Nine children ..	856	7,704	Total ..	1,304,227	2,764,167

(a) Under 16 years of age.

### § 6. Widows' Pensions.

Widows' pensions and the rates in each class, as from 18th October, 1955, have been payable to the following classes of women :—

Class "A"—A widow who has the custody, care and control of one or more children under the age of 16 years. Rate £221 per annum.

Class "B"—A widow, not less than 50 years of age, who has no children under 16 years of age in her custody, care and control. Rate £175 10s. per annum.

Class "C"—A widow, under 50 years of age, who has no children under the age of 16 years in her custody, care and control, but is in necessitous circumstances within 26 weeks after the death of her husband. Rate £3 7s. 6d. per week for not more than 26 weeks. If at her husband's death, a widow is with child, this period will be extended until the birth of the child. She would then, of course, become eligible for an "A" class widow's pension.

Class "D"—A woman whose husband has been serving a term of imprisonment for at least six months, if she has the custody, care and control of one or more children under the age of 16 years or is not less than 50 years of age. Rate £15 10s. per annum.

The term "widow" includes :—a "dependent female" (i.e. a woman, who, for not less than three years immediately prior to the death of a man, was wholly or mainly maintained by him as his wife on a permanent and bona fide domestic basis) ; a deserted wife (i.e. a woman deserted by her husband for not less than six months) ; a divorcee (i.e. a woman whose marriage has been dissolved and who has not remarried) ; and a woman whose husband is an inmate of a mental hospital.

The residential qualification is five years' continuous residence in Australia immediately prior to the date of lodgment of the claim. This period is reduced to one year where the claimant and her husband were residing permanently in Australia when the husband died.

A widow's pension is not payable to :—a woman who is not a British subject unless she was a British subject before her marriage ; a woman who is in receipt of an age or invalid pension, tuberculosis allowance, or a war widow's pension under the Repatriation Act in respect of the death of her husband ; a woman who has deprived herself of property or income in order to qualify for a pension ; a deserted wife or a divorcee who has not taken reasonable action to obtain maintenance from her husband or former husband ; a woman who is not of good character ; a woman who is not deserving of a pension ; a woman in Class " A " in receipt of income of £403 per annum or more or owning property, apart from her permanent home and other exempt property, to the net value of more than £1,750 or a woman in Classes " B " or " D " in receipt of income of £357 10s. per annum or more or owning property, apart from her permanent home and other exempt property, to the net value of more than £1,750.

Widows' pensions may be granted to aboriginal native women of Australia under the same conditions as age pensions.

Permissible income is £182 per annum. Any income in excess of this amount is deducted from the pension. " Income " has the same meaning as for age pensions. Any amount in excess of 15s. per week received by a deserted wife, or a divorcee from her husband or former husband, for the maintenance of a child is taken into account in the claimant's income.

The rate of pension for women in Classes " B " and " D " is reduced by £1 per annum for every complete £12 of the value of property which exceeds £200 up to £1,750. Property disregarded for pension is the same as for age pensions.

The pension payable to a Class " A " widow may be continued after her child reaches 16 years and until the age of 18 years is reached if the child continues with full-time education at a school or university and is still dependent on the widow and is not in employment.

The number of widows' pensions by Class, current at 30th June, 1954, was as follows :—Class " A ", 18,100 ; Class " B ", 22,314 ; Class " C ", 131 ; Class " D ", 181 ; total, 40,726. The amount paid in pensions during 1953-54 was £6,625,679. The following table shows details of widows' pensions paid in each State in the year 1953-54 :—

(a) The Commonwealth Government commenced to pay widows' pensions from 1st July, 1942.  
 (b) Excludes fourteen pensions in respect of pensioners in Benevolent Homes. (c) Based on mean population for the financial year. (d) Included in average rate for South Australia. (e) Included in average rate for New South Wales. (f) Included in figures for State in which pensioner is permanently domiciled.

## § 7. Unemployment and Sickness Benefits.

From 1st July, 1945, men over 16 and under 65 years of age, and women over 16 and under 60 years of age and who were qualified in other respects, have been eligible to apply for an unemployment benefit or a sickness benefit. There is a twelve months' residential requirement but this is waived if the claimant is likely to remain permanently in Australia. A person in receipt of an age, invalid or widow's pension, or a service pension (as distinct from a war pension) under the Repatriation Act or a tuberculosis allowance is ineligible to receive a benefit.

To qualify for an unemployment benefit a person must establish that he is unemployed and that his unemployment is not due to his being a direct participant in a strike; that he is capable and willing to undertake suitable work; and that he has taken reasonable steps to obtain such work. Registration with the local Commonwealth District Employment Officer is necessary.

To qualify for a sickness benefit a person must establish that he is temporarily incapacitated for work by reason of sickness or accident and that he has thereby suffered a loss of salary, wages or other income.

A married woman is not qualified to receive a sickness benefit if it is reasonably possible for her husband to maintain her. Where her husband is able to maintain her only partially, a benefit may be paid at such rate as is considered reasonable in the circumstances. In exceptional cases a married woman may qualify for an unemployment benefit in her own right.

A benefit may be paid only to those aboriginal natives of Australia who are considered suitable, by reason of character, standard of intelligence and social development.

The maximum weekly rates of benefit payable and permissible income from 22nd September, 1952, are as follows :—

A married claimant can receive £2 10s. and £2 for a dependent spouse and 5s. for one child under 16 years of age with other income of £1. The amount for an unmarried claimant 21 years of age or over is £2 10s. with other income of £1, for those between 18 years and under 21 years £2 with other income of 15s., for those 17 years and under 18 years £1 10s. with other income of 10s., and for those 16 years and under 17 years £1 10s. with other income of 5s.

Where an unmarried claimant has the custody, care and control of a child under the age of sixteen years, the total benefit may be increased by 5s. per week.

Additional benefit of up to £2 per week may be paid in respect of a claimant's housekeeper where no such benefit is payable in respect of his wife, provided there are one or more children under 16 years of age in the home and the woman is substantially dependent on the claimant but is not employed by him.

Any income in excess of the permissible income is deducted from the rate of benefit. For unemployment benefit purposes, the incomes of the claimant and his spouse are taken into account, but where the claimant and his spouse are permanently separated any income received by the spouse may be disregarded. For sickness benefit purposes, the income of claimant only is taken into account, while up to £2 per week is disregarded of any payment received from an approved friendly society or other similar approved body in respect of the incapacity for which sickness benefit is payable. "Income" does not include child endowment, or other payments in respect of children, the Commonwealth hospital benefits and pharmaceutical benefits, or a tuberculosis allowance or an amount paid in reimbursement of medical, dental or similar expenses actually paid.

Where a person qualified for sickness benefit receives or is entitled to receive (in respect of the same period and the same incapacity for which sickness benefit is payable) any payment by way of compensation (including workers' compensation), damages, or otherwise under any law (except payments for which he has contributed), the amount of the compensation, etc., is not taken into account as income but is deducted from the rate of sickness benefit otherwise payable.

There is a waiting period of seven days in respect of which unemployment or sickness benefit is not payable. A special benefit may be granted to a person not qualified for

unemployment or sickness benefit who is not in receipt of an age, invalid or widows' pension or a service pension, if by reason of age, physical or mental disability or domestic circumstances, or for any other reason, he is unable to earn a sufficient livelihood for himself and his dependants. Unemployment and sickness beneficiaries are eligible to participate in the Commonwealth rehabilitation service under the same conditions as invalid pensioners. Payment of an unemployment or sickness benefit may be refused if the claimant or beneficiary, on being required, fails to undergo a medical examination or to receive treatment or undertake training or to do any suitable work. See A, § 3, page 547. The following table shows the number admitted to benefit during 1954-55, the number of persons on benefit at 30th June, 1955, and the amount paid for each benefit during 1954-55.

(a) Excludes migrants.

(b) Includes payments to migrants.

## § 8. Reciprocal Agreements with Other Countries.

1. **New Zealand.**—An agreement between the Governments of Australia and New Zealand for reciprocity in social services came into operation on 1st July, 1949.

The reciprocal arrangements cover age and invalid pensions, widows' pensions, child endowment and unemployment and sickness benefits, and apply to both permanent and temporary changes of residence.

Residence in one country counts as residence in the other country in relation to entitlement to benefits in which a residential qualification applies.

Persons from one country taking up permanent residence in the other country become eligible for any of the specified benefits of the new country under the same conditions (with one or two exceptions) as apply to citizens of that country.

Persons in receipt of any of the specified benefits in one country may continue to receive those benefits while temporarily absent in the other country. These payments are made on an agency basis by the appropriate authority of the country in which the person is temporarily resident.

2. **United Kingdom.**—The Governments of the United Kingdom and Australia signed a reciprocal agreement on social services in London on 8th June, 1953.

The agreement covers age and invalid pensions, widows' pensions, child endowment, and unemployment and sickness benefits. Under the agreement former residents of the United Kingdom over pension age—65 years for men and 60 years for women—who were in the National Insurance Scheme when they left the United Kingdom will be eligible to receive Australian pensions without having to complete 20 years' residence in Australia.

Subject to the means test, these persons so entitled have any United Kingdom pensions they receive supplemented by Australia to bring the total payments in most cases to the maximum pension rate for Australians—at present £4 per week.

Similar principles apply to widows' pensions. Australian residential requirements will be waived for these pensions, also for invalid pensions, child endowment and unemployment and sickness benefits.

With few exceptions, all these benefits will be payable to former residents of the United Kingdom at the same rates as are payable to Australian citizens.

Persons from Australia going to the United Kingdom for permanent residence will be treated in the United Kingdom as if they had been insured under the National Insurance Scheme while in Australia, so that they can qualify for various National Insurance benefits.

Families who go from one country to another will be able to qualify for child endowment, or family allowances, as soon as they arrive in their new country.

There is also provision for the safeguard of social service rights for Australians going to the United Kingdom for temporary residence, and vice versa.

The agreement came into operation in both countries on 7th January, 1954.

## B. OTHER SERVICES.

### § 1. Benevolent Homes.

1. **General.**—The public provisions for the care of indigent old people have been a feature of the social development of recent years in most countries. Numerous establishments exist in Australia for the housing and protection of persons no longer able to provide for themselves. These homes are supported by Government and municipal aid, public subscriptions, bequests, etc.; while in many cases relatives of poor and afflicted persons contribute to their maintenance.

An entirely satisfactory statistical tabulation in regard to all forms of charitable aid is especially difficult in the case of benevolent institutions, because the services provided by these institutions are not always identical.

2. **Principal Institutions.**—Particulars respecting the accommodation and the number of inmates of the principal institutions were published in earlier issues of the Official Year Book (*see* No. 22, p. 485).

3. **Revenue and Expenditure.**—Details regarding revenue and expenditure for the year 1953-54 are given in the following table.

#### BENEVOLENT HOMES : REVENUE AND EXPENDITURE, 1953-54.

(a) These figures relate to the three State hospitals and homes only. (b) Year ended 31st March, 1954. (c) Includes Commonwealth Hospital Benefits and Age and Invalid Pension receipts. (d) Includes such items as purchase of land, cost of new buildings and additions to buildings.

4. **The Aged Persons Homes Act.**—The *Aged Persons Homes Act* No. 81, 1954 operated from 16th December, 1954. The purpose of the Act is to encourage and assist the provision of suitable homes for aged persons, ("Aged Person" means a man who has reached the age of 65 years or a woman who has reached 60 years and includes the wife or husband of an aged person residing or desiring to reside with the aged person) and in particular homes at which aged persons may reside in conditions approaching as nearly as possible normal domestic life, and, in the case of married people, with proper regard to the companionship of husband and wife.

Subject to this section, a society, association or other organization is eligible for assistance under this Act if—

- (a) it is carried on otherwise than for purposes of profit or gain to the individual members ; and
- (b) it is a religious organization ; an organization, the principal objects or purposes of which are charitable or benevolent ; an organization of former members of the Defence Forces established in every State or a State branch of such an organization ; or an organization approved by the Governor-General for the purpose of this Act.

A trustee or trustees under a trust established for charitable or benevolent purposes shall, if the Governor-General so approves, be deemed to be an organization referred to in the last preceding sub-section.

An organization conducted or controlled by, or by persons appointed by, the Government of the Commonwealth or of a State or a local governing body established under the law of a State, is not eligible for assistance under this Act.

Where the Director-General is satisfied that a building or buildings erected or to be erected, or purchased or to be purchased, by an organization is or are intended to be used permanently by or on behalf of the organization as a home or homes for the accommodation of aged persons, he may, in his discretion, approve that building or proposed building or those buildings or proposed buildings as a home for the purposes of this Act.

A building or proposed building shall not be approved under this section unless—

- (a) it was in course of erection by the organization on the 4th May, 1954 ;
- (b) its erection by the organization was commenced after the date specified in the last preceding paragraph or is to be commenced after the date of the approval ; or
- (c) it was purchased by the organization after the date specified in paragraph (a) of this sub-section or is to be so purchased after the date of the approval.

The Director-General may, in his discretion, on behalf of the Commonwealth, make a grant of moneys in accordance with this Act to an organization as assistance towards meeting the capital cost of an approved home.

A grant under this section shall be made at such time, or by such instalments and at such times, as are determined by agreement between the Director-General and the organization or, in the absence of agreement, by the Director-General.

A payment under this Act shall not be made except to a corporation in which, or to trustees in whom, the approved home is or is to be vested.

Subject to this section the amount of a grant under the Act in respect of an approved home shall be an amount not exceeding—

- (a) one half of the capital cost of the home, as determined by the Director-General ; or
- (b) the sum of the moneys expended, and the moneys presently available for expenditure, by the organization towards the capital cost of the home, being moneys which the Director-General is satisfied did not become available as a result of the borrowing of those moneys or any other moneys by the organization and were not received by the organization from the Government of the Commonwealth or of a State or from a local governing body or other authority established by a State Act, whichever is the less.

The Director-General shall not make, or agree to make, a grant under this Act to an organization in respect of an approved home unless he is satisfied that the sum of the moneys expended, and the moneys presently available for expenditure, by the organization towards the capital cost of the home together with the amount of the grant, will be not less than the capital cost of the home.

## § 2. Orphanages, Industrial Schools, etc.

1. General.—The methods of caring for orphans and neglected children differ extensively, inasmuch as some of the children are more or less segregated in orphanages and industrial schools, while others are boarded out with their mothers or female relatives or with approved foster-mothers. The children in orphanages and similar institutions

may receive, in addition to primary education, some craft training. In all cases employment is found for the children on their discharge from the institution, and they remain for some time under the supervision of the proper authorities. The conditions under which orphans, neglected children and children boarded out live are subject to frequent departmental inspections.

2. **Principal Institutions.**—Particulars concerning the principal institutions in each State were published in earlier issues of the Official Year Book (*see* No. 22, p. 486).

3. **Transactions of State Departments.**—The following table summarizes the transactions of State Departments during 1953-54 in connexion with children under their control or supervision. In addition to neglected children, the figures include uncontrollable and convicted children who are wards of a Government authority, as well as poor children whose parents obtain assistance from the Government without giving up the legal right of custody.

#### CHILDREN UNDER GOVERNMENT AUTHORITY : SUMMARY, 1953-54.

Particulars.	N.S.W.	Vic.(a)	Q'land.	S. Aust.	W. Aust.	Tas.	Total.

<i>Net Cost to State ..</i>	942,681	415,043	316,062	212,148	99,285	20,914	2,006,133

(a) Year ended 31st December, 1953.  
after-care ex-institution inmates.

(b) Includes inmates of hospitals.

(c) Includes 544

The total expenditure on children's relief in the foregoing table shows considerable variation amongst the States owing to the different methods of treating assistance to mothers with dependent children. In South Australia, Western Australia and Tasmania large amounts have been excluded from the total expenditure on this account owing to the difficulty of obtaining separate amounts for allowances made in respect of the dependent children only.

### § 3. Protection of Aborigines.

For the protection of the aboriginal Australian race there are institutions, under the supervision of Aborigines Boards, where these people are housed and encouraged to work, the children receiving elementary education. The work is usually carried on at mission stations, but many of the natives are nomadic, and receive food and clothing when they call, while others only rarely come near the stations. The aboriginal native race is extinct in Tasmania. The expenditure from Consolidated Revenue in 1953-54 was as follows (figures in brackets are for year 1952-53):—New South Wales, £151,100 (£148,652); Victoria, £10,960 (£9,534); Queensland, £510,696 (£489,654); South Australia, £84,815 (£44,049); Western Australia, £180,517 (£154,400); Northern Territory, £354,266 (£278,492); Australian Capital Territory, £3,227 (£2,739); total for Australia, £1,295,581 (£1,127,520).

### § 4. Royal Life Saving Society.

In each of the State capitals, "centres" of the Royal Life Saving Society have been established, and in some States sub-centres have also been established in the larger provincial districts. In 1934 an Australian Federal Council of this Society was formed with headquarters at Melbourne, and each State centre, or branch, as it is now called, is controlled by this organization. Saving of life from drowning and other forms of asphyxiation is the object of the Society, and its immediate aims are (a) educative and (b) remedial. The encouragement of swimming and life-saving in schools, colleges, clubs, etc., will bring about a more widespread knowledge of these necessary matters, and there is increasing provision of life-belts, reels, lines, warning provisions, and other first-aid appliances on ocean beaches, wharves and other suitable places. Numerous certificates of proficiency in various grades are issued annually after examination throughout Australia, the number for the individual States for 1953-54 being:—New South Wales, 1,796; Victoria, 7,146; Queensland, 1,587; South Australia, 5,108; Western Australia, 485; and Tasmania, 3,557.

### § 5. Royal Humane Society.

The Royal Humane Society of Australasia with head office at 188 Collins-street Melbourne has as its main object the granting of awards to all who with bravery, skill and perseverance promptly risk their own lives in saving or attempting to save those of their fellow creatures. The classes of awards are (a) Gold Medal; (b) Silver Medal; (c) Bronze Medal; and (d) Certificate of Merit. The Clarke Medal is awarded for the outstanding case of the year, and the Rupert Wilks Trophy is awarded for the most outstanding bravery by a child under 13 years of age. About 75 awards are made annually.

### § 6. The Order Of St. John.

The Priory in Australia of the Most Venerable Order of the Hospital of St. John of Jerusalem is the governing body of the various activities of the Order which comprise the St. John Ambulance Association, the St. John Ambulance Brigade and the Hospitallers' Clubs in all States and Commonwealth Territories.

The teaching of first aid to the injured, home nursing, hygiene and child welfare are undertaken by the Association and carried out in a practical manner by the Brigade and qualified members of the public throughout the Commonwealth, in times of peace and war.

The Hospitallers' Clubs in each State undertake the collection of funds for the St. John Ophthalmic Hospital in Jerusalem, and other duties which tend to bring together all persons interested in the work of St. John.

The Order of St. John has established ambulance transport services in some States, acts as an ancillary to such services in other States, provides technical reserves for the medical services of the Crown and trained personnel for the various air raid precaution organizations.

The Life Saving Medal is awarded by the Order as warranted.

### § 7. Other Charitable Institutions.

Owing to the variety of name and function of other charitable institutions it has been found impracticable to give detailed results. The aid given in kind—food, clothing, tools of trade, etc.—is considerable, whilst the shelter and treatment afforded range from a bed for a night for casual callers in establishments ministering minor charity to indoor treatment over long periods in those that exist for the relief of the aged and the infirm. The institutions not so particularized include homes for the deaf, dumb and blind, infant homes, homes for the destitute and aged poor, industrial colonies, night shelters, crèches, rescue homes for females, free kindergartens, auxiliary medical charities, free dispensaries, benevolent societies and nursing systems, ambulance and health societies, boys' brigades, humane and animals' protection societies, prisoners' aid associations, shipwreck relief societies, bush fire, flood and mining accident relief funds, etc.

## CHAPTER XVI.

### POPULATION.

**NOTE.**—The figures shown throughout this chapter for the Census of 30th June, 1954, are the final results, and population estimates shown for the intercensal period 1947 to 1954 are revised figures which have been adjusted in accordance with these results.

A summary of additional census data which became available after this chapter was sent to press will be found in the Appendix.

#### § 1. Population Statistics.

Population statistics relating to Australia or to the component States and Territories as at specific dates are of two types—

- (i) *Those ascertained by census enumeration.* These results attain a very high degree of accuracy and may generally be accepted without reservation.
- (ii) *Estimates derived by the application of vital and migration statistics to census data.* In general, three estimates are made for any specific date :
  - (a) Original estimates for dates subsequent to a census made before another census is taken.
  - (b) Two-stage revision of the original estimates for each newly completed intercensal period to adjust for the difference between the new census result and the comparable estimate. This is to bring intercensal estimates into line with the two census populations. The first revision is reconciled with preliminary census results and the second revision with final census results.

Final revised figures become the permanent population estimates. For purposes requiring a mean population for any twelve-month period such mean is calculated as described in § 4. As populations at specific dates are used in these calculations, consequential revisions are made in mean populations when the estimates for specific dates are revised as described above.

In accordance with this policy all Australian population statistics shown in this issue of the Year Book for dates up to 30th June, 1954, and all mean populations for calendar years up to 1953 and financial years up to 1953-54 are final. Population statistics for dates or years subsequent to these are subject to revision when another census is taken.

Since the establishment of the Commonwealth Bureau of Census and Statistics the populations of the States and Territories have been estimated in a comparable manner and attention has been given to the improvement of the basic demographic data from which the estimates are compiled. The principal source of error in early estimates lay in the migration records, both overseas and interstate, and efforts were directed towards their improvement. The 1911 Census disclosed an error in the precensal estimates equivalent to proportions of 14.5 per cent. and 10.0 per cent., respectively, of recorded male and female overseas departures from Australia. These proportions were used as adjusting factors to recorded overseas departures during the intercensal period 1911-21. These adjusting factors were reduced after the 1921 Census to 1 per cent. for males and 4.5 per cent. for females and were discontinued altogether after the 1933 Census. From the results of the 1954 Census it appears that the accuracy of the records of overseas migration is such that in future little adjustment to recorded figures will be necessary for Australia as a whole.

It is improbable that the same degree of accuracy as has been attained in the record of overseas migration can be reached in the case of interstate movements. Records are made of interstate passengers by sea, rail and air, but it is impracticable, with occasional important exceptions, to record the movements by road.

## § 2. The Census.

1. **Census-taking.**—Although “musters” of the population were carried out at least annually from 1788 to 1825, the first regular census in Australia was not taken until 1828 when a count of the population of the Colony of New South Wales was made. Subsequent censuses were taken sporadically in the various colonies until 1881, when a census was taken on the same date throughout Australia.

In 1891 and 1901 census-taking was still in the hands of the Government Statisticians of the States, but, in 1911, under the provisions of the Commonwealth Census and Statistics Act, which provides for the enumeration to be made from one centre instead of by each State as formerly, the Commonwealth Statistician undertook the first census of the Commonwealth of Australia. The second was taken in 1921, the third in 1933, the fourth in 1947 and the fifth as on the night of 30th June, 1954.

2. **Population recorded at Censuses.**—State and Territorial populations recorded at the Australia-wide censuses taken over the period 1881 to 1954 are shown in the following table. The figures relate to the political boundaries of the several States (or Colonies) as they existed at the date of each census except that Northern Territory has been shown separately from South Australia for three censuses prior to its transfer from that State. The years of formation of the separate Colonies and transfer of the Territories are shown in Chapter I, § 4. and § 5. The total populations recorded at the censuses taken in the Colonies from 1828 to 1876 were shown in Official Year Book No. 40, page 326.

(a) Final figures. (b) Includes Australian Capital Territory. (c) Part of New South Wales prior to 1911.

NOTE.—Minus sign (—) denotes decrease.

The numerical increase during the period 1947-54 (7 years) was greater by 457,653 than that for the period 1933-47 (14 years) and the proportional increase rose from 14.32 per cent. for 1933-47 to 18.57 per cent. for 1947-54. The increase during the earlier period corresponds to 0.96 per cent. per annum, and in the latter to 2.46 per cent. per annum.

### § 3. Growth and Distribution of Population.

1. **Growth of Population.**—The table which follows shows the growth in the population of each sex in the various States and Territories as measured by the estimated population at 31st December in 1880 and thereafter at decennial intervals to 1950. Each year from 1947 to 1954 is included in order to show recent fluctuations in greater detail.

#### ESTIMATED POPULATION : 1880 TO 1954.

(EXCLUDING FULL-BLOOD ABORIGINALS.)

Adjusted in accordance with the final results of the Census of 30th June, 1954.

(a) Northern Territory figures included with South Australia prior to 1900. (b) Part of New South Wales prior to 1911. (c) Includes all defence personnel enlisted in Australia irrespective of movements subsequent to enlistment.

Estimates of population for intercensal years are obtained in the manner outlined in § 1.

The estimated population at 31st December each year from 1788 to 1946 on the same basis as in the table above is shown in *Demography Bulletin* No. 67, 1949 and for the period 1881 to 1954 in *Demography Bulletin* No. 72. Figures shown therein for the years 1947 to 1954 have also been revised in accordance with results of the 1954 Census. A graph illustrating the growth of the population of Australia and of each State and Territory appears on page 593.

2. Present Numbers.—The population of Australia at 31st December, 1954, was estimated at 9,090,395 persons of whom 4,598,009, or 50.58 per cent., were males and 4,492,386, or 49.42 per cent., were females. The increase during 1954 was 187,709, equal to 2.11 per cent., males having increased by 94,731 or 2.10 per cent., and females by 92,978 or 2.11 per cent. This increase was due to an excess of births over deaths of 120,451, together with a net gain by migration of 68,207 persons. An adjustment of 949 persons was necessary to effect a reconciliation with the final results of the Census of 30th June, 1954.

3. Proportion of Area and Population, Density and Masculinity.—A previous table shows the number of persons in each of the States and Territories at 30th June, 1954. In the following table the proportions of the total area and of the total population represented by each State and Territory are given, together with the density and the masculinity of the population.

**DENSITY AND MASCULINITY OF POPULATION, CENSUS, 30th JUNE. 1954.**  
(EXCLUDING FULL-BLOOD ABORIGINALS.)

(a) Number of persons per square mile.

(b) Number of males per 100 females.

Additional information regarding density and masculinity of population appears in later sections of this chapter.

4. **Urban and Rural Distribution.**—Particulars of the distribution of the population amongst metropolitan, provincial urban and rural areas in each State and Territory at the 1947 Census were shown in Official Year Book No: 39. pages 521-524.

At the Census of 30th June, 1954, the number of persons and the proportion of the total population of Australia in each division were:—metropolitan urban 4,845,230, 53.92 per cent.; other urban 2,230,039, 24.81 per cent.; rural 1,887,892, 21.01 per cent. Migratory population (23,369) accounted for the remaining 0.26 per cent.

Of the States Victoria had the largest proportion of population residing in the metropolitan area (62.15 per cent.) but was closely followed in this respect by South Australia (60.66 per cent.). Percentages for the other States were:—New South Wales, 54.42; Queensland, 38.10; Western Australia, 54.50; and Tasmania, 30.84.

A feature of the metropolitan population is its relatively high femininity. In 1933, 52.5 per cent. of the metropolitan population was composed of females; in 1947, the proportion had fallen slightly to 51.9 per cent., being highest in Tasmania at 52.3 per cent.; at the Census of 30th June, 1954, the proportion had fallen to 51.0 per cent., there being little difference in the proportions as between the several States.

Metropolitan Urban Divisions include the capital cities of the States and (included in 1954 for the first time) Canberra, the capital city of Australia, the boundaries of the capital cities being determined for census purposes by the Statisticians of the States, and normally include the city proper and all adjoining urban areas. In order to conform to the growth of the metropolitan urban population the boundaries are reviewed at each census and adjustments made, wherever necessary, to embrace contiguous urban areas that have developed since the previous census. Amendments were made prior to the Census of 1954 to the boundaries of the Metropolitan Urban Divisions in New South Wales, Victoria and Tasmania.

Other Urban Divisions comprise the capital city of the Northern Territory, all separately incorporated cities and towns, and all other towns with a population of 1,000 persons or more (750 in Tasmania), outside the Metropolitan Urban Divisions. The inclusion in the Other Urban Divisions in 1954 of the larger towns not separately incorporated was a significant departure from the classification adopted at previous censuses, when these towns (in all States except Tasmania) were included in the Rural Divisions, and the Other Urban Divisions (or Provincial Urban Divisions) were restricted to provincial separately incorporated cities and towns only. As it is not possible to provide 1947 particulars for all these towns, the particulars for the Other Urban and Rural Divisions for 1947 have been combined in the table below.

Rural Divisions comprise the remaining portions of each State and Territory, and are affected by the intercensal changes in the areas of the Metropolitan Urban and Other Urban Divisions. As already mentioned, the Rural Divisions in 1954 exclude the towns of 1,000 persons or more (750 in Tasmania) which were not separately incorporated.

The term "Migratory" used in the following tables refers to persons not elsewhere enumerated who at midnight between 30th June and 1st July, 1954 were on ships in Australian waters or were travelling on long-distance trains or aircraft.

(a) See letterpress on page 571. (b) Adjustments have been made to the 1947 Census figures for the Metropolitan Divisions of New South Wales, Victoria and Tasmania in order to provide approximate comparisons on the 1954 Census basis. See letterpress on page 571.

NOTE.—Minus sign (—) denotes decrease.

5. Metropolitan Population : Australia and Other Countries.—In Australia there is an abnormal concentration of population in the capital cities, which are the only cities of outstanding importance in the various States. A comparison with the capitals of the more important countries is given in the following table.

**METROPOLITAN POPULATION : AUSTRALIA AND OTHER COUNTRIES.**  
(1954.)

State or Country.	Metropolis.	Year.	Metro- politan Popu- lation.	Country.	Metropolis.	Year.	Metro- politan Popu- lation.

(a) Metropolitan Area.

(b) Entire Urban Area.

7. **Urban Areas Outside Metropolitan Areas.**—The proportion of the total population of each State which was located in incorporated urban provincial areas at the 1933 and 1947 Censuses is shown in Official Year Book No. 39, pages 522-3 and in Official Year Book No. 40, page 334, there is a table showing aggregate population at the 1947 Census of all cities and towns outside the metropolitan area of each State with 2,000 or more and 3,000 or more inhabitants, irrespective of whether such centres were incorporated separately or not. In addition, the proportion of the aggregate population of these cities and towns to the total population of the State is shown. The following table shows similar particulars for the 1954 Census.

**AGGREGATE POPULATION OF CITIES AND TOWNS OF SPECIFIED SIZE :  
CENSUS, 30th JUNE, 1954.**

(EXCLUDING FULL-BLOOD ABORIGINALS.)

State or Territory.	Cities and Towns outside Metropolitan Area with Population of—					
	2,000 and over.			3,000 and over.		
	Number.	Population.	Proportion of Total Population.	Number.	Population.	Proportion of Total Population.
			%			%

<b>Total ..</b>	<b>233</b>	<b>1,986,378</b>	<b>22.10</b>	<b>160</b>	<b>1,807,156</b>	<b>20.11</b>

(a) Excludes that part of Liverpool Municipality outside the Metropolitan Area of Sydney.

(b) Excludes that part of Fremantle suburbs outside the Metropolitan Area of Perth.

In the foregoing table urban areas comprising two or more Local Government Areas or portions thereof are treated as units. The urban areas so treated are : in New South Wales, Newcastle ; in Victoria, Ballaarat, Bendigo, and Geelong ; in Western Australia, Kalgoorlie ; and in Tasmania, Launceston. The figures in each instance include the populations of the adjoining areas which, together with the city proper, constitute the entire urban area.

The numbers of towns of 2,000 or more inhabitants in New South Wales and Victoria, and of 3,000 or more in New South Wales, show considerable decreases as compared with the figures for the 1947 Census. This is due to the absorption, by the increased metropolitan areas, of towns within these ranges which were formerly outside the metropolitan limits, and, in New South Wales, to similar absorptions by the City of Blue Mountains, Greater Wollongong and Newcastle Urban Area.

8. Principal Cities in the World.—The following table shows the population of the world's largest cities at the latest available date :—

### POPULATION OF THE WORLD'S LARGEST CITIES.

(a) Greater London. (b) Greater Tokyo. (c) Includes Howrah. (d) Greater Budapest.  
(e) Greater Montreal. (f) Greater Athens, including Piraeus. (g) Greater Toronto.

### § 4. Mean Population.

1. General.—Mean populations are calculated for twelve-month periods to provide a satisfactory average basis for calculations requiring allowance for the continuous change in population figures during such periods.

2. Method of Calculation.—From 1901 onwards the mean population for any year has been calculated by the formula :—

$$\text{Mean Population} = \frac{a + 4b + 2c + 4d + e}{12}$$

where *a*, *b*, *c*, *d* and *e*, respectively, are the populations at the end of the quarter immediately preceding the year and at the end of each of the four succeeding quarters. e.g., in the case of a calendar year, 31st December of the preceding year and 31st March, 30th June, 30th September and 31st December of the year under consideration. This

formula gives a close approximation to the mean of a theoretical population progressing smoothly through the five values *a, b, c, d, e*. The principles underlying the adoption of the formula were set out in some detail in Section V. of *Population and Vital Statistics Bulletin* No. 1, 1907.

3. Results.—(i) *Calendar Years*. The following table shows the mean population of each State and Territory for the calendar-years 1944 to 1954 :—

#### MEAN POPULATION : CALENDAR YEARS.

(a) Includes all defence personnel enlisted in Australia irrespective of movements subsequent to enlistment.

### § 5. Elements of Increase.

1. *Natural Increase*.—(i) *General*. The two factors which contribute to the growth of a population are the “natural increase,” i.e., the excess of births over deaths, and the “net migration,” i.e., the excess of arrivals over departures. In earlier issues of the Official Year Book particulars of the natural increase from 1861 were given for each sex and for each State and Territory (see No. 22, page 899). Figures for more recent years will be found in *Demography Bulletin* No. 72.

During the present century the rate of natural increase grew until it reached a maximum rate of 17.44 per thousand of population in 1914, but it steadily declined after that year to 7.07 in 1934. There was little change until 1939, but during the war and in the post-war period the rate rose sharply, reaching the level of 14.37 in 1947, and it has since remained at between 13 and 14 per 1,000 of population.

In the following table particulars of the natural increase in each State and Territory are given for each sex for each five-year period from 1926 to 1950 and for each of the years 1947 to 1954.

POPULATION : NATURAL INCREASE (EXCESS OF BIRTHS OVER DEATHS).  
(EXCLUDING FULL-BLOOD ABORIGINALS.)

(a) Excess of births over civilian deaths from September, 1930 to June, 1947. (b) Excess of births over deaths per 1,000 of mean population. (c) Excess of births over civilian deaths per 1,000 of mean population from September, 1939 to June, 1947. (d) Revised in accordance with the final results of the Census of 30th June, 1954.

NOTE.—Minus sign (—) denotes excess of deaths over births.

During the first five years of the present century the average increment to the population of Australia by natural increase was 56,886 persons per annum. The increment rose to 81,695 persons per annum in 1921-25, but thereafter fell to 52,650 persons per annum in the five years 1931-35, increasing during 1936-40 to 54,489. During 1941-45 the average annual excess of births over civilian deaths was 74,750, while during 1946-50 the annual excess of births over deaths was a record high average of 106,035. In the year 1954 the excess was 120,451.

(ii) *Comparison with other Countries.* Notwithstanding its low birth rate, Australia has a higher rate of natural increase than most European countries, owing to the fact that its death rate is very low. The following table gives a comparison between the rate of natural increase in Australia and that in some of the principal countries for which such information is available.

## NATURAL INCREASE OF POPULATION : VARIOUS COUNTRIES.

(a) Europeans only. (b) Excludes Maoris. (c) Not available. (d) Excludes full-blood aboriginals. (e) Federal Republic.

NOTE.—Minus sign (—) denotes decrease.

2. Net Migration.\*—The other factor of increase in the population, namely, the excess of arrivals over departures, known as "net migration," is, from its nature, much more subject to variation than is "natural increase".

Particulars of the increase by net migration are given below for five-year periods from 1926 to 1950 and for each of the years 1947 to 1954.

## POPULATION : INCREASE BY NET MIGRATION.

(a) Excludes troop movements from September, 1939 to June, 1947. (b) Excludes interstate migration from July, 1943 to June, 1947. (c) Figures for New South Wales, Victoria, Queensland and the Australian Capital Territory have been adjusted for discrepancies in road and rail movements.

NOTE.—Minus sign (—) indicates excess of departures over arrivals.

In the five years ended 1935 there was a net emigration of 10,886 and in the five years ended 1940 a net immigration of 43,128. During the war period 1941-45 net immigration fell to 7,809 persons. In 1946 there was a net loss by migration of 15,148 persons due mainly to the departure of refugees and evacuees, and also fiancées, wives and children of British and Allied servicemen but, with increasing transport facilities and the resumption of assisted migration, there was a net gain of 10,611 in 1947, increasing rapidly to 55,115 in 1948, 150,001 in 1949 and 152,505 in 1950. This large net gain was due in great measure to the arrival of successive contingents from Australia's quota of 176,000 former European displaced persons, of whom 156,491 had arrived by the end of 1950. As this flow diminished it was partly offset by new schemes for assisted migrants but nevertheless by 1953 the total net gain from all sources during the year had fallen to 42,897. It rose again in 1954, to 68,207. The net gains in each of the years 1949 to 1952 were the highest recorded for individual years with the exception of 1919 for which year troops returning from the 1914-18 War were included.

3. Total Increase.—The total increase of the population is obtained by combining the natural increase with the increase by net migration. For the period September,

1939 to June, 1947 deaths of defence personnel have been deducted from the total increase so derived. The results of the 1947 and 1954 Censuses disclosed some unrecorded movements of population during the intercensal periods, July, 1933 to June, 1947 and July, 1947 to June, 1954, and particulars of total increase, after taking into account deaths of defence personnel in the earlier period, have been adjusted for these discrepancies. No separate adjustment has, however, been applied to individual elements of increase during the periods, although intercensal discrepancies disclosed by previous censuses were adjusted on recorded oversea departures.

The annual increments to the population for the years 1947 to 1954 are shown below, together with the increases for each five years from 1926 to 1950. For the reasons stated in the previous paragraph, figures for the period 1933 to 1954 differ from the totals of figures for natural increase and net migration shown in preceding tables by an amount equal to the net total of deaths of defence personnel and unrecorded movements of population disclosed by the Censuses of 1947 and 1954

(a) Includes recorded deaths of defence personnel, whether inside or outside Australia, from September, 1939 to June, 1947. (b) Excludes interstate migration from July, 1943 to June, 1947.

4. Rate of Population Growth.—(i) *Australia.* The annual percentage rate of population growth is computed by the compound interest formula. The formula is as follows:—

$$P_1 = P_0 (1 + r)^t$$

where  $P_0$  and  $P_1$  are the populations at the beginning and end of the period respectively,  $t$  is the number of years intervening and  $r$  is the annual rate of growth.

The annual rates of growth per cent. of population in Australia during each of the years 1944 to 1954 were as follows:—1944, 1.06; 1945, 1.13; 1946, 1.18; 1947, 1.60; 1948, 2.02; 1949, 3.25; 1950, 3.26; 1951, 2.65; 1952, 2.48; 1953, 1.87; and 1954, 2.11.

The annual rate of population growth during the present century has been 1.64 per cent., but the results from year to year have deviated widely from this figure. In the following table the period 31st December, 1900 to 31st December, 1954 has been arranged into certain defined groups of years according to the occurrence of influences markedly affecting the growth of population:—

## POPULATION: PERIODICAL RATES OF GROWTH.

Period.	Interval. (Years.)	Total Increase. ('000.)	Average Annual Numerical Increase. ('000.)	Annual Rate of Population Growth. (Per cent.)		
				Natural Increase.	Net Migration.	Total.
1901 to 1913 ..	13	1,128	87	1.59	0.53	2.04
1914 to 1923 ..	10	862	86	1.50	0.15	1.64
1924 to 1929 ..	6	680	113	1.28	0.64	1.88
1930 to 1939(a) ..	10	569	57	0.82	0.03	0.85
1940 to 1946(a) ..	7	513	73	1.05	0.01	1.01
1947 to 1951(a) ..	8	1,572	197	1.43	1.10	2.42

(a) Population figures include Australian defence forces overseas from September, 1939, to June, 1947.

Up to 1913 the rate of natural increase was rising, and this factor, coupled with the impetus given to immigration from 1911 onwards by increased governmental assistance, was responsible for the comparatively high annual rate of 2.04 per cent. during this period. The 1914-18 War was a dominating influence in the decade 1914-23, and its

effects can be seen in the reduction of the rate from 2.04 to 1.64 per cent. From 1924 to 1929, more settled and prosperous conditions were experienced; encouraged migration was resumed on a large scale and, despite a further decline in the rate of natural increase owing to the persistent fall in the birth rate, the annual rate of growth rose to 1.88 per cent. After 1929 came the economic depression, and immigration ceased—in fact Australia actually lost people through an excess of departures over arrivals in 1930, 1931, 1932 and 1935. The rate of natural increase also fell, and the rate of growth of the population receded to 0.85 per cent. per annum. With the outbreak of war in 1939, Australia entered a new phase in her demographic history, the full effects of which will not be seen for some time to come. The immediate effect of the war was to increase the number of marriages and to reverse the downward trend in fertility. The number of births increased each war year from 1940 to 1945, and these increases more than offset the rise in deaths due to war casualties and higher civilian death rates. As might be expected, migration over these years was negligible. The post-war period 1947 to 1954 was marked by a continued high natural increase and a resumption of immigration, the latter resulting in very high net gains in each of the four years 1949 to 1952. The annual rate of growth for the period was 2.45 per cent.

Rates of population growth from 1881 to 1954 may be found for each State and Territory of Australia in *Demography Bulletin* No. 72, 1954.

(ii) *Various Countries.* The table hereunder gives estimated rates of growth of the population of Australia in comparison with those for other countries:—

(c) Excludes

NOTE.—Minus sign (—) denotes decrease.

## § 6. Density.

1. *General.*—From certain aspects population may be less significant in respect of its absolute amount than in its relation to the area of the country. Australia, with an area of 2,974,581 square miles, and a recorded population at 30th June, 1954, of 8,986,530, excluding about 47,000 full-blood aborigines, has a density of only 3.02 persons to the square mile, and is, therefore, the most sparsely populated of the civilized countries of the world. For the other continents and sub-continents the densities are approximately as follows:—Europe (excluding U.S.S.R.), 212; Asia (excluding U.S.S.R.), 138; U.S.S.R., 25; Africa, 18; North and Central America, 25; and South America, 17. The population of Australia has thus about one-sixth of the density of that of South America and of Africa; about one-eighth of that of U.S.S.R. and of North and Central America; about one-forty-fifth of that of Asia (excluding U.S.S.R.); and about one-seventieth of that of Europe (excluding U.S.S.R.).

On account of the very large area of Australia and the unsuitability for settlement of much of the country, the density of population must necessarily increase slowly. In Australia as a whole the figure has increased from 1.29 per square mile in 1901 to 3.02 in 1954. Victoria's density, however, has grown from 13.77 to 27.90 and that of New South Wales from 4.43 to 11.06 in the same period. When comparing the density of

population of the several States consideration should be given to the average annual rainfall distribution in each State as an indication of the climatic influence upon probable population numbers. The area of Australia receiving less than 10 inches of rainfall is 38 per cent.; that of the various States is:—New South Wales, 20 per cent.; Victoria, nil; Queensland, 13 per cent.; South Australia, 83 per cent.; Western Australia, 58 per cent.; and Tasmania, nil.

A map showing the density of population throughout Australia at the 1947 Census may be found in Official Year Book No. 41, pp. 317-8.

2. Main Countries of the World.—Number and density of population of the most important countries of the world at 30th June, 1953, are shown in the following table. In some instances, more particularly in the cases of Asia and Africa, the numbers must be considered as rough approximations only.

**POPULATION OF THE PRINCIPAL COUNTRIES OF THE WORLD: NUMBER AND DENSITY, 1953.**

(a) Number of persons per square mile.  
Islands. (d) Includes European Territory.  
full-blood aboriginals.

(b) Population 1954.  
(e) Population 1951.

(c) Includes Federated  
(f) Includes 47,000

The populations shown in the above table are, in the main, in accordance with figures published in the *Demographic Year Book*, 1954, published by the United Nations, and the countries have been arranged in accordance with the continental groups used therein.

## § 7. General Characteristics.

NOTE.—Information provided throughout this section relates to the 1954 Census. Further particulars will be found in the Appendix.

1. Sex Distribution.—(i) *States.* The number of males to each hundred females has been adopted as a measure of the “masculinity” of the population. On pp. 163–5 in the second issue of the Official Year Book a table was included showing the masculinity of the population of each of the States for each year from 1796 to 1907. In the fifth issue, on p. 123, the figures in this table for the years 1901 to 1907 were modified in accordance with the results of the 1911 Census.

With the exception of some dislocation arising from the two World Wars, there has been a continuous diminution of the masculinity of the population. This has resulted from the increasing proportion of the population in the higher age groups, in which females preponderate owing to their greater longevity, and the general long-term fall in the birth rate. At the 1947 Census the numbers of the sexes were practically equal, but there has since been an increase in masculinity owing to the higher birth rate and to the increase in the number of immigrants, the majority of whom are males.

The following table shows the masculinity of the population at five-year intervals from 1925 to 1945 and for each of the years 1947 to 1954 :—

## POPULATION : MASCULINITY, 1925 TO 1954.

(b) Excludes Maoris.

(c) European population only.

2. Age Distribution.—The age distribution of the population is obtained only at a census, but estimates, based on the census distribution and on births, recorded ages at death and recorded ages of migrants, are made for intercensal years. The following table shows the variation which took place in the age constitution of the population during the 7 years following the 1947 Census.

Of the 8,986,530 persons enumerated at the 1954 Census, 10.8 per cent. were under 5 years of age; 10.0 per cent. were from 5 to 9 years; 7.7 per cent. from 10 to 14 years; 6.6 per cent. from 15 to 19 years; and 36.3 per cent. were under age 21. At the 1947 Census 10.0 per cent. were under 5 years; 8.0 per cent. 5 to 9 years; 7.1 per cent. 10 to 14 years; 7.7 per cent. 15 to 19 years; and 34.4 per cent. under 21 years of age.

Owing mainly to the fall in the birth rate during the years 1930 to 1939, the number of persons in Australia between the ages of 15 and 24 in 1954 showed a decline of 12,683 as compared with the number in this age group in 1947. This decline would have been more serious but for the migration of adolescents between 1947 and 1954. The number of children under 16 years of age among immigrants contributed substantially to the increases in the lower age groups. The proportion of persons under 21 years in Australia increased from 34.4 per cent. in 1947 to 36.3 per cent. in 1954, whilst the proportion of persons aged 21 years and over decreased from 65.6 per cent. to 63.7 per cent. during the same period.

(a) At the 1947 Census unspecified ages were distributed proportionally over ages 15 years and upwards after completion of tabulation, but at the 1954 Census they were distributed over all ages prior to tabulation.

NOTE.—Minus sign (—) denotes decrease.

The next table shows the change which has been taking place in the age constitution of the population of Australia since 1871. Up to the 1954 Census, each successive census except that of 1921 had revealed a larger percentage of the population 15 years of age and over than was recorded at the previous census. However, in 1954, the proportion of this age group dropped sharply to a level (71.5 per cent.) slightly below that of 1933, the proportion of children under 15 years showing a corresponding increase to 28.5 per cent. of the total population.

3. **Conjugal Condition.**—Of the total population of Australia at the 1954 Census, 46.8 per cent. had never married; 47.1 per cent. were married (including 1.4 per cent. married but permanently separated); 5.2 per cent. were widowed; and 0.8 per cent. were divorced. Between 1947 and 1954 the number never married increased by 17.7 per cent.; those married (including permanently separated) by 20.6 per cent.; the widowed by 10.2 per cent.; and the divorced by 31.8 per cent.

From the demographic point of view the most important change in the conjugal condition of the population of Australia between 1947 and 1954 was the increase of 35.0 per cent. in never married persons under 15 years of age, which offset by many times the continued decrease in never married persons 15 years and over. The latter decrease was, however, confined to females, as the number of unmarried males 15 years and over increased by 3.6 per cent. between 1947 and 1954. The proportion of married persons continued to increase, and in 1954 comprised 66 per cent. of the population 15 years of age and over who stated their conjugal condition, compared with 62 per cent. in 1947 and 54 per cent. in 1933.

The number of widowed females recorded in Australia in 1954 was 351,101 or more than three times as many as the number of widowed males. This disparity is the result of two influences. The first is the greater longevity of females coupled with the usually younger age at marriage; and the second is that a larger proportion of males cancel their widowhood by remarriage.

**POPULATION : CONJUGAL CONDITION, AUSTRALIA, 1947 AND 1954.**

NOTE.—Minus sign (—) denotes decrease.

4. Birthplace.—At 30th June, 1954, the Australian-born element of the population of Australia represented 85.7 per cent. as compared with 90.2 per cent. at the 1947 Census. The number of Australian-born increased by 865,410 or by 12.7 per cent. between 1947 and 1954 while the oversea-born population increased by 541,762 or 72.8 per cent. This was due mainly to the increase of 502,961 in the number of persons of European birthplace since 1947—principally persons born in England (an increase of 96,620); Italy (86,011); Germany (50,854); Poland (50,021); and the Netherlands (49,825).

Although numerically less significant, the number of persons of Asian and African birthplace more than doubled during the intercensal period, but there was little change in the number of persons born elsewhere.

Of persons born outside Australia, 57 per cent. were males and 43 per cent. females.

5. **Period of Residence in Australia.**—This table classifies the immigrant population of Australia according to period of residence in Australia, and reflects the greatly increased rate of immigration since 1947. It shows that, of persons in 1954 born outside Australia who stated their period of residence, 40.9 per cent. had resided in Australia for a period of less than 5 years, 53.9 per cent. for less than 8 years, and 56.2 per cent. for less than 15 years, compared with 5.7, 7.7 and 14.8 per cent. respectively at the previous Census in 1947.

6. **Nationality.**—At 30th June, 1954, 8,582,509 persons (or 95.5 per cent. of the Australian population) were of British nationality (consisting of 85.7 per cent. born in Australia and 9.8 per cent. born outside), compared with 99.5 per cent. in 1947 (90.2 per cent. Australian-born and 9.3 per cent. born outside Australia). Of the over-sea-born population in 1954, 68.6 per cent. were British subjects, compared with 94.8 per cent. in 1947. The most numerous foreign nationals in Australia at 30th June, 1954 were:—Italian, 89,785 persons; Dutch, 53,448; Polish, 49,732; German, 31,448; Yugoslav, 18,120; Greek, 17,843; Ukrainian, 17,234; and Latvian, 17,223.

(a) "Irish" nationality is included with "British" nationality for the purpose of this table.

7. Religion.—At the 1921 Census 92,258 persons in Australia, or 1.7 per cent., gave no reply to this question, but at the Censuses of 1933, 1947 and 1954, when the public was informed there was no legal obligation to answer this question, 848,948 persons, (12.8 per cent.), 824,824 (10.9 per cent.) and 855,819 (9.5 per cent.), respectively, gave no reply. Of males 10.3 per cent., and of females 8.7 per cent., did not state their religion in 1954.

Of those who stated their religion, the greatest numerical increase during the intercensal period between 1947 and 1954 was recorded by the Roman Catholic and Catholic combined. This group was followed closely by Church of England, and then Presbyterian, Methodist and Lutheran in that order. Amongst the denominations with the largest numbers of adherents, the greatest proportional increases were recorded by Roman Catholic and Catholic combined, 30.0 per cent.; Presbyterian, 16.9 per cent.; Church of England, 15.3 per cent.; and Methodist, 12.2 per cent. The largest proportional increase was that of the Lutheran denomination, 73.7 per cent.

At the 1954 Census, as at earlier censuses, 99 per cent. of those who stated their religion professed the Christian faith. Between 1947 and 1954 the number who stated they were of non-Christian religion increased by 50 per cent., while those specifically stating they had no religion decreased by 10 per cent.

NOTE.—Minus sign (—) denotes decrease.

8. Industry.—In the following table the male and female populations of Australia at the 1954 Census are classified according to the industry in which they are usually engaged. Persons usually engaged in industry are regarded as being "in the work force," while the remainder of the population, which at the 1954 Census comprised 5,284,508 persons, is classified as not being in the work force. The term "in the work force" includes persons of all ages who are employers, self-employed or working on their own account, wage and salary earners, unpaid helpers engaged in industry, and those who usually work for their living but who have lost their jobs.

Persons who do not earn their living by doing work for monetary reward, such as children, housewives, full-time students, retired persons, pensioners and permanent inmates of institutions, are regarded as not being in the work force.

On the average, 63 in every 100 of the male population and 19 in every 100 of the female population were in the work force, or in other words there were, in 1954, 3.4 males to every female in the work force.

Of the total males in the work force those engaged in Manufacturing represented the largest proportion, namely 28.0 per cent., followed next in order by those in Primary Production, 16.1 per cent.; Commerce, 13.6 per cent.; Building and Construction, 11.3 per cent.; Public Authority (n.e.i.) and Professional Activities, 9.1 per cent.; and Transport and Storage, 8.4 per cent.

As with males, females in the work force were engaged mainly in Manufacturing, 26.9 per cent.; followed next in order by those in Commerce, 22.5 per cent.; Public Authority (n.e.i.) and Professional Activities, 22.0 per cent.; and Amusement, Hotels, Cafés, Personal Service, etc., 14.8 per cent.

9. **Occupational Status.**—The term “occupational status” has been substituted for “grade of occupation” formerly in use, and it relates to the capacity in which persons are engaged in the various branches of industry.

While the numbers of employers and of persons self-employed at the 1954 Census showed increases of approximately 13 per cent. and 6 per cent., respectively, as compared with 1947, the number of employees increased by slightly more than 20 per cent., and in 1954 constituted nearly 80 per cent. of the total work force, as compared with 77 per cent. in 1947. Employers and self-employed combined constituted 17.8 per cent. of the work force in 1954 as compared with 19.0 per cent. in 1947.

**POPULATION : OCCUPATIONAL STATUS, AUSTRALIA, 1947 AND 1954.**

(a) Includes persons who were (1) unable to secure employment; (2) temporarily laid off from their jobs; or (3) not actively seeking work at the time of the Census on account of sickness or accident, industrial dispute, resting between jobs or for any other reason.

NOTE.—Minus sign (—) denotes decrease.

10. **Other General Characteristics.**—Questions asked at the 1933 Census regarding orphanhood, and the ability to read and write a foreign language (of persons who could not read and write English), were not asked on the schedules of the 1947 Census. The question on dependent children asked at the 1947 Census was not asked in 1954, and information supplied in 1954 in reply to the question on race has not yet been tabulated.

The latest data published in respect of the first two questions appear, therefore, on pp. 482 and 487 of Official Year Book No. 36, and of the last two on pp. 326 and 327 of Official Year Book No. 41.

## § 8. Dwellings.

1. **Number of Dwellings.**—In addition to the questions relating to the personal particulars of the individual members of the household there were a number of important questions on the Census Schedule designed to elicit information concerning the dwellings in which the population was housed at the date of the Census. For information obtained at the 1933 and 1947 Censuses see Official Year Book No. 38, pp. 557 to 571. The following tables relate to the 1947 and 1954 Censuses. For the purpose of the Census, a “dwelling” is any habitation occupied by a household group living together

as a domestic unit, whether comprising the whole or only part of a building. The term has therefore a very wide reference, and includes, *in addition to houses and flats*, a great variety of dwellings ranging from a single-roomed shack to a multi-roomed hotel or institution.

The following table shows the number of occupied and unoccupied dwellings in the urban and rural areas of Australia at 30th June, 1954. (For definitions of "urban" and "rural" see para. 4, page 571. As explained therein, the boundaries of the Metropolitan Urban and other divisions of State differ from census to census, and consequently accurate comparison cannot be made between figures for corresponding divisions. Moreover, the inclusion in the Other Urban Division in 1954 of the larger towns not separately incorporated has further reduced comparability. These factors should be borne in mind when referring to tables in this section showing divisions of State.

Occupied dwellings are classified into private and other dwellings (see para. 2, page 598, for definitions of "private" and "other" dwellings). The term "unoccupied dwellings" is not synonymous with vacant houses and flats available for occupancy, but refers mainly to "week-end", holiday and other dwellings whose usual occupants were temporarily absent on the night of the Census. Newly-completed dwellings awaiting occupancy are also included. Examination of the geographical distribution of such "unoccupied dwellings" indicates that for the most part they were temporarily unoccupied, or located in rural areas other than towns with a population of 1,000 persons or more.

The total number of occupied dwellings in Australia at the Census of 30th June, 1954, showed an increase of 24.8 per cent. over the corresponding figure for the 1947 Census, compared with an increase of 18.6 per cent. in population. Occupied private dwellings increased by 25.1 per cent. and occupied dwellings other than private by 7.8 per cent. At the 1954 Census 98.4 per cent. of the total occupied dwellings in Australia were private dwellings, compared with 98.2 per cent. in 1947. Percentage increases in total occupied dwellings over 1947 figures in each State and Territory were:—New South Wales 22.3 per cent., Victoria 25.3 per cent., Queensland 24.7 per cent., South Australia 27.7 per cent., Western Australia 30.5 per cent., Tasmania 26.1 per cent., Australian Capital Territory 96.9 per cent. and Northern Territory 27.1 per cent.

Unoccupied dwellings increased by 139 per cent.

#### DWELLINGS : AUSTRALIA, CENSUS, 30th JUNE, 1954.

Total .. .. .	1,907,895	47,041	2,380,353	112,594

2. *Class of Dwelling.*—The dwellings in which the people are housed comprise private dwellings such as private houses, shares of private houses, flats, apartments, rooms, etc., and dwellings other than private, such as hotels, boarding houses, charitable institutions, etc.

*Private dwellings* comprise private houses (including sheds, huts, garages, etc. used for dwelling purposes), shares of private houses, flats, and rooms, apartments, etc. In previous censuses dwellings returned on the Schedules as sheds, huts, garages, etc. were included with private houses. In the Census of 1954, particulars of these dwellings have been tabulated separately, but are linked with private houses to preserve continuity with past census results. Separate particulars were shown in the 1947 Census publications for private houses which were shared by two or more family units and for which only one Householder's Schedule was received, but in 1954 these dwellings were included with private houses.

*Share of private house* is a portion of a shared private house which is occupied separately and for which portion a separate Householder's Schedule was furnished.

*Flat* is part of a house or other building which can be completely closed off and which includes both cooking and bathing facilities.

*Other private dwelling* is an apartment, room(s), etc., which is part of a building, but is not a self-contained unit.

*Dwellings other than private* include hotels, boarding houses, lodging houses, hostels, hospitals, educational, religious and charitable institutions, defence and penal establishments, etc.

It is desirable when considering the question of housing to exclude those forms of accommodation which do not represent the normal housing conditions associated with family life, and the statistics which follow relate mainly to private dwellings only.

(a) See letterpress on p. 571 regarding comparability as between Censuses. (b) Includes shared private houses for which only one Householder's Schedule was received. (c) Portion of a shared private house which is occupied separately and for which portion a separate Householder's Schedule was received.

NOTE.—Minus sign (—) denotes decrease.

3. Population According to Class of Dwelling, etc.—The following table shows the number of the various classes of occupied dwellings at the Censuses of 1947 and 1954, together with the number of inmates therein.

Of the total population in 1954, 92.52 per cent. were living in private dwellings—houses, flats, apartments, rooms, etc.—whilst 672,168 persons, or 7.48 per cent. of the population, spent the night in other than private dwellings, or on ships, trains or aircraft, or were camping out.

(a) Includes shared private houses for which only one Householder's Schedule was received.  
 (b) Portion of a shared private house which is occupied separately and for which portion a separate Householder's Schedule was received.  
 (c) Shipping, railway and air travellers.

4. Occupied Private Dwellings.—(i) *Material of Outer Walls.* In the following table occupied private dwellings are classified according to the material of which the outer walls were built.

Wood has been the most extensively used material in the construction of the outer walls, followed by brick and fibro-cement, and in 1954 the respective percentages for Australia for occupied private dwellings for which the material of the outer walls was specified were—wood, 44.4 per cent., brick, 33.5 per cent. and fibro-cement, 12.7 per cent. The latter has shown a most spectacular increase since 1933 when the proportion was 1.6 per cent. (23,696 dwellings), compared with 6.3 per cent. in 1947 (117,631 dwellings). The proportions of both brick and wooden dwellings have shown small decreases since 1947. The numbers of dwellings of all other materials except fibro-cement and concrete have decreased. Brick dwellings in 1954 represented 51.5 per cent. of all occupied private dwellings in the Metropolitan Urban Divisions, whilst in the Other Urban and Rural Divisions wooden dwellings predominated, the percentages of such dwellings being 60.0 per cent. and 59.4 per cent. respectively.

# OCCUPIED PRIVATE DWELLINGS CLASSIFIED ACCORDING TO MATERIAL OF OUTER WALLS, AUSTRALIA, 1947 AND 1954.

(EXCLUDING DWELLINGS OCCUPIED SOLELY BY FULL-BLOOD ABORIGINALS.)

(a) See letterpress on p. 571 regarding comparability as between Censuses.

NOTE.—Minus sign (—) denotes decrease.

(ii) *Number of Rooms.* For Census purposes, the kitchen and any permanently enclosed sleep-out were included in the number of rooms in the dwelling, but the bathroom, pantry, laundry and storehouse were excluded unless generally used for sleeping.

Excluding houses with rooms unspecified, private houses of four, five and six rooms represented 78.3 per cent. of the total number of private houses in Australia at 30th June, 1954, compared with 79.2 per cent. in 1947, and three-quarters of the total increase in the number of private houses since 1947 consisted of houses containing these numbers of rooms. Houses of seven and more rooms also showed substantial increases.

(*a*) See letterpress on p. 571 regarding comparability as between Censuses. (*b*) Includes kitchen and permanently enclosed sleep-out but does not include bathroom, pantry, laundry or storehouse, unless generally used for sleeping. (*c*) Includes houses, sheds, huts, etc., and shared private houses for which only one Householder's Schedule was received. (*d*) Portion of a shared private house which is occupied separately and for which portion a separate Householder's Schedule was received.

(iii) *Number of Inmates.* A classification of occupied private dwellings according to the number of inmates is shown in the following table.

For Australia as a whole private houses with four inmates were most numerous, followed very closely by those with two and three inmates in that order.

An increase of nearly 51 per cent. (149,348 houses) in the number of private houses occupied by two inmates brought this group from third position in 1947 to second position in 1954. Houses with two inmates in 1954 constituted 22 per cent. of the total number of occupied private houses in Australia, about the same proportion as for houses with four inmates. In 1947 houses with two inmates constituted 18 per cent. of the total and houses with four inmates 21 per cent. Houses with three inmates constituted 21 per cent. at both the 1947 and 1954 Censuses. The average number of inmates in private houses was 3.69 in 1954 compared with 3.91 in 1947.

The number of private houses which were shared, and for each share of which a separate Householder's Schedule was furnished, increased slightly between 1947 and 1954, but the average number of inmates therein decreased from 2.87 to 2.71. Separate particulars of shared houses for which only one Householder's Schedule was furnished were not compiled in 1954. These particulars are included with private houses in all tables in this section.

Flats and other classes of private dwellings increased in both numbers and total inmates, but the average number of inmates fell from 2.84 to 2.58 for flats and from 2.18 to 2.11 for others.

In flats those with two inmates and in other classes of occupied private dwellings those with one inmate predominated.

### OCCUPIED PRIVATE DWELLINGS CLASSIFIED ACCORDING TO NUMBER OF INMATES, AUSTRALIA, 1947 AND 1954.

(a) See letterpress on p. 571 regarding comparability as between Censuses. (b) Includes houses, sheds, huts, etc., and shared private houses for which only one Householder's Schedule was received. (c) Portion of a shared private house which is occupied separately and for which portion a separate Householder's Schedule was received.

(iv) *Nature of Occupancy.* At the 1954 Census, 52.5 per cent of occupied private houses in Australia for which particulars were supplied were occupied by owners; 16.8 per cent. by purchasers by instalments; 28.1 per cent. by tenants; and 2.6 per cent. by others. The corresponding percentages in 1947 were—owners, 50.5 per cent; purchasers by instalments, 9.0 per cent; tenants, 37.6 per cent; and others, 2.9 per cent. Owner-occupied houses in Australia increased by 33.4 per cent. between 1947 and 1954, and those being purchased by instalments by 139.3 per cent., the increase in these two groups combined being nearly 50 per cent., while tenant-occupied houses decreased by 4.1 per cent.

In the metropolitan areas 70.5 per cent. of all occupied private houses were either owner-occupied or being purchased by instalments, as compared with 69.0 per cent. in the other urban areas, and 66.9 per cent. in the rural areas.

Tenants occupied by far the greater proportion of flats and other private dwellings.

### OCCUPIED PRIVATE DWELLINGS CLASSIFIED ACCORDING TO NATURE OF OCCUPANCY, AUSTRALIA, 1947 AND 1954.

(EXCLUDING DWELLINGS OCCUPIED SOLELY BY FULL-BLOOD ABORIGINALS.)

(c) Portion of a shared private house which is occupied separately and for which portion a separate Householder's Schedule was received.

(v) *Other Dwelling Characteristics.* In addition to the questions asked on the 1954 Census Schedule as to class of dwelling, material of outer walls, number of rooms, number of inmates and nature of occupancy, from the replies to which the data in the preceding paragraphs have been compiled, questions were also asked as to weekly rent, facilities, date of building and farm dwellings.

Particulars of weekly rent and date of building were still being summarized at the time of preparation of this section, and the results will be included in the Appendix to this volume. At the 1947 Census a detailed question was asked concerning facilities and a summary of the information obtained therefrom was published on page 571 of Official Year Book No. 38. The question asked at the 1954 Census was much less detailed and was designed partly to clarify replies to the question on class of dwellings. Information obtained in reply to this question and to that on farm dwellings has not been compiled.

## § 9. Oversea Migration.

1. *Overseas Migration during Present Century.*—Earlier issues of the Official Year Book contain in summary form tables showing the increase of population by net migration from 1861 to the latest date, while the *Demography Bulletin* issued by this Bureau gives this information for individual years. The following table shows, for Australia, arrivals and departures and net migration since 1901. A graph showing overseas migration from 1921 to 1955 appears on p. 594.

## OVERSEA MIGRATION : AUSTRALIA.

(a) Excludes movements of defence personnel from September, 1939 to June, 1947.

NOTE.—Minus sign (—) indicates excess of departures over arrivals.

As the encouragement of immigration by governmental assistance has been a feature of Australian immigration policy, a clear indication of the significance of migration movements is obtained when "assisted" and "unassisted" movements are distinguished. This was shown broadly, for the period 1901-1952, in Official Year Book No. 40, page 361, and has been continued in the following table for the period 1926 to 1954.

## "ASSISTED" AND "UNASSISTED" MIGRATION : AUSTRALIA.

Period.	Arrivals.			Departures.	Excess of "Un- assisted" Arrivals over All Departures.
	Nominated and Selected ("Assisted").	Other ("Un- assisted").	Total.		
1926-30..	99,403	371,077	470,480	340,773	30,304
1931-35..	781	238,542	239,323	250,209	- 11,667
1936-40(a)	3,828	317,484	321,312	278,184	39,300
1941-45(a)	..	63,925	63,925	56,116	7,809
1946-50(a)	273,195	428,725	701,920	348,836	79,889
1949 ..	118,840	114,295	233,135	83,134	31,161
1950 ..	119,109	131,295	250,404	97,899	33,396
1951 ..	66,674	146,966	213,640	102,207	44,759
1952 ..	60,531	155,308	215,839	121,807	33,501
1953 ..	27,310	135,815	163,125	120,228	15,597
1954 ..	54,038	143,987	198,025	129,818	14,169

(a) Excludes movements of defence personnel from September, 1939 to June, 1947.

NOTE.—Minus sign (—) indicates excess of departures over "unassisted" arrivals.

It is not possible in the statistics of departures to distinguish the return movement of persons who came to Australia as "assisted" migrants and consequently the separate net migration of "assisted" and "non-assisted" persons cannot be ascertained. Nevertheless the basis on which the above table has been compiled is sufficient to throw into relief the major trends in Australian migration statistics in the period reviewed.

Although separate net migration figures are not available it is generally agreed that Australia has gained considerably more population through its encouraged migration programme than it has from non-assisted migration.

A detailed review of assisted migration into Australia in recent years is given in § 10.

2. *Classes of Arrivals and Departures.*—(i) *General.* Since 1st July, 1924, all overseas travellers have been classified according to their declared intention in regard to residence made at the time of arrival or departure. For various reasons the intentions of travellers are subject to subsequent modification and the classification headings used must therefore be accepted as indicating intention only. The numbers so classified since 1st January, 1926 are as follows.

#### MIGRANTS CLASSIFIED ACCORDING TO INTENDED RESIDENCE : AUSTRALIA.

Period.	Arrivals.				Departures.			
	Per- manent Move- ment.	Temporary Move- ment.		Total.	Per- manent Move- ment.	Temporary Move- ment.		Total.
	New Arrivals.	Aus- tralian Residents Return- ing.	Visitors Arriving.		Aus- tralian Residents Departing Per- manently.	Aus- tralian Residents Depart- ing Tempo- rarily.	Visitors Depart- ing.	
1926-30 ..	224,010	121,395	125,029	a 470,480	103,209	111,714	125,772	b 340,773

1954 ..	104,014	44,944	49,067	198,025	35,449	45,701	48,668	129,818

(a) Includes 46 arrivals whose intended period of residence was not stated. (b) Includes 78 departures whose intended length of stay abroad was not stated. (c) Includes 5 departures whose intended length of stay abroad was not stated. (d) Includes evacuees arriving in Australia during the war years as follows:—1936-40, 4,543; 1941-45, 12,586.

(ii) *Permanent Movement.* In the table above "permanent" means residence for a year or longer, in Australia in the case of arrivals or overseas in the case of departures.

The 1939-45 War caused a large drop, from 1940, in the number of permanent new arrivals but after the war the number rose progressively, reaching 174,540 in 1950, the highest on record. As in the case of arrivals, although not to the same extent, the number of Australian residents departing permanently rose rapidly in the period of immediate post-war re-adjustment of population, but the high figure of 29,806 in 1946 was surpassed in 1952, 1953 and 1954, in which years the figures were higher than any recorded since this method of classification was introduced.

Up to and including 1929 there was a considerable net gain of permanent residents, but during 1930 and 1931 there was a heavy net loss. The loss was very much reduced in 1932, 1933 and 1934, whilst during the five years up to and including 1939 there was a net gain in permanent residents of more than 28,000. Except for the arrival of evacuees, little movement took place during the war period, but in 1946 a net permanent loss of 11,589 persons occurred, owing in large measure to the departure for the United States of America of Australian wives and children of American servicemen, and, when conditions

permitted after the war, the departure of Australians to Papua and New Guinea and of large numbers of war evacuees who were returned to their home countries. Subsequently large net gains were recorded, amounting to 149,270 in 1949, 153,685 in 1950, 110,362 in 1951, 97,454 in 1952, 42,883 in 1953, and 68,565 in 1954.

(iii) *Temporary Movement.* Temporary movement refers to persons intending residence for periods shorter than one year and includes Australian residents and visitors from overseas. Since 1st July, 1947, it also includes Australian defence personnel irrespective of length of intended residence. Although considerable in number, the temporary movement is of little significance from the point of view of population growth, as it represents principally the movement of business people and tourists.

3. *Extent of Journey.*—(i) *General.* Since 1st January, 1945, the journeys undertaken by passengers have been recorded for Australian overseas migration statistics in two ways: (a) according to country of embarkation or disembarkation and (b) according to country of last or future permanent residence. In the case of a complete journey in a single stage to or from Australia there is no difference in result between the two methods. With multiple-stage journeys to or from an Australian port, however, one method distinguishes only the first stage of outward journeys or the last stage of inward journeys, whilst the second method records the complete journey.

Detailed statistics of overseas journeys are published in the annual *Demography Bulletin*. In addition, from January, 1951 onwards, statistics distinguishing State of residence have been compiled for special purposes. The following brief explanations indicate the principles followed in the compilation of migration statistics generally.

(ii) *Arrivals.* (a) *Country of Embarkation*—refers to the country in which the passenger embarked on the particular ship or aircraft which brought him to Australia. Therefore in multiple-stage journeys to Australia these statistics refer only to the last booked stage.

(b) *State of Disembarkation*—refers to the State in which the passenger actually disembarked, irrespective of the State to which originally booked or of State of ultimate destination. Passengers embarking on fresh journeys from one Australian State to another State are recorded in interstate migration.

(c) *Country of Last Permanent Residence*—This is taken from the passenger's own statement and is not necessarily the country from which the single-stage or multiple-stage journey to Australia commenced. Permanent residence means residence for one year or longer.

(d) *State of Intended Future Permanent Residence*—In the administration of the encouraged migration schemes large numbers of migrants are disembarked in States other than the State for which they are destined, and their subsequent movements in Australia to State of ultimate destination are recorded as interstate migration, in which distinction between individuals is not practicable. The classification by State of intended future permanent residence was introduced to permit compilation of statistics which show the true effect of overseas arrivals on the populations of individual States.

(iii) *Departures.* (a) *State of Embarkation*—refers to the State in which the passenger actually embarked on the ship or aircraft to leave Australia. The interstate travel of any such passengers prior to embarking is recorded as interstate migration.

(b) *Country of Disembarkation*—refers to the intended country of disembarkation from the particular ship or aircraft which takes the passenger from Australia. In multiple-stage journeys from Australia these statistics refer only to the first booked stage and changes in this, subsequent to departure, are not recorded.

(c) *Country of Intended Future Permanent Residence*—refers to the ultimate destination, after a complete single-stage or multiple-stage journey, of the passenger, as intended at the time of embarkation.

(d) *State of Last Permanent Residence*—refers to the State in which the passenger was last resident for a period of 12 months or longer, irrespective of the State in which actual embarkation on an overseas ship or aircraft took place. In the case of temporary visitors leaving Australia who have not resided for at least twelve months in any one State, the State of embarkation is regarded as the State of last permanent residence.

4. **Racial Origin.**—Up to 30th June, 1948, the system of classifying racial origin was a compromise based partly on nationality and partly on racial origin (*see* para. 5). From 1st July, 1948, this system was superseded by one in which the passenger's statement as to race is restricted to either "European", "Asian", "African" or "Polynesian", only. Statistics based on this system are shown for the years 1952 to 1954 in the following table. Under this system nationality is recorded independently, as indicated in the next paragraph.

#### RACIAL ORIGIN OF ARRIVALS AND DEPARTURES : AUSTRALIA.

Racial Origin.	Arrivals.			Departures.			Net Migration.		
	1952.	1953.	1954.	1952.	1953.	1954.	1952.	1953.	1954.
European ..	210,559	157,564	192,334	117,870	115,710	124,636	92,689	41,854	67,698
Asian ..	4,699	4,873	4,850	3,332	3,916	4,237	1,367	957	653

NOTE.—Minus sign (—) indicates excess of departures over arrivals.

5. **Nationality.**—From 1st July, 1924 to 30th June, 1948, nationality of overseas passengers was recorded as "British" or "Alien" only. Racial origin was also recorded and as the particulars of racial origin stated by passengers closely reflected their nationalities and made it possible to present much more detail of "nationality" than was possible on the total "Alien" basis, published statistics were mostly confined to those compiled on the detailed basis according to a composite classification of "nationality or race".

This method was superseded on 1st July, 1948, by one in which each passenger's race was recorded as indicated in paragraph 4 above, and nationality, as shown on each passenger's passport or other document of identification, was recorded independently of race. The principal nationalities recorded on this basis for the years 1952 to 1954 are as follows :—

#### NATIONALITY OF ARRIVALS AND DEPARTURES : AUSTRALIA.

Nationality.	Arrivals.			Departures.			Net Migration.

(a) Irish nationality is included with British for the purposes of this table. (b) Includes "Stateless" who were formerly Polish. (c) Includes "Stateless" who were formerly Russian. (d) Stateless, with former nationality stated but other than Polish or Russian.

NOTE.—Minus sign (—) indicates excess of departures over arrivals.

6. Age Distribution and Conjugal Condition.—The annual *Demography Bulletin* shows particulars of total arrivals and departures of overseas travellers classified according to intention as to residence (see para. 2 above) with independent dissections into five-year age groups and separate conjugal conditions (see *Demography Bulletin* No. 72 for 1954 figures). A summary of the age distribution and conjugal condition of permanent arrivals and departures during 1954 is as follows:—

**AGE DISTRIBUTION AND CONJUGAL CONDITION OF PERMANENT ARRIVALS AND DEPARTURES : AUSTRALIA, 1954.**

Particulars.	Permanent New Arrivals.			Permanent Departures.		
	Males.	Females.	Persons.	Males.	Females.	Persons.

7. Occupation.—A classification of the occupations of males who arrived or departed permanently during 1954 is published in *Demography Bulletin* No. 72. A summary for 1954 for the main occupational groups is as follows:—Rural, fishing and hunting—permanent new arrivals, 7,068, permanent departures, 770; professional and semi-professional, 1,720, 1,870; administrative, 884, 790; commercial and clerical, 2,950, 2,446; domestic and protective service, 1,143, 683; craftsmen, 10,889, 4,332; operatives, 4,686, 1,711; labourers, 5,397, 1,573; indefinite or not stated, 2,122, 429; not gainfully occupied (mainly children), 18,761, 4,172; total, 55,620, 18,776.

## § 10. Immigration.

### (A) Assisted Migration into Australia.

1. Joint Commonwealth and States' Scheme.—Details of the joint scheme of assisted immigration arrived at by agreement between the Commonwealth and State Governments, which operated from 1920 to 1939, may be found in earlier issues of the Official Year Book (see No. 38, page 576). After the outbreak of hostilities in 1939 it was decided to discontinue the grant of assisted passages for the duration of the war.

2. United Kingdom Free and Assisted Passage Agreements, March, 1946.—

(i) *General.* Resumption of migration was the subject of negotiations between the Commonwealth and United Kingdom Governments towards the end of 1945 and two agreements were signed in March, 1946. These agreements, which came into operation on 31st March, 1947, provided for free and assisted passages to be granted to British residents desirous of settling in Australia. The Free Passage Agreement was terminated on 28th February, 1955. The Assisted Passage Agreement continued until 31st March, 1949, when it was renewed for a further two years. It was revived from 1st April, 1951 for a term of three years, but under changed financial arrangements. For the year ended 31st March, 1952 the United Kingdom Government contributed £500,000 sterling towards the scheme, and for the following two years agreed to pay a maximum amount of £150,000 sterling per annum. The Assisted Passage Agreement was again extended for a further period of one year as from 1st April, 1954 and for two years as from 1st April, 1955, on the basis that the United Kingdom Government would contribute a maximum amount of £150,000 sterling per annum.

The Free and Assisted Passage Agreements have covered three main groups of migrants, viz., *Personal nominees*, who are migrants sponsored by residents of Australia able to provide suitable accommodation for them (any adult resident of Australia may nominate friends or relatives in the United Kingdom who are eligible to be considered for free or assisted passages under this agreement); *Group nominees*, who are recruited on a trade-qualification basis to meet applications lodged by employers and State Governments who guarantee to provide employment and accommodation for those selected; *Commonwealth nominees*, who comprise workers selected against known and assessed employment demands in Australia; and their families. Migrants in the latter group live in hostels established by the Commonwealth Government until such time as they are able to obtain private accommodation. The Commonwealth nominee scheme was introduced in 1950 in order to reinforce the personal and group nomination schemes, but towards the end of 1952 it was greatly curtailed and selection was confined to workers in a limited group of essential skilled trades. During the latter part of 1953 the list of categories of workers who could be selected was broadened and the scheme resumed its former impetus.

(ii) *Assisted Passages.* As the Free Passage Scheme has now terminated only the Assisted Passage Scheme remains in operation. Assisted passages are granted under the Empire Settlement Acts of the United Kingdom to suitable British subjects normally resident in the United Kingdom. Although the Commonwealth is not generally prepared to accept single persons or married persons without children if they have reached their forty-sixth birthday before the date of sailing, the parents or close relatives of intending migrants or of persons established in Australia may, if otherwise acceptable under the scheme, be granted passages irrespective of age. Each migrant of 19 years of age and over is required to contribute £10 sterling towards the cost of his or her passage, while juveniles aged 14 years and under 19 years have to pay £5 sterling. Children under 14 years travel free. Apart from these contributions and that made annually by the United Kingdom Government, the cost of the passages is borne by the Commonwealth Government.

(iii) *Numbers Arrived.* The numbers of British migrants who came to Australia under the Free and Assisted Passage Agreement during the years 1947 to 1954 are given in the following table :—

**UNITED KINGDOM FREE AND ASSISTED PASSAGE AGREEMENT : NUMBER OF MIGRANTS.**

Period.	N.S.W.	Vic.	Q'land.	S. Aust.	W.Aust.	Tas.	A.C.T.	C'wealth Nominees.	Total.
1947-50 ..	27,984	27,662	12,975	8,464	11,106	3,831	1,721	4,062	97,805
1951 ..	6,386	10,727	4,097	1,617	2,691	1,176	255	17,058	44,007
1952 ..	7,386	10,596	4,104	2,326	2,804	1,235	382	6,247	35,080
1953 ..	3,890	3,962	1,835	1,072	1,969	485	110	372	13,695
1954 ..	3,046	3,199	1,872	1,406	2,067	425	97	6,605	18,717
Total, 1947-54	48,692	56,146	24,883	14,885	20,637	7,152	2,565	34,344	209,304

3. *Child Migration from the United Kingdom.*—(i) *General.* Since the commencement of the assisted passage schemes in 1947, the immigration of unaccompanied children and youths from the United Kingdom has been encouraged under the auspices of approved voluntary organizations. The organizations at present introducing child migrants include the Fairbridge Farm Schools of New South Wales and Western Australia, Dr. Barnardo's Homes, the Big Brother Movements of New South Wales and Tasmania, and the Northcote Children's Emigration Fund. All the principal religious denominations are also participating in the scheme. At the present time 43 institutions are caring for child migrants.

(ii) *Financial Assistance.* The United Kingdom Government contributes 12s. 6d. and the Commonwealth Government 10s. per week to approved organizations in respect of each child under 16 years of age, while the respective State Governments contribute amounts varying from 4s. 8d. per week in New South Wales to £1 10s. 9d. in Western Australia. In addition, the Commonwealth Government and State Government concerned each contribute, where necessary, towards the approved capital expenditure on accommodation for child migrants brought in by these organizations.

(iii) *Numbers Arrived.* From the beginning of 1947 to the end of 1954, a total of 3,645 British children and youths arrived under the sponsorship of voluntary organizations, and of this number 571 came in 1952, 574 in 1953 and 375 in 1954. New South Wales took 1,868, Western Australia 1,033, Victoria 413, and the other three States 331. These children were brought to Australia under the United Kingdom Free and Assisted Passage Scheme and are included in the figures shown in the table above.

4. *Assisted Passage Scheme, Eire.*—In November, 1948, the Commonwealth Government decided to grant limited financial assistance to natural-born citizens of Eire normally residing in the British Isles, and to natural-born British citizens residing in Eire, who wish to emigrate to Australia and who are duly selected. This scheme applies only to prospective settlers and their dependants who are not eligible for assisted passages under the agreement with the United Kingdom Government (*see para. 2 above*). The maximum amount granted towards an adult passage is £30 sterling, with varying amounts for children according to age.

It is not essential for an applicant for a passage to be nominated by a friend or relative in Australia before the question of granting financial assistance is considered. Single men or women who are eligible under the scheme are readily accepted. Families, on the other hand, are accepted only if they can produce evidence of having secured

accommodation in Australia, or, in the case of nominated migrants, a guarantee of accommodation by their sponsors. Up to the end of 1954, 2,023 migrants had arrived under this scheme (*see* table on p. 617).

5. *Maltese Migration*.—On 31st May, 1948, the Commonwealth Government and the Government of Malta entered into an agreement under which the two governments jointly grant financial assistance towards the cost of the passages of Maltese selected to migrate to Australia. In the case of an adult the maximum contribution of the Commonwealth is £30 sterling, and the payment of this is subject to the Government of Malta contributing not less than a like amount.

Any person already established in Australia may nominate individual Maltese under the scheme, while an employer or firm or a voluntary or other organization may nominate a group. In all cases the nominator must undertake to provide accommodation and, so far as groups of migrants are concerned, employment. The Commonwealth retains the right of final selection of both personal and group nominees. The Government of Malta attends to their after-care in Australia.

At 31st December, 1954, a total of 17,889 Maltese had arrived under this scheme since its inception (*see* table on p. 617). These arrivals were largely dependants of those who had earlier migrated to Australia. To the end of 1954, 197 Maltese children had been brought out to approved institutions in Western Australia. These are included in the number shown above.

6. *Empire and Allied Ex-Servicemen's Scheme*.—With the object principally of giving ex-servicemen of Empire and Allied countries who had served in Australia during the 1939–45 War an opportunity to return for permanent settlement, the Commonwealth Government on 26th May, 1947 initiated a scheme of financial assistance towards the cost of the passages of eligible Empire ex-servicemen not covered by the Free and Assisted Passage Agreement with the United Kingdom (*see* para. 2 above) and of ex-servicemen of the United States of America, and their dependants. This was later extended to cover ex-servicemen and former members of the resistance movements of the Netherlands, Norway, Belgium, France and Denmark, and their dependants. The maximum amount granted towards an adult passage was £30 sterling, with varying amounts for children according to age. The scheme was discontinued as from 30th June, 1955, being superseded by the General Assisted Passage Scheme (*see* para. 12).

Since its inception, 21,024 migrants have come to Australia under this scheme (*see* table on p. 617), the number of each nationality being: Dutch, 16,023; American, 3,138; French, 1,005; British, 581; Belgian, 126; Norwegian, 74; Danish, 76; Polish, 1.

7. *Displaced Persons Scheme*.—On 21st July, 1947, the Commonwealth Government entered into an agreement with the International Refugee Organization to resettle in Australia European displaced persons who were under the protection of that body. In the first two years, limitation of shipping restricted the departure of these migrants, with the result that only 840 arrived in 1947 and 9,953 in 1948, but in the next two years the numbers rose to 75,486 and 70,212 respectively. When the International Refugee Organization wound up its activities in 1951, the Commonwealth agreed to receive those displaced persons already accepted for migration whose passages had still to be arranged. During that year 11,708 reached Australia. In 1952 another 2,055 arrived, whilst in 1953 and 1954 arrivals numbered 441 and 5 respectively, bringing the total number of arrivals under this scheme to 170,700.

8. *Netherlands Migration.*—A migration agreement concluded between the Commonwealth and the Netherlands Governments in February, 1951, came into operation on 1st April of that year. This superseded an earlier agreement between the Commonwealth Government and the Netherlands Emigration Foundation which was made in December, 1946 (*see* Official Year Book No. 39, p. 567). The initial selection of the migrants is carried out by the Netherlands authorities in accordance with requisitions furnished from time to time by the Commonwealth, the responsibility for final selection resting with Australian migration officers stationed in that country.

Important changes were made in 1955 in the financial arrangements which apply under the Netherlands-Australia Migration Agreement. As from 1st April, 1955, an arrangement known as the "Equalization Scheme" commenced operating in respect of all Netherlands migrants, both full-fare or assisted. Recognizing that a migrant's choice of the country in which he wishes to settle is influenced by the cost of passages, the Netherlands Government decided to subsidize passage costs to all countries so that the maximum cost to the migrant would not exceed the passage costs to the nearest migration country (*i.e.*, Canada).

The actual amount contributed by the migrant towards his passage costs is assessed by the Netherlands Government and is subject to a minimum of £A17 12s. 1d. for single persons and £A11 14s. 9d. for family units. The balance of the fare is made up by the Netherlands Government which later receives a contribution from the Inter-Governmental Committee for European Migration and from the Commonwealth Government. The amount contributed by the Commonwealth is the equivalent of \$100 per head.

An account of the financial arrangements which applied prior to 1st April, 1955 may be found on page 341 of Official Year Book No. 41.

The provision of the shipping is the responsibility of the Netherlands Government. The Commonwealth undertakes the arrangements for the reception of the migrants and their after-care, and assists in the securing of employment. Those unable to secure private accommodation in advance of their arrival are housed in "reception" centres controlled by the Department of Immigration, and if, when he obtains employment, the worker of the family cannot find accommodation for his dependants, they are moved to one of the department's "holding" centres. Here they remain until the family is able to arrange to live together privately again.

Under the 1946 agreement 584 persons arrived between 1948 and May, 1951 and, up to the end of 1954, 13,810 migrants had come to Australia under the 1951 agreement.

9. *Italian Migration.*—On 29th March, 1951, the Commonwealth and Italian Governments entered into a migration agreement on lines similar to those of the Commonwealth-Netherlands agreement. Under the terms of this agreement, which came into force on 1st August, 1951, the maximum amount payable by the Commonwealth towards the fares of selected Italian migrants was £25 sterling for each adult, with amounts in proportion for children according to the passage rates. From 1st March, 1955, this amount was increased to \$75. During 1951 and 1952, 9,970 migrants arrived under this scheme. The agreement was temporarily suspended at the end of 1952, but in March, 1954 provision was made for the migration to Australia of certain relatives and fiancées of migrants who had previously travelled to Australia under the agreement. On 1st December, 1954, the agreement proper was re-opened. The number of Italians who arrived under the scheme during 1954 was 409.

10. **German Migration.**—On 29th August, 1952, a migration agreement was signed by representatives of Australia and the Federal Republic of Germany. Except in regard to financial and shipping arrangements, this agreement operates in a manner similar to those concluded with the Netherlands and Italy.

On the financial side, the Commonwealth and the West German Governments each contribute a sum up to a maximum of the equivalent of \$60 towards the fare of each adult selected, the payment of the balance being a matter of arrangement between the migrant and the Inter-Governmental Committee for European Migration. From 1st March, 1955, the Commonwealth contribution was increased to \$75. The ships to carry the migrants are provided by the Committee.

The number of Germans who had arrived under this scheme to the end of 1954 was 19,308. This figure excludes 424 East Zone refugees (*see* para. 11).

11. **Other European Assisted Migration.**—Late in 1952 agreement was reached between the Inter-Governmental Committee for European Migration and the Commonwealth for the migration to Australia of a limited number of selected rural and other workers and their families from Austria and Greece. These arrangements were later extended to include selected migrants from Trieste and refugees from the East Zone of Germany. It was also agreed that selection would not be confined to rural workers. Passages for these migrants are arranged by the Inter-Governmental Committee for European Migration, which also bears the cost of fares initially. The Commonwealth later reimburses the Committee with such sums as are agreed upon from time to time, the current cost to the Commonwealth being the equivalent of \$75 (\$60 prior to 1st March, 1955) per adult migrant with *pro rata* amounts for children. The reception of these migrants, their temporary accommodation on arrival, after-care and placement in employment are undertaken by the Commonwealth.

Under these arrangements 13 Austrians arrived in 1952, 103 in 1953 and 1,674 in 1954, while 1,486 Greeks arrived during 1953 and 7,278 in 1954.

Total arrivals of Triestians and East Zone refugees were 4,273 and 424 respectively, all of whom arrived during 1954. The arrangements for East Zone refugees were terminated at the end of 1954 when these people became eligible for acceptance under the bilateral agreement with the Federal Republic of Germany.

12. **General Assisted Passage Scheme.**—As a measure of encouragement to persons wishing to migrate to Australia from the United States of America, Switzerland, Denmark, Norway, Sweden and Finland the Commonwealth Government on 10th September, 1954 introduced a scheme of assisted passages from those countries.

Under this scheme the Commonwealth contributes an amount of £37 10s. sterling towards an adult passage with *pro rata* amounts for children according to the fare paid.

To the end of December, 1954, 19 migrants had travelled to Australia under this scheme.

13. **Summary of Arrivals of Assisted Migrants.**—The following table shows, for each of the years 1948 to 1954, the number of assisted migrants who arrived in Australia under the various schemes introduced since 1946. The total for the years 1947 to 1954 is also given.

## ASSISTED MIGRATION SCHEMES : NUMBER OF MIGRANTS.

Total Assisted Migrants	28,943	118,840	119,109	66,674	60,531	27,310	54,038	481,748

From the earliest years of assisted migration to the end of 1954 a total of 1,550,048 assisted migrants arrived in Australia, of whom 504,006 were destined for New South Wales, 465,918 for Victoria, 265,562 for Queensland, 137,293 for South Australia, 136,881 for Western Australia, 33,669 for Tasmania, 6,664 for the Australian Capital Territory and 55 for the Northern Territory.

## (B) The Regulation of Immigration into Australia.

1. Powers and Legislation of the Commonwealth.—(i) *Constitutional*. Under Section 51, xxvii. and xxviii. of the Commonwealth Constitution, the Parliament of the Commonwealth is empowered to make laws with respect to immigration and emigration and the influx of criminals.

(ii) *Legislation*. Immigration into the Commonwealth is regulated by the Immigration Act 1901-1949, which specifies the persons whose immigration is prohibited and provides for their deportation if they enter contrary to the Act. Provision is also made for the deportation of persons who have entered lawfully but who contravene the provisions of the Act after they have entered. Power is given to the Minister for Immigration to admit prohibited immigrants for a specified period under Certificate of Exemption from the provisions of the Act relating to entry or stay in the Commonwealth.

The amending Act of 1948 provided for the registration of immigration agents, and made it unlawful for unregistered persons to charge fees in respect of applications by intending immigrants for admission to Australia, or to arrange or secure passages to Australia for such immigrants. In addition, the Minister for Immigration has power to fix the fees which registered agents may charge for these services.

The Aliens Deportation Act 1948 repealed the Aliens Deportation Act 1946 and empowers the Minister for Immigration to order the deportation of an alien who after investigation by a Commissioner is reported as not being a fit and proper person to be allowed to remain in Australia.

The War-time Refugees Removal Act 1949 enables the Minister for Immigration to effect the repatriation to their own countries of persons given refuge in Australia during the 1939–45 War. Deportation is limited to persons in respect of whom orders for deportation were issued prior to 12th July, 1950.

The Immigration (Guardianship of Children) Act 1946–1952 provides that the Minister for Immigration becomes the legal guardian of every person under the age of 21 years who enters Australia other than in the charge of, or for the purpose of living in the care of, a parent or adult relative. It is primarily administered through the child welfare authorities in each State who, as the Minister's delegates under the Act, supervise the welfare of each "immigrant child".

The Aliens Act 1947–1952 provides that a register of aliens shall be maintained for every State and Territory of the Commonwealth. Unless exempted, aliens 16 years of age and over are required to register with the Department of Immigration, and to notify the Department of any change of address, occupation or employment, and of their marriage. The Act also provides that consent must be obtained before an alien may change his surname.

**2. Conditions of Immigration into Australia.**—(i) *Persons of Non-European Race.* In pursuance of the established policy, the general practice is not to permit Asians or other coloured persons to enter Australia for the purpose of settling permanently.

Special provision exists for the temporary admission of non-Europeans who are bona fide merchants, students or tourists. They are permitted to enter and remain in Australia under exemption while they retain their status.

Permission may also be given for the entry of non-Europeans as assistants or substitutes for local traders domiciled in Australia. Such persons are allowed to remain so long as they retain their status.

(ii) *Persons of European Race.* Persons of European race desiring to settle permanently in Australia are required to obtain authority for admission from the Department of Immigration. Their admission under the present policy is subject to their compliance with the Commonwealth's requirements in regard to health, character, freedom from security risk and general suitability as settlers.

(iii) *General Information.* General information as to conditions of entry into Australia may be obtained from the following officers:—

- (a) In Australia—The Secretary, Department of Immigration, Canberra, A.C.T., and Commonwealth Migration Officers in the capital cities of the various States;
- (b) In Great Britain—the Chief Migration Officer, High Commissioner's Office, Australia House, Strand, London;
- (c) In other British Dominions—the High Commissioner for Australia;
- (d) In other countries where Australia is represented—the Secretary, Australian Embassy, Legation or Consulate.

For details of the Australian representatives in the British Dominions and other countries. *see* the section entitled "Diplomatic and other Representatives Overseas and in Australia" in Chapter XXIX.

**3. Racial Origin and Nationality of Persons Arriving.**—For details of the racial origin and nationality of persons who arrived in Australia during the years 1952 to 1954 *see* § 9, paras. 4 and 5.

### (C) Passports.

Provision is made in the Immigration Act 1901-1949 for the production of a passport by each immigrant over 16 years of age who desires to enter Australia. Under the Passports Act 1920, it was compulsory also for each person over 16 years of age to be in possession of a passport or other document authorizing his departure. This Act has now been superseded by the Passports Act 1938-1948 which repealed the compulsory provisions. The Act also applies to the Territories of Australia, including Papua, Norfolk Island and the Trust Territory of New Guinea.

Although it is not compulsory for Australians to obtain a passport when leaving Australia, it is desirable in their own interests that they should have one in order to establish their identity and nationality overseas. A passport is necessary for admission into most countries, and the holder of an Australian passport also has no difficulty in landing on return to Australia. The charge for an Australian passport is £1.

As a result of the Nationality and Citizenship Act 1948-1955 (see § 11 below) and the enactment of similar citizenship legislation in other British Commonwealth countries it is now the general rule that Australian passports are issued only to Australian citizens. Citizens of other British Commonwealth countries secure passports from their own High Commissioners in Australia. Australian citizens abroad may secure passports only from Australian representatives.

Diplomatic and official passports are issued to members of the Australian diplomatic service and other Government officials proceeding abroad on official business.

Applicants for passports are required to produce evidence of their identity and nationality (e.g., birth certificates).

## § 11. Citizenship and Naturalization.

1. Commonwealth Legislation.—The Nationality and Citizenship Act 1948 commenced on Australia Day (26th January), 1949 and repealed all previous Commonwealth legislation on this subject. The most significant effect of the Act was the creation for the first time of the status of "Australian Citizen". In this respect the Act was complementary to citizenship legislation passed or about to be passed by other countries of the British Commonwealth. All Australian citizens, and the citizens of other countries of the British Commonwealth, are declared to be British subjects. Australian citizenship was automatically acquired as from 26th January, 1949 by persons who were British subjects at that date and who either (a) were born in Australia or New Guinea; or (b) were naturalized in Australia; or (c) had been residing in Australia during the five years immediately preceding 26th January, 1949; or (d) were born outside Australia of fathers to whom (a) or (b) above applied (provided the persons concerned had entered Australia without being placed under any immigration restriction); or (e) were women who had been married to men who became Australian citizens under the above headings (provided that the women concerned had entered Australia without being placed under immigration restriction). For the purposes of the Act, "Australia" includes Norfolk Island and the Territory of Papua, and by an amendment of the Act in 1950 it was further provided that Nauru shall be treated in the same manner as New Guinea.

After the Act's commencement citizenship may be acquired in the following ways:—(a) by birth in Australia; (b) by birth outside Australia, of a father who is an Australian citizen, provided that the birth is registered at an Australian Consulate; (c) by registration—Certificates of Registration as Australian citizens may be granted by the Minister to British subjects or Irish citizens who make application and satisfy the Minister that they can comply with specified requirements as to residence in Australia, good character and intention to reside permanently in Australia; (d) by naturalization—Certificates of Naturalization as Australian citizens may be granted by the Minister to aliens who make application and can comply with requirements somewhat similar to those previously required under the Nationality Act 1920-1946. New requirements for naturalization are—(i) as a rule five years residence in Australia is required, but residence in other British countries or service under a British government may be accepted (special concessions in the matter of residence qualifications in respect of persons who have voluntarily enlisted in the armed forces were made by an amending Act of 1952); (ii) the

applicants must have an adequate knowledge of the responsibilities and privileges of citizenship; (iii) Certificates do not take effect until the applicant takes the Oath of Allegiance. The oath is now taken, and citizenship is conferred, at public ceremonies held in the Town Hall of the applicant's place of residence, and presided over by the mayor or equivalent head of the local government.

The Declaration of Intention to apply for naturalization, which was introduced by the original Act of 1948, is no longer compulsory, although it can still be made if an intending applicant so desires. This change was made by an amending Act of 1955 under the provisions of which aliens may apply up to six months before completing their residence requirements, but may not be granted naturalization until six months after application.

Under the Act, the independence of married women in nationality matters is recognized, and British nationality is restored to those women who had lost it through marriage to aliens. In future, marriage will not affect a woman's nationality. Alien women who marry Australian citizens may, however, be naturalized under somewhat easier conditions than those which apply to other aliens.

2. *Certificates Granted.*—(i) *Australia.* The following figures relate to certificates issued under the Nationality and Citizenship Act 1948–1955 during the year 1954:—

### NATURALIZATION : CERTIFICATES GRANTED, AUSTRALIA, 1954.

(ii) *States.* The certificates of naturalization granted in 1954 were issued in respect of residents of the various States and Territories as follows :—New South Wales, 1,661 ; Victoria, 1,428 ; Queensland, 400 ; South Australia, 548 ; Western Australia, 487 ; Tasmania, 115 ; Northern Territory, 25 ; Australian Capital Territory, 85 ; New Guinea, 21 ; Total, 4,770.

## § 12. Population of Territories.

At the Census of 30th June, 1954, as at previous censuses, arrangements were made to obtain complete information concerning not only the two internal territories of Australia—the Northern Territory and the Australian Capital Territory—but also the external territories under the control of Australia, namely :—Norfolk Island, Papua, the Trust Territory of New Guinea, and the Trust Territory of Nauru. Figures respecting population and number of dwellings in each Territory at the Census of 1954 are summarized in the following table :—

POPULATION AND DWELLINGS : TERRITORIES, CENSUS, 30th JUNE, 1954.  
(EXCLUDING INDIGENOUS POPULATION.)

Territory.	Population.			Dwellings.	
	Males.	Females.	Persons.	Occupied.	Unoccupied
Internal—					
Northern Territory ..	10,288	6,181	16,469	3,426	47
Aust. Capital Territory	16,229	14,086	30,315	7,118	326
External—					
Norfolk Island ..	478	464	942	310	41
Papua ..	3,867	2,446	6,313	1,605	66
Trust Territory of New Guinea ..	7,201	4,241	11,442	3,098	104
Trust Territory of Nauru	1,269	376	1,645	99	13

Particulars concerning the indigenous populations of the internal and external territories will be found in Chapter V.—The Territories of Australia.

## § 13. The Aboriginal Population of Australia.

In Official Year Book No. 17, pp. 951–61, a brief account is given of the Australian aboriginal population, its origin, its numbers as estimated from time to time, and the steps taken for its protection. On pp. 914–6 of Official Year Book No. 22, particulars are shown for each of the States and Territories of Australia at successive periods, while a special article dealing with the estimated number and distribution of the native population at the date of first settlement of the white race in the continent appears on pp. 687–96 of Official Year Book No. 23.

The aborigines are scattered over the whole of the mainland but the majority are concentrated in Western Australia, Queensland and the Northern Territory. Details of the number in each State at the June, 1947 Census are shown in the following table. Full-blood aborigines in employment or living in proximity to settlements were enumerated at the census, while estimates of the total numbers, including those living in the wild state, were furnished by the Protectors of Aborigines. Half-caste aborigines are included in the numbers of the population and are of course enumerated at the census. The figures shown for Queensland are exclusive of Torres Strait Islanders.

## ABORIGINAL POPULATION, 30th JUNE, 1947.

State or Territory.	Full-blood.				Half-caste. (Enumerated at the Census.)				Total, Full-blood and Half-caste.
	In Employment or Living in Proximity to Settlements.(a)			Esti- mate of Total Num- bers.(b)					
	Males.	Females.	Persons.		Persons.	Males.	Females.	Persons.	
New South Wales ..	546	407	953	(c) 953	5,498	5,109	10,607	11,560	
Victoria ..	100	108	208	(c) 208	537	532	1,069	1,277	
Queensland ..	3,504	2,822	6,326	9,100	3,684	3,527	7,211	16,311	
South Australia ..	259	205	464	2,139	1,103	1,054	(d)2,157	(d)4,296	
Western Australia ..	2,664	2,269	4,933	20,338	2,359	2,215	(d)4,574	d 24,912	
Tasmania ..	..	..	..	..	127	87	214	214	
Northern Territory ..	5,615	5,370	10,985	13,900	660	587	1,247	15,147	
Aust. Capital Territory ..	..	..	..	..	58	42	100	100	
Total ..	12,688	11,181	23,869	46,638	14,026	13,153	27,179	73,817	

(a) Enumerated at the Census. (b) Furnished by the Protectors of Aborigines. (c) Census totals. (d) In addition to these totals, the Protectors of Aborigines estimated that there were 826 half-caste and mixed bloods in South Australia and 1,322 in Western Australia, presumably living in the nomadic state.

According to the annual Reports of the Protectors of Aborigines, there has been little change in the numbers of aborigines in most States since 1947. In Western Australia, however, the estimate for the total number of full-blood and half-caste aborigines at 30th June, 1952 was 21,051.

## CHAPTER XVII.

### VITAL STATISTICS.

**NOTE.**—1. Tables in this chapter cover the year 1954. More detailed figures will be found in *Demography Bulletin* No. 72 unless otherwise specifically indicated.

2. Figures for Australia throughout are exclusive of full-blood aborigines.

#### § 1. Provisions for Registration and Compilation of Statistics.

In Australia vital statistics are compiled from information obtained from the registers of births, deaths and marriages. Each State and Territory has an independent system of registration. Provisions for the civil registration of births, deaths and marriages have been in force in Tasmania from 1839, in Western Australia from 1841, in South Australia from 1842, in Victoria from 1853 and in New South Wales and Queensland (then part of New South Wales) from 1856. Registration in the Territories is administered by the Commonwealth Government, registration in respect of the Northern Territory having been taken over from South Australia in 1911 and in respect of the Australian Capital Territory from New South Wales in 1930. The authority responsible for the registration of births, deaths and marriages occurring within his particular State or Territory is the Registrar-General or the Principal Registrar, or, as in the case of Victoria, the Government Statist.

In the Australian Capital Territory and the Northern Territory, information concerning a birth is required to be supplied within 21 days, in South Australia in 42 days, and in all other States 60 days is allowed. In all States, however, provision has been made for the late registration of births. For the registration of a death, the length of time varies more considerably, being 8 days in Tasmania, 10 days in South Australia, 14 days in Western Australia, the Northern Territory and the Australian Capital Territory, 21 days in Victoria and 30 days in New South Wales and Queensland. In all States and Territories provision is made for the celebration of marriages by ministers of religion registered for that purpose with the Registrar-General or the Principal Registrar of Births, Deaths and Marriages of the State or Territory and also by certain civil officers. In all cases the celebrant, whether minister of religion or civil officer, is required to register particulars of the parties married with the Registrar of the district in which the marriage has taken place. The length of time allowed for registration of marriage also shows considerable variation as between States and Territories. In Victoria, Western Australia, the Northern Territory and the Australian Capital Territory, registration is required immediately following the ceremony, in Tasmania and South Australia within 7 days and in New South Wales and Queensland within 30 days.

For all States except Queensland and Tasmania the registration of stillbirths is compulsory. Western Australia was the first State to introduce compulsory registration in 1908, followed by the Australian Capital Territory in 1930, New South Wales in 1935, South Australia in 1937 and Victoria in 1953. No statutory provision has been made in Queensland or Tasmania for the registration of stillbirths. In these States, however, provision is made for voluntary registration and it appears likely that such births are notified to the Registrar-General. In this chapter stillbirths have been excluded from all tables of births and deaths and shown only in those specially relating to stillbirths.

While there is every indication that the registration work of the several States and the Territories is very efficiently carried out, it is clear that in those States with a large area and scattered population, failure to register births and deaths may occur in some cases. It is believed, however, that consequent on the abolition, in 1943, of income limits previously restricting eligibility for maternity allowances, claims for which are checked against birth registers before payment, the proportion of births now occurring which is not registered is very small.

The data required for the compilation of vital statistics are copied from the registers of births, deaths and marriages in the Registrar General's Office and forwarded, through the Government Statistician in each State, and direct from the Principal Registrars in the two Territories, to the Commonwealth Statistician. The compilation and publication of vital statistics for Australia is a function of the Commonwealth Statistician. The Statisticians in the various States compile and publish statistics relating to their respective States.

## § 2. Marriages.

1. **Number of Marriages.**—The number of marriages registered in Australia during the year ended 31st December, 1954 was 71,229, giving a rate of 7.92 per 1,000 of the mean population for the year. A summary of the number of marriages registered in each State and Territory from 1926 to 1954 is given in the following table. Annual averages for each five-year period from 1861 will be found in Official Year Book No. 39, page 575.

### MARRIAGES.

1953 .. ..	8.14	8.03	7.66	7.92	8.10	7.91	9.91	7.35	8.01
1954 .. ..	8.02	7.91	7.64	7.77	8.13	8.07	8.82	8.10	7.92

(a) Rates based on revised mean population estimates shown on p. 577.

3. **Marriage Rates based on Marriageable Population.**—As the marriage rates in some international tabulations are based on the unmarried population aged 15 years and over, the corresponding rates have been calculated for Australia for the eight census periods to 1953-55. The period in each case comprises the census year with the year immediately preceding and the year immediately following, and the figures are as follows :—

## PERSONS MARRYING PER 1,000 OF UNMARRIED POPULATION : AUSTRALIA.

Period.	Rate.(a)	Period.	Rate.(a)
1880-82 .. ..	48.63	1920-22 .. ..	55.97
1890-92 .. ..	44.04	1932-34 .. ..	42.88

(a) Number of marriages per 1,000 of mean population.

(b) European population only.

(c) 1953.

(d) Includes Maoris.

(e) Excludes full-blood aboriginals.

5. **Age and Conjugal Condition at Marriage.**—(i) *General.* Age at marriage in single years of age and previous conjugal condition of bridegrooms and brides in 1954 will be found in *Demography Bulletin* No. 72. A summary in age groups is given

hereunder. There were 5,291 males aged less than twenty-one years married during 1954 while the corresponding number of females was 22,967. At the other extreme there were 95 bachelors and 54 spinsters in the age group 65 years and over.

**AGE AND CONJUGAL CONDITION OF BRIDEGROOMS AND BRIDES : AUSTRALIA, 1954.**

(iii) *Relative Ages of Bridegrooms and Brides.* The relative ages of bridegrooms and brides in 1954 are shown in single years in *Demography Bulletin No. 72*. A summary in age groups of five years is given below.

# BIRTHS, DEATHS, AND MARRIAGES: AUSTRALIA, 1860 to 1955

# RATES OF BIRTHS, DEATHS, AND NATURAL INCREASE: AUSTRALIA, 1860 to 1955

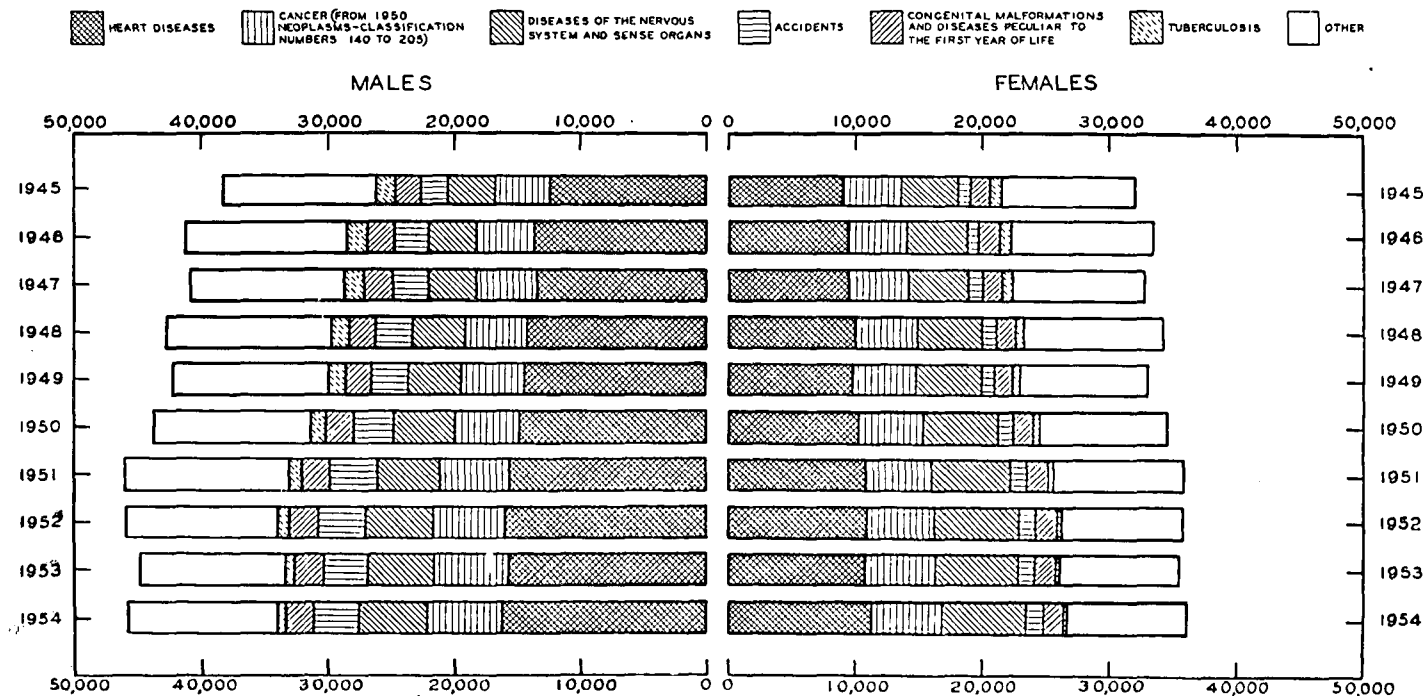

# INFANT MORTALITY RATES: AUSTRALIA, 1907 to 1955 (INFANT DEATHS PER 1000 LIVE BIRTHS)

629

EXPLANATION.—This graph shows the marked improvement in infantile mortality rates over the past 48 years. The improvement has been confined mainly to children over one month, considerably less having occurred in the first month of life (see page 649).

# CAUSES OF DEATH: AUSTRALIA, 1945 to 1954

(iv) *Average Ages of Bridegrooms and Brides.* The age at marriage of brides has remained fairly constant during recent years at an average of about 25½ years, although in the period 1937-39 the average rose to almost 26 years. The average ages, in years, of brides for each of the five years to 1954 were:—1950, 25.73; 1951, 25.71; 1952, 25.61; 1953, 25.73; and 1954, 25.59. For the following five-year periods the average ages in years were:—1911-15, 25.76; 1916-20, 26.05; 1921-25, 25.76; 1926-30, 25.57; 1931-35, 25.50; 1936-40, 25.72; 1941-45, 25.68; and 1946-50, 25.61. The average ages, in years, of bridegrooms were 28.99 in 1950, 28.92 in 1951, 28.79 in 1952, 28.96 in 1953, and 28.82 in 1954. It follows, therefore, that brides are, generally speaking, a little more than three years younger than bridegrooms. The average ages of brides and bridegrooms for the years 1940-46 showed the effects of war-time conditions. The proportion of young persons marrying during those years increased, thereby causing decreases in the average ages of both brides and bridegrooms. The difference in age between brides and bridegrooms was 3.26 years in 1950, 3.21 in 1951, 3.18 in 1952 and 3.23 in 1953 and 1954.

6. *Previous Conjugal Condition.*—The number of bachelors, spinsters and widowed and divorced persons who married during 1954 is shown in the table on page 626. The following table shows the relative conjugal condition of the contracting parties.

## CONJUGAL CONDITION OF BRIDEGROOMS AND BRIDES : AUSTRALIA, 1954.

Conjugal Condition of Bridegrooms.	Total Bridegrooms.	Conjugal Condition of Brides.		
		Spinsters.	Widows.	Divorced.
Bachelors ..	63,356	58,896	1,502	2,958
Widowers ..	3,344	1,363	1,338	643
Divorced ..	4,529	2,546	616	1,367
Total Brides ..	71,229	62,805	3,456	4,968

7. *Birthplaces of Persons Marrying.*—A table showing the relative birthplaces of bridegrooms and brides married in each year will be found in the *Demography Bulletin*.

8. *Occupation of Bridegrooms.*—The distribution of the 71,229 bridegrooms for 1954 amongst classes of occupations was as follows:—Craftsmen, 18,257; Commercial and Clerical, 12,282; Operatives, 12,108; Rural, Fishing and Hunting, 8,653; Labourers, 6,297; Domestic and Protective Service, 4,828; Professional and Semi-Professional, 3,781; Administrative, 2,913; and Not Gainfully Occupied and Not Stated, 2,110.

9. *Celebration of Marriages.*—In all the States marriages may be celebrated either by ministers of religion who are registered for that purpose with the Registrar-General, or by certain civil officers—in most cases district registrars—but most of the marriages

are celebrated by ministers of religion. The registered ministers in 1954 belonged to more than forty different denominations, some of which, however, have only very few adherents. A number of these have been bracketed under the heading "Other Christian". The figures for 1954 are shown in the following table.

#### MARRIAGES IN EACH DENOMINATION, 1954.

10. Divorces.—Chapter XIII.—Public Justice shows details of the number of marriages dissolved annually by divorce, nullity of marriage and judicial separation. The number dissolved by decrees for divorce and nullity of marriage made absolute and by judicial separation in 1954 was 6,528. Detailed tables relating to divorce statistics for 1954 and summary tables for earlier years are shown also in *Demography Bulletin* No. 72.

### § 3. Fertility and Reproduction.

1. **Introductory.**—Of the two elements of increase in the population, namely, natural increase and net migration, the former has been by far the more important over the past few decades. The level of natural increase depends on the excess of births over deaths and the relation between fertility and mortality determines the rate of reproduction or replacement of the population.

2. **Number of Live Births and Confinements.**—(i) *Year 1954.* There are various methods of measuring the fertility of the population by relating the number of births to the numbers in the population. In each the basic data are, of course, the numbers of live births.

The number of live births registered in Australia during 1954 is shown in the table below. The table shows also the number of confinements resulting in one or more live births. The figures exclude cases where the births were of still-born children only.

## LIVE BIRTHS AND CONFINEMENTS, 1954.

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W.A.	Tas.	N.T.	A.C.T.	Australia.
--------------	--------	------	---------	----------	------	------	------	--------	------------

## LIVE BIRTHS.

Single births	71,379	53,327	30,583	17,811	15,576	7,559	501	845	197,581
Twins ..	1,709	1,315	581	407	346	208	12	12	4,590
Triplets ..	37	18	12	9	6	3	..	..	85
Males ..	37,453	28,112	15,880	9,347	8,136	3,919	268	440	103,555
Females ..	35,672	26,548	15,296	8,880	7,792	3,851	245	417	98,701
Total ..	73,125	54,660	31,176	18,227	15,928	7,770	513	857	202,256

## STILLBIRTHS ASSOCIATED WITH MULTIPLE BIRTHS INCLUDED ABOVE.

Twins ..	47	15	15	3	10	8	..	..	98
Triplets ..	2	..	..	..	..	..	..	..	2

## CONFINEMENTS RESULTING IN ABOVE BIRTHS.

Nuptial ..	69,415	52,132	29,311	17,455	15,054	7,380	431	840	192,018
Ex-nuptial ..	2,855	1,866	1,574	504	702	288	76	11	7,930
Total ..	72,270	53,998	30,885	18,019	15,756	7,668	507	851	199,954

NOTE.—In Queensland and Tasmania the registration of stillbirths is not compulsory and it is possible that in some cases where one child only of a multiple pregnancy is live-born the confinement has been treated as a single birth. This applies particularly to South Australia, where registration practice for twins, when one is live-born and one still-born, is to treat each child as a single birth, and for triplets with one still-born, to treat the two live-born as twins, and so on.

(ii) *Live Births, Years 1926 to 1954.* The average annual number of live births in each State and Territory for each five-year period from 1926 to 1950 and the total number of live births in each State and Territory for each year from 1950 to 1954 are given in the following table. Corresponding figures for each five-year period from 1861 will be found in Official Year Book No. 39, p. 583.

3. *Crude Birth Rates.*—The oldest and most popular method of measuring fertility is to relate the number of births to the total population, thus obtaining the crude birth rate. The crude birth rate measures the rate per thousand persons (irrespective of age or sex) at which the population has added to its numbers by way of births during a given period.

Crude birth rates for each five-year period from 1926 to 1950 and for each year from 1950 to 1954 for each State and Territory are set out below :—

## CRUDE BIRTH RATES.(a)

(a) Number of births per 1,000 of mean population.  
estimates shown on p. 577.

(b) Rates based on revised mean population

NOTE.—The birth rates in the table above are based on live births registered in the respective States and Territories. Some years ago a large proportion of births in respect of which the mother's usual residence was the Australian Capital Territory took place in Queanbeyan, just over the New South Wales border, but with improved hospital facilities in the Territory the movement to outside hospitals rapidly diminished and was reversed in 1939. The following rates, based on births in respect of which the mother's usual residence is the Australian Capital Territory and on revised population figures, are a truer measure of birth rates in the Australian Capital Territory :—

Annual Average.			Year.		
1926-1930 ..	..	22.45	1950 ..	..	29.69
1931-1935 ..	..	19.53	1951 ..	..	28.51
1936-1940 ..	..	19.29	1952 ..	..	31.09
1941-1945 ..	..	23.06	1953 ..	..	27.61
1946-1950 ..	..	27.13	1954 ..	..	28.67

The variations similarly caused in the birth rates for the States and the Northern Territory by referring the birth registrations to the State or Territory in which the mother was usually resident are shown by the following corrected rates for 1954 :—New South Wales, 21.32; Victoria, 22.25; Queensland, 23.82; South Australia, 22.82; Western Australia, 24.91; Tasmania, 25.03; and Northern Territory, 32.38.

In the earlier years of the present century the crude birth rate fluctuated somewhat but from 1912, when 28.60 was recorded, there was an almost continuous decline to the very low figure of 16.39 in 1934. The decline in the depression years was to some extent occasioned by the postponement of marriages, and with subsequent improvement in economic conditions the rate rose. From 1940 the rate increased quite appreciably owing to a continued improvement in the economic welfare of the community and the war-time boom in marriages. The latter resulted in an abnormal number of first births but investigation indicates that rates for births other than first were generally slightly higher than might have been expected from pre-war experience. The improvement in the birth rate has been maintained since the end of the war despite some falling off in marriage rates. The post-war peak of 24.07 was recorded in 1947.

4. Crude Birth Rates of Various Countries.—The following table gives crude birth rates for Australia in comparison with rates for various other countries.

## CRUDE BIRTH RATES(a) : VARIOUS COUNTRIES.

Country.	1921- 25.	1926- 30.	1931- 35.	1934.	Country.	1921- 25.	1926- 30.	1931- 35.	1934.
Canada .. ..	27.4	24.1	21.4	28.5	Japan .. ..	34.6	33.5	31.6	20.1
Yugo-Slavia ..	35.0	34.2	31.8	28.4	Spain .. ..	29.8	28.5	27.1	20.0
Union of South Africa(b) ..	27.1	25.9	24.1	25.5	France .. ..	19.3	18.2	16.5	18.7
United States of America .. ..	22.5	19.7	16.9	24.9	Norway .. ..	22.2	18.0	15.2	18.6
New Zealand(d) ..	22.2	19.7	17.0	21.7	Italy .. ..	29.8	26.8	23.8	17.6
Australia(e) ..	23.9	21.0	16.9	22.5	Denmark .. ..	22.3	19.4	17.7	17.4
Netherlands ..	25.7	23.2	21.2	21.6	Switzerland ..	19.5	17.6	16.4	17.0

Ireland, Republic of	20.3	20.1	19.4	21.1	United Kingdom ..	20.4	17.2	15.5	15.6
					Austria .. ..	22.2	17.6	14.4	14.7
					Sweden .. ..	19.1	15.9	14.1	14.6

(a) Number of births per 1,000 of mean population. (b) European population only. (c) 1933-35.  
(d) Excludes Maoris. (e) Excludes full-blood aborigines.

5. **Fertility Rates.**—The principal demographic factors affecting the level of crude birth rates are the proportion of women of child-bearing age in the population and the proportion of such women who are married. These factors may vary considerably at different periods and for different countries, and a population with a high proportion of married women of child-bearing age will have a much higher crude birth rate than one with a low proportion, although the fertilities of the two populations may be identical.

In order to compare fertilities, births are sometimes related to the number of women of child-bearing age or, alternatively, nuptial births are related to the number of married women of child-bearing age. Thus births are related to potential mothers, giving the fertility rate.

The following table sets out for certain periods, commencing with 1880-82, the number of births per thousand of mean population, the number of births per thousand women of child-bearing age and the number of nuptial births per thousand married women of child-bearing age. For purposes of this table the child-bearing age has been taken to be 15-44 years inclusive, but births to mothers who were stated to be under 15 or over 44 years have been included in the compilations.

## CRUDE BIRTH RATES AND FERTILITY RATES : AUSTRALIA.

Period.	Average Annual Rates.			Index Nos. (Base : 1880-82 = 100).		
	Crude Birth Rate.(a)	Fertility Rates.		Crude Birth Rate.(a)	Fertility Rates.	
		Births per 1,000 Women aged 15-44 Years.	Nuptial Births per 1,000 Married Women aged 15-44 Years.		Births per 1,000 Women aged 15-44 Years.	Nuptial Births per 1,000 Married Women aged 15-44 Years.
1880-82 ..	35.3	170	321	100	100	100
1890-92 ..	34.5	159	332	98	94	103
1900-02 ..	27.2	117	235	77	69	73
1910-12 ..	27.2	117	236	77	69	74
1920-22 ..	25.0	107	197	71	63	61
1932-34 ..	16.7	71	131	47	42	41
1946-48 ..	23.6	104	167	67	61	52

(a) Number of births per 1,000 of mean population.

The table above shows how increasing proportions both of women of child-bearing age and of married women of child-bearing age inflate the crude birth rate. Thus while the nuptial birth rate for married women increased by only 27 per cent. over the period 1932-34 to 1946-48 the crude birth rate rose by 41 per cent., owing principally to the greatly increased number of marriages during that period.

6. **Age-specific Fertility Rates for Females.**—So long as customary ages at marriage do not change drastically, the main demographic factor affecting the number of births is the age composition of the potential mothers in the population. Within the child-bearing group the fertility of women of different ages varies considerably and a clearer view of the fertility of the population can be obtained from an examination of what are known as its age-specific fertility rates, that is, the number of births to women of specified ages per thousand women of those particular ages.

Age-specific fertility rates are more commonly expressed in age groups than single ages. The following table sets out age-specific fertility rates for Australia for the period 1921 to 1954 in five-year age groups.

AGE-SPECIFIC FERTILITY RATES(a) : AUSTRALIA.

Age Group (Years).	1921.	1926.	1931.	1936.	1941.	1946.	1951.	1952.	1953.	1954.
15-19..	12.83	14.02	13.08	12.18	11.90	12.63	18.59	19.07	18.45	19.12
20-24..	65.45	60.23	53.08	50.33	59.42	73.52	85.84	90.93	94.53	96.24
25-29..	82.24	76.82	62.47	62.02	70.78	89.51	90.24	94.53	94.73	94.40
30-34..	68.50	61.90	51.25	46.33	49.72	65.03	59.16	61.51	61.17	59.91
35-39..	49.48	43.55	33.23	28.89	28.69	37.43	32.29	32.61	31.87	31.17
40-44..	21.66	17.63	13.61	10.19	9.52	11.87	9.97	9.95	9.77	9.85
45-49..	2.10	1.90	1.45	1.11	0.80	1.03	0.80	0.83	0.67	0.71

(a) Number of female births per 1,000 women in each age group.

The table shows that in 1954 the most fertile age group was 20-24 years. The decline in fertility between 1921 and 1936 was general but was more pronounced in the older age groups. During the period 1936 to 1954 a rise in fertility occurred in all age groups below 40, the most noticeable increase being in the 20 to 24 age group.

7. **Gross and Net Reproduction Rates for Females.**—A single measure of reproduction known as the gross reproduction rate is obtained by adding together the specific fertility rates for each age in the child-bearing group. This measure indicates the number of female children who would be born on the average to women living right through the child-bearing period, if the conditions on which the rate is based continue. The rate is unaffected by the age composition of the potential mothers, and consequently it shows more clearly than the crude birth rate the reproductive propensity of the population. It is, however, an imperfect measure of reproduction because it does not take into account the females who fail to live from birth to the end of the reproductive period. A more accurate measure of this nature is obtained by multiplying the specific fertility rates by the number of females in the corresponding age group of the stationary or life table population and summing the products. Allowance is thus made for the effect of mortality and the result is known as the net reproduction rate. The net reproduction rate indicates the average number of female children who would be born to women during their lifetime if they were subject at each age to the fertility and mortality rates on which the calculation is based. A constant net reproduction rate of unity indicates that the population will ultimately become stationary. If it continues greater than unity, the population will ultimately increase; if less than unity, it will ultimately decrease. The following table should be read in the light of the comment which follows it and of the index of fertility in paragraph 9 hereof.

GROSS AND NET REPRODUCTION RATES : AUSTRALIA.

Year.	Gross Reproduction Rate.	Net Reproduction Rate.	Year.	Gross Reproduction Rate.	Net Reproduction Rate.(g)
1881 (a) ..	2.65	(b) 1.88	1948 ..	1.451	1.376
1891 (a) ..	2.30	(b) 1.73	1949 ..	1.457	1.382
1901 (a) ..	1.74	(c) 1.39	1950 ..	1.491	1.415
1911 ..	1.705	(d) 1.421	1951 ..	1.485	1.409
1921 ..	1.511	(e) 1.313	1952 ..	1.547	1.468
1931 ..	1.141	(f) 1.039	1953 ..	1.556	1.477
1941 ..	1.154	(f) 1.053	1954 ..	1.558	1.478

(a) Approximate only. (b) 1881-1890 mortality experience used. (c) 1891-1900 mortality experience used. (d) 1901-1910 mortality experience used. (e) 1920-1922 mortality experience used. (f) 1932-1934 mortality experience used. (g) 1946-48 mortality experience used.

NOTE.—It is not strictly correct to assume, as above, that a particular age-specific fertility rate can be applied to a hypothetical group of women reaching that age, without taking account of previous fertility and marriage experiences. Reproduction rates are, therefore, somewhat unreliable when birth and marriage rates have been changing. The indexes of marriage fertility shown on the next page are also of doubtful reliability in similar circumstances.

Since 1881 there has been a substantial downward trend in both rates, but the gross rate has fallen considerably more than the net, showing that the decline in fertility has been offset to some extent by a decline in mortality. The net reproduction rate was below unity over the period 1932 to 1939, and if the low level of those years were to continue, ultimate population decline would be certain. The progressive rise in both gross and net reproduction rates from 1939 to 1947 was due largely to higher marriage rates during the war and early post-war years than had been experienced in the immediate pre-war years. Such fluctuations in marriage rates affect both gross and net reproduction rates substantially. When fluctuations in marriage rates are transient, reproduction rates calculated as above are not valid as indicators of relative fertility nor of the extent to which population will replace itself. Owing to various influences the number of marriages in each year since 1948 has remained at a relatively high level and the net reproduction rates have been steady between 1.4 and 1.5. The fertility of marriages is measured in paragraph 9 below.

8. **Gross and Net Reproduction Rates of Various Countries.**—In the following table a comparison is given of the gross and net reproduction rates recorded for various countries in the period 1951 to 1953. These have been taken mainly from the United Nations *Demographic Year Book*, 1954 and represent the latest available international comparison. More recent Australian rates are shown in the table above.

#### GROSS AND NET REPRODUCTION RATES : VARIOUS COUNTRIES.

Country.	Period.	Reproduction Rate.		Country.	Period.	Reproduction Rate.	
		Gross.	Net.			Gross.	Net.
Canada ..	1952	1.77	(a)	Norway ..	1952	1.24	1.17
New Zealand (b)	1953	1.70	1.63	Switzerland ..	1952	1.25	1.15
United States of America(c) ..	1951	1.59	1.51	Denmark ..	1953	1.25	1.14
Australia(d) ..	1953	1.56	1.48	Scotland ..	1952	1.18	1.12
Finland ..	1952	1.49	1.39	Portugal ..	1951	1.49	1.09
Netherlands ..	1953	1.46	1.39	England and Wales ..	1953	(a)	1.03
Ireland, Republic of ..	1950-52	1.60	1.38	Belgium ..	1952	1.13	1.03
France ..	1952	1.33	1.25	Sweden ..	1951	1.07	1.02

(a) Not available.  
full-blood aboriginals.

(b) Excludes Maoris.

(c) White population only.

(d) Excludes

In comparing the reproduction rates of the countries shown above allowance should be made for any differences in years as the rates for any one country from year to year are affected by variations in the incidence of marriage.

9. **Fertility of Marriages.**—In issues of the Official Year Book prior to No. 36 estimates of the fertility of marriages were published. These were calculated by relating the births of one five-year period to the marriages in the preceding five years (see Official Year Book No. 35, p. 329). Since the publication of that issue, an improved method has been formulated for measuring current marriage fertility by relating nuptial confinements in each year to the marriages from which they could have resulted. Confinements of women of a certain number of years duration of marriage are related to the number of marriages taking place that number of years previously. The table below sets out this index of current fertility per marriage in respect of confinements in the individual years shown.

#### FERTILITY OF MARRIAGES : AUSTRALIA.

Year.	Nuptial Confinements per Marriage.	Year.	Nuptial Confinements per Marriage.	Year.	Nuptial Confinements per Marriage.
1940.. ..	2.18	1945.. ..	2.36	1950.. ..	2.56
1941.. ..	2.19	1946.. ..	2.55	1951.. ..	2.55
1942.. ..	2.12	1947.. ..	2.55	1952.. ..	2.63
1943.. ..	2.21	1948.. ..	2.44	1953.. ..	2.66
1944.. ..	2.28	1949.. ..	2.45	1954.. ..	2.66

NOTE.—See Note at foot of p. 636.

The figure for a particular year gives the estimated number of children which a marriage would produce according to the fertility conditions of that year. There was an almost continuous decline for a number of years to 1942, but a pronounced increase from 1943 to 1946. Comparing this index with the net reproduction rate it is evident that the rise in the latter since 1935 has been caused by a rise in the marriage rate, due firstly to the postponed depression marriages, and secondly to war-time marriages, and since 1942 to an increase in the fertility of marriages. The figures for 1949 and subsequent years present a somewhat inflated index as many of the births which have been used to calculate the index relate to marriages of immigrants which took place overseas and are consequently not included in Australian marriage records. Partial investigation suggests that this factor may overstate the index by as much as 6 per cent.

10. **Masculinity of Live Births.**—The masculinity of live births, i.e., the number of males born for every 100 female births, has remained fairly stable for Australia at about 105. But when the number of births for which masculinity is being calculated is small (for example, State totals), considerable variation is shown. For 1954 the figures ranged from 101.77 in Tasmania to 109.39 in the Northern Territory. The averages for the ten years 1941–50 were as follows:—New South Wales, 105.49; Victoria, 105.47; Queensland, 105.49; South Australia, 105.78; Western Australia, 104.27; Tasmania, 104.45; Australia, 105.38. The following table shows the figures for Australia for each ten-year period from 1901 to 1950 and for each of the years 1951 to 1954:—

**MASCUILITY(a) OF LIVE BIRTHS REGISTERED : AUSTRALIA.**

Particulars.	1901–10.	1911–20.	1921–30.	1931–40.	1941–50.	1951.	1952.	1953.	1954.
Total Births ..	105.22	105.27	105.55	105.12	105.38	105.86	105.20	104.82	104.92
Ex-nuptial Births	104.08	105.25	105.16	105.36	105.34	105.30	99.57	105.69	101.58

(a) Number of males born for every 100 female births.

11. **Ex-nuptial Live Births.**—(i) *General.* The highest proportion of ex-nuptial births in any one year since 1901 was recorded in 1905 when there were 6,545 ex-nuptial births representing 6.24 per cent. of total births. Since then the proportion has declined steadily. The largest number of ex-nuptial births was recorded in 1953 when 8,032 were registered, but this number represented only 3.97 per cent. of total births. The lowest proportion was 3.78 per cent. in 1940.

The variations in the proportions of ex-nuptial births as between the individual States and Territories for 1954 are shown below.

**EX-NUPTIAL LIVE BIRTHS : NUMBER AND PROPORTION, 1954.**

Particulars.	N.S.W.	Vic.	Q'land.	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
Number ..	2,889	1,890	1,585	569	711	295	77	11	8,027
Proportion of Total Births%	3.95	3.46	5.08	3.12	4.46	3.80	15.01	1.28	3.97

The number and proportion of ex-nuptial births at intervals from 1901 to 1954 are as follows:—

**EX-NUPTIAL LIVE BIRTHS : NUMBER AND PROPORTION, AUSTRALIA.**

Particulars.	Annual Average.					1951.	1952.	1953.	1954.
	1901–10.	1911–20.	1921–30.	1931–40.	1941–50.				
Number ..	6,498	6,836	6,238	5,133	6,780	7,555	7,842	8,032	8,027
Proportion of Total Births .. %	6.05	5.22	4.66	4.40	4.13	3.91	3.89	3.97	3.97

It is, of course, possible that the number of ex-nuptial births is somewhat understated owing to diffidence in proclaiming the fact of ex-nuptiality.

(ii) *Rate of Ex-nuptiality.* A further comparison is obtained by calculating the number of ex-nuptial births per thousand of the single, widowed and divorced female population between the ages of 15 and 45 years. On this basis the number of ex-nuptial births per 1,000 unmarried women of ages 15 to 45 has been found to be as follows:—1880–82, 14.49; 1890–92, 15.93; 1900–02, 13.30; 1910–12, 12.53; 1920–22, 10.50; 1932–34, 6.91; and 1946–48, 11.45.

(iii) *Comparison of Rates.* The following table, showing the relative proportions of ex-nuptial and nuptial births to the total population, discloses a much greater proportional reduction in the ex-nuptial birth rate than in the nuptial rate:—

**CRUDE EX-NUPTIAL, NUPTIAL, AND TOTAL BIRTH RATES(a) : AUSTRALIA.**

Birth Rate.	Annual Average.					1951.	1952.	1953.	1954.
	1901–10.	1911–20.	1921–30.	1931–40.	1941–50.				
Ex-nuptial	1.60	1.39	1.04	0.76	0.90	0.90	0.91	0.91	0.89
Nuptial ..	24.91	25.18	21.40	16.47	20.99	22.06	22.44	22.03	21.61
Total ..	26.51	26.57	22.44	17.23	21.89	22.96	23.35	22.94	22.50

(a) Number of births per 1,000 of mean population.

12. *Legitimations.*—In the several States Acts have been passed to legitimize children born before the marriage of their parents, provided that no legal impediment to the marriage existed at the time of birth. On registration in accordance with the provisions of the Legitimation Acts, any child who comes within the scope of their purposes, born before or after the passing thereof, is deemed to be legitimate from birth by the post-natal union of its parents, and entitled to the status of offspring born in wedlock. During 1954 the number of children legitimized in Australia was 1,041.

13. *Multiple Births.*—Because the current Australian birth statistics are based only on those confinements which resulted in a live-born child the number of confinements for multiple births for Australia is understated—firstly, because in cases where all children of a multiple birth are still-born the confinement is excluded, and secondly, because of differences in registration practice where stillbirths are involved, from which it is evident, in recent years, that in Victoria and Queensland, some, and in South Australia, all, cases of multiple births in which only one child was live-born have been registered as single births. It is estimated that the deficiency due to this second cause is about 50 cases per annum. During 1954 multiple births recorded on the above basis comprised 2,344 cases of twins and 29 cases of triplets, the resultant numbers of live-born and still-born children being respectively 4,590 and 98 for twins and 85 and 2 for triplets. This represents an average of 11.72 recorded cases of twins and 0.15 recorded cases of triplets per 1,000 confinements or, alternatively, mothers of twins represented one in every 85 mothers and mothers of triplets one in every 7,000. Total cases of multiple births represented 11.87 per 1,000 confinements or one in every 84 mothers.

The proportion of mothers of multiple births to total mothers does not vary greatly from year to year.

14. *Ages of Parents.*—The relative ages of the parents of children registered in 1954 have been tabulated separately for male and female births, multiple births being distinguished from single births. For total births and for multiple births the relative ages of parents are shown in *Demography Bulletin* No. 72. In the present work the exigencies of space allow only the insertion of a table showing, in respect of confinements resulting in one or more live births, the relative ages of parents in groups of five years.

## CONFINEMENTS : RELATIVE AGES OF PARENTS, AUSTRALIA, 1954.

15. *Birthplaces of Parents.*—A table showing birthplaces of parents of children whose births were registered during 1954 appears in *Demography Bulletin* No. 72.

16. *Occupation of Fathers.*—A table showing occupations of the fathers of all nuptial children registered in 1954 appears in *Demography Bulletin* No. 72.

17. *Age, Duration of Marriage and Issue of Mothers.*—(i) *General.* The total number of nuptial confinements resulting in live births in 1954 was 192,018, comprising 189,740 single births, 2,250 cases of twins, and 28 cases of triplets. The tables relating to previous issue exclude the issue of former marriages and still-born children. On the other hand, they include children by the same father who were born to the mother prior to the marriage. Children born at the present confinement are included in the total issue shown.

(ii) *Duration of Marriage and Issue of Mothers.* The following table shows that in 1954 the duration of marriage of mothers of nuptial children ranged from less than one year to over 25 years, and that the average family increased fairly regularly with the duration of marriage. The average issue of married mothers who bore children in 1954 was 2.48 compared with 2.45 in 1953, 2.42 in 1952, 2.40 in 1951, and 2.39 in 1950.

**NUPTIAL CONFINEMENTS : DURATION OF MARRIAGE AND ISSUE OF MOTHERS.  
AUSTRALIA, 1954.**

Duration of Marriage (Years).	Total Married Mothers.	Total Issue.	Average Issue.	Duration of Marriage (Years).	Total Married Mothers.	Total Issue.	Average Issue.

13-14 ..	3,675	16,096	4.38	Total ..	192,018	475,371	2.48

(iii) *Age and Average Issue of Mothers.* The following table shows the average number of children born to mothers of different ages. In the younger ages there is, naturally, little difference in the average number of children to each mother from year to year, but with the increase of the age of the mother the number of issue has fallen in comparison with past years. The average issue of mothers of all ages recorded for 1954 (namely, 2.48) is 24.5 per cent. below the average of 3.25 for the years 1911-20.

**AGE AND AVERAGE ISSUE OF MOTHERS : AUSTRALIA.**

19. *Stillbirths.*—Registration of stillbirths is not compulsory in all Australian States. It has been compulsory in Western Australia since 14th January, 1908; in the Australian Capital Territory since 1st January, 1930; in New South Wales since 1st April, 1935; in South Australia since 1st May, 1937; and in Victoria from 1st January, 1953. In Victoria, independently of compulsory registration, and in Queensland and Tasmania where registration is not enforced, some information is obtained by notification of stillbirths for various purposes. Because registration is not compulsory in all States detailed statistics of stillbirths for Australia as a whole have not been compiled.

The number of stillbirths in each State and Territory, as recorded since 1936 by the means outlined above, is shown in the following table:—

### STILLBIRTHS.

1953	..	31,707	22,650	11,006	6,962	5,072	2,551	116	124	80,188
1954	..	32,444	22,554	11,344	7,179	5,364	2,696	106	118	81,805

(a) Excludes deaths of defence personnel and of internees and prisoners of war from overseas for the period September, 1939 to June, 1947.

2. **Crude Death Rates.**—The commonest method of measuring the mortality rate is to relate the number of deaths for a given period to the mean population for that period, thus obtaining the crude death rate. This rate for a given period measures the numbers per thousand of population by which the population is depleted through deaths during that period. Crude death rates for each State and Territory from 1926 to 1954 are shown in the following table.

## CRUDE DEATH RATES.(a)

Period.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.
---------	--------	------	---------	----------	----------	------	------	--------	-------

## AVERAGE ANNUAL RATES.

1926-30	9.26	9.56	9.06	8.83	8.91	9.44	15.83	5.36	9.26

Males	..	10.60	9.87	9.83	9.65	9.70	9.43	8.88	4.30	10.07
Females	..	8.32	8.51	7.38	8.37	6.98	7.88	2.63	3.40	8.11
Persons	..	9.46	9.19	8.64	9.01	8.38	8.67	6.54	3.88	9.10

(a) Number of deaths per 1,000 of mean population. (b) Excludes deaths of defence personnel from September, 1939 to June, 1947. (c) Rates based on revised mean population estimates shown on page 577.

3. **Standardized Death Rates.**—(i) *General.* The death rates quoted above are crude rates, i.e., they simply show the number of deaths per thousand of mean population without taking into consideration differences in the sex and age composition of the population. Other conditions being equal, however, the crude death rate of a community will be low if it contains a large proportion of young people (not infants), and conversely it will be relatively high if the population includes a large proportion of elderly people. The foregoing table of crude death rates, therefore, does not indicate comparative incidence of mortality either as between States in the same year or in any one State over a period of years. In order to obtain a comparison of mortality rates on a uniform basis as far as sex and age constitution are concerned, "standardized" death rates may be computed. These are computed by selecting a particular distribution of age and sex as a standard, and then calculating what would have been the general death rate if the death rates for each sex and in each age group were as recorded, but the age and sex distribution were the same as in the standard population. For the standardized rates which follow, the standard population compiled by the International Institute of Statistics has been used. This standard is based upon the age distribution according to sex of nineteen European countries at their censuses nearest to the year 1900. Full details of the "Standard Population" are given in Official Year Book No. 22, p. 962.

