AUSTRALIAN HARMONIZED EXPORT COMMODITY CLASSIFICATION (AHECC)

(Electronic Publication)

January 2004 issue

The January 2004 issue of the AHECC becomes operative on 1 January 2004. Users should ensure they have the latest version by using the complete updated manual, or by inserting the new set of replacement pages in their existing copies.

The AHECC is designed for use by exporters, customs brokers and freight forwarders in the classification of goods when providing export declarations to the Australian Customs Service, and to assist users interpret export statistics published by the Australian Bureau of Statistics (ABS).

It is compiled by the ABS and based on the six digit international Harmonized Description and Coding System (Harmonized System or HS) developed by the World Customs Organization (WCO) for describing internationally traded goods. Australia extends the six digit international HS by two digits to provide a finer level of detail to meet Australian statistical requirements.

The most significant changes to the classification occur when the WCO undertakes periodic reviews of the international HS. Implementation of the last review occurred on 1 January 2002 and the next is expected in 2007. Between these major reviews, the ABS keeps the AHECC current by making any updates required on 1 January and 1 July each year.

Copies of the AHECC and its replacement pages are available from the ABS web site, free of charge. To access this material, go to the ABS web site <www.abs.gov.au>, then select Themes, International Trade, AHECC. Users should check the International Trade theme page for the most recent information relating to the AHECC.

Any queries should be referred to the contact officers listed on page E/19. If you have any difficulties accessing the AHECC on the ABS web site, please contact the ABS Classification Manager on (02) 6252 5409 or email <international.trade@abs.gov.au>.

KEY OF CHANGES

The key of changes presents a history of the AHECC classification since its inception in 1988.

Whenever an AHECC code changes it is closed and a new code or codes created. This information is presented in the form of a table. The first column (Previous code) indicates the code that closed. The next column (Replacement code) shows the code or codes that were created as a result of the closure of the previous code. The Date replaced column indicates the date this change occurred. The Expiry date indicates when a code used to replace a previous code was subsequently closed.

Note that an asterisk * preceding a code indicates that the change occurred on 1 January 2004.
