on the state of an Proposition of the state to the state of the second state and the second set for a local well successfully all proves and PART X.-SOCIAL CONDITION. and the second STA STANDAR er and Star part of 666. It was provided by the Constitution Act that, for the advance- Abolition of ment of the Christian religion in Victoria, the sum of £50,000 should to religion be set apart each year from the general revenue to promote the erection of buildings for public worship and the maintenance of ministers of religion, which sum should be apportioned to each denomination according to the number of its members at the preceding census. This provision was, however, repealed by an Act (34 Vict. No. 391) which came into operation on the 31st December, 1875. Since that date no further State assistance to religion has been given.

667. The following table contains a statement of the number of Clergy and services. clergy in 1890, and the approximate number of religious services performed in connexion with each denomination during the last two additional multi-and dour pathiadar partetill and apres vears : aditation and Chergy and Services Performed.**** by addited

* The information in this and the next two tables was obtained from the heads or clergy of the different denominations. In the cases where blanks occur in the column for increase or decrease, no returns have been received for 1890, and the figures for the previous year have been repeated.

2B 2

ncrease or decrease in services of different sects.

668. In 1890, as compared with 1889, increases in the number of services performed will be observed in the case of the Church of England, the Bible Christians, the Baptists, the Lutherans, the Church of Christ, the Protestants unattached, the Roman Catholics, the New Church, the Seventh Day Adventists, the Salvation Army, the Spiritualists, and the Jews; and decreases in the case of the Presbyterians, the Methodists, the Welsh Calvinists, the Moravians, and the Catholic Apostolic Church.

hurches, attendance, etc.

669. The next table shows for the same two years the number of churches or other buildings used for public worship, the number of persons they can accommodate, and the number of persons usually attending at the principal Sunday services :--

670. It will be seen that the Bible Christians, the Baptists, the increase or decrease of churches of Lutherans, the Church of Christ, the Roman Catholics, the Seventh Day different sects.

* See footnote (*) on previous page.

† Figures revised since last publication.

Adventists, and the Salvation Army returned more, and the Church of England, the Methodists, the Protestants unattached, the Catholic Apostolic Church, and the Jews returned fewer, church edifices in 1890 than in 1889; that the only denominations which returned less accommodation were the Methodists, the Welsh Calvinists, the Moravians, and the Catholic Apostolic Church, and the only denominations which returned a smaller attendance at their principal service were the Church of England, the Protestants unattached, the New Church, the Catholic Apostolic Church, the Seventh Day Adventists, the Salvation Army, and the Jews. The fact of some sects returning fewer buildings and less accommodation in the latter year than in the former may perhaps be accounted for by the circumstance that halls, schoolhouses, and even private dwellings in which services are held, are sometimes returned as church buildings, but disappear from the totals on such services being discontinued.

671. In the householder's schedule of the census taken on the sunday 5th April, 1891, provision was made for ascertaining the number of teachers and children attending Sunday schools, and the number of Sunday school scholars. teachers. From the results of this enquiry the following table has been compiled :- /

SUNDAY SCHOOL TEACHERS AND SCHOLARS, 1891.

eligious sects of ceachers and scholars.

ges of Junday

chool

cholars.

672. It should be pointed out that both teachers and scholars have necessarily been tabulated according to the religious denominations placed against their names in the census schedule, but it does not follow that the Sunday school with which they were connected was of that denomination. It will be remarked that 1 of the Sunday school scholars was returned as a Mohammedan, also that 55 of the teachers and 444 of the scholars were returned as of "No Denomination," 4 of the teachers and 55 of the scholars as of "No Religion," and 63 teachers and 510 scholars objected to state their religious belief. 673. The following table shows the ages of the Sunday school scholars as returned at the census :—

* Schools held on Saturday.

† Including 5 Chinese and 7 Aborigines.

Including 134 Chinese and 70 Aborigines.

674. Including those whose ages were not specified in the census sunday schedules, 33,325 of the male, and 33,415 of the female Sunday school scholars were at the school age (6 to 12 both inclusive). These numbers, compared with the numbers at that age in the populationviz., 87,466 boys and 85,633 girls-show that 38 per cent. of the boys, and 39 per cent. of the girls, at the school age attended Sunday

675. In almost all cases, the Sunday school teachers and scholars Difference returned at the census were considerably fewer than those returned by the heads of the respective denominations in the previous year, tional

scholars at school age.

between census and denomina-

returns. the total difference being 3,295 in the case of the former, and 28,297 in that of the latter. This must have arisen either from those connected with Sunday schools having omitted to enter that fact in the census schedule, or else from the different denominations having generally over-estimated the numbers. As regards the teachers, the census figures were less than those supplied by the denominations in the case of all the important sects except the Baptists; and as regards THEFT HE FEEL STUDY

16. 他们的原始的第三人称单数形式。

* Including 134 Chinese and 70 Aborigines.

the scholars, in the case of all except the Church of England. The excess of the denominational over the census return was much the greatest in the case of the Roman Catholics, the former being greater than the latter by 594, or 70 per cent., in the teachers, and by 11,927, or 117 per cent., in the scholars. In the following table, the numbers according to the census and the return furnished by the denominations in 1890 have been placed side by side for the purpose of comparison :—

ARELLAR L Contraction of the second s 677. The Melbourne University was established under a special Melbourne University. Act of the Victorian Legislature (16 Vict. No. 34), which was assented to on the 22nd January, 1853. This Act, as amended by 44 Vict. No. 691 (the two consolidated under 54 Vict. No. 1151), provides for the endowment of the University by the payment of £9,000+ annually out of the general revenue; also, that no religious test be administered to any one to entitle him to be admitted to the rights and privileges of the institution; also for the constitution of a senate, to consist of all male persons who had been admitted to the degree of master or doctor, and for the election by them annually, or after the occurrence of a vacancy, of one of their body as warden; also for the election by the senate of a council consisting of twenty members (all males), each elected for five years, of whom not more than three may be members of the teaching staff, and for the election by them out of their own body of a chancellor and a vice-chancellor. The council are empowered by these Statutes to grant, in any faculty except divinity, any degree, diploma, certificate, or licence which can now be conferred in any University in the British dominions.

678. Royal letters patent, under the sign manual of Her Majesty University Queen Victoria, were issued on the 14th March, 1859, declaring that the degrees of Bachelor and Master of Arts, and Bachelor and Doctor of Medicine, Laws, and Music, which had been granted or might thereafter be granted by the Melbourne University, should be recognised as academic distinctions and rewards of merit, and should be entitled to rank, precedence, and consideration in the United Kingdom, and in British colonies and possessions throught the world, just as fully as if they had been granted by any University in the United Kingdom.

* Schools held on Saturday.

† Besides this amount, an additional annual subsidy of £2,000 was voted by Parliament for the years 1883 and 1884; £5,500 for the years from 1885 to 1887; and £7,500 for the years 1888 to 1890. The total subsidy at the present time is thus £16,500 per annum Moreover, since 1884, various sums, amounting in the aggregate to £42,500, have been granted for buildings and apparatus.

Admission of Victorian medical graduates to practise in the United Kingdom. 394

679. Although, in accordance with this patent, the degrees of the Melbourne University have long been nominally recognized in the United Kingdom, it was not until May, 1890, that medical and surgical graduates of that University were permitted to practise there. At that date, however, owing to representations made by the Melbourne University authorities, the matter was satisfactorily decided by the Privy Council, the result being that, in future, the name of any person holding a degree in medicine and a degree in surgery of the University of Melbourne will be placed on the British Register on personal application to the registrar, and payment of the prescribed fee of £5; and, after registration, he will enjoy all the privileges possessed by persons registered in respect of degrees granted in the United Kingdom.* The following is a copy of the resolution adopted by the Privy Council:---

"That the evidence afforded in the preceding statement, and in the Melbourne University Calendar, is such as to satisfy the committee that the said degrees in medicine and surgery are a sufficient guarantee of the possession of the requisite knowledge and skill for the efficient practice of medicine, surgery, and midwifery, and the committee recommend to the Council that the holders of these conjoint degrees of the Melbourne University be registrable in the separate list of practitioners in the Colonial Register."

Date of founding University. on the 3rd July, 1854, by His Excellency Sir Charles Hotham, K.C.B., the then Governor of Victoria, and the building was opened on the 3rd October of the following year.

University thrown open to females. 681. On the 22nd March, 1880, the University was thrown open to females. For some years afterwards they were not allowed to study medicine, but this prohibition has been removed, and they are now admitted to all the same corporate privileges as male students.

University fees. 682. The following is a statement of the fees payable at the Melbourne University:--

683. The memorial stone of the University Hall, called the Wilson Hall. "Wilson Hall," was laid on the 2nd October, 1879, in the presence of His Excellency the Marquis of Normanby and a large concourse of spectators, by Sir Samuel Wilson, Knt., then a member of the Legislative Council, now a member of the British House of Commons, who, by his munificent gift of £30,000 (which by interest had increased to £37,000 before the University authorities were in a position to expend it), was the means of the Hall being erected. The building, which, except the organ loft, is now completed, is of the perpendicular Gothic style of architecture; in length, 140 feet; breadth, 47 feet; height of walls, 45 feet; and of apex of roof, 84 feet. Its cost has exceeded £40,000.

684. Provision had been made in the Act of Incorporation for the Affiliated colleges in connexion with the four principal religious denominations, and ground for the erection of such colleges was reserved near the University. Up to the present period this privilege has been taken advantage of by the Anglicans, Presbyterians, and Wesleyans; their colleges being named respectively Trinity,

Ormond, and Queen's. The Roman Catholics have not yet commenced to erect a college on the site reserved for their body.

685. The following information respecting Trinity College has been Trinity College. supplied for this work :---

Trinity College stands in a section of the University reserve facing the Sydney road. It was for several years the only University College in Victoria. From the time of its affiliation to the University, in 1876, the progress of the college was rapid and uninterrupted. Before the end of 1877 a considerable increase in the accommodation for students was required, and a large pile of buildings was conseguently erected. In a short time the additional rooms thus provided were all occupied, and the building of annother wing was rendered necessary. Through the munificence of Sir W. J. Clarke, Mr. Joseph Clarke, and other friends of the college, the council was in the year 1882 placed in a position to erect the new structure. These additional rooms were speedily occupied, and the buildings were further extended in 1887. The existing buildings, in addition to apartments for the warden, tutors, and students, contain a chapel, dining hall, lecture rooms, billiard room, chemical and biological laboratories, libraries, etc. The college, while maintaining its primary character as a place of residence and education, both religious and secular, for University students belonging to the various professional schools, has also, since the year 1878, contained the Theological Training-school for the Diocese of Melbourne.

Lectures on a large number of subjects of the Arts, Law, Science, Engineering, and Medical courses are regularly delivered at the college during term. Most of these lectures are given in the evening or early morning, in order to meet the requirements of bank clerks, teachers, and others who may be prevented, by the nature of their employment, from attending lectures at the University. The college lectures are intended to be ancillary to those delivered in the University, and are given with a view to preparing students for both the Ordinary and Honour University Examinations. The college provides students, at moderate rates, with extra private tuition in any subject in which they may require special assistance. All the lectures are open to women students (whether men or women), and a large number have already availed themselves of the privilege

The college offers exceptional facilities for the study of the subjects of the University Medical course and the course for the degree of Bachelor of Science in its Chemical and Biological Laboratories.

Special attention is devoted by the Science Lecturers to the preparation of First Year Medical Students in the subjects of Natural Philosophy, Biology, and Chemistry.

Practical demonstrations are regularly given in Biology, Botany, Physiological, Chemistry, Histology, and Materia Medica, and form an important feature of the college teaching. The use of microscopes and other apparatus is allowed to the students without extra charge.

Abundant means for recreation have been provided, including two asphalted tennis courts, a billiard room, and a reading room supplied with newspapers and periodicals. A special feature of the college is its libraries, containing about six thousand volumes, which comprise many rare and valuable works. The buildings of the college represent an outlay of about £30,000, the whole of which has been derived from the liberality of Victorian churchmen. Several hundred names have already been entered on the college books. Each student is provided with a separate bedroom. The sitting-rooms are for the most part jointly occupied by two students, but a separate sitting-room can be arranged for if desired.

A hall or hostel, forming an integral part of Trinity College, for the residence of women students, was established by the present warden, Dr. Leeper, in the year 1886, and the work of the institution was carried on in a hired house until 1889, when a permanent building was erected in the college grounds, mainly through the liberality of Lady Clarke. The women students are admitted to all the educational advantages of the college equally with the men students.