(ii) *Death Rates in Age Groups.* An examination of the age distribution of deaths and the resultant age-specific mortality rates is made in paragraph 9, p. 653.

(iii) *Comparison of Crude and Standardized Death Rates.* The relative incidence of mortality as between individual States and as between the years 1921, 1933, 1947 and 1954 is illustrated in the following statement of crude and "standardized" death rates. These years have been chosen for comparison because the census data give essential information as to sexes and ages of the State populations. Crude death rates are shown to indicate the degree to which they disguise the true position.

#### CRUDE AND STANDARDIZED DEATH RATES.

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Aust.
<b>Crude Death Rate(a)—</b>							
1921 .. ..	9.50	10.52	9.37	10.02	10.42	10.30	9.91
1933 .. ..	8.58	9.59	8.84	8.44	8.64	9.60	8.92
1947 .. ..	9.53	10.44	9.15	9.61	9.39	9.17	9.69
1954 .. ..	9.46	9.19	8.64	9.01	8.38	8.67	9.10
<b>Standardized Death Rate(b)—</b>							
1921 .. ..	10.35	10.79	10.24	10.38	11.88	10.83	10.58
1933 .. ..	8.52	8.74	9.10	7.66	8.74	8.86	8.62
1947 .. ..	7.44	7.31	7.47	6.77	7.28	7.21	7.34
1954 .. ..	7.24	6.63	6.80	6.52	6.71	7.02	6.90

(a) Total deaths per 1,000 of mean population.  
In para. 3 (i) above.

(b) See explanation of standardized death rates

The comparisons above relate to individual years in which a census of population was taken and should not be used as the basis for general conclusions as to changes in incidence of mortality for other than those years.

4. **True Death Rates.**—The main objections to standardized death rates are that the choice of a standard population is arbitrary and that the standardized rates have little value except for comparative purposes, and even then variation of the standard population may make appreciable differences. A correct measurement of the mortality of the population can be obtained, however, from life tables. A life table represents the number of survivors at each age from a selected group of newly-born children who are subject to given mortality conditions, and from such a table the complete expectation of life at birth can be calculated. The reciprocal of this figure is known as the true death rate, since, if the complete expectation of life of a person at birth is 50 years, say, then each person will on the average die 50 years after birth, so that in the standard population one person in 50 or 20 per thousand will die each year. The true death rate for a given period is unaffected by the particular age distribution of that period and is determined

solely by the mortality experience of the period as manifested in the rate of survivorship from each year of age to the next. The table below sets out complete expectation of life at birth and true death rates for the periods covered by Australian life tables.

**COMPLETE EXPECTATION OF LIFE AT BIRTH AND TRUE DEATH RATES : AUSTRALIA.**

Period.	Complete Expectation of Life at Birth (Years).		True Death Rate.	
	Males.	Females.	Males.(a)	Females.(b)
1881-1890..	47.20	50.84	21.19	19.67
1891-1900..	51.06	54.76	19.58	18.26
1901-1910..	55.20	58.84	18.12	17.00
1920-1922..	59.15	63.31	16.91	15.80
1932-1934..	63.48	67.14	15.75	14.89
1946-1948..	66.07	70.63	15.14	14.16

(a) Number of deaths per 1,000 males in life table or stationary population. (b) Number of deaths per 1,000 females in life table or stationary population.

5. **Crude Death Rates of Various Countries.**—The following table gives crude death rates for Australia in comparison with rates for various other countries.

Scotland ..	1953	15.2	14.1				

(a) Number of deaths per 1,000 males in life table or stationary population (see explanation on p. 636). (b) Number of deaths per 1,000 females in life table or stationary population (see explanation on p. 646). (c) Excludes Maoris. (d) Excludes full-blood aboriginals. (e) European population only.

7. *Australian Life Tables.*—(i) *Life Tables prior to 1947.* It has been the practice at each census from 1911 onwards to prepare Life Tables representative of the mortality experience of Australia. In 1911 the mortality of the Australian population for the thirty years from 1881 to 1910 inclusive was investigated by the Commonwealth Statistician. Tables were compiled for each State and for Australia as a whole in respect of each sex for each of the decennial periods 1881–1890, 1891–1900 and 1901–1910. These compilations furnished a comprehensive view of Australian mortality in respect of sex, of time, and of geographical distribution, and practically superseded all Life Tables prepared in Australia prior to 1911. In addition, monetary tables based on the experience for the whole of Australia for the ten years 1901–1910 were prepared and published.

At the Census of 1921 Life Tables were prepared by the Commonwealth Statistician from the population recorded and the deaths in the three years 1920–22. Similarly in 1933 the Life Tables, which were prepared by Mr. F. W. Barford, M.A., A.I.A., were based on the census population and the deaths in the calendar years 1932–34.

(ii) *Life Tables of Census of 1947.* On the occasion of the 1947 Census, Life Tables representing the sixth in the series were compiled by the Commonwealth Actuary, Mr. W. C. Balmford, O.B.E., F.I.A. These were based on the population recorded, in conjunction with the deaths during 1946, 1947 and 1948, as it was considered undesirable to take into account deaths occurring prior to 1946 owing to the possible effects on the civilian population of conditions arising from the 1939–45 War. Full particulars of the data used, the methods of construction and the tabulations of these Life Tables will be found in the report of the Commonwealth Actuary which was published by the Commonwealth Statistician in 1950. This report also appeared in Volume III. of the Census of the Commonwealth of Australia, 1947. Monetary tables for both single and joint lives have also been prepared by the Commonwealth Actuary.

Comparative tables showing the number of survivors ( $l_x$ ) out of 100,000 births, rates of mortality ( $q_x$ ) and probability of surviving ten years ( $_{10}p_x$ ), at selected ages, in respect of the Australian Life Tables of 1920–22, 1932–34 and 1946–48, together with a summary of the main characteristics of the tables, were published in Official Year Book No. 39, pp. 602–3. The expectation of life at selected ages taken from these three Life Tables is as follows:—

**AUSTRALIAN LIFE TABLES : COMPLETE EXPECTATION OF LIFE ( $e_x$ ) AT  
SELECTED AGES.**

Age (x).	Males.			Females.

8. *Infant Deaths and Death Rates.*—(i) *Australia, 1926 to 1954.* The universal experience that during the first few years of life the higher death rate of male infants tends to counteract the excess of male births is confirmed by the fact that out of 507,666 male infants born from 1950 to 1954, 13,453 (26.50 per 1,000) died during the first year of life, while of 482,364 female infants only 10,146 (21.03 per 1,000) died during the first year. Stillbirths are not included in any of the tables relating to deaths.

## ANNUAL RATES.

1950 ..	8.25	5.38	6.34	6.47	8.72	7.73	17.04	4.19	7.06
1951 ..	8.28	6.57	7.45	8.08	8.65	8.29	29.49	2.99	7.74
1952 ..	7.94	5.90	6.98	8.05	6.87	7.08	13.39	6.35	7.15
1953 ..	7.48	5.45	7.18	6.66	7.38	7.37	15.22	7.61	6.82
1954 ..	7.60	4.88	5.48	6.04	6.47	7.47	9.74	1.17	6.29

(a) Number of deaths of children aged four weeks and under one year per 1,000 live births registered.

These tables indicate the striking decrease in infant mortality in Australia, the mortality rate of children aged under one year per 1,000 live births for 1954 being only 43 per cent. of the average rate for 1926-30. The tables above reveal the fact that this improvement was due largely to the decrease in deaths from preventable causes, the mortality rate for children aged four weeks but under one year declining by 73 per cent. while that for children aged under four weeks declined by only 44 per cent.

A graph showing infant mortality rates for each year from 1907 to 1955 will be found on page 629.

(iii) *Statistical Divisions.* The total numbers of births and of deaths of children under one year of age for 1954 are shown in *Demography Bulletin* No. 72 for each of the sixty-seven statistical divisions for which vital statistics have been tabulated.

(iv) *Various Countries.* Compared with other countries Australia occupies a very favourable position in respect of infant mortality. In 1954 only New Zealand, Sweden and the Netherlands recorded a lower rate than Australia.

## INFANT MORTALITY RATES : VARIOUS COUNTRIES.

Country.	Infant Mortality Rate.(a)						Crude Birth Rate (b) 1954.

(a) Number of deaths under one year per 1,000 live births registered. (b) Number of live births per 1,000 of mean population. (c) Excludes Maoris. (d) Excludes full-blood aboriginals. (e) 1935-39. (f) European population only. (g) 1935-38. (h) Not available.

(v) *Causes of Death: Children under one Year.* Causes of deaths of children under one year of age should be considered in relation to age at death, because the emphasis on various causes changes rapidly as age at death varies. In 1954, 2,819 (97.7 per cent.) of the deaths occurring during the first week of life were caused by congenital malformations (12.2 per cent.) and certain diseases of early infancy (85.5 per cent.). Of the latter, 65.4 per cent. were associated with immaturity (*see table below*). At ages one week and under four weeks the proportions were 33.0 per cent. and 58.1 per cent. respectively. Of deaths of children over four weeks and under one year of age, 22.7 per cent. were caused by congenital malformations and only 4.8 per cent. by diseases of early infancy, the emphasis having shifted to respiratory and digestive diseases (44.2 per cent.), infective and parasitic diseases (7.9 per cent.), diseases of the nervous system (7.7 per cent.) and accidents and violence (5.5 per cent.). A summary for 1954 of the deaths of children under one year of age, classified according to principal causes of death and age at death, is given in the following table.

Deaths from each cause in the detailed list of titles adopted for publication, classified according to age at death, will be found in *Demography Bulletin* No. 72. Causes of infant deaths in each State and Territory in 1954 will also be found therein.

(a) Age four weeks and under two months.

(b) For further detail of this group of causes *see* next table.

The individual categories representing the causes of death which come within Class XV.—Certain Diseases of Early Infancy are designed to show the effect of immaturity in such causes of infant death. In 1954, 65 per cent. of deaths during the first week of life and 46 per cent. of those in the next three weeks of life were due, directly or indirectly, to immaturity. The relationship between immaturity and each of the individual categories of Class XV. is shown for the year 1954 in the following table:—

**DEATHS OF CHILDREN UNDER ONE YEAR OF AGE FROM CERTAIN DISEASES OF EARLY INFANCY : AUSTRALIA, 1954.**

Category No.	Cause of Death.	Without Mention of Immaturity.			With Immaturity.			Total.		
		Males.	Fe-males.	Per-sons.	Males.	Fe-males.	Per-sons.	Males.	Fe-males.	Per-sons.

(vi) *Deaths of Ex-nuptial Children under one Year of Age.* Distinction between nuptial and ex-nuptial children in death statistics for Australia as a whole has been made only since 1925. Results show that death rates during infancy have generally been much higher for ex-nuptial children than for nuptial children, but the disparity has become smaller in recent years. The following table shows the number of deaths of children under one year of age and the infant mortality rates for nuptial, ex-nuptial and all children in five-year periods since 1926 and for each year from 1950 to 1954.

**DEATHS UNDER ONE YEAR OF AGE : NUPTIAL AND EX-NUPTIAL, AUSTRALIA.**

Period.	Nuptial Children.		Ex-Nuptial Children.			All Children.	
	Number of Deaths.	Infant Mortality Rate.(a)	Number of Deaths.	Infant Mortality Rate.(b)		Number of Deaths.	Infant Mortality Rate.(c)
				Actual.	Ratio to Nuptial Rate. (Per Cent.)		
1926-30 ..	31,367	49.96	2,888	93.38	187	34,255	51.99
1931-35 ..	21,460	40.09	1,713	65.37	163	23,173	41.27
1936-40 ..	21,792	37.59	1,680	66.87	178	23,472	38.81
1941-45 ..	24,053	34.20	1,627	52.39	153	25,680	34.97
1946-50 ..	23,139	26.54	1,373	37.37	141	24,512	26.98
1950 ..	4,444	24.25	221	30.17	124	4,665	24.47
1951 ..	4,687	25.23	191	25.28	100	4,878	25.24
1952 ..	4,609	23.78	188	23.97	101	4,797	23.79
1953 ..	4,515	23.25	198	24.65	106	4,713	23.30
1954 ..	4,353	22.41	193	24.04	107	4,546	22.48

(a) Number of deaths under one year of age per 1,000 nuptial live births registered. (b) Number of deaths under one year of age per 1,000 ex-nuptial live births registered. (c) Number of deaths under one year of age per 1,000 total live births registered.

The ex-nuptial rates are higher at all ages under one year but the difference is greatest several months after birth. For the five years 1950-54 the ratio of the ex-nuptial to the nuptial rate at various ages was as follows:—Under one month, 102 per cent.; one month, 143 per cent.; 2 months, 119 per cent.; 3 months, 147 per cent.; 4 months, 114 per cent.; 5 months, 145 per cent.; under one year, 107 per cent.

Full particulars of the causes of deaths of ex-nuptial children who died in 1954, aged under four weeks and under one year, are given for each State and Territory in *Demography Bulletin* No. 72. Detailed information for Australia as to the age at which ex-nuptial children died from each cause of death will also be found therein. It is difficult to assess the real significance of the differences between the numbers of nuptial and ex-nuptial deaths from each individual cause because of the small number of ex-nuptial deaths involved in each case.

9. Age Distribution.—(i) *Number of Deaths.* Age at death is recorded for statistical purposes in days for the first week of life, in weeks for the first four weeks, in months for the first two years and in completed years of life thereafter. Owing to exigencies of space these ages are usually combined in groups for publication, the most common grouping being in weeks for the first four weeks, in months or groups of months for the first year, in single years of age for the first five years and thereafter in the five-year groups 5-9 years, 10-14 years, etc. A summary in this form for Australia is given in the following table for the year 1954.

## AGE AT DEATH : AUSTRALIA, 1954.

Age at Death.	Males.	Fe- males.	Per- sons.	Age at Death.	Males.	Fe- males.	Per- sons.

There are different mortality rates at various stages of life and the actual number of deaths in any period depends upon the impact of these rates on the numbers living at the respective stages. Changes in the number of deaths from one period to another are caused by changes in the rate of mortality in the various age groups and by the changed proportions of persons living in the different groups.

In Australia during the last fifty years there has been a steady improvement in the rate of mortality at all ages, thus tending to reduce the number of deaths. This has been most pronounced at ages under one year. The increased length of life due to this factor, coupled with the long-term decline in the birth rate and the effects of past and present migration, has been a significant cause in changing the age distribution of the population and consequently the age distribution of deaths, thus obscuring the effects of improved mortality rates.

The combined effect of these various influences can be seen from the following table, which shows the proportion of deaths in various age groups in periods of ten years from 1901 to 1950 and for the year 1954.

**PROPORTION OF DEATHS IN EACH AGE GROUP : AUSTRALIA.**  
(Per Cent.)

Period.	Age Group (Years).								Total.
	Under 1.	1-4.	5-19.	20-39.	40-59.	60-64.	65 and over.	Unspecified.	
1901-10 ..	20.51	6.45	6.37	14.99	17.99	5.31	28.26	0.12	100.00
1911-20 ..	16.66	6.09	5.49	14.44	20.32	6.19	30.68	0.13	100.00
1921-30 ..	13.10	4.51	4.85	12.12	20.55	8.26	36.53	0.08	100.00
1931-40 ..	7.40	2.56	3.83	9.36	20.54	8.36	47.92	0.03	100.00
1941-50 ..	6.79	1.71	2.26	6.01	19.04	9.33	54.84	0.02	100.00
1954—Males ..	5.70	1.53	2.09	5.71	19.19	10.35	55.39	0.04	100.00
Females ..	5.38	1.36	1.42	4.07	14.86	8.14	64.75	0.02	100.00
Persons ..	5.56	1.45	1.79	4.99	17.29	9.38	59.51	0.03	100.00

A table showing these proportions for males and females separately for the period 1901 to 1950 will be found in Official Year Book No. 39, p. 614.

(ii) *Age-specific Death Rates.* In earlier issues of the Official Year Book average annual age-specific death rates were given for each State and for Australia for the years 1932-34 and 1946-48 (see No. 37, p. 778 and No. 39, pp. 615-6). A table showing the rates in the age groups used for calculating the standardized death rate for each State for the year 1947 appeared in Official Year Book No. 39, p. 599. Estimates of the age distribution of the population in each State are not available to enable a similar comparison to be made for later years.

Estimates of the age distribution of the population of Australia as a whole have been used to calculate the following age-specific death rates for the years 1952, 1953 and 1954.

**AGE-SPECIFIC DEATH RATES(a) : AUSTRALIA.**

Age Group (Years).	1952.	1953.	1954.	Age Group (Years).	1952.	1953.	1954.
0-4 ..	6.39	6.18	5.93	50-54 ..	8.91	8.60	8.38
5-9 ..	0.64	0.67	0.57	55-59 ..	13.87	13.28	13.43
10-14 ..	0.55	0.51	0.51	60-64 ..	22.07	21.11	20.32
15-19 ..	1.08	1.10	1.01	65-69 ..	33.98	31.79	32.05

45-49 ..	5.62	5.20	5.07				

(a) Average number of deaths per 1,000 of population in each age group.

10. *Birthplaces of Persons who Died.*—A table showing the birthplaces of persons whose deaths were registered in each year will be found in the *Demography Bulletin*. Tabulations were discontinued for the years 1941 to 1945 inclusive, but were revived for 1946.

11. *Occupation of Males who Died.*—A table showing occupations of males who died during 1954 appears in *Demography Bulletin* No. 72.

12. *Causes of Death.*—The classification of causes of death adopted for Australia by the Commonwealth Bureau of Census and Statistics at the inception of its mortality statistics in 1907 was that introduced by the International Institute of Statistics in 1893, reviewed by that Institute in 1899 and revised by an International Commission in 1900. This classification became known as the International List of Causes of Death and further revisions by International Commissions in 1909 (Second), 1920 (Third), 1929 (Fourth) and 1938 (Fifth) were successively adapted for use in Australian statistics.

Proposals for the Fourth and Fifth revisions were drafted by a "Mixed Commission" of representatives of the International Statistical Institute and the Health Organization of the League of Nations and the final revision was carried out by the International Conference for the Revision of the International List of Causes of Death. Preparatory work in connexion with the Sixth Revision was entrusted by the International Health Conference in 1946 to the Interim Commission of the World Health Organization. As a result of this arrangement the World Health Organization compiled the International Statistical Classification of Diseases, Injuries and Causes of Death, which in its final stages was unanimously approved by the International Conference for the Sixth Revision of the International Lists of Diseases and Causes of Death in April, 1948. This classification was adopted by the First World Health Assembly, which also issued regulations to guide member states in its application. Australia adopted the classification, together with the rules for using it, for use commencing with the year 1950.

For the first time in connexion with the International List, international rules for a uniform method of selecting the main cause to be tabulated, if more than one cause is stated on the death certificate, were laid down, as well as the new classifications of causes of death. Prior to 1950 the rules adopted in Australia for the selection of the cause of death to be tabulated were those laid down in the *United States Manual of Joint Causes of Death*, first published in 1914 and revised to conform with successive revisions of the International List.

The adoption of the new method marked a fundamental change in Australian cause of death statistics, with emphasis now placed on the underlying cause of death as indicated by the certifying practitioner. The introduction of this method required the adoption by all States of a form of medical certificate substantially identical with the International Form of Medical Certificate of Cause of Death as laid down in Article 9 of the World Health Organization Regulations No. 1. By 1950 all States had adopted satisfactory forms of certificate and it was possible to apply the new principles uniformly to all State cause of death records.

This change in principle affects the comparability of the statistics for 1950 and subsequent years with those of earlier years. For convenience in assessing the extent of the change and in accordance with a recommendation of the Sixth Decennial Revision Conference, causes of death for Australia for 1950 were also classified according to the detailed classification of the Fifth Revision, 1938, on the joint cause rules current for that revision. A complete detailed classification according to both the Fifth and Sixth Revisions was shown in *Demography Bulletin* No. 68. Commencing with 1951 the classification is according to the Sixth Revision only.

In order to facilitate the limited presentation of cause of death statistics the present International Classification provides two special lists of causes for tabulation—the Intermediate List of 150 causes and the Abbreviated List of 50 causes. The latter has been used for the cause of death tabulations A to C which follow. Tables A and B show deaths of males and females, respectively, for 1954 and Table C shows the numbers of persons who died and the death rates and proportion per 10,000 deaths for the years 1953 and 1954.

A graph showing the main causes of death for the years 1945 to 1954 appears on page 630.

13. *Deaths from Principal Causes.*—(i) *General.* In the preceding tables particulars have been given for each of the causes of death comprising the Abbreviated Classification according to the Sixth Revision of the International List. The more important of these causes are treated in detail hereunder. The Abbreviated Classification number used in tables A to C is indicated in parentheses for each cause or group of causes.

(ii) *All Forms of Tuberculosis (B1, B2).* (a) *General.* The total number of deaths classified as all forms of tuberculosis in 1954 was 897, consisting of 683 males and 214 females. In comparing any of the figures for 1950 and subsequent years with those for 1949 and earlier years consideration should be given to the effect of the change in basis from the Fifth to the Sixth Revision of the International List. This was discussed in Official Year Book No. 39, p. 626.

(b) *Age at Death.* The following table shows the age groups of males, females and persons who were classified as dying from tuberculosis in 1954 together with figures for 1931, 1941 and 1951.

**TUBERCULOSIS (ALL FORMS) : DEATHS IN AGE GROUPS, AUSTRALIA.**

(c) *Occupation at Death, Males.* A summary of the main groups of occupations of males who died from tuberculosis during 1954 is given in *Demography Bulletin* No. 72.

(d) *Period of Residence in Australia.* The period of residence in Australia of persons who died from tuberculosis in 1954 is given in relation to age at death in *Demography Bulletin* No. 72.

(e) *Death Rates.* The improvement which has taken place in recent years in the incidence of tuberculosis in Australia is shown by the fall in the death rate from tubercular diseases. The death rate represents the number of deaths from tuberculosis per 100,000 of mean population. In 1931 the rate was 49 (males, 55; females, 42). In 1941 it was 38 (males, 48; females, 29) and by 1951 had fallen to 18 (males, 25; females, 11). Figures for 1954 show that the rate has declined still further, to 10 per 100,000 of mean population (males, 15; females, 5).

(f) *Proportion of Total Deaths.* A table showing the number of deaths from tuberculosis per 10,000 deaths from all causes in each State and Territory during 1911-20, 1921-30, 1931-40 and 1941-50 was given in Official Year Book No. 39, p. 627.

(g) *Death Rates, Various Countries.* A comparison of the death rates from tuberculosis for Australia with those for various other countries, made on the latest figures available, shows that Australia with a rate of 10 deaths per 100,000 of mean population occupies a favourable position as regards this disease. Whereas the rate for Denmark is only 9, rates range as high as 82 for Japan. For various other countries rates are

as follows :—Netherlands, 9 ; Canada, 12 ; New Zealand, 15 ; United States of America, 20 ; Union of South Africa, 20 ; United Kingdom, 24 ; Italy, 27 ; France, 36 ; Finland, 58 ; and Portugal, 63.

(iii) *Malignant Neoplasms, including Neoplasms of Lymphatic and Haematopoietic Tissues* (B18). (a) *General*. It was shown in Official Year Book No. 39, p. 628 that deaths classified under this heading according to the Sixth Revision of the International List are not directly comparable in total with those on the Fifth Revision basis and comparability ratios were given to enable comparison to be made on an adjusted basis. This change must be kept in mind in considering the comparisons between 1951, 1941 and 1931 which are shown in the following pages.

(b) *Type and Seat of Disease*. Tables showing the type and seat of disease in conjunction with age and conjugal condition of the persons dying from malignant neoplasms in 1954 will be found in *Demography Bulletin* No. 72. A summary regarding type and seat of disease for 1954 is given below. It may be pointed out that the significance of the number of deaths shown for the various types of neoplasms enumerated hereunder is doubtful, owing to the fact that, in the absence of a post-mortem, it is impracticable for the certifying doctor in the majority of cases to make an accurate diagnosis as to type in the detail required for the following classification.

**DEATHS FROM MALIGNANT NEOPLASMS AND NEOPLASMS OF LYMPHATIC AND HAEMATOPOIETIC TISSUES : TYPE AND SEAT OF DISEASE, AUSTRALIA, 1954.**

(c) *Age at Death*. The ages of persons who died from malignant neoplasms in 1954 are given below, together with figures for 1931, 1941 and 1951. Inferences drawn from the great increase in the number of deaths from malignant neoplasms in 1954 compared with 1931 need qualification in view of the altered age constitution of the population since the earlier year. The number of people over 55 years of age, at which level cancer risks are greatest, nearly doubled between 1931 and 1954, whilst those in the age group

75 years and over more than doubled. It is only in this extreme old age group from 75 onwards that the rate of mortality, as distinct from the number of deaths, has increased. For groups up to age 75 there has been no increase in mortality rates since 1931; indeed, in some age groups the rates have actually declined. It is also probable that a proportion of the increased number of deaths from cancer recorded in recent years has been due to better diagnosis and certification on the part of medical practitioners rather than to any actual increase in the disease itself.

#### MALIGNANT NEOPLASMS : NUMBER OF DEATHS IN AGE GROUPS, AUSTRALIA

(d) *Occupation at Death, Males.* A table showing main groups of occupations of males who died from malignant neoplasms and neoplasms of lymphatic and haematopoietic tissues during 1954 appears in *Demography Bulletin* No. 72.

(e) *Death Rates.* The death rates from malignant neoplasms have continued to rise over recent years. The rates are crude death rates representing the number of deaths from malignant neoplasms per 100,000 of mean population and do not take account of changes in the age constitution of the population, and to a substantial extent reflect the increasing age of the population rather than the true change in mortality from malignant neoplasms (see para. 13 (iii) (c) p. 660). In 1931 the rate for Australia was 101 (males, 105; females, 97). In 1941 it was 119 (males, 119; females, 120) and in 1951 it had risen to 126 (males, 129; females, 122). Figures for 1954 show that a further rise has taken place, the rate being 129 (males, 133; females, 125).

(f) *Proportion of Total Deaths.* A table showing the number of deaths from malignant neoplasms per 10,000 deaths from all causes in each State and Territory during 1911-20, 1921-30, 1931-40 and 1941-50 was given in *Official Year Book* No. 39, p. 631.

(g) *Death Rates, Various Countries.* Death rates from malignant neoplasms per 100,000 of mean population for Australia and for various other countries are as follows:—Portugal, 71; Spain, 75; Japan, 81; Union of South Africa, 125; Australia, 129; Canada, 130; United States of America, 141; New Zealand, 149; France, 175; Switzerland, 188; and United Kingdom, 200. The rates are for the latest available year in each case.

(iv) *Diseases of the Heart (B25 to B28).* The number of deaths classified to diseases of the heart in 1954 was 27,424 (16,197 males and 11,227 females). Details for each individual category within the group may be obtained from *Demography Bulletin* No. 72. This class is the largest amongst causes of death, the death rate having increased from 102 per 100,000 of mean population in 1911-15 to 305 in 1954. The increase in the number of deaths recorded from heart diseases has been particularly pronounced during the past twenty years. The rapid increase in mortality is partly a reflection of the ageing of the population, but the figures have been influenced mainly by improved diagnosis and certification by medical practitioners.

The death rates for heart diseases for the years 1931, 1941, 1951 and 1954 were as follows :—1931, 159 (males, 178 ; females, 142) ; 1941, 269 (males, 306 ; females, 231) ; 1951, 314 (males, 367 ; females, 259) ; and 1954, 305 (males, 356 ; females, 252). In 1954 deaths from heart diseases represented 34 per cent. of the total deaths.

(v) *Diarrhoea and Enteritis (Children under two years of age)*. Figures published in Official Year Book No. 39, p. 634, show that deaths in this category declined from a rate of 22.8 per 1,000 children born for the period 1911–15 to 1.5 for the period 1946–50, from which it is evident that this cause of death is no longer the scourge that it was in earlier years.

Owing to changes in classification it is not possible to continue the tables in the same form for 1954.

(vi) *Puerperal Causes (B40)*. It was shown in Official Year Book No. 39, p. 634, that the changes introduced with the Sixth Revision of the International List did not significantly affect the comparability of the total number of deaths from puerperal causes. The death rate from these causes (including criminal abortion) has fallen rapidly during recent years and in 1954 the rate was 0.7 per 1,000 live births, compared with a rate of 6 per 1,000 in 1936. The 139 deaths in 1954 correspond to a death rate of 3.1 per 100,000 females. The death rate may be expressed in other terms by stating that 1 of every 1,439 women giving birth to a live child in 1954 died from puerperal causes ; the corresponding ratios for married women were 1 in every 1,536, and for single women 1 in every 567.

The death rate per 1,000 live births from puerperal causes in various countries for the latest available years is as follows :—United Kingdom, 0.6 ; Australia, 0.7 ; New Zealand, France and the United States of America, 0.7 ; Canada and Denmark, 0.8 ; Union of South Africa, Spain and Switzerland, 1.1 ; Portugal and Japan, 1.7.

A tabulation of puerperal causes for Australia according to age at death for married and single women separately will be found in *Demography Bulletin* No. 72.

The total number of children left by the 125 married mothers who died from puerperal causes in 1954 was 356, an average of 2.8 children per mother.

Three of the mothers who died had been married less than one year, 9 between one and two years, and 8 between two and three years. The duration of marriage ranged up to 26 years. Tabulations distinguishing the ages at marriage and at death will be found in *Demography Bulletin* No. 72, which also includes a table showing in combination the duration of marriage and previous issue.

(vii) *Congenital Malformations and Diseases of Early Infancy (B41–B44)*. This combined group embraces two complete classes of the International List of Causes of Death which relate more specifically to infant deaths and they have already been presented in detail in the section devoted to causes of infant death (see pp. 651 and 652).

(viii) *Accidents, Poisonings and Violence (BE 47 to BE 50)*. (a) *General*. Deaths in this class are classified according to external cause and not according to nature of injury. The classification provides sub-groups for accident, including adverse reactions to prophylactic inoculations, therapeutic misadventures and late effects of accidental injury ; suicide ; homicide and injuries purposely inflicted by other persons ; and injury resulting from operations of war, including late effects.

The following table, showing the death rates in the main sub-groups per 100,000 of mean population and the proportion of deaths caused by violence during the period 1926–54, indicates that the death rate from violence is generally about twice as great for males as for females. It can be seen also that in 1954 the percentage of deaths caused by violence was 7.37.

The low level of the rates and proportions for the years 1941–45 is attributable mainly to the fact that deaths of defence personnel have been excluded but the rates

have been based on total mean population (including defence personnel). A contributing factor is the decrease during this period in the number of automobile accidents, a consequence of the war-time restrictions on travel. From 1st July, 1947, deaths of defence personnel have again been included and the rates and proportions have since risen fairly steadily.

### ACCIDENTS, POISONINGS AND VIOLENCE : DEATH RATES.(a)

(a) Number of deaths per 100,000 of mean population.

(b) Includes "open verdict".

(c) Includes "war wounds".

(b) *Accident* (BE 47, BE 48). In 1954 the total number of deaths from accidental causes was 4,936 (3,611 males and 1,325 females). Slightly less than half of the accidental deaths were the result of transport accidents. Of these, the numbers attributable to the major causes, and the percentages of the total accidental deaths in each case, were as follows:—Motor vehicle traffic accidents, 2,014 (40.80 per cent.); motor vehicle non-traffic accidents, 80 (1.62 per cent.); other road vehicle accidents, 126 (2.55 per cent.); railway accidents, 143 (2.90 per cent.); water transport accidents, 78 (1.58 per cent.); aircraft accidents, 22 (0.45 per cent.); a total of 2,463 (49.90 per cent.). Other important causes were accidental falls, 990 (20.05 per cent.); accidental drowning 430 (7.46 per cent.); and accidents caused by fire and explosion of combustible material, 173 (3.50 per cent.).

(c) *Suicide* (BE 49). (i) *Modes Adopted*. Deaths from suicide in 1954 numbered 969 (males, 724; females, 245). Firearms and explosives were used in 290 cases (29.93 per cent. of total deaths by suicide). Other important modes adopted, together with the numbers and relevant percentages, were as follows:—Poisoning other than gases, 174 (17.96 per cent.); hanging or strangulation, 178 (18.37 per cent.); poisoning by gases, 151 (15.58 per cent.); submersion (drowning), 58 (5.98 per cent.); other modes, 118 (12.18 per cent.).

Of the 724 males who committed suicide, 265 (36.60 per cent.) used firearms and explosives. For females the most common mode was poisoning (other than gases). This was used in 71 cases (28.98 per cent.).

(ii) *Age at Death*. From the following table which shows the age of persons who committed suicide in 1954 it will be seen that both young and extremely old people took their lives during this year.

## AGE OF PERSONS WHO COMMITTED SUICIDE : AUSTRALIA, 1954.

Age Group (Years).	Males.	Females.	Persons.	Age Group (Years).	Males.	Females.	Persons.
10-14 ..	3	..	3	60-64 ..	79	28	107

50-54 ..	50	27	77				
55-59 ..	64	24	88	Total Deaths	724	245	969

(iii) *Occupation at Death, Males.* A table showing main groups of occupations of males who committed suicide during 1954 appears in *Demography Bulletin* No. 72.

(d) *Homicide and Operations of War (BE 50).* In 1954 there were 117 deaths from homicide and injury purposely inflicted by other persons (not in war), of which non-accidental poisoning caused 2 deaths, assault by firearms and explosives, 39; assault by cutting and piercing instruments, 15; and assault by other means, 61. Deaths from injury resulting from the operations of war numbered 9, but all were deaths from late effects of such injuries.

14. Age at Death of Deceased Married Males and Females, and Issue.—*Demography Bulletin* No. 72 contains a number of tables showing, in combination with the issue, the age at marriage, age at death and occupation of married (including widowed or divorced) persons who died in Australia in 1954. Deaths of married males in 1954 numbered 33,797, and of married females, 27,982. The tabulations which follow deal, however, with only 33,362 males and 27,756 females, the information regarding issue in the remaining 661 cases being incomplete. The total number of children in the families of the 33,362 males was 109,739 and of the 27,756 females, 98,944. The average number of children is shown for various age groups in the following table.

## AGE AT DEATH AND AVERAGE ISSUE OF DECEASED MARRIED (a) MALES AND FEMALES : AUSTRALIA.

Age at Death (Years).	Average Issue.

(a) Includes widowed or divorced.

The figures in the preceding table include the issue both living and dead, the proportion between them, taking the issue of deceased males and females together, being about five to one. The totals for 1954 are shown in the following table:—

#### ISSUE OF DECEASED MARRIED(a) MALES AND FEMALES : AUSTRALIA, 1954.

Issue of Married Males.				Issue of Married Females.			
Issue.	Males.	Females.	Total.	Issue.	Males.	Females.	Total.
Living ..	48,248	47,493	95,741	Living ..	41,025	41,112	82,137
Dead ..	8,327	5,671	13,998	Dead ..	9,950	6,857	16,807
Total ..	56,575	53,164	109,739	Total ..	50,975	47,969	98,944

(a) Includes widowed or divorced.

15. Age at Marriage of Deceased Males and Females, and Issue.—While the table giving the average issue of married males and females naturally shows an increase in the averages with advancing age at death, the following table which gives the average issue of males and females according to the age at marriage of the deceased parent shows a corresponding decrease in the averages as the age at marriage advances.

#### AGE AT MARRIAGE OF DECEASED MALES AND FEMALES, AND AVERAGE ISSUE : AUSTRALIA.

16. Occupation of Deceased Married Males, and Issue.—A summary of the main groups of occupations of married (including widowed or divorced) males who died during 1954, together with issue, appears in *Demography Bulletin* No. 72.

## § 5. Vital Statistics of External Territories.

Because of the outbreak of hostilities in the Pacific during the 1939-45 War, civil administration in the external territories was suspended on 11th February, 1942, and registration of births, deaths and marriages was not resumed until 1946. The following table for the year 1954 shows the number of births, deaths and marriages registered in the external territories under the control of Australia, namely :—Norfolk Island ; Papua ; Trust Territory of New Guinea ; and Trust Territory of Nauru. More detailed information will be found in a series of tables in *Demography Bulletin* No. 72.

## VITAL STATISTICS : EXTERNAL TERRITORIES, 1954.

## CHAPTER XVIII.

### LOCAL GOVERNMENT.

#### § 1. Introduction.

1. **Local Government Authorities.**—In each State of the Commonwealth there exists a system of local government whose powers and responsibilities are in general similar, and cover such matters as the upkeep and construction of roads, streets and bridges, water, sewerage and drainage systems and health and sanitary services, the supervision of building and the administration of regulations relating to items such as weights and measures, slaughtering, the registration of dogs, etc. In addition to these obligatory functions there are also a large number which may be performed by a local government authority either with or without the consent of the ratepayers or the Governor-in-Council. These include transport facilities, electricity, gas and other business undertakings, hospitals, charitable institutions, recreation grounds, parks, baths, libraries, museums, etc.

The system is based on the principle of a grant of specific powers by the State legislatures to the local authorities, their autonomy, however, being more or less limited by the provision for general supervision by a department of the central government or by the Governor-in-Council. Otherwise, within the scope of the Acts under which they are constituted or which they have to administer, they are responsible only to the ratepayers.

While the broad pattern of local government throughout the States of Australia is similar, the range of activities, election of officers, methods of valuation and rating powers, etc., differ considerably.

The areas over which local government bodies exercise general control, numbering 914, are known in New South Wales as cities, municipalities and shires; in Victoria as cities, towns, boroughs and shires; in Queensland as cities, towns and shires; in South Australia as corporate towns and district council areas; in Western Australia as municipalities and road districts; and in Tasmania as municipalities. In New South Wales some local government authorities in an area have combined to provide services such as electricity, water, sewerage and drainage—e.g., the county councils. Within shires there are also some municipal units known as urban areas. In Western Australia there are local health boards, whose personnel in most cases coincide with those of municipalities and road boards. Apart from the more thinly populated parts of New South Wales and South Australia and the Commonwealth Territories, practically the whole of Australia comes within local government jurisdiction.

The financial statistics in § 2 following are classified under the headings of *Ordinary Services* and *Business Undertakings*. The former covers the obligatory and general functions referred to above. Business Undertakings include public utilities such as water supply, sewerage, electricity, gas, transport and hydraulic power undertakings, and other miscellaneous works such as abattoirs, quarries, ice works, cinemas, etc.

2. **Semi-Governmental Authorities.**—In addition to local government authorities, a large number of authorities have been set up to control specific activities, which are often identical with some of those performed by either, or both, of the other classes of public authority—central government and local government—and a complete picture of any field of activity for a State or Australia as a whole cannot be obtained without reference to each class operating in that particular field. These semi-governmental authorities differ primarily from local government authorities in that their operations are restricted to the specific activity for which they were constituted—e.g. roads and bridges, or water and sewerage, or electricity and irrigation, or harbours, or tramways, etc.—i.e. each dispenses a specific service throughout an area as distinct from the general services of the local authority.

Sections 4 to 7 following, dealing with roads and bridges, water supply and sewerage, harbours and fire brigades, include particulars of the more important of these authorities which operate within the range covered by this chapter.

3. **Roads, Bridges, etc.**—The construction and maintenance of roads, bridges and ferries are generally part of the functions of local authorities, but in each State there exists a central road authority or a Government department whose duties relate to the construction and maintenance of “main” and “developmental” roads, the distribution of funds to local bodies, and the supervision and co-ordination of road construction and policy throughout the State. Although roads and bridges constructed and maintained directly by the Government or by the central road authority do not properly come under the heading of “Local Government”, they have been included in this chapter for the sake of convenience. Owing to difficulty in obtaining complete particulars of receipts and expenditure by the various local governing bodies in regard to roads under their control, the details of receipts and expenditure given in § 4 are those of the Government only, relating either to the supervisory board or commission in the State or to direct activities of a department. In § 2 some information is given of the revenue and expenditure of local government authorities in respect of roads.

4. **Water Supply and Sewerage.**—In the cities of Sydney and Melbourne the control of water supply and sewerage is in the hands of special Boards, while in Adelaide and Perth these services are under the direct supervision of Government departments. In most of the other cities and towns, the municipal councils, or, in some cases, water trusts, are the controlling bodies which either construct the works out of their own resources or take them over after they have been constructed by the Government.

5. **Harbours.**—The majority of the harbours in Australia are managed by Boards, the members of which are either elected by persons interested, or are appointed by the Government. In a few instances, however, they are directly controlled by the Government.

6. **Fire Brigades.**—In all the States, the management of fire brigades is undertaken by Boards. These Boards usually comprise members elected by the councils of municipalities and insurance companies within the districts placed under their jurisdiction. and one or more members appointed by the Government. Occasionally volunteer or country fire brigades are represented.

7. **Other Local or Semi-Governmental Activity.**—The activities referred to above are not the only forms of local or semi-governmental undertakings. There are others, the most important being tramways and omnibus services and electricity and gas undertakings, which are not dealt with in this chapter, except to the extent that they are represented in the finances as shown in the following section. Chapter VII.—Transport and Communication contains information on municipal transport services, and Chapter X.—Electric Power Generation and Distribution deals with the various types of electricity undertakings in each State. In addition, particulars of municipal electricity and gas undertakings, although not shown separately, are included in the relevant sections in Chapter IX.—Manufacturing Industry.

## § 2. Local Government Authorities.

1. **New South Wales.**—For purposes of local government the whole of the Eastern and Central land divisions and a small portion of the sparsely populated Western division have been divided into cities, municipalities (most principal towns) and shires (mainly large rural areas, some of which embrace important towns). At the end of 1952 the area incorporated was 18,400 square miles, or nearly three-fifths of the total area of the State.

All local government authorities in the State are subject to the general provisions of the Local Government Act.

Municipalities and shires may combine to form county councils for the establishment and conduct of services of joint benefit, e.g., electricity, water, sewerage. There were 33 county councils and the Grafton and South Grafton Water Board at 31st December, 1952.

2. **Victoria.**—Local government is established throughout the State, the various divisions being termed cities, towns, boroughs or shires. The only unincorporated areas are French Island (42,000 acres) in Westernport Bay, Julia Percy Island (650 acres), off Port Fairy, and Tower Hill (1,350 acres), adjacent to the Borough of Koroit. Melbourne and Geelong were incorporated under special statutes prior to the establishment of a general system of local government, but are now subject to several provisions of the Local Government Act. The law relating to local government was consolidated by the Local Government Act 1946.

3. **Queensland.**—The whole of the State (except certain islands along the coast, the Dawson Valley Irrigation Area and the Somerset Dam Area) is incorporated into cities, towns and shires under the Local Authorities Act 1902 and its amendments. In June, 1949, the State Government rearranged the boundaries of the local authorities to the south of Brisbane, reducing their number by ten. The towns of Coolangatta and Southport were absorbed by the new town of South Coast; two new shires were created and eleven were abolished, being absorbed by the new shires and existing cities, towns and shires.

4. **South Australia.**—The settled portion of South Australia is incorporated, being mostly under municipal corporations in the larger cities and towns, and district councils in the agricultural areas.

5. **Western Australia.**—In this State, local government is carried on by means of municipalities and district road boards. Certain functions are delegated to health boards, whose personnel, in most cases, coincide with those of the municipalities and district road boards.

6. **Tasmania.**—The whole State is divided into municipal districts, Hobart and Launceston being incorporated under separate Acts.

7. **Area, Population, Dwellings and Value of Ratable Property.**—The area, population, dwellings and value of ratable property in the incorporated areas of each State are shown in the table below. The valuations relate to ratable property only and exclude Government and other non-ratable property, whose value in the aggregate is considerable. In this table, particulars of dwellings are in accordance with the definition used in the 1954 Census, and are the results of information collected on the Census Schedules. For the purpose of the Census, a dwelling was defined as any habitation occupied by a household group living together as a domestic unit, whether comprising the whole or only part of a building. The term has, therefore, a very wide meaning and includes, in addition to houses and flats, a great variety of dwellings ranging from a single-roomed shack to a multi-roomed hotel or institution. Unoccupied dwellings include "week-end" and holiday dwellings and other dwellings temporarily unoccupied on the night of the Census. Dwellings being built are not included.

(a) Particulars of population and dwellings are as at Census 30th June, 1954. (b) Year ended 31st December, 1952. (c) Not available. (d) Year ended 30th September, 1953. (e) Excludes Yallourn area under the jurisdiction of the State Electricity Commission. (f) Year ended 30th June, 1953. (g) Municipalities—Year ended 31st October, 1953; Road Districts—Year ended 30th June, 1953.

8. Finances.—(i) *General.* The following tables show the latest available financial statistics for local government authorities. The figures relate to the years 1952-53 and 1953-54, except for New South Wales, where they relate to the years 1952 and 1953.

(ii) *Ordinary Services.* In the returns of revenue and expenditure for 1952-53 in the following table, the proceeds from loans and expenditure thereof have been excluded. The financial operations of business undertakings controlled by the various local government authorities are given in the next paragraph. The profits resulting from the working of these undertakings, where taken into general revenue, have been included.

(a) Includes debt or interest payable in London and New York. The former is expressed in United Kingdom currency, the latter is payable in dollars which have been converted at the rate of 4.8665 dollars to £1.

(b) Included in debt figures above.

(c) Not available.

In this and the following tables, debt includes all liabilities for which arrangements have been made for repayment over a period of one year or more, and net overdrafts. Interest capitalized and amounts due for the capital cost of assets or for services rendered which are to be repaid over a period of one year or more are included. Current liabilities, such as interest accrued (but not capitalized), trade creditors, amounts held in trust and other debts which are to be repaid in less than one year are not included. Net overdraft is the gross overdraft of all funds less all bank credit balances (including fixed deposits) which do not form part of a sinking fund to repay a loan. New loans raised during the year include new loan liabilities incurred during the year, loans raised to repay indebtedness to the Government, and interest capitalized. Loans raised and redeemed within the year, increases in overdrafts and loans raised for conversion or redemption of existing debt are excluded. Funds provided for redemption include instalments of principal repaid and amounts credited to sinking funds established for the purpose of repaying the debt on maturity. Amounts provided for redemption from loans raised for that purpose are excluded.

In the following table a summary is given of new money loan raisings, provisions for the redemption of debt and debt outstanding of local and semi-governmental authorities for the years 1938-39 and 1950-51 to 1953-54.

## § 4. Roads and Bridges.

1. Commonwealth Government Grants.—The following table shows the allocations to the several States under the several Commonwealth Aid Roads and Works Acts, for road construction, maintenance, repair and other works connected with transport during the years 1938-39 and 1948-49 to 1953-54. Allocations for the construction and maintenance of strategic roads and for the promotion of road safety practices made in the years 1948-49 to 1953-54 are excluded. The aggregate amounts payable under the relevant Acts from 1922-23 to 1953-54 for the purposes outlined above are also shown. Further particulars of these grants appear in Chapter XX.—Public Finance and in *Finance Bulletins*.

## ROAD CONSTRUCTION, MAINTENANCE, ETC.: GRANTS BY COMMONWEALTH GOVERNMENT.

(a) Includes £5,000,000 paid into the Commonwealth Aid Roads (Supplementary) Trust Account, to be expended on grants to the States for roads purposes in subsequent years.

2. New South Wales.—(i) *General.* A central road authority was created by legislation early in 1925 for the purpose of providing improved and uniform standards of construction and maintenance of the principal roads, and to administer Governmental subsidies for work on those roads. This authority, known as the Department of Main Roads, exercises control over Government activities in connexion with road works. Its activities embrace works on main and developmental roads throughout the State, all roads in the unincorporated portion of the Western Division, and proclaimed national works (principally bridges and vehicular ferries) constructed from Government funds. The department co-operates with the municipal and shire councils in the work of constructing and maintaining a well-organized system of main highways.

In the metropolitan district the whole cost of the construction and maintenance of main roads is paid from the funds of the Main Roads Department, while in the country districts assistance in respect of road works may be granted for any area through which a main road passes. The cost of constructing developmental roads and works is borne in full by the Main Roads Department, but local councils are required to maintain them in satisfactory condition. For other roads the cost of both construction and maintenance work is generally chargeable to the revenue of local authorities, although Governmental assistance is not infrequently granted for works of construction and re-construction. In the Western Division the full cost of all roads and bridges is met by the Department of Main Roads.

The general system of road communication throughout the State is made up of main roads classified into State highways, trunk roads and ordinary main roads. There are also secondary roads (metropolitan area) and developmental roads.

Public roads, except those within the City of Sydney, may be proclaimed as main roads on the recommendation of the Commissioner for Main Roads, who takes into consideration representations made by councils concerned, availability of funds for construction and maintenance purposes, and the value as connecting links between centres of population or business.

(ii) *Length of Roads.* (a) *Proclaimed Roads.* The following table shows lengths of proclaimed roads at 30th June, 1954, according to class of road :—

PROCLAIMED ROADS, NEW SOUTH WALES : LENGTHS, 30th JUNE, 1954.  
(Miles.)

Division.	Main Roads.				Secondary Roads.	Developmental Roads.	Total.
	State Highways.	Trunk Roads.	Ordinary Main Roads.	Total.

Western ..	1,329	1,355	2,839	5,523	..	..	(b) 5,523
Total ..	6,528	4,229	12,534	23,291	77	2,934	26,302

(a) Metropolitan area.  
Department.

(b) Excludes 3,213 miles of unclassified roads, the responsibility of the

During 1953-54, 89 miles of new developmental roads were proclaimed and 66 miles were removed from the list of proclaimed roads. There were no main roads proclaimed during the year.

The length of main and secondary roads maintained by the Department of Main Roads at 30th June, 1954 (excluding the Western Division) was 2,807 miles (16 per cent.), while the length maintained by councils was 15,038 miles (84 per cent.). The proportions of the several classes of main roads maintained by the Department and councils respectively were :—State highways, 41 per cent., 59 per cent.; trunk roads, 2 per cent., 98 per cent.; ordinary main roads, 6 per cent., 94 per cent. Secondary roads were wholly maintained by councils. In the County of Cumberland (the metropolis and adjoining areas) the Department maintained 55 per cent. of the roads (504 miles).

(b) *Composition of Roads.* In 1954, the total length of all roads in New South Wales was estimated at 125,029 miles, including 8,645 miles in the Western Division. The lengths of roads, according to their composition or nature, were as follows :—cement concrete, 405 miles; asphaltic concrete, 200 miles; tar or bituminous macadam, 4,684 miles; surface water-bound macadam, 5,442 miles; water-bound macadam, 1,792 miles; gravel or crushed rock, 39,550 miles; formed only, 27,279 miles; cleared or natural surface only, 45,677 miles.

(iii) *Main Roads Department.* (a) *General.* Progress has continued with the implementation of the Main Roads Department plan for main road development in the metropolis and the balance of the County of Cumberland. The plan has been incorporated in the County of Cumberland Planning Scheme approved by Parliament under the Local Government (Amendment) Act 1951. Detailed planning of the Newcastle and District Arterial Roads System is well advanced and some sections of the system have already been constructed. Surveys and designs have been advanced in the planned Wollongong-Port Kembla District Main Roads System.

In addition to its construction and maintenance work on roads, the Main Roads Department is engaged on a scheme for widening metropolitan roads. The acquisition of land required to implement approved schemes has been proceeding.

During 1953-54, 49 new bridges were completed on main roads by the Department and councils. Major bridge works under construction include steel and concrete bridges over Iron Cove between Balmain and Drummoyne, Sydney (length 1,536 feet), over

Middle Harbour at the Spit, Sydney (length 745 feet), over George's River at Liverpool (length 912 feet), and over the Clyde River at Bateman's Bay (length 1,008 feet).

(b) *Receipts and Payments.* The funds of the Department of Main Roads are derived principally from taxation of motor vehicles, contributions by the Commonwealth Government under the Commonwealth Aid Roads and Works Acts (*see* Chapter XX.—Public Finance, for some particulars of the basis and distribution of grants under these Acts and para. 1 of this section for particulars of the amounts allocated in recent years), contributions by municipal and shire councils, and special (not statutory) assistance by the State Government by way of loan moneys or special grants from revenue funds. Receipts and payments for the four years 1950–51 to 1953–54 compared with the income and expenditure for 1938–39 are shown below.

(a) Income and expenditure.

(b) Includes £100,000 repayment to Treasury of funds specially provided by the State Government in earlier years from Consolidated Revenue.

The figures shown above represent the aggregate receipts and payments of three funds—the County of Cumberland Main Roads Fund, the Country Main Roads Fund and the Developmental Roads Fund. From 1st January, 1925 to 30th June, 1954 receipts amounted to £138,985,137 and payments to £137,818,047. Particulars of the individual funds are—County of Cumberland, receipts £36,114,802, payments £35,531,410; Country, £98,363,263, £97,802,536; Developmental, £4,507,072, £4,484,101.

The total expenditure on roads, streets and bridges in the State by all authorities during the years 1938–39 and 1949–50 to 1952–53 was, respectively, £8,891,000, £12,377,000, £14,840,000, £19,969,000, and £22,593,000. These figures are approximate and they include expenditure on construction, maintenance and direct administration, but not on debt charges. Expenditure on the Sydney Harbour Bridge is not included.

(c) *Sydney Harbour Bridge.* The Sydney Harbour Bridge was opened for traffic on 19th March, 1932. The main span is 1,650 feet and the clearance for shipping 170 feet from high water level. The deck, 160 feet wide, carries a roadway, two railway tracks and two tramway tracks, and there is also a footway on each side. The capital cost of the bridge to the 30th June, 1954, was £9,725,507, but this amount will be reduced by approximately £260,000 on the disposal of all surplus resumed property. The portion met from repayable loan funds, over £8,000,000, is to be repaid over a period of 53 years ending approximately in 1985. The accumulated balance of the Bridge Account at 30th June, 1954, showed a surplus of £15,920, after the transfer of sums totalling £985,000 to a reserve account. Annual income, after a decline to less than £300,000 during the 1939–45 War, has risen from about £400,000 in 1938–39 to over £800,000 in 1953–54; expenditure over the same period has remained relatively stable, varying between £424,000 and £500,000. In 1953–54 income included road tolls £648,641, railway passenger tolls £139,340, and tram and omnibus passenger tolls £26,045. Expenditure amounted to £492,776, including interest, exchange, etc., £235,065, sinking fund, £62,581 and maintenance and improvement £117,666. During 1953–54, 25,056,000 rail travellers, 23,753,000 tram and omnibus travellers, and 29,384,000 road travellers in 17,786,000 road vehicles crossed the bridge, contributing respectively, 17 per cent., 3 per cent., and 80 per cent. of the total toll revenue.

3. *Victoria.*—(i) *General.* With the object of improving the main roads of the State the Country Roads Board was established by legislation passed in 1912. The principal duties of the Board are to determine the main roads, State highways, tourists' roads, etc., to inquire into the State's resources in road materials and the most effective methods of road construction and maintenance, and to recommend deviations in existing roads or the construction of new roads in order to facilitate communication or to improve the conditions of traffic.

(ii) *Length of Roads.* (a) *Declared Roads.* The total length of declared roads in Victoria at 30th June, 1953 the latest date for which details are available, was 14,448 miles, classified as follows:—State highways, 3,849 miles; main roads, 9,792 miles; tourist roads, 432 miles; forest roads, 375 miles. The total length of the surface treated (black) system included in the foregoing totals was 7,361 miles or 51 per cent.

(b) *Composition of Roads.* It is estimated that, in addition to the 14,448 miles of classified roads as above, there were approximately 90,000 miles of unclassified roads at 30th June, 1953. The latest detailed estimate of the length of roads and streets in Victoria (as at 30th September, 1948) provides the following information:—Wood or stone, 62 miles; portland cement concrete, 150 miles; asphaltic concrete and sheet asphalt, 202 miles; tar or bitumen surface seal, 10,241 miles; water-bound macadam, gravel, sand and hard loam pavements, 28,418 miles; formed only, 23,901 miles; surveyed only, 38,437 miles; total 101,411 miles.

(iii) *Country Roads Board.* (a) *General.* During 1953–54 1,198 miles of declared roads under the Board's control were treated with bitumen. In addition, 83 miles of undeclared roads, for which the Board contributed funds, were similarly treated. Work for other authorities carried out by the Board's plant amounted to 148 miles. The total length of bitumen treatment carried out in 1953–54 was 1,429 miles. Of the work on the roads under the Board's control, 568 miles related to State highways.

During 1953–54, 164 bridge projects with a total value of £646,804 were initiated. Of these new projects, 30 with a total value of £295,395 were supervised by the Board and 134 with a total value of £351,409, were supervised by municipalities.

(b) *Receipts and Payments.* The funds of the Country Roads Board are derived principally from motor vehicle registration fees, drivers' licence fees, contributions from the Commonwealth Government under Commonwealth Aid Roads and Works Acts and payments from municipalities. In addition loans have been authorized from time to time under the Country Roads Acts for permanent works on main roads and State highways and restoration of flood and bush fire damage. During the year ended 30th June, 1954, loan receipts and payments each amounted to £1,512,741, and expenditure included £245,741 for restoration of flood and bush fire damage. The total loan expenditure to 30th June, 1954 was £10,368,745. This figure does not include loan expenditure from the Developmental Roads Loan Account, which fund was created for the purpose of constructing and maintaining subsidiary or developmental roads. Loan money raised on this account was exhausted at 30th June, 1937, the total expenditure at that date being £6,425,758.

Total receipts and payments during each of the years 1938-39 and 1950-51 to 1953-54 are shown below :—

<b>Total ..</b>	<b>3,306,856</b>	<b>7,188,700</b>	<b>7,815,252</b>	<b>7,882,409</b>	<b>8,518,879</b>

(a) Figures for 1938-39 are not directly comparable with those of succeeding years owing to a change in the method of compilation adopted by the Country Roads Board. (b) Prior to 1st July, 1949 drivers' licence fees were paid into Consolidated Revenue Fund. From that date until 31st December, 1950 the fees were credited to the funds of the Country Roads Board. Since then one half of the fees have been credited to the funds of the Country Roads Board while the remaining half have been credited to the Municipalities Assistance Fund. (c) Excludes portion of Commonwealth Aid Roads and Works Acts advances drawn by the Public Works Department for expenditure on wharfs, jetties, etc. (d) Includes £54,662 expenditure on unemployment relief works.

4. Queensland.—(i) *General*. Under the Main Roads Act 1920 a Main Roads Board was constituted, consisting of three members appointed by the Governor-in-Council. In 1925 the Board was abolished and its powers conferred upon a single Commissioner. The Main Roads Commission was constituted a Department under the name of the Department of Main Roads in February, 1951, with the Commissioner of Main Roads as its permanent head. The duties of the Commissioner are to carry out surveys and investigations necessary to determine State highways, main, developmental, secondary, mining access, farmers' and tourist roads and tourist tracks, and the responsibility for building and maintaining these declared roads is largely that of the Commissioner. Roads of purely local importance are constructed and maintained by local authorities. In many cases construction is subsidized by the State Government by means of Treasury loans. Other roads are built by the Public Estate Improvement Branch of the Lands Department in order to open up areas of previously inaccessible or undeveloped country.

(ii) *Length of Roads*. (a) *Declared Roads*. The total length of declared roads in Queensland at 30th June, 1954 was 21,050 miles, comprising State highways, 7,772 miles; main roads, 11,198 miles; developmental roads, 246 miles; secondary roads, 648 miles; mining access roads, 574 miles; farmers' roads, 312 miles; tourist roads, 298 miles; tourist tracks, 2 miles. During 1953-54, 96 miles were added to the list. The length of roads improved in Queensland from the date of commencement of work under the Main Roads Acts 1920-1952 to 30th June, 1954 was 12,237 miles (58 per cent.). At that date, also, 1,120 miles of new road construction and 980 miles of stage construction work were proceeding.

(b) *Composition of Roads*. The total length of roads and streets in Queensland at 30th June, 1954 was:—Concrete, 100 miles; bitumen, 5,612 miles; macadam, 12,744 miles; other formed, 44,341 miles; unconstructed, 62,895 miles; total, 125,692 miles.

(iii) *Department of Main Roads*. (a) *General*. During 1953-54, the Department completed 1,195 miles of roads including new construction and stage construction. Bridges of all types to a length of 6,827 linear feet were constructed, bringing the total constructed by the Department at 30th June, 1954 to 172,728 feet. In addition, at 30th June, 1954, 7,822 feet were under construction. These figures do not include particulars of the Fitzroy River and Burdekin River bridges.

The Fitzroy River Bridge (length 1,210 feet) was constructed jointly by the Main Roads Department and the Rockhampton City Council and was opened for traffic in September, 1952. The Burdekin River Bridge is a combined road and rail bridge over the Burdekin River with an overall length including approaches of 3,620 feet. The Main Roads Department is responsible for the approaches and substructure and the Co-ordinator-General's Department for the superstructure. The substructure was completed during 1953 and work is proceeding on the approaches and superstructure. Expenditure, which was adversely affected by floods in earlier years, totalled £1,559,743 to 30th June, 1954.

(b) *Receipts and Payments*. The funds of the Department of Main Roads are obtained chiefly from motor vehicle registration and collections, fees, etc., under the Transport Acts, contributions under the Commonwealth Aid Roads and Works Acts and loans, grants and advances from the State Government. The total receipts and

payments, including amounts for defence works, during each of the years 1938-39 and 1950-51 to 1953-54 are shown below :—

5. South Australia.—(i) *General.* The Highways Act 1926 created a Commissioner of Highways and a Highways Fund for the purpose of improving the main roads of the State. The Commissioner of Highways had the sole responsibility of determining upon which main roads moneys from the Highways Fund were to be expended. In 1953, by the Highways Act 1926-1953 the Commissioner of Highways was placed under the control of the Minister for Roads and Local Government and now has to have ministerial approval of all main road projects.

The Highways Fund is credited with the receipts from State motor taxation, fees, fines and licences, after deduction of the costs of collection, and all loans raised and appropriated for roads. All moneys received by the State from the Commonwealth under the Commonwealth Aid Roads and Works Acts are also expended by the Commissioner of Highways under the general provisions of the Highways Act.

(ii) *Length of Roads.* The total length of roads in use for general traffic at 30th June, 1953 (the latest date for which details are available) was as follows :—Within district council and corporation boundaries ; blocks (wood or stone), 6 miles ; bituminous concrete (asphalt and premix), 600 miles ; cement concrete and cement penetration, 5 miles ; penetration or surface dressed (bitumen or tar), 2,914 miles ; metalled (gravelled or rubbled), 16,829 miles ; formed, but little or no metal, 12,391 miles ; surveyed, used by traffic, but little or no improvement, 22,270 miles ; total, 55,015 miles ; outside districts (mainroads only), 565 miles ; grand total, 55,580 miles. Lengths of main roads within district council and corporation boundaries aggregated 7,575 miles.

(iii) *State Highways and Local Government Department.* (a) *General.* The Department's programme for the acquisition of land for road improvement in the metropolitan and rural areas was continued during 1953-54 when approximately 27,500 linear feet of frontages in the metropolitan area were acquired and set back. This brought the total acquisition since the inception of the metropolitan widening scheme to 28½ miles. In rural areas the policy of widening roads and improving the alignments was continued in order to provide for an expected future increase in the volume of traffic.

(b) *Receipts and Payments.* The following table shows particulars of receipts and payments, during the years 1938-39 and 1950-51 to 1953-54, of funds controlled by the Highways and Local Government Department.

Total . . .	1,374,108	2,648,451	3,938,119	3,804,310	5,027,688

(a) Figures for 1938-39 are not completely comparable with those for following years. (b) Includes special contribution of £620,000 from Consolidated Revenue for roads for war service land settlement and developmental roads. (c) Roads, plant, etc. (d) Interest and sinking fund payments. (e) Not separately available; included elsewhere.

The total expenditure, both revenue and loan, by State and local governments on roads, streets and bridges in South Australia during the years 1938-39 and 1951-52 to 1953-54 was, respectively, £1,966,000, £4,596,000, £4,667,000 and £6,131,000.

6. *Western Australia.*—(i) *General.* Under the Main Roads Act 1930-1939 the Main Roads Board previously existing was abolished and a Commissioner of Main Roads was appointed. His duties relate to the determination of main roads after consideration of the funds available and the services to be rendered by the roads, the declaration and provision of developmental roads, the construction and maintenance of main roads, and the carrying out of surveys, investigations and experiments connected with roads and road materials. The Act authorizes two trust accounts (Main Roads Trust Account and Main Roads Contribution Trust Account) to record the moneys prescribed as available to the Commissioner for expenditure associated with roads, etc. In addition, the Commissioner operates on those Trust Accounts which are used for funds made available under the Commonwealth Aid Roads and Works Acts

(ii) *Length of Roads and Streets.* The total known lengths of roads and streets in existence in the various municipalities at 31st October, 1954 and in road districts at

30th June, 1954, were as follows :—Bituminous, 4,840 miles ; gravel water-bound, 13,989 miles ; other constructed surfaces, 1,833 miles ; formed only, 34,229 miles ; unprepared, 28,167 miles (incomplete) ; total 83,058 miles.

The lengths of declared roads at 30th June, 1954, were :—Main roads, 3,178 miles ; important secondary roads, 7,232 miles ; developmental roads, 11,331 miles ; total, 21,741 miles.

(iii) *Main Roads Department.* During the year 1953-54 the activities of the Department included :—clearing, 1,287 miles ; forming 1,431 miles ; gravelling, 968 miles ; reconditioning 2,377 miles ; stabilizing, 180 miles ; side drains, 85 miles. In addition lengths of tar and bitumen work performed aggregated 689 miles. Bridges constructed numbered 20. Work commenced during the year on the timber bridge over the Murray River at Pinjarra which is a vital link in the road system between the Perth Metropolitan area and the south-west of the State. When completed the bridge will be 320 feet long and 30 feet wide. Construction of the Wyndham-Ord River-Nicholson road was continued during 1953-54.

(iv) *Receipts and Payments—Combined Road Funds.* The following table shows the combined transactions of the Main Roads Trust Account, the Main Roads Contributions Trust Account, the Metropolitan Traffic Trust Account, and the Commonwealth Aid Roads and Works Trust Accounts during the years ended 30th June, 1939 and 1951 to 1954.

(a) Figures not completely comparable with those for following years. Includes Transport Co-ordination Trust Account.

7. *Tasmania.*—(i) *General.* Under the Transport Act 1938, which came into operation on 1st July, 1939, the Transport Commission was constituted to co-ordinate, regulate, control, and improve the means of, and facilities for, transport by road, rail or air within the State. Revenues at its disposal for road and motor traffic purposes are the Commonwealth Aid Roads and Works grants, motor vehicle registration fees and tax, and licensing fees for drivers and public motor vehicles. Under the Roads and Jetties Act 1944, which provides for the classification of the whole of the roads of the State so that they will be adequately and efficiently maintained, the cost of maintenance of roads classified as State highways, tourist roads and developmental roads is borne by the Transport Commission. It is also responsible for a proportion of the cost of maintenance of main and secondary roads. Except in special cases, municipal councils bear the cost

of maintaining country roads and a proportion of the cost of main and secondary roads. The cost of construction of roads and bridges in Tasmania is borne almost entirely by the State Government. The expenditure of the Public Works Department (the construction and maintenance authority for the Transport Commission) during 1953-54 on roads, tracks and bridges amounted to £2,216,837 of which £1,341,022 was charged to road funds, £38,972 to revenue, £731,962 to loan and £104,881 to other funds.

As from 1st July, 1951 certain functions with respect to the construction and maintenance of roads and the vesting and control of certain plant were transferred from the Transport Commission to the Minister for Lands and Works. The existing Road Account and Commonwealth Aid Roads and Works Account in the books of the Transport Commission were closed and a new Fund—the State Highways Trust Fund—was opened in the Treasury books.

(ii) *Length of Roads.* (a) *Classified Roads.* The mileages of classified roads in Tasmania at 30th June, 1954 were as follows:—State highways, 1,161 miles; main roads, 651 miles; secondary roads, 186 miles; tourist roads, 45 miles; developmental roads, 50 miles; subsidized roads, 92 miles; total 2,185 miles. Country roads totalled more than 10,000 miles. The mileages of sealed roads, and their proportions to the respective totals, were:—State highways, 571 miles (49 per cent.); main roads, 196 miles (30 per cent.); secondary and other roads, 14 miles (7 per cent.); total, 781 miles (36 per cent. of all classified roads, and 6 per cent. of all roads, in Tasmania).

(b) *Composition of Roads.* The length of all roads in Tasmania, including those with surfaces of lower grade, at 30th June, 1954, was as follows:—Bituminous, 1,031 miles; concrete, 20 miles; granite, limestone, etc., water-bound, 9,079 miles; surfaces of lower grade, 2,918 miles; total, 13,048 miles.

(iii) *Receipts and Payments—Combined Road Funds.* The table hereunder shows particulars of the receipts and payments of combined Road Funds and Commonwealth Aid Roads and Works Funds under the control of the Transport Commission for the years 1939-40 and 1950-51 to 1953-54:—

NOTE.—Minus sign (—) indicates an excess of credits.

8. *Summary of Roads used for General Traffic.*—(i) *Proclaimed or Declared Roads.* The table hereunder is a summary of the roads proclaimed or declared under the Acts of the several States relative to the operations of the central road authorities, and shows the lengths of various classes proclaimed or declared as at 30th June, 1954. These proclaimed or declared roads are those for which the central road authority assumes responsibility under the Act for the whole, or a proportion, of the cost of construction and/or maintenance, the extent varying from State to State and with the class and locality of the roads. Before proclamation of a main road, consideration is given, in general, to the following points:—availability of funds; whether the road is, or will be, within one of several classes of main trunk routes; whether the district is, or will be, sufficiently served by railways. Provision is also made in some States for the declaration of roads other than main roads. The absence of a particular class in any State does not necessarily imply that there are no roads within that State that might be so classified; the classes are restricted only to roads proclaimed or declared under the Acts. A further point to make is that, through various causes, e.g. insufficiency of funds, man-power or materials, etc., construction or maintenance may not keep pace with gazettals of mileages, and that therefore the condition of a road may not match its status.

PROCLAIMED OR DECLARED ROADS : LENGTHS, 30th JUNE, 1954.

(a) As at 30th June, 1953. (b) Forest roads. (c) Includes mining access roads, 574 miles; farmers' roads, 312 miles; tourist tracks, 2 miles. (d) Subsidized roads.

(ii) *Composition of Roads.* The following table represents an attempt to classify all the roads used for general traffic in Australia, at the latest dates available, according to States and Territories and to certain broad composition groups. The results are not entirely satisfactory, (i) because it is doubtful whether the whole of Australia is covered, (ii) because the dates of reference differ, and (iii) because the figures constituting each group are not wholly comparable for the States and Territories. It is hoped, however, despite these defects, that the table will provide an approximate and general idea of the main types of roads in Australia.

The data in the table for the States are obtained from the State Government Statisticians, and are derived mainly from local government sources. Unincorporated areas in some States are probably excluded and the figures on the returns supplied by the local government authorities are in some cases of doubtful accuracy. Details of the composition of roads, as far as they are available, vary to such an extent that it is considered preferable to show here only major divisions.

Groups 1-4 as shown in the table include, respectively, the following types of composition :—

1. *Wood or Stone.* Wood blocks ; stone paved.
2. *Concrete.* Cement concrete ; asphaltic concrete ; bituminous concrete ; sheet asphalt on concrete base.
3. *Bituminous.* Tar or bituminous macadam ; tar and bituminous surface seal ; surfaced water-bound macadam or gravel ; bituminous or cement penetration.
4. *Macadam and Other.* Water-bound macadam ; granite, limestone, and blast-furnace slag, water-bound ; water-bound gravel ; gravel or crushed rock ; metalled (gravel or rubble) ; gravel, sand and hard loam pavements.

Groups 5 and 6 include roads so-called mainly because they are used for general traffic, irrespective of their surfaces, prepared or otherwise.

It will be noticed that some of the terms used above are practically synonymous. Such terms are, of course, not used by any one State, but are the classifications adopted by different States.

For details of any particular State, see the respective paragraphs in the preceding pages.

(a) Municipalities, 31st October and Road Districts, 30th June.

It will be seen from the foregoing table that a little more than one-quarter of the road lengths of Australia have actually been constructed, the remainder, for the greater part, being in little more than the natural state. The percentages for each group are as follows :—Group 1, 0.01 ; group 2, 0.33 ; group 3, 7.01 ; group 4, 24.11 ; groups 5 and 6, 68.54. The percentage of constructed lengths to total length in each State is as follows :—New South Wales, 42 ; Victoria, 39 ; Queensland, 15 ; South Australia, 37 ; Western Australia, 25 ; Tasmania, 77 ; Northern Territory, 12 ; Australian Capital Territory, 60. Comparisons between the States should be made with caution, however, because, in addition to the defects enumerated at the beginning of this section, factors such as the area, physiography, density and distribution of population, nature of economic activity, other facilities for transport, etc., in each State must be taken into account.

9. *Summary of Expenditure on Roads and Bridges.*—(i) *General.* In most States there are three classes of authorities—the State Government, the central road authority, and the numerous local government bodies. Most of these authorities may expend money either directly on road construction or indirectly by means of grants and miscellaneous payments to other authorities. Insufficient information is given in the

accounts of many authorities to permit the exclusion of these indirect payments which would, if included in the aggregate, duplicate the expenditure. In addition a number of authorities are not able to supply separate information concerning their expenditure on roads. For these reasons it has not been possible up to the present, to compile statistics of the aggregate expenditure on roads.

The two paragraphs following therefore represent only : (a) aggregate expenditure from the various State road funds referred to in the foregoing pages, and (b) loan fund expenditure by State Governments. Expenditure by local government bodies is not included. Paragraph 8., Finances, of § 2. Local Government Authorities, contains some particulars of local government revenue and expenditure on roads, streets and bridges (*see* pages 671 and 674).

(ii) *Aggregate Expenditure from State Road Funds.* The following table shows expenditure on the construction and maintenance of roads, including payments to local government bodies, by each State during the years 1938-39 and 1949-50 to 1953-54, as summarized from the foregoing sections. Expenditure on administration, debt charges, Commonwealth defence works, payments to State consolidated revenues, and on plant and materials is not included. In some instances expenditure on works other than roads and bridges is included. Figures are not completely comparable as between States, and, in some States, as from year to year.

**ROADS AND BRIDGES : AGGREGATE EXPENDITURE FROM ROAD FUNDS.**  
(£'000.)

Year ended 30th June—	N.S.W.(a)	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	Total.
1939 ..	3,257	2,339	2,405	(b) 1,150	1,067	(c) 250	10,468
1950 ..	5,160	3,185	3,212	2,067	1,872	791	16,287
1951 ..	6,063	5,362	4,380	2,174	2,628	1,277	21,884
1952 ..	8,546	5,836	6,650	3,048	3,034	1,341	28,455
1953 ..	8,885	6,023	5,296	3,123	3,611	1,503	28,441
1954 ..	11,505	6,686	5,536	4,405	3,002	2,061	33,195

(a) Excludes Sydney Harbour Bridge.  
1939-40.

(b) Includes expenditure on plant.

(c) Year

The foregoing particulars do not represent the total expenditure on roads and bridges in each State. To obtain this information additions must be made on account of (a) State Government expenditure from revenue and loan through Departments or authorities other than the Central Road Authority and (b) local government expenditure from revenue and loan, while, on the other hand, allowances must be made for grants and miscellaneous payments to other authorities (*see* (i) above).

(iii) *State Net Loan Expenditure.* In recent years, expenditure from State loan funds on roads and bridges has not been large, and it would appear, also, that a considerable proportion passes through the funds of the central road authorities and is therefore included in the figures of their financial operations in the foregoing sections. Gross loan expenditure by all State Governments during 1953-54 amounted to over £2,000,000, while net expenditure was about £350,000 less. Aggregate net loan expenditure on roads and bridges in each State to 30th June, 1954 amounted to the following approximate sums :—New South Wales, £22,000,000 ; Victoria, £18,000,000 ; Queensland, £11,000,000 ; South Australia, £5,000,000 ; Western Australia, £3,000,000 ; Tasmania, £8,000,000 ; total, £67,000,000.

## § 5. Water Supply, Sewerage and Drainage.

NOTE.—See also Chapter XI.—Water Conservation and Irrigation.

1. New South Wales.—(i) *General*. The two largest domestic water supply and sewerage systems are controlled by statutory boards each consisting of a president and a vice-president appointed by the State Government and five members elected by local councils. These are (a) the Metropolitan Water, Sewerage and Drainage Board, which administers the systems in the County of Cumberland, i.e., in Sydney and in the surrounding districts, and, in addition, has jurisdiction over territory extending along the South Coast beyond Wollongong to Lake Illawarra, and (b) the Hunter District Water Board, serving the Newcastle area. At Broken Hill a similar board includes a representative of the mining companies. Other systems, apart from irrigation projects and water storage systems administered by the State Government, are controlled by county, municipal and shire councils.

(ii) *Water Supply—to 30th June, 1954*. (a) *Metropolitan*. The storage reservoirs of the metropolitan system, with a combined available capacity of 124,959 million gallons, drain catchment areas of 376 square miles (Upper Nepean, 347 square miles and Woronora, 29 square miles). Water is drawn also from the Warragamba River, with a catchment of 3,383 square miles. This system is being developed, and building has commenced on a dam to have an overall height of 415 feet (greatest depth of water 340 feet) having a storage capacity of 460,000 million gallons and giving a net safe draught estimated at 263 million gallons per day and in addition 11 million gallons per day for riparian purposes. The existing temporary storage is supplied by a weir 50 feet high with a maximum storage of 579 million gallons. At 30th June, 1954 there were 107 service reservoirs in use with a combined capacity of 545.6 million gallons. Rating for water for 1953-54 was 10d. in the £1 of assessed annual value and the charge for water measured by meters 1s. 9d. per 1,000 gallons.

(b) *Newcastle*. The water supply is drawn from two sources (1) the Chichester Reservoir, with a storage capacity of about 5,000 million gallons and draining a catchment of 76 square miles, and (2) the Tomago Sandbeds, which extend northerly along the coast towards Port Stephens. Service reservoirs and tanks distributed throughout the Water Supply District have a total storage capacity of 106 million gallons. Water rating for 1953-54 was 1s. 8d. in the £1 on assessed annual value. The price of water to domestic and industrial consumers is 2s. per 1,000 gallons.

(c) *Water Supplied, etc.* The following tables show, for the Sydney and Newcastle systems, the number of properties, the estimated population supplied, and other details for the years 1938-39 and 1949-50 to 1953-54 :—

WATER SUPPLY, SYDNEY(a) : SERVICES.

1953-54.. ..	71,307	285,228	25.5	9,415	358	90.4	1,284

(iii) *Sewerage and Drainage—to 30th June, 1954.* (a) *Metropolitan.* Sydney and suburbs are served by 3 major sewerage systems and 5 minor systems consisting of 6 outfalls discharging direct into the Pacific Ocean and 2 treatment works. A further treatment works is in course of construction near Kurnell and is designed to serve the whole of the Cronulla Peninsula. In addition 4 centres outside the metropolitan area (Camden, Campbelltown, Liverpool and Wollongong) are served by local treatment works.

Stormwater drainage channels under the Metropolitan Water, Sewerage and Drainage Board's control at 30th June, 1954 were 175 miles long. Sewerage rating for 1953-54 was 10½d. in the £1 of assessed annual value and drainage rating ¾d. in the £1.

(b) *Newcastle.* The main sewerage system of the Newcastle area discharges into the Pacific Ocean at Merewether Gulf. In some of the outlying districts treatment works have been installed.

Sewerage rates for 1953-54 were 1s. 3d. in the £1 of assessed annual value and drainage rates (on certain areas served) 2d. in the £1.

(c) *Particulars of Services.* The following table supplies, for the Metropolitan system, details of sewerage services and stormwater drains as at 30th June, 1939 and 1950 to 1954.

## SEWERAGE AND DRAINAGE, METROPOLITAN(a) : SERVICES.

At 30th June—				Improved Properties for which Sewer Available.	Estimated Population Served.	Length of Sewers.	Length of Stormwater Channels.
				No.		Miles.	Miles.
1939	..	..	..	254,632	1,066,000	2,561	87
1950	..	..	..	298,996	1,306,000	2,899	154

1953	..	..	..	316,439	1,427,000	3,055	174
1954	..	..	..	324,737	1,454,000	3,163	175

(a) Includes part of South Coast.

At 30th June, 1954, 47,497 premises had been connected to the Hunter District Water Board's sewerage system (Newcastle area). The total length of sewers under the Board's control was 633 miles, and the length of drains was 42 miles.

(iv) *Finances, Sydney and Newcastle Systems.* The following table shows the debt, revenue and expenditure of the Metropolitan Water, Sewerage and Drainage Board and the Hunter District Water Board for each of the services of water supply, sewerage and drainage during 1953-54 and for the three services combined during the years 1938-39 and 1949-50 to 1952-53.

1938-39	4,574,880	385,732	167,620	188,185	20,886	376,691	+ 9,041

(a) Includes provision for renewals, long service leave, loss on exchange, etc. (b) Includes part of South Coast.  
(c) Excludes non-interest bearing capital in respect of stormwater drains transferred from Public Works Department—£2,199,223 at 30th June, 1954.

(v) *Country Water Supply and Sewerage Systems.* At 31st December, 1952, country water supply services were conducted or under construction by 64 municipalities, 60 shires and 4 county councils, and country sewerage services by 58 municipalities and 18 shires. The capital indebtedness of these schemes was £12,674,357 at 31st December, 1952, namely, £8,773,311 for water and £3,901,046 for sewerage. Of the foregoing amounts, Government advances amounted to £419,589. Debt of the municipalities amounted to £7,599,338, shires to £2,557,849 and county councils to £2,517,170. Aggregate income and expenditure, respectively, amounted to £2,378,626 and £1,688,177 in 1952.

(vi) *Other Water Supply and Sewerage Systems.* The water supply and sewerage services for Broken Hill are operated by a statutory board, the Broken Hill Water Board. Its capital indebtedness at 31st December, 1953 was £2,810,946. In 1953 income (excluding subsidies, State Government £101,279 and Mining Companies £286,217) amounted to £164,504 and expenditure (excluding debt redemption £119,627) amounted to £428,362.

The following country water supply systems—South-West Tablelands, Junee and Fish River—are administered by the Department of Public Works. These supply water in bulk to municipalities and shires, the Railways Department, and other large consumers; only a small quantity is sold directly to private consumers. The capital indebtedness of these systems was £2,831,560 at 31st December, 1953.

There are also the Mulwala Water Supply and Sewerage Service constructed as an urgent war-time work for the Commonwealth, and the Bethungra Water Supply System administered by the Department of Public Works in conjunction with the Junee supply.

2. Victoria.—(i) *Melbourne and Metropolitan Board of Works—to 30th June, 1954.*

(a) *General.* The Board was established by Act of Parliament on 20th December, 1890 and entered upon its duties on 18th March, 1891. It consists of 50 members, including the chairman, who is elected every four years by the other members. The other 49 members, who are called commissioners, are from time to time elected by the councils of the municipal districts wholly or partly within the metropolis. The principal functions of the Board are to control and manage the metropolitan water supply system; to provide the metropolis with an efficient system of main and general sewerage; to deal with main drains and main drainage works; and to control and manage the rivers, creeks and watercourses within the metropolis.

(b) *Water Supply.* There are five storage reservoirs serving the metropolitan area—Yan Yean, 7,234 million gallons (available for consumption, 6,605 million gallons); Toorourrong, 60 million gallons; Maroondah, 6,274 million gallons (4,855 million gallons); O'Shannassy, 930 million gallons; Silvan, 8,853 million gallons (8,823 million gallons); total 23,351 million gallons (21,273 million gallons). Service reservoirs number 25, with a total capacity of 262 million gallons. Two major projects are under construction. One is an 18 mile conduit to carry water from the Silvan Reservoir to the existing Mt. Waverley service reservoir and to a new service reservoir which is to be built south of Glen Waverley and which when completed will be capable of supplying an additional 110 million gallons a day. The other project, which was approved by the Board in 1946, consists of a dam, 293 feet high, which will impound 44,000 million gallons of water, on the River Yarra, immediately upstream from the confluence of the Yarra and Doctors Creek, and work on the project is proceeding. This work is estimated to cost £12,628,000.

The water rate levied by the Board in 1953-54 was 8d. in the £1 on the net annual value of the property served, and from 1st July, 1953, the charge for water supplied by measure in excess of the quantity which, at 1s. per 1,000 gallons, would produce an amount equal to the water rate payable on the property, was increased from 1s. 3d. to 1s. 6d. The following table shows particulars of Melbourne metropolitan water supply services for the years 1938-39 and 1949-50 to 1953-54.

WATER SUPPLY, MELBOURNE : SERVICES.

Year.	Number of Houses Supplied.	Estimated Population Supplied.	Average Daily Consumption.	Total Consumption for the Year.	Average Daily Consumption.		Length of Aqueducts, etc., Mains and Reti-culation.	Number of Meters.
					Per House.	Per Head of Estimated Population.		
			Mill. gals.	Mill. gals.	Gallons.	Gallons.	Miles.	
1938-39 ..	285,408	1,133,000	66.9	24,408	234	59.0	3.234	189,617

The metropolitan sewerage system consists of the Main system (serving an area of 67,433 acres) and three subsidiary systems—the Sunshine system (serving an area of 941 acres), the Kew system (serving an area of 103 acres) and the South-eastern system (serving an area of 2,292 acres in Cheltenham, Parkdale, Mentone and Mordialloc). The Metropolitan Sewage Farm, 26,073 acres in extent and situated about 24 miles south-west of Melbourne beyond the township of Werribee, serves to purify and dispose of approximately 95 per cent. of the sewage flow of the metropolis before its discharge into Port Phillip Bay. The total capital cost (less depreciation) of the Farm to 30th June, 1954 was £2,608,337. Revenue during 1953-54 amounted to £87,833, cost of sewage disposal £185,525, trading expenses £84,770, interest £102,872, and net cost of sewerage purification £285,334. These financial particulars are included in the sewerage items of the summary below.

(d) *Finances.* The following table provides a summary, for the year 1953-54 of the financial operations of the three services conducted by the Melbourne and Metropolitan Board of Works.

#### MELBOURNE AND METROPOLITAN BOARD OF WORKS : FINANCES, 1953-54.

(£.)

Service, etc.	Capital Cost at 30th June. (a)	Revenue.	Expenditure.				Surplus (+) or Deficit (-).
			Working Expenses.	Interest and Exchange.	Debt Redemption.	Total.	
Water ..	25,564,214	2,271,269	924,326	965,799	..	1,890,125	+ 381,144
Sewerage ..	20,815,248	2,265,331	977,764	828,299	..	1,806,063	+ 459,268

(ii) *Geelong Waterworks and Sewerage Trust.* (a) *General.* The Geelong Waterworks and Sewerage Trust was constituted in 1908 and reconstituted under the Geelong Waterworks and Sewerage Act in 1910. It was further reconstituted in September, 1950 to include a Government nominee (Chairman) and provision was made for a commissioner to be elected by the ratepayers of the Shire of Corio, making a total of seven commissioners instead of five as formerly. The amount of loan money which may be raised is limited to £1,500,000 for water supply undertakings, £1,250,000 for sewerage undertakings, and £270,000 for sewerage installation to properties under the deferred payment system. The population supplied is estimated by the Trust at 72,100. This and other general information relates to 30th June, 1954.

(b) *Water Supply.* The catchment area is about 16,000 acres. There are five storage reservoirs and nine service basins whose total storage capacity is 2,746 million gallons. The length of water mains and reticulation is 399 miles. In addition, the State Rivers and Water Supply Commission has made available a supplementary supply of a minimum quantity of 545 million gallons of water per annum from the Bellarine Peninsula System. The total expenditure on water supply to 30th June, 1954 was £1,333,712. Expenditure for 1953-54 comprised £73,275 for working expenses and £69,653 for interest, redemption and reserves, while revenue amounted to £155,881. The sinking fund appropriations at June, 1954 amounted to £142,433. The replacement and contingencies reserve amounted to £209,175. There is a water rate of 1s. 5d. in the £1 (with minima of 5s. for unbuilt-on land and £1 for tenements) on the net annual value of ratable properties.

(c) *Sewerage Works.* The sewerage scheme consists of a main outfall sewer to the ocean at Black Rock, about 9 miles from Geelong, and 186 miles of main and reticulation sewers. The sewerage area is 10,219 acres, and the number of buildings within the sewered areas is 15,789 of which 15,777 have been connected. The total expenditure to 30th June, 1954 on sewerage works was £980,414, and on the cost of sewerage installation under deferred payment conditions £260,349 of which £1,809 was outstanding. The revenue in 1953-54 amounted to £99,089 and the expenditure comprised £40,064 on working expenses and £50,165 on interest, redemption and reserves. Sinking fund appropriations at June, 1954 were £122,080. Replacement and contingencies reserve amounted to £199,295. A general rate of 1s. 4d. in the £1 is levied on the net annual value of ratable properties.

(iii) *The Ballarat Water Commission and the Ballarat Sewerage Authority.* (a) *General.* The Ballarat Water Commission was constituted on 1st July, 1880, and the Ballarat Sewerage Authority on 30th November, 1920. The members of the Water Commission constitute the Sewerage Authority. The Commissioners number eight, three (one of whom is chairman) being appointed by the Government, four being elected by the Council of the City of Ballarat and one being elected by the Councils of the Borough of Sebastopol and the Shires of Ballarat, Bungaree, Bunninyong and Grenville. General and financial information given herein relates to the year ended 31st December, 1954.

(b) *Water Supply.* The Water Supply District embraces an area of about 65 square miles, containing a population of about 50,000. The total storage capacity of the seven reservoirs is 5,563 million gallons and the catchment area is 18,695 acres.

The capital cost of construction of the waterworks was £2,068,695 to 31st December, 1954. The liabilities amounted to £1,122,293 at 31st December, 1954 including loans due to the Government totalling £1,072,443. The revenue for the year 1954 was £129,684. Working expenses during 1954 amounted to £77,346 and interest and other charges to £53,692. A rate of 1s. 2d. in the £1 is levied on the net annual value of all ratable properties, with a minimum of £1 per annum for land on which there is a building or water supply.

(c) *Sewerage.* The Ballarat sewerage district embraces the City of Ballarat and parts of the Shires of Ballarat and Bungaree and the Borough of Sebastopol. Work was commenced in 1922 and up to 31st December, 1954 the Authority had constructed a disposals works, a nightsoil depot, an ejector station and more than 100 miles of sewers. The capital cost of sewerage construction works to 31st December, 1954 was £668,027. The method of sewage disposal is by sedimentation, oxidation and sludge digestion. One hundred and thirty-nine sewered areas had been declared as at 31st December, 1954. Assessments in the sewerage district numbered 15,023, while those in sewered areas numbered 11,557. There were 10,027 buildings connected.

The scheme is financed by debenture-issue loans from various financial institutions. The liabilities on account of loans secured for construction at 31st December, 1954, amounted to £537,788, redemption payments at that date totalling £203,830. An expenditure of £157,122 was incurred for house connexions, the whole of which has been redeemed. Revenue during 1954 amounted to £65,851 and expenditure, including £29,799 on interest and redemption, to £63,293.

A sewerage rate of 1s. 4d. in the £1, with a minimum rate of £2 4s., is levied on the net annual value of any ratable sewered property on which there is a building and £1 on any ratable sewered property on which there is no building.

(iv) *Other Sewerage Authorities.* At 30th June, 1954, 60 sewerage authorities had been constituted under the provisions of the Sewerage Districts Acts in districts outside the areas under the control of the Melbourne and Metropolitan Board of Works and the Geelong Waterworks and Sewerage Trust, and systems were in operation in 30 districts (including five partly operating) serving a population of 229,050 persons.

In addition, sewerage authorities were constituted in a further 30 districts at this date, but their operations had either been suspended or had not commenced.

(v) *Water Supply in Country Towns and Districts.* Most of the country waterworks are controlled by the State Rivers and Water Supply Commission, but in some instances the control is by waterworks trusts or by municipal corporations.

The waterworks controlled by the State Rivers and Water Supply Commission at 30th June, 1954, included 37 large reservoirs and 241 subsidiary reservoirs and service basins with a total storage capacity of 661,785 million gallons (2,430,800 acre feet). Length of channels was 15,027 miles (irrigation, 4,884 miles, domestic and stock 8,049 miles, drainage and flood protection, 2,094 miles) and of pipe lines 1,224 miles. The quantity of water delivered to water users during 1953-54 was 1,011,556 acre feet. The Commission administered 65 rural districts during 1953-54 (29 irrigation districts, 31 waterworks districts, 4 flood protection districts and 1 drainage district), and the reticulated pipe supplies for domestic and industrial purposes in 130 urban districts. In addition, 127 urban districts were administered by waterworks trusts and 16 by local governing bodies. The population served in these groups of urban districts numbered, respectively, 175,310, 339,270 and 100,510 persons. The table below is a summary of the Commission's finances for operations in districts under its control for the years 1938-39 and 1949-50 to 1953-54.

STATE RIVERS AND WATER SUPPLY COMMISSION, VICTORIA : FINANCES.(a)  
(£.)

Year.	Total Loan Capital Expenditure to 30th June.	Receipts.	Payments.				Total.
			Operating Expenses.	Interest on Capital Allotted.	Depreciation.	Debt Redemption.	
1938-39 ..	24,223,037	560,680	476,085	145,105	27,553	4,922	653,665
1949-50 ..	35,041,827	1,433,561	1,519,659	38,117	66,441	3,055	1,627,272
1950-51 ..	41,318,382	1,592,333	1,810,264	37,950	97,425	1,383	1,947,022
1951-52 ..	51,082,707	1,871,810	2,292,995	47,547	92,573	1,497	2,434,612
1952-53 ..	57,464,776	1,989,289	2,669,419	26,555	90,024	3,284	2,789,282
1953-54 ..	65,143,250	2,412,382	2,717,862	75,101	90,616	5,181	2,888,760

(a) Excludes waterworks and river improvement trusts and local governing bodies.

The total loan capital expenditure of waterworks and river improvement trusts and local governing bodies at 30th June, 1954 was £8,767,113, making a grand total of £73,910,363 when added to the figure for works under the control of the Commission. The net loan capital after redemption payments of £2,115,292 was £71,795,071.

The financial operations of the State Rivers and Water Supply Commission form part of the Consolidated Revenue Fund, but are included in this section for convenience. The major proportion of the interest payable is borne by the State and is additional to that shown above. The net expenditure borne by the State during 1953-54 was £3,052,155.

3. Queensland.—(i) *Brisbane City Council—to 30th June, 1954.* (a) *General.* This organization conducts the water supply and sewerage systems of the City of Brisbane. Prior to 1928, water and sewerage activities had been controlled by the Metropolitan Water and Sewerage Board, but were then absorbed by the Brisbane City Council, which also supplies, in bulk, the whole of the water used by the City of Ipswich and the Town of Redcliffe.

(b) *Water Supply.* Water storage facilities comprise the following (available capacities are shown in parentheses):—Somerset Reservoir, 200,000 million gallons (55,000 million gallons); Lake Manchester, 5,806 million gallons (5,725 million gallons); Brisbane River, 543 million gallons (484 million gallons); Pure Water Reservoir, Holt's Hill, 8.3 million gallons (8.3 million gallons); Enoggera Reservoir, 1,000 million gallons (600 million gallons); Gold Creek Reservoir, 407 million gallons (400 million gallons). There are eleven service reservoirs with a capacity of approximately 36.6 million gallons. The Somerset reservoir is under the control of Stanley River Works Board and is a dual purpose project with a designed total holding capacity of 200,000 million gallons, 55,000 million gallons to be for water storage and 145,000 million gallons for flood mitigation. Water rating at 30th June, 1954 was 3½d. in the £1 of unimproved capital value for improved properties, and 2d. in the £1 for vacant lands, with a minimum of £3 10s. and £2 6s. 8d. respectively. The following table is a summary of operations of the complete Brisbane City Council system (metropolitan area, Ipswich and Redcliffe) for the years 1938-39 and 1949-50 to 1953-54 :—

## WATER SUPPLY, BRISBANE(a) : SERVICES.

					Per Service.	Per Head of Estimated Population.		
			Mill. gals.	Mill. gals.	Gallons.	Gallons.	Mill-s.	
1938-39 ..	81,389	345,903	15.9	5,791	195	45.9	1,169	(b)
1949-50 ..	111,363	445,897	26.1	9,540	235	58.6	1,376	52,807
1950-51 ..	117,904	472,145	27.9	10,193	237	60.8	1,429	52,691
1951-52 ..	124,992	489,266	32.4	11,860	259	66.2	1,479	52,496
1952-53 ..	131,895	516,186	31.5	11,486	239	61.0	1,535	52,360
1953-54 ..	139,172	544,183	33.9	12,379	244	62.3	1,581	51,976

(a) Includes Ipswich and Redcliffe.

(b) Not available.

(c) *Sewerage.* The sewage treatment works are situated at Luggage Point on the north bank at the entrance to the Brisbane River. The treatment plan is the activated sludge system, but this has not been put into operation, and since the commencement of pumping operations in 1923 a sedimentation plant only has been used. Sewerage rating at 30th June, 1954 was 2½d. in the £1 of unimproved capital value for improved properties, and 2d. in the £1 for vacant lands, with a minimum of £3 15s. and £3 5s. respectively. The following table is a summary of operations of the Brisbane sewerage scheme for the years 1938-39 and 1949-50 to 1953-54 :—

## SEWERAGE, BRISBANE : SERVICES.

1953-54 .. ..	11,893,902	603,141	163,397	349,692	552,651	+ 50,490

(ii) *Country Towns.* (a) *Water Supply.* In addition to the City of Brisbane there were, at 30th June, 1953, 107 cities and towns in Queensland provided with water supply systems controlled by municipal and shire councils.

(b) *Sewerage Systems.* At 30th June, 1953, there were 13 cities and towns outside the metropolitan area—Bundaberg, Charleville, Cunnamulla, Goondiwindi, Hughenden, Ipswich, Mackay, Maryborough, Quilpie, Rockhampton, Toowoomba, Townsville and Warwick—with sewerage systems. Sewerage systems were in course of construction at Mt. Isa, Dalby, Barcaldine and Longreach.

(c) *Finances.* The receipts (other than loan) of water undertakings controlled by the cities and towns referred to above amounted to £2,880,173 in 1952-53. Expenditure amounted to £2,699,087, including £270,024 for debt charges. In addition, loan expenditure amounted to £1,466,640.

Finances of sewerage undertakings are incorporated in council general funds and are not available separately.

4. South Australia.—(i) *General.* The water supply and sewerage systems in this State were constructed and are maintained by the Engineering and Water Supply Department under the control of the Minister of Works. The works controlled comprise the Adelaide, Barossa, Baroota Creek, Beetaloo, Bundaleer, Tod River, Warren and other country water districts systems, the Morgan-Whyalla water supply system, the Adelaide metropolitan sewerage system, the Murray River Weirs, water conservation, and the Metropolitan Flood Waters Scheme.

(ii) *South Australian Waterworks. (a) Services.* The table hereunder shows particulars of the area, capacity, etc. of combined metropolitan and country waterworks for the years 1938-39 and 1950-51 to 1954-55:—

## WATERWORKS, SOUTH AUSTRALIA : SERVICES.

Year.	Assessments.(a)		Area of Districts Supplied. (a)	Capacity of Reservoirs, Tanks, etc.	Length of Mains.	Number of Meters.
	Number.	Annual Value.				
		£	Acres.	Mill. gals.	Miles.

1954-55 ..	37,353,231	1,725,017	1,855,026	1,095,914	2,950,940	1,225,923

(iii) *Adelaide Waterworks.* At 30th June, 1954 the Adelaide waterworks supplied a district of 144,711 acres. The capacity of its five reservoirs was 14,469 million gallons and there were 1,886 miles of mains.

The piping of River Murray water to Adelaide was completed in November, 1954. This water supplements the Metropolitan and Warren system areas and serves country areas en route. Another major project—the construction of a large reservoir on the South Para River—is still under construction but is nearing completion. This reservoir will provide additional storage to serve the lower northern areas of the State and will make some additional provision for the metropolitan area. The capacity of this new reservoir will be about 10,000 million gallons.

Particulars of finances for the years 1938-39 and 1950-51 to 1954-55 are shown below :—

ADELAIDE WATERWORKS : FINANCES.

(£.)

Year.	Invested Capital at 30th June.	Revenue.	Expenditure.			Surplus (+) or Deficit (-)
			Working Expenses.	Interest and Debt Redemption.	Total.	
1938-39 ..	4,676,110	446,459	111,347	202,279	313,626	+ 132,833
1950-51 ..	7,814,093	680,275	400,600	230,821	631,421	+ 48,854

(iv) *Adelaide Metropolitan Sewerage.* The Adelaide metropolitan sewerage system, comprising the Adelaide, Glenelg and Port Adelaide areas, with drainage areas of 100 square miles in all, includes a sewage farm, and treatment works at Glenelg and Port Adelaide. The total quantity of sewage pumped by the various stations was 4,665 million gallons during 1954-55. Other particulars for 1938-39 and 1950-51 to 1954-55 are shown hereunder :—

ADELAIDE METROPOLITAN SEWERAGE : SUMMARY.

(v) *Country Water Supply.* Water district systems outside Adelaide at 30th June, 1955 comprised an area of 11,956,073 acres, and the capacity of the reservoirs was 9,545 million gallons. These figures exclude the Morgan-Whyalla supply system, which obtains its water from the River Murray. The storage tanks of this system had a capacity of 44 million gallons.

The Uley-Wanilla sub-artesian basin has been utilised to augment the Tod River District supplies. Pumping began in 1947. In 1954-55 nine bores were in operation and 379 million gallons were pumped from the basin to meet the needs of Port Lincoln. At 30th June, 1955, £5,014,866 had been invested in the Tod River District.

Construction work is proceeding on the scheme to reticulate water to Yorke Peninsula. The section of the new 20 inch to 26 inch steel main between Bundaleer Reservoir and Bute has been completed and is in service.

The following table gives financial information on country waterworks for 1938-39 and 1950-51 to 1954-55:—

**COUNTRY WATERWORKS, SOUTH AUSTRALIA : FINANCES.(a)**

(a) Excludes Morgan-Whyalla system.

(vi) *Morgan-Whyalla Water Supply Scheme.* This scheme, which involved the laying of 223 miles of main, was officially opened on 31st March, 1944, the capital invested to 30th June, 1955 being £2,577,469. Particulars of this scheme, where applicable, are included in the tables of the combined waterworks in (ii) above. During 1954-55 the water used from the system between Hanson and Whyalla amounted to 1,264 million gallons. Revenue for the year 1954-55 was £173,880, working expenses, etc. £155,195, interest charges, £82,200 and deficit, £63,515. Corresponding figures for 1953-54 were respectively, £203,889, £160,721, £81,674 and £38,506.

5. Western Australia.—(i) *General.* The water supply and sewerage systems of Western Australia are principally under the management of Government Departments, and are divided into the following categories:—(a) Metropolitan Water Supply, Sewerage and Drainage, covering Perth, Fremantle, Claremont, Guildford, Midland Junction and Armadale District; (b) Country Areas (previously Goldfields) Water Supply; (c) Water Supply of other towns, etc.; (d) Agricultural Water Supply, and (e) Artesian and sub-artesian waters.

(ii) *Metropolitan Water Supply, Sewerage and Drainage.* (a) *General.* The sources of the metropolitan water supply are the Canning Dam, Churchman's Brook, Wongong Brook, Victoria Reservoir, Armadale Pipe Head Dam and Well, and certain bores. The largest reservoir, the Canning Dam, has a capacity of 20,550 million gallons, about 5,000 million gallons more than that of the Mundaring Reservoir to which it is linked by a pipeline.

The sewage treatment works of Perth and suburbs consist of primary sedimentation with separate sludge digestion and discharge of all effluent direct to the ocean. Fremantle treatment works consist of septic tanks with ocean outfall for effluent. There are three treatment works, situated at West Subiaco, Swanbourne and Fremantle.

(b) *Water Supply.* The following table shows particulars of water supply services for 1938-39 and 1949-50 to 1953-54:—

**METROPOLITAN WATER SUPPLY, WESTERN AUSTRALIA : SERVICES.**

Year.	Number of Services.	Estimated Population Supplied.	Average Daily Consumption.	Total Consumption for Year.	Average Daily Consumption.		Length of Mains.	Number of Meters.
					Per Service.	Per Head of Estimated Population.		
			Mill. gals.	Mill. gals.	Gallons.	Gallons.	Miles.	
1938-39 ..	61,467	248,248	14.1	5,147	229	56.8	953	40,014
1949-50 ..	79,835	297,123	29.1	10,618	364	97.9	1,224	49,370
1950-51 ..	84,926	303,422	28.4	10,354	334	93.5	1,271	52,277
1951-52 ..	90,436	309,851	31.0	11,337	343	100.0	1,327	61,146
1952-53 ..	96,155	316,423	30.7	11,201	319	97.0	1,422	69,262
1953-54 ..	102,093	323,131	31.0	11,713	342	108.0	1,500	73,780

Water rating for 1953-54 was 1s. 9d. in the £1 on annual valuation.

(c) *Sewerage and Drainage.* Some particulars of the metropolitan sewerage and drainage services for 1938-39 and 1949-50 to 1953-54 are shown below :—

**METROPOLITAN SEWERAGE AND DRAINAGE, WESTERN AUSTRALIA : SERVICES.**

Year.	Houses Connected.	Estimated Population Served.	Sewage Pumped for the Year.(a)	Length of Sewers.	Length of Stormwater Drains.
			Mill. gals.	Miles.	Miles.
1938-39.. ..	36,652	162,457	1,030	444	31
1949-50.. ..	48,909	205,418	2,326	588	34
1950-51.. ..	50,480	212,016	3,809	605	34
1951-52.. ..	52,171	224,000	3,080	626	34
1952-53.. ..	54,467	229,700	3,333	648	34
1953-54.. ..	56,526	238,400	3,372	654	34

(a) Aggregate of quantities pumped by the various stations.

Sewerage rating for 1953-54 was 1s. 11d in the £1 on annual valuation, while stormwater drainage rating was 5d.

(d) *Finances.* The following table shows particulars of the finances of the Western Australian Metropolitan Water Supply, Sewerage and Drainage Department for the years 1938-39 and 1949-50 to 1953-54 :—

**METROPOLITAN WATER SUPPLY AND SEWERAGE AND DRAINAGE, WESTERN AUSTRALIA : FINANCES.**

(iii) *Country Areas Water Supply (Previously Goldfields Water Supply).* The source of supply for Kalgoorlie, Coolgardie and adjacent goldfields, as well as for the towns and districts on or near the pipeline, is the Mundaring Reservoir, whose capacity is 15,100 million gallons. This scheme is linked by pipeline with the Canning Dam.

Work is proceeding for a comprehensively reticulated water scheme at an estimated cost of approximately £4,300,000 to serve an area of about 4,500,000 acres of farm lands and some 23 agricultural towns, including the principal towns on the Great Southern Railway. The supply to the Eastern Goldfields will be increased to permit expansion of the gold-mining industry, the already increased capacity of the Mundaring Reservoir being part of this scheme. It is also planned to increase the storage capacity of the Willington Dam to 38,000 million gallons. Financing of the scheme is being shared by the Commonwealth and the State Governments on a £1 for £1 basis. Expenditure on this work to 30th June, 1954 totalled £2,283,122.

The following table shows details of the Country Areas Water Supply for 1938-39 and 1949-50 to 1953-54 :—

**COUNTRY AREAS WATER SUPPLY(a), WESTERN AUSTRALIA : SUMMARY.**

Year.	Number of Services.	Total Consumption.	Length of Water Mains.	Number of Meters.	Capital Cost.	Revenue.	Expenditure. (b)	Surplus (+) or Deficit (-)
		Mill. gals.	Miles.		£	£	£	£
1938-39 ..	13,670	1,735	1,720	10,872	5,527,890	331,457	298,531	+ 32,926
1949-50 ..	16,063	2,208	1,777	13,991	6,803,271	346,660	566,614	- 219,954

1953-54 ..	17,375	2,565	1,818	15,500	8,770,042	432,502	1,071,597	- 639,095

(a) Previously Goldfields Water Supply.

(b) Includes interest and debt redemption.

(iv) *Water Supply of Other Towns, etc.* (a) *Controlled by Public Works Department.* During 1953-54, water supplied to other towns and districts, excluding minor water supplies, amounted to 910 million gallons, including service to adjacent mines, 14 million gallons, and railways 73 million gallons. There were in all, 16,097 services connected.

(b) *Controlled by Commonwealth and State Government Railways.* Consumption for the year ended 30th June, 1954 was 299 million gallons. In addition, 371 million gallons were obtained from other sources, mainly the Country Areas Water Supply and the Metropolitan Water Supply.

(c) *Water Boards not Controlled by Government.* During 1953-54, approximately 424 million gallons of water were supplied to an estimated population of 18,399.

(v) *Agricultural Water Supply.* During the fifty years from 1st July, 1904 to 30th June, 1954, 584 tanks were built, 1,159 wells sunk, and 5,611 bores (including artesian) put down. Of the bores put down, 1,588 yield fresh or stock water.

(vi) *Artesian and Sub-artesian Waters.* Up to 30th June, 1954 the total number of bores put down in search of artesian or sub-artesian water (inclusive of operations by Defence Services) was 341 ranging in depth from 21 to 4,006 feet. Water (fresh or stock) was struck in 290 bores, 174 of which were artesian and 116 sub-artesian.

6. *Tasmania.*—(i) *Waterworks.* At the end of 1952-53 (1951-52 in parentheses) there were 38 (37) municipal waterworks in Tasmania. The capacity of the reservoirs was 887 (881) million gallons, the estimated population served was 210,291 (201,281), the number of properties assessed was 66,857 (64,088) and the length of aqueducts, mains and reticulation was 1,199 (1,122) miles. Costs of construction amounted to £3,038,190 (£2,538,256). The largest of these undertakings is Hobart, with a reservoir capacity at the end of 1952-53 of 578 million gallons, and 161 miles of reticulation and 92 miles of aqueduct and main.

(ii) *Sewerage.* In Tasmania sewerage also is the concern of local authorities.

## § 6. Harbour Boards and Trusts.

NOTE.—The number and net tonnage of all vessels which entered the major ports in each State during the years 1953-54 and 1954-55 are shown in Chapter VII.—Transport and Communication, A. §3. Shipping at Principal Ports. Particulars of overseas and interstate cargo discharged and shipped during 1954-55 are shown in A. § 6 of the same chapter.

1. *New South Wales.*—(i) *Maritime Services Board of New South Wales.* (a) *General.* The Maritime Services Board of New South Wales is a corporate body of five Commissioners, three of whom are full-time members and two, representing shipping and

other interests, part-time members. The Board was brought into existence on 1st February, 1936 by the Maritime Services Act 1935 in order to co-ordinate the port and navigation services of the State, which had previously been administered by the Sydney Harbour Trust and by the State Department of Navigation.

The Board exercises general control over intra-state shipping, including the survey and certification of vessels, the licensing of harbour craft and the examination and issue of certificates to officers; is responsible for the provision of pilotage services, lights, beacons, buoys and other port facilities; imposes and collects rates and charges on goods and vessels; and is vested with the general control and management of the navigable waters and ports within the State.

At the Port of Sydney the Board is also responsible for the provision of adequate wharfage and channels, and carries out all construction, maintenance and dredging work. At other ports of New South Wales such work is undertaken by the Department of Public Works.

(b) *Port of Sydney.* The entrance to Sydney Harbour, the principal port of New South Wales, is nearly a mile wide, and the depth of its navigable channel is not less than 80 feet. Between the entrance, known as "The Heads", and the Harbour proper, a distance of 4 miles, there are two separate channels, each 700 feet wide, the Western Channel not less than 42 feet deep (low water ordinary spring tides) and the Eastern Channel 40 feet deep. The foreshores, which have been reduced by reclamations, are 152 miles in length and the total area of the port is 13,600 acres, or 21 square miles, of which about one-half has a depth of 30 feet or more at low water ordinary spring tide. The mean range of tides is 3 feet 6 inches.

The wharves are situated in close proximity to the business centre of the city, about four or five miles from the Heads. At present there are 6 dolphin berths each 550 feet long, and 122 effective commercial cargo berths with a total length of 50,432 feet controlled by the Board. Accommodation for harbour craft amounts to 4,835 feet while the length of other berths including oil and private wharves totals 19,532 feet. Depth of water at wharves is up to 40 feet. Special facilities for the storage and handling of staple products such as wheat, wool, etc., are provided and modern plant has been installed for replenishing ships' bunkers with oil or coal.

Docking facilities are available for the largest vessel afloat. The Captain Cook Graving Dock, opened in March, 1945, ranks amongst the largest graving docks in the world being 1,133 feet by 147 feet 7½ inches with a depth of 45 feet 2 inches over the sill at high water. There are also several smaller dry docks and floating docks in the port.

The following table shows particulars of the finances of the Board in respect of the Port of Sydney for 1938-39 and 1949-50 to 1953-54 :—

#### MARITIME SERVICES BOARD : FINANCES OF THE PORT OF SYDNEY.

1953-54..	12,799,104	1,482,492	333,320	2,471,540	1,517,811	550,654	2,068,465	+403,075

(a) Excludes capital expenditure (1938-39, £28,576; 1949-50, £287,211; 1950-51, £384,911; 1951-52, £495,443; 1952-53, £465,764; 1953-54, £468,010) and expenditure on renewals and replacements (1949-50, £159,935; 1950-51, £196,102; 1951-52, £291,454; 1952-53, £299,286; 1953-54, £317,493.)

(c) *Port of Newcastle.* The Maritime Services Board of New South Wales is the port authority but other government bodies are responsible for certain functions and activities of a maritime character at Newcastle. These include—

- (i) The Department of Public Works, which is the constructing, dredging and maintenance authority at Newcastle as well as at other New South Wales ports except Sydney ;
- (ii) The Department of Railways, which is responsible for the control of wharfage and shipping arrangements in connexion with the coal industry and the provision and maintenance of appliances necessary for the transport and shipment of coal.

An Advisory Committee consisting of eight members, appointed by the Governor, assists the Board in matters associated with the operation of the port. In regard to volume of trade, Newcastle ranks second in importance in New South Wales and third in Australia. It is primarily a coal-loading port, and the proximity to the coal fields has led to the establishment of important industries, including iron and steel works, in the district. Facilities are available for the shipment of wool, wheat and frozen meat, and a wharf is available for timber.

The area used by shipping is about 570 acres, excluding the entrance to the harbour and the inner basin, which together cover an area of 162 acres. The width of the harbour at the entrance is 1,200 feet, and the navigable channel, with a depth of 25 feet 6 inches at low water, is 350 feet wide. Wharfage accommodation amounts to 16,100 feet, the Maritime Services Board controlling 6,500 feet and the Railways Department 7,000 feet while 2,600 feet is privately owned. There are also a number of dolphin berths available for tie-up purposes. A floating dock of 15,000 tons capacity is available at the port.

(d) *Port Kembla.* As from 3rd May, 1948, the Maritime Services Board assumed the administration and navigational control of Port Kembla, which had previously been administered by the New South Wales Department of Public Works. The Department continues however to be the constructing authority in respect of works, dredging and maintenance. In respect of volume of trade, Port Kembla ranks third in the ports of New South Wales, and about fifth in those of Australia. It has an area of approximately 330 acres, with depths ranging from 20 to 50 feet (low water ordinary spring tide), and wharfage accommodation totalling 4,800 feet has been provided for large ocean-going vessels. No cargo sheds are available as the nature of trade at the port does not call for the provision of sheltered storage accommodation at the berths. It is the port of the southern coalfields and for the expanding industrial area in and about Wollongong.

(e) *Other Ports.* In addition to the ports of Sydney, Newcastle and Port Kembla, the Board controls 29 outports along the coastline of 609 miles. The shipping trade of these outports is relatively small.

(ii) *Port Charges.* The port charges payable in respect of shipping and ships' cargoes in New South Wales are imposed by the Commonwealth Government in terms of the Lighthouses Act and the Federal Navigation Act, and by the State authorities under the Navigation Act of New South Wales, the Harbour and Tonnage Rates Act, and the Sydney Harbour Trust Act. Since 1st February, 1936, the State enactments have been administered by the Maritime Services Board. The gross collections by the State authorities amounted to £3,614,233 in 1953-54. These figures include the Port of Sydney revenue (see table above) and State navigation service collections (£1,142,693 in 1953-54). Commonwealth Government revenue from light dues and navigation receipts, for the whole of Australia, amounted to £224,654 in 1953-54.

2. *Victoria.*—(i) *Melbourne Harbor Trust.* (a) *General.* Information regarding the origin and constitution of this Trust, which controls the Port of Melbourne, appears in Official Year Book No. 12, p. 970 *et seq.* The composition of the Board of the Melbourne Harbor Trust Commissioners was increased to five during 1954 by the appointment of a further part-time Commissioner to represent waterside workers' interests. At 31st

December, 1954, the sheds available for wharfage accommodation had a length of 21,244 feet, covering an area of 1,506,083 square feet. The area of water in the bay and River Yarra under the control of the Trust is approximately 5,327 acres and the total length of wharves, piers and jetties in the port is 62,703 feet, giving an area of over 58 acres of wharfage, and 54,795 feet of effective berthing space. During 1954, work was continued on the new berths at Appleton Dock (ultimately to have eighteen berths), Victoria Docks, South Wharf and Williamstown. The depth of water (low water ordinary spring tide) from the main channels to the principal wharves is about 31 to 34 feet, the maximum being about 40 feet.

(b) *Finances.* The following table shows particulars of the financial operations of the Trust during the years 1939 and 1950 to 1954:—

#### MELBOURNE HARBOR TRUST : FINANCES.

(£.)

Year.	Gross Loan Indebtedness at 31st December.	Revenue.		Expenditure.				Surplus(+) or Deficit(—)
		Wharfage and Tonnage Rates.	Total.	Administration and Maintenance.	Interest, Debt Redemption, Exchange, etc.	Depreciation, Renewals and Insurance Account.	Total. (a)	
1939 ..	4,018,527	689,100	843,899	282,533	270,650	129,160	837,577	+ 6,322
1950 ..	3,972,029	1,293,923	1,771,074	675,830	187,582	162,883	1,301,687	+ 469,387
1951 ..	5,883,857	1,493,423	2,129,432	1,036,842	235,881	175,263	1,768,105	+ 361,327
1952 ..	7,914,146	1,256,581	1,941,252	1,204,863	292,485	179,047	1,947,085	— 5,833
1953 ..	9,581,933	1,423,345	2,052,272	1,230,195	381,914	98,182	2,013,554	+ 38,718
1954 ..	9,641,361	1,800,811	2,593,347	1,232,574	418,818	479,393	2,509,947	+ 83,400

(a) Includes statutory payments to Consolidated Revenue and Geelong Harbor Trust:—1939 £155,234; 1950, £275,383; 1951, £320,119; 1952, £270,690; 1953, £303,263. 1954, £379,162. Excludes capital expenditure:—1939 £128,567; 1950, £1,589,392; 1951, £2,058,921; 1952, £2,246,097; 1953 £1 255,613; 1954, £1,255,625.

(ii) *Geelong Harbor Trust.* The Geelong Harbor Trust was constituted in 1905, and reconstituted in 1934 under the provisions of the Melbourne and Geelong Harbor Trusts Act 1934. The Trust is under the control of three Commissioners appointed by the Governor-in-Council. The port dredging programme was nearing completion at the end of 1954 and will provide a minimum depth of water throughout approaches and at all berths of 32 feet (mean low water spring tides).

Revenue for the year 1954 was £544,401, and revenue expenditure was £370,440. The gross value of the Trust's fixed assets increased by £727,863 in 1954 and loans outstanding at the end of the year amounted to £2,695,862.

(iii) *Other Ports.* Apart from Melbourne and Geelong, Portland is the only Victorian port of more than minor importance.

3. *Queensland.*—(i) *General.* The ports of Queensland, except Brisbane and certain minor ports, are administered by Harbour Boards with members representing the towns and districts served by the ports. Brisbane and the minor ports are controlled by the State Treasury through the Department of Harbours and Marine, which supervises the engineering activities of the other ports.

(ii) *Brisbane.* Brisbane accommodates comfortably, in its dredged and improved river, the largest vessels in the Australian trade. The main centres for shipping, although further downstream than formerly, because of the increasing size of vessels, are still within easy access of the city. The maximum depths (low water ordinary spring tide) of the shipping channel decrease from 32 feet in the North-West channel to 20 feet in

the Bulimba Reach to Victoria Bridge section. Depths at wharves vary between 23 and 29 feet. Adequate dry-docking facilities are available. The finances of Brisbane Harbour for the years 1938-39 and 1948-49 to 1952-53 are shown below :—

## BRISBANE HARBOUR : FINANCES.

(£'000.)

Year.	Loan Indebtedness at 30th June.	Receipts.		Payments.	
		Harbour Dues.	Total.	Working Expenses.	Total (including Interest and Redemption)
1938-39 .. ..	1,179	165	173	36	112
1948-49 .. ..	1,256	190	209	162	250
1949-50 .. ..	1,325	219	299	168	260
1950-51 .. ..	1,572	221	253	237	329
1951-52 .. ..	1,862	276	326	348	463
1952-53 .. ..	2,168	318	393	426	556

In addition to Brisbane Harbour, the Department of Harbours and Marine also controls the Brisbane Dry Dock, the Cairncross Dock, the Brisbane River, and ten smaller harbours not administered by harbour boards.

(iii) *Harbour Boards.* Harbour boards control the ports of Bowen, Bundaberg, Cairns, Gladstone, Mackay, Rockhampton and Townsville. After 1st January 1953, the harbour boards adopted the financial year ended 30th June for accounting purposes instead of the calendar year as previously. Finances for each port for the eighteen months ended 30th June, 1954 are shown below, together with a summary for the years 1939 and 1949 to 1952.

## HARBOUR BOARDS, QUEENSLAND : FINANCES.

(£.)

Harbour Board.	Loan Indebted- ness at 30th June (a)	Revenue.		Expenditure (excluding Loan).		Surplus (+) or Deficit (-)
		Wharf- age and Harbour Dues.	Total.	Working Expenses.	Total (including Int' rest and Redemp- tion).	
Bowen .. ..	352,933	59,178	69,955	40,308	70,508	— 553
Bundaberg .. ..	42,143	7,778	14,051	9,921	14,482	— 431
Cairns .. ..	201,368	256,899	416,520	303,946	372,454	+ 44,066
Gladstone .. ..	353,355	39,984	195,398	69,021	191,875	+ 3,523
Mackay .. ..	783,017	225,092	247,103	42,555	96,557	+ 150,546
Rockhampton .. ..	563,393	78,252	99,729	73,186	102,226	— 2,497
Townsville .. ..	417,470	288,281	371,138	250,409	310,834	+ 51,304
Total, 1954(b) .. ..	2,713,679	955,464	1,413,894	789,346	1,167,936	+ 245,958
„ 1952 .. ..	2,059,080	455,677	713,312	440,784	696,843	+ 16,469
„ 1951 .. ..	1,786,774	402,903	599,505	370,040	534,095	+ 65,410
„ 1950 .. ..	1,611,241	378,949	510,719	284,896	408,561	+ 102,158
„ 1949 .. ..	1,523,644	347,843	464,450	307,716	431,359	+ 33,091
„ 1939 .. ..	1,548,144	249,510	410,439	139,752	343,083	+ 58,356

(a) Years 1939 and 1949 to 1952, 31st December.

(b) Eighteen months ended 30th June, 1954.

4. South Australia.—*The South Australian Harbors Board.* All South Australian harbours are controlled by the South Australian Harbors Board, which consists of three Commissioners appointed by the Governor for a period of five years and eligible

for re-appointment. The Board is responsible to the Minister of Marine for the discharge of its duties and functions. The most important ports are the 5 deep sea ports of Adelaide, Pirie, Wallaroo, Lincoln and Thevenard. At several ports, the wharves or jetties are privately controlled, the principal of these being Whyalla (controlled by the Broken Hill Pty. Co. Ltd. under a Private Act of Parliament) and Augusta (controlled by the Commonwealth Railways) whilst at Ardrossan the Broken Hill Pty. Co. Ltd. has installed a bulk loading plant for handling dolomite and grain. Maximum depths of water (low water ordinary spring tide) at the wharves of the main ports range from 20 to 24 feet at Pirie to 35 feet at Adelaide (Outer Harbour). The following table shows the finances of the Board for 1938-39 and 1949-50 to 1953-54 :—

### SOUTH AUSTRALIAN HARBORS BOARD : FINANCES.

(£.)

Year.	Capital at 30th June. (a)	Revenue.	Expenditure from Revenue.				Surplus(+) or Deficit (-).
			Working Expenses.	Interest.	Debt Redemption.	Total.	
1938-39 ..	8,026,441	664,915	205,848	326,719	50,000	582,567	+ 82,348
1949-50 ..	8,545,084	1,050,742	583,965	281,691	33,327	898,983	+ 151,759
1950-51 ..	8,896,281	1,141,174	784,191	281,657	..	1,065,848	+ 75,326
1951-52 ..	9,581,786	1,336,504	1,039,801	280,872	..	1,320,673	+ 15,831
1952-53 ..	10,017,582	1,240,679	1,083,322	286,456	..	1,369,778	- 120,099
1953-54 ..	10,782,702	1,382,276	1,280,709	312,333	..	1,593,042	- 210,766

(a) State Treasurer's Funds and Reserve employed.

5. *Western Australia.*—(i) *Fremantle Harbour Trust.* Fremantle Harbour is controlled by a board of five Commissioners appointed by the Governor-in-Council. Maximum depth of water (low water ordinary spring tide) at the entrance to the harbour is 30 feet, and at the wharves 33 feet. The length of wharf berth accommodation is 10,495 feet.

Gross earnings for the year 1953-54 amounted to £2,029,053, working expenses to £1,579,741, interest £159,642, debt redemption £45,174, renewals fund £2,000, and payment of surplus cash to Consolidated Revenue £51,785. There was also a special loan repayment from revenue amounting to £236,460. The total amount debited to loan capital account at 30th June, 1954 was £4,128,140.

(ii) *Bunbury Harbour Board.* The Bunbury Harbour Board consists of five members appointed by the Government. The depth of water at the entrance to the harbour and at the wharf is 27 feet (low water ordinary spring tide). Berthage accommodation is 3,700 feet. Gross earnings in 1953-54 were £34,147, working expenses £73,804, and interest £53,314. The total amount debited to loan capital account at 30th June, 1954 was £1,371,970.

(iii) *Other Ports.* Only the ports of Fremantle, Bunbury and Albany in Western Australia are under the control of trusts, the remainder are Government operated. Of these, Carnarvon, Geraldton and Onslow have the largest amount of shipping movement.

6. *Tasmania.*—There are eight marine boards and two harbour trusts in Tasmania. The marine boards control the ports of Hobart, Launceston, Stanley (Circular Head), Burnie, Wynyard (Table Cape), Devonport, Strahan, Currie (King Island) and Whitemark (Flinders Island) and the harbour trusts those of Smithton and Leven. Aggregate receipts of revenue accounts of all these authorities during the year 1953-54 were £833,589, and expenditures £743,270 including loan charges £115,602. The total receipts of the Hobart Marine Board during 1953-54 were £360,741, loan charges amounted to £32,913 and total expenditure to £353,600. Launceston Marine Board receipts during 1953-54 amounted to £225,225, loan charges to £15,386 and total expenditure to £177,969. Loan indebtedness of all marine boards and trusts at 30th June, 1954 was £2,213,951, of which £782,782 was in respect of Hobart and £184,722 in respect of Launceston.

Hobart, Launceston, Burnie and Devonport are the principal ports of Tasmania. In addition to their interstate and intra-state traffic, there is also considerable overseas shipping. Depths of water at wharves vary, in general, between 16 and 34 feet (low water ordinary spring tide), but at Hobart there is a depth of water of from 30 to 52 feet.

## § 7. Fire Brigades.

1. *New South Wales.*—(i) *General.* A Board of Fire Commissioners, consisting of eight members, operates under the Fire Brigades Act 1909–1949, and 153 fire districts had been constituted at the end of 1954. Up to the end of 1949, the cost of maintenance of fire brigades was borne in proportions of one quarter, one quarter, and one half respectively by the Government, the municipalities, and the insurance companies concerned, the expenditure so regulated that the proportion payable by the councils in a fire district should not, except in special circumstances, exceed the amount obtainable from ½d. in the £1 rate on the unimproved capital value of ratable land in the fire district. In June, 1949 legislation was introduced (i) increasing the limit of the Board's borrowing power from £250,000 to £500,000, (ii) providing for the varying of the maximum rate that may be levied by councils, and (iii) altering the basis of contributions so that from 1st January, 1950, local councils and the Government will each pay one-eighth and the insurance companies three-quarters.

Other legislation, introduced in September, 1949 to improve and modernize the law dealing with the prevention of bush fires and to build up the organization of the bush fire-fighting services, provided for the establishment of Fire Regions and a Bush Fire Fighting Fund to be financed from contributions by the Government, councils and insurance companies in the proportion of one-quarter, one-quarter and one-half, respectively. The contribution of any council shall not exceed one-twentieth of a penny in the £1 on the unimproved capital value of ratable land in the area of the council not being land within a fire district constituted under the Fire Brigades Act 1909–1949.

(ii) *Board of Fire Commissioners of New South Wales.* At 31st December, 1954 the authorised strength of the Fire Brigade throughout the fire districts of New South Wales was 294 officers and 823 permanent and 2,239 volunteer firemen. Corresponding figures for the Sydney Fire District were 242, 774 and 349. The revenue for the year 1954 was £1,873,407, made up as follows:—From the Government, £231,254; municipalities and shires, £231,254; fire insurance companies and firms, £1,387,521; and from other sources, £23,378. The disbursements for the year were £1,788,749.

2. *Victoria.*—(i) *General.* The Fire Brigades Act of 1928 provided for a Metropolitan Fire Brigades Board and a Country Fire Brigades Board each consisting of nine members. In December, 1944 the latter Board was superseded by the Country Fire Authority under an Act of that title, and the number of members was increased to ten.

(ii) *Metropolitan Fire Brigades Board.* Since 1st October, 1952, the Metropolitan Fire Brigades Board has received contributions from the municipalities and the insurance companies in the proportion of one-third and two-thirds respectively. Prior to 1st October, 1952, the Board received contributions in equal proportions from the Treasury, the municipalities and the insurance companies. On 30th June, 1954 the Board had under its control 43 stations, 670 permanent staff, 61 special service and clerical, etc. staff, and 15 part-time firemen. The total receipts for 1953–54 were £1,076,175 comprising contributions, £877,311, receipts for services, £102,534, and interest and sundries, £96,330. The expenditure was £1,015,775.

(iii) *Country Fire Authority.* This authority, constituted in 1944, is responsible for the prevention and suppression of fires in the "country area of Victoria", which embraces the whole of the State outside the metropolitan fire district, excluding State forests and certain crown lands. The country area has been divided into 24 fire control regions, three of which (Ballarat, Bendigo and Geelong) are wholly urban and the remainder mixed urban and rural. The Country Fire Authority has received contributions in the proportion of two-thirds from insurance companies and one-third from the Treasury as from 1st January, 1954. Prior to that date the Treasury contributed two-thirds while the insurance companies contributed one-third. At 30th June, 1954 there were 150 insurance companies included in the operation of the Act, and 198 urban and 1,007 rural fire brigades. The effective registered strength of the brigades was 91,875 members.

The receipts for the year 1953–54 amounted to £328,173. Total expenditure other than loan amounted to £323,506.

3. *Queensland.*—(i) *General.* The Acts of 1920–1931 made provision for the retention of existing fire districts, and for the constitution of new districts. For each district there must be a Fire Brigades Board consisting of seven members, and the cost of

maintenance of each brigade is proportioned as follows :—The Treasury two-sevenths, insurance companies three-sevenths, and local authorities two-sevenths. All volunteer fire brigades in a district must be registered.

(ii) *Fire Brigades Boards.* At 30th June, 1953, the latest year for which figures are available, there were 68 Fire Brigades Boards. The total number of stations was 116, and full-time staff numbered 467, including 15 administrative, 85 officers and 367 firemen. Workshop staff numbered 17. Part-time staff numbered 596, including 69 administrative, 96 officers and 431 firemen. Volunteers numbered 336. The total revenue for the year 1952–53 was £563,740 received mainly from the following sources—Government £151,478, local authorities £151,081, insurance companies £227,220 and loans (Government and other) £30,011. The total expenditure for the year was £556,941 the chief items being salaries and wages £387,729 and interest and redemption of loans £28,739.

4. *South Australia.*—The Fire Brigades Act 1936–1944 provides for a board of five members, and the expenses and maintenance of brigades are defrayed in the proportion of two-ninths by the Treasury (subject to certain limits when the contribution exceeds £10,000), five-ninths by insurance companies, and two-ninths by the municipalities concerned. At 30th June, 1954 there were altogether 35 fire brigade stations, of which 12 were metropolitan and 23 country.

The authorized strength of the permanent staff was 376, including 271 officers and men and 85 country auxiliary firemen. The total revenue for the year 1953–54 was £305,307, made up as follows :—insurance companies £183,899, Treasury £47,849, and municipalities £73,559. The Treasury contribution includes an additional grant of £35,853.

5. *Western Australia.*—In 1942 certain municipal and road board districts were constituted fire districts under the control of the Western Australian Fire Brigades Board. There were 31 at 30th September, 1954. The contribution to the Board is made in the proportion of two-ninths from the Government, two-ninths from local government authorities, and five-ninths from insurance companies. The number of local government authorities and insurance companies who contributed numbered 55 and 127 respectively. The brigades throughout the State controlled by the Western Australian Fire Brigades Board at 30th September, 1954 numbered 48, with a staff of 1,443, including 218 permanent officers and firemen and 1,197 volunteer brigade officers and firemen. The revenue for the year ended 30th September, 1954, was £275,419 and the expenditure £273,861.

Under the Bush Fires Act a Rural Fires Prevention Advisory Committee, consisting of ten members, four of whom are nominated by the Road Board Association, was set up to advise the Minister for Lands on bush fire control. The Act also provides for the registration of bush fire control officers, who numbered 1,147 at 30th June, 1954 and the establishment of bush fire brigades, the number of which was 549 at 30th June, 1954.

6. *Tasmania.*—The Fire Brigades Act 1945 provided for the creation of the Fire Brigades Commission of Tasmania to co-ordinate the activities of existing fire brigades boards, while leaving the responsibility for individual control and management with the boards. The Commission consists of five members nominated or elected by the fire brigades boards and one member nominated by the Minister. Contributions towards the cost of operations are on the basis of one-third each from the Treasury the municipalities and the insurance companies concerned. The cost for the year 1953–54 amounted to £98,829. There were at 30th June, 1954, 31 stations amongst the 23 brigades, and their aggregate staffs numbered 432, including 79 permanent officers and 337 part-time firemen, including officers.

## CHAPTER XIX.

### PRIVATE FINANCE.

#### A. CURRENCY.

##### § 1. General.

The Australian monetary system is based on the British system, of which the unit is the pound (£) divided into 20 shillings (s.) each of 12 pence (d.). When the Australian currency was introduced in 1909 the Australian pound was specified as equivalent to 123.27447 grains of gold  $\frac{11}{18}$ ths fine or 113.002 grains of fine gold and, until the depression in 1930, was identical with the pound sterling. There was a gradual depreciation of the Australian pound in terms of sterling from the beginning of 1930 until 3rd December, 1931, when it was stabilized at the rate of £125 Australian = £100 sterling. This relationship has been maintained until the present time. Following the depreciation, no action was taken to define the value of the Australian pound in terms of gold until 5th August, 1947, when the Australian Government advised the International Monetary Fund, in terms of the membership agreement, that the par value of the Australian pound was 2.86507 grammes (44.2148 grains) of fine gold. From 19th September, 1949 this was reduced to 1.99062 grammes (30.720 grains) of fine gold.

When the Commonwealth was established in 1901, the currency in Australia consisted of United Kingdom gold, silver and bronze coins, notes issued by the banks, and Queensland Treasury notes. Queensland Treasury notes were in circulation in Queensland only, having superseded bank notes in that State after the 1893 crisis. Under the Commonwealth Constitution the control of currency, coinage and legal tender and the issue of paper money were vested in the Commonwealth. The Commonwealth assumed these powers by enacting the Coinage Act 1909 and the Australian Notes Act 1910.

Imperial gold coins of the specified weight and fineness and Australian notes are legal tender in Australia for any amount. Australian silver coins are legal tender for any amount not exceeding forty shillings and Australian bronze coins are legal tender for any amount not exceeding one shilling.

##### § 2. Coinage.

1. *Coins in Circulation.*—Brief historical notes relating to the Australian Coinage are given in Official Year Book No. 37, pages 557 and 558. For weight, metal, composition, etc., of Australian coins in circulation *see* Official Year Book No. 39, page 697.

The silver coins issued prior to July, 1947 have a millesimal fineness of 925 (thirty-seven fortieths silver and three fortieths alloy) and those issued since 1st July, 1947 (dated 1946 and later) have a millesimal fineness of 500 (one-half silver and one-half alloy).

From 1910 to 1916 Australian coins were minted in England by the Royal Mint, London, and the Mint, Birmingham Ltd., and in 1916 and 1917 by the Indian Mints. The minting of Australian coins was undertaken by the Australian Mints in 1916 and coins have been minted at the Melbourne branch of the Royal Mint from 1916 to the present time, at the Sydney branch from 1919 until that Mint closed in 1926 and at the Perth branch in 1922 and since 1940.

During the 1939–45 War the two Australian mints were unable to meet the demand for Australian coins and some coins were minted in the United States of America and India. In 1951–52 and 1952–53 some coins were minted at the Royal Mint, London, to meet the heavy demand for coins. Details of Australian coins obtained from each mint to 30th June, 1955, are as follows:—Melbourne, £37,917,000; Perth, £1,226,000; Sydney, £488,000; United Kingdom Mints, £3,016,000; United States Mints, £6,000,000; Indian Mints, £169,000; Total, £48,816,000.

2. **Issues of Australian Coins.**—The net issues of Australian silver and bronze coin; from 1910 to 30th June, 1955 were:—Crown (5s.), £276,000; Florin (2s.), £17,998,000; Shilling (1s.), £6,382,000; Sixpence (6d.), £4,557,000; Threepence (3d.), £5,036,000; Total silver coins, £34,249,000; Penny (1d.), £2,089,000; Half-penny ( $\frac{1}{2}$ d.), £620,000; Total bronze coins, £2,709,000. No allowance has been made for £52,000 worth of damaged silver coin, for which denominations are not available, withdrawn since 1910.

3. **Profits on Coinage of Silver and Bronze.**—Australian silver and bronze coins are token coins and, as the face value of the coins is greater than the value of the bullion they contain, a profit is made from their issue. This profit forms part of the Commonwealth Consolidated Revenue. In the following table details are given of the value of coins issued, the cost of bullion, the cost of minting and sundry expenses connected with the issue, and the profits made on the issue of coins during the years 1938–39 and 1950–51 to 1954–55.

(a) Minus sign (—) denotes a loss.

4. **Australian Mints.**—(i) *General.* Soon after the discovery of gold in Australia a branch of the Royal Mint was established in Sydney. The formal opening took place on 14th May, 1855. The Melbourne branch was opened on 12th June, 1872, and the Perth Branch on 20th June, 1899. The States of New South Wales, Victoria and Western Australia provided an annual endowment in return for which the mint receipts were paid to the respective State Treasuries. Owing to losses incurred in its operations, the Sydney branch was closed at the end of 1926.

Since their establishment, the Australian branches of the Royal Mint have been primarily concerned with the refining of gold, minting of Imperial gold coins and the production of bars and ingots of gold bullion for export. The minting of Imperial gold coins was discontinued in September, 1931. In 1916 the Melbourne branch took over the minting of Australian silver and bronze coins from the Royal Mint, London. Australian coins were also minted at the Sydney Mint from 1919 to 1926 and at the Perth Mint in 1922 and from 1940 to the present time. The Melbourne branch has also minted token coins for the Territory of New Guinea and for New Zealand.

(ii) *Gold Receipts and Issues.* (a) *Receipts.* The receipts of gold at Australian mints during 1954 amounted to 1,013,000 fine ounces (Melbourne, 168,000 fine ounces; Perth, 845,000 fine ounces) making the aggregate received to the end of 1954, 124,888,000 fine ounces, (Melbourne, 43,101,000 fine ounces, Perth, 44,880,000 fine ounces, and Sydney, until 1926 when it was closed, 36,907,000 fine ounces).

(b) *Issues.* The Australian mints issue gold bullion for the use of local manufacturers (jewellers, dentists, etc.), and for export. Since September, 1931, when the United Kingdom departed from the gold standard, the minting and issue of gold coins by Australian mints has ceased. Australian exports of gold are mainly in the form of 400-oz. ingots, but in earlier years a considerable amount of gold was shipped to India in 10-oz. bars. Since early in the 1939-45 War, all gold has been acquired by the Commonwealth Bank and the export and use of gold has been subject to regulation by the Commonwealth Government. From December, 1951 export of a proportion of newly-mined gold for sale on premium markets overseas was permitted (see para. 5 below). The issues from Australian mints during 1954 (valued at £3 17s. 10½d. per standard ounce) amounted to £4,300,000 (Melbourne, £709,000, Perth, £3,591,000) making the aggregate issues of bullion and coin to the end of 1954, £530,549,000 (Melbourne, £183,079,000, Perth, £190,679,000, and Sydney, £156,791,000).

5. *Price of Gold.*—The following table shows the average prices of gold and the average value of the sovereign in London and Australia for the years 1938-39 and 1950-51 to 1954-55. The average price of gold in Australia is based on the Commonwealth Bank's buying price for gold lodged with the mints.

PRICE OF GOLD : LONDON AND AUSTRALIA.

				Average value.		
	£stg. s. d.	£stg. s. d.	£A. s. d.	£A. s. d.		%
1938-39 ..	7 6 9	1 14 7	9 2 9	2 3 0		115.0
1950-51 ..	12 8 0	2 18 5	15 9 10	3 12 0		260.0
1951-52 ..	12 8 0	2 18 5	15 9 10	3 12 0		260.0
1952-53 ..	12 8 0	2 18 5	15 9 10	3 12 0		260.0
1953-54 ..	12 8 3	2 18 5	15 10 4	3 12 1		260.4
1954-55 ..	12 10 0	2 18 10	15 12 6	3 12 6		267.8

In December, 1951, arrangements were made whereby producers could sell a proportion of newly-mined gold for industrial purposes on oversea premium markets. Under the arrangements, gold is acquired by the Commonwealth Bank in the usual manner and sold, at the Bank's buying price, to an association representing gold producers participating in the scheme. The association pays the Bank's handling charges and the costs of preparation of the gold and makes arrangements for export and sale. The gold can only be sold against payment in United States dollars. Profits earned by the

association after meeting administrative expenses are distributed to members in proportion to the quantity of gold delivered to the Commonwealth Bank. Until August, 1952, when permission was given for the export of fine gold, gold exported under this arrangement was not to exceed a fineness of 22 carats ( $\frac{11}{12}$ ths.).

The average prices in Australian currency (f.o.b.) obtained for gold exported under this scheme for each month during 1954-55 were :—July, £15 10s. 1d; August, no sales; September, no sales; October, £15 13s. 1d.; November, £15 14s. 2d.; December, £15 12s. 11d.; January, £15 13s. 2d.; February, £15 13s. 5d.; March, £15 12s. 11d.; April, £15 12s. 10d.; May, £15 12s. 9d.; June, £15 12s. 11d.

From 1st May, 1954 the Commonwealth Bank increased its buying price for gold from £15 9s. 10d. to £15 12s. 6d. per fine ounce. The previous gold price was a realization price based upon the price for which the Commonwealth Bank could sell gold abroad in official markets, less costs of movement. Changes affecting gold abroad, including the reopening of the London gold market on 22nd March, 1954, made it necessary to review the Australian price of gold. The new price of £15 12s. 6d. per fine ounce reflects the "parity" value of Australian currency as established by the International Monetary Agreements Act, 1947.

### § 3. Notes.

1. **General.**—Brief historical notes relating to the circulation and issue of notes in Australia are given in Official Year Book No. 37, pages 561 and 562. The issue of notes intended for circulation as money other than by the Commonwealth Bank is prohibited.

2. **The Australian Note Issue.**—(i) *General.* Notes in circulation in Australia are issued by the Commonwealth Bank through the Note Issue Department. The Bank is authorized to issue Australian notes in denominations of 5s., 10s., £1, £5, £10 and any multiple of £10. The Commonwealth Bank is not required to hold a specific reserve in gold against the note issue, but the assets of the Note Issue Department must be held or invested in gold, on deposit with any bank or in securities of the Government of the United Kingdom, the Commonwealth or a State. All profits of the Note Issue Department, with the exception of an amount not exceeding £500,000 each year which may be paid to the other departments or divisions of the Commonwealth Bank, are paid to the Commonwealth Consolidated Revenue Fund.

Australian notes are legal tender to any amount within Australia and have been issued in denominations of 10s., £1, £5, £10, £20, £50, £100 and £1,000.

