## PREFACE.

By the Constitution of the Commonwealth of Australia, the Parliament of the Commonwealth is empowered "to make laws for the peace, order, and good government of the Commonwealth, with respect to Census and Statistics." In the exercise of the power so conferred, a "Census and Statistics Act" was passed in 1905, and in the year following, the "Commonwealth Bureau of Census and Statistics" was created. The first Official Year Book was published early in 1908. The publication here presented is the thirtieth Official Year Book issued under the authority of the Commonwealth Government.

The synopsis on pp. vii to xxi immediately following shows the general arrangement of the work. The special index (following the usual general index) provided at the end of the volume, together with certain references given in the various Chapters, will assist in tracing in previous issues matter which, owing to limitations of space, has been omitted or is not printed fully in the present volume.

Economic and financial conditions during recent years have caused a demand for new information, or information expressed in new terms, concerning many matters of finance, trade, prices, production and population, and some progress has been made in the later volumes towards bringing closer to present day requirements the Chapters dealing with these branches of statistics while the Appendix furnishes a summary, brought up to the latest available date, of the chief events in connexion with the financial crisis.

In the present volume the most notable contributions of new material are a series of index-numbers showing (i) the movement of export prices (p. 526), (ii) the course of employment in factories (p. 590), and (iii) similar trends in retail stores (p. 591). On page 564 the recent basic wage judgment of the Commonwealth Court of Conciliation and Arbitration is reviewed and the main parts of the judgment are reprinted. The results of an extensive analysis of wheat holdings in 1935-36 are included in Chapter XX., and a summary of the recommendations of the Royal Commission appointed to inquire into the Monetary and Banking Systems in Australia is inserted in the Appendix.

All rates, etc., based on the mean population in the various chapters of this volume have been revised in accordance with the results of the Census of the 30th June, 1933.

Later information which has come to hand since the various Chapters were sent to press has been incorporated in the Appendix (p. 971).

The material contained in each issue is always carefully examined, but it would be idle to hope that all error has been avoided. I shall be grateful to those who will be kind enough to point out defects or make suggestions.

My best thanks are due to the State Statisticians, who have collected and compiled the data on which the greater part of the information given in the Year Book is based. Thanks are also due to the responsible officers of the various Commonwealth and State Departments, and to others, who have kindly, and often at considerable trouble, supplied information.

I wish to express my keen appreciation of the valuable work performed by Mr. J. Barry, the Editor of the Year Book, and of the services rendered by the officers in charge of the various branches of the Commonwealth Bureau of Census and Statistics, upon whom has devolved the duty of revising the Chapters relative to their respective branches.

ROLAND WILSON,  
Commonwealth Statistician.