Ormond College. 686. Ormond College was erected at a total cost to the present date (including furniture, fencing, etc.) of £47,850, of which amount £41,780 was contributed during his lifetime by its generous founder, the late Hon. Francis Ormond, M.L.C., after whom the college has been named. Mr. Ormond died on the 2nd June, 1889, and bequeathed to the college a sum which will ultimately amount to upwards of £67,000, part of which will be used to complete and extend the present building, and the remainder will be reserved as a permanent endowment for the institution. It is estimated that when completed in its quadrangular form the total cost of the building, including the dining hall, will be at least £75,000. A portion of the north-east side was completed in 1888. This is to be called the Victoria wing, in commemoration of the jubilee of Her Most Gracious Majesty. The sum of £15,000 has already been obtained from the public towards the maintenance of the institution and the foundation of scholarships. Although allied to the Presbyterian body, it is open to members of all religious denominations. The following account of this institution has been supplied by the Master of the college :--

The foundation stone of the college, which is built on a section of the University reserve, was laid by the Marquis of Normanby on the 14th November, 1879; and the college was opened by His Excellency on the 18th March, 1881, and affiliated to the University on the 17th May of the same year. In 1884, owing to the number of applicants for admission, it was found necessary to enlarge the buildings. A new wing, containing students' bedrooms, sitting-rooms, bathrooms, students' common norm, etc., was erected and formally opened by Mrs. Ormond on the 23rd December, 1885. At the opening of the session, 1886, this additional accommodation was all taken up, and when a fourth side was added to the quadrangle and opened at the beginning of the University session, 1889, it was immediately filled with students, and the number of applicants for admission is now greater than the present building the number of applicants for admission is now greater than the present building

Tutorial assistance is provided by the college for students in preparing for the University lectures and examinations in Arts, Law, Medicine, and Engineering, and Mecollege lectures are open to both resident and non-resident students.

Many of the college lectures take place in the early morning and in the evening, that those who are engaged at other employments throughout the day have an opportunity of preparing themselves for the University dexaminations, and of ultimately taking a degree, as the University does not make attendance at its own but the classes in Arts and Medicine are open to ladies.

^{xis} A chemical laboratory has been fitted up by the Council with all the necessary appliances; and the college has also a supply of microscopes for the use of students in We Biology Class. ^{97EI} A reading room, billiard room, swimning bath, and lawn tennis court have been wovided by the college, and handed over to the management of the students, who have lately built a college gymnasium, and laid down a second asphalt tennis court. A flourishing debating society meets in the college once a fortnight, and is open to all members of the University.

³⁸⁸ During the session 1891, there were in all upwards of 90 students attending the scale of the state of t

Une An examination for entrance scholarships and exhibitions, each of which is of the "While of either £10, £25, £50, or £60, is held at the beginning of December in each year, and is open to all, irrespective of age, sex, or creed. The total cost for tuition and residence varies from 84 to 69 guineas per annum; these sums cover all the necessary college charges during the University year. Special arrangements are imade either in the case of clergymen's sons or in the case of students studying for the ministry of the Presbyterian Church-these pay about half fees for residence. Breakfast, luncheon, and dinner are provided in hall by the college, so that a student affed have no extra expenses except his laundry bill. The lectures in connexion with the Theological Hall of the Presbyterian Church are delivered in Ormond College by two Professors and two Lecturers appointed by the General Assembly. The Ostudents attending these classes are candidates for the ministry of the Presbyterian bChurch, and they are required to take a three years' course in the Hall after graduating in Arts either in Melbourne or in some other recognised University.* 19:17 687. The following account of Queen's College + has been supplied Queen's College. by the Master :--and all and thing the state being the

* For further particulars respecting Ormond College, see Melbourne University Calendar. Situat For information relating to the building of the college, and for the House Regulations, see last edition of this work, Vol. II., paragraph 612. Queen's College is built in the section of the University reserve granted by the Government to the Wesleyan Church in the Act of Incorporation of 1853. It was formally opened on the 14th March, 1888, and is available for students of either sex, without regard to their religious belief.

All the rooms have been furnished by the Council, and each student is provided with a separate bedroom and sitting-room.

Two lawn tennis courts and a reading room have also been provided, and handed over to the management of the students.

Lectures are delivered in the college on the chief subjects of the University examinations. The lectures are given in the evening, so as not to interfere with the attendance of students at the University classes, and are open to non-resident as well as resident students. For the present the lectures in Chemistry, Biology, and Histology will be given in the laboratory of Trinity.

A first-rate microscope has been expressly constructed for the College, under the personal direction of the Rev. Dr. Dallinger, F.R.S., late President of the Microscopical Society of Great Britain.

The college library is furnished with all necessary books of reference for the use of students, and all the leading scientific periodicals.

An examination will be held at Queen's College, in the early part of December, 1891, at which six scholarships will be offered for competition. Each of these is of the value of not less than £50 per annum, tenable for one year only; but scholars will, on the expiry of their tenure, be again eligible as candidates. Scholars are required to reside in the College. Three minor scholarships and a number of exhibitions will also be awarded.

Exhibitioners may be resident or non-resident in the College. and taking accept

There are no restrictions as to age, sex, or religion for either scholarships or exhibitions. The scholarships and exhibitions will be awarded on condition that the holders thereof obtain first or second class honours at the close of the year.

Graduates in Arts who intend to read for any University scholarship examination, or to study for degrees in medicine, law, or engineering, may be elected scholars or exhibitioners of this college without examination, provided they have taken first or second class honours or a scholarship at any final honour examination.

Examination entry forms should be filled up and sent in not later than 1st December of each year. Candidates are required to state the subjects in which they wish to be examined, and generally the extent of their reading. They must forward at the same time testimonials of good character. An entrance fee of ten shillings will be charged to each candidate for the examination. This must be forwarded with the entry form.

A students' society has been founded, under the name of 'The William Quick Club,' for the purpose of reading essays, holding debates, and in general encouraging social intercourse amongst the students. The ordinary meetings are held on alternate Wednesday evenings at eight o'clock. Membership is open to all members of the University or affiliated colleges. A sports committee has also been appointed for the arrangement of cricket, tennis, football, and rowing contests. tomating 19. Fellowships may be granted (1) to students optaining first-class honours in the final examination for their degree; (2) to any other persons distinguished for special original work in any department of science or literature. The following are the present Fellows of the College :- The Master (Rev. E. H. Sugden, B.A., B.Sc.); A. H. S. Lucas, M.A., B.Sc.; A. Dendy, M.Sc.; E. F. J. Love, M.A.; J. R. Harcourt, B.A.; the Rev. L. Fison, M.A.; A. S. Way, M.A.; A. W. Howitt, F.L.S.; R. T. A. Bernard, M.A. The number of Fellows is limited to 12. Rooms and commons may be granted to any Fellow who is engaged in original research approved by the Fellows' Meeting hat to be security and a contract of the second

Chair of Music. 688. A Chair of Music has been established in connexion with the University, for the endowment of which the late Hon. Francis Ormond contributed the sum of £20,000. Besides this about £5,000 has been

raised by public subscription and concerts for the endowment of musical scholarships in connexion with the Ormond Professorship of The following information respecting the recent appointment Music. of a professor has been supplied by the Chancellor of the University, Dr. A. C. Brownless, C.M.G.:-加拉

On the 1st of September, 1890, the Council of the University elected Mr. G. W. L. Marshall Hall as Ormond Professor of Music in the University, and he commenced his duties early in January, 1891, by preparing draft statutes and regulations for the degrees of bachelor and doctor of music; for the diploma of musical associate; for musical exhibitions open both to candidates for the degree of bachelor of music and to candidates for the diploma of musical associate; and for a travelling scholarship, open only to candidates for the degree of bachelor of music at the end of their third year. These statutes and regulations were, with some alterations, passed by the Council and Senate, and were allowed by His Excellency the Governor, thus enabling the Professor to commence his lectures early in the first term ³¹ of the present academic year.

1. Candidates for the degree of bachelor of music, and also those for the diploma Tof musical associate, must first pass an easy elementary examination, conducted by ¹⁰ the Professor, to show their preparedness to benefit by professorial teaching.

2. Those proceeding to degrees must have also matriculated before commencing enthercourse of lectures. A sublicate scheme a Common and the

 $10 \rightarrow 3.0$ Those desirous of obtaining the diploma of musical associate need not be matriculated students, but must undergo the same course of study as those proceeding to degrees, whilst they will be permitted to compete with candidates for degrees for the mexhibitions to be awarded at the end of the first and second years of the course. 9d) 4. The scholarship of £150 at the end of the third year can only be competed for

by candidates for the degree of bachelor of music. Besides delivering the courses of lectures for the first, second, and third years, the Professor of Music will conduct the following classes :----

Leken tirst or

Choral Class. Orchestral Class. Orchestral Class. Chamber Mu-ic Class.

^{tel} "All the lectures and classes will be open to persons not candidates for degrees or ^{yea}diplomas upon payment of the prescribed fees. 324111689. The matriculation examination of the Melbourne University Matriculais at present held twice a year, viz., at the end of the first term, and nation. hat the end of the fourth term. The subjects of examination are Bifourteen in number, viz., Greek, Latin, English, French, German, elalgebra, geometry, * history, arithmetic, geography, chemistry, physics, of arithmetic and geography, honour as well as pass papers are set, his but the candidate must decide before entering for the examination "which he intends to present himself? for The last four are called ascience subjects, any two, but not more, of which may be selected. To pass the matriculation course it is necessary, at one and the same backamination, either to pass in six subjects, or obtaining honours in one subject to pass in four others, or obtaining Monours in two subjects to pass in two others. buoist Trigonometry as well as geometry is set in the homour papers, but geometry only in the pass mutributed the sum of £20,000. Besides this about £5.000 Justegen

tion exami-

Matriculation class lists. 690. In addition to the lists published after every matriculation examination, containing a record of honours, pass, or failure in each subject presented by the various candidates, six class lists are published of those who have passed creditably the honour papers set in—(a) Classics (Greek and Latin); (b) Mathematics (algebra, geometry, and trigonometry); (c) English and history; (d) Modern languages (French and German); (e) Physics and chemistry; (f) Physiology and botany. In these lists the names of candidates are arranged in three classes—those in the first and second classes being placed in order of merit, those in the third in alphabetical order.

Exhibitions at matriculation.

691. At the matriculation examination in the fourth term in each year, six exhibitions, two of the value of £25 each; one in classics, and one in mathematics, and four of the value of £20 each; one in English and history, one in French and German, one in physics and chemistry, and one in physiology and botany, are open for competition, and may be awarded to the candidates under twenty-one years of age who severally stand highest in the first class of the six class lists of that examination.

Candidates at matriculation examination.

692. During the year 1890 the total number of candidates who presented themselves for the matriculation examination was 1,415. Of these 144 entered for fewer subjects than the number required for passing the examination, leaving 1,271 who attempted to pass. Of this number 631, or 50 per cent., were successful.

Matriculated students.

693 A large majority of those who pass the matriculation examination have no intention of pursuing a University career any further and therefore do not matriculate, to do which it is necessary to pay a fee of one guinea and to go through a formal ceremony, which involves making a declaration and signing the matriculation book—the matriculation examination being, as a matter of course, passed beforehand. Although 631 persons passed the matriculation examination in 1890, only 1954 matriculated, as against 192 in the

to the end of 1890, the total number who matriculated was 3,062"

Attendance 694. In 1890, 570 students, of whom all but seven had matricuat lectures. Lated, attended lectures, as against 537² in 1889, and only 301 ten Stream previously. Of the number in 0890, 246 attended lectures in Arts, 85 in Laws, 15 in Engineering, 217 in Medicine, and 7 in ScScience. 42 Degrees. 695. The number of degrees taken in 1890 was 109, of which 99 to reduce late of the state of the s

697. The Education Act 1872 (36 Vict. No. 447), providing free instruction of a secular character to all willing to accept it, but prescribing that, whether willing to accept State education or not, all children must be educated up to a certain standard, came into operation on the 1st January, 1873. The following is a statement, based upon returns supplied by the Education Department, of the number of schools aided or supported by the State, and of the instructors and

* In accordance with the principle followed in the Education Department, each night school as well as each day school (although both kinds of schools may be carried on in the same building) is considered as a separate school, and is included as such in this column. There was only 1 night school in 1872, there were 29 in 1873, 56 in 1874, 117 in 1875, 181 in 1876, 216 in 1877, 208 fin 1878, 180 in 1879, 186 in 1880, 41 in 1881, 35 in 1882, 27 in 1883, 30 in 1884, 23 in 1885, 24 in 1886, RETRE-19 in 1887, 17 in 1888 and 1889, and 18 in 18909917 at norrountant oilds I schools. † Including workmistresses, who numbered 485 in 1890.

I The figures in this column are derived from estimates formed by the Education Department, the reductions made for multiple enrolments in the last two years being as follow :- In 1884, 1858 for day schools, and 49.78 for night schools; in 1890, 18.01 per cent. for day schools, and 36.84 for night schools.