(ii) *Australian Notes in Circulation.* Particulars of the average values of notes in circulation for the years 1938-39 and 1950-51 to 1954-55 are given in the following table :—

#### AUSTRALIAN NOTE ISSUE. (£'000.)

Total Liabilities ..	351,786	371,039	Total Assets ..	351,786	371,039

(a) Notes of a denomination not exceeding one pound which have been on issue for more than twenty years, and notes of a denomination exceeding one pound which have been on issue for more than 40 years are not included in the item "Notes on Issue" but are included in the item "Other Liabilities".

In 1954-55 the net profits of the Note Issue Department amounted to £6,016,409 of which £5,516,409 was paid to the Commonwealth Treasury and £500,000 to the Capital Accounts of sections of the Commonwealth Bank and the Commonwealth Trading Bank as follows:—Mortgage Bank Department £143,000, Rural Credits Department £71,000, Industrial Finance Department £143,000, and the Commonwealth Trading Bank £143,000. For the basis of distribution of the net profits of the Note Issue Department see page 721.

## § 4. Legal Tender Extant.

Accurate information regarding the amount of legal tender in circulation is not available, but the estimated amount extant about the middle of the years 1939 and 1951 to 1955, is as follows:—1939, £58 millions; 1951, £307 millions; 1952, £336 millions; 1953, £360 millions; 1954, £378 millions; and 1955, £399 millions. Details of the amounts of coin and notes in circulation are shown in § 2 and § 3, Part A, of this chapter.

## B. BANKING.

### § 1. Cheque-Paying Banks.

1. *Banking Legislation.*—(i) *Commonwealth Legislation.* Under Section 51 of the Commonwealth Constitution the Commonwealth Parliament has power to legislate with respect to "Banking, other than State banking; also State banking extending beyond the limits of the State concerned, the incorporation of banks, and the issue of paper money" The principal Commonwealth Acts at present in force relating to Banking are—

- (a) The Commonwealth Bank Act 1945-1953 which provides for the constitution and management of the Commonwealth Bank, Commonwealth Trading Bank and Commonwealth Savings Bank and the management of the Australian note issue; and
- (b) The Banking Act 1945-1953, which provides for the regulation of banking and for the protection of the currency and the public credit of the Commonwealth.

The Banking Act 1945 was assented to on 3rd August, 1945, and came into operation on 21st August, 1945. It applies to all banks, except State banks, operating in Australia or Territories of the Commonwealth. The objects of the Act are:—(a) To provide a legal framework, uniform throughout Australia, for regulating the banking system; (b) to safeguard depositors of the banks from loss; (c) to provide for the co-ordination of banking policy under the direction of the Commonwealth Bank; (d) to control the volume of credit in circulation and bank interest rates; (e) to mobilize and to provide machinery for the control of the foreign exchange and gold resources of the Australian economy. A summary of the main provisions of the Act is given in Official Year Book No. 37, page 565.

The Banking Act 1953, assented to on 1st April, 1953, amended the Banking Act 1945. Details of the main amendments are given in Official Year Book No. 40, page 616.

(ii) *State Legislation.* State banking legislation relates to the incorporation of banks and the constitution and management of State banks. The Acts under which the various banks are incorporated differ. While some of the older banks were incorporated by special Act or Charter, e.g., the Bank of New South Wales by Act of Council 1817, The Bank of Adelaide by Act of the South Australian Parliament, and the Bank of New Zealand by Act of the General Assembly of New Zealand, most of the banks are incorporated under a Companies Act of the States or the United Kingdom. This is also the case with those banks which were reconstructed after the crisis of 1893. State banks, constituted under State Acts, transacting general banking business are The Rural Bank of New South Wales, the State Bank of South Australia and The Rural and Industries Bank of Western Australia.

2. *Royal Commission on Monetary and Banking Systems.*—A Royal Commission was appointed by the Commonwealth Government in November, 1935 to inquire into the monetary and banking systems in operation in Australia and to report whether any, and if so what, alterations were desirable in the interests of the people of Australia as a whole, and the manner in which any such alterations should be effected. The Commission presented its report on 15th July, 1937, and a summary of the recommendations appears in Official Year Book No. 31, p. 1010.

3. *Presentation of Banking Statistics.*—Because of the different purposes they serve in the Australian financial system, Australian banks have been divided for statistical purposes into four groups and a separate series is presented for each. These groups are:—

- (a) *The Commonwealth Bank.* This is the Central Bank. It also provides special banking facilities through the Rural Credits, Mortgage Bank and Industrial Finance Departments. It transacted general banking business through a General Banking Division up to 3rd December, 1953, when that business was transferred to the Commonwealth Trading Bank of Australia. Statistics of the Central Banking Business (including the Note Issue Department), and Rural Credits, Mortgage Bank and Industrial Finance Departments are presented in separate series.
- (b) *The Commonwealth Trading Bank of Australia.* This bank commenced operations on 3rd December, 1953. On that date, under the provisions of the Commonwealth Bank Act, 1953, it took over the business of the General Banking Division of the Commonwealth Bank. The statistics presented in the Commonwealth Trading Bank series include averages for the General Banking Division of the Commonwealth Bank up to 3rd December, 1953.
- (c) *Private Trading Banks.* This group was formerly known as the Nine Trading Banks but the number of banks included has been reduced to seven by amalgamations. With the Commonwealth Trading Bank, these banks provide the major part of the general banking facilities in Australia. The banks included in this group are—the Bank of New South Wales,

The Commercial Banking Company of Sydney Ltd., The National Bank of Australasia Ltd. (which has absorbed the Queensland National Bank Ltd., and The Ballarat Banking Co. Ltd.), The Commercial Bank of Australia Ltd., The Bank of Adelaide, the Australia and New Zealand Bank Ltd. (an amalgamation of The Bank of Australasia Ltd. and The Union Bank of Australia Ltd.), and The English, Scottish and Australian Bank Ltd.

- (d) *Other Banks.* This group consists of (i) three State Government Banks—The Rural Bank of New South Wales, the State Bank of South Australia and The Rural and Industries Bank of Western Australia which, in their general banking business, specialize mainly in financing rural industries, (ii) one joint stock bank—The Brisbane Permanent Building and Banking Co. Ltd., which has specialized business in one district only, and (iii) branches of three overseas banks—the Bank of New Zealand, Comptoir National d'Escompte de Paris and the Bank of China, which transact limited business in Australia and are mainly concerned with financing trade, etc., between Australia and overseas countries.

In addition to the series mentioned above, a series for all cheque-paying banks is presented. This series covers the Commonwealth Trading Bank, the Private Trading Banks and the other cheque-paying banks included in the fourth group.

Unless otherwise stated, the statistics presented are averages of weekly returns. Averages of liabilities and assets are the averages of the liabilities and assets of the banks on the several weekly balance days during the period concerned. Averages of bank clearings and debits to customers' accounts are the averages of transactions for weeks ended on the balance days during the period.

4. Banks Transacting Business in Australia.—(i) *Number of Branches.* At 30th June, 1955 the 15 banks operating in Australia transacted all classes of banking business at 3,298 branches and 1,210 agencies. The Commonwealth Trading Bank and the Private Trading Banks have branches throughout the Commonwealth. The Rural Bank of New South Wales, the State Bank of South Australia and The Rural and Industries Bank of Western Australia, being State Government banks specializing mainly in financing rural industries, have branches only in those States. The Brisbane Permanent Building and Banking Co. Ltd., transacts business in Brisbane only. The remaining three banks are branches of overseas banks.

(a) For the Commonwealth Bank and Commonwealth Trading Bank the amount shown in this column is the amount specified as capital in the Commonwealth Bank Act 1945-1953. For these two Banks all capital has been provided from accumulated profits. For the State Bank of South Australia and The Rural and Industries Bank of Western Australia the amounts shown in this column are capital funds provided by the respective State Governments. Capital of The Rural Bank of New South Wales consists of Inscribed Stock and Debentures issued by the Bank for capital purposes. (b) Includes dividends declared but not paid at date of balance-sheet. (c) For the Commonwealth Bank, Commonwealth Trading Bank and the State Banks the amount shown in this column is total capital and reserves. (See footnote (a).) (d) Includes uncalled capital. (e) Dividends paid and payable out of profits earned during 1953-54. (f) Special Reserve—Premium on gold sold. (g) The business of The Queensland National Bank Ltd. was taken over by The National Bank of Australasia Ltd. in January, 1948.

5. Commonwealth Bank of Australia.—(i) General. An account of the progress and development of the Commonwealth Bank is given in earlier issues of the Official Year Book (see No. 37, pages 570 to 573). The general functions of the Bank are set out in section 8 of the Commonwealth Bank Act 1945-1953 which states—

“8. It shall be the duty of the Commonwealth Bank, within the limits of its powers, to pursue a monetary and banking policy directed to the greatest advantage of the people of Australia, and to exercise its powers under this Act and the Banking Act 1945 in such a manner as, in the opinion of the Bank, will best contribute to:—

(a) the stability of the currency of Australia; (b) the maintenance of full employment in Australia; and (c) the economic prosperity and welfare of the people of Australia.”

In addition to its functions as a Central Bank, the Bank controls the Australian note issue through a Note Issue Department and provides special services through the Rural Credits Department, Mortgage Bank Department and Industrial Finance Department. The Commonwealth Bank also provided general banking facilities through the General Banking Division up to 3rd December, 1953. In accordance with the provisions of the Commonwealth Bank Act, 1953, the Commonwealth Trading Bank, on that date, took over the business of the General Banking Division of the Commonwealth Bank. The Commonwealth Savings Bank, a separate institution providing for small depositors, is controlled by the Commonwealth Bank Board and is operated in conjunction with the Commonwealth Bank.

(ii) *Management.* Under the Commonwealth Bank Act 1911 the Bank was managed by a Governor. From 1924 to August, 1945 it was controlled by a Board of Directors. Under the Commonwealth Bank Act 1945 control was vested in a Governor, assisted by an Advisory Council. Since 21st August, 1951, under the Commonwealth Bank Act 1951, the policy of the Commonwealth Bank and the Commonwealth Savings Bank has been determined by the Commonwealth Bank Board consisting of the Governor (Chairman), the Deputy Governor, the Secretary of the Department of the Treasury and seven other members appointed by the Governor-General. The Bank is managed by the Governor who shall act in accordance with the policy of the Bank and with any directions of the Board. The Board is required to inform the Government of the monetary and banking policy of the Bank. In the event of a disagreement between the Government and the Board as to whether the monetary and banking policy of the Bank is directed to the greatest advantage of the people of Australia, the Governor-General, acting with the advice of the Executive Council, may determine the policy to be adopted by the Bank. The Commonwealth Trading Bank is managed by a General Manager under the Governor of the Commonwealth Bank and its policy is determined by the Commonwealth Bank Board.

(iii) *Central Banking Business.* Under the powers it possessed under the Commonwealth Bank Act 1911-1943 and under its war-time powers under the National Security Regulations, the Commonwealth Bank had gradually assumed the functions of a Central Bank. Part III. of the Commonwealth Bank Act 1945 formally constituted the Commonwealth Bank as a Central Bank and granted the Bank the necessary powers to carry on the business of a Central Bank. The capital for the Central Banking Business is £4,000,000 and such other sums as are transferred from the Reserve Fund. Since 1951 the profits of the Commonwealth Bank have been distributed as follows:—(a) One-half to the National Debt Sinking Fund; (b) for a period of five years, an amount not exceeding £500,000 per annum may be paid to the capital of the several departments of the Bank and the Commonwealth Trading Bank, this amount to be distributed as follows:—Commonwealth Trading Bank Mortgage Bank Department and Industrial Finance Department each two-sevenths and the Rural Credits Department one-seventh; and (c) the balance to be paid to the Commonwealth Bank Reserve Fund.

(iv) *Note Issue Department.* This Department was established in 1920 when the control of the Australian note issue was transferred from the Commonwealth Treasury to the Commonwealth Bank. The Bank may, through this department, issue, re-issue and cancel Australian notes. Until 30th June, 1951, all profits of this Department, with

the exception of £2,000,000 paid to the Capital Account of the Rural Credits Department and £1,200,000 paid to the Capital Account of the Mortgage Bank Department, were paid to the Commonwealth Consolidated Revenue Fund. In 1951 provision was made for an amount, not exceeding £500,000 per annum for five years, to be paid to the Capital Accounts of the Commonwealth Trading Bank and the Rural Credits, Industrial Finance and Mortgage Bank Departments of the Commonwealth Bank. This amount is payable only if a similar amount is paid from the profits of the Central Banking Business and is to be distributed to the various sections in the same proportions as the amount payable from the profits of the Central Banking Business. The balance of the profits is to be paid to the Commonwealth Consolidated Revenue Fund.

(v) *General Banking Division.* Under the Commonwealth Bank Act 1911-1943 no provision was made for the separation of the general banking business of the bank from its central banking business. Under the Commonwealth Bank Act 1945 the General Banking Division was set up to carry on the general banking business of the Bank and the accounts and transactions of this division were kept separate and distinct from the other accounts of the Bank. The capital of the General Banking Division was £4,000,000, and such other sums as were transferred from the General Banking Division Reserve Fund, or from the profits of the Central Banking Business and the Note Issue Department. Transfers from each of these two sources increased the total capital to £4,572,000 at 30th June, 1953. The profits of the General Banking Division were distributed as follows :—(a) one-half was credited to the General Banking Division Reserve Fund, and (b) one-half was paid to the National Debt Sinking Fund. Under the Commonwealth Bank Act 1953 the business of the General Banking Division was transferred to the Commonwealth Trading Bank on 3rd December, 1953. *See also* para. 6 below—Commonwealth Trading Bank of Australia.

(vi) *Rural Credits Department.* The Rural Credits Department was established in 1925 for the purpose of making short-term credit available for the orderly marketing of primary produce. The Bank may, through this department, make advances, upon the security of primary produce placed under the legal control of the Bank or other security associated with the production or marketing of primary produce, to co-operative associations or marketing boards formed under the laws of the Commonwealth or of a State or Territory of the Commonwealth or other bodies specified by proclamation. The period of the advance shall not be more than one year. The capital of the Rural Credits Department is £2,000,000 and such amounts as are transferred from the profits of the Central Banking Business and the Note Issue Department. Transfers from each of these two sources have increased the total capital to £2,571,000 at 30th June, 1955. Profits are distributed as follows :—(a) one-half is credited to the Rural Credits Department Reserve Fund, and (b) one-half is credited to the Rural Credits Department Development Fund for the promotion of primary production.

(vii) *Mortgage Bank Department.* The Mortgage Bank Department was established in 1943 for the purpose of making long-term loans to primary producers. Through this Department the Bank may make a loan to any person engaged in farming, agricultural, horticultural, pastoral or grazing operations or other form of primary production, upon the security of a mortgage to the Bank of an estate or interest in land in the Commonwealth owned by the borrower. The term of the loan shall not be less than five years nor more than forty-one years. The capital of the Department is £4,000,000 plus any amount transferred from the profits of the Central Banking Business and the Note Issue Department. Transfers from each of these two sources have increased the total capital to £5,143,000 at 30th June, 1955. Profits are credited to the Mortgage Bank Department Reserve Fund.

(viii) *Industrial Finance Department.* The functions of the Industrial Finance Department established in January, 1946 are :—(a) to provide finance for the establishment and development of industrial undertakings; (b) to assist in the establishment

and development of industrial undertakings; and (c) to provide advice on the operations of industrial undertakings with a view to promoting the efficient organization and conduct thereof. To exercise these functions the Bank may, through the Industrial Finance Department, lend money and purchase and sell shares or securities in an industrial undertaking. The capital of this department is £4,000,000 plus any amount transferred from the profits of the Central Banking Business and Note Issue Department. Transfers from each of these two sources have increased the total capital to £5,143,000 at 30th June, 1955. The Treasurer, the Bank and the Savings Bank may advance money to the Industrial Finance Department. The amount that may be advanced by the Bank is limited to £1,000,000. The profits of the Department are credited to the Industrial Finance Department Reserve Fund.

(ix) *Housing Loans.* Provision is made for the Bank, through the Commonwealth Trading Bank, to make loans to individuals or building societies for the erection or purchase of homes or for the discharge of mortgages on homes. These loans must be made at the lowest possible rate of interest. Loans to individuals are to be on *crédit foncier* terms, to be secured by first mortgage on an estate or interest in land owned by the borrower and to be repaid in periods of not less than five years nor more than 35 years. Loans to building societies are to be made on such security and on such terms and conditions as the Bank determines.

(x) *Liabilities and Assets—All Departments.* Liabilities and assets of each Department of the Commonwealth Bank at 30th June, 1955 are shown in the following table. The Commonwealth Trading Bank and the Commonwealth Savings Bank, which are operated as separate institutions, are not included (*see* § 1, para. 6 (ii) and § 2, para 8 (ii), following):—

6. Commonwealth Trading Bank of Australia.—(i) *General.* The Commonwealth Trading Bank was established under the Commonwealth Bank Act, 1953. On 3rd December, 1953, it took over the business of the General Banking Division of the Commonwealth Bank. The Commonwealth Trading Bank is a body corporate with its own General Manager who is appointed by the Governor-General on the recommendation of the Commonwealth Bank Board for a term of seven years. The General Manager, under the Governor of the Commonwealth Bank, is responsible for the administration of the Commonwealth Trading Bank in accordance with policy determined by the Commonwealth Bank Board. Under the Banking Act 1945-1953 the Commonwealth Trading Bank is subject to the same central banking controls as the private trading banks and is required to maintain a Special Account with the Commonwealth Bank on the same basis as those of the private trading banks. The capital of the Commonwealth Trading Bank is the total of the capital of the General Banking Division of the Commonwealth Bank immediately before 3rd December, 1953 and such other sums as are transferred from the Commonwealth Trading Bank Reserve Fund, or from the profits of the Central Banking Business and the Note Issue Department of the Commonwealth Bank. The net profits of the Commonwealth Trading Bank are divided as follows :—(a) one-half placed to the credit of the Commonwealth Trading Bank Reserve Fund, and (b) one-half paid into the National Debt Sinking Fund.

(ii) *Liabilities and Assets.* The liabilities and assets of the Commonwealth Trading Bank at 30th June, 1954 and 1955 are shown in the following table :—

(a) Includes Territories of Papua and New Guinea.

10. **Classification of Advances within Australia.—Commonwealth Trading Bank of Australia and Private Trading Banks.**—(i) *States, June, 1955.* A dissection of advances made by the Commonwealth Trading Bank and the Private Trading Banks at the end of June, 1955, is shown in the following table. Business advances, which have been classified according to the main industry of the borrower, are those made mainly for business purposes and include all loans to corporate bodies other than public authorities. Advances made to public authorities are those made to Commonwealth and State Governments, Government Agencies and Local and Semi-governmental Authorities irrespective of the purpose of the advance or the industry in which the authority is engaged. Personal advances, which have been classified according to purpose, include advances to persons in their private capacity for such purposes as the purchase of a house or of household equipment, repayment of personal debts, etc.

(a) Excludes transactions connected with the issue and redemption of Treasury Bills.

13. **Debits to Customers' Accounts—All Cheque-Paying Banks.**—Statistics of debits to customers' accounts have been collected since September, 1945. Generally they represent the total of all cheques drawn by the customers of the banks. In the following table are shown the average weekly debits to customers' accounts of all cheque-paying banks for each State for the years ended June, 1951 to 1955. In this table debits to accounts of Australian Governments in capital cities are excluded as they are subject to abnormal influences and are not uniform for each State.

(a) Unchanged since 1st January, 1940.

There is no charge for transfers within a city or a town. In all States excepting Queensland and Western Australia, the exchange for transfers between towns in the same State is 2s. per £100. Queensland and Western Australia are divided into zones. The exchange rate for transfers between towns in the same zone is 2s. per £100, with higher rates for inter-zone transfers.

The exchange rate between Papua and New Guinea and the mainland is 10s. per £100 for all points.

## § 2. Savings Banks.

1. *General.*—The inauguration of Savings Banks in Australia dates from 1819, when a private Savings Bank was opened in Sydney. In 1832 the legislature created "The Savings Bank of New South Wales" under the control of trustees, and shortly after its establishment the funds of the private Savings Bank were transferred to the new institution. In the other States provision for placing deposits with savings banks dates from 1841 in Victoria; 1854 in Queensland; 1848 in South Australia; 1863 in Western Australia (a Savings Bank was opened in 1856 but was closed a year later); 1835 in Launceston; and 1845 in Hobart. These early banks functioned as Trustee Savings Banks, but, with the exception of the Hobart and Launceston institutions, were later absorbed by, or amalgamated with, Government Savings Banks.

Post Office Savings Banks were established in all States from 1864 onwards. These were separate Government institutions except in South Australia, where the Post Office acted as agent for the Savings Bank. Since the federation of the Australian States in 1900, post offices have been controlled by the Commonwealth Government, but they continued to act as savings bank agencies for the State institutions until the establishment of the Commonwealth Bank in 1912. They now act as agents for the Commonwealth Savings Bank.

Savings banks at present operating are the Commonwealth Savings Bank (all States and Territories); State Savings Bank of Victoria; Savings Bank of South Australia; and the two Trustee Banks—Hobart and Launceston.

The prime object of the foundation of savings banks in Australia was the encouragement of thrift, deposits of one shilling and upwards being accepted; nevertheless, the facilities offered, while preserving the original object, have led to developments in another direction. Although depositors may not operate on their accounts by means of cheques, they have practically all the other advantages of a current account and in addition receive interest on their minimum monthly balances. No charge is made by the banks for keeping the accounts.

Commencing with July, 1931, monthly returns of statistics have been furnished by savings bank authorities. The information given in the following paragraphs relates to the deposits at 30th June in each year. For convenience of reference the information has been grouped under the following headings :—

- (i) Commonwealth Savings Bank ; (ii) State Savings Banks (including Trustee Banks in Tasmania) ; and (iii) All Savings Banks.

2. Number of Accounts.—The following table shows the number of savings bank accounts in existence at 30th June, 1954 and 1955. It should be noted that these figures relate to the number of accounts and not necessarily to the number of depositors.

#### SAVINGS BANKS : NUMBER OF ACCOUNTS.(a)

Bank.	30th June, 1954.		30th June, 1955.	
	Operative.	Inoperative. (b)	Operative.	Inoperative. (b)
Commonwealth Savings Bank ..	4,495,323	2,165,141	4,576,280	2,257,832
State Savings Bank of Victoria ..	1,513,109	585,108	1,524,989	601,227
Savings Bank of South Australia ..	572,838	(c) 167,806	585,696	(c) 171,573
Hobart Savings Bank ..	93,430	(c) 34,221	95,121	(c) 34,841
Launceston Bank for Savings ..	80,821	23,436	79,374	27,804
Total .. ..	6,755,521	2,975,712	6,861,460	3,093,277

(a) Excludes special purpose and school bank accounts. (b) Inoperative accounts are those accounts with balances of less than £1 which have not been operated on for a period of over two years. (a) Estimated.

3. Business Transacted.—The following table shows details of the business transacted in Australia by savings banks during the years ended 30th June, 1954 and 1955 :—

#### BUSINESS TRANSACTED IN AUSTRALIA. (£'000.)

State or Territory.	Year ended 30th June, 1954.				Year ended 30th June, 1955.

(a) In addition to the amounts shown above, the Commonwealth Bank had deposits at offices in Papua, New Guinea, London and British Solomon Islands totalling: 1939, £78,000; 1951, £2,841,000; 1952, £3,285,000; 1953, £3,785,000; 1954, £4,190,000; and 1955, £1,688,000. (b) The State savings banks in New South Wales, Queensland, Western Australia and Tasmania were absorbed by the Commonwealth Savings Bank. (c) Revised.

5. Deposits per head and Purchasing Power.—Particulars of the deposits per head of population, actual and adjusted to purchasing power by the application of retail price index-numbers, at 30th June, in each of the years 1939 and 1951 to 1955 are shown in the following table. In calculating the index-numbers in this table the average of deposits per head of population at 30th June, 1937, 1938 and 1939 has been used as a base and made equal to 1,000.

## ALL SAVINGS BANKS : DEPOSITS PER HEAD OF POPULATION, AUSTRALIA.

At 30th June—				Actual		Adjusted to Purchasing Power.(a)	
				Deposits per head of population.	Index-Number.	Deposits per head of population.	Index-Number.
				£	1937-1939 = 1000	£	1937-1939 = 1000
1939	..	..	.	35.25	1,018	34.32	991
1951	..	..	..	99.44	2,872	48.44	1,390
1952	..	..	..	103.27	2,983	41.80	1,207
1953	..	..	..	107.48	3,104	41.86	1,209
1954	..	..	..	112.40	3,246	43.19	1,247
1955	..	..	..	116.66	3,369	43.87	1,267

(a) On the basis of the All Items ("C") Series of Retail Price Index-numbers (6 capitals) for June quarter in each year.

In interpreting the figures above it should be remembered that savings bank accounts are used to some extent by institutions and business people, as well as by individuals for the investment of personal savings. The relative extent to which savings bank accounts are used for business purposes, etc., may, and probably does, fluctuate considerably from time to time.

6. **School Banking.**—With the object of encouraging principles of thrift amongst children, agencies of the Savings Banks have been established at most of the schools throughout Australia. Particulars of operative accounts for the Commonwealth at 30th June of the years 1939 and 1951 to 1955 appear below :—

## SCHOOL SAVINGS BANKS : AUSTRALIA.

At 30th June—				Number of School Agencies.	Number of Operative Accounts.	Deposits.	Deposits per Operative Account.
						£	£ s. d.
1939	..	..	..	9,535	560,116	1,090,703	1 18 11
1951	..	..	..	8,239	591,915	3,369,872	5 13 10
1952	..	..	..	8,219	638,476	3,866,793	6 1 2
1953	..	..	..	8,148	684,527	4,375,185	6 7 10
1954	..	..	..	8,179	724,038	4,831,538	6 13 6
1955	..	..	..	8,210	761,974	5,280,808	6 18 7

7. **War Savings and Savings Certificates.**—Sales of savings certificates and stamps under the War Savings and Savings Certificate schemes, particulars of which were given in earlier issues of the Official Year Book (*see* No. 37, page 586), were discontinued after 31st January, 1949, except for some sales made to wind up savings groups, etc. This method of saving was replaced by special savings schemes to operate through the savings banks. Employers were asked to co-operate by forming employee savings groups and by making regular deductions from wages and salaries for payment into group savings bank accounts, and thence, at the end of each quarter to individual accounts. The total value of certificates outstanding at 30th June in each of the last five years was :—1951, £48,115,000; 1952, £41,809,000; 1953, £35,601,000; 1954, £30,310,000; 1955, £26,615,000.

8. **Commonwealth Savings Bank of Australia.**—(i) *General.* The Savings Bank Department of the Commonwealth Bank opened for business in Victoria on 15th July, 1912; in Queensland on 16th September, 1912; in the Northern Territory on 21st October, 1912; in Tasmania on 1st January, 1913, and in New South Wales, South Australia and Western Australia on 13th January, 1913. The Tasmanian State Savings

Bank was absorbed by the Commonwealth Bank on 1st January, 1913, the Queensland State Savings Bank was taken over in 1920 and the New South Wales and Western Australian State Savings Banks in 1931. The Savings Bank Department was separated from the General Bank on 9th June, 1928, and established as a separate institution known as the "Commonwealth Savings Bank of Australia". It has since then operated independently, publishing its own balance-sheets and profit and loss accounts. The Commonwealth Bank Act 1927, which provided for the establishment of the Commonwealth Savings Bank as a separate institution, provided for a Commission of three members to manage the Savings Bank. This Commission was never appointed and the Commonwealth Bank Act 1945 placed the control of the Commonwealth Savings Bank under the Governor of the Commonwealth Bank.

(ii) *Balance-sheet, 30th June, 1954 and 1955.* Particulars of the liabilities and assets of the Commonwealth Savings Bank as at 30th June, 1954 and 1955 were as follows :—

**COMMONWEALTH SAVINGS BANK(a) : LIABILITIES AND ASSETS, 30th JUNE.**

10. *Classification of Depositors' Balances.*—The classification of deposits published by savings banks does not permit a fully detailed analysis with respect to Australia as a whole, but information supplied to the Royal Commission on Monetary and Banking Systems, for all savings banks except the Hobart Trustee Savings Bank, shows that at 30th June, 1936 the amount on deposit in accounts with balances of less than £100 represented 21 per cent. of the total deposits; balances of over £100 but under £250, 21 per cent.; over £250 but under £500, 23 per cent.; over £500 but under £1,000, 25 per cent.; while those of over £1,000 accounted for 10 per cent. School, penny bank and small inoperative accounts were excluded in determining these percentages.

A similar classification as at 30th June, 1936, 1939 and 1951 to 1955, but relating only to the combined State Savings Banks of Victoria and South Australia, is shown below.

## STATE SAVINGS BANKS : CLASSIFICATION OF DEPOSITS.

(Per cent.)

At 30th June—	£100 and under.	£101-£300.	£301-£500.	Total under £501.	£501-£1,000.	Over £1,000.
1936.. ..	19.54	26.13	17.84	63.51	27.42	9.07

(a) Includes Starr-Bowkett and other terminating societies:—New South Wales, £75,233,075; Queensland, £936,666. (b) Not available. Included in Other Assets. (c) Year 1953.

3. Co-operative Housing Societies, Victoria.—In addition to the information shown above, the following details of co-operative housing societies in Victoria have been extracted from the 8th Annual Report of the Registrar of Co-operative Housing Societies. At 30th June, 1953, 234 co-operative housing societies were registered in Victoria with 22,648 members who had subscribed for 744,530 shares giving a nominal share capital subscribed of £39,477,299. For the twelve months ended 30th April, 1953, returns were submitted by 217 societies, the total income of those societies being £156,206, and total expenditure £142,205. The liabilities at 30th April, 1953 of the societies submitting returns were:—bank overdraft, £20,001,888; subscriptions, £2,620,049; surplus interest and management expenses, £261,956; other liabilities, £375,032; total liabilities, £23,258,925. Assets at the same date consisted of:—advances, £22,973,234; other assets, £285,691; total assets, £23,258,925.

### § 3. Co-operative Societies.

Co-operative societies are divided into three classes—(i) those engaged in the manufacture and marketing of primary products and trade requirements; (ii) those engaged in retailing general household requirements; and (iii) those engaged in activities covered by both classes (i) and (ii). The first class may be described briefly as Producers' Co-operative Societies and the second as Consumers' Co-operative Societies. The particulars given for New South Wales relate to societies registered under the Co-operative Act 1923-1950. A summary of the business of all co-operative societies for the years 1952-53 or 1953 for all States except Western Australia is given in the following tables. For Western Australia details of the business during 1940-41 (the latest year available) are given. Separate particulars for each of the three types of Co-operative Societies is given in the *Annual Finance Bulletin* (see No. 45, pages 176 and 177).

**D. INSURANCE.****§ 1. Introductory.**

1. **Legislation.**—Section 51 of the Commonwealth Constitution confers the necessary powers on the Commonwealth Parliament to legislate with respect to “insurance other than State insurance; also State insurance extending beyond the limits of the State concerned”. Commonwealth legislation includes the Marine Insurance Act 1909 defining the limits of marine insurance and regulating the terms of contracts, etc., the Insurance Act 1932–1937 requiring the lodgment of deposits by insurance companies, and the Life Insurance Act 1945–1953 generally regulating life insurance business in Australia. The Marine Insurance Act 1909 and the Insurance Act 1932–1937 have limited application, and, except for life insurance business which is regulated by the Life Insurance Act 1945–1953, insurance business is conducted under State laws.

2. **Insurance Act 1932–1937.**—Companies, persons or associations of persons carrying on insurance business in Australia or in any Territory of Australia are required to lodge a deposit with the Commonwealth Treasurer.

Money deposited is invested by the Treasurer in prescribed securities selected by the depositor, and all interest is paid to depositors. Deposits remain as security against liability to policy holders, and are available to satisfy judgments obtained in respect of policies.

Deposits held by States on 1st February, 1932, could, however, remain with the States subject to the conditions embodied in the laws of the States, and depositors to the extent of the value of these deposits were exempt from liability to make deposits under the Commonwealth Act.

The following are not regarded as insurance businesses under the Act :—

Staff superannuation schemes; schemes of religious organizations solely for insurance of their property; and friendly society, union and association schemes involving superannuation or insurance benefits to employees.

This Act does not apply to State insurance within the limits of the State concerned, and, under the Life Insurance Act 1945–1953, ceased to apply to life insurance business.

3. **Life Insurance Act 1945–1953.**—The objects of this Act are :—(a) To replace all State legislation on the subject of life insurance and to provide uniform legislation for the whole of Australia; (b) to appoint an Insurance Commissioner to exercise active supervision of the activities of life insurance companies, with a view to securing the greatest possible protection for policy holders; (c) to set up adequate machinery for dealing with any company that fails to maintain a required minimum standard of solvency.

The Act was assented to on 16th August, 1945 and came into operation on 20th June, 1946. A summary of the provisions of the Act is given in Official Year Book No. 37 (pages 595 to 597).

The main amendment by the Life Insurance Act, No. 94 of 1953 was to repeal Part VI. of the principal Act, which provided for the establishment of a Commonwealth Government Insurance Office.

4. **Deposits under Insurance Acts.**—Deposits lodged under the Insurance Acts at 30th June, 1954, totalled £5,381,991, comprising £1,092,282 held by the Commonwealth in respect of life insurance and £4,006,379 held by the Commonwealth and £283,330 held by the States in respect of other forms of insurance.

The deposits comprise cash £25,000, government, municipal and other securities £4,373,841, fixed deposits £1,000, bank guarantees and undertakings £618,000, titles and mortgages £364,150.

**§ 2. Life Assurance.**

1. **General.**—Statistical returns have been collected from life assurance institutions since 1907. Until 1946 these returns were collected under the Census and Statistics Act. Since 1947 returns lodged under the Life Insurance Act 1945–1953 have been used to

compile life assurance statistics. This change in method of collection has resulted in some slight changes in definition and, as a result, the statistics for 1947 and later years are not in all cases strictly comparable with those for earlier years. In earlier years statistics of revenue and expenditure and of assets and liabilities, although generally related only to the life assurance business of the offices making the returns, included, in some cases, a small amount of other classes of business. Under the Life Insurance Act 1945-1953 companies transacting life assurance business are required to set up separate statutory funds for their life assurance business. As a result of this, it has been possible to separate life assurance business from other classes of business. Except where otherwise indicated, the figures in the succeeding paragraphs refer to Australian business only. Business in the Territories of Papua and New Guinea is, however, included in the Australian figures.

2. **Offices Transacting Business.**—The number of offices which transacted life assurance business in Australia during 1953 was 24, including three overseas companies. Of the twenty-one Australian offices, six are purely mutual, including one which transacts general business in respect of which share capital is used, thirteen are public companies, and two are State Government institutions. Of the total offices, fourteen transacted both ordinary and industrial business, and one industrial business only. Ordinary and industrial business has, where possible, been kept separate.

3. **Australian Business—Policies in Existence.**—In the following table details of policies on the registers in each State and the Australian Capital Territory are given for the year 1953:—

(a) Includes other expenses of management, licence fees and taxes, &c.

8. *Liabilities and Assets.*—(i) *General.* The liabilities of the Australian offices consist mainly of their assurance funds, but in the case of public companies there is a further liability on account of the shareholders' capital. The assets consist chiefly of government and municipal securities, mortgages, loans on policies, landed and house property, etc. Loans on personal security are granted by very few of the Australian offices. Separate details of liabilities and assets in respect of Australian business are not available.

(ii) *Total Liabilities and Assets.* In the two tables which follow, the details of liabilities and assets relate to all business (Australian and overseas) of Australian companies, the life assurance business of the two State Government offices, all business of the Provident Life Assurance Co. Ltd. (incorporated in New Zealand) and the Australian business only of the Prudential Assurance Co. Ltd. (incorporated in England). For various reasons several offices do not attempt the dissection of liabilities and assets between the industrial and ordinary branches, and, therefore, the figures in the following tables relate to the ordinary and industrial branches combined. Details of the total liabilities of life assurance offices for the year 1953 are given in the following table.

**ORDINARY AND INDUSTRIAL LIFE ASSURANCE : TOTAL LIABILITIES, 1953.**  
(£'000.)

Dividends and bonuses paid ..	709	1,755	1,912	1,904	1,629	1,612

(a) Not available.

2. *Aggregate Australian Business.*—(i) *General.* While the foregoing statements relate only to those companies whose head offices are located in Australia, New Zealand or Fiji, the following particulars, which are somewhat restricted in the range of information, are in respect of all companies operating in Australia. The statistics in this paragraph conform substantially to the following definitions and should be interpreted in accordance therewith.

(a) Premiums represent the full amount receivable in respect of policies issued and renewed in the year, less returns, rebates and bonuses paid or credited to policy-holders during the year. They are not adjusted to provide for premiums unearned at the end of the year and consequently the amounts differ from “earned premium income” appropriate to the year. When business is increasing, as in recent years, premiums receivable (as shown in the statistics) are greater than “earned premium income” appropriate to the year. The converse applies when business is declining.

(b) Claims or losses include provision for outstanding claims and represent claims or losses incurred in the year. Salvage and other amounts recoverable have been deducted.

(c) Contributions to Fire Brigades, Commission and Agents' Charges, and Expenses of Management represent mainly charges paid during the year.

(d) Taxation represents mainly payments made during the year, and includes income tax, pay-roll tax, licence fees, stamp duty (where paid by the company), etc. Income tax paid during the year is based on the income of earlier years.

The tables contain selected items of statistics and the information shown is not suitable for the construction of a “profit and loss” statement or “revenue” account.

In cases where the business is underwritten in one State and the risk is situated in another the business is included in the State in which the policy was issued.

During 1953–54 (1952–53) revenue from premiums amounted to £97,984,000 (£89,346,000) and from the net interest on investments, etc., to £3,345,000 (£2,593,000), totalling £101,329,000 (£91,939,000). Expenditure on losses amounted to £52,599,000 (£45,800,000), contributions to fire brigades £2,635,000 (£2,290,000), commission and agents' charges £9,963,000 (£9,279,000), expenses of management £16,742,000 (£15,537,000) and taxation £3,992,000 (£3,817,000), a total of £85,931,000 (£76,723,000).

(ii) *States.* The following table shows, for each State, the aggregate premium income less reinsurances and returns, and claims or losses less amounts recoverable, for all classes of insurance other than life for the years 1938–39 and 1949–50 to 1953–54.

FIRE, MARINE AND GENERAL INSURANCE : PREMIUMS AND LOSSES—STATES.  
(£'000.)

(a) From 1947-48 excludes Workers' Compensation Insurance in coal-mining industry in New South Wales.

The volume of business measured by the amount of premium income shows that fire insurance represented about 23.9 per cent. of the total business during 1952-53 and 22.6 per cent. during 1953-54, workers' compensation 21.6 per cent. during 1952-53 and 20.7 per cent. during 1953-54, motor vehicles (including compulsory third party insurance) 32.5 per cent. in 1952-53 and 35.0 per cent. in 1953-54 and marine insurance constituted 6.6 per cent. in 1952-53 and 6.2 per cent. in 1953-54.

## E. FRIENDLY SOCIETIES.

1. *General.*—The total membership of friendly societies in Australia is approximately 530,000 but as certain benefits, such as medical attendance and free medicines, and in many cases funeral expenses, are granted to members' families as well as to members themselves, this figure must, even when due allowance is made for young and unmarried members, be more than doubled to arrive at an estimate of the number of persons who receive some direct benefit from these societies. Legislation has conferred certain privileges on friendly societies, but, on the other hand, it insists on their registration, and it is the duty of the Registrars in the various States, prior to registering a new society, to see that its proposed rules conform to the law, and that the scale of contribution is sufficient to provide the promised benefits. Societies are obliged to forward to the Registrar annual returns about their membership and their finances, and reports are published in most of the States dealing with the returns received.

2. *Societies, Members and Revenue.*—The following table sets out the number of societies, members, etc., and revenue and expenditure and funds of registered societies for the year 1952-53. More detailed information is available in *Finance Bulletin* No. 45.

## FRIENDLY SOCIETIES : 1952-53.

(a) Total estates of deceased persons assessed for death duty. (b) Estates dealt with by Taxation Department.  
(c) Not available. (d) Not available separately.

## G. STATE LOTTERIES AND BETTING.

## § 1. State Lotteries.

State Governments operate lotteries in New South Wales, Queensland and Western Australia. Tattersalls Lotteries and Tasmanian Lotteries are operated under Government licences in Victoria and Tasmania respectively.

New South Wales State Lotteries are conducted in accordance with the New South Wales State Lotteries Act, 1930 and the first drawing took place on 20th August, 1931. At present, each ordinary lottery consists of 100,000 tickets at 5s. 6d. each, with prizes totalling £17,550 and each special lottery of 100,000 tickets at 10s. each, with prize money totalling £31,700. In addition there is a mammoth lottery consisting of 100,000 tickets of £1 each with prize money totalling £64,200. Net profits of the lottery are paid to the Consolidated Revenue Fund from which grants are made to hospitals.

Tattersalls Lotteries, which were previously conducted in Tasmania, were transferred to Victoria in 1954 and the first drawing in Melbourne took place on 8th July, 1954. The Tattersalls Consultations Act, 1953 provides that prizes in each consultation shall not be less than sixty per cent. of total subscriptions to that consultation, and that a duty equal to thirty-one per cent. of subscriptions shall be paid into the Consolidated Revenue Fund from which an equivalent amount will be paid out into the Hospitals and Charities Fund and the Mental Hospitals Fund in proportions as determined by the Treasurer. At present, tickets are priced at 5s. each (200,000) with prizes totalling £30,000; 10s. each (100,000 and 200,000) with prizes totalling £30,000 and £60,000 respectively and £1 each (100,000) with prizes totalling £60,000. In addition there is a special Melbourne Cup consultation at £1 each (200,000) with prize money of £120,000.

In Queensland, the Golden Casket Art Union commenced in 1916 with the specific object of augmenting the funds of the Queensland War Council. Subsequently, Anzac Cottages and Nurses Quarters Funds benefited until 1920, when net profits were paid to the Department of Health and Home Affairs (Hospitals, Motherhood and Child Welfare Trust Fund) and used for the maintenance of hospitals, grants to institutions, and for motherhood and child welfare purposes. A stamp duty is imposed on tickets sold. The proceeds of this are paid to Consolidated Revenue Fund. At present, ordinary tickets are priced at 5s. 6d. each (100,000), special tickets at 10s. (100,000) and £1 (100,000) each with prizes totalling £17,550, £32,000 and £64,300 respectively. A special Melbourne Cup lottery with tickets priced at 15s. (100,000) and prizes totalling £48,100 was introduced in 1955.

In Western Australia, lotteries are conducted by the Lotteries Commission under the Lotteries Control Act of 1932. Profits are paid by the Commission to hospitals and other charities. Each lottery comprises 100,000 tickets at 2s. 6d. each, with prizes totalling £6,630.

In Tasmania, lotteries are subject to the provisions of the Racing and Gaming Act 1950-1952. With the transfer of Tattersalls from Hobart to Melbourne, Tasmanian Lotteries commenced operations under Government licence and the first drawing took place on 30th June, 1954. The stamp duty on tickets sold, and the duty on prize money

are paid into Consolidated Revenue. Tickets are priced at present at 5s. (250,000) and £1 (250,000) with prizes totalling £38,047 and £152,188 respectively. In 1955 a lottery with tickets at £5 each (50,000) and prize money totalling £152,188 was introduced.

Details of the income, expenditure and net profit of the three State Lotteries for the years 1938-39 and 1949-50 to 1953-54 are given in the following table:—

**STATE LOTTERIES: INCOME, EXPENDITURE AND NET PROFIT.**

## H. GOVERNMENT, SEMI-GOVERNMENTAL AND PARLIAMENTARY PENSION AND SUPERANNUATION SCHEMES.

### § 1. Government and Semi-Governmental Pension and Superannuation Schemes.

The Commonwealth and all State Governments have established pension or superannuation schemes for their employees. These schemes are operated through funds to which both the Government and the employees make contributions. Employees of semi-governmental authorities are in some cases covered by the Commonwealth or State Government scheme and in other cases by a separate scheme of the authority.

In the following table aggregate details are given for the year 1953-54, of the receipts, expenditure, accumulated funds and number of contributors and pensioners of the Commonwealth and State Government and main semi-governmental schemes. The funds included are :—

- (a) *Commonwealth*.—The Superannuation Fund and Defence Forces Retirement Benefits Fund.
- (b) *New South Wales*.—State Superannuation Fund, Government Railways Superannuation Fund and Police Superannuation and Reward Fund.
- (c) *Victoria*.—The State Superannuation Fund, Police Superannuation Fund, Police Pensions Fund, Melbourne Harbor Trust Superannuation Account, Geelong Harbor Trust Superannuation Fund, Melbourne and Metropolitan Board of Works Superannuation Fund, State Electricity Commission Provident Fund, Gas and Fuel Corporation Superannuation Fund, Metropolitan Fire Brigades Board Superannuation Fund, Country Fire Authority Superannuation Fund and Port Phillip Pilots' Sick and Superannuation Fund.
- (d) *Queensland*.—Public Service Superannuation Fund and Police Superannuation Fund.
- (e) *South Australia*.—South Australian Superannuation Fund, Police Pensions Fund and Public Service Superannuation Fund.
- (f) *Western Australia*.—The Superannuation Fund.
- (g) *Tasmania*.—Public Service Superannuation Fund (Old and New Funds), Police Provident Fund and State Teachers' Superannuation Fund.

## § 2. Parliamentary Pension and Superannuation Schemes.

Pension and superannuation schemes have been established for members of the Commonwealth and all State Parliaments except the Tasmanian. Full details of these schemes are given in pages 91 to 99 of Official Year Book No. 38. All the schemes are operated through funds to which the members of Parliament and the Commonwealth or States contribute. Details of the receipts, expenditure, funds and number of contributors and pensioners for the year 1953-54 are given in the following table :—

## CHAPTER XX.

### PUBLIC FINANCE.

**NOTE.**—The subject of "Public Finance" is dealt with in this Chapter under the two major divisions of Commonwealth Finance and State Finance. The close financial relations between the Commonwealth and States, however, particularly since the Financial Agreement has been in operation, demand also a combination of these two divisions under the heading of Commonwealth and State Finance. Under the Financial Agreement the Commonwealth assumed the liability to bondholders for the States' Debts existing at the date of the Agreement and now arranges for all borrowings for and on behalf of the Commonwealth or any State and for all conversions, renewals, redemptions and consolidations of the Public Debts of the Commonwealth and the States. In view of this it has been found convenient to deal with the Commonwealth and State Public Debt in a separate division.

The subject of income taxes is also dealt with in a separate division.

#### A. COMMONWEALTH FINANCE.

##### § 1. General.

1. **Financial Provisions of the Constitution.**—The main provisions of the Constitution relating to the initiation and development of the financial system of the Commonwealth are contained in Sections 81 to 105A of the Commonwealth Constitution (*see* pages 18–22 of this Year Book). Two other sections which have a most important bearing on questions of Commonwealth finance are Sections 69 and 51.

Section 69 provides for the transfer to the Commonwealth from the States of certain specified departments, and Section 51, in outlining the powers of the Commonwealth Parliament, implies the transfer or creation of other departments. Section 87 deals with the financial relations between the Commonwealth and the States. These matters have been treated in previous issues of the Official Year Book and on pages 783–786 of this issue a summary is given of the present provisions for Commonwealth financial assistance to the States.

The majority of the tables relating to Commonwealth Finance have been compiled from the annual Budget Papers as presented to Parliament by the Treasurer of the Commonwealth.

2. **Accounts of Commonwealth Government.**—The Commonwealth Government, like the State Governments, bases its accounts upon three funds, the Consolidated Revenue Fund, the Trust Fund and the Loan Fund.

##### § 2. Commonwealth Consolidated Revenue Fund.

###### Division I.—Nature of Fund.

1. **Provisions of the Constitution.**—The provisions made for the establishment of a Commonwealth Consolidated Revenue Fund, and the means to be adopted for operating on the fund, are contained in Sections 81 to 83 of the Constitution (*see* page 18 of this Year Book).

2. **Annual Results of Transactions.**—In the early 1920's receipts and expenditure of the Consolidated Revenue Fund each ranged between £60 million and £70 million. Excess receipts in these years amounted to one or two million pounds a year, and were utilized for a variety of purposes, e.g., for debt redemption, naval construction, main

roads, science and industry investigations, prospecting for oil and precious metals, civil aviation, etc. In the later 'twenties and early 'thirties, when receipts and expenditure were each about £70 million or £80 million a year, there were annual deficiencies, which by the end of 1930-31 had accumulated to more than £17 million.

In subsequent years (receipts and expenditure each rising from about £70 million in 1931-32 to £95 million in 1938-39) there were excess receipts of up to £3.5 million a year. Approximately £1.5 million of these excess receipts were used to reduce the accumulated deficiency, and the balance for non-recurring grants to the States, post office works and the provision of defence equipment. The balance of the accumulated deficiency (£15.7 million) was funded in 1937-38.

For most of the 1939-45 War years and thereafter, the Consolidated Revenue Fund has been balanced, as all available revenue after charging expenditure on ordinary services has been used for defence, war and repatriation purposes.

During the years 1951-52 to 1953-54 the Fund was balanced after special payments of £98.5 million, £13.4 million and £56.3 million to the National Debt Sinking Fund, War Pensions Trust Account and Debt Redemption Reserve Trust Account respectively. The amounts so transferred were subsequently invested wholly or partly in special loans for State works requirements.

Receipts and expenditure increased from £95 million in 1938-39 to £377 million in 1944-45. By 1949-50 they had risen to £581 million, and then increased sharply to £842 million in 1950-51, £1,017 million in 1951-52 and £1,040 million in 1952-53. Receipts and expenditure for 1953-54 were £1,023 million.

### Division II.—Revenue.

1. General.—The following table shows details of the revenue from each source and the amount per head of population under each of the main headings during the years 1938-39 and 1949-50 to 1953-54. Taxation constitutes the main source of Commonwealth revenue e.g. 84.0 per cent. in 1953-54.

#### COMMONWEALTH CONSOLIDATED REVENUE FUND: SOURCES OF REVENUE. (£'000.)

<b>Total .. ..</b>	<b>16,472</b>	<b>66,157</b>	<b>73,083</b>	<b>99,981</b>	<b>113,104</b>	<b>125,460</b>

(iv) *Other Taxation.* (a) *General.* Taxes other than customs and excise are, in general, assessed and collected by the Commissioner of Taxation. The organization comprises an office in each State assessing the returns of taxpayers whose interests are restricted to that State only, and a Central Office assessing taxpayers whose interests are in more than one State.

(b) *Sales Tax.* The sales tax was first imposed in August, 1930. The operation of the tax is controlled chiefly by a system of registration of taxpayers whereby all manufacturers and wholesale merchants, who are the taxpayers under the Act in respect of goods sold in Australia, must be registered with the Department. The tax on imports subject to sales tax is collected by the Customs Department at ports of entry.

Since the inception of the tax certain exemptions have been allowed. These exemptions, which have been extended from time to time, relate mainly to goods of an essential nature or for use in primary production. The most recent exemptions were those granted from 19th August, 1954.

A general rate of Sales Tax is levied on all goods other than those specified in the schedules of the Sales Tax (Exemptions and Classifications) Act 1935-1954. These

schedules set out details of goods exempt from sales tax and those subject to special rates. The general and special rates which operated from 15th November, 1946, were:—

Period.	General Rate.	Special Rates.
15th November, 1946 to 7th September, 1949 ..	10 per cent. ..	25 per cent.
8th September, 1949 to 12th October, 1950 ..	8½ per cent. ..	25 per cent.
13th October, 1950 to 26th September, 1951 ..	8½ per cent. ..	10, 25 and 33½ per cent.
27th September, 1951 to 6th August, 1952 ..	12½ per cent. ..	20, 25, 33½, 50 and 66⅔ per cent.
7th August, 1952 to 9th September, 1953 ..	12½ per cent. ..	20, 33½ and 50 per cent.
10th September, 1953 to 18th August, 1954 ..	12½ per cent. ..	16⅔ per cent.
From 19th August, 1954 ..	12½ per cent. ..	10 and 16⅔ per cent.

For particulars of rates applicable since the inception of Sales Tax in August, 1930 see Official Year Book No. 37, page 617.

Sales Tax Collections for the years 1938-39 and 1949-50 to 1953-54 were as follows:— 1938-39, £9,308,000; 1949-50, £42,425,000; 1950-51, £57,173,000; 1951-52, £95,459,000; 1952-53, £89,067,000; 1953-54, £95,689,000.

Particulars of the net amount of sales tax payable, and the sales of taxable and exempt goods in each State for 1953-54, are given in the following table. The figures are in respect of sales during the period 1st July to 30th June.

#### SALES TAX AND AMOUNT OF SALES, 1953-54.

(a) Includes Australian Capital Territory.

Sales of taxable and exempt goods and sales tax payable for Australia as a whole for the years 1938-39 and 1949-50 to 1953-54 are shown in the following table:—

#### SALES TAX AND AMOUNT OF SALES.

(£'000.)

Year.	Net Sales on which Sales Tax was Payable.	Sales of Exempt Goods by Registered Persons.	Total Sales of Taxable and Exempt Goods.	Sales Tax Payable.
1938-39 .. ..	196,491	280,656	477,147	9,363
1949-50 .. ..	455,251	866,575	1,321,826	40,789
1950-51 .. ..	552,919	1,138,887	1,691,806	54,471
1951-52 .. ..	623,390	1,321,696	1,945,086	91,332
1952-53 .. ..	555,390	1,342,279	1,897,669	86,085
1953-54 .. ..	687,946	1,466,323	2,154,269	96,079

In the foregoing tables sales include goods transferred to stock for sale by retail, goods imported by persons other than registered taxpayers, and goods used in the business of the taxpayer. Exempt sales relate to goods exempted from sales tax under the Sales Tax (Exemptions and Classifications) Act 1935-1954. The figures shown in the foregoing tables do not represent the total sales of all commodities, as vendors trading in exempt goods only are not required to be registered and consequently the volume of their sales is not included in the statistics above. In addition non-taxable sales (i.e. goods sold by one registered taxpayer to another registered taxpayer) are excluded.

(c) *Land Tax.* Commonwealth Land Tax was levied annually from 1910-11 to 1951-52 on the unimproved value of land. It was abolished from 1st July, 1952. For rates of tax payable from 1942-43 to 1951-52, see Official Year Book No. 40, 1954, page 669. Receipts for the years 1938-39 and 1949-50 to 1953-54 were as follows:—1938-39, £1,489,000; 1949-50, £4,210,000; 1950-51, £3,591,000; 1951-52, £6,199,000; 1952-53, £1,250,000; 1953-54, £221,000.

(d) *Pay-roll Tax.* The Pay-roll Tax Assessment Act 1941-1942 and the Pay-roll Tax Act 1941 imposed a pay-roll tax of 2½ per cent. on all wages and salaries in excess of £20 per week paid by an employer after 30th June, 1941. Employers who are liable for tax are required to register and to furnish a monthly return of all wages paid. These measures formed part of the Commonwealth scheme of child endowment, the revenue from the tax being designed to provide part of the money required. The exemption was increased to £80 per week (£4,160 per annum) from 1st October, 1953 and to £120 per week (£6,240 per annum) from 1st September, 1954.

Receipts from pay-roll tax for the years 1949-50 to 1953-54 were, 1949-50, £22,728,000; 1950-51, £28,721,000; 1951-52, £37,170,000; 1952-53, £40,171,000; 1953-54, £40,384,000.

(e) *Income Taxes.* Details of taxes on income are given in Division E of this Chapter.

(f) *Wool Sales Deduction.* The Wool Sales Deduction Act 1950 and the Wool Sales Deduction (Administration) Act 1950 came into operation on 2nd December, 1950 and required that a deduction be made from the sale value of wool sold or exported, the amount deducted being set off against the Income Tax and Social Services Contribution assessed in respect of the income of the year 1950-51. These Acts were repealed by the Wool Sales Deduction Legislation Repeal Act 1951 which came into operation on 17th November, 1951, and provided for the refund to producers, etc., of amounts paid on the value of wool sold or otherwise disposed of, after 30th June, 1951. The amount of deduction collected was—1950-51, £109,531,000; 1951-52, £5,963,000. In 1952-53 and 1953-54 refunds amounted to £2,223,000 and £239,000 respectively.

(g) *Estate Duty.* The Commonwealth Estate Duty was first levied in 1914. Particulars of exemptions and the rates imposed prior to October, 1953 are given in earlier issues of the Year Book (see No. 40, page 670).

Estate duty, under the Estate Duty Assessment Act 1914-1953, operative from 28th October, 1953 is assessed on the net value of the estate less a statutory exemption determined in accordance with the following formula:—(a) where the whole of the estate passes to the widow, children or grand-children of the deceased, the sum of £5,000 decreasing by £1 for every £3 by which the value exceeds £5,000 and ceasing to apply at £20,000; (b) where no part of the estate passes to the widow, children or grand-children, the sum of £2,500 decreasing by £1 for every £3 by which the value exceeds £2,500 and ceasing to apply at £10,000; and (c) where part only of the estate passes to the widow, children or grand-children, the statutory exemption is to be calculated proportionately under (a) and (b).

This Act also provides, from 27th June, 1950, for a special deduction of £5,000 from estates of persons who served in Korea or Malaya.

The rates of duty levied under the Estate Duty Act 1914-1941 increase as the value of the estate increases as follows:—£1 to £10,000, 3 per cent.; £10,001 to £20,000, 3 per cent. to 6 per cent.; £20,001 to £120,000, 6 per cent. to 26 per cent.; £120,001 to £500,000, 26 per cent. to 27.9 per cent.; over £500,000, 27.9 per cent.

Total collections for the years 1938-39 and 1949-50 to 1953-54 were as follows:—1938-39, £1,915,000; 1949-50, £6,054,000; 1950-51, £6,401,000; 1951-52, £7,778,000; 1952-53, £8,393,000; 1953-54, £9,825,000.

Particulars of the number and value of estates and duty assessed, for each of the assessment years 1938-39 and 1949-50 to 1953-54, are given in the following table:—

## ESTATE DUTY ASSESSMENTS.

Particulars.	1938-39.	1949-50.	1950-51.	1951-52.	1952-53.	1953-54.
Number of Estates ..	9,081	13,982	15,680	16,209	19,003	19,621
Gross Value Assessed £'000	65,699	117,534	134,074	144,073	175,672	187,905
Deductions .. £'000	12,630	19,219	22,714	22,083	27,795	31,010
Statutory Exemption £'000	..	16,271	18,175	18,672	22,566	22,976
Dutiable Value .. £'000	53,069	82,044	93,185	103,318	125,311	133,919
Duty Payable .. £	2,002,283	5,992,700	6,933,608	7,797,967	9,248,925	10,088,841
Average dutiable value £	5,482	5,868	5,943	6,313	6,373	6,825
Average duty per estate £	207	429	442	479	470	514

(h) *Gift Duty.* The Gift Duty Assessment Act 1941-1947 and the Gift Duty Act 1941-1947 impose a gift duty on all gifts made after the 29th October, 1941. A gift has been defined as any disposition of property, which is made otherwise than by will, without adequate consideration in money or money's worth. There is a liability on both the donor and the donee to furnish a return, and both are jointly and severally liable for payment of the duty.

The following rates of duty are levied under the Gift Duty Act 1941-1947 and relate to the value of all gifts made by the donor within a period of eighteen months:—Not exceeding £2,000, nil; £2,001 to £10,000, 3 per cent.; £10,001 to £20,000, 3 per cent. to 6 per cent.; £20,001 to £120,000, 6 per cent. to 26 per cent.; £120,001 to £500,000, 26 per cent. to 27.9 per cent.; £500,001 and over, 27.9 per cent.

An amendment which operated from 3rd June, 1947 provides that gift duty will not exceed one-half of the amount by which the value of the gift exceeds £2,000.

Total receipts from gift duty for the years 1949-50 to 1953-54 were as follows:—1949-50, £745,000; 1950-51, £1,044,000; 1951-52, £1,202,000; 1952-53, £1,162,000; 1953-54, £1,386,000.

(i) *Entertainments Tax.* The Commonwealth levied an Entertainments Tax from 1st October, 1942 to 30th September, 1953. Details of rates are given in earlier issues of the Official Year Book (see No. 40, pages 672 and 673).

Entertainments tax receipts during the five years 1949-50 to 1953-54 were as follows:—1949-50, £4,698,000; 1950-51, £5,148,000; 1951-52, £6,161,000; 1952-53, £6,708,000; 1953-54, £1,977,000.

(j) *Flour Tax.* Particulars of the rates of flour tax which operated from 4th December, 1933 to 21st December, 1947 are given in Official Year Book No. 37, pages 618 and 619. Because of the rise in wheat prices the rate was declared to be nil as from 22nd December, 1947.

(k) *Wool Levy.* The Wool Tax Act 1936 and Wool Tax Assessment Act 1936 provided for a levy on all wool grown in Australia and shorn on or after 1st July, 1936. Details of this levy are given in earlier issues of the Official Year Book. This levy was suspended from 1st July, 1946 until 30th June, 1952 while the Wool Contributory Charge was imposed.

However, with the repeal of the Wool Contributory Charge, a levy on wool produced in Australia was re-introduced from 1st July, 1952. The Wool Tax Acts (Nos. 1 and 2) of 1952 provide for the payment of a levy of four shillings per bale until 30th June, 1953, after which date the rate of tax may be varied within prescribed limits. There was no variation to 30th June, 1954. The purpose of the tax is to provide funds for publicity and research previously provided by the Wool Contributory Charge. Collections during 1952-53 and 1953-54 were £675,000 and £772,000 respectively.

(l) *Wool Contributory Charge.* The Wool (Contributory Charge) Act 1945 and the Wool (Contributory Charge) Assessment Act 1945 imposed a charge on all wool produced in Australia and sold, manufactured or exported. Wool sold by the Australian Wool Realization Commission was not liable to the charge. Details of the rate of the charge are given in earlier issues of the Official Year Book (see No. 40, page 675).

The various Wool (Contributory Charge) Acts were repealed by the Wool Tax Assessment Act of 1952 and the charge superseded by the wool levy. Collections during the years 1949-50 to 1952-53 were as follows:—1949-50, £1,439,000; 1950-51, £44,844,000; 1951-52, £2,230,000, and 1952-53, £28,000.

(m) *Wheat Export Charge and Wheat Tax.* A summary of the provisions of the Wheat Export Charge Acts 1946, 1948 and 1952 is contained in previous issues of the Official Year Book (see No. 40, p. 676 and No. 41, p. 604).

The Wheat Export Charge Act 1954 repealed previous Acts and provided for an export charge on wheat and wheat products for the seasons 1953-54 to 1957-58 inclusive. The charge levied is based on the difference between the cost of production and the export price with a maximum levy of 1s. 6d. per bushel. Under the Wheat Industry Stabilization Act 1954, to which the Wheat Export Charge Act is complementary, the Commonwealth Government guarantees a return to wheat-growers of the ascertained cost of production in respect of up to 100 million bushels of wheat exported from Australia during each of the five seasons. Collections from the wheat export charge are paid into the Wheat Prices Stabilization Fund, out of which payments will be made to the Australian Wheat Board, when required, for the purpose of building up the average export price for any season to the guaranteed price. If the Fund is exhausted, additional payments shall be made from the Consolidated Revenue Fund.

Collections of wheat export charge amounted to £12,633,000 in 1949-50; £13,353,000 in 1950-51; £12,202,000 in 1951-52 and £8,139,000 in 1952-53.

(n) *Miscellaneous Export Charges.* These consist of charges levied on exports of apples and pears (Apple and Pear Export Charges Act 1938-1947), canned fruits (Canned Fruits Export Charges Act 1926-1952), dairy produce (Dairy Produce Export Charges Act 1924-1937), dried fruits (Dried Fruits Export Charges Act 1924-1929), eggs (Egg Export Charges Act 1947) and on grapes used in the manufacture of wine (Wine Grapes Charges Act 1929-1954). The collections are paid into funds to be applied for the purposes of Export Boards established under various Acts, in controlling the quantity and quality of produce exported.

Collections for the last five years were as follows:—1949-50, £89,000; 1950-51, £76,000; 1951-52, £72,000; 1952-53, £166,000 and 1953-54, £168,000.

(o) *Stevedoring Industry Charge.* The Stevedoring Industry Charge Act 1947 and the Stevedoring Industry Charge Assessment Act 1947 imposed a charge of 4½d. per man-hour on the employer of a waterside worker after 22nd December, 1947.

The amounts received are paid to the Stevedoring Industry Board for the payment of attendance money to waterside workers and for other expenses of the Board.

Since 1947 the charge has been amended as follows:—11th October, 1949 a reduction to 2½d. per man-hour; 11th December, 1951 an increase to 4d. per man-hour; 28th October, 1952 an increase to 11d. per man-hour and from 4th May, 1954 a reduction to 6d. per man-hour.

Collections during the years 1949-50 to 1953-54 were as follows:—1949-50, £499,000; 1950-51, £420,000; 1951-52, £551,000; 1952-53, £1,144,000 and 1953-54, £1,630,000.

(p) *Gold Tax.* Particulars of the Gold Tax which operated from 15th September, 1939 to 20th September, 1947 are given in Official Year Book No. 39, page 767.

3. *Business Undertakings.*—(i) *Postmaster-General's Department.* Particulars of net receipts for each of the financial years 1938-39 and 1949-50 to 1953-54 are contained in the following table :—

**POSTMASTER-GENERAL'S DEPARTMENT : NET RECEIPTS.**

(£'000.)

Further particulars to 1953-54 are given in Chapter VII.—Transport and Communication (Division B. Government Railways).

4. Other Sources of Revenue.—Revenue derived by the Consolidated Revenue Fund from the Territories of the Commonwealth during 1953-54 amounted to £2,195,000 (Australian Capital Territory, £1,548,000; Northern Territory, £647,000). Of other sources of revenue, amounting in 1953-54 to £45,019,000, the following are noteworthy:—Interest, £8,797,000; Civil Aviation, £4,313,000; Net Profit on Australian Note Issue, £5,707,000; Australian Shipping Board—Transfer of Surplus Funds £4,000,000; Joint Coal Board—Repayment of Advances £3,342,000 and Surplus Balances of Trust Accounts, £4,190,000.

### Division III.—Expenditure.

1. Details of Expenditure from Consolidated Revenue.—The following table shows details of the expenditure from the Consolidated Revenue Fund during the years 1938-39 and 1949-50 to 1953-54.

#### COMMONWEALTH CONSOLIDATED REVENUE FUND : EXPENDITURE. (£'000.)

(a) Excludes debt charges and Defence Division of the Department of the Treasury. (b) Invalid and Age Pensions and Maternity Allowances. (c) Provided in part from Postmaster-General's Department. Votes and balance from Broadcasting Trust Account. (d) In addition, £24,911,000 was provided from Loan Fund. (e) Includes assistance to primary producers. (f) Excludes surplus £13,400,000 transferred to War Pensions Trust Account. (g) Excludes surplus £56,271,000 transferred to Debt Redemption Reserve Trust Account.

Further details of the expenditure in each section are given in paragraphs 2 to 11 following.

A graphical representation of the revenue and expenditure of the Commonwealth Consolidated Revenue Fund appears on page 793. In this diagram Public Debt Charges (interest and debt redemption, etc.) are shown as a separate item, whereas in the table above these charges are included in the section to which they relate.

Details of Commonwealth expenditure on public debt charges for 1938-39 and 1949-50 to 1953-54 are shown in the following table:—

(a) Excludes payments to or for States under the Financial Agreement. See pages 783-86.

(b) Includes repatriation debt. (c) Redemption, conversion and loan management, etc., expenses.

2. **Defence Services.**—Details of the expenditure on Defence Services by the Departments of Defence, Navy, Army, Air, Supply and Defence Production are shown in the following table. The expenditure shown under Department of Supply includes the former Departments of Shipping and Fuel, Supply and Development, Supply and Shipping, and Munitions. This table covers expenditure by the service and associated departments only, and includes the cost of maintaining forces in Korea and at other overseas posts.

The figures represent the combined expenditures from revenue, trust and loan fund for the years 1938-39 and 1949-50 to 1953-54.

(a) Excludes expenditure on debt charges and on Defence Division of the Department of the Treasury.  
 (b) As a dissection is not available expenditure on War and Repatriation Services (see page 775) has been deducted from this item instead of from departmental expenditure above. (c) Included with Department of Supply prior to 1951-52. (d) Paid to credit of Defence Equipment and Supplies Trust Account. (e) Expenditure from excess receipts of previous years appropriated for Defence Equipment Trust Account.

NOTE.—Minus sign (—) indicates excess of transfers or repayments over expenditure.

3. War and Repatriation Services.—Expenditure from Consolidated Revenue and Loan Fund for War and Repatriation Services and Post-war Charges in relation to both the 1914-18 and 1939-45 Wars is shown in the following table for the years 1938-39 and 1949-50 to 1953-54. Expenditure on subsidies, which in the year 1949-50 were paid from the War and Repatriation Votes, has been excluded from this table and is

dealt with separately in paragraph 4. Expenditure on the maintenance of forces in Korea and at other oversea posts and the cost of arms and equipment is included in Defence Services (*see* paragraph 2).

(a) Excludes Interest and Redemption on War (1914-18) Debt due to the United Kingdom Government, payment of which was suspended in 1931. (b) From Service Departments and Australian Soldiers' Repatriation Trust Account. (c) Represents expenditure on War and Repatriation Services by Defence Departments (*see* page 774) for which dissection is not available. (d) Excludes International Monetary Fund Charges. (e) Munitions, stores, etc., supplied to the Government of United Kingdom and other administrations. (f) Includes repayments and waiver of war-time indebtedness of other administrations. (f) Receipts credited to Defence revenue.

NOTE.—Minus sign (—) indicates excess of credits or repayments over expenditure.

4. Subsidies and Bounties.—The following table shows details, for the years 1938-39 and 1949-50 to 1953-54, of Commonwealth expenditure from revenue on subsidies, bounties and assistance to primary producers. Expenditure on special relief such as drought, frost, flood and bush fire, etc. (*see* table, p. 778, for more important items), is not included, nor is expenditure from the proceeds of certain taxes on primary products and profits from marketing schemes, which have been paid to trust funds for the purpose of price or other stabilization schemes or for distribution to producers (*see* paragraph 11). Further information relating to these schemes and other assistance to, page 783 primary producers is given in Chapter XXI—Agricultural Production.

Details of price stabilization subsidies and of various forms of assistance to primary producers for earlier years may be found on pages 414 and 1014-15 respectively of Official Year Book No. 38.

(a) Dairy products.

(b) Includes Raw Cotton Bounty, £115,000 and Sulphur Bounty, £88,000.

5. **Total Cost of Departments.**—Expenditure under this heading covers expenditure by departments, other than the defence and repatriation departments and business undertakings, on administrative services and other activities. Expenditure on defence, (other than interest and debt redemption in respect of the defence departments which is included in the expenditure of the Department of the Treasury), war and repatriation services, subsidies and bounties, social services paid from the National Welfare Fund, business undertakings, Commonwealth territories and capital works and services is excluded.

Information on the functions of departments and the acts administered by the Ministers of departments was published in Official Year Book No. 37, pages 76-86, and particulars of subsequent changes in departmental structure are given in later issues.

In the following table details are given of that expenditure on the branches of each department which might be termed running expenses. Miscellaneous expenditure and debt charges, etc., are not included in this table but in the one following.

(a) Allocated to Departments.  
with Prime Minister's Department.

(b) Included with Department of the Interior.

(c) Included

The following table gives details of miscellaneous expenditure included in the total cost of departments. It covers such items as interest and debt redemption in respect of departments (including defence departments) which is included under expenditure by the Department of the Treasury, repairs and maintenance of buildings, and special expenditure for which the Commonwealth is committed, such as contributions to international organizations, payment of Commonwealth scholarships, etc. The costs of social services, which are paid from the National Welfare Fund, are not included in this table (see p. 780 for this information).

Total, All Departments . . . . .	5,393	26,868	29,406	35,248	35,337	32,811

(a) Includes rent, repairs and maintenance, pension and superannuation contributions. Interest and debt redemption in respect of the various departments is included under the Department of the Treasury. (b) League of Nations. (c) Unallocated debt charges, in respect of all departments including defence departments. (d) Included with Department of the Interior. (e) Provided under Defence Services. (f) Included with Prime Minister's Department.

6. National Welfare Fund.—The National Welfare Fund was established for the purpose of providing a fund for the payment of Commonwealth social services benefits. During the year 1949-50 an amount equivalent to the total collections of pay-roll tax and social services contribution was paid to the fund from Consolidated Revenue. During 1950-51 the social services contribution was amalgamated with the normal income tax and it became necessary to base the contributions on another formula. For the year 1950-51 the amount paid to the fund was the total of collections of pay-roll tax and social services contribution plus £30,000,000. In 1951-52 the amount paid to the fund was the amount paid in 1950-51 increased in the same proportion as collections of pay-roll tax increased over the collections of pay-roll tax in 1950-51. By an amendment to the National Welfare Fund Act 1943-1950, the amount to be paid to the fund in 1952-53

and subsequent years was changed to the amount of moneys paid out of the fund. In addition to these payments from Consolidated Revenue the fund received a small amount of interest from investments.

In the following table details are given of the income and expenditure of the National Welfare Fund and the balance in the fund at the end of each year for the years 1949-50 to 1953-54. A dissection of expenditure into the various types of benefits is given in Chapter XV.—Welfare Services (*see* pages 545 and 546).

**NATIONAL WELFARE FUND: RECEIPTS, EXPENDITURE AND BALANCES.**  
(£'000.)

Year.	Income.			Expenditure.	Balance in Fund at end of Year.
	Contribution from Consolidated Revenue.	Interest on Investments.	Total.		
1949-50 .. ..	123,288	751	124,039	92,804	131,115
1950-51 .. ..	132,680	985	133,665	114,983	149,797

1953-54 .. ..	176,565	2,094	178,659	176,565	188,930

7. **National Debt Sinking Fund.**—During 1951-52 surplus revenue of £98,500,000 was paid to the National Debt Sinking Fund for investment in a special loan raised to finance State works expenditure.

8. **Business Undertakings.**—(i) *Postmaster-General's Department.* From the beginning of 1949-50, Broadcasting Services were separated from the Postmaster-General's Department. Prior to 1949-50 part of the expenditure on these services was included with the Postmaster-General's Department. Details of the expenditure of this Department for the years 1938-39 and 1949-50 to 1953-54 are given in the following table :—

**POSTMASTER-GENERAL'S DEPARTMENT: EXPENDITURE.**  
(£'000.)

Item.	1938-39.	1949-50.	1950-51.	1951-52.	1952-53.	1953-54.
Salaries, stores and materials, mail, engineering services, etc.	11,485	39,919	49,670	58,686	64,157	66,619

Rents, repairs, etc. . . .	114	599	733	850	984	876
Interest and Exchange ..	1,758	1,281	1,454	1,437	1,349	1,220
Debt Redemption ..	1,129	2,048	2,150	2,257	2,371	2,313
<b>Total Working, etc., expenses .. ..</b>	<b>14,878</b>	<b>44,512</b>	<b>54,802</b>	<b>64,291</b>	<b>69,917</b>	<b>72,244</b>
<b>Capital Works and Services ..</b>	<b>3,851</b>	<b>19,792</b>	<b>34,897</b>	<b>28,819</b>	<b>28,427</b>	<b>25,986</b>
<b>Grand Total .. ..</b>	<b>18,729</b>	<b>64,304</b>	<b>89,699</b>	<b>93,110</b>	<b>98,344</b>	<b>98,230</b>

Further details of expenditure for 1953-54 on account of the Postmaster-General's Department appear in Chapter VII.—Transport and Communication (Division I, Poste, Telegraphs, Telephones and Wireless).

(ii) *Broadcasting Services.* Since 1949-50 all expenditure on broadcasting services has been brought together in one section. Previously these services had been financed partly by the Postmaster-General's Department and partly from the Wireless Broadcasting Trust Account. Details of expenditure for the years 1949-50 to 1953-54 are shown in the following table.

**COMMONWEALTH BROADCASTING SERVICES : EXPENDITURE.**  
(£'000.)

Grand Total .. .. .	1,493	3,274	4,842	6,662	8,690	7,519

(a) Includes loans redemption and conversion expenses, 1949-50, £7,000; 1952-53, £1,000.

Additional details of the financial operations of the Commonwealth Railways to 1953-54 are given in Chapter VII.—Transport and Communication (Division B, Government Railways).

9. *Territories.*—The following table shows the expenditure on account of Commonwealth Territories for the years 1938-39 and 1949-50 to 1953-54. The Australian Capital Territory is administered by the Department of the Interior, and the Department of Territories controls the external territories and the Northern Territory. The expenditure has been grouped in one table for convenience. Information in greater detail will be found in the *Finance Bulletin* issued by this Bureau.

**COMMONWEALTH TERRITORIES : EXPENDITURE.**  
(£'000.)

(a) Includes properties transferred from the States. (b) Includes Strategic Stores and Equipment Reserve, 1950-51, £57,048,000; 1951-52, £10,049,000. (c) Excludes Amalgamated Wireless (Aust.) Ltd. and Commonwealth New Guinea Timbers Ltd. included under Postmaster-General's Department and Territories respectively. (d) Excludes Overseas Telecommunications Commission included under Postmaster-General's Department. (e) Not available. (f) From excess receipts of previous years and National Defence Contributions Trust Account.

NOTE.—Minus sign (—) indicates excess of credits or repayments over expenditure.

11. Payments to or for the States.—(i) *General.* An outline of the provisions of the Constitution requiring the Commonwealth to make payments to the States, and of the systems which followed, is given in earlier issues of the Official Year Book (*see* No. 37, pages 633 to 638). In the following paragraphs reference is made to the arrangements at present in operation.

(ii) *Amounts Paid.* (a) *Year 1953-54.* The table below shows particulars of the amounts paid to each of the States as grants for the several purposes referred to in subsequent paragraphs.

COMMONWEALTH PAYMENTS TO OR FOR THE STATES, 1953-54.(a)  
(£'000.)

Particulars.	N.S.W.	Vic.	Q'land.	S.A.	W.A.	Tas.	Total.

(a) Excludes relief to primary producers and other payments for medical research, etc. (b) Paid to National Debt Sinking Fund. (c) Excludes expenditure on strategic roads and road safety practices, 1949-50 to 1953-54, £600,000.

Particulars of special Commonwealth grants for the relief of primary producers are not included in the foregoing tables. For details *see* Chapter XXI—Agricultural Production. *See also* para. 4., Subsidies and Bounties, and para. 12., Other Expenditure of this Division.

(iii) *Financial Agreement.* Details of the Financial Agreement between the Commonwealth and the States are given in Official Year Book No. 37, pages 685 to 690. Under this Agreement the Commonwealth undertook to contribute £7,584,912 per annum towards interest payable on the State Debts for a period of 58 years from 1st July, 1927. This amount is to be distributed amongst the States as follows:—New South Wales, £2,917,411; Victoria, £2,127,159; Queensland, £1,096,235; South Australia, £703,816; Western Australia, £473,432; Tasmania, £266,859.

These amounts are equal to the sums paid by the Commonwealth to each State in the year 1926–27 at the rate of 25s. per head of population, the rate at which the Commonwealth had contributed annually to the States since 1st July, 1910 as compensation for the States relinquishing, after Federation, the right to levy Customs and Excise Duties.

In addition, under the Financial Agreement, the Commonwealth agreed to make certain contributions to the National Debt Sinking Fund for redemption of State Debts. Details of these payments are given in part D of this Chapter (§ 2, page 805).

(iv) *Special Grants.* The Constitution provides in Section 96 for the granting of special financial assistance to the States. Prior to 1933 financial assistance of varying amounts was granted by the Commonwealth to South Australia, Western Australia and Tasmania. Details of this may be found in earlier issues of the Official Year Book (see No. 40, page 695).

In 1933 the Commonwealth Government appointed the Commonwealth Grants Commission of three members to inquire into and report upon claims made by any State for a grant of financial assistance and any matters relevant thereto.

Applications have been received from South Australia, Western Australia and Tasmania each year from 1933 onwards and the recommendations of the Commission in respect of the years 1938–39 and 1950–51 to 1954–55 are shown in the following table. Commencing with 1949–50 the Commission has divided the grants recommended into two parts. One part is the Commission's estimate of the indispensable need of the claimant State for the year in which the payment is to be made after allowing a sufficient margin for safety. The other part is an adjustment of this estimate for an earlier year after an examination of the audited accounts for that year. Thus the grants for 1954–55 include an estimate of the indispensable need of the claimant State for 1954–55 and an adjustment to the estimated grant for 1952–53.

(a) Adjustment to estimated grant paid two years previously.

(v) *Tax Reimbursement Grants.* Details of the States Grants (Income Tax Reimbursement) Act 1942 and the States Grants (Entertainments Tax Reimbursement) Act 1942 are given in earlier issues of the Official Year Book (see No. 37, pages 635 to 637). These Acts provided for grants to the States as compensation for vacating the fields of Income Tax and Entertainments Tax. Grants under these Acts ceased after 1945–46 and were replaced by grants under the States Grants (Tax Reimbursement) Act 1946–1948.

This Act provided for reimbursement grants of certain specified amounts to be paid to the States during 1946-47 and 1947-48. For 1948-49 and subsequent years the grants were assessed on the aggregate paid in 1947-48 (£45,000,000) increased in accordance with a formula based on increases in population and average wages. Details of the formula and of the treatment of arrears of State income taxes are given in earlier issues of the Official Year Book (*see* No. 40, page 696).

In 1950-51 an amount of £5,000,000 was paid to the States under the States Grants (Additional Tax Reimbursement Act) 1950. As this was considered as a non-recurring grant the formula outlined above was not amended.

(vi) *Additional Financial Assistance, 1948-49 to 1953-54.*—(a) *Coal Strike Emergency Grant.* During 1949-50 State business undertakings suffered considerable losses as a result of the coal strike. Towards meeting these losses the Commonwealth made grants totalling £8,000,000 to the States. The amounts paid to each State were:—New South Wales, £3,261,000; Victoria, £1,830,000; Queensland, £1,309,000; South Australia, £687,000; Western Australia, £661,000; and Tasmania, £252,000.

(b) *Special Financial Assistance Grants.* During the years 1950-51 to 1953-54 there were heavy additions to the financial needs of the States and special assistance grants amounting to £15,000,000, £33,577,000, £27,146,000 and £21,915,000 respectively were made. For details of amounts paid to each State during 1953-54 *see* page 783 and for payments during 1950-51, 1951-52 and 1952-53 *see* Official Year Book No. 39, page 791, No. 40, page 698 and No. 41, page 619.

(vii) *Grants for Road Construction.* (a) *Main Roads Development Act 1923-25, Federal Aid Roads Act 1926, 1931 and 1936, Federal Aid Roads and Works Act 1937, Commonwealth Aid Roads and Works Act 1947-1949 and Commonwealth Aid Roads Act 1950.* Details of these Acts are given in earlier issues of the Official Year Book (*see* No. 38, pp. 787-8 and No. 41, p. 62) and in the *Finance Bulletins* published by this Bureau.

(b) *The Commonwealth Aid Roads Act 1954* repealed the Commonwealth Aid Roads Act 1950 and provided for payment to the States, for a period of five years from 1st July, 1954, an amount equivalent to 7d. per gallon on all petrol except aviation spirit which is entered for home consumption and which is subject to Customs and Excise duties as specified in Customs Tariff Item 229c and Excise Tariff Item 11(A) 2 and (B) 2. Out of this amount, the following grants are to be made to the States, for construction and maintenance of roads and the purchase of roadmaking plant:—

(a) Sixty per cent. of the amount, less £900,000, per annum for expenditure on roads, and

(b) Forty per cent. of the amount for expenditure on roads in rural areas other than highways, trunk or main roads.

The States may spend from the Commonwealth road grants up to £1,000,000 per annum on works connected with transport by road or water. Five per cent. of the grants is payable to Tasmania and the remainder is to be divided among the other five states three-fifths according to population and two-fifths according to area. In addition the Commonwealth may spend each year £800,000 on strategic roads and £100,000 on the promotion of road safety practices.

(viii) *Other Payments.* (a) *Price Control Reimbursement.* These grants were made from 1948-49 to 1953-54 to reimburse the States for expenditure incurred in administering prices, rents and land sales controls. An amount of £84,000 was paid by the Commonwealth to the States during the year ended 30th June, 1954 to cover certain arrears.

(b) *Western Australian Waterworks.* The Western Australia (Water Supply) Act 1948 provides for grants to Western Australia not exceeding an aggregate of £2,150,000 for the development of the agricultural areas, great southern towns and Goldfields Water Supply scheme. The amount provided by the Commonwealth is not to exceed half the total expenditure on the scheme.

(c) *Coal Mining Industry—Long Service Leave.* To provide funds for the payment for long service leave in the coal mining industry the Commonwealth imposed an excise duty of 6d. per ton on coal produced from 1st November, 1949. The rate of duty was raised to 7½d. per ton from 26th August, 1951 and to 8d. per ton from 30th May, 1952. The proceeds of this excise duty are paid to a trust fund out of which the States are reimbursed for expenditure incurred in granting long service leave to employees in the coal mining industry.

(d) *Imported Houses.* A subsidy is paid to the States for houses imported by a State or a housing authority of a State after 12th October, 1949. The amount of the subsidy is the amount by which the cost of imported houses exceeds the cost of building comparable houses from local materials. The subsidy is limited to £300 per house and in aggregate to 30,000 houses or £9,000,000.

(e) *Encouragement of Meat Production.* To develop meat production in Queensland and Western Australia grants are made to these States for the provision of improved roads and other facilities for the movement of live-stock. Provision is made for the Commonwealth to meet the cost of the construction and improvement of certain specified roads in both States and the construction of eight cattle loading and unloading points in Queensland. Provision is also made for the Commonwealth to meet half the cost of improving watering facilities on specified stock routes in both States. The amount of the grants for improving watering facilities on stock routes is limited to £75,000 in Queensland and £31,500 in Western Australia. These limits were extended as from 20th April, 1954 to £150,000 in Queensland and £50,000 in Western Australia.

(f) *Grants to Universities.* The States Grants (Universities) Act 1951, provides for grants to be made to the States for the purpose of financial assistance to Universities during the three years 1950–51 to 1952–53. This Act was superseded by the States Grants (Universities) Act 1953 which came into operation on 1st January, 1953, and which increased the assistance payable during 1952–53 and 1953–54.

**12. Other Expenditure.**—Expenditure under this item represents the proceeds of special industry taxes and profits from marketing schemes which are paid to trust funds or other authorities for the purposes of the industries concerned. Advance payments in respect of sales of uranium paid to the Atomic Energy Commission are also included.

Information relating to the taxes levied is given in Division II.—Revenue, of this section (see pages 768, 769, and 770). Details of expenditure from the trust funds are given in § 3., Commonwealth Trust Funds. Details of the price stabilization and other assistance schemes for primary industries may be found in Chapter XXI.—Agricultural Production. Details of expenditure from the Consolidated Revenue Fund during the last five years are given in the following table.

### § 4. Commonwealth Loan Fund.

Brief historical notes relating to the Commonwealth Loan Fund are given in earlier issues of the Official Year Book (*see* No. 37, page 640). In the following table details are given of the net expenditure from the Commonwealth Loan Fund for the years 1938-39 and 1949-50 to 1953-54 and of the aggregate expenditure to 30th June, 1954. The figures shown represent "net" loan expenditure, i.e., after adjustments have been made for refunds of amounts expended in earlier years.

(b) Excludes amounts charged to War Loan Fund. (c) Includes administration and other public buildings, Australian Capital Territory.

(d) Payment to National Debt Sinking Fund. *See* pages 818 and 819. (e) Payment to Swiss Loan Trust Account. *See* page 818.

NOTE.—Minus sign (—) indicates excess of repayments to Loan Fund.

Information relating to the Public Debt of the Commonwealth is given in part D, Commonwealth and State Public Debt, of this chapter.

## B. STATE FINANCE.

### § 1. General.

1. **Functions of State Governments.**—In comparing the financial returns of the States, allowances must be made for the various functions discharged by the respective Governments, and for local conditions in each case. Direct comparisons of the revenue, expenditure and debt of the individual States are difficult, owing to the fact that functions which in one State are assumed by the Central Government are in another relegated to

municipal or semi-governmental bodies which are vested with certain defined borrowing powers and whose financial transactions are not included with those of the Central Government. Care, therefore, is needed in making comparisons, and the particulars contained in this Chapter should be read with those contained in Chapter XVIII.—Local Government. In many respects, moreover, the budgets of the Australian Governments differ materially from those of most European countries, owing to the inclusion therein of the revenue and expenditure of departments concerned in rendering public services, such as railways, tramways, water supply, etc., which in other countries are often left to private enterprise.

2. **Accounts of State Governments.**—The various financial transactions of the States are in each case mainly concerned with one or other of three Funds—the “Consolidated Revenue Fund”, the “Trust Fund”, and the “Loan Fund”. All revenue (except certain items paid into special funds) collected by the State is paid into its Consolidated Revenue Fund, from which payments are made under the authority of an annual Appropriation Act passed by the Legislature, or by a permanent appropriation under a special act.

Figures in § 2 following relating to New South Wales represent the transactions of the Consolidated Revenue Fund and the business undertakings included in the annual budget papers. These latter are as follows:—Railways, Tramways and Omnibuses, and Sydney Harbour Trust Section of the Maritime Services Board. Adjustments have been made to the Budget figures, however, in order to obviate duplications caused by inter-fund payments and to maintain uniformity from year to year in the presentation of statistics. Particulars for all other States relate to the transactions of the Consolidated Revenue Fund.

The Trust Fund comprises all moneys held in trust by the Government, and includes such items as superannuation funds, road funds, insurance companies' deposits, etc.

The Loan Fund is debited with all loan moneys raised by the State, and credited with the expenditure therefrom on public works or other purposes.

3. **Inter-relation of Commonwealth and State Finances.**—A statement in some detail, covering the inter-relation of Commonwealth and State Finances during the period from the inception of Federation to the passing of the Financial Agreement Act 1928, was published in Official Year Book No. 22, pages 379–80. Changes in the financial relations between the Commonwealth and States since the passing of the Financial Agreement Act have been described in issues of the Official Year Book from year to year (*see also* pages 805–807).

## § 2. State Consolidated Revenue Funds.

### Division I.—Revenue.

1. **General.**—The principal sources of State revenue are:—

(a) Taxation; (b) The business undertakings controlled by the State Governments; (c) Sale of and rental from crown lands; (d) Payments by Commonwealth Government under the Financial Agreement, Special Grants and Tax Reimbursement Acts, etc.; (e) Interest on advances; and (f) Miscellaneous sources, comprising fines, fees, etc.

Of these sources, that yielding the largest revenue for the States as a whole is the group of business undertakings, the principal contributors being the government railways and tramways. Next in magnitude are Commonwealth payments under the Tax Reimbursement Acts, followed in order by taxation receipts, Commonwealth special financial assistance and special grants, and lands receipts. Since the introduction in 1942–43 of the uniform tax scheme, Commonwealth payments under the Income and Entertainments Tax Reimbursement Acts and, from 1946–47, under the Tax Reimbursement Act, have replaced revenue previously received from income and entertainment taxes.

2. **Revenue Received.**—The following table shows particulars of the total amounts and the amounts per head of consolidated revenue received by the several States during the years 1938–39 and 1949–50 to 1953–54.

## STATE CONSOLIDATED REVENUE.

(a) See § 1 para. 2, page 789. (b) In all States certain taxation collections are not paid into Consolidated Revenue Fund. For total collections see next page. (c) Includes payments under Financial Agreement, Special Grants, Prices Control Reimbursement Grants and Special Financial Assistance.

(ii) *Revenue from Taxation. (a) General.* The following table shows, for the year 1953-54, particulars of all State taxation collections irrespective of whether such moneys have been paid into the Consolidated Revenue Funds or not. For this reason the particulars hereunder differ from those shown in the tables relating to the Consolidated Revenue Funds and represent a comprehensive statement of all taxation collections by the Government in each State. In this and the succeeding statements of taxation, the collections have been grouped according to the nature of the tax rather than the method of collection. For example stamp duties on betting tickets and bookmakers' licences have been included under "Racing Tax" instead of under "Stamp Duties" and "Licences" respectively. Commonwealth payments under the State Grants (Tax Reimbursement) Act are not included.

(b) 1938-39 and 1949-50 to 1953-54. Prior to federation, customs and excise duties constituted the principal source of revenue from taxation. Thereafter, until the introduction of the uniform income tax scheme in 1942-43, the most productive State taxes were the various income taxes which, in 1941-42, included unemployment relief, State development and hospital taxes. Since 1941-42 the States have been reimbursed by the Commonwealth for the revenue lost by the discontinuance of these taxes. Details of the reimbursement grants are given on pp. 784 and 790. Information relating to the State income taxes which were levied prior to 1942-43 may be found in earlier issues of the Year Book.

The total amounts and the amounts per head raised from all sources of taxation by the several State Governments, including amounts not paid into the Consolidated Revenue Fund, during the years 1938-39 and 1949-50 to 1953-54, are shown in the following table :—

**STATE REVENUE FROM TAXATION: TOTAL NET COLLECTIONS.(a)**

(iii) *Business Undertakings.* (a) 1953-54. A very large proportion of State gross revenues is made up of receipts from business undertakings under the control of the Governments. The principal of these are railways and tramways, harbour works, water supply and sewerage, and electricity supply and, in addition, State batteries for the treatment of auriferous ores in Western Australia and various minor revenue-producing services rendered by the Governments of all States are included. For the year 1953-54 the revenue from these sources was £190,759,000 or 40.7 per cent. of the revenue from all sources. Details of revenue are as follows :—

**STATE REVENUE FROM BUSINESS UNDERTAKINGS, 1953-54.**  
(£'000.)

(iv) *Lands.* The revenue from the sale and rental of crown lands has, with few exceptions, been treated from the earliest times as forming part of the Consolidated Revenue Funds, and has been applied to meet ordinary expenses. The following table shows the revenue from sales and rentals of crown lands for the year 1953-54.

STATE LAND REVENUE, 1953-54.  
(£'000.)

Source.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	Total.
Sales ..	90	117	..	47	76	12	820
Conditional Purchases	311	..	..	3	173

Other ..	58	91	103	..	..	..	252
Total ..	3,644	2,683	3,967	310	964	335	11,003

(a) Includes mining royalties, rents, etc.

The total land revenue for all States for the years 1938-39 and 1949-50 to 1953-54 respectively was:—£4,144,000, £7,004,000, £7,917,000, £11,792,000, £12,659,000, and £11,903,000.

(v) *Commonwealth Payments.* Commonwealth payments to the States represent a considerable proportion of the States' Revenue. In 1953-54 the total amount (excluding sundry minor items) paid to the Consolidated Revenue Funds of the States was £165,351,000 (35.3 per cent.). This was made up of the contribution towards interest on States' debts under the Financial Agreement, £7,585,000, special grants to the States of South Australia, Western Australia and Tasmania, £15,400,000, prices control reimbursement £37,000, special financial assistance, £21,915,000 and tax reimbursement grants, £120,415,000.

In addition to these, the States receive a number of other payments which are paid to trust funds. The main items in this class are the contribution towards the sinking fund on States' debts (£3,463,000 in 1953-54) paid to the National Debt Sinking Fund and grants for Commonwealth Aid Roads (£23,457,000 in 1953-54) paid to State trust funds.

More detailed information concerning Commonwealth payments to the States is given in § 2 of part A of this Chapter (page 783).

(vi) *Interest and Miscellaneous.* In addition to the foregoing, there are in each State several miscellaneous sources of revenue, including such items as interest, fines, fees, etc. In 1953-54 interest, mainly from loans to local governing bodies, on public account balances and for soldier land settlement amounted to £11,195,000, whilst "Miscellaneous" revenue, which includes fines of the courts and fees for services, amounted to £31,028,000,

## Division II.—Expenditure.

1. *General.*—The principal heads of State expenditure from Consolidated Revenue Funds are:—

(a) Interest, exchange and debt redemption charges in connexion with public debt; (b) Working expenses of railways, tramways and other business and industrial undertakings; (c) Education; (d) Health and charitable expenditure; (e) Justice; (f) Police; (g) Penal establishments; and (h) all other expenditure, under which heading is included public works, lands and surveys, agriculture and forestry, legislative and general administration, pensions and miscellaneous.

In earlier years the working expenses of railways and tramways were the most important item of State Governmental expenditure, but, for a period prior to 1941-42, public debt charges were the heaviest item. Since then, however, railways and tramways expenditure has again taken the major place. In the year 1953-54 the working expenses of the railways, tramways and omnibuses were 36.6 per cent. of the total expenditure from the State Consolidated Revenue Funds; next in importance were education, 14.4 per cent.; charitable, public health and hospitals, 11.5 per cent.; public debt charges, 13.2 per cent.; and law, order and public safety, 5.2 per cent.

2. **Total Expenditure.**—The total expenditure from the Consolidated Revenue Funds of the several States and the expenditure per head of population during each of the years 1938-39 and 1949-50 to 1953-54 are shown in the following table :—

**STATE EXPENDITURE : CONSOLIDATED REVENUE FUNDS.**

(a) See § 1, para. 2, page 789.

(b) Tasmanian transport services are under the separate control

of the Transport Commission. (c) Balance of Special Grant, 1951-52. The Special Grant for 1953-54 was brought into the Western Australian Consolidated Revenue Fund as £7,350,000, although the Commonwealth payment was £7,800,000. The Special Grant for 1953-54 taken into Tasmanian Consolidated Revenue Fund was £1,650,000, although the Commonwealth payment was £1,500,000. The difference was offset in the Tasmanian accounts against the adjusted surplus for 1951-52.

(a) Special Deposits Account and Special Accounts.

**§ 4. State Loan Funds.**

1. **General.**—As far back as 1842 revenue collections were supplemented by borrowed moneys, the earliest loan being raised by New South Wales for the purpose of assisting immigration, at rates of interest varying from 2½d. to 5½d. per £100 per diem, or

approximately from  $4\frac{1}{2}$  per cent. to 8 per cent. per annum. Australian public borrowing, however, is mainly due to the fact that the State Governments, in addition to ordinary administrative duties, undertake functions which in other countries are usually entrusted to local authorities or left to private enterprise. Foremost amongst these are the construction and control of the railway systems. Loan moneys have also been largely used for improvements to harbours and rivers, and for the construction of roads, water supply and sewerage works. The State loan expenditure and public debt thus differ very materially from those of most European countries, and from those of the Commonwealth, where such expenditure was very largely incurred for defence or war purposes. As shown above, the State debts consist chiefly of moneys raised and expended with the object of assisting the development of the resources of the country, and are to a very large extent represented by tangible assets.

Statements relating to "gross" loan expenditure are shown below. The gross expenditure represents the amounts disbursed during each year. Details of "net" loan expenditure, i.e., gross expenditure less any credits to the Loan Fund during the year on account of repayments of advances to local governing bodies, settlers, etc., the sale of assets and transfers from other funds may be found in *Finance Bulletin* No. 45, 1953-54. Such moneys are credited to the Loan Fund in the year of repayment irrespective of when the advance was made. See also following page.

2. Gross Loan Expenditure.—(i) 1953-54. Particulars of gross loan expenditure on works, services, etc., are shown in the following table:—

## STATE GROSS LOAN EXPENDITURE ON WORKS, SERVICES, ETC., 1953-54.

(a) Includes exchange, discounts and flotation expenses, revenue and general cash deficits.  
(b) From Consolidated Revenue Fund.

Information relating to the State Public Debt is given in part D. Commonwealth and State Public Debt (pages 807 and 809).

### C. COMMONWEALTH AND STATE FINANCE.

1. Revenue and Expenditure.—(i) *Consolidated Revenue Funds.* The following tables show the aggregate revenue and expenditure of the Consolidated Revenue Funds of the Commonwealth and States for each of the years 1938-39 and 1949-50 to 1953-54. In these tables the combined Commonwealth and State totals have been adjusted to exclude major duplications, but the separate Commonwealth and State figures are as shown in other sections of this Chapter. The items excluded from the total figures are:—payments made by the Commonwealth to the States on account of tax reimbursements, interest under the Financial Agreement, special grants, special financial assistance, coal strike emergency grants, price control reimbursements and estimated payments of pay-roll tax by the States to the Commonwealth.

#### COMMONWEALTH AND STATES: REVENUE AND EXPENDITURE.

Year ended 30th June—		Revenue.			Expenditure.

**D. COMMONWEALTH AND STATE PUBLIC DEBT.****§ 1. General.**

Under the Financial Agreement between the Commonwealth and the States in 1927 the Commonwealth and State Public Debts were amalgamated and the Commonwealth Government accepted responsibility for the State Public Debts. The Commonwealth is reimbursed by the States for interest, exchange, etc., paid on their behalf and the debt is redeemed from the National Debt Sinking Fund to which both the Commonwealth and the States make contributions. Under the agreement the Commonwealth arranges for all borrowings on behalf of the Commonwealth and the States, and Commonwealth securities are issued for all money borrowed.

In the statistical tables relating to Public Debt the units of currency for debt outstanding and interest payable, with the exception referred to below, are :—Debt in Australia—£ Australian ; Debt in London—£ Sterling ; Debt in New York—£ (converted from dollars at the rate of \$4.8665 to £1); Debt in Switzerland—£ (converted from Swiss francs at the rate of 1,000 Swiss francs = £102 18. 10d.).

The totals shown represent the total "face" or "book" value of the debt without adjustment on account of the differences in currency mentioned above.

In § 3, para. 5 only, details of the debt for the Commonwealth and each State are given in Australian currency.

**§ 2. The Financial Agreement between the Commonwealth and the States.**

1. **General.**—Full details of the Financial Agreement between the Commonwealth and the States are given in earlier issues of the Official Year Book (*see* No. 37, pages 685 to 690). In this issue a summary of the main provisions only is given.

2. **Australian Loan Council.**—The Australian Loan Council was set up to co-ordinate the public borrowings of the Commonwealth and the States. It consists of the Prime Minister of the Commonwealth, or another Minister nominated by him in writing, as Chairman and the Premier of each State, or Ministers nominated by them in writing. Each year the Loan Council examines the loan programmes of the Commonwealth and the States and determines the total amount to be borrowed during the year. Borrowings by the Commonwealth for defence purposes are not subject to decisions of the Loan Council.

3. **Loan Raisings for the Commonwealth and States.**—Subject to the decisions of the Loan Council, the Commonwealth arranges for all borrowings for or on behalf of the Commonwealth or any State, and for all conversions, renewals, redemptions, and consolidations of the Public Debts of the Commonwealth and of the States.

If the Loan Council unanimously decides, however, a State may borrow outside Australia in the name of the State, and may issue securities for the amount so borrowed. The Commonwealth then guarantees that the State will fulfil all its obligations to bond-holders in respect of the money so borrowed and the money is deemed to be borrowed by the Commonwealth for and on behalf of the State.

Subject to any maximum limits decided upon by the Loan Council for interest, brokerage, discount and other charges, the Commonwealth or any State may—

- (i) borrow within its own territory, for any purpose, money from any authorities, bodies, funds or institutions (including Savings Banks) constituted or established under Commonwealth or State law or practice ;
- (ii) borrow from the public by means of counter sales of securities ; and
- (iii) use any available public moneys.

However, any securities issued for money so borrowed or used must be Commonwealth securities on terms approved by the Loan Council.

4. **Taking over of State Public Debts.**—The Commonwealth took over on 1st July, 1929—

- (a) the balance then unpaid of the gross public debt of each State existing on 30th June, 1927 ; and
- (b) all other debts of each State existing on 1st July, 1929 for money borrowed by that State deemed by the Agreement to be money borrowed by the Commonwealth for and on behalf of the State,

and in respect of these debts assumed, as between the Commonwealth and the States, the liabilities of the States to bond holders.

5. *Transferred Properties.*—In relation to State properties transferred to the Commonwealth under Section 85 of the Constitution, the States, as from 1st July, 1929, were discharged from any liability in respect of principal, interest or debt redemption on so much of the debts bearing interest at 5 per cent. per annum, taken over by the Commonwealth, as amounted to the agreed value of these properties, namely £10,924,323.

6. *Payment of Interest.*—For a period of 58 years from 1st July, 1927 the Commonwealth agreed to contribute the sum of £7,584,912 each year towards the interest payable on the State debts. The balance of the interest payable on the State debts is paid to the Commonwealth by the States.

7. *Sinking Fund.*—(i) *State Public Debt existing at 30th June, 1927.* A sinking fund at the rate of 7s. 6d. per annum for each £100 of the net public debts of the States existing on 30th June, 1927, and conversions thereof, was established under the terms of the Agreement. The Commonwealth contributes annually from revenue 2s. 6d. per cent. on the net public debts of the States existing at 30th June, 1927 and each State contributes annually 5s. per cent. on the net public debt of such State at 30th June, 1927. The payments of the Commonwealth and of all States except New South Wales will continue for a period of 58 years from 1st July, 1927, and those of New South Wales for a similar period from 1st July, 1928.

(ii) *New Borrowings.* On new borrowings after 1st July, 1927 (except those for redemptions or conversions, or funding a State deficit) a sinking fund at the rate of 10s per cent. per annum was established and the State and the Commonwealth contribute from revenue equal shares for a period of 53 years from the date of raising. (New South Wales did not commence sinking fund contributions in respect of new loans raised in the financial year 1927–28 until 1st July, 1928.)

(iii) *Loans raised to meet a Revenue Deficit.* In respect of any loan (except any of the loans referred to in para. (iv) below) raised after 30th June, 1927 by a State to meet a revenue deficit accruing after that date, no sinking fund contribution is made by the Commonwealth, but the State makes a sinking fund contribution at the rate of not less than 4 per cent. per annum of the loan for a period sufficient to provide for the redemption of the loan, the contributions being deemed to accumulate at the rate of 4½ per cent. per annum compound interest.

(iv) *Loans raised to meet Revenue Deficits between 30th June, 1927 and 1st July, 1935.* In respect of loans raised by a State or by the Commonwealth on behalf of a State, on the security of Commonwealth Treasury Bills, to meet a revenue deficit accruing after 30th June, 1927 and before 1st July, 1935, special contributions are payable. Details of these contributions are given in Official Year Book No. 37, pages 688 and 689.

(v) *National Debt Commission.* The sinking funds established are controlled by the National Debt Commission, which may arrange with any State to act as its agent in connexion with payments due to bond holders. Except where the conditions relating to sinking funds, redemption funds, and funds of a like nature held by a State on 30th June, 1929, precluded such transfer, all such funds were transferred to the National Debt Commission.

(vi) *Operation of Sinking Fund.* Sinking fund contributions made in respect of the debts of a State, and funds of that State transferred to the National Debt Commission, are not accumulated but must be applied, whenever expedient, to the redemption and repurchase of loan securities. When such a loan security is repurchased or redeemed by the National Debt Commission, it is cancelled, and the State, in addition to sinking fund contributions otherwise payable, pays a further annual sinking fund contribution at the rate of 4½ per cent. on the face value of the cancelled security.

(vii) *Oversea Debt.* Sinking fund contributions in respect of oversea debt shall be calculated at the mint par of exchange prevailing on 1st July, 1927.

8. **Borrowing by Semi-Governmental Authorities.**—It was realized at the inception of the Loan Council that, in the interests of co-ordinated borrowing, the Council should be advised of borrowing of large amounts by semi-governmental authorities. In May, 1936, all resolutions passed by the Loan Council in connexion with semi-governmental borrowings were consolidated into one set of rules, which superseded all previous resolutions. This set of rules provides, *inter alia* for the submission of annual loan programmes, in respect of semi-governmental authorities proposing to raise £100,000 or more in a year, for the consideration of such programmes in conjunction with the loan programme of the Government concerned, and for the fixing of the terms of individual semi-governmental loans coming within the scope of the annual programme.

### § 3. Commonwealth and State Public Debt Outstanding.

1. **Public Debt, Annual Interest Payable and Average Rate of Interest at 30th June, 1954.**—In the following table details are given of the Commonwealth and State Public Debt, annual interest payable and average rate of interest at 30th June, 1954.

(a) See §1, page 8c5.

In some States certain public utilities such as tramways, water supply and sewerage, harbour services, etc., are controlled by boards or trusts, which, in addition to receiving advances from the central Government, raise loans by public borrowing on their own behalf, while in other States these services are controlled by the central Government. Comparison of the debts of the States is therefore difficult, but on page 814 figures showing the aggregate debts of the States, including these local and semi-governmental authorities, are shown for the years 1938-39 and 1949-50 to 1953-54.

5. *Public Debt and Interest Payable in Australian Currency.*—In the foregoing tables relating to Commonwealth and State public debt the debt outstanding in London is expressed in sterling, debt outstanding in New York is expressed in pounds converted from dollars at the rate of \$4.8665 to £1 and debt outstanding in Switzerland is expressed in pounds converted from Swiss francs at the rate of 1,000 Swiss francs = £102 18. 10d. This method of showing the debt gives no indication to the amount that the Australian Governments would have to find to repay the debt. In the following tables the public debt and the interest payable are shown in terms of Australian currency throughout. Debt in London, New York and Switzerland has been converted to Australian currency at the selling rate of exchange on 30th June, 1954.

(a) Excludes Overdrafts and Internal Treasury Bills.

(ii) *Interest Rates.* (a) *London.* The rates of interest payable on Treasury Bills and Debentures in London during the following periods were: 1938–39—minimum rate, 2 per cent., maximum rate,  $2\frac{1}{4}$  per cent.; 1949–50 to 1950–51—minimum rate, 2 per cent., maximum rate,  $2\frac{1}{4}$  per cent. On 8th November, 1951 the rates were increased to—minimum rate,  $2\frac{1}{2}$  per cent., maximum rate,  $2\frac{3}{4}$  per cent.

(b) *Australia.* The Treasury Bill rates in Australia were as follows:— $1\frac{3}{4}$  per cent. from 1st January, 1935;  $1\frac{1}{2}$  per cent. from 1st May, 1940;  $1\frac{1}{4}$  per cent. from 1st May, 1943; 1 per cent. from 1st March, 1945;  $\frac{3}{4}$  per cent. from 1st May, 1949; 1 per cent. from 1st August, 1952.

9. *State and Municipal and Semi-Governmental Authority Public Debt.*—For the reasons indicated on page 811 direct comparisons of the debts of the several States should be made with caution. The table following shows, for 1938–39 and 1949–50 to 1952–53, particulars of the debts of the States and the debts due to the public by municipal and semi-governmental authorities in each State.

## § 4. Commonwealth Loan Raisings.

1. New Loans Raised, 1951-52 to 1953-54.—Under the Financial Agreement between the Commonwealth and the States, the Commonwealth is responsible for raising all loan moneys required by both the Commonwealth and the State Governments. Details of loan transactions given in this section relate, therefore, to all loans raised for the Commonwealth and the States. The following table shows details of new loans raised in Australia by the Commonwealth during the three years 1951-52 to 1953-54. No new loans were raised in London during this period, and the only new loans raised in New York were those from the International Bank for Reconstruction and Development. Details of these loans are given in para. 3, below.

(a) Includes loans raised for redemption of Treasury Bills, but excludes conversion loans, loans for redemption of debt maturing in London, short-term debt and certain miscellaneous debt (see below).  
(b) Special Issue. For details see following paragraph.

The loans of £160,000,000, £123,000,000 and £80,000,000 issued in June, 1952, 1953 and 1954 respectively were for the purpose of fulfilling an undertaking given by the Commonwealth that the States would have access to loan funds for their works programmes up to the approved Loan Council borrowing programmes. These programmes totalled £225,287,000 in 1951-52, £190,182,000 in 1952-53 and £200,000,000 in 1953-54. Subscriptions to these special loans came from the following sources :—

	1951-52.	1952-53	1953-54.
	£	£	£
National Debt Commission—			
Investment of surplus received from Commonwealth Revenue .. ..	98,500,000	..	..
Investment of Australian currency proceeds of International Bank Loan .. ..	27,000,000	18,500,000	18,000,000
Swiss Loan Trust Account .. ..	..	..	5,750,000
Commonwealth Trust Moneys—Investment	34,500,000	104,500,000	56,250,000
Total ..	160,000,000	123,000,000	80,000,000

Finance for the approved Loan Council programmes in 1952-53 and 1953-54 was provided from the following sources—

	1951-52.	1952-53.	1953-54.
	£	£	£
Public Loans, domestic raisings, etc. ..	72,422,000	67,357,000	125,647,000
Special Commonwealth Loan .. ..	152,865,000	122,825,000	74,353,000
Total ..	225,287,000	190,182,000	200,000,000

In addition to the new loans raised shown in the foregoing table, and the redemption and conversion loans shown in the following table, there were other miscellaneous debt operations during 1953-54, namely :—Savings Certificates and War Saving Certificates (Five and Seven Years' Series), decrease of £5,192,000 ; War Savings and Savings Stamps, decrease of £1,000 ; National Savings Bonds and Stamps, decrease of £13,000 ; "Over the Counter Sales" (small amounts borrowed by virtue of certain statutory rights) £1,312,000. Advance loan subscriptions in hand increased from £4,280,000 at the end of 1952-53 to £9,894,000 at the end of 1953-54.

2. Conversion and Redemption Loans, 1951-52 to 1953-54.—(i) *Australia*. Particulars of conversion loans raised in Australia during the three years 1951-52 to 1953-54 are given in the following table :—

#### COMMONWEALTH CONVERSION AND REDEMPTION LOANS RAISED IN AUSTRALIA.

NOTE.—Minus sign (—) indicates a reduction in the annual liability for interest and exchange.

(ii) *London.* The following table shows particulars of loans raised in Australia and London during the years 1952-53 and 1953-54 for the purpose of redeeming and converting London loans. There were no loans raised for this purpose in 1951-52.

**COMMONWEALTH LOANS RAISED FOR THE CONVERSION AND REDEMPTION OF LOANS MATURING IN LONDON.**

Month of Raising.	Old Loan.		New Loan.				Increase in Annual Liability for Interest and Exchange. (a)	
	Amount.	Rate of Interest per annum.	Amount raised in—		Rate of Interest per annum.	Price of Issue per £100.		Year of Maturity.
			Australia.	London.				
			£ Stg. '000.	%				
1952-53— July ..	11,790	3½	..	11,790	4½	98	1960-62	148
1953-54— November ..	10,796	3½	..	10,796	4	99½	1966-68	68

(a) No account has been taken of cost of issuing the conversion loans at a discount. Exchange calculated at £A. 125.375 = £ stg. 100.

(iii) *New York.* During 1946-47 four loans totalling \$128,000,000 were raised in New York to redeem loans which became due for redemption or which the Commonwealth had the option of redeeming. No further loans were raised in New York for this purpose up to the end of 1954.

3. *International Bank for Reconstruction and Development Loans.*—To provide dollar funds for the purchase of certain types of capital equipment and plant which were indispensable to the furtherance of development in Australia and which could be obtained only in the United States of America and Canada, the Commonwealth Government, in August, 1950, arranged a loan of \$100,000,000 from the International Bank for Reconstruction and Development. The loan is for a term of 25 years with interest at 4½ per cent. per annum on the amount of the loan withdrawn and outstanding from time to time. In addition there is a commitment charge of ¾ per cent. per annum on the amount of the loan not withdrawn from time to time. Repayment of the loan is to be made in half-yearly instalments commencing on 1st September, 1955. The last instalment is payable on 1st September, 1975. At the 31st December, 1953, the whole of the loan had been drawn.

In July, 1952, a further loan of \$50,000,000 was arranged. This loan is for a term of 20 years with interest at 4½ per cent. per annum on the amount of the loan withdrawn and outstanding from time to time. There is also a commitment charge of ¾ per cent. per annum similar to that of the previous loan. Repayment of the loan is to be made in half-yearly instalments from 1st June, 1957 to 1st December, 1972. Up to 30th June, 1954, \$44,706,057 had been drawn on the loan.

In March, 1954 a third loan of \$54,000,000 was arranged. The loan is for a term of 15 years with interest and commitment charges similar to those for the previous loan for \$50,000,000. Repayment of the loan will be made in half-yearly instalments from 1st March, 1957 to 1st March, 1969. Up to 30th June, 1954, \$6,418,978 had been drawn on the loan.

In March, 1955, a fourth loan of \$54,500,000 was arranged. This loan is for a term of 15 years with interest at 4½ per cent. per annum. There is also a commitment charge of ¾ per cent. per annum similar to that of previous loans. Repayment is to be made in half-yearly instalments from 15th March, 1958 to 15th March, 1970.

The capital equipment and plant purchased from the proceeds of these loans are made available to Commonwealth and State Government departments and agencies and private firms and individuals for use in the development of Australian resources. Subject to a special import licence being obtained, the goods are imported and distributed through normal channels and payment made through the Australian banking system. Periodically, schedules of dollar payments for goods imported against loan licences are submitted to the International Bank for Reconstruction and Development. These

schedules form the basis for periodical drawings by the Commonwealth against the loan. The amounts drawn are paid to the Commonwealth Bank to replace the dollar funds used in making the purchases. In return, the Commonwealth Government receives Australian currency from the Commonwealth Bank. This is paid to the Commonwealth National Debt Sinking Fund, out of which the loans will subsequently be redeemed.

4. **Swiss Loan.**—To foster industrial development in Australia and to stimulate trade relations between the two countries, the Commonwealth Government arranged for the issue in Switzerland in November, 1953 and February, 1955, of two public loans each of 60,000,000 Swiss francs. The loans were underwritten by a Swiss banking group headed by the Swiss Bank Corporation, the Credit Suisse and the Union Bank of Switzerland. Certain Swiss taxes connected with the issue and servicing of the loan were paid on an agreed basis by the Australian Government.

The first loan was for a period of 15 years with an option on the part of the Australian Government to repay the loan in whole or in part after 12 years. The rate of interest was 4 per cent. and the issue price £99. Bondholders have the option of requiring payment either in Australian pounds or in the foreign currency equivalent of Australian pounds.

The second Swiss loan was for a period of 15 years with an option to redeem after 10 years. The rate of interest was  $3\frac{1}{2}$  per cent. and the issue price £99 10s. Bonds and interest are payable only in Swiss francs.

The loans were both fully subscribed and Swiss franc proceeds, after deducting borrowing expenses, were sold by the Commonwealth Government to the Commonwealth Bank in return for an equivalent amount of Australian currency. A trust account, named the Swiss Loan Trust Account, was opened and the proceeds from the two loans were transferred to this account and were used in assisting the Loan Council borrowing programmes for the 1953-54 and 1954-55 financial years. The Swiss Loan Trust Account will also be used as a sinking fund for the loans, and, when the time comes for repayment, the trust account investments can be realized. The provisions of the National Debt Sinking Fund Act do not apply to the loans.

5. **Summary of Loan Transactions, 1949-50 to 1953-54.**—The following table contains a summary of loan transactions on behalf of the Commonwealth and State Governments during the five years 1949-50 to 1953-54.

#### COMMONWEALTH LOAN TRANSACTIONS : SUMMARY.

(a) Includes loans raised for redemption of Treasury Bills. No new loans were raised in London during this period.

(b) "Over the Counter Sales". Instalment Stock, National Savings Bonds, War Savings and Savings Certificates and net increase in debt on account of War Savings and Savings Stamps, National Savings Stamps and advance loan subscriptions. (c) Amounts drawn of \$100,000,000, \$50,000,000, \$51,000,000 and \$54,500,000 loans from International Bank for Reconstruction and Development.

NOTE.—Minus sign (—) denotes a decrease in debt.

## § 5. National Debt Sinking Fund.

1. *Commonwealth Public Debt.*—Particulars relating to the creation of sinking funds are included in issues of the Official Year Book prior to No. 23.

The old sinking funds were merged in the National Debt Sinking Fund on 11th August, 1923. Particulars of receipts and expenditure of the Commonwealth Account for the years 1938–39 and 1949–50 to 1953–54 were as follows:—

**E. TAXES ON INCOME.**

**NOTE.**—The following section contains details of taxes on individuals and companies for the 1955-56 financial year.

1. **General.**—A description of the development of income taxes in Australia appeared in Official Year Book No. 35, p. 926. Since July, 1942, the Commonwealth, under the uniform tax arrangement, has been the only authority imposing taxes on income. Taxes on income are assessed and imposed under the Income Tax and Social Services Contribution Assessment Act 1936-1955 and the Income Tax and Social Services Contribution Act 1955. The latter Act is an annual measure and its primary purpose is to declare the rates of tax and contribution payable for the financial year. The rates for the financial year are levied, in the case of individuals, on the income of that year and, in the case of companies, on the income of the preceding year. Thus tax for the financial year 1955-56 is levied on the income of individuals in 1955-56 and on the income of companies in 1954-55.

2. **Present Taxes.**—For individuals, a single tax known as the Income Tax and Social Services Contribution is levied. All companies are liable for primary income tax and in addition, private companies are subject to tax on undistributed income.

3. **Assessable Income.**—Income taxes in Australia are levied, primarily, on all income derived from Australian sources by any person, rather than on income derived from all sources by Australian residents. Thus a non-resident is taxed on income derived in Australia, while a resident is, in general, not taxed on income other than dividends derived from overseas if the income is taxed in the country in which it is derived.

Certain types of Australian income are exempt from tax in Australia, the more important being (i) pensions, child endowment and other payments under the Social Services Act 1947-1955 and the Tuberculosis Act 1948, (ii) income from gold-mining and uranium mining, (iii) twenty per cent. of certain mining profits, (iv) dividends paid out of exempt mining profits, (v) pay and allowances earned by a member of the Defence Forces while serving in Korea after 26th June, 1950 and Malaya after 28th June, 1950 and (vi) income received from a scholarship, bursary or other education allowance.

No amount is included in assessable income on account of a house occupied by its owner. Profits derived from the sale of property are not assessable income if such property was not purchased with a view to resale at a profit.

Assessable income is divided into two main groups—personal exertion and property. Personal exertion income includes all wage, salary, business and professional incomes, while property income includes all rents, dividends and interest. No distinction between personal exertion and property income is made for companies. The further tax on property income imposed on individuals in cases where the total taxable income exceeded £400 and the amount of property income exceeded £100 was discontinued from the 1953-54 financial year.

Expenses incurred in earning income, certain subscriptions to business associations and trade union dues, are allowable deductions. Losses incurred in previous years may be carried forward as a deduction.

Because of uncongenial climatic conditions, isolation and high cost of living, taxpayers living in certain areas are allowed an additional deduction. Two zones have been prescribed, and the allowances are Zone A, £120 and Zone B, £20.

Income Tax and Social Services Contribution is levied on the taxable income remaining after making these deductions and the concessional deductions to which reference is made in paragraph 4 following.

4. **Concessional Deductions.**—Concessional allowances for dependants, medical expenses, life assurance and superannuation contributions, etc., are made by way of a deduction from income. The maximum deduction allowed for each dependant, parent or a housekeeper employed by the taxpayer for the financial year 1955-56 is shown in the following table.

#### CONCESSIONAL DEDUCTIONS FOR DEPENDANTS, ETC.

(£.)

Dependant, etc. (Resident).	Maximum Deduction. (a)
Spouse .. .. .	130
Daughter-housekeeper (b) .. .. .	130
Housekeeper (b) having care of taxpayer's children under 16 years of age .. .. .	130
Parent .. .. .	130
One child under 16 years of age .. .. .	78
Other children under 16 years of age .. .. .	52
Invalid relative(c) .. .. .	78
Child 16 to 21 years receiving full-time education (d) .. .. .	78

(a) These deductions are allowed only if the dependant or parent is a resident of Australia. If the dependant is maintained for part only of the year a partial deduction is allowed. (b) Of a widower or widow. (c) Child, step-child, brother or sister over 16 years of age. The amount of the deduction is reduced by any invalid pension received. (d) The amount of the deduction is reduced by the value of any assistance provided by the Commonwealth or a State.

When the dependant or person maintained derives separate income, the amount of the concessional deduction allowable is reduced as follows :—

In the case of a spouse or daughter-housekeeper, by £2 for every £1 by which the separate net income exceeds £65 ; for each parent maintained, by £1 for each £1 of separate income ; and for each dependent child or invalid relative, by £2 for every £1 by which the separate net income exceeds £52.

For the 1955-56 financial year, medical expenses paid by a taxpayer who is a resident, in respect of himself or dependants, including children under 21 years of age, up to £150 for each person, are allowed as a concessional deduction. Medical expenses include payments made to a legally qualified medical practitioner, nurse or chemist, or a hospital, in respect of an illness or operation, payments for dental services not exceeding £30 for any one person, payment for therapeutic treatment and eye tests, expenditure on medical or surgical appliances, artificial limbs or eyes, hearing aids and spectacles, and the remuneration of an attendant of a person who is blind or confined to bed or invalid chair.

Other concessional deductions allowed to resident taxpayers include (i) payments of life, etc., insurance premiums and contributions to superannuation, medical, hospital and similar funds and friendly societies, not exceeding an aggregate of £200, (ii) funeral expenses of a dependant not exceeding £30 and (iii) expenditure incurred for the full-time education of dependants who are less than 21 years of age (maximum £75 per dependant).

In addition to concessional deductions, all taxpayers (residents and non-residents) are allowed a deduction from income of rates and taxes on land which are annually assessed, gifts to charitable, benevolent or patriotic funds and one-third of amounts paid as calls to certain mining, forestry and oil-prospecting companies.

5. **Effective Exemptions from Tax.**—For the financial years 1950-51 to 1955-56 resident taxpayers without dependants were exempt from Income Tax and Social Services Contribution if their income did not exceed £104. The effect of the deductions for dependants was to exempt taxpayers up to the incomes shown hereunder.

#### RESIDENT TAXPAYERS : EFFECTIVE EXEMPTIONS FROM TAX.

( £. )

Taxpayer with—						Income Tax and Social Services Contribution— Financial Years 1950-51 to 1952-53.	Income Tax and Social Services Contribution— Financial Years 1953-54 to 1955-56.
No dependants	..	..	..	..	..	104	104
Wife	..	..	..	..	..	208	234
„ and one child	..	..	..	..	..	286	312
„ „ two children	..	..	..	..	..	338	364
„ „ three children	..	..	..	..	..	390	416
„ „ four children	..	..	..	..	..	442	468

For the 1955-56 financial year an aged person (i.e., a man who has attained the age of 65 years or a woman who has attained the age of 60 years) is exempt from Income Tax and Social Services Contribution if his net income (i.e., gross income less

expenses of earning that income) does not exceed £390. A married couple both of whom qualify by age for the concession, are exempt from tax if their combined net incomes do not exceed £780.

6. Rates of Income Tax and Social Services Contribution on Individuals.—The following table shows the rates of income tax and social services contribution for the financial years 1953-54 to 1955-56.

**INCOME TAX AND SOCIAL SERVICES CONTRIBUTION—INDIVIDUALS: RATES OF INCOME TAX AND SOCIAL SERVICES CONTRIBUTION—1953-54 TO 1955-56.**

16,000	upwards	9,157 5 10	168	8,417 18 4	160

For primary producers, the rate of Income Tax and Social Services Contribution for the current year is determined by the average of the taxable income for the five years up to and including the current year. A taxpayer may elect not to have these averaging provisions applied to his assessment, but the election once made, is irrevocable. The application of the averaging provisions is limited to that part of the taxable income which does not exceed £4,000, and when the taxable income exceeds £4,000, the balance is taxed at ordinary rates. When the taxable income is less than £4,000, the rate of tax for averaging purposes is limited to the rate on a taxable income of £4,000.

Commencing with 1953-54, the taxable income, including any abnormal receipts, of actors, artists, composers and inventors, is taxed at the rate appropriate to the normal taxable income plus one-third of the abnormal receipts.

Interest on Commonwealth Loans issued prior to 1st January, 1940 is subject to the condition that it shall not be taxed at rates higher than those for 1930-31. Interest on Commonwealth Loans issued after 1st January, 1940 and interest on certain State semi-governmental loans issued free of State income tax receive a rebate of 2s. in the £1.

The minimum amount of Income Tax and Social Services Contribution payable is 10s. and the amounts payable and rebates are calculated to the nearest shilling.

7. **The Income Tax (International Agreements) Act 1953.**—This Act provided for relief from double taxation of incomes flowing between Australia and the United States of America. It also provided similar relief in respect of the United Kingdom, which had been covered by the Income Tax Assessment Act since 1947.

8. **Taxes on Specified Incomes.**—The following table shows the Income Tax and Social Services Contribution payable by taxpayers, with various incomes and numbers of dependants, on income derived in each year from 1950-51 to 1955-56 :—

9. *Pay-as-you-earn.*—Individual taxpayers pay tax on a pay-as-you-earn basis. A similar scheme does not operate for companies.

(a) *Salary and Wage Earners.* Salary and wage earners are subject to instalment deductions for payment of tax at current rates out of weekly (or fortnightly) earnings. Employers are required to deduct tax and contribution from each payment of wages and salary to an employee at the appropriate rate in accordance with a prescribed instalment scale. This scale shows the amount to be deducted according to the income and number of dependants of the employee.

Under the group scheme of deduction, which covers most employers of more than ten persons, the amount deducted is remitted to the Taxation Department, and after 30th June each year each employee is given a group certificate by his employer showing the amount of deductions made during the year. This certificate is forwarded to the Taxation Department with the employee's return of income for the year. If the tax assessed on the basis of this return is less than the amount shown on the group certificate a refund is forwarded to the employee with his assessment. If the tax assessed is greater than the amount shown on the group certificate the employee is required to pay the balance.

Under the stamp scheme, used by small employers, a stamp deduction sheet in two parts is used. Each four weeks the employer purchases stamps (also in two parts) for the amount of the deductions made each pay day and sticks one part on each half of the sheet. At the end of the year the employer gives the employee one half of the sheet and sends the other half to the Taxation Department. The employee's half is then used in the same way as a group certificate.

(b) *Taxpayers with Income other than Salary and Wages.* These taxpayers pay provisional tax in respect of income other than salary and wages. Collection of tax and contribution for the current year is made at the same time as collection and assessment for the previous year is adjusted. The notice of assessment shows an amount of provisional tax and contribution for the current year. This provisional amount is an approximation to the tax and contribution which will be payable after the return of income for the current year has been lodged. It is ascertained by assuming that the income of the current year will be the same as that for the previous year (for which a return has already been lodged) but the rates for the current year are applied to the income and not the rates for the year in which it was derived. The assessment notice shows the provisional tax and contribution paid in the previous year as a credit against the tax and contribution assessed on the basis of the return for that year. On receipt of his assessment the taxpayer may elect to substitute his estimate of income for the current year and pay tax on the basis of this estimate. To protect the revenue, a penalty is imposed if the taxpayer elects to pay provisional tax on an estimate of income more than 20 per cent. lower than the income of the previous year and he underestimates his income by more than 20 per cent.

Employees with income of £100 or more from sources other than salaries and wages are required to pay provisional tax in respect of that income.

10. *Lodgment of Returns and Assessment of Tax.*—All persons with assessable income in excess of £104 are required to lodge returns by the 31st July each year (31st August for business incomes). Income Tax and Social Services Contribution payable is assessed, and assessment notices showing the amount payable are issued during the year following the year of income (in most cases from September to June following the lodgment of the return). The approximate amount payable, however, has already been collected during the income year—from employees by deductions from wages and from non-employees by a provisional tax. The amount shown on the assessment notice is therefore adjusted against the amount already collected and any difference either collected or refunded.

11. *Company Income Taxes.*—(i) *General.* For taxation purposes, companies are divided into two main groups—public and private. A private company is defined as a company in which all the issued shares are held by not more than twenty persons or which is capable of being controlled by not more than seven persons, and which is not a company in which the public is substantially interested or a subsidiary of a public

company. All other companies are regarded as public companies. Both public and private companies pay primary Income Tax and Social Services Contribution assessed on a taxable income ascertained by the same principles as for individuals.

Dividends received are assessable income, but resident companies receive a rebate at the average rate on the amount of dividends included in the taxable income. This rebate is not allowed to non-resident companies.

(ii) *Rates of Tax.* The rates of Primary Tax, in the case of public companies, and Primary and Additional Tax for private companies, for the financial years 1953-54 to 1955-56, are shown in the table below.

Super Tax and Undistributed Income Tax ceased to be levied on public companies in the 1951-52 financial year and Additional Income Tax and Social Services Contribution ceased in the 1953-54 financial year. For details see Official Year Book No. 39, p. 846 and No. 40, p. 743.

# **RATES OF TAX : COMPANIES, 1953-54 TO 1955-56 FINANCIAL YEARS.**

(Pence per £.)

Type of Company.	Rate of Tax—		
	On Taxable Income.		Undistributed Amount—Additional Tax.
	Up to £5,000.	On Remainder of Taxable Income.	
Private .. .. .	48	72	120
Co-operative and Non-profit(a) .. .. .	60	84	..
Life Assurance—			
Mutual .. .. .	48	72	..
Other—			
(1) Mutual Income .. .. .	48	72	..
(2) Other Income(b) .. .. .	(c) 72	84	..
Other .. .. .	(c) 72	84	..
Interest paid to a Non-resident(d) .. .. .	84	84	..

(a) Non-profit companies with taxable incomes not exceeding £104 are exempted from tax and if the taxable income does not exceed £208 the tax may not exceed one-half of the amount by which the taxable income exceeds £104. (b) The rate of 72d. is levied on the amount by which the £5,000 exceeds the mutual income. (c) For non-resident companies dividends included in this part of taxable income are taxed at 60d. per £1. (A resident company is allowed a rebate of tax in respect of dividends received.) (d) If the non-resident is not a company, tax is paid only on income in excess of £104.

A private company incurs liability for additional tax on its undistributed income if it fails to make a sufficient distribution of income within a specified period after the close of the year of income. The tax is levied on the undistributed amount which, for practical purposes, is the taxable income less—

- Primary income tax and social services contribution payable;
- Retention allowance (i.e., the proportion of the reduced distributable income which a company may retain without incurring liability for undistributed income tax); and
- Certain dividends paid by the company.

For the financial years 1953-54 to 1955-56 the retention allowance is the following proportion of the reduced distributable income :—

On first £1,000 or part, 50 per cent.

On next £1,000 or part, 40 per cent.

On next £1,000 or part, 35 per cent.

On next £1,000 or part, 30 per cent.

On balance, 25 per cent., and

Ten per cent. of distributable income from property, except dividends from other private companies.

For the financial years 1953-54 to 1955-56, the reduced distributable income is calculated by deducting from the taxable income the primary tax payable and the amount of all property income included in taxable income. The additional tax imposed on undistributed income was imposed at a flat rate of 10s. in the £1 on the undistributed amount.

12. Yield of Income Taxes.—(i) *Collections from Income Taxes.* The following table shows the collections of taxes imposed on income for the years 1938-39 and 1949-50 to 1953-54 :—

## INCOME TAX COLLECTIONS.

(a) Assessment in respect of 1952-53 income issued to 30th September, 1954. Assessments issued after that date have been excluded. (b) Actual income is the total income (less any expenses of earning the income) and includes any exempt income and any concessional deductions or expenses of a capital nature which are allowed as a deduction for the purpose of assessing taxable income.

(iv) *Commonwealth Income Tax on Residents—Grades of Income.* Individual income taxes assessed on residents are distributed according to grades of actual income in the following table. The year shown in each case refers to the year in which assessment was made, i.e., the year following the income year. The figures relate only to assessments made on the income of the previous year during the normal assessing period. Assessments issued after the normal assessing period are excluded.

## CHAPTER XXI.

### AGRICULTURAL PRODUCTION.

NOTE.—Values of Australian oversea trade shown throughout this chapter are expressed as £A. f.o.b. Port of Shipment, except where otherwise indicated.

#### § 1. Introductory.

In general, statistics in this chapter relating to agricultural production are derived from "census" returns supplied by farmers (an average of 245,800 during the past ten years) who utilize one acre or more of land for agricultural or pastoral purposes. The returns are collected by the Statisticians of each State and by the Commonwealth Statistician in respect of the Australian Capital Territory. Particulars for the Northern Territory have not been available in recent years. The returns are collected on a substantially uniform basis in all States at 31st March each year and relate to areas sown and crops produced in the previous twelve months. Where harvests are not completed by March (e.g. potatoes) provision is made in some States for a special collection after the harvest is completed and in others for the inclusion of the total estimated yield expected from the complete harvest. In cases where additional data are available from marketing authorities or other sources, these are used in conjunction with the "census" returns. The statistics published in this Chapter are therefore shown in agricultural years. For most purposes there will be little error involved in considering them to apply to years ending on 30th June.

#### § 2. Progress of Agriculture.

1. *Early Records.*—In an "Account of Live Stock and Ground under Crop in New South Wales, 19th August, 1797", Governor Hunter gives the acreage of crops as follows:—Wheat, 3,361 acres; maize, 1,527 acres; barley, 26 acres; potatoes, 11 acres; and vines, 8 acres.

The following details of crops were collected in 1808:—Wheat, 6,874 acres; maize, 3,389 acres; barley, 544 acres; oats, 92 acres; peas and beans, 100 acres; potatoes, 301 acres; turnips, 13 acres; orchards, 546 acres; and flax and hemp, 37 acres.

A brief reference to the attempts at cultivation by the first settlers in New South Wales and to the discovery of suitable agricultural land on the Parramatta and Hawkesbury Rivers prior to the year 1813 and west of the Blue Mountains thereafter is contained in early issues of the Official Year Book. (*See* No. 22, p. 670.)

By the year 1850 the area of crops had increased to 491,000 acres, of which 198,000 acres were cultivated in what is now the State of New South Wales, and 169,000 acres in Tasmania. At the end of 1850 the area under cultivation in Victoria, which was then the Port Phillip District of New South Wales, was 52,190 acres.

The gold discoveries of 1851 and subsequent years had at first a very disturbing effect on agricultural progress, the area of crops declining from 491,000 acres in 1850 to 458,000 acres in 1854. The demand for agricultural products occasioned by the large influx of population was, however, soon reflected in the increased area cultivated, for at the end of 1858 the land under crop in Australia exceeded a million acres.

2. *Progress of Cultivation.*—The following table shows the area of crops in each of the States and Territories of Australia at decennial intervals since 1860 and during each of the eleven seasons ended 1953–54, and on page 859 there is a graph showing the area of crops in Australia from 1860 onward.

(a) Not available.

The progress of agriculture was practically uninterrupted from 1860 to 1915-16, when, as the result of a special effort to raise wheat during the 1914-18 War, 18.5 million acres were cultivated in Australia. Four years later the area of crops declined to 13.3 million acres owing to the accumulation of wheat stocks consequent upon the difficulty of securing freight space during the war years. After the termination of hostilities the area again began to expand and rose steadily to the record area of 25.2 million acres in 1930-31. Thereafter the slump in wheat prices seriously depressed the agricultural industry and the area of crops receded to just under 20 million acres in 1935-36.

By 1938-39 the industry had recovered from the depression and the total area under cultivation reached the high level of 23.5 million acres. Thereafter, as a result of war-time man-power shortages and shipping difficulties, the area declined to less than 16 million acres in 1943-44. After 1943-44 production gradually increased again until, in 1947-48, 22.3 million acres were sown to crops. This upward trend has been reversed since 1948-49 largely as a result of the transfer of many primary producers from agricultural to pastoral production following on high prices for wool. Of recent years the area has fluctuated around a level of 20 million acres, 1952-53 being 20.4 million acres and 1953-54 0.7 million acres higher at 21.1 million acres. As the area under wheat in Australia constitutes a large proportion of the total area cropped (56 per cent. during the ten years ended 1953-54) fluctuations in the latter follow broadly the same pattern as changes in wheat areas.

3. **Area under Sown Pastures.**—In all the States there are considerable areas of grasses mainly sown on land from which scrub has been cleared or on land which it is desired to rest from cultivation. These areas, which are not included in “area of crops”, have expanded from about 5.3 million acres in 1929-30 to about 23.0 million acres in 1953-54.

4. **Australian Agricultural Council.**—Arising out of a conference of Commonwealth and State Ministers on agricultural and marketing matters held at Canberra in December, 1934, a permanent organization known as the Australian Agricultural Council was formed. The Council consists of the Commonwealth Ministers for Primary Industry and for Territories, and the State Ministers of Agriculture, with power to co-opt the services of other Commonwealth and State Ministers as required. The principal functions of the Council are:—(i) the promotion of the welfare and development of agricultural industries generally; (ii) exchange of information on agricultural production and marketing; (iii) the improvement of the quality of agricultural products and the maintenance of high grade standards; (iv) to ensure, as far as possible, balance between production and available markets; and (v) organized marketing, etc.

In addition a permanent Standing Committee on Agriculture was formed to advise the Council; secure co-operation and co-ordination in agricultural research; advise State and Commonwealth Governments on the initiation and development of agricultural research and to secure co-operation between all Governments in respect of quarantine measures against pests and diseases of plants and animals.

### § 3. Distribution, Production and Value of Crops.

1. Area of Crops in States and Territories.—The following table shows the areas in the several States and the Australian Capital Territory of each of the crops for the season 1953-54.

#### AREA OF CROPS, 1953-54.

(a) Excludes Northern Territory, details for which are not available. (b) Excludes 38,351 acres of pasture land sown to lucerne and 219,194 acres sown to oats for grazing. (c) Excludes 256,003 acres of pasture land sown to lucerne for grazing. (d) Not available. Included in "All Other Crops". (e) Incomplete. See footnotes to individual States. (f) Not available for publication. Included in "All Other Crops".

2. Relative Areas of Crops in States and Territories.—The proportion of each of the crops cultivated to the extent of over 100,000 acres in the various States and Territories to the total area of crops for the season 1953-54 is shown in the next table. In four of

the States, namely, New South Wales, Victoria, South Australia and Western Australia, wheat-growing for grain is by far the most extensive crop. In Queensland the most extensive crops are wheat, green fodder and sugar-cane, and in Tasmania, green fodder, hay and potatoes.

As pointed out previously, wheat is the main crop in Australia, the area thereof, for grain only, representing more than 50 per cent. of the total area of crops in 1953-54.

### RELATIVE AREAS OF CROPS, 1953-54.

(Per cent.)

Total, Gross Value ..	77,490	281,889	278,638	332,324	383,108	372,135

(a) Includes Government assistance.

(b) Incomplete, excludes Western Australia.

(c) Incomplete. Market gardens and pulse only.

9. **Value of Production and Indexes of Price and Quantum of Production.**—(i) *Gross and Net Values, 1953-54.* Values of agricultural production for each State are shown for 1953-54 in the following table. A more detailed reference to the value of production of agriculture and other industries in Australia as well as a brief explanation of the terms used will be found in Chapter XXIX.—Miscellaneous.

In computing the net value of production no deduction has been made for the cost of maintenance of farm buildings and fences, nor for the depreciation of farm plant; consequently, the figures stated are inflated to that extent.

**GROSS, FARM AND NET VALUES OF AGRICULTURAL PRODUCTION, 1953-54.**  
(£'000.)

State.	Gross Production valued at Principal Markets.	Marketing Costs.	Gross Production valued at Farm.	Value of Materials Used in Process of Production.		Net value of Production. (a)
				Seed used and Fodder for Farm Stock.	Value of other Materials used.	
New South Wales .. ..	93,735	17,410	76,325	4,995	(b) 2,938	68,342
Victoria .. ..	89,374	14,587	74,787	5,000	4,163	65,624

## § 4. Wheat.

1. **Royal Commission on the Wheat Industry.**—A Royal Commission was appointed in January, 1934 to inquire into and report upon the economic condition of the industries of growing, handling and marketing wheat, and the manufacturing, distributing and selling of flour and bread. A searching inquiry was made by the Commission and the results of its investigations were submitted in a series of five reports. The first and second reports covered the wheat-growing industry, the third that of baking, the fourth the flour-milling industry, while the fifth, completed in February, 1936, dealt with the history of the Commission's investigations and traversed the principal recommendations submitted.

2. **Wheat Costs of Production Committee.**—A Wheat Costs of Production Committee was appointed by the Commonwealth Government in February, 1947, to inquire into and report upon :—(i) the reasonable costs of production of wheat per bushel in Australia's main wheat-growing districts, and (ii) whether basic items of cost could be established as an index to periodical variations in costs of the production of wheat. The Committee in its report to the Commonwealth Government in March, 1948, found that the cost of growing wheat in the Commonwealth was 6s. per bushel at sidings and advised that basic items of cost could be established as an index to periodical variations in wheat production costs.

3. **Licensing of Areas Sown to Wheat, and Acreages Sown.**—Details of the operations of the Wheat Stabilization Board in licensing wheat growing during the seasons 1941-42 to 1948-49 will be found in Official Year Book No. 38, pp. 940, 941. The Board ceased to function on 31st December, 1948.

4. **Legislation relating to Wheat Industry.**—(i) *Financial Assistance to Wheat Growers.* Reference to financial assistance during 1952-53 and 1953-54 will be found in § 23, Financial Assistance to Primary Producers, hereafter. Information with respect to earlier years will be found in earlier issues of the Official Year Book.

(ii) *Stabilized Marketing.* A detailed survey of legislation relating to stabilization of the wheat industry, including controls exercised during the 1914-18 and 1939-45 Wars and legislation establishing the permanent Wheat Stabilization Plan in 1948, was given in the Appendix to Official Year Book No. 37 (pp. 1295-99).

(iii) *The Australian Wheat Board.* The Australian Wheat Board was constituted in September, 1939 under National Security (Wheat Acquisition) Regulations to purchase sell or dispose of wheat or wheat products, manage and control all matters connected with the handling, storage, protection, shipment, etc. of wheat acquired and such other matters as were necessary to give effect to the regulations.