The average attendance was affected in 1875, and to a certain extent, also in 1876, by the preneverage of a period 22 per cent., and the total popularisation and an antiparticle of a sonalar loss With the commencement of 1878 capitation grants were abolished; the consequence being that 30 schools, which in 1877 had been receiving such grants, ceased to be connected with the States

2C 2

2,909, and the number of instructors by 122; but the number of scholars on the rolls decreased by 332. 699. The net increase of schools during the year, amounting to 108, Net increase of schools during the year, amounting to 108, Net increase of schools. as just stated, is made up of 124 new schools opened, less 16 schools closed. 700. By comparing the figures on the lowest and uppermost lines Increase in State in the table following paragraph 697 ante, it will be ascertained that, during the period the present *Education Act* has been in force, * the following increases have taken place in and in connection with, the schools supported by the State :=

Order of colonies in respect to State school scholars. 704. It will be observed that, in proportion to population, the average attendance at State schools is largest in New Zealand, where, however, the proportion is swelled by Maori children being included amongst the scholars, whereas they are not included in the population. Victoria, however, stands above any of the other colonies. The following is the order of the colonies in this respect, Tasmania being at the bottom of the list, which, however, may be explained by the circumstance that in Tasmania the proportion of children to the

population is smaller than in the other colonies :----

ORDER OF THE COLONIES IN REFERENCE TO PROPORTION OF STATE SCHOOL SCHOLARS TO POPULATION.

- 1. New Zealand.42. Victoria.53. { New South Wales.63. { Queensland.6
 - South Australia.
 Western Australia.
 Tasmania.

* For a full account of the education systems of the various colonies, see Victorian Year-Book, 1888-9, Volume II., Appendix B.

- + It is believed that workmistresses are included in the returns of all the colonies.
- ‡ Including 19 assisted schools.

§ This high proportion is partly accounted for by the circumstance that Maoris are included amongst the scholars, but excluded from the population.

705. By the figures in the last column of the following table it is school shown that, in proportion to the total number of children enrolled in in Austral-State schools, the average number attending is greater in Victoria than in New South Wales or Tasmania, but lower than in any of the other Australasian colonies :---

709. The 13th section of the Education Act 1890 prescribes that State school attendance. the parents of children between the ages of 6 and 13 shall cause such children to attend school for at least 40 days in each quarter of a year, + unless there is some valid reason to prevent them from so doing. The returns, which are made up quarterly, show that, of the whole number set down as attending State schools in 1890, the highest second deal or many back the State to the har ching

> * See footnote (‡) to table following paragraph 697 ante. † The Education Act 1889 (53 Vict. No. 1023), which was passed on the 4th November and gazetted on the 8th November of that year, altered the school age to that between 6 and 13 years, also increased the period of compulsory school attendance from 60 to 80 days each half-year. The provisions of this Act have been re-enacted by the *Education Act* 1890.

proportion which completed a 40 days' attendance (71 per cent.) was in the September quarter: the next highest (58 per cent.) was in the December quarter; the next (55 per cent.) was in the June quarter; and the lowest proportion (only 35 per cent.) was in the March quarter, the mean 40 days' attendance for the whole year being 55 per cent., as compared with $72\frac{1}{3}$ per cent. in the previous year, when, however, the school age was 6 to 15, and the period of compulsory attendance per quarter was only 30 days.* The following are the figures for the four quarters of 1890; also the average for the Distinct Children Attending. year :---

htod to some attender a set of the the the properties of the average attendance of both Reasons for 710. It should be mentioned that a considerable proportion of Reasons for non-attend the following table in the following table in ance. or excusable for various reasons. During the last quarter of the year, for example, 80,194 of the enrolled children attended less than 40 days; but to 16,826 of these the compulsory provisions of the Statute did not apply, as they were either above or below the school age; 6,284 were also exempt on account of living beyond the prescribed . distance (from two to three miles) from a State school, and 5,030 on account of having been educated up to the standard; whilst 10,427 were excusable on account of sickness, and 16,068 entered late in the quarter or left before its termination; thus the number of actual defaulters was reduced to 9,774, or to 5.1 per cent. of the number enrolled. Taking the year as a whole, the defaulters who had no a for territiene does at evil, the least builds builds builds or reabled reasonable excuse averaged only 6.79 per cent. out 711. In 1890, the children who passed the examination qualifying Pupils who have passed for a certificate of exemption from further attendance at school the stannumbered 11,431, or more by 3,432 than in 1889. During the dard. eighteen years which have elapsed since the passing of the present the site of the reader and 1.67 点 (46) code sats burgers include to the reason of the east of historics is increased the period of cou**301 sgar ab (+) 316616631 558 re**m (0) to 50 days each in it cean. The proves of this Acc nave been re-counted by the Educentics stat 15%.

non-attend-

Education Act, 120,657 children passed this examination; some of these, however, were above the school age. In first set set and a show entry

Prosecution for nonattendance at school.

712. In order to carry out the compulsory portion of the system, 9,150 prosecutions against parents were instituted in 1890, with the result that 7,686 convictions were obtained, whilst in 1,248 other instances the case was withdrawn or not proceeded with, and in 216 instances the case was dismissed. The total amount of fines inflicted was £2,087, also costs amounting to £62. More than three-fourths of the prosecutions were instituted by the Boards of Advice.

Free subjects.

713. In 1890, military drill was taught in 250 schools to an average attendance of 16,053 pupils, and in 13 of these schools instruction in gymnastics was also given to 752 pupils; singing was taught in 346 schools, in 103 of which instruction was given by members of the ordinary staff to 39,913 pupils; and drawing was taught, in 295 schools, to 24,999 pupils. All these are free subjects.

Kinder-

714. It is reported that there has been a growing demand for garten instruction, introduced in the early part of 1887, which, it is believed, tends to foster intelligence, to promote manual dexterity, and to stimulate the constructive powers of the mind. The plan adopted has been to give lectures in certain commercial centres, where teachers of neighbouring schools could attend; and the result is that upwards of 120 teachers have been more or less trained in the system, many of whom are now teaching it in their several schools. * and a stude

Instruction in cookery

715. The Education Department reports that, though technical instruction is not formally allied in any way to the State School programme, it has yet been judged advisable to continue the instruction on cookery; and that in 1891, two or three courses were given, in 12 schools, to 500 or 600 girls, in addition to female students of the Training College. + 194 2 such the any float souther high all the

Extra subjects.

716. The number of schools in which extra subjects were taught in 1890 was 109, as against 101 in 1889, and 104 in 1888; the amount paid by pupils for instruction in such subjects was £2,361 in 1890, as against £2,042 in 1889. As compared with the previous year, there was a marked increase in the pupils seeking instruction in all the subjects except English, book-keeping, physics, and physical geography; whilst 178 pupils were specially instructed, apparently for the first time, in science. There is no doubt the number taught extra subjects would be larger but for the circumstance that several subjects which were

* See Education Report, 1899-91, Parliamentary Paper No. 73, Session 1891, page xxi. *† Ibid*, page xxii.

formerly taught as extra subjects are now embraced in the ordinary course under the revised programme, whilst pupils who have gained exhibitions or scholarships now generally pursue their studies at secondary schools.* The following is a list of the subjects, and the number of pupils instructed in each subject in 1889 and 1890:—

717. To enable them to continue their education at the best State grammar schools, two hundred scholarships have been annually scholarships. awarded since 1886, to the most clever and industrious pupils of State schools, selected in accordance with the results of competitive examinations, the conditions being that all must be under 15 years of age and in the sixth class. Each scholarship is of the value of £10, tenable for three years, on condition that the scholar attends at, and obtains favourable reports annually from the authorities of, one of the public grammar schools, one of the Schools of Mines, one of the Agricultural Colleges, or some other school approved by the Minister. If the scholar does not live within three miles from the approved place of education, the Minister may allow him such sum as will cover his cost of transit to and fro, or may commute the scholarship for one of £40 tenable for one year. The holders of commuted scholarships, at the end of a year, may compete among themselves for renewed scholarships offered to 30 of the best students. In the following year these 30 students may present themselves for a further renewal offered to the best 15. The subjects for competitive examination are solely those taught in State schools, except in the case of competitions for a renewal of commuted scholarships, when the

* See Education Report, 1890-91, page xviii.

examination is partly upon the State school subjects, but chiefly upon the new subjects they have been learning at the grammar schools. Up to the end of 1890 one thousand of these scholarships had been awarded. It has, however, been decided in future to reduce the number of scholarships to 100, as the number of candidates competing has been found insufficient to warrant the larger number.

Candidates 718. The number of candidates who presented themselves at the for scholarships. 718. The number of candidates who presented themselves at the initial examinations for these scholarships in 1890 was 516, as compared with 466 in 1889, 694 in 1888, 527 in 1887, and 313 in 1886.

719. Twelve exhibitions, each of the yearly value of £40, are State school exhibitions annually awarded for competition to the holders of State school scholarships who have passed the matriculation examination. These exhibitions, which are for the purpose of enabling the abler scholars to finish their education at the University, are each tenable for four years, but in the case of candidates for a degree of law or medicine they may be continued for another year. The subjects upon which the candidates are examined are those taught in grammar schools, namely, English, history, algebra, geometry, and two languages as prescribed for the matriculation examination. In October, 1891, there were 60 exhibitioners, viz., 44 attending at the University, 7 at various approved grammar schools, and 9 had their exhibitions suspended for a year. จแล้งอุณโล Boards of Monte

School books and requisites.

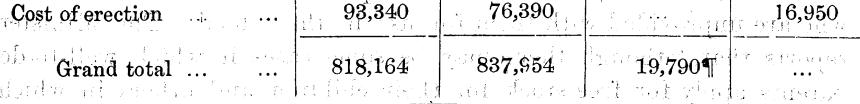

720. The regulations and practice of the Education Department relative to the supply of school books, apparatus, and other requisites are as follow :-- Such books and apparatus as may be regarded as indispensable to the efficient working of the school are supplied by the department for the teacher's use free of charge. It is expected. that the children will generally supply themselves with books, slates, and other articles required to enable them to take part in the work of their class, but free grants of school requisites are made for children who are unprovided with them for use in the school. The Minister reports that, "though there may be some cases in which well-to-do parents apply for free stock for their children, and others in which the teacher gives it without due discrimination, children generally purchase their own requisites; and when it is considered that the total cost of free stock amounted in 1890 to no more than £3,522 12s. 11d., or, on the average, about £1 12s. 8d. for each school, it will be acknowledged that this expense is reduced almost to a minimum."*

See Education Report, 1890-91, page xv.

721. The following is a statement of the expenditure from all Expenditure sources on State education during the financial years 1889-90 and education. 1890-91: The amounts set down for extra subjects were paid by parents, all the remainder by the State :--

paid for extra subjects.

723. In view of the large sum the State expends upon elementary Amount education, the amount parents are willing to pay to have extra subjects taught their children appears extremely small. If the whole sum so expended in 1890-91 be divided by the number of children in average attendance, the proportion per child would be about $4\frac{1}{4}d$. per annum; and if it be divided by the number of distinct children enrolled, the proportion per child would be only $2\frac{3}{4}d$. 41181 STATE STRUCT Sec. Fed. L - せつこ ふーレー 724. A Bill to vest certain Crown Lands for educational purposes-Education ndow-ent Bill. and to provide for the control and management thereof, was intro-duced into the Legislative Assembly on the 16th July, 1891, and in alonos 190 0000 in 1800 shot only something 16th July, 1891, and read a first time. The lands proposed to be so set apart embrace an strong area of 1,754,235 acres, the repts and profits arising wherefrom were to, be paid to a special account to be called "The Education Endowment Endowment Bill.

"Total cost, exclusive of expenditure (either for erection, maintenance, or repairs) on buildings and reat. Training college for teachers.

732. The new Training College, which will eventually form a handsome block of buildings, has during the last few years been in course of erection on the south-east corner of the University Reserve. The central portion of the college was occupied in December, 1889; the western wing, for 26 female students, on the 11th June, 1891; and the eastern wing, for 25 male students, on 18th January, 1892. The cost, inclusive of fittings and furniture, of the central portion was £13,349, of the western wing £11,722, and of the eastern wing £9,267. It is considered that the advantage of thus having all the students housed close to their work under conditions of collegiate life are sufficiently evident, and must be productive of good results. The college contains a good library and an educational museum, available for State school teachers. The string said measures have dealers

Private

733. The following table gives the number of private schools, and schools, 1873 to 1891. of the teachers and scholars connected therewith, according to the returns of the nineteen years, 1873 to 1891 :--

.11 .107

734. The figures in the first line of the table relate to the early Private part of the year in which The Education Act came into operation. 1891 com-Since then there appears to have been a falling-off of 99 in the pared. number of private schools, but an increase of 196 in the number of instructors, and of 15,400 in the number of scholars.