The Board was reconstituted, with similar powers, under the Commonwealth Wheat Stabilization Act 1948 to administer the stabilization plan. The new Board commenced to function on the 18th December, 1948.

(iv) *Wheat Stabilization Plan.* (a) 1947-48 to 1952-53. Details of the Wheat Stabilization Plan which operated during the seasons 1947-48 to 1952-53 inclusive were published in Official Year Book No. 40, pp. 841 and 842, and previous issues. All contributions paid into the Fund established as a part of the plan have now been refunded.

(b) 1953-54 to 1957-58. Agreement was reached in July, 1954 at a conference of Premiers and Ministers for Agriculture on the terms of a new wheat industry stabilization plan. The plan was submitted to polls of wheat growers in the mainland producing States, 94 per cent. of growers voting in favour of the plan.

The necessary legislation was subsequently passed by Commonwealth and State Governments and the plan operated from the 1953-54 season.

The principal features of the plan are as follows :—

- (i) The period of the Wheat Stabilization Plan to be five years, 1953-54 to 1957-58 inclusive.
- (ii) The Australian Wheat Board will be the sole authority for marketing wheat within Australia and wheat and flour for export from Australia.
- (iii) The Commonwealth Government will guarantee a return to growers of the ascertained cost of production in respect of up to 100 million bushels of wheat exported from Australia from each of the crops covered by the plan.
- (iv) The home consumption price will not be less than the guaranteed price. Subject to this understanding, the home consumption price will be fixed at 14s. per bushel, bulk f.o.r. ports, but will vary downwards to conform with the International Wheat Agreement price current at the commencement of each season. If no international agreement is operating the home consumption price will vary downwards with the current export price fixed by the Wheat Board.
- (v) A premium of 3d. per bushel on wheat grown in Western Australia and exported from that State will be paid in recognition of the natural freight advantage applying to that State.
- (vi) The home consumption price will be loaded by an amount necessary to cover the cost of freight on wheat to Tasmania. For 1953-54 and 1954-55 this amount is 1½d. per bushel.
- (vii) A Stabilization Fund will be established by means of an export tax of 1s. 6d. per bushel when wheat export prices exceed the costs of production by this amount or more, and by that portion of 1s. 6d. by which the export prices exceed the costs of production when the excess is less than 1s. 6d. per bushel.
- (viii) The maximum amount of the Stabilization Fund will be £20 million. As the Fund accumulates beyond this figure, repayments will be made to the oldest contributing pool.
- (ix) When average export realizations fall below costs of production, export returns will be raised, in respect of up to 100 million bushels, first by drawing upon the Stabilization Fund and when that Fund is exhausted the Commonwealth Government will make the necessary payments.

5. Marketing of Wheat.—(i) *Wheat Acquired and Disposed of.* (a) *Wheat Acquired.* Particulars of wheat acquired by the Australian Wheat Board from the 1949-50 to 1954-55 harvests are shown in the following table :—

**AUSTRALIAN WHEAT BOARD : WHEAT ACQUIRED, 1949-50 TO 1954-55.**

('000 Bushels.)

Pool.	Harvest.	New South Wales.	Victoria.	Queensland.	South Australia.	Western Australia.	Tasmania.	Australia.

(b) *Wheat Disposal.* Details relating to the disposal of wheat during the years ended 30th November, 1950 to 1955 are shown in the following table :—

**AUSTRALIAN WHEAT BOARD : DISPOSAL OF WHEAT, 1950 TO 1955.(a)**  
(’000 Bushels.)

Particulars.	1950.	1951.	1952.	1953.	1954.	1955.
Sold for export as wheat ..	80,931	85,227	46,192	59,517	40,547	63,171
Sold for export as flour ..	30,947	42,454	3f.693	41,255	26,871	(b)34,024
Sold for local consumption as flour ..	35,484	37,577	39,049	39,108	35,860	38,012
Sold for other purposes ..	25,499	29,556	26,233	20,605	20,261	18,560

(a) Years ended 30th November.

(b) Includes flour content of manufactured wheat products exported.

(ii) *Finance.* The Wheat Acquisition Regulations empowered the Minister to arrange with the Commonwealth Bank for advances to the Board, the advances being guaranteed by the Commonwealth Government. The Wheat Industry Stabilization Act 1948 included similar provisions for advances to the reconstituted Board established under that Act.

(d) Includes £11,070,976 paid into Wheat Prices Stabilization Fund under Wheat Export Charges Act 1948, plus interest £400,712. (e) Includes £9,166,550 paid into Wheat Prices Stabilization Fund under Wheat Export Charges Act 1948, plus interest £282,291. (f) Includes £9,189,577 paid to Wheat Prices Stabilization Fund under Wheat Export Charge Act, 1954.

NOTE.—Details of earlier pools will be found in previous issues of the Year Book.

(iii) *Advances to Growers.* Details of advances made to wheat growers in respect of the various pools are published in *Statistical Bulletin : The Wheat Industry, Australia*, last issued in April, 1956.

6. *International Wheat Agreement.*—Details of the International Wheat Agreement operative from 1st August, 1949 to 31st August, 1953 were published in Official Year Book No. 40, pp. 844-5, and previous issues.

A table showing guaranteed sales and purchases and actual transactions recorded during 1952-53, the last year of the Agreement, was published in Official Year Book No. 41, p. 752.

A further agreement covering a period of three years from 1st August, 1953 to 31st July, 1956 was signed in Washington in April, 1953. Sweden and the United Kingdom have failed to enter into the new agreement while Jordan, Korea, Vatican City and Yugoslavia have joined the new agreement. Australia's quota was fixed originally at 48 million bushels but this was subsequently adjusted to 45 million bushels.

Particulars of guaranteed sales and purchases and transactions actually recorded during 1953-54 are shown in the table below.

**INTERNATIONAL WHEAT AGREEMENT: GUARANTEED ANNUAL SALES AND PURCHASES AND TRANSACTIONS RECORDED FOR 1953-54.(a)**  
(Million Bushels.)

(a) Wheat and wheat flour as wheat. (b) Quantities which exporting countries must sell if required by importing countries to do so at the maximum price. (c) Quantities which importing countries must buy if required to do so at the relevant minimum price.

7. **Wheat Farms.**—(i) *Number.* Particulars of the number of farms growing 20, acres and upwards of wheat for grain during each of the years 1949-50 to 1953-54, compared with the average for the five years ended 1938-39, are shown in the following table. It should be noted that a farm worked on the share system or as a partnership is included as one holding only.

**NUMBER OF FARMS GROWING 20 ACRES AND UPWARDS OF WHEAT FOR GRAIN.**

State.	Average, 1934-35 to 1938-39.	1949-50.	1950-51.	1951-52.	1952-53.	1953-54.

Australia(a) ..	51,836	48,041	45,653	42,390	44,464	46,091

(a) Excludes Australian Capital Territory.

(ii) *Special Tabulations relating to Wheat Holdings.* With the co-operation of State Statisticians, a series of special tabulations relating to rural holdings was undertaken for all States for the year 1949-50. The tabulations, which covered, *inter alia*, a series of size classifications of wheat farms, have been published in detail in *Primary Industries Bulletin*, 1949-50, No. 44. A similar tabulation was made for the year 1947-48, a summary of the results being published in *Production Bulletin* No. 42, Part II.—*Primary Industries* and Official Year Book No. 38, page 947.

8. **Area, Production and Yield per Acre.**—(i) *Area.* Wheat is the principal crop grown in Australia, and its progress since 1860 has been almost continuous. Prominent features in its early development were the increase in population following the discovery of gold and the redistribution of labour after the surface gold had been won. The economic depression of 1893 interrupted its progress, but its subsequent recovery was assisted by the invention of mechanical appliances, the use of superphosphates as an aid

to production, and the introduction of new and more suitable varieties for Australian conditions. The establishment of closer settlement schemes and the settling of returned soldiers and others on the land were additional factors in its expansion.

As previously mentioned, any variation in the acreage sown to this cereal materially affects the total area of crops. The area, production and yield per acre of wheat for grain in each State are shown below for the years 1949-50 to 1953-54 in comparison with the averages for the decennial periods ended 1938-39 and 1952-53 :—

#### WHEAT FOR GRAIN: AREA, PRODUCTION AND YIELD PER ACRE.

1953-54 ..	19.0	22.5	17.6	19.9	13.8	27.2	18.5	18.4

(a) 60 lb. per bushel.

A graph showing the expansion of the area sown to wheat for grain in Australia since 1860 appears on page 859 while a map showing the distribution of areas growing wheat for grain throughout Australia in 1947-48 appeared in Official Year Book No. 39, pp. 977-8. Similar maps showing the distribution of wheat areas in 1924-25 and 1938-39 appeared respectively in Official Year Book No. 22, p. 695, and in No. 34, p. 451.

(ii) *Production.* Apart from the variations in the area sown, the size of the wheat harvest in Australia is largely determined by the nature of the season and inconsistencies in this respect are reflected in the yearly production.

The main wheat-producing States of Australia are New South Wales, Victoria, South Australia and Western Australia. Queensland production normally approaches local demands, but Tasmania imports wheat from the mainland to satisfy its needs, though it ships flour made from local wheat which is particularly suitable for biscuits. Normally the production of wheat greatly exceeds Australian requirements, and from half to two-thirds of the crop is exported overseas.

Australia's wheat production in 1953-54 was 198.0 million bushels, representing an average yield of 18.4 bushels per acre. This was 39.0 million bushels more than the average for the ten years ended 1952-53 and 28.6 million bushels more than the average for the ten years ended 1938-39.

(iii) *Yield per Acre.* Short-term variations in yield per acre are due chiefly to the vagaries of the seasons. The best yields per acre for single seasons since 1901 were obtained in 1920-21, 16.1 bushels; in 1942-43, 16.8 bushels; in 1949-50, 17.8 bushels; in 1952-53, 19.1 bushels (the record); and in 1953-54, 18.4 bushels.

(iv) *Decennial Averages, 1861-70 to 1945-54.* The following table shows the average area, production and yield per acre for decennial periods since 1861.

#### WHEAT FOR GRAIN: AVERAGE AREA AND PRODUCTION, AUSTRALIA.

Period.				Area.	Production.	Yield per Acre.
				'000 Acres.	'000 Bushels.	Bushels.
1861-70	..	..	..	831	10,622	12.8
1871-80	..	..	..	1,646	17,711	10.8
1881-90	..	..	..	3,258	26,992	8.3
1891-1900	..	..	..	4,087	29,934	7.3
1901-10	..	..	..	5,711	56,058	9.8
1911-20	..	..	..	8,928	95,480	10.7
1921-30	..	..	..	11,201	135,400	12.0
1931-40	..	..	..	14,176	177,758	12.5
1941-50	..	..	..	11,358	145,599	12.8
1945-54	..	..	..	11,478	167,873	14.6

It should be noted, that with improved farming methods, including the proper tillage of the soil, rotation of crops, the growing of suitable varieties and the application of fertilizers, average yields per acre in the five decades since 1901 have shown a continued improvement.

9. *Varieties of Wheat Sown.*—(i) *General.* The breeding of wheat suitable to local conditions has long been established in Australia. Farrer (1845-1905) did invaluable work in pioneering this field and the results of his labour and the continued efforts of those who have since followed him have proved of immense benefit to the wheat industry of Australia. Their efforts have resulted in better average yields, a greater uniformity of sample, with which have accrued certain marketing advantages, as well as an improvement in the quality of wheat grown. More than 1,000 different varieties of Australian wheats have been catalogued by the Commonwealth Scientific and Industrial Research Organization, but the number of the principal varieties grown during each season is restricted to about 40.

(ii) *Stats, 1953.* The principal varieties of wheat sown and the percentage of each to the total area sown in the five main producing States during 1953 were as follows:—New South Wales, Bencubbin (38.2), Gabo (15.8), Kendee (7.6); Victoria, Insignia (41.0), Quadrat (26.4), Pinnacle (21.4); Queensland, Gabo (15.4), Charter (14.9), Lawrence (13.8); South Australia, Gabo (22.9), Bencubbin (9.9); Western Australia, Bungulla (25.6), Bencubbin (21.8), Kondut (10.4). A detailed table of wheat varieties sown in these five States appears in *Primary Industries Bulletin* No. 48, *Part I.—Rural Industries.*

10. *F.A.Q. Standard of Wheat.*—The Chambers of Commerce in each of the four main wheat States each year determine the "f.a.q." standard for the State. "F.a.q." means "fair average quality", and the standard is used as the basis for sales of the season's crop. It represents the average quality for the season, and this average varies from year to year, and from State to State. "F.a.q." is an Australian term, and the method differs from that of other countries which sell according to sample, or (as in Canada) according to grades which are fixed, and do not vary from year to year.

Samples of wheat are obtained by the Chambers of Commerce from the different wheat districts, and are mixed to give a representative sample of the whole crop. From this representative sample the f.a.q. weight is determined by the use of the Schopper 1-litre scale chondrometer.

The f.a.q. weight of a bushel of wheat in each of the four main wheat-producing States for the 1954-55 season's crop was as follows (1953-54 details in parentheses)—New South Wales, 66½ lb. (64 lb.); Victoria, 62½ lb. (64½ lb.); South Australia, 64½ lb. (63½ lb.); and Western Australia, 63½ lb. (64½ lb.).

11. **Price of Wheat.**—(i) *Home Consumption.* The price charged by the Australian Wheat Board for wheat sold to millers for gristing into flour for consumption in Australia and for wheat sold as stock feed is shown in the table below for the years indicated.

**AUSTRALIAN WHEAT BOARD'S PRICE FOR WHEAT FOR HOME CONSUMPTION : AUSTRALIA.**

(s. d. per Bushel, Bulk Basis.)

Particulars.	1950.(a)	1951.	1952.	1953.	1954.	1955.
For Flour .. ..	6 8	7 10	10 0	11 11	(b)14 1½	(b)14 1½
For Stock Feed .. ..	6 8	7 10	(c)12 0	(c)13 11	(b)14 1½	(b)14 1½

(a) Excludes 5d. per bushel subsidy paid by the Commonwealth Government, making the total return to growers 7s. 1d. per bushel, bulk basis. (b) Of this, 1½d. is to be used to meet freight charges incurred on wheat shipped to Tasmania. (c) Excludes subsidy of 4s. 1d. in 1952 and 2s. 2d. in 1953 paid by the Commonwealth Government. In Western Australia the price in 1952 was 10s. exclusive of subsidy.

(ii) *Export Wheat Prices—Australian Wheat Board's Basic Selling Price.*—The Wheat Board basic export selling prices averaged 14s. 6d. for the season ended 31st July, 1955, both for wheat sold under the International Wheat Agreement and for "free" wheat sold on the open market. Actual selling prices have been lower than the basic prices in some cases, particularly where other exporting countries enjoy a geographical freight advantage.

The maximum and minimum prices fixed under the 1953-56 International Wheat Agreement are expressed in terms of "Canadian currency per bushel, at the parity of the Canadian dollar determined for the purposes of the International Monetary Fund as at 1st March, 1949 for No. 1 Manitoba Northern wheat in bulk in store Fort William—Port Arthur." Expressed in terms of Australian currency the maximum price for f.a.q. Australian wheat sold under the Agreement is approximately 18s. 5½d. per bushel while the minimum price is 13s. 10d. per bushel, though it may be higher or lower depending upon the differences in freight rates between Canada—the United Kingdom and Australia—the United Kingdom.

Details of export wheat prices in previous years, including those received for wheat sold under the terms of the 1949-1953 International Wheat Agreement, are given in Official Year Book No. 41, p. 755, and *Statistical Bulletin: The Wheat Industry, Australia*, No. 88, of April, 1955, and in previous issues of these publications.

12. **Value of the Wheat Crop.**—The estimated gross value of the wheat crop in each State and in Australia during the season 1953-54 and the value per acre are shown below.

**WHEAT FOR GRAIN : VALUE OF CROP(a), 1953-54.**

Particulars.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Aust.
Aggregate value £'000	44,016	37,009	7,225	21,969	27,712	184	20	138,135
Value per acre ..	£13/2/3	£15/9/9	£12/9/2	£14/7/6	£9/12/1	£18/19/10	£12/17/8	£12/16/11

(a) Gross value of total crop, including wheat used for seed and for stock feed on farms.

13. **Production and Disposal of Wheat in Australia.**—In the following table details are given of the production of wheat and its disposal during each of the years ended 30th November, 1950 to 1954 in comparison with the average for the three years ended November, 1937 to 1939. The particulars respecting local consumption refer to sales actually executed by the Australian Wheat Board, whilst those respecting exports represent actual shipments. (For particulars of production and exports from 1860 see graph, p. 860).

(a) Includes wheatmeal from July 1951, and sharps from July, 1954. (b) Included with flour (local consumption). (c) Included with stock feed. (d) Includes allowance for unrecorded movements in stocks, gain or loss in out-turn, etc.

14. **Exports of Wheat and Flour.**—(NOTE : Statistics in this section relate to years ended 30th June.) (i) *Quantities.* The following table shows particulars of the exports of wheat and flour and total of both in terms of wheat for each of the years 1949–50 to 1953–54 compared with the average for the five years ended 1938–39. For the sake of convenience, flour has been expressed at its equivalent in wheat, 1 ton of flour being taken as equal to 46.3 bushels of grain. Wheat and flour have been imported to tide over lean seasons on only two occasions since 1900 : in 1902–3 the wheat harvest was as low as 12,378,000 bushels, and wheat and flour representing 12,468,000 bushels of wheat were imported, whilst an equivalent of 7,279,000 bushels was imported in 1914–15 to supplement the yield of 25 million bushels produced in that season. During the five years ended 1953–54 exports in terms of wheat averaged 102,580,000 bushels, compared with the average of 106,432,000 bushels for the five years ended 1938–39.

## WHEAT AND FLOUR : EXPORTS FROM AUSTRALIA.

Year.	Quantity.				Value. (£'000.)		
	Wheat.	Flour.		Total as Wheat.	Wheat.	Flour.	Total.
		As Flour.	As Wheat. (a)				
'000 bushels.	Tons. (2,000 lb.)	'000 bushels.	'000 bushels.				
Average, 1934-35 to 1938-39 ..	76,473	64,707	29,959	106,432	14,813	(b)5,058	19,871

(a) One ton of flour is treated as equivalent to 46.3 bushels of wheat.

16. **Bulk Handling and Storage of Wheat in Australia.**—(i) *Description and Development of the Bulk Handling System.* A detailed description of the bulk handling system including its advantages and disadvantages compared with other methods of handling appeared on pages 954–8 of Official Year Book No. 39.

New South Wales, Victoria and Western Australia have operated bulk handling systems for a number of years, but until recently no efforts have been made to introduce such a system in the other States.

Late in 1953 it became clear that Australia could not clear its stocks of wheat as quickly as in past years and in April, 1954 the Commonwealth Government arranged to finance the construction of additional storage space in New South Wales, Victoria and South Australia (Western Australia and Queensland were later included in the scheme). The Australian Wheat Board was authorized to control the expenditure of the money provided, amounting to £3½ million.

(ii) *Bulk Handling and Storage in the States.* Particulars of the operation of the bulk handling and storage system and projected extensions in the States concerned are set out below :—

(a) *New South Wales.* At the end of 1954 there were 180 elevators operated by Government Grain Elevators and situated at the more important wheat receiving stations throughout the State as well as terminal elevators at Sydney and Newcastle. The storage capacity of the country elevators is 25,422,000 bushels. In 1953–54, 61 per cent. of the total crop was handled compared with 76 per cent. in 1952–53 and 48 per cent. in 1940–41.

Additional storage capacity is being constructed at several country centres and the sub-terminals at Junee, Temora and Werris Creek are being enlarged to a total capacity of 4.5 million bushels each as part of the plan to meet the general shortage in storage capacity.

Temporary bulkheads have also been erected to meet shortages and in 1951–52 75 of these were used.

Further bulk handling facilities are in course of construction at Newcastle and numerous sidings in Northern and Western New South Wales. When completed these storages—which are being constructed with the State's portion of the Commonwealth loan of £3½m. mentioned above—will add a further 11,900,000 bushels to the total bulk storage available in N.S.W., but when they come into use a number of temporary bulk-heads will be dismantled.

(b) *Victoria.* The Victorian Grain Elevators Board operates 148 elevators with a storage capacity of 17,034,000 bushels and a terminal elevator at Geelong with a capacity of 4,100,000 bushels. Storages for 18 million bushels, adjacent to the permanent terminal, have been constructed at Geelong.

Temporary measures for extending bulk handling facilities have been adopted and sub-terminals were constructed or acquired at Dunolly, Murtoa and Warracknabeal with a capacity of 22,000,000 bushels. Temporary bulkheads have also been used and in 1952-53 and 1953-54 there were 86 in use with a total storage for 6,885,000 bushels.

In 1953-54, 96 per cent. of the total crop was received in elevators, compared with 98 per cent. in 1952-53 and 24 per cent. in 1939-40.

(c) *Queensland.* In 1952-53 a temporary silo was provided at Pinkenba and a number of concrete silos and temporary bulkheads have subsequently been erected at country centres. Plans to extend this programme include the provision of a permanent bulk terminal at Pinkenba.

(d) *South Australia.* In 1951-52 a bulk terminal was erected by the Wheat Board at Ardrossan with a storage capacity of 1,000,000 bushels. Approximately 4,115,000 bushels were handled in 1952-53.

Additional storages are being constructed at Port Adelaide, Kadina, Gladstone and Cummins with a total capacity of 10,650,000 bushels.

(e) *Western Australia.* The system of storage in Western Australia differs from that in the eastern States in that horizontal storages made of timber and galvanized iron are used. These are relatively cheap and may be moved from place to place as required. These storages are operated by the Co-operative Bulk Handling Ltd. which is controlled and managed by wheat growers.

In 1953-54 there were 277 sidings equipped with bulk handling facilities and 36,138,000 bushels, comprising the whole of the marketed wheat crop, were received.

Extension of storage facilities in 1954-55 involved the erection of a storage for 5 million bushels at Midland Junction, which is now completed.

(f) *Tasmania.* Bulk handling of wheat has not been found necessary in this State but it is planned to erect installations at Hobart and Launceston to store wheat imported from the mainland.

17. *World Area and Production of Wheat.*—The details in the following table of the world area and production of wheat by principal countries and by continents have been compiled from official sources so far as they are available, but more particularly from the records published by the Food and Agriculture Organization of the United Nations, and the United States Office of Foreign Agricultural Service. The harvests shown for countries in the Northern Hemisphere are those garnered during the period March to October whilst those for the Southern Hemisphere cover the period November to February following.

18. Exports—Principal Countries.—The following table shows the quantities of wheat exported from the chief exporting countries for the period 1934-38 and the years 1952 and 1953 according to statistics recently published by the Food and Agriculture Organization of the United Nations, and the United States Office of Foreign Agricultural Service.

While Australia's production of wheat averages about 3 per cent. of the world's total, its exports account for a much higher proportion of the total quantities shipped. During the five years 1934-38 Australia's share of world wheat exports was 16 per cent., but in 1953 the proportion fell to 10 per cent., although the actual quantity shipped was only 2 per cent. lower

## § 5. Oats.

1. Area, Production and Yield per acre.—Oats are usually next in importance to wheat amongst the grain crops cultivated in Australia, but while wheat grown for grain in 1953-54 accounted for 50.9 per cent., oats grown for grain represented only 10.1 per cent. of the area of all crops. The area, production and yield per acre of oats for the years 1949-50 to 1953-54 and the averages for the ten-year periods ended 1938-39 and 1952-53 are shown in the following table:—

## OATS FOR GRAIN: AREA, PRODUCTION AND YIELD PER ACRE.

(a) 40 lb. per bushel.

A graph showing the area sown to oats appears on page 859.

The principal oat-growing States are New South Wales, Victoria and Western Australia, which produce on the average more than 80 per cent. of the total quantity grown in Australia. South Australia also produces considerable quantities, but in Queensland and Tasmania the output is small.

During the five seasons ending 1953-54 an average of 8.7 million bushels were exported; 2.2 million bushels were used in factories for oatmeal; and 6.2 million bushels were used for seed purposes; leaving a balance of 15.3 million bushels for stock feed (principally unprocessed).

The largest yield per acre recorded for Australia in the ten years ended 1953-54 was that of the season 1947-48, amounting to 19.3 bushels per acre, this being the highest yield since 1920-21. The smallest yield per acre for the same period was that recorded in the abnormally dry season 1944-45, namely 4.4 bushels which is the lowest ever recorded for Australia.

2. **Price of Oats.**—The average wholesale price in the Melbourne market for oats of good milling quality in 1953-54 was 7s. 6½d. per bushel. This represents an increase of 3.1 per cent. on the price in 1952-53 (7s. 3¾d.) and an increase of 118.1 per cent. on the price in 1938-39 (3s. 5½d.).

3. **Value of Oat Crop.**—The estimated gross value of the oat crop in each State for the 1953-54 season and the value per acre were as follows :—

#### OATS : VALUE OF CROP, 1953-54.

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Aust.
Aggregate value £'000	3,946	3,609	84	1,572	2,925	207	2	12,345
Value per acre ..	£7/14/9	£6/3/9	£6/4/3	£5/12/2	£3/19/10	£10/6/3	£8/11/7	£5/15/6

4. **Imports and Exports.**—The production of oats in Australia is sufficient to admit of a regular export trade. The quantities and values of oats exported from Australia during the years 1949-50 to 1953-54 compared with the average for the years 1934-35 to 1938-39 are shown hereunder :—

#### OATS : EXPORTS, AUSTRALIA.

Particulars.	Average, 1934-35 to 1938-39.	1949-50.	1950-51.	1951-52.	1952-53.	1953-54.
Quantity '000 bus.	286	6,626	7,947	12,971	11,846	3,275
Value .. £'000	36	2,394	3,529	8,001	4,851	1,219

The quantity of oats imported into Australia is usually not very large, although in 1945-46 imports exceeded exports by 802,000 bushels. Canada was the chief supplier. The previous year when imports exceeded exports was 1927-28 (by 461,000 bushels), when New Zealand was the main supplier. In 1953-54 the principal countries of destination of the exports were the United Kingdom, Federal Republic of Germany, Singapore, Federation of Malaya, India and Ceylon.

5. **Oatmeal, etc.**—The production of oatmeal amounted in 1953-54 to 40,010 tons equivalent to about 2,241,000 bushels of oats, or about 6.8 per cent. of the total production.

6. **World Production.**—The world's production of oats for the year 1954, excluding production in the U.S.S.R., according to preliminary details released by the Food and Agriculture Organization of the United Nations, amounted to 2,745 million bushels, harvested from 91.7 million acres, representing an average yield of 29.9 bushels per acre. This compared with the production in the previous year of 2,673 million bushels from an area of 89.4 million acres also giving an average yield of 29.9 bushels per acre. The world's average production, including that of the U.S.S.R., for the years 1934 to 1938 amounted to 3,588 million bushels from 143 million acres giving an average yield of 25.09 bushels per acre. In comparison with the average return per acre for world production in 1954 that of Australia for the same period (15.4 bushels) appears very small. Yields in excess of 40 bushels per acre are not uncommon and some European countries record averages in excess of 50 bushels per acre.

## § 6. Maize.

1. **States Growing Maize.**—Maize is grown for grain chiefly in Queensland and New South Wales, the area so cropped in these States during the 1953-54 season being 173,291 acres, or 97 per cent. of the total for Australia. In all States except South Australia the crop is grown to a greater or lesser extent for green fodder, particularly in connexion with the dairying industry.

2. **Area, Production and Yield per Acre.**—Although maize for grain is grown extensively in other countries, the area sown to maize for grain in Australia has averaged only 214,636 acres during the ten years ended 1952-53. Compared with the previous year, the area in 1953-54 increased by 4,915 acres but was considerably less than the comparatively large areas of 414,914 and 400,544 acres sown in 1910-11 and 1927-28 respectively.

There has been a considerable increase in recent years in the growing of maize from hybrid strains of seed. Varieties have been developed which are capable of producing yields per acre considerably in excess of the older open pollinated types. The expansion in areas sown to hybrid maize necessitates a parallel development in the specialized industry of growing hybrid strains of seed.

The area, production and yield per acre of maize for grain in each State for the years 1949-50 to 1953-54 and the averages for the ten-year periods ended 1938-39 and 1952-53 are given in the following table. Separate details for hybrid and other varieties are shown for New South Wales, Victoria and Queensland for 1953-54.

(a) 56 lb. per bushel.

The average yield for Australia for the ten-year period was 26.3 bushels per acre. Among principal producing countries the United States of America during 1954 averaged 37.1 bushels per acre and Italy 34.5 bushels.

3. **Price of Maize.**—The average wholesale price of maize in the Melbourne market in 1953-54 was 17s. 3½d. per bushel compared with 20s. 8½d. in 1952-53. In 1938-39 the comparable price for maize of similar quality was 5s. 2½d.

4. **Value of Crop.**—The estimated gross value of the crop in each State for the 1953-54 season and the value per acre were as follows:—

#### MAIZE FOR GRAIN : VALUE OF CROP, 1953-54.

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Aust.
Aggregate value .. £'000	1,557	270	2,037	..	1	3	3,868
Value per acre ..	£26/11/8	£48/2/41	£17/15/1	..	£28/12/5	£48/18/2	£21/12/2

5. **Exports of Maize and Maize Products.**—Details of exports of maize for the five years ended 1953-54 compared with the average of the five years ended 1938-39 are shown below.

#### MAIZE : EXPORTS, AUSTRALIA.

Particulars.	Average, 1934-35 to 1938-39.	1949-50.	1950-51.	1951-52.	1952-53.	1953-54.
Quantity '000 bus.	57	1,201	1,189	188	782	504
Value .. £'000	9	614	786	149	703	353

In recent years only small quantities of maize have been imported.

Exports of cornflour, which prior to the war were very small, increased considerably during the war years, the principal country of destination being New Zealand. In 1953-54 1,242,463 lb., valued at £72,136, were exported, compared with an annual average of only 37,000 lb. during the five years ended 1938-39. It should be noted that these figures include some quantities of "cornflour" made from wheat. Imports of cornflour into Australia are negligible.

6. **World Production.**—According to preliminary details released by the Food and Agriculture Organization of the United Nations, world production of maize, excluding that of the U.S.S.R., in the year 1954, amounted to 5,389 million bushels, harvested from 216 million acres, giving an average yield per acre of 25.0 bushels. This compared with production in the previous year of 5,693 million bushels from 214 million acres, yielding an average per acre of 26.6 bushels. Production (including that of the U.S.S.R.) over the years 1934 to 1938 averaged 4,525 million bushels from 218 million acres, giving an average yield per acre of 21.0 bushels.

The United States of America is the most important maize-producing country in the world and during the three years ended 1954 the area sown to maize in that country averaged 80.5 million acres or 38 per cent. of the world total. During the same period production averaged 3,145 million bushels or about 57 per cent. of the world total. These figures are not strictly comparable with those for other countries included in the above-mentioned world totals as the area, and an estimate of grain equivalent, of maize used as green fodder are included. In recent years maize grain actually harvested in the United States has amounted to about 90 per cent. of the total crop.

## § 7. Barley.

1. Area, Production and Yield per Acre.—The area sown to barley for grain expanded considerably during the ten years preceding the 1939-45 War—from 383,000 acres in 1930-31 to 836,000 acres in 1939-40. This increase was followed by a decline to 443,000 acres in 1943-44, but the area sown has increased in succeeding years, and in 1953-54 reached the record level of 1,803,000 acres. Victoria was originally the principal barley-growing State, but since 1913-14 its place has been taken by South Australia which accounted for 62 per cent. of the Australian acreage in 1953-54. Victoria was next in importance with 21 per cent., leaving a balance of about 17 per cent. distributed among the other States. The totals given here relate to the areas harvested for grain; small areas are sown for hay, but more considerable quantities are sown for green forage. These, however, are not included in this section. The area, production and yield per acre of barley for grain in the several States for the years 1949-50 to 1953-54 and the averages for the ten-year periods ended 1938-39 and 1952-53 are shown in the following table:—

Total ..	21.4	21.2	20.3	25.4	13.1	31.4	..	22.9

(a) 50 lb. per bushel.

Taking Australia as a whole, about 82 per cent. of the area of barley for grain in 1953-54 was sown with malting or 2-row barley while the remainder consisted of 6-row, or feed, varieties. The proportion, however, varied considerably in the several States.

The consumption of barley during the season 1953-54 was as follows:—malt works, 7,118,000 bushels; flour and other grain mills, 297,000 bushels; distilleries, 63,000 bushels; exports, 28,216,000 bushels; leaving a balance of 5,927,000 bushels for feed, seed and other purposes.

The following table sets out the acreage and production of malting and other barley in Australia during the seasons 1949-50 to 1953-54 and the averages for the ten-year periods ended 1938-39 and 1952-53.

**BARLEY, MALTING AND OTHER : AREA AND PRODUCTION, AUSTRALIA.**

Season.	Area. ( <sup>'</sup> 000 Acres.)			Production. ( <sup>'</sup> 000 Bushels.)			Yield per Acre. (Bushels.)		
	Malting (2-row).	Other (6-row).	Total.	Malting (2 row).	Other (6-row).	Total.	Malting (2-row).	Other (6-row).	Total.
Average, 1929-30 to 1938-39 ..	428	67	495	7,480	1,073	8,553	17.5	16.0	17.3
1949-50 ..	927	113	1,040	17,569	1,974	19,543	18.9	17.5	18.8
1950-51 ..	963	116	1,079	20,811	2,066	22,871	21.6	17.8	21.2
1951-52 ..	965	153	1,118	19,477	2,432	21,909	20.2	15.9	19.6
1952-53 ..	1,123	254	1,377	29,633	5,412	35,045	26.4	21.3	25.5
Average 1943-44 to 1952-53 ..	774	123	897	15,308	2,026	17,334	19.8	16.5	19.3
1953-54 ..	1,482	321	1,803	35,923	5,349	41,272	24.2	16.7	22.9

During the last ten-year period shown the average area of barley of the malting, or 2-row, class was more than six times the corresponding figure for barley of the 6-row, or feed, class. The yield per acre for malting barley was 20 per cent. higher than that for 6-row barley.

2. **Australian Barley Board.**—Following the outbreak of war in 1939, the Australian Barley Board, representative of the industry, was formed, and the Commonwealth Government acceded to its request to acquire the entire 1939-40 barley crop, which was placed under the control of the Board. A pool was established from which proceeds were distributed with appropriate margins for different grades of barley.

The Board was responsible for the marketing and storage of barley, and, like the Australian Wheat Board, appointed licensed receivers to receive grain on its behalf and to act as agents for all local and overseas sales.

Following the decision of the Commonwealth Government not to acquire barley in the smaller producing States after 1941-42, the Governments of Western Australia and Queensland established State Barley Boards to control marketing in these States.

The Commonwealth Government did not acquire barley after the 1947-48 crop, and the Victorian and South Australian Governments formed a joint board under the same name as the former Commonwealth board to market the 1948-49 and subsequent crops of the two States. Details of these acquisitions are shown in the table below.

**AUSTRALIAN BARLEY BOARD : BARLEY ACQUIRED, SOLD, ETC.,**

„ 15 (1953-54 „ )	..	..	34,430	34,586	10 4.101	15,417,374

(a) Includes surplus in out-turn. (b) Paid to growers in the northern part of South Australia. Growers in the south-east of South Australia and Victoria received an additional 2d. per bushel.

3. **Prices.**—The average wholesale price for 2-row English malting barley in the Melbourne market during 1953-54 was 15s. 7d. compared with 15s. 3d. in 1952-53 and 3s. 5½d. in 1938-39.

4. **Value of Barley Crop.**—The estimated gross value of the barley crop in each State for the 1953-54 season and the value per acre are shown in the following table :—

**BARLEY FOR GRAIN : VALUE OF CROP, 1953-54.**

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Australia.
Aggregate value .. £'000	443	4,164	530	14,402	1,266	206	21,011
Value per acre ..	£13/18/11	£11/2/4	£9/8/11	£12/16/9	£6/1/6	£21/17/5	£11/13/1

5. **Exports.**—Australian exports of barley during the five years ended 1953-54 averaged 16,832,000 bushels, South Australia being the principal exporting State and the United Kingdom, the Netherlands and Japan the principal countries to which barley was shipped. Particulars of Australian exports for the years 1949-50 to 1953-54 together with the average for the five years ended 1938-39 are shown in the following table :—

**BARLEY : EXPORTS, AUSTRALIA.**

Particulars.	Average, 1934-35 to 1938-39.	1949-50.	1950-51.	1951-52.	1952-53.	1953-54.
Quantity '000 bus.	3,279	10,703	12,208	12,062	22,239	26,949
Value .. £'000	483	6,433	9,053	11,154	19,245	14,870

Imports of barley in recent years have been negligible.

In addition to exports of barley grain, there is also an export of Australian pearl and Scotch barley, the total for 1953-54 amounting to 452,746 lb., valued at £16,487, consigned mainly to Ceylon.

6. **Malt.**—(i) *Production.* Details of the quantity of grain used and the production of barley malt are given in the following table:—

**BARLEY MALT : GRAIN USED AND MALT PRODUCED, AUSTRALIA.**

Particulars.	1938-39.	1949-50.	1950-51.	1951-52.	1952-53.	1953-54.
Grain used '000 bus.	3,730	5,294	5,543	6,063	6,505	7,118
Malt produced '000 bus. (a)	3,621	5,438	5,550	6,073	6,620	7,078

(a) 40 lb. per bushel.

(ii) *Imports and Exports.* The production of malt in Australia was sufficient to meet local requirements and to provide a margin for export until 1947-48 but from 1948-49 to 1951-52 imports exceeded exports by an increasing quantity, the net imports reaching 266,000 bushels in 1951-52. In 1952-53, there was a small net export amounting to 4,000 bushels valued at £7,000 and in 1953-54 this increased to 140,124 bushels valued at £177,415.

7. **World Production.**—In comparison with the barley production of other countries, that of Australia is extremely small. The main producers in 1954 were Canada and the United States of America. China is also normally a major producer, but details for 1954 are not yet available. Australian production in that year was only a little more than one per cent. of the world total.

According to preliminary results compiled by the Food and Agriculture Organization of the United Nations, world production of barley in the year 1954, excluding that of the U.S.S.R., amounted to 2,434 million bushels harvested from 108.5 million acres, equivalent to a yield per acre of 22.4 bushels. This compared with the production of 2,430 million bushels in the previous year from 103 million acres, giving a yield per acre of 23.6 bushels. Production, including that of the U.S.S.R., over the years 1934-38 averaged 2,273 million bushels from 114.6 million acres, representing an average yield of 19.8 bushels per acre.

## § 8. Rice.

Rice-growing is confined almost entirely to Asia although limited quantities are grown in other countries. In Australia, rice was first cultivated at the Yanco Experimental Farm in New South Wales, but it was not grown commercially until 1924-25 when 16,240 bushels were produced from 153 acres. Favoured by high average yields and protected by tariff, rice culture made rapid progress in the Murrumbidgee Irrigation Area until local requirements were met and a small surplus became available for export. The area sown is controlled, being limited by the quantity of water available.

The area sown reached a maximum in 1943-44 when 40,690 acres yielded 4,015,000 bushels. The highest production was recorded in 1950-51 when the yield was 4,117,600 bushels.

The bulk of Australia's exports of rice, which had gone to the United Kingdom in years prior to 1938-39, is shipped now to islands in the South-East Asia area.

Details relating to area, production and trade for the years 1949-50 to 1953-54, compared with the averages for the years 1934-35 to 1938-39, are shown in the following table :—

RICE : AREA, PRODUCTION AND TRADE, AUSTRALIA. (a)

Season.	No. of Holdings Growing Rice (b)	Area.	Production (Paddy Rice).		Average Yield (Paddy) per acre.	Imports.		Exports.	
			Quantity.	Gross Value. (c)		Un-cleaned.	Cleaned.	Un-cleaned.	Cleaned.
		Acres.	'000 Bushels. (c)	£'000.	Bushels. (d)	Centals.	Centals.	Centals.	Centals.
Average, 1934-35 to 1938-39 ..	(e) 313	22,823	2,274	450	99.7	2,124	38,272	9,357	271,851
1949-50 ..	444	37,540	3,783	1,653	100.8	..	6,685	225	597,739
1950-51 ..	462	36,945	4,118	2,171	111.5	1	63	2,065	657,267
1951-52 ..	452	35,664	3,048	2,108	85.5	3	18	4,140	559,395
1952-53 ..	496	34,519	3,964	3,338	114.8	136	2,223	2,126	532,828
1953-54 ..	530	38,000	4,060	3,107	104.6	(f)	(f)	18,758	775,489

(a) Rice-growing in Australia has been practically confined to New South Wales with very small acreages only being sown in Queensland in recent seasons. (b) 20 acres or more in area.

(c) Excludes the value of straw. (d) 42 lb. per bushel. (e) 1938-39 figure, previous years not collected. (f) Not available.

## § 9. Sorghum for Grain.

The growing of sorghum for grain on an extensive scale is a recent development in Australia. No details of the area and production of this cereal are available prior to 1939-40, but the output was of little importance. The climatic conditions of Queensland and northern New South Wales are particularly suited for the growing of sorghum and the development so far has been restricted to these areas, but more particularly to Queensland which accounts for the greater portion of the area sown. The grain produced is fed to livestock and is becoming an important source of supply for supplementing other coarse grains for the feeding of livestock. Other sorghums are grown in Australia mainly as green fodder, hay and silage (sweet sorghums and Sudan grass) and for the production of brush for broom manufacture (broom millet). Particulars of the area and production of sorghum grown for grain are given in the following table.

GRAIN SORGHUM : AREA, PRODUCTION AND YIELD PER ACRE, AUSTRALIA.

Season.	Area.			Production.(a)			Yield per Acre.(a)		
	N.S.W.	Q'land.	Total. (b)	N.S.W.	Q'land.	Total. (b)	N.S.W.	Q'land.	Total. (b)

(a) 60 lb. per bushel. (b) Includes small areas sown and quantities produced in other States.

(c) Not available. (d) Queensland only.

# AREA OF CROPS: AUSTRALIA, 1860-61 to 1954-55

# WHEAT PRODUCTION AND EXPORTS: AUSTRALIA, 1860-61 to 1954-55

NOTE.—The export figures for the years 1915-16 to 1920-21 do not represent the surplus available for export in each of these years because of the dislocation of shipping due to the 1914-1918 War. For these years the quantity consumed in Australia has been averaged and the balance taken as exports.

# PRODUCTION OF OATS, BARLEY, MAIZE, RICE AND HAY : AUSTRALIA, 1860-61 to 1954-55

## § 10. Potatoes.

1. Area, Production and Yield per Acre.—Victoria possesses particular advantages for the growing of potatoes, as the rainfall is generally satisfactory and the climate is unfavourable to the spread of Irish blight; consequently, the crop is widely grown. The principal areas of that State are the central highlands, and the south-western and Gippsland districts. Tasmania comes next in order of acreage sown, although the production exceeded that of Victoria in some of the war years. New South Wales occupies third place in acreage and production. The area for these three States accounted for 79 per cent. of the total for Australia in 1953-54.

The area sown, production and yield per acre of potatoes in each State during the years 1949-50 to 1953-54 and the averages for the ten-year periods ended 1938-39 and 1952-53 are shown hereunder:—

## POTATOES : AREA, PRODUCTION AND YIELD PER ACRE.

Average, 1943-44 to								
1952-53 .. ..	2.68	3.38	4.39	5.62	5.55	3.93	5.55	3.55
1953-54 .. ..	3.52	4.05	3.48	6.41	6.66	4.18	4.59	4.27

After the outbreak of war in the Pacific in December, 1941, the area sown to potatoes increased rapidly and reached a maximum of 241,803 acres in 1944-45. Areas sown in subsequent seasons were considerably less, however, and showed a general decline to the figure for the 1953-54 season, 128,367 acres.

Compared with the yield per acre obtained in other countries, that returned for Australia is low; the production in New Zealand, for example, in 1953-54 averaged 7.20 tons per acre from an area of about 22,000 acres, as compared with a record yield of 4.31 tons per acre in Australia in 1951-52, and 4.27 tons per acre in 1953-54.

2. **Gross Value of Potato Crop.**—The estimated gross value of the potato crop of each State for the 1953-54 season and the value per acre are shown in the following table.

POTATOES : VALUE OF CROP, 1953-54.

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Aust.
Aggregate value £'000	1,090	4,087	1,142	1,303	1,595	1,940	18	12,075
Value per acre	£121/10/6	£77/9/9	£121/14/5	£185/10/3	£197/13/11	£56/3/10	£157/7/2	£94/1/3

3. **Consumption.**—The annual consumption of potatoes in Australia during each of the three years 1951-52 to 1953-54 amounted to 412,900 tons, 376,100 tons and 485,400 tons respectively, or 108.3 lb., 96.4 lb. and 122.2 lb. respectively per head of population. These figures exclude the quantities used for seed, which averaged about 60,000 tons annually over this period. Consumption during the three years ended 1938-39 averaged 318,500 tons (103.8 lb. per head of population) excluding 37,000 tons for seed. New South Wales, Queensland and, in some seasons, South Australia do not produce the quantities necessary for their requirements and must import from Tasmania and Victoria which have a surplus.

4. **Marketing.**—Commonwealth control of potato marketing under war-time legislation ceased at the end of 1948 with the completion of sales of the 1947-48 crop.

Potato Marketing Boards were subsequently established in all States under separate State legislation. Boards now operate in five States only as the tenure of the Queensland Board was not continued when its term expired in March, 1954.

5. **Exports.**—Prior to the 1939-45 War, small quantities of potatoes were exported, principally to the Pacific Islands and Papua. Since the war the export trade has expanded considerably reaching a peak in 1952-53 but declining in 1953-54. Details showing exports for the years 1949-50 to 1953-54 and the annual average for the period 1934-35 to 1938-39 are given in the following table:—

POTATOES : EXPORTS, AUSTRALIA.

Particulars.	Average, 1934-35 to 1938-39.	1949-50.	1950-51.	1951-52.	1952-53.	1953-54.
Quantity .. tons	1,884	15,183	6,231	12,468	37,570	4,010
Value .. £'000	17	341	190	437	1,237	155

Imports of potatoes are negligible.

## § 11. Onions.

1. **Area, Production and Yield per acre.**—Australia's supply of onions comes chiefly from Victoria, which accounted for 50.0 per cent. of the total area and 49.8 per cent. of the quantity produced in 1953-54. Queensland came next with 34.3 per cent. of the area and 26.1 per cent. of the production, leaving a balance of 15.7 per cent. of area and 24.1 per cent. of production distributed among the remaining four States. The Victorian crop consists almost entirely of brown onions of good keeping qualities, and the bulk of the crop is grown in a small section of the Western Division of the State, where soil conditions have been found to be particularly suitable for onion-growing on a commercial scale. Details of the area, production and yield per acre are given in the following table for the years 1949-50 to 1953-54 together with averages for the ten-year periods ended 1938-39 and 1952-53.

## ONIONS : AREA, PRODUCTION AND AVERAGE YIELD.

Average, 1943-44 to 1952-53 ..	3.59	5.94	4.24	9.39	8.98	3.95	5.00	5.73
1953-54 ..	4.91	6.26	4.79	10.56	12.34	4.83	2.00	6.29

2. Gross Value of Onion Crop.—The estimated gross value of the onion crop and the value per acre are shown in the following table for the 1953-54 season:—

## ONIONS : VALUE OF CROP, 1953-54.

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Aust.
Aggregate value £'000	621	769	508	174	145	3	1	1,662
Value per acre ..	£228/16/4	£211/4/3	£203/11/2	£368/19/2	£387/0/10	£169/8/11	£93/5/9	£228/5/9

3. Consumption.—The annual consumption of onions in Australia averaged 46,875 tons or 12.1 lb. per head of population during the three years ended 1953-54, compared with 40,600 tons or 13.2 lb. per head during the three years ended 1938-39. These figures exclude an estimated wastage which averaged 2,400 tons and 2,100 tons respectively.

4. **Imports and Exports.**—Onions are the only root crop, other than potatoes, in which any considerable overseas trade is carried on by Australia. In 1953-54 exports amounted to 3,317 tons, valued at £120,869, and were shipped mainly to Singapore and Canada. The quantity of exports in 1952-53 was 8,283 tons, valued at £249,000. There were no imports in 1952-53 and 1953-54, but 2,397 tons were imported in 1951-52, principally from New Zealand.

Details relating to fresh vegetables other than potatoes and onions are given in § 17.

## § 12. Hay.

1. **General.**—(i) *Area and Production.* As already stated, the chief crop in Australia is wheat grown for grain. Up to and including 1946-47 hay was next in importance in area but in 1947-48 gave place to oats (for grain). In the following year, 1948-49, green fodder replaced hay as the third most important crop and hay has since remained in fourth position.

In 1953-54 the hay area represented 9.2 per cent. of the total area cropped. A graph showing the area sown to hay since 1860 appears on page 859. In most European countries the hay consists almost entirely of meadow and other grasses, but in Australia a very large proportion consists of oats, wheat and lucerne. The area, production and yield per acre of hay of all kinds in the several States during the years 1949-50 to 1953-54 and the averages for the ten-year periods ended 1938-39 and 1952-53 are shown below :—

### HAY : AREA, PRODUCTION AND YIELD PER ACRE.

Season.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Aust.
AREA (ACRES).								
Average, 1929-30 to 1938-39 ..	757,010	1,110,616	67,850	541,265	432,217	83,118	2,338	2,994,414

1952-53 ..	578,651	1,245,217	135,673	317,462	290,296	192,381	4,971	2,704,651
Average, 1943-44 to 1952-53 ..	579,366	1,026,067	116,890	387,865	276,691	155,560	3,863	2,546,302
1953-54 ..	638,702	1,360,662	140,097	369,296	293,936	241,582	4,588	3,048,863
YIELD PER ACRE (TONS).								
Average, 1929-30 to 1938-39 ..	1.27	1.14	1.54	1.07	1.07	1.44	1.21	1.17
1949-50 ..	1.46	1.65	2.11	1.31	1.26	1.70	1.91	1.51
1950-51 ..	1.32	1.60	2.25	1.30	1.28	1.67	1.56	1.50
1951-52 ..	1.35	1.63	1.83	1.48	1.22	1.76	1.58	1.51
1952-53 ..	1.49	1.65	2.05	1.48	1.28	1.75	1.54	1.57
Average, 1943-44 to 1952-53 ..	1.23	1.43	1.90	1.25	1.14	1.60	1.35	1.34
1953-54 ..	1.42	1.69	1.99	1.41	1.34	1.96	1.52	1.58

Owing to various causes, particularly the variation in the relative prices of grain and hay and the favourableness or otherwise of the season for a grain crop, the area of hay is apt to fluctuate considerably. The area under hay in Australia during the season 1915-1916, 3,597,771 acres, was the largest on record, whilst the average for the ten years ended 1952-53 was 1,905,815 acres.

(ii) *Varieties Grown.* Information regarding areas cut for hay is available for all States, and details for 1953-54 are given in the following table.

**HAY : AREA UNDER VARIOUS KINDS GROWN, 1953-54.**  
(Acres.)

State.	Wheaten.	Oaten.	Lucerne.	Other.	Total.
New South Wales ..	145,689	114,302	122,462	67,790	450,243
Victoria ..	39,793	240,031	48,674	478,725	807,223
Queensland ..	6,279	3,868	51,626	8,678	70,451
South Australia ..	62,458	118,529	12,451	68,568	262,006
Western Australia ..	37,536	115,305	188	66,142	219,171
Tasmania ..	3,054	28,393	782	91,020	123,249
Australian Capital Territory ..	18	1,554	1,184	267	3,023
Total ..	294,827	621,982	237,367	781,190	1,935,366

For all States and the Australian Capital Territory combined the proportions of the areas sown to the principal kinds of hay in 1953-54 were 32 per cent. for oaten, 15 per cent. for wheaten, 12 per cent. for lucerne, and 41 per cent. for other hay. In that year, oaten hay predominated in the States of South Australia and Western Australia, wheaten in New South Wales, lucerne in Queensland, and meadow and grass in Victoria and Tasmania.

2. Value of Hay Crop.—The following table shows the estimated gross value, and the value per acre, of the hay crop of the several States for the 1953-54 season :—

**HAY : VALUE OF CROP, 1953-54.**

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Aust.
Aggregate value £'000.	8,877	13,196	2,712	3,103	2,946	2,309	88	33,231
Value per acre ..	£19/14/4	£16/6/11	£38/9/10	£11/16/11	£13/8/10	£18/14/8	£29/3/0	£17/3/5

3. Farm Stocks of Hay.—Details of stocks of hay held on farms are now collected at the annual census of farm production. Particulars of stocks so held at 31st March in each year 1950 to 1954 are given in the table below.

**STOCKS OF HAY HELD ON FARMS.**  
(Tons.)

31st March—	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Australia.
1950 ..	680,498	1,014,747	101,222	341,888	188,167	116,549	2,530	2,445,601
1951 ..	608,416	940,537	102,487	321,873	154,094	112,887	1,774	2,242,068
1952 ..	500,596	1,129,163	29,766	418,734	142,711	129,893	2,702	2,353,565
1953 ..	628,977	1,347,363	97,492	402,477	186,523	145,375	5,119	2,813,326
1954 ..	700,367	1,479,299	106,794	420,423	216,023	185,549	4,775	3,113,230

4. Imports and Exports.—Under normal conditions, hay, whether whole or in the form of chaff, is somewhat bulky for oversea trade, and consequently does not figure largely amongst the imports and exports of Australia. During 1953-54 exports amounted to 2,955 tons, valued at £67,593.

### § 13. Green Fodder.

1. Nature and Extent.—Considerable areas are devoted to the growing of green fodder, mainly in connexion with the dairying industry. Consequently, green fodder ranks after wheat and oats (for grain) as the third most important crop, in area, grown in Australia. The areas recorded in respect of green fodder include areas of crops cut

for feeding to live-stock as green fodder, together with areas fed off to stock as green forage. Included with the latter are areas which may have been sown with the intention of harvesting for grain, but which, due to adverse seasonal conditions, showed no promise of producing grain or even hay and were fed off to live-stock. The principal crops cut for green fodder are oats, wheat and lucerne, while small quantities of barley, sorghum, maize, rye and sugar-cane also are so used. In 1953-54 the area under green fodder (2,541,028 acres) consisted of oats (1,494,316 acres), lucerne (263,935 acres), wheat (147,972 acres), sorghum (79,647 acres), maize (52,358 acres), barley (85,410 acres), rye (33,630 acres), sugar-cane (2,269 acres) and other crops (384,491 acres). Particulars concerning the area of green fodder in the several States during each of the years 1949-50 to 1953-54 are given in the following table, together with the average for the period of ten years ended in 1938-39.

**GREEN FODDER : AREA.**  
(Acres.)

Season.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Aust.
Average, 1929-30 to 1938-39 .. ..	482,989	(a)	347,804	106,820	189,332	24,255	656	(a)
1949-50 .. ..	584,541	44,928	581,811	277,265	550,690	49,780	2,249	2,091,264
1950-51 .. ..	528,214	41,279	583,304	340,727	566,312	57,331	1,214	2,118,381
1951-52 .. ..	672,633	45,661	604,190	385,079	636,728	57,548	1,225	2,403,064
1952-53 .. ..	661,767	40,303	572,212	285,857	574,790	60,142	1,108	2,196,179
1953-54 .. ..	761,552	56,210	663,097	365,301	507,756	60,127	1,218	2,415,261

(a) Not available.

2. **Value of Green Fodder Crops.**—The value of these crops is variously estimated in the several States, and the Australian total for the season 1953-54, excluding Western Australia, may be taken as approximately £7,720,000.

## § 14. Sugar-cane.

1. **Area.**—Sugar-cane growing appears to have commenced in Australia in or about 1862, and is confined to New South Wales and Queensland. A brief outline of the development of the industry was included in earlier issues of the Official Year Book (see No. 38, page 985). The area of sugar-cane in Australia for the seasons 1949-50 to 1953-54 and the averages for the ten-year periods ended 1938-39 and 1952-53 are shown in the following table. In 1953-54 the total area of sugar-cane (excluding areas cut for green fodder) was again a record at 481,602 acres, an increase of 11.0 per cent. over the previous record area of 433,894 acres in 1952-53.

**SUGAR-CANE : AREA.(a)**  
(Acres.)

Season.	New South Wales.			Queensland.			Australia.			
	Area crushed.	Area of stand-over and newly-planted cane.	Area cut for plants.	Area crushed.	Area of stand-over and newly-planted cane.	Area cut for plants.	Area crushed.	Area of stand-over and newly-planted cane.	Area cut for plants.	Total.
Average, 1929-30 to 1938-39 ..	9,106	9,023	140	229,327	75,409	9,368	238,433	84,432	9,508	332,373
1949-50 ..	8,517	8,081	297	272,812	97,878	10,639	281,329	105,959	10,936	398,224
1950-51 ..	8,207	7,134	236	263,666	106,903	10,976	271,873	114,037	11,212	397,122
1951-52 ..	8,354	5,974	191	273,370	101,731	13,247	281,724	107,705	13,438	402,867
1952-53 ..	5,202	8,581	277	274,757	131,724	13,353	279,959	140,305	13,630	433,894
Average, 1943-44 to 1952-53 ..	7,430	7,842	283	244,764	95,608	12,500	252,194	103,450	12,783	368,427
1953-54 ..	7,787	6,869	468	332,703	120,929	12,846	340,490	127,798	13,314	481,602

(a) Excludes areas cut for green fodder.

2. **Productive and Unproductive Cane.**—The areas shown in the preceding table do not include the small acreage cut for green fodder, which in 1953-54 amounted to 2,269 acres. The whole area planted is not cut for crushing during any one season, there being always a considerable amount of young and "stand-over" cane as well as a small quantity required for plants. Thus the season in which the highest acreage is recorded may not show the greatest area of productive cane cut for crushing although this was not the case in 1953-54 when both area and production were at record levels.

3. **Production of Cane and Sugar.**—For Queensland, statistics of the production of sugar-cane are not available for seasons prior to 1897-98. In that season the total for Australia was 1,073,883 tons, as against the record production of 9,014,312 tons in the 1953-54 season. Prior to 1953-54 the previous record production was 7,051,555 tons in 1950-51.

The average production of cane during the ten seasons ended 1952-53 was 5,435,120 tons, and of raw sugar 751,236 tons. Particulars of the total production of cane and sugar for the years 1949-50 to 1953-54 and the averages for the ten-year periods ended 1938-39 and 1952-53 are as follows.

### SUGAR-CANE : PRODUCTION OF CANE AND SUGAR.

(Tons.)

Season.	New South Wales.		Queensland.		Australia.	
	Cane.	Sugar.(a)	Cane.	Sugar.(a)	Cane.	Sugar.(a)
Average, 1929-30 to						
1938-39 .. ..	241,402	30,317	4,461,988	626,789	4,703,390	657,106
1949-50 .. ..	330,738	40,706	6,518,042	896,413	6,848,780	937,119
1950-51 .. ..	359,849	41,258	6,691,706	879,844	7,051,555	921,102
1951-52 .. ..	321,388	41,060	5,005,172	704,341	5,326,560	745,401
1952-53 .. ..	125,714	14,272	6,841,536	934,614	6,967,250	948,886
Average, 1943-44 to						
1952-53 .. ..	264,502	32,871	5,170,618	718,365	5,435,120	751,236
1953-54 .. ..	263,249	34,004	8,751,063	1,220,383	9,014,312	1,254,387

(a) Raw sugar at 94 net titre.

The production of raw sugar in Australia in 1953-54 amounted to 1,254,387 tons manufactured from 9,014,312 tons of cane, compared with the previous record production of 948,886 tons in 1952-53.

Official annual data are not available regarding the total number of persons engaged in the sugar industry in New South Wales and Queensland other than the number of separate holdings of 5 acres or more growing cane (7,033 in 1953-54).

According to data obtained from the population census of 30th June, 1954, the number of persons engaged in the sugar-cane industry in New South Wales and Queensland comprised 20,185 males and 431 females, a total of 20,616 persons, of whom 4,245 were employers and 5,118 were self-employed.

4. **Average Production of Cane Sugar.**—Owing to climatic variation, comparison between the average yields of cane per productive acre in Queensland and New South Wales cannot be made accurately except on an annual basis. In New South Wales the crop matures in from 20 to 24 months, whereas in Queensland a period of from 12 to 14 months is sufficient. Allowing for the disparity in maturing periods the average annual yields of cane per productive acre during the ten years ended 1952-53 were 35.60 tons for New South Wales, and 21.12 tons for Queensland. Similarly, the yields of sugar per acre crushed for the same period were estimated at 4.42 tons and 2.93 tons respectively. Apart from the consideration mentioned above, the yields of cane and sugar per acre crushed for Australia for the ten years ended 1952-53 were 21.55 tons and 2.98 tons respectively, as compared with 19.73 tons and 2.76 tons for the ten years ended 1938-39.

## SUGAR-CANE AND SUGAR : YIELD PER ACRE.

(Tons.)

Average, 1943-44 to 1952-53 .. ..	35.60	4.42	8.05	21.12	2.93	7.20	21.55	2.98	7.23
1953-54 .. ..	33.81	4.37	7.74	26.30	3.67	7.17	26.47	3.68	7.19

5. *Quality of Cane.*—The quantity of cane required to produce a ton of sugar varies with the variety planted, the district and the season. For the ten years ended 1952-53 it required on the average 7.23 tons of cane to produce 1 ton of sugar, or 13.83 per cent. of its total weight, as compared with 7.15 tons for the ten years ended 1938-39. As the result of the systematic study of cane culture in Queensland and improvements in field and mill methods the sugar content of the cane has been considerably increased since the turn of the century when over 9 tons of cane were required to produce 1 ton of sugar. It is believed that this is the highest sugar content obtained anywhere in the world.

The Bureau of Sugar Experiment Stations in Queensland is rendering useful service to the sugar industry by advocating and demonstrating better methods of cultivation and the more scientific use of fertilizers, lime, etc., and by producing and distributing improved varieties of cane.

6. *Production and Utilization.*—Details of the production and utilization of raw sugar for the three years ended 1938-39 and each year 1949-50 to 1953-54 are shown below. It should be noted that the details of sugar production refer to the annual periods shown, without regard to the season in which the sugar was produced; they include the small quantities of beet sugar produced in certain of these years. Consumption is shown in terms of refined sugar, including that consumed in manufactured products.

## RAW SUGAR : PRODUCTION AND UTILIZATION, AUSTRALIA.

Year.	Changes in Stocks.	Production.	Exports. (a)	Miscellaneous Uses. (b)	Consumption in Australia. (a)	
					Total. (c)	Per Head. (c)
	'000 tons.	'000 tons.	'000 tons.	'000 tons.	'000 tons.	lb.
Average, 1936-37 to 1938-39 .. ..	+ 6.2	779.3	435.3	11.2	326.6	106.5
1949-50 .. ..	-10.4	902.5	483.4	19.5	410.0	114.1
1950-51 .. ..	+ 5.8	906.9	433.3	21.8	446.0	120.2
1951-52 .. ..	+24.7	702.2	206.1	23.8	447.6	117.6
1952-53 .. ..	+ 3.8	948.3	500.8	18.6	425.1	109.0
1953-54 .. ..	+41.3	1243.6	738.7	17.8	445.8	112.2

(a) Includes sugar content of manufactured products.  
(c) In terms of refined sugar.

(b) Includes industrial uses and losses in refining.

7. **Consumption in Factories.**—The quantity of sugar used in factories in 1953-54 amounted to 240,974 tons compared with 241,846 tons in 1952-53 and 123,883 tons in 1938-39. Particulars of sugar used in establishments not classified as factories are not available, and consequently these quantities are deficient to that extent. In 1953-54 consumption by factories engaged in the production of jams, jellies and preserved fruit (including condiments, pickles, etc.) amounted to 66,201 tons and by those producing confectionery, ice cream, etc., amounted to 47,180 tons.

8. **Control of Cane Production in Queensland.**—Agreements between the Commonwealth and Queensland Governments have fixed the wholesale price of sugar and sugar products from time to time. On 1st September, 1946, a Sugar Agreement Act came into operation fixing wholesale and retail prices of sugar and in June, 1951 a new agreement was signed to cover the period to 31st August, 1956. Details of prices are shown in para. 14 of this section (*see page 873*).

The Queensland Government acquires the whole of the sugar production of that State and New South Wales by legislation and private agreement respectively. The net proceeds of all sugar sold are pooled and a uniform price paid to mills.

Sugar production barely met local requirements in 1923 but increased rapidly until 1925 when approximately 44 per cent. of the production was exported. Steps were taken by the Government to restrict planting of new areas and production was fairly stable until 1929. In that year the pool was reorganized and mills received full pool price for sugar up to the amount of their previous maximum production, further supplies being acquired at export prices.

Between 1929 and 1939 production rose by more than 70 per cent. despite the restrictions mentioned above and the fact that export prices were generally less than half the pool price.

In 1939 following the International Sugar Agreement, which limited exports, the Queensland Government limited the pool (mill peaks) to 737,000 tons in respect of Queensland production. Mill quotas were allotted on the understanding that mills would allot quotas to individual growers. Mill peaks have been raised to 942,300 tons in 1950, 1,045,000 tons in 1953 and 1,170,900 tons in 1954. These latter increases followed the negotiation of the Commonwealth Countries Sugar Marketing Agreement of 1949, which allowed the Queensland Government to initiate a planned expansion of the industry.

9. **Sugar Agreement in Australia—Embargo on Imports, etc.**—Reference was made in Official Year Book No. 37 (pp. 940-41) to the agreement operating between the Commonwealth and Queensland Governments in respect of the sugar industry in Australia. Briefly, the agreement places an embargo on sugar importations and fixes the price of sugar consumed in Australia. A new agreement operating from 7th July, 1951 covers the period up to 31st August, 1956. Some of the terms of the 1951 Agreement (in particular, those relating to sugar prices), were amended in 1952, and incorporated in the Sugar Agreement Act 1954.

10. **International Sugar Agreement.**—The International Sugar Agreement of 1937 was superseded by a new agreement which came into force on 1st January, 1954. Details of the 1937 Agreement were given in Official Year Book No. 40, pp. 881 and 882. and previous issues.

The new agreement, which was negotiated by 38 countries, is designed to assure supplies of sugar to importing countries and markets to exporting countries at stable and equitable prices. It is also aimed at increasing world consumption of sugar. Basic export quotas have been allocated with provision for reductions or increases to maintain prices within a specified range.

The British Commonwealth, as a whole, has been granted an export quota of 2,375,000 tons, rising to 2,450,000 tons in 1936, which is not subject to the fluctuations mentioned above. The allocation of this total between exporting members of the British Commonwealth is a matter for the countries and territories themselves, Australia's share being fixed at 600,000 tons. Details of the marketing arrangements for Australian sugar are given in para. 15 below.

11. **Net Return for Sugar Crop.**—Details of the disposal of the crop, net value of exports and the average price realized during each of the years 1938-39 and 1949-50 to 1953-54 will be found in the following table :—

**RAW SUGAR(a) : NET RETURNS, AUSTRALIA.**

Year.	Proportion Exported. (b)	Net Value of Exports per Ton. (b)	Average Price per Ton for Whole Crop.	Estimated Value of Crop.
	Per cent.	£ s. d.	£ s. d.	£'000.
1938-39 .. ..	55.78	8 4 3	15 3 11	12,806
1949-50 .. ..	46.92	29 7 6	26 13 8	25,362
1950-51 .. ..	43.73	32 16 6	28 3 4	26,132
1951-52 .. ..	21.12	36 15 6	34 7 0	24,912
1952-53 .. ..	49.66	41 2 0	42 12 9	40,781
1953-54 .. ..	58.39	39 18 0	42 10 8	52,572

(a) 94 net titre.

(b) As supplied by the Queensland Sugar Board.

The estimated value of the raw sugar produced has been based upon details taken from the audited accounts of the Queensland Sugar Board. The values stated represent the gross receipts from sales in Australia and overseas, less refining costs, freight, administrative charges, etc., and export charges, but including concessions to the fruit industry and other rebates which in 1953-54 amounted to £249,622. The value thus obtained represents the net market value of all raw sugar sold, which, since 1933, has been divided between the growers and millers in the approximate proportions of 70 per cent. and 30 per cent. respectively. Prior to that year the distribution was about two-thirds to the grower and one-third to the miller.

12. **Exports of Sugar.**—Particulars of the exports of cane sugar (raw and refined) for the five years ended 1938-39 and for each year from 1949-50 to 1953-54 are as follows :—

**SUGAR : EXPORTS, AUSTRALIA.**

Particulars.	Average, 1934-35 to 1938-39.	1949-50.	1950-51.	1951-52.	1952-53.	1953-54.
Quantity tons	377,930	432,711	387,841	167,431	459,370	706,801
Value £'000	3,481	14,147	14,792	6,896	21,655	31,592

13. **Sugar By-products.**—Large quantities of molasses are produced as a by-product in the sugar mills. Details for a series of years of the quantities produced and the amounts used for distilling, fuel, manure and other purposes will be found in Chapter IX.—Manufacturing Industry.

Other by-products include industrial chemicals and building boards. These boards are made from the residue of crushed fibre after removal of the sugar content from sugarcane and possess high insulating and sound-absorbing properties which make them particularly suitable for use in walls and ceilings.

14. **Sugar Prices.**—The prices of sugar in Australia from 1949 to 1953 in the case of raw sugar, and from 1947 to 1956 in the case of refined sugar, are shown in the following table.

SUGAR : PRICES IN AUSTRALIA.

Year.	Raw Sugar, 94 Net Titre.			Refined Sugar.		
	Average Return per Ton received by millers and growers for—			Date of Determination.	Wholesale Price per Ton.	Retail Price per lb
	Home Consumption.	Exports.(a)	Whole Crop. (a)			
	£ s. d.	£ s. d.	£ s. d.		£ s. d.	d.
1949 ..	24 6 0	29 7 6	26 13 8	4.12.47 to 28.10.49	37 6 8	4½
1950 ..	24 11 0	32 16 6	28 3 4	29.10.49 to 6.7.51	41 9 4	5
1951 ..	33 14 0	36 15 6	34 7 0	7.7.51 to 23.3.52..	53 6 8	6½
1952 ..	44 3 0	41 2 0	42 12 9	24.3.52 to 12.10.52	65 12 10	8
1953 ..	47 18 6	39 18 0	42 10 8	13.10.52 to 31.8.56	73 16 11	9

(a) Including "Excess" Sugar.

15. **Marketing Arrangements.**—Since 1939 the British Ministry of Food has purchased Australia's surplus raw sugar at prices negotiated annually and varying from £ stg. 11 5s. in 1939 to £ stg. 40 15s. in 1955 including tariff preference (for prices in other years see earlier issues of the Year Book). From 1953 the negotiated price applies to 314,000 tons of exports annually, the balance of exports being sold at world prices.

In December, 1949, the United Kingdom Government undertook to find a market for Australia's sugar exports until the end of 1952 when a new British Commonwealth Sugar Agreement came into operation. The new arrangement, as extended annually, provides for Australia to export a maximum of 600,000 tons annually from 1953 to 1962. The United Kingdom Government agreed to take 314,000 tons at annually negotiated prices, the balance to be sold at world prices, plus preference if sold in the United Kingdom or Canada.

The Sugar Bill introduced into the House of Commons on 5th July, 1955, proposes that dealings in sugar in the United Kingdom will revert to a trader to trader basis. However, under the Bill, a Sugar Board is created which will be responsible for the purchase of the negotiated price sugar which the United Kingdom Government has contracted to take under the British Commonwealth Sugar Agreement.

16. **Fruit Industry Sugar Concession Committee and Sugar Rebates.**—The Fruit Industry Sugar Concession Committee was established by agreement between the Commonwealth and Queensland Governments and administers a fund to which the Queensland Government contributes £216,000 annually on behalf of the Sugar Industry (contributions were suspended temporarily whilst funds exceeded £500,000).

A rebate of £2 4s. per ton of refined sugar used in processing approved fruit products is paid to Australian manufacturers provided they buy the fresh fruit at prices not lower than those declared by the Committee as reasonable.

An export sugar rebate is also paid by the Committee to exporters of approved fruit products to ensure that manufacturers do not pay higher prices for Australian sugar than the price for which the cheapest imported sugar could be landed duty free in Australia.

Any money remaining may be used for the promotion of the use and sale of fruit products, or for scientific research for the purpose of increasing the yield per acre of Australian fruits.

17. **Sugar Inquiry Committee**.—The Sugar Inquiry Committee was constituted in March, 1952, to investigate the sugar industry and in particular the Sugar Agreement between the Commonwealth and Queensland Governments. As a result of its findings the wholesale and retail prices of sugar were increased from 13th October, 1952 by £8 per ton and 1d. per lb. respectively.

Other amendments were also made, and incorporated in the Sugar Agreement Act, 1954.

18. **Bulk Handling of Sugar**.—Bulk handling facilities are being established at the ports of Mackay and Lucinda Point following successful tests and consideration of two independent reports by the Sugar Board. These are expected to be completed by 1957 and 1958 respectively. Proposals have also been made for installations at other sugar ports.

### § 15. Vineyards.

1. **Progress of Cultivation**.—(i) *Area of Vineyards*. Since the early days of Australian settlement the expansion of the cultivation of vines has been most rapid in Victoria and South Australia, the area under vineyards in the 1954 season in these two States comprising 78 per cent. of the total area. The purposes for which grapes are grown in Australia are (a) for wine-making, (b) for table use, and (c) for drying. The total area of vines in the several States during each of the years 1949-50 to 1953-54 and the averages for the ten-year periods ended 1938-39 and 1952-53 are shown in the following table.

#### VINEYARDS : AREA.

(Acres.)

Season.	N.S.W.	Victoria.	Queensland.	S. Aust.	W. Aust.	Australia.(a)
Average, 1929-30 to 1938-39	15,777	40,563	2,142	54,156	5,666	118,304
1949-50 ..	16,931	45,386	3,135	60,253	9,676	135,381
1950-51 ..	16,917	45,313	3,045	61,971	9,258	136,504
1951-52 ..	17,047	45,267	2,819	61,214	9,358	135,705
1952-53 ..	18,006	45,968	2,808	60,603	9,233	136,618
Average, 1943-44 to 1952-53	16,622	44,274	3,014	59,258	9,721	132,889
1953-54—						
Wine ..	8,273	5,831	317	42,750	2,770	59,941
Table ..	2,637	1,956	2,567	285	1,423	8,868

Total ..	18,128	45,777	2,884	62,121	9,202	138,112

(a) Excludes particulars for Australian Capital Territory.

(ii) *Wine Production, Bounties, etc.* The total production of wine (beverage and distillation) in Australia has shown a marked increase in recent years, rising from 14.3 million gallons in 1938-39 to 31.7 million gallons in 1953-54. In the same period consumption of beverage wine in Australia has expanded from 4.5 million gallons (0.7 gallons per head of population) to 12.4 million gallons (1.4 gallons per head of population). For many years prior to the 1939-45 War a bounty was paid on wine shipped overseas under the provisions of the Wine Export Bounty Act 1930, as amended from time to time. Details of the bounty, payment of which was discontinued in 1947, may be found in Official Year Book No. 39, page 992.

The quantity of wine produced in the several States during the 1949-50 to 1953-54 seasons, together with the averages for the ten-year periods ended 1938-39 and 1952-53, is shown in the following table :—

**WINE : PRODUCTION.(a)**  
(‘000 Gallons.)

Season.	N.S.W.	Victoria.	Queensland.	S. Aust.	W. Aust.	Australia.
Average, 1929-30 to 1938-39	2,099	1,449	36	12,127	393	16,104
1949-50 ..	5,185	3,230	45	23,702	513	32,675
1950-51 ..	4,372	2,358	43	18,611	652	26,036
1951-52 ..	5,465	3,472	33	25,495	790	35,255
1952-53 ..	4,250	2,267	42	22,733	731	30,023
Average, 1943-44 to 1952-53	4,088	2,447	34	20,758	639	27,966
1953-54 ..	5,066	2,327	59	23,497	717	31,666

(a) Net factory and farm production of beverage and distillation wine excluding the liquid gallanage of spirits added in wine fortifying.

2. Imports and Exports of Wine.—(i) *Imports.* The principal countries of origin of wine imported into Australia were, before the 1939-45 War, France, Spain, Portugal and Italy, the bulk of the sparkling wines coming from France. The bulk of the post-war wine imports have been obtained from France. Imports for 1953-54 amounted to 40,374 gallons valued at £84,088 compared with 7,683 gallons valued at £16,350 in the previous year and an average of 36,685 gallons valued at £39,577 for the five years ended 1938-39.

(ii) *Exports.* Before the 1939-45 War practically all wine exported was sent to the United Kingdom, only about 200,000 gallons per annum being sent elsewhere. Exports in 1953-54 totalled 1,394,960 gallons, of which the United Kingdom received 926,814 gallons, New Zealand 72,236 gallons, Canada 300,772 gallons, and other countries 95,138 gallons.

Exports for the five years ended 1953-54 are shown in the following table in comparison with average exports during the five years ended 1938-39 :—

**WINE : EXPORTS FROM AUSTRALIA.**

Year.	Quantity (Gallons).			Value (£).		
	Sparkling.	Other.	Total.	Sparkling.	Other.	Total.
Average, 1934-35 to 1938-39	3,772	3,559,094	3,562,866	5,400	938,195	943,595
1949-50 ..	6,093	1,097,225	1,103,318	6,323	509,516	515,839
1950-51 ..	3,651	1,219,258	1,222,909	7,121	627,741	634,862
1951-52 ..	6,685	1,155,610	1,162,295	18,983	711,554	730,537
1952-53 ..	7,373	1,160,088	1,167,461	21,277	742,649	763,926
1953-54 ..	4,842	1,390,118	1,394,960	16,631	886,228	902,859

3. **Oversea Marketing of Wine.**—(i) *The Wine Overseas Marketing Act 1929-1954.* This Act was introduced to place the oversea marketing of surplus wine on an orderly basis. The Australian Wine Board (formerly The Wine Overseas Marketing Board), consisting of representatives from wineries and distilleries, grape-growers and the Commonwealth Government, supervises the sale and distribution of Australian wine exported and recommends conditions under which export licences should be issued. The Board has a London agency which advises on marketing conditions.

During 1954 the Act was amended to enable the Board to engage in the sales promotion of wine in Australia in addition to overseas.

(ii) *The Wine Grapes Charges Act 1929-1954.* This Act provides for the imposition of a levy on all grapes used in Australia for the manufacture of wines or spirit used for fortifying wine. The proceeds of the levy are used to defray the administrative and other expenses of the Board, and provision is made for such exemptions from the levy as the Board may recommend.

4. **Other Viticultural Products.**—(i) *Table Grapes.* Grapes for table use are grown in all the States except Tasmania, but the area cultivated to this variety is only about 6 per cent. of the productive area of grapes. The greatest development in the industry has taken place in the drying of raisins and currants, particularly in Victoria and South Australia. The quantities of table grapes produced during the season 1953-54 in each State are shown in § 3 of this chapter. (See p. 835)

(ii) *Raisins and Currants.* The quantities of raisins (sultanas and lexias) and currants dried during each of the seasons 1949-50 to 1953-54 and the averages for the ten-year periods ended 1938-39 and 1952-53 are shown in the following table. Production in 1953-54 was 89,914 tons, 10,819 tons less than the preceding year (100,733 tons), which was the second highest production on record.

#### RAISINS(a) AND CURRANTS : PRODUCTION.

(Tons.)

Season.	N. S. Wales.		Victoria.		South Aust.		Western Aust.		Australia.	
	Raisins.	Currants.	Raisins.	Currants.	Raisins.	Currants.	Raisins.	Currants.	Raisins.	Currants.

(a) Sultanas and lexias.

5. **Production and Disposal of Dried Vine Fruit.**—As the production of dried vine fruit is far in excess of Australia's requirements, considerable quantities are available for export. The quantities disposed of in Australia and overseas, as recorded by the Commonwealth Dried Fruits Control Board for the season ended December, 1954, totalled 89,573 tons, Australian consumption amounting to 17,729 tons and oversea exports 71,844 tons. Australian consumption includes amounts delivered to biscuit manufacturers, bakeries, etc., as well as retail sales for household consumption.

The following table shows the oversea exports of raisins and currants during each of the years 1949-50 to 1953-54 compared with the average for the five years ended 1938-39.

**RAISINS AND CURRANTS(a) : EXPORTS, AUSTRALIA.**

Year.	Raisins.		Currants.		Total Raisins and Currants.	
	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.
	Tons.	£'000.	Tons.	£'000.	Tons.	£'000.
Average, 1934-35 to 1938-39	43,191	1,686	15,054	549	58,245	2,235
1949-50 ..	28,558	1,819	7,063	409	35,621	2,228
1950-51 ..	27,122	2,586	7,231	717	34,353	3,303
1951-52 ..	32,669	3,961	5,003	646	37,672	4,607
1952-53 ..	58,886	6,395	10,387	1,053	69,273	7,448
1953-54 ..	51,693	5,561	10,731	1,039	62,424	6,600

(a) Excludes quantities exported as mincemeat.

The chief countries importing Australian raisins and currants are the United Kingdom, New Zealand and Canada, the quantities exported thereto in 1953-54 being 44,683 tons, 4,397 tons and 11,985 tons respectively.

6. *Post-war Contracts.*—Agreements were negotiated between the Governments of the United Kingdom and Australia for the purchase of Australian dried vine fruits during the period 1946-1953. Up to and including 1951 the quantity of fruit to be purchased was limited but in 1952 and 1953 there was no restriction. In April, 1953, it was agreed to extend the contract for one year but in August, 1953 the United Kingdom Government abolished all controls and on 1st December of that year exports reverted to a trader to trader basis.

The British Ministry of Food agreed to subsidize returns from sales of fruit of the 1954 crop sold in the United Kingdom up to 31st May, 1955, if average returns were less than the level of prices agreed upon. The support prices under this arrangement were: Currants 1 and 2 crown, £87 10s. per ton, Currants 3 and 4 crown, £93 15s.; Sultanas 1 crown and upwards, £100; Lexias 4 and 5 crown seeded, £112 10s., unseeded, £100.

Details of contract prices for the years 1946 to 1953 will be found on page 783 of Official Year Book No. 41.

7. *Oversea Marketing of Dried Fruits.*—(i) *The Dried Fruits Export Control Act 1924-1953.* This Act was passed to organize oversea marketing of Australian dried vine fruits. The Dried Fruits Control Board, consisting of growers and Government representatives and members with commercial experience and experience in marketing dried fruits, controls the sale and distribution of dried fruit exports and recommends the conditions under which export licences will be issued.

In conjunction with its London agency the Board has improved dried fruit marketing overseas by its system of appraisement, regulation of shipments and advertising.

(ii) *Dried Fruits Export Charges Act 1924-1929.* This Act provides for a levy on exports of dried fruits to defray costs and expenses incurred by the Board. Provision is made for exemption from the levy upon recommendations by the Board.

## § 16. Orchards and Fruit-Gardens.

1. *Area.*—The largest area of orchards and fruit-gardens prior to the 1939-45 War was 281,899 acres which was attained in 1933-34. From that year until 1942-43, when 260,384 acres were under fruit, there was a gradual decline. In each subsequent

year there was a continuous upward movement to 1947-48 when the area reached a new peak of 290,320 acres. Subsequently there was a continuous decline to about 271,000 acres in 1951-52 and 1952-53. In 1953-54 there was a slight increase to 273,000 acres. The total area of orchards and fruit-gardens in the several States during the years 1949-50 to 1953-54 compared with the average for the ten seasons 1929-30 to 1938-39 is shown in the following table :—

### ORCHARDS AND FRUIT-GARDENS : AREA.

(Acres.)

2. Varieties of Crops.—The varieties grown differ in various parts of the States, ranging from such fruits as pineapples, papaws and mangoes of the tropics, to strawberries, raspberries and currants of the colder parts of the temperate zone. In New South Wales, citrus fruits (oranges, lemons, etc.) and bananas are the principal crops, although apples, peaches, plums, pears and cherries are extensively grown. The principal varieties grown in Victoria are apples, peaches, pears, oranges, plums and apricots. In Queensland, bananas, pineapples, apples, oranges, mandarins, peaches and plums are the varieties most largely cultivated. In South Australia, in addition to apples, oranges, apricots, plums, peaches and pears, almonds and olives are extensively grown. In Western Australia, apples, oranges, lemons, pears, plums, peaches, apricots and figs are the chief varieties. In Tasmania, apples occupy over two-thirds of the fruit-growing area, but small fruits, such as currants, raspberries and gooseberries are extensively grown, while the balance of the area is mainly taken up with pears, apricots and plums. The following table shows the acreage—bearing and non-bearing—of the principal kinds of fruit, and the quantity and value of fruit produced.

4. **Production of Jams and Jellies and Preserved Fruit.**—Considerable quantities of fruit are used in the production of jams and jellies and preserved fruit in Australia. In 1953-54 output of jams and jellies amounted to 85,687,000 lb. whilst output of preserved fruit, excluding preserved apples, amounted to 324,677,000 lb. Production of preserved apples was 13,885,000 lb.

The recorded consumption of fruit in factories for all purposes, including that used for juice and cordial manufacture and for drying, was 224,505 tons in 1953-54.

5. **Consumption of Fruit and Fruit Products.**—Details of the estimated consumption of fruit and fruit products per head of population for a series of years ending 1954-55 are shown in Chapter XXIX.—Miscellaneous, of this Year Book.

6. **Imports and Exports of Fruit.**—(i) *General.* The imports of fresh fruit into Australia are negligible, whilst those of dried fruit consist mainly of dates.

A considerable export trade in both fresh and dried fruit is carried on by Australia with overseas countries. The values of the shipments in 1953-54 amounted to £9,384,000 and £7,395,000 respectively. Apples constitute the bulk of the fresh fruit exported, although the exports of citrus fruit and pears are fairly considerable. Shipments of raisins and currants have increased greatly since 1914-15 and are mainly responsible for the growth in the dried fruit exports, although dried tree fruit also figures amongst the exports.

(ii) *Fresh Fruit.* Particulars of the Australian export trade in fresh and frozen fruit for each of the years 1949-50 to 1953-54 and the average of the five years ended 1938-39 are shown in the following table:—

**FRESH AND FROZEN FRUIT : EXPORTS, AUSTRALIA.**

(a) Total, including exports of all other fresh and frozen fruit.

(iii) *Dried Tree Fruit.* The quantity and value of oversea imports and exports of dried fruit, other than raisins and currants, for the years 1945-50 to 1953-54, compared with the average for the five years 1934-35 to 1938-39, are shown below. Normally, the bulk of the imports consists of dates obtained almost entirely from Iraq.

**DRIED TREE FRUIT(a) : IMPORTS AND EXPORTS, AUSTRALIA.**

Year.	Imports.		Exports.		Net Exports.	
	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.
	'000 lb.	£'000.	'000 lb.	£'000.	'000 lb.	£'000.
Average, 1934-35 to 1938-39	12,225	80	4,315	117	-7,910	37
1949-50 ..	10,125	212	10,218	661	93	449
1950-51 ..	11,666	285	24,336	1,366	12,670	1,081

1952-53 ..	5,851	142	3,966	403	-1,885	261
1953-54 ..	11,638	303	6,526	795	-5,112	492

(a) Excludes raisins and currants referred to separately under Vineyards, § 15, par. 5.

NOTE.—Minus sign (—) denotes net imports.

(iv) *Jams and Jellies.* Exports of jams and jellies reached large proportions immediately following the 1939-45 War and in 1946-47 amounted to 65,434,000 lb., compared with the average for the five years ended 1938-39 of 7,118,000 lb. Since 1949-50, when exports totalled 65,229,000 lb., there has been a marked decline and in 1953-54 exports amounted to only 6,315,000 lb., valued at £372,000. Imports of jams and jellies are negligible.

(v) *Preserved Fruit.* The total quantity of fruit preserved in liquid, or partly preserved in liquid or pulped, imported into Australia during 1953-54, was 534,000 lb. valued at £32,000. Large quantities of fruit preserved in liquid are normally exported from Australia, the value of shipments in 1938-39 amounting to £1,271,525. In 1953-54 the value of exports had increased to £14,186,203. In addition, the exports of pulped fruits during 1953-54 amounted to 13,005,000 lb., valued at £1,441,000. Quantities of fruit preserved in liquid exported from Australia in 1953-54 amounted to 199,242,000 lb. compared with average exports of 68,896,000 lb. for the five years ended 1938-39. Exports in 1953-54 were principally made up of peaches (57,009,000 lb.), pears (59,070,000 lb.), apricots (44,797,000 lb.) and pineapples (32,292,000 lb.).

7. *Marketing of Apples and Pears.*—(i) *Apple and Pear Organization Act 1938-1953.* This Act, which was passed by the Commonwealth Parliament at the request of the apple and pear industry, provides for the establishment of an Australian Apple and Pear Board comprised of representatives of growers, exporters, employees and the Commonwealth Government. Oversea representatives may also be appointed by the Board.

The function of the Board is the organization and control of exports of fresh apples and pears and it has the power to regulate shipments, determine export quotas and allocate consignments from each State.

(ii) *Apple and Pear Export Charges Act 1938-1947.* This Act provides for an export levy to meet the expenses of the Board.

(iii) *Apple and Pear Acquisition*. Exports of apples and pears were seriously curtailed during the war and the 1940 to 1948 crops were acquired and marketed under National Security and Defence Regulations. Details of the acquisition scheme will be found on pages 1003 and 1004 of Official Year Book No. 38 and in earlier issues.

8. *Oversea Marketing of Canned Fruit*.—(i) *The Canned Fruits Export Control Act 1926-1953*. This legislation was introduced with the object of organizing the oversea marketing of canned fruit. The Australian Canned Fruits Board, comprising members representing canneries, pineapple interests and the Commonwealth Government, was appointed with functions mentioned above and also to recommend conditions under which export licences are issued.

The system of marketing adopted by the Board has resulted in the satisfactory disposal of the exportable surplus of canned fruits.

(ii) *The Canned Fruits Export Charges Act 1926-1938*. This Act provides for a levy on exports to meet the Board's expenses. Provision has been made for certain exemptions when recommended by the Board.

## § 17. Vegetables for Human Consumption.

1. *Area and Production of Fresh Vegetables*.—Details of the areas planted and production of individual kinds of vegetables, excluding potatoes and onions referred to in §§ 10 and 11 of this chapter, are shown below for the seasons 1951-52 to 1953-54.

### FRESH VEGETABLES(a) FOR HUMAN CONSUMPTION : AUSTRALIA.

All Other ..	13,142	..	12,889	..	12,872	..
Total ..	161,823	..	151,891	..	130,967	..

(a) Excludes potatoes and onions. (b) Excludes french beans harvested dry; these are included in "All Other".

2. **Production of Canned and Dehydrated Vegetables.**—Total production of canned vegetables in 1953-54 amounted to 40,265,000 lb., which was considerably higher than pre-war production, but only approximately 56 per cent. of the peak war-time production. The principal canned vegetables produced in 1953-54 were green peas 12,114,000 lb., green beans 827,292 lb., baked beans (including pork and beans) 11,755,500 lb., tomatoes 471,773 lb. and asparagus 6,276,312 lb.

The production of dehydrated vegetables, which was initiated during the 1939-45 War by the Commonwealth Government, rose to a maximum of 22 million lb. in 1945-46. but in 1953-54 had declined to approximately 400,000 lb.

3. **Imports and Exports of Vegetables.**—Oversea exports of pulse and fresh vegetables during 1953-54 consisted of:—Pulse, 17,053 tons, £878,000; onions, 3,317 tons, £121,000; potatoes, 4,010 tons, £155,000; other vegetables, 2,617 tons, £227,000. Imports of pulse amounted to 8,403 tons, valued at £525,000, whilst imports of fresh vegetables were negligible.

In 1953-54 exports of vegetables preserved in liquid consisted of:—Peas, 3,961,000 lb., £255,000; tomatoes, 3,435,000 lb., £204,000; other vegetables, 1,704,000 lb., £130,000.

4. **Consumption of Vegetables.**—Details of the estimated consumption of vegetables for a series of years ending with 1954-55 are shown in Chapter XXIX.—Miscellaneous, of this Year Book.

## § 18. Tobacco.

1. **States, Area and Production.** Tobacco-growing promised years ago to occupy an important place amongst the agricultural industries of Australia. As early as the season 1888-89, the area of this crop amounted to 6,641 acres, of which 4,833 were in New South Wales, 1,685 in Victoria, and 123 in Queensland. Thereafter the industry fluctuated for many years reaching a peak in 1932-33 when 26,272 acres were planted.

In 1953-54 the acreage planted was 8,246 acres which was 73 per cent. of the average for the ten years ended 1938-39. Owing to improvement in average yields, however, the production of dried leaf in 1953-54 was 50 per cent. higher than the pre-war average.

In the following table particulars of the area and production of tobacco are given by States for each of the seasons 1949-50 to 1953-54, together with averages for the ten-year periods ended 1938-39 and 1952-53:—

### TOBACCO : AREA AND PRODUCTION.

Season.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Aust. (a)

2. *The Tobacco Industry.*—(i) *Marketing.* In the early days purchase of the leaf at the farms was the usual practice but towards the later part of the 1930's the auction system was introduced by arrangement between the growers' associations and the manufacturers.

On the 9th May, 1941, the Australian Tobacco Board was constituted under the National Security (Australian Tobacco Leaf) Regulations for the purpose of facilitating and regulating the marketing of Australian grown tobacco leaf. All leaf was under the control of the Board, the growers being paid on the valuation as appraised by the Board. The Board ceased to function on the 24th September, 1948 and subsequent crops have been marketed at open auction in the respective States. Queensland has had its own Tobacco Leaf Marketing Board since 1948 and leaf sold in that State has a reserved price, determined by the Board's appraiser. Growers in New South Wales voluntarily submit their leaf to the Queensland Board.

(ii) *Tobacco Advisory Committee.* The Australian Agricultural Council formed the Standing Advisory Committee on Tobacco during 1950. This Committee consisted of representatives of tobacco growers, tobacco manufacturers and Commonwealth and State Governments. Its main functions were to review the industry and make recommendations on its problems.

The Committee was reconstituted by the Agricultural Council during 1952-53 and its terms of reference were as follows:—

“To report annually to the Agricultural Council, through the Standing Committee on Agriculture and also to the Commonwealth Minister for Trade and Customs, through the Chairman of the Council, on the following:—

- (i) The percentage of Australian tobacco which should be incorporated in locally manufactured tobacco under Customs regulations, having regard to the anticipated volume of Australian production of usable leaf available for absorption by the manufacturing industry ;
- (ii) The progress of the industry during the year with particular reference to—
  - (a) marketing problems encountered,
  - (b) a review of prices being paid to farmers in relation to quality of leaf,
  - (c) such other problems as may be retarding the progressive development of the industry, such as the volume of importation of manufactured tobacco and cigarettes.”

(iii) *Industry Inquiries.* The tobacco industry has been the subject of a number of investigations during the past 30 years. The Tariff Board inquired into the industry in 1923, 1926, 1931 and 1940 and reports were issued in respect of the last three inquiries.

(iv) *Commonwealth Grants.* Details of the recommendations by the Tobacco Inquiry Committee and grants periodically approved by the Commonwealth Government up to 30th June, 1953, were given in Official Year Book No. 40, pages 895, 896 and in previous issues.

(v) *Research and Investigations.* The Commonwealth Scientific and Industrial Research Organization has been investigating many fundamental problems connected with tobacco culture. One of the major achievements of this organization was the development of a technique to control "Field Blue Mould" and investigations are now being made into the control of this disease in the field. State Departments of Agriculture are also carrying out investigations over a wide range of problems, being concerned mainly with variety trials, irrigation, disease and pest control, crop rotation and cultural practices.

The Tobacco Advisory Committee has formulated a programme for increased research and advisory activities. The capital costs of establishing this programme are estimated at £168,000 of which the Commonwealth Government has agreed to contribute £84,000 and tobacco manufacturers the remaining £84,000. It has been estimated that to maintain the programme, it will cost approximately £63,000 per annum, of which the Commonwealth Government is contributing £21,000, tobacco growers £14,000 and tobacco manufacturers £28,000 per annum. A Tobacco Industry Trust Account has been established to receive these contributions.

(vi) *War Service Land Settlement.* A development of considerable interest in the history of tobacco growing in Australia was the inclusion of tobacco farming within the framework of the present war service land settlement scheme. In 1948 the Government approved of projects submitted by Queensland and Western Australia for the settlement of ex-servicemen on tobacco farms.

(vii) *Tobacco Factories.* Manufacturers of Australian cigarettes and tobacco are granted a lower rate of duty on imported tobacco leaf provided it is blended with a prescribed minimum percentage of Australian leaf. These percentages rose from 3 per cent. for cigarettes and 5 per cent. for tobacco in November, 1946 to 6 per cent. and 12½ per cent. respectively from 1st July, 1954. The percentages were further increased to 7½ per cent. and 17½ per cent. respectively from 1st July, 1955. In 1953-54 the quantity of cured leaf used in tobacco factories in Australia amounted to 37.9 million lb. of which 4.9 million was of local origin, the balance being imported, chiefly from the United States of America.

3. *Oversea Trade.*—Imports of tobacco and manufactures thereof into Australia during 1953-54 were valued at £17.8 million, including 37.3 million lb. of unmanufactured tobacco valued at £12.4 million. Exports of tobacco and manufactures thereof during 1953-54 were valued at £281,000.

## § 19. Hops.

Hop-growing in Australia is practically confined to Tasmania and some of the cooler districts of Victoria, the total area for 1953-54 being 1,694 acres, of which 1,350 acres were in Tasmania, and 344 acres in Victoria. A small area was also grown in Western Australia, but the details are not available for publication. The Tasmanian area, though still small, has increased during the present century, the total for 1901-2 being 599 acres. The cultivation of hops was much more extensive in Victoria some 60 years ago than at present, the area in 1883-84 being 1,758 acres.

The production of hops in Australia is insufficient to meet local requirements, and additional supplies are imported to meet the needs of the brewing industry. In the following table details of the production, imports and exports of hops and the quantity of hops used in breweries are shown for each of the years 1949-50 to 1953-54 in comparison with the average for the five years ended 1938-39.

## HOPS : PRODUCTION AND DISPOSAL, AUSTRALIA.

(a) Disregards movements in stocks.

The Tariff Board conducted an inquiry into the hop-growing industry and issued a report on 12th June, 1945.

## § 20. Flax.

For many years flax was grown intermittently in parts of Victoria and unsuccessful attempts were made to introduce its cultivation in some of the other States.

During the 1914-18 and 1939-45 Wars there was an acute shortage of flax fibre and expansion of production was encouraged by the Commonwealth Government, the area sown reaching a maximum of more than 61,000 acres in 1944-45. Government assistance was again provided in 1950 and a bounty on scutched flax fibre used was paid during the period July, 1950 to March, 1953, when increased customs duties were introduced. Following recent Tariff Board inquiries the Government has decided to reintroduce the bounty on flax fibre for a period of two years to permit the modernization of plant and machinery. The amount of the bounty is related to the difference between overseas prices and local production costs and it came into operation on 1st November, 1954.

The Government has also decided to proceed with the establishment of a Flax Commission to direct and control Commonwealth flax undertakings previously handled by the Flax Production Committee.

Details of the area under flax and the production of straw are given in the following table :—

## FLAX FOR FIBRE : AREA AND PRODUCTION.

Prior to 1948-49, the growing of flax for linseed oil had not been developed extensively in Australia. Action has since been taken to develop this industry, however, the ultimate objective being the production of sufficient linseed to meet Australia's total oil requirements. Development of the industry proceeded rapidly until 1951-52 when the record total of 53,741 acres was sown. In 1952-53 there was a decline of 14% to 46,338 acres and in 1953-54 a further decline of 78% leaving the total area sown in 1953-54 at only 6,343 acres. This sudden decline in areas sown was due primarily to the fall in the price paid to the growers for linseed which in turn reflected the decline in world prices for linseed oil.

In Australia linseed is usually grown on land suitable for other grains so that a price differential in favour of linseed is necessary before any expansion will occur in the areas sown. In addition the differential must be sufficient to overcome the higher cost factors involved in growing linseed than in growing other grains. In 1953-54 in particular this price differential was not maintained at the same level as in previous years and many growers reverted to the growing of other grains.

The question of assistance to the industry was investigated by the Commonwealth Tariff Board in 1953 and their conclusions are contained in their Report on *Linseed and Linseed Products* dated 23rd October, 1953.

Details of the area and production of flax for linseed are shown in the following table for the seasons 1949-50 to 1953-54.

## FLAX FOR LINSEED : AREA AND PRODUCTION.

## § 21. Peanuts.

The production in Australia of peanuts, or groundnuts, is mainly confined to Queensland, although small quantities are grown in New South Wales, Western Australia and the Northern Territory. Details of the area and production are given in the table below.

PEANUTS : AREA AND PRODUCTION, AUSTRALIA.

Season.	Area (Acres).				Production (Tons).			
	N.S.W.	Q'land.	W. Aust.	Australia. (a)	N.S.W.	Q'land.	W. Aust.	Australia. (a)
Average, 1929-30 to 1938-39 ..	29	8,320	100	8,449	(b) 11	3,715	24	3,750

1950-51 ..	225	16,656	92	16,973	103	5,312	18	5,433
1951-52 ..	374	13,312	15	13,701	222	4,535	9	4,766
1952-53 ..	789	18,920	10	19,719	409	8,438	7	8,854
1953-54 ..	1,525	36,617	(c)	d 38,142	718	17,866	(c)	d 18,584

(a) Excludes Northern Territory. (b) Average for five years. (c) Not available for publication. (d) Excludes Western Australia for which details are not available for publication.

The gross value of the 1953-54 crop was £2,169,940 which was approximately £1.3 million greater than in 1952-53. This increase was largely the result of the high level of production at 18,584 tons, the highest since 1946-47 when 22,774 tons were produced, and reflected the higher area of 38,142 acres sown in 1953-54 compared with 19,719 acres in 1952-53.

Considerable quantities of peanut kernels were formerly imported annually, chiefly from India, for oil expression purposes. These imports were suspended from 1946 to 1949, but have since been resumed on an increasing scale. Total supplies available for consumption in Australia in 1953-54 of 12,727 tons (shell equivalent) consisted of 8,854 tons grown locally in the 1952-53 season and 3,873 tons imported.

## § 22. Cotton.

1. **General.**—The production of cotton in Australia is restricted to Queensland, where cultivation began in 1860. Details of areas sown for years prior to 1930 and of Government financial assistance to growers up to 1940 appear in Official Year Book No. 39 and earlier issues.

Australia produces only portion of its requirements of raw cotton, the balance being obtained in 1953-54 chiefly from Pakistan, the United States of America, Egypt, India and Brazil. Efforts have been directed towards increasing production by an extension of area, the introduction of irrigation methods and payment of bounties, but so far have not met with much success. Production was increased very considerably during the early war years—it reached a peak of 17,550,000 lb. unginned cotton in 1939-40—but has since fallen away. The expansion of the industries connected with the spinning and weaving of cotton is referred to in Chapter IX.—Manufacturing Industry.

The Raw Cotton Bounty Act 1940 provided an extension until 31st December, 1946 of assistance previously granted by way of bounty. The Act was amended in August, 1946 to provide a guaranteed net average return to cotton-growers of 15d. per lb. of raw cotton for five years from 1st January, 1947. It was superseded by the Cotton Bounty Act 1951, which guaranteed a net average return of 9½d. per lb. of seed cotton for five years from 1st January, 1951. The 1951 Act was amended in 1952 to provide for a guaranteed return of 14d. per lb. of seed cotton for the 1953 crop, and for variation by regulation of the guaranteed return, in succeeding seasons, with a minimum of 9½d. per lb. The Cotton Bounty Act extended the period of the guaranteed return for three years to 31st December, 1958. The guaranteed return has remained at 14d. per lb. of seed cotton since the 1953 season and the Government has announced that this guaranteed return will apply to the 1956 season's crop.

2. Area and Production.—The area under cultivation and the production in Queensland for the years 1949 to 1953 are shown hereunder together with the average for the period of ten years ended 1939 :—

#### COTTON : AREA AND PRODUCTION IN QUEENSLAND.

### § 23. Financial Assistance to Primary Producers.

NOTE.—See also Chapter XX.—Public Finance, pages 775-776.

Direct financial assistance to primary producers by the Commonwealth Government takes the form of bounties, subsidies and other financial assistance, which in 1953-54 amounted to £17,469,000 compared with £13,576,000 in 1952-53 and £22,377,000 in 1951-52.

Brief details of some of the more important payments are given below:—

(i) *Wheat Bounty.* The Wheat Bounty Act 1951 provided for the payment of a bounty on wheat sold for stock feed purposes during the two-year period which expired on 30th November, 1953. Expenditure during the financial year 1953-54 was £1,010,000, which represented the balance of the bounty payable under the Act. In 1952-53 the expenditure on the bounty was £2,759,000.

(ii) *Cotton Bounty.* The Cotton Bounty Act 1951-52 provides for payment of a bounty on seed cotton delivered by growers to processors before 31st December, 1955. The present rate of bounty is designed to give growers an average return of 14d. per lb. The total payment in 1953-54 was £17,650 in respect of 5,400,000 lb. of cotton. There was no payment of cotton bounty in 1952-53.

(iii) *Tractor Bounty.* Under the Tractor Bounty Act 1939-1953, bounties are payable on tractors produced and sold for use in Australia up to 24th October, 1955. The rates of bounty, which were increased by 150 per cent. by the amending Act of 1953, vary between £80 and £240 per tractor, according to belt horse power of the engine. Payments in 1953-54 amounted to £145,000 on 643 tractors as compared with £38,000 on 320 tractors in 1952-53.

(iv) *Dairy Products Bounty.* Under the provisions of the Dairy Industry Assistance Act 1952, a subsidy is paid to dairymen to ensure them a return equal to the average cost of production of their produce. In 1953-54 the rate of subsidy on butter was 89s. 10d. per cwt. and on cheese 32s. per cwt., total payments amounting to £15,400,000. The respective rates in 1952-53 were 85s. and 32s. per cwt. and total payments £15,719,000.

(v) *Artificial Fertilizers.* Prices charged to primary producers for superphosphate and nitrogenous fertilizers (other than sulphate of ammonia produced locally as a by-product on which a surcharge is fixed) have been less than cost, the balance being met by the surcharge on sulphate of ammonia and by Commonwealth subsidy. Total subsidy payments in 1953-54 were £175,000 as compared with £289,000 in 1952-53.

Other forms of financial assistance to primary producers include payments for Cattle Tick Control, the Dairy Industry Extension Grant, Flood and Bush Fire Relief, Food Production, Expansion of Agricultural Advisory Services, Assistance to the Tobacco Industry and Wheat shipped to Tasmania—Freight Subsidy. In 1953-54 payments to primary producers for these purposes totalled £721,000.

### § 24. Fertilizers.

1. *General.*—In the early days of settlement in Australia scientific cultivation was little understood. It was common, as in other new countries, for the land to be cropped continuously to a degree of exhaustion. This practice is very much less in evidence now than in the early days of Australian agricultural development. Under the guidance of the State Departments of Agriculture, scientific farming is now much more widely practised. The importance of fallowing, crop rotation, and the application of suitable fertilizers in adequate quantities is now appreciated by farmers. The introduction of the modern seed-drill, acting also as a fertilizer-distributor, has greatly facilitated the use of artificial manures and much land formerly regarded as useless for cultivation has now been made productive.

In order to protect the users of artificial fertilizers, legislation has been passed in each of the States regulating the sale and prohibiting the adulteration of fertilizers. A list of these Acts and their main features is given in Official Year Book No. 12, p. 378.

2. Imports and Exports.—The Australian output of prepared fertilizers is derived chiefly from imported rock phosphate and is sufficient for local requirements.

The chief sources of Australia's supplies of rock phosphate are Nauru, Gilbert Islands Group and Christmas Island. Sodium nitrate is obtained chiefly from Chile.

The imports of artificial fertilizers during the five years ended 1953-54, compared with average imports for the period 1934-35 to 1938-39, are shown in the following table:—

#### ARTIFICIAL FERTILIZERS : IMPORTS INTO AUSTRALIA.

Fertilizer.		Average, 1934-35 to 1938-39.	1949-50.	1950-51.	1951-52.	1952-53.	1953-54.

	£'000	1,144	3,785	3,780	4,126	3,002	3,405

Exports of fertilizers (practically all of which are manufactured locally) amounted to 1,803 tons valued at £30,000 in 1953-54 compared with 1,511 tons valued at £33,000 in 1952-53 and 4,826 tons valued at £34,000 for the average of the five years ended 1938-39. Superphosphate is the principal fertilizer exported and amounted to 1,605 tons in 1953-54.

3. Quantities Used Locally.—Information regarding the area fertilized with artificial fertilizers and the quantity of artificial fertilizers (superphosphate, bonedust, nitrates, etc.) used in each State during the 1953-54 season is given in the following table. Details of the area manured with natural manure (stableyard, etc.) are no longer collected.

#### AREA FERTILIZED AND QUANTITY OF ARTIFICIAL FERTILIZERS USED, 1953-54.

State or Territory.	Area Fertilized ('000 Acres).			Fertilizers Used (Tons).		
	Crops.	Pasture Lands.	Total.	Crops.	Pasture Lands.	Total.
New South Wales .. ..	2,698	2,908	5,606	104,625	146,815	251,440
Victoria .. ..	3,556	7,555	11,111	170,168	422,235	592,403
Queensland .. ..	415	11	426	95,518	840	96,358

Tasmania .. ..	191	678	869	25,756	45,259	71,015
Australian Capital Territory ..	5	35	41	286	2,018	2,304
Total .. ..	14,712	17,877	32,589	793,912	949,705	1,743,617

Particulars of the quantity of artificial fertilizers used in each State and Territory during each of the seasons 1949-50 to 1953-54, compared with the average for the five years ended 1938-39, are shown in the next table. These details include the quantity used in the top-dressing of pasture lands.

QUANTITY OF ARTIFICIAL FERTILIZERS USED.  
(Tons.)

Season.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Total.
Average, 1934-35 to 1938-39 ..	148,277	305,969	50,651	200,566	230,713	30,272	276	966,724
1949-50 ..	174,171	550,020	72,298	243,768	357,632	53,874	1,098	1,452,861
1950-51 ..	160,871	563,086	73,761	255,781	377,083	56,224	822	1,487,628
1951-52 ..	177,120	579,022	72,610	270,046	399,304	56,719	1,033	1,555,854

1953-54 ..	251,440	592,403	96,358	325,085	405,012	71,015	2,304	1,743,617

As mentioned in § 23 (v) the Commonwealth Government has encouraged the use of artificial fertilizers by providing subsidies to primary producers. In 1953-54 subsidy was paid only on nitrogenous fertilizers.

4. Local Production.—Complete information regarding local production of fertilizers is not available. The number of firms engaged in the manufacture of chemical fertilizers in Australia for the year 1953-54 was 51, made up as follows:—New South Wales, 14; Victoria, 9; Queensland, 8; South Australia, 7; Western Australia, 5 and Tasmania, 8. The production of superphosphate in Australia during 1953-54 amounted to 1,771,000 tons.

## § 25. Ensilage.

1. Government Assistance in Production.—The several State Governments devote a considerable amount of attention to the education of the farming community in regard to the value of ensilage. Monetary aid is afforded in the erection of silos, and expert advice is supplied in connexion with the design of the silos and the cutting and packing of the ensilage.

2. Quantity Made and Stocks Held on Farms.—Information regarding production and farm stocks of ensilage for the years ended 31st March, 1952, 1953 and 1954 are given in the following table.

ENSILAGE : PRODUCTION AND FARM STOCKS.  
(Tons.)

Period.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Total.
Production during—								
1951-52 season	47,920	24,591	7,654	8,234	11,433	10,638	4	110,474
1952-53 ..	85,135	45,643	12,808	11,670	14,103	17,861	9	187,229
1953-54 ..	84,465	69,830	18,513	13,755	12,070	22,459	..	221,092
Farm Stocks, as at—

„ „ 1953	102,812	(a)	12,980	11,186	3,530	13,588	84	(a)
„ „ 1954	101,262	(a)	18,907	11,497	4,324	19,811	25	(a)

(a) Not available.

The drought of 1902-3 drew increased attention to the value of stocks of ensilage, and during the four seasons ended 1909-10 there was an increase both in the number of holdings on which ensilage was made and in the quantity produced. The accumulated stocks proved of great value during the 1914 drought, though far less than would have been the case if more attention had been paid to production during the previous years when there was a surplus of green fodder. The quantities made since that date have fluctuated considerably, but the output increased up to 1939-40 in which year the production of 303,495 tons was the highest yet recorded. During subsequent seasons output declined to the extremely low level of 94,744 tons during the drought year 1944-45 rising to 180,622 tons in 1947-48 but decreasing again in succeeding years to 110,474 tons in 1951-52. Production increased in 1952-53 and again in 1953-54 to 221,092 tons.

## **§ 26. Agricultural Colleges and Experimental Farms.**

Agricultural colleges, administered by State Departments of Agriculture, have been established in all States except Tasmania. The primary function of these colleges is the training of students in the various phases of agricultural work and live stock husbandry. Students are required to undertake a considerable amount of practical work in addition to lectures and theory. A secondary function of the colleges is agricultural research and experimentation. To a lesser degree they carry out extension work in the form of public field days. Upon graduation, students receive diplomas in agriculture, dairying etc., according to the course undertaken.

Experimental farms have been set up by State Departments of Agriculture in all States. They are primarily concerned with agricultural research and experimentation, each farm concentrating on problems specific to the district in which it is located. The results of the work undertaken are passed on to farmers at field days, which are held at regular intervals, through publication in various agricultural or scientific journals and through the agricultural extension officers of the State Departments of Agriculture.

The Commonwealth Scientific and Industrial Research Organization has field stations scattered throughout Australia, and sometimes undertakes joint research with the appropriate State authorities. In general, however, the Commonwealth Scientific and Industrial Research Organization concentrates on fundamental research, except when otherwise specifically invited, while the State Departments of Agriculture study problems of particular significance within their own boundaries. The universities also carry out valuable research work on their own experimental farms.

## **§ 27. Tractors on Rural Holdings.**

The growth of mechanization in agriculture is indicated by the increase in the number of tractors on rural holdings from 41,943 in 1939 to 170,905 in 1954 or by 307 per cent. Since 1943, the first year in which the collection was made by types, wheeled type tractors have increased by 244 per cent., and crawler types by 109 per cent.

The table below sets out the total number of tractors on rural holdings in 1939, and the number of wheeled type and crawler tractors for the five years ended 1954.

## TRACTORS ON RURAL HOLDINGS.

## § 28. Number and Area of Rural Holdings and Employment Thereon.

1. **Number and Area.**—A holding in Australia has been defined by Statisticians on a more or less uniform basis and discrepancies which exist are not of sufficient importance to vitiate comparisons. For the purpose of these statistics, a holding may be defined as land of one acre or more in extent, used in the production of agricultural produce, the raising of live stock or the products of live stock.

There is considerable fluctuation from time to time in numbers of very small holdings and it is very difficult to determine in some cases whether or not they are rural holdings within the definition.

In addition in the very dry parts such as the far west of New South Wales and Queensland and the remoter parts of South Australia and Western Australia there are large areas of marginal lands sporadically occupied under short-term lease or other arrangement and the areas so occupied tend to fluctuate with the season. Similarly, there are rugged areas in the mountain country of some States which are also sporadically occupied.

The following table shows the recorded number and area of the holdings in each State for the seasons 1938-39 and 1949-50 to 1953-54.

## RURAL HOLDINGS : NUMBER AND AREA.

Season.	New South Wales.	Victoria.	Queens-land.	South Australia.	Western Australia.	Tasmania.	Australian Capital Territory.	Australia. (a)

1952-53..	167,907	37,868	358,332	152,689	215,858	6,559	394	939,607
1953-54..	168,996	37,546	361,520	150,314	221,805	6,511	391	947,083

(a) Excludes Northern Territory.

It is not possible to classify these holdings according to the purpose for which they are used. This arises from a number of factors, the chief of which is mixed farming. The general trend in Australia is for farmers to diversify their activities and consequently it is very difficult to determine whether the purpose of many holdings is mainly agricultural, pastoral or dairying, or any of these in combination.

An approximate classification was, however, made for New South Wales for 1945-46 and details may be found on page 1018 of Official Year Book No. 39.

2. Special Tabulation Relating to Rural Holdings, 1949-50.—With the co-operation of State Statisticians, the second series of special tabulations relating to rural holdings was undertaken for all States for the 1949-50 season. These tabulations have been published in detail in Primary Industries Bulletin No. 44, 1949-50. The following table shows particulars of the number and area of rural holdings classified according to the size of holdings.

3. **Employment on Rural Holdings.**—The following table shows, for each State of Australia, the recorded number of persons permanently and temporarily working on rural holdings as at 31st March, 1954. Additional particulars relating to the number of males employed in agriculture are available up to 1941-42 in Official Year Book No. 36, page 852, and previous issues. Similar details for later years are not available.

## CHAPTER XXII.

### PASTORAL PRODUCTION.

NOTE.—Except where otherwise indicated, values of Australian oversea trade shown throughout this chapter are expressed as f.o.b., Australian currency, port of shipment.

#### § 1. Initiation and Growth of Pastoral Industry.

1. **Livestock Numbers.**—A detailed account of the various enumerations of livestock in Australia made prior to 1860 was given in previous issues of the Year Book. Since 1860 annual enumerations have been made, based, with few exceptions, on actual collections made through the agency of the State Police or by post. Particulars concerning the numbers of each of the principal kinds of livestock in Australia at decennial intervals from that year to 1950 and from 1951 onwards in single years are given in the following table, and are shown continuously on the graph on page 911.

#### LIVESTOCK : AUSTRALIA. (‘000.)

Year.	Horses.	Cattle.	Sheep.	Pigs.	Year.	Horses.	Cattle.	Sheep.	Pigs.
1860 ..	432	3,958	20,135	351	1930 ..	1,793	11,721	110,568	1,072
1870 ..	717	4,276	41,594	543	1940 ..	1,699	13,080	119,305	1,455
1880 ..	1,069	7,527	62,184	816	1950 ..	1,057	14,640	112,891	1,123
1890 ..	1,522	10,300	97,881	891	1951 ..	999	15,229	115,596	1,134
1900 ..	1,610	8,640	70,603	950	1952 ..	937	14,893	117,647	1,022
1910 ..	2,166	11,745	98,066	1,026	1953 ..	895	15,247	123,072	993
1920 ..	2,416	13,500	81,796	764	1954 ..	850	15,601	126,944	1,197

While livestock numbers (particularly sheep) have increased substantially since 1860, marked fluctuations have taken place during the period, mainly on account of droughts which have from time to time left their impress on the pastoral history of Australia. These occurred in 1868, 1877, 1883-4, 1892, 1893, 1895, 1901-2, 1912, 1914, 1918, 1919, 1922-23, 1925-26, 1927-28, 1929-30, 1940-41 and 1944-45 to 1946-47.

The years in which the numbers of livestock attained their maxima are as follows :—Horses, 1918 (2,527,000); cattle, 1954 (15,601,000); sheep, 1954 (126,945,000); and pigs, 1941 (1,797,000).

The distribution throughout Australia of beef cattle, dairy cattle, sheep and pigs as at 31st March, 1948 was shown in the graphs on pages 905-8 of Official Year Book No. 39.

The numbers of horses, beef cattle and sheep in each State and Territory are shown later in this chapter; similar information for dairy cattle and pigs appears in Chapter XXIII.—Farmyard, Dairy and Bee Products.

2. **Minor Classes of Livestock.**—Statistics of the minor classes of livestock (goats, camels, mules, donkeys, etc.) have not been collected in recent years. The last year in which all States, other than Victoria, collected this information was 1941, when total

numbers were as follows :—Goats, 80,366; camels, 2,267; and mules and donkeys, 10,881. Of these, goats were most numerous in Queensland, and camels, mules and donkeys in Western Australia. Further details have been published in earlier issues of the Year Book.

3. Value of Pastoral Production.—(i) *Gross, Local and Net Values, 1953-54.* Values of pastoral production for each State are shown for 1953-54 in the following table. Further details of the source of the information and an explanation of the terms used in this compilation will be found in Chapter XXIX.—Miscellaneous. Maintenance costs have not been computed in all States and depreciation has not been deducted; consequently the net values are inflated to the extent of these costs.

### GROSS, LOCAL AND NET VALUES OF PASTORAL PRODUCTION, 1953-54.

(£'000.)

State.	Gross Production Valued at Principal Markets. (a)	Marketing Costs.	Gross Production Valued at Farm.	Farm Costs.		Net Value of Production. (b)
				Seed used, and Fodder for Farm Stock.	Value of other Materials used in Process of Production.

(a) Excludes payments to wool-growers of profits from the war-time wool disposal plan. (b) No allowance has been made for costs of power, power kerosene, petrol and other oils. (c) No deduction has been made for depreciation and maintenance.

4. Indexes of Quantum and Price of Pastoral Production, 1949-50 to 1953-54.—For details of the methods of calculating these indexes and of the weights used *see* Chapter XXIX.—Miscellaneous.

INDEXES OF QUANTUM AND PRICE OF PASTORAL PRODUCTION :  
AUSTRALIA.

(Base : Average 3 years ended June, 1939 = 100.)

Particulars.	1949-50.	1950-51.	1951-52.	1952-53.	1953-54.
Quantum produced—					
Wool .. ..	115	116	112	131	128
Other products ..	109	100	95	119	117
Total Pastoral ..	112	109	105	126	123
Total per Head of Population ..	96	90	84	97	95
Price—					
Wool .. ..	483	1,098	552	623	621
Other products ..	264	386	423	389	401
Total Pastoral ..	396	818	501	531	534

5. Consumption of Meats.—The quantity of meat (including cured and canned meat) in terms of carcass weight and edible offal available for consumption in Australia in 1953-54 was 888,000 tons. This is equivalent to 223.5 lb. per head compared with 227.7 lb. per head in 1952-53, 214.8 lb. in 1951-52, and an average of 253.0 lb. during the years 1936-37 to 1938-39.

Although it is not easy to obtain strictly comparable particulars for other countries, it appears from data published by the Food and Agricultural Organization of the United Nations in its *Food Balance Sheets* that in recent years consumption of meat in Australia has been at approximately twice the level of that in Canada and about one and a half times the level of that in the United States of America.

6. *Marketing of Meat.*—(i) *General.* The Australian Meat Board, consisting of representatives of producers, processors, exporters and the Commonwealth Government, is responsible for the control of all exports of Australian meat and meat products. Further information on the powers, etc., conferred on the Board under the Meat Export Control Act 1935–1953 was given on p. 801 of Official Year Book No. 40.

(ii) *War-time Marketing.* Details of arrangements for the marketing of meat during the 1939–45 War were given on page 1107 of Official Year Book No. 36.

(iii) *United Kingdom Long-term Purchase Agreements.* Details of the long-term meat contracts with the United Kingdom Government from the outbreak of the 1939–45 War up to 30th June, 1952 and of the Fifteen Year Meat Agreement (1952–67) were given on page 710 of Official Year Book No. 41 and in earlier issues of the Year Book.

The Fifteen Year Meat Agreement (1952–67) between the United Kingdom and Australian Governments has as its objectives the promotion of meat production in Australia enabling increased exports to be made to the United Kingdom and the provision of a satisfactory market in the United Kingdom for that meat. It covers chilled and frozen beef, frozen veal, frozen mutton and lamb, frozen cattle and sheep sundries and edible offal.

Pig meats were not included in the Fifteen Year Meat Agreement, but a two-year arrangement terminating on 30th September, 1954 was negotiated. This arrangement did not limit shipments of pig meats to other markets.

(iv) *Cessation of Bulk Purchasing.* Following the announcement in September, 1953 that the United Kingdom Ministry of Food would cease bulk purchasing of meat, arrangements were made between the Australian Meat Board and the Ministry for the reversion to private trading in the United Kingdom. The main features of the arrangements are :—

- (a) Mutton and lamb exported after 1st July, 1954 and beef, veal and pig meats exported after 1st October, 1954 direct to United Kingdom importers are to be sold on the open market under methods similar to those which applied pre-war.
- (b) A schedule of minimum prices to operate until 30th September, 1955 was drawn up. The guaranteed levels for the year ended 30th September, 1955, were :—Beef and veal, 13.18d. stg. f.o.b. per lb.; lamb, 13.61d. stg. f.o.b. per lb.; and mutton, 6.05d. stg. f.o.b. per lb.
- (c) In the event of market prices for the various classifications of meat averaging below the minimum, the Ministry is to make a payment to the Australian Government corresponding to the amount of the deficiency. So as to determine the extent of any deficiency, a procedure designed to measure as accurately as possible the weighted average level of wholesale prices of Australian meat on the United Kingdom market has been agreed upon.

(v) *Private Trading.* After eight months of open trading, the Board estimated that a deficiency payment would be received in respect of beef for the first year. In order to make arrangements for this anticipated deficiency to be passed on to the producer, the Meat Agreement (Deficiency Payments) Act was passed by the Commonwealth Government in May, 1955. Under this Act, the Board paid to exporters a deficiency payment of 1½d. per lb. on beef delivered into store between 1st May and 30th September, 1955, and subsequently exported to the United Kingdom. This payment was made on the understanding that it was, or would be, reflected in the price paid to producers.

To make provision for recoupment by the Board of any overpayment, the Meat Export (Additional Charge) Act was also passed in May, 1955.

Negotiations were held in Australia during August and September, 1955, to fix minimum prices for the year commencing 1st October, 1955, and to review the working of the Agreement generally. The guaranteed levels agreed on for this period were:— for beef and veal and lamb the same as for the year ended 30th September, 1955, and for mutton the average prices realized to the end of April, 1955 (approximately 5.8d. stg. per lb.). In addition minimum beef and veal prices were fixed for the three years 1958–61 at 5 per cent. below those for the 1955–58 period. Australia will, under the terms of the Agreement, be entitled to export 10,000 tons of beef, veal, lamb and mutton to destinations other than the United Kingdom and the Colonies. Additional free quotas can be requested and sympathetic consideration can be expected for any such requests should depressed prices or other circumstances justify an approach of this kind.

## § 2. Horses.

1. *Distribution throughout Australia.*—About 80 per cent. of the total number of horses in Australia are in the States of New South Wales, Queensland and Victoria. In the following table figures are shown for each State and Territory for the years 1950 to 1954 in comparison with the average for the years 1935 to 1939 :—

HORSES : NUMBER.  
(‘000.)

Year.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Australia.
Average, 1935 to 1939 ..	537	355	444	198	154	31	33	1	1,753
1950 ..	343	200	317	83	59	21	33	1	1,057
1951 ..	329	187	307	71	55	20	29	1	999
1952 ..	311	169	289	63	53	19	32	1	937
1953 ..	298	154	282	57	50	18	35	1	895
1954 ..	280	141	273	52	49	17	37	1	850

The number of horses in Australia attained its maximum during 1918, when a total of 2,527,149 was recorded. The United States of America recorded its highest number in the same year and Canada in 1921. The number in Australia has declined considerably since 1918 owing to the mechanization of transport and farming. During the period 1918 to 1954 the decrease in numbers averaged 46,000 per annum, the rate of decline being 53,000 per annum during the five years ended 1954.

The number of horses in Australia from 1860 onwards may be obtained from the graph on page 911.

The proportion per cent. of the number of horses in each State and Territory for 1954 was :—New South Wales, 33 ; Victoria, 17 ; Queensland, 32 ; South Australia, 6 ; Western Australia, 6 ; Tasmania, 2 ; and Northern Territory, 4.

2. *Oversea Trade in Horses.*—(i) *Exports.* The export of horses from Australia during the early years of this century was fairly considerable, averaging about 15,000 head per annum between 1901 and 1920, exclusive of those used for war purposes during the 1914–18 War. Since then exports have gradually declined and averaged only about 4,000 for the five years ended 1938–39 and just under 1,000 for the five years ended 1953–54.

(ii) *Imports.* The few horses imported into Australia consist mainly of valuable stud animals from the United Kingdom and racehorses from New Zealand. During the five years ended 1953–54 an average of 432 horses valued at £338,000 (equivalent to £783 per head) was imported annually.

## § 3. Cattle.

1. **Purposes for which Raised.**—Cattle-raising is carried out in all the States, the main object in certain districts being the production of stock suitable for slaughtering purposes, and in others the raising of profitable dairy herds. The great impetus which the development of the export trade in Australian butter gave to the dairying industry led to a considerable increase in numbers and an improvement in quality of the dairy herds in the coastal districts of Victoria, New South Wales and southern Queensland in particular, the portion of Australia in the temperate zone which is best adapted to this industry. On the other hand, beef-producing cattle are more widely distributed particularly in the eastern States and are raised in areas unsuitable for dairy cattle, such as the tropical area of northern Queensland, the Northern Territory, and the Kimberley district in the north of Western Australia.

2. **Distribution throughout Australia.**—Until 1880, New South Wales was the principal cattle-raising State, but in that year Queensland occupied the leading position, which it has since maintained. There was a very rapid increase in the number of cattle in Australia up to the year 1894, when 12,312,000 head were depastured. From 1895 onwards, however, the effects of droughts and the ravages of tick fever reduced the number to 7,063,000 in 1902. Following the disastrous drought which terminated in the latter year the herds were gradually built up, and, despite recurring droughts, they continued to increase up to 14,441,000 in 1921. After that year the number dropped continuously till 1929, largely owing to the decline in the oversea demand for frozen beef. With the expansion of dairying it recovered to 14,049,000 in 1934, but from that year declined continuously to 1939 when it stood at 12,862,000. The upward movement which commenced in 1940 was continued until 1944, the total number of cattle (14,184,000) in the latter year being at its highest level since 1923. Drought conditions and other factors caused a decline in numbers to 13,427,000 in 1947. This was followed by a general upward movement in numbers to a record 15,601,000 in 1954. A graph showing the number of cattle in Australia from 1860 appears on page 911.

The numbers of cattle (beef and dairy) in the several States and Territories in each year 1950 to 1954 compared with the average for the years 1935 to 1939 are shown below.

CATTLE : NUMBER.  
(‘000.)

Year.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Nor. Terr.	Aust. Cap. Terr.	Aust.
Average, 1935 to 1939 ..	3,198	1,952	6,018	331	819	262	889	9	13,478
1950 ..	3,440	2,231	6,305	464	865	275	1,049	11	14,640
1951 ..	3,703	2,216	6,734	433	841	272	1,019	11	15,229
1952 ..	3,621	2,215	6,435	437	852	265	1,058	10	14,893
1953 ..	3,649	2,297	6,751	483	846	275	936	10	15,247
1954 ..	3,554	2,370	7,086	491	830	295	966	9	15,601

Although the proportion is not as high as it has been in the past, Queensland was carrying 46 per cent. of the cattle in Australia in 1954. The percentage in each State and Territory during that year was :—New South Wales, 23 ; Victoria, 15 ; Queensland, 46 ; South Australia, 3 ; Western Australia, 5 ; Tasmania, 2 ; and Northern Territory, 6.

A graph showing the distribution in 1924–25 of the total cattle in Australia appeared on page 660 of Official Year Book No. 22, while similar graphs showing for 1938–39 the distribution of total cattle and of dairy cows were shown on pp. 453–4 of Official Year Book No. 34 and graphs indicating the distribution of beef and dairy cattle separately in Australia at 31st March, 1948 may be found on pages 905–6 of Official Year Book No. 39.

3. **Classification of Cattle According to Purpose.**—Of the total number of cattle in Australia in 1954, 10,771,000 or 69 per cent. were classified as beef cattle. The numbers classified as beef cattle in the several States and Territories during the years 1943 and 1950 to 1954 were as follows :—

**BEEF CATTLE : NUMBER.**  
(‘000.)

Year.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Nor. Terr.	Aust. Cap. Terr.	Aust.
1943 .. ..	1,676	577	4,893	171	605	102	978	5	9,007
1950 .. ..	2,167	706	4,872	193	638	117	1,049	8	9,750
1951 .. ..	2,457	727	5,294	189	618	115	1,019	8	10,427
1952 .. ..	2,416	776	5,138	201	621	110	1,058	7	10,327
1953 .. ..	2,405	820	5,378	231	612	113	936	6	10,501
1954 .. ..	2,316	829	5,703	230	600	121	966	6	10,771

A classification of numbers on this basis is not available prior to 1943.

Particulars relating to dairy cattle numbers will be found in Chapter XXIII.—Farmyard, Dairy and Bee Products.

4. **Size Classifications of Cattle Herds.**—A special series of tabulations relating to rural holdings in Australia was compiled for 1949–50 and published in Primary Industries Bulletin No. 44. The tables relating to beef and dairy cattle show classifications according to size of herd and area of holding.

5. **Comparison with other Countries.**—The following table shows the number of cattle in Australia and in some of the principal cattle-raising countries of the world for the years 1936–40 and at the latest available date. The figures, which, in general, have been compiled by the United States Department of Agriculture for publication in *Foreign Crops and Markets*, relate to areas embraced by post-war boundaries, but do not cover identical areas for the two periods in all cases.

**CATTLE : NUMBER IN VARIOUS COUNTRIES.**  
(‘000.)

Country.	Average, 1936–40.(a)	Year and Month.	Number
India(b) .. ..	180,000	1952 (January) ..	199,271
United States of America .. ..	66,706	1955 (January) ..	95,433
Brazil .. ..	40,807	1954 (December) ..	58,000
U.S.S.R. .. ..	59,800	1953 (January) ..	56,600
Argentina .. ..	33,762	1955 (July) ..	44,000
Pakistan(b) .. ..	33,000	1953 (January) ..	29,100
China .. ..	25,600	1953 (May) ..	28,800

Germany, Federal Republic of ..	12,114	1954 (December) ..	11,521

(a) In some cases census for a single year, and in others an average for two to four years. (b) Includes buffaloes.

6. **Imports and Exports of Cattle.**—The products of the cattle-raising industry figure largely in the export trade of Australia, although the export of live cattle has never been large. The number of cattle imported is also small, consisting, as in the case of horses, mainly of valuable animals for stud purposes. Details for the years 1940–50 to 1953–54 compared with the average for the years 1934–35 to 1938–39 are as follows.

## CATTLE : IMPORTS AND EXPORTS, AUSTRALIA.

Year.	Imports.		Exports.		Net Exports.	
	No.	Value.	No.	Value.	No.	Value.
Average, 1934-35 to 1938-39	295	£'000 22	308	£'000 6	13	— 16
1949-50 ..	160	89	485	40	325	— 49
1950-51 ..	201	123	876	70	675	— 53
1951-52 ..	318	214	681	58	363	— 156
1952-53 ..	494	201	1,643	81	1,149	— 120
1953-54 ..	153	102	1,214	95	1,061	— 7

NOTE.—The minus sign (—) signifies net imports.

The average value per head of the cattle imported during the last five years was £550, while the average value per head of the cattle exported during the same period was £70.

7. Cattle Slaughtered.—The numbers of cattle slaughtered during each of the years ended June, 1950 to 1954 compared with the average for the years 1934-35 to 1938-39 are shown in the following table :—

CATTLE (INCLUDING CALVES) SLAUGHTERED.  
( '000.)

Year ended June—	Slaughtering passed for Human Consumption.									Total Slaughtering including Boiled Down.
	N.S.W.	Vic.	Qld.	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.	
Average, 1934-35 to 1938-39 ..	(a) 1,112	812	1,046	(b) 156	(b) 124	45	(b) 4	2	3,301	3,331

1954 ..	1,564	1,008	1,366	220	172	62	15	8	4,415	4,475

(a) Year ended March.

(b) Year ended previous December.

8. Production of Beef and Veal.—Details of the production of beef and veal in each State and Territory are shown in the following table for the years indicated :—

PRODUCTION OF BEEF AND VEAL (BONE-IN WEIGHT) : AUSTRALIA.  
( '000 tons.)

Year ended June—	N.S.W.	Vic.	Qld.	S. Aust.	W.A.	Tas.	N.T.	A.C.T.	Aust.
Average 1935 to 1939	(a) 173	115	181	(b) 25	(b) 27	9	(b) 1	..	531
1950 ..	186	125	212	33	35	12	3	1	607
1951 ..	193	137	232	36	34	14	4	2	652
1952 ..	184	138	178	31	32	14	3	2	582
1953 ..	217	124	253	31	32	14	3	1	675
1954 ..	221	140	258	34	35	11	3	2	704

(a) Year ended March.

(b) Year ended previous December.

9. Consumption of Beef and Veal.—For the three pre-war years 1936-37 to 1938-39 the average annual production of beef and veal in Australia was 569,000 tons of which 127,000 tons were exported, leaving a balance of 442,000 tons (or the carcass equivalent of 144 lb. per head per annum) available for consumption as fresh and canned meat.

Due mainly to the effects of rationing, civilian consumption during the war and immediate post-war years of carcass beef and veal (including the carcass equivalent of canned meat) was considerably lower than previously but following the return to more normal conditions it rose to 135.6 lb. per head in 1950-51. From 1951-52, consumption fell again, to 115.8 lb., in 1953-54.

In the following table details of the production and disposal of beef and veal are shown for the periods stated.

**PRODUCTION AND DISPOSAL OF BEEF AND VEAL (BONE-IN WEIGHT) :  
AUSTRALIA.  
(‘000 tons.)**

Year.	Changes In Stock.	Production.	Exports.	For Canning.	Consumption in Australia as Human Food.	
					Total.	Per Head per Annum.
Average, 1936-37 to 1938-39 .. ..	.. ..	569	127	(a)	442	lb. 144.1
1949-50 .. ..	- 9	607	94	75	447	124.3
1950-51 .. ..	+ 10	651	81	72	488	131.6
1951-52 .. ..	- 4	582	52	81	453	118.9

1953-54 .. ..	- 7	704	155	101	455	114.6

(a) Included with exports.

10. **Exports of Frozen Beef and Veal.**—The export of frozen meat from Australia dates from about 1881, and since that year the trade has grown considerably. The quantity of frozen beef and veal exported in 1938-39 amounted to 271,964,000 lb., valued at £4,324,000, but there was a decline during the war years owing to reduced production and the diversion of supplies to meet the requirements of the Australian and Allied Services based on Australia. By 1947-48 the quantity exported had risen again to 237,150,000 lb., valued at £6,193,000, but this was followed by a steady decline until 1951-52 when exports amounted to only 95,876,000 lb. valued at £5,230,000. There was a marked increase in 1953-54 when 316,977,000 lb. valued at £22,046,000 was exported. The quantities and values of frozen beef and veal exported during the five pre-war years ended 1938-39 and in each year 1949-50 to 1953-54 are shown in the following table :—

**EXPORTS OF FROZEN BEEF AND VEAL : AUSTRALIA.**

Year.	Exports of Frozen and Chilled Beef.		Exports of Frozen Veal.	
	Quantity.	Value.	Quantity.	Value.
	‘000 lb.	£’000	‘000 lb.	£’000
Average, 1934-35 to 1938-39	231,355	3,188	10,353	165
1949-50 .. ..	178,128	6,522	4,233	182
1950-51 .. ..	154,832	6,440	3,478	207
1951-52 .. ..	92,926	5,009	2,950	221
1952-53 .. ..	189,176	13,443	3,324	339
1953-54 .. ..	313,198	21,697	3,779	349

Prior to the war the largest purchaser of Australian beef and veal was the United Kingdom, which during 1938-39 took about 90 per cent. of the total shipments. However, at the request of the United Kingdom Government there was a considerable diversion from that country to nearer British possessions during the war years. In 1953-54 shipments to the United Kingdom were valued at £18,016,000 or 82 per cent. of the total value of beef and veal exports compared with £9,690,000 or 70 per cent. in 1952-53. Exports to other British countries amounted to £2,099,000 or 10 per cent. of the total in 1953-54 and £2,032,000 or 21 per cent. in 1952-53.

In view of the preference overseas for chilled beef, the Australian beef industry was at a serious disadvantage until investigations proved that beef could be successfully transported from Australia to United Kingdom in a chilled condition. Trial shipments of 254,000 lb. in 1932-33 and 1,515,000 lb. in 1933-34 were made, and the exports in

subsequent years increased to a maximum of 58,963,000 lb. in 1938-39. However, the advent of war seriously affected the export trade in chilled beef, which declined to a negligible amount after 1939-40.

#### § 4. Sheep.

1. **Initiation of the Pastoral Industry.**—The suitability of the Australian climate and general conditions for the production of a high class of wool were at an early date recognized by Captain Macarthur, one of the pioneer sheep-breeders of New South Wales. While it would appear that the introduction of the merino sheep into Australia was not due to Macarthur, a great deal of the credit for having successfully established the pastoral industry in Australia must certainly be his.

2. **Movement in Sheep Numbers in Australia.**—Fluctuations in the number of sheep recorded in Australia for each year from 1860 onwards may be seen from the graph on page 911. Up to 1945 there were five marked periods of decline, but the losses were made up rapidly. In each of the years 1925 to 1945 the sheep flocks exceeded 100 million, reaching 125.2 million in 1942. At no previous period have such large numbers been depastured continuously, and the development took place despite an increase in the annual slaughter for the meat trade over this period, from about 10 million to 25 million.

However, a sharp decline to 95.7 million occurred during the three years ended 1947 representing a loss from all causes other than slaughtering of about 37 million sheep (30 per cent.) since 1944. This was largely attributable to the severe drought conditions experienced during 1944, 1945 and 1946. The passing of the drought and consequent re-stocking have resulted in a steady increase in sheep numbers which at 31st March, 1954 amounted to 126.9 million, the highest ever recorded.

The following table shows the approximate movement in sheep numbers in Australia in 1938-39 and 1949-50 to 1953-54.

**SHEEP AND LAMBS : ANALYSIS OF MOVEMENT IN NUMBERS, AUSTRALIA.**  
(’000.)

Season.	Lambs Marked.	Excess of Exports.	Sheep and Lambs Slaughtered.	Estimated Number of Deaths from Disease, Drought, etc.(a)	Number at 31st March.	Annual Net Increase (+) or Decrease (-)
1938-39 ..	25,469	67	18,900	8,817	(b) 111,058	- 2,315
1949-50 ..	30,382	96	20,929	5,201	112,891	+ 4,156
1950-51 ..	29,816	84	16,083	10,944	115,596	+ 2,705
1951-52 ..	27,183	79	15,418	9,635	117,647	+ 2,051
1952-53 ..	31,778	84	21,034	5,235	123,072	+ 5,425
1953-54 ..	32,231	86	20,922	7,351	126,944	+ 3,872

(a) Balance figure. (b) As at 1st January, 1939—Queensland, South Australia, Western Australia, Tasmania, Northern Territory; as at 1st March, 1939—Victoria.

3. **Distribution throughout Australia.**—With the exception of a short period in the early sixties, when the flocks of Victoria outnumbered those of New South Wales, the latter State has occupied the premier position in sheep-raising, depasturing about one half of the sheep of Australia.

A graph indicating the distribution of sheep in Australia at 31st March, 1948, is shown on page 907 of Official Year Book No. 39. Similar graphs for the years 1938-39 and 1924-25 were published in Official Year Books No. 34, page 452 and No. 22, page 659, respectively.

The numbers of sheep in the several States and Territories at 31st March of each year 1950 to 1954 compared with the average for the years 1935 to 1939 are shown in the following table :—

**SHEEP : NUMBER.**  
( '000.)

Year.	N.S.W.	Vic.	Q'land.	S. Aust.	W.Aust.	Tas.	Nor. Terr.	Aust. Cap. Terr.	Australia.
Average, 1935 to 1939 ..	51,774	17,555	21,061	8,515	9,839	2,312	23	240	111,319
1950 ..	53,298	19,161	17,582	9,477	10,923	2,170	26	254	112,891
1951 ..	54,111	20,012	17,478	10,166	11,362	2,181	29	257	115,596
1952 ..	53,676	21,537	16,164	11,470	12,188	2,338	31	243	117,647
1953 ..	57,461	21,368	17,030	12,036	12,475	2,421	34	247	123,072
1954 ..	59,639	21,438	18,194	11,838	13,087	2,465	31	252	126,944

Except when affected by drought, the relative number of sheep depastured in the different States in recent years has remained fairly constant.

The percentage distribution in 1954 was :—New South Wales, 47 ; Victoria, 17 ; Queensland, 15 ; South Australia, 9 ; Western Australia, 10 ; and Tasmania, 2.

4. Classification of Sheep According to Age, Sex and Breed.—In the following table numbers of sheep in Australia are classified according to age and sex at 31st March of the years 1943 and 1950 to 1954. Data in this form are not available prior to 1943.

**SHEEP : AGE AND SEX, AUSTRALIA.**  
( '000.)

Description.	31st March—					
	1943.	1950.	1951.	1952.	1953.	1954.
Rams, 1 year and over ..	1,651	1,497	1,473	1,507	1,560	1,610
Breeding ewes (including ewes intended for mating)	56,674	52,122	52,794	52,954	55,351	55,528
Other ewes, 1 year and over	9,636	6,982	6,760	7,451	7,039	8,430

Total ..	57,461.0	21,368.2	17,029.6	12,036.5	12,474.7	2,421.5	33.8	246.8	123,072.1

(a) As at 31st December, 1952. Distribution between categories has been estimated. (b) Merino comeback is the progeny of a crossbred merino ewe and a merino ram, i.e., finer than half-bred. (c) Half-bred and coarser.

5. Numbers of Sheep on Rural Holdings.—A special series of tabulations relating to rural holdings in Australia was compiled for 1949–50 and published in *Primary Industries Bulletin* No. 44. The tables relating to sheep farming show classifications according to areas of the holdings on which the sheep were carried.

6. Comparison with other Countries.—As regards the size of its flocks and the quantity and quality of wool produced, Australia has long occupied a leading position amongst the sheep raising countries of the world. In 1953–54, Australian flocks numbered

127 million sheep, compared with the estimate of 167 million for the U.S.S.R., China and Eastern Europe, with about 54 million in Argentina and about 38 million in New Zealand. The total world sheep population was estimated at about 827 million in 1953-54. Further details of sheep numbers in the principal wool producing countries of the world for 1938-39, 1952-53 and 1953-54 are given in the table on p. 917.

7. **Oversea Imports and Exports of Sheep.**—As in the case of cattle, the oversea exports of live sheep from Australia are of comparatively little importance. On 27th November, 1929, the export of stud sheep was prohibited, except with the approval of the Minister for Trade and Customs. Sheep for breeding purposes were being exported in increasing numbers up to the outbreak of war in the Pacific, and shipments in 1939-40 amounted to 23,329 sheep valued at £80,000, compared with 1065 valued at £24,000 in 1953-54. The chief countries to which sheep for breeding purposes were consigned in 1939-40 were New Zealand, South Africa, Japan and Korea and, in 1952-53 to New Zealand. During the last five years the principal consignments of ordinary sheep have been made to Singapore from Western Australia. The following table shows the imports and exports of breeding and flock sheep for the years 1949-50 to 1953-54 compared with the average for the years 1934-35 to 1938-39.

#### SHEEP : IMPORTS AND EXPORTS, AUSTRALIA.

Year.	Imports.		Exports.		Net Exports.

NOTE:- VERTICAL SCALE IS LOGARITHMIC, AND THE CURVES RISE AND FALL ACCORDING TO RATE OF INCREASE OR DECREASE, ACTUAL NUMBERS ARE INDICATED BY SCALE.

# SHEEP NUMBERS AND WOOL PRODUCTION: AUSTRALIA 1870 to 1954-55

The quantities and values of exports of frozen mutton and lamb in each year 1944-50 to 1953-54 compared with the average for the five years ended 1938-39 are shown in the following table :—

EXPORTS OF FROZEN MUTTON AND LAMB : AUSTRALIA.

Year.	Exports of Frozen Mutton.		Exports of Frozen Lamb.		Exports of Frozen Mutton and Lamb.	
	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.
	'000 lb.	£'000.	'000 lb.	£'000.	'000 lb.	£'000.
Average, 1934-35 to 1938-39	40,584	656	153,606	4,208	194,190	4,864
1949-50 .. .. .	69,744	1,695	123,348	5,758	193,092	7,453
1950-51 .. .. .	8,424	290	45,684	2,394	54,108	2,684
1951-52 .. .. .	5,907	297	25,246	1,621	31,153	1,918
1952-53 .. .. .	80,774	2,790	86,070	5,971	166,844	8,761
1953-54 .. .. .	55,590	1,964	44,102	3,298	99,692	5,262

As with beef, the principal customer in this trade is normally the United Kingdom. In 1953-54 exports of mutton and lamb to this country represented 71 per cent. and 81 per cent., respectively of the total quantities exported.

## § 5. Wool.

1. **General.**—Australia is the leading wool-growing country in the world. With less than one-sixth of the world's sheep Australia produces more than one-quarter of the world's wool, and of the total fine-quality merino wool Australia produces about one-half. The bulk of the production is exported, mainly as greasy wool, although substantial amounts of scoured and carbonized wool and wool on sheep skins and small quantities of semi-manufactured wool are also shipped. The remainder which is used by Australian manufacturers amounted to only 7 per cent. of total production (greasy basis) in 1953-54.

The important position held by Australia among the principal sheep and wool producing countries of the world is shown in the table on p. 917.

2. **Greasy and Scoured Wool.**—Whether the weight of the wool clip should be stated as “in the grease” or as “clean” is a matter which seriously affects comparisons between the clips of different seasons and of different countries. The quantity of grease and other extraneous matter in a fleece differs, not only between countries, but between districts in the same country. It fluctuates with the vagaries of the season, and with the breed and the condition of the sheep.

From 1946-47 to 1952-53 the Australian Wool Realization Commission, and from 1953-54, the Wool Statistical Service, has assessed annually the clean yield of the Australian wool clip. A steady rise was recorded from 53.4 per cent. clean yield from greasy in 1946-47 to 57.5 per cent. in 1951-52 and 1952-53, but this was followed by a fall to 55.7 per cent. in 1953-54. A standard factor of 93 per cent. is taken as the clean yield of Australian scoured wools.

Wool scoured, washed and carbonized in Australia before export, however, has a clean yield somewhat lower than for the whole clip, because the grade of greasy wool treated locally for export as scoured, washed or carbonized includes a large proportion of dirty and low-grade wool. In recent years it has approximated 50 per cent. The quantity of this wool exported during the five years ended 1953-54 was approximately 18 per cent. of the total raw wool exports (excluding wool exported on skins) in terms of greasy.

3. **Production.**—The bulk of the Australian wool production is shorn from live sheep; in recent years, approximately 4 per cent. has been obtained by fellmongering and about 5 per cent. has been on skins exported. Statistics of wool production are compiled from data received from growers, fellmongers, etc. The following table shows the production for the five years 1949-50 to 1953-54 compared with average production for the five years ended 1938-39. Particulars of the gross value of wool produced are based, for shorn wool, upon the average price realized for greasy wool sold at auction, and for skin wools on prices recorded by fellmongers and skin exporters.

(a) For year ended previous December.

(b) Estimated.

Preliminary estimate of production for 1954-55 was 1,283 million lb., valued at £366,200,000.

4. Care Needed in Comparing Clips.—In comparing successive clips allowance must be made for the circumstance that, owing to climatic or other conditions, the time of shearing may be so far delayed in some areas that one clip may include almost thirteen months' growth of wool, while the succeeding one may include little more than eleven months' growth.

5. Average Weights of Fleeces Shorn.—The average weights of sheep and lamb fleeces shorn in each of the States of Australia and the Australian Capital Territory are shown in the following table for each season 1949-50 to 1953-54 compared with the average for the five seasons 1934-35 to 1938-39.

## AVERAGE WEIGHT OF SHEEP AND LAMB FLEECES SHORN.

(a) Mean of average weights in each season.

(b) Excludes Northern Territory.

6. Wool classified according to Quality.—Under control exercised during the 1939-45 War, records were kept of the classification of each lot of wool appraised according to quality, degree of fault and combing or carding type for each of the years 1940-41 to 1945-46. From the resumption of auctions in 1946-47 to 23rd October, 1953 this analysis was continued by the Australian Wool Realization Commission and from 23rd October, 1953 by the Wool Statistical Service, but the basis of the data has been changed to the catalogues of auction sales, and not upon appraisal as previously. The following table provides a detailed analysis of wool appraised or sold at auction according to quality, for the years 1950-51 to 1953-54 compared with 1940-41, according to the records compiled by the Australian Wool Realization Commission. "Quality" ("64's, 60's, 58's," etc.) is a measure of the fineness and texture of wool for spinning purposes. Broadly, it means the maximum number of hanks of yarn, each of 560 yards length, which can be spun from 1 lb. of combed wool. For instance, wool of 64's quality is of a fineness and texture which will produce 64 hanks, each of 560 yards, from 1 lb. of tops (combed wool) of that particular wool.

### CLASSIFICATION OF GREASY WOOL APPRAISED OR SOLD AT AUCTION : AUSTRALIA.

(c) All greasy wool sold at auction except "wool re-offered account  
buyer".

7. World Sheep Population and Wool Production.—The following table shows particulars of the sheep population and total production of wool, in terms of greasy, in the principal wool-producing countries of the world, together with estimates of world production of merino, crossbred and carpet type wool for each season 1952-53 and 1953-54 compared with pre-war years. The data for countries other than Australia have been taken from reports published by the Commonwealth Economic Committee compiled from questionnaires prepared by the Committee and the International Wool Textile Organization.

In 1953-54 Australia produced 28 per cent. of the world total of all types of wool, the share of the British Commonwealth representing approximately 50 per cent. The principal wool producers, other than Australia, are New Zealand with 10 per cent. of the world total, Argentina, 9 per cent., United States of America, 7 per cent., and Union of South Africa, 6 per cent. Production in the U.S.S.R., China and Eastern European countries together amounted to 14 per cent. World production of wool (all types) in 1953-54 was about 611 million lb. (12 per cent.) greater than the average for 1934-38.

Australia's wool clip is predominantly merino; New Zealand and Argentina produce mainly crossbred wool, while the clip of the U.S.S.R. is largely of the carpet type. While world production of merino wool in 1953-54 was at about the same level as pre-war, the production of crossbred types has risen by about 27 per cent. Carpet wool production has risen by about 20 per cent.

8. War-time Contracts.—(i) *Wool.* Details of the contract entered into between the Governments of Australia and the United Kingdom for the purchase of the surplus wool clip of Australia for the duration of the war and one full clip thereafter (1939-40 to 1945-46) will be found in Official Year Book No. 36, page 1106.

(ii) *Sheepskins.* Details of the war-time contract arrangements for the period April, 1940 to June, 1946 between the Australian and United Kingdom Governments for the purchase of Australia's exportable surplus of woolled sheepskins will be found in Official Year Book No. 37, page 875.

9. Australian Wool Realization Commission.—The Australian Wool Realization Commission was the Australian subsidiary of a Joint Organization (commonly referred to as "J.O.") set up by the Governments of the United Kingdom, the Commonwealth of Australia, the Dominion of New Zealand and the Union of South Africa, under the title of "U.K.—Dominion Wool Disposals Limited" to dispose of accumulated war-time stocks of Dominion wool held by the United Kingdom Government at the end of the war. Details of the functions and operations of these organizations appear in earlier issues of the Year Book, particularly No. 38 (pages 919-923).

By the end of 1951 the Joint Organization had disposed of all stocks of wool held and shortly after, it went into voluntary liquidation. Liquidation proceedings were completed on 15th February, 1954.

Australia's share of the profits arising from the operations of J.O. amounted to approximately £93 million (including interest). The task of distributing the profits to growers was entrusted to the Australian Wool Realization Commission and up to June, 1955, all but £2.9 million of the total value of the profits, plus a small amount representing mainly unclaimed moneys, had been distributed to growers. The £2.9 million still to be distributed represents the profits on wool which was submitted by growers for war-time appraisalment through dealers, and is being held pending the settlement of litigation initiated by dealers claiming a share of the profits.

10. Australian Wool Bureau.—(i) *General.* The Australian Wool Bureau was constituted under the Wool Use Promotion Act 1953. It replaced the Australian Wool Board which was originally set up in 1936 to take measures for improving the production and increasing the use of wool.

The Bureau consists of seven members, one the Commonwealth Wool Adviser or the Deputy Commonwealth Wool Adviser appointed by the Minister for Commerce and Agriculture, and six members (three nominated by the Australian Woolgrowers' Council and three by the Australian Wool and Meat Producers' Federation) appointed by the Governor-General for a period of three years.

Particulars of the wool promotional activities of the Bureau are given in paragraph 12, Wool Publicity and Research.

(ii) *Wool Statistical Service.* The Wool Statistical Service, formerly conducted by the Australian Wool Realization Commission, was taken over by the Australian Wool Bureau on 23rd October, 1953. The Statistical Service is responsible for the preparation and publication of statistical material relating to the Australian wool market and the composition of the Australian clip and other special statistical work which may be assigned to it.

It is financed out of the income received by the Australian Wool Bureau from wool sources under its control and from an annual contribution by the Commonwealth Government.

A Statistical Service Committee, consisting of the representatives of the Australian Wool Bureau, the Commonwealth Government, wool buyers, wool growers and wool selling brokers' organizations, acts in an advisory capacity to the Australian Wool Bureau.

(iii) *Wool Stores.* Some three hundred wool stores, formerly the property of the Joint Organization and purchased from it by the Commonwealth Government, were transferred to the ownership of the Australian Wool Bureau by virtue of the Wool Stores Act 1953. The Bureau formally assumed control of these stores on 11th January, 1954, and at the same time received a substantial sum of accumulated rentals and receipts from sales of the stores which had come to hand whilst the stores were held by the Commonwealth Government. Under the Act the Bureau may only dispose of these stores with the permission of the Minister for Commerce and Agriculture and, in the event of war, may be required to return the stores without compensation to the Commonwealth Government. The stores are being let by the Wool Bureau as a commercial proposition. The rental income is used to meet the expenses of maintaining, managing and insuring the stores, to defray the cost of operating the Wool Statistical Service and to help finance the wool promotion activities of the Bureau.

(iv) *The Contributory Charge.*—Associated legislation, namely, the Wool (Contributory Charge) Act 1945 (subsequently replaced by the Wool (Contributory Charge) Act (No. 1) 1950–1951 and the Wool (Contributory Charge) Act (No. 2) 1950–1951) and the Wool (Contributory Charge) Assessment Act 1945–1951 provided for a contributory charge to be imposed on all wool produced in Australia and sold, purchased or processed by a manufacturer or exported on or after a date fixed by proclamation. The charge in 1951–52 was limited to a rate (one-eighth of one per cent.) which, it was calculated, would equal the amount which would otherwise have been raised by the Wool Tax for payment into the Wool Use Promotion Fund. The passage of amending Wool Tax legislation in June, 1952 made it possible to cease collection of the contributory charge at 30th June, 1952, and the legislation under which it was imposed was repealed. Further particulars of the Wool Contributory Charge and the amounts collected appear in Year Book No. 40, pages 675 and 819.

(v) *The Wool Levy.* Whilst the contributory charge legislation, mentioned above, was in force, the Wool Levy, which was imposed by the Wool Tax Act 1936 and the Wool Tax Assessment Act 1936, was not collected. When the Wool Levy was first imposed in 1936, the rate of tax was 6d. per bale, 3d. per fadge or 1d. per bag of wool delivered into the store of a wool dealer or wool selling broker or exported. The proceeds were paid into the Wool Publicity and Research Fund administered by the Australian Wool Board.

When collection of the contributory charge ceased, the Wool Levy again became operative (i.e. from 1st July, 1952) but at a higher rate. For the years 1952–53, 1953–54 and 1954–55 the rate imposed was 4s. per bale, 2s. per fadge and 8d. per bag of shorn

wool. The new rate was provided for in the Wool Tax Act (No. 1) 1952 and the Wool Tax Act (No. 2) 1952, which also provided that in subsequent years the rate could be prescribed, by regulation, between limits of 2s. per bale and 5s. per bale.

11. *Marketing of Wool.*—(i) *Minimum Reserve Price Plan.* Details of the minimum reserve price plan which was completed by the Governments of Australia, New Zealand, South Africa and the United Kingdom in May, 1951, and which was subsequently rejected at a referendum of wool-growers in Australia will be found in Official Year Book No. 39, page 925.

(ii) *Subsidy on Woollen Goods, 1950-51.* Details of the subsidy paid on woollen goods manufactured for consumption in Australia from wool sold during the 1950-51 season will be found in Official Year Book No. 41, page 727.

12. *Wool Publicity and Research.*—(i) *Wool Use Promotion.* The Wool Use Promotion Act of 1953 defines the powers and functions of the Australian Wool Bureau as including measures for promoting by publicity or other means the use of wool in Australia or in other countries.

The Bureau is also authorized to take measures for improving the production of wool in Australia and encouraging research directed to the promotion of the use of wool.

By virtue of its powers the Bureau is represented on the International Wool Secretariat, which was established in 1937 with head-quarters in London, to promote the use of wool through a broad programme of publicity, education and research.

The activities of the Australian Wool Bureau are financed from the Wool Use Promotion Fund into which are paid the proceeds of the Wool Levy, and contributions from the rental income of the wool stores as mentioned in (iii) above.

(ii) *Research.* Until 1945 the Australian Wool Board was responsible for the supervision of economic and scientific research but in that year the Commonwealth Scientific and Industrial Research Organization was made responsible for scientific, technical and biological research into sheep raising and wool production, as well as wool textile research. Economic wool research is the responsibility of the Bureau of Agricultural Economics, a division of the Commonwealth Department of Primary Industry. The economic research work falls into two main categories, namely, farm production economics dealing with economics of wool growing and sheep-station management generally, and commodity research dealing with the economic aspects of the wool industry in Australia and of wool as a commodity in world trade.

Finance for research is provided from a Wool Research Trust Account into which, since 1945, has been paid annually from the Commonwealth Consolidated Revenue a sum equal to the amount which is raised by the wool levy or its equivalent. In 1952-53 the Commonwealth's contribution to the Wool Research Trust Account was set at one-half of the amount raised under the wool levy at its new rate. In addition, expenditure on items of a capital nature for the research programme may be met from the Wool Industry Fund which was constituted as a Trust Account from various moneys accumulated by the Central Wool Committee in war-time.

Ample opportunity is afforded for co-operation in these research activities, with State Departments of Agriculture and other organizations.

13. *Consumption of Wool.*—(i) *Consumption of Raw Wool.* Statistics of raw wool consumption published in recent years for the purposes of broad international comparisons are based on the quantities of scoured or carbonized wool used on the woollen and worsted systems (mill consumption) plus quantities used in such processes as felting. Consumption estimates compiled on this basis have obvious defects as they disregard oversea trade in semi-processed wool (e.g., tops and yarn) as well as woollen goods. They are, however, comparatively simple to calculate and are useful in providing an approximate indication of trends in wool consumption. Estimates of raw wool consumption on the woollen and worsted systems and by felt manufacturers in Australia are shown below for the years 1938-39 and 1949-50 to 1953-54

## ESTIMATED CONSUMPTION OF RAW WOOL IN AUSTRALIA.

('000 lb.)

Year.	Greasy Basis.			Clean Basis.		
	Used on Woollen and Worsted Systems.	Used for Felt Manufacture (including Hats).	Total.	Used on Woollen and Worsted Systems.	Used for Felt Manufacture (including Hats).	Total.
1938-39 ..	77,947	2,248	80,195	39,599	1,068	40,667
1949-50 ..	97,281	9,356	106,637	54,046	4,444	58,490
1950-51 ..	90,801	8,700	99,501	51,397	4,133	55,530
1951-52 ..	72,868	5,546	78,414	42,731	2,634	45,365
1952-53 ..	69,868	5,622	75,490	41,745	2,670	44,415
1953-54 ..	88,106	8,376	96,482	52,975	3,979	56,954

(ii) *Consumption of Locally Processed Wool.* As considerable quantities of tops, noils and yarn are exported from Australia, the series on raw wool consumption shown above is over-stated to this extent. The series entitled "Consumption of Locally Processed Wool" provides a more reliable indication of wool consumption in Australia, as allowance has been made for exports of wool in semi-processed form. This series is shown below for the years 1938-39 and 1949-50 to 1953-54. Briefly the series measures consumption of wool in terms of yarn used in Australian mills and other factories to produce woollen cloth and other woollen goods, yarn used for hand knitting purposes (since 1949-50) and scoured wool used for felt manufacture. No allowance has been made for overseas trade in woollen piece goods, clothing, etc., because of the obvious difficulties of accurately estimating the wool content of these products.

## ESTIMATED CONSUMPTION OF LOCALLY PROCESSED WOOL IN AUSTRALIA.

(a) Includes hand knitting yarns used from 1949-50. (b) Includes wool content of yarns containing a mixture of wool and other fibres. (c) Includes woollen yarn, excludes hand knitting yarns.

14. *Exports of Wool.*—(i) *Greasy—Quantities.* Prior to the 1939-45 War, Australian greasy wool exported overseas was sent principally to the United Kingdom and other European countries. In 1938-39, 41.9 per cent. of total shipments were sent to the United Kingdom, other important consignees being France, 20.4 per cent., Belgium, 13.1 per cent., and Japan, 9.1 per cent. During the war, exports to the United Kingdom declined and shipments to the European continent and to Japan virtually ceased, while the quantity shipped to the United States of America showed great expansion. Of the total quantity of greasy wool exported overseas during the five years ended 1953-54, 11 per cent. was sent to the United States of America and 32 per cent. to the United Kingdom. Of the total shipments in 1953-54, 29 per cent. went to the United Kingdom, 16 per cent. to France, 10 per cent. to Japan and 12 per cent. to Italy. The following table shows the quantities of greasy wool exported, and the principal countries of recorded destination.

(v) *Total Value of Exports.* The value of wool of Australian origin exported from Australia during the five years ended 1953-54 averaged 54 per cent. of the total value of exports of merchandise of Australian origin, and during 1953-54 the proportion was 51 per cent. The value during the period under review, together with the principal countries to which wool was exported, is shown in the following table.

**VALUE OF WOOL EXPORTS (AUSTRALIAN PRODUCE).**  
(£'000.)

<b>Total .. .. .</b>	<b>48,767</b>	<b>313,136</b>	<b>633,298</b>	<b>323,428</b>	<b>402,905</b>	<b>410,420</b>

15. *Local Sales of Wool.*—In 1946-47 following the cessation of the war-time acquisition scheme which ended with the 1945-46 season, auction sales were resumed in Australia. Sales are conducted at Sydney, Goulburn, Newcastle, Albury, Melbourne, Geelong, Ballarat, Brisbane, Adelaide, Perth, Hobart and Launceston, and are attended by buyers representing manufacturers and merchants in the United Kingdom, France, the United States of America, Japan, U.S.S.R. and many other countries. More than 95 per cent. of the Australian wool clip is now disposed of at auction in Australia.

16. *Stocks of Wool.*—Stocks of raw wool held in Australia at 30th June, 1954 amounted to 63.3 million lb. (as in the grease) of which 49.7 million lb. (32.7 million lb. as greasy and 17.0 million lb. as scoured and carbonized) were held by woollen mills, wool scourers and fellmongers and 13.6 million lb. (unsold wool assumed to be all greasy) were held by brokers. These stocks exclude wool on skins, since this wool is not recorded as production until fellmongered in Australia or exported on skins.

Stocks at 30th June, 1954 were slightly lower than at 30th June, 1953 but both years were higher than at 30th June, 1952 when at 56.1 million lb., they were the lowest recorded since the outbreak of the war. During the war-time and post-war years up to 1951 raw wool stocks were exceptionally high because of the large quantities held in Australia by the Australian Wool Realization Commission on account of Joint Organization. They reached a maximum of 1,749.9 million lb. at 30th June, 1945, but declined in each successive year to 30th June, 1952 by which time all Joint Organization stocks had been sold.

17. Price.—Wool is the chief factor in the pastoral wealth of Australia and the nation's prosperity is largely dependent upon its satisfactory sale. During the five years ended 1953-54 the price of greasy wool sold in the selling centres of Australia averaged 88.7d. per lb. compared with the average United Kingdom contract price of 14.59d. per lb. during the years 1939-40 to 1945-46 and the average selling price of 11.5d. per lb. during the ten years ended 1938-39. The average for the nine years ended 1928-29 was 18d. per lb., and for the seven years ended 1913-14, 9d. per lb.

As indicated in para. 8 above, the price of wool during the 1939-45 War was determined by the British Government wool contract. With the return to auction sales since 1945-46, the average price of greasy wool sold rose rapidly from the contract price of 15.45d. per lb. applicable to 1945-46 to the unprecedented level of 144.19d. per lb. in 1950-51. This was followed by a sharp fall in 1951-52 to 72.42d. per lb. or slightly more than half the price in 1950-51. There was, however, a partial recovery to 81.80d. per lb. in 1952-53. In 1953-54, the price, at 81.50d. per lb. remained at almost the same level.

The following table shows the average auction room price of greasy wool in Australia for 1938-39 and 1949-50 to 1953-54 as compiled by the National Council of Wool Selling Brokers. This price represents the average price realized for all greasy wool of whatever type or quality marketed during the year indicated.

WOOL : AVERAGE MARKET PRICE PER LB.(a)  
(Pence.)

Description.	1938-39.	1949-50.	1950-51.	1951-52.	1952-53.	1953-54.
Greasy .. .. .	10.39	63.35	144.19	72.42	81.80	81.50

(a) Average price realized for all greasy wool of whatever type or quality marketed in Australia during the year. (Source—National Council of Wool Selling Brokers of Australia).

18. Value.—Fluctuation in Australian wool prices has a marked effect on the nation's rural income. In 1945-46 the gross value of wool production was £58,597,000 representing 17.4 per cent. of the gross value of all Rural Industries whilst in 1950-51, when prices reached a peak wool was valued at £651,902,000 or 55.6 per cent. of the total for all Rural Industries. The value of wool production fell in subsequent years and in 1953-54 was £409,768,000.

Details of the value of wool production for the years 1949-50 to 1953-54 compared with the average for the three pre-war years are shown below.

19. **United Kingdom Importation of Wool.**—The important position which Australia occupies in the supply of wool to the United Kingdom is indicated in the following statement of the quantities of wool imported into that country from the principal wool-producing countries during 1938 and each year 1950 to 1954.

**WOOL(a) : IMPORTS INTO UNITED KINGDOM.**

(a) Greasy and Scoured.

(b) Not available.

Australian wool represented 47.4 per cent. of the total quantity imported into the United Kingdom during the five years ended 1954. New Zealand supplied 26.0 per cent. and South Africa 8.4 per cent., while the total quantity received from British countries constituted 88.2 per cent. of all United Kingdom imports.

20. **Principal Importing Countries and Sources of Supply.**—The following table furnishes in respect of the principal importing countries details of their production and imports of wool for 1954 together with the chief sources of supply. The quantities imported refer to the actual weight of wool without distinguishing between greasy and scoured except in the case of the United States of America where estimated clean content of raw wool is quoted.

**WOOL : PRINCIPAL IMPORTING COUNTRIES AND SOURCES OF SUPPLY, 1954.**  
(Million lb.)

Importing Country.	Pro- duction of Importing Country. (a)	Quantity Imported from(b)—					Total Imports.
		Australia.	Union of South Africa.	Argen- tina.	New Zealand.	Other Countries.	
United Kingdom	105	293.5	61.8	21.8	187.5	142.5	687.1
Belgium .. ..	(c)	85.3	13.6	7.4	15.4	20.8	142.5
France .. ..	53	173.9	43.8	22.1	74.1	28.7	342.6
Germany (Federal Republic) .. ..	(c)	61.2	36.0	18.3	24.4	44.0	183.9
Italy .. ..	38	100.5	14.0	1.4	24.7	38.7	169.3
Japan .. ..	(c)	96.9	5.9	26.7	2.3	15.3	147.1
United States of America .. ..	302	(d) 42.4	(d) 14.8	(d) 59.4	(d) 25.4	(d) 64.1	(d) 206.1

(a) As in the grease, 1953-54. (b) Actual weight of greasy and scoured wool. (c) Not available. (d) Imports are in terms of estimated clean content of greasy and scoured wool. Actual weight of total United States of America imports was 304.5 million lb.

As a considerable transit trade exists between continental countries it must not be assumed that the whole of the imports recorded by these countries are retained for their own consumption. The countries chiefly concerned with the transit trade are the United Kingdom (12 per cent. of total imports re-exported in 1954), Belgium and France.

## § 6. Trade in Hides and Skins.

1. *Extent of Trade.*—In addition to the hides and skins treated locally, considerable quantities are exported: the value of cattle and horse hides, and sheep and other skins, sent overseas during the five years ended 1953-1954 amounted to £99,063,000 or an average of £19,814,000 per annum.

2. *Sheepskins with Wool.*—The exports of sheepskins with wool, aggregating £77,162,000 during these five years, constitute the most important item in the values referred to in the preceding paragraph. During 1938-39 France was the largest purchaser of sheepskins with wool, taking 74 per cent. of the total consignments, while the United Kingdom ranked next with 15 per cent., followed by Germany with 7 per cent. In 1953-54, France obtained 74 per cent. of total exports and the United Kingdom 13 per cent. The exports of sheepskins with wool during each of the years 1949-50 to 1953-54 compared with the average for the years 1934-35 to 1938-39 were as follows:—

## EXPORTS OF SHEEPSKINS WITH WOOL : AUSTRALIA.

Particulars.	Average, 1934-35 to 1938-39.	1949-50.	1950-51.	1951-52.	1952-53.	1953-54.
Number .. '000	12,009	14,919	10,201	10,611	15,681	13,647
Value .. £'000	2,780	10,877	20,773	13,159	16,584	15,769

3. *Sheepskins without Wool.*—Up to 1943-44 sheepskins without wool were exported chiefly to the United States of America. During the year mentioned that country accounted for 97 per cent. of the total shipments while the remaining 3 per cent. were exported to the United Kingdom, Canada and the U.S.S.R. There has, however, since been a decline in shipments to the United States of America and an increase in the quantities shipped to the United Kingdom and other countries; in 1953-54 the United States of America received 57 per cent. of total shipments; the United Kingdom 26 per cent. and other countries 17 per cent. Quantities and values for the five years 1949-50 to 1953-54 compared with the average for the years 1934-35 to 1938-39 are shown in the table hereunder:—

## EXPORTS OF SHEEPSKINS WITHOUT WOOL : AUSTRALIA.

Particulars.	Average, 1934-35 to 1938-39.	1949-50.	1950-51.	1951-52.	1952-53.	1953-54.
Number .. '000	808	3,441	3,000	1,454	3,242	2,482
Value .. £'000	70	826	1,272	518	749	671

4. *Hides.*—(i) *Exports.* The export trade in cattle hides and calf skins during 1953-54 was distributed as follows:—Italy, £294,000; United Kingdom, £259,000; Netherlands, £182,000; Sweden, £146,000; Japan, £128,000; Turkey, £105,000 and other countries, £267,000.

The exports during each of the five years 1949-50 to 1953-54 compared with the average for the years 1934-35 to 1938-39 are shown in the table below:—

## EXPORTS OF CATTLE HIDES AND CALFSKINS : AUSTRALIA.

Particulars.	Average, 1934-35 to 1938-39.	1949-50.	1950-51.	1951-52.	1952-53.	1953-54.
Number .. ..	1,677,402	287,850	210,871	178,714	281,625	(a) 18,760,742
Value .. £'000	957	1,358	1,345	1,109	1,161	1,381

(a) lb.

Horse hides exported during the five years ended 1953-54 weighed 14,774,000 lb. and were valued at £1,153,000.

(ii) *Imports.* The imports of cattle hides and calfskins are fairly large, the chief sources of supply being New Zealand and the Pacific Islands. The quantities and values of cattle hides, including calfskins, imported into Australia during the years 1949-50 to 1953-54 compared with the average for the years 1934-35 to 1938-39 were as follows :—

#### IMPORTS OF CATTLE HIDES AND CALFSKINS : AUSTRALIA.

Particulars.	Average, 1934-35 to 1938-39.	1949-50.	1950-51.	1951-52.	1952-53	1953-54.
Quantity .. cwt.	70,781	13,490	12,126	28,590	11,183	16,960
Value .. £ '000	279	76	112	402	64	174

5. *Furred Skins.*—The exports of furred skins were valued as follows :—

#### EXPORTS OF FURRED SKINS : AUSTRALIA.

(£'000.)

De-scription.	Average, 1934-35 to 1938-39.	1949-50.	1950-51.	1951-52.	1952-53.	1953-54.

United States of America ..	676	183	76	935
Belgium and Luxemburg ..	53	..	(a)	53
Other Countries ..	55	8	24	87
Total ..	849	197	110	1,156

(a) Less than £500.

6. *Marketing of Hides and Skins.*—(i) *Sheepskins with Wool.* Details of the wartime agreement between the United Kingdom and Commonwealth Governments for the purchase by acquisition of the "exportable surplus" of woolled sheepskins in Australia were given in Official Year Book No. 37, page 886. The contract expired on 30th June, 1946, and sheepskins have since been marketed mostly at open auction.

(ii) *Sheep and Lamb Pelts.* Details of the marketing control of sheep and lamb pelts were given in Official Year Book No. 38, page 930. Pelts have reverted to open marketing without export restrictions.

(iii) *Hides and Leather.* A hide acquisition and marketing scheme operated from November, 1939 to August, 1954. Until 31st December, 1948, the scheme operated under the National Security Regulations. From 1st January, 1949, it continued under a Commonwealth Act and supporting State Acts. In June, 1952 the Tasmanian legislation lapsed and the scheme did not operate in Tasmania after that date. By August, 1954, the wide gap which had existed between fixed local prices and export prices for hides and leather had almost disappeared and, having in view certain legal difficulties which were hampering the operation of the scheme, the Commonwealth Government decided on its immediate termination.

The Australian Hide and Leather Industries Board, which administered the scheme acquired all cattle hides and yearling and calf skins produced in Australia at set prices and allocated them to tanners at these prices. The prices were 15 per cent. to 20 per cent. above August, 1939 levels until May, 1952 when they were increased by 50 per cent. Surplus hides were disposed of by tender or open auction. The Board retained the amounts realized in excess of appraised values, and supplemented the price to the producers in cases where the realized amount was less than the appraisement values.

Returns from sales of surplus hides and deferred payments levied on leather exported based on the difference between world and Australian prices for the hides involved were paid into a fund by the Board. From this fund, premiums were paid to producers as a proportion of appraised values. These premiums compensated hide producers to some extent for the margin between local and oversea prices. Further details of the war-time operations of the scheme will be found in Official Year Book No. 37, page 887 and Official Year Book No. 38, pages 930-1.

Pre-war, about 40 to 45 per cent. of Australian production was exported, but with the development of the local tanning industry, the proportion now is approximately 12½ per cent.

(iv) *Rabbit Skins.* A marketing control scheme for rabbit skins was introduced under the National Security (Rabbit Skins) Regulations on 10th June, 1940 and terminated in April, 1949. Details of the scheme will be found in Official Year Book No. 38, page 931.

### § 7. Tallow and Lard.

1. *Production.*—Australia's production of tallow and lard is in excess of local requirements and considerable quantities are normally available for export. Before 1952-53, the collection of details of tallow and lard was somewhat defective. In that year, a collection was instituted covering both slaughtering establishments and factories on a fiscal year basis. Details of the production of edible and inedible tallow and lard in each State are shown in the table below for the years 1952-53 and 1953-54.

#### TALLOW AND LARD : PRODUCTION.

(cwt.)

State.	1952-53.			1953-54.		
	Tallow.		Lard.	Tallow.		Lard.
	Edible.	Inedible.		Edible.	Inedible.	
New South Wales .. ..	78,923	514,581	8,924	73,300	500,670	4,802
Victoria .. ..	171,326	493,397	7,480	173,527	503,720	6,730
Queensland .. ..	411,766	199,622	15,339	353,520	211,861	19,866
South Australia .. ..	62,480	106,826	3,242	52,782	101,177	4,939
Western Australia .. ..	38,335	55,561	6,264	36,596	67,539	5,704
Tasmania .. ..	1,639	43,604	1,993	1,337	40,660	905
Australia .. ..	761,469	1,413,591	43,242	691,062	1,425,627	42,946

2. *Consumption of Tallow in Factories.*—Details of consumption are collected from the principal factories using tallow (soap and candle, chemical and woolscouring works).

Total consumption of tallow in factories as shown in the table below for the years 1938-39 and 1949-50 to 1953-54 is deficient, however, to the extent that no allowance is made for the small unrecorded amounts used in other types of establishments.

#### TALLOW : CONSUMPTION IN FACTORIES, AUSTRALIA.

(cwt.)

Year.	Quantity Used.		Year.	Quantity Used.	
1938-39.. ..	..	539,095	1951-52 .. ..	..	1,205,307
1949-50.. ..	..	1,063,194	1952-53 .. ..	..	1,068,181
1950-51.. ..	..	1,217,027	1953-54 .. ..	..	1,172,710

3. Exports of Tallow and Lard.—Particulars of exports of edible (including lard) and inedible tallow are shown in the following table for the five years 1949-50 to 1953-54 in comparison with the average for the five years ended 1938-39.

TALLOW AND LARD : EXPORTS, AUSTRALIA.  
(cwt.)

Particulars.	Average, 1934-35 to 1938-39.	1949-50.	1950-51.	1951-52.	1952-53.	1953-54.

Inedible .. ..	606,934	348,214	260,569	126,618	430,227	823,816
Total .. ..	(a)	423,711	292,526	153,964	541,247	946,798

(a) Not available.

4. Marketing of Tallow.—Until 30th September, 1952 the bulk of Australia's exportable surplus tallow, other than collar white mutton tallow was sold to the United Kingdom Ministry of Food under a series of annual contracts. The 1951-52 contract was not renewed and on 9th November, 1952 tallow export control was removed following termination of the industry's equalization pool arrangement and price de-control in most states.

### § 8. Net Exports Of Principal Pastoral Products.

The quantities and values by which the exports of the principal pastoral products of Australia exceeded the imports for the years 1938-39, 1952-53 and 1953-54 were as follows:—

NET EXPORTS OF PASTORAL PRODUCTS : AUSTRALIA.

(a) Quantity not available. (b) Includes chilled beef. (c) Number. (d) Inedible Tallow only.

NOTE.—Minus sign (—) signifies net imports.

## CHAPTER XXIII.

### FARMYARD, DAIRY AND BEE PRODUCTS.

NOTE.—Values of Australian oversea trade shown throughout this chapter are expressed as £A. f.o.b. Port of Shipment, except where otherwise indicated.

#### § 1. Introductory.

1. **General.**—The introduction of cattle into Australia and the early history of the dairying industry are referred to in some detail in earlier issues of this publication. It may be noted here that an increased and improved milk supply has resulted from the crossing of imported stud cattle with the original stock and from the further judicious crossing of strains. In Australia dairy cattle thrive in the open throughout the year, local climatic conditions demanding no protection other than tree plantations for shelter and, in certain districts, rugging in the coldest weather. Indigenous and imported grasses furnish food during the greater part of the year, and winter fodder, when necessary, is given to the cattle in the fields. With the wider application of scientific methods in the treatment of animals and pasturages and in the processes of manufacture, coupled with herd testing and effective State supervision, the dairying industry has shown rapid expansion. It has been demonstrated that Australian production and marketing methods do not adversely affect the vitamin content of the butter and that the loss during cold storage even for as long as two years is insignificant.

2. **Mixed Farming.**—Dairying is not, as formerly, wholly confined to agriculturists, since many graziers also give it their attention. In non-coastal regions it is generally carried on in conjunction with agriculture and sheep-raising, sufficient fodder being grown to carry the cattle through the winter months. Local wants are thus met, and in many places remote from the metropolis well-equipped factories have been established. The extent to which dairy cattle were run in conjunction with pig raising and wheat growing in 1947-48 is shown in the relevant tables published in the section "Special Tabulations Relating to Rural Holdings, 1947-48" of *Primary Industries Bulletin* No. 42, 1947-48.

3. **Employment.**—The numbers of persons employed in rural industries are ascertained at the annual census of rural production. The particulars collected are in respect of those persons who were permanently engaged in the actual work of the farm and include owners, lessees, tenants or sharefarmers, relatives over 14 years of age not receiving wages, and other permanent employees, including managers and relatives, working for wages or salary. For some earlier years and uniformly from March, 1950, particulars have also been collected as to numbers of temporary employees at 31st March, of each year. Details of the numbers so engaged are given in Chapter XXI.—Agricultural Production, § 28.

For the years up to 1939-40, information was also collected which enabled the classification of each holding according to the chief purpose for which it was used, thus obtaining a distribution of employment in the three main classes, Agriculture, Pastoral and Dairying. However, because of difficulties in determining with precision

the chief purpose for which holdings are used, this information has since been omitted from the schedules. Consequently it has not been possible to continue to compile details of employment in the dairying industry from data obtained from this source.

Details of the number of persons who described themselves at the population census of 30th June, 1947 as being engaged in dairy farming were shown for each State in Official Year Book No. 38, page 1025. They comprised 96,508 males and 10,018 females, a total of 106,526 persons. At the Census of 30th June, 1954, 100,553 males and 11,004 females a total of 111,557 persons described themselves as being engaged in dairying.

4. **Growth of the Dairying Industry.**—The following table gives some indication of the growth of the dairying industry since 1918–19 :—

DAIRYING INDUSTRY : AUSTRALIA.

Year.	Number of Dairy Cows at 31st March.			Production of—			Milking Machines (No. of Stands). <sup>(a)</sup>
	In Milk.	Dry.	Total.	Milk for all Purposes.	Butter (Factory and Farm).	Cheese (Factory and Farm).

1953–54 ..	2,262,783	948,215	3,210,998	1,189.7	159,585	49,057	189,542

(a) "Number of Stands" indicates the number of cows that can be milked simultaneously—i.e., the cow capacity of installed milking machines. (b) Not available.

5. **Official Supervision of Dairying Industry.**—Dairy experts of the various State Agricultural Departments give instruction in approved methods of production, and inspect animals, buildings and marketable produce. A high standard of cleanliness, both of *personnel* and *matériel*, prevails.

The export trade is regulated by the terms of the Commonwealth Customs Act 1901–1953 and the Commonwealth Commerce (Trade Descriptions) Act 1905–1950, and regulations thereunder. It will be sufficient to state here that the true trade description, etc., must be marked on all produce intended for export, while official inspection ensures the maintenance of purity and quality. Upon request of the exporter the goods are given a certificate by the inspector.

6. **Australian Agricultural Council.**—General information on the constitution and functions of the Australian Agricultural Council is given on page 832 of Chapter XXI.—Agricultural Production. Details were given on pages 833–4 of Official Year Book No. 40, of the production aims for the five-year period ended 1957–58 (including specific targets for the principal dairy products) as set by the Council at its 36th Meeting in April, 1952.

## § 2. Value of Farmyard, Dairy and Bee Production and Indexes of Price and Quantum of Production.

1. **Gross Value of Farmyard, Dairy and Bee Production, 1936–37 to 1938–39 and 1949–50 to 1953–54.**—The following table shows the gross value of recorded farmyard and dairy production at the principal markets in Australia.

GROSS VALUE OF FARMYARD, DAIRY AND BEE PRODUCTION: AUSTRALIA.(a)  
(£'000.)

Particulars.	Average 1936-37 to 1938-39.	1949-50.	1950-51.	1951-52.	1952-53.	1953-54.
Whole Milk(b) used for—						
Butter .. ..	22,550	39,414	36,692	38,875	58,995	57,004
Cheese .. ..	1,505	5,451	5,398	6,700	9,377	10,077
Condensing, Concentrating, etc. .. ..	1,094	5,900	6,223	7,948	10,860	9,583
Human Consumption and other purposes ..	7,971	24,511	28,315	37,261	46,092	49,205
Subsidy Paid on Whole Milk for—						
Butter, Cheese, Condensing, Concentrating, etc. ..	..	8,062	13,629	15,041	15,265	15,468
Human Consumption ..	..	..	..	..	..	..
Total Whole Milk (in- cluding Subsidy) ..	33,120	83,338	90,257	105,825	140,589	141,337
Pigs Slaughtered .. ..	5,526	14,281	15,358	18,516	21,703	23,773
Dairy Cattle Slaughtered ..	1,591	3,492	4,872	5,966	6,509	8,437
Eggs .. ..	9,117	25,766	28,047	37,534	43,637	43,569
Poultry .. ..	2,386	7,726	9,408	10,985	11,231	11,391
Honey .. ..	154	787	871	800	1,113	1,473
Beeswax .. ..	10	50	71	62	84	120
Total .. ..	51,904	135,440	148,884	179,688	224,926	230,105

(a) Excludes Australian Capital Territory and Northern Territory, details for which are not available.  
(b) Excludes Commonwealth subsidy which is shown separately below.

2. Gross and Net Values, 1953-54.—The values of dairy, poultry and bee farming on gross, local and net bases are shown in the following table. Further information on values, including definitions of the terms used is given in Chapter XXIX.—Miscellaneous.

GROSS, LOCAL AND NET VALUE OF FARMYARD, DAIRY AND BEE PRODUCTION,  
1953-54.

(£'000.)

State.	Gross Production valued at Principal Markets.	Marketing Costs.	Gross Production valued at Farm.	Farm Costs.		Net Value of Pro- duction. (a)
				Fodder fed to Farm Stock.	Value of Other Materials used in process of Pro- duction.

## § 3. Dairy Cattle and Dairy Products.

1. Dairy Herds.—Lack of uniformity in the schedules used by the various States in the collection of livestock statistics make it impossible to measure with complete accuracy the growth of dairy herds prior to 1943. Statistics of dairy cows—which form the largest part of herds—are, however, available on a comparable basis for a series of years. These statistics show that in 1918-19 there were 1,902,036 dairy cows (in milk and dry), compared with 2,345,070 in 1928-29 and 3,209,519 in 1938-39. The numbers remained at this level until March, 1944, but declined in succeeding years and did not regain the level of 1944 until 31st March, 1954, when the number recorded was 3,210,998. In New South Wales, Victoria, South Australia and Tasmania the proportion of dairy to all cattle is high. In Queensland, the Northern Territory and Western Australia there is a great preponderance of other cattle, the main object in these areas being the production of beef. Since 1939 there have been substantial decreases in the number of dairy cows in New South Wales and Queensland. The numbers of dairy cows for 1950 to 1954 shown in the following table refer to those recorded by farmers as being in milk and dry as at 31st March. The figures shown for the years 1935 to 1939 cover the same categories, but the period differs in some States (see footnote (a)). To this extent the figures lack comparability.

## NUMBER OF CATTLE AND DAIRY COWS (IN MILK AND DRY) AT 31st MARCH.

State.		Average, 1935-39. (a)	1950.	1951.	1952.	1953.	1954.

	1954	2,262,783	948,215	820,638	685,478	112,906	4,830,020

A map showing the distribution of dairy cattle in Australia at 31st March, 1948, appears on page 906 of Official Year Book No. 39.

2. **Size of Dairy Herds.**—A series of special tabulations relating to rural holdings, undertaken for all States for the year 1949–50, covered, *inter alia*, a classification of holdings with dairy cattle according to size of herd. Details of these tabulations are published in *Primary Industries Bulletin* No. 44, 1949–50.

3. **Factory System.**—(i) *General.* Cream separation and butter-making are often carried on together under the co-operative system. The creation of large central butter factories has resulted in a considerable reduction in the cost of manufacture, since improved appliances such as refrigerators, etc., may be profitably worked at the larger establishments. The product is also of a more uniform quality, and whereas formerly, the average quantity of milk used per pound of hand-made butter was about 3 gallons, factory butter requires less than 2½ gallons.

(ii) *Number of Factories.* In 1953–54 the factories in Australia for the manufacture of butter, cheese and condensed milk numbered 380 and were distributed among the States as follows:—New South Wales, 78; Victoria, 135; Queensland, 91; South Australia, 40; Western Australia, 15; and Tasmania, 21. More details regarding numbers of factories, output, etc., are given in Chapter IX.—Manufacturing Industry.

4. **Butter and Cheese—Stabilization Schemes.**—(i) *Voluntary Plan.* During the period from January, 1926 to April, 1934, a voluntary scheme known as the “Paterson Plan” was in operation and had the effect of stabilizing the price of butter in Australia. Details of this scheme may be found on page 1028 of Official Year Book No. 38 and in earlier issues.

(ii) *Compulsory Plan.* On 1st May, 1934 the “Paterson Plan” was superseded by a compulsory price equalization plan, details of which were shown on page 1029 of Official Year Book No. 38 and earlier issues. This compulsory plan was invalidated by the decision in 1936 of the Privy Council which declared in the *James (Dried Fruits)* Case that the Commonwealth had no power under the Constitution to regulate trade between the States.

(iii) *Equalization Scheme.* Since the Privy Council decision, the butter price equalization scheme has continued to operate by voluntary action based on the agreements between the manufacturers and the Commonwealth Dairy Produce Equalization Committee Limited. The Committee, which comprises members of the State Dairy Products Boards and other persons representing the industry, enters into agreements with manufacturers to secure to them equal rates from sales of butter and cheese, and for this purpose may fix basic prices at which these products sold in Australia or abroad are to be taken into account. The effect is that local and export trade are distributed in equitable proportions among the manufacturers by means of quotas. The Committee fixes basic prices and equalizes returns to factories through an Equalization Fund. The States originally participating in the scheme were New South Wales, Victoria, Queensland and Tasmania in respect of both butter and cheese, and South Australia in respect of cheese. South Australia and Western Australia entered the scheme in respect of butter on 1st April, 1946 and Western Australia extended its participation to include cheese in January, 1947.

The home consumption prices of butter and cheese were fixed by the Commonwealth Prices Commissioner up to 19th September, 1948, from which date prices have been controlled by State Governments.

5. **Commonwealth Subsidies.**—(i) *Butter, Cheese and Processed Milk Products.* Under the provisions of the various Dairy Industry Assistance Acts, the first of which was passed in 1942, the Commonwealth Government has provided subsidies on milk supplied for the manufacture of butter, cheese and processed milk products. Subsidies were paid on a seasonal basis prior to 1st April, 1946, but from that date have been on a flat rate basis. Subsidies are distributed by the Commonwealth Dairy Produce Equalization Committee Limited through factories to milk producers by payments on butter, cheese and processed milk products manufactured. Subsidy on milk supplied for the manufacture of processed milk products was discontinued from 1st July, 1948 to 30th June, 1949 and again from 1st July, 1952.

The following table shows particulars, in respect of butter and cheese, of the rates realized on local, interstate and overseas sales and the average equalization and subsidy rates in operation for the years ended June, 1939 and 1951 to 1955.

**BUTTER AND CHEESE : RATES REALIZED ON SALES, AVERAGE EQUALIZATION RATES AND RATES OF COMMONWEALTH SUBSIDY UNDER DAIRY INDUSTRY ASSISTANCE ACTS.**

(Rates s. d. per cwt.)

(a) Rates are of an interim nature only. (b) Not yet available. (c) A lower rate was determined for cheese sold for processing for local consumption.

(Source : Commonwealth Dairy Produce Equalisation Committee Limited.)

Following representations by industry organizations, the Commonwealth Government established the Joint Dairy Industry Advisory Committee in November, 1946, comprising a chairman nominated by the Government, four representatives of Commonwealth Government Departments and four industry representatives from the several States. The Committee's functions, broadly, were to advise and assist in conducting cost and other surveys of dairy farm production and to act as an advisory body to the Government in these matters. From 1st April, 1947 to 30th June, 1952, the rates of overall return to milk producers determined by the Commonwealth Government for the purpose of subsidy payments were based on recommendations made by the Committee following surveys of production costs in the dairy industry.

Under the Five-year Stabilization Plan which came into operation on 1st July, 1952, the Commonwealth Government, with the approval of the States, determines each season the ex-factory prices of butter and cheese, guarantees to dairy farmers a return, based upon costs of efficient production, in respect of quantities of butter and cheese sold within the Commonwealth, plus an additional 20 per cent. (if produced), and hence determines the amount of subsidy it will make available to lift the return on that part of output covered by the guarantee to the guaranteed level.

Early in 1953, the Dairy Industry Investigation Committee, an independent body consisting of three members was appointed to advise the Commonwealth Government on the guaranteed return to producers during 1953-54. The Committee was re-established in March, 1954, to advise the Government on the guaranteed return for each year of the remaining three year period of the Stabilization Plan.

Amounts realized on exports of butter and cheese in excess of the f.o.b. equivalent of the guaranteed return have been credited to the Dairying Industry Stabilization Fund, which was established in July, 1948 for the purpose of stabilizing returns from exports. During 1951-52 the Stabilization Fund met the deficiency in respect of all exports which did not return sufficient to meet the basic return to the factory. Since 1st July, 1952, it has been available to the industry to be used, in whatever manner considered desirable by it, to make good any deficiency in respect of all exports other than the 20 per cent. provided for under the Commonwealth Government's Five-year Stabilization Plan. After allowing for outstanding debits the amount standing to the credit of the Dairying Industry Stabilization Fund at 30th June, 1955 totalled approximately £1,828,000.

(ii) *Whole Milk.* In addition to the subsidies referred to above, the Commonwealth Government subsidized the production of whole milk consumed directly from 1943-44 to 1948-49. Details of the amounts distributed during each year will be found in Official Year Book No. 38, page 1031.

6. **Total Dairy Production.**—The dairy production for each State in 1953-54 is shown below :—

(a) Includes 4,631,498 gallons of milk the produce of New South Wales, sent as cream to factories in Victoria and Queensland. (b) Includes 917,000 gallons of milk, the produce of Victoria, sent as cream to New South Wales. (c) Includes 618,000 gallons of milk the produce of Queensland, sent as cream to New South Wales. (d) Includes 333 tons of butter made from cream, the produce of Victoria and Queensland. (e) Includes 881 tons of butter made from cream, the produce of New South Wales. (f) Includes 115 tons of butter made from cream, the produce of New South Wales. (g) Includes 119 tons of cheese made in establishments not classified as factories.

7. Whole Milk.—(i) *Production and Utilization.* During the five years ended 1938–39 approximately 80 per cent. of Australia's milk supply was used for making butter, 4 per cent. for cheese manufacture, 2 per cent. for condensery products and 14 per cent. for fluid consumption and other purposes. There has since been a considerable decline in the proportion of milk used for butter-making, with corresponding increases in the quantities used for other purposes. In 1953–54, 62 per cent. of the total milk supply was used for butter, 9 per cent. for cheese, 6 per cent. for condensery products and 23 per cent. for other purposes.

Details of the production of whole milk for various purposes are shown in the following table for each year 1949–50 to 1953–54 in comparison with the average for the years 1934–35 to 1938–39 :—

#### PRODUCTION AND UTILIZATION OF WHOLE MILK : AUSTRALIA.

('000 Gallons.)

Year.	Total Production.	Quantity used for—			
		Butter (Factory and Farm).	Cheese (Factory and Farm).	Condensery Products.	Other purposes.
Average, 1934–35 to 1938–39	1,149,697	913,754	48,595	28,116	159,232
1949–50 .. ..	1,238,402	804,426	96,757	89,565	247,654
1950–51 .. ..	1,197,808	760,622	96,532	84,828	255,826
1951–52 .. ..	1,047,376	626,560	87,360	76,324	257,132
1952–53 .. ..	1,215,241	771,522	100,224	83,411	260,084
1953–54 .. ..	1,189,652	737,474	105,870	75,773	270,535

In the following table, particulars of production of whole milk in the several States are shown for the years 1949–50 to 1953–54, compared with the average for the five years ended 1938–39. Victoria is the principal milk-producing State and in 1953–54 the output from that State, 474.4 million gallons, represented 40 per cent. of total production. Output from New South Wales was 282.2 million gallons or 24 per cent. of the total and that of Queensland 249.7 million gallons (21 per cent.). Production in the remaining States accounted for 15 per cent. of the total Australian output.

(ii) *Production per Cow.* The quantity of milk produced by a dairy cow reaches as high as 1,000 gallons per year, varying greatly with breed, locality and season. For the whole of Australia for all dairy cows and for all seasons prior to 1916 production has averaged considerably less than 300 gallons per annum. In recent years not only has there

been an improvement in the quality of the cattle, but the application of scientific methods has been continually extended, and the 300-gallon average has been exceeded in each year since 1924. In 1952-53 the average yield of 401 gallons constituted a record. The annual average yields per cow shown in the following table are based on the approximate number of dairy cows which were in milk during any part of the year. The average shown is, therefore, less than that for cows which were yielding during the greater part of the year. It should be noted that there are many difficulties attending the collection of particulars of the total quantity of milk obtained during any year. In addition, there is the further difficulty of ascertaining with reasonable accuracy the average number of cows in milk during the same period. The average yield per cow shown hereunder may be accepted as sufficiently reliable to show the general trend :—

## AVERAGE MILK PRODUCTION PER DAIRY COW.

(Gallons.)

1953-54 .. ..	328	490	270	531	373	480	341	378

8. Butter Production.—There was a steady increase in the annual output of butter for many years prior to the 1939-45 War. The average annual production rose from 126,000 tons for the five years ended 1928-29 to 195,000 tons for the five years ended 1938-39.

Following the record output of 211,988 tons in 1939-40 the general trend of butter production declined until 1946-47, when 143,308 tons were produced. Output increased again to 173,599 tons in 1949-50, but in 1950-51 decreased to 163,934 tons and in 1951-52 to 135,319 tons. Production increased to 167,480 tons in 1952-53 but in 1953-54 there was another decrease to 159,585 tons, due to unfavourable conditions in New South Wales and Queensland. The fall in these two States was partly offset by an excellent season in Victoria. The foregoing figures include butter produced on farms which has shown a decline from 8,714 tons in 1938-39 to 3,468 tons in 1953-54.

The following table shows production of butter in factories in each State for the years 1949-50 to 1953-54, compared with the average for the five years ended 1938-39.

9. **Cheese Production.**—Until 1916 the annual production of cheese had not reached 10,000 tons. From 1916 to 1932-33 it ranged between about 10,000 and 16,000 tons, rising in subsequent years with some reversals of trend to an output of 44,796 tons in 1949-50. Production decreased slightly in 1950-51 and more substantially in 1951-52 to 40,598 tons but, by 1953-54 had risen to a record output of 49,057 tons. The States contributing chiefly towards the general increase over the years are Victoria and South Australia.

The following table shows production of cheese in factories in each State in the years 1949-50 to 1953-54 in comparison with average output during the years 1934-35 to 1938-39 :—

10. **Condensed, Concentrated and Powdered, etc., Milk Production.**—The manufacture of these products has expanded greatly since 1938-39 to meet the needs of the Services during the 1939-45 War and for export purposes since the war. The output of condensed milk (sweetened and unsweetened) in 1953-54 was 144 per cent. higher than in the three years ended 1938-39 while that of powdered milk (full cream and skim) was 309 per cent. higher. Over the same period the quantity of whole milk used in the manufacture of the products shown below increased from 33.2 million gallons to 75.8 million gallons or by 128 per cent. These products are manufactured mainly in Victoria, which produced 67 per cent. of the total (in terms of whole milk equivalent) in 1953-54. New South Wales accounted for 26 per cent. and the remaining States for 7 per cent.

The following table shows details of the output of condensed, concentrated, powdered, etc., milk during the years 1949-50 to 1953-54, compared with the available details for the years 1936-37 to 1938-39.

(a) Mainly for ice-cream manufacture. (b) Incomplete. (c) Malted milk and milk sugar only. (d) Not available separately; included with powdered full cream milk. (e) Excludes powdered whey.

11. **Local Consumption of Butter and Cheese.**—The production of butter and cheese less net exports and adjusted to account for movements in stocks, represents the quantity available for consumption in Australia.

A system of butter rationing introduced as a war-time measure and retained until 16th June, 1950, had the effect of considerably reducing civilian consumption. In the last year of rationing, 1949–50, consumption was 25.3 lb. per head per annum compared with an average of 32.9 lb. during the years 1936–37 to 1938–39. Following the cessation of rationing, consumption rose sharply to 30.9 lb. per head in 1950–51 and to 31.2 lb. in 1951–52, but fell in 1952–53 to 29.4 lb. In 1953–54 consumption again rose to 30.6 lb. per head.

Cheese consumption rose considerably during the period of butter rationing, from 4.4 lb. per head pre-war to 6.3 lb. per head in 1949–50. There was a further slight rise in 1950–51 to 6.5 lb. per head, and after a decline in 1951–52 and 1952–53 consumption rose again in 1953–54 to 6.6 lb. per head.

The following table shows details of the production and disposal of butter and cheese for each of the years 1949–50 to 1953–54 compared with the average for the years 1936–37 to 1938–39.

**PRODUCTION AND DISPOSAL OF BUTTER AND CHEESE : AUSTRALIA.**

(a) Figures for butter include ghee expressed as butter as well as butter shipped as ships' stores. Figures for cheese include ships' stores after allowance for a small quantity of cheese imported. (b) Not available. (c) Excludes ghee. (d) Includes allowance for movements in stocks other than those held in main cold stores.

12. **Marketing of Dairy Products.**—(i) *The Dairy Produce Export Control Act 1924–1954.* Introduced at the request of the dairying industry this Act was passed by the Commonwealth Parliament with the object of organizing the overseas marketing of Australian dairy produce. A Dairy Produce Control Board was appointed and was in existence from 1924 to 1935. It dealt with matters relating to the organization and supervision of overseas marketing of dairy produce. In the course of its functions the Board regulated shipments to ensure regularity of supply in the London market, controlled forward selling, obtained reductions in overseas freights and insurance rates and participated in an advertising campaign in the United Kingdom.

Prior to the appointment of the Dairy Produce Control Board, a voluntary body—the Australian Dairy Council—was established to advise and make recommendations to the Governments on problems connected with the production, manufacture and quality of dairy produce, pasture improvement and diseases of dairy cattle.

Following a recommendation by the Australian Agricultural Council the functions of these bodies were combined by an amending Act of 1935 under the Australian Dairy Produce Board and provision was made for the allocation of money from the Board's

funds for research and investigation into pastures, diseases of dairy cattle and the quality of butter. The functions of the Board were later extended to enable it to advise the Government in connexion with the transport of dairy produce, the securing of new markets, the expansion of existing markets and other matters.

The Australian Dairy Produce Board was re-constituted in 1947 by an amendment to the Dairy Produce Export Control Act, its membership being reduced from seventeen to twelve. The functions of the Board were extended to enable it to purchase and sell, on behalf of the Commonwealth, dairy produce intended for export, and to control all matters concerning the handling, storage, protection, treatment, transfer and shipment of the produce so purchased or sold. In 1953 the direct farmer representation on the Board was increased from two to three members thus raising the total membership from twelve to thirteen.

In April, 1954 the Act was further amended to prepare for the implementation of an export marketing plan to follow the expiration of the United Kingdom-Australia Butter and Cheese Contract. The amendment will enable the Board to purchase dairy produce intended for export to the United Kingdom and to sell such produce on behalf of the dairying industry in lieu of its present function of selling on behalf of the Commonwealth Government. In the interests of the stability of the industry, the Act provides that the Board may be the sole Australian exporter of butter and cheese to the United Kingdom.

(ii) *The Dairy Produce Export Charges Act 1924-1937.* This Act provides for the imposition of a levy on all butter and cheese exported from Australia to cover the administrative expenses of the Board and for advertising and other purposes. The rate of the levy is fixed by regulation.

13. **Butter and Cheese Contracts.**—(i) *General.* Details of the war-time contracts arranged between the United Kingdom and Australian Governments whereby the former undertook to purchase Australia's surplus butter and cheese were shown on pp. 985 and 986 of Official Year Book No. 37. The purchase of butter and cheese in 1944-45 and subsequent years has been covered by the Long-Term Purchase Agreement (*see sub-par. (ii) following*).

For the years 1943-44 to 1947-48 the United Kingdom Government reimbursed the Australian Government to the extent of subsidy paid on butter and cheese exported on Ministry of Food account. From 1st July, 1948 to 30th November, 1950 in respect of butter, and for the year 1948-49 in the case of cheese, however, contract prices paid by the United Kingdom Government were in excess of the basic return to the Australian manufacturer. As a result, subsidy on butter and cheese exported was discontinued from that date and returns from export sales in excess of the basic return to the producer have been credited to the Dairying Industry Stabilization Fund (*see pp. 936 and 937*). The Fund was drawn upon to cover the deficiencies in export prices during 1951-52 and since July, 1952 has been available to make good the deficiency in respect of all exports other than the 20 per cent. provided for under the Five-year Stabilization Plan.

The following table indicates the prices per cwt., Australian currency f.o.b. port of shipment, payable under the Long-term Purchase Agreement for the various grades of butter and cheese for the years 1948-49 to 1954-55.

(ii) *Long-term Purchase Agreement.* Early in 1945 an agreement was completed between the United Kingdom and Australian Governments covering the sale to the former of Australia's surplus butter and cheese for the four years 1944-45 to 1947-48. The Agreement was later extended to cover the period up to 30th June, 1955. In the original agreement, prices were stipulated for the initial two years ended June, 1946, while any variation in price for the succeeding years was not to exceed 7½ per cent. of the price paid for the preceding year. The United Kingdom undertakes responsibility for storage costs, if unable to provide ships to lift butter and cheese from store after 90 days, and makes advances against stored stock in this event. The usual provisions relative to quality, packing, etc., continued to obtain, but in regard to payment the United Kingdom now pays the whole of the value on shipment, instead of 97½ per cent. on shipment and 2½ per cent. 60 days after the date of the last bill of lading, as formerly.

14. *Oversea Trade in Butter, Cheese and Milk.*—(i) *General.* The production of butter and cheese in Australia is considerably in excess of local requirements and consequently a substantial surplus is available for export overseas. In normal circumstances the extent of this surplus is chiefly dependent upon the seasonal conditions. Exports of butter, which averaged 90,000 tons in the three pre-war years, were maintained to a certain extent during the war-time and post-war years by the restriction of supplies for local consumption, but, because of lower production they nevertheless fell as low as 41,800 tons in 1944-45. In the last year of rationing, 1949-50, exports were 79,200 tons, but they fell to 11,300 tons by 1951-52. In 1952-53 they were 49,300 tons and in 1953-54 39,300 tons. In addition small quantities of ghee have been exported during the post-war period. Exports of cheese, which averaged 11,500 tons pre-war, rose to a maximum of 26,000 tons in 1948-49, but they subsequently fell and in 1953-54 amounted to 22,800 tons.

During 1938-39, 96,900 tons of butter (95 per cent. of all butter exported) were shipped to the United Kingdom. With the decline in total exports there has also been a substantial reduction in the quantity shipped to the United Kingdom. In 1953-54 it amounted to 29,100 tons (74 per cent. of total butter exports.)

In 1938-39, exports of cheese totalled 16,000 tons of which 15,500 tons or 97 per cent. were exported to the United Kingdom. Of the total of 22,800 tons exported in 1953-54 17,900 tons or 79 per cent. were shipped to the United Kingdom.

Total quantities and values of exports of Australian origin of butter, cheese and condensed, concentrated, etc., milk and cream are shown on page 952.

(ii) *Butter and Cheese Exports graded according to Quality.* All butter and cheese exported comes under the provisions of the Exports (Dairy Produce) Regulations and is subject to the supervision, inspection and examination of officers appointed for that purpose. These commodities are graded according to quality which has been fixed by

regulation as follows :—Flavour and aroma, 50 points, texture, 30 points, and condition, 20 points. Butter and cheese graded at 93 to 100 points is of choicest quality, at 90 to 92 points, first quality, at 86 to 89 points, second quality, and at 80 to 85 points, pastry or cooking quality or, in the case of cheese, third quality.

In the following table particulars are given of the relative proportions of butter and cheese graded for export according to quality. Further details, which include actual quantities by States, are to be found in *Primary Industries Bulletin* No. 48, Part 1.—*Rural Industries*, 1953-54.

### § 4. Pigs and Pig Products.

1. Pigs.—The number of pigs in Australia first reached a million in 1905. It fluctuated about this level up to 1940, when it reached 1,455,311 while in 1941 the record number of 1,797,340 was recorded. There was a decline in the following two years but the numbers rose again to 1,746,721 in 1944; thereafter there was an almost continuous decline until 1953 when the number of pigs was only 992,532. In 1954 however, the number increased to 1,197,640 which is the highest figure since 1948. Details of the number of pigs in each State and Territory for each of the five years 1950 to 1954, together with the average for the five years 1935 to 1939, are given in the following table.

#### NUMBER OF PIGS.

As at 31st March.	N.S.W.	Vic.	Qld.	S. Aust.	W. Aust.	Tas.	N.T.(a)	A.C.T.	Total.

(a) As at 1st January.

(b) As at 31st March for New South Wales and Australian Capital Territory; 1st March for Victoria; 1st January for Queensland, South Australia, Western Australia and Tasmania.

Further details relating to pig numbers are given in Chapter XXII.—Pastoral Production. A map showing the distribution of pigs in Australia at 31st March, 1948, appeared on p. 908 of Official Year Book No. 39.

2. Size of Pig Herds.—A series of special tabulations relating to rural holdings undertaken for all States for the year 1949-50 covered, *inter alia*, a classification of holdings carrying pigs according to size of herd. Full details of these tabulations were published in *Primary Industries Bulletin* No. 44, 1949-50.

3. **Pigs Slaughtered.**—The number of pigs slaughtered during each of the years 1949–50 to 1953–54 and the average for the years 1934–35 to 1938–39 are shown in the following table :—

## PIGS SLAUGHTERED.

('000.)

Year.	Slaughterings Passed for Human Consumption.							Total Slaughtering (including Boiled Down).
	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Total.(a)	
Average, 1934–35 to 1938–39	555	484	525	154	119	61	1,899	1,912
1949–50 ..	479	299	504	110	111	51	1,557	1,568
1950–51 ..	454	312	460	115	113	58	1,516	1,529
1951–52 ..	468	339	370	108	132	66	1,488	1,500
1952–53 ..	458	297	400	115	122	66	1,463	1,474
1953–54 ..	492	298	461	104	115	59	1,534	1,545

(a) Including Australian Capital Territory and Northern Territory.

4. **Pork.**—(i) *Production.* In the following table details of the production of pork in each State are shown for the years 1949–50 to 1953–54 compared with average production during the years 1934–35 to 1938–39.

## PRODUCTION OF PORK (BONE-IN WEIGHT).

(Tons.)

Year.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Total.
Average, 1934–35 to 1938–39 ..	9,938	12,236	9,867	3,215	1,741	1,240	7	38	38,282
1949–50 ..	10,260	6,645	12,911	2,009	1,793	1,208	42	90	34,958
1950–51 ..	9,307	7,596	11,751	2,774	2,116	1,499	64	150	35,237
1951–52 ..	10,382	8,716	8,604	2,551	2,550	1,981	70	170	35,024
1952–53 ..	9,611	6,925	6,548	2,836	2,436	1,920	60	132	30,468
1953–54 ..	12,949	7,332	7,216	2,253	2,032	1,399	69	146	33,396

(ii) *Consumption.* As in the case of other meats, pork was subject to rationing during the 1939–45 War and immediate post-war years and consumption was at a much lower level than pre-war. By 1948–49 it had returned to about 7 lb. per head, remaining at this level until 1951–52. In 1952–53 consumption fell to 5.8 lb., but rose again in 1953–54 to 7.7 lb. per head. In the following table details of the production and disposal of pork are shown for the years 1949–50 to 1953–54 compared with averages for the three years 1936–37 to 1938–39.

## PRODUCTION AND DISPOSAL OF PORK (BONE-IN WEIGHT) : AUSTRALIA.

Year.	Changes in Stock.	Production. (a)	Exports.	Canning.	Consumption in Australia.	
					Total.	Per Head per annum.
	'000 tons.	'000 tons.	'000 tons.	'000 tons.	'000 tons.	lb.

1953–54 ..	—1.1	33.4	1.2	2.8	30.5	7.7

(a) Includes an estimate of trimmings from baconer carcasses.

5. **Bacon and Ham.**—(i) *Production.* As in the case of pork, the increased demand for bacon and ham during the war years stimulated production to a level not previously attained. Production reached its peak in 1944-45 when 56,246 tons of bacon and ham were cured. This was followed by a continuous decline in output in each succeeding year to 36,628 tons in 1951-52. In 1952-53 there was a slight recovery in production to 38,545 tons followed by another decline to 36,990 tons in 1953-54. Details of production are shown by States in the following table for each year 1949-50 to 1953-54 compared with the average production for the five pre-war years ended 1938-39.

#### PRODUCTION OF BACON AND HAM (CURED WEIGHT).

(Tons.)

Year.	N S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Australia.

(a) Pressed and canned bacon and ham have been converted to bone-in weight.

(ii) *Consumption.* Consumption per head declined in the early stages of the 1939-45 War from the pre-war average of 10.2 lb. per annum, but subsequently increased to 12.7 lb. in 1946-47. Since that year there has been a steady decline to 7.2 lb. per head during 1953-54. Details of production and disposal of bacon and ham for the years 1949-50 to 1953-54 compared with average production and disposal for the period 1936-37 to 1938-39 are shown in the following table:—

#### PRODUCTION AND DISPOSAL OF BACON AND HAM (CURED WEIGHT) : AUSTRALIA.

(a) Not available.

(b) Pressed and canned bacon and ham have been converted to bone-in weight.

6. **United Kingdom Contracts.**—Details relating to the several war-time contracts and the more recent Long-term Purchase Agreement between the Governments of the Commonwealth and the United Kingdom for the sale of Australia's surplus production of meats (including pigmeats) are included in Chapter XXII.—Pastoral Production.

7. **Oversea Trade in Pigs and Pig Products.**—Total quantities and values of exports of Australian origin of pigs and pig products (bacon and ham, lard and frozen pork) for the years 1938-39, 1952-53 and 1953-54 are shown on page 952.

### § 5. Poultry-farming.

1. *General.*—Poultry-farming has been carried on in Australia for many years and the State Departments of Agriculture have encouraged its development by appointing experts to advise on the care and management of poultry and by conducting egg-laying competitions. Originally the industry was conducted in conjunction with other branches of rural activity, mainly dairying, but it is now a specialized and distinct industry and it is from this source that the bulk of the commercial production is obtained. Practically all farms keep poultry for the purpose of supplying their own domestic requirements and in many cases some supplies from this source are also marketed. In addition, many private homes keep small numbers of fowls in backyard runs and this helps to maintain domestic needs particularly when eggs are in short supply.

2. *Numbers of Poultry.*—In pre-war years the numbers of the principal kinds of poultry were a normal feature of the annual census of livestock in all States except Victoria and Tasmania. These data were collected on a restricted scale by all States in 1942-43, the details obtained being confined to farms of one acre or more producing eggs or poultry for sale. The collection has since been discontinued in some States. Because of their incompleteness, details of poultry numbers are not published.

3. *Recorded Production and Disposal of Eggs.*—(i) *Shell Eggs.* Available statistics of the production and disposal of eggs in Australia are restricted to those recorded by the Egg Boards of the several States. As Boards were not set up in all States until 1943, comparable statistics of recorded production of eggs for Australia as a whole are not available prior to 1943-44. Details of production in the respective States as recorded by these authorities for the years 1949-50 to 1953-54 are shown in the following table :—

**SHELL EGGS : PRODUCTION(a) RECORDED BY EGG BOARDS.**  
(<sup>000</sup> Dozen.)

State.	1949-50.	1950-51.	1951-52.	1952-53.	1953-54.
New South Wales ..	52,269	50,465	50,271	50,884	51,884
Victoria .. ..	20,985	25,573	23,492	24,701	25,306
Queensland .. ..	11,176	10,858	8,426	7,860	8,555
South Australia ..	13,089	11,663	10,741	11,354	12,040
Western Australia ..	7,653	7,437	8,077	8,783	9,283
Tasmania .. ..	1,514	1,297	1,027	1,107	934
Total .. ..	115,686	107,293	102,034	104,694	108,002

(a) Receipts from consignors and sales by producer agents.

(ii) *Egg Pulp.* Prior to the 1939-45 War, production of egg pulp was about 7 million lb. per annum. This was used almost entirely for the manufacture of cakes, pastry and biscuits, only negligible quantities being exported. Production was expanded greatly during the war years to meet the requirements of the Armed Services and has since been maintained at a high level for export purposes and to meet increased local requirements.

Particulars of the production of whole egg pulp as recorded by the Egg Boards in the several States are shown in the following table.

**LIQUID WHOLE EGG : PRODUCTION RECORDED BY EGG BOARDS.**  
(<sup>000</sup> lb.)

State.	1949-50.	1950-51.	1951-52.	1952-53.	1953-54.
New South Wales ..	14,760	16,003	12,357	16,991	20,942
Victoria .. ..	8,565	6,153	6,559	6,467	8,295
Queensland .. ..	4,498	4,008	2,278	2,315	3,703
South Australia ..	6,574	5,692	5,629	6,284	8,178
Western Australia ..	1,837	1,939	2,878	3,490	3,894
Tasmania .. ..	407	353	249	359	239
Total .. ..	36,641	34,148	29,950	35,906	45,251

In addition to liquid whole egg, production was also recorded of liquid egg whites and liquid egg yolks. Output in 1953-54 amounted to 298,371 lb. and 191,179 lb. respectively compared with 387,032 lb. and 253,742 lb. respectively in the previous year.

(iii) *Egg Powder.* The production of dried egg powder was established in Australia in 1942, to treat Australia's surplus eggs so as to maintain exports under war-time conditions to the United Kingdom. Production was continued after the end of the war for export purposes, but since 1946-47 has declined to negligible proportions.

4. *Production and Consumption of Eggs.*—Statistics of total egg production must necessarily be accepted with some reserve. The production shown in the following table together with details of exports and consumption is based upon the records of Egg Boards of production from areas under their control plus estimates of production from uncontrolled areas and from "back-yard" poultry-keepers.

#### ESTIMATED PRODUCTION AND DISPOSAL OF EGGS IN SHELL (a) : AUSTRALIA.

5. *Marketing of Eggs.*—(i) *United Kingdom Contracts.* Details of the annual contracts entered into between the United Kingdom and Australian Governments will be found in Official Year Book Nos. 38, pp. 1048-9 and 40, p. 930.

In respect of the 1953-54 season the Ministry of Food agreed to pay to the Australian Government the actual United Kingdom market realizations for eggs in shell, less actual cost, paid by the Ministry up to the point of delivery to wholesalers. For the same

season the contract price for egg pulp was fixed at £294 sterling per ton, f.o.b. Australian ports which is equivalent to 3s. 3.375d. per lb. (Australian currency) and represents an increase of 3½d. per lb. (Australian currency) over the contract price for the 1952-53 season. The United Kingdom market realizations for Australian eggs in shell during the 1953-54 season were nearly 25 per cent. below those received during 1952-53, the final year of the contract, when the contract price was 4s. 2.25d. per dozen for packs of 15 lb. In order to cushion the effect of the collapse of the United Kingdom market in the first year following de-control in the United Kingdom, the Commonwealth Government in 1954 made a special grant of £250,000 to egg producers. Commencing from the 1954-55 season, however, the Ministry of Food discontinued its system of control over the distribution and sale of imported eggs. Prices realized for Australian eggs were slightly below the realizations for the 1953-54 season. Egg pulp was also sold under free market conditions. Australian pulp exported to the United Kingdom amounted to approximately 95,000 tons and was sold at prices ranging from £210 to £215 sterling per ton f.o.b. port of shipment.

(ii) *Egg Export Control Act 1947.* Following the termination of Commonwealth control over the production and marketing of eggs on 31st December, 1947, functions relating to the local marketing of eggs reverted to State Egg Boards which became responsible for stabilizing prices and marketing of eggs produced in the respective States. In order to assist in marketing Australia's surplus production of eggs under the Long-term Purchase Agreement with the United Kingdom, the Commonwealth established the Australian Egg Board under the Egg Export Control Act 1947. The Board, which commenced to operate on 1st January, 1948, was empowered to buy and sell, on behalf of the Commonwealth Government, eggs and egg products intended for export which comply with the provisions of the Export (Dairy Produce) Regulations. In addition, the Board was authorized to deal with all matters relating to the export of eggs and egg products from Australia, to make such experiments as are likely to lead to the improvement of the quality of Australian eggs and to promote their sale overseas. The Board consisted of ten members, including six representatives of egg producers and one representative of the Commonwealth Government.

Due to the discontinuance of inter-Governmental trading in eggs and egg products, the Egg Export Control Act was amended in April, 1954, to provide for the reconstruction of the Australian Egg Board and the implementation of an egg export marketing scheme. The new Board, established on 17th June, 1954, comprises nine members including a representative of the Commonwealth Government and representatives from each State Egg Marketing Board (except Tasmania). The Board is empowered to act as a trading authority selling eggs and egg pulp as agent for State Egg Boards. However any State Board desiring to export on its own account may do so subject to general terms and conditions to be laid down by the Australian Egg Board.

**6. Oversea Trade in Poultry Products.**—The Australian oversea export of poultry products has in the past been confined chiefly to eggs in shell and egg contents, which are consigned mainly to the United Kingdom. In 1949-50 exports of eggs in shell reached the record level of 23.0 million dozen, but in the two succeeding years amounted to less than 14 million dozen, and in 1953-54 to 12.9 million dozen.

Prior to the 1939-45 War, exports of egg contents were small and in 1939-40 there was an excess of imports. During the war years, exports expanded greatly, mainly to meet Service requirements, and since the close of the war there was further expansion until 1947-48 when 30.6 million lb. of egg contents were shipped. Between 1947-48 and 1952-53 exports declined but rose again in 1953-54 to 37.1 million lb.

Since the close of the war there has also been a considerable increase in the exports of frozen poultry, exports amounting to 308,000 pairs in 1953-54 compared with the average for the pre-war years 1934-35 to 1938-39 of 37,913 pairs.

Total quantities and values of exports of Australian origin of poultry products (live poultry, frozen poultry, eggs in shell, egg pulp and powder and undressed feathers) for the years 1938-39, 1952-53 and 1953-54 are shown on page 952.

## § 6. Bee-farming.

1. **Production of Honey and Bees-wax.**—Although practised as a separate industry, bee-farming is also carried on in conjunction with other branches of farming, but its place in Australia's rural economy is not very significant. The returns of honey from productive hives during 1953-54 showed an average of 108 lb. per hive and the average quantity of wax was 1.3 lb. per productive hive.

The number of hives and the production of honey and bees-wax during the year 1953-54 are shown in the following table.

**BEEHIVES, HONEY AND BEES-WAX, 1953-54.**

State.	Beehives.			Honey Produced.		Bees-wax Produced.	
	Pro- ductive.	Unpro- ductive.	Total.	Quantity.	Gross Value.	Quantity.	Gross Value.
	'000.	'000.	'000.	'000 lb.	£	lb.	£
New South Wales ..	109	35	144	10,381	475,794	122,985	40,739
Victoria ..	87	22	109	9,383	430,020	100,562	35,197
Queensland ..	30	12	42	2,888	132,374	43,045	10,761
South Australia ..	74	18	92	6,378	193,459	78,455	17,139
Western Australia	28	5	33	6,325	219,956	72,833	14,448
Tasmania ..	4	1	5	365	21,310	4,342	1,850
Australian Capital Territory ..	(a)	(a)	(a)	17	845	152	50
Australia(b) ..	332	93	425	35,737	1,473,758	422,374	120,184

(a) Less than 500.

(b) Excludes Northern Territory.

The production of honey and bees-wax fluctuates considerably and is determined mainly by the flow of nectar from flora of the eucalypts, which varies greatly from year to year. In recent years there has been a pronounced upward trend in the output of honey, the 1948-49 figure, 53,200,000 lb., being an all-time record. Production in 1953-54, 35,737,000 lb., although much lower than in 1948-49, was still higher than pre-war.

The table hereunder shows the production of honey and bees-wax for the five years ended 1953-54 in comparison with the averages for the years 1934-35 to 1938-39.

**HONEY AND BEES-WAX PRODUCTION.**

1952-53 ..	94,297	71,536	29,703	102,733	39,912	3,548	(b) 341,779
1953-54 ..	122,985	100,562	43,045	78,455	72,833	4,342	(b) 422,374

(a) Excludes Australian Capital Territory and Northern Territory.

(b) Excludes Northern Territory.

2. **Oversea Trade in Bee Products.**—Prior to the 1939-45 War the production of honey exceeded Australian requirements and a small quantity was available for export. In 1948-49 the record quantity of 32.09 million lb., was exported. In 1952-53 exports amounted to 16.61 million lb. and in 1953-54 to 14.36 million lb.

The wider use of frame hives has reduced the production of wax, and as a result the quantity of bees-wax imported generally exceeded that exported up to 1945-46. During each year, however, since 1946-47, with the exception of 1951-52, production has been high on account of exceptionally good seasons, and exports have exceeded imports by substantial margins. In 1953-54 exports exceeded imports by an amount of 169,170 lb.

Total quantities and values of exports of Australian origin of honey and bees-wax for the years 1938-39, 1952-53 and 1953-54 are shown in §7 below.

### § 7. Exports of Australian Farmyard, Dairy and Bee Products.

The quantities and values of Australian farmyard, dairy and bee products exported during 1952-53 and 1953-54 are shown below in comparison with those of 1938-39.

#### AUSTRALIAN FARMYARD, DAIRY AND BEE PRODUCTS: EXPORTS OF AUSTRALIAN ORIGIN.

## § 8. Imports of Dairy and Farmyard Products into United Kingdom.

NOTE.—Values of imports in this section are expressed in £ sterling at the landed c.i.f. point.

1. Summary, Principal Products.—The following table shows the quantities and values of the principal dairy products imported into the United Kingdom during the years 1939, 1953 and 1954.

## DAIRY PRODUCTS : IMPORTS INTO UNITED KINGDOM.

Product.	Unit of Quantity.	1939.		1953.		1954.	
		Quantity.	Value.	Quantity.	Value.	Quantity.	Value.
			£'000.		£'000.		£'000.
Butter .. ..	'000 cwt.	8,737	48,424	5,638	94,889	5,646	98,084
Cheese .. ..	"	2,845	8,669	2,920	30,454	2,640	27,366
Milk, powdered and pre-served .. ..	"		2,818		11,539		5,970
Bacon and ham ..	'000 cwt.	7,953	37,105	6,612	86,923	6,309	77,405
Pork (a) .. ..	"	989	3,036	892	11,216	655	8,008
Eggs in shell ..	'000 doz.	283,315	12,835	134,526	23,947	119,713	19,577
Eggs, not in shell, liquid or frozen .. ..	'000 cwt.	800	2,292	532	7,004	579	7,977

(a) Excluding pork in airtight containers.

2. Butter.—Until 1950 Australia had regularly supplied between 20 and 30 per cent. of the butter imported into the United Kingdom. Since 1950, when butter rationing was abolished in Australia, the quantity shipped has been considerably lower and in 1954 amounted to 583,474 cwt., or 10.3 per cent. of the total United Kingdom imports. New Zealand supplied 43.4 per cent. of the total quantity imported during 1954 and Denmark, 35.9 per cent.

In the following table particulars of the quantity and value of butter imported into the United Kingdom are shown for the years 1938, 1953 and 1954, according to country of origin.

## BUTTER : IMPORTS INTO UNITED KINGDOM.

Country from which Imported.	1938.		1953.		1954.	
	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.
	'000 cwt.	£'000.	'000 cwt.	£'000.	'000 cwt.	£'000.
New Zealand ..	2,592	14,524	2,620	43,502	2,453	42,033
Australia .. ..	1,798	9,630	551	9,135	583	9,968
Other Commonwealth Countries and Republic of Ireland ..	423	2,455	..	..	106	1,087
Denmark .. ..	2,365	12,960	2,074	35,861	2,026	35,459
Netherlands ..	712	3,466	240	3,919	285	5,306
Other Foreign Countries	1,628	7,838	154	2,486	193	3,331
Total .. ..	9,518	50,873	5,639	94,903	5,646	98,084

3. Cheese.—The value of cheese imported into the United Kingdom in 1954 was £27,365,587. Of this, £18,127,910 was imported from New Zealand, £3,574,521 from Australia, £2,284,030 from Denmark and £1,547,967 from the Netherlands.

4. Bacon.—Of a total import in 1954 of bacon (excluding bacon in airtight containers) valued at £70,445,769, the value of that supplied by Denmark was £49,995,829, Poland, £10,156,135, and the Netherlands, £6,183,846.

5. Pork.—The value of the United Kingdom imports of pork (excluding pork in airtight containers) was £8,008,191 in 1954. Imports from Republic of Ireland, valued at £3,480,131, New Zealand, £1,876,386, and Denmark, £1,367,777, comprised 84 per cent. of the imports into the United Kingdom.

6. Eggs.—In 1954 the value of eggs imported into the United Kingdom was £27,553,885, comprising eggs in shell, £19,577,318, and liquid or frozen eggs, £7,976,567. The Australian share in this trade amounted to £6,929,546. Eggs in shell were supplied principally by Denmark, £15,051,030, and Australia, £1,670,267.

7. Milk Products.—In 1954 the value of preserved milk imported into the United Kingdom was £5,969,992. Of this total, imports from Australia amounted to £1,442,615.

8. Other Products.—The imports into the United Kingdom from Australia of poultry (excluding poultry meat in airtight containers) amounted to £264,359, while those of bees-wax, lard and honey in 1954 were unimportant.

## CHAPTER XXIV.

## FORESTRY.\*

## § 1. General.

NOTE.—Values of Australian oversea trade shown throughout this Chapter are expressed in £A f.o.b., Port of Shipment, except where otherwise indicated.

1. **Objects of Forestry.**—The main object of forestry is to manage the forests of a country in the way that will provide the maximum benefits, both direct and indirect. Direct benefits include the provision of essential commercial commodities such as structural timber, pulpwood, plywood, veneers, firewood, bark products, tars, oils and resins. Indirect benefits include protection of soil and stock from wind and exposure, regulation of stream flow, and aesthetic effects.

Forestry aims to improve existing forests and woodlands by properly controlled exploitation, by protection from destructive agencies such as fire, and by inducing natural regeneration where it is desirable. Forestry also aims to provide a partial tree cover on denuded lands when such cover is necessary for protective purposes, and a complete cover when the land is better under forest than under any other crop.

2. **General Account of Forests and Timbers.**—The area of land in Australia suitable for the production of commercial timber as the primary crop is very small in comparison with the size of the continent. It is concentrated mainly around the wetter coastal belts and the eastern highlands and it includes the bulk of the land suitable for intensive development by agricultural or pastoral undertakings.

The allocation of land for agricultural and pastoral purposes led to the clearing of much of the original forest of Australia, particularly of the more readily accessible parts. In the early period of agricultural and pastoral expansion, only the best timbers found their way into commerce, and species now prized as providing high quality woods were often put to inferior uses. During this period the forest resources of the country were considered by the majority of the people to be inexhaustible, and relatively little care was taken to prevent the degradation of the remaining forests by fire and uncontrolled grazing. This state of affairs is rapidly changing; it is now recognized that the remaining forest land must be protected and properly managed in the interests of the community.

The trees which make up the forests of Australia are mainly evergreen hardwoods. The characteristic genus is *Eucalyptus*. There are over six hundred different kinds of eucalypts and with few exceptions the natural occurrence of all of them is restricted to Australia. The genus includes such species as the mountain ash (*Eucalyptus regnans*) of Victoria and Tasmania, and karri (*E. diversicolor*) of Western Australia, which are the tallest-growing hardwoods in the world. At the other end of the scale there are many eucalypts which do not grow to tall trees, including the species collectively known as the "mallees". The mallees develop a number of small stems from an underground structure called the "mallee root".

\* A specially contributed article dealing with Forestry in Australia appeared as part of Chapter XIX in Official Year Book No. 19 (see pp. 701-12 therein). See also "The Commercial Timbers of Australia, Their Properties and Uses" by I. H. Boas, published by the Council for Scientific and Industrial Research in 1947, "Timbers and Forest Products of Queensland" by E. H. S. Swain, published in 1925 and "Australian Standard Nomenclature of Australian Timbers" published by the Standards Association of Australia.

Less than 100 eucalypts are used for sawmilling and not more than 30 to 40 are exploited extensively. The main commercial eucalypts were listed in Official Year Book No. 39 and earlier issues.

The eucalypts satisfy the Australian requirement for timbers having great strength and durability. They also provide a large proportion of the building timber and some of the wood required for packaging. In recent years some eucalypts have been used extensively for papermaking and for the manufacture of hardboard and fibreboard. The species most commonly used for pulping are mountain ash (*E. regnans*), alpine ash (*E. gigantea*), and messmate, stringybark or Tasmanian oak (*E. obliqua*).

A large number of other genera represented in the Australian forest flora also produce commercial hardwoods. Among the outstanding furniture cabinet and veneer timbers are red cedar (*Cedrela toona* var. *australis*), Queensland maple (*Flindersia brayleyana*), Southern and Northern silky oak (*Grevillea robusta* and *Cardwellia sublimis*, respectively), Queensland walnut (*Endiandra palmerstoni*), blackwood (*Acacia melanoxylon*), rose mahogany (*Dysoxylum fraserianum*), etc. Turpentine (*Syncarpia laurifolia*) ranks with the world's best as a harbour piling timber. Coachwood (*Ceratopetalum apetalum*) came into prominence for rifle furniture and for aircraft plywood, during the 1939-45 War.

The foregoing are but a few examples indicating the range of use of the timbers of the Australian hardwood forests.

The most important indigenous softwood resources of Australia were in the forests of hoop pine (*Araucaria cunninghamii*) of Queensland and New South Wales. These forests occurred on rich land suitable for intensive agriculture. The greater part of the original hoop pine forest has gone but the wood removed made an important contribution to the Australian timber industry. Some areas of the hoop pine forest have been replanted with this species in Queensland and, to a lesser extent, in New South Wales.

There are still considerable areas of the useful white-ant resisting cypress pine (*Callitris* spp.) in the inland areas of Queensland and New South Wales. They have been seriously overcut but are gradually being brought under management.

Other native softwoods which have played a useful but minor part in the Australian timber industry include bunya pine (*Araucaria bidwillii*) and kauri (*Agathis* spp.) of Queensland, and huon pine (*Dacrydium franklinii*), celerytop pine (*Phyllocladus rhomboidalis*) and King William pine (*Athrotaxis selaginoides*) of Tasmania.

The savannah woodlands of the interior of Australia yield commercial commodities such as sandalwood, tanbarks and essential oils. They also have an important function in providing fuel and rough timbers for the development of agricultural and pastoral holdings.

**3. Extent of Forests.**—According to data assembled for the Sixth British Commonwealth Forestry Conference held in Canada in 1952, the total area of forest in Australia is estimated at 159,751 square miles, or about 5.4 per cent. of the total land area of the continent. The estimated forest area is distributed amongst the States as follows (the proportion of forest land to the total area of each State is shown in parenthesis):—New South Wales and the Australian Capital Territory, 47,356 square miles (15 per cent.); Victoria, 26,236 (30 per cent.); Queensland, 22,300 (3 per cent.); South Australia, 10,311 (including 4,600 square miles of mallee suitable for firewood only) (3 per cent.); Western Australia, 41,256 (4 per cent.); and Tasmania, 12,292 (47 per cent.). The areas given are rough estimates only and are considerably in excess of those which are both suitable for reservation and likely to be maintained for timber production. Considerable areas of low grade forest which, in many cases, are suitable for little more than the production of firewood are included. It is doubtful if the remaining prime native forest area of Australia exceeds 20,000 square miles. The proportion of Australia carrying commercial forests is therefore very low and apart from forests on the coastal fringe of the continent, the tree density is very low.

The table below shows a classification of the estimated total forest area referred to above :—

CLASSIFICATION OF FOREST AREA : AUSTRALIA (a).

Class of Forest.	Area (Square Miles).				Proportion of Total Forest Area.
	State Forest.	Communal Forest.	Private Forest.	Total.	
Exploitable—					%
Softwood .. ..	4,157	5	1,072	5,234	3.3
Mixed wood .. ..	729	..	..	729	0.5
Hardwood .. ..	41,020	74	11,050	52,144	32.6
Total .. ..	45,906	79	12,122	58,107	36.4
Potentially Exploitable—					
Softwood .. ..	156	..	78	234	0.1
Mixed wood .. ..	..	..	..	..	..
Hardwood .. ..	15,063	..	12,877	27,940	17.5
Total .. ..	15,219	..	12,955	28,174	17.6
Other Land Classed as Forest .. ..	67,294	450	5,726	73,470	46.0
Grand Total ..	128,419	529	30,803	159,751	100.0

(a) Based on the 1950 classification of forests.

State forests accounted for 80.4 per cent. of the total forest area, private forests for 19.3 per cent. and communal forests for 0.3 per cent.

The bulk of the softwood area of approximately 5,468 square miles is in Queensland and New South Wales and consists principally of natural forest, a large proportion of which is slow-growing cypress pine (*Callitris spp.*) in low rainfall areas. The volume of this species per acre is comparatively low.

4. Forest Reservations.—The first attempt to determine the forest area which should be reserved solely for purposes of timber production was made at an Interstate Forestry Conference held at Hobart in 1920. This Conference decided that an area of 24½ million acres of indigenous forest should be permanently reserved. According to statements furnished by State and Commonwealth authorities, reservations of forest areas in Australia at 30th June, 1954, totalled 31,932,993 acres of which 20,970,361 acres were Dedicated State Forests and 10,962,632 acres were Timber, Fuel and Other Reserves. The distribution of these areas is shown by States in § 4, para. 2 of this chapter.

In general, the Timber Reserves are temporary and are liable to be alienated after the timber on them has been exploited. Some of these areas contain land of high value for forestry purposes, but the greater part does not justify permanent reservation.

If the permanently reserved areas were all of good quality, accessible, and fully productive forests supplying the class of timber required, they could be regarded as adequate for a much larger population than exists in Australia at the present time. Actually, however, a considerable proportion is in inaccessible mountainous country and many of the forests contain a mixture of species, some only of which are at present of commercial value: much of it consists of inferior forest and a large proportion of the whole has been seriously degraded by recurrent fires. Also the indigenous forest does not contain adequate supplies of softwoods producing commercial timbers and Australia's requirements of these have to be met largely by imports from other countries.

It is freely acknowledged by Australian forestry authorities that information on forest resources is very imperfect. It is not possible at present to give a reliable estimate of the forest areas needed to meet all future demands because of the number of unknown variables involved; in particular the yield capacity per acre, future consumption of different classes of timber per head, and the future population. It appears however, that all available potentially good forest country, including adequate areas for plantations of conifers, will need to be reserved, protected and systematically managed, if Australia is to approach the goal of self sufficiency in timber supplies in the future. One of the most urgent requirements in this connexion is a comprehensive estimate of forest resources.

5. **Plantations.**—Reference has been made to the inadequacy of indigenous softwood supplies, but, as a result of the planned policy of the forest services of the States and the Commonwealth and, to a less extent, of several private commercial organizations, the area of softwood plantations, mainly of exotic species is steadily increasing. It was natural that this aspect of forestry received earliest attention in South Australia as it is the State most poorly endowed with natural forest. This State now has a larger area of planted softwoods than any other State in Australia, and for some years has been exploiting considerable quantities of timber from these plantations. The total production is now in the vicinity of 100,000,000 superficial feet and this quantity is expected to be increased very substantially during the next decade. Production is also increasing in the other States and first thinnings from their plantations are already supplying a significant portion of the requirements of the case-making industry.

The total net area of Commonwealth and State softwood plantations at 30th June, 1954, was 310,669 acres. In addition, the area of privately owned plantations was about 58,000 acres. Hardwood plantations (mainly *Eucalyptus* spp.) comprise a much smaller area and the total acreage is about 30,000 acres, nearly two-thirds of which is mallet (*Eucalyptus astringens*) which has been established in Western Australia for tan bark production.

6. **Fire Protection.**—Fire control measures in Australia are the responsibility of the individual State Governments, and the provision of adequate fire protection is one of the main problems facing forest authorities at the present day. In each State a Bush or Rural Fires Act provides the main legislative basis for the control of forest fires.

The responsibility for the protection of private property outside urban areas rests with volunteer bush fire brigade organizations which are co-ordinated in each State, by a committee or board carrying out functions of an advisory or educational nature and fostering the growth and organization of the bush fire brigade movement. Throughout the main agricultural and forest areas of Australia there are over 4,000 registered volunteer bush fire brigades with a membership exceeding 150,000. Although both forest and rural fire organizations are entirely separate entities, a high degree of co-operation and liaison is maintained.

In addition to the Forest Service and rural organizations, various private and semi-Governmental bodies in each State maintain fire protection organizations, which are generally concerned with the protection of private forestry operations and hydro-electric and water catchment areas.

The annual cost of protecting from fire 23.6 million acres of dedicated and reserved forest over the three year period 1952 to 1954 has been estimated at £1,150,000 or about 11.7d. per acre annually. The cost of rural fire control as a whole cannot be estimated with any degree of accuracy owing to the fact that by far the greatest contribution comes from the personal efforts of volunteer brigade members.

The Australian fire season is very variable, with a particularly bad fire season every seven years or so. Such years were 1926, 1939, 1944 and 1952, and they account for a large proportion of the average area burnt each year which, for the period 1945 to 1955, amounted to 2.16 million acres or 2.3 per cent. of the total forested area, both Crown and private, in Australia. In disastrous fire seasons, such as 1938-39 and 1951-52, the acreage burnt on protected forest areas may rise to as high as 15 per cent.

During the post-war decade Forest Services greatly expanded their fire detection facilities and big advances were made in the use of power pumping equipment. Radio communication is now being used extensively by both Forest Services and rural organizations, and considerable progress has been made in the provision of legislative power for the rural bush fire movement, although the volunteer movement itself dates back to the turn of the century.

Recognizing that fire prevention is one of the most important aspects of the fire problem, intensive campaigns have been conducted to reduce the incidence of man-caused fires. A study of fire causes in recent years reveals that human agencies account for 95 per cent. of all fires, and of this figure at least 80 per cent. are preventable. Burning off, much of which is started illegally, accounts for 35 per cent. of all fires, smokers, hunters, fishermen and travellers cause 13 per cent. of all fires, whilst only 5 per cent. of fires in Australia are caused by lightning.

## § 2. Forestry Activities of the Commonwealth.

1. *Prior to 1925.*—When the Commonwealth of Australia was established on the 1st January, 1901, forestry was not included among the matters transferred from the States to the control of the Commonwealth, and Federal jurisdiction was therefore restricted to the then relatively unimportant forests of the Australian Territories. After the 1914–18 War these Territories (including Papua-New Guinea and Norfolk Island) covered a large area, and in the aggregate contained substantial forest resources. In the early twenties of this century a professional forester was appointed as forestry adviser to the Commonwealth Government, and he submitted preliminary reports on the forest resources of Papua-New Guinea, Norfolk Island and the Australian Capital Territory, with suggestions for future policy.

2. *Forestry and Timber Bureau.*—In 1925 the Commonwealth Forestry Bureau was instituted, and the Commonwealth Forestry Adviser became the Inspector-General of Forests. By an Act of 1930, the Bureau received statutory powers, and its functions included the advising of the various Territorial Administrations on forestry matters, the management of forests placed under its control, the establishment of experimental forest stations, the training of students in forestry, etc.

At the end of the 1939–45 War, the Commonwealth Government decided to continue certain advisory functions which during the War had been carried out by War-time Timber Control, and such functions were incorporated in the Forestry and Timber Bureau Act 1946, under which the title of the Bureau was altered to Forestry and Timber Bureau. The powers and functions of the Bureau were extended to embrace the collection of statistics and information, and advising the Governments of the Commonwealth and the States or other interested bodies on matters relating to the supply, production, overseas trade and distribution of timber in Australia. The Bureau was placed under the administration of a Director-General.

The activities of the Bureau under its statutory functions are summarized below :—

(a) *Forestry Education.* The Australian Forestry School was opened at Adelaide University in 1926 in continuation of the School of Forestry of that University established in 1911. In 1927 the School was transferred to Canberra. The purpose of the School is to train students as professional officers to manage the forests of Australia. It also accepts students from overseas.

Training at the School covers the third and fourth years of a four-year course. The first two years are spent at an Australian University in a study of prescribed science subjects. Courses at the School lead to Commonwealth Diplomas in Forestry and in Forest Technology, and in the case of the former, can lead further to a Degree in Forestry of an Australian University. Applicants possessing a University Degree granted for approved natural science subjects, or applicants with academic qualifications accepted

by the Director-General as equivalent, may also be admitted to this School and proceed to the Diplomas. Graduates or Diploma holders approved by the Director-General may be admitted to the School to take selected subjects or to carry out research work.

The Board of Higher Forestry Education advises regarding pre-requisite University courses leading to the Diploma courses and in regard to the maintenance of the standard of the School Diploma course.

In addition to students nominated by State Governments and other Australian and overseas authorities and organizations, private students are accepted at the School, and the Commonwealth Government offers up to ten forestry scholarships each year. These scholarships provide a salary allowance for the four years of the full Diploma course.

During 1950 the number of students enrolled reached 80, owing to the intake of ex-servicemen taking University courses under the Commonwealth Reconstruction Training Scheme. The normal capacity of the School is 40.

(b) *Silvicultural Research.* Research head-quarters and a Central Experimental Station have been established at Canberra. Other Forest Experimental Stations have been established at Mount Burr in the south-east of South Australia, in Tasmania, and at Dwellingup in Western Australia, on a co-operative basis with the Forest Services of those States. It is proposed to establish similar co-operative Experimental Stations in other States and Territories.

With its present limited staff, the research work of the Bureau has been concentrated largely upon studies of forest and climatic conditions, the genetical relationships and silvicultural requirements of various species, forest nutrition and the improvement of forest yields. A considerable expansion in the research activities is planned for the next few years as suitable trained staff becomes available.

(c) *Forest Management Research.*—In the national interest it is essential that over-cutting of forests should be avoided and in consequence it is a matter of primary importance that reliable information be available as to the country's forest resources and potentialities. To this end a national forest stocktaking is being carried out by the Bureau in co-operation with the Forest Services of the States and, to assist in the work of forest assessment, special consideration is being given to the development of the use of aerial surveys.

Consideration is also being given, in co-operation with the State Forest Services, to the establishment of increased areas of plantations of exotic pines with a view to providing additional supplies of softwood timber to meet requirements.

The general economics of forest management are also being studied.

(d) *Timber Supply.* The value of reliable statistical data covering availability of timber and timber requirements was so forcibly demonstrated during the 1939-45 War that it was considered essential to maintain at least a skeleton organization against times of future national emergency. Apart from this, it became clear that for many years to come shortages of timber on the one hand and heavy post-war reconstruction demands on the other, accentuated by a rapidly increasing population, would necessitate assessment of requirements and availability of supplies being kept constantly under review as a basis for short and long term policies of timber supply and distribution.

Advice is currently provided to Government Departments and the trade in matters pertaining to timber supply, including—(a) the availability of total quantities and quantities of particular grades and specifications required to meet Australia's needs; (b) the quantity of timber that should be imported; (c) the extent to which exports of timber and related products might be allowed without detriment to local needs; and (d) distribution of timber within Australia.

(e) *Management of Forests.* The Bureau manages the forests of the Australian Capital Territory and maintains a forestry officer in the Northern Territory. In addition, it is responsible for advising the administrations of the Northern Territory and the External Territories on the management of the forests under their charge.

3. **Commercial Forests.**—The forest areas under Commonwealth control include the following :—

- (a) *Australian Capital Territory.* The forests of the Australian Capital Territory are administered by a Division of the Forestry and Timber Bureau. Further information is contained in Chapter V.—The Territories of Australia.
- (b) *Northern Territory.* The forests of the Northern Territory are administered under ordinance by the Administrator of that Territory. The native forests of the Territory are very limited, consisting largely of open eucalypt forest in the North, with very restricted patches of rain forest along streams, river-fringing forests of paper bark tea-tree, patches of cypress pine, and elsewhere savannah woodland deteriorating to mallee and mulga in the interior. The Bureau maintains a forestry officer in the Territory for investigation and advisory purposes.
- (c) *Norfolk Island.* The forests of Norfolk Island are administered by the Administrator of that Territory. The area reserved for forest covers 1,037 acres, of which the main species is Norfolk Island pine.
- (d) *Papua and New Guinea.* The forests of the Territory of Papua and New Guinea are managed by a Forestry Department under the control of a Director, and are administered under an ordinance of the Territorial Administration. Forestry in the Territory commenced with the appointment of two officers in 1938. Further information is contained in Chapter V.—The Territories of Australia.

4. **Forest Products Research.**—Fundamental investigations connected with the properties and uses of timber and forest products generally are carried out by the Forest Products Division of the Commonwealth Scientific and Industrial Research Organization. These investigations cover a very wide field, e.g., pulp, paper, seasoning, structure and chemistry of wood, tans, etc.

Details can be obtained from the annual reports and publications of the Forest Products Division.

### § 3. Forest Congresses.

The first British Empire Forestry Conference was held in London in 1920. Subsequent conferences were held in Ottawa in 1923, Australia and New Zealand, 1928, South Africa, 1935 and again in the United Kingdom in 1947. In 1952 (the name of these conferences having been changed in conformity with the development of the British Commonwealth of Nations) the Sixth British Commonwealth Forestry Conference was held in Canada. It is proposed to hold the next conference in Australia and New Zealand in 1957.

### § 4. State Forestry Departments.

1. **Functions.**—Except for Queensland, the powers and functions of State forest authorities are laid down under Forestry Acts and Regulations. In each State there is a department or commission to control and manage the forests of the State. The functions of these administrations are as follows :—(a) The securing of an adequate reservation of forest lands; (b) the introduction of proper measures for scientific control and management of forest lands; (c) the protection of forests; (d) the conversion, marketing and economic utilization of forest produce; and (e) the establishment and maintenance of coniferous forests to remedy the existing deficiency in softwoods. Annual

reports are issued by each State forest authority. In Queensland, forestry is a sub-department of the Department of Public Lands. Victoria maintains a forestry school at which recruits are trained for the forestry service of that State.

2. **Forest Reservations.**—As mentioned in § 1, para. 4 above, State forest authorities agreed that, in order to secure Australia's future requirements, an area of 24½ million acres should be permanently reserved. In June, 1954, the area of State forests reserved in perpetuity totalled 20,970,361 acres or 86 per cent. of the area recommended as the goal to be attained.

In addition to the work of permanently reserving areas in each State, foresters are endeavouring to survey all timbered lands with a view to the elimination of those unsuitable for forestry. Considerable areas have been revoked in certain States, while dedications of new areas have resulted in gains to the permanent forest estate. The Forestry Departments also usually control all timber on open Crown lands as well as over 10 million acres of Timber Reserves, National Parks, etc., but, while these areas contain some land of high value for forestry purposes, the greater part does not justify permanent reservation.

In the following table details of forest areas as recorded by State Forest Authorities, distinguishing between Dedicated State Forests, Timber Reserves and Other Forest Reserves are shown for each State as at 30th June, 1954. In addition, details of forest reservations in Northern Territory and Australian Capital Territory are shown.

#### AREA OF FOREST RESERVATIONS, 30th JUNE, 1954.

(Acres.)

State or Territory.	State Forests.	Timber Reserves.	Other Reserves.	Total.

(a) Excludes Australian Capital Territory and Northern Territory, details for which are not available.

The next table shows the sawn output of native timber in sawmills and other woodworking establishments in each State for the years 1938-39 and 1949-50 to 1953-54.

SAWN OUTPUT (a) OF NATIVE TIMBER : ALL MILLS.  
( '000 super. feet.)

State.	1938-39.	1949-50.	1950-51.	1951-52.	1952-53.	1953-54.
New South Wales ..	179,350	341,144	338,347	380,633	350,702	364,728
Victoria ..	120,197	308,790	329,640	348,478	322,209	338,957
Queensland ..	193,250	251,127	252,378	291,581	285,074	288,380
South Australia ..	14,537	56,775	59,393	67,121	68,500	68,190
Western Australia ..	125,453	138,077	156,810	178,290	203,314	216,021
Tasmania ..	84,228	127,147	124,772	126,563	109,908	118,271
Australia (b) ..	717,015	1,223,060	1,261,340	1,392,766	1,339,797	1,394,547

(a) Includes the sawn equivalent of timber peeled or sliced for plywood and veneers. (b) Excludes Australian Capital Territory and Northern Territory, details for which are not available.

In addition to the sawn timber shown in the preceding table, a large amount of other timber, e.g., sleepers, piles, poles, fencing material, timber used in mining, and fuel, is obtained from forest and other lands. Complete information in regard to the volume of this output is, however, not available. In Western Australia particulars are obtained of the quantities of timber hewn by contractors for the Railway Department, mines, etc., as well as of the quantities produced by other agencies, but the figures have not been included in the preceding tables. The quantities so produced in Western Australia in the six years shown in the preceding table were as follows: 1938 30, 35,862,540 super. feet; 1949-50, 16,823,566 super. feet; 1950-51, 19,396,134 super. feet; 1951-52, 21,156,790 super. feet; 1952-53, 20,011,008 super. feet; and 1953-54, 24,979,694 super. feet. The annual reports of the Forest Departments of the States contain particulars of the output of timber from areas under departmental control, but owing to lack of uniformity in classification and measurement, accurate determination of total production cannot be made. Moreover, there is a moderate quantity of hewn timber produced from privately owned land, but information regarding output is not available.

2. Wood Pulp and Paper.—(i) *Wood Pulp*. The manufacture of wood pulp from Australian-grown timber was established in Australia in 1939, after years of experimentation with eucalypt hardwoods, production in 1938-39 being 6,165 tons of wood pulp. At the end of 1955, four wood pulp mills were operating in three States and production during 1953-54 was 83,624 tons of chemical pulp and 53,022 tons of mechanical pulp, a total of 136,646 tons.

(a) *Victoria*. In Victoria, Australian Paper Manufacturers Ltd. produce wood pulp at Maryvale in Gippsland by a chemical process known as the kraft or sulphate process. The timber used at this mill consists mainly of eucalypt hardwoods at present unsuitable for other purposes and, in addition, a small quantity of plantation pine thinnings and mill waste and special softwood for production of cellulose. During 1954-55 the wood taken from Crown Lands for the production of pulpwood and cellulose amounted to 4,523,375 cubic feet of which 3,882,199 cubic feet were hardwood and 641,176 cubic feet were radiata pine. Pine plantations are being established in Gippsland by A.P.M. Forests Pty. Ltd. The initial aim is 20,000 acres to provide a perpetual yield of 20,000 tons of long-fibred pulp per annum. Planting commenced in 1951 and by the end of 1955 it was estimated that 14,000 acres had been planted.

(b) *South Australia*. In South Australia a pulp and paper board mill operates near Millicent. This mill uses the mechanical or groundwood method of producing wood pulp from softwoods from the Mt. Burr and Penola pine plantations. Recently this mill has adopted a semi-chemical process for part of its production of wood pulp. During 1953-54, 6,134,099 super. feet of pulp wood were produced from South Australian forests.

(c) *Tasmania*. In Tasmania two large mills are making pulpwood from indigenous hardwoods. At Burnie on the north-west coast Associated Pulp and Paper Mills Ltd. use a chemical method, the soda process, to produce wood pulp for fine writing and printing papers from eucalypt hardwoods. This plant is of the most modern design and pulp and paper manufacture are combined with sawmilling and hardboard production. Offcuts and rejects from the timber mill are used as pulp wood as well as small trees removed in thinning the forests. A continuous digester has been installed at the Burnie mill, making it the only one in Australia using a continuous pulping process. Supplies of pulpwood for this mill are drawn from freehold and concession forest areas. The forests are managed on a permanent yield basis with regeneration of the eucalypts in all suitable areas. Some pine plantations have also been established to provide softwoods for pulping.

Australian Newsprint Mills Ltd. at Boyer, 20 miles from Hobart is the only producer of newsprint in Australia. Wood pulp is produced there by mechanical process from hardwoods drawn from State timber concession areas. This mill operates continuously, stopping only for maintenance. Eucalypts provide about 80 per cent. of its requirements for wood pulp, the remainder being imported long-fibred softwood pulp.

A pulp and paper board mill was established at Launceston by Tasmanian Board Mills Ltd. but after operating for about a year it was closed down in April, 1955.

(ii) *Paper and Paper Board.* Paper and paper board are manufactured in all States but the industry is centred mainly in New South Wales, Victoria and Tasmania. At the end of 1955, sixteen paper mills were operating, six in Victoria, four in New South Wales, three in Tasmania and one each in Queensland, South Australia and Western Australia. Sixteen paper machines and eighteen board machines are installed in these mills, and it is planned to instal five additional paper machines and one new board machine in the next few years. Paper mills operate in conjunction with all wood pulp mills, and pulp produced in mills operated by Australian Paper Manufacturers Ltd. and Associated Pulp and Paper Mills Ltd. is used, together with some imported pulp, in other paper and board mills owned and operated by the respective companies. Other paper and paper board mills use imported pulp, waste paper, straw and processed waste. A wide variety of papers and paper boards is produced, the quantity and value of paper produced in 1953-54 being as follows:—newsprint, 60,406 tons valued at £4,179,250; blotting, 664 tons, £97,590; duplicating, 2,543 tons, £368,031; printing and writing, 29,530 tons, £4,483,843; kraft wrapping, 37,374 tons, £5,445,279; other wrapping, 3,103 tons, £480,570; felt and carpet felt, 3,323 tons, £339,434; and other paper, 22,173 tons, £2,105,670. In addition, 123,440 tons of paper boards worth £11,092,900 were produced in 1953-54.

3. Other Forest Products.—(i) *Veneers, Plywood, etc.* Cutting of timber for the manufacture of veneers, plywood, etc., has been carried out in most States for a number of years. Recently, however, this has been considerably extended, and much greater use has been made of locally-grown timbers, both hardwoods and softwoods. In recent years special attention has been paid to the selection of logs suitable for peeling.

The following table shows the production of plywood for each of the years 1938-39 and 1949-50 to 1953-54:—

PLYWOOD PRODUCED.  
(’000 square feet  $\frac{3}{4}$  in. basis.)

State.	1938-39.	1949-50.	1950-51.	1951-52.	1952-53.	1953-54.
New South Wales ..	24,194	28,008	32,287	31,784	22,557	28,601
Queensland ..	66,100	111,048	104,799	110,028	81,400	114,545
Other States ..	14,511	17,977	16,412	17,341	11,771	18,135
Australia ..	104,805	157,033	153,498	159,153	115,728	161,581

Of the total plywood produced in 1953-54, 136,214,000 square feet  $\frac{3}{4}$  in. basis was classed as "Commercial", 21,593,000 as "Waterproof" and 3,774,000 as "Case."

During 1953-54, 393.8 million square feet ( $\frac{1}{8}$  in. basis) of veneers were produced by the rotary process for the manufacture of plywood, and 119.2 million square feet ( $\frac{1}{8}$  in. basis) were sold or added to stock, the bulk of which would eventually be used in the production of plywood. In addition, 22.4 million square feet of sliced veneers were produced.

(ii) *Hardboard.* The production in Australia from pulped wood of hardboard for building purposes has increased considerably in recent years. There were three factories producing hardboard in 1955 and during the three years ended 30th June, 1954, the following quantities and values of hardboard were produced in Australia:—1951-52, 10,089,000 square yards; £1,787,000; 1952-53, 12,150,000 square yards, £2,472,000; and 1953-54, 16,992,000 square yards, £3,284,000.

(iii) *Eucalyptus Oil.* Oil may be distilled from the foliage of all varieties of Eucalyptus, and several of them furnish a product widely known for its commercial and medicinal uses. Complete information regarding Australian production and consumption of eucalyptus oil is not available, but considerable quantities are manufactured, particularly in New South Wales and Victoria. The value of oversea

exports of eucalyptus oil distilled in Australia was £445,206 in 1951-52; £215,283 in 1952-53; and £163,763 in 1953-54. The quantities exported in the years 1951-52 to 1953-54 were, 1,254,618 lb., 721,330 lb. and 504,628 lb. respectively.

(iv) *Gums and Resins.* Gums and resins are produced in most States of Australia, the main product being grass tree, or yacca gum. This gum which is used in the preparation of varnishes and lacquers comes chiefly from South Australia while small quantities are also produced in New South Wales and Western Australia. The recorded production of gums and resins in 1953-54 was 18 cwt. in New South Wales, 12,560 cwt. in South Australia and 2,816 cwt. in Tasmania, giving a total production of 15,394 cwt. in Australia. Exports of yacca gum from Australia during the same period amounted to 13,128 cwt. valued at £17,995.

(v) *Tanning Barks.* The forests of Australia are capable of yielding a wealth of tanning materials; many species of eucalyptus and other genera contain varying proportions of tannin, chiefly in the bark, but also in the wood and twigs. Scattered distribution however, has resulted in only the richest tan-bearing species being used in Australia. These are:—Golden wattle (*Acacia pycnantha*), black or green wattle (*Acacia decurrens* or *mollissima*), and mallet (*Eucalyptus astringens*). Mallet (*E. astringens*), of Western Australia, is not extensively used in Australian tanneries, but is exported to Europe and other countries. Reference to oversea trade in tanning barks is made in § 6, para. 3.

The production of extract from the bark of karri (*E. diversicolor*), of which very large quantities are available at karri sawmills, has passed the experimental stage, and private enterprise has started production on a commercial scale. The experimental work in kino impregnated karri (*E. calophylla*) bark is not yet complete. The production of tanning bark in Australia approximated 25,000 tons per annum in the years prior to 1939, but since then production has declined and in 1953-54 was approximately 7,000 tons. However, this decrease is offset by the increased use of vegetable tanning extract.

4. *Value of Production.*—(i) *Gross and Local Values, 1953-54.* The values of forestry production on a gross and local basis are shown in the following table for the year 1953-54.

#### GROSS AND LOCAL VALUE OF FORESTRY PRODUCTION, 1953-54.

(£'000.)

State.	Gross Production Valued at Principal Markets.	Marketing Costs.	Gross Production Valued at Place of Production.
New South Wales .. ..	13,315	410	12,905
Victoria .. ..	10,190	715	9,475
Queensland .. ..	9,117	1,320	7,797
South Australia .. ..	4,509	136	4,373
Western Australia .. ..	3,839	224	3,615
Tasmania .. ..	4,085	530	3,555
Australia(a) .. ..	45,055	3,335	41,720

(a) Excludes Australian Capital Territory and Northern Territory, details for which are not available.

No information is available on the value of materials used in the process of production or of depreciation and maintenance charges for 1953-54 and hence it is not possible to calculate net value of forestry production.

(ii) *Local Values, 1934-35 to 1938-39 and 1949-50 to 1953-54.* In the following table the local value of forestry production and the local value per head of population are shown by States for the years 1949-50 to 1953-54 in comparison with the average for the five years ended 1938-39. Local value is gross value less marketing costs and is the value at place of production.

## LOCAL VALUE OF FORESTRY PRODUCTION.

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	Aust.(a)
LOCAL VALUE. (£'000.)							
Average, 1934-35 to 1938-39 (b) ..	2,094	837	2,226	547	1,176	394	7,274
1949-50 ..	7,185	5,570	4,020	2,300	2,021	2,099	23,195
1950-51 ..	8,966	6,437	5,029	2,656	2,908	2,432	28,428
1951-52 ..	12,461	8,479	7,040	3,179	3,689	3,057	37,905
1952-53 ..	13,672	8,904	7,102	3,790	3,328	3,248	40,044
1953-54 ..	12,905	9,475	7,797	4,373	3,615	3,555	41,720

## LOCAL VALUE PER HEAD OF POPULATION. (£ s. d.)

Average, 1934-35 to 1938-39 (b) ..	0 15 7	0 9 1	2 5 2	0 18 7	2 11 8	1 13 9	1 1 4
1949-50 ..	2 5 8	2 11 3	3 8 6	3 6 3	3 14 2	7 12 11	2 17 11
1950-51 ..	2 15 5	2 17 5	4 3 4	3 13 7	5 2 0	8 11 7	3 8 10
1951-52 ..	3 15 3	3 13 5	5 13 7	4 5 6	6 5 1	10 8 5	4 9 3
1952-53 ..	4 1 4	3 15 1	5 11 8	4 18 11	5 8 11	10 14 8	4 12 2
1953-54 ..	3 15 10	3 18 3	5 19 11	5 11 3	5 14 7	11 9 10	4 14 3

(a) Excludes Australian Capital Territory and Northern Territory, details for which are not available.  
 (b) Net value of production (i.e. local value less value of materials used in the course of production) has been included for certain years for Victoria and Western Australia.

5. *Employment.*—(i) *Forestry Operations.* The estimated number of persons employed in forestry operations at 30th June, 1954 is shown in the following table. These estimates, which have been based upon preliminary data from the 1954 Census, include working proprietors, but exclude those employed in the sawmilling industry, for which particulars are shown in the next table.

## ESTIMATED NUMBERS EMPLOYED IN FORESTRY, 30th JUNE, 1954.(a)

(Excluding Sawmilling Industry.)

Sex.	N.S.W. and A.C.T.	Vic.	Q'land.	S. Aust. and N.T.	W. Aust.	Tas.	Aust.
Males ..	4,659	3,902	3,837	921	1,005	955	15,279
Females ..	16	16	11	16	7	1	67
Total ..	4,675	3,918	3,848	937	1,012	956	15,346

(a) Preliminary 1954 Census figures, subject to revision.

(ii) *Milling Operations.* Details of the average number of persons employed, including working proprietors, in the milling operations of sawmills during the year 1953-54 are shown in the next table. Further details regarding the operations of these mills are shown in Chapter IX.—Manufacturing Industry.

## SAWMILLS : AVERAGE NUMBER OF PERSONS EMPLOYED, 1953-54.

Sex.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	Australia (a)
Males ..	9,592	7,134	6,964	1,931	4,222	2,154	31,997
Females ..	355	189	287	135	36	35	1,038
Total ..	9,947	7,323	7,251	2,067	4,258	2,189	33,035

(a) Excludes Northern Territory and Australian Capital Territory, details for which are not available.

## § 6. Imports and Exports of Timber and Tanning Substances.

1. Imports of Dressed and Undressed Timber. The quantities of timber imported into Australia during the years 1950-51 to 1953-54 inclusive are shown in the following table according to countries of origin :—

### IMPORTS OF DRESSED AND UNDRESSED TIMBER INTO AUSTRALIA : COUNTRIES OF ORIGIN. (‘000 Super. feet.)

Country of Origin.	Dressed Timber (a)				Undressed Timber.(b)			
	1950-51	1951-52	1952-53	1953-54	1950-51	1951-52	1952-53	1953-54
United Kingdom ..	43	7	2	7	143	101	57	132
Canada ..	606	9,193	250	..	85,083	77,168	41,928	93,230
New Zealand ..	404	3,235	1,981	1,004	10,709	26,331	8,565	21,984
Other British Countries ..	140	12	67	135	35,877	34,083	21,777	30,648
Indonesia ..	..	..	..	10	1,197	2,280	955	2,523
Norway ..	15,114	12,525	374	3,777	79	395	..	..
Sweden ..	64,700	50,337	7,025	7,352	53,018	26,768	1,127	1,685
United States of America ..	..	7,554	..	..	58,845	115,576	37,560	67,498
Other Foreign Countries ..	4,021	15,786	611	2,017	50,776	47,671	7,170	17,815
Total ..	85,113	107,649	10,310	14,502	304,577	331,293	114,134	244,595

(a) Excludes timber not measured in super. feet.

(b) Includes logs not sawn.

The figures in the table above exclude dressed and undressed timber such as architraves, veneers, plywood, staves, etc., quantities for which either are not shown, or are expressed in dissimilar units in the Customs entries. The total value of the items so excluded amounted to £225,938 in 1953-54.

The bulk of the imports of dressed timber now comes from Sweden, Norway and New Zealand and consists of softwoods cut for making boxes, and tongued and grooved timber, weatherboards, etc. The total value of dressed timber shown in the table above amounted to £962,000 during 1953-54, the major items being timber for box making and tongued and grooved weatherboarding. Undressed timber imported totalled £9,575,000 of which more than 80 per cent. was softwood. The principal undressed timber imported was oregon pine from Canada and the United States of America. The balance was mainly hemlock from North America, pines from New Zealand, Indonesia and the United States of America, and hickory from the United States of America.

2. Exports of Undressed Timber and Railway Sleepers.—The quantities of undressed timber and railway sleepers exported during the years 1950-51 to 1953-54 are shown below, together with the countries of destination.

### EXPORTS OF UNDRESSED TIMBER (a) AND RAILWAY SLEEPERS FROM AUSTRALIA : COUNTRIES OF DESTINATION. (‘000 super. feet.)

Country of Destination.	Undressed Timber (excluding Railway Sleepers).				Railway Sleepers.			
	1950-51	1951-52	1952-53	1953-54	1950-51	1951-52	1952-53	1953-54
United Kingdom ..	7,266	4,840	8,289	5,424	325	217	..	..
Ceylon ..	..	..	5	299	346	..	..	1,979
Mauritius ..	539	187	400	449	..	..	..	375
New Zealand ..	7,536	14,507	26,244	15,121	5,059	4,148	8,136	13,009
Union of South Africa ..	2,854	1,258	2,880	2,897	1,401	97	..	15
Other British Countries ..	2,657	2,966	1,927	3,058	120	286	214	380
Foreign Countries ..	695	105	7,633	2,594	268	..	17	2,723
Australian Produce ..	21,537	23,872	47,492	29,842	7,519	4,748	8,367	18,481
Re-exports ..	299	124	231	514	..	..	..	..
Total ..	21,836	23,996	47,723	30,356	7,519	4,748	8,367	18,481

(a) Excludes timber not measured in super. feet.

Exports of undressed timber were consigned mainly to New Zealand and the United Kingdom, and consisted largely of the Western Australian hardwoods, jarrah and karri, which have earned an excellent reputation for such purposes as harbour works and wood paving, etc. The total value of exports of undressed timber, excluding railway sleepers, during 1953-54 was £1,843,139 (hardwood £1,799,842, softwood £43,297). Railway sleepers exported were valued at £921,101.

3. Classification of Imports and Exports.—(i) *General*. The quantities and values of timber, according to items, imported and exported during the years 1952-53 and 1953-54 are shown in the following table :—

TIMBER : IMPORTS AND EXPORTS, AUSTRALIA.

Item.	Imports.				Exports.			
	1952-53.		1953-54.		1952-53.		1953-54.

(a) Not available.

(ii) *Tanning Bark*. Imports of tanning bark have declined considerably in recent years from a record figure of 105,315 cwt. valued at £53,553 during 1943-44 to 2,634 cwt. valued at £5,245 in 1953-54. Exports, on the other hand, have expanded in recent years. In 1947-48, 1949-50 and 1951-52 exports were nil, but in 1953-54, 31,557 cwt. of tanning bark valued at £57,900 were exported.

The imports of tanning bark consist almost exclusively of wattle bark from the plantations in South Africa. One species of Australian wattle, *Acacia mollissima*, is chiefly relied upon for the production of wattle bark in the South African plantations, most of the seed being obtained from the best wattle bark areas in eastern Tasmania and western Victoria. Two reasons are given to account for the success of the industry in the Union of South Africa :—(a) The suitability of the treeless, grassy highlands of Natal; and (b) the availability of native labour.

(iii) *Other Tanning Substances.* Considerable quantities of tanning substances other than bark are imported annually into Australia. The total value in Australian currency of the imports in 1953-54 was £574,646, and was composed as follows:—tanners' bates, £5,831; wattle bark extract, £443,644; other extracts, £62,734; and valonia, myrobalans, cutch, etc., £62,437.

Exports of tanning extracts and other tanning substances from Australia amounted to £491,818 in 1953-54.

## CHAPTER XXV.

## FISHERIES.

## § 1. General.

1. *Fish Resources.*—The waters surrounding the Australian continent contain a great variety of marine fauna. Despite this, the fish stocks of Australia, in common with those of other countries of the Southern Hemisphere, are small by comparison with the stocks in the Northern Hemisphere. The reasons for this comparative shortage have not been fully explained but it seems clear that the basic factors involved are the absence of large expanses of shallow water and the much lower fertility of the oceans of the Southern Hemisphere.

The existence of greater fish stocks largely explains why approximately 98 per cent. of the world production of fish comes from the Northern Hemisphere. Nevertheless the Australian catch is low even after making allowance for the smaller resources available. Further explanation must be sought in terms of the socio-economic factors which determine the demand for and supply of fish.

By comparison with the populations of other countries, notably those in the Northern Hemisphere, Australians are not large fish eaters. As a result, there is not the pressure on resources so necessary to induce expansion in the fishing industry and to encourage the investment of large amounts of capital. On the other hand, even this somewhat restricted Australian demand for fish cannot be met from purely local sources of supply. The result is that large quantities of fish are imported each year.

This apparent paradox is explained by the fact that the Australian fishing industry has consistently over-exploited some sources of supply and under-exploited others.

Thus, on the one hand, the fisheries in the estuaries of the Australian coasts (the so-called estuarine fisheries) and those offshore for fish that dwell on the bottom of the sea (the demersal fisheries) have frequently been overfished with a consequent diminution of stocks. On the other hand, those species of fish which dwell near the surface of the sea (the pelagic species) have barely been exploited at all.

It is anticipated that the greatest future development of the Australian fishing industry will take place in the pelagic fisheries. However, no great contribution to the supplies of fresh fish can be expected from this source since most of the pelagic species caught are canned or processed.

An increase in the supply of fresh fish available to the Australian consumer will therefore have to come largely from an expansion of the estuarine and demersal fisheries. In view of the over-exploitation of existing estuarine and demersal fisheries, such an expansion will require the development of new fishing areas.

While it is known that promising fishing grounds exist to the south and north of Australia, it appears that the trawling grounds of the Great Australian Bight are the most suitable for development. It is not considered, however, that any great expansion of production can come from this source.

2. *Fishing Areas.*—The principal fishing areas at present are the coastal lakes, streams, estuaries and beaches, from Cairns in Queensland to Ceduna in South Australia, and from Esperance to Geraldton in Western Australia. For the most part, these fishing grounds are associated with the coastal streams. The demersal grounds fall into two classes—(a) the reefs from which cod, snapper, etc. are taken; and (b) the grounds from which flathead, morwong, etc., are taken. The reefs extend intermittently from northern Queensland around the southern part of the continent to Shark Bay in Western Australia. The flathead grounds lie on the continental shelf off south-east Australia, chiefly from Crowdy Head to south of Cape Everard and further off the east Tasmanian coast from Babel Island southwards to Storm Bay. As mentioned in the previous section other demersal grounds exist in the Great Australian Bight but would require large modern trawlers for commercial exploitation. The demersal shark grounds lie principally in Bass Strait and on the continental shelf off eastern South Australia. Other grounds have been located off southern Western Australia.

The grounds of existing pelagic fisheries include that for the Spanish mackerel off the north-eastern coast from about Coff's Harbour to Cairns and that for barracouta in Bass Strait and off eastern Tasmania. Jack mackerel is found in the waters of eastern Tasmania,

the south-east coast of New South Wales, and Western Australia. Tuna is now being taken in commercial quantities on the New South Wales coast.

Of the crustaceans exploited in Australia, crayfish are the most important and are taken on reefs of the continental shelf in the waters of all southern States, the fishery extending (with a major interruption in the Bight) from Port Macquarie in New South Wales to Geraldton in Western Australia. Considerable development has taken place in the crayfish fisheries, particularly in South Australian and Western Australian waters, owing to the opening up of markets in the United States of America for frozen crayfish tails. Crabs of various species are found in practically all coastal waters. Prawns are taken in the temperate waters of Queensland and New South Wales.

In the mollusc group, edible oysters are found in the temperate waters of Queensland, New South Wales and Victoria. Some cropping of natural resources takes place in Queensland, but the principal cultivation grounds are found in New South Wales. The scallop is taken commercially only in Tasmanian waters.

Pearlshell is fished from Cooktown in Northern Queensland, and from Thursday Island, round the north coast of Australia to Exmouth Gulf in Western Australia. Trochus shell is obtained from Mackay in Queensland round the north coast to King Sound in Western Australia.

Whales emigrating from Antarctic waters to their breeding grounds in the warmer waters of low latitudes pass up both the western and eastern coasts of Australia, returning to the Antarctic in the spring. Three whaling stations operate in Western Australia (Pt. Cloates, Babbage Island near Carnarvon and Cheynes Beach near Albany), one in New South Wales (Byron Bay) and one in Queensland (Moreton Bay).

3. **Fishing Boats and Equipment.**—The fishing equipment includes almost every possible type of gear, and appropriate boats are employed. The on-shore equipment includes mesh-nets, trawl-nets, and traps of various types. The demersal reef-fishery is worked with traps, hand lines and long lines. The demersal flathead fishery is worked by both otter trawl (with Vigneron-Dahl gear) and Danish seine; in addition some hand-lining is carried out. The demersal shark fishery is worked by long lines. The pelagic mackerel fishery employs trolling gear with lures of various types, while the pelagic barracouta fishery employs principally barbless jigs. Tuna is taken by trolling and, more recently, by pole fishing with live bait.

The boats for the on-shore fisheries are almost invariably small vessels fitted with low-power petrol engines. The vessels working the reefs are larger (up to 50 feet) and have more power. The otter trawl vessels are steam trawlers, and the Danish seine vessels are 40 to 70 feet in length with diesel engines. The shark boats have diesel power and range from 35 to 50 feet in length.

4. **Administration.**—The fisheries are administered by State Departments while the Commonwealth Fisheries Office, a division of the Department of Primary Industry, co-ordinates fisheries administration and develops the fisheries of Australia.

The administration of the fisheries was discussed in greater detail in Official Year Book No. 41, page 844 and in earlier issues.

## § 2. Development and Present Condition of the Fishery.

1. **Fisheries Proper.**—(i) *General.* The development of Australian fisheries has almost invariably followed the same sequence at each centre. The earliest fisheries were on-shore followed by demersal reef fishing using long lines. Trawling operations have followed line fishing in suitable areas and more recently again the exploitation of pelagic fisheries has commenced.

Until about 1900 the expansion of the industry consisted chiefly of the extension of on-shore and demersal fishing with long lines into areas previously unworked. Barracouta was fished in Tasmanian waters at least by 1880, if not earlier, although the main development of this fishery occurred towards the end of the 1939-45 War and post-war to meet demands for canned fish.

The first major development of the industry came with the institution of trawling operations off the New South Wales coast in 1918 by the New South Wales Government. The State enterprise failed, but the fishery was found very profitable by private enterprise.

In 1936 the use of Danish seine vessels began and the fleet of these vessels rapidly expanded, and in 1946 (after the return of vessels requisitioned in war-time) a peak was reached when thirteen steam trawlers and 120 Danish seine vessels were licensed. The total catch of trawled fish in 1946-47 was 16,000,000 lb. Of the species taken by the trawl fishery, tiger flathead, morwong and nannygai are the most important and of these flathead may be regarded as the prime fish and commands a higher price. Since 1917 the composition of the catch has changed, because of depletion of the flathead stocks, and the lower-priced fish have become a larger proportion of the catch. In 1954-55 six steam trawlers (all based at Sydney but fishing right down the coast to Bass Strait) and a considerably larger number of Danish seine vessels in New South Wales and Victoria were engaged in the trawl fishery.

In Queensland waters since 1930 the Spanish mackerel has been taken by line fishermen, operating in off-shore waters out to the Barrier Reef between Gladstone and Cairns.

In 1930 also, fishing for snapper shark commenced in south-eastern waters, particularly off the Victorian and Tasmanian coasts. This fishery rapidly extended its area of operations, and by 1953-54 the catch of edible sharks had reached 8,600,000 lb. round weight. Great impetus was given to the fishery during war years by the demand for livers for fish oil production for medicinal purposes. Demand eased with the return of cod-liver oil and availability of synthetic vitamin "A". In 1955, processors ceased accepting shark livers because of availability of imported oils and synthetics at cheaper prices. The shark fishery is still important, however, as its flesh, which is sold as "flake", brings substantial prices, mainly in Melbourne.

As far as pelagic fisheries are concerned, pilchards occur in the southern waters of Australia from Port Stephens to the south-west of Western Australia. Commercial catches have been made with lampara nets and to a lesser extent with purse seines. Anchovies in Port Phillip Bay and sprats in Tasmanian waters are caught in payable quantities, though there is usually some difficulty in finding a market for them. Jack mackerel have been caught in commercial quantities off the east coast of Tasmania and off Eden in New South Wales.

The tuna fishery was established on the New South Wales coast during 1949, when fishermen, using improvised trolling gear, caught 1,000 tons of southern blue-fin tuna. The catch was canned at Eden and Narooma and some was frozen raw and sold direct to Californian canneries. The American-owned tuna clipper *Senibua*, whose operations were subsidized by the Commonwealth, demonstrated that Australian tunas could be caught by pole fishing with live bait. In 1955, 40 tuna boats were operating on the south coast of New South Wales, but their catch was limited by the canneries to quantities which could be marketed in canned form in Australia and overseas. The price of raw tuna in California was reduced below the level necessary to make export profitable. In 1955, a new plant on the south coast of New South Wales began producing smoked and cooked tuna, this giving further support to the tuna fishery.

Southern blue-fin tuna occurs all along the southern coastline of the continent. In addition, albacore, yellow-fin, striped (skipjack) and northern bluefin tuna occur, but their capture has not been developed.

(ii) *Production.* The statistics of production published in this issue of the Official Year Book are not fully comparable with those published in earlier issues. Previously production has been shown in "recorded" weights, whereas in this issue "round" or "gross" weights have been used. The change to round weights makes use of conversion factors, which allow for the fact that weights as recorded are frequently the weight of the fish in a gutted, headed and gutted, or otherwise reduced condition.

Publication on a round weight basis has been made possible largely as a result of the efforts of the Commonwealth Fisheries Office.

In interpreting Australian fisheries statistics, allowance should be made for the incomplete coverage. Returns are collected in most States from licensed professional fishermen only, and as a result the published totals fall short of total fish production to the extent of the catch by amateur fishermen, the commercial catch by persons not licensed as professional fishermen and unrecorded catch by professional fishermen.

Production by States for the years 1950-51 to 1953-54 is shown in the following table on a round weight basis.

**RECORDED PRODUCTION OF FISH.**  
(EQUIVALENT ROUND WEIGHT.)  
(‘000 lb.)

State.	1950-51.	1951-52.	1952-53.	1953-54.
New South Wales .. ..	26,333	28,331	32,660	32,332
Victoria(a) .. ..	12,044	13,285	13,069	13,820
Queensland .. ..	9,454	9,594	11,354	10,525
South Australia .. ..	6,874	7,856	8,102	8,317
Western Australia .. ..	8,652	7,344	9,225	10,913
Tasmania(a) .. ..	7,924	5,162	6,882	2,821
Northern Territory .. ..	56	62	87	100
Total .. ..	(b) 71,337	71,634	81,379	78,828

(a) Catch by Victorian fishermen in Tasmanian waters is included in Victoria from 1951-52 onwards.

(b) Incomplete, excludes catch by Victorian fishermen in Tasmanian waters.

In the following table total Australian recorded production of fish by species is shown in terms of equivalent round weight for each of the years 1950-51 to 1953-54, details by States also being shown for the latter year. As an aid to identification scientific names have been listed in addition to common names. Data on catch by species is not available for years prior to 1950-51 and has not been published in previous issues of the Year Book.

(a) Catch by Victorian fishermen in Tasmanian waters is included in Victoria.

(b) Incomplete; excludes catch by Victorian fishermen in Tasmanian waters, details of which are not available.

(c) Less than 500 lb.

(d) Includes Northern Territory production—species details not available.

2. **Crustaceans and Molluscs.**—Crayfish are taken (in pots) in all States other than Queensland. Cray fisheries have developed greatly since the War to take advantage of the market in the United States of America for frozen crayfish tails, the total catch increasing from approximately 3 million lb. in 1945-46 to 17.4 million lb. in 1953-54.

Prawns are taken by otter trawl in the waters of New South Wales, Queensland and Western Australia. Prawns have been found in considerable quantity in the ocean waters of northern New South Wales and southern Queensland. An important development is anticipated with improvement of handling and distribution and opening up of overseas markets.

Initially the Australian oyster fisheries depended solely upon the harvesting of naturally grown stock in littoral and submarine areas. However, the stocks soon deteriorated and attention was turned to methods of cultivation. This is carried on mainly in New South Wales where there has been constant improvement in methods, and the present technique in certain areas is highly efficient. The production for Australia in 1953-54 was 9,688,000 lb. (in shell). Scallops are taken by dredge in the D'Entrecasteaux Channel in Tasmania.

Details of production of crustaceans and molluscs are shown in the table below on a gross (in-shell) weight basis for each year 1950-51 to 1953-54, details by States being also shown for the latter year.

(a) Catch by Victorian fishermen in Tasmanian waters is included in Victoria. (b) Incomplete; excludes catch by Victorian fishermen in Tasmanian waters, details of which are not available.

3. **Pearl-shell and Trochus.**—The industry, which ceased operations on Japan entry into the war in December, 1941, did not resume on a commercial basis at Queensland centres until late in 1945, and at Western Australian centres until 1946, while operations off the Northern Territory coast were not resumed until 1948.

Before the war a large proportion of the key men were Japanese; the others included Malays, Chinese, Koepangers, Filipinos, Papuans and Torres Straits Islanders. On the resumption of operations without the Japanese, the labour available was, with few exceptions, inefficient. Queensland with a more ready source of labour from the Torres Strait Islands and mainland was able to expand its fishing more rapidly, and in the 1949 season, achieved its second highest pearl shell production on record. The expansion of the industry at Darwin has been retarded by the fact that the key men lack the local knowledge acquired by the Japanese. Western Australian centres also suffered from lack of skilled labour. In 1953 the Commonwealth permitted the employment at Broome, under certain conditions, of 35 Japanese divers, tenders and engine-drivers.

In 1953 a Japanese fleet, which had been pearling in the Arafura Sea while a Japanese Mission in Canberra was discussing a fisheries agreement with the Australian Government, moved into an area in which they had been asked not to fish. Their action was regarded

as having broken off the negotiations, and proclamations were issued in September 1953 declaring Australia's sovereign rights over the natural resources of the sea bed and sub-soil of the Continental Shelf adjoining Australia, its territories and the Trust Territory of New Guinea. In September the Pearl Fisheries Act 1952-53, providing for licensing and control of pearling, was brought into operation.

Japan disputed Australia's right to apply this legislation to foreign ships, and Australia agreed to refer the dispute to the International Court of Justice on condition that meantime Japanese pearling in Australian waters would be conducted in conformity with the Australian Government's policy of regulation and conservation, and that Japan would abide by the Court's decision. On these conditions, a Japanese pearling fleet operated in prescribed waters in 1954 and again in 1955.

Australian production of pearl-shell and trochus-shell was 2,337,000 lb. and 3,057,000 lb. respectively in 1953-54. In addition, Japanese pearlers took 2,110,000 lb. of pearl-shell in Australian waters.