735. For the last fifteen years a column has been placed in the Denominaschedule used for collecting the returns of private schools for the private purpose of ascertaining to what religious denomination, if any, each school was attached. This column was, on each occasion, filled, in a considerable number of instances, with the name of some denomination; but it is believed that this entry was frequently meant to indicate merely the religion of the principal teacher or proprietor of the school, and perhaps the principles on which the establishment was conducted, not that it was recognised as connected with his church, or was subordinate to the clergy thereof. The exceptions to this are believed to be most of the schools returned as Roman Catholic, Lutheran, and Jewish, and a few as of the Church of England, but scarcely any connected with other denominations. The following are the returns of the fifteen years :---

1.1.

418

۱.

736. By the figures relating to 1891 it may be ascertained that, in Proportion that year, 247 private schools or 31 per cent., employing 852 instructors or 42 per cent., and educating 24,437 children or 61 per cent., of the total numbers, claimed to be connected with some religious denomination; also that 21,623 children, or about 54 per cent. of the total number attending private schools, or 88 per cent. of the number attending schools connected with some religious sect, were being educated in schools claiming connexion with the Roman Catholic church.

737. The male teachers in private schools returned in 1891 were Teachers in private more numerous by 21, and the female teachers by 49, than those in schools. 1890, the result being a total increase of 70. The number and sexes of the teachers returned in the year under review and the previous one are compared in the following table :--

122 NE G

上心

TEACHERS IN PRIVATE SCHOOLS, 1890 AND 1891.

1,049	Year.	Males.	Females.	Total.
- 	1890 II. 612 II. 1891 II. 612 II. 614 1891 II. 614 II. 614	458 479	1,509 1,558	1,967 2,037
761 761 749	Increase	21 85 8 21 85 8 2 65		70

738. In private schools connected with religious bodies the num- scholars to ber of scholars entrusted to each teacher is generally larger than in each teacher in denomipurely secular institutions. The following, are the proportions as and other schools. derived from the returns of 1891 :---二般のた ŢĤĮ Gel.

In schools attached to religious bodies there was 1 teacher to 29 scholars. .27 _ 20110 not attached 13812 221 20 09 328 18, ±50 870 1 **))** (태종 122,397

280. 739. The authorities of the different religious bodies vary greatly scholars in regard to the number of scholars they deem it expedient to entrust to each teacher teacher in to each instructor. Thus, whilst in the Church of England schools schools of different the average is 13 scholars to each teacher, in the Roman Catholic denominations. schools it is as high as 32 to each. The following are the proportions of scholars to each teacher in the schools attached to the different **Tdenominations:** 828,81 08 08 181,181 881 88 088 187 108,11178,328 828,81 08 08 181,181 891 891 196 196 196 188,328 Right In schools of the Church of England there was 1 teacher to 13 scholars. 1 2 2 2 2 1 1621 $\mathbf{25}$ Jews " ,, Lutherans 27" " Roman Catholics about of age , 32" " 2D 2

of denominational schools.

740. In State schools the mean number of scholars in average Scholars to each attendance committed to the charge of each teacher is 28.* This is teacher in public and higher than the number so committed in the schools of any of the denominational religious denominations except the Roman Catholics. schools

Sexes of scholars in private schools.

420

741. In 1891, as compared with 1890, there was an increase of 361 in the number of boys, but a decrease of 361 in the number of girls, in private schools. The following are the numbers according to the returns of the years referred to :---

SEXES OF SCHOLARS IN PRIVATE SCHOOLS, 1890 AND 1891.

Year.		Boys.	Girls.	Total.
1890 · 1891		19,825 20,186	20,356 19,995	40,181 40,181
Increase		361	• • •	•••
Decrease	• •••	•••	361	•••

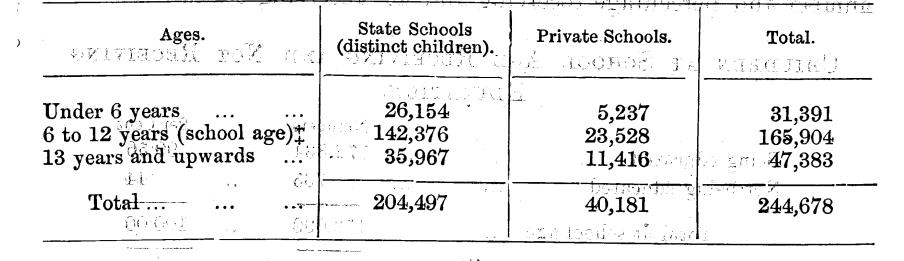

Proportion of male to female scholars.

742. In 1890, the number of girls educated in private schools was greater than that of boys, the proportion being 103 to 100, but in 1891 the reverse was the case, the proportion being 99 girls to 100 boys. It has been already shown that, in State schools, the scholars are in the proportion of 91 girls to 100 boys.

Ages of scholars

743. The age prescribed by law as that at which children are to attend school, unless there might be some reasonable excuse for their not doing so, is from 6 to 12 years last birthday, both inclusive. The following are the numbers in both descriptions of schools at, above, and below those ages during the past year:

AGES OF SCHOLARS, 1890.

* If workmistresses be excluded, this number would be increased to 32.

- 167. See paragraph 708, ante. at these is according and and the set of the second such as the contact by
 - t The school age was changed in November, 1889. Prior to that date it had been 6 and under 15.

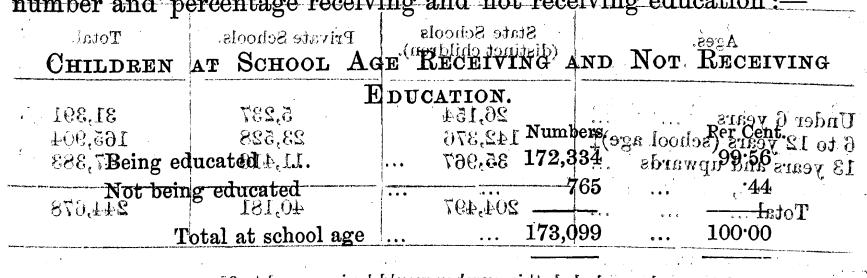

744. In public schools, $69\frac{1}{2}$ per cent. of the scholars were at the Proportion of scholars school age, whilst $17\frac{1}{2}$ per cent. were above, and 13 per cent. were at school age. below it. In private schools, only 59 per cent. of the scholars were at the school age, whilst 28 per cent. were above, and 13 per cent. were below it.

421

745. The number of children of all ages receiving education in Scholars, 1890. Wictoria during any portion of the year 1890 may be stated as follows:—

CHILDREN OF ALL AGES RECEIVING EDUCATION, 1890. Being educated— In State schools (distinct children) ... 204,497 In private schools ... 40,181 At home (census figures, 1891) ... 13,901 Total 258,579

746. Of these children the following were at the school age scholars at school age. school age. (6 and under 13): But prive norther out as a list was showing CHILDREN AT SCHOOL AGE RECEIVING EDUCATION, 1890. .555,654 equations in Second to the second second second second second second second second second age was changed in November, 1889. Prior to that date it had been 6 and under 15.

Proportion of children being educated.

748. By the foregoing figures it would appear that practically the whole of the children at the school age (6 and under 13) living in Victoria were being educated during some portion of the year, and that about 83 per cent. of these were at State schools. The scholars referred to are the "distinct children," whose number it will be remembered has not been ascertained by actual counting but by an estimate made by the Education Department. If the number of children in average attendance be used in the computation instead of the estimated distinct children, the number of State school children at the school age would be reduced to about 93,700,* and the total number at that age receiving education in the whole colony would be reduced to 123,800, whilst the number of children not receiving education would be increased to 49,300. and the state of the state of

Proportion of children not attending full time.

749. If the distinct children have been accurately estimated, the total number receiving education during some portion of the year would be correct also, but it should be clearly understood that the stay of some of these in the schools is so short that practically they are not being educated at all. It has already been shown that the prescribed number of days in each quarter, viz., 40, was not reached in the case of 45 per cent. of the children who attended State schools. during some portion of one or more of the quarters of 1890.

Colleges, grammar

750. Six of the schools included with the private schools are called schools, etc. colleges or grammar schools. Five of these at some former period received sums of money and grants of land from the Government for the erection of school buildings, but no State assistance has been given them of late years. They receive male pupils only, and are all attached to some religious denomination; and in connexion with several of them there are exhibitions, chiefly with the view of assisting the ablest scholars to complete their education at the University. The following is a return, derived from statements furnished by the arentas ansean ar a arengan da 300001 m. n. met al restdence. * Seventy per cent. of the whole average attendance have been assumed to be at the school age. This was about the proportion of distinct children at the school age as estimated by the Education Department, such as the formation of the second sec

Colleges and Grammar Schools,* 1890.

751. Through the instrumentality, and mainly owing to the working liberality, of the late Hon. Francis Ormond, M.L.C.—whose name has ^{Men's} been already mentioned in connexion with the Ormond College and the Chair of Music—a Working Men's College was established in Melbourne four years since.[†] The following account of this institution has been supplied for this work by Mr. F. A. Campbell, C.E. (Melb.), F.R.G.S., F.R.Hist.S., Secretary to the College:—

"The college is centrally situated, in Latrobe Street, opposite the Public Library. There are now two buildings, facing Latrobe and Bowen Streets respectively. The Bowen Street building has been erected on a half-acre of ground, granted by the Government, and is intended mainly for the extension of trade classes, but will also accommodate the classes in drawing and modelling, while the Latrobe Street block has been erected by private subscription, and is occupied by class rooms, offices, etc.

* At the Melbourne Grammar School there are three Council Scholarships of the animal value of £21 for boys under 14, open only to members of the school, and tenable at it for three years; and two exhibitions of the annual value of £20, tenable for two years, open to the competition of boys proceeding to the Melbourne University, whose names have been for the two previous years on the school register, and who have passed the matriculation examination with credit; the head master also offers every year for open competition two scholarships of the annual value of £30 and £25 respectively, four exhibitions—two of the value of £15 and two of £10; and there is a Witherby scholarship, which entitles the holder to exemption from school fees for three years. In connexion with the Scotch College, the following scholarships were announced to be competed for :-(1) Scholarships of the value of 10 or 20 guineas each, tenable for one year, to students who gain a satisfactory position in the class honour lists at the matriculation examination ; (2) Scholarships of 20 guineas or 10 guineas each (according to merit), tenacle for one year, open to all boys who have passed the ordinary matriculation examination, to be awarded for excellence in any one or more of the four groups of subjects, Classics, Mathematics, French and German, English and History. In connexion with the Wesley College, there is a scholarship called the "Draper Scholarship" established in memory of the late Rev. D. J. Draper, who perished in the London-of the value of £25, tenable for one year; two "Walter Powell Scholarships" founded by Mrs. Powell; in memory of her late husband, of the value of £10 each, payable in two annual instalments of £20; also the "Waugh," for boys below the matriculation form, the "Eggleston" and "Corrigan" entrance scholarships, each of the value of 16 guineas, tenable for two years. At the Geelong Grammar School there is an exhibition, given by Mrs. F. W. Armytage, of the value of £60, tenable for two years on condition that the bolder shall be a resident student of Trinity College, Melbourne, and shall have been for two years previously a pupil of the Grammar School; the head master also receives one son of a clergyman of the Church of England as a resident boarder, exempt from allschool fees and cost of residence.

すう おいりつ

† The total amount contributed by the late Mr. Ormond to the three institutions during his lifetime was £60,700; moreover, a further sum of £113,500 was bequeathed by him to various charitable (1 and religious purposes. For further particulars, see the *Victorian Year-Book*, 1888-9, Vol. II footnote (†) to paragraph 807. "The initiation of the college is due to the late Mr. Ormond, who subscribed $\pounds 5,500$ towards the building, a like sum being obtained by public subscription. The sites were granted by the Government, who have also subsidized the institution by grants, both for buildings and maintenance.

"The college is governed by a Council of 16 members, consisting of representatives of the Founder, the Government, the University, the Public Library, the Trades' Hall Council, subscribers of £1 and upwards, and subscribers of from 2s. 6d. to £1. A subscription of from 2s. 6d. upwards annually gives the privilege of a vote for members of the Council. The President of the Council for the present year is Prof. Kernot, M.A., C.E., F.R.G.S.

"The college is intended to improve the general and technical education of the working classes; but is open to all, women as well as men. The class work is carried on almost entirely in the evening, between the hours of 7 and 10.15 p.m. Saturday morning lectures in science for the special benefit of State school teachers are also held.

"Courses of study extending over 3 years are laid down for students in the varions trade classes, and the four following certificates are issued :---

- "1. Class Ordinary Certificate, to those students who pass the annual examination in any class.
- "2. Class Credit Certificate, to those students who pass the examination with credit.
- "3. Technical Certificate, to those students who pass all the examinations in the 2 years' course.
- "4. Expert Certificates, to those students who have passed all the examinations in the 3 years' course.