Reference to inquiries into the pearl-shell fishing industry by a Royal Commission in 1912, and by the Tariff Board in 1935, appears on page 1031 of Official Year Book No. 37.

### § 3. Marketing and Distribution.

1. **Marketing.**—The greater portion of Australian fish is sold in metropolitan markets. In Queensland, fish marketing is under the control of a Fish Board, which has representatives of producers, wholesalers and consumers, and a Government nominee as chairman. A central market is located in Brisbane and there are branch markets or depots at fourteen centres along the coast. The organization ensures that all fish is marketed through these channels, and the board has encouraged to a very marked extent the steadily increasing fish production of the State. The fish marketing methods in this State have proved successful. In New South Wales the central market in Sydney is conducted by the Chief Secretary's Department, and the port depots in various centres along the coast by fishermen's co-operatives. These co-operatives distribute some of their fish to local centres and to inland country districts, and send the balance to the central market in Sydney. In Victoria, South Australia and Western Australia, fish is sold in central markets by agents. The greater part of the catch of fish in Tasmania is either processed in canneries in that State or exported to the mainland. There is some interstate export of fish from the northern rivers of New South Wales to Queensland, from Tasmania to New South Wales and Victoria, and from South Australia to Victoria.

2. **Consumption of Fish.**—Prior to the 1939-45 War, Australians consumed annually the fresh and canned equivalent of about 131 million lb. of round fish, or 19.0 lb. per person. About 70 million lb. were produced locally and the remainder was imported. Total consumption (including canned and cured) during 1953-54 is estimated at 87.3 million lb. edible weight (9 8 lb. per head) as compared with 69.9 million lb. edible weight (8 0 lb. per head) in the previous year. This is equivalent to approximately 172.3 million lb. fresh round weight (19.4 lb. per head) and 141.8 million lb. fresh round weight (16.2 lb. per head) respectively. Fish is not, as in many countries, a staple item in the diet of Australians and, away from the seaboard, is still regarded as rather a luxury.

3. **Processing, including Canning.**—The equipment for handling fish was in the past rather inadequate, but in most States cold storage facilities have been improved and increased in recent years. In Queensland and New South Wales, particularly, the depots which have been established at fishing ports have been equipped with cold storage space. In several States there has been a development of establishments equipped for snap freezing of fish, in particular the freezing of crayfish tails for export. A number of vessels have been equipped with freezing plants to process crayfish at sea.

In all States there has been a development of facilities for light processing of fish.

Reference to the production of processed fish and number of factories operating will be found in § 5, para. 4, page 980. Considerable expansion has taken place in the industry, particularly since 1945-46. In 1938-39, three factories processed 1,472,592 lb. of fish valued at £29,581, whereas in 1953-54 eleven factories processed 10,988,393 lb., valued at £350,114.

4. **By-products.**—Processing of offal for fish-meals, etc., has been established in certain States. The processing of livers for vitamin-rich oils was undertaken in several States but as mentioned previously has now been discontinued.

## § 4. Inquiries and Research.

1. **General.**—The Australian fishing industry has been the subject of a number of official inquiries seeking an explanation of the very slow rate of development and the unfortunate conditions prevailing within the industry as well as the paucity of supplies available to the public. Details of the inquiries undertaken, the recommendations arising from them, and subsequent developments will be found in Official Year Book No. 38, page 1082.

2. **Commonwealth Scientific and Industrial Research Organization, Division of Fisheries and Oceanography.**—Details of the establishment, organization and functions of the Division of Fisheries of the Commonwealth Scientific and Industrial Research Organization will be found in Official Year Book No. 38, page 1083. The scientific basis on which the work of the Division is carried out has now been widened, and to provide for this, the name of the Division has been amended to "Division of Fisheries and Oceanography".

Research carried out by the Division has assisted greatly in the development and preservation of Australian fisheries. Details may be found in Official Year Book No. 41 page 848 and in previous issues.

3. **Commonwealth Fisheries Office.**—The Commonwealth Fisheries Office, a division of the Department of Primary Industry, arose out of a Tariff Board recommendation in 1941, following a public inquiry into the fishing industry, that a Commonwealth developmental authority should be established. Details of the establishment, organization and functions of the office will be found in Official Year Book No. 38, page 1084.

In accordance with the Tariff Board report, scientific research, as distinct from developmental and administrative functions, was left to the Commonwealth Scientific and Industrial Research Organization which had established a Division of Fisheries for this purpose in 1937.

The Commonwealth is responsible for extra-territorial waters, whaling, pearling, rehabilitation of ex-servicemen in the fishing industry, fishery training schools, commercial development of fisheries, promotion of uniform conditions governing catches of various species of fish, statistics, information and publications.

4. **North Australia Development Committee.**—In 1946 the North Australia Development Committee recommended that a hydrological and oceanographical survey should be made of North Australian waters. It also suggested that a biological survey should be made of the pearl oyster with particular reference to the possibility of instituting pearl culture.

Further reference to these and other recommendations may be found in Official Year Book No. 41, p. 848.

The C.S.I.R.O. Division of Fisheries subsequently set up a biological research station on Thursday Island, mainly for the pearl and pearl-shell investigations. Since 1951 a research vessel has been based on Thursday Island and is used for diving, biological and hydrological work.

5. Whaling.—The Commonwealth Fisheries Office carried out extensive investigational and preparatory work for the establishment of an Australian whaling industry. In 1949 a privately-owned station began operating at Pt. Cloates, Western Australia. The same year the Australian Whaling Commission was established. The Commission built a station at Babbage Island, near Carnarvon, Western Australia, but it did not begin operating until almost the end of the 1950 season. Legislation has now been passed to provide for the dissolution of the Commission, for the sale of its assets to the company operating at Pt. Cloates and for the use of the proceeds of the sale in developing the Australian fishing industry. There is also a small station in Western Australia at Cheynes Beach near Albany. A large station began operating in 1952 at Moreton Island (Queensland), and in 1954 a small station began operating at Byron Bay (New South Wales). In 1954 these five stations processed 2,039 whales, producing whale oil and other products valued at £1,960,000. A table showing statistics of whaling operations appears in §5, para. 2 following.

The Director of Fisheries represents Australia on the International Whaling Commission, which controls whaling throughout the world.

### § 5. The Fishing and Whaling Industry—Statistics.

1. Fisheries.—(i) *Quantity and Gross Value of Take.* Recorded production for all fisheries is shown in the following table.

#### RECORDED FISHERIES PRODUCTION: QUANTITY AND GROSS VALUE OF TAKE.

Particulars.	Unit.	1950-51.	1951-52.	1952-53.	1953-54.

(a) Catch by Victorian fishermen in Tasmanian waters is included in Victoria. (b) Includes Northern Territory; 100,000 lb. of fish valued at £10,000 and 371,000 lb. of pearl-shell valued at £60,000. (c) Incomplete; excludes catch by Victorian fishermen in Tasmanian waters, details of which are not available. (d) Squid, clam and pipi. (e) Western Australia. season ended 15th December. Northern Territory, season ended 31st January.

(ii) *Boats and Men Engaged, etc.* The following table shows particulars of boats and equipment used and persons engaged in the various fisheries. Details relating to oyster leases are also shown.

## FISHERIES: BOATS AND EQUIPMENT IN USE AND PERSONS ENGAGED.

(a) Year ended 31st Dec., 1953. (b) Includes Crustacean and Scallop Fisheries. (c) Value of boats engaged in Oyster Fisheries is included in General Fisheries. (d) Less than £500. (e) As at 30th June, 1954. (f) Length of foreshore in leases not available for Queensland. (g) Also (in N.S.W.) 5,628 acres offshore in 1950-51; 5,749 in 1951-52; 5,888 in 1952-53; and 6,296 in 1953-54.

2. Whaling.—The information summarized in the table below was supplied by the Commonwealth Fisheries Office. Details relate to seasons extending from about May to October of each year.

## WHALING STATISTICS, AUSTRALIA.

Particulars.	Unit.	1950.	1951.	1952.	1953.	1954.
Seasonal Quota(a)	No.	(b)	1,250	1,850	2,000	2,040
Whales Taken	..	388	1,224	1,787	2,001	(c) 2,039
Whales Processed	..	387	1,220	1,780	2,001	(c) 2,039
Average Length of Whales Processed	ft.	40.4	40.3	40.1	40.0	39.8
Average Oil Production per Whale Processed	Barrel d	42.6	45.0	51.3	51.2	49.1
Persons Employed—at Sea	No.	48	48	110	110	114
Persons Employed—Ashore	..	170	230	390	390	400
Whale Oil Produced—Quantity	Barrel d	16,494	56,051	91,360	102,354	100,068
Whale Products—Value	£'000	362	1,601	1,670	1,803	1,960

(a) In terms of humpback whales, as determined by the Minister for Primary Industry, acting on the advice of the Director of Fisheries. For quota purposes, 1 blue whale is taken as equivalent to 2 fin whales, 2½ humpback whales or 6 sei whales. (b) Quotas did not operate. (c) Includes one blue whale. (d) 6 barrels = 1 ton.

3. Value of Production.—(i) *Gross and Local Values, 1953-54.* Although statistics of the value of production of the fishing industry have been on an established basis for some years, attention is drawn to the fact that the actual collection of statistics of the quantity of fish taken presents many difficulties and consequently any defects which may occur in the collection must necessarily be reflected in the value of production. Particulars of the value of other materials used in the process of production are not available for all

States, so the values can only be stated at the point of production and not on a net basis as has been done with other industries. Variations in the relative proportions of marketing costs to gross production suggest that complete uniformity in method has not yet been attained.

### GROSS AND LOCAL VALUE OF PRODUCTION ; FISHING AND WHALING, 1953-54.

(£'000.)

State.					Gross Production Valued at Principal Markets.	Marketing Costs.	Gross Production Valued at Place of Production.
New South Wales	..	..	..	..	3,179	537	2,642
Victoria	..	..	..	..	986	152	834
Queensland	..	..	..	..	1,221	270	951
South Australia	..	..	..	..	1,143	128	1,015
Western Australia	..	..	..	..	1,904	37	1,867
Tasmania	..	..	..	..	432	..	432
Total	..	..	..	..	8,865	1,124	7,741

(ii) *Local Values, 1934-35 to 1938-39 (Average) and 1949-50 to 1953-54.* In the following table the local value of fisheries production and the local value per head of population are shown by States for the average of years 1934-35 to 1938-39 and for each of the years 1949-50 to 1953-54. Local value is gross value less marketing costs and is the value at the place of production. Because the value of materials used in the course of production is not available for all States it is not possible to show a comparison of net values.

### LOCAL VALUE OF FISHING AND WHALING PRODUCTION.

Year.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Total.
-------	--------	------	---------	----------	----------	------	--------

LOCAL VALUE.

1953-54 ..	15 6	6 10	14 7	25 10	59 2	27 11	17 6

4. *Fish Preserving.*—The attempt to establish the fish preserving industry at the commencement of this century met with little success although a bounty was paid to encourage production. The industry, however, continued to operate, but there was

no marked development until about 1945-46 when the production of canned fish amounted to 1,700,000 lb. After that year production increased considerably and reached a peak of 10,900,000 lb. in 1948-49, but by 1950-51 it had declined to 7,300,000 lb. It increased again to 7,700,000 lb. in 1952-53, but declined again to 6,600,000 lb. in 1953-54.

In addition to the canning of fish, other fish products are produced. In 1953-54 these included 286,000 lb. of smoked fish, 1,128,000 lb. of fish paste and a considerable quantity of frozen crayfish tails for export.

In 1939 New South Wales and Tasmania were the only States canning fish, but the industry has since been extended to Victoria, South Australia and Western Australia. Details of production are given in the following table for the years 1938-39 and 1949-50 to 1953-54.

#### PRODUCTION OF CANNED FISH (a) : AUSTRALIA.

Particulars.	1938-39.	1949-50.	1950-51.	1951-52.	1952-53.	1953-54.
Number of factories operating ..	3	15	18	17	13	11
Quantity produced lb.	603,302	7,442,521	7,279,033	7,294,622	7,705,081	6,604,587
Value .. £	13,700	676,812	723,689	965,100	1,020,307	838,179

(a) Including the canning of fish loaf and crustaceans.

The varieties canned in the several States differ according to the species caught, but separate details for each variety are not available. In New South Wales, Australian salmon and tuna are the principal varieties. Barracouta is of major importance in Victoria and Tasmania; and Australian salmon predominates in South Australia and Western Australia; herrings are also important in the latter State.

5 State Revenue from Fisheries.—The revenue from fisheries during the year 1953-54 was £66,420, compared with £63,552 in 1952-53 and £34,273 in 1938-39. Of the total of £66,420 in 1953-54, New South Wales collected £31,779, Victoria £3,980, Queensland £13,181, South Australia £4,397, Western Australia (year ended December, 1953) £7,734, Tasmania £5,204 and Northern Territory £145.

### § 6. Oversea Trade in Fishery Products.

NOTE.—Values of Australian oversea trade shown in this section are expressed in £A. f.o.b., port of shipment.

1. Imports of Fish.—The equivalent, in the round, of imported fish consumed in Australia in 1953-54 was 33 per cent. of the total consumption. Particulars of the imports of fish are shown below for the years 1949-50 to 1953-54 in comparison with 1938-39.

#### FISH (INCLUDING SHELL FISH) : IMPORTS INTO AUSTRALIA.

(Cwt.)

Classification.	1938-39.	1949-50.	1950-51.	1951-52.	1952-53.	1953-54.
Fresh or preserved by cold process ..	84,028	59,152	103,926	150,972	86,397	140,787
Potted or concentrated ..	9,435	1,908	1,959	1,766	583	1,359
Preserved in Tins—						
Fish—						
Herrings ..	38,917	81,569	95,227	88,149	20,030	61,277
Pilchards ..	(a)	735	930	4,041	462	845
Salmon ..	166,695	14,848	14,923	20,387	24,855	27,339
Sardines (including Sild)	29,372	50,253	80,645	70,334	3,380	40,850
Other ..	14,306	5,974	4,535	15,455	916	3,459
Shell Fish—						
Crustaceans ..	6,829	2,386	6,194	3,308	2,150	4,141
Oysters ..	1,939	59	121	198	115	272
Other ..	(a)	201	74	225	113	137
Smoked or Dried (not salted)	8,122	70,524	64,099	56,235	55,929	50,291
Other (including salted) ..	7,987	8,577	8,655	11,911	6,878	11,296

(a) Not recorded separately.

The value of fish and fish products imported during 1953-54 amounted to £4,104,000, compared with £1,470,854 in 1938-39.

Canned fish (total imports of which in 1953-54 were valued at £2,442,768) constituted the largest proportion of the imports; salmon from the U.S.S.R. and Japan, herrings from the United Kingdom and Norway, pilchards from the Union of South Africa and sardines from Norway were the chief varieties imported. A considerable proportion of the fresh fish imported in 1953-54 came from the United Kingdom, the Union of South Africa and New Zealand, and the potted fish came chiefly from the United Kingdom; the bulk of the remainder came from South Africa, the United Kingdom and New Zealand.

2. **Exports of Fish.**—During 1953-54 the exports of fish of Australian origin were as follows:—Fresh or frozen crustaceans, 38,625 cwt., £1,553,667; other fish, fresh or preserved by cold process, 395 cwt., £4,284; oysters in shell, 261 cwt., £5,365; potted or concentrated, 67 cwt., £2,101; fish preserved in tins, 5,771 cwt., £137,432; shell fish in tins, 541 cwt., £22,238; smoked or dried, 91 cwt., £1,316, and other fish, 74 cwt., £1,304.

3. **Exports of Pearl and other Shell.**—The exports of pearl, trochus and other shell of Australian origin are shown hereunder for the years 1938-39 and 1949-50 to 1953-54.

**PEARL, TROCHUS AND OTHER SHELL : EXPORTS FROM AUSTRALIA.**

## CHAPTER XXVI.

### MINERAL INDUSTRY.

#### § 1. The Mineral Wealth of Australia.

1. *Place of Mining in Australian Development.*—The discovery of gold in payable quantities first attracted population to Australia in large numbers and was thus a significant factor in its early development. In more recent times the rapid growth of Australia's secondary industries has been associated with considerable expansion in mining for silver-lead-zinc, copper and iron ores, and coal. However, the value of mineral production has lagged behind that recorded for Australia's large rural industries and in 1953 represented only about 10 per cent. of the net value of production of all primary industries.

2. *Extent of Mineral Wealth.*—The extent of the mineral wealth of Australia, as in any country, is not determined fully at any point in time. Regional and detailed investigations are being carried out by the Commonwealth Bureau of Mineral Resources, Geology and Geophysics, by the Geological Surveys of the State Governments and by the exploration departments of mining companies but large areas of the country still await geological survey. Important prospects of copper, iron, lead and zinc, oil, uranium ore, bauxite (aluminium ore) and some other minerals have been recorded recently and are being investigated in detail.

3. *Standardization of Mineral Statistics.*—At the 1945 Conference of Australian Statisticians, consideration was given to the defective nature of Australian mineral production statistics arising from the widely differing methods adopted by individual States in collecting, compiling and publishing the data. Further attention was given to the problem by a conference in 1948 of officers of the Bureau of Mineral Resources, Geology and Geophysics, State Mines Departments and State and Commonwealth Statistical Bureaux. Following work subsequently undertaken by the Bureau of Mineral Resources, the Commonwealth Bureau of Census and Statistics and other authorities concerned, a specific plan for standardization of Australian mineral production statistics was adopted in 1950. In accordance with the plan, numerous improvements have been introduced and with the introduction of annual Australia-wide industrial censuses for mining and quarrying in 1952, Australian mineral statistics are now considered to be adequate for present needs. It should be noted that the statistics included in this chapter omit particulars relating to uranium-bearing minerals.

The fundamental provision of the plan for standardization of Australian mineral statistics is that quantities and values of individual minerals produced should be reported in terms of the products in the form in which they are despatched from the locality of each mine. This involves the inclusion in the mining industry of ore-dressing and elementary smelting of metallic minerals (e.g., in the case of gold) and miscellaneous treatment of non-metallic minerals, where these operations are carried out in an associated plant at or near the mine. For example, in the case of a metal mine, the output is recorded as ore when no treatment is undertaken at the mine or as a concentrate where ore-dressing operations are carried out in associated works in the locality of the mine. In addition to the basic quantity data, the plan provides for the reporting of contents of metallic minerals and of contents or average grade of selected non-metallic minerals. Wherever practicable, contents (based on assay) of metallic minerals are shown for each metal which is a "pay metal" or a "refiners' prize" when present in the particular mineral.

For the purpose of compiling and publishing data relating to employment, value of output, value of production, etc., a detailed statistical classification for the mining industry has been used in Australia from 1950. For the purpose of this classification, the "Mining Industry" includes all mining and quarrying and the recovery of minerals from ore dumps, tailings, etc. As mentioned above, ore dressing and miscellaneous treatment of non-metallic minerals (where these are carried out in an associated plant at or near the mine) are included in the Mining Industry. However, establishments primarily engaged in smelting and/or refining (including the smelting and refining sections of the large plants operated at Mt. Morgan and Mt. Isa in Queensland and at Mt. Lyell in Tasmania) are omitted and classified to the Manufacturing Industry. The classification divides the industry into four major groups, namely, Metal Mining, Fuel Mining, Non-metal (excluding Fuel) Mining and Construction Material Quarrying.

The adoption of revised methods of compiling and presenting mineral statistics in 1950 caused a break in continuity of the data published for earlier years, and the introduction of industrial censuses of the mining and quarrying industry in all States in 1952 has caused a further break in continuity of data, particularly those relating to values.

4. **Quantity and Value of Minerals Produced, 1954.**—(i) *Quantities.* In the following table particulars of the quantities of principal minerals produced are shown for each State and the Northern Territory for 1954.

In the main, the data consist of official statistics of Mines Departments furnished to this Bureau by the Statisticians of the several States and by the Northern Territory Mines Branch. These statistics have been supplemented, as necessary, by data obtained from the Australian Mines and Metals Association (Inc.), the Bureau of Mineral Resources, Geology and Geophysics and several other sources. The particulars shown have been compiled as far as practicable on the standardized basis outlined in para. 3 above. This has involved some re-arrangement of official statistics published by Mines Departments for some States.

In these tables individual minerals are arranged in four groups, **Metallic Minerals**, **Fuel Minerals**, **Non-metallic (excluding Fuel) Minerals** and **Construction Materials**, to correspond with the major groups of the statistical classification of the mining industry.

The particulars shown in the group "Construction Materials" cover, broadly, data similar to those previously included under the heading of "Quarries".

(a) Mine production of metals. (b) Estimated. (c) Total sulphur content of zinc concentrate and pyrite produced and of spent oxide roasted.

6. Value of Output and Value of Production for Mining and Quarrying.—(i) *Individual Industries*, 1953. The following two tables show particulars of the value of output and value of production of individual mining and quarrying industries and for all mining and quarrying for the year 1953. The data were obtained from industrial censuses of the mining and quarrying industry which were made on a substantially uniform basis in all States and Territories for the year 1953.

### MINING AND QUARRYING : VALUE OF OUTPUT(a), 1953. (£'000.)

(a) Value of output at mine, less cost of power, fuel, light and other materials and stores used; depreciation and maintenance costs have not been deducted. (b) Less than £500. (c) Not available for publication. (d) Cost of power, fuel, light and other materials have not been deducted. (e) Incomplete. (f) Excludes quarries primarily engaged in obtaining construction material. (g) Not available. (h) Year ended 30th June, 1953. (i) Year ended 30th June, 1954. (j) Includes £92,000 for the Australian Capital Territory.

(ii) *States, 1939 and 1949 to 1953.* Values for individual minerals produced based on estimated selling value at the mine or quarry are shown for the year 1954 in para. 4 (iii) above. Australian State and Commonwealth Statisticians have for many years used values for mine and refinery products as recorded by Mines Departments and other relevant data (including censuses of the industry in some States) to estimate value of output and value of production for the mining and quarrying industry as a whole. The following table shows estimates on this basis for the years 1939 and 1949 to 1951 together with the values ascertained from the Australia-wide mineral industry censuses of 1952 and 1953. The estimates for 1951 and the earlier years shown are approximate, and as value added in ore-dressing and similar treatment plants situated at or near the mine was excluded in some cases, they are not strictly comparable with the 1952 and 1953 valuations which consistently include the value of such mine treatment. The Northern Territory is omitted for years prior to 1952 and the Australian Capital Territory for years prior to 1953.

(a) Selling value of mine and quarry products at the mine or quarry. (b) Not available.  
(c) Value of output less cost of power, fuel, light and other materials and stores used; depreciation and maintenance costs have not been deducted. (d) Value of output; value of production not available.

7. Industrial Census of the Mining and Quarrying Industry, 1953.—Industrial censuses of the mining and quarrying industry (covering employment, salaries and wages paid, fixed assets, value of output, costs of materials used, etc.) have been taken in some Australian States for many years, but on different bases. In 1952 and 1953 censuses were taken in all States and Territories on a substantially uniform basis, thus providing important Australian statistics on mining and quarrying operations which were not previously available. A summary of the statistics collected in 1953 is shown in the following table.

**MINING AND QUARRYING : SUMMARY OF OPERATIONS, AUSTRALIA, 1953.**

Particulars.	Unit.	Metal Mining.	Fuel Mining.	Non-metal (excluding fuel) Mining. (a)	Total, All Mining.	Construction Material Quarrying. (b)	Total All Mining and Quarrying.
Mines and Quarries ..	No.	1,099	285	703	2,087	679	2,766
Persons Employed (c) ..	"	21,594	28,204	2,046	52,744	3,803	56,547

(a) Average number employed (including working proprietors) during whole year. (b) Excludes mines and quarries employing less than four persons (less than five persons in Western Australia). (c) Excludes drawings by working proprietors; the amounts are net after deducting value of explosives sold to own employees. (d) Value at mine or quarry. (e) Includes value of explosives sold to own employees. (f) Value of output less cost of power, fuel and light and other materials and stores used; depreciation and maintenance costs have not been deducted. (g) Depreciated value (i.e. book value less any depreciation reserves) at end of year.

## § 2. Gold.

1. **Discovery in Various States.**—A detailed account of the discovery of gold in the various States appears under this section in Official Year Books Nos. 1 to 4.

2. **Mine Production.**—The following table shows the recorded mine production of gold (i.e., gold content of minerals produced) in the several States and in Australia as a whole during each of the ten decennial periods from 1851 to 1950, and in single years from 1951 to 1954. Owing to defective information in the earlier years it is likely that the recorded production falls considerably short of the actual totals.

## GOLD : MINE PRODUCTION.(a)

('000 fine oz.)

Period.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	Aust

1954 ..	32	53	98	(b)	862	19	54	1,118
Total, 1851-1954..	16,290	73,452	22,259	450	56,522	2,464	960	172,397

(a) Gold content of minerals produced.

(b) Less than 500 fine ounces.

The amount of gold raised in Australia in any one year attained its maximum in 1903, when Western Australia also reached its highest point. For the other States the years in which the greatest yields were obtained were as follows:—New South Wales, 1852; Victoria, 1856; Queensland, 1900; South Australia, 1904; and Tasmania, 1899.

Owing to the exhaustion of the more easily worked deposits and increased costs due to deep mining the production of gold in Australia declined from 3,837,979 fine oz. in 1903 to 427,160 fine oz. in 1929, the lowest output since its discovery.

Increased activity in prospecting due to prevailing economic conditions resulted in some improvement in 1930, but the marked development between that year and 1939 was caused by the heavy depreciation of Australian currency in terms of gold. Following the outbreak of the 1939-45 War there was a sharp fall in gold production to 656,867 fine oz. in 1944 and 657,213 fine oz. in 1945, but with the release of man-power after the war there has been a slight upward trend in mine production of gold, which, in 1953, exceeded 1,000,000 fine oz. for the first time since 1942. The devaluation of Australian currency in September, 1949 gave an impetus to gold production, but this was offset in the following years by increasing costs which brought about the closing of several large producers in New South Wales, Victoria and Western Australia. To enable the industry to meet the increase in costs, sales of gold on overseas premium markets at prices in excess of the official price were permitted from December, 1951. During 1952 and 1953, premium sales of gold brought an additional return to the industry amounting to about £1,800,000, but towards the end of 1953 the price of gold on overseas premium markets fell sharply and subsequent sales have been made at prices very little above the official price. This had an adverse effect on the financial position of the gold-mining industry and the Commonwealth Government passed the Gold-Mining Industry Assistance Act in 1954 to prevent any serious decline in gold-mining activity. Despite the difficulties referred to above, the production of gold in Australia has increased in each successive year since 1951, mainly owing to increased output in Western Australia, Northern Territory and Queensland.

3. **Refinery Production.**—The quantities and values of the refinery production of new gold of Australian origin are shown in the following table for each of the years 1945 to 1954. The value of the refined new gold is based on the price fixed by the Commonwealth Bank, but allowance is made in the 1952, 1953 and 1954 figures for premiums on sales of gold overseas and for industrial purposes in Australia.

**GOLD : REFINERY PRODUCTION OF NEWLY WON GOLD OF AUSTRALIAN ORIGIN.**

Year.	Quantity.	Value.	Year.	Quantity.	Value.
	'000. fine oz.	£'000.		'000. fine oz.	£'000.
1945 .. ..	613	6,556	1950 .. ..	844	13,077
1946 .. ..	820	8,830	1951 .. ..	850	13,172
1947 .. ..	969	10,430	1952 .. ..	979	16,037
1948 .. ..	884	9,517	1953 .. ..	1,053	16,780
1949 .. ..	879	10,670	1954 .. ..	1,063	16,521

The unit value of refinery production of newly won gold of Australian origin rose to £12 2s. 10d. in 1949 as a result of the increase in the price to £15 9s. 10d. per fine oz. fixed by the Commonwealth Bank on 19th September, 1949, consequent upon alteration in the rate of exchange. In 1950 and 1951, the unit values were the Bank's price of £15 9s. 10d. per fine oz., while in 1952, 1953 and 1954 allowance was made for premiums on gold sold for industrial purposes in Australia and on premium markets overseas, the average value for these years being £16 7s. 7½d., £15 18s. 9½d. and £15 10s. 10d. per fine oz. respectively. From 1st May, 1954 the official price of gold in Australia was raised to £15 12s. 6d. per fine oz. The previous gold price was based on the price for which gold could be sold abroad in official markets less costs of movement; the new price reflects the "parity" value of Australian currency established by the International Monetary Agreement Act, 1947. Further information regarding the price of gold realized, including particulars of prices for newly won gold sold on overseas premium markets since December, 1951, is given in Chapter XIX.—Private Finance.

4 **Changes in Stocks of Gold held in Australia.**—The following table shows particulars of production, imports and exports of gold and changes in stocks of gold held in Australia for each of the years 1950-51 to 1954-55.

**CHANGES IN STOCKS OF GOLD HELD IN AUSTRALIA.**  
(Fine oz.)

Particulars.	1950-51.	1951-52.	1952-53.	1953-54.	1954-55.

(a) Includes Newfoundland.

(b) Includes Gold Coast, Nigeria and Sierra Leone.

6. **Employment in Gold Mining.**—Particulars of the numbers of persons employed in gold mining are shown in § 13 (page 1021).

7. **Assistance to Gold-mining Industry.**—In 1939 a tax was imposed on gold produced in Australia or any Australian Territory but this tax was suspended in 1947. Further relief was given to the gold-mining industry in 1952 and 1953 by permitting sales of gold on overseas premium markets, but with the disappearance of high premium prices overseas in late 1953, many producers were faced with the prospect of closing down. To meet this situation, the Gold-Mining Industry Assistance Act was assented to on 18th November, 1954. The purpose of this Act was to assist the gold-mining industry by the payment of subsidy subject to certain conditions on the production and sales of gold during the two financial years 1954-55 and 1955-56. The subsidy payable to small producers whose annual output does not exceed 500 fine oz. of gold is a flat rate of £1 10s. od. per fine oz. For large producers the formula for determining the amount of subsidy payable is:—

Three-quarters of the excess of average cost of production per fine oz. over £13 10s. od.

The maximum rate of subsidy which may be paid is £2 per fine oz. Where a producer receives an amount in excess of the official price of £15 12s. 6d. per fine oz. as

a result of sales on overseas premium markets or otherwise, the subsidy payable shall be reduced by the amount of the excess. The subsidy will also be limited to the extent that the annual net profit of a producer will not, with the addition of the subsidy, exceed 10 per centum of the capital investment in the company. A further condition of the Act is that the recovery rate of the mine shall be maintained at the level of the year previous to the Act. In 1956 the operation of the Act was extended for a further three years to 1958-59.

### § 3. Silver, Lead and Zinc.

1. Mine Production.—(i) *Australia*. The following table shows for 1953 and 1954 the mine production (metallic contents of ores and concentrates produced) of silver, lead and zinc in Australia, and the respective minerals in which these metals were contained.

#### SILVER, LEAD AND ZINC : CONTENT OF ORES AND CONCENTRATES PRODUCED.

Mineral in which contained.	Silver (fine oz.).		Lead (tons).		Zinc (tons).

Australia ..	12,539,152	13,827,038	269,344	284,862	239,324	252,659

Particulars of the values ascribed to the various minerals containing silver, lead and zinc for the year 1954 are shown in the detailed table relating to mineral production on page 986.

(ii) *New South Wales.* By far the most silver-lead-zinc ore in New South Wales, in fact in Australia, is won from the massive silver-lead-zinc sulphide deposit at Broken Hill. The companies concerned in operating this gigantic lode are North Broken Hill Limited, which mines the northern limb of the ore-bearing structure, Broken Hill South Ltd., and Zinc Corporation Ltd. (with which is associated New Broken Hill Consolidated), which are conducting operations on the southern limb.

The present-day sulphide ores are concentrated by gravity and flotation methods at Broken Hill. The lead (galena) concentrates are railed to Port Pirie and smelted to produce lead bullion which is later refined by a continuous lead refining process for the elimination of arsenic and antimony and the recovery of silver and gold. About half of the zinc concentrates produced at Broken Hill are exported from Australia. Most of the remainder are treated at Risdon in Tasmania and a small proportion are roasted by fertilizer plants in South Australia for the recovery of sulphur dioxide for sulphuric acid manufacture.

At Captain's Flat, Lake George Mines Limited is operating a lode of similar constitution. Concentration of the ore is carried out at the mine itself, after which process individual concentrates of zinc and lead (containing silver) are despatched to Port Kembla, New South Wales, for further treatment. Concentrates of copper, pyrites and gold are also produced at this mine.

Silver-lead-zinc ore has been mined in small quantities in various other parts of the State, the more important localities being Howell, Yerranderie and Kangiara. The Conrad Mine at Howell in northern New South Wales is being re-opened.

(iii) *Victoria.* Small quantities of lead sulphide ore occur on most of Victoria's goldfields and in minor amounts in the Omeo, Bethanga and Cassilis districts. There has been no production of lead ore in recent years, the total recorded production being about 800 tons valued at £5,892.

The whole of the Victorian mine production of silver of 6,268 fine oz. in 1953 and 3,443 fine oz. in 1954 was won as a by-product of the gold mining industry.

(iv) *Queensland.* Silver produced in Queensland is obtained mainly as a by-product of ores of other metals such as lead-zinc and copper ores at Mt. Isa and copper-gold ore at Mt. Morgan. An exception is the ore at the Silver Phantom Mine in the Cloncurry district, which produced 32,848 oz. of silver from 27 tons of ore during 1954. The total production of silver in Queensland was 2,980,669 fine oz. in 1953 and 3,583,776 fine oz. in 1954.

Nearly all the output of lead in Queensland is produced at Mt. Isa in the far north-west of the State, where mining is carried out on extensive silver-lead-zinc ore and copper ore bodies. After concentration by flotation in the concentrating mill, the silver-lead concentrate is converted to bullion in the smelter. All Mt. Isa lead bullion is exported overseas, where certain impurities, such as antimony, arsenic and copper, as well as silver, are removed to yield a pure lead suitable for commercial use.

Zinc concentrates produced by Mt. Isa are also exported overseas. During the 1939-45 War, operations on silver-lead-zinc ores at Mt. Isa were suspended while the mine was engaged in mining copper, but in 1946 copper mining ceased, and operations on silver-lead-zinc ores were resumed. Copper mining has recommenced at Mt. Isa with the opening there of a new copper smelting plant in 1953.

(v) *South Australia.* Output of lead from local ores has been very small in recent years. In 1954, 55 tons of lead-silver ore valued at £1,472 were produced, containing 14 tons of lead and 625 fine oz. of silver.

There has been no recorded zinc production since 1903, when the zinc was contained in lead ores and concentrates which came mainly from the Glen Osmond and Strathalbyn districts.

(vi) *Western Australia.* During recent years, lead-silver-zinc ore and lead concentrates have been produced in Western Australia. Main centres of production have been the Northampton area, the Ashburton area and the West Kimberley district.

The bulk of the mine production of silver in Western Australia is obtained as a by-product of the gold-mining industry.

(vii) *Tasmania*. There are two large centres of silver-lead-zinc mining in Tasmania. The more important is the field operated by the Electrolytic Zinc Company of Australasia Ltd. at Read-Rosebery. These are primarily zinc mines, although lead and copper-lead concentrates are also produced. This company also operates the electrolytic zinc reduction works at Risdon near Hobart.

The lead concentrates and copper-lead concentrates produced at Rosebery are exported overseas.

The zinc concentrates, containing some lead, which are the principal product from the mine, are sent to Risdon for roasting and refining. The Risdon plant also treats considerable quantities of zinc concentrates from the Broken Hill mines.

Of secondary importance to Rosebery is the Mount Farrell field, situated 6 miles north-east of Rosebery. These ore-bodies are mainly silver-lead lodes which yield a lead concentrate with high silver content. The zinc content is insufficient to warrant recovery.

Most of the State's silver is contained in concentrates produced at Rosebery and Mount Farrell. Some silver is obtained from the Mount Lyell copper refinery tank house slimes which are treated at Port Kembla in New South Wales.

(viii) *Northern Territory*. There was no production of lead-silver ore in the Northern Territory in 1953. However, 3 tons of ore valued at £198 and with a content of 56 fine oz. of silver and 2 tons of lead were won in 1954 from Murray Downs, 150 miles north-east of Alice Springs.

2. **Production and Sales of Refined Silver, Lead and Zinc.**—In the following table, details are given of the production and sales of refined primary silver, lead and zinc as recorded from data received from the Australian Mines and Metals Association and from other sources. The figures shown for refined silver production include small quantities recovered from imported materials. The data relating to lead production include small quantities recovered from scrap for the year 1939.

(a) Long tons.

(b) Not available.

(c) Estimated.

In 1954, the Australian mine production of lead, 284,862 tons, was the highest in the world for the first time in the history of the lead-zinc industry. This was due not only to increased production in Australia, but also to the continued fall in production in the former leading country, the United States of America.

4. **Prices of Silver, Lead and Zinc.**—In view of the close association in Australia, particularly in New South Wales, of ores containing these metals, relevant particulars of the prices of each of the metals have been included in the following table. The table shows average prices in Australia and on the London Metal Exchange during the years 1938 and 1950 to 1954. Lead and zinc prices were controlled in Australia and the United Kingdom after the outbreak of war in 1939, but were decontrolled in Australia on 21st April, 1953. Free trading in lead in the United Kingdom, after thirteen years of Government control, was resumed on 1st October, 1952, while the fixing by regulation of the price of zinc was abandoned from 1st January, 1953. Silver prices have not been controlled in Australia and the United Kingdom.

**PRICES OF SILVER, LEAD AND ZINC.**

Metal.	1938.	1950.	1951.	1952.	1953.	1954.
<b>Australian Prices, in Australian currency—</b>						
Silver, per fine oz. (a) ..	s. d. 2 2	s. d. 6 9	s. d. 8 2	s. d. 7 9	s. d. 7 8	s. d. 7 5
Lead, per ton (b)(c) 22	(b)(c) 22	(b) 44	(b) 65	(b) 75	(d) 104	(e) 114
Zinc, per ton (b)(c) 22	(b)(c) 22	(b) 47	(b) 65	(b) 75	(d) 92	(e) 101
<b>London Metal Exchange Prices, in sterling—</b>						
Silver, per fine oz. (e) ..	s. d. 1 9	s. d. 5 5	s. d. 6 6	s. d. 6 2	s. d. 6 2	s. d. 6 2
Lead, per ton (b) 15	(b) 15	(b) 106	(b) 162	(f) 135	(e) 91	(e) 96

(a) Silver prices have not been fixed by regulation in Australia, the prices shown representing export parity calculated from London Metal Exchange prices. (b) Prices fixed by regulation. (c) From February, 1940. (d) Price regulation was abandoned from 21st April, 1953; average market prices have been used for balance of year. (e) Average market prices. (f) Price regulation was abandoned from 1st October, 1952; average market prices have been used for balance of year.

5. **Employment in Silver, Lead and Zinc Mining.**—Particulars of the number of persons employed in mining for these metals are shown in § 13, page 1021.

### § 4. Copper.

1. **Production.**—Copper is widely distributed throughout Australia. However, the principal producing States in 1954 were Queensland, Tasmania and New South Wales, in that order of magnitude. The opening of a new smelting plant at Mt. Isa in Queensland early in 1953 doubled the output of copper in Australia over the previous year, and the production of 40,857 tons in 1954 was the highest recorded since 1913. The table hereunder shows the quantity of mine production of copper (copper content of ores and concentrates produced) in Australia for the years 1951 to 1954. It should be noted that the minerals shown below contain, in addition to copper, certain other metals.

#### COPPER : CONTENT OF ORES AND CONCENTRATES PRODUCED, AUSTRALIA. (Tons.)

Mineral in which Contained.	1951.	1952.	1953.	1954.
Copper Ore, Concentrate and Precipitate	15,739	16,125	33,007	37,041
Gold Ore, Concentrate, etc. . . . .	5	1	1	(a)
Lead Ore and Concentrate . . . . .	1,874	2,163	3,037	3,241
Zinc Concentrate . . . . .	308	289	540	575
Total . . . . .	17,926	18,578	36,585	40,857

(a) Less than half a ton.

Particulars of the copper content of ores and concentrates produced in each producing State and the Northern Territory, as published by the Australian Mines and Metals Association for the year 1939, and as recorded by this Bureau from data obtained from the several State Mines Departments and other sources for the years 1950 to 1954, are shown in the table below.

#### COPPER : CONTENT OF ORES AND CONCENTRATES PRODUCED, STATES. (Tons.)

State.	1939.	1950.	1951.	1952.	1953.	1954.
New South Wales . . . . .	1,155	3,893	3,679	3,562	3,626	3,182
Queensland . . . . .	5,798	5,424	5,432	6,966	23,955	27,207
South Australia . . . . .	110	..	(a)	2	1	(a)
Western Australia . . . . .	1	1	7	7	15	..
Tasmania . . . . .	13,453	7,884	8,657	7,722	8,902	9,880
Northern Territory . . . . .	43	279	151	319	86	588
Australia . . . . .	20,560	17,481	17,926	18,578	36,585	40,857

(a) Less than half a ton.

2. **Sources of Production.**—(i) *New South Wales.* The copper content of ores and concentrates produced in New South Wales amounted to 3,626 tons in 1953 and to 3,182 tons in 1954. The principal sources of this production were ores mined at Broken Hill and Captain's Flat.

(ii) *Queensland.* In 1954 mine production of copper in this State amounted to 27,207 tons compared with 23,955 tons in 1953 and 6,966 tons in 1952. The bulk of the production in 1950, 1951 and 1952 came from Mt. Morgan. In February, 1953, a new copper smelter was brought into operation at Mt. Isa to treat ore from Mt. Isa Mines, the Cloncurry field generally and other centres. Copper was produced from copper ore at Mt. Isa during the 1939-45 War, but production was suspended in 1946 and until 1953 operations had been confined to silver-lead-zinc ores. Mt. Isa now produces about half the total Australian output of copper. Some of the blister copper produced at Mt. Isa is exported to the United States of America, but the bulk is sent to Port Kembla in New South Wales for refining.

(iii) *South Australia.* Deposits of copper were found in the past over a large portion of South Australia, but the principal fields have been exhausted and output in recent years has been negligible.

(iv) *Western Australia.* The ore sent to smelters in 1953 amounted to 50 tons, containing 15 tons of copper. In 1954 there was no production of copper. Cupreous ore is mined in Western Australia and details of its production are given in § 12. Non-Metallic Minerals (see page 1020).

(v) *Tasmania*. The quantity of copper produced in Tasmania during 1953 was 8,902 tons and during 1954, 9,880 tons, the Mount Lyell Mining and Railway Co. Ltd. providing the greater part thereof. The remainder consisted mainly of copper in copper-lead concentrates exported from Read-Rosebery.

(vi) *Northern Territory*. Copper has been found at various places in the Territory. In 1953 the output of copper fell to 86 tons owing to the cessation of copper mining operations at Barrow Creek and the interruption of mining at the Peko Mine at Tennant Creek while new surface treatment plant was being installed. Although the Peko Mine was originally worked as a gold mine, high-grade copper ore was discovered there, and since the new milling plant came into operation in June, 1954, the mine has become the major producer of copper in the Northern Territory. The total output of copper in the Northern Territory during 1954 was 588 tons.

3. **Production and Sales of Refined Copper.**—There are two refining plants in Australia, one operated by the Electrolytic Refining and Smelting Co., Port Kembla, New South Wales, and the other by The Mount Lyell Mining and Railway Co. Ltd., Mt. Lyell, Tasmania. The electrolytic process has been employed in both refineries up to 1954. As blister copper from Mt. Isa can be satisfactorily fire-refined and the process is cheaper, part of the blister copper sent from Mt. Isa to Port Kembla is now refined by that process. The quantity of copper refined by this method in 1954 was 2,935 tons. At Mt. Lyell, copper is produced in cathode form, which, with the exception of a quantity sold to the trade in Tasmania, is shipped to Port Kembla for conversion into the various customary refinery shapes. In the following table, details are given of the production and sales of refined copper, as recorded from data received from the Australian Mines and Metals Association and other sources.

**REFINED COPPER(a) : PRODUCTION AND SALES, AUSTRALIA.**  
(Tons.)

Particulars.	1939.	1950.	1951.	1952.	1953.	1954.
Production(b) ..	17,867	13,231	13,543	19,623	16,682	29,287
Sold to Australian consumers(c).	18,808	11,632	14,806	17,884	15,115	29,361
Exported or sold for export (c)	100	..	..	..	2,607	..

(a) Refined from domestic primary copper.

(b) Source : Bureau of Mineral Resources.

(c) Source : Australian Mines and Metals Association.

Although the embargo on the export of copper in any form from Australia remains in force, it has been relaxed during recent years to meet varying circumstances. Up to 1952, local demand for copper considerably exceeded Australian refinery production and substantial quantities of copper were imported. A large proportion of the imports in 1948 and later years comprised blister copper imported mainly from South Africa and refined in Australia. However, in 1953 the large increase in blister copper production from the Mt. Isa smelter could not be handled with available refining capacity and considerable quantities of blister copper were exported for treatment overseas. During that year, imports of copper were very small. In 1954 imports of copper in primary shapes were considerably higher than in the previous year, due partly to the return from overseas treatment of Mt. Isa blister copper as refinery shapes.

4. **World Production of Copper.**—The world's estimated mine production of copper during the years 1939 and 1949 to 1953 is shown below.

**COPPER : WORLD MINE PRODUCTION.**  
(Tons.)

1939.	1949.	1950.	1951.	1952.	1953.
2,160,000	2,250,000	2,490,000	2,620,000	2,720,000	2,750,000

The yields in 1953 from the principal copper-producing countries reporting, as published by the Mineral Resources Division of the Colonial Geological Surveys, were as follows :—

**COPPER : MINE PRODUCTION IN PRINCIPAL COUNTRIES, 1953.**

(Tons.)(a)

Country.	Production.	Country.	Production.
United States of America ..	827,186	Japan ..	57,953
Rhodesia ..	367,245	Australia ..	36,585
Chile ..	357,400	Union of South Africa ..	35,575
U.S.S.R. ..	(b) 340,000	Yugoslavia ..	34,759
Canada (c) ..	224,654	Peru ..	33,836
Belgian Congo ..	210,734	Turkey ..	26,913
Mexico ..	59,198	Cyprus ..	22,100

(a) Long tons.

(b) Estimated.

(c) Includes Newfoundland.

During 1953 the share of the United States of America in the world's mine production of copper amounted to 30 per cent. while the Australian proportion was only 1.3 per cent.

5. Prices.—From the outbreak of war in 1939 to August, 1953 in the United Kingdom and October, 1954 in Australia, the price of copper was fixed by regulation. Private trading has now been resumed in both countries. Details of the average price for the years shown are given in terms of Australian currency and sterling in the following table :—

**AVERAGE PRICE PER TON OF ELECTROLYTIC COPPER IN AUSTRALIA AND THE UNITED KINGDOM.**

(£.)

Country.	December, 1939.	1950.	1951.	1952.	1953.	1954

United Kingdom — in sterling ..	62	179	220	259	(c) 253	249

(a) Ex works Port Kembla.

(b) Average market prices from 26th October, 1954.

(c) Average market prices from 5th August, 1953.

6. Employment in Copper Mining.—Particulars of the numbers of persons engaged in the mining of copper and copper-gold ores are shown in § 13, page 1021.

**§ 5. Tin.**

1. Production.—Tasmania, Queensland and New South Wales are the principal producing States.

The following table shows the tin content of concentrates produced in each State and the Northern Territory for the year 1939 as published by the Australian Mines and Metals Association, and the years 1950 to 1954 as recorded by this Bureau.

**TIN : CONTENT OF TIN CONCENTRATES PRODUCED : STATES.**

(Tons.)

State.	1939.	1950.	1951.	1952.	1953.	1954.
New South Wales ..	775	482	413	396	342	272
Victoria ..	118	29	36	39	31	26
Queensland ..	867	600	340	330	292	730
Western Australia ..	7	36	41	65	76	80
Tasmania ..	1,250	685	706	772	788	947
Northern Territory ..	20	22	23	9	24	20
Australia ..	3,067	1,854	1,559	1,611	1,553	2,075

2. **Sources of Production.**—(i) *New South Wales.* Production of tin concentrates in 1954 was 377 tons, with a tin content of 272 tons, compared with 483 tons (tin content 342 tons) in 1953. A large proportion of the output in this State is obtained by dredging and sluicing, principally in the New England district.

(ii) *Victoria.* The tin produced in this State was obtained solely as a by-product from the gold dredging operations at Eldorado. With the closing down of the Eldorado gold dredge in July, 1954, the production of tin in Victoria ceased. The production in 1954 amounted to 36 tons of concentrates, with a tin content of 26 tons, compared with 44 tons (tin content, 31 tons) in 1953.

(iii) *Queensland.* The chief districts in Queensland producing tin concentrates during 1954 were Herberton, 850 tons; Cooktown, 68 tons; Chillagoe, 64 tons; Kangaroo Hills, 25 tons and Stanthorpe, 16 tons. The total production in 1954 amounted to 1,034 tons, compared with 411 tons in 1953. The tin content in 1953 and 1954 was 292 tons and 730 tons respectively. It is interesting to compare these production figures with those recorded in this State in the early years of this century when the output ranged between 2,000 and 5,000 tons per annum.

(iv) *Western Australia.* The quantity of tin concentrates reported in this State in 1954 amounted to 121 tons (tin content, 80 tons), compared with 113 tons in 1953 (tin content, 76 tons). Production was mainly in the Pilbara and Greenbushes fields.

(v) *Tasmania.* For 1954 the output amounted to 1,374 tons of tin concentrates, an increase of 242 tons on the output of the previous year. The tin content for 1954 was 947 tons and for 1953, 788 tons.

(vi) *Northern Territory.* The production for 1954 amounted to 32 tons of concentrates compared with 40 tons of concentrates produced during 1953. The tin content for 1954 and 1953 was 20 tons and 24 tons respectively.

3. **Production of Refined Tin.**—There are two firms engaged in the smelting of tin in Australia, both located in Sydney, New South Wales. The following table shows details of refined tin produced in Australia during the years 1939, and 1950 to 1954.

REFINED TIN PRODUCTION (a) : AUSTRALIA.  
(Tons.)

—	1939.	1950.	1951.	1952.	1953.	1954.
Production of Refined Tin .. ..	3,294	2,014	1,459	1,700	1,443	2,063

(a) Source : Bureau of Mineral Resources.

4. **World Production.**—The world production of tin ore, *in terms of metal*, during each of the years 1939 and 1949 to 1953, as published by the Mineral Resources Division of the Colonial Geological Surveys, was as follows :—

TIN : WORLD PRODUCTION.  
(Tons.)

1939.	1949.	1950.	1951.	1952.	1953.
174,000	161,500	167,200	167,300	171,000	175,800

The production of tin reached its maximum in 1941 when 241,400 tons were recorded. The following are the chief producing countries of the world :—Federation of Malaya, Bolivia, Indonesia, Belgian Congo, Thailand and Nigeria. In recent years these countries have produced approximately 90 per cent. of the total production. Australia's share of the world's tin production is about 1 per cent.

The production of tin ore, *in terms of metal*, as published by the International Tin Study Group and other authorities, for the principal producing countries in 1953 was as follows.

**TIN : PRODUCTION IN PRINCIPAL COUNTRIES, 1953.**  
(Tons.) (a)

Country.	Production.	Country.	Production.
Malaya, Federation of ..	56,254	Australia .. ..	1,553
Bolivia .. ..	34,825	Portugal .. ..	1,367
Indonesia .. ..	33,750	Union of South Africa ..	1,361
Belgian Congo .. ..	15,293	Burma .. ..	(b) 960
Thailand .. ..	10,126	United Kingdom .. ..	935
Nigeria .. ..	8,228	Spain .. ..	795
China .. ..	(b) 6,300	Japan .. ..	737

(a) Long tons.

(b) Estimated.

5. Prices.—At the outbreak of war in September, 1939, the price of tin in Australia and London was fixed by regulation. London control of tin prices ceased on 14th November, 1949, while the Australian price was decontrolled on the 21st April, 1953. Details of the movement in average prices for the years shown are given in terms of Australian currency and sterling in the following table :—

**AVERAGE PRICE PER TON OF TIN IN AUSTRALIA AND THE UNITED KINGDOM.**  
(£.)

Country.	December, 1939.	1950.	1951.	1952.	1953.	1954.
Australia — in Aust. currency (a)	299	725	1,222	1,151	919	911
United Kingdom — in sterling (b)	(c) 271	746	1,080	965	731	720

(a) Prices fixed by regulation *ex* smelters for sales of 10 cwt. or more or in ingots of 70 lb. or more to 21st April, 1953; average market prices thereafter. (b) Average spot market prices for standard tin. (c) Prices fixed by regulation for standard tin.

6. Employment in Tin Mining.—The number of persons employed in tin mining is shown in § 13 (page 1021).

### § 6. Iron.

1. General.—Although iron ore is widely distributed throughout Australia, the only known ore bodies of large extent and high grade which are easily accessible are those situated at Iron Knob, South Australia and at Yampi Sound, Western Australia. Estimates of the high grade reserves at these centres place the quantities available at approximately 200 million tons and 100 million tons respectively. Bearing in mind the expansion of the iron industry in Australia, and the limitations of these reserves, the Commonwealth Government prohibited the export of iron ore from 1st July, 1938.

2. Production.—(i) *Australia.* Production of iron ore for smelting purposes and estimated iron ore content are shown below for the years 1939 and 1950 to 1954 :—

**IRON ORE : PRODUCTION, AUSTRALIA.**  
(Tons.)

Particulars.	1939.	1950.	1951.	1952.	1953.	1954.
Production of Iron Ore	2,575,758	2,364,719	2,436,229	2,907,754	3,298,718	3,518,804
Estimated Iron Content	1,548,031	1,417,608	1,605,400	1,883,087	2,131,865	2,274,330

(ii) *New South Wales.* Since 1945 no iron ore has been mined in this State for conversion into pig-iron. For many years the chief source of supply for New South Wales blast furnaces has been South Australia.

Small quantities of iron oxide produced in New South Wales are used by the various gas-works for purifying gas, and also in the manufacture of paper, and for pigments. These supplies are drawn chiefly from the deposits in the Port Macquarie Division. During 1954, 5,221 tons of oxide were won.

(iii) *Queensland.* Extensive deposits of iron ore are known to exist in Queensland. Their location and size, however, in comparison with the more favourable deposits of South Australia and Western Australia, preclude their exploitation. The output of 162 tons of iron oxide for 1954 came mainly from the Biggenden district.

(iv) *South Australia.* The main production of iron ore in Australia is from the deposits worked by The Broken Hill Proprietary Co. Ltd. in the Middleback Ranges near Whyalla. Production in 1954 reached a record level of 2,867,060 tons (estimated iron content, 1,863,589 tons).

(v) *Western Australia.* Plans drawn up in 1927 to develop the rich iron ore deposits on Koolon and Cockatoo Islands in Yampi Sound were realized on 24th July, 1951 when regular shipments of ore for smelting at the steelworks at Newcastle and Port Kembla commenced from Yampi Sound. Iron ore is also obtained from deposits at Wundowie and Koolyanobbing. Production of iron ore during 1954 amounted to 634,514 tons at Yampi Sound, 9,825 tons at Koolyanobbing and 7,405 tons at Wundowie, giving a total production of 651,744 tons with an estimated iron content of 410,741 tons.

The whole iron pyrite production of Western Australia is won at the Iron King and Norseman mines and is railed, in the form of ores and concentrates, to superphosphate manufacturers in Perth.

(vi) *Tasmania.* There has been no production of ironstone in Tasmania since 1943 when 7 tons were produced. The iron pyrite concentrate produced, which in 1954 amounted to 54,142 tons (sulphur content, 26,757 tons), is a by-product from the flotation of copper ores at Mount Lyell. This product is exported to the mainland, where it is used in the manufacture of chemical fertilizers.

In 1954, 6,380 tons of iron oxide were produced for gas purification and fluxing purposes.

3. *Production of Iron and Steel.*—(i) *Australia.* The production of pig-iron and steel in Australia, of which New South Wales is the main producing State, is shown in the following table for each of the years ended 31st May, 1946 to 1955.

#### PIG-IRON AND STEEL : PRODUCTION, AUSTRALIA.

(Tons.)

Year Ended 31st May.	Pig-iron (a)	Steel Ingots.	Year Ended 31st May.	Pig-iron. (a)	Steel Ingots.
1946 .. ..	906,283	1,061,918	1951 .. ..	1,313,332	1,443,831
1947 .. ..	1,143,132	1,312,439	1952 .. ..	1,430,027	1,521,386
1948 .. ..	1,235,574	1,344,692	1953 .. ..	1,691,693	1,801,028
1949 .. ..	1,044,957	1,178,010	1954 .. ..	1,826,711	2,116,813
1950 .. ..	1,097,635	1,217,971	1955 .. ..	1,865,487	2,208,700

(a) Includes pig-iron for castings; excludes ferro-alloys.

The principal producers in Australia are The Broken Hill Proprietary Co. Ltd. and Australian Iron and Steel Ltd., both in New South Wales, the former situated at Newcastle and the latter at Port Kembla. The steelworks at Port Kembla are being further expanded by the construction of two new open hearth steel furnaces which will add a further 350,000 tons to the annual output of steel. During 1955 the new hot strip mill came into full production at Port Kembla. The new mill has an installed capacity of 1,500,000 tons of wide continuously-rolled hot strip a year. Work has also begun on a tinplate plant which will produce initially 70,000 tons of tinplate a year by the hot dip method. At Newcastle steelworks a beginning has been made on the installation of a new skelp mill. In South Australia, at Whyalla, The Broken Hill Proprietary Co. Ltd. operate a blast furnace, and also produce a small quantity of steel ingots by means of an electric furnace.

In Western Australia, pig iron is produced under the direction of the State Department of Industrial Development at Wundowie. The output during the year 1953-54 amounted to 10,515 tons. At Kwinana the construction of a merchant steel rolling mill is proceeding and production there on a limited scale, mainly of steel fencing posts, has already begun.

(ii) *Principal Countries.* Particulars of the production in the principal countries and the estimated world total production during the years 1939, 1952 and 1953, according to figures published by the Mineral Resources Division of the Colonial Geological Surveys, are shown in the next table. Australia ranked fifteenth in order of output of both pig-iron and steel production in 1953.

## PIG-IRON AND STEEL : PRODUCTION IN PRINCIPAL COUNTRIES.

('000 Tons.) (a)

(c) Pre-war Germany.

## § 7. Other Metallic Minerals.

1. **Tungsten.**—Tungsten ores occur in all States. Particulars of scheelite concentrates from King Island, in Bass Strait, the major producer, are included with Tasmanian production. Other important deposits of tungsten ores occur in Queensland, New South Wales, the Tasmanian mainland and the Northern Territory, but production from Victoria, South Australia and Western Australia has been comparatively unimportant. In recent years the largest producer has been Tasmania. Production of tungsten concentrates and contents during 1954 in each State, etc., is shown below :—

## TUNGSTEN CONCENTRATES : PRODUCTION, 1954.

(Tons.)

Particulars.	N.S.W.	Q'land.	W. Au-t.	Tas.	N. Terr.	Australia.

WO <sub>3</sub> Content .. ..	482	198	467	672	672	511

2. **Mineral Sands.**—The recovery of mineral sands from beaches in northern New South Wales and Queensland commenced in 1934. The industry was expanded considerably following the 1939-45 War and Australia is now one of the world's largest producers of the two principal minerals obtained from treatment of the sands, namely, rutile and zircon. Small quantities of ilmenite and monazite are also produced, but most producers either prepare a low grade concentrate which is stockpiled or make no attempt to recover the ilmenite and monazite from the beach sands, the tailings being dumped after extraction of rutile and zircon. Particulars of the quantity of rutile and zircon concentrates produced are shown in the following table for the years 1950 to 1954.

## RUTILE AND ZIRCON PRODUCTION, AUSTRALIA.

(Tons.)

Year.	Rutile Concentrates.		Zircon Concentrates.	
	Quantity.	TiO <sub>2</sub> Content.	Quantity.	Zircon Content.
1950 .. .. .	18,312	18,089	21,805	21,536
1951 .. .. .	35,189	33,432	42,410	41,420
1952 .. .. .	38,014	36,861	27,696	27,371
1953 .. .. .	38,039	37,067	27,207	26,858
1954 .. .. .	44,659	43,011	41,453	40,920

3. **Cadmium and Cobalt.**—The sources of cadmium in Australia are lead and zinc concentrates. The cadmium content of these concentrates produced during 1953 was 806 tons and in 1954, 903 tons. Most of the concentrates are treated at Risdon, Tasmania and at Port Pirie, South Australia, for the extraction of cadmium. The remainder are exported.

Cobalt is present in zinc concentrate produced at Broken Hill, New South Wales, and at Rosebery, Tasmania. The cobalt is recovered in the form of cobalt oxide at the zinc refining plant at Risdon, Tasmania, and is sold as such to industry. The cobalt metal content of zinc concentrate produced in 1953 is estimated at 53 tons and in 1954 at 69 tons.

Production of refined cadmium and cobalt oxide for the years 1939 and 1950 to 1954 is shown in the following table :—

## CADMIUM (REFINED) AND COBALT OXIDE : PRODUCTION.(a)

(Tons.)

Year.	Cadmium (Refined).			Cobalt Oxide.

1951 .. .. .	195	36	231	13
1952 .. .. .	245	41	286	16
1953 .. .. .	257	40	297	17
1954 .. .. .	239	49	288	18

(a) Source : Bureau of Mineral Resources.  
from Tasmanian ores in each of the years shown.

(b) Excludes less than a ton of cobalt oxide produced

The figures shown in the table above refer to production in Australia only and do not include the metallic contents of cadmium and cobalt oxide contained in the ores and concentrates exported overseas.

4. **Manganese.**—There has been considerable expansion of manganese ore production in recent years, due mainly to increased output in Western Australia at Ragged Hills, 250 miles east of Port Hedland, and at Horseshoe, north of Meekatharra. Export of manganese ore is prohibited under the Commonwealth Government's policy to conserve strategic minerals of which domestic reserves are limited. Permits were granted in 1953 for some shipments to the United States, and this led to the opening up of the Ragged Hills deposits which are of high grade (84% MnO<sub>2</sub>).

The following table shows the production of metallurgical grade and battery and other grades of manganese ore for the years 1939 and 1950 to 1954.

## MANGANESE ORE PRODUCTION : AUSTRALIA.

(Tons.)

Year.	Metallurgical Grade.					Battery and Other Grades.
	New South Wales.	Queensland.	South Australia.	Western Australia.	Australia.	
1939 ..	146	..	7	..	153	(a)
1950 ..	1,673	..	237	11,962	13,872	(b) 997
1951 ..	1,054	..	..	5,257	6,311	(c) 1,658
1952 ..	981	..	..	5,045	6,026	(d) 1,043
1953 ..	1,015	43	..	30,457	31,515	(d) 1,428
1954 ..	749	138	..	26,448	27,335	(d) 867

(a) Included with "Metallurgical Grade". (b) New South Wales 426 tons; Queensland 571 tons (includes some "Metallurgical Grade"). (c) New South Wales 1,631 tons; South Australia 27 tons. (d) New South Wales only.

5. Other.—The production, in 1954 (1953 shown in parentheses) of other metallic minerals worthy of note, is as follows :—

**Antimony.** The antimony content of antimony-bearing minerals produced was 731 tons (791 tons). Of this amount 614 tons (578 tons) were in lead concentrate and 117 tons (213 tons) in 222 tons (450 tons) of antimony ore and concentrate.

**Bauxite.** 5,487 tons (4,052 tons) of bauxite ore were produced mainly in New South Wales and Victoria. At present it is not intended to mine bauxite in Australia for the production of aluminium at the Australian Aluminium Production Commission's smelter at Bell Bay, Tasmania which began operations in 1955, bauxite being imported from Malaya for that purpose.

**Beryllium.** Production of beryl ore was 332,976 lb. (280,941 lb.) of which 296,016 lb. (279,149 lb.) came from Western Australia where the Pilbara gold field was the main producing area. The beryllium oxide content of the beryl ore was 38,602 lb. (33,747 lb.)

**Chromite.** Western Australia was the main source of chromite, producing 4,270 tons (1,968 tons) of the total output of 4,943 tons (2,741 tons), the remaining production being from Queensland. The chromium sesquioxide content of the total Australian production was 2,094 tons (1,131 tons).

**Tantalite-Columbite.** The production of tantalite-columbite concentrate was 117,767 lb. (18,124 lb.) and the whole of this output, excepting 1,048 lb. produced in the Northern Territory in 1954, came from Western Australia. The tantalum pentoxide and columbium pentoxide content of the concentrates was 60,348 lb. (13,304 lb.).

**Other.** Other metallic minerals produced in Australia in small quantities during 1954, were bismuth concentrate, molybdenite concentrate, native osmiridium, and platinum concentrate.

## § 8. Coal.

1. Total Production of Coal.—An account of the discovery of coal in each State appears in preceding issues of the Official Year Book (*see* No. 3, pp. 515-16). The quantity and value of the production in each State and in Australia for 1939, and for each of the years 1950 to 1954 are shown in the following table. Of the total production of black coal in 1954, 73,621 tons were classified as semi-anthracite, 17,848,220 tons as bituminous and 1,841,198 tons as sub-bituminous.

## COAL PRODUCTION.

1954 ..	42,762	886	6,474	650	3,589	523	54,884	3,945

(a) At the mine.

The mining of black coal on a large scale by open-cut methods first began in Australia at Blair Athol in Queensland, where in 1937, the first year of production, 18,494 tons were produced. Open-cut mining of black coal was introduced in New South Wales in 1940, in Western Australia in 1943, in South Australia in 1944, and in Tasmania in 1950. The output from open-cuts rose slowly up to 1943 when 119,406 tons were produced, but increased rapidly from 1944 reaching an output of over four million tons in 1952, from which level it declined to 3,138,976 tons in 1953 and 2,989,795 tons in 1954. This decline has been mainly due to the closing down of large open-cuts in New South Wales, as overproduction of coal began to occur late in 1952 and it was the policy of the Joint Coal Board that open-cut mining should provide the quantity of coal by which underground mine production failed to meet total requirements.

The production of black coal from underground and open-cut mines in each State for the years 1939 and 1950 to 1954 is shown in the following table.

**BLACK COAL PRODUCTION : UNDERGROUND AND OPEN-CUT.**  
(<sup>'000</sup> Tons.)

(a) Less than 500 tons.

2. **Production of Coal in each State.**—(i) *New South Wales.* The coal deposits of New South Wales are the most important and extensively worked in Australia. The principal fields are known as the Northern, Southern and Western, and are situated in the vicinity of Newcastle, Bulli and Lithgow respectively.

The coal from the various districts differs in quality or, geologically speaking, rank—that from the Northern district being especially suitable for gas-making, household purposes and steam, while the product of the Southern and Western districts is essentially a steaming coal. The Permian Coal Measures in the Northern division are being worked extensively in the Hunter River Valley area, particularly in the vicinity of Maitland, Cessnock and, more recently, Muswellbrook. This district is the most important, from the aspect of coal mining, in Australia.

The following table shows particulars of New South Wales coal production classified according to type of mining and rank during the five years 1950 to 1954 compared with 1939. Small quantities of semi-anthracite coal produced in some years are included with bituminous.

**COAL : PRODUCTION, NEW SOUTH WALES.**

Sub-bituminous ..	..	2	12	5	13	9	17

(ii) *Victoria.* (a) *Black Coal.* Production of black coal in Victoria is restricted to the Gippsland district. The State Coal Mine at Wonthaggi is the main producer, the remaining production coming from small privately-owned mines. In 1954, production of bituminous coal was 141,318 tons compared with 151,907 tons in 1953. 1953

(b) *Brown Coal.* The mining of brown coal in Australia is carried on only in Victoria, where extensive deposits exist; estimates place the available reserves at 40,000 million tons. Large-scale developmental projects are in progress; these, when completed, will greatly reduce the dependence on fuel from other States. Brown coal produced in Victoria in 1954 amounted to 9,331,255 tons, of which 8,393,263 tons, or 90 per cent., were won at the State open-cuts at Yallourn. During 1953-54, 7,980,844 tons of brown coal were produced at Yallourn, of which 5,306,825 tons went to electricity generating stations, and 2,339,470 tons to the briquette factory.

The briquetting plant of the State Electricity Commission at Yallourn started operations in November, 1924, and the output, which in 1926 was 95,477 tons, had increased to 180,905 tons in 1930 and to 587,252 tons in 1953-54. Approximately two and a half tons of brown coal are required to make one ton of briquettes.

A brown coal gasification plant is at present being established at Morwell near the new open-cut brown coal mine and briquetting plants of the State Electricity Commission of Victoria. The Gas and Fuel Corporation plans to commence gas making at this plant in 1956 with an initial output of 18 million cubic feet per day, increasing to 144 million cubic feet per day over the next 20 years. The brown coal gas will be made by the Lurgi process which is widely used in Germany.

The table following shows the production and distribution of brown coal and the production of briquettes in Victoria for the years 1949-50 to 1953-54, compared with 1938-39.

**BROWN COAL : PRODUCTION AND UTILIZATION, VICTORIA.**

(a) Recorded consumption.

(b) Not available.

(iii) *Queensland.* The production of coal classified according to type of mining and rank during the years 1939 and 1950 to 1954 was as follows :—

**COAL : PRODUCTION IN QUEENSLAND.**  
(<sup>'000</sup> Tons.)

Particulars.	1939.	1950.	1951.	1952.	1953.	1954.
Underground Mines ..	1,274	1,860	1,857	2,006	1,941	2,067
Open-cut Mines ..	43	461	617	736	576	694
Total ..	1,317	2,321	2,474	2,742	2,517	2,761
Semi-anthracite ..	1,317	99	81	83	81	72
Bituminous ..		2,057	2,138	2,312	2,215	2,378
Sub-bituminous ..		165	255	347	221	311

The principal coal-producing districts in Queensland are Ipswich, Clermont, Mt. Morgan and Bowen; output from these areas in 1954 amounted to 2,299,942 tons or 83 per cent. of the total.

The open-cut method of mining for black coal has advanced considerably in Queensland in recent years. In 1946, 106,444 tons (or 7 per cent. of total production) were won from open-cuts while in 1954, 694,022 tons (25 per cent.) were mined in this manner.

(iv) *South Australia.* Coal mined in South Australia is won by open-cut methods at Leigh Creek, some 380 miles by rail north of Adelaide. This important deposit yields a low grade sub-bituminous coal of Triassic age, and has known reserves of about 380 million tons. However, this State relies to a great degree on bituminous coal from New South Wales to supplement the demand created by industrial expansion. In the first year of major production of the Leigh Creek mine in 1944, 34,620 tons were won. Production has risen considerably in more recent years, and amounted to 495,106 tons in 1954.

(v) *Western Australia.* The only coal deposits which have been developed on a commercial scale are at Collie in the south-west of the State. Collie coal is sub-bituminous in rank. Production in 1954 was 1,018,343 tons, compared with 557,535 tons in 1939.

MINE PRODUCTION OF PRINCIPAL METALS  
(METALLIC CONTENT OF MINERALS)  
AUSTRALIA, 1927 TO 1955

# MINE PRODUCTION OF PRINCIPAL METALS (METALLIC CONTENT OF MINERALS) AND PRODUCTION OF COAL

AUSTRALIA, 1927 TO 1955

Although a large proportion of the coal produced in Western Australia comes from open-cut mines, the amount available from these mines is limited, as present surveys estimate that only 8,000,000 tons can be extracted by open-cut methods.

(vi) *Tasmania.* Two periods of coal formation are represented in Tasmania. The older (Permo-Carboniferous) seams contain fairly high ranking semi-anthracitic coal, with a high sulphur content, but production from these mines represents less than one per cent. of Tasmanian black coal output. The more recent Mesozoic coal of bituminous rank is mined in the north-east of the island, the Cornwall and Mt. Nicholas mines being the most prolific producers. In 1954, output amounted to 264,202 tons compared with 99,392 tons in 1939.

(vii) *Australia's Coal Reserves.* The latest available estimate of the actual and probable coal reserves of Australia is that prepared by the Coal and Lignites Panel of the Power Survey Sectional Committee of the Standards Association of Australia in March, 1953. This places total Australian reserves at about 56,830 million tons, of which 14,250 million tons are of anthracitic and bituminous rank and 42,580 million tons of sub-bituminous and lignitic rank. New South Wales has the largest reserves of anthracitic and bituminous coal (about 10,000 million tons) while the greater part of the sub-bituminous and lignitic reserves comprise brown coal in Victoria (40,000 million tons).

3. *Production in Principal Countries.*—The following table shows the production of the principal countries in 1953 as published by the Mineral Resources Division of the Colonial Geological Surveys.

#### COAL : PRODUCTION IN PRINCIPAL COUNTRIES, 1953.

('000 Tons.) (a).

Country.	Black Coal.	Brown Coal, Lignite.
United States of America .. .. .	430,495	2,496

(d) Not

4. *Exports.*—(i) *General.* The quantity of coal of Australian production exported to other countries in 1954-55 was 291,226 tons, valued at £1,147,441, shipped mainly from New South Wales. These figures of overseas exports exclude bunker coal supplied to overseas vessels, which in 1954-55 amounted to 25,363 tons, valued at £111,625. The quantities and values of the overseas exports of Australian coal and of bunker coal for overseas vessels for a series of years are shown in the following table.

## COAL : OVERSEA EXPORTS AND BUNKERS, AUSTRALIA.

Year.	Oversea Exports.(a)		Bunker Coal for Oversea Vessels.	
	Quantity.	Value.	Quantity.	Value.
	Tons.	£	Tons.	£
1938-39 .. .. .	382,085	347,054	549,453	561,063
1950-51 .. .. .	72,283	242,649	69,299	284,824
1951-52 .. .. .	139,140	608,045	54,207	246,258
1952-53 .. .. .	255,832	1,178,466	42,623	215,776
1953-54 .. .. .	385,812	1,528,788	31,718	129,977
1954-55 .. .. .	291,226	1,147,441	25,363	111,625

(a) Excludes bunker coal.

(ii) *New South Wales.* New South Wales is the principal Australian coal-producing State and in addition to meeting requirements within the State, supplies considerable quantities of coal to other States and for export overseas as well as bunker coal for vessels calling at New South Wales ports. Of the total New South Wales coal production in 1954-55 (14,661,061 tons), 11,820,199 tons (81 per cent.) were available for consumption in the State, 2,520,673 tons (17 per cent.) were exported interstate and 320,189 tons (2 per cent.) were exported overseas or supplied as bunker coal for interstate and overseas vessels.

5. *Consumption in Australia.*—Details of the production of black coal and its disposal in Australia are given in the following table for the years 1949-50 to 1953-54, compared with 1938-39.

## BLACK COAL : PRODUCTION AND DISPOSAL.

('000 Tons.)

Particulars.	1938-39.	1949-50.	1950-51.	1951-52.	1952-53.	1953-54.

Grand Total .. .. .	12,285	15,412	17,016	19,455	18,691	19,426

(a) Includes miners' and colliery coal.

(b) Estimated.

(c) Government railways only.

(d) Includes net change in stocks.

After the 1939-45 War, it was found necessary to augment local supplies of black coal in Australia by increasing imports. The quantity imported reached a post-war peak of 597,866 tons in 1950-51, but since then has declined as in recent years production has expanded considerably. Since 1952-53 exports have exceeded imports by a wide margin; in 1954 exports of black coal were 391,226 tons and imports were 4,994 tons.

6. Coal Value at the Mine in New South Wales.—Particulars of the average values at the mine (or at screens where these are at a distance from the mine) of saleable coal for each district and for New South Wales as a whole are shown in the following table for the years 1938 and 1950 to 1954. Saleable coal is taken to exclude miners' coal, coal consumed at the mines and other producer-consumed coal. For the years 1951 to 1954 stocks of coal held at grass by the Commonwealth Government are also excluded. No deduction has been made in respect of excise duty operative from 1st November, 1949.

**AVERAGE SELLING VALUE AT THE MINE PER TON OF SALEABLE COAL : NEW SOUTH WALES.**

(s. d.)

Year.				Northern District.	Southern District.	Western District.	Average for State.
1938	..	..	..	12 0	14 0	9 6	12 0
1950	..	..	..	36 5	39 1	29 4	35 10
1951	..	..	..	51 5	50 8	42 10	49 8
1952	..	..	..	62 3	60 3	56 7	61 2
1953	..	..	..	62 1	61 0	56 9	61 1
1954	..	..	..	59 11	59 0	57 1	59 3

7. Values in New South Wales, Great Britain and the United States of America.—The following table shows, for the years 1938 and 1950 to 1954, average values of coal produced in New South Wales, Great Britain and the United States of America. The figures give an indication of changes in average value or price within each country but they do not necessarily show the relative levels as between the countries concerned.

The series of average values for the United States of America replaces the series of prices shown for this country in earlier Year Books.

**PRODUCTION VALUES OF COAL PER TON : NEW SOUTH WALES, GREAT BRITAIN AND UNITED STATES OF AMERICA.**

Country.	1938.	1950	1951.	1952.	1953.	1954.
	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.
New South Wales—Bituminous(a)	12 0	35 10	49 8	61 2	61 1	59 3
Great Britain—Deep mined(b)	16 8	47 9½	51 2½	57 3	61 1½	63 6
United States of America—Bituminous and lignite (c)	\$ 1.95	\$ 4.84	\$ 4.92	\$ 4.90	\$ 4.92	\$ 4.82

(a) Average selling value at the mine per ton of 2,240 lb.: the figures relate to saleable coal and include excise duty from November, 1949. (b) Average value in sterling at the mine per ton of 2,240 lb. (c) Average value in United States currency at the mine per ton of 2,000 lb.

8. Employment in Coal-mines.—The number of persons employed, both above and below ground, in coal-mines in each State for 1939 and each of the years 1950 to 1954 is shown in the following table.

## COAL-MINES : PERSONS EMPLOYED.

Year.	New South Wales.	Victoria.		Queens-land.	South Australia.	Western Australia.	Tasmania.	Australia
		Black.	Brown. (a)					
1939 .. ..	16,581	1,376	449	2,615	..	752	238	22,011
1950 .. ..	18,540	777	889	3,495	408	1,099	334	25,542
1951 .. ..	18,747	773	808	3,503	434	1,125	329	25,809
1952 .. ..	20,151	851	1,697	3,715	220	1,326	349	28,415
1953 .. ..	19,961	900	1,598	3,701	250	1,478	345	28,233
1954 .. ..	19,979	786	1,598	3,743	270	1,583	358	28,317

(a) Prior to 1952, persons engaged in removing overburden were not included.

The year of maximum employment was 1926 when 31,774 persons were engaged in the coal-mines of Australia. Shortly after that year the industrial depression and a prolonged stoppage of work on one of the principal fields of New South Wales during 1929 and 1930 seriously affected the figures of employment. Since 1933 there has been a gradual increase, but the numbers employed in 1953 were only 86 per cent. of the maximum figure already quoted. In New South Wales in 1954, 7,973,737 tons of coal, or 53 per cent. of the total output of underground coal, were cut by machinery, compared with 3,594,000 tons or 32 per cent. in 1939. Similar details for other States are not available.

9. Production of Black Coal per Man-shift.—(i) *Underground Mines.* The following table shows particulars of estimated black coal output per man-shift worked (a) at the coal face and (b) by all employees in respect of underground mines for each State concerned and for Australia for the years 1950 to 1954. These estimates have been calculated by the Joint Coal Board from data collected fortnightly in respect of coal production and the number of man-shifts actually worked. In South Australia black coal is won only by open-cut mining.

PRODUCTION OF BLACK COAL PER MAN-SHIFT : UNDERGROUND MINES.(a)  
(Tons.)

Year.	N.S.W.	Vic.	Q'land.	W. Aust.	Tas.	Australia.
PRODUCTION PER MAN-SHIFT WORKED AT COAL FACE.						
1950 .. ..	10.28	2.41	6.18	8.80	5.40	9.01
1951 .. ..	10.82	2.43	6.40	8.22	6.01	9.39
1952 .. ..	10.06	2.24	6.36	6.82	6.03	8.88
1953 .. ..	9.72	2.11	6.37	4.86	6.15	8.50
1954 .. ..	10.16	2.03	6.54	4.82	5.95	8.81
PRODUCTION PER MAN-SHIFT WORKED BY ALL EMPLOYEES.						
1950 .. ..	2.95	0.91	2.52	2.17	2.76	2.78
1951 .. ..	2.96	0.93	2.55	1.85	3.03	2.78
1952 .. ..	3.00	0.83	2.55	1.64	3.01	2.81
1953 .. ..	3.08	0.81	2.53	1.67	3.00	2.84
1954 .. ..	3.25	0.82	2.61	1.92	3.07	3.00

(a) As calculated by Joint Coal Board. (b) In April, 1952, persons working "at coal face" were re-defined resulting in a considerable increase in persons in this category in New South Wales.

(ii) *Open-cut Mines.* In the next table, the Joint Coal Board's estimates of production of black coal per man-shift worked by all employees in open-cut mines are shown for the years 1950 to 1954. There are no open-cuts producing black coal in Victoria.

**PRODUCTION OF BLACK COAL PER MAN-SHIFT : OPEN-CUT MINES.(a)**  
(Tons.)

Year.	N.S.W.	Q'land.	S. Aust.	W. Aust.	Tas.	Australia
1950 .. ..	8.33	10.16	2.17	7.17	5.74	6.57
1951 .. ..	8.02	11.80	3.05	6.73	5.28	7.03
1952 .. ..	7.92	11.78	3.22	6.13	4.63	7.07
1953 .. ..	8.51	10.97	3.57	5.37	..	6.92
1954 .. ..	8.97	12.27	(b) 4.52	4.74	7.91	7.31

(a) Production per man-shift worked by all employees, as calculated by Joint Coal Board.

(b) Figures prior to July, 1954 include manshifts on other than mine work.

10. Joint Coal Board.—After the 1939-45 War, the Governments of the Commonwealth and New South Wales mutually agreed to create jointly an authority with powers similar to and in some respects wider than those possessed under Commonwealth war-time legislation. Following this agreement, the Joint Coal Board was created and has functioned as from 1st March, 1947. Briefly, it is the responsibility of the Board to ensure that the coal of the State is conserved, developed, worked, distributed and used to the best advantage in the public interest, and to promote the welfare of the workers in the industry. Further details of the powers and functions of the Board are contained in previous issues of the Official Year Book.

### § 9. Coke and Other By-products from Coal.

1. Coke.—The production of metallurgical coke in Australia was limited to about 250,000 tons per annum prior to the 1914-18 War. This was below local requirements and necessitated an annual import of about 27,000 tons. By 1920, production had risen to more than 500,000 tons, by 1938-39 to 1,164,873 tons and in 1953-54 reached the record level of 2,010,404 tons. Until recent years, imports have exceeded exports but in 1953-54 exports amounted to 28,223 tons (27,439 tons to New Caledonia) while 10,981 tons were imported.

In addition to metallurgical coke referred to above (which is produced by specialized coke works), considerable quantities of coke are produced in gas works as a by-product of the manufacture of gas. Production in gas works in 1953-54 was 839,793 tons compared with 757,046 tons in 1938-39.

In order to avoid duplication with coal values, the figures for coke have not been included in the general tables of mineral production in the early part of this chapter.

In the following table, particulars of the production of coke in coke works and gas works in Australia are shown for the years 1938-39 and 1949-50 to 1953-54. The figures exclude output of coke breeze, which in 1953-54 amounted to 366,041 tons.

#### COKE PRODUCTION(a) : AUSTRALIA.

(Tons.)

Industry.	1938-39.	1949-50.	1950-51.	1951-52.	1952-53.	1953-54.
Coke Works ..	1,164,873	1,182,773	1,515,782	1,636,982	1,858,428	2,010,404
Gas Works ..	757,046	1,094,982	1,111,854	1,203,602	1,071,106	839,793
Total ..	1,921,919	2,277,755	2,627,636	2,840,584	2,929,534	2,850,197

(a) Excludes coke breeze; see letterpress above.

2. Other By-products from Coal.—In addition to coke, other products are obtained from the treatment of coal by coke and gas works. Details of some of these are given in the following table.

#### OTHER BY-PRODUCTS FROM COAL : AUSTRALIA.

Commodity.	1938-39.	1949-50.	1950-51.	1951-52.	1952-53.	1953-54.
Tar—Crude (a) .. '000 gals.	34,614	38,178	41,239	42,586	44,402	46,517
Refined (a) .. ..	3,752	12,324	12,449	12,514	15,699	17,725
Tar Oils (crude) .. ..	1,254	3,758	3,960	4,101	3,674	3,799

Ammonium Sulphate (a) .. tons	24,251	48,736	57,893	63,814	70,174	70,811

(a) Includes production in works other than coke and gas works.

### § 10. Mineral Oils.

1. **Australia.**—Natural oil has been proved to exist in Queensland, Victoria and Western Australia, and in the latter State in 1953, potential oil production was found at Rough Range. Many of the conditions favourable to the accumulation of oil in commercial quantities have been shown to be present in Queensland, Western Australia and New South Wales, but in the latter State no strong positive evidence of its existence has been recorded.

Reference is made in § 15 page 1023, to the assistance afforded by the Commonwealth Government in the search for oil.

Structure control drilling has been carried out following the Rough Range discovery and field exploration increased enormously. The drilling of a number of wells has commenced at various places throughout the Commonwealth. These include all the States with the exception of Tasmania and the Northern Territory.

2. **New South Wales.**—During 1955 Australian Oil and Gas Corp. commenced drilling at Kurrajong and Clarence River Basin Oil Exploration Co. N.L. started drilling at Grafton.

3. **Victoria.**—Drilling for oil commenced in 1955 in the Gippsland area of Victoria when Frome Lakes Pty. Ltd. drilled Darriman No. 1 to 4,730 feet. The well was abandoned without testing. Woodside (Lakes Entrance) Oil Co. N.L. also commenced drilling near Woodside.

4. **Queensland.**—At Roma, Queensland, Associated Australian Oilfields N.L. after testing uneconomical sands in the Roma Blocks area north of Roma in mid-1955, moved to Hospital Hill. One gas well with a potential of 1,195 m.c. ft. and two unsuccessful wells were drilled. Operations in this area have been temporarily suspended.

Two wells were drilled at Reid's Dome near Springsure, one at Wellington Point, two near Maryborough and seven in the Longreach area. None of these succeeded in finding commercial oil or gas production during 1955.

5. **South Australia.**—Under prescribed conditions, the South Australian Government offers a bonus of £5,000 to the person or body corporate which first obtains from a local bore or well 100,000 gallons of crude petroleum containing not less than 90 per cent. of products obtainable by distillation. Geophysical surveys were undertaken by private interests during 1947, and continued into 1948, in the north-east corner of the State and extending over the border into New South Wales and Queensland, but with little success. Assistance given by the Commonwealth included equipment and a geophysical survey party.

Airborne geophysical surveys over the Eucla Basin in the south-western part of the State were made and extended into Western Australia.

6. **Western Australia.**—Systematic geological mapping and stratigraphic and structural studies have been continued in the Carnarvon area during 1955 by the Commonwealth Bureau of Mineral Resources, Geology and Geophysics. Western Australian Petroleum Pty. Ltd. (an exploration Company formed by Caltex in partnership with Ampol Petroleum Company) have proved commercial oil production at about 3,600 feet in one well on the Rough Range anticline at Exmouth Gulf. Subsequent wells drilled to exploit this reservoir showed that subsurface conditions did not reflect those shown at the surface, and further detailed geophysical work is in progress. One dry hole has been drilled on the Cape Range structure and a second well is now being drilled. Drilling has also been done at Giralda, Waroora and drilling for geological information was done at Grierson and Point Cuvier.

In the Fitzroy basin, South Kimberley area, geological surface and geophysical surveys have been continued by the Bureau of Mineral Resources, Geology and Geophysics. Associated Freney Oilfields N.L. drilled one well to 9,072 feet, which was abandoned after testing had shown that a number of oil shows were uneconomical. West Australian Petroleum Pty. Ltd. ceased drilling at Grant Range in October, 1955 and moved to a new site on the Fraser River.

7. **Papua.**—Australasian Petroleum Co. Pty. Ltd. and Island Exploration Company continued extensive geological and geophysical surveys over the western areas of Papua. During 1955, Island Exploration Co.'s Omati No. 2 was abandoned at 10,880 feet, and Aramia No. 1 was abandoned after having been drilled to 6,628 feet. The drilling rigs were then moved to Kuru and Barikewa.

8. **General.**—During 1939 efforts were made to secure greater uniformity in State legislation governing the search for oil. A draft Bill based on modern legislation in other countries was prepared by the Commonwealth and submitted to the State Governments. As a result, amending legislation was passed in Victoria, Queensland, South Australia and Western Australia. There was immediate response to this in Queensland, where an agreement has been reached between the State Government and one of the major oil companies, whereby the company has undertaken to spend up to £400,000 in the search for oil in that State.

Further details of action taken by the Commonwealth Government in connexion with the search for oil will be found in § 15. Government Aid to Mining, and Mineral Control (page 1023).

## § 11. Sulphur.

Sulphur, although produced in Australia as a content of certain metallic minerals, is itself non-metallic in character. Sulphides such as zinc concentrate and pyrite, which contain sulphur, are produced in appreciable quantities. There is no production of elemental sulphur (brimstone) in Australia. A large proportion of zinc concentrate produced is exported and therefore lost to Australia for utilization of the sulphur content. The sulphur recovered in Australia is in the form of acid, most of which is used in the manufacture of fertilizers, mainly superphosphate. As this recovery does not at present satisfy local requirements, it is necessary to import elemental sulphur to meet the balance.

Production of pyrite concentrate at Nairne in South Australia commenced early in 1955. The output from this mine is supplied to the new sulphuric acid plant which was opened at Port Adelaide in August, 1955. This new plant has an annual capacity of 100,000 tons of sulphuric acid and will require 70,000 tons of pyrite concentrate from Nairne annually.

The following table shows for the years 1939 and 1950 to 1954, the sulphur content of sulphur-bearing minerals produced, quantities of sulphur recoverable therefrom, production of monohydrate acid (100 per cent. sulphuric acid), and sulphur content of monohydrate acid produced. Particulars regarding spent oxide roasted have been included to complete the statistics relating to recovery of sulphur and monohydrate acid production.

SULPHUR PRODUCTION: AUSTRALIA.  
(Tons.)

Item.	1939.	1950.	1951.	1952.	1953.	1954.

(c) Year ended 30th June, 1939.

(d) All imported.

## § 12. Non-Metallic Minerals.

1. **Asbestos.**—The production of asbestos in Australia at present is only sufficient to meet about one-sixth of domestic requirements. Production of asbestos in Australia in recent years has been of two types, chrysotile and crocidolite, the former being the most important type economically, but deposits of chrysotile in Australia are relatively

small and widely scattered. The principal deposits of asbestos are of crocidolite, and they occur in the Hammersley Ranges in Western Australia, about 200 miles south-east of Roebourne. Large scale operations were commenced there in 1943 at Wittenoom Gorge by Australian Blue Asbestos Ltd. and reserves in seams over which the Company holds leases are estimated at two million tons. However, high costs of production due to heavy freight charges and the difficulty of retaining labour in an isolated community have prevented greater development of the project.

The production of chrysotile and crocidolite in Australia during the five years 1950 to 1954 is shown in the following table:—

PRODUCTION OF ASBESTOS : STATES.  
(Tons.)

Year.	Chrysotile.			Crocidolite.		
	New South Wales.	Western Australia.	Australia.	South Australia.	Western Australia.	Australia.
1950 ..	374	211	585	13	1,018	1,031

1952 ..	466	652	1,118	..	2,940	2,940
1953 ..	569	606	1,175	..	3,795	3,795
1954 ..	616	303	919	..	3,794	3,794

2. Clays.—Statistics of clay production in Australia are not entirely satisfactory, mainly because of differences between States in the classification of the various types of clays. In the following table, the recorded production of the main types of clays produced in each State of Australia is shown for the year 1954.

PRODUCTION OF CLAYS : STATES, 1954.  
(Tons.)

Type.	New South Wales.	Victoria.	Queensland	South Australia.	Western Australia.	Tasmania.	Total.
Bentonite ..	63	..	126	..	1,122	..	1,311
Brick Clay and Shale ..	1,604,409	(a) 845,000	277,468	302,942	(a) 420,000	(a) 69,000	3,518,819
Cement Clay and Shale ..	114,254	..	..	20,548	11,901	..	146,703
Damourite ..	..	..	..	514	..	..	514

(a) Estimated.

3. Gypsum.—There are very extensive deposits of gypsum in Australia, but only the more accessible and easily worked deposits have been exploited. These deposits lie in four main regions, (a) in New South Wales stretching from around Griffith to near Broken Hill, (b) the north-west corner of Victoria, the south-west corner of New South Wales and adjoining parts of South Australia, (c) in South Australia on both sides of Gulf St. Vincent and extending to Lake MacDonnell in the west, and (d) between Perth and Kalgoorlie in Western Australia. The South Australian deposits are the most important and about two-thirds of the total Australian production of gypsum to 1954 have come from this area, where the main centres of production are Stenhouse Bay on Yorke Peninsula and Lake MacDonnell.

The building industry is the main user of the gypsum produced in Australia, principally in the manufacture of plaster and the remainder in cement manufacture. A small amount is also used as fertilizer. A considerable quantity is exported, mainly to New Zealand for use in the plaster industry, and to New Caledonia for use in nickel smelting operations.

The production of gypsum in Australia is set out in the following table for the five years 1950 to 1954 compared with the year 1939.

### PRODUCTION OF GYPSUM : STATES.

(Tons.)

Year.	New South Wales.	Victoria.	South Australia.	Western Australia.	Australia.
1939 .. ..	7,032	11,777	144,940	14,340	178,089
1950 .. ..	102,910	39,945	156,031	36,598	335,484
1951 .. ..	104,697	41,126	147,701	70,823	364,347
1952 .. ..	89,226	47,295	164,825	50,332	351,678
1953 .. ..	71,819	36,286	181,640	40,247	329,992
1954 .. ..	128,790	75,012	194,772	41,142	439,716

4. Limestone.—Limestone is quarried in all States, but statistics of limestone production are incomplete, none being collected in Western Australia, and in Queensland figures do not include limestone quarried for cement manufacture. Limestone is used mainly for the manufacture of cement, other uses being in the steel industry as a metallurgical flux, in the chemical industry, and in agriculture.

The recorded statistics of limestone production in each State of Australia during 1954 are shown in the following table :—

### PRODUCTION OF LIMESTONE (a) : STATES, 1954.

(Tons.)

New South Wales.	Victoria.	Queensland.	South Australia.	Western Australia.	Tasmania.	Northern Territory.	Total.
1,544,217	694,684	(b)73,701	950,202	(c)	196,485	65	(b)3,459,354

(a) Includes shell and coral.

(b) Incomplete.

(c) Not available.

5. Magnesite.—The major sources of magnesite at present are deposits at Fifield and Thuddungra in central New South Wales. Most of the output of magnesite in Australia is used for refractory purposes, particularly in the steel industry, and small amounts are used in chemical, paper, glass, rubber, and ceramic industries. Particulars of the production of magnesite in each State for the years 1939, and 1950 to 1954, are set out in the table below.

### PRODUCTION OF MAGNESITE : STATES.

(Tons.)

Year.	New South Wales.	Victoria.	Queensland.	South Australia.	Western Australia.	Australia.
1939.. ..	25,189	118	..	376	..	25,683
1950.. ..	32,386	..	..	1,177	1,829	35,392
1951.. ..	35,963	398	13	998	762	38,134
1952.. ..	40,333	164	13	572	1,055	42,137
1953.. ..	45,769	572	..	36	20	46,397
1954.. ..	42,825	..	..	235	92	43,152

6. Mica.—Almost all Australian production of muscovite mica has come from the Northern Territory, though small quantities of inferior grades have been obtained from most of the States. The centre of mica production in the Northern Territory is the Harts Range area about 130 miles north-east of Alice Springs, where mining has been carried on intermittently since 1892, and the Plenty River field, 50 miles north-east of Harts Range.

The Commonwealth Mica Pool—details of which are given in § 15, Government Aid to Mining, on page 1025—purchases all mica which is in accordance with certain specifications. The following table shows the quantity of muscovite mica produced in Australia during the five years 1950 to 1954.

#### MUSCOVITE MICA PRODUCTION.

(lbs.)

Particulars.	1950.	1951.	1952.	1953.	1954.

Crude and Film .. ..	..	2,034		1,542	..
Scrap .. ..	51,184	82,880		..	65,184

7. **Salt.**—Salt is obtained in Australia from evaporation of saline lakes and clay pans. Production satisfies local requirements and provides a considerable surplus for export. Recorded production in South Australia (the chief producing State) is shown in the following table for the years 1939 and 1950 to 1954. Available estimates of total Australian production are also shown.

8. **Other Non-Metallic Minerals.**—(i) *General.* Many other non-metallic minerals are produced in Australia in considerable quantities, and are listed separately in the following paragraphs.

(ii) *Barite.* The principal producing centre of barite is at Oraparinna in the north Flinders Range in South Australia where the deposits are of first-grade quality. The production of barite in Australia during 1954 was 6,872 tons, of which 3,828 tons came from South Australia.

(iii) *Cupreous Ore and Concentrate.* Cupreous ore is mined in Western Australia for mixing with superphosphate fertilizer. The quantity produced in 1954 was 4,748 tons and 18 tons were also produced in the Northern Territory giving a total of 4,766 tons production for Australia.

(iv) *Diatomite.* Production of diatomite is carried on mainly in the eastern States of Australia, only a small quantity coming from Western Australia. In 1954, 5,439 tons were produced in Australia, and of this total, New South Wales produced 3,708 tons.

(v) *Dolomite.* Up to 1950 New South Wales was the main producer of dolomite, but in that year the Broken Hill Pty. Co. Ltd. opened up a large deposit of dolomite at Ardrossan in South Australia which now produces over 90 per cent. of total output. In 1954 New South Wales produced 3,855 tons; Queensland, 2,680 tons; South Australia, 118,612 tons; and Tasmania, 2,847 tons, making an Australian total of 127,994 tons.

(vi) *Felspar.* The main demand for felspar comes from the glass and ceramic industries. About half the Australian production of felspar comes from New South Wales which produced 9,538 tons of the Australian total of 16,384 tons in 1954.

(vii) *Gemstones.* (a) *Diamonds.* Gem quality diamonds are not produced in Australia, but 1,564 carats of industrial diamonds worth £12,673 were recovered in gold dredging operations on the Macquarie River in New South Wales.

(b) *Opals*. Most of the opals won in recent years came from the Coober Peedy and Andamooka fields in South Australia which produced opals worth £44,815 in 1954 compared with £76,460 in 1953. Other production in 1954 was from the Quilpie district in Queensland valued at £950, and £661 from Lightning Ridge in New South Wales.

(c) *Sapphires*. The Anakie field in Central Queensland is the only Australian producer of sapphires. Output in 1954 was valued at £636.

(d) *Other Gemstones*. The only other recorded production of gemstones in Australia during 1954 was in Western Australia, where emeralds valued at £3·3 were won.

(viii) *Silica*. The production of silica is not recorded in Victoria and Queensland. The output of silica, which includes glass sand, quartz, quartzite, sand, sandstone, and siliceous abrasives, was 102,044 tons in New South Wales; 17,942 tons in South Australia; 7,803 tons in Western Australia; and 6,169 tons in Tasmania, giving a total of 133,958 tons for those States during 1954.

(ix) *Sillimanite*. In 1954, 2,337 tons of sillimanite were produced in Australia. New South Wales contributed 1,370 tons and the remaining 967 tons came from South Australia.

(x) *Talc*. The Australian output of talc (including steatite), 12,940 tons, in 1954 was the highest yet recorded, New South Wales produced 932 tons, South Australia 9,088 tons and Western Australia 2,920 tons.

(xi) *Other*. Other non-metallic minerals produced in Australia in small quantities during 1954 were fluorite, graphite, glauconite, mineral pigments, pebbles for grinding, phosphate rock, pyrophyllite, petalite, serpentine and slate.

### § 13. Persons Engaged, Wages Paid and Accidents in Mining.

1. *Total Employment in Mining*.—The number of persons engaged in the mining industry in Australia fluctuates according to economic conditions generally, the price of industrial metals, the state of the labour market, and according to the permanence of new finds and the development of the established mines. The following table shows the numbers engaged in the various mining industries in each State and Australia as a whole in 1953. Attention is drawn to § 1, para. 3, Standardization of Mineral Statistics, (pp. 983-4) which outlines the nature of changes adopted in 1950 and 1952 in the reporting of mineral statistics.

(a) Average employment during whole year. (b) Not available for publication. (c) Not available for publication; included with 'Non-metal (excluding Fuel) Mining'. (d) Incomplete. (e) Includes particulars of "Other Fuel Mining". (f) Year ended 30th June, 1953. (g) Year ended 30th June, 1954. (h) Includes 42 for the Australian Capital Territory.

The particulars in the foregoing table exclude the following estimated numbers of fossickers :—Gold mining, 222 ; Tin mining, 409 ; Other mining, 1,633.

The following table shows particulars of mining employment in Australia for the years 1938 and 1949 to 1953. Complete particulars of employment in construction material quarrying are not available prior to 1952. The details for 1951 and earlier years include estimates by State Mines Departments of numbers of fossickers which are excluded for 1952 and 1953. Changes in the bases of collecting and compiling the statistics introduced in 1950, 1951 and 1952 have resulted in some lack of comparability of the data in other respects, particularly in the case of metal mining. The employment figures for 1952 are for the period worked by individual mines or quarries, and for 1953 the figures show the average number employed during the whole year.

(a) Incomplete ; some metal mining included with " Total Non-metal (excluding Fuel) Mining ".  
 (b) Prior to 1952, persons engaged in removing overburden were not included. (c) Not available separately ; included with " Non-metal (excluding Fuel) Mining ". (d) Includes some Metal Mining ;  
 (e) Includes " Other Fuel Mining ". (f) Not available.

2. **Wages Paid in Mining.**—Information regarding rates of wages paid in the mining industry is shown in the *Labour Report* issued by this Bureau and in Chapter VI.—Labour, Wages and Prices (page 168).

3. **Accidents in Mining.**—Particulars of numbers of persons killed and injured in accidents in mines and associated treatment plants are recorded by State Mines Departments. Numbers injured are not reported on a uniform basis from State to State as varying criteria are used in determining what constitutes injury for the purpose of these records. In 1953, 58 persons were recorded as having been killed and 1,546 as having been injured in mining accidents (excluding accidents in construction material quarrying). Of the total of 58 persons killed, 23 were in black coal mines, 12 in gold mines and 23 in other mines. Reported injuries were highest in gold mines (493), black coal mines (463) and silver-lead-zinc mines (332).

### § 14. Oversea Trade in Minerals and Metals.

Particulars of the quantity and value of imports and exports of the principal minerals and metals for Australia are shown in the following table for the years 1952–53, 1953–54 and 1954–55. In addition to the unfabricated metals shown, considerable quantities of partly fabricated metals (bars, rods, wire, etc.) enter into Australia's overseas trade.

## § 15. Government Aid to Mining, and Mineral Control.

1. Aid to Mining.—(i) *Commonwealth.* (a) *Assistance to marginal and sub-marginal gold mines.* Under the terms of the Gold-Mining Industry Assistance Act 1954, a large producer may receive a subsidy of up to three-quarters of that portion of the cost of production in excess of £13 10s. od. per fine oz.; the subsidy will not exceed £2 os. od. per fine oz. A person producing less than 500 fine oz. per year receives a flat rate

subsidy of £1 10s. od. per fine oz. regardless of the cost of production. The Act will remain in force for two years from 1st July, 1954. The operation of the Act has since been extended for a further three years.

(b) *Rewards for Discovery of Uranium Ore.* To encourage the search for and discovery of deposits of uranium ore, the Commonwealth Government has approved the granting of monetary rewards up to a maximum of £25,000 for any one deposit.

(c) *Bureau of Mineral Resources, Geology and Geophysics.* The Bureau of Mineral Resources, Geology and Geophysics has sections dealing with geology, geophysics, mining engineering, petroleum technology and mineral economics. The geological section conducts all surveys required in Commonwealth Territories, detailed and regional surveys in conjunction with or by arrangement with the State Mines Departments, surveys of possible oil-fields in Australia and New Guinea, surveys of mines for which financial assistance is sought, and investigations of deposits of radio-active minerals. The geophysical section conducts investigations throughout Australia and New Guinea connected with the search for metalliferous, radio-active and other mineral deposits; investigations connected with exploration for coal, oil and water; regional magnetic and gravity surveys; engineering and military geophysics; and the operation of geophysical (magnetic and seismic) observatories. The Bureau works in close co-operation with the Mines Departments of the States. It has assumed full responsibility for geological and geophysical surveys in Commonwealth Territories, but suitable arrangements have been made to ensure that the local Administrations have the necessary technical advice directly available to them. The Bureau has carried out extensive scout boring in New South Wales to prove deposits of coal suitable for working by open-cut methods.

(d) *Diamond Drills.* The drilling plant operated by the Bureau of Mineral Resources consists of two heavy, two medium and five light prospecting drills. These drills are used mainly in connexion with the Bureau's comprehensive programme of prospecting by aerial, geological, geophysical and geochemical methods. Some of the drills are available for hire to private companies.

(e) *Search for Oil.* No variation has been made in the policy described in Official Year Book No. 37, page 850, regarding the search for petroleum throughout Australia and its Territories. In addition to its activities set out in that Year Book, the Bureau of Mineral Resources, Geology and Geophysics furnishes field laboratories and trained personnel to assist small companies in recording scientific information obtained while drilling for oil.

The Commonwealth Government has encouraged the search for oil in Australia, Papua and New Guinea; details of the efforts made are outlined in earlier issues of the Official Year Book and in § 10. Mineral Oils (p. 1016). A considerable amount of geological and geophysical work and test drilling has been conducted under the provisions of the Petroleum Oil Search Act 1936.

(f) *Survey of North Australia.* Reference to this survey which was completed at the end of 1940 appears in Official Year Book No. 35, page 744.

(g) *Ore-dressing and mineragraphic investigations.* These investigations are conducted by the Commonwealth Scientific and Industrial Research Organization as required by the industry. Ore-dressing investigations are carried out conjointly with appropriate State institutions, the three laboratory centres being the School of Mines, Kalgoorlie, the School of Mines and Industries, Adelaide, and the University of Melbourne.

Since 1947, funds for these investigations have been included in the investigational vote approved annually for the Commonwealth Scientific and Industrial Research Organization; in 1955 the Commonwealth Government expended approximately £18,000 on ore-dressing and £10,500 on mineragraphic investigations.

(h) *Petroleum Legislation.* The petroleum ordinances of Papua and New Guinea have been amended and combined in a single ordinance entitled Petroleum (Prospecting and Mining) Ordinance 1951. Further minor amendments were passed early in 1954. A new Petroleum Ordinance for the Northern Territory was brought into force on 27th

May, 1954. New legislation covering petroleum was brought down in New South Wales under the Petroleum Act, 1955, and several amendments to the Petroleum Act, 1951, were passed in Western Australia.

(ii) *States.* (a) *General.* In addition to free assays and determinations of rocks and minerals carried out for prospectors by the Mines Departments of the States and Territories, technical officers of these departments provide advice to the mining and allied industries where required, carry out field examinations of mining prospects, advise on exploration and development, select sites for water supply, and in general give a free technical service to the mining industry.

(b) *New South Wales.* State aid to assist metalliferous mining consisted of grants to assist the prospecting and/or mining for gold and minerals and for the purchase, removal and installation of mining plant or equipment.

(c) *Victoria.* Loans may be made to assist prospecting and development or the purchase of machinery. The Mines Department has 28 stamp batteries in different parts of the State to crush ore for prospectors at nominal rates. Small mining companies may avail themselves of these facilities.

(d) *Queensland.* The Mines Department maintains a treatment works for tin ores, etc., at Irvinebank, an assay office at Cloncurry and diamond-drilling plants in several parts of the State. The Venus State Mill at Charters Towers is available for the treatment of gold-bearing ores. In addition, many departmental compressor plants, pumping plants and other mining equipment are provided and made available on hire on the principal mining fields.

(e) *South Australia.* During 1940 the Premier announced that assistance would be given to copper-mining in the form of financial help towards such development work as was absolutely necessary for a mine to enter upon reasonably continuous production. The State maintains batteries and cyanide works at Mount Torrens, Peterborough, Mongolata, Tarcoola and Glenloth and assays for public purposes are made at the School of Mines.

(f) *Western Australia.* The Mines Department has about twenty batteries throughout the mining fields where prospectors and others can have their ore treated.

(g) *Tasmania.* The Department of Mines provides financial assistance to mining lessees for the purchase of plant and machinery, for sinking, repairing or dewatering of shafts, for construction of dams and water races, for testing and proving a deposit of any mining product, for developmental work and for diamond and other types of drilling.

Other assistance is rendered to the industry by geological and engineering advice and through ore-dressing research into metallurgical recoveries and the selection and design of treatment plant.

(h) *Northern Territory.* In order to encourage the development of the mining industry, the Northern Territory Administration operates Government batteries at Tennant Creek, Hatches Creek, and Maranboy for the treatment of miners' ores. The crushing charges are subsidized by Government grants. In addition, the Administration provides cartage subsidies and financial advances to encourage miners to carry out development work. Roads and water supply services are provided and maintained for all mines under active development throughout the Territory.

2. *Control of Minerals.*—(i) *Mica Production.* The Commonwealth Mica Pool purchases mica won in the Harts Range, Northern Territory, thus ensuring the miners a ready market for their output at fixed prices and also permitting an orderly distribution of mica to the trade. The Pool is controlled by a Committee of Management consisting of representatives of the Commonwealth Government, producers and consumers.

(ii) *Control of Exports of Metals and Minerals.* Certain metals and minerals produced in Australia are subject to export control for one or more of the following reasons :—

- (a) the necessity to conserve resources (e.g., iron ore and manganese) ;
- (b) inadequacy of local production to fulfil domestic demand (e.g., mica, manganese ore, copper, iron and steel) ;
- (c) the strategic importance of the minerals (e.g., beryllium ores, concentrates and metal ; monazite ; tantalite and tantalum products ; uranium ore, concentrates, residues and metal ; mica).

Mixed concentrates of beach sand minerals are prohibited exports, but rutile, zircon and ilmenite may be exported. Some non-ferrous scrap is also subject to control.

(iii) *Radio-active Minerals.* Since the discovery of the possibility of using atomic energy considerable attention has been paid to the occurrence of uranium in Australia. To encourage the search for and discovery of deposits of uranium ore, the Commonwealth Government has approved the granting of monetary rewards for such discoveries.

Up to the end of 1949 important deposits had been found only in the northern part of South Australia where the Mt. Painter and Radium Hill fields had been investigated, largely by the South Australian Government, but in that year the presence of uranium was discovered in the Rum Jungle district of the Northern Territory, and investigations carried out by the Commonwealth Bureau of Mineral Resources, Geology and Geophysics in the years 1949–1952 proved that these deposits are of substantial importance.

Towards the end of 1952 the Commonwealth Government placed the Rum Jungle deposits, together with other deposits which are known to occur, but which have not yet been adequately investigated, under the control of Territory Enterprises Pty. Ltd., a subsidiary of Consolidated Zinc Corporation Limited, to carry on the investigations on its behalf and to mine and treat the ore. The treatment plant at Rum Jungle was officially opened by the Prime Minister on 17th September, 1954. Investigation of an area adjacent to Rum Jungle was carried out by the Bureau, using an airborne scintillometer. This survey indicated the presence of many radio-active anomalies, and demonstrated the effectiveness of this method of search. During 1952, arrangements were completed between the Governments of the United States of America, South Australia and the Australian Commonwealth, for the purchase of ores by the United States.

In South Australia, the South Australian Government extensively explored the Radium Hill deposit by underground development and diamond drilling. A primary treatment plant was erected at the mine and went into operation in November, 1954 ; the concentrate is transported to a plant at Port Pirie, completed in mid-1955, where it is further reduced.

The Bureau of Mineral Resources is carrying out further airborne scintillometer surveys and extensive geological, geophysical and geochemical surveys and diamond drilling operations, with a view to discovering further deposits and to assessing the value of known deposits.

During 1953 Commonwealth Legislation was enacted to set up an Atomic Energy Commission which is responsible, in an overall sense, for the production and utilization of uranium in Australia. This Act, the Atomic Energy Act of 1953, supersedes the Atomic Energy (Control of Materials) Act of 1946, but contains a provision of that Act which provides for control of substances which could be used for production or use of atomic energy. It gives the Commonwealth power to acquire such substances in their natural state and in waste materials from mining operations, to carry on mining and other operations necessary for the recovery of such substances, and to pay compensation for such acquisition. It also gives the Commonwealth power to obtain possession of such substances held by any person.

Further reference to the Atomic Energy Commission appears in Chapter XXVII.—Defence.

## CHAPTER XXVII.

## DEFENCE.

## § 1. Department of Defence.

1. *Introduction.*—At the outbreak of the 1939–45 War, the Department of Defence comprised the three Fighting Services and a Central Secretariat. In November, 1939 separate Departments, each with its own Minister, were created for the control and administration of the Navy, Army and Air Force. The Defence Department as then reconstituted retained responsibility for over-all defence policy and for the conduct during the war of the business of the War Cabinet, set up in September, 1939, and the Advisory War Council, set up in October, 1940. These bodies ceased to function after the war.

2. *Functions and Organization.*—(i) *Functions.* Subject to the authority of Cabinet, the Minister and Department of Defence are responsible for:—

- (1) The formulation and general application of a unified defence policy relating to the Defence Forces and their requirements, including:—(a) co-operation in British Commonwealth and regional defence and the defence aspect of the Charter of the United Nations; (b) the supply aspect of defence policy, including the review of production programmes and capacity; (c) the scientific aspect of defence policy; and (d) the financial requirements of defence policy, and the allocation of funds made available.
- (2) The defence aspect of Armistice and Peace Terms, Control Commissions, and Forces of Occupation.
- (3) Matters of policy or principle and important questions having a joint Service or inter-Departmental defence aspect.
- (4) The defence aspect of questions relating to the organization and machinery for:—(a) co-operation in British Commonwealth defence; (b) co-operation in regional security, including obligations under the United Nations Charter; (c) higher direction in war; and (d) higher direction of the Services.
- (5) The Commonwealth War Book, which is a summary of national plans for an emergency as developed in Departmental War Books.
- (6) The administration of inter-Service organizations, such as the joint intelligence machinery.
- (7) The defence aspect of:—the strength and organization of the Forces, higher appointments in the Services, honours and awards.
- (8) Advice on the military aspect of civil defence.

(ii) *Organization, higher defence machinery, the control of the joint Service machinery and the Secretariat of the Council of Defence.* The joint Service and inter-Departmental advisory machinery of the Department consists of various committees headed by the Defence Committee, the Chiefs of Staff Committee and the Joint War Production Committee. The Defence Committee is a statutory body consisting of the Secretary, Department of Defence, who is Chairman, and the Chiefs of Staff of the three Services. In general, its function is to advise on defence policy as a whole, and on matters of policy or principle and important questions having a joint Service or inter-Departmental defence aspect. The main responsibility of the Chiefs of Staff Committee in peace is the preparation of strategic appreciations and military plans. The function of the Joint War Production Committee is, briefly, to examine the relation between strategical plans and their requirements to ensure that the war potential for them exists. The major committees subordinate to the Defence Committee and/or the Chiefs of Staff Committee comprise the Principal Administrative Officers Committee (Maintenance and *Matériel*), the Principal Administrative Officers Committee (Personnel), the Defence Research and Development Policy Committee, the Joint Planning Committee, the Joint Intelligence Committee and the Joint Administrative Planning Committee.

(iii) *Board of Business Administration.* In view of the heavy defence expenditure, the Government, in July, 1953, established the Board of Business Administration in the Department of Defence. The Board deals with joint Service matters of common interest to the three Services, or important subjects on which the collective advice of the Board

is desired. The Board comprises businessmen who serve in a part-time honorary capacity and consists of an independent chairman and deputy chairman and the business advisers of the three Service Departments.

3. **Basis of Current Defence Policy.**—The aim of Australian Defence Policy is to co-operate in repelling aggression.

The basis of Defence Policy has been transformed from preparedness by a critical date, to the capacity to maintain it at a level that can reasonably be sustained for a long haul having regard to the essential demands of other sectors of the national economy, including national development.

The size of the Defence effort having been determined by the amount of the Defence Vote, the relative strengths of the Navy, Army and Air Force are governed by the probable form and scale of attack. Strategically, Defence falls into two divisions:—

(i) Local defence of Australian territories and waters, which is the absolute responsibility of the Australian Government. This is the first priority for the Services.

(ii) Oversea defence based on global strategy to defend vital interests and to bring about the defeat of the enemy. Australia is committed as a member of the British Commonwealth, and in accordance with the provisions of the Anzus Treaty, the South East Asia Collective Defence Treaty, and the Charter of the United Nations, to co-operate in collective security.

4. **The Defence Programme.**—(i) *Programme.* The Government's current Defence Programme is based on a vote of £190 million. It provides for the maintenance of an efficient Service organization including fighting forces together with command, training and maintenance elements capable of rapid expansion in time of war. Adjustments have been made to improve the balance between equipment and manpower to enable increased provision to be made for modern equipment.

In the field of research and development, Australia is making its principal contribution through the Long Range Weapons Establishment which is a joint United Kingdom—Australian effort, for the testing of guided weapons. The executive authority for this project is the Department of Supply which is also responsible for design and inspection services and for the provision of the material requirements of the forces other than munitions.

The Department of Defence Production is responsible for manufacture and supply of munitions and aircraft. Provision is being made for further progress with the Defence Production Capital Programme, for the expansion of production capacity and the replacement and modernization of existing facilities to meet the material requirements of the Services. This includes the establishment of a munitions factory at St. Mary's in New South Wales.

(ii) *Financial.* Details of Defence Expenditure for 1954–55 and the allocation of the Defence Vote for 1955–56 are set out in the two tables which follow:—

**ALLOCATION OF DEFENCE VOTE OF £190,000,000 FOR 1955–56.**  
(£'000.)

Service or Department.	Mainten- ance.	Capital Material Requirements, Machinery, Plant and Equipment.	Capital Buildings, Works and Acquisi- tions.	Miscel- laneous.	Total Expenditure.
Defence .. .. .	709	13	28	..	750
Navy .. .. .	31,395	16,024	1,415	..	48,834

<b>Total .. .. .</b>	<b>130,898</b>	<b>42,463</b>	<b>16,613</b>	<b>26</b>	<b>190,000</b>

**DEFENCE EXPENDITURE, 1954-55.**  
(£'000.)

Service or Department.	Mainten- ance.	Capital Material Requirements, Machinery, Plant and Equipment.	Capital Buildings, Works and Acquisi- tions.	Mil- itaries.	Total Expenditure.
Defence .. ..	611	11	21	..	643
Navy .. ..	30,561	15,435	1,217	..	47,213
Army .. ..	47,472	(a) 19,096	2,937	..	(a) 69,505
Air .. ..	33,137	13,524	2,587	..	49,248
Defence Production .. ..	2,634	1,811	783	..	5,228
Supply .. ..	11,034	907	1,684	38	13,663
Civil Defence .. ..	34	..	..	..	34
<b>Total .. ..</b>	<b>125,483</b>	<b>50,784</b>	<b>9,229</b>	<b>38</b>	<b>185,534</b>

(a) Includes £8,000,000 paid to the Defence Equipment Trust Account.

(iii) *Personnel Strengths.* The personnel strengths of the Services at 31st December, 1955 were :—

Category.	Navy.	Army.	Air Force.	Total.
Permanent Forces .. ..	(a) 13,143	22,726	15,411	51,280
Citizen Forces—				
Volunteers .. ..	5,276	14,630	1,929	21,835
National Service Personnel .. ..	4,476	(b) 114,842	(b) 16,196	(b) 135,514
Total Citizen Forces .. ..	9,752	129,472	18,125	157,349
Total Permanent and Citizen Forces .. ..	22,895	152,198	33,536	208,629

(a) Excludes midshipmen not on pay—99. (b) Includes 44,470 Army and 15,416 Air Force National Service personnel who have completed training and are on the reserve.

5. **Australian Forces in Malaya and Korea-Japan.** (i) *Malaya.* The Prime Minister announced on 1st April, 1955—“Australia will participate in the establishment in Malaya, a very important portion of the Manila Treaty area, a contribution to the defence of the treaty area, of a strategic reserve in which the United Kingdom and New Zealand will participate”.

The Australian contribution comprises the following forces—

*Navy*—Two destroyers and two frigates. An aircraft carrier will also pay an annual visit, and additional ships will be provided in an emergency.

*Army*—An infantry battalion with supporting arms, and reinforcements in Australia.

*Air Force*—A bomber wing of one squadron and an airfield construction squadron. In addition, a fighter wing of 2 squadrons is to be provided.

On 15th June, 1955 the Prime Minister announced the decision of the Australian Government that the Australian forces sent to Malaya could, like the United Kingdom and New Zealand components of the Strategic Reserve, be available for use against the Communist terrorists.

(ii) *Korea-Japan; Australian Contribution—*

*Navy*—From June, 1950 to December, 1954, a Royal Australian Navy Force of two ships operated under the U.N. Command with the aircraft carrier H.M.A.S. *Sydney* relieving a United Kingdom aircraft carrier for brief intervals. During 1955 one destroyer or frigate operated under this Command until September, when it was decided that the R.A.N. contribution would in future be drawn from Australian ships of the Far Eastern Fleet. The Australian ships are allocated for duty by the Commander-in-Chief (F.E.S.) in rotation with other ships in the Fleet.

*Army*—At 1st February, 1956 the Armed Forces in Korea totalled 760 (all ranks) comprising—

- (i) 1st Battalion, The Royal Australian Regiment.
- (ii) A proportion of the Headquarters of 1st Commonwealth Division.
- (iii) An element of the British Commonwealth Communications Zone.

At the same date the forces in Japan totalled 770 (all ranks) comprising—

- (i) Australian units in the Kure Base.
- (ii) A proportion of Headquarters, B.C.F.K. and other base units.

The periods of service in Korea of the respective battalions have been as follows—

3rd Battalion—September, 1950 to November, 1954.

1st Battalion—March, 1952 to March, 1953.

2nd Battalion—March, 1953 to March, 1954.

1st Battalion—relieved 2nd Battalion, March, 1954.

Commencing in March, 1956, the 1st Commonwealth Division in Korea will be reduced from brigade group strength to an infantry battalion drawn from the United Kingdom with Canada, Australia and New Zealand providing detachments. The force will be known as the Commonwealth Contingent, Korea. Australian Forces will comprise a signal squadron and a small proportion of Headquarters and Administrative units (total strength 90).

This reduction in strength will permit the transfer of the base from Japan to Korea, and as from July, 1956 the base in Japan will begin to close down.

*Air Force*—No. 77 Fighter Squadron served in Korea from June, 1950, and later (1953) was joined with No. 36 Transport Squadron and Administrative and Maintenance units to form No. 91 Composite Wing. This Wing was disbanded by early 1955 and the R.A.A.F. Transport Flight, Japan, was formed, comprising 3 transport aircraft and small administrative and maintenance elements. With the closing of the base in Japan the Flight will return to Australia.

6. *National Service Training.*—(i) *Liability.* The National Service Act 1951-1953 requires every male ordinarily resident in Australia, other than certain officials in the service of international bodies, diplomatic personnel, men already serving in the Permanent Forces and aboriginal natives of Australia, who on and after 1st November, 1950 attains the age of 18 years to register when called upon to do so by notice published in the *Gazette*.

Every registrant is liable to be called up for service unless he is exempt on the grounds of being subject to prescribed physical or mental disabilities, a theological student, a minister of religion, a member of a religious order, or a person who has established a conscientious objection to all forms of military service. Persons who establish a conscientious objection to combatant service only are called up for non-combatant duties.

Provision is made for deferment of call-up for limited periods of students and apprentices and of individuals who can establish before a court that their call-up would result in exceptional hardship to themselves, their parents or dependants. In September, 1954 the Government announced that, for the time being, the training of those who do not live within reasonable distances of C.M.F. training centres and those engaged full-time as rural workers in the production of foods and raw materials would be deferred. The total number of National Servicemen to be trained will continue at the present figure of 33,750 annually.

(ii) *Conditions of Service.* Service under the National Service Scheme is with the Citizen Naval Forces, the Citizen Military Forces or the Citizen Air Force but no person is called up for service with the Citizen Naval Forces or the Citizen Air Force unless he has volunteered for service beyond the limits of Australia.

In the Navy and Air Force, National Servicemen are required to serve a total period of 154 days training which is performed in one continuous period except in the case of students who may complete their service in two periods of 77 days in successive years. In the case of the Army, the total period of training is 140 days, consisting of 98 days continuous training and 21 days training in camps or week-end bivouacs in each of the

following two years. In all cases the Act requires a further term of service as reservists until five years from the date of call up. (*See also* sections dealing with the respective Services.)

(iii) *Strength.* To 31st December, 1955, 147,050 persons had been called up for training.

## § 2. Naval Defence.

1. *State Systems.*—Information regarding naval defence systems prior to 1901 will be found in *Official Year Book No. 2*, p. 1084.

2. *The Present System.*—(i) *General.* (a) *Royal Australian Navy up to end of 1939–45 War.* An outline of the development of Australian Naval policy was given in *Official Year Book No. 3*, p. 1060 and *No. 12*, p. 1012. Some account of the building of the Australian Navy, the proposed and modified cost thereof, the compact with the Imperial Government, etc., appears in *Official Year Book No. 15*, pp. 921–23. An account of the growth and activities of the Royal Australian Navy during the 1939–45 War is given in *Official Year Book No. 36*, pp. 1023–27.

(b) *Post-war Programme.* The following is a summary of the Naval Programme:—

(1) *Ships in Commission.*—The Fleet consists of:—

Carrier Force : 1 Light Fleet Carrier, 3 Destroyers.

Escort Forces : 3 Frigates.

Surveying Duties : 1 Survey Ship and its tender:

Training Ships : 1 Frigate, 5 Ocean Minesweepers, 1 Light Fleet Carrier.

Auxiliary Vessels : 3 Boom Defence Vessels, 1 Ocean-going Tug, 1

Armament Store Carrier, 3 Patrol Vessels, 2 General Purpose Vessels,

4 Search and Rescue Vessels.

(2) In addition to the ships in Commission, a substantial reserve fleet will be maintained in good condition against any future emergency.

(3) *Personnel.*—The strength of the Royal Australian Navy has been pegged at 14,400, comprising 1,584 Officers and 12,816 ratings.

(4) *Reserve and National Service Training.*—Reserve training was resumed as from 1st January, 1950 for members of the Royal Australian Naval Reserve. Training consists of 45 two-hour drill attendances at night or on Saturdays in naval training establishments in each of the capital cities, plus 13 days continuous training each year in H.M.A. ships or training establishments, including special schools. In addition, payment is made for further voluntary home training up to a maximum of 12 days. Selected members may undergo special courses up to a limit of six months during the whole of their service in the Reserve, whilst up to 12 months training or service may be performed in H.M.A. ships or establishments with similar qualifications. Engagements are for three years. Rates of pay have been aligned (with minor modifications) with those applicable to the Permanent Naval Forces. The training for members of the Royal Australian Naval Reserve (Sea-going) is normally 28 days every two years whilst members of the Royal Australian Naval Volunteer Reserve are under no training obligations.

Naval National Service personnel commenced training on 30th July, 1951. On completion of their 154 days initial training in naval establishments and H.M.A. ships, personnel will be attached to the Naval Reserve Training Establishment in their State until completion of their five-year liability for mobilization in war or emergency. The present annual intake of National Servicemen is 1,200.

Revised post-war conditions of service in the Royal Australian Fleet Reserve were introduced as from 13th December, 1950. This Reserve is comprised of two classes:—(a) former ratings who receive full benefits under the Defence Forces Benefits Act and are required to serve five years in the Royal Australian Fleet Reserve as a consideration for receipt of these benefits, and (b) former ratings who have previously served in the Permanent Naval Forces of the Royal Australian Navy, Royal Navy, or a Dominion Navy subject to a minimum period of three

years' service and an absence of not more than five years. No retainer is payable to members under (a) and no obligatory training is carried out but 14 days paid voluntary training can be undertaken. Members under (b) receive an annual retainer of £24 subject to completing annual training; if enrolled within 12 months of discharge from Permanent Naval Forces—7 days; if enrolled after a lapse of 12 months since discharge from Permanent Naval Forces—14 days; additional paid voluntary training up to 14 days may be carried out. Ratings receive pay applicable to Royal Australian Navy personnel whilst under training.

- (5) **Fleet Air Arm**—The Fleet Air Arm of the Royal Australian Navy consists of five front line squadrons, one operational carrier, H.M.A.S. *Melbourne*, and one Naval Air Station, H.M.A.S. *Albatross* at Nowra, New South Wales. The training ship, H.M.A.S. *Sydney*, is used periodically for deck landing training. The new aircraft carrier H.M.A.S. *Melbourne*, fitted with an angled deck and steam catapult, arrived in Australia in mid 1956. She carries two squadrons of Gannet turbo-prop anti-submarine aircraft, and one squadron of jet Sea Venom all weather fighters.

- (6) **Ship Construction and Repair**—Provision is made for the maintenance in Australia of a nucleus ship construction and repair industry capable of rapid expansion in war. The present approved programme provides for the construction of three destroyers, four anti-submarine frigates, one boom-working vessel and two inshore minesweepers (work not yet commenced); and the conversion of four "Q" class destroyers to fast anti-submarine frigates (three have been completed and work on one is in progress).

(c) *The Relation of New Weapons.* Careful consideration has been given to the implications of new weapons, and the decisions in regard to the Navy are based on the broad conclusions of great naval powers that these weapons should be introduced by the normal process of evolution, first into existing ships, and later perhaps into an entirely new form of fighting ship. The same authority supports the view that there will be no rapid development which will render vessels such as carriers, cruisers and destroyers obsolete in the near future.

(ii) *Naval Board.* The Australian Navy is administered by a Board consisting of the Minister for the Navy with four Naval Members, and the Secretary, Department of the Navy; the seat of administration is at Melbourne.

(iii) *Naval College.* Nineteen cadet midshipmen (including four from the Royal New Zealand Navy) entered the Naval College for training in the year commenced January, 1956. At that date there were 118 cadet midshipmen undergoing training at the College.

(iv) *Training Establishments.* Flinders Naval Depot, Victoria, remains the principal training establishment for ratings in the permanent forces, while several advanced training schools are established in Port Jackson, New South Wales. Air training is carried out at Nowra, New South Wales.

(v) *The Australia Naval Station.* Defined limits of the Australia Station are as follows:—

Eastern—

From 3° 30' North, 169° East, south to 1° South, thence east to 170° East, thence south along this meridian to 30° South, thence to 45° South, 160° East, thence south, along this meridian.

Northern—

From 3° 30' North, 169° East, west to 125° East, thence south to the Coast of Celebes, thence west along the Coast of Celebes to 120° East, thence south to 11° 30' South, thence west to 11° 30' South, 95° 15' East.

Western—

From 11° 30' South, 95° 15' East, south along this meridian to 30° South, thence west along this parallel to 80° East, thence south along this meridian.

(vi) *Foreign Service.* The R.A.N. is represented in Japan by H.M.A.S. *Commonwealth* base establishment in Kure. During the year ended June, 1955 H.M.A. Ships *Shoalhaven*

and *Condamine* served in Korean waters. H.M.A. Ships *Arunta* and *Warramunga* served in the Malayan area of the Strategic Reserve.

(vii) *Papua and New Guinea Division of the Royal Australian Navy.* A Papua and New Guinea Division of the Royal Australian Navy, consisting of native ratings, was inaugurated in July, 1951 as a separate part of the Permanent Naval Forces for employment in Papua and New Guinea and waters adjacent thereto.

3. Ships of the Royal Australian Navy.—The following ships were in commission or in reserve in June, 1956 :—

4. **Strength of Royal Australian Navy.**—The serving strength of the Royal Australian Naval Forces, both permanent and reserves, at 30th December, 1955 was 1,232 officers and 11,620 ratings including 59 native ratings of the Papua and New Guinea Division of the Royal Australian Navy. In addition, 10 officers and 210 ratings of the Women's Royal Australian Naval Service were serving and 170 cadet midshipmen were undergoing training, including 118 at the Naval College. Reserve strength comprised 1,469 officers and 7,913 ratings.

### § 3. Military Defence.

1. **State Systems.**—A detailed historical account of the Australian defence forces prior to Federation will be found in Official Year Book No. 2, pp. 1075–1080. *See also* Official Year Book No. 12, p. 999.

The strength of the military forces of the States on 31st December, 1900 (the eve of Federation) was:—New South Wales, 9,338; Victoria, 6,335; Queensland, 4,028; South Australia, 2,932; Western Australia, 2,696; Tasmania, 2,024; total for Australia, 27,353. This total is exclusive of cadets, reservists and rifle club members.

2. **Commonwealth Systems.**—(i) *General.* Under the terms of the Constitution Act 1900, the Commonwealth took over control of defence matters in March, 1901. The growth of the Commonwealth Military Forces may be considered to have taken place in sixteen phases. For particulars of the phases which cover the period from the welding together of the military forces of the States into one homogeneous army in 1902 up to the decision to increase the training strength of the militia to 70,000 in the year before the 1939–45 War (phases 1–7), *see* Official Year Book No. 36 and earlier issues.

Phases 8–10, covering the period immediately prior to, and just following, the outbreak of the 1939–45 War, relate to the initial steps necessary to put the Australian Military Forces on a war-time basis, and to its organization into commands.

The eleventh phase, in January, 1942, was the division of Northern, Eastern and Southern Commands into separate commands and base headquarters to handle operational and administrative matters respectively, and the twelfth phase was the revision of the machinery for command administration of lines of communication areas. The thirteenth phase was the appointment of Lieutenant-General Sir Iven Mackay as G.O.C.-in-C. Home Forces commanding the forces in Northern, Eastern and Southern Commands. The fourteenth phase covered the period following the outbreak of war with Japan and the entry of United States of America Forces into the South-West Pacific Area, and related to the appointment of General Sir Thomas Blamey as Commander-in-Chief, Australian Military Forces, the cessation of the Military Board, and the replacement of the system of commands and bases by the field army and lines of communication areas. In March, 1943, First and Second Armies took over from Queensland, New South Wales and Victoria Lines of Communication Areas the command of all coast and static anti-aircraft artillery defences and training establishments. On 16th June, 1944 Western Command was re-established and took over the combined responsibilities of Third Australian Corps and Western Australia Line of Communication Area.

The fifteenth phase was the re-introduction in March, 1946, of the Military Board and the organization of commands and military districts, and the sixteenth phase was the commencement of the National Service Training Scheme in August, 1951 (*see* § 1, para. 6 above and sub-para. (iv) (c) following)

For greater detail on phases 8–14 *see* Official Year Book No. 38 and earlier issues.

(ii) *Population of Military Age, 30th June, 1954.* The following particulars show the numbers of males of military age in the population of Australia at the Census of 30th June, 1954. The total number of cadet age, 14 and under 18, was 250,184; of citizen soldier age, 18 and under 26, 497,742; and 26 and under 35, 663,074; making a total of 1,410,916, 18 and under 35, which is considered the best period for military service. In addition to the above-mentioned there were 1,375,100 males 35 and under 60, in Australia at 30th June, 1954.

(iii) *Allotment of Units.* Under the Command Organization (*see* above) units are raised on a territorial basis, each State supplying its proportion of the personnel required for the fighting services, the organization at 30th June, 1955 being as follows:—

#### COMMAND ORGANIZATION.

##### Army Headquarters.

Northern Command	Eastern Command	Southern Command	Central Command	Western Command	Tasmania Command	Northern Territory Command
All formations and units in 1st Military District and New Guinea.	All formations and units in 2nd Military District.	All formations and units in 3rd Military District.	All formations and units in 4th Military District.	All formations and units in 5th Military District.	All formations and units in 6th Military District.	All formations and units in 7th Military District.

Commands conform generally to State boundaries as follows:—Northern Command, Queensland; Eastern Command, New South Wales; Southern Command, Victoria; Central Command, South Australia; Western Command, Western Australia; Tasmania Command and Northern Territory Command. New Guinea is the responsibility of Northern Command.

(iv) *Military Training Systems.* (a) *General.* Particulars of the military training systems in operation prior to the 1939–45 War, first on a compulsory basis and later voluntary, will be found in Official Year Book No. 38 and earlier issues.

The current plan (1955–56) for the Australian Regular Army is based on an average strength of 28,000 full time duty personnel (including 4,600 civilians) and a Citizen Military Force of 80,000 including National Servicemen.

(b) *The Australian Cadet Corps.* The Australian Cadet Corps is a voluntary organization comprised of School Cadet units and Regimental Cadet units. It serves as a training ground to provide, to some extent, the future officers and non-commissioned officers of the Australian Military Forces, and, as such, occupies an important position in the scheme of national defence. School Cadet units are raised at educational establishments in all States of the Commonwealth. The minimum age for enrolment is the year in which the applicant reaches the age of 14 years, and cadets, who in the large majority of schools receive a free issue of A.M.F. pattern uniform, may remain in the Cadet Corps until they cease to be pupils of the educational establishments concerned. A few units retain their own pattern school uniform and are not issued with A.M.F. pattern uniforms. Provision is made for the appointment of officers, warrant and non-commissioned officers on an authorized establishment scale from within school units. School cadet units are not affiliated with Citizen Military Force Units.

Regimental Cadet units have been raised in close affiliation with Citizen Military Force units, whose uniform they wear with the addition of the word "Cadets" directly under the title of the parent unit. These units are manned by boys who either have left school or are students at schools where no School Cadet unit has been raised. Regimental Cadet units are now being disbanded.

The establishment of the whole Corps is 35,000 all ranks, and by September, 1955, comprised 265 School Cadet units with a posted strength of 30,500 all ranks and 382 Regimental Cadets posted to Citizen Military Force units.

(c) *National Service Training Scheme.* Under the National Service Scheme (*see* § 1, para. 6 above) the Army is required to train 29,250 trainees per year, effected by three intakes each of 9,750 trainees in January, April and August each year. The first intake commenced training in August, 1951.

(v) *Women's Services.* In November, 1950 approval was given for the enlistment of women into the Australian Regular Army, on a limited scale. Enlistment commenced immediately into the Australian Women's Army Corps. During June, 1951, the Australian Women's Army Corps was re-designated the Women's Royal Australian Army Corps (W.R.A.A.C.). Members are employed in establishments in direct substitution for male soldiers. The Women's Services in the Australian Regular Army now comprise two Corps only:—(a) Royal Australian Army Nursing Corps; (b) Women's Royal Australian Army Corps.

Women's Services have been incorporated in the Citizen Military Forces; it is proposed to raise sixteen companies of the Women's Royal Australian Army Corps and twelve companies of the Royal Australian Army Nursing Corps, a total of 3,900 all ranks, within the C.M.F.

At December, 1955 seven companies of the Women's Royal Australian Army Corps and nine companies of the Royal Australian Army Nursing Corps, a total of 2,250 all ranks, had been raised within the C.M.F.

(vi) *Korea.* On 2nd August, 1950 the Commonwealth Government announced its decision to raise and dispatch to Korea one infantry battalion as part of Australia's contribution of military assistance to the United Nations. 3rd Battalion, The Royal Australian Regiment, stationed in Japan, brought up to strength by special enlistments flown to Japan from Australia, became the Special Korean Force, and on 27th September, 1950 sailed from Japan for Korea where it joined 27th British Brigade. For its gallantry on 24th and 25th April, 1951, 3rd Battalion was awarded the United States Presidential Citation by the United States of America. On 4th October, 1951 the Commonwealth Government announced that a second infantry battalion would be sent to Korea to join 3rd Battalion. On 3rd March, 1952, 1st Battalion, The Royal Australian Regiment, which had been brought up to strength at Ingleburn, New South Wales, embarked for Japan where it was equipped before moving to Korea. 1st Battalion joined 3rd Battalion, under operational control of 28th British Brigade, 1st Commonwealth Division, on 1st June, 1952. 2nd Battalion, The Royal Australian Regiment, after training at Puckapunyal, Victoria, relieved 1st Battalion in Korea on 21st March, 1953, the latter battalion returning to Australia. 2nd Battalion was relieved by 1st Battalion and returned to Australia in April, 1954, while 3rd Battalion returned to Australia in November, 1954.

(vii) *Malaya.* On 1st April, 1955 the Commonwealth Government announced its decision to dispatch troops to Malaya as an Australian component of the British Commonwealth Far East Strategic Reserve. 2nd Battalion, The Royal Australian Regiment and 105th Field Battery, Royal Australian Artillery and other minor units embarked from Australia on 6th October, 1955 and disembarked at Penang on 20th October, 1955.

(vii) *The Staff College.* Until 1938 the training of staff officers was carried out in the various Military Districts throughout Australia, except in cases where officers were selected from time to time to attend courses abroad. In 1938 an Australian Command and Staff School, located in the original Officers' Mess at Victoria Barracks, Sydney, was established. Between 1939 and 1945 the training of staff officers was carried out under varying conditions by different schools in accordance with the changing needs of the war.

Early in 1946 the Staff School (Australia) was established at Seymour in Victoria and re-designated the Staff College in conformity with other Empire training establishments for training officers for command and staff appointments. The College was later moved to Queenscliffe, Victoria, where it is at present situated. The courses are of ten months' duration and are held from January to November each year. The normal intake is 30 students and, on successfully completing the course, an officer is awarded the symbol "psc". The course is designed to train selected officers for war, and in so doing to fit them for Command or Grade II. staff appointments. Each course includes, among the students, Army representatives of the United Kingdom and other Dominions and countries. Included in the 1953 course were students from the United Kingdom, Canada, New Zealand, India, Pakistan, the United States of America and Burma. Vacancies on each course are reserved also for officers who may be nominated by the Royal Australian Navy, the Royal Australian Air Force and the Commonwealth Public Service.

In order to ensure common standards in tactical doctrine and staff and command training throughout the Empire, liaison is maintained with other Staff Colleges; and to this end there is also a reciprocal exchange of instructors. To this extent it may be said that the Staff College is imperial in character.

(viii) *Royal Military College.* The Royal Military College was established in 1911 at Duntroon in the Australian Capital Territory for the purpose of providing trained officers for the Army. The conditions of entry are laid down in the Royal Military College Regulations and provide for admission by "normal", "service" and "special" entries. The length of the normal course is four years; "service" entry cadets attend for three years; and "special" entries for one year.

While at the College, cadets receive pay and allowance of 14s. 1d. per day in their first year, rising to 22s. 9d. per day in their fourth. Uniform maintenance allowance of 1s. 9d. per day is additional, and a further 6d. per day is paid to cadets on attaining the age of 18 years. The course of instruction is organized into military and civil departments and the instructional staff comprises officers of the Army and civilian professors. On graduation, cadets are appointed lieutenants in the Australian Regular Army. The College also trains New Zealand cadets for commissions in the New Zealand Permanent Forces under an agreement made with the Government of that Dominion.

(ix) *The Officer Cadet School.* The Officer Cadet School was established in 1951 at Portsea, Victoria, for the purpose of speeding up the supply of junior regimental officers for the Australian Regular Army. Serving members of the Australian Regular Army, the Citizen Military Forces, National Servicemen, and civilians between the ages of 18 and 23 years, are eligible to apply for entrance. The course is of eleven months' duration, and on graduation, cadets are appointed second-lieutenants in the Australian Regular Army. They then normally proceed to further training at the Army School of the Arm or Service to which they have been allotted before being posted to regimental duties.

(x) *The Women's Royal Australian Army Corps School.* The W.R.A.A.C. School was established in 1952 at Mildura, Victoria. It has two wings, one whose primary task is the training of Officer Cadets for the W.R.A.A.C., the other being for the training of non-commissioned officers at all levels and for other special courses. The Officer Cadets are selected from eligible applicants, who may be serving members between 21 and 32 years

of age, or civilians between 21 and 30 years of age. The course is of six months' duration, and on graduation, cadets are appointed lieutenants in the Women's Royal Australian Army Corps.

(xi) *The Army Apprentices' School.* The Army Apprentices' School was opened in 1948 at Balcombe, Victoria, with the aim of training youths as skilled tradesmen for the Australian Regular Army, and to form a background for an Army career with prospects of promotion. The course is open to boys between the ages of 15 and 17 years and provides training in a number of highly skilled trades. A three-year course of intensive theoretical and practical work at the Apprentices' School is followed by one year in an appropriate Army workshop or technical unit. At the end of their third year, boys are given their Army trade test and also take the Victorian Apprenticeship Commission final grade public examinations, which ensures that they will be accepted as qualified tradesmen in civil life when they eventually leave the Army. In addition to trade training, the Apprentices' School provides general educational facilities up to the School Leaving Standard.

(xii) *Army Schools.* Army Schools have been established for the major Arms and Services for the purpose of training officers and other ranks in the up-to-date techniques of their own Arm or Service, to qualify them for promotion requirements, and to produce trained instructors. In addition, a School of Tactics and Administration which has been established at Seymour, Victoria, provides qualifying and instructional courses in current tactical and administrative doctrine for members of all Arms and Services. Courses at Army Schools are conducted for members of both the Australian Regular Army and the Citizen Military Forces.

The following Army Schools have been established :—School of Tactics and Administration ; Jungle Training Centre ; Armoured School ; School of Artillery ; School of Military Engineering ; School of Survey ; School of Signals ; School of Military Intelligence ; School of Infantry ; Royal Australian Army Medical Corps School of Army Health ; Royal Australian Army Service Corps School ; Royal Australian Army Ordnance Corps School ; Royal Australian Electrical and Mechanical Engineers Training Centre ; Transportation Training Centre ; School of Music ; Central Instructors School ; Women's Royal Australian Army Corps School.

(xiii) *Rifle Clubs.* The Australian Rifle Club movement, which had its origin in 1888, is provided for in the Defence Act and comprises an Australian Council of State Rifle Associations (which functions in an advisory capacity to the Minister and in the promotion of intra-empire and interstate rifle competitions), State Rifle Associations, District Rifle Club Unions and Rifle Clubs. When placed in recess, the efficient strength of the rifle club movement was 1,018 clubs and 36,478 members. Approximately 20 per cent. of this number served overseas and a further 60 per cent. performed home service duties during the 1939-45 War. Rifle shooting activities were resumed in 1946 and the strength of the movement as at 31st December, 1955 was 1,034 clubs and 44,312 members.

(xiv) *The Australian Battles Nomenclature Committee.* The Minister for the Army gave approval on 25th July, 1947 for the formation of the Australian Battles Nomenclature Committee to tabulate and classify the operations fought in the Pacific Zones in the 1939-45 War which involved the Australian Military Forces, to define their geographical and chronological limits and to advise the United Kingdom Battles Nomenclature Committee regarding operations in zones other than the Pacific Zone in which the Australian Military Forces participated. Sub-committees were later appointed to study the various campaigns in order to classify the operations into battles, actions and engagements.

3. *Strength of Australian Military Forces.*—The effective strength of the Australian Military Forces at 31st December, 1955 was as follows :—Australian Regular Army, 20,004 ; Regular Army Special Reserve, 2,722 ; Citizen Military Force (including National Service Trainees), 85,002 ; Australian Cadet Corps, 31,798.

## § 4. Air Defence.

1. *General.*—A statement respecting the preliminary steps taken in connexion with the development of air defence will be found in Official Year Book No. 18, p. 610, and one on the expansion and development and zones and operations of the Royal Australian Air Force during the 1939-45 War appears in Official Year Book No. 36, p. 1027.

2. *Operations in Korea and Malaya.*—Reference to R.A.A.F. participation in operations in Korea is contained in Official Year Book No. 40, pp. 1112-13.

Australian assistance in the form of one transport squadron provided to the Malayan authorities is detailed in Official Year Book No. 40, page 1113.

One bomber squadron was also provided for operations in Malaya. The *Lincolns* of No. 1 Squadron arrived in July, 1950 and were soon in action. Up till 1st November, 1955 No. 1 Squadron had dropped about 28,000,000 lb. of bombs during operations against communist bandits. This bombing, which calls for extreme accuracy, was mainly on jungle hideouts frequented by the insurgents and was carried out in close co-operation with the ground forces.

3. *Administration and Organization.*—The Department of Air is responsible for policy for organization and control of the Royal Australian Air Force. The Air Board is responsible, subject to approved policy, for the control and administration of the Royal Australian Air Force, and is constituted as follows :—Chief of the Air Staff, Air Member for Personnel, Air Member for Technical Services, Air Member for Supply and Equipment, Citizen Air Force Member and the Secretary, Department of Air.

Headquarters of the Royal Australian Air Force is located at Melbourne. An Oversea Headquarters is located at London and an Air Attaché at Washington.

The units of the Royal Australian Air Force are organized in three functional Commands throughout Australia and its Territories.

The Commands are :—

*Home Command.*—Home Command is responsible for the command of operational units and the conduct of their operations within Australia and its Territories.

*Training Command.*—Training Command is responsible for the command of training units, recruitment and individual training in the R.A.A.F.

*Maintenance Command.*—Maintenance Command is responsible for the command of supply and servicing units, and supply and servicing, including technical services, of the R.A.A.F. in Australia.

The organization of the Royal Australian Air Force includes the following types of formations and units :—

- (a) *Area Headquarters.* There are three Area Headquarters (North Eastern, North Western and Western) responsible to Home Command for the command of units within their geographical areas.
- (b) *Sub-formations,* comprising a headquarters unit to control the activities of a number of units at one location. Each formation has a base squadron which provides common services to all units at the location.
- (c) *Flying Squadrons.* These bomber, fighter, transport, target-towing and maritime reconnaissance squadrons undertake the operational and operational training flying commitments of the R.A.A.F.
- (d) *Aircraft Depots.* These units specialize in major overhauls, etc., of aircraft and equipment and relieve flying unit ground staff of these commitments.
- (e) *Stores Depots.* Stores and equipment ordered by the R.A.A.F. are delivered to these centrally located depots for distribution to units.
- (f) *Flying Training, Ground Training, Navigation, Radio and Air Armament Training Units,* which specialize in the aircrew and ground training required by the R.A.A.F.
- (g) *Airfield Construction Squadrons.* These units specialize in the construction of R.A.A.F. aerodromes and associated buildings and works services.

- (h) Royal Australian Air Force College. This unit is the training college for officer cadet entrants to the R.A.A.F.
- (i) Telecommunications Units. These units are responsible for the communications services of the R.A.A.F.
- (j) R.A.A.F. Staff College. This college trains specially selected R.A.A.F. officers for higher staff and command posts.

4. National Service Training Scheme.—Under the National Service Training Scheme, 3,330 personnel undergo training each year (*see also* § 1, para. 6, page 1030):

5. Aircraft.—Some of the aircraft which are at present being used in the Royal Australian Air Force are: bomber squadrons—Lincoln and Canberra; fighter squadrons—Mustang, Vampire, Meteor and Avon Sabre; transport squadrons—Dakota; maritime reconnaissance squadrons—Lincoln and Neptune; air observation post—Auster; training—Tiger Moth, Wirraway, Mustang, Dakota, Lincoln, Winjeel, Vampire and Meteor.

6. Establishment.—The Royal Australian Air Force establishment, as proposed, comprises—(a) a Home Defence Organization, (b) Task Force elements and (c) a Training Organization, consisting in all of approximately 17,190 personnel.

7. Strength of Royal Australian Air Force.—At 1st November, 1955 the strength of the Royal Australian Air Force was as follows:—Permanent Air Force, 15,407; Active Citizen Air Force, 745; Active Reserve, 1,359 and General Reserve, 23,288. In addition 3,330 National Service Trainees undergo 154 days' training each year and are then transferred to the Reserve.

8. Women's Royal Australian Air Force.—At 1st November, 1955 the Women's Royal Australian Air Force had an establishment of 832, with an enlisted strength of 786. There are 27 musterings, excluding W.R.A.A.F.'s in training. The entry age is 18 to 34 years inclusive. Parental consent must also accompany applications for those between the ages of 18 and 21 years. A good education is necessary. Applicants must be of British nationality, single, or a widow without dependants, and must be physically fit. Engagement period is four years with the option of re-enlistment for further periods of four years.

All trainee W.R.A.A.F.'s undergo a month's initial training course at Point Cook, Victoria. On graduating they are posted for duty to R.A.A.F. units anywhere in Australia. Wherever possible, the Air Force endeavours to post W.R.A.A.F.'s to R.A.A.F. units within their home State. This rule applies for those who wish to serve in their home State, but for W.R.A.A.F.'s desirous of travel, they may indicate their preference and be posted to whichever State they desire.

## § 5. War Gratuities.

Reference is made in earlier issues of the Official Year Book to the payments made under the provisions of the *War Gratuity Acts of 1920* (*see* No. 15, p. 930) and the *War Gratuity Act 1945–1947* (*see* No. 41, p. 999).

## § 6. Department of Defence Production.

1. General.—On 11th May, 1951 a Department of Defence Production and a Department of Supply were established by a decision of the Government. These Departments took over the functions previously undertaken by a joint Supply Department. The Department of Defence Production is responsible broadly for the production of munitions (including aircraft) required by the Services in government-operated factories and in industry under contract to the Government. It is also responsible for all those matters incidental to production, including the planning of production capacity to meet expected future Service requirements. References to previous operations of the various sections and establishments of the Department are given in Official Year Book No. 38, pp. 1200–9.

2. **Functions of the Department and Act Administered.**—The functions of the Department of Defence Production, as defined in the Administrative Arrangements approved by the Governor-General, are :—

- (i) Manufacture, acquisition, provision and supply of munitions for the defence forces, that is to say, armaments, aircraft, arms, ammunition, weapons, machine tools, war chemicals, radar (and such other items as may be mutually agreed with the Department of Supply as falling within the definition of munitions), including the materials and plant necessary for the production of those things and all matters incidental thereto, including :—

The receipt from the Service Departments and other authorities or Departments of orders and forecasts of requirements of munitions ; appropriate liaison with the Higher Defence Machinery, Service Departments and the Department of Supply to deal with Service munitions programmes ; operation and management of factories, workshops and undertakings concerned in the production of munitions ; arrangements and all action necessary to secure the manufacture, processing and delivery of munitions ; investigations and development of Australian sources of munitions production, including the establishment of annexes or special capacity in industry for that purpose ; acquisition by the Commonwealth and the establishment of factories and workshops for the purpose of producing munitions ; provision and maintenance of stocks of materials and goods for the purpose of producing munitions.

- (ii) Employment and training of technicians, workmen and others for the purpose of producing munitions.
- (iii) Formation of Industry Advisory Committees to advise the Minister for Defence Production regarding :—

The allocation to industry of production programmes of munitions ; the establishing of additional munitions production facilities, including annexes and undertakings ; the obtaining of appropriate details of Australian industrial capacity required by the Department of Defence Production in allocating munitions production to industry ; any other matters associated with munitions production as specified by the Minister.

- (iv) Provision and control of stores, magazine and similar undertakings required in connexion with production of munitions and for other purposes as required.
- (v) Arrangements for ascertaining costs and the control and limitation of profits in connexion with the production of munitions.
- (vi) Development of inventions originating in Government factories in the interests of defence production.

The Act administered by the Department is the Supply and Development Act 1939-1948.

3. **Production.**—(i) *Munitions.* The Department is responsible for the production in Australia of the munitions (other than specialized Navy requirements) for the Armed Services. The production is undertaken in Government-operated factories and industry. Broadly their roles are :—

- (a) Some processes are entirely undertaken by the Government factories in peace and war because of special requirements.
- (b) Some classes of equipment and components are produced entirely by industry in peace and war.
- (c) Production techniques of advanced equipment and components are developed in the Government factories in peace, of which industry may undertake mass production in war.
- (d) Limited requirements of standard equipment and components produced in peace by the Government factories are in war produced on a mass production basis in industry.

The following factories are currently in operation:—Ammunition—Footscray, Victoria; Explosives and Filling—Albion and Maribyrnong, Victoria; Mulwala and St. Mary's, New South Wales; Ordnance—Maribyrnong, Bendigo, Echuca, Port Melbourne, all in Victoria; Small Arms, Lithgow, New South Wales; and certain annexes established in industry. Other Government-owned factories and annexes are held on a care and maintenance basis against an emergency.

These factories are complementary to each other in the manufacture of a range of basic munitions. The Ammunition Factory makes the brass and non-ferrous components of gun ammunition, including melting and rolling and these components are then passed to the Explosives Factory for filling with explosives. In the case of small arms ammunition, however, the factory makes the complete round, receiving the propellant from the Explosives Factory. The Ordnance Factories principally make guns, and in addition make the steel shell bodies which are passed to the Explosives Factory to be filled with explosives and assembled with the brass and other components received from the Ammunition Factory. The Explosives Factories make the propellant and high explosives for the brass components made at the Ammunition Factory and the steel components made at the Ordnance Factory. The Explosives Factory also assembles the gun ammunition. The Small Arms Factory is equipped to make the rifles and other small arms for which the Ammunition Factory makes the ammunition.

Production of munitions is also a joint effort between the Government factories and private contractors in industry. In peace, industry produces many components for ammunition and other stores plus complete equipments such as electronics and motor vehicles for the Services. In war, industry would provide the major capacity not only for mass production of these and many other new items, but also for the mass production of equipment and components using engineering techniques developed in peacetime in the Government factories.

(ii) *Aircraft. (a) General.* Matters relating to the production in Australia of military types of aircraft and aero engines and of other aircraft components required by the Royal Australian Air Force and the Royal Australian Navy are administered by the Division of Aircraft Production of the Department of Defence Production. Aircraft repair and overhaul activities carried out for those Services in civilian establishments, as distinct from Service workshops, are also the function of the Department, together with the responsibility of supplying aircraft and engine spare parts and airborne equipment generally.

(b) *Aircraft, Engine and Other Production.* The approved production programmes for the major aircraft manufacturing organizations in Australia comprised Canberra jet-engined bombers and Jindivik radio-controlled jet-propelled target aircraft at the Government Aircraft Factory, Melbourne; Avon Sabre jet-engined fighters, Winjeel basic trainers and Rolls Royce Avon turbo-jet engines at Commonwealth Aircraft Corporation Pty. Ltd., Melbourne, and Vampire jet-trainers at De Havilland Aircraft Pty. Ltd., Sydney.

Associated concurrent activities included the production of maintenance parts of aero engines and of undercarriage parts at the Aircraft Engine Factory, Sydney, the repair and overhaul of propellers at the Propeller Annexe, Sydney, production of heavy forgings at the Heavy Forge Annexe, Sydney, and the manufacture of aircraft pressed metal parts at Chrysler Australia Ltd., Adelaide.

(c) *Repair and Overhaul.* During the year the broad policy was continued by the R.A.A.F. of returning to the factories in which they were produced all Australian-made aircraft and aero engines requiring major overhaul and the incorporation of modifications. Repair and overhaul of R.A.A.F. aircraft of other types and of carrier-based aircraft operated by the R.A.N. were undertaken by civilian personnel in the aircraft factories or in the works of contractors specially equipped to handle this type of work.

Lincoln and Canberra bomber aircraft were repaired and extensively modified at the Government Aircraft Factory, together with Jindivik target aircraft. Avon Sabre fighter aircraft were overhauled, repaired and modified and Rolls Royce Nene and Avon turbo-jet engines were overhauled by Commonwealth Aircraft Corporation Pty. Ltd., Melbourne. Rolls Royce Merlin and Pratt and Whitney Twin Row Wasp engines from the R.A.A.F., Rolls Royce Griffon and Bristol Centaurus engines from the R.A.N. and Rover Meteor engines from the Department of Army for Centurian tanks were overhauled at the Aircraft Engine Factory, Sydney. Wright turbo-compound engines from R.A.A.F. Neptune aircraft were overhauled by Qantas Empire Airways Ltd., Sydney.

Vampire fighters and trainers and Tiger Moth trainers together with Goblin turbo-jet engines from Vampire trainers and Gipsy Major piston engines were repaired and overhauled at De Havilland Aircraft Pty. Ltd. Dakota transport and other miscellaneous aircraft were serviced at the Government workshops at Parafield, South Australia.

The repair and overhaul of carrier-based Fairey "Firefly" and Hawker "Sea Fury" aircraft operated by the R.A.N. were handled by the Fairey-Aviation Company of Australasia Ltd. Sydney.

Sycamore helicopter aircraft built by the Bristol Aeroplane Company and Bristol freighter aircraft and Alvis Leonides and Bristol Hercules engines from those aircraft were repaired and overhauled by Bristol Aviation Services, also in Sydney.

(d) *Avalon Test Field.* During the year, the new aircraft flight test field constructed at Avalon, near Geelong (Victoria), was further developed for the final assembly, fitting out and testing in flight of the Canberra bomber and Avon Sabre fighter aircraft built at the aircraft factories near Melbourne.

4. *Defence Production Planning.*—A Defence Supply Planning Branch was established in July, 1950 within the Department of Supply to co-ordinate the planning of expansion of production capacity in government-owned factories and in industry. When the Department of Defence Production was created, the Branch was transferred to that Department as the Defence Production Planning Branch.

Broadly, the functions of the Branch are :—(i) to plan for and to undertake the development of additional production capacity to meet Service munition requirements for mobilization and war ; (ii) to arrange production in industry of current munitions requirements for the Defence Services ; (iii) to develop production techniques and, where necessary, capacity to produce such requirements.

The following production and related sections exist within the Branch :—(a) Ammunition ; (b) Telecommunications ; (c) Ordnance and Engineering Equipment (including equipment involving optics, production plant, mobile equipment, electrical and small craft) ; (d) Materials and Chemical Engineering ; (e) Special Projects ; (f) Planning.

The Defence Production Planning Branch is the executive instrument of a Committee of the same name. The three Defence Services, the Departments of Defence, Defence Production, Supply and National Development are represented on the Committee. This enables a close liaison to be maintained with the Departments concerned directly and indirectly with defence in the formation of defence production planning policy.

To advise the Department in the development of industrial mobilization plans to meet the requirements of war relating to particular industries, the following Industry Advisory Committees have been created :—Ammunition Industry, Electrical Industry, Explosives and Chemicals Industry, Materials Industry, Military Vehicles Industry, Machine Tools and Gauges Industry, Radar and Telecommunications Industry and Weapons and their Equipment.

The Department has undertaken a survey of industrial facilities to determine the ability of industry to meet the assessed war and mobilization requirements of the Armed Services.

5. Finance and Accounts.—The expenditure on munitions, munitions factories, aircraft production, etc., during 1953-54 and 1954-55 is shown in the following table:—

## DEFENCE PRODUCTION : TOTAL EXPENDITURE.

(£'000.)

Particulars.	Expenditure.	
	1953-54.	1954-55.
Parliamentary Appropriations .. .. .	(a) 7,307	(a) 5,280
Trust Fund Accounts—		
Government Factories and Establishments .. ..	13,422	14,564
Manufacture of Munitions .. .. .	11,054	12,007
Munition Materials .. .. .	34	129
Defence Production Materials .. .. .	233	570
Aircraft .. .. .	12,663	15,944
 Total Trust Fund Accounts .. .. .	 37,406	 43,214
 Total Expenditure .. .. .	 44,713	 48,494

(a) Includes contribution under Superannuation Act and Audit.

## § 8. Department of Supply.

1. General.—Reference to the creation of the Department of Supply is contained in Official Year Book No. 39, p. 1257.

2. Functions of the Department.—The functions of the Department include (a) the manufacture, acquisition, provision and supply of services and goods other than “munitions” (that is to say foodstuffs, textiles, clothing, fibres, canvas goods, woodwork, hardware, boots, leatherware and other like supplies) required by Services and other authorities; (b) research and scientific development in relation to war *matériel*, including the operation of the Joint United Kingdom-Australia Long Range Weapons Project, and Australian research and development through the Weapons Research Establishment, the Aeronautical Research Laboratories, Defence Standards Laboratories and associated establishments; (c) design and associated technical development and inspection of war *matériel*; (d) Planning for and procurement of strategic materials; (e) planning and establishment of manufacturing facilities for the production of goods other than munitions; (f) formation of industry advisory committees in respect of production and procurement matters; (g) arranging contracts for supply of goods and performance of services; (h) operation and management of Government Clothing Factories; (i) acquisition, maintenance and disposal of stocks; (j) sale or disposal of surplus or unserviceable Commonwealth property (except buildings or land); (k) provision of Commonwealth transport facilities; (l) security service for Supply and Defence Production Departments; (m) arrangements for ascertaining costs and control and limitation of profits on production contracts; (n) co-ordinating estimates, allocation and commitment of resources for Defence Supply needs (including munitions) and liaison with the National Security Resources Board; (o) provision and control of stores required for or in connexion with matters administered by the Department of Supply; general storage for other Departments as required.

3. *Acts Administered.*—Acts administered by the Minister for Supply are the Aluminium Industry Act 1944–1954, Atomic Energy Act 1953 and Supply and Development Act 1939–1948.

4. *Research and Development Branch.*—(i) *General.* The Research and Development Branch, which is under the control of the Chief Scientist, is responsible for research and scientific development in relation to war *matériel* including the operation of the joint United Kingdom-Australia Long Range Weapons Organization. The Chief Scientist is also the Chairman of the Board of Management for Research and Development, which is responsible for the efficient and economical conduct of research and development undertakings. The headquarters of the Branch is situated at 339 Swanston Street, Melbourne, and the following establishments are included in the Branch :—Weapons Research Establishment, Salisbury, South Australia; Defence Standards Laboratories, Maribyrnong, Victoria; Aeronautical Research Laboratories, Fishermen's Bend, Victoria.

(ii) *Weapons Research Establishment, South Australia.* The Long Range Weapons Establishment, the Chemical and Physical Research Laboratories, the Electronic Research Laboratories and the Propulsion Research Laboratories have recently been amalgamated into one organization with the title of the Weapons Research Establishment.

The Establishment has two main sections, namely, the Trials and Instrumentation Wing and the Weapons Research and Development Wing.

The Trials and Instrumentation Wing is concerned with the Joint United Kingdom-Australia Long Range Weapons Project and is responsible for the testing of guided missiles developed in the United Kingdom. The Weapons Research and Development Wing is engaged chiefly on Australian-initiated research but also provides a supporting research service for the Joint Project.

The headquarters of Weapons Research Establishment consisting of the main laboratory, workshop and administrative Services, is located at Salisbury.

Accommodation has been provided in the area for a number of United Kingdom firms which are developing guided weapons under contract to the British Ministry of Supply.

A modern airfield (Edinburgh Field) has been established adjacent to the Headquarters at Salisbury to meet the flying requirements of the establishment, the flying effort being provided by the R.A.A.F.

Testing ranges have been provided at Woomera, which is approximately 280 miles north-west of Salisbury and 9 miles north of Pimba, which is on the trans-continental railway line. A number of these testing ranges are now in operation. A modern township of 500 houses and extensive barracks accommodation has been built complete with Community Store, Hospital, School and all amenities usually found in an Australian country town.

(iii) *Aeronautical Research Laboratories.* The Aeronautical Research Laboratories at Fishermen's Bend have continued investigations in aerodynamics, structures, aircraft materials and general aeronautical engineering according to their approved programme with particular attention to defence problems. These laboratories also collaborate with the United Kingdom on aeronautical matters of mutual interest.

(iv) *Defence Standards Laboratories.* The Defence Standards Laboratories at Maribyrnong continue to give comprehensive service to industry, the Armed Services and to other Commonwealth and State Departments.

The broad function of these laboratories is the application of scientific knowledge and research to the problems arising in design, development, manufacture, inspection, storage, and use of war *matériel*. Research is also carried out in connexion with the development of new and improved materials, methods and equipment of known or potential interest.

5. *Design and Inspection Branch.*—(a) *General.* The function of the Branch to design and test equipment to meet the Army's special requirements, and to inspect war matériel for adherence to standards before acceptance on behalf of the Army.

The word "design" is used here in the wider sense of a design authority. For example, armament production in Australia is based on British designs, but it is necessary to have in Australia a design authority to which the production agencies can refer problems arising out of differences in British and Australian manufacturing practices, techniques, skills, materials and tooling. A high percentage of Army stores is of a commercial or near-commercial pattern. Examples of these are trucks, earth-moving equipment, electrical and general engineering equipment, and general stores. In many of these items the amount of design may be small or may be carried out by manufacturers, but selection of types, makes and models, and their variation if necessary, calls for the existence of a design authority with facilities for testing, reporting and making recommendations to guide selection. In each field different problems arise for the design authority. For example, radio development for the Army is carried out by the trade, but a design authority is required as an executive link between the users and the designers and manufacturers.

(b) *Design.* The Design Establishment has been set up with the following elements :—

Four design sections to deal with design problems relating to the selection and the manufacture of armaments, vehicles, signal equipment, and general engineering plant and equipment.

Common facilities for dealing with defects, standards, rationalization and standardization, production drawings, specifications, publications, testing of components and complete electrical and mechanical units, and the construction of mock-ups and models.

(c) *Inspection.* The Inspection Service whilst primarily intended for the inspection of supplies for the Army, also undertakes inspection on behalf of other Departments, and all proof of armament stores on behalf of the three Services.

The Inspection Service is divided into three main Groups—Engineering, Ammunition and Small Arms, and General Stores and Clothing. The last group, in addition to the inspection function, is responsible for the design element associated with the items comprising general stores and clothing. A Proof and Experimental Group and an Equipment Information Section are included. The Equipment Information Section holds and issues a complete range of Army drawings and specifications including United Kingdom and Australian Joint Service Specifications. It provides the data on which production is based.

6. *Contract Board.*—(i) *General.* Under the Supply and Development Act 1939-1948 the Contract Board is the authority responsible for purchasing supplies and arranging services for the Military, Naval and Air Forces of the Commonwealth, as well as for the Departments of Supply and Defence Production. Under this Act and Regulations it is also charged with the responsibility of arranging for the sale or disposal on behalf of Commonwealth Departments of all surplus or unserviceable war matériel, goods and services approved for disposal.

(ii) *The Board and its Administrative Organization.* The Contract Board meets in Melbourne, and comprises representatives of the Departments of Supply, Defence Production, Navy, Army and Air. The Board's administrative organization is the Directorate of Contracts. In each State other than Victoria there is a District Contract Board with an administrative organization similar to the Directorate of Contracts. The table following shows, in respect of the Contract Board Organization, the purchases and realizations from disposals for the years 1953-54 and 1954-55.

## CONTRACT BOARD ORGANIZATION: PURCHASES AND REALIZATIONS FROM DISPOSALS.

(£.)

State.	Purchases.		Realizations from Disposals.	
	1953-54.	1954-55.	1953-54.	1954-55.
Contract Board, Victoria .. ..	30,032,564	22,992,424	1,327,420	1,273,584
District Contract Board—				
New South Wales .. ..	6,161,285	6,824,197	785,378	1,324,574
Queensland .. ..	1,177,587	1,454,911	336,660	496,618
South Australia .. ..	924,090	909,723	180,367	355,185
Western Australia .. ..	518,556	485,597	228,992	143,134
Tasmania .. ..	147,507	162,494	21,005	23,463
Total .. ..	38,961,589	32,829,346	2,880,722	3,616,558

7. **Tinplate.**—During the year 1955, tinplate continued to be in free supply from the United Kingdom and the United States of America, the main sources of supply for Australia.

Tinplate usage continued to increase in most branches of industry, the consumption for 1955 reaching a record level at 127,465 tons. The average consumption over the ten years ended 30th June, 1955 was 114,000 tons per annum.

8. **Mica.** The Commonwealth Mica Pool is now administered by a Committee of Management which includes representatives of the producers and the consumers. The Committee has issued new specifications based on the latest draft International Standards Specification and, by this means, aims to buy and sell only mica which compares with world standards.

9. **Stores and Transport Branch.**—This Branch, administered by a Board of Management and working under the direction of a General Manager, functions as the central authority for meeting the storage and transport requirements of Commonwealth Departments and authorities. It is the authority for the arrangement of furniture removals, at Departmental expense, in all States with the exception of the Australian Capital Territory and the Northern Territory. It has agents in Canberra and Darwin.

At 30th June, 1955 it had under its control, land, buildings, plant and machinery valued at over £5,959,000 and 2,524,000 square feet of storage space, of which 2,034,000 square feet was Government-owned and the balance held under tenancy.

10. **Finance Branch.**—The expenditure for Department of Supply activities during the years 1953-54 and 1954-55 are shown in the following table.

## SUPPLY: TOTAL EXPENDITURE.

(£'000.)

Particulars.	Expenditure.	
	1953-54.	1954-55.
Parliamentary Appropriations .. ..	(a) 11,846	(a) 13,745
Special Appropriation—Aluminium Industry .. ..	2,451	..
Total Appropriations .. ..	14,297	13,745
Trust Fund Accounts—		
Mica .. ..	..	444
Minerals Production .. ..	155	154
Government Factory (Clothing) .. ..	2,275	2,089
Stores and Transport .. ..	4,467	3,969
Strategic Stores and Equipment Reserve .. ..	2	Cr. 7
Total Trust Fund Accounts .. ..	6,899	6,649
Total Expenditure .. ..	21,196	20,394

(a) Includes amount appropriated for audit and superannuation charges.

11. **Australian Aluminium Production Commission.**—Basic plans for the manufacture of aluminium ingot in Australia were approved by the Commonwealth Government in April, 1941 as a defence measure designed to make this country independent of oversea supplies. In April, 1944 an agreement was made between the Commonwealth and Tasmanian Governments for the establishment of the industry in Tasmania. The Australian Aluminium Production Commission, consisting of representatives of each of the two Governments, was constituted on 1st May, 1945. By legislation passed in 1952 and 1954, the original fund of £3,000,000 to finance the undertaking was increased to £10,500,000 of which the Commonwealth Government will contribute £9,000,000 and the Tasmanian Government £1,500,000. At the same time the Commission was re-constituted to consist of five members, of whom four represent the Commonwealth and one the State of Tasmania.

Workable deposits of bauxite (aluminium ore) have been proved in Tasmania, Victoria, New South Wales and the Northern Territory. The largest deposits are located in the Wessel Islands, Northern Territory, where nearly 10,000,000 tons of good grade ore have been proved, and also in the Inverell district of Northern New South Wales, where reserves exceeding 8,000,000 tons have been brought under the Commission's control. In the Wessel deposits alone, there is a sufficient supply to maintain aluminium production in Australia for over 100 years, based on the present planned production of 13,000 tons of aluminium ingot annually.

The combined Bayer-Hall alumina and reduction plant erected at Bell Bay, Northern Tasmania, is now in production of aluminium ingot and output was expected to reach the rate of 10,000 tons per annum by March, 1956.

## CHAPTER XXVIII.

### REPATRIATION.

#### § 1. General.

An outline of the activities leading up to the formation of the Commonwealth Repatriation Commission was given in Official Year Book No. 15, p. 931, also in the Official Year Book referred to, and in subsequent issues, some account was given of the policy and general activities of the Department, while detailed information was incorporated in regard to such matters as sustenance rates and pensions to members of the Forces and dependants. (*See* Official Year Book No. 17, pp. 598-601.) In 1943 the Australian Soldiers' Repatriation Act was amended by the incorporation of the recommendations of the Parliamentary Committee appointed to inquire into pensions and repatriation benefits. A general increase was made of approximately 20 per cent. in the rates of war pensions and increases were also made in other repatriation benefits.

Under the Australian Soldiers' Repatriation Act 1950, rates of pension and medical sustenance were increased, and pensions and benefits under the Act were extended to those members of the Forces (and their dependants) engaged in operations in Korea and Malaya. Provision was also made for payment to a war widow, on re-marriage, of a gratuity equal to one year's war pension. In addition, an important amendment was a change in the basis of war pensioning. Previously, the basis was the daily rate of service pay, but under this legislation the rank, not the pay, of the service man or woman became the basis. This change was brought about as the result of the increased rates of pay of members of the Forces under the new pay code from 1st July, 1947, and the further increases since then. The constantly rising rates of pay made it evident that the basis of pensioning on the daily rate of pay would be unworkable; for example, the rates of pay of more or less senior officers of the 1914-18 War, and of the 1939-45 War discharged before 1st July, 1947, were less than the new rates of pay for present day lower ranks, with a consequent disparity in the rates of pension. To avoid this disparity, the daily rate of pay basis—which had been in operation since the original war pension legislation of 1914—was abandoned in favour of the basis of pensioning according to the rank of the member, the basis adopted by other countries.

Amendments to the Act in 1951-52, 1953-54 and 1954-55 made provision for general increases in the rate of certain types of war pension. Other payments were accordingly affected, and additional benefits were provided.

The main activities of the Repatriation Commission at 30th June, 1955 were confined to the grant, review and assessment of war and service pensions, the provision of medical treatment, vocational training, the renewal and repair of artificial replacements and surgical appliances, the grant and review of sustenance and living allowances, and the administration of the Soldiers' Children Education Scheme.

## § 2. War Pensions.

1. *General.*—The first provision for the payment of war pensions to members of the Forces and their dependants was made by the Commonwealth Parliament in the War Pensions Act 1914, which came into operation on 21st December, 1914. This Act was repealed in 1920 by the Australian Soldiers' Repatriation Act (amended from 31st December, 1950 to the Repatriation Act). Owing to limitations of space, only some of the main features relating to war pensions under the Repatriation Act 1920–1955 are shown in the following paragraphs:—

(i) *Eligibility for Pension.* There has been a considerable widening of the provision in this respect, to the benefit, mainly, of members of the Citizen Military Forces who have not served outside Australia. These provisions are summarized as follows:—

- (a) A member of the Forces who served (1) outside Australia, (2) in the Territories of Australia, such as Papua and New Guinea, or (3) within Australia in circumstances which can be regarded as actual combat against the enemy, is covered for war pension purposes in respect of incapacity or death which may result from any occurrence that happened during the period from the date of his enlistment to the date of the termination of his service in respect of that enlistment.
- (b) In other cases where a member served only in Australia, incapacity or death to be pensionable must have been attributable to service.
- (c) There is a third ground applicable to all in (a) and (b) who have had at least six months' camp service. This provides that, where a condition pre-existed enlistment, a pension may accrue if it is considered that such condition was aggravated by service.

(ii) *Pensions for Incapacity.* From 7th October, 1954 the 100 per cent. pension rate for a member's incapacity was increased from £8 5s. to £9 per fortnight (higher rates were payable in respect of certain commissioned ranks). The rates for wives and children of such members are £3 11s. and £1 7s. 6d. per fortnight respectively. From 20th October, 1955, the member's 100 per cent. incapacity rate was increased from £9 to £9 10s. per fortnight.

(iii) *Supplementation of Pension.* Where a member in receipt of a pension at the maximum rate is, because of his war disability, temporarily (for at least three months) precluded from earning, an additional pension may be granted to bring the total pension to the member up to £19 10s. per fortnight from 20th October, 1955.

(iv) *Women's Nursing and Auxiliary Services.* Members of Women's Services are entitled to pensions and other benefits as prescribed in the Act on the same basis as male members of the Forces.

(v) *Tuberculosis.* In the case of a member of the Forces who served in a theatre of war, and, at any time after discharge became or becomes incapacitated, or died or dies, from pulmonary tuberculosis, war pension is payable, and medical treatment is provided on application as if the incapacity or death resulted from an occurrence on service. (*See also* § 3. Service Pensions.)

(vi) *Special Rates.* Those who have been totally blinded as the result of war service and those who are permanently totally incapacitated receive as from 5th November, 1953, special pensions of £18 10s. per fortnight. The rate for Tuberculars, Class "B" (fit for light employment) was increased from £12 to £13 per fortnight. The rates were further increased to £19 10s. and to £14 per fortnight respectively, from 20th October, 1955. In addition to the special pension, an attendant's allowance of £3 10s. per fortnight is granted to the war-blinded and to certain others who are deemed to be in need of an attendant.

A war-blinded member who is also affected with total loss of speech or total deafness was entitled from 2nd October, 1952 to an attendant's allowance of £7 per fortnight in lieu of that referred to above. Attendant's allowance rates were further increased from 20th October, 1955 to £5 10s. and to £9 per fortnight respectively. The wife and any children under 16 years of age receive the same rates as shown in sub-para. (ii).

(vii) *Specified Disabilities.* Where the disability is amputation of a limb or limbs or total loss of vision in one eye, amounts ranging from 17s. to £10 per fortnight in addition to the statutory rate of pension are payable as from 20th October, 1955. In addition, allowances of either £5 10s. or £9 per fortnight are payable in certain double amputation cases.

(viii) *Time Limit for Wives and Children Removed.* Prior to the 1950 amending Act, wives who were married and children who were born after 1st July, 1938 were ineligible to receive a war pension. This time limit was removed as from 2nd November, 1950.

(ix) *Rates of Pensions for Death.* (a) *Widows.* As already indicated, rates of pension, which were previously based on the daily rate of pay of the member, are now based on the rank of the member. From 20th October, 1955 the rates were increased by £1 per fortnight, the minimum rate being increased from £8 to £9 per fortnight. In addition to the pension, the widow, if she has dependent children, receives an allowance if she is permanently unemployable, or if she is over 50 years of age; this allowance is £3 9s. per fortnight. The allowance may also be paid to a widow under 50 years of age, in certain cases, so long as the child (or one of the children if more than one child) over the age of sixteen, is undergoing education or training but has not qualified for (or is not receiving) the adult wage in the trade, occupation or calling for which the child is training.

(b) *Children.* From 2nd October, 1952, the rate of pension for the eldest child (under 16 years of age) was increased to £2 13s. per fortnight, and that of each younger child to £1 17s. Additional pension of 12s. per fortnight may be paid in certain circumstances. Where both parents are dead each child is pensioned at the rate of £4 16s. per fortnight.

(c) *Widowed Mother on Death of Member.* A pension ranging from £4 10s. to £8 6s. per fortnight, according to the rank of the member, may be granted to a widowed mother of a deceased unmarried son, provided widowhood occurred either prior to or within three years after the death of the member. The pension may be supplemented by payment to a prescribed person, of an additional amount not exceeding £8 per fortnight according to the extent of other income of the pensioner; this operated from 20th October, 1955. The value of property possessed does not affect the issue.

2. *Appeals Tribunals.*—The principal Act was amended as from 1st June, 1929 to create tribunals to hear appeals in regard to war pensions. The War Pensions Entitlement Appeal Tribunal is empowered to hear and decide any appeal by or on behalf of ex-members of the Forces or their dependants against a decision of the Repatriation Commission that an incapacity or the death of an ex-member did not arise out of war service. Assessment Appeal Tribunals were created to hear and decide any appeal against a current assessment or a "Nil" assessment of war pension made by the Repatriation Commission in respect of an incapacity of an ex-member of the Forces which had been accepted as arising out of war service. Provision was made by subsequent legislation to enable the Tribunals to hear appeals by certain members for service pensions.

3. *Summary of War Pensions, 1954-55.*—At 30th June, 1955, the number of war pensions for the 1914-18 War was 138,641, for the 1939-45 War, 442,862, and for the Korea and Malaya Operations 2,034, making a total of 583,537 with a liability of £40,223,720 per annum. The amount paid in war and service pensions during the year 1954-55 was £44,516,287. The outstanding features for 1954-55 for each war were as follows.

## WAR PENSIONS : SUMMARY, AUSTRALIA, 1954-55.

## § 3. Service Pensions.

1. **General.** The payment of service pensions is provided for in the Repatriation Act 1920-1955 and has operated since 1st January, 1936.

Originally fixed on a lower scale, the maximum rate of service pension for a member of the Forces now conforms to the rate of the age or invalid pension, which was increased from £7 to £8 per fortnight from 20th October, 1955. The maximum rate for the wife of a member is £3 10s. per fortnight; the rate for the first child under 16 years of age is 23s. per fortnight and 5s. per fortnight is payable for each of the younger children up to three in number. The actual rate payable in any case is determined after taking into consideration all other income, "except income derived from property" and property (apart from the home and certain other exemptions) owned by the pensioner, and no service pension can be paid where the other income and/or property exceeds certain specified limits. From 7th October, 1954 the "allowed income" was £364 per annum for a single man and £728 per annum in the case of a member and wife. The amounts were raised to £390 and £780 operative from 20th October, 1955 in conformity with the member's rate increase. If a member has property (apart from the home and certain other exemptions) exceeding in value £1,750 (£3,500 for a member and wife), that alone precludes payment of a pension. Pension is assessed according to the amount of income; if the income is less than the amount shown above, service pension is assessed at such rate as will, with that other income, bring the total income (including service pension) of the pensioner up to the "allowed income" provided that the pension cannot exceed the maximum rate specified for the particular class of case. If assessable property is held, then a deduction is made from the pension assessed according to income only, the deductions being made at 9d. per fortnight for each complete £10 of property in excess of £200 (or £400 in the case of member and wife). Half the combined income received and property possessed by man and wife is deemed to be income received and property possessed by each for Service pension purposes.

In 1936 female members of the forces were made eligible for consideration for service pensions if they embarked for service abroad; previously they must have served in a theatre of war. In the same year an institutional rate of service pension not exceeding 12s. per fortnight was made available. This pension rate, which benefits particularly inmates of mental hospitals, was £2 9s. per fortnight from 5th November, 1953, but was increased to £2 16s. per fortnight from 20th October, 1955.

Eligibility for service pensions may be established on the following grounds :—

- (a) Sixty years of age or more, provided the member served in a theatre of war, but eligibility on this ground applies only to the member and not to his wife or children. In the case of a female member of the forces, the qualifying age is 55 years, and service abroad, not necessarily in a theatre of war, is sufficient.
- (b) Permanently unemployable, provided the member served in a theatre of war (or, in the case of a female member, served abroad). Under this class pensions may be paid to the member, his wife and children up to four in number.
- (c) Pulmonary tuberculosis, whether the member served in a theatre of war or not. Under this class, also, pensions are payable to the wife and children up to four in number.

Only those members who qualify under Class (c) are entitled to receive both service and invalid pensions at the same time

From 1st November, 1941, service pensions were extended to veterans of the South African War 1899–1902, and in 1943 to members of the Forces of the 1939–45 War, and now also apply to members who served in the Korea and Malaya operations.

2. Operations, 1954–55.—The following table gives a summary relating to service pensions during 1954–55 :—

Claims granted during year—

Members of the Forces	..	..	..	..	2,891
Wives	..	..	..	..	845
Children	..	..	..	..	326
Total	..	..	..	..	4,062

Claims rejected during year—

Members of the Forces	..	..	..	..	737
Wives	..	..	..	..	415
Children	..	..	..	..	240
Total	..	..	..	..	1,392

Service pensions cancelled or discontinued during year	..	1,892
Deaths of pensioners during year	..	1,187
Pensions in force at 30th June, 1955	..	22,316
Annual pension liability on 30th June, 1955	..	£3,126,321

3. Number of Service Pensioners and Amount Paid.—(i) *Summary, Australia, 1945-46 to 1954-55.* The following table shows the number of service pensions in force and the amount paid in pensions for the ten years 1945-46 to 1954-55 :—

## SERVICE PENSIONS : SUMMARY, AUSTRALIA.

Year ended 30th June—	Number of Service Pensions in Force at 30th June—						Amount Paid in Pensions.
	Age.	Permanently Unemployable.		Suffering from Pulmonary Tuberculosis.		Total.	
	Members of Forces.	Members of Forces.	Depen- dants.	Members of Forces.	Depen- dants.		
1946 ..	4,971	3,896	3,633	244	345	13,089	£ 804,880
1947 ..	5,894	4,312	3,657	254	358	14,475	904,120
1948 ..	6,610	4,660	3,791	271	358	15,690	1,238,112
1949 ..	7,070	4,613	3,699	271	365	16,018	1,328,955
1950 ..	7,448	4,608	3,598	299	385	16,338	1,431,687
1951 ..	7,456	4,492	3,911	279	374	16,512	1,507,258
1952 ..	7,587	4,561	4,270	269	389	17,076	1,778,380
1953 ..	8,703	4,971	4,780	291	432	19,177	2,225,044
1954 ..	9,648	5,294	5,092	321	451	20,806	2,694,522
1955 ..	10,566	5,555	5,286	379	530	22,316	(a)

(a) Included with War pensions—see page 1055.

(ii) *Amount Paid and State where Paid.* Details of the amounts paid in each State in respect of service pensions are no longer available. Particulars for the years 1949-50 to 1953-54 may be found on page 1017 of Official Year Book No. 41.

#### § 4. Medical Treatment of Returned Soldiers Suffering from War Service Disabilities.

At 30th June, 1955 there were 4,663 in-patients in Repatriation medical institutions and State mental hospitals, including a number whose care was undertaken by the Repatriation Commission on behalf of other countries or Commonwealth Departments. There were 380,624 out-patient attendances for treatment during the year, excluding approximately 850,000 treatments by the 3,545 local medical officers resident in metropolitan and country areas and New Guinea. The expenditure to 30th June, 1955 was £72,091,315.

### § 5. General Benefits and Miscellaneous.

1. *Other Departmental Activities.*—(i) *General.* During the 1939-45 War, the ordinary activities of the Department in the way of general benefits for the welfare of members and dependants were carried on without interruption. They were mainly education and training of children under the Soldiers' Children Education Scheme, medical benefits for widows and children of deceased members and for widowed mothers of deceased unmarried members, funeral expenses for certain classes of members and dependants, and allowances to certain classes of dependants in lieu of pension.

By legislation passed in June, 1940, these benefits were extended to members engaged in the 1939-45 War and in November, 1950 to those engaged in the Korea and Malaya Operations and new benefits designed for the re-establishment of members after discharge from the Forces were made available. The re-establishment benefits administered by the Repatriation Commission are :—payments of re-employment allowance while awaiting employment ; provision of tools of trade and equipment where such are necessary to the member's employment ; transportation expenses to meet the cost of fares and removal of household belongings, where a member, or member and family, takes up training, employment, or a business, or settles on the land ; supplementation of wages of apprentices whose apprenticeships were interrupted by war service ; re-establishment loans to enable members and widows to establish themselves in businesses, practices or other occupations, including (until the Division of War Service Land Settlement began operations early in 1946) agricultural occupations ; payment of re-establishment allowance during the early stages of establishment in business ; gifts up to £75 for furniture to members who are blinded or totally and permanently incapacitated, also to widows with children under 16 years of age ; and free passages to Australia for wives, widows and children of members who married abroad (and passages outward from Australia in certain cases of members and dependants).

In 1949 the Commission took over the functions of the Re-establishment Division of the former Department of Post-war Reconstruction, and is responsible for the co-ordination of all matters relating to training under the Commonwealth Reconstruction Training Scheme. Re-establishment of the more seriously disabled where ordinary training is not sufficient continues to be a function of the Commission, and special means have to be found to overcome each problem.

(ii) *Review of General Benefits.* The following paragraph gives particulars of the more important general benefits for each war (those for Korea and Malaya Operations are included under the 1939-45 War) for the period from 8th April, 1918 to 30th June, 1955.

#### (a) *Employment*—

1914-18 War : Number of applications, 251,200 ; Expenditure—sustenance while awaiting employment, £1,768,000 ; tools of trade and fares, etc. (gift), £554,000 ; tools of trade (loan), £21,800.

1939-45 *War* : The placing of members in employment was carried out by the Commission for only a short period prior to the inauguration of the Department of Labour and National Service, but the Commission has the responsibility of payment of re-employment allowance, provision of tools of trade and payment of fares and removal expenses. Number of cases and expenditure to 30th June, 1955 were as follows :—Re-employment allowances—67,275, £1,027,488 ; tools of trade (gift)—261,836, £1,896,987 ; (loan)—19,485, £293,406 ; fares and removal expenses, 16,741, £244,495.

(b) *Vocational Training*—

1914-18 *War* : Number of members completed training in full-time courses, 27,696 ; expenditure, £4,849,600.

1939-45 *War* : Number of members completed training in full-time re-establishment courses 57,239 ; number still in training, 806 ; expenditure, £50,257,064. An additional sum of £3,874,927 was expended on supplementation of apprentices wages.

(c) *Business Loans*—

1914-18 *War* : 6,130, £421,800.

1939-45 *War* : 28,213, £7,626,067. Allowances pending productivity of business—1,451, £90,033. Fares and removal expenses to member proceeding to a business, £495.

(d) *Furniture Grants*—

1914-18 *War* : Expenditure—gift (to members blinded or totally and permanently incapacitated and to widows), £75,190 ; loan (to other classes of members), £1,031,570 ; total number of cases, 35,400.

1939-45 *War* : Gift (no loan cases)—widows, 5,718, £397,586 ; members, 378, £23,405.

(e) *Free Passages*—

1914-18 *War* : £509,120.

1939-45 *War* : To Australia—4,750, £310,893 ; from Australia—70, £10,466.

(f) *Soldiers' Children Education Scheme*—

*Main Scheme* : Full-time training as from 12 years of age.

Particulars.					1914-18 War.	1939-45 War.
Applications	..	..	..	..	33,109	16,409
Approved	..	..	..	..	31,441	16,231
Completed training	..	..	..	..	25,784	8,155
Withdrawn during training	..	..	..	..	4,101	691
Awaiting next stage of training	..	..	..	..	48	200
In training	..	..	..	..	1,509	7,184
Expenditure	..	..	..	..	£4,757,448	

*Minor benefits prior to entrance to main scheme* : For all Wars, £98,345.

(iii) *Total Expenditure on General Benefits*. The total expenditure on general benefits, apart from war and service pensions, from 8th April, 1918 to 30th June, 1955, for all wars since 1914 was £111,891,074 (including loan £9,605,692). Of this total the largest amounts were absorbed by medical treatment with £72,091,315, vocational training with £8,800,780, and expenses in providing employment, £5,878,683.

2. **Expenditure of Repatriation Commission, 1954-55.**—The expenditure of the Commission for the year ended 30th June, 1955 was £59,625,416, distributed as follows :—

Repatriation benefits—						£
Loans to members	..	..	..	..	..	178,181
Grants to members and general expenditure (including main- tenance of training schools, medical institutions, etc.)	..	..	..	..	..	11,539,931
Assistance to members in necessitous circumstances	..	..	..	..	..	805
Total .. .. .						11,718,917
Soldiers' Children Education Scheme	..	..	..	..	..	368,876
War and Service Pensions	..	..	..	..	..	444,548,113
Administrative costs—						£
Salaries	..	..	..	..	..	2,480,984
Contingencies	..	..	..	..	..	508,526
						2,989,510
Grand total .. .. .						59,625,416

(a) Includes Trust Fund adjustments.

3. **Settlement of Returned Service Personnel on the Land.**—Reference to the settlement on the land of returned service personnel will be found in Chapter IV.—Land Tenure and Settlement.

## CHAPTER XXIX.

### MISCELLANEOUS.

This chapter comprises miscellaneous statistics and other descriptive information not directly related to the subjects of the preceding chapters, arranged in sections as follows :—

1. Valuation of Australian Production ; 2. Indexes of Production ; 3. New Building ; 4. Consumption of Foodstuffs and Beverages ; 5. Patents, Trade Marks and Designs ; 6. Copyright ; 7. Australian Ship-building Board ; 8. War Service Homes Division ; 9. Commonwealth Scientific and Industrial Research Organization ; 10. Commonwealth Observatory ; 11. Standards Association of Australia ; 12. Film Censorship Board ; 13. Australian National Film Board and the Film Division ; 14. National Safety Council of Australia ; 15. Australian Road Safety Council ; 16. Atomic Energy Commission ; 17. The United Nations ; 18. Diplomatic and other Representatives Overseas and in Australia ; 19. Retail Trade ; 20. The Snowy Mountains Scheme.

#### § 1. Valuation of Australian Production.

**1. General.**—The value of production for Australia is computed in accordance with the decisions reached at the Conferences of Australian Statisticians and principally at the Conference held in 1935. The figures published below have been compiled by the State Statisticians from the best data available, and relate to 1953-54. The adoption of substantially uniform methods of valuing production and of estimating elements of costs of production and marketing renders the results comparable as between States.

Attention is directed to the fact that the values shown in the tables herein refer only to production of primary industries and factories and exclude the building and construction industry, those industrial establishments not classified as factories, and certain agricultural and farmyard produce obtained from areas of less than one acre.

The following is a brief explanation of the terms used :—

- (a) *Gross Value of Production* is the value placed on recorded production at the wholesale price realized in the principal markets. (In cases where primary products are consumed at the place of production or where they become raw material for a secondary industry, these points of consumption are presumed to be the principal markets.)
- (b) *Local Value* (i.e. the gross production valued at the place of production) is ascertained by deducting marketing costs from the gross value. (Marketing costs include freight, costs of containers, commission and other charges incidental thereto.)
- (c) *Net Value of Production* represents local value less value of materials used in the process of production. Materials used in the process of production include seed, power, kerosene, petrol and other oils, fodder consumed by farm stock, manures, dips, sprays and other costs. No deductions have been made for depreciation or certain maintenance costs as particulars are not available for all States. The Net Value of Production is the only satisfactory measure to use when comparing or combining the value of primary industries with those of other industries.

Power costs (power, power kerosene, petrol and other oils) have not been deducted in New South Wales since 1940-41 when they amounted to £1,892,000 and in Tasmania since 1941-42, when they amounted to £86,510. Consequently net values of production for later years in these two States are overstated. Costs of materials used in the process of production are not available for all States in respect of Bee-farming, Trapping, Forestry and Fisheries, and local values have been used for these industries with consequent overstatement in net values.

2. Value of Production, Australia, 1953-54.—The following table shows particulars of the gross, local and net values of production in Australia by industries during the year 1953-54 :—

**GROSS, LOCAL AND NET VALUE OF PRODUCTION OF PRIMARY INDUSTRIES AND FACTORIES : AUSTRALIA, 1953-54.**

(£'000.)

Industry.	Gross Production valued at Principal Markets.	Local Value—Gross Production valued at Place of Production.	Net Value of Production (without deduction of depreciation or maintenance).

(a) See letterpress on page 1061. (b) Local value.

In the chapters dealing with the respective industries (except trapping and mines and quarries) tables will be found showing the total and per head values of production for the industry by States for a series of years up to 1953-54.

## § 2. Indexes of Production.

In the first two tables below, indexes of price and quantum of production are given for the following industrial groups, namely:—Agriculture, Pastoral, Farmyard and Dairying, and All Farming combined (including separate indexes for Wool and Products other than Wool). In the third table, indexes of quantum of production, exports and consumption of farm products for food use are shown. Indexes previously published in respect of Gold and Other Minerals, and All Mining combined, are under review and pending completion of investigations the publication of these results has been temporarily discontinued.

1. Farm Production Price Indexes.—The Farm Production Price Indexes shown in the following table relate to average "prices" of agriculture, pastoral, farmyard and dairying products realized in the principal markets of Australia. The "price" data used are average unit values for the total quantities of the relevant commodities produced or marketed in each year and the index-numbers therefore measure both the effects of changes in prices (as such) and of variations in the quality, type, usage,

etc. of products marketed. The index-numbers for any year relate to the average values of products produced or marketed in that year, irrespective of the periods in which payment is received by producers.

The indexes have been calculated by the fixed-base weighted aggregative method. "Prices" for each commodity in any year are obtained by dividing gross value of production by the quantity produced in that year. In the original published series of Production Price Index-Numbers the average quantities of the relevant commodities produced in the period 1923-24 to 1927-28 were used as fixed weights. This series has been retained for years up to 1935-36, but re-computed to the base, average 1936-37 to 1938-39 = 100. For 1936-37 and later years, the original series was replaced in December, 1952 by a revised series in which average quantities of each product marketed during the period 1946-47 to 1950-51 are used as fixed weights. In the revised series, the regimen was extended and modified to include farm products (as defined by Australian Statisticians) in all cases. Certain other refinements were also incorporated in the revised indexes, the principal of which was the omission from the weights used for the All Farming Index of quantities of crops marketed for livestock feeding in Australia.

(c) Revised

2. **Indexes of Quantum of Farm Production.**—The indexes shown in the following table relate to gross output of farm products. They have been calculated by the fixed-base weighted aggregative method, the weights used being weighted average unit values obtained by dividing total gross value by total quantity produced for each commodity for the base period.

In the original published series, the period 1923-24 to 1927-28 was adopted as the base for weighting purposes. This series has been retained for years up to 1935-36, but the index-numbers have been re-computed to the base, average 1936-37 to 1938-39 = 100. For 1936-37 and later years, the original series was replaced in December, 1952 by a revised series in which average unit values for the period 1936-37 to 1938-39 are used as fixed weights. The regimen used for the revised series was extended and modified to include farm products (as defined by Australian Statisticians) in all cases. Certain other refinements were incorporated in the revised indexes, the principal of which was the omission, in calculating the All Farming Index, of quantities of crops fed to live-stock in Australia.

3. **Farm Products for Food Use : Indexes of Quantum of Production, Exports and Consumption.** The indexes shown in the following table have been calculated by the fixed-base weighted aggregative method, the weights used being constant unit gross values of each farm product for the years 1936-37 to 1938-39. The items included comprise products in the form in which they are sold from farms in all cases except livestock sold for slaughter for meat which are included in terms of dressed carcass weight of meat. Quantity data relating to exports include exports of processed food in terms of farm product equivalent. The indexes of production relate basically to gross output of farm products for food use, including crops exported for stock-feeding overseas. Particulars are not available prior to 1946-47 except for the base years.

### § 3. New Building.

1. **General.**—The statistics in this section relate to the operations of private contractors, Government authorities and owner-builders, with the exception of those relating to employment, which exclude the numbers of persons working on owner-built houses. In general, they relate to *new* building only, and data on alterations, additions, renovations and repairs to buildings are excluded, because of the difficulty in obtaining complete lists of persons who engage in these operations. Figures for houses exclude converted military huts, flats and shop dwellings. Some houses built on farms are excluded but these do not affect the figures materially.

These statistics are available for each quarter from the September quarter, 1945.

More detailed information on building activity may be found in the Quarterly Bulletin of Building Statistics.

The following definitions of terms used in this section are necessary for interpretation of the data presented :—

*Owner-Built.* An "owner-built" house is one actually erected or being erected by the owner or under the owner's direction without the services of a contractor who is responsible for the whole job.

*Contract-Built.* Includes the operations of all Building Contractors and Government instrumentalities which undertake the erection of new buildings.

*Commenced.* A building is regarded as having been commenced when work on foundations has begun. Owing to the difficulty of defining the exact point that this represents in building operations, it is probable that interpretations placed upon it by informants are not entirely uniform.

*Completed.* A building is regarded as having been completed when the builder has fulfilled the terms of the contract. As with commencements, the interpretations placed upon this definition may vary.

*Under Construction.* A building remaining uncompleted at the end of a period is regarded as being under construction, regardless of whether construction was actively proceeding on that particular date.

*Employment.* Figures relate to persons actually working on the jobs of contractors who undertake the erection of new buildings and of Government instrumentalities which erect new buildings on their own account. They include persons actually engaged on alterations, additions, repairs and maintenance when these jobs are undertaken by such contractors and instrumentalities. The figures include working principals and their employees, men working as or for sub-contractors, and men temporarily laid off on account of weather.

Contractors are asked to give details of the persons employed on a specified day, but because of frequent movement between jobs and because some persons (such as electricians, etc.) may work on several jobs which are under construction simultaneously, some duplication may occur.

The figures exclude persons working on owner-built houses, and employees of builders who undertake only alterations, additions, repairs and maintenance.

*Values.* All values shown exclude the value of land and represent the estimated value of buildings on completion.

2. Value of New Buildings.—(i) *Completed, 1954-55.* The following table shows the value of all new buildings completed in each State during 1954-55, according to the kind of building. It should be remembered that all values shown exclude the value of land and represent the estimated value of buildings on completion.

4. **Numbers of New Flats.**—The figures in the foregoing two tables do not include particulars of new flats. The summary below shows the numbers of new flats commenced, completed and under construction in Australia for the years 1948-49 to 1954-55, together with State details for 1954-55. It should be noted : (i) that the figures are additional to the numbers of houses shown in other tables, (ii) that each flat is counted as a separate unit, and the numbers shown therefore relate to individual flats, and (iii) that new flats only are included, i.e., the conversions of old buildings into flats are omitted.

**NEW FLATS : NUMBER.**  
(Individual Flats.)

State or Territory.	Commenced during Period.	Completed during Period.	Under Construction at end of Period

5. **Persons engaged in New Building.**—The following table shows, by States, the number of persons (including contractors and sub-contractors actually working on jobs) engaged on jobs carried out by builders of new buildings at 30th June of the years 1949 to 1955. Particulars for 30th June, 1955 show the numbers of tradesmen, contractors, sub-contractors and wage earners engaged. For an explanation of the field of employment covered see para. 1 of this section.

(a) Actually working on jobs.

## § 4. Consumption of Foodstuffs and Beverages.

1. Quantities Consumed.—Previous issues of the Official Year Book up to No. 36 included a statistical survey of the movement in the consumption in Australia, in total and per head of population, of a selected number of commodities over a period of years up to 1940-41 (*see* Official Year Book No. 36, pp. 1098-1100). In issue No. 37 these long-term comparisons were replaced by more detailed information covering consumption of the principal foodstuffs and beverages in annual periods since 1944 in comparison with average annual consumption during the three years ended 1938-39. In this issue the annual periods extend from 1950-51 to 1954-55.

The estimates of total consumption and consumption per head of population in Australia in the two tables following have been compiled by deducting net exports from production and allowing for recorded movements in stocks of the respective commodities. While the estimates may generally be accepted as reasonably accurate, there are some deficiencies to which attention should be directed. These relate chiefly to the quantities of poultry, game and fish (fresh and shell) and the quantities of visible oils and other fats entering consumption. In addition, little information is available on the quantities of vegetables, fruit, eggs, etc., which householders produce for their own requirements and the extent of wastage occurring in the marketing of foodstuffs. In all these cases careful estimates have been compiled from the best available data, and the quantities shown as entering consumption in Australia have been adjusted to allow for these circumstances. The absence of particulars of stocks for certain commodities has resulted in some inaccuracies in the estimates of annual consumption. Consumption of foodstuffs is measured in general "at producer" level. As a result no allowance is made for wastage before the foodstuffs are consumed, and except in a few special cases no adjustment has been made for changes in stocks held by wholesalers and retailers. In recent years, wastage of foodstuffs has possibly been less than hitherto because of more efficient distribution and storage methods. In addition, it is likely that the quantities of foodstuffs shown in the following pages as available for consumption have been supplemented by increased "back-yard" production. Neither of these factors has been taken into account, and it is possible that, as a result, some understatement has occurred in the following consumption estimates. Estimates have been made in certain cases to allow for changes in wholesalers' and retailers' stocks. Where no allowance is made it is considered unlikely that these stocks would make any appreciable difference to consumption estimates. Allowance has not been made for the purchase of foodstuffs for

dispatch overseas as gifts in bulk and by parcel post. These deficiencies, however, do not seriously impair the accuracy of the estimates compiled.

The estimates of consumption per head of population shown in the second table following have been checked, wherever possible, with data from other sources which confirm the reliability of the methods used. The data were obtained principally from the Food Consumption Survey conducted in 1944 by the Nutrition Committee of the National Health and Medical Research Council.

More detailed information on the consumption of foodstuffs and beverages is contained in the Statistical Bulletin: *Food Production and the Consumption of Foodstuffs and Nutrients in Australia*, issued by this Bureau.

2. Level of Nutrient Intake.—The table below shows details of the estimated supplies of nutrients available for consumption in Australia during annual periods since 1950-51 in comparison with the annual average for the three years 1936-37 to 1938-39. The table has been compiled by the Nutrition Section of the Commonwealth Department of Health and is based on the estimates of the quantity of foodstuffs consumed per head of population shown in the preceding table.

ESTIMATED SUPPLIES OF NUTRIENTS AVAILABLE FOR CONSUMPTION :  
AUSTRALIA.

(Per Head per Day.)

Nutrient.	Unit.	Average 1936-37 to 1938-39.	1950-51.	1951-52.	1952-53.	1953-54.	1954-55. (a)

(a) Subject to revision.

NOTE.—For the years 1952-53 to 1954-55, new conversion factors have been used based on factors contained in the "*Table of Composition of Australian Foods*" (Anita Osmond and Winifred Wilson, Canberra, 1954), but the comparison with previous years has not been significantly affected. Vitamin A is on a revised basis for all years shown.

## § 5. Patents, Trade Marks and Designs.

1. *Patents.*—(i) *General.* Patents for inventions are granted under the Patents Act 1952-1955, which applies to the Commonwealth of Australia and the Territories of Norfolk Island, Papua and New Guinea. The Act is administered by a Commissioner of Patents. The principal fees payable up to and including the grant of a patent amount to £17 10s. Renewal fees are payable as follows:—£5 before the expiration of the fourth year, and an amount progressively increasing by £1 before the expiration of each succeeding year up to the final fee of £16, payable before the expiration of the fifteenth year. An extension of time for six months for payment of a renewal fee may be obtained. Patents granted under the repealed Acts (Patents Act 1903-1950) are subject to the renewal fees under those Acts.

(ii) *Summary.* The number of separate inventions in respect of which applications were filed and the number of letters patent sealed during the years 1939 and 1951 to 1955 are shown in the following table.

## PATENTS : AUSTRALIA.

Particulars.	1939.	1951.	1952.	1953.	1954.	1955.
Applications .. ..	5,740	7,135	8,073	8,917	9,073	8,869

Letters patent sealed ..	3,141	4,291	5,248	5,181	5,464	5,931

2. Trade Marks and Designs.—(i) *Trade Marks*. Under the Trade Marks Act 1905–1948 the Commissioner of Patents is also Registrar of Trade Marks. This Act has been amended from time to time, the last amendment having been made in 1948. Special provisions for the registration of a “Commonwealth Trade Mark” are contained in the Act of 1905, and are applicable to all goods included in or specified by a resolution passed by both Houses of Parliament that the conditions as to remuneration of labour in connexion with the manufacture of such goods are fair and reasonable. The Act of 1948 provides for the registration of users of trade marks, and also for assignment of trade marks with or without the goodwill of the business concerned.

(ii) *Designs*. Under the Designs Act 1906–1950 the Commissioner of Patents is also Registrar of Designs.

(iii) *Summary*. The following table shows the applications for trade marks and designs received and registered during the years 1939 and 1951 to 1955.

#### TRADE MARKS AND DESIGNS : AUSTRALIA.

3. Revenue.—The following table shows the revenue of the Commonwealth Patent Office, Trade Marks and Designs Office, and revenue obtained from Copyright for the years 1939 and 1951 to 1955. From 1st July, 1954 a system of payment of fees by “fee stamps” was introduced and fees have since been collected under one head of revenue. Consequently separate figures are not available for the years 1954 and 1955.

### § 6. Copyright.

1. Legislation.—Copyright is regulated by the Commonwealth Copyright Act 1912–1950 wherein, subject to modifications relating to procedure and remedies, the British Copyright Act of 1911 has been adopted and scheduled to the Australian law.

Reciprocal protection of unpublished works was extended in 1918 to citizens of Australia and of the United States of America, under which copyright may be secured in the latter country by registration at the Library of Congress, Washington. The Commonwealth Government promulgated a further Order in Council which came into

operation on 1st February, 1923, and extended the provisions of the Copyright Act to the foreign countries of the Copyright Union, subject to the observance of the conditions contained therein.

**2. Applications and Registrations.**—The following table shows under the various headings the number of applications for copyright received and registered for the years 1939 and 1951 to 1955.

**COPYRIGHT : AUSTRALIA.**

**3. Revenue.**—Revenue obtained from copyright during the years 1939 and 1951 to 1955 is shown in §5, para. 3 above.

### § 7. Australian Shipbuilding Board.

**1. Constitution.**—Previous reference to the constitution of the Australian Shipbuilding Board appeared in Official Year Book No. 37, page 1170. Originally established in 1941 under National Security Regulations, the Board has been reconstituted a number of times since its inception and in 1948 was constituted on a permanent basis under the Supply and Development Act. At present it operates under the control of the Minister for Shipping and Transport. In order to link the activities of the Board more closely with the Department of Shipping and Transport, the constitution of the Board was altered in April, 1952, to provide for representation by senior departmental officers. The present membership of the Board consists of a Chairman who is the General Manager, a Deputy Chairman, a Finance Member and two other members, one of whom represents the Naval Board and one the Australian Shipping Board.

**2. Functions.**—The functions of the Board in relation to merchant shipbuilding are—(i) to report on the capacity of the industry ; (ii) to control building, repair and maintenance of ships and shipyards, etc ; (iii) to arrange construction of vessels and yards, etc. ; (iv) to order and direct repair and docking of vessels ; and (v) to arrange supply of engines and other equipment for ships.

The first actions of the Board were to survey existing shipbuilding potentials and decide upon a construction programme. (*See* Official Year Book No. 37, p. 1170).

The Board also established facilities for the manufacture of marine engines at Rocklea in Queensland, and at Port Melbourne. The Rocklea plant, which produced engines for "A", "B" and "D" class freighters, was closed in 1949, but the Port Melbourne works are still in operation and to December, 1955 had constructed eleven steam and six Doxford diesel propelling engines, and also numerous steering and auxiliary engines and winches. At 31st December, 1955 five Doxford diesel propelling engines were under construction.

To bring the cost to purchasers of Australian tonnage more into line with the cost of comparable vessels built in the United Kingdom the Board is empowered to sell new Australian-built tonnage to private owners at prices up to 25 per cent. below their total construction cost. In order to take advantage of this, private shipowners are required to place their orders for vessels through the Board, which has thus become the ordering authority for all vessels built in Australian yards on which a subsidy is paid.

The Board has also undertaken the preparation of plans and drawings for the various yards, as the level of ship construction in Australia does not warrant each yard employing specialists in naval architecture. In this way the Board has assisted in raising the efficiency of the industry as a whole and also in the development of individual yards.

In the exercise of its functions the Board is responsible for—(i) the design of vessels; (ii) calling of tenders and placements of orders; (iii) co-ordination of the Board's supplies to shipbuilders, e.g., machinery and certain equipment; (iv) supervision of construction; (v) acceptance of vessels after sea trials; and (vi) administration associated with ship repairs, marine engines, spare parts, etc.

In September, 1954, the Tariff Board commenced an inquiry into the level and method of assistance which should be given to the Australian Shipbuilding Industry, with evidence being heard in Melbourne, Sydney and Brisbane. The findings of the Board are not expected to be made public until some time in 1956.

**3. Construction Programme.**—At 31st December, 1955 the Board had 17 vessels under construction or on order in Australian shipbuilding yards. These comprised: 5 "M.B.C." class, 10,000 tons d.w. motor bulk carriers; 3 "S.B.C." class, 10,000 tons d.w. steam bulk carriers; 3 "B.H.T." class, 10,000 tons d.w. steam iron-ore carriers; 2 "M.C." class, 7,000 tons d.w. motor colliers; 1 "B" class, 6,500 tons d.w. freighter; 1 "P.C.V." class, 3,000 tons d.w. passenger/cargo vessel; and 2 "M.G.C." class, 2,000 tons d.w. motor bulk grain carriers. At the same date, 47 vessels exceeding 300 gross tons had been built to the order of the Board, as follows:—1 "B.H.T." class, 10,000 tons d.w. steam iron-ore carrier; 13 "A" class, 9,000 tons d.w. freighters; 1 "M.C." class, 7,000 tons d.w. motor collier; 10 "B" class, 6,000 tons d.w. freighters; 2 "S.C.O." class, 4,000 tons d.w. steam colliers; 9 "D" class, 3,000 tons d.w. freighters; 2 "U/S" class, 3,000 tons d.w. freighters; 2 "D/A" class, 3,000 tons d.w. freighters; 1 passenger/cargo vessel of 3,000 tons d.w.; 1 "M/M" class, 2,000 tons d.w. motor collier; and 5 "E" class, 700 tons d.w. freighters.

Since its inception, the Board has been responsible also for the construction of 24 wooden vessels of 300 tons gross, together with a 1,000 ton floating dock. It was also responsible for the foundation of the small craft construction during the 1939-45 War. This function was, however, later transferred to the Small Craft Construction Directorate, Department of Supply.

## § 8. War Service Homes Division.

The provision of War Service Homes is a function of the War Service Homes Division of the Department of National Development, and the administration of the War Service Homes Act is under the control of the Director of War Service Homes.

The War Service Homes Act 1918-1954 is a measure for the provision of homes for Australian ex-servicemen who served during the 1914-18 War or during any war in which His Majesty became engaged on or after 3rd September, 1939, including, subject to the statutory provision of the Act, service in Korea or Malaya. Provision is also made for assistance to the female dependants of Australian ex-servicemen and other classes of eligible persons as defined in the Act. Assistance may be granted to an eligible person and the wife or husband of that person, as the case may be, as joint tenants.

The maximum amount of loan or advance which may be granted under the Act is £2,750. The period of repayment may be approved up to 45 years. In the case of a widow or widowed mother of an Australian ex-serviceman the period may be extended to a maximum of 50 years.

The War Service Homes Division does not provide homes for occupation on a purely tenancy basis.

Since the inception of operations under the War Service Homes Act (figures in parentheses indicate cases where eligibility has been established as a result of service during the 1939-45 War or in Korea or Malaya) 147,860 (97,985) applications have been approved; 54,998 (32,299) homes have been built, or assistance to build them has been given; 58,015 (42,871) homes have been purchased; and 15,502 (12,025) mortgages have been discharged. The total number of homes provided under the War Service Homes Act to 30th June, 1955 was 128,515, including 87,195 to persons who served during the 1939-45 War or in Korea or Malaya.

In addition, the Division had approved 11,958 transfers and resales, of which 3,614 were in respect of persons whose eligibility had been established as a result of service during the 1939-45 War or in Korea or Malaya.

During 1954-55, 15,007 (14,230) applications were approved; 5,628 (5,424) homes were built or assistance to build them was given; 5,665 (5,341) homes were purchased; and 1,498 (1,418) mortgages were discharged. The total number of homes provided during the financial year 1954-55 was 12,791 (12,183). Transfers and resales approved numbered 1,070 (939).

At 30th June, 1955, 3,547 homes, including 417 group projects, were in course of construction; 1,221 contracts, of which 124 were for group homes, had been let but work had not started; and 1,288 tenders, including 116 for group homes, had been called but not finally dealt with. The majority of these homes are being provided for persons who served during the 1939-45 War.

The total capital expenditure from inception to 30th June, 1955, was £199,419,769, including £30,086,585 for 1954-55. Receipts from inception to 30th June, 1955 amounted to £82,993,472, including £10,778,768 during 1954-55. Of the total receipts, £43,203,015 has been paid to the National Debt Sinking Fund, including £5,734,270 for 1954-55.

At 30th June, 1955 the total amount of insurances in force, including cover notes, amounted to £236,062,281. From 1st July, 1954 to 30th June, 1955 the premium income amounted to £145,933, and expenditure from the War Service Homes Insurance Trust Account to £394,229.

At 30th June, 1955 arrears of instalments outstanding amounted to £318,776, or 0.40 per cent. of the total instalments due.

## **§ 9. Commonwealth Scientific and Industrial Research Organization.**

1. **General.**—By the Science and Industry Research Act 1949, the previously existing Commonwealth Council for Scientific and Industrial Research was reorganized under the title of the Commonwealth Scientific and Industrial Research Organization. An account of the organization and work of the former Council, and of the earlier Commonwealth Institute of Science and Industry from which the Council was formed, was given in earlier issues of the Official Year Book. (*See* No. 14, p. 1061 and No. 37, p. 1183).

2. **Science and Industry Research Act 1949.**—This Act provides for—

- (a) an Executive of the Organization consisting of five members to be appointed by the Governor-General, at least three of whom shall be persons possessing scientific qualifications; and
- (b) an Advisory Council of the Organization, consisting of the members of the Executive, the Chairman of each State Committee constituted under the Act, and such other members as the Advisory Council, with the consent of the Minister, co-opts by reason of their scientific knowledge.

The powers and functions of the Organization are as follows :—(a) To initiate and carry out scientific researches in connexion with primary or secondary industries in Australia ; (b) to train research workers and to establish industrial research studentships and fellowships ; (c) to make grants in aid of pure scientific research ; (d) to establish and make grants to industrial research associations in any industry ; (e) to test and standardize scientific apparatus and instruments ; (f) to collect and disseminate scientific and technical information ; (g) to publish scientific and technical reports and periodicals ; and (h) to act as a means of liaison between Australia and other countries in matters of scientific research.

3. **Science and Industry Endowment Act 1926-1949.**—Under this Act, the Government established a fund of £100,000, the income from which is used to provide assistance (a) to persons engaged in scientific research ; and (b) in the training of students in scientific research. Provision is made for gifts or bequests to the fund, which is controlled by a trust consisting of the Executive of the Organization. In accordance with the Act, arrangements have been made to send a number of qualified graduates abroad for training in special fields of work.

4. **Work of the Organization.**—The activities of the Commonwealth Scientific and Industrial Research Organization have necessitated a widespread and adaptable arrangement of its research laboratories. Undesirable centralization has been avoided mainly in two ways. In the first place, the policy has been followed of establishing laboratories in different places in the Commonwealth wherever the necessary facilities, contacts and other suitable conditions could best be found. Secondly, the Act provides for the establishment of a State Committee in each of the six States. These Committees are widely representative of scientific and industrial interests, and advise the Executive or the Advisory Council on general matters and on particular questions of investigation and research.

For about twelve years after its establishment, the work of the previous Council was devoted mainly to the solution of problems affecting the agricultural and pastoral industries. Unlike manufacturing concerns, which can often employ their own scientific staffs, the farmers and the pastoralists are dependent on outside help for the solution of their problems which require research. It was a recognition of the greater need of the primary producer which directed the Council's early policy. However, in 1937, the Commonwealth Government decided to extend the activities of the C.S.I.R. so as to provide assistance to secondary industries, and several laboratories have been established for work in that field ; it was thus in the fortunate position of being able to render to these industries assistance of vital importance almost immediately after the outbreak of war. In fact, the remarkable technological advances and developments in secondary industrial production during the war would to a large extent have been impossible had it not been for the assistance rendered by scientific research, and this may well serve as a forceful illustration of what may be accomplished in times of peace.

For the purpose of carrying out its research work there are established within the Organization a number of Divisions and Sections. The Divisions, of which there are now seventeen, comprise the major establishments for which special laboratory buildings have been erected and equipped ; the Sections generally include establishments which have not reached a stage of development, so far as the scope and magnitude of their operations are concerned, to justify their designation as Divisions. As the Organization's investigations extend on a Commonwealth-wide basis and as many of the investigations which are being conducted—particularly those concerned with problems affecting the agricultural and pastoral industries—necessitate experimental work in the field, a number of field stations are established in various parts of Australia.

The Divisions which have been established are as follows :—

- (1) Plant Industry, with main laboratories at Canberra and Brisbane and field stations.
- (2) Entomology, with main laboratories at Canberra and field stations.
- (3) Animal Health and Production, with main laboratories in Melbourne, Sydney and Brisbane and field stations.

- (4) Biochemistry and General Nutrition, with main laboratories at Adelaide and field stations.
- (5) Soils, with main laboratories at Adelaide and extensive operations in the field.
- (6) Forest Products, with main laboratories in Melbourne and field experiments.
- (7) Food Preservation and Transport, with main laboratories at Homebush, New South Wales, and a subsidiary laboratory in Brisbane.
- (8) Fisheries and Oceanography, with main laboratories at Cronulla, New South Wales, subsidiary laboratories in Perth, Western Australia, Dunwich, Queensland, and Thursday Island, and experimental work in coastal waters of Australia.
- (9), (10), (11) Metrology, Physics and Electrotechnology, comprising the National Standards Laboratory at Sydney.
- (12) Radiophysics, with main laboratory at Sydney.
- (13) Industrial Chemistry, with main laboratories in Melbourne.
- (14) Tribophysics, with laboratories in Melbourne.
- (15) Building Research, with laboratories in Melbourne.
- (16) Mathematical Statistics, with main laboratory in Adelaide.
- (17) Meteorological Physics, with main laboratory in Melbourne and field station.

The following are the Sections :—

- (1) Commonwealth Research Station, Murray Irrigation Area, Merbein, Victoria.
- (2) Irrigation Research Station, Griffith, New South Wales.
- (3) Radio Research Board, Sydney.
- (4) Dairy Research, Melbourne.
- (5) Mineragraphic Investigations, Melbourne.
- (6) Ore-dressing Investigations, Melbourne and Kalgoorlie.
- (7) Plant Fibre, Melbourne.
- (8) Physical Metallurgy, Melbourne.
- (9) Wool Textile Research Laboratories, Geelong, Melbourne and Sydney.
- (10) Coal Research, Sydney.
- (11) Mathematical Instruments, Sydney.
- (12) Wildlife Survey, with main laboratory in Canberra, subsidiary laboratory at Albury, and field experiments.
- (13) Land Research and Regional Survey, with headquarters in Canberra, and field stations at Ayr (Queensland), Katherine (Northern Territory) and Ivanhoe (Kimberley, Western Australia).
- (14) Animal Genetics, Sydney.

In addition to its investigational work, the Organization deals with inquiries covering a wide range of scientific and technical subjects and maintains Scientific Research Liaison Offices in London and Washington.

An Agricultural Research Liaison Section established at the Organization's Head Office assists in making results in agricultural research speedily available to State Departments of Agriculture for use in their extension work.

Recently an Industrial Research Liaison Section has also been established at Head Office to foster liaison in the secondary and manufacturing fields.

The Organization's Head Office, with administrative and executive staff, is in Melbourne, and associated with it are the Organization's Central Library, Agricultural Research Liaison Section and Central Experimental Workshops. The funds for the Organization are provided from two main sources, namely, from Commonwealth revenue by Parliamentary appropriation, and from industry directly or indirectly by way of contributions and special grants. The fact that contributions and grants account for over one-eighth of the total annual expenditure indicates that the C.S.I.R.O. has succeeded in a very large measure in gaining the confidence of the public.

The activities of the C.S.I.R.O. are now so comprehensive in their scope and so widely distributed that it is not an easy matter to present an adequate picture of them in a concise form. For details of the investigations in progress, reference should be made to the Annual Report of the Organization.

### § 10. Commonwealth Observatory.

1. **Foundation of Observatory.**—The Observatory was founded primarily to prosecute astrophysical research, including the study of the relations between solar and terrestrial phenomena. A short history of the foundation of the Observatory appears in Official Year Book No. 19, p. 979.

2. **Site of Observatory.**—The Observatory is situated on Mount Stromlo, which forms part of a ridge of hills about seven miles west of Canberra. The highest point in the ridge is 2,560 feet above sea level, that is about 700 feet above the general level of the surrounding country.

3. **Equipment.**—The major items of equipment at Mount Stromlo comprise a 74-inch reflector, a 50-inch reflector, which is the re-built Melbourne 48-inch telescope, a 30-inch reflector donated by the late J. H. Reynolds, Esq., a 20-inch reflector once the property of the late J. H. Catts, M.P., as well as a 9-inch refractor, a solar tower telescope of 45 feet focal length and other smaller telescopes. A photographic refractor of 26-inch aperture belonging to the Universities of Yale and Columbia is now installed in a dome provided by the Commonwealth Government.

4. **Functions of Observatory.**—Investigations in the fields of stellar spectroscopy, stellar photometry and variable stars are being carried out. In addition to covering the type of astrophysical research for which the Observatory was founded, the field of work has been extended to include experimental and theoretical investigations of the ionosphere, and the determination of time. The observatory is now responsible for the accuracy of the Australian Time Service. Considerable attention is being given to the development of this work, and a highly accurate quartz clock system has been installed. A photographic zenith tube has been acquired for time determination.

5. **International Co-operation.**—The Commonwealth Observatory works in close liaison with oversea observatories and major equipment has been or is being installed at Mt. Stromlo in co-operation with the University Observatories of Yale and Columbia (U.S.A.), Uppsala (Sweden), and Munich (Germany).

### § 11. Standards Association of Australia.

The Standards Association of Australia is the national standardizing organization of Australia, and issues Australian standard specifications for materials and codes of practice.

The Association was established in July, 1929 by the amalgamation of the Australian Commonwealth Engineering Standards Association and the Australian Commonwealth Association of Simplified Practice. It is an independent body in close touch with modern industrial requirements and has the full recognition and support of the Commonwealth and State Governments and industry. It was incorporated by Royal Charter in 1950.

The sole executive authority of the Association is vested in the Council, on which industry is fully represented, together with official representatives of the Commonwealth and State Governments and their technical departments, and of scientific, professional and commercial organizations. Voluntary assistance is rendered in the drafting of specifications and codes by several thousand individuals who are experts in their particular fields, and are organized into some hundreds of committees. These committees are grouped under broad industry headings including civil engineering and building construction, mechanical engineering, electrical engineering, chemical industry, timber industry, transportation, aircraft materials, ferrous and non-ferrous metallurgy, textiles, mining, ceramics, medical and dental materials, household and domestic economy, miscellaneous and general.

These committees are comprised of nominated representatives of manufacturing, distributing and purchasing organizations, and of scientific and other expert authorities in the particular field of the project being dealt with. The operations of these committees are co-ordinated and supervised by committees broadly representative of the whole industry within which the respective projects are included.

The specifications of the Association provide a suitable standard of performance, quality and dimension and an equitable basis for tendering. They help to eliminate

redundant qualities and sizes. They enable purchasers to obtain their requirements with greater assurance of satisfaction, with more rapid delivery and without the necessity of drafting individual specifications.

The underlying principles covering the preparation of the specifications and codes are that they shall be in accordance with the needs of industry ; that the common interests of producer and consumer be maintained ; that periodical revision should keep the work abreast with progress ; and that standardization be arrived at by general consent without coercion.

Organizations, companies, firms and individuals interested in the work of the Association are eligible for subscription membership. Members are entitled to free copies of the publications of the Association and to the use of the library and its Special Information Service. Bibliographical research is undertaken for committees, members of the Association, and industry in general. Many hundreds of inquiries are answered each year.

The Association has international affiliations and the standards of all British and foreign countries are filed in the library and are accessible to members. It is a member, representing Australia, of the International Organization for Standardization (I.S.O.). The Association also administers the Australian National Committees of the International Electrotechnical Commission, the World Power Conference and the International Commission on Large Dams.

The Association is also the representative of the British Standards Institution, and all British standards may be purchased from headquarters and branch offices in the various States.

The headquarters of the Association are at Science House, Gloucester Street, Sydney, and branches of the Association are situated at Temple Court, 422 Collins Street, Melbourne ; School of Arts Building, 162 Ann Street, Brisbane ; Alliance Building, Grenfell Street, Adelaide ; Gledden Building, Hay Street, Perth ; c/o Engineering Department, Hobart Technical College, Hobart ; Department of Works, Canberra ; and Howard Smith Chambers, Watt Street, Newcastle.

## § 12. Film Censorship Board.

1. **Legislation.**—The Censorship of imported films derives its authority from Section 52 (g) of the Customs Act which gives power to prohibit the importation of goods. Under this section, regulations have been issued prohibiting the importation of films except under certain conditions and with the consent of the Minister. The regulations provide, *inter alia*, that no film shall be registered which in the opinion of the Censor is (a) blasphemous, indecent or obscene ; (b) likely to be injurious to morality, or to encourage or incite to crime ; (c) likely to be offensive to the people of any friendly nation ; (d) likely to be offensive to the people of the British Empire ; or (e) depicts any matter the exhibition of which is undesirable in the public interest.

The regulations governing the exportation of Australian-made films are similar with the addition that no film may be exported which in the opinion of the Censorship is likely to prove detrimental or prejudicial to the Commonwealth of Australia.

The Censorship consists of a Censorship Board of three persons and an Appeal Censor, the headquarters being in Sydney. There is also a right of appeal to the Minister.

In addition to the censorship of moving pictures, the Censorship may refuse to admit into Australia any advertising matter proposed to be used in connexion with the exhibition of any film. In regard to films and advertising matter produced in Australia, legislation of a uniform nature is now operative in all States except South Australia. Under the State legislation the Commonwealth Film Censorship Organization acts as censor for the States concerned by virtue of agreements entered into between the Commonwealth and the respective State Governments.

2. **Import of Films.**—Imported standard size (35-millimetre) films dealt with by the Censorship for the year 1955 were as follows :—1,148 films of 3,178,017 feet passed without elimination, 120 films of 945,286 feet passed after eliminations and 4 films of 30,485 feet rejected, making a total of 1,272 films of 4,153,788 feet. Appeals were lodged against the rejection of two films, one of which was upheld, whilst the other was disallowed

The countries of origin were as follows :—United States of America, 687 films of 2,249,702 feet ; United Kingdom, 275 films of 960,493 feet ; and other countries, 310 films of 943,593 feet.

The films which chiefly concern the Censorship are the feature or dramatic films. Of these, 412—3,391,605 feet were imported during 1955 (223—1,866,087 feet from the United States of America and 104—787,533 feet from the United Kingdom). Two hundred and ninety-four—2,441,743 feet were passed without eliminations, 114—919,377 feet were passed with eliminations and four films of 30,485 feet were rejected in the first instance. In two instances an appeal was lodged, one of which was upheld, whilst the other was disallowed. During 1953, 401 feature films were dealt with, 278 being passed without eliminations and 122 passed with eliminations, while one film rejected in the first instance was subsequently passed for public exhibition.

There were also imported, during 1955, 5,661 miniature films (16 millimetres) of 3,963,628 feet and 4,413 miniature films (9.5 and 8 millimetres) of 1,637,612 feet. Six 8-millimetre films and three 16-millimetre films were rejected. No appeals were lodged against rejection of the films.

3. *Export of Films.*—The number of films exported for the year 1955 was 2,505 of 1,721,034 feet, of which 1,988 films of 1,335,072 feet were sent to British countries, including Trust Territories and 293 films of 209,044 feet were sent to the United States of America.

### § 13. Australian National Film Board and the Film Division.

1. *The Australian National Film Board.*—The Australian National Film Board was inaugurated in April, 1945, on the recommendations of a Commonwealth Government inter-departmental committee which considered the suggestions of a conference of interested individuals and Commonwealth and State officials, including Directors of Education, called in November, 1944 by the Ministers for Information and Post-war Reconstruction. It was attached, for administrative purposes, to the Department of Information.

With the abolition of the Department of Information in March, 1950, administration of the Board was transferred to the News and Information Bureau, Department of the Interior.

In November, 1950, the Board was reconstituted as an advisory body to the Minister for the Interior on matters concerned with the production, distribution and acquisition of films required by Commonwealth departments for the following purposes :—

- (a) for use within Australia on important matters of national interest and welfare, such as school and adult education, rehabilitation, social development, international understanding, trade and tourist expansion, and immigration ;
- (b) for dissemination abroad to expand trade and commerce with other countries, encourage tourist traffic with Australia, improve Australia's relations with other countries and, where necessary, to explain Australia's national policies, and to encourage immigration.

The constitution provides for a membership of ten, with the Secretary of the Department of the Interior, Chairman, the Director of the News and Information Bureau, Deputy Chairman, and the remainder representative of Commonwealth Departments, State Government instrumentalities and organizations interested in the production, distribution or utilization of films for national publicity.

2. *The Film Division of the News and Information Bureau.*—Production and distribution of all films required by Commonwealth Departments is undertaken by the staff of the Film Division, News and Information Bureau, Department of the Interior, or by commercial enterprises under the supervision of officers of the Film Division. Theatrical distribution in Australia, and both theatrical and non-theatrical distribution overseas, of all Film Division productions are organized by the News and Information Bureau's home office or its overseas representatives. Non-theatrical distribution in Australia is organized through the National Library, Canberra, in co-operation with State film distribution agencies.

The first Australian Government organization for the production of motion pictures for national publicity purposes was the Cinema and Photographic Branch of the Department of Commerce, set up in Melbourne in 1920. Early in the 1939-45 War the newly-established Department of Information was made responsible for the operation of the Cinema Branch and for an Official War Photography Unit.

Since 1946 the Film Division has produced 239 films for general exhibition, as well as training and special purpose films. Prints are dispatched to 40 overseas centres where distribution is arranged by News and Information Bureau officers or other Australian representatives. In Britain there is regular distribution through more than a thousand theatres, and a large non-theatrical and educational series of circuits. By arrangement with the British Broadcasting Corporation, items of topical interest photographed by the Film Division are flown to London for television. In the United States of America there is wide non-theatrical distribution and considerable use of the films by television networks. An exchange arrangement with the National Film Board of Canada secures extensive distribution in Canada. French versions, prepared in Paris under the supervision of the Australian Embassy, circulate through France and French-speaking countries. Selected films have also been recorded in Dutch, German, Italian, Japanese, Hindustani, Tamil and other Indian dialects.

In addition to films made on the initiative of the News and Information Bureau, the Film Division has produced, or is producing, films under the sponsorship or with the co-operation of Commonwealth Departments and many other bodies such as the Commonwealth Bank of Australia, the Road Safety Council, Overseas Telecommunications Commission, Snowy Mountains Hydro-electric Authority, Australian Wine Board, the Australian National University and the Australian Broadcasting Commission.

The co-operation of the Australian motion picture industry with the Commonwealth spontaneously offered at the outset of the 1939-45 War, continues. Special films for urgent national appeals are planned, produced and distributed with the assistance of the National Films Council of the motion picture industry and its Film Production Advisory Committee.

#### § 14. National Safety Council of Australia.

The National Safety Council of Australia was founded in Melbourne in 1927 for the purposes of developing, mainly by means of education, safety on the road, at work and in the home, and its activities have developed in other directions wherever the need for reducing the toll of accidents has been shown. To this end it conducts continuous propaganda through the press and in other ways. It also forms Junior Safety Councils in the schools for developing a safety conscience among children. The children themselves are officers of these Councils and patrol the roads in the neighbourhood of the schools and conduct the scholars across in safety. Posters are available to schools in connexion with Health and Safety lessons. Films specially taken are available for children's and road safety instruction.

A "Safe Driving" campaign for individual motor drivers is conducted as well as a "Freedom from Accidents" competition among employee drivers, those completing a year free from any accident for which they were responsible being given a certificate to that effect. An industrial service of four posters per month, together with slips for pay envelopes, constitutes a regular service for the dissemination of safety advice, and was supplied to over 100,000 workers in factories in 1954-55. Committees deal with specific problems regarding traffic, films, safety in industry, air safety and home dangers. The Air Safety Committee has issued a 32-page booklet "Air Sense" for distribution with pilots' private licences through the Civil Aviation Department, and has a plan for assistance to aircraft in distress which is being implemented throughout Australia.

The Council is supported by Government grants, public subscriptions and sales of service, and is a non-profit organization. Its work is carried on by a small staff controlled by committees and governed by an executive. The following committees, whose work is of an entirely honorary nature, are in operation, namely, Executive, Traffic, Industrial Safety, Home, Air Safety and Publicity.

## § 15. Australian Road Safety Council.

1. **Origin and Organization.**—The Australian Road Safety Council was formed in June, 1947, through the instrumentality of the Australian Transport Advisory Council.

The prime movers for the establishment of the Council were the Australian Automobile Association, which submitted a comprehensive plan: the New South Wales Minister for Transport, who advocated expansion, on a nation-wide basis, of road safety activities on lines similar to those of the Road Safety Council of New South Wales; and the National Safety Council of South Australia, which conveyed recommendations from a Special Safety Convention held in Adelaide in 1946.

At that time, in addition to the above-mentioned organizations in New South Wales and South Australia, there was a road safety organization in Victoria. Steps were immediately taken to form Councils in Queensland, Western Australia and Tasmania, and subsequently for the internal Territories.

The Australian Road Safety Council is the composite body of Road Safety Councils of the following States and Territories of Australia:—

*Governmental.*—New South Wales, Road Safety Council of New South Wales; Queensland, Road Safety Council of Queensland; Tasmania, Road Safety Council of Tasmania; the Australian Capital Territory and the Northern Territory, Road Safety Councils of the Australian Capital Territory and the Northern Territory respectively.

*Non-Governmental.*—Victoria, Victorian Road Safety Division, National Safety Council of Australia; South Australia, Road Safety Division, National Safety Council of South Australia; Western Australia, Road Safety Division, National Safety Council of Western Australia.

The Council is representative, geographically and technically, of the whole Commonwealth, and comprises nominees of practically all classes of road users, together with representatives of road transport, the Department of Defence and police administrations from each State. National organizations represented on the Council are:—The Federal Chamber of Automotive Industries, Council of Fire and Accident Underwriters, Australian Road Transport Federation, Australian Automobile Association, Transport Workers' Union of Australia, Federation of Motor Cycle Importers and Distributors of Australia, and Auto Cycle Council of Australia.

The Council meets annually, and an Executive Committee operates between conferences. The principal effort of the Council is directed through educational, advertising and public relations media.

An annual grant is made available by the Commonwealth Government under the Commonwealth Aid Roads Act for the promotion of road safety. Hitherto £100,000 annually, it has been increased to £150,000 for the five years commencing 1st July, 1955. Of this, £90,000 is allocated to State Road Safety Councils for local activities in the following proportions:—New South Wales, £22,500; Victoria, £18,000; Queensland, £16,650; Western Australia, £14,850; South Australia, £11,250; and Tasmania, £6,750. The remaining £60,000 is applied to the National Campaign, spread equitably over the entire Commonwealth.

2. *Mode of Operation.*—The role of the Australian Road Safety Council is primarily in the field of education and public relations. Its task is to inculcate the habit of safe use of the roads by all who travel on them and to promote the cause of road safety as a humanitarian and community ideal of the highest importance. To this end it constantly strives to increase public awareness of the road accident problem, which for the year ended 30th June, 1955 resulted in 97,758 accidents involving casualties or damage in excess of £10 to property, the deaths of 2,042 persons and injuries to 46,465 persons. (For further information on the subject of Traffic Accidents see pp. 249-251 of this Year Book.)

The Council works in close collaboration with two other committees also established by the Australian Transport Advisory Council, namely, the Australian Motor Vehicle Standards and the Australian Road Traffic Code Committees. All three committees are administered by the Commonwealth Department of Shipping and Transport, which is the executive department for the Australian Transport Advisory Council.

The Australian Motor Vehicle Standards Committee develops and promulgates essential basic motor vehicle standards, such as maximum lengths, weights, height, carrying capacity of vehicles, and minimum lighting, braking and other mechanical efficiencies. In addition to ensuring a greater safety factor, these standards have helped to eliminate many conflicting State requirements which had an adverse effect on design and production costs.

The Australian Road Traffic Code Committee is charged with the responsibility of progressively preparing a "blue print" uniform national traffic code for incorporation in State legislation. Speed limits, right hand turns, rules governing approaches to intersections, qualifications of drivers, and pedestrian behaviour, are a few of the numerous aspects which come within its purview, and a high degree of uniformity has been achieved.

The campaign for road accident prevention resolves broadly into three main elements relating to (i) the Road User, (ii) the Road, and (iii) the Vehicle. Similarly, the attack falls into three main divisions—(i) Education, (ii) Enforcement, and (iii) Engineering. The link between the components is, broadly :—

The Road User	{	Education (public relations media, instruction in schools, homes, etc.).
		Enforcement (of correct road usage—through the police and the courts, uniform traffic laws, etc.).
The Road ..	{	Engineering (technical improvements of all kinds, safer roads and vehicles, improved illumination, uniform vehicle standards, etc.).
The Vehicle ..		

In addition to the foregoing activities, the Council convenes special national conferences, as required by the Australian Transport Advisory Council, to consider specific road safety problems. Typical of these have been the special committee appointed in 1951 to discuss level crossing accidents which recommended, among other measures, the appointment in each State of a committee to investigate level crossings and report on safety provisions, the elimination of some railway level crossings and the closure of others where practicable and desirable; a special meeting held in June, 1953 to discuss methods of reducing the high incidence of motor cycle accidents, at which various measures to offset the greater vulnerability of both the machine and its rider were recommended; and special meetings held in May, 1954 and April, 1955 to consider the problems of "Youth and Road Safety" and "Pedestrian Behaviour" respectively. Through the Road Safety Council of New South Wales, the Australian Road Safety Council has pioneered the advocacy of voluntary blood tests for intoxication in cases of suspected driving under the influence of drugs or alcohol.

## § 16. Australian Atomic Energy Commission.

In November, 1952 a Commission of three members was appointed to control the Commonwealth's activities in relation to uranium and atomic energy, and in April, 1953, upon the enactment of the Atomic Energy Act 1953, the Commission was established as a statutory authority, with powers and functions as defined in the Act. The Commission is a corporate and autonomous body, controlling its own service. It functions under the direction of the Minister for Supply.

Commonwealth arrangements for securing collective advice on atomic energy matters date from 1949, when the Industrial Atomic Energy Policy Committee was established to study possible industrial applications of atomic energy, and to recommend a programme of development. This committee functioned until 1952, when it was disbanded at its own suggestion and succeeded by the Atomic Energy Policy Committee, a re-constituted body with enlarged terms of reference. In the light of recommendations by the 1952 Committee, and of scientific and organizational developments overseas in relation to atomic energy, the Government decided on the establishment of the Commission, and legislation was enacted in 1953 to give effect to this decision.

The functions of the Commission fall under two main headings. Firstly, it is responsible for undertaking and encouraging the search for and mining of uranium, and is empowered to co-operate with the appropriate authorities of the States in connexion with these and related matters. Secondly, it is authorized to develop the practical uses of atomic energy, by constructing and operating plant for this purpose, carrying out research, and generally fostering the advancement of atomic energy technology. These powers and functions are set out in detail in Part II. of the 1953 Act. In general, and subject to the Commonwealth's defence powers and particular provisions of the Act, they are exercisable only in or in relation to the Territories of the Commonwealth.

The search for and mining of uranium in the Territories of the Commonwealth are freely open to private enterprise, subject to the *Atomic Energy Act* 1953 and the Ordinances of the Territories. For the assistance of private prospectors, and with the object of ascertaining the uranium resources of the Territories, aerial and geological surveys are carried out to identify areas favourable to uranium occurrences. These surveys are undertaken for the Commission by the Bureau of Mineral Resources of the Department of National Development, and the results are published from time to time in map form for general information. As incentives to private enterprise to engage in the search for uranium, rewards have been paid for discoveries. Taxation concessions are allowed in respect of income derived from uranium mining. In addition, the Atomic Energy Commission, the Bureau of Mineral Resources and other Commonwealth agencies make available to prospectors and mining companies a wide range of technical and advisory services.

The development of the uranium resources of the States is a State matter, governed by the legislation and policies of the States. Commonwealth aerial survey facilities are made available to the States for the radiometric examination of areas within the States, and work is undertaken by the State Mines Departments for the Commonwealth on the testing of uranium ores and research on ore treatment problems. At the request of the State Governments, aerial radiometric surveys of approximately 43,000 square miles of selected country within the States had been carried out by the Bureau of Mineral Resources to 30th June, 1955. Prospectors and mining companies in the States have available to them technical and advisory services provided by the State Mines Departments.

Uranium oxide is being produced in Australia from large ore deposits at Rum Jungle, in the Northern Territory, and Radium Hill, in South Australia. The Rum Jungle deposits are being developed under arrangements between the Commonwealth and the Combined Development Agency, a joint procurement organization of the United States and United Kingdom Governments. The actual mining and treatment operations are being conducted for the Commonwealth by an Australian mining company. A treatment plant was brought into operation on the field in September, 1954, the substantial production from which is being sold to the Agency for defence purposes. The Radium Hill deposits are being developed by the South Australian Government, which has established an ore concentration plant on the field and a plant for the treatment of the concentrates at Port Pirie. Like the Rum Jungle project, the operations at Radium Hill and Port Pirie are carried out under arrangements with the combined Development Agency, and the output from the operations is sold to the Agency.

Uranium ores have also been found elsewhere in the Commonwealth, most notably at the Mary Kathleen lease in the Mt. Isa-Cloncurry district in Queensland. The Mary Kathleen lease, containing a large body of ore, is being developed by commercial interests, which are proceeding with the erection of a treatment plant in the area at a cost of several million pounds. Production from the plant will be sold to the United Kingdom Atomic Energy Authority, under arrangements approved by the Commonwealth Government. Amongst other known ore occurrences, some in the Northern Territory are of considerable interest. These are being examined by the mining companies which discovered them, and may prove to justify commercial development.

Arrangements for an extensive programme of research in Australia on the development of the industrial and other peaceful uses of atomic energy are at an advanced stage. A specialized research establishment, which will include a high-flux nuclear reactor of the latest type, is under construction at Lucas Heights, near Sydney, and is expected to be completed in 1957. Meanwhile the Atomic Energy Commission is maintaining a group of about fifty research officers at the United Kingdom Atomic Energy Research Establishment at Harwell, where some Australian scientific workers have been participating in the United Kingdom research and development programme since 1947. Most of the officers at Harwell will return to Australia when facilities for their work are available at Lucas Heights. Within Australia, in addition to its programme at Lucas Heights, the Commission is supporting atomic energy research on a considerable scale in the various universities, and it has established a wide range of post-graduate research studentships and undergraduate scholarships in the universities to train scientists for future work in atomic energy fields.

The broad objects of the Commission's research programme are to develop the production of electric power from nuclear fuels, and to investigate and promote the application of atomic energy and radioactive isotopes in industry, agriculture, medicine and biological research and other fields. In these endeavours the Atomic Energy Commission is working in close co-operation with the United Kingdom Atomic Energy Authority, under arrangements which give Australia access to the results of the very large United Kingdom programme of research on peaceful atomic energy uses. The results of research in Australia will in like manner be made available to the United Kingdom. Work in Australia, while constituting a self-contained programme, will be co-ordinated with the United Kingdom programme, to avoid overlapping of research objectives and duplication of investigations.

In the light of the vast amount of research now going forward overseas, and the programmes of many nations for the establishment of full-scale power producing reactors, it seems clear that nuclear power is rapidly approaching the stage of being economically

practicable. When that stage is reached, the implications for industry will be of great importance. The planned Australian research effort will enable Australia to make a full contribution to the advancement of atomic energy technology, both in power production and in other fields, and will at the same time place the country in a position to take advantage of the practical uses of atomic energy as they are developed.

## § 17. The United Nations.

1. *General.*—The Moscow Declaration of 1943 concerning a new international organization for the maintenance of international peace and security marked the end of the League of Nations. The dissolution of the League, and the transfer of certain of its functions to the new body, the United Nations, took place over subsequent years. Information concerning the League of Nations was given in issue No. 35 and earlier issues of the Official Year Book.

The Charter of the United Nations was drawn up by the delegates of fifty nations at the United Nations Conference on International Organization at San Francisco from 25th April to 26th June, 1945. Australia's ratification was deposited on 1st November, 1945. Following the admission in December, 1955 of 16 new countries there are now\* 76 member States:—Afghanistan, Albania, Argentina, Australia, Austria, Belgium, Bolivia, Brazil, Bulgaria, Burma, Byelorussia, Cambodia, Canada, Ceylon, Chile, China, Colombia, Costa Rica, Cuba, Czechoslovakia, Denmark, the Dominican Republic, Ecuador, Egypt, El Salvador, Ethiopia, Finland, France, Greece, Guatemala, Haiti, Honduras, Hungary, Iceland, India, Indonesia, Iran, Iraq, the Republic of Ireland, Israel, Italy, Jordan, Laos, Lebanon, Liberia, Libya, Luxemburg, Mexico, Nepal, the Netherlands, New Zealand, Nicaragua, Norway, Pakistan, Panama, Paraguay, Peru, the Philippines, Poland, Portugal, Romania, Saudi Arabia, Spain, Sweden, Syria, Thailand, Turkey, the Ukraine, the Union of South Africa, the Union of Soviet Socialist Republics, the United Kingdom, the United States of America, Uruguay, Venezuela, Yemen, Yugoslavia.

The full record of the Conference is contained in the Report by the Australian Delegates on the United Nations Conference on International Organization held at San Francisco, from 25th April to 26th June, 1945.

At San Francisco an Executive Committee and a Preparatory Commission were established, and when these bodies had completed their work of preparation for the first meeting of the United Nations, the General Assembly met in London on 10th January, 1946.

The principal organs of the United Nations are the General Assembly, the Security Council, the Economic and Social Council, the Trusteeship Council, the International Court of Justice, and the Secretariat.

2. *General Assembly.*—This is the forum of the United Nations. In it each member state is represented and has one vote. It meets in regular annual sessions and has provision for special sessions. With the exception of disputes which are before the Security Council and matters essentially within the domestic jurisdiction of any State, it has power to discuss any matter within the scope of the Charter and to make recommendations upon it. The Assembly elects the non-permanent members of the other major organs and considers annual reports from them. Upon the recommendation of the Security Council, it may expel a member which has persistently violated the principles of the Charter.

---

\* June, 1956.

3. **The Security Council.**—This has the primary responsibility for the maintenance of international peace and security. It is composed of five permanent members, namely China, France, the United Kingdom, the Union of Soviet Socialist Republics and the United States of America, and six non-permanent members with two-year periods of office, of whom three retire at the end of each year. At the initial election three countries, including Australia, were elected for a term of two years and three others for a term of one year only. The following are the non-permanent members of the Security Council at present\*: Belgium, Iran and Peru (whose terms commenced on 1st January, 1955) and Australia, Cuba and Yugoslavia (whose terms commenced on 1st January, 1956). On procedural matters, decisions are taken by an affirmative vote of any seven members. But on all other matters decisions can only be made on the affirmative vote of seven members, including the concurring votes of all the permanent members. However, the powers which are parties to a dispute for peaceful settlement do not vote.

The Security Council is assisted by a Military Staff Committee consisting of the Chiefs of Staff of the permanent members of the Council or their representatives.

4. **The Economic and Social Council.**—This body consists of eighteen members, each elected for a period of three years. Its main functions are to make, or initiate, studies and reports, and to make recommendations to the General Assembly or to members of the United Nations, upon international, economic, social, cultural, educational, health and related matters. It may make recommendations for the purpose of promoting respect for, and observance of, human rights and fundamental freedoms for all.

The present\* members of the Economic and Social Council are: the United Kingdom, the Union of Soviet Socialist Republics, Ecuador, Pakistan, Czechoslovakia and Norway (retiring 1956), France, China, Egypt, Argentina, the Dominican Republic and the Netherlands (retiring 1957) and Brazil, Canada, Greece, Indonesia, the United States of America and Yugoslavia (retiring 1958).

5. **The Trusteeship Council.**—The Charter declares the political, social, cultural and economic advancement of the Trusteeship Territories to be a sacred trust. A Trusteeship Council has been set up composed of those members of the United Nations who are administering trust territories and an equal number of members who are not administering trust territories (including any permanent members of the Security Council who are not administering trust territories). Territories which may be placed under trusteeship in accord with individual trusteeship agreements are those previously held under mandate, those detached from enemy states as a result of the second World War and those dependent territories placed under the system by the states responsible for their administration. Australia is automatically a member of the Trusteeship Council, as the Power administering the Trust Territories of New Guinea and Nauru. The present\* members of the Trusteeship Council are: Australia, Belgium, France, Italy, New Zealand, the United Kingdom, the United States of America (administering States), and Burma, China, Guatemala, Haiti, India, Syria and the Union of Soviet Socialist Republics. China and the Union of Soviet Socialist Republics are eligible for permanent membership of the Trusteeship Council by virtue of their permanent membership of the Security Council.

The Council has among its duties the consideration of annual reports submitted by the trustee state, the carrying out of periodic inspections by agreement with it, and the formulation of questionnaires on the welfare and advancement of the dependent peoples.

---

\* June, 1956.

6. **The International Court of Justice.**—This consists of fifteen judges, no two of whom may be nationals of the same state. Its jurisdiction comprises all cases which the parties refer to it, and all matters especially provided for in the Charter or in treaties and conventions in force. Provision exists in the Statute of the Court whereby States parties to the Statute may accept the jurisdiction of the Court as compulsory, either conditionally, or unconditionally in certain international disputes.

The present\* members of the Court are : Judges Badawa (Egypt), Hsu Mo (China), Read (Canada), Winiarski (Poland), Zoricic (Yugoslavia)—all retiring in 1958 ; Judges Hackworth (United States of America), Sir Zafrullah Khan (Pakistan), Klaested (Norway), Kozhevnikov (U.S.S.R.), and Ugon (Uruguay)—all retiring in 1961 ; and Judges Lauterpacht (United Kingdom), Basdevant (France), Guerrero (El Salvador), Cordova (Mexico), and Quintana (Argentina)—all retiring in 1964.

Sir Zafrullah Khan was elected to replace Sir Benegal Rau (India), who died in 1953.

7. **The Secretariat.**—The Secretary-General is the head of the Secretariat of the organization. He is appointed by the General Assembly upon the recommendation of the Security Council, and he appoints his staff in accordance with the rules approved by the General Assembly. Mr. Trygve Lie (Norway) was appointed first Secretary-General, and at the Sixth Session of the General Assembly in 1950 was re-appointed for three further years as from 1st February, 1951. In November, 1952 Mr. Lie announced his intention of retiring and in April, 1953, Mr. Dag Hammarskjöld (Sweden) was appointed in his place.

8. **Specialized Agencies.**—In addition to these organs of the United Nations there are specialized agencies which co-operate closely with the United Nations in many fields on economic and social questions.

Those now\* in operation are : The International Labour Organization ; Food and Agriculture Organization ; United Nations Educational, Scientific and Cultural Organization ; International Civil Aviation Organization ; International Bank for Reconstruction and Development ; International Monetary Fund ; Universal Postal Union ; World Health Organization ; International Telecommunication Union ; World Meteorological Organization.

To enable co-ordination of the work of the specialized agencies, arrangements have been made for them to submit reports on their activities and budgets to the United Nations where they are discussed by the Economic and Social Council and the General Assembly.

## § 18. Diplomatic and other Representatives Overseas and in Australia

1 **General.**—The following statements show particulars of the various diplomatic and other representatives overseas and in Australia at 30th June, 1956. Full details of British and foreign representation in Australia—diplomatic and consular—and of permanent Australian missions overseas may be obtained from publications issued by the Department of External Affairs, Canberra. A statement is issued each quarter by the Department of Trade, showing the latest particulars of the Australian Trade Commissioner Service overseas.

---

\* June, 1956.

## 2. Australian Representation Overseas.—

## AUSTRALIAN DIPLOMATIC AND OTHER REPRESENTATIVES OVERSEAS.

## Her Majesty's Australian Ambassador Extraordinary and Plenipotentiary to—

- Burma* (Rangoon)—C. T. Moodie.  
*France* (Paris)—A. Stirling, C.B.E.  
*Germany, Federal Republic of* (Bonn)—P. Shaw.  
*Indonesia* (Djakarta)—W. R. Crocker, C.B.E.  
*Ireland* (Dublin)—(Vacant); S. Jamieson (Chargé d'Affaires *ad interim*).  
*Japan* (Tokyo)—Sir Alan Watt, C.B.E.  
*The Netherlands* (The Hague)—H. A. McClure-Smith.  
*The Phillipines* (Manila)—K. C. O. Shann.  
*Thailand* (Bangkok)—D. O. Hay, D.S.O., M.B.E.  
*United States of America* (Washington, D.C.)—The Hon. Sir Percy Spender, K.B.E., Q.C.

## Her Majesty's Australian Envoy Extraordinary and Minister Plenipotentiary to—

- Brazil* (Rio de Janeiro)—C. V. Kellway.  
*Cambodia* (Phnom Penh)—D. W. McNicol.  
*Egypt* (Cairo)—A. R. Cutler, V.C.  
*Israel* (Tel Aviv)—B. C. Baillard.  
*Italy* (Rome)—D. P. McGuire, C.B.E.  
*Laos* (Vientiane)—D. W. McNicol.  
*Vietnam* (Saigon)—D. W. McNicol.

## High Commissioners for Australia in—

- Canada* (Ottawa)—T. A. Pyman (acting).  
*Ceylon* (Colombo)—A. J. Eastman.  
*India* (New Delhi)—P. R. Heydon.  
*New Zealand* (Wellington)—Vice-Admiral Sir John Collins, K.B.E., C.B.  
*Pakistan* (Karachi)—Major-General W. J. Cawthorn, C.B., C.I.E., C.B.E.  
*Union of South Africa* (Pretoria and Cape Town)—Lt.-Col. W. R. Hodgson, C.M.G., O.B.E.  
*United Kingdom of Great Britain and Northern Ireland* (London)—The Rt. Hon. Sir Eric Harrison, K.C.V.O.

## Australian Military Mission—

- Germany, Federal Republic of* (Berlin) Head—P. Shaw.

## Australian Mission—

- United Nations* (New York)—Ambassador, Dr. E. R. Walker, C.B.E.  
*United Nations* (Geneva)—Permanent Delegate, G. A. Jockel.

## Australian Commissioner in—

- Malaya, Federation of* (Kuala Lumpur)—T. K. Critchley.  
*Singapore, Brunei, Sarawak and North Borneo* (Singapore)—R. L. Harry.

## Consuls-General—

- Greece* (Athens)—H. G. Brooks (acting).  
*Switzerland* (Geneva)—G. A. Jockel.  
*United States of America* (New York)—The Hon. J. Francis.  
*United States of America* (San Francisco)—M. H. Marshall.

## Consuls—

- Denmark* (Copenhagen)—G. T. Pretymann.  
*New Caledonia* (Noumea)—Dr. J. S. Cumpston, E.D.  
*Portuguese Timor* (Dili)—F. J. A. Whittaker.

**Trade Commissioner Service of the Commonwealth of Australia—***British West Indies*—B. T. Connolly (Port of Spain).*Burma*—L. C. Holmes, Commercial Secretary and Acting Trade Commissioner (Rangoon).*Canada*—C. L. Steele (Montreal); H. Wrigley (Vancouver).*Central African Federation*—W. S. Lowe (Salisbury).*Ceylon*—H. W. Goodger (Colombo).*Egypt*—S. D. Shubart, Commercial Counsellor and Trade Commissioner (Cairo).*France*—C. J. Carne, O.B.E., Commercial Counsellor and Trade Commissioner (Paris).*Germany, Federal Republic of*—R. R. Ellen, Commercial Counsellor and Trade Commissioner (Bonn).*Hong Kong*—K. T. Ridley (Hong Kong).*India*—P. R. Searcy (Calcutta); D. L. Crawford (Bombay).*Indonesia*—D. R. McPhee, Commercial Counsellor and Trade Commissioner (Djakarta).*Italy*—S. F. Lynch, Commercial Counsellor and Trade Commissioner (Rome).*Japan*—N. F. Stuart, Commercial Counsellor and Trade Commissioner (Tokyo).*Malaya*—H. M. Le Marchand, Commercial Counsellor and Trade Commissioner (Singapore).*New Zealand*—W. R. Hudspeth (Wellington).*Pakistan*—R. K. Scott, Commercial Counsellor and Trade Commissioner (Karachi).*Philippines, The*—E. E. Jarvis (Manila).*Union of South Africa*—A. J. S. Day, Commercial Counsellor and Trade Commissioner (Johannesburg).*United Kingdom of Great Britain and Northern Ireland*—G. R. B. Patterson, Senior Trade Commissioner; E. B. Gilbert (London).*United States of America*—J. B. Todd, Commercial Secretary and Trade acting Commissioner (Washington); F. R. Gullick (New York); W. D. Hardy (San Francisco).

3. **Oversea Representation in Australia.**—Consular representatives are not included in the following statement. Particulars of these are contained in a publication *Consular Representatives and Trade Commissioners in Australia*, issued by the Department of External Affairs, Canberra. There are more than 150 such representatives in Australia, and 40 countries are represented.

**DIPLOMATIC REPRESENTATIVES IN AUSTRALIA.****Ambassador Extraordinary and Plenipotentiary of—***Burma*—(Vacant); U Sain Bwa (Minister, *Chargé d'Affaires ad interim*) (Canberra U 1451).*China*—(Vacant); Dr. Chen Tai Chu (*Chargé d'Affaires ad interim*) (Canberra U 2368).*France*—His Excellency Monsieur Renaud Sivan (Canberra X 2925).*Federal Republic of Germany*—His Excellency Dr. Walther Hess (Canberra X 3575).*Indonesia*—His Excellency Dr. A. Y. Helmi (Canberra U 1221).*Ireland*—(Vacant); Mr. M. L. Skentelbery (*Chargé d'Affaires ad interim*) (Canberra J 3251).*Japan*—His Excellency Mr. Tadakatsu Suzuki (Canberra U 1251).*The Netherlands*—His Excellency Mr. A. M. L. Winkelman (Canberra U 1256).*The Philippines*—His Excellency Dr. Roberto Regala (Sydney FA 1938).*Thailand*—His Excellency Nai Konthi Suphamongkhon (Canberra, U 8101).*United States of America*—His Excellency Mr. D. M. Moffat (Canberra U 1351).**Envoy Extraordinary and Minister Plenipotentiary of—***Austria*—Dr. J. Manz (*Chargé d'Affaires*) (Canberra U 8167).*Belgium*—His Excellency Monsieur Jean Querton (Sydney FB 1325).

- Brazil*—(Vacant) ; His Excellency Senhor Q. S. de Seta (Chargé d'Affaires *ad interim*) (Canberra X 2680).  
*Chile*—Senor Don Juan Domeyko (Chargé d'Affaires) (Sydney FU 3353).  
*Denmark*—(Vacant) ; Mr. F. Henning Hergel, O.B.E. (Chargé d'Affaires *ad interim*) (Sydney BW 3547).  
*Finland*—(Vacant) ; Mr. P. I. Simelius (Chargé d'Affaires) (Sydney FM 3116).  
*Greece*—His Excellency Monsieur Dimitri N. Lambros (Canberra J 3159).  
*Israel*—His Excellency Mr. Mordekhai Nurock (Sydney BW 2082).  
*Italy*—His Excellency Signor Silvio Daneo (Canberra J 3263).  
*Sweden*—His Excellency Mr. J. Martin Kastengren (Canberra U 1421).

#### High Commissioner for—

- Canada*—His Excellency Mr. W. Arthur Irwin (Canberra U 1304).  
*Ceylon*—His Excellency Mr. P. R. Gunasekara (Canberra X 1021).  
*India*—Shri P. A. Menon (High Commissioner) (Canberra J 3209).  
*New Zealand*—His Excellency Mr. G. E. L. Alderton, C.M.G. (Canberra U 1030).  
*Pakistan*—(Vacant) ; Mr. M. A. Alvie (Acting High Commissioner) (Sydney BL 3395).  
*Union of South Africa*—His Excellency Mr. J. K. Uys (Canberra U 2370).  
*United Kingdom of Great Britain and Northern Ireland*—His Excellency Sir Stephen Holmes, K.C.M.G., M.C. (Canberra U 2211).

#### Commissioner for—

- Malta*—Captain George F. L. Stivala, O.B.E. (Melbourne MU 1291).

#### TRADE COMMISSIONERS OF OVERSEA GOVERNMENTS IN AUSTRALIA.

- Canada*—Senior Canadian Government Trade Commissioner—Mr. J. C. Britton (Sydney BW 5696-7).  
 Canadian Government Trade Commissioner—Mr. R. W. Blake (Melbourne MU 4716).  
*India*—Indian Trade Commissioner—Mr. S. V. Patel (Sydney BW 9518).  
*New Zealand*—Senior New Zealand Government Trade Commissioner—Mr. J. A. Malcolm (Sydney BL 3941).  
 New Zealand Government Trade Commissioners—Mr. R. J. Inglis (Melbourne MU 8111) ; Mr. E. J. Sutch (Sydney BL 3941).  
*United Kingdom of Great Britain and Northern Ireland*—United Kingdom Senior Trade Commissioner—Mr. H. J. Gray, C.M.G. (Canberra U 2211).  
 United Kingdom Trade Commissioners—Messrs. J. N. McKelvie and N. L. Hibbs (Canberra U 2211) ; Messrs. A. R. Bruce, O.B.E., A. Hartland, O.B.E., and L. F. Hope (Sydney BW 8086) ; Messrs. A. R. Starck, O.B.E. and K. R. Allen (Melbourne MU 5556) ; Mr. R. Fell (Brisbane B 8588) ; Mr. J. D. Leithead (Perth BA 2042).

## § 19. Retail Trade.

1. **General.**—The statistics in this section relate to the number of retail establishments throughout Australia and the turnover of these establishments.

Information of this nature was first collected in respect of the year ended 30th June, 1948 by a full Census of all retail establishments. As this was the first Census of its type in Australia its scope and the data sought were the minima consistent with the objective of securing a record of the number of such establishments, their type, their geographical distribution, their aggregate sales of goods and a simple commodity dissection together with a record of the value of certain services provided. This Census was followed by a second Census of all retail establishments trading during the year

ended 30th June, 1949, and a third Census was taken for the year ended 30th June, 1953. In this latest Census, retailers were asked to furnish more detailed information concerning the dissection of their turnover into commodity groups and questions were asked about stocks of goods on hand, the number of persons engaged in the business and credit sales.

In general terms, the Censuses covered those establishments which normally sell goods by retail in shops, rooms, kiosks and yards. Certain types of establishments which sell services by retail (including repairs and materials therein) were also included, e.g., boot repairers, hairdressers, motor garages and service stations and cafés. The Censuses included the retail sales of those factories or wholesalers who conducted a regular retail business, but excluded those who only occasionally sold goods by retail. Both new and second-hand goods were included in sales recorded by relevant retail establishments.

During the period between Censuses variations in the value of retail sales have been measured by means of quarterly sample surveys. Annual totals derived from these surveys and some of the results of the 1952-53 Census are contained in this section.

2. Value of Retail Sales in Each Commodity Group, 1948-49 to 1954-55, Australia.—The following table shows the value of retail sales of goods in each of the commodity groups specified in the years 1948-49 to 1954-55 on a comparable basis throughout. The figures for the years 1948-49 and 1952-53 were obtained from Censuses taken in respect of those years, whereas figures for the other years shown are estimates based on sample surveys.

VALUE OF RETAIL SALES : COMMODITY GROUPS, AUSTRALIA.  
(£ million.)

Commodity Group.	Year ended 30th June—

(a) Census figures.

(b) Survey figures.

(c) Survey figures revised since previous issue.

(d) Includes fresh fruit and vegetables, confectionery, soft drinks, ice cream, cakes, pastry, cocked provisions, fish, etc., but excludes some delivered milk and bread.

(e) Excludes basic building materials (e.g., timber, roofing tiles, bricks, etc.).

(f) Includes tobacco, cigarettes, etc., newspapers, books and stationery, chemists' goods, grain and produce, jewellery, office equipment, etc.

(g) Excludes farm machinery and implements, earth-moving equipment, etc.

In the foregoing table, figures for the years ended 30th June, 1949 to 1952 relate to establishments with total retail sales of £50 or more; for the years ended 30th June, 1953 to 1955 they relate to establishments with total retail sales of £500 or more. The total amount of retail sales of establishments so excluded in 1952-53 was not significant (less than 0.1 per cent. of total), and their omission does not affect the validity of the comparisons shown.

3. Takings for Certain Services, Australia.—The following table shows the amounts of "Other takings" recorded for the services specified in respect of establishments covered by the Retail Censuses of 1948-49 and 1952-53. The figures for the year ended 30th June, 1949 relate to establishments with "Other takings" of £50 or more recorded for the services specified; for the year ended 30th June, 1953 they relate to establishments

with retail sales or "Other takings" of £500 or more. The amount of "Other takings" of establishments so excluded in 1952-53 was less than one per cent. of total takings shown for Repair Work Done and Meals in Cafés, Restaurants, etc., and less than three per cent. of total takings shown for Hairdressing.

**TAKINGS FOR CERTAIN SERVICES, AUSTRALIA.**

(a) Includes value of materials used and cost of labour.

4. Number of Establishments with Sales in each Commodity Group, 1952-53, States.—The following table shows the number of establishments with sales in each of the commodity groups specified during the year ended 30th June, 1953 for each State. Many establishments recorded sales in more than one commodity group. Thus the aggregate of the number of establishments by commodity group is greater than the total number of individual establishments.

(a) All figures refer to establishments with total retail sales in 1952-53 of £500 or more. The number of establishments in each State with retail sales in 1952-53 of less than £500 but more than £100 was as follows:—New South Wales, 1,126; Victoria, 989; Queensland, 449; South Australia, 279; Western Australia, 294; Tasmania, 100; Northern Territory and Australian Capital Territory, 5; Total, 3,242.

(b) Excludes basic building materials (e.g., timber, roofing tiles, etc.). (c) Not available for publication. (d) Not available. (e) Excludes farm machinery and implements, earth-moving equipment, etc. (f) Many establishments showed sales in more than one commodity group. Thus, the number of establishments selling goods in each commodity group does not add down to the total number of individual establishments which is as follows:—New South Wales, 40,523; Victoria, 32,864; Queensland, 15,051; South Australia, 9,673; Western Australia, 7,911; Tasmania, 3,637; Northern Territory, 146; Australian Capital Territory, 180; Total, 109,985.

5. Value of Retail Sales of Goods in each Commodity Group, 1952-53, States.—The following table shows the value of retail sales of goods in each of the commodity groups specified during the year ended 30th June, 1953.

(a) All figures refer to establishments with total retail sales in 1952-53 of £500 or more. The total retail sales of the establishments with retail sales in 1952-53 of less than £500 but more than £100 were as follows:—New South Wales, £312,000; Victoria, £283,000; Queensland, £128,000; South Australia, £88,000; Western Australia, £85,000; Tasmania, £27,000; Northern Territory and Australian Capital Territory, £1,000; Total, £924,000. (b) Excludes basic building materials (e.g. timber, roofing tiles, etc.). (c) Not available for publication. (d) Excludes farm machinery and implements, earth-moving equipment, etc.

6. Number of Retail Establishments and Value of Retail Sales Classified According to Main Type of Business, 1952-53, States.—The following tables show the number of establishments and the value of retail sales made in 1952-53 in each State classified according to the main type of business. In classifying establishments by type of business, the description given by the proprietor was used as a guide but the classification was based mainly on the commodity group for which the largest item of turnover was recorded.

## § 20. The Snowy Mountains Scheme.

The following article covering the history and development of the Snowy Mountains Scheme has been contributed by the Commissioner of the Snowy Mountains Hydro-electric Authority—Sir William Hudson, K.B.E., and deals with the various phases of the Scheme under the following headings :—

1. Introduction.
2. The Snowy Mountains Scheme in relation to Australian Power and Water Resources.
3. Historical.
4. Joint Commonwealth-State action on the Utilization of the Snowy River.
5. The Snowy Mountains Act.
6. Relationships between Commonwealth and States in regard to the Scheme.
7. The Essential Features of the Scheme.
8. The Catchments and Principal Rivers of the Snowy Mountains Area.
9. Conservation of the Catchment.
10. The Hydrology of the Area.
11. The Geology of the Area.
12. Description of the Scheme—
  - A. THE SNOWY-TUMUT DEVELOPMENT—
    - (i) Adaminaby Dam.
    - (ii) The Eucumbene-Tumut Diversion.
    - (iii) Tumut Pond Dam and T1 Pressure Tunnel.
    - (iv) T1 Power Station.
    - (v) T2 Power Station.
    - (vi) Developments on the lower reaches of the Tumut River.
    - (vii) The Tooma-Tumut Diversion.

17. The Programme for the Immediate Future.
18. Summary.

Explanatory Plans and Diagrams.

Table of Principal Features.

1. Introduction.—In south-eastern New South Wales and the adjacent areas of Victoria, the Great Dividing Range rises to its highest elevation to form the central section of the Australian Alps. Snow-clad for five or six months each year, this area is the source of the westward flowing Murray and Murrumbidgee Rivers which cross dry but otherwise fertile plains stretching for hundreds of miles to the coast of South Australia. Irrigation farming on these plains is already a well-established and prosperous industry, with food and other primary production greater than in any other region in Australia, but further substantial expansion of production depends on augmenting the flow of the Murray and Murrumbidgee Rivers. The Snowy River, which receives the greatest share of the run-off from the winter snow-fields, flows in the opposite direction from the Murray and the Murrumbidgee to the near-by south-east coast, traversing an area of reliable and adequate rainfall where water is not required for irrigation.

The Snowy Mountains Scheme, begun in August, 1949, provides for the diversion of the Snowy waters through two trans-mountain tunnels to the western river systems

These diversions will give large quantities of additional water so urgently needed for irrigation. In addition, large quantities of electric power will be generated by utilizing the fall of the waters as they pass through the diversion tunnels and shafts. The additional regulated flow of irrigation water supplied by the Scheme will be nearly twice the amount diverted for irrigation from the Murrumbidgee and Murray Rivers in New South Wales during the year 1953-54. The capacity of the proposed power stations will be about 3,000,000 kW which is more than the total generating capacity installed in the whole of Australia to-day, or about one-third of the total generating capacity which will be installed in New South Wales and Victoria by the time the Scheme is completed. The location of the Scheme and its relationship to the Murray and Murrumbidgee Irrigation Areas are shown on pages 1107-8.

**2. The Snowy Mountains Scheme in relation to Australian Power and Water Resources.**—The generally dry nature of the Australian continent limits the water resources of the mainland for hydro-electric power and irrigation. There are possible sites for development on some of the coastal streams on the north-eastern perimeter of the continent and in the far north but the principal power potential lies in the central section of the Australian Alps now being developed by the Snowy Mountains Scheme. It is estimated that the total quantity of hydro-electric energy which can be developed economically on the mainland is in the vicinity of 8,500 million kWh per annum, of which nearly 6,000 million kWh will come from the Snowy Scheme.

The relatively limited extent of Australia's hydro-electric resources is of significance in determining the way in which these resources should be developed. Thermal stations are generally better suited to base load than peak load operation. Conversely, there is considerable advantage in using hydro-electric stations to take peak load, particularly in a predominantly thermal system. The stations of the Snowy Mountains Scheme are being planned on this basis. They will play a very important part in meeting the peak load of the growing New South Wales and Victorian power systems.

The principal sources of irrigation water in the States of New South Wales, Victoria, and South Australia are the Murray and Murrumbidgee River systems. The total present diversion from the Murray and Murrumbidgee Rivers and their tributary streams in New South Wales and Victoria is approximately 2,500,000 acre feet per annum, measured at the main diversion points. To this total the Snowy Scheme, with re-regulation at Hume Reservoir and at the future Blowering Reservoir, will add by diversion and regulation some 1,800,000 acre feet per annum. The contribution of the Scheme to the development of this prosperous irrigation area is therefore very significant, particularly as much of the additional water will be available within the next ten years.

**3. Historical.**—Proposals for development of the Snowy River date back to 1884. In that year, following heavy stock losses through drought in New South Wales a proposal was put forward for a limited diversion of Snowy water into the Upper Murrumbidgee. No action was taken to implement the proposal and the matter was left in abeyance until 1915 when the New South Wales Department of Public Works examined another proposal for using the Snowy River, on this occasion for the development of hydro-electric power. From the Public Works Department's investigations it was concluded that a dam at Jindabyne and an aqueduct leading to a power station on Biddi Point further downstream could provide a power capacity of 150,000 kW. Again, nothing was done and in the 1920's other schemes were put forward, one being for supplying water to Sydney.

In 1937, the Department of Public Works, assisted by oversea consultants, reviewed the possible power development which had been examined in 1915. On this occasion a more extensive scheme with an installed capacity of 250,000 kW was suggested. But, like the 1915 proposal, there was no provision for diversion of the Snowy water to the Murray or Murrumbidgee Rivers for irrigation.

All these early proposals were local developments. Most of them were for a single purpose only, either for power production or for the diversion of water.

In 1944 a dual-purpose development was proposed to the New South Wales Government, involving the diversion of the Snowy River from a reservoir near Jindabyne through a 22½ mile tunnel north-eastwards to the Upper Murrumbidgee River near Cooma. A power station of 21,000 kW capacity was planned at the downstream end of the tunnel, discharging into a storage reservoir on the Murrumbidgee formed by a dam at Billilunga. A capacity of 1,100,000 acre feet was proposed for this storage and a second power station of 25,000 kW was to be located immediately downstream of the Billilunga Dam.

4. Joint Commonwealth-State action on the Utilization of the Snowy River.—In the immediate post-war years there was urgent need for both increased electric power and increased food production. The development of the Snowy River became a matter of national importance and in 1946 the Commonwealth Government and the Governments of New South Wales and Victoria jointly initiated a further technical study of the Snowy River. This study indicated that the diversion from the Upper Snowy to the River Murray was both practicable and attractive from the viewpoint of power production. On the other hand, diversion of the Snowy to the Murrumbidgee River also possessed considerable advantages from the irrigation viewpoint.

At a Premier's Conference in August, 1947, reports on power and irrigation proposals were considered and further investigations recommended. A Technical Committee, with representatives from the Commonwealth, New South Wales and Victoria, was set up under the chairmanship of Dr. L. F. Loder, Director-General of the Commonwealth Department of Works and Housing. The Committee's main function was to obtain information necessary to make a decision on which of the alternative schemes, namely diversion to the Murray or diversion to the Murrumbidgee, should be adopted.

In its first report of November, 1948, the Committee established that the potential value of the waters of the Snowy Mountains was much greater than previously assumed. It recommended that neither of the alternative schemes mentioned in the preceding paragraph should be adopted, but that another proposal providing for the diversion of a substantial quantity of water from the Snowy, the Murray and the Murrumbidgee catchments to the Tumut River should be commenced as soon as possible. The Committee also recommended that further investigations be carried out before a decision was made on the use of the remainder of the Snowy flow. These recommendations were approved by Ministers representing the Commonwealth and the States of New South Wales and Victoria in February, 1949.

A few months later, in June, 1949, the Technical Committee presented a second report recommending that the balance of the Snowy River waters should be diverted to the Murray. This report covered the full range of the Committee's investigations, which extended far beyond the specific comparison of the original proposals and included an examination of the water resources of the whole Snowy Mountains area. The examination brought out the great significance of the Scheme and lifted it to the level of one of major national importance for both irrigation and power development. It established that, in addition to the diversion of water from the Snowy and Tooma Rivers, storages should be constructed to regulate the Tumut and Murrumbidgee Rivers so that an increased proportion of their flows would become available for irrigation in the Murrumbidgee Irrigation Area.

Ministers of the Commonwealth, New South Wales and Victorian Governments met in Canberra in July, 1949 and approved the Committee's recommendations.

5. The Snowy Mountains Act.—Since increased power production and irrigation were regarded as matters directly connected with national defence, it was decided that the construction of the Scheme should be carried out with Commonwealth resources. The urgent need to make a start on the Scheme caused the Commonwealth Government to pass the Snowy Mountains Hydro-electric Power Act in July, 1949. This Act established the Snowy Mountains Authority and cleared the way for work to begin.

The functions and powers of the Authority as defined in the Act are :—

- (a) to generate electricity by means of hydro-electric works in the Snowy Mountains Area.
- (b) to supply electricity generated to the Commonwealth :—
  - (i) for defence purposes
  - (ii) for consumption in the Australian Capital Territory.

The Authority is also empowered to sell to a State, or to a State Authority, electricity not immediately required for defence purposes or for consumption in the Australian Capital Territory.

To enable it to perform its functions, the Authority is given power to construct, maintain, operate, protect, manage and control works :—

- (a) for the collection, diversion and storage of water in the Snowy Mountains area ;
- (b) for the generation of electricity in that area ;
- (c) for the transmission of electricity generated by the Authority ;
- (d) incidental or related to the construction, maintenance, operation, protection, management or control of any works otherwise specified in the Act.

The Authority is constituted by a Commissioner appointed by the Governor-General. He is assisted by two Associate Commissioners, each of whom is also appointed by the Governor-General.

6. Relationships between Commonwealth and States in regard to the Scheme.—The constitutional rights of the Commonwealth to engage in the construction of the Snowy Mountains Scheme stem largely from the defence powers of the Commonwealth and from the Seat of Government Acceptance Act. This Act gives the Commonwealth the right to use electrical energy generated from the waters of the Snowy River and to construct works for that purpose. The defence powers of the Commonwealth are wide in their application and empower the Commonwealth Government to carry out at any time works necessary to national defence.

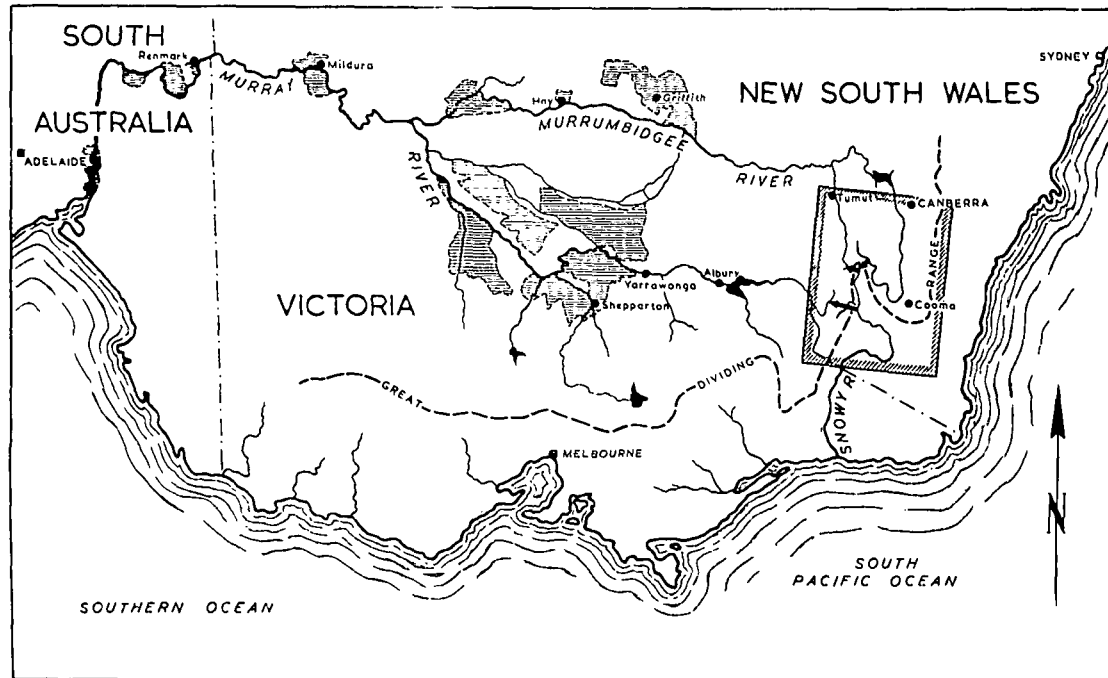

The Snowy Mountains Act will be supported by a detailed agreement between the States of New South Wales and Victoria and the Commonwealth in regard to the construction and operation of the Scheme, the distribution of power and water and other such matters. Negotiations on this agreement have reached their final stage.

The interests of the States are at present expressed through meetings of the Interim Snowy Mountains Advisory Council, on which Electricity Commissions and Irrigation Authorities of the two States are represented, together with the Commonwealth and the Authority. The Commonwealth-States agreement will provide for the continued operation of such a Council which will have power to direct the operation of completed portions of the Scheme.

The cost of constructing the Scheme is being met initially by Commonwealth funds, repayment being effected through the sale of electric power to the State Electricity Commissions. This reflects a most unusual financial arrangement determined at the Premier's Conference in 1949, namely that the cost of supplying irrigation water will be met by increasing the charges for the supply of power.

7. The Essential Features of the Scheme.—The essential features of the Scheme are the diversion of the Snowy River to the Murray and Murrumbidgee valleys for irrigation and the use of its waters, together with the regulated flow of the Tooma, Tumut and Upper Murrumbidgee Rivers, for power production.

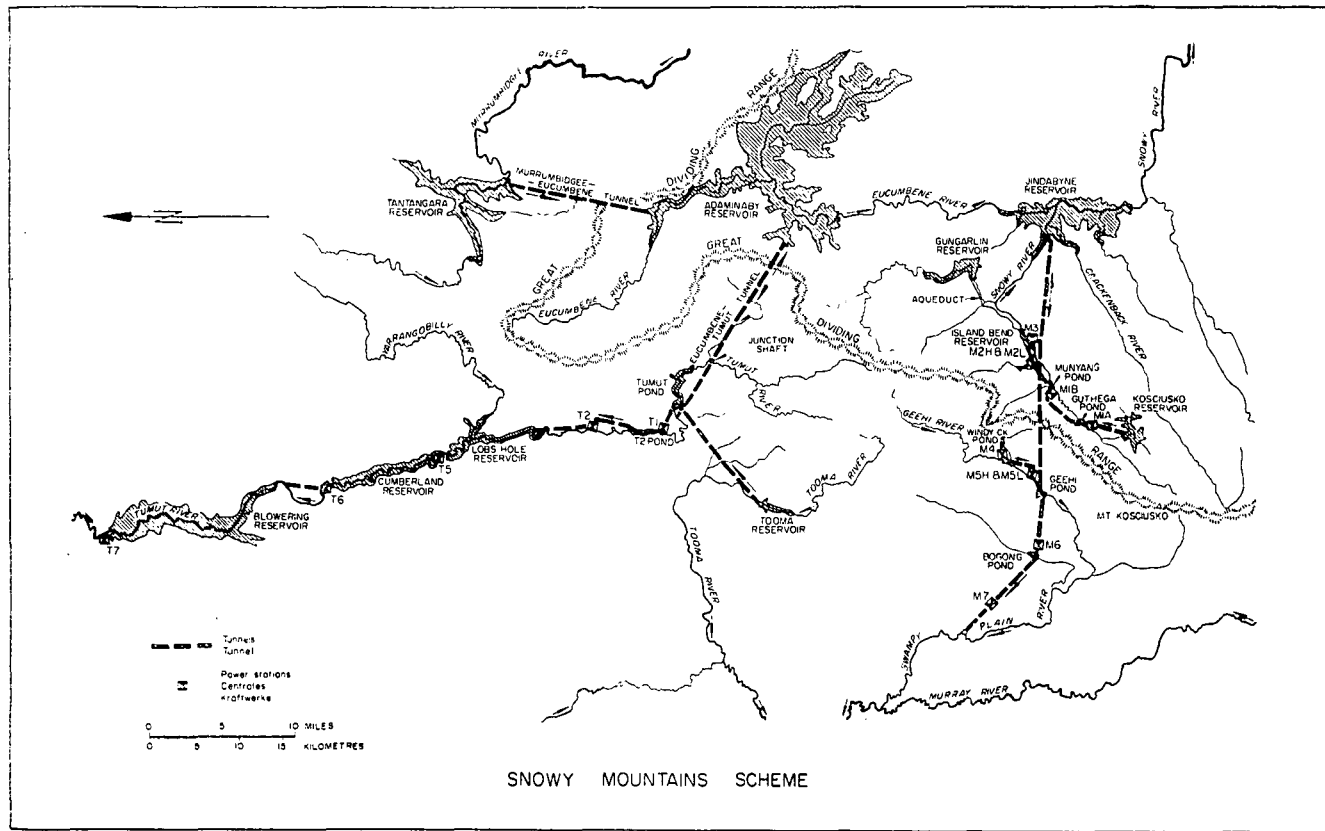

The main stream of the Snowy River will be collected in the proposed Jindabyne Reservoir and diverted through the mountains to Swampy Plains River, a tributary of the Upper Murray River. The Snowy's tributary, the Eucumbene, will be diverted from Adaminaby Reservoir to the Upper Tumut River, a tributary of the Murrumbidgee.