"Before gaining Expert and Technical Certificates, the students must produce evidence of having been engaged in practical work for some time.

"The largest number of individual students enrolled for any one term was 2,400. The average enrolment for 1890 was 2,178, and the average attendance 1,586. 811 students were examined for first and second year certificates in 39 subjects; 551, or 68 per cent., passed, and 252, or 31 per cent., passed with credit."

752. The following account of the Gordon Technical College, Gordon Technical Geelong, which is an institution of which the objects are in many College. respects identical with those of the Melbourne Working Men's College, has been supplied for this work :--

The college is splendidly situated both for town and country students, occupying a portion of that area in Fenwick Street formerly known as Johnstone Park. It is almost adjoining the central railway station, which is found very convenient for students travelling to and from the college by rail, of whom there is a large number on the class rolls.

The workshops for practical instruction in carpentry, plumbing, and other trade subjects, are now open and promise to be a great success.

The total number of students attending the college for the quarter ending 30th June, 1891, was 266. This number is made up chiefly of the artizan class.

The total amount received in students' fees, to date, is £1,005 17s., and in public subscriptions, £1,200. This is exclusive of the Ormond bequest (£1,000 less probate duty). - The Government grants to date amount to £7,000. The total expenditure on buildings has been £7,907.

The subjects taught are - Building construction, bookkeeping, chemistry, carpentry (practical), electrical engineering, English, French, freehand and model drawing, German, Latin, mathematics, mechanical drawing, modelling, physics, phonography, painting, practical geometry, perspective, plumbing (practical), telegraphy, writing and correspondence, and woolsorting. The fees range from 3s. 3d. to 21s.

Through the liberality of the publishers, a large number of scientific and other useful publications are sent to the college gratis. These are well used and appreciated by students. Samuel Inclosed

753. The Ormond and Gordon Working Men's Colleges, as well Technological schools, as other technical schools, schools of art and design, and schools of mines-are now under the direct control of the Education Department, which has been devising a scheme to provide for the best. method of promoting and directing secondary education generally, by

Victorian Vear-Book, 1890-91.

which schools will be recognized in certain authorized centres only, and payments will be provided in accordance with amounts raised locally. Hitherto, schools of design have been under the control of a Royal Technological Commission, which was dissolved on the 30th" June, 1890; the other technical schools were practically independent," and were not subject to Government supervision, although receiving State aid, which was given without regard to the merits of the different institutions. In the schools of art and design, the subjects taught comprise practical geometry, mechanical and architectural drawing, perspective, model, and freehand hand drawing. The schools of mines, which have been established at the principal mining? centres, provide both theoretical and practical instruction, not only in all the subjects in any way connected with mining pursuits, but also in the arts and sciences generally*; whilst a wide range of subjects is taught at the working men's and other colleges. In 1890, there were altogether 26 technological schools in the colony, viz., 3 working men's or technical colleges-two of which have been just described, 11 schools of art, and 12 schools of mines. One of the last-named, the Ballarat School of Mines, was affiliated to the Melbourne University by a statute passed by the senate in April, 1887, which, however, restricts the privileges conferred by the affiliation to matriculated students. The schools, as a whole, possess 195 lecturers, and had, during 1890, an enrolment of 6,899 pupils, of whom 3,818 attended eight or more times during the last quarter of the year; whilst the fees per quarter range, in the different schools, from 2s. to £373s. The local South Kensington examinations, which are conducted under the supervision of the Education Department, were attended by 339 students, of whom nearly 200 were successful in obtaining the Science and Art Department's certificate of merit'; moreover, the Working Men's College (Melbourne) issued 551, and the Gordon Technical College The Government expenditure on all the 78, prizes or certificates. institutions in 1890-91, amounted to £38,613, viz., £19,113 for maintenance, and £19,500 for building purposes; and of the total

amount the Working Men's College (Melbourne) received £7,000; the Sandhurst School of Mines, £6,350; and the Ballarat School of Mines, £5,000 Inte tour late laid of a school of art of which the

The South Kensington examinations are to be henceforth discontinued, and the Education
Department will establish its own examinations in their stead.
A digest of some of the evidence taken before the Royal Commission on Technical
Instruction in Great, Britain, 1881 to 1884, together with valuable comments thereon by the
Hon. C. H. Pearson, EL.D., M.P., Minister of Public Instruction in Victoria, was laid before the
Parliament of Victoria in 1883, and will amply repay perisal. (See Parliamentary Paper B. 579, Session 1888.)

754. The buildings of the Melbourne Public Library have cost Melbourne from first to last £147,604, and are still unfinished. These funds were Library. provided by Government, as also were further moneys, amounting, with the sum just named, to a total of £530,105, of which £65,508 was received by the trustees during the year under review. The private contributions, consisting of books, pamphlets, maps, newspapers, etc., have amounted in all to 506,503, of which 264,695 were presented to the institution, and the remainder were deposited under the Copyright Statute of The estimated value of these contributions is £26,276. At the end of 1890 the library contained 122,834 volumes, and 153,548 pamphlets and parts. It is open to the public, without payment, on week days between the hours of 10 a.m. and 10 p.m., and was visited during the year by 474,435 persons. The trustees report that, of 4,278 volumes added to the institution in 1890, 1,142 were donations; these embrace a valuable donation of 467 volumes from the British Government, which also presented 3,075 pamphlets and 1,568 maps; falso afgift of 181 volumes, besides 427 maps, from the Government of the United States. It is, moreover, reported that, although the new dictionary catalogue has not yet been completed, the cards upon which it has been written will soon be a made available to the public, and will prove of great value to the researches of readers in enabling them to ascertain with the least possible delay the resources of the library on any given subject. The enection of the new reading room, the funds for which the trustees expecte will be soon provided, and which is the next work to be under a taken, will afford ample space for a long time to come for the storage and shelving of a very large number of wolumes, of not could odt to

"A bin pointing of a very targe number of workings, of non-model of 2012 10 "755. The National Gallery, at the end of 1890, contained 15,769 National "755. The National Gallery, at the end of 1890, contained 15,769 National and 13,025 drawings, engravings, and photographs. It is opened at 10 a.m. and closed at 5 p.m. daily, Sundays and certain holidays excepted. The school of painting in connexion with this institution was attended in the year by 12 male and 19 female students, and the school of design by 48 male and 101 female students. The students are encouraged to paint original works, by which means it is hoped the foundation may be laid of a school of art of which the subjects are purely Australian or The most important contribution to the National Gallery during 1890 was. Mr. Longstaff's copy of the "Esopp" of Velasquez in the the terms of the travelling scholarship in "Esopp" of Velasquez in the terms of the travelling scholarship in "Esopp" of Velasquez in the terms of the travelling scholarship in awarded to him in 1887. Industrial Museum.

756. The Industrial and Technological Museum joins the National Gallery, and was opened on the 7th September, 1870. It now contains 617 publications, 51,275 specimens, of which 2,300 were added during 1890, and 261 drawings. It is open on the same days and during the same hours as the National Gallery. During the year a fine exhibit of prize wools was presented to the Museum by Messrs. Goldsbrough, Mort & Co.; moreover, the whole foreign mineral collection was re-arranged, and 655 specimens, were received either as donations, exchanges, or purchases; the section of economic botany was also largely added to by donations from private sources, and from agricultural societies. As a measure was a state of the societies of the $\int_{M} dx = \int_{M} dx = \int_{M} dx$

National Museum.

757. The collections of the National Museum are kept in a building situated on the grounds of the Melbourne University. They consist of stuffed animals and birds, insects, specimens of minerals, and other objects of curiosity. The cost of the edifice was about £8,500. It is open to the public free of charge on all week days throughout the year, except Christmas Day and Good Friday, between the hours of 10 a.m. and 5 p.m., and in 1890 was visited by 129,253 persons. During the same year, besides presentations of value and interest made to the institution, purchases were made to the extent of £1,402. The payments for salaries and wages amounted to £1,877. The total amount of aid from Government during the year 1889-90 was £1,836. The Director again complains of the delay which is taking place in the completion of the buildings, for which the sum of £12,000 has been voted but not appropriated. . . . bebbs ad blook--- zeroors bas

combined; but with the Domain and Government House grounds adjoining it covers about 300 acres. This garden, although nominally in existence for some 48 years, was virtually created by Dr. (now the Baron Sir Ferdinand von) Mueller, who was for 16 years its director, but retired from that post in 1873. It was early extremely rich in rare plants, these being in very many instances then new to the colony. The garden under the present director, Mr. W. R. Guilfoyle, F.L.S., still maintains its beauty. An interesting description of it from his pen appears in the Victorian Year-Book, 1888-9*.

Zoological and Acclimatisation Gardens.

765. The gardens of the Zoological and Acolimatisation Society of Victoria are situated in the centre of the Royal Park, on the northern side of the city, and distant nearly two miles from the Post, Office, and can be reached by the Brunswick tramcars starting from Elizabeth Street South, close to the Hobson's Bay Railway Station, every few minutes. A transfer has to be made at the south entrance to the Royal Park to a short horse tram running from the Sydney Road to the Society's gardens, but only one fare of 3d. for adults and half-price for children is made. The gardens can also be reached from Spencer Street by the Coburg, Fitzroy, or Heidelberg trains, all of which stop at the Royal Park Station, close to the railway gates on the north side of the gardens. The ground enclosed contains 50 acres, rather more than half of which is laid out as a Zoological Garden and the rest in deer paddocks. An interesting account of the operations of this society, contributed for this work by the Director of the Gardens, Mr. A. A. C. Le Souef, was published in the edition of this work for 1889-90.+ Matthew salt To Come and all stiges A IN MARLER THE

766. On the 18th March, 1890, a Royal Commission, consisting of Commission 11 members, was appointed to enquire into and report upon the condition and management of the charitable institutions of the colony. The Commission made a progress report 1 on the 11th November, 1890, and a final report towards the end of 1891§ embodying the following recommendations. The some could while which with the noise states of . 32

RECOMMENDATIONS OF THE ROYAL COMMISSION ON CHARITABLE IN INSTITUTIONS.

1. Removal of the depots of the Immigrants' Home on St. Kilda Road, Melbourne.

2. Establishment of a casual ward on the north bank of the Yarra, near Prince's 1 Bridge.

3. Transfer of the permanent inmates now in the buildings on the St. Kilda-Roadto the Royal Parks stratatic it autoblator with to avorage tou hild consideration of a

5. Removal of the Melbourne Hospital. 6. Erection of the Melbourne Hospital on the site known as the Pig Market. * Vol. II., paragraph 764. * Vol. II., paragraph 764.

.II .107

7. The immediate establishment of infectious diseases hospitals.

8. The employment of female nurses in hospitals wherever practicable. 9. The establishment of a board, from which nurses should obtain a certificate of competency.

10. The provision of a better accommodation for nurses, relief from menial work, and the raising of their status.

11. Calling upon persons in good circumstances to show cause why they should not contribute to the support of their indigent relations who are burdens on the charitable institutions. Magistrates to hear cases privately at discretion.

12. Regular inspection of all the charitable institutions of the colony by competent firemen, and the enforcement of methods for the safety of the inmates of charitable institutions in case of fire.

13. The printing of all the reports of the Inspector of Charities as Parliamentary papers.

14. Removal of the Blind Asylum to a country site.

15. Removal of the Deaf and Dumb Institution to a country site.

16. Amalgamation of the Benevolent Asylum and Immigrants' Home; receiving house only being left in the city.

117. Amalgamation of metropolitan refuges for fallen women, other than Abbotsford; removal of them to a country site or distant suburb; proper classification of inmates; and establishment of receiving-houses in town.

18. Appointment of duly qualified medical men of junior standing to the positions of resident medical officers in all cases where the services of consulting medical men can be obtained.

19. Provision for the appointment of honorary medical officers to be made by the District Boards.

120. Division of the colony into charitable districts administered by District Boards, the members of which shall be elected by the municipalities within the several districts, to have full powers in the allocation of the Government grant and other funds.

21. The appointment of a Central Board of Charity to allocate the Government grant to the various districts and have general control of all charities within the colony.

22. Such Central Board to consist of nine honorary members, four appointed by the Government and five elected by the District Boards. The Board to choose its own chairman, and to have control of the present office of the Inspector of Charities.

23. The Central Board to have powers to transfer inmates from and to any benevolent asylum or hospital in any part of the country.

24. That half the expense of supporting charitable institutions be borne by the Government grant; that, if necessary funds for the other half cannot be obtained by private subscription, the balance be paid by the municipalities out of the general rate upon the precept from the District Board.*

25. The transformation of some of the country hospitals into benevolent asylums by agreement of the various committees of the different institutions within the districts, or in the event of the committees not agreeing, by order of the District Board.†

26. The extension of the time during which ship-owners shall be compelled to give bonds to the Central Board to indemnify the State for introducing into the colony

persons, who, within three months after their arrival, become a burden upon the State.
27. The classification of the various ladies' benevolent societies, throughout the colony, and more equal distribution of the grant to them.
28. The establishment of dispensaries in the suburbs of Melbourne, to relieve them pressure on existing charitable institutions.
29. The establishment of a more extensive ambulance service.

3. Transfer of the permanent inmates now in the buildings on the St. Kilda Read-

* Two Commissioners did not approve of this, considering it undesirable to place the burden's upon ratepayers who are possessors of one kind of property or to tax becupiers of small homesteads, or, in other words, to tax thrift; whilst they were of opinion that the obnoxious imposition of a poor tax should be deferred as long as possible. † One Commissioner considered it an unwise policy to close hospitals and multiply benevolent asylums. If some of the former were no longer required as hospitals, they should be closed altogether, whilst the latter might well be amalgamated into two or three institutions with financial gain to the country of the terminent of the state of the former were institutions with VOL. II.

Accommodation of charities.

ા તેલું સુરુપ્ત છે. તેને સ્વીજન્મ તે સ્વીજે તેલું

> NOTE.—Besides the hospitals above referred to, there were two Convalescent Homes, with accommodation for 64 inmates. Particulars of these institutions will be found in a subsequent paragraph.

> * With reference to the relative merits of the "boarding-out" and "barracks" systems, one Commissioner dissented from the view that, under the latter, when boys are brought up to the knowledge of a trade, or when girls are carefully trained for domestic service, they are not so well fitted to fight the battle of life, or to become as good citizens as those children who are boarded out. -t-Only three of the kinds described are Government institutions, viz., the Hospitals for the Insane, the Idiot Asylum, and four of the Industrial and Reformatory Schools.

> ‡ Except in the case of the Industrial and Reformatory Schools, for which the returns, both in this and the following tables, are for the year ended 31st December, 1890.

§ A list of the general hospitals is given in the table following paragraph 697 in Volume I.
The Idiot Asylum is under the same control as the Hospitals for the Insane.

The name of this institution is misleading ; it is really a benevolent asylum.

् ार्

.

768. According to regulations issued by the Central Board of Cubic space in wards. Health in Melbourne, not less than 1,200 cubic feet in the wards of a hospital or other institution of a like nature, should be allowed for each individual. It will be observed by the figures in the last column of the foregoing table that this amount of space for inmates is not attained in the case of any of the institutions, except the general hospitals and the Women's Hospital. It may be remarked that one important authority considers so large an amount of space unnecessary. The late Dr. Paley, in his report on the Hospitals for the Insane for 1878,* mentioned 500 feet for beach patient in ordinary wards, sand 1,000 feet in hospital wards, as a sufficient allowance; but, on the other hand, Dr. McCrea, the late Chief Medical Officer, fin a paper contributed by him to an "Précis of Information Concerning The 8913168 Colony of Victoria," prepared some years since, under the oditorship of the present writer, for the Intelligence Department of the Imperial War Office, gave it as his opinion that, whilst 600 feet of cubic space is sufficient for each person in a well-ventilated sleeping room, as much as from 1,500 to 2,000 cubic feet ought to be allowed in hospital wards.

769. The following table shows the total and average number of Innates and inmates in the same institutions during the year ended 30th June, 1890; also the number of deaths and the proportion of deaths to SPR. CONTRACT COR inmates :-(A) (21) 12 Women's Rospital

Inmates in excess of beds.

436

770. With reference to the overcrowding of some of the institutions, a comparison of the last two tables will show that the daily average of inmates in the year under review was greater than the number of beds in the Hospitals for the Insane, the Idiot Asylum, the Immigrants' Home, and the Orphan Asylums. The children attached to the Industrial and Reformatory Schools greatly outnumber the beds, but as the majority of these are boarded out, the institutions are not overcrowded.* E mand out the failers H Verz 1 aran ζ.e

Birthplaces of inmates.

Average cost 3 2775 The following table gives a statement of the average number per inmateri of inmates of the respective institutions during the year ended with June, 1890, the total cost of their maintenance, and the average cost per annum of each inmate : -

if This represents the amount paid into the Treasury in 1890 by the Master in Lunacy on account of the maintenance of lunatic patients; and it is entered in this table as being a set-off against the total cost to Government of these institutions.

⁺ Of this amount, £1,454 was received and paid into the Treasury during the year from parents and others for the maintenance of Industrial and Reformatory School children, and £286 was derived from the sale of articles produced, making a total of £1,740. No information is furnished of the amounts received from private sources by the assisted Industrial and Reformatory Schools. CHARITABLE INSTITUTIONS. - AVERAGE COST SOFT FACH INMATE,

77.6. In 1889-90 the average cost per inmate was greatest in the Expediture per inmate. Women's Hospital (2132), the next in the Children's Hospital (2106), the next in the Blind Asylum (261), and next in the General Hospitals (260). The Eye and Ear Hospital followed with an average per inimate of 253; then the Deaf and Dumb Asylum, with 252. I The institutions in which the relative cost was least were the Timmigrants' Home, and the Industrial and Reformatory Schools, with an average of nearly 212 10s, ; the Orphan Asylums, with an average of the least than 216', and the Benevolent Asylums, with an average of the set over 218 per inmate. The children of the Industrial and Reformatory Schools, and Orphan Asylums, are, however, for the most part not a tax on the institutions, being boarded-out or licensed.

778. In Melbourne and suburbs, during, the month of ionetaber, of Hospital Saturday each year, the last Saturday and Sunday are set abart for smarting and collections in aid of the charitable institutions... The movement is taken up warmly by the clergy of all denominations, who, on/Hospital Sunday, preach sermons in aid thereof, and devote of the reference all the offerings collected in their churches. Superintendents of Stindard up and head masters of State schools, and the proprietors and persons employed in many places of business, also render important assistance in the collection of funds. The following are the amounts collected in each year since the movement was inaugurated :----

803,1811 588701 + 1388,021 nales in these costilitations and realer 11,248 139,959 128,711 Total collected 785. In proportion to the numbers resident, the mortality in the - ARTICA -วริโมมริงที่ odt 780. In his report for 1890, the Inspector of Lunatic Asylums, CLUTHIA. Lunatics in Dr. Dick, states that in that year the registered insane as compared Australasia and with the entire population bore the proportion of 1 to 304, or rather England compared. less than in the previous year, when it was I to 300. He adds that in New South Wales there is 1° insane person in every 377, in South Australia, 1 in 410, and in England 1 in 344, of the general population.

Dr. Dick suggests the following influences as perhaps explaining the comparatively high rate in Victoria: (1). The facilities afforded by the Victorian lunacy system for safely and cheaply disposing of weakminded persons who may have become a burden to their proper guardians. (2) The poor-house system of Great Britain having no equivalent here. (3) The standard of mental unsoundness in use, which leads to many persons suffering only from old age, and harmless as regards themselves or others, being certified to as insane. (4) The mortality amongst patients being low, which results in an accumulation of the old and incurable. (5) The nomadic tendencies of the population, whereby they become exposed to some of the most potent causes of mental disease. 1-01 1)

281. The proportion of recoveries of patients in the Victorian Recoveries Lunatic Asylums (Hospitals for the Insane) was not so high in 1890 as in most previous years, the proportion having been 3,925* per notification of 10,000 admitted as against a proportion of 4,423 in 1889, 4,737 in 1888, and an average during the ten years ended with 1887 of 4,451. The proportion of recoveries was higher than in two of the other Australasian colonies, or than in England and Wales, as is shown by the following figures :---

23 : 21 18 Douestie trenble (including 14 | 67 (. <u>F</u> $\left[\right]$ Ð 8 E 786. An Act was passed in 1888* authorising the establishment Inebriate of Inebriate Asylums, where persons addicted to the excessive use of alcohol could be received either as voluntary patients or under legal compulsion, the general direction and control of these establishments being vested in the Lunacy Department. There are two of these asylums in Victoria, one at Beaconsfield for both men and women, and the other at Northcote, for women only. (In The number of patients admitted during the year to these institutions was 57, viz., 38 males and 19 females. Of those admitted, 45 entered voluntarily; 25 had been constant, and 20 had been periodical drinkers; 11 had had delirium tremens; 28 had been accustomed to the use of tobacco, and thirteen were known to have had intemperate parents. Forty patients were discharged during the year, and 18 remained in the institutions at its close." The following particulars

7710.081

asylums.

10 1 The Inebriate Asylums Act 1888, now embodied in Consolidated Act 154 Vict. No. 1, 101.)

respecting these institutions have been taken from the report of the Inspector of Lunatic Asylums for 1890:-

BEACONSFIELD.

The buildings, having been originally intended for objects other than the accommodation of inebriate patients, do not afford the conditions to be desired in a complete institution of the kind. The building of a new Asylum, however, having been so long delayed, and there being no immediate prospect of its commencement, it would now appear desirable to carry out some improvements at Beaconsfield, where accommodation has more than once been taxed to the utmost, and the safety of patients strongly inclined to escape cannot be guaranteed. Additional single rooms and one or more strong rooms should be added, and it would also be advantageous to have a portion of the ground securely fenced. The regulations have been modified so as to reduce the minimum rate of maintenance from £2 to £1 per week, patients being now charged from £1 to £5 weekly, according to their circumstances. 了,这些说,在这个关系的,我们的人,我们就是你的。"

RESULTS.

As far as we have any reliable knowledge the results of the first 46 cases are that 19 were cured, 10 improved,* 4 not known, 1 was sent to another asylum, 2 died since discharge (of ovarian dropsy and ulcer of stomach respectively), and 10 relapsed. The remaining cases (about as many more) are either too recent to form an opinion as yet, or are still connected with the house. The diseases, other than those caused by drunkenness, treated in the asylums were :- Scabies, herpes circinatus, pemphigus, chronic hepatitis, diarrhœa, dysentery, Bright's disease, gout, chronic rheumatism, and conjunctivitis. Of these hepatitis, diarrhœa, and dysentery are very common when patients are first admitted. The others mentioned are only occasional, and there were a number of prescriptions for minor or temporary ailments not worth recording. The skin diseases named were on some of the patients when they came in, and were, of course, discovered at once, showing how careless people even of good position will get in their habits when they give way to intemperance. Notwithstanding the weak condition of many of the patients when they first come in not a single death has yet occurred in the asylum.

It is specially recommended that, if there is any additional legislation for the asylums, it would be advisable to have some clause inserted under which patients who are physically fit for it could be put to some light labour, and principally such as are sent in at the lowest rate, as these are obviously the worst cases, having lost all habits of industry and application. The better paying patients, of course, may be supposed to purchase some immunity from work, but, moreover, as a rule, they are persons sincerely desirous of a cure. It is painful at present to see able-bodied. men of all classes spending the entire day in total idleness. There is always, enough work that no man may be ashamed to do here, but very few will take to it. Those who have worked hitherto have all, as far as we know, turned out well, The others go out in good bodily health, but with scarcely any improvement in habit of thought. They have been all and all any set and the set of a first destroyed

11 marten ar 1981 13 out han one NORTHCOTE, should be bue al savin bard stad

The Inebriate Retreat at Northcote, for many years conducted by Dr. McCarthy, was taken over by the Government on the 1st July, 1890. The services of Dr. McCarthy and a few subordinate officers were retained; and the institution was opened for female inebriates unable to contribute towards their maintenance, and its existence and objects made known through the press. Only a few persons have responded by seeking admission. Under the circumstances, the original object having failed, it may be necessary to convert the buildings to another use.

Blind Asylum.

and and and the 787. The Victorian Asylum and School for the Blind, henceforth to be known as "The Royal Victorian Institute for the Blind," occupies

* "Improved" means that the patient, though not a total abstainer, has, to the best of our knowledge, been temperate up to the present, and continued to work at his profession or business.

2. 307

a site on the St. Kilda Road, Melbourne, which is valued by the Royal Commission on Charitable Institutions at £13,325. The Commission was of opinion that proximity to the metropolis results in an injurious effect upon discipline and morals, and that the purposes of the institution would be better served if it were removed into the country. The following information respecting this Asylum has been taken from the report of the Committee for the year ending 30th June, 1891 :--

At the commencement of the year the number of inmates was 111, and 4 former pupils were then employed as journeymen, making a total of 115. During the year 24 have been admitted, 8 have been discharged, and 2 died. At the close of the year there were 123 inmates and 4 journeymen, making a total of 127 then enjoying the benefits of the institution. The total number received into the institution since its establishment is now 352.

The year commenced with an overdraft of £650 against the maintenance account, and at its close the amount was increased to £1,051. Considering the crisis that the institution has passed through, this may be considered fairly satisfactory. The income of the building fund for the year was £1,273, inclusive of the sum of £833, being a further distribution of the surplus funds in the estate of the late Hon. Francis Ormond, M.L.C., which, with the sum brought forward from the previous year, amounted to £4,773. The disbursements for the year were £7,361, thus leaving an overdraft of £2,588, which, together with that on the maintenance account, makes the total indebtedness £3,639.

The number of pupils in the school at the close of the year was 49, viz., 26 boys and 23 girls. The subjects taught in all the classes by means of the Braille System are reading, writing, arithmetic, geography, spelling, history, grammar, composition, and lessons in the Old and New Testament. A promising matriculation class is in existence, in which, in addition to the ordinary subjects, the following are taught, viz., French, Greek, history, botany, algebra, and physical geography. It is with pleasure that we report that one of the female pupils of this class, aged 17, has been successful in passing the matriculation examination at the Melbourne University. Having been entirely taught in the institution, this achievement reflects great credit on the teaching staff as well as on the pupil herself. By the kind exertions of the members of the Austral Salon, as well as a number of her friends, a special fund has been raised to enable her still further to pursue her studies.

It is intended shortly to send up other pupils for matriculation examinations. The pupils display considerable intelligence, and their progress and general conduct which is to enquestion in one is during the year has been very satisfactory.

The number of music pupils under tuition is 56, 5 of whom assist in teaching; 40 are learning the piano, 10 string instruments, 12 wind instruments (who, together with the two drummers, form the brass band), 9 piano tuning, and 7 the organ; 26 also receive special vocal training. The senior choir consists of 23 members, and the junior choir of 24. During the past year 22 concerts and 16 band performances have been given in aid of the funds of the institution, and the aggregate net profit amounted to £427 3s. 1d most show what the condition is the there all on index 1 and 1 to In the Industrial Department 16 of the inmates are taught basket-making, 7 brush-making, 7 mat-making, and almost all the elder female inmates are engaged to some extent with wool-work, etc., The domestic work also is carried on largely by them. The total proceeds of sales for the year were £1,291 5s. 8d. This amount would also doubtless be largely increased had the projected concerts taken place. اله منه کې د کا 788. The Deaf and Dumb Institution also occupies a site on the Deaf and Dumb St. Kilda Road, which is valued by the Commission on Charities at Institution. £22,000, and that Commission considers that it might be advan-1121 1991 tageously removed to the country, where the deaf mutes might and should be taught garden and farm work. The following information 2FVOL. II.

relating to the institution has been taken from its report for the year 1890-91: H- will be the or all distance they will be the second

The number of pupils on the 1st July, 1890, was 55. Since then 17 have been admitted and 13 discharged, leaving on the roll on 30th June, 1891, 59-viz., 33 boys and 26 girls. The total number of deaf mutes received into the institution since its commencement in the year 1860 is now 308.

Of the 59 pupils now in the institution, 21 are in the oral and 38 in the manual departments. Seven pupils, who have been receiving oral instruction for some time, have been transferred to the manual school on account of their inability to be successfully taught the oral system. The committee have decided that in case of new pupils the advice of the honorary medical officer be obtained as to whether they should be instructed under the manual or oral system.

The health of the inmates has been fairly good. About November last three girls were taken ill, one with rheumatism, one with bronchitis, and the third with hæmorrhage from a lung (this girl died some months after her removal from the institution). In April last'a small outbreak of diphtheria occurred, affecting one child very severely, and two or three others but slightly. And then are an area of the second s

The receipts for the past year, including the Government grant of £1,600, amounted in the aggregate to £3,612. The expenditure for the same period was £3,441, viz. :—Building account, £517; maintenance account, £2,924. The liabilities at the close of the year were £269. The endowment fund, which was reported at the last annual meeting to amount to $\pounds7,478$, has been increased by further bequests received during the year, and now amounts to £8,718. Of this sum, £7,428 has been invested in Victorian Government 4 per cent. stock, £1,000 deposited in the bank, and the balance (£290) is awaiting investment. The interest received from this account during the year amounted to £294, and has been paid over to the maintenance fund. Here our securit no abunwar purveteed to belo

Hospital.

those of their follow-creatures. In April, 1658, Her Mojesty's Eye and Ear 789. The Victorian Eye and Ear Hospital was established with the object of treating a class of diseases which not only are the cause of extreme suffering, but also, where unchecked, produce much helplessness and poverty, arising from deafness and blindness, thus entailing a heavy burden on the community. It places within the reach of all persons, without distinction of creed or country, every attainable means for the relief or cure of diseases of the eye and ear. It received 333 in-patients during the year ended 30th June, 1890, making, with 40 in the institution at its commencement, a total of 373 treated. The patients discharged numbered 332, of whom 311 were stated to be cured or relieved, and 10 to be incurable of The number of out-patients during the year was 22,934 recent not contractor

Children's Hospital.

Victorian Infant

Asylum.

790. The Melbourne Free Hospital for Sick Children had 55 in-door patients at the beginning of the financial year. During the year: ended 30th June, 1890, 825 patients were admitted; and 767 were discharged, 72 died, and 41 remained at its close. It is in the here and ionar channe set estatually preserve F-115317-127761 791. The objects of the Victorian Infant Asylum are the prevention of infanticide, the saving of infant life from the many evils arising from baby-farming, and the rescuing of mothers of illegitimate children from further degradation. Every child admitted must be brought

2.2.5

by the mother, or some authorized person, who must enter the child's name and the date of birth in a register kept for the purpose, and must undertake to contribute something towards its support. During the year ended 30th June, 1890, the number of infants admitted was 58, besides which 52 were under the care of the institution at the commencement of the year. The number who died during the year was 22, and 36 were discharged; thus the number remaining nnder the control of the institution at the end of the year was 52, of whom 27 were boarded out. Besides the infants, there were 78 mothers in the institution during the year, of whom 61 were discharged, and 17 remained at the close of the year. The receipts during the year amounted to £1,211, of which £250 was from Government, and £961 from private sources; and the expenditure was £1,214. 792. A Humane Society was established in 1874, under the name Royal

of "The Victorian Humane Society," for the purpose of circulating Society of information respecting the most effectual methods of, and providing Australsuitable apparatus for, restoring persons apparently drowned or dead, also of bestowing rewards on those who risk their own lives to save those of their fellow-creatures. In April, 1883, Her Majesty's permission having been first obtained, the society assumed the title of "The Royal Humane Society," and in 1885 it was incorporated as "The Royal Humane Society of Australasia." Its objects are stated to bestow rewards on all who promptly risk their own lives to save those of their fellow-creatures. (2) To provide assistance, as far as it is in the power of the Society, in all cases of apparent death occurring in any part of Australasia. (3) To restore the apparently drowned or dead, and to distinguish by rewards all who, through skill and perseverance, are, under Providence, successful. (4) To collect information regarding the most approved methods and the best apparatus to be used for such purposes. The following

information respecting the operations of this society has been supplied by its secretary, Mr. William Hamilton :earnedista of T. 905 -

"In 1881, the Hon. Sir W. J. Clarke, Bart., generously presented to the society the sum of £250 for the purpose of founding a gold or silver medal, to be awarded annually to the best case that comes before the society. Since its establishment, it has dealt with 1,017 cases, and made 720 awards. During the year ended 30th June, 1891, 103 applications for awards were investigated, with the result that 58 certificates, 22 bronze medals, 1 silver medal, and the Clarke silver medal, were granted. The receipts during the year amounted to £1,342 6s. 8d., and the expenditure to £610 Os. 2d. The institution has placed and maintains 866 life buoys at various places on the coast, rivers, lakes, and reservoirs throughout all the Australasian colonies-(its operations extend throughout the Australasian colonies)-and Fiji. Of the Honorary awards distributed in 1891, 36 were for deeds of bravery performed

flaction -CORE OF 10111.737

공기 소리가 문 Anno A

2F 2

in Victoria, 20 for similar acts in New South Wales, 7 in Queensland, 11 in New Zealand, 4 in Tasmania, and 4 in South Australia. The society has 184 honorary correspondents, residing as follows, viz. :- 37 in New South Wales, 30 in New Zealand, 33 in Queensland, 10 in Tasmania, 3 in South Australia, 6 in Western Australia, and 65 in Victoria. Owing to the appointment of these gentlemen and to the awards made by the society appearing to give complete satisfaction throughout the colonies, there is no urgency for forming local branches of the society in the The exertions of the society to induce both the Imperial and other colonies. Australasian Governments to amend the law for the protection of life and property at sea induced the Board of Trade to appoint a Special Committee to consider the subject. The Hon. the Premier, Mr. Duncan Gillies, on the 3rd March, 1887, at the request of the directors, telegraphed to the Hon. the Colonial Secretary to ask him to lay the question before the Imperial Conference. The matter was accordingly brought under the notice of the conference by a memorandum from the Colonial Office, and was ably discussed by the conference. A Select Committee was appointed by the House of Commons, to enquire into the existing laws and regulations regarding boats, life buoys, and other life-saving apparatus to be carried by British merchant ships, and to report what amendments are required, etc. Their report fully endorsed the views which the directors of this society have persistently advocated for the last ten or twelve years. On the 22nd March, 1888, Lord Onslow, the Under Secretary of State for the Colonies, introduced a bill entitled The Merchant Shipping (Life-saving Appliances) Bill into the House of Lords, which was passed and sent to the House of Commons, and on the 10th August, 1888, received Her Majesty's assent. The title of the Act is The Merchant Shipping Act 1888 (Life-saving Appliances). Instructions for saving life from drowning, sunstroke, snake-bite, etc., are taught in the State schools throughout the colony, but the directors of this society are urging that something more is now required; and, to give practical effect to their views, the society offers annually the "Queen's Medallion" to the best in any competing school for proficiency in swimming exercise, with reference to saving life; the competition to be open to the scholars at all public and private schools throughout Australasia. Efforts are still being made to induce the Education departments of the other colonies to adopt the plan followed in Victoria by making the instructions for saving life, etc., a part of the curriculum in the public schools."

Health Society.

793. An Australian Health Society was established in Melbourne in 1875, and still maintains a vigorous existence. It consists of about 400 members, and is managed by a president, two vice-presidents, a treasurer, two secretaries (one being a lady), and fifteen members of council. Its objects are—(1) To create and educate public opinion with regard to sanitary matters in general, by the aid of the platform, the press, and other suitable means; (2) to induce and assist people, by personal influence, example, and encouragement, to live in accordance with the recognized laws whereby health is maintained and disease is prevented; (3) to seek removal of all noxious influences deleterious to public health, and to influence and facilitate legislation in that direction. To effect these objects, the society issues (gratis) pamphlets, tracts, and wall sheets, bearing upon the subject of health and disease; maintains a lending library of specially selected works for the use of members; and arranges for the delivery of public lectures, the annual recurrence of which is considered by many a welcome event, as is evidenced by the large audiences they succeed in attracting. Recently the ladies' committee organized a weekly class

Social Condition.

for ladies at Prahran, at which, during seven weeks, lectures were given by Dr. Godfrey Howitt on hygiene generally, including also domestic economy and the abuse of drugs. About fifty attended the class, and thirteen passed a rather severe subsequent examination, and were presented with certificates at the society's half-yearly public meeting. It is intended to hold similar classes and examinations in other suburbs. The receipts of the society for 1889-90 amounted to £153, and the expenditure to about the same amount. No pecuniary aid is received from the Government, the work of the society being carried on by subscriptions ranging from 5s. per annum upwards.

i E.

794. A Charity Organization Society has been established in Mel- Charity Orbourne, its objects being—(1) Promotion of co-operation in charit- $g_{\text{society.}}^{\text{ganization}}$ able work; (2) direction of the stream of charity to the deserving; (3) discouragement of indiscriminate giving; (4) exposure of sturdy beggars and professional impostors; (5) adequate inquiry before relief, and compilation of records; (6) distribution of immediate relief in kind pending arrangements with existing charities; (7) inquiry upon the request of any charitable institution; (8) fostering the establishment of provident dispensaries; (9) encouragement of charitable effort in localities where no suitable societies are in existence. The business of the society is managed by a council empowered to make rules and, regulations for the management of the business of the society and for their own government. This council consists of a representative of each of the charities, and of twenty members to be elected at an annual meeting of subscribers of the society. The number of subscribers during the fourth year of the society's existence, which ended on the 30th June, 1891, was 315. The income of the year, excluding an amount of £336 brought forward, was £671, the expenditure £643, and the balance on hand at the end of the financial year was £359. The new cases investigated by the society during the year numbered 501, the result of the inquiry being that 180 were set down as satisfactory, 177 as unsatisfactory, and 144 as doubtful. The society claims to have prevented a large amount of imposture, to have relieved subscribers of the annoying feeling that their benevolence was wasted on unworthy objects, and to have stimulated and directed the flow of charity. Especially good work has been done in cases where employment has been found for those who, without the society's aid, might have degenerated into permanent burdens on public or private charity, and in the large number of cases in which relatives of indigent persons have been induced to recognize natural claims in a community where no legal

obligation is entailed by relationship other than that of husband to wife, and of parent to infant. The society has rendered important service by organizing intercolonial conferences on charity, which have proved highly successful, both in point of number of delegates attending, in the merit of the papers contributed, and in the value of the suggestions made to the Colonial Legislatures. The society was also prominently before the public last year in connexion with the "unemployed" agitation. It investigated the whole question, at the invitation of the Hon. the Premier of the colony, and claims to have reduced the difficulty to its true dimensions. The principles of the society are spreading, and efforts are being made to establish similar associations in the up-country centres.

Victorian Discharged Prisoners' Aid Society.

795. Since 1873 a society has been in existence in Melbourne for the purpose of affording assistance to discharged prisoners, and offering them inducements to return to the paths of honesty and industry. Relief is afforded by gifts of money, clothes, blankets, and other necessaries, and those who desire it are supplied for a time with board and lodging in Melbourne, or are provided with means to go into the interior or to leave the colony. The society also takes charge of and distributes the sums earned by the prisoners whilst under detention. The number of individuals relieved in 1890-91 was 334. The receipts in the same year amounted to £1,251—viz., £100 grant from Government, £626 from the Penal Department, and £525 from private sources; and the expenditure to £1,233.

Industrial Schools.

796. There are 5 Industrial Schools in the colony, of which 2 are wholly, and 3 partly, maintained by the State; 2 of the latter are in connexion with the Roman Catholic denomination, and I is a Servants' Training School. The two Government schools are merely Receiving Depôts, it being the long-established policy of the department to send the children, as soon as possible after they are committed, to foster-homes. The Government Experimental Farm at Dookie* and the Macedon State Nursery were formerly, but are not now, included with the Industrial Schools. The wards of the Department for Neglected Children at the end of 1890 numbered 3,063, viz., 1,749 males and 1,314 females. Of these, only 45 were in the Government Receiving Depôts, and 60 in assisted schools; of the remainder, 1,761 were boarded-out or adopted, 544 were placed with relatives on probation, and 653 were at service. The children committed to the Industrial Schools in 1890 numbered 377, viz., and the second party of the second * For particulars of this farm, see paragraph 466 ante.

217 boys and 160 girls. They were placed in the schools for the	,

798. Children, however young, are boarded-out from the Receiving Children Depôts after a detention of only a few days, the welfare of the out, etc., boarded-out children being cared for by honorary committees, who Industrial send in reports to the Department. The rate paid by the Government to persons accepting charge of the boarded-out children is five shillings per week for each child. The number of such children at the end of 1890 was 1,761, or 111 fewer than at the end of the previous year; and there were besides 544 in 1890, as against 421 in 1889, who were placed with friends on probation, without wages. In addition to these, 653 children at the end of 1890, as against 513 at the end of 1889, were at service or apprenticed.

n ing mengahan kan kéla

799. Under the same management and control as the Industrial Reformatories. Schools, there are also 4 Reformatory Schools, 2 of which are Protestant institutions, and 1 a Roman Catholic institution. The other (boys) receives both Protestant and Roman Catholic inmates. These schools are intended for children who have been convicted of crime; and criminal children committed by magistrates to Industrial Schools may be transferred thereto, and, in like manner, children not found to need reformatory restraints may be transferred to the care of the Department for Neglected Children. The number of children Inmates of reformabelonging to reformatories at the commencement of the year 1890 was tories. 354, and during the year there were 171 new committals, etc., thus making a total of 525. Of these 187 were discharged, viz., 34 at the request of relatives, 150 on expiration of term, and 3 died.

455

boarded-

Schools.

from

At the end of the year 338 children—208 boys and 130 girls remained in connexion with the institutions. Of the boys, 67 were in the reformatory at Ballarat, 88 were at service, and 53 were placed with relatives on probation; and of the girls, 18 were in the reformatory at Coburg, 20 were in the assisted reformatory school maintained under the supervision of the nuns at Oakleigh, 22 in the Brookside Protestant school, 67 were at service, and 3 were placed with relatives on probation.

Cost of maintenance of industrial and reformatory children. 800. The Government expenditure for the maintenance of neglected and offending children amounted in 1890 to £41,422, as against which £1,454 was received for maintenance from parents, and £286 was derived from the sale of farm produce, etc., or £1,740 in all, which leaves £39,682 as the net amount expended by Government. The mean number of children maintained was 3,330; and the average net cost of each to the State was thus £11 18s. 4d.

Refuges for fallen women.

801. Of the 902 females who were inmates of Refuges during the year ended 30th June, 1890, 114 were at the Temporary Home at Collingwood; 425 were at the Magdalen Asylum, Abbotsford; 84 at the Melbourne Refuge; 34 at the Ballarat Home; 20 at the Geelong Refuge; 114 at the South Yarra Home; and 111 at the Elizabeth Fry Retreat. Moreover, 58 children were allowed to accompany their mothers to the Melbourne Refuge, 13 to the Ballarat Home, and 5 to the Geelong Refuge, but of the total number 3 died during the year. Five women from the Magdalen Asylum, 10 from the South Yarra Home, and 10 from the Elizabeth Fry Retreat, were discharged for misconduct; and 6 in the Magdalen Asylum died. Besides these numbers, 272 from all the institutions were placed in service or restored to friends, 115 left voluntarily, 18 were sent to other institutions, 1 at the Melbourne Refuge was married, and 24 were otherwise discharged. At the end of the year, the number remaining in the institutions was 441, of whom 309 were in the Magdalen The objects of these institutions are (1) To provide a Asylum. refuge for women who have fallen into vice, and who are desirous to return to the paths of virtue; (2) To reclaim such women from evil courses, and fit them to become useful members of society; (3) To assist in procuring situations for such women, or in otherwise providing for them on leaving the institution. The late Commission on Charities, in their final report, drew attention to the waste of energy and funds, by the existence of sister institutions of this class, as various refuges might readily be worked together with economy and efficiency.

The Commission also considered that the site of the Melbourne Refuge, valued at £10,400, was too prominent and valuable for such a purpose, and that the inmates ought to be removed to the country, where there would be no necessity to place women within prisonlike walls, and where an institution might be conducted on home principles, which would tend far more to the reformation of the inmates than the present system.

802. In addition to the hospitals referred to in previous paragraphs, Conthere were two Convalescent Homes, with accommodation for about Homes. 64 inmates. The number of inmates at the beginning of the year 1889-90 was 16; 476 were admitted, and 474 were discharged, during the year; and 18 remained at its close. The receipts in 1889-90 amounted to £3,287, of which £300 was from Goverment; and the expenditure to £9,518, of which £1,439 was for maintenance, and £8,079 for buildings.

803. The Governesses' Institute and Melbourne Home contains 12 Governesses' sleeping-rooms, having 27,354 feet of cubic space, and makes up 35 beds. The inmates in 1890 numbered 128, of whom 69 were needle- Home. women and servants, and 59 were governesses. The receipts during the year, all from private sources, amounted to £829, and the expenditure to £830. The added to be any second and the other

804. The Melbourne Sailors' Home contains 3 wards, divided Sailors' Home. into 96 separate rooms, each containing one bed. The total number of cubic feet in the wards is 42,156. The total number of inmates in 1889 was 1,310. No aid was received from Government during the The receipts from private sources amounted to £4,497, and the year. expenditure to £5,371. The objects of the institution are to provide seamen frequenting the port of Melbourne with board and lodging at moderate charges, to encourage them in provident habits, and to promote their professional improvement.

Institute and Melbourne

805. Three free dispensaries furnished returns for 1889-90. One Free Dispenof these was a homeopathic institution. The individuals treated during the year ended 30th June, 1890, numbered 5,099, viz., 2,290 males and 2,809 females. The visits to or by these persons numbered 17,941. The total receipts amounted to £722, of which £250 was from Government and £472 from private sources. The total expenditure was £794. Alle testament bedreve of the section section.

Victorian Year-Book, 1890-91.

Benevolent Societies.

806. Forty-six benevolent or philanthropic societies furnished returns for the year ended 30th June, 1890. These associations are for the relief of distressed or indigent persons, and are generally managed by ladies. The names of three of the societies indicate their connexion with the Jewish body, but no distinctive denomination is perceptible in the titles of the others. The persons relieved during the year numbered about 14,800;* the receipts amounted to £16,119, of which £5,683 was from Government and £10,436 from private sources; and the expenditure to £16,118. SPAT

Night Shelters.

807. At Dr. Singleton's Night Shelters, Collingwood, 20,968 cases were accommodated during the year 1890-91, viz., 8,757 of men, 11,599 of women, and 612 of children. The receipts during the year, partly in kind and partly in cash, were equivalent to £800, and the expenses to £689.

Society for the Protection of Animals.

808. The Victorian Society for the Protection of Animals has been established for about 19 years, its object being to prevent cruelty to animals by enforcing the existing laws, by procuring such further legislation as may be found expedient, and by exciting and sustaining an intelligent public opinion regarding man's duty to the lower In 1889-90 the cases dealt with by the society numbered 684, animals. of which 531 were for cruelty to horses; whilst there were 210 prosecutions, which resulted in 194 persons being fined, 5 sent to prison without the option of a fine, and 11 dismissals. The receipts during the year amounted to £435, and the expenditure to £442.

Pauperism in England

809. There is no poor law in Victoria, nor is one required, as and Wales. happily pauperism does not exist here in the same sense as in the countries of the old world. The official returns of paupers in England and Wales are stated to be those showing the number of persons relieved exclusive of vagrants, and of pauper inmates of lunatic asylums, registered hospitals, and licensed houses. By the following figures, taken from a return ordered by the House of Commons to be printed, it would appear that, although the proportion of paupers to the population is still large in England and Wales, it has materially diminished of late years :---

* In the case of one Society, the number of families only was returned, viz., 350, and these have been reduced to individuals on the assumption that there were 5 persons to a family.

A PAUPERISM IN ENGLAND AND WALES, 1857 TO 1890.

810. Friendly Societies are associations chiefly of working men, Friendly whose object is, by means of small periodical payments, to provide for medical and monetary relief in sickness, and for payments to the families of members at the death of themselves and their wives. The following is an abstract of the particulars furnished respecting the Victorian societies for 1878 and the last three years :---

TOTOL MALT OF THE FRIENDLY SOCIETIES.

Societies.

* This fund is applied to the payment of medical attendance and medicines, and expenses of of a service of antipality and the new property function of the general management.

Victorian Year-Book, 1890-91.

Growth of Friendly Societies. 811. From the figures in this table it may be ascertained that, whilst during the twelve years ended with 1890 the number of members increased by 90 per cent., and the total annual expenditure by 92 per cent., the total annual income of the sick and funeral fund increased by as much as 119 per cent.; also that no less a sum than £466,896 was added to the sick and funeral fund in the same period, or an increase of 125 per cent. on the amount (£372,598) standing to its credit at the end of 1878.

Sickness and Death Rates. 812. In proportion to the number of effective members of Friendly Societies, the average amount of sickness remains tolerably steady from year to year. The days per effective member for which aliment was allowed numbered 9.9 in 1890, as compared with 8.9 in 1889, and an average of 9.0 during the eight years ended with 1890. The death rate in 1890 was slightly below the average, the deaths per 1,000 members having numbered 10.70 in 1890, as compared with 10.81 in 1889, and 10.93 on an average during the ten years ended with 1890.

Valuations of Friendly Societies.

813. Friendly Societies are regulated under the Friendly Societies Act 1890 (54 Vict. No. 1,094), as amended by the Act of 1891 (55 Vict. No. 1,232), which, amongst other provisions, prescribes that each society shall furnish returns annually to the Government Statist, and once in every five years shall cause its assets and liabilities to be valued to the satisfaction of the same officer. As, in the event of the valuations being made outside the department of the Government Statist, which was originally contemplated under the Statute, it would probably have been necessary to reject some of them, which would have occasioned delay and caused trouble and expense to the societies, a qualified actuary was some years since appointed to that department, and the valuations are effected by him. The fees for valuation have purposely been fixed low, and average no more than threepence per member, the result being that, although it is competent for the societies to employ outside valuers if they desire it, as a matter of fact, they very rarely do so, and all the valuations are now made by the departmental actuary, an arrangement which has worked in a most satisfactory manner.*

* For full particulars relating to the valuation and operations of Friendly Societies in Victoria, see Annual Reports of the Government Statist of the Proceedings in connexion with Friendly Societies, published by the Government Printer, Melbourne.

Social Condition. 4

814. In all the Australasian colonies the number of members of Friendly Friendly Societies is about 223,000, and they possess funds to the ^{Societies} in Australasia. following is a statement of the number of societies, branches, and members, also the total amount of funds to the credit of such societies, in the several colonies, at the latest date for which particulars have been supplied :—

Colony.	Year.	Number of separate Societies.	Number of Branches.	Number of Members.	Amount of Funds.	Capital per Member.