  - (2) NET GAIN TO MURRAY FROM DIVERSION (442,000 AC. FT./P.A.) IS TO BE DIVIDED BETWEEN N.S.W AND VICTORIA RESPECTIVELY IN THE PROPORTION 3:1.  
GAIN TO MURRAY FROM REGULATION (356,000 AC. FT./P.A.) IS TO BE DIVIDED BETWEEN N.S.W AND VICTORIA RESPECTIVELY IN THE PROPORTION 1:1.

To give increased power production and achieve the desired division of irrigation waters between the Murray and Murrumbidgee Valleys, the Upper Tooma River, a tributary of the Murray, will be diverted to the Tumut River and thence to the Murrumbidgee. A further increase in power production will be obtained by diverting the Upper Murrumbidgee River to Adaminaby Reservoir on the Eucumbene River, thence to the Upper Tumut River. The general arrangement of the works is shown in plans and sections on pages 1108, 1109 and 1110.

Storage and regulation of the waters of the Snowy, Tumut, Upper Tooma and Upper Murrumbidgee Rivers in three large reservoirs (Jindabyne, Adaminaby and Tantangara) is an important feature of the proposals. These reservoirs will assure an almost uniform total output of electrical energy from the Scheme, and will also have a considerable influence on the continuity of supply of irrigation water during drought conditions.

On the Snowy-Murray section of the Scheme the principal power stations will be M6 and M7 on the western end of the Snowy-Murray diversion tunnel. An additional four-stage development is planned, extending down the length of the Upper Snowy River and into the Snowy-Murray tunnel. The Guthega Project, completed early in 1955, is one of these developments on the Upper Snowy. On the western side of the Alps a further supplementary development is proposed leading from the upper catchment of the Gechi River down to the level of the main diversion tunnel.

The principal power stations of the Snowy-Tumut section of the Scheme will be the Upper Tumut Stations, T.1 and T.2. These will later be supplemented by the Lower Tumut Stations T.5, T.6 and T.7.

The separate features of the Scheme are described in further detail in later sections.

**8. The Catchments and Principal Rivers of the Snowy Mountains Area.**—The works of the Snowy Mountains Scheme lie in a mountainous area intersected by a series of ranges which form the boundaries between the headwaters of three main river systems, the Upper Murray, the Upper Murrumbidgee, and the Snowy. The ranges rise to an altitude of 7,313 feet at Mount Kosciusko, the higher portion of the area forming a central belt 15 to 20 miles wide, trending in a north-north-easterly direction. The western side of the area is bounded by steeply sloping fault escarpments; on the eastern side the descent is much more gradual.

On the Snowy-Murray section of the Scheme water-power will be developed from an elevation of over 5,700 feet on the upper reaches of the Snowy down to an elevation of 1,000 feet at Swampy Plains River, a tributary stream of the Murray. The Snowy-Tumut development will extend from an elevation of 3,800 feet on the Upper Tumut down to an elevation of less than 1,000 feet on the lower reaches of that river.

Much of the catchment on the northern and eastern sections of the Scheme consists of sub-alpine basins at an elevation of between 4,000 and 5,000 feet. These are partly under a cover of snow grass and native shrubs and partly in woodland. The flood plains and valley bottoms contain extensive swamp areas which contribute to the natural regulation of the snow-melt. The rivers in this area often flow for considerable distances over elevated tablelands before becoming entrenched in steep walled valleys up to 2,500 feet in depth.

A total area of 550 square miles of the catchment lies at an elevation above 4,750 feet, and an area of 750 square miles is snow covered during the winter.

**9. Conservation of the Catchment.**—The preservation of the catchment of the Snowy Mountains Area is essential not only to the operation of the Scheme but also to the continued supply of irrigation water in the Murray and Murrumbidgee valleys.

Prior to the commencement of work on the Scheme, a number of State and Commonwealth agencies were already devoting a considerable amount of study to this vital catchment area. Although disturbance of the general surface by the Authority's construction operations affects only a very small proportion of the catchment, the Authority nevertheless recognizes its interest in the conservation of soil throughout the area as a

whole. Accordingly, although the soil conservation activities of the Authority are directed particularly towards the prevention of damage from its construction operations, a good deal of attention is given to the area as a whole.

Work in this field is closely co-ordinated with that of existing agencies with responsibilities in the area, including the Soil Conservation Service of New South Wales, the Lands Department of New South Wales, the Kosciuszko State Park Trust, and the Division of Plant Industry of the Commonwealth Scientific and Industrial Research Organization.

10. **The Hydrology of the Area.**—Compared with Australian conditions generally, the most unusual feature of the precipitation in the area is the occurrence of a considerable depth of snow over much of the catchment during winter months. Summer and winter precipitation is profoundly affected by the relative altitude of the Alps and the lower areas to the west and south-east. This results in comparatively heavy snow or rainfall from moisture-laden air moving across the ranges from either of these directions. The heavy winter precipitation occurring at high altitudes on the western side of the Great Dividing Range is due to moist air from the Indian Ocean being lifted sharply in crossing the main divide. Precipitation on the eastern side of the range originates mainly from the Tasman and Coral Seas and is much more evenly distributed than the precipitation from the west. As the Snowy Mountains area benefits from both of these sources of moisture, it is less affected by the failure of either than are the adjacent areas of lower altitude.

The nature of the run-off experienced in the Snowy Mountains Area is strongly influenced by the retention of precipitation both within the snow cover which normally remains until late November and as ground water stored in the peaty areas of the higher tablelands. On the other hand, the reverse effect is apparent in certain other sections of the area where the very steep valley slopes lead to extremely rapid run-off and marked local seasonal variations in flows.

The hydrographic data on which much of the earlier study of the Scheme was based was obtained from the following river flow gauges:—

River.	Flow Gauge Location.	Period of Records.	
		From.	To.
Crackenback ..	The Creel ..	June, 1944 ..	To date
Eucumbene ..	Eastbourne ..	June, 1944 ..	To date
Indi (Upper Murray)	Bringenbrong ..	September, 1905 ..	December, 1920
Mowamba ..	Upper Bridge ..	February, 1908 ..	November, 1909
Murray ..	Bringenbrong ..	September, 1905 ..	December, 1920
Murrumbidgee ..	Yaouk ..	February, 1939 ..	December, 1945
Murrumbidgee ..	Mittagang Crossing	April, 1926 ..	To date
Snowy ..	Jindabyne ..	May, 1902 ..	To date
Swampy Plains ..	Khancoban ..	December, 1926 ..	To date
Swampy Plains ..	Bringenbrong ..	September, 1905 ..	December, 1913

Tooma ..	Warbrook ..	August, 1909 ..	December, 1920
Murray ..	Jingellic ..	1891 ..	To date

To obtain more detailed hydrographic information, the Authority has carried out an intensive programme of installation of gauges, a total of 75 having been established since the Scheme began. Records are also obtained from a further 40 gauging stations for purposes of correlation with the shorter-term readings from the gauging stations established by the Authority in the Snowy Mountains Area. Average flows to the power stations of the Scheme are set out in the appended Table of Principal Features of the Scheme (*see* page 1130).

11. **The Geology of the Area.**—The Snowy Mountains Area includes the highest and most deeply dissected parts of the Australian South-Eastern Highlands. The Area has been formed from an earlier extensive peneplain by faulting, flexuring and up-doming of the earth's crust, in a later series of movements. The final period of disturbance causing the greatest uplift occurred during the Kosciusko epoch, at the end of the Tertiary period about 1,000,000 years ago, when the mountains were raised to their present elevations.

Parts of the original land-form are still evident as plateau remnants, lying at different elevations and often abruptly separated by distinct scarps. A very marked fault-scarp descends from an elevation of over 7,300 feet in the Mount Kosciusko area to an elevation of about 1,000 feet immediately to the west. To the east the descent from the high plateau to the lower tablelands occurs more gradually, in part along the broad warped zone, and in part along a series of step-like fault escarpments. The valleys of the Crackenback River and the Upper Snowy River on the eastern side of the Main Range, and of the Geehi River and Bogong Creek on the western side, have generally straight, almost parallel, courses following along major fault zones.

The greater part of the area is composed of granitic rocks, consisting of several distinct masses of intrusive granite, and also granitic gneisses. The remainder is mainly highly folded sedimentary and metamorphosed sedimentary rocks.

A belt 4,000 feet wide and 6 miles long of highly cavernous limestone occurs in the vicinity of the Upper Yarrangobilly Valley. Limestone also occurs in the Pocket Creek area of the Tantangara Reservoir basin on the Upper Murrumbidgee River.

Scattered areas of almost horizontal flows of basalt lava of early Tertiary age, up to 120 feet in thickness, occur in the vicinity of Cabramurra, capping some of the highest ground. The basalt often overlies and protects beds of unconsolidated sand, clay, lignite and gravel, up to 300 feet in thickness. These sediments are the remnants of former extensive river valley bottom and lake deposits, over which the basalt lavas flowed.

Deposits of alluvium along the present-day streams are quite limited in extent. Within the main mountain block, where the streams are chiefly in narrow steep-sided valleys, alluvium is either absent or consists of poorly sorted boulder gravels. Fairly extensive flats containing gravel deposits occur along the more open valleys at lower levels.

The only region on the mainland of Australia in which evidence remains of glaciation is in the highest part of the Kosciusko tableland, where the Upper Spencers Creek and its tributaries occupy broad flat-bottomed valleys shaped by valley glaciers of the second stage of Pleistocene glaciation. The proposed Kosciusko Dam on Spencers Creek will be situated partly on a residual glacial moraine.

Much of the undulating plateau country, the broad mature valleys, and even most of the higher slopes of the steep-walled valleys below the plateau surface, are covered with a mantle of residual soil often of great thickness, formed by *in situ* weathering of the bed-rock. Only along the beds of actively degrading streams, and the lower 100 feet or so of the major valleys, is it common to find fresh rock exposed on the surface. This considerable depth of weathering has a marked effect on the nature and location of most of the engineering structures of the Scheme.

The Authority's team of geologists is carrying out detailed mapping, trenching, diamond drilling and seismic refraction studies. Much attention is being paid to the correlation of the geological evidence obtained by such means with actual conditions encountered during the construction of tunnels and underground works.

12. **Description of the Scheme.**—The Snowy Mountains Scheme is a complex one, both in regard to the types of engineering structures involved and the nature of the river diversions. Particular features of the Scheme are the large amount of tunnelling required, the underground location of many of the power stations and the use of very high voltage transmission lines to convey the energy produced to the load centres in

New South Wales and Victoria. This 330,000 volt transmission system will be the first of its kind in the southern hemisphere and it will form an important link between the power distribution systems of the two States.

An essential feature of the Scheme is the provision of a number of large regulating storages. While, as already pointed out, the annual snow-cover affords some retention and regulation of run-off, the flow in the rivers in the Snowy Mountains Area is nevertheless quite seasonal and it also varies considerably from year to year. For purposes of both power production and irrigation it is necessary to provide a considerable degree of regulation of run-off. The most notable storage basin available at a suitable elevation is on the Eucumbene River near the town of Adaminaby. A second large reservoir is also proposed on the Snowy River near Jindabyne, and a third major storage is planned on the Upper Murrumbidgee at the Tantangara dam site. Of these three storages, Adaminaby Reservoir is considerably the largest. The use of this reservoir to regulate the inflows from the Eucumbene, Tumut, Upper Murrumbidgee and Tooma Rivers and its use virtually to regulate the energy output from the whole Snowy development are central features of the proposals.

As previously noted, the Scheme involves two main diversions, the diversion of the main stream of the Snowy River at Jindabyne to the Upper Murray River and the diversion of the Snowy's tributary, the Eucumbene, to the Upper Tumut River. These two diversions divide the Scheme geographically into two sections, the Snowy-Tumut Development and the Snowy-Murray Development.

#### A. THE SNOWY-TUMUT DEVELOPMENT (*see plans on pages 1103-9*).

These works comprise the diversion and regulation of the Eucumbene, Upper Tooma, Upper Murrumbidgee and Upper Tumut Rivers and their combined development through a series of power stations down the length of the Tumut Valley. All four rivers have their origin in the northern section of the catchment of the Snowy Mountains Area.

To the west of the group the Tooma River, on the western side of the Dividing Range, has its origin on the slopes of the Strumbo Range, roughly 20 miles north of Mount Kosciusko. It flows generally northward for a distance of some 26 river miles before turning westwards towards its confluence with the Murray, 20 miles further downstream.

The catchment of the Upper Tumut River lies parallel to, and to the east of, the Upper Tooma catchment, being separated from it by the Toolong Range. It is drained by the Tumut River and its tributaries, the Doubtful and Happy Jacks Rivers, which combine to flow northwards, descending through a steeply sloping valley for a distance of some 20 miles before entering the more gently graded lower reaches. The Tumut River joins the Murrumbidgee River further downstream near the town of Gundagai.

The catchment of the Eucumbene River lies to the north-east of the catchment of the Upper Tumut, the boundary between the two being the Great Dividing Range. The river flows generally southwards from this area for a distance of approximately 60 miles to join the Snowy about one mile upstream from the town of Jindabyne.

Further to the north-east and across a continuation of the Dividing Range is the source of the Upper Murrumbidgee. From this area the river flows south-eastwards for some 75 miles to a point near Cooma, before turning northwards towards Burrinjuck Reservoir 120 miles further downstream.

(i) *Adaminaby Dam.* The site chosen for Adaminaby Dam, which will form the principal storage reservoir of the Scheme, is at Eaglehawk, 8 miles to the south of Adaminaby township and 20 miles upstream from the junction of the Eucumbene River with the Snowy. At this point the Eucumbene flows through a steep-sided valley ideally suited to the construction of a high earth and rock fill dam. The storage area itself is the broad basin of Buckanderra Creek which drains into the Eucumbene River near the present site of Adaminaby township. On completion of the dam, which is now under construction, a net storage capacity of 3,500,000 acre feet, which is eight times the volume of Sydney

Harbour, will be available for regulation of the Eucumbene and the diverted Tooma, Tumut and Murrumbidgee waters. The dam will be 390 feet in height and one of the highest of this type yet to be built. Its construction will involve the placing of 9,500,000 cubic yards of earth and rock fill.

Although under most circumstances the capacity of Adaminaby Reservoir is sufficient to hold the flood waters from the Eucumbene catchment, provision is being made in the case of floods of exceptional volume for water to be discharged through a low saddle on the north-eastern perimeter of the reservoir basin, into the adjacent Murrumbidgee catchment.

The reservoir will be operated initially with maximum storage level at Elevation 3810 feet, providing a net capacity of 3,000,000 acre feet during the early stages of the Scheme. At a later stage this level can be raised to Elevation 3822 feet, giving a net storage capacity of 3,500,000 acre feet. Some protective works on the emergency spillway will be constructed at that stage.

(ii) *The Eucumbene-Tumut Diversion.* The Eucumbene-Tumut tunnel, which will be approximately 14 miles in length and 21 feet in diameter, will convey Eucumbene, Tumut, Tooma and Upper Murrumbidgee waters, stored in Adaminaby Reservoir, north-westward through the Great Dividing Range to Tumut Pond. From this point they will flow down the Tumut gorge, passing through Stations T1 and T2, and later through Stations T5, T6 and T7. The tunnel will also divert surplus waters from the Tumut and the diverted Tooma Rivers in the reverse direction to Adaminaby Reservoir for storage when they are not required for immediate use.

After passing through the Eucumbene-Tumut tunnel, water drawn from Adaminaby Reservoir will discharge into a balancing reservoir at Tumut Pond which in turn will supply the heavy draw-off required for operating Stations T1 and T2 during peak load periods. The pondage will be replenished by inflow from the Eucumbene-Tumut tunnel during off-peak hours.

It has not been found practicable to carry Tumut Pond Dam up to a sufficient height to cause, under all circumstances, a reversal of flow back to Adaminaby Reservoir for storage. Provision has therefore been made for closing the north-western end of the Eucumbene-Tumut tunnel by means of a valve to divert the Tooma and Tumut waters directly into the tunnel from higher levels. When this is necessary, water from the Tumut river will enter the tunnel by a 300 feet shaft constructed at the confluence of the Upper Tumut and Happy Jacks Rivers. This shaft is also a point of access for the construction of the Eucumbene-Tumut tunnel.

Approximately 40 per cent. of the length of the tunnel will be driven through granite, and 40 per cent. through metamorphosed sedimentary rocks. The remaining 20 per cent. will pass through varied cherts, andesites, slates, etc.

(iii) *Tumut Pond Dam and T1 Pressure Tunnel.* Tumut Pond Dam at the north-western end of the Eucumbene-Tumut tunnel will be a concrete arch structure 290 feet in height and 650 feet in crest length, providing a gross storage of 43,000 acre feet. Full supply level will be at Elevation 3800 feet. The dam site is in a V-shaped gorge with relatively sound granite outcropping on both abutments. The spillway, located on the right abutment of the dam, will be controlled by two radial gates with a total discharge capacity of 68,000 cusecs. River outlets of 7,000 cusecs capacity will also be provided in the dam.

Immediately downstream from Tumut Pond Dam the river enters a steep-sided rocky valley looping westwards and then eastwards, and descending a vertical distance of 954 feet in a total of 7.6 river miles to the site of the outlet of the tailrace tunnel from Power Station T1. Water from Tumut Pond storage will flow through a pressure tunnel 8,000 feet long by 21 feet in diameter, to a surge chamber immediately above T1 Power Station.

(iv) *T<sub>1</sub> Power Station.* Station T<sub>1</sub> will be located in an underground chamber excavated in granite 1,200 feet below ground level, immediately downstream of the underground surge chamber at the end of the T<sub>1</sub> pressure tunnel. The extremely rugged nature of the Tumut Valley in this area and the relative instability of the weathered material on the valley slopes above, made it impossible to locate the power station on the surface.

Twin vertical pressure shafts 12 feet in diameter will lead down from the surge chamber for a vertical distance of 800 feet to the turbo-generators in the power station gallery. From the turbines the water will enter a 4,000 feet tailrace tunnel leading back into the Tumut River further downstream. This underground station is typical of a number of similar stations proposed for the Scheme. It closely follows present day European and Scandinavian practice for underground power stations in country of this nature.

The power station machine hall will be a chamber 305 feet long by 59 feet wide with a maximum height of 105 feet. Access will be through a 1,340 feet long vehicular tunnel on a 1 in 8 grade, or alternatively by a 1,200 feet personnel access lift.

The four turbo-generators to be installed in T<sub>1</sub> Power Station will have a total capacity of 320,000 kW, and will operate under an average net head of 1,050 feet. The flow through the station when operating on full load under average head will be nearly 4,200 cusecs.

Power will be delivered from the generators at 12,500 volts to a bank of underground transformers which will raise the voltage to 330,000 volts. From the transformers, power will be led through high tension cables to the surface and across a bridge to the left bank of the Tumut River. High voltage overhead lines will take the power from this point to a central switching station high on the right bank of the Tumut River, then on to load centres in New South Wales and Victoria.

(v) *T<sub>2</sub> Power Station.* Station T<sub>2</sub> will utilize the water discharged from Station T<sub>1</sub>, developing a gross head of 935 feet between the outlet from that Station and the upper end of the future Lob's Hole Reservoir.

The outflow from Station T<sub>1</sub> will be impounded by a dam 140 feet in height, located 1.4 miles downstream from the outlet from T<sub>1</sub> tailrace tunnel. The net available storage capacity of the pondage will be 1,350 acre feet. From this pondage a tunnel will lead for a distance of 15,700 feet to a point on the right bank of the Tumut River near its junction with Eight Mile Creek, where Station T<sub>2</sub> surge chamber will be constructed. The water will be led from the surge chamber through two sloping pressure shafts to an underground power station located 650 feet beneath the surface. The Station will comprise four turbo-generators, each of 70,000 kW capacity, giving a total capacity of 280,000 kW. After passing through the turbines the water will be discharged into a tailrace tunnel 19,000 feet in length leading back into the Tumut River at the head of the future Lob's Hole Reservoir.

Both the headrace and the tailrace tunnels will be concrete lined and 21 feet in internal diameter. The headrace tunnel will be entirely in granite. The tailrace tunnel will also be mainly in granite, but near its lower end it will cross through a regional contact between granites and sediments.

The power station chamber will be excavated in granite. Its machine hall will be approximately 300 feet long, 55 feet wide and 100 feet maximum height. Access will be gained by a sloping vehicular tunnel, and by a lift shaft. As in the case of Station T<sub>1</sub>, the high voltage transformers will be placed underground, power being brought from them to the surface by high tension cables.

(vi) *Development on the lower reaches of the Tumut River.* Downstream from Station T<sub>2</sub> the further development of the Tumut River will take the form of a series of three reservoirs, with a power station immediately downstream of the dam in each case.

The first of these developments will be the T5 Project, which includes Lob's Hole Reservoir. This reservoir will be formed by an earth and rock fill dam some 240 feet in height and will extend down the Tumut Valley from the outlet from Station T2 for a length of 9.6 river miles. The total storage capacity of the reservoir will be 104,000 acre feet. Station T5 will be located immediately downstream of the dam and will have an installed capacity of 180,000 kilowatts operating on an average net head of 220 feet.

Downstream from Station T5 the next reservoir will extend for 12.7 river miles along the Tumut Valley to Cumberland Dam. The dam will be an earth and rock fill structure some 300 feet in height, located about 6.4 river miles upstream from Talbingo. Power Station T6 at the foot of Cumberland Dam will have an installed capacity of 230,000 kW. Under the present proposals, the station will be located underground with a 21,000 feet tailrace tunnel leading downstream to the head of the Blowering Reservoir, the third storage of the group.

Blowering Reservoir will function primarily to store water passed through the Upper Tumut projects during the winter, and to hold it for release to the Murrumbidgee River during the summer irrigation season. It will be an earth and rock fill embankment approximately 250 feet in height. The total storage capacity of Blowering Reservoir will be in the vicinity of 860,000 acre feet. Full supply level will be at Elevation 1,200 feet. Station T7 at the foot of Blowering Dam will utilize these releases for power production. It will have a capacity of 60,000 kW on an average net head of 200 feet.

(vii) *The Tooma-Tumut Diversion.* The function of the Tooma-Tumut Diversion will be to provide additional water to the series of power stations on the Tumut River and to divide the additional irrigation water to be supplied by the Scheme between the Murray and Murrumbidgee Rivers in the required proportions.

Diversion of the Upper Tooma River will be from a reservoir at a point near its confluence with Toolong Creek. The proposed Tooma Dam will be an earth and rock fill structure with full supply level at Elevation 4,000 feet. The height of the embankment will be approximately 220 feet and the net storage capacity of the reservoir 22,000 acre feet. From this reservoir a tunnel will lead north-eastwards for a distance of about 9 miles to the Tumut River at Tumut Pond. The tunnel will be in granite for most of its length and will be excavated to a section equivalent of 14 feet diameter. At intermediate points along the length of the tunnel tributary streams of the Tooma will be diverted through shafts into the tunnel to supplement the main diversion. The quantity of water diverted from the Tooma catchment will average approximately 285,000 acre feet per annum.

Provision will be made for the diversion of Tooma water either into Tumut Pond or alternatively directly into the Eucumbene-Tumut tunnel on the Eucumbene side of the main control gate at the Tumut Pond end of that tunnel. The latter procedure will enable the whole head available between Tooma Reservoir and Adaminaby Reservoir to be utilized, thus ensuring the diversion of the maximum quantity of Tooma water to storage in Adaminaby Reservoir.

(viii) *The Murrumbidgee-Eucumbene Diversion.* Under the original plans, prepared by the Commonwealth-States Technical Committee, it was proposed to divert the Upper Murrumbidgee River westwards into the Yarrangobilly Valley, and then to the Tumut River at Lob's Hole. Two power stations were to be built, developing the full available head between the Upper Murrumbidgee and the Tumut River. It is now proposed to amend that lay-out by diverting the Upper Murrumbidgee southwards into Adaminaby Reservoir on the Eucumbene River. Under the latter arrangement, Murrumbidgee water will pass through Adaminaby Reservoir and augment the flow through power stations T1, T2, T5, T6 and T7 on the Tumut River.

The dam on the Upper Murrumbidgee, known as Tantangara Dam, will be located at the Gulf where the river leaves a wide basin and enters a narrow gorge. It will be approximately 200 feet in height. The reservoir will have a net storage of about 500,000 acre feet.

The tunnel through the Main Divide from Tantangara Reservoir to Adaminyabey Reservoir will be  $9\frac{1}{2}$  miles long. Its route passes through alternating granites and sediments, the maximum depth of rock over the tunnel line being 1,500 feet. It will be approximately 10 feet by 12 feet in section.

The average quantity of water diverted from the Upper Murrumbidgee will be approximately 230,000 acre feet per annum.

B. THE SNOWY-MURRAY DEVELOPMENT (*see plans on pages 1108 and 1110*).

The principal feature of the Snowy-Murray Development is the diversion of the main stream of the Snowy River at Jindabyne by tunnels, totalling nearly 30 miles in length, westwards through the Great Dividing Range into the Swampy Plain River in the catchment of the Upper Murray River. A balancing pondage will be constructed at the point where the tunnel route crosses the Geehi River, a headwater tributary of the Murray. From this pondage down to the lower Swampy Plain River the diverted Snowy water will fall about 2,000 feet, developing in two power stations approximately 1 million kW. The outflow from the last of these stations will pass into a regulating pondage on the lower Swampy Plain River before flowing into the Upper Murray and on to the Hume Reservoir.

Associated with the main Snowy-Murray Diversion are the power developments of the Upper Snowy River and the Upper Geehi River. The Upper Snowy group will comprise a series of four power projects, utilizing the fall in the waters of the Snowy River from Kosciusko Reservoir at Elevation 5,770 feet to Island Bend at Elevation 3,930 feet, then down a 1,100 feet shaft into the main Snowy-Murray tunnel. One of these developments, the Guthega Project, came into operation in February, 1955.

On the western side of the Divide, developments on the Upper Geehi will similarly utilize the upper reaches of that river from an altitude of 5,190 feet through a series of three power stations down to the level of the Geehi Pondage.

(i) *Jindabyne Dam*. The Snowy River emerges from the mountains into a broad open valley some 5 miles upstream from the town of Jindabyne. Immediately below the town, the valley again narrows and from that point southwards to the sea its course is generally through hilly and rather rugged country. Jindabyne Dam, which will impound the Snowy River and divert it westwards under the main range into the Murray catchment, will be located about one mile downstream from the present township. The storage area will cover the whole of the Jindabyne basin and extend upstream above the junction of the Crackenback River with the Snowy. The dam will be an earth and rock fill embankment, 275 feet in height, impounding a net storage of 1,100,000 acre feet.

(ii) *The Snowy-Murray Tunnel (Jindabyne to Geehi)*. The first section of the Snowy-Murray tunnel, leading from Jindabyne Reservoir under the Dividing Range to Geehi Pond, will be 19 miles in length, the longest single tunnel in the Snowy Mountains Scheme. The cross-section dimensions of the tunnel have yet to be determined but it is expected that its diameter will be in the vicinity of 20 feet. Where it passes beneath the crest of the Dividing Range the tunnel will be about 3,800 feet below surface level.

At Island Bend, about half way along the length of the tunnel, the route crosses beneath the Snowy River and at this point the tunnel will be intercepted by a shaft about 1,100 feet in depth. The shaft will serve as a point of access for the construction of the tunnel. In addition it is probable that Station M3 will later be built into the base of the shaft, to generate power from the Upper Snowy waters as they pass from the shaft into the Snowy-Murray tunnel.

(iii) *The Snowy-Murray Tunnel (Geehi to Swampy Plain)*. The section of the development between Geehi Pondage and Swampy Plain River is still under investigation and therefore can only be described in general terms. There are a number of possible

alternatives. One of these developments is that suggested by the original Commonwealth-States Technical Committee in its examination of the Scheme (see plans on pages 1108 and 1110).

This proposal involves a two-stage development, the first section, which includes M6 Power Station, utilizing about 975 feet of head between Geehi Pond and a pondage on Bogong Creek. The second section, which includes M7 Power Station, extends from the Bogong Creek pondage to the lower Swampy Plain River. Under this proposal, both Stations M6 and M7 would be located underground.

To supplement the flow of the diverted Snowy and Geehi Rivers, it is proposed to divert part of the run-off from the western slopes of the Great Dividing Range by means of a series of surface aqueducts and tunnels.

13. *Operation of the Scheme and its Relationship to the Thermal System.*—The future electric power installations on the mainland of Australia will be predominantly thermal or possibly thermo-nuclear installations. When compared with future requirements, the amount of hydro-electric energy that can be developed is very limited. It is important, therefore, to make the most of our hydro-electric potential by using it to the utmost advantage.

(i) *The Load Factor of the Hydro Stations.* In an electrical system in which the greater part of the energy is generated in thermal plants, it is usually found that the hydro installations operate to the best advantage on peak load. In a hydro installation the increase in energy cost with reduction in load factor is much less marked than for thermal plants, and as the load factor decreases the economy of hydro plant becomes increasingly favourable compared with that of thermal plant.

There are a number of reasons for this. One, from the operation viewpoint, is that thermal units are not well suited to a constantly varying output. It is not always possible to predict the exact time of day at which the peak of the load will occur. Therefore, if the peak is to be taken by thermal units it is necessary for these units either to remain on stand-by, in which case there are unavoidable heat losses, or for the plant to operate on part-load in readiness to meet the peak when it occurs. In either case this type of operation is not conducive to efficiency. Hydro units, on the other hand, are well adapted to following the very rapid changes in load which occur during peak hours. The combined use of thermal and hydro equipment, with the former operating on virtually constant output and the latter adjusting itself to varying load, is the ideal arrangement.

This general conclusion must be qualified to take into account a number of factors which can influence the desirable inter-operation of hydro and thermal plant in any particular case. For instance, the relative cost of production of energy as between old thermal plant and new thermal plant is of particular significance in the case of the New South Wales and Victorian generating systems at the present time. Recent technical developments in thermo-electric generation have brought about a considerable improvement in efficiency, with a consequent marked difference between the cost of energy from new and from old plant. The existing New South Wales and Victorian systems comprise a proportion of relatively old and less efficient installations, generally situated in the metropolitan area, and utilizing relatively expensive transported fuel. These installations operate in conjunction with a proportion of newer, more efficient equipment, generally situated close to the coalfields. While it may always be desirable to have a limited proportion of the thermal generating capacity located in metropolitan areas and therefore operating with higher cost fuel, the future trend will be to concentrate the bulk of the thermal generating plant outside metropolitan areas and close to the fuel source. For the time being, however, and as long as a considerable proportion of existing older type metropolitan plant remains in operation, there will be an incentive to use this equipment on peak load in the interests of fuel economy. While this situation obtains it is desirable for any hydro stations introduced into the system to operate on a rather higher load factor than would otherwise be the case, leaving the relatively expensive thermal plant to take the extreme peak load until it is finally withdrawn from service.

Two factors contribute to making this state of affairs a relatively short-term one. Firstly, much of this older-type plant is reaching the end of its economic life and will be withdrawn progressively over the next 10 or 15 years. Secondly, the system load is increasing at a very rapid rate, more than doubling itself every 10 years. The proportion of the peak load which the existing high-cost metropolitan stations can take is therefore rapidly decreasing. As the load increases and the proportion of the peak taken by these thermal stations becomes progressively less, a larger section of the peak load will require to be taken either by relatively new thermal installations or preferably by hydro plant. Hydro-electric developments such as those at Kiewa, Eildon and Hume now under construction by the State Electricity Commissions will contribute to meeting the peak load, but these are limited in total capacity. The hydro stations of the Snowy Mountains Scheme will be relied upon principally for this function in the future.

To utilize the potential of the Snowy Mountains Scheme most effectively, it is proposed to arrange the order of development so that the early stations will operate initially somewhat below the peak of the system load, with a progressive change to predominantly peak load operation as construction proceeds and as the load increases in magnitude.

(ii) *Regulation of energy output by storage reservoirs.* It is desirable, under most circumstances, for the day by day output of electrical energy from the Scheme to be reasonably constant. As there is a marked seasonal variation in the flow in the rivers of the area, considerable emphasis has been placed on the construction of very large storages, notably at Aaminaby and Jindabyne, to reduce the effect of these variations. Certain of the power stations will necessarily operate on inflows not regulated by the main storages and the output from these stations will vary considerably. A feature of the design and the proposed operation of the Scheme, however, is that the variable output from these stations on uncontrolled streams will be balanced by corresponding variations in the output of other stations operating on flows controlled by the main reservoirs. In this way the total output from the Scheme will be kept almost constant, and the energy delivered from operating stations on uncontrolled streams will, in effect, be regulated by the main storages. This method of operation, which shows a marked change from that envisaged by the original Commonwealth-States Technical Committee, will not only considerably increase the quantity of electricity the Scheme can guarantee to its customers, but it will also greatly improve the irrigation value of the Scheme.

(iii) *Transmission of energy from the Scheme.* The Snowy Mountains Scheme is situated geographically about midway between the principal load centres of Sydney and Melbourne and, as already mentioned, will be connected to these centres by high-tension 330,000 volt transmission lines. It will consequently be in a strategic position to take advantage of the diversity in the power requirements of these two load systems, a most important factor in so far as it affects the economy of operation of the supply systems of the two States.

Although, as already indicated, most of the output from the Scheme will go to the States of New South Wales and Victoria, the Commonwealth Government also has rights, vested in the Seat of Government Act, to draw from the Scheme its requirements of power and energy for the Australian Capital Territory and for defence purposes. For convenience, the Commonwealth share of power and energy will be drawn from the New South Wales transmission network by an exchange arrangement between the Commonwealth and the Electricity Commission of New South Wales. The remaining power and energy from the Scheme, after fulfilling the Commonwealth rights, will be divided between the States of New South Wales and Victoria in the average ratio of 2 : 1.

**14. Irrigation Features of the Scheme.**—Since the inception of the Scheme, the diversion of the waters of the Snowy River inland to supplement irrigation developments in the Murray and Murrumbidgee river valleys has been regarded as one of its primary features.

The irrigation at present carried out in the valleys of the Murray and Murrumbidgee Rivers provides a considerable proportion of the total Australian irrigation production, but further increases are strictly limited by the availability of additional water.

The supply to Victorian irrigation schemes has been increased in recent years by additions to the storage capacity of Hume Weir and by the construction of the enlarged Eildon Dam and storages at Cairn Curran and elsewhere. Amplifications of supply are now reaching their limit and there is very little room for further large scale addition to the supply of irrigation water in Victoria other than by the diversion of the Snowy River.

The New South Wales irrigation areas on the Murray River, which will also benefit from the additional capacity being provided at Hume Reservoir, have not reached the same critical stage, but the position in the Murrumbidgee Irrigation Area is similar to that in Victoria. On the Murrumbidgee River and its tributaries, the principal works in progress or in prospect are the provision of increased storage capacity at Burrinjuck Reservoir and the proposed control works at Menindee Lakes. The latter works will provide a considerable part of the New South Wales quota of the South Australian share of Murray water, and will thereby increase the amount of water which may be diverted for use in the Murrumbidgee Irrigation Area further upstream. On the completion of these works, however, there will be little possibility of further significant increases in irrigation development in the important Murrumbidgee Irrigation Area other than by the supply of additional water from the Snowy Scheme.

The total additional regulated supply of irrigation water in the Murray and Murrumbidgee Rivers, directly resulting from the operation of the Scheme and the re-regulating storages, will be approximately 1,800,000 acre feet per annum, or an increase of 70 per cent. on the total present diversions from these rivers and their tributary streams in the States of New South Wales and Victoria. The increase in New South Wales will be more than 150 per cent. on the present diversions from the Murrumbidgee and Murray Rivers in that State.

The additional regulated irrigation water to be supplied to the State of Victoria will probably be used largely to provide for more intensive development of areas already reticulated with channels and served from the diversion weirs at Yarrawonga and Torrumbarry. There will be some extension of channels to high quality lands adjoining existing irrigation districts and some further developments by pumping from diversion points along the river.

The New South Wales Government has for some time been carrying out studies on soils, drainage and other matters which could affect the use of the additional waters in the Murrumbidgee Valley from the Snowy Scheme. It is understood that special attention is being given to the Billabidgee area between the Murrumbidgee and Billabong Creek, and to the country north of the Murrumbidgee between Griffith and Hay. Extensive work on distribution canals and preparation of land will be required in the immediate future if advantage is to be taken of the additional irrigation water which will shortly be available.

The value of increased irrigation production resulting from the additional supplies of water to be provided by the Scheme will amount to nearly £30,000,000 per annum based on present-day figures. It will have a very marked effect on stabilizing rural production in the irrigation areas of the Murray and Murrumbidgee Valleys and will substantially increase export revenues.

Apart from the direct diversion of new irrigation water from the Snowy River, a considerable advantage will be gained from the regulation afforded to the Snowy, Eucumbene, Tooma, Tumut and Murrumbidgee Rivers by the operation of the Scheme. As previously mentioned, the development is being so designed that the total output of energy is reasonably constant from season to season, and from year to year. With the method of operation now proposed in which the stations supplied from the main storages will balance the varying output from the stations on uncontrolled rivers, the actual releases of water from the principal reservoirs will be greater in dry seasons than in wet seasons. In the case of Adamina Reservoir this effect could extend over several years.

For the fullest advantage to be taken of the outflows from the power stations, it is essential that releases during the winter months be held for use during the summer

irrigation season. As already indicated, it is proposed to accomplish this by means of re-regulation in the enlarged Hume Reservoir on the Murray River and in the proposed Blowering Reservoir on the Lower Tumut River.

Blowering Reservoir will have a storage capacity of some 860,000 acre feet. This will be sufficient to retain almost the whole of the releases from the Snowy-Tumut section of the Scheme during the non-irrigation months. The construction of Blowering Reservoir will be undertaken by the Water Conservation and Irrigation Commission of New South Wales.

The principal diversions and the allocation of additional regulated irrigation water between the States of New South Wales and Victoria are shown diagrammatically on page 111. It is noted that there will be a period during the early stages of construction of the Scheme during which the Tooma-Tumut diversion will be in operation prior to the completion of the compensating Snowy-Murray diversion. During these initial years the diverted Tooma water will be regarded as a part of the share of the State of New South Wales in the waters of the Murray River. In effect this share of the Murray water will become available to New South Wales as additional water in the Murrumbidgee River instead of as a part of the New South Wales allocation of Murray water. In relatively dry years, this diverted Tooma water will probably be used to meet part of the New South Wales quota of the water required to flow down to South Australia.

On completion of the Snowy-Murray Diversion, water turned into the Murray will more than compensate for the Tooma Diversion.

In the formal Agreement between the States of New South Wales and Victoria and the Commonwealth Government now being negotiated provisions are included which will assure the two States of increases in the supply of water during the initial as well as in the final stages of the Scheme. Thus, during a declared period of water supply restrictions in the Murray Valley, the Irrigation Commission of New South Wales will be able to call for releases of water from Adamaby Reservoir via the Tumut River, sufficient in quantity to compensate fully for the effect of the diversion of the Tooma River from the Murray catchment to the Murrumbidgee catchment. This provision will not apply after the completion of the compensating Snowy-Murray Diversion. It will then be replaced by a similar provision which will ensure certain minimum releases of additional water into the Murray River during periods of restriction. A further provision will assure the State of New South Wales of certain minimum releases from Tumut River stations at all stages of the Scheme.

A principle was established at the Premier's Conference in 1949 that the cost of providing irrigation water from the Scheme would be defrayed by charges for power. Although the considerable increase in interest rates since that time has added greatly to the annual charges to be carried by the Scheme insistence on the application of this unusual principle has been maintained. It is estimated that over £60,000,000 of the cost of the Scheme is attributable to the provision of irrigation water. In this respect the arrangements for financing the Snowy Mountains Scheme differ considerably, and much to the Snowy Scheme's disadvantage, from those of other notable dual-purpose power and irrigation developments constructed overseas in recent years, particularly in the United States. It has generally been considered in such developments that the costs attributable to irrigation works should be treated separately. This is the present policy in the case of irrigation headworks constructed by the State Irrigation Commissions in Australia. Most of the cost of these structures will also ultimately be met from public revenues. In the case of the Snowy Scheme, however, it is proposed that the whole cost of the irrigation features of the Scheme will be financed by the sale of power.

The first release of new irrigation water from the Scheme will become available on completion of the Eucumbene-Tumut tunnel late in 1959. Before that date, the water of the Eucumbene River, a tributary of the Snowy, will have been stored in advance of the diversion for a period of approximately  $1\frac{1}{2}$  years. On the present construction programme, the main stream of the Snowy River at Jindabyne will be impounded in 1965 and diversion of the Snowy to the Murray will be accomplished in 1966. By that date

most of the additional irrigation water from the Scheme will be available. If the construction of distribution systems in the irrigation areas has kept pace with the construction of the Scheme a very great increase in irrigation production in the Murrumbidgee and Murray areas will then be apparent.

15. *Defence Aspects of the Scheme.*—The joint State-Commonwealth action to initiate construction of the Scheme in 1949 was prompted by the urgent need to build up power resources and primary production in the interests of national defence. The lag in construction of new generating plant during the war years has not yet been overtaken, and it is evident that provision of adequate power for industry will continue to be a problem for many years to come.

In addition to its general contribution to power and irrigation production, the Scheme has certain features which add considerably to its value from the defence viewpoint. The experience of the 1939-45 War has shown that thermal power stations are particularly susceptible to damage under light as well as heavy attack, because much of the equipment can be put out of service relatively easily. The damage which would result to thermal power stations in exposed positions on the coastline or near the main cities in a concerted attack with modern weapons could be very great indeed. On the other hand, the strategic location of the Scheme in a mountainous region, distant from the coastline, would make a concerted attack difficult to carry out. The power stations are mainly sited in deep underground galleries and it is most unlikely that they would be affected by any form of aerial bombardment. The tunnels, too, would be relatively safe.

With regard to the water storages on the Snowy Scheme, it was the experience of the last war that a systematic attack on dams could bring about their destruction. In the case of relatively low-head hydro schemes, the destruction of headworks reservoirs would effectively put such stations out of operation, but in the case of high-head developments such as those of the Snowy Mountains Scheme the destruction of reservoirs would merely result in a reduction in the amount of controlled energy; it would not result in the stations being put completely out of service.

The position of the Scheme midway between the two main load centres of Sydney and Melbourne is of particular significance as the output from the Scheme could be used to support the load in either of these centres if one of them suffered war damage. The transmission lines also traverse areas in both States suitable for the establishment of dispersed industries.

Although the design of the Scheme is based largely on economic and geographic considerations, it is very similar in many respects to certain recent European and Scandinavian developments which have been designed with protection against damage from modern weapons as a primary consideration. The power potential of the Scheme is certain to play an essential part in future national defence planning.

16. *Progress already achieved on the Scheme.*—During the six years since the passing of the Snowy Mountains Act, the Authority has established an organization comprising a staff of approximately 1,060 officers, including 340 engineers, geologists, physicists, soil conservationists and other professional men, many recruited overseas. It has erected three new townships and a number of large construction camps, involving the establishment of 800 houses, messes, hostels, office buildings, shops, stores, recreation facilities, water and electricity supplies, workshops, and probably the largest civil engineering laboratories in Australia.

About 100 miles of public roads have been reconstructed. One hundred and ten miles of new heavy duty roads and 150 miles of light roads and access tracks have also been built. A feature of the Authority's roadwork has been the opening up of a potentially valuable tourist and recreation area. It is believed that some of the Authority's new roads will later form important links in the inter-state transport systems of New South Wales and Victoria. In particular, the Alpine Way now being constructed across the Main Divide within five miles of Mount Kosciusko will traverse an alpine scenic area unequalled in Australia.

Following the opening up of the area by the construction of roads, two regional townships were established, one at Island Bend in the southern section of the Scheme and one at Cabramurra in the northern section. These served as bases for further preliminary works. A system of radio and telephone communications and a construction power network had to be established throughout the Area. Much of this early work was carried out during winter conditions when snow and low temperatures made working very difficult.

The original Snowy River Committee had only a very short time in which to carry out the preliminary investigation and planning of the Scheme. It was also seriously handicapped by lack of data. Access for surveys was difficult and much of the work had to be based on aerial photographs and unreliable maps. The available hydrological records were also limited. It was necessary, therefore, for the Authority to confirm the work of the Committee and extend it in much greater detail. With the objectives of generation of power and diversion of irrigation water at the earliest possible time, the Authority began an intensive programme for the collection and analysis of field data. Unsurveyed country had to be mapped and hydrological and geological information had to be gathered, all in mountainous country, some of which was inaccessible except on foot and by pack horse.

Due to the comprehensive nature of the Scheme it was necessary to investigate on broad lines the whole of the development and its inter-related components before any section could be designed in detail. This work involved, amongst other things, a study of the inter-operation of the stations of the Scheme with those of the State thermal systems, and an analysis of the effect of the proposed diversions on the availability of irrigation water in the Murray and Murrumbidgee Rivers. The problem of integrating the operation of the components of the Scheme was one of considerable complexity, requiring consideration of a large number of power stations, storages and diversions.

General investigations of the whole Scheme had to be followed closely by studies to determine the basis for the development of each project, and the detailed investigation of the sites of proposed structures. Designs followed the detailed investigations and by August, 1951, construction had commenced on the first of the Authority's power projects, the Guthega Project.

Faced with the problems of building up a large organization and commencing major construction work at the earliest possible date, the Authority sought and obtained the assistance of the Bureau of Reclamation of the Department of the Interior, United States of America, in the preparation of designs and specifications. The Bureau with its 50 years of experience in the construction of reclamation works by contract, was in a unique position to advise the Authority, to give technical assistance in the preparation of designs and specifications and to advise on staff training. This technical assistance enabled the Authority to proceed with confidence and to achieve a much greater rate of progress than would otherwise have been possible. In addition to the preparation of designs and specifications for about two-thirds of the Authority's contracts and the training of the Authority's staff on large construction works in the United States, the Bureau of Reclamation has also made available the services of a group of experienced engineering advisors who are now resident in the Snowy Mountains Area.

The first section of the Scheme chosen for construction was the Guthega Project on the Upper Snowy River. This project was selected because it offered the possibility of developing power within a comparatively short space of time. It could also be undertaken with much less preparatory work than would have been required in the case of the other larger projects. Construction began in August, 1951, and proceeded through winter and summer until its completion in February, 1955, when the first power from the Scheme was fed into the New South Wales transmission system. The civil engineering work was carried out by the Norwegian firm, Selmer Engineering Pty. Ltd.

Because of the acute shortage of manpower when the project was commenced, the contract specifications required the successful tenderer to import 90 per cent. of his labour and staff, and all materials then in short supply in Australia. About 400 Norwegians

were brought to Australia to work on the project. Later, when the labour market improved, numbers were supplemented by the employment of Australians, particularly for tunnelling.

The Guthega works area is at an elevation of approximately 5,200 feet and is only 8 miles from the summit of Mount Kosciusko. It is normally under snow from May to October, falls of over 3 feet being quite common. Low temperatures and snow condition added greatly to the difficulty and hazard of the work.

The Authority's own forces have constructed more than 84,000 feet of concrete aqueducts to divert additional waters from downstream of the works into the Guthega pondage and the surge chamber. As the elevation and the exposed position of these aqueduct lines makes winter construction uneconomic, if not impossible, the work is carried out in the summer in conjunction with a winter programme of road building and other work at lower elevations.

The Authority has constructed 47 miles of 132,000 volt lines from Guthega Power Station to Cooma and over 100 miles of 66,000 and 11,000 volt lines for distribution of construction power within the area.

Adaminaby Dam, on the Eucumbene River is being designed and constructed for the Authority by the Public Works Department of New South Wales. Construction on a large scale commenced in 1953. More than 220 homes and several barrack blocks for employees have been erected in the works township of Eaglehawk, adjacent to the site of the dam. The 2,300 feet long by 25 feet diameter diversion tunnel around the dam site was completed in 1955 by Allied Constructions Pty. Ltd., as sub-contractors to the Public Works Department. Stripping of the abutments of the dam and foundation consolidation grouting were completed by the Department in 1955, permitting a commencement to be made on the placement of earth and rock fill immediately after the diversion of the river. Tenders closed in March, 1956 for the construction of the major part of the embankment and a contract was placed in May with the Kaiser-Walsh-Perini-Raymond group of American contractors. Storage of the Eucumbene River behind the partially completed wall is scheduled to begin by mid-1957. The dam will be completed in 1959.

The deviation of the Snowy Mountains Highway, formerly the Monaro Highway, around the eastern side of Adaminaby Reservoir has already been almost completed over a length of 25 miles. This work is being carried out by the Department of Main Roads, with the Authority's construction force assisting during the winter. Thirty-one miles of new road construction is involved. As most of the existing township of Adaminaby will be inundated when the reservoir is filled, the Authority is building a new township near the eastern perimeter of the reservoir and about four miles from the existing township.

In October, 1954, the Kaiser-Walsh-Perini-Raymond group began to drive the Eucumbene-Tumut tunnel from the Adaminaby Reservoir through the Great Dividing Range to the Tumut River. In preparation for the tunnel works, the Authority constructed 15 miles of first-class road from the Snowy Mountains Highway over the Great Dividing Range to Eucumbene Portal at the southern end of the tunnel; also a 13-mile branch road across the elevated Happy Jacks Plain to the site of Junction Shaft, a working point on the tunnel at the confluence of the Tumut and Happy Jacks Rivers. Initial accommodation was provided for the contractors' forces, as well as construction power.

At the end of March, 1956, the contractors had driven a distance of over 2½ miles from the Eucumbene Portal. The 300 feet junction shaft had been completed and tunnellers driving from the bottom of the shaft had progressed over 3,000 feet in each direction. The existing world's record for excavation of a tunnel of this size has been broken on at least four occasions by the Kaiser-Walsh-Perini-Raymond group, a footage of 474 feet having been achieved in one week of six working days during March, 1956.

A 4,000 feet long access and drainage adit leading to the downstream end of the main tunnel from a point downstream of Tumut Pond dam was driven during 1955 by

the Australian firm of Allied Constructions Pty. Ltd., sub-contractors to Kaiser-Walsh-Perini-Raymond. It is anticipated that the Eucumbene-Tumut tunnel will be in service by the end of 1959.

As already mentioned, Tumut Pond Dam will regulate and control waters from the Tumut, the Tooma, the Eucumbene and the Murrumbidgee Rivers and pass them through a pressure tunnel to T1 Power Station. Both the dam and the pressure tunnel are being constructed by the Kaiser-Walsh-Perini-Raymond group of American contractors. Construction commenced on the 3,000 feet pressure tunnel in January, 1955, and by the end of March, 1956 excavation had progressed for a distance of approximately 1½ miles. Preparatory work is already well under way for the construction of Tumut Pond Dam. The dam and pressure tunnel will be in service by the end of 1958.

The construction of T1 Power Station is being carried out by a group of French contractors, the sponsoring company being the firm of Etudes et Entreprises. The turbines are being manufactured by the English Electric Company and the generators by A.S.E.A. Electrics, Vasteras, Sweden. The first two units of the power station should be in service by the end of 1958, and the second two units about one year later.

Preparatory work for the construction of the next power station on the Tumut River, T2, is already well advanced. All investigations have been completed and designs are now in progress in preparation for calling tenders for the civil engineering works early in 1957. The Authority's field construction forces are building a road from the Regional Centre of Cabramurra to the power station site. This road traverses very difficult country, passing down the side of a 2,000 feet gorge.

Designs for the Tooma-Tumut diversion are well advanced and tenders will be called in 1956. The construction of a road leading from Tumut Pond to the site of the Tooma Dam has already been completed, giving direct access from the Regional Centre at Cabramurra. It is anticipated that construction of the Tooma Dam and the Tooma-Tumut tunnel will commence early in 1957, with completion scheduled for the end of 1959.

Office and field investigation of the Murrumbidgee-Eucumbene Diversion is nearing completion and it is anticipated that designs will be sufficiently advanced for construction to begin in 1957. The diversion works will be in service in 1962, Murrumbidgee water probably being stored in Tantangara Dam for at least one year in advance of that date.

Investigations and preparatory work are now proceeding on the Snowy-Murray section of the Scheme. These include detailed studies of the main diversion works and the principal power stations, together with an extensive programme of geological, diamond drilling, and survey field work. A new road, which will link the Authority's Head-quarters at Cooma on the eastern side of the Great Dividing Range with the Snowy-Murray works on the western side of the mountains is already in use.

In the Geehi area access roads for investigation work have been constructed from the Swampy Plain River to the Upper Geehi Valley and to the Upper Bogong Creek Valley. The nucleus of a regional centre has also been established. The existing regional centre at Island Bend on the eastern side of the range, used in the construction of the Guthega Project, will also be an important centre for the driving of the Snowy-Murray tunnel.

**17. The Programme for the Immediate Future.**—The immediate objective of the Snowy Mountains Authority will be to press on with the Upper Tumut Diversion Works and the T1 and T2 Projects, in accordance with the following schedule.

Adaminaby Dam	..	..	Commencement of storage, mid-1957
			Completion of dam, 1959.
Eucumbene-Tumut Tunnel	..	..	Completion date, 1959.
Tooma-Tumut Diversion	..	..	Completion date, 1959.
Tumut Pond Dam	..	..	Completion date, 1958.
T1 Pressure Tunnel	..	..	Completion date, 1958.

Murrumbidgee-Adaminaby Diversion ..	Completion date, 1962.
T1 Power Station .. ..	Two units in operation, 1958. Four units in operation, 1959.
T2 Project .. ..	Commencement of contract, 1957. Two units in operation, 1962. Four units in operation, 1963.
Under the schedule set out above, power will become available as follows :—	
Guthega Project (already in operation).. 60,000 kW.	
T1 Power Station—	
1958 .. ..	160,000 kW., total 220,000 kW.
1959 .. ..	160,000 kW., total 380,000 kW.
T2 Power Station—	
1962 .. ..	140,000 kW., total 520,000 kW.
1963 .. ..	140,000 kW., total 660,000 kW.
Additional water for irrigation will be supplied to the Murrumbidgee as follows :—	
1959 .. ..	300,000 acre feet per annum.
1961 .. ..	200,000 acre feet per annum.
Total .. ..	500,000 acre feet per annum.

(NOTE.—With the completion of Blowering Dam by the State of New South Wales, these water quantities will be almost doubled.)

Detailed investigations and other preparatory work on the Snowy-Murray section of the Scheme will proceed actively during the next three years, so as to enable full scale construction operations on the Snowy-Murray Diversion to commence in 1959, on the 540,000 kW. M6 Power Station at Bogong Creek in 1960, and on the 540,000 kW. M7 Power Station at Swampy Plains shortly afterwards.

Office and field investigations for the Scheme as a whole will continue to receive the highest priority, in order to bring about refinements and improvements to the various future developments and so ensure the most economical use of the water resources of the area.

**18. Summary.**—The Snowy Scheme is one of the largest engineering works ever undertaken in the world, comparing in magnitude with the great Tennessee Valley Authority's development in the United States of America. It involves the construction of 7 major dams, 15 power stations with possibly two more to be built later—most of which will be hundreds of feet underground, over 80 miles of tunnelling and more than 300 miles of aqueducts along the mountain sides to pick up streams and lead them to reservoirs and tunnels.

New South Wales and Victoria will receive from the Snowy 3,000,000 kW of power and nearly 6,000 million kWh per annum of energy to meet the needs of expanding industry and rapidly increasing population. Perhaps of even greater importance, it will make available to the fertile plains of the Murray and Murrumbidgee Valleys nearly 2,000,000 acre feet of urgently needed water, so enabling this already prosperous area to produce additional foodstuffs to the value of nearly £30,000,000 per annum. The indirect benefits from the supply of water are equally important, irrigation development for instance, will bring about an increase in revenue from taxation of well over £12,000,000 per annum.

The Scheme is economically sound without receiving any financial return for the enormous capital outlay involved in the supply of additional water for irrigation. Few, if any, development works ever carried out in Australia can show a comparable return on capital invested.

The development is not solely a long-term one undertaken for the benefit of future generations. Power is already being produced and 300,000 acre feet per annum of additional water for irrigation will be flowing into the Murrumbidgee in less than 4 years. More power and more water will be supplied progressively, project by project, right throughout the construction period.

## SNOWY MOUNTAINS SCHEME.

## TABLE OF PRINCIPAL FEATURES.

(NOTE.—Where structures not yet under construction are referred to, the dimensions and data are tentative only and subject to revision on more detailed investigation).

## A. Main Storages.

Dams.					Height.	Volume of Fill.	Approximate net Storage Capacity.
					Feet.	Cubic yds.	Acre ft.
Adaminaby ..	..	..	..	..	390	9,500,000	3,500,000
Jindabyne ..	..	..	..	..	274	3,700,000	1,100,000
Tantangara ..	..	..	..	..	200	1,750,000	500,000
Tooma ..	..	..	..	..	222	1,400,000	22,400

## B. Main Diversions.

Tunnels.				Length.	Diameter.
				Feet.	
Eucumbene-Tumut ..	..	..	..	72,860	21' diameter (lined) (under construction)
Snowy-Murray—					
Snowy-Geehi ..	..	..	..	96,000	Not yet determined
Geehi-Murray ..	..	..	..	53,000	Not yet determined
Tooma-Tumut ..	..	..	..	47,000	14' diameter (mainly unlined)
Murrumbidgee-Eucumbene ..	..	..	..	54,900	12' x 10' (mainly unlined)

## C. Power Stations.

Station.	Capacity.	Average Net Head.	Average Flow.	Total Length Headrace plus Tailrace Tunnels.	Headwater Dam.	
					Type.	Height.
	kW.	Feet.	Cusecs.	Feet.		Feet.
M1A ..	60,000	555	248	14,400	Earth ..	90
M1B ..	90,000	800	410	14,500	Gravity ..	110
M2L ..	60,000	415	450	15,500	Gravity ..	145
M2H ..	10,000	605	28	5,000	Earth ..	50
M3 ..	265,000	900	770	1,000	Arch ..	143
M4 ..	75,000	1,775	127	6,700	Gravity ..	110
M5L ..	20,000	145	655	2,500	Gravity ..	276
M5H ..	40,000	285	320	11,800	Gravity ..	80
M6 ..	540,000	930	1,710	21,200	Arch ..	296
M7 ..	540,000	930	1,820	34,000	Gravity ..	180
T1 ..	320,000	1,065	1,300	12,000	Arch ..	290
T2 ..	280,000	863	1,420	36,200	Gravity ..	140
T5 ..	180,000	220	1,680	..	Earth ..	245
T6 ..	230,000	378	1,800	14,900	Earth ..	300
T7 ..	60,000	195	1,880	..	Earth ..	250

NOTES.—Initial capacity at present installed in Station M1B is 60,000 kW. Dam heights are height from river-bed to crest of dam. Total length of headrace and tailrace tunnels includes length of tailrace surge chamber.

## CHAPTER XXX.

### STATISTICAL ORGANIZATION AND SOURCES OF INFORMATION.

#### § 1. Statistical Organization in Australia.

1. Development of Australian Statistics.—(i) *Crown Colony Blue Books*. Statistical organization in Australia was founded in the "Blue Books" which, in the Crown Colony days, were prepared annually for the information of the Colonial Office. Although primarily intended for administrative purposes, these documents have been important sources of statistical data, even though some important matters are not covered, and others only partially so. These Blue Books form the basis from which later statistical publications were developed. This led to an element of uniformity in statistical compilation within the British Empire.

(ii) *Statistical Registers*. Following the advent of Responsible Government which was granted during the period 1851–1860 to all Australian States except Western Australia—and to that State in 1890—the "Blue Book" was succeeded in all States by "Statistical Registers". These were in many respects the old Blue Books in a new form, and were largely confined to summaries of the "by-product" statistics of Government administrative departments.

The first example of extensive Governmental organization for purely statistical purposes was the taking of periodic population censuses, which were initiated in all States under the Crown Colony régime. The growing need for quantitative data concerning the progress of the several young communities of Australia eventually led to the appointment of official Statisticians commissioned to prepare and publish such data.

(iii) *Statistical Conferences*. To enable the interchange of ideas between States and to obtain uniform State Statistics which could be aggregated to Australian totals conferences were held in the several States from as early as 1861. Altogether, six conferences were held prior to the formation of the Commonwealth Bureau of Census and Statistics in 1906. These were held in 1861, 1875, 1890, 1900, 1902 and 1901. The holding of these conferences has been continued since the formation of the Commonwealth Bureau, and a representative from New Zealand attended up to 1928.

2. Commonwealth Bureau of Census and Statistics.—(i) *Origin and Aims*. Under the provisions of section 51 of the Commonwealth Constitution, power is conferred on the Commonwealth Parliament "to make laws for the peace, order and good government of the Commonwealth with respect to—" (*inter alia*) "(XI.) Census and statistics". In compliance with this provision, the Census and Statistics Act 1905 was passed, and in 1906 the Commonwealth Bureau of Census and Statistics was created. A conference of Statisticians in 1906 defined the relations between the Commonwealth and State Bureaux, and in each case the State Statistician became the representative in his own State of the Commonwealth Statistician for the purpose of administering the Commonwealth Act. In addition, each State has its own "Statistics Act", and although these are not identical in all States, they embody common principles. With the establishment of the Commonwealth Bureau, the movement towards uniformity in information collected and statistical methods employed received a great stimulus. The Commonwealth Bureau did not attempt to duplicate the existing statistical organization, but endeavoured to use the services of the State statistical offices whenever possible, and to undertake the initial collection of statistics only in fields not already occupied by the States, or in which efficiency demanded complete centralization. Frequent statistical conferences (*see above*) have assisted the uniform development of existing statistics, and have facilitated expansion into new fields.

The scope of the Commonwealth Bureau has constantly been widened, more particularly during the 1939-45 War, when the Bureau responded to the urgent demands of administration for immediate and accurate statistical information in various fields. Since the war, requirements in the administrative, industrial, financial and scientific spheres have led to the development of many new statistical collections. All the activities of the Bureau are covered by the Census and Statistics Act, which confers authority to collect information and contains stringent provisions to ensure that the information obtained is treated in strictest secrecy.

(ii) *Organization.* For administrative purposes the Commonwealth Bureau is divided into a number of Divisions. These are :—Census, Compiling, Development, Publications, Social Accounting and Administrative.

(a) *Census Division.* This Division of the Bureau is responsible for the taking of periodic Population Censuses and the tabulation, summarization and preparation for publication of the results obtained.

(b) *Compiling Division.* The Compiling Division is divided into the following Branches which compile statistics dealing with specific fields of activity :—

Trade and Transport Branch—Responsible for the original compilation, tabulation and analysis of statistics relating to imports and exports, and for the compilation of statistics relating to road and rail transport, aviation, shipping, posts and telegraphs, telephones and wireless.

Prices Branch—Deals with the collection of retail and wholesale prices and the compilation of retail and wholesale price index numbers. A staff of trained field officers is maintained in the several States to facilitate the collection of accurate information.

Employment and Labour Branch—Compiles all employment estimates, wage and labour statistics.

Primary Production Branch—Deals with statistics relating to agricultural and pastoral activities, mining, forestry and fishing. Original data are largely supplied by State Statisticians.

Secondary Production Branch—Compiles all factory statistics both annual and monthly. Collates on a Commonwealth basis original annual data supplied by State Statisticians.

Finance and Taxation Branch—Compiles statistics of private finance (banking, insurance, exchange rates, etc.), public finance (Commonwealth, State and Local and Semi-Governmental authorities), and statistics relating to all aspects of Commonwealth taxation.

Demography Branch—Concerned with statistics of births, deaths, marriages and migration, and is responsible for periodic estimates of population.

(c) *Development Division.* This Division was created in order to develop new statistical collections to meet post-war demands for more adequate and up-to-date statistics, and also to examine current collections in the light of such requirements. It is divided into three Branches, namely :—

Sampling Techniques Branch—undertakes the development and application of sampling procedures to statistical collections and furnishes technical advice to branches and other Government departments.

Development Branch—Develops new statistical collections and examines current collections in the light of present day requirements. Compiles social statistics.

Business Statistics Branch—Conducts censuses and surveys and analyses statistics relating to Internal Trade (Retail), Business and Hire Purchase Activities, and Company Investments and Profits.

(d) *Publications Division.* This Division is responsible for the scrutiny, editing and graphical illustration of all Bureau publications, and, in collaboration with other Divisions, for the initiation, development and co-ordination of statistical publications. It also

maintains a regular flow of statistical series to certain international organizations, and revises statistical material in certain overseas and local publications.

(e) *Social Accounting Division*. This Division undertakes research into the theoretical and practical problems of social accounting. It is divided into three branches as follows:—

Balance of Payments Branch—collects and analyses statistics on Australia's balance of international payments.

National Income and Expenditure Branch—prepares estimates of national income and expenditure.

Quantum Indexes Branch—undertakes research into quantum of production.

(f) *Administrative Division*. The Administrative Division is responsible for all aspects of staff recruitment and direction, supplies, payment of accounts, etc. The Reproduction Section of the Division is equipped with multilith and duplicating machines for processing statistical statements for more immediate requirements. In addition, a special section of this Division is responsible for the examination of statistical methods and systems, and the co-ordination of all statistics in Commonwealth Departments (see para. 3 below). The Mechanical Tabulation Branch and the specialized library of official and unofficial publications on statistics and economics are controlled by the Administrative Division. The Mechanical Tabulation Branch is equipped with modern tabulating equipment and is responsible for all machine tabulating work required by other Divisions of the Bureau with the exception of the Census Division.

3. *Relation of the Bureau to other Commonwealth Departments*.—In October, 1950 the Commonwealth Public Service Board issued a circular relative to the compilation of statistics in other Commonwealth Departments, in which it stated that the Commonwealth Statistician should be the co-ordinating authority on all statistics in Commonwealth Departments, and that, as a general principle, where any new statistical field is to be established involving the regular collection of statistics, the Commonwealth Statistician should be consulted to ensure that they are necessary and that they are based on sound statistical methods; furthermore, that the Commonwealth Statistician should make a regular inspection, at least once every twelve months, of all statistical work done by Departments to ensure that their needs are met by the most economical means and without duplication of effort.

This project of co-ordination is being implemented as time and circumstances permit.

## § 2. Statistical Publications of Australia.

1. *General*.—The official statistical publications of Australia may be divided bibliographically into two main divisions, namely:—(i) Commonwealth publications dealing both individually and collectively with the several States of Australia; and (ii) State publications dealing with individual States only.

2. *Commonwealth Publications*.—Commonwealth publications may be grouped under two heads, namely:—(i) Publications issued by the Commonwealth Statistician; and (ii) Parliamentary and Departmental Reports and Papers.

(i) *Publications issued by the Commonwealth Statistician*. The following is a list of the principal statistical publications issued from the Commonwealth Bureau of Census and Statistics since its inauguration to June, 1956:—

*Australian Balance of Payments*.—Statements Nos. 1 to 3, 1928–29 to 1951–52.

*Australian Life Tables, 1901–1910. Australian Joint Life Tables, 1901–1910.*

*Australian Life Tables, 1920–1922.*

*Australian Life Tables, 1932–1934. Australian Joint Life Tables, 1932–1934*

*Australian Life Tables, 1946–1948.*

*Australian Mineral Industry Statistics* (formerly *Minerals and Metals Bulletin*).—

Part 2 of Quarterly Bulletin issued jointly with the Bureau of Mineral Resources.

*Australian Primary Industries*.—Report prepared for the Empire Producers' Conference, Sydney, March, 1938.

- Census (1911) Results.*—Bulletins. Vols. I. (Statistician's Report), II., and III., with Appendix "*Mathematical Theory of Population.*"
- Census (1921) Results.*—Bulletins, Nos. 1 to 26. Parts I. to XVI., forming Vol. I., and Parts XVII. to XXIX., forming, with the Statistician's Report, Vol. II.
- NOTE.—Part XXVII., Life Tables.
- Census (1933) Results.*—Bulletins, Nos. 1 to 25. Parts I. to XIV., forming Vol. I., Parts XV. to XXVIII., forming Vol. II., and Parts XXIX. to XXXVII., forming, with Statistician's Report and Australian Life Tables 1932-1934, Vol. III.
- Census (1947) Results.*—Bulletins, Nos. 1 to 25. Parts I. to XVI., forming Vol. I., Parts XVII. to XIX., forming Vol. II., and Parts XX. to XXVIII., forming, with Statistician's Report and Australian Life Tables 1946-1948, Vol. III.
- Census (1954) Results.*—See Price List at end of volume.
- \**Census of Retail Establishments (1947-48) Results.*—Bulletins, Nos. 1 to 7.
- \**Census of Retail Establishments (1948-49) Results.*—Bulletins, Nos. 1 to 7.
- \**Census of Retail Establishments (1952-53) Results.*—Bulletins, Nos. 1 to 14.
- \**Dairying Industry (formerly Summary of Dairying Industry).*—Statistical Bulletin, monthly; first issue, September, 1937.
- \**Factories, Principal Statistics, Summary.*—Annually, 1948-49 to 1953-54.
- Finance.*—Bulletins 1907 to 1916-17 annually; 1917-18 and 1918-19 (one vol.); 1919-20 and 1920-21 (one vol.); 1922-23 to 1953-54 annually.
- \**Food Production and the Consumption of Foodstuffs and Nutrients in Australia, Report.* Half-yearly, 1946-47 to 1947-48; annually, 1948-49 to 1953-54.
- \**Fruit Growing Industry Summary.*—Annually, 1944-45 to 1953-54.
- Labour and Industrial Statistics.*—Memoranda and Reports, various, to 1913.
- Labour Report.*—Annually, 1913 to 1953.
- \**Livestock Numbers (formerly Summary of Livestock Statistics).*—Statistical Bulletin, annually, 1943 to 1955.
- Local Government in Australia.*—July, 1919.
- \**Manufacturing Industries.*—Bulletins on Individual Industries, annually, 1936-37 to 1939-40, 1940-41 (issue incomplete), and 1944-45 to 1953 54.
- \**Monthly Review of Business Statistics.*—First issue, October, 1937.
- \**Occupation Survey (1945) Results.*—Detailed tables.
- Official Year Book of the Commonwealth of Australia.*—Annually, 1907 to present issue (No. 42). Issues Nos. 40 to 42 also published in parts.
- Oversea Trade.*—Bulletins, annually, 1906 to 1954-55.
- \**Oversea Trade.*—Preliminary Bulletins. Annually, 1952-53 to 1955-56.
- \**Oversea Trade Statistics : Imports Cleared for Home Consumption classified according to Individual Items of the Customs Tariff,* 1950-51 to 1954-55.
- Pocket Compendium of Australian Statistics (formerly Statistical Digest).*—1913, 1914, 1916, and 1918 to 1956 annually.
- Population and Vital Statistics.*—Bulletins and Reports, various, 1906-1910.
- Demography,* 1911 to 1954 annually.
- Primary Industries*—Bulletin, annually, 1950-51 to 1953-54, in two parts: Part I. Rural Industries; Part II. Non-Rural Industries and Value of Production.
- Production.*—Bulletin, annually, 1906 to 1947-48. From 1936-37 to 1949-50 issued in two parts.—Part I. Secondary Industries; Part II. Primary Industries (including Total Recorded Production); thereafter separate Bulletins (see *Primary Industries* and *Secondary Industries*).
- Professional Papers.*—Various. A full list appears in Official Year Book No. 13, p. 3.
- Quarterly Summary of Australian Statistics.*—First issue, No. 70, December, 1917, replacing *Monthly Summary of Australian Statistics* (Bulletins Nos. 1 to 69).
- \**Report of Proceedings of the Conference of British Commonwealth Statisticians,* 1951.

\* Obtainable from Commonwealth Statistician—for methods of obtaining other publications still in print see back page of this volume.

*\*Rural Land Use and Crop Statistics* (formerly *Summary of Crop Statistics*).—

Statistical Bulletin, annually, 1943-44 to 1954-55.

*Secondary Industries*.—Bulletin, annually, 1950-51 to 1953-54.

*Social Insurance*.—Report to the Hon. the Minister for Trade and Customs, 1910.

*Social Statistics*.—Bulletins, 1907 to 1915 annually, and 1918.

*Superannuation for the Commonwealth Public Service*.—Report to the Hon. the Minister for Home Affairs, 1910.

*\*Survey of Motor Vehicles (1947-48) Results*.—Bulletins Nos. 1 to 7.

*\*Survey of Private Superannuation Schemes 1951-52* (reprinted in *Finance Bulletin* No. 44).

*Transport and Communication*.—Bulletins, 1906, 1908 to 1916 annually, 1919 to 1930 annually, and 1932 to 1954-55 annually.

*\*Vegetables Grown on Farms for Human Consumption*.—Statistical Bulletin, annually, 1942-43 to 1954-55.

*Wages and Prices*.—January, 1932.

*Wealth*.—The Private Wealth of Australia and its Growth as ascertained by various methods, together with a Report on the War Census in 1915.

*\*Wheat Industry* (formerly *Summary of the Wheat Situation*).—Statistical Bulletin, periodically; first issue, July, 1936.

*\*Wool Supplies and Utilization*.—Bulletin, annually, 1952-53 to 1954-55.

The foregoing list includes all the printed publications issued from the Bureau, and certain more important mimeographed publications issued for the most part annually. Other mimeographed statements, obtainable on application to the Commonwealth Statistician and dealing with a wide variety of subjects, are issued as follows:—

*Annually*—Bee Farming; Commonwealth and State Taxation Collections; Companies with Oversea Affiliations; Factory Products (Principal); Factory Statistics (Preliminary); Fire, Marine, and General Insurance; Meat Production and Utilization; Milking Machines on Rural Holdings; Mining and Quarrying; New Capital Raisings; Oversea Trade between Australia and Eastern Countries; Registrations of New Motor Vehicles; Rural Statistics of the Australian Capital Territory; Social Services, Expenditure by States; Tractors on Rural Holdings; University Statistics; Value of Production; Wheat Forecast and Estimate; Wool Production.

*Half-yearly*—Australian Balance of Payments; Capital Expenditure; Labour Turnover; Trade of Australia with United Kingdom.

*Quarterly*—Building; Interim Retail Price Index; Quarterly Business Survey; Retail Sales of Goods; Retail Price Variations—All Items ("C" Series) Index; Road Traffic Accidents; Tractor Statistics; Trade of Australia with Monetary Areas.

*Monthly*—Banking; Dairying Industry; Demographic Review; Employment; Exports of Wool from Australia; Export Prices Index; Gold Mining Industry; Hire Purchase Business of Finance Companies; Life Assurance; Oversea Trade; Production Statistics; Registrations of New Motor Vehicles, Savings Bank Deposits and Savings Certificates.

(ii) *Commonwealth Parliamentary and Departmental Reports and Papers*. Lists of the principal official reports and other documents containing statistical information issued from the inauguration of the Commonwealth appear in the Official Year Books up to No. 13, but it is not now practicable to undertake the preparation of such lists.

3. *State Publications*.—The chief statistical publications of each State are set out hereunder. As with the Commonwealth Parliamentary and Departmental Reports and Papers, it is not practicable to enumerate the various Departmental Reports, statements of accounts, etc., issued by officials, boards, local and semi-governmental authorities, etc., in each State.

(a) *New South Wales*—Statistical Register (annually); Official Year Book of New South Wales (annually); Pocket Year Book (annually); Statistical Bulletin (monthly to December, 1919, quarterly to June, 1943, then discontinued to September, 1948); Monthly Summary of Business Statistics.

(b) *Victoria*—Statistical Register (annually to 1916, then discontinued); Victorian Year-book (annually); Statistical Abstracts (quarterly to 1917), then discontinued to December, 1946).

\* Obtainable from Commonwealth Statistician—for methods of obtaining other publications still in print see back page of this volume.

- (c) Queensland—Statistical Register (annually); Official Year Book, 1901; A.B.C. of Queensland Statistics (annually) to 1936, then discontinued; Queensland Year Book (annually 1937 to 1941, then discontinued to 1945); Queensland Pocket Year Book (annually).
- (d) South Australia—Statistical Register (annually); Official Year Book, 1912 and 1913; Statesman's Pocket Year Book of South Australia (annually); Quarterly Summary of Statistics.
- (e) Western Australia—Statistical Register (annually); Statistical Abstracts (quarterly, previously issued monthly to July, 1917); Pocket Year Book of Western Australia (annually).
- (f) Tasmania—Statistical Register (annually); Pocket Year Book of Tasmania (annually); Monthly Review of Business Statistics.

### § 3. The Third Conference of British Commonwealth Statisticians, Canberra, 1951.

Conferences of the Government Statisticians of the British Commonwealth were held first in London in 1920 and then in Ottawa in 1935. The Third Conference was held in Canberra from 12th to 23rd November, 1951. Delegates were present from Australia, Canada, Ceylon, India, New Zealand and the United Kingdom (including a representative of the Colonial Office). Ireland, the Commonwealth Economic Committee and the United Nations were represented by observers, and the Australian State Government Statisticians were also present. A summary of the activities of the conference may be found in Official Year Book No. 39, page 1320.

### § 4. Select List of Works about, or published in, Australia.

(Compiled by the Librarian of the Commonwealth National Library.)

This list aims to meet the growing need, in Australia as publishing develops, and overseas as interest in Australia widens, for an authoritative current reference and reading list of books dealing with Australia or of Australian authorship, wherever published.

Australians will find these books in the National Library and in their State Libraries as well as in leading bookshops. Oversea readers may have access to them in the collections which the National Library maintains at 41 Australian posts abroad. They will be found also, increasingly, in leading libraries and bookshops in many countries. In the United States, for example, Australian books are included in the Farmington Plan in which 62 libraries and research institutions co-operate to ensure that at least one copy of all material published in any part of the world and likely to be required for a serious purpose will be available promptly somewhere in the country.

The list is classified broadly by subject and under each heading there is first a list of the principal standard books still in print, then a list of selected books and official publications (excluding annual reports) which were published during 1954. A few books published earlier, but received too late for inclusion in the previous list, are also included. Where known the retail price in the country of publication is given, but this is subject to fluctuation.

The Library also issues a series of select lists which include, *Australian Public Affairs Information Service* (monthly), subject index of material in new books, pamphlets, current periodicals and government publications from English speaking countries, with an important bearing on investigations into Australian political, economic, cultural and social affairs, and the following full bibliographies.

*Monthly list of Australian Government Publications*, covering both the Commonwealth and the States;

*Books published in Australia* : a monthly list of books supplied to the National Library under copyright.

The two last-mentioned publications are cumulated annually as the *Annual Catalogue of Australian Publications* which includes also a list of books published overseas of Australian interest or by authors resident in Australia, a select list of the more important Australian periodical and serial publications and a directory of publishers.

#### General and Descriptive.

## DIARY OF PRINCIPAL ECONOMIC EVENTS, 1952 to 1955.

---

The principal economic events for the years 1931 to 1938 were shown on pp. 968 to 977 of Official Year Book No. 33, those for the years 1939 to 1944 on pp. 1129 to 1141 of Official Year Book No. 36 while those for the years 1945 to 1951 were included in the range of years covered by the three Official Year Books following (Nos. 37 to 39). For reasons of space some of the items originally shown for the years 1952 and 1953 have been omitted from this issue. Previous issues should be consulted for additional information for these years.

### 1952.

Migration was on a reduced scale during 1952. The decline in immigration was associated with unsettled employment conditions in Australia, and total numbers employed (excluding rural and household domestic workers and the defence forces) fell from 2,637,000 in December, 1951, to 2,533,000 in December, 1952. Except for small increases in February and December, this decline continued throughout 1952, while the number of persons on unemployment benefit increased from 2,000 to 40,000.

68,000 new houses were started and 79,000 completed during the year. Production of coal, gas, electricity, pig-iron and steel was maintained or increased, and electricity restrictions were much less severe than in recent years.

In the early part of the year continuing drought and bushfires, particularly in New South Wales, Queensland and the Northern Territory, seriously affected pastures and restricted meat and butter production. Conditions improved later in the year and meat and milk production increased quickly. For crops, weather conditions generally were favorable and wheat production in 1952-53 was considerably higher than in 1951-52. Average yield per acre reached an all-time record of about 19 bushels. Wool production is estimated to have reached an all-time record in 1952-53, being 19 per cent. above 1951-52.

The high level of imports reached in the latter half of 1951 continued into 1952. This increase in imports, together with a drop in the receipts for exports, resulted in a balance of payments deficit on current account for the latter half of 1951, and the continuation of these conditions in 1952 led to the imposition of severe import restrictions to safeguard overseas reserves. Licences to import goods from dollar areas were also recalled and reviewed. The value of imports fell by more than 50 per cent. in the second half of the year and the balance of payments deficit of £269 million in the first half of the year was changed to a surplus of £75 million in the second half of the year.

Average earnings per employee continued to rise and in the December quarter were about 11 per cent. above the corresponding level of the previous year. Retail prices increased by about 10 per cent. and wholesale prices by about 9 per cent. during the year.

During 1952 uncertainty about the future of interest rates for public authority borrowing resulted in a number of loan failures until some stability in interest rates was reached towards the end of the year. Bank overdraft and deposit rates were also raised from the beginning of August.

*2nd January.*—The Australian Mutual Provident Society to take over a large low-rainfall area in the Mallee-Wimmera District for development and improvement for settlement under the Victorian Land (Development Leases) Act 1951. (See also 18th August, 1949, Official Year Book No. 39.)

*5th January.*—Australia and Pakistan signed a one-year trade agreement.

*17th January.*—Commonwealth Conciliation Commissioner Galvin refused an application by eleven metals trades unions for marginal wage increases. (See 29th February, 1st March, 1952, and 11th November, 1953.)

*21st January.*—A conference of British Commonwealth Finance Ministers, attended by the Treasurer of Australia, issued a statement on the measures considered necessary to correct the sterling area situation.

*25th January.*—Widespread bushfires in New South Wales, Victoria and the Australian Capital Territory.

*19th February.*—Good rains in the northern areas of New South Wales end the worst drought experienced for many years, during which extensive areas of pastures and crops were destroyed by bushfires. Drought conditions continued in Queensland and the Northern Territory.

*23rd February.*—Discovery announced of important high-grade uranium deposits at Rum Jungle in the Northern Territory.

*26th February.*—Introduction into the House of Representatives of the Fisheries and Pearl Fisheries Bills to conserve swimming and sedentary fisheries in Australian waters. (Acts assented to 13th March.)

*7th March.*—The Commonwealth Bank prohibited the establishment of further import credits until licences had been obtained for the goods involved.

*8th March.*—Imposition of severe restrictions on imports from all sources and on amounts available for Australians travelling overseas.

*11th March.*—Arrival of the President of the International Bank for Reconstruction and Development to survey development progress and to discuss loan prospects with the Commonwealth Government.

*1st April.*—Agreement between the Commonwealth and South Australian Governments and the combined Development Agency of the British and American Governments on the development of uranium deposits at Radium Hill, South Australia.

*9th April.*—The Waterside Workers' Federation, in connexion with its claim for higher margins, imposed an Australia-wide ban on overtime.

*29th April.*—Wages of about 50,000 workers in the pastoral industry in all States, except Queensland (where a State award is in operation), reduced by Commonwealth Conciliation Commissioner because of a decline in wool prices.

*3rd May.*—A special Loan Council meeting approved programmes amounting to £247,500,000 for Government loans and £128,000,000 for local and semi-governmental authorities loans, the Commonwealth Government being prepared to guarantee subscriptions to an extent of £125,000,000 (subsequently increased to £135,000,000).

*7th May.*—Introduction into the House of Representatives of the Aluminium Industry Bill, an amending bill designed to increase by £4,250,000 the capital originally contributed in 1944 (£3,000,000) for the establishment of the industry at Bell Bay, Tasmania, and provide for the annual production of 13,000 tons of aluminium ingots. (Act assented to 30th May.)

*22nd May.*—Modification of the Commonwealth Bank's advance policy to secure greater flexibility and to enable individual banks to apply the policy appropriately in individual cases.

The Conciliation and Arbitration Bill introduced into House of Representatives providing for a limited right of appeal from decisions of Conciliation Commissioners to a court of three Arbitration Court Judges, and an increase in the number of Arbitration Court Judges to at least seven, so that two full courts may sit at once. (Act assented to 17th June.)

23rd May.—Good rains brought relief to north and central Australia which had suffered from prolonged drought causing heavy losses in cattle industry.

29th May.—Bill introduced to approve agreement between the Commonwealth Government and the Bulolo Gold Dredging Ltd. to form a joint company to cut 10,000,000 super. feet of timber annually from pine forests at Bulolo, New Guinea. (Act assented to 17th June.)

18th June.—Wagga, Forbes, Cowra and many other towns were badly flooded by water from the Murrumbidgee and Lachlan Rivers and their tributaries.

24th June.—Employers' organizations lodged a claim with the Commonwealth Court of Conciliation and Arbitration seeking the following adjustments to awards of 25 metal trades unions, affecting about 250,000 workers in all States except Western Australia:— (i) Reduction in basic wage by amounts of from £2 5s. to £2 7s. per week; (ii) Reduction of the female rate from 75 per cent. to 60 per cent. of the male rate; (iii) An increase in working hours from 40 to 44 hours per week, to be worked in either 5 or 5½ days; (iv) Abandonment of the system of automatic quarterly cost of living adjustments to the basic wage. (See 12th September, 1953.)

1st July.—New five-year Dairy Industry Stabilization Scheme commenced to operate.

7th July.—At a conference of the Prime Minister and State Premiers a total of £135,900,000 was decided on as tax reimbursement grant to the States for 1952-53, plus Special Grants to Victoria and Tasmania of £800,000 and £70,000 respectively.

9th July.—The International Bank for Reconstruction and Development announced the granting of a further loan to Australia of \$50,000,000 for a twenty-year term at 4½ per cent. interest.

14th July.—Relaxation of bank advance policy to provide hire-purchase finance for farm equipment announced.

24th July.—Announced that as a result of present economic situation the migration programme for 1952 and 1953 would be reduced.

1st August.—Revocation of the order made by the Commonwealth Bank under National Security Regulations fixing maximum rates of interest. This was followed by a general increase in interest rates.

6th August.—The Commonwealth Budget for 1952-53 introduced into the House of Representatives. (For details, see Official Year Book No. 40, p. 1198.)

26th August.—Arrival of Santa Gertrudis cattle from King Ranch, Texas, U.S.A., to start the breed on the Darling Downs, Queensland.

27th August.—The new blast furnace lit at Port Kembla, New South Wales, expected to increase output of pig iron at that centre by 1,500 tons daily.

11th September.—Announced that Consolidated Zinc Pty. Ltd. would develop the Rum Jungle, Northern Territory, uranium deposits on behalf of the Commonwealth Government, the United States of America Atomic Energy Commission to supply uranium refining plant to begin operating in 1954.

30th September.—All controls over building operations and materials ended in New South Wales.

6th October.—The Commonwealth Bank announced the cessation of restrictions on bank advances for any purpose, except where the control of capital issues is involved.

14th October.—The Navigation Bill, proposing the transfer of jurisdiction over maritime industrial disputes from the Maritime Industry Commission to a single judge of the

Commonwealth Court of Conciliation and Arbitration and the abolition of the Maritime Industry Commission, introduced into the House of Representatives. (Act assented to 8th December.)

Broken Hill Proprietary Steel Industry Agreement Bill introduced into the Western Australian Legislative Assembly to ratify an agreement for the establishment of a steel rolling mill and fence post factory at a cost of approximately £4,000,000 at Kwinana, near Fremantle, Western Australia. (Act assented to 18th December.)

16th October.—A Bill to provide for the sale of the Commonwealth's holding of shares in Commonwealth Oil Refineries Ltd. to the Anglo-Iranian Oil Co. Ltd. introduced into the House of Representatives (Act assented to 6th November). The Anglo-Iranian Oil Co. Ltd. is to construct an oil refinery with a capacity of about 3,000,000 tons a year, to cost about £40,000,000, at Kwinana.

22nd October.—Owing to the increased production of coal, the Coal Industry Tribunal granted an application to advance the date for commencement of the long service leave scheme from 1st January, 1954 to 1st January, 1953. (See 7th September, 1949, Official Year Book No. 39.)

27th November–11th December.—The Prime Minister and other Australian Ministers attended the British Commonwealth Economic Conference in London. All subjects were discussed in the light of the necessity to curb inflation and rises in the cost of living, to encourage sound economic development, and to extend a multilateral trade and payment system over the widest possible area.

5th December.—The Coal Industry Stabilization Plan was announced by the Commonwealth Government, its main features being the financing by the Commonwealth of the stockpiling of surplus production, and of the sale of coal on a credit basis to major consumers; the foregoing by the Commonwealth of interest charges on mining plant which might become idle, and the daily review of production and demand.

31st December.—The first good rains for many months were recorded in Northern Territory drought-stricken areas.

### 1953.

The immigration programme was cut further during the year and net migration amounted to only about 43,000, compared with 94,000 in 1952 and over 100,000 in each of the preceding three years.

Total employment (excluding rural and household domestic employment and the defence forces) rose from 2,533,000 in December, 1952 to 2,612,000 in December, 1953. Numbers on unemployment benefit dropped to less than half the level of 41,600 reached in January.

Production of coal was down slightly from the 1952 level, but production of gas and electricity and of many basic materials continued to increase. Production of refrigerators, washing machines, radios and other domestic electrical goods, many clothing and textile lines and sporting goods increased substantially after the set back of the previous year. There was also some revival in house building, but the number of houses started did not regain the 1951 level.

Seasonal conditions were satisfactory. Meat production was substantially increased. The average wheat yield was lower than the previous year's record but still high at 17 bushels per acre. Acreage was somewhat greater and total production was estimated at about 199 million bushels compared with 195 million bushels in the 1952–53 harvest. The wool clip for 1953–54 was only 3 per cent. under the record of the previous year.

After some weakness at the close of the 1952–53 season, wool prices firmed again at the opening sales in September and during the first half of the 1953–54 season averaged 85d. compared with 81.8d. in 1952–53. Export prices generally remained above the previous year's level and the value of exports was considerably higher than in 1952. During the second half of the year imports also increased substantially over the low level of the previous twelve months, and the balance of payments credit on current account which reached about £100 million in the first half of the year dropped to about £20 million in the second half.

Rises in internal prices and earnings were much smaller. Average earnings per employee rose by 4 per cent., the basic wage by 2 per cent., retail prices by 4 per cent., and wholesale prices by 5 per cent. before falling towards the close of the year, compared with increases of about 10 per cent. in 1952.

Interest rates were kept stable during the year at  $4\frac{1}{2}$  per cent. on Commonwealth bonds,  $4\frac{1}{2}$  per cent. on local and semi-governmental securities and 5 per cent. on bank advances. Both Commonwealth loans raised during the year at  $4\frac{1}{2}$  per cent. were over-subscribed, and during the second half of the year there was some speculation about a possible drop in interest rates.

*5th January.*—New deposits of coal, bauxite, tin and zinc discovered as a result of surveys carried out by the Bureau of Mineral Resources, Geology and Geophysics.

*8th January.*—Ten-year agreement signed for sale to the United States of America of uranium from deposits at Rum Jungle, Northern Territory.

*10th January.*—United Kingdom and Queensland Governments agreed to abandon the Queensland-British Food Corporation's farming project in Central Queensland.

*22nd January.*—For first time since 1945, basic wage adjustment for December quarter showed no change in average for six capital cities.

*18th February.*—Television Bill introduced into House of Representatives to permit the establishment of both National and Commercial television transmitting stations. (Act assented to 20th March.)

*19th February.*—The Commonwealth Bank Bill 1953, which sets up the Commonwealth Trading Bank under a General Manager, in place of the General Banking Division of the Commonwealth Bank, and the Banking Bill 1953, which provides for a new method of determining the maximum amounts which the trading banks may be required to lodge with the Commonwealth Bank, introduced into House of Representatives. (Both Acts assented to 28th March.)

*20th February.*—Premiers' Conference in Canberra failed to reach agreement on return of income tax powers to the States.

*1st April.*—Further relaxation of import restrictions to allow additional imports to the value of £50,000,000 during the next twelve months other than from the dollar area and Japan.

*13th April.*—New International Wheat Agreement signed in Washington fixing Australia's annual wheat export quota at 75,000,000 bushels. (Later legislation introduced into House of Representatives, 11th October.)

*18th April.*—Commonwealth Scientific and Industrial Research Organization announced that a process had been developed to prevent shrinkage in wool.

*15th May.*—Australia and United States of America signed conventions to end double taxation between the two countries. (Acts ratifying these conventions were assented to 11th December.)

*19th May.*—Australian Loan Council meeting at Canberra adopted programme of £231,000,000 for State Government works during 1953-54. Borrowing programme of £90,486,000 by Local Government and Semi-governmental authorities also approved. Loan Council decided to retain ruling interest rates on public loans for at least twelve months.

*8th June.*—Britain and Australia signed agreement for reciprocity in social services benefits.

*9th June.*—Conference of Commonwealth Prime Ministers on defence, economic and political issues concluded in London.

*24th June.*—Contract prices for sale of Australian butter and cheese to the United Kingdom Ministry of Food during 1953-54 increased by approximately  $3\frac{1}{2}$  per cent.

*1st July.*—Commonwealth Medical Benefits Scheme commenced, under which persons who are contributors to an approved medical benefits organization are entitled to receive part reimbursement by the Commonwealth of payments made for medical services to themselves or their dependants.

Conditions of purchase by Australian Atomic Energy Commission of acceptable uranium ores and concentrates from 1st July announced, including guaranteed minimum prices for five years.

Further relaxation of restrictions on imports from sterling countries came into operation. Some increases in imports from Japan also to be allowed.

*15th July.*—Announced that the United Kingdom Government would pay higher prices, representing increases of  $7\frac{1}{2}$  and  $5\frac{1}{2}$  per cent. respectively, for Australian lamb and mutton in 1953-54.

*7th August.*—Shipping freights to United Kingdom rose by  $7\frac{1}{2}$  per cent.

*13th August.*—Commonwealth Government rejected a Japanese request for a conference to discuss trade relations between Australia and Japan.

*9th September.*—The Commonwealth Budget for 1953-54 introduced into the House of Representatives. (For details, see Official Year Book No. 41, p. 1086.)

*10th September.*—Pearl Fisheries Bill introduced, providing for a licensing system and other measures to control pearl fisheries (Act assented to 17th September). *See also* 11th September.

*11th September.*—Australian sovereignty proclaimed over sea-bed, subsoil, and continental shelf adjoining Australia and Australian territories. (Australia subsequently agreed to submit issues arising from the Pearl Fisheries Act to the International Court of Justice for adjudication.)

*12th September.*—Commonwealth Court of Conciliation and Arbitration refused applications by employers for reduction of current basic wages and for an increase of standard hours of work and also refused applications by unions for increases of basic wages. The employers' applications for abandonment of the system of automatic adjustment of the basic wage in accordance with retail price indexes were, however, granted. Later, the extension by the Court, on its own motion, of this decision to awards not the subject of an application before the Court was challenged in the High Court by the unions concerned but the power of the Arbitration Court to so vary awards was upheld.

*24th September.*—Australian Council of Trade Unions Congress withdrew its policy of unqualified opposition to incentive payments, leaving individual unions free to accept incentive payment schemes if they so desire.

*1st October.*—Announced that Australia would receive an increase of  $5\frac{1}{2}$  per cent. in the price of beef and veal shipped to the United Kingdom during 1953-54 under the fifteen-year meat agreement with United Kingdom.

Further relaxation of import restrictions on goods from sterling areas came into operation, allowing additional annual imports valued at £45 million.

*7th October.*—All States agreed to a price of 14s. per bushel for wheat sold in Australia for the three years ending 1955-56.

*13th October.*—Wheat Marketing Bill providing for orderly marketing of wheat for next three harvests introduced into House of Representatives. (Act assented to 26th October.)

Bill providing for ratification of the International Wheat Agreement, under which portion of Australia's crop for the next three seasons will be exported within certain price limits, introduced into House of Representatives. (Act assented to 26th October.)

Queensland State Full Industrial Court rejected application by employers' organizations to end basic wage adjustments.

*22nd October.*—Commonwealth Court of Conciliation and Arbitration refused New South Wales transport authorities permission to withdraw applications for relief from basic wage adjustments.

*26th October.*—Factories and Shops (Wages Boards) Bill 1953 introduced in Victoria to pay latest cost-of-living increase in basic wages. (Act assented to 25th November.)

*30th October.*—Tasmanian Government abolished price control on all goods other than copper.

*11th November.*—Commonwealth Court of Conciliation and Arbitration completed hearing of evidence by Australian Engineering Union and other organizations in the margins case and reserved its decision. (See 5th November, 1954.)

*12th November.*—Industrial Arbitration (Amendment) Bill, giving absolute preference to unionists, introduced in New South Wales Parliament. (Act assented to 17th December.)

*3rd December.*—Commonwealth Trading Bank of Australia commenced operations.

*4th December.*—Oil discovered at Exmouth Gulf, 680 miles north of Perth. The oil, discovered at a depth of approximately 3,600 feet, was stated to be a very high grade crude oil.

*31st December.*—With the expiration of the Defence Preparations Act, control of Capital Issues ceased.

Price control abandoned in Western Australia.

### 1954.

Immigration was greater than in 1953. Net migration increased from 43,000 in 1953 to 68,000 in 1954, but was still well below the level of the preceding four years. Employment increased continuously throughout 1954. Total employment (excluding rural and household domestic employment and the defence forces) rose from 2,612,000 in December, 1953 to 2,701,000 in December, 1954. In April total employment exceeded the previous peak of 2,643,000 reached in November, 1951. Numbers on unemployment benefit fell from 13,423 in January to 2,975 in November, 1954. Production of pig-iron and steel was practically the same as in 1953, but there were rises in the production of coal, gas and electricity, and many basic materials (copper, lead, zinc, acids, cement, superphosphate). Production of domestic electrical appliances and of many textile and clothing lines also increased. More new houses were commenced in 1954 than in 1953, but the number completed was slightly below the 1953 figure. Meat production increased slightly in 1954. The wheat acreage for 1954-55 was about the same as in 1952-53, but both the total crop and the average yield are estimated to be below the levels of the previous two seasons. A substantial fall in exports, however, resulted in a level of stocks at 30th November, more than twice as high as a year earlier. The 1954-55 wool clip is estimated to be practically the same as the record 1952-53 clip and about 3 per cent. higher than the 1953-54 clip. In April there was a further relaxation of import restrictions (imposed in March, 1952) on trade with countries other than dollar area and Japan, and imports were substantially higher than in 1953. A fall in wool and wheat prices and a lower volume of wheat exports contributed to a decline in exports. In the second half of 1954 there was a debit balance, estimated at £96 million, in the balance of payments on current account compared with a debit balance of £62 million in the first half of the year, and a credit balance of £54 million in the second half of 1953. Quotas were re-imposed on some imports in October. Average earnings per employee rose by 4 per cent., the same as the previous year's rise. In 1954, however, retail and wholesale prices showed practically no change whereas in 1953 they rose by 4 per cent. and 3 per cent. respectively. Bank interest rates were not altered during the year. The three Commonwealth loans were issued at  $4\frac{1}{2}$  per cent. for long dated bonds and most local and semi-governmental loans at  $4\frac{1}{2}$  per cent.

*7th January.*—Reciprocal agreement with the United Kingdom on Social Services became operative.

*8th-15th January.*—Conference of British Finance Ministers held in Sydney with the Prime Minister as Chairman and other Australian Ministers in attendance. Conference reaffirmed the British Commonwealth's objectives of strengthening the internal economies of member countries and of establishing with other countries the widest possible system of multilateral trade and payments.

*19th January.*—It was announced that Australia would sign the declaration extending until 30th June, 1955 the schedule of tariff concessions under the General Agreement on Tariffs and Trade.

*5th February.*—Tariff Board increased to seven by the appointment of three new members.

*25th February.*—Interim decision by Full Arbitration Court on claim by Metal Trades employees for increased margins left rates of pay unchanged (*see* 5th November, 1954).

*4th March.*—Loan of \$54 million from the International Bank, to be used to import capital goods and equipment.

*10th March.*—19th Security Loan of £35 million closed with a subscription of about £50 million.

*1st April.*—United Kingdom Free and Assisted Passages Migration Agreement with Australia renewed for another year.

*9th April.*—Contract for £25 million let to Kaiser group, of U.S.A. for the construction of the Eucumbene—Tumut tunnel and other works in the Snowy Mountains Scheme.

*16th April.*—Revision of the 15 year marketing agreement for Australian meat sold in the United Kingdom, occasioned by the change over from bulk purchasing to private trading.

*27th April.*—£3.9 million contract for building the Upper Tumut power station of the Snowy Mountains Scheme let to a French group of contractors.

*4th June.*—Queensland Industrial Court increased margins to workers under Mechanical Engineering Award.

*16th June.*—Premier of South Australia announced two new uranium finds in north-east of State.

*28th June.*—Australia signed International Tin Agreement as a consuming country. Savings Bank deposits in Australia reached £1,000 million for the first time.

*30th June.*—Loan Council approved borrowing programme of £290 million for 1954-55 comprising Government loans, £200 million, Semi-Governmental loans, £75 million, and Local Government loans, £15 million. Tax reimbursement Grants to States to be £150 million for 1954-55. Australian population census taken.

*1st July.*—Forecast that by 31st July stocks of wheat carried over by the four major producing countries will total 1,601 million bushels compared with 1,061 million in 1953.

*4th July.*—Commonwealth Budget for 1953-54 resulted in a surplus of £56,300,000 Favourable trade balance of £149,400,000 for 1953-54.

*13th July.*—Heavy rain and gales caused damage to 200 miles of coastal area from Queensland to Northern New South Wales with floods in river districts of S.E. Queensland and Northern New South Wales. For the seventh time in five years (and twice in 1954) the New South Wales North Coast towns have been flooded. Damage estimated at £17,000,000.

*16th July.*—Retail prices index for June showed, on average, a slight fall throughout Australia.

*4th August.*—£1,800,000 hydro-electric project approved for Warragamba Dam (New South Wales).

*13th August.*—Wool sold in Australia in 1953-54 season realized £390.7 million, £14 million less than last year, but third highest on record.

*18th August.*—Commonwealth Budget for 1954-55 introduced into the House of Representatives, providing for an estimated expenditure of £1,016,923,000, revenue of £1,017,174,000 and an estimated surplus of £251,000. Major items of estimated expenditure from Consolidated Revenue Fund were:—Defence Services, £200,000,000;

War and Repatriation Services, £118,000,000; National Welfare Fund, £193,000,000; Payments to or for the States, £199,000,000; Capital Works and Services, £104,500,000; Estimated expenditure from Loan Fund included £5,000,000 for War Service Land Settlement and £5,000,000 for redemption of War Savings Certificates. Budget included proposals for increases in expenditure on repatriation benefits (£1,500,000) and social services benefits (£16,500,000); and reductions in taxation of an estimated annual value to taxpayers of £35,000,000. Proposals for reductions in taxation included reduced rates of income tax with increased allowances and exemptions (£23,000,000), sales tax (£10,000,000) and increased annual exemption from pay-roll tax (£1,500,000).

*19th August.*—Miners' Federation convention unanimously agreed to the mechanical extraction of pillar coal. (See 20th September, 1954.)

*31st August.*—New South Wales Government granted £125,000 to New South Wales University of Technology for research in nuclear engineering (previously £50,000 was granted to the University of Sydney for research into nuclear physics). £50 million Commonwealth Cash and Conversion Loan oversubscribed by £1 million.

*17th September.*—Prime Minister officially opened at Rum Jungle first uranium plant established in Australia.

*20th September.*—Mechanical extraction of pillar coal commenced in some New South Wales mines.

*29th September.*—The Tariff Board annual report issued a warning against any general increase in the tariff level and on high cost in industry.

*30th September.*—New import restrictions announced on imported materials and equipment (goods on which quota restrictions were abandoned in April, 1954), on the basis of 100 per cent. of imports in the base year, 1950-51.

*5th October.*—Hon. H. E. Holt, Federal Minister for Labour and National Service, announced the formation of a National Joint Production Council representing management and workers.

*14th October.*—Announced that Commonwealth would grant £24 million for roads in 1954-55.

*29th October.*—Tariff changes increased tariffs on certain imports and increased protection to eight Australian industries. Government bounties on rayon yarn in Australia and scutched flax fibre produced from flax grown in Australia were announced.

*3rd November.*—Bounty paid on sulphuric acid as from 1st July, 1954. Legislation introduced to appropriate £600,000 annually for five years. Waterside workers declared a general strike on the Australian waterfront as a protest against proposed new Stevedoring legislation. (See 5th November.)

*5th November.*—Federal Arbitration Court granted higher margins for skilled workers in a judgment intended to be a guide to other wage fixing authorities. New Stevedoring legislation introduced into House of Representatives which, in effect, gave employers the right to nominate new waterside workers. Previously the right of deciding eligibility for work in the industry had been the prerogative solely of the Unions. Government will pay subsidy on gold produced in Australia, Papua and New Guinea in the next three years.

*19th November.*—Privy Council ruled New South Wales State Transport (Co-ordination) Act is invalid insofar as it applied to interstate Transport.

*22nd November.*—New arrangements for regulation of trading with Japan gave Japanese exporters the opportunity of obtaining a larger share of Australia's trade.

*23rd November.*—Commonwealth Government set target of migrants for 1954-55 at 115,000.

*25th November.*—Commonwealth Government called tenders for equipment necessary for television stations in Sydney and Melbourne.

*2nd December.*—Australian wheat prices guaranteed under the wheat stabilization plan will remain at 12s. 7d. per bushel for 1954-55 season.

*10th December.*—\$25 million loan floated by Australia on United States market oversubscribed.

*14th December.*—£13 million lag in cash section of Commonwealth Government £125 million cash and conversion loan.

*15th December.*—Increased margins for coal industry employees, applying in New South Wales, Queensland, Victoria and Tasmania, announced by Coal Industry Tribunal.

*31st December.*—Governor of Commonwealth Bank announced an increase of 5s. per cent. in rates of interest on bank fixed deposits and Savings Bank deposits, to operate from 1st January, 1955.

## 1955.

When the Treasurer presented the budget in August he said that there were "unmistakable signs of active inflation". A boom had been getting under way in consumer spending and private investment, and labour shortages had become general. No concessions in taxation were made in the budget. During the year several measures were introduced to check inflation. In July the Commonwealth Bank directed the trading banks to restrict new loans which would increase the scale of hire purchase. Towards the end of the year the Prime Minister held a series of conferences with representatives of financial and industrial institutions to enlist their co-operation in checking inflation. Hire purchase and finance companies agreed to restrict the increase in their loans to 10 per cent. above the level at September, 1955. The level of total bank advances changed little in the second half of the year. In spite of lower wool and wheat prices the value of exports was slightly higher than in 1954. The value of imports was much greater than in 1954 and the balance of payments deficit was therefore greater in 1955. Import restrictions were made more severe in April and again in September. Following the judgment of the Commonwealth Court of Conciliation and Arbitration late in 1954, margins for skill were adjusted upwards in many occupations. Nominal wages rose throughout the year, and by December, 1955 were 3½ per cent. higher than in December, 1954. Over the same period average earnings rose by 7 per cent. and retail prices by 4½ per cent. Employment rose steadily during the year, and the number of persons receiving unemployment benefit fell to the lowest level since 1951. Investment by private businesses in 1955 was well above the level of 1954. Dwelling construction also continued at a high level. There were 78,000 new houses completed in 1955, a higher number than in any post-war year except 1952. The number commenced was 3,000 less than in 1954, but was higher than in 1952 or 1953. Secondary production was generally maintained at the high level of the previous year, and output of primary products increased. The wheat acreage in 1955-56 is estimated to have been slightly less than in any other post-war year, but the average yield was estimated to be the highest on record. The total crop was therefore well above the 1954-55 level and nearly as high as in 1953-54. It was predicted that the production of wool in 1955-56 would be over 1,400 million pounds compared with the previous record of about 1,290 million pounds in 1954-55. Net immigration during 1955 was 95,000. This compared with 68,000 in 1954, and 43,000 in 1953 but was still well below the 1950 and 1951 levels of 153,000 and 111,000 respectively.

*1st January.*—Price control in Victoria ended after 14 years. Increased Bank Deposit interest rates.

*12th January.*—Harbour at Cockburn Sound, Western Australia, opened to provide shipping facilities for Kwinana. Kwinana £40 million oil refinery began operations—to be in production by mid-March.

*4th February.*—Announced that arrangements completed for issue of £6 million public loan in Switzerland to Commonwealth Government.

*7th February.*—Australia's first aluminium plant, at Bell Bay, Tasmania, began production.

*17th February.*—Special conference agreed that Waterside Workers Federation should have right to nominate waterside recruits; counteracts legislation passed last November. (see 5th November, 1954).

*22nd February.*—Guthega power station in operation, first power generated from Snowy Mountains Hydro-electric scheme being fed into New South Wales electricity system.

*24th February.*—Disastrous floods cover large areas of Central West New South Wales and Hunter Valley. Damage estimated at £15 million to townships, stock and grazing lands, and many lives lost.

*18th March.*—Government plan announced for sale to tenants of houses built under Commonwealth and State Housing Agreement. Maximum advance to be £2,750 repayable over 45 years at 4½ per cent. interest, minimum deposit 5 per cent. of first £2,000 of sale price, repayments of principal included in rent previously paid to be credited as part of deposit.

*19th March.*—Details announced of new 15 year 5½ million dollar loan from International Bank of Reconstruction to Australia at 4½ per cent. interest, including Bank's 1 per cent. commission.

*21st March.*—New import restrictions imposed, cutting Australia's rate of imports by about 20 per cent; to operate from 1st April.

*23rd March.*—First commercial shipment of Australian uranium oxide, worth about £200,000, dispatched to United States.

*15th April.*—All price control ended in New South Wales.

*20th April.*—Broken Hill Pty. Company announced plans for spending £67 million on plant in next five years at Newcastle and Port Kembla.

*12th May.*—Increase of interest rates for home purchase and building finance from 5 per cent. to 5½ per cent. announced by most of major life assurance companies in Australia.

*16th May.*—Commonwealth Government to build ammunition filling and assembly factory at St. Marys, near Sydney, at estimated cost of £23 million.

*5th June.*—Australia's 1955-56 immigration programme to be increased to basic intake of 125,000 migrants (including 70,000 under assisted-passages scheme).

*10th June.*—Full High Court in reserved judgment declared invalid recent legislation imposing a road-tax on interstate road hauliers.

*19th June.*—Commonwealth abandons control of tea.

*21st-23rd June.*—At annual Loan Council meeting, Prime Minister rejected proposals by State Premiers for substantially increased loan programme to finance State Works in 1955-56. Loan Council, by majority vote, approved borrowing programme of £193,500,000 for public works in 1955-56. Prime Minister announced that Commonwealth Government would grant States £157 million taxation reimbursements for 1955-56, an increase of £7 million on 1954-55.

*19th July.*—Decision by Federal Cabinet to cut subsidy on local consumption of butter and cheese, followed by increase in butter and cheese prices. General Motors-Holden's announced £21.6 million expansion programme for plants throughout Australia.

*26th-28th July.*—Price control re-imposed in New South Wales and South Australia.

*9th August.*—Western Australian State Arbitration Court increased Western Australian basic wage by 5s. 11d.

*14th August.*—Prime Minister stated that Australia would not extend trading concessions to Japan under G.A.T.T.

*22nd August.*—First International Wool Textile Research Conference to be held in Australia opened in Sydney. Attended by 100 research workers, including 52 scientists from overseas.

*23rd August.*—Contract system of shipping Australian wool exports to Europe and United Kingdom broke down as British and European shipowners refused to renew contracts at less than 10 per cent. increase in freight rates.

*24th August.*—Commonwealth Budget for 1955-56 introduced into the House of Representatives, providing for an estimated expenditure of £1,123,599,000, revenue of £1,123,769,000 and an estimated surplus revenue of £170,000. The major items of estimated expenditure from Consolidated Revenue Fund were:—Defence Services, £190,000,000; War and Repatriation Services, £121,000,000; National Welfare Fund, £218,500,000; Payments to or for the States, £220,000,000; Capital Works and Services, £104,000,000. Estimated expenditure from Loan Fund includes £8,500,000 for War Service Land Settlement and £3,000,000 for redemption of War Savings Certificates. The Budget included proposals for increases in expenditure on repatriation benefits (£1,750,000) and social services benefits (£11,000,000).

*26th August.*—Overall prices of Australian iron and steel raised by 5 per cent.

*30th August.*—New £30 million hot-strip steel mill of Australian Iron and Steel Ltd. at Port Kembla (N.S.W.) opened by the Prime Minister who described it as "a great and historic event in the development of Australia".

*12th-21st September.*—Prime Minister called series of conferences with representatives of trading banks, hire purchase companies, and trade-union leaders to discuss financial aspects of Australian economic problems and suggested remedies. Fresh tightening of bank credit.

*13th September.*—Bank of New South Wales Savings Bank Ltd. registered in Sydney. The first new savings bank established in Australia for 40 years.

*1st October.*—Increase of  $7\frac{1}{2}$  per cent. in shipping freights for Australian exports to most oversea countries became effective. Reductions of from  $7\frac{1}{2}$  per cent. to 25 per cent. operated on licensed imports.

*6th October.*—15 million dollars (£A6.8 million) loan successfully negotiated in Canada by Australian Government.

*4th November.*—Legislation passed to re-introduce automatic quarterly basic wage adjustments in New South Wales.

*18th November.*—Queensland and New South Wales coal producers combined to form Australian Coal Association with main object of trying to find new and improved ways of producing, preparing and marketing coal.

*22nd November.*—For the first time in history, brown coal coke was successfully used at a Richmond (Vic.) foundry to smelt iron commercially.

*26th November.*—Reduction of about 10 per cent. in Queensland shearing rates under the State Shearing industry award ordered in Industrial Court judgment of 25th November.

*13th December.*—Trade Unions case for increased basic wages and restoration of quarterly cost of living adjustments brought before Arbitration Court.

*17th December.*—Commonwealth £30 million cash Loan undersubscribed by £2 million. Commonwealth Arbitration Court upholds appeal by Public Service Board against salary increases granted under "Castieau" Award of June, 1955, based on metal trades " $2\frac{1}{2}$  times" formula; Court, however, granted certain adjustments.

## CHRONOLOGICAL TABLE.

## CHRONOLOGICAL TABLE OF CHIEF EVENTS SINCE THE ESTABLISHMENT OF SETTLEMENT IN AUSTRALIA.

NOTES.—For each earlier year this Table contains rarely more than two or three items; for recent years, however, in order to provide a wide cover of events, etc., it includes a much greater number. Both the nature of the Table and considerations of space render necessary a continual reduction in these items, and for more information the reader should therefore consult earlier issues.

The Government was centralized in Sydney, New South Wales, up to 1825, when Tasmania (Van Diemen's Land) was made a separate colony. In the Table the names now borne by the States serve to indicate the localities.

Year.

- 1788 N.S.W.—Arrival of "First Fleet", under Captain Arthur Phillip, at Botany Bay. Land in vicinity being found unsuitable for settlement, the expedition moved to Sydney Cove, and formal possession of the colony was taken on 26th January. Formal proclamation of colony and establishment of regular government on 7th February. Branch Settlement established at Norfolk Island. French navigator La Pérouse visited Botany Bay. First cultivation of wheat and barley. First grape vines planted.
- 1789 N.S.W.—First wheat harvest at Parramatta, near Sydney. Discovery of Hawkesbury River.
- 1790 N.S.W.—Scarcity of provisions. "Second Fleet" reached Port Jackson. Landing of the New South Wales Corps.
- 1791 N.S.W.—Arrival of "Third Fleet". Territorial seal brought by Governor King.
- 1792 N.S.W.—Visit of *Philadelphia*, first foreign trading vessel.
- 1793 N.S.W.—First free immigrants arrived in *Bellona*. First Australian church opened at Sydney. Tas.—D'Entrecasteaux discovered the Derwent River.
- 1794 N.S.W.—Establishment of settlement at Hawkesbury River.
- 1795 N.S.W.—Erection of the first printing press at Sydney. Descendants of strayed cattle discovered at Cowpastures, Nepean River.
- 1796 N.S.W.—First Australian theatre opened at Sydney. Coal discovered by fisherman at Newcastle.
- 1797 N.S.W.—Introduction of merino sheep from Cape of Good Hope.
- 1798 Tas.—Insularity of Tasmania proved by voyage of Bass and Flinders.
- 1800 N.S.W.—Hunter River coal-mines worked. First Customs House in Australia established at Sydney. Flinders' charts published.
- 1801 N.S.W.—First colonial manufacture of blankets and linen.
- 1802 Vic.—Discovery of Port Phillip by Lieut. Murray. Q'land.—Discovery of Port Curtis and Port Bowen by Flinders. S.A.—Discovery of Spencer's and St. Vincent Gulfs by Flinders.
- 1803 N.S.W.—First Australian wool taken to England by Capt. Macarthur. Issue of *The Sydney Gazette*, first Australian newspaper. Vic.—Attempted settlement at Port Phillip by Collins. Discovery of Yarra by Grimes. Tas.—First settlement formed at Risdon by Lieut. Bowen.
- 1804 Vic.—Abandonment of settlement at Port Phillip. Tas.—Foundation of settlement at Hobart by Collins.
- 1805 N.S.W.—First extensive sheep farm established at Camden by Capt. Macarthur.
- 1806 N.S.W.—"The great flood" on the Hawkesbury. Shortage of provisions. Tas.—Settlement at Launceston.
- 1807 N.S.W.—First shipment of merchantable wool (245 lb.) to England.
- 1808 N.S.W.—Deposition of Governor Bligh.
- 1809 N.S.W.—Free school established.
- 1810 N.S.W.—Post Office officially established at Sydney.
- 1813 N.S.W.—Passage across Blue Mountains discovered by Wentworth, Lawson and Blaxland. Macquarie River discovered by Evans.
- 1814 N.S.W.—Flinders suggested the name "Australia", instead of "New Holland". Creation of Civil Courts.

## Year.

- 1815 N.S.W.—First steam engine in Australia erected at Sydney. Lachlan River discovered by Evans. Tas.—Arrival of first immigrant ship with free settlers. First export of wheat to Sydney.
- 1816 N.S.W.—Sydney Hospital opened.
- 1817 N.S.W.—Oxley's first exploration inland. Discovery of Lakes George and Bathurst and the Goulburn Plains by Meehan and Hume. First bank in Australia—Bank of New South Wales—opened at Sydney.
- 1818 N.S.W.—Liverpool Plains, and the Peel, Hastings and Manning Rivers discovered by Oxley, and Port Essington (N.T.) by Captain King.
- 1819 N.S.W.—First Savings Bank in Australia opened at Sydney.
- 1820 Tas.—First importation of pure merino sheep from Camden Park (N.S.W.) flocks.
- 1821 Tas.—Establishment of penal settlement at Macquarie Harbour.
- 1822 N.S.W.—Formation of Agricultural Society of New South Wales.
- 1823 N.S.W.—New South Wales Judicature Act passed. Discovery of gold at Fish River by Assistant-Surveyor McBrien. Qld.—Brisbane River discovered by Oxley.
- 1824 N.S.W.—Constituted a Crown Colony. Executive Council formed. Establishment of Supreme Court at Sydney, and introduction of trial by jury. First Australian Enactment (Currency Bill) passed by the Legislative Council. Proclamation of freedom of the press. First manufacture of sugar. Vic.—Hume and Hovell, journeying overland from Sydney, arrived at Corio Bay. Qld.—Penal settlement founded at Moreton Bay (Brisbane). Fort Dundas Settlement formed at Melville Island, N. Terr.
- 1825 Tas.—Van Diemen's Land (Tasmania) proclaimed a separate colony. Qld.—Major Lockyer explored Brisbane River to its source and discovered coal.
- 1826 N.S.W.—Settlement in Illawarra District. Vic.—Settlement at Corinella, Western Port, formed by Captain Wright.
- 1827 Qld.—Darling Downs and the Condamine River discovered by Allan Cunningham. W.A.—Military settlement founded at King George's Sound by Major Lockyer. First official claim of British Sovereignty over all Australia.
- 1828 N.S.W.—Second constitution. First Census. Sturt's expedition down Darling River. Gas first used at Sydney. Richmond and Clarence Rivers discovered by Captain Rous. Vic.—Abandonment of settlement at Western Port. Qld.—Cunningham discovered a route from Brisbane to the Darling Downs, and explored Brisbane River.
- 1829 N.S.W.—Sturt's expedition down Murrumbidgee River. W.A.—Foundation of settlement at Swan River. Foundation of Perth.
- 1830 N.S.W.—Sturt, voyaging down Murrumbidgee and Murray Rivers, arrived at Lake Alexandrina. Tas.—Black line organized to force aborigines into Tasman's Peninsula, but failed. Small remnant subsequently (1830 to 1835) persuaded to settle on Flinders Island.
- 1831 N.S.W.—Crown lands first disposed of at auction. Mitchell's explorations north of Liverpool Plains. SS. *Surprise*, first steamship built in Australia, launched at Sydney. First coal shipped from Australian Agricultural Company's workings at Newcastle, N.S.W. First assisted immigration to N.S.W. S.A.—Wakefield's first colonization committee. W.A.—Appointment of Executive and Legislative Councils.
- 1832 N.S.W.—State Savings Bank established.
- 1833 N.S.W.—First School of Arts established at Sydney.
- 1834 N.S.W.—First settlement at Twofold Bay. Vic.—Settlement formed at Portland Bay by Henty Brothers. S.A.—Formation of the South Australian Association. W.A.—Severe reprisals against Murray River natives at Pinjarrah for continued attacks on settlers.
- 1835 Vic.—John Batman arrived at Port Phillip; foundation of Melbourne.
- 1836 N.S.W.—Mitchell's overland journey from Sydney to Cape Northumberland. Vic.—Proclamation of Port Phillip district as open for settlement. S.A.—Settlement founded at Adelaide under Governor Hindmarsh.

Year.

- 1837 N.S.W.—Appointment in London of Select Committee on Transportation. Vic.—First overlanders from Sydney arrived at Port Phillip.
- 1838 N.S.W.—Discontinuance of assignment of convicts. Qld.—Settlement of German missionaries at Brisbane—first free colonists. S.A.—“Overlanding” of cattle from Sydney to Adelaide along the Murray route by Hawden and Bonney. Settlement at Port Essington, Northern Territory, formed by Captain Bremer.
- 1839 N.S.W.—Gold found at Vale of Clwydd by Count Strzelecki. S.A.—Lake Torrens discovered by Eyre. Port Darwin discovered by Captain Stokes. W.A.—Murchison River discovered by Captain Grey.
- 1840 N.S.W.—Abolition of transportation to New South Wales. Land regulations—proceeds of sales to be applied to payments for public works and expenditure on immigration. Vic.—Determination of northern boundary. Qld.—Pensal settlement broken up and Moreton Bay district thrown open. S.A.—Eyre began his overland journey from Adelaide to King George’s Sound.
- 1841 N.S.W.—Gold found near Hartley. W.A.—Completion of Eyre’s overland journey from Adelaide to King George’s Sound. New Zealand proclaimed a separate colony.
- 1842 N.S.W.—Incorporation of Sydney. Vic.—Incorporation of Melbourne. S.A.—Discovery of copper at Kapunda.
- 1843 N.S.W.—First Representative Constitution (under Act of 1842). Qld.—Moreton Bay granted legislative representation as a distinct electoral division.
- 1844 Qld.—Leichhardt’s expedition to Port Essington (N.T.). S.A.—Sturt’s last expedition inland.
- 1845 N.S.W.—Mitchell’s explorations on the Barcoo. Qld.—Explorations by Mitchell and Kennedy. S.A.—Discovery of the Burra copper deposits. Sturt discovered Cooper’s Creek.
- 1846 N.S.W.—Initiation of meat-preserving. Qld.—Foundation of settlement at Port Curtis. S.A.—Proclamation of North Australia.
- 1847 N.S.W.—Iron-smelting commenced near Berrima. Overland mail established between Sydney and Adelaide. Qld.—Explorations by Leichhardt, Burnett and Kennedy.
- 1848 N.S.W.—National and Denominational School Boards established. Qld.—Leichhardt’s last journey. Kennedy speared by the blacks at York Peninsula. Chinese brought in as shepherds.
- 1849 N.S.W.—Indignation of colonists at arrival of convict ship *Hashemy*. Exodus of population to gold-fields of California. Vic.—*Randolph* prevented from landing convicts. Qld.—Assignment of *Hashemy* convicts to squatters on Darling Downs. W.A.—Commencement of transportation to Western Australia.
- 1850 N.S.W.—Final abolition of transportation. First sod of first Australian railway turned at Sydney. Sydney University founded. Vic.—Gold discovered at Clunes. Representative government granted. S.A.—Representative government granted. W.A.—Pearl oysters found by Lieut. Helpman at Saturday Island Shoal. Tas.—Representative government granted.
- 1851 N.S.W.—Payable gold discovered by Hargraves at Lewis Ponds and Summerhill Creek. Vic.—Port Phillip created an independent colony under the name of Victoria. Discovery of gold in various localities. W.A.—Proclamation of Legislative Council Act.
- 1852 N.S.W.—Arrival of *Chusan*, first P. and O. mail steamer from England. S.A.—First steamer ascended the Murray River to the junction with the Darling. Tas.—Meeting of first elective Council protested against transportation. Payable gold discovered at The Nook, near Fingal, and at Nine Mile Springs.
- 1853 Tas.—Abolition of transportation. Vic.—Melbourne University founded.
- 1854 Vic.—Opening of first Victorian railway—Flinders Street to Port Melbourne. Riots on Ballaarat gold-fields. Storming of the Eureka Stockade, 3rd Dec. Telegraph first used.

Year.

- 1855 N.S.W.—Opening of railway—Sydney to Parramatta. Mint opened.
- 1856 N.S.W.—Pitcairn Islanders placed on Norfolk Island. W.A.—A. C. Gregory's expedition in search of Leichhardt.  
Responsible Governments in N.S.W., Vic., S.A. and Tas. (Act of 1855).
- 1857 N.S.W.—Select Committee on Federation. Vic.—Manhood suffrage and vote by ballot. S.A.—Passage of Torrens' Real Property Act.
- 1858 N.S.W.—Establishment of manhood suffrage and vote by ballot. Telegraphic communication between Sydney, Melbourne and Adelaide. Qld.—Canooona gold rush.  
Population of Australia reached 1,000,000.
- 1859 Qld.—Proclamation of Queensland as separate colony. Tas.—First submarine cable, via Circular Head and King Island to Cape Otway.
- 1860 Vic.—Burke and Wills left Melbourne and crossed to Gulf of Carpentaria. S.A.—Copper discoveries at Wallaroo and Moonta. McDouall Stuart reached centre of continent and named "Central Mount Stuart".
- 1861 N.S.W.—Anti-Chinese riots at Lambing Flat and Burrangong gold-fields. Opening of first tramway in Sydney. Regulation of Chinese immigration. Vic.—Burke and Wills perished at Cooper's Creek, near Innamincka, S.A.
- 1862 N.S.W.—Abolition of State aid to religion. Real Property (Torrens) Act passed. S.A.—Stuart crossed the Continent from south to north. W.A.—First export of pearl-shell.
- 1863 Vic.—Intercolonial Conference at Melbourne. S.A.—Northern Territory taken over. W.A.—Initiation of settlement in the north-west district. Henry Maxwell Lefroy discovered and traversed area now comprised in the Coolgardie-Kalgoorlie gold-field.
- 1864 Qld.—First sugar made from Queensland cane.
- 1865 N.S.W.—Destruction by fire of St. Mary's Cathedral, Sydney.
- 1866 N.S.W.—Passage of Public Schools Act of (Sir) Henry Parkes. S.A.—Introduction of camels for exploration, etc.
- 1867 Vic.—Imposition of protective tariff. Qld.—Discovery of gold at Gympie.
- 1868 W.A.—Arrival of *Hougomont*, last convict ship.
- 1869 Vic.—Record gold nugget "Welcome Stranger" 2,284 oz. found near Dunolly. W.A.—First telegraph line opened from Perth to Fremantle.
- 1870 N.S.W.—Intercolonial Exhibition opened at Sydney. Imperial troops withdrawn. Vic.—Intercolonial Congress at Melbourne. S.A.—Commencement of trans continental telegraph.
- 1871 N.S.W.—Permanent military force raised. W.A.—Forrest's explorations. Tas.—Discovery of tin at Mount Bischoff.
- 1872 Vic.—Mint opened. S.A.—Cable from Java to Port Darwin. Completion of transcontinental telegraph line.
- 1873 N.S.W.—Intercolonial Conference at Sydney. First volunteer encampment. Inauguration of mail service with San Francisco.
- 1874 N.S.W.—Triennial Parliaments Act passed. Intercolonial Conference. S.A.—University of Adelaide founded. W.A.—John and Alexander Forrest arrived at Overland Telegraph from Murchison.
- 1875 Qld.—Transfer of Port Albany Settlement to Thursday Island.
- 1876 N.S.W.—Completion of cable—Sydney to Wellington. W.A.—Giles crossed colony from east to west. Tas.—Death of Truganini, last representative of Tasmanian aboriginals.
- 1877 W.A.—Opening of telegraphic communication with South Australia.  
Population of Australia reached 2,000,000.
- 1878 Qld.—Restriction of Chinese immigration.  
Introduction of telephone into Australia.
- 1879 N.S.W.—First artesian bore at Kallara Station, near Bourke. First steam tramway. W.A.—A. Forrest's explorations in the Kimberley district. and discovery of the Fitzroy pastoral country.

- Year.
- 1880 N.S.W.—Public Instruction Act passed. Vic.—First Australian Telephone Exchange opened in Melbourne.  
Federal Conference at Melbourne and Sydney.
- 1881 N.S.W.—Further restrictions on Chinese immigration.  
First Australia-wide censuses on same date taken.
- 1882 W.A.—Nugget of gold found between Roebourne and Cossack.
- 1883 N.S.W.—Discovery of silver at Broken Hill. Completion of railway between New South Wales and Victoria. Qld.—Annexation of New Guinea—repudiated by Imperial authorities.  
Federal Conference held at Sydney. Federal Council created.
- 1884 Federation Bill passed in Victoria and rejected in New South Wales. British protectorate declared over New Guinea.
- 1885 N.S.W.—Military contingent sent to the Sudan. Opening of the Broken Hill Proprietary Silver Mines. W.A.—Gold found by prospectors on the Margaret and Ord Rivers in the Kimberley district. Tas.—Silver-lead discovered at Mount Zeehan.
- 1886 Tas.—Discovery of gold and copper at Mount Lyell.  
First session of Federal Council held at Hobart on 26th January.
- 1887 W.A.—Gold discovered at Southern Cross.  
First "Colonial" Conference in London. Australasian Naval Defence Force Act passed.
- 1888 N.S.W.—Restrictive legislation against Chinese, imposing poll-tax of £100.  
Qld.—Railway communication opened between Sydney and Brisbane.  
Conference of Australian Ministers at Sydney to consider question of Chinese immigration. First meeting of the Australasian Association for the Advancement of Science held in Sydney.
- 1889 Qld.—Railway communication established between Brisbane and Adelaide.  
W.A.—Framing of new Constitution. Tas.—University of Tasmania founded.  
Population of Australia reached 3,000,000.
- 1890 W.A.—Responsible Government granted.  
Meeting at Melbourne of Australasian Federation Conference.
- 1891 N.S.W.—Arrival of Australian Auxiliary Squadron. Cessation of assisted immigration. W.A.—Discovery of gold on the Murchison.  
First Federal Convention in Sydney, draft bill framed and adopted.
- 1892 W.A.—Discovery of gold at Coolgardie.
- 1893 Financial crisis, chiefly affecting the eastern States.
- 1894 S.A.—Women's suffrage granted—first State to do so.
- 1895 N.S.W.—Free-trade tariff. Land and income taxes introduced.  
Conference of Premiers on Federation at Hobart.
- 1896 N.S.W.—People's Federal Convention at Bathurst. Vic.—Wages Board system established by Act of Parliament.
- 1897-8 Sessions of Federal Convention at Adelaide, Sydney and Melbourne.
- 1898 Draft Federal Constitution Bill submitted to electors in Victoria, New South Wales, South Australia and Tasmania. Requisite statutory number of votes not obtained in New South Wales.

Year.

- 1899 First contingent of Australian troops sent to South Africa. Conference of Premiers in Melbourne to consider amendments to Federal Constitution Bill. Referendum—Bill accepted by New South Wales, Victoria, Queensland, South Australia and Tasmania. First Labour Government (Queensland).

Japanese landed at Rabaul. Fall of Singapore. Darwin bombed. United States armed forces landed in Australia. Headquarters of South-West Pacific Command set up by General Douglas MacArthur in Melbourne. Coral Sea Battle. Japanese midget submarines in Sydney Harbour. Australian cruisers in attack on Solomon Islands. Australians withdrew from Kokoda. Japanese forced to withdraw from Milne Bay. Owen Stanley Ranges offensive. Ninth Australian Division at El Alamein (North Africa). Kokoda recaptured. Further Australian successes in New Guinea.

## Year.

- 1943 Price Stabilization Scheme. Mortgage Bank Department of Commonwealth Bank opened. National Works Council formed.

Australian forces combined with American forces to recapture many places in New Guinea. Commencement of long series of amphibious operations in which R.A.N. ships took part. R.A.A.F. from 1943 till end of war operated on all fronts.

- 1944 Pay-as-you-earn taxation operated from 1st July. Referendum refused Commonwealth Government increased powers in post-war period.

Australian advances in Northern New Guinea. Allied invasion of France. Australians landed on New Britain; took over from Americans in Bougainville, Solomon Islands, and at Aitape, New Guinea.

- 1945 Captain Cook Dock opened by Governor-General, the Duke of Gloucester. Re-establishment and Employment Act. Banking Act to regulate banking and to protect the currency and public credit. Australia ratified United Nations Charter.

Cessation of hostilities in Europe, 8th May. Cessation of hostilities against Japan, 15th August. Australian forces operating in New Guinea, Solomon Islands and Borneo. General demobilization commenced.

- 1946 Cessation of man-power controls. Commonwealth Government accepted responsibility for supply and maintenance of BCOF in Japan. Inauguration of Commonwealth Employment Service. Joint Organization (Wool Disposal) commenced operations. Act to establish National University at Canberra. Coal Industry Act providing, *inter alia*, for a joint Commonwealth-State authority. Commonwealth and State agreement on housing. Trans-Australia Airlines (Government) began operations. Constitution Alteration Referendum granted powers in regard to social services to Commonwealth. Double taxation relief agreement between Australia and Britain. Approval for establishment of guided missile range in Central Australia.

- 1947 End of demobilization. Census of Australia—first since 1933. Full High Court declared invalid section of Banking Act 1945 prohibiting banks from conducting business for State authorities. Legislation to nationalize trading banks enacted (*see* 1948). Australian National Antarctic Research Expedition to establish scientific research station at Heard Island. First "displaced persons" reached Australia.

- 1948 Forty-hour week effective throughout Australia. Membership of Commonwealth Parliament increased. Constitution Alteration (Rents and Prices) proposal defeated. High Court declared invalid vital sections of Banking Act 1947. International Trade Organization Act (General Agreement on Tariffs and Trade and Havana Charter for International Trade Organization).

- 1949 Nationality and Citizenship Act operative. Broadcasting Control Board came into operation. New Guinea placed under international trusteeship and administrative union of Papua and New Guinea established. Certain Australian aboriginals for first time granted franchise at Federal elections. Establishment of New South Wales University of Technology. Dispute over hours, wages and leave claims rendered all Australian black coal mines idle from 27th June until 15th August, causing restrictions in dependent services and unemployment. Australian Whaling Commission established. Reduction of 25 per cent. in Australia's imports from dollar areas. Devaluation of sterling against American dollar, and commensurate devaluation of Australian pound to two dollars twenty-four cents. Commencement of Snowy Mountains Hydro-electric Power Scheme. Australia's population reached 8,000,000.

## Year.

- 1950 Severe flooding for twenty-five years in south-east corner of New South Wales. Arrival of Field-Marshal Sir William Slim, Chief of Imperial General Staff, for defence talks. Disastrous floods on north coast of New South Wales. Following attacks by forces of North Korea on forces of Republic of Korea and failure of Security Council's call for immediate cessation of hostilities, the Council called on members to furnish assistance to Republic of Korea. Australian naval and air forces in vicinity of Korea placed at disposal of United Nations, and decision to withdraw Australian troops with BCOF in Japan countermanded. Loan of \$100,000,000 for Australia by International Bank for Reconstruction and Development. Inauguration of modified free medicine scheme. All volunteers in Australian Regular Army and Citizen Military Forces to be liable for service anywhere in the world—but only in the event of a major war. Australian ground troops joined British Commonwealth Brigade in Korean conflict. Adult franchise for Victorian Legislative Council replaced existing franchise dependent on property qualifications. Commonwealth Court of Conciliation and Arbitration ruling of increase of £1 in male basic wage, and increase in female basic wage from 54 to 75 per cent. of male rate. Railway dispute caused cessation of railway services in Victoria from 16th October to 8th December, and in South Australia from 23rd October to 19th November. National Service Bill to establish a system of national training for defence forces of Australia introduced in House of Representatives. Commonwealth Government to contribute £31,250,000 to Colombo Plan for Co-operative Economic Development in South and South-east Asia and £3,500,000 for technical assistance programme. Conference of Commonwealth Prime Ministers in London.
- 1951 Opening of Jubilee celebrations to mark the fiftieth year of Australian federation. British Government's confirmation of transfer of Heard Island and the Macdonald Islands (Southern Indian Ocean) to Australia as from 26th December, 1947. Governor-General granted double dissolution of nineteenth Parliament. Return of Menzies-Fadden Government after general election. The Governor-General opened the twentieth Parliament with special Jubilee ceremonies. Official cessation of hostilities with Germany. Conferences at all levels of business, finance, and working classes called by Prime Minister to discuss methods of dealing with adverse economic trends. Security Treaty signed in Washington by the United States of America, Australia and New Zealand for action in the event of an armed attack in the Pacific. Japanese Peace Treaty signed at San Francisco. Constitution Alteration (Powers to deal with Communists and Communism) referendum defeated. Australia to provide an additional infantry battalion for United Nations forces in Korea. Third Conference of Government Statisticians of the British Commonwealth held in Canberra. Opening of new Legislative Council of Papua and New Guinea, which included, for the first time in the history of Australian Legislature, representatives of the native peoples. New mace presented to the House of Representatives by the House of Commons, to commemorate the Australian Commonwealth Jubilee.
- 1952 Nuclear experiments commenced at National University, Canberra. Refusal by Commonwealth Conciliation Commissioner of an application by eleven metal trades unions for marginal wage increases ("Galvin" Award) affected more than 250,000 metal trades workers throughout Australia. Widespread bushfires in New South Wales, Victoria and Australian Capital Territory. Prototype of first unmanned radio-controlled jet aircraft designed and built in Australia successfully tested. Death of His Majesty King George VI.; Princess Elizabeth proclaimed Queen. Third British Commonwealth Scientific Official Conference held in Canberra and Melbourne. Good rains in

Year.

1952—  
contd.

northern areas of New South Wales ended the worst drought experienced there for many years. Important high-grade uranium deposits discovered at Rum Jungle, Northern Territory. 1st Battalion, The Royal Australian Regiment, sailed from Sydney for service in Korea. Australia ratified Pacific Pact between United States of America, New Zealand and Australia. Commonwealth Bank prohibited the establishment of further import credits until licences had been obtained for the goods involved. Severe restrictions imposed on imports from all sources and on amounts available for Australians travelling overseas. Agreement between the Commonwealth and South Australian Governments and the Combined Development Agency of the British and American Governments, on the development of uranium deposits at Radium Hill, South Australia. At Berala, near Sydney, in first collision between two electric trains in New South Wales to result in fatalities, ten persons killed and more than 100 injured. Good rains brought relief to north and central Australia, after prolonged drought conditions. Nine people died and 22 were injured in a level-crossing smash at Boronia in Victoria. An amendment to the Conciliation and Arbitration Act provided for a limited right of appeal to the Commonwealth Court of Conciliation and Arbitration from decisions of Conciliation Commissioners, and for an increase in the number of Judges. Many towns in central and south-west New South Wales experienced one of the worst floods in their history. In the Basic Wage and Standard Hours Inquiry before the Commonwealth Court of Conciliation and Arbitration, employers' organizations sought reductions in wages, longer hours and abandonment of the system of automatic quarterly cost of living adjustments to the basic wage. (See 1953.) Representatives of New Zealand, the United States of America and Australia met at Honolulu to consider the Pacific defence pact (A.N.Z.U.S.). Qantas Empire Airways began first direct service between Sydney and Johannesburg, South Africa, via Perth, Cocos Islands and Mauritius. Commonwealth legislation requiring employers to give preference in employment to ex-servicemen extended for three years. Commonwealth Government disposed of shares in Commonwealth Oil Refineries to the Anglo-Iranian Oil Co. Britain's first atomic weapon detonated on the Monte Bello Islands, near the north-west coast of Australia. Agreement between the Commonwealth Government and Australian National Airways Pty. Ltd. guaranteeing the latter a loan to purchase new aircraft and an equal share with Trans-Australia Airlines in government business, and reducing air route charges. British Commonwealth Economic Conference in London attended by Prime Minister of Australia. Good rains in Northern Territory terminated prolonged drought there.

- 1953 Ten-year agreement signed for sale to the United States of America of uranium from deposits at Rum Jungle, Northern Territory. Inquiry by Royal Commission into the establishment of television in Australia. Television Act authorized the establishment of both National and Commercial television transmitting stations. Commonwealth Bank Act 1953 and Banking Act 1953 passed. Premiers' Conference in Canberra failed to reach agreement on return of income tax powers to States. 2nd Battalion sailed from Sydney for service in Korea. Bill introduced into Northern Territory Legislative Council to give citizenship rights to Northern Territory aborigines, except those committed to State care (assented to 17th April). Atomic Energy Act 1953, established Atomic Energy Commission. H.M.A.S. *Sydney* sailed from Melbourne for England with Coronation Contingent. National Health Bill 1953 consolidated legislation relating to pharmaceutical, medical and hospital benefits and other health services. Australian designed and built radio-controlled jet plane for use in guided missile research successfully tested. Field-Marshal Sir William Slim sworn in as Governor-General of Australia.

Year.

1953—  
*contd.*

Australia and United States of America signed conventions to end double taxation between the two countries. Australian Loan Council adopted programme of £231,000,000 for 1953-54. Borrowing programme of £90,486,000 by Local Government and Semi-Governmental Authorities also approved. Loan Council decided to retain ruling interest rates on public loans for at least twelve months. Full Court of Victoria upheld validity of Electoral Reform Bill providing for two State seats for each Commonwealth Electorate. Coronation of Her Majesty Queen Elizabeth the Second. Britain and Australia signed agreement for reciprocity in social services benefits. Conference of Commonwealth Prime Ministers on defence, economic and political issues held in London. Commonwealth Medical Benefits Scheme commenced. Korean armistice signed by United Nations and Communist Forces at Panmunjom, bringing to an end over three years of fighting. Pearl Fisheries Act providing for stricter control of pearl fisheries. Commonwealth Court of Conciliation and Arbitration refused applications by employers for reduction of current basic wages and for an increase of standard hours of work, and also refused applications by unions for increases of basic wages. The employers' applications for abandonment of the system of automatic adjustment of the basic wage in accordance with retail price index numbers were, however, granted. Arrangements made with United Kingdom for sharing cost of guided missile research at Woomera, South Australia. Commonwealth Trading Bank of Australia commenced operations. Oil, stated to be a very high grade crude oil, discovered at Exmouth Gulf, about 680 miles north of Perth.

1954

Her Majesty the Queen and His Royal Highness the Duke of Edinburgh arrived in Sydney on 3rd February to commence their tour of Australia, making the first visit of the reigning sovereign to Australia. Australian and Japanese Governments exchanged notes for the submission of dispute over extent of Australian sovereignty over sea-bed and control of pearl fisheries to the International Court of Justice. Agreement signed on a provisional régime to regulate Japanese pearling in Australian waters in the interim. The Australian Antarctic Research Expedition established a station at Mawson on the coast of MacRobertson Land to conduct meteorological and other research. An Australian Services mission visited Singapore for a conference between Service representatives of the United Kingdom, the United States of America, Australia, and New Zealand. Her Majesty the Queen opened the Federal Parliamentary session and unveiled the Australian-American War Memorial at Canberra. Australian Academy of Science incorporated by Her Majesty the Queen. New South Wales Government granted Sydney University £100,000 for nuclear research. Inaugural meeting of Nuclear Research Foundation. Commonwealth grant of £50,000 to Sydney University for fundamental nuclear research. Royal tour of Australia ended on 1st April. Contract for £25 million let to Kaiser group, of the United States of America, for the construction of the Eucumbene-Tumut tunnel and other works in the Snowy Mountains Scheme. Mr. and Mrs. Vladimir Petrov of the Soviet Embassy granted political asylum. On 25th April, the Soviet Government informed the Australian Government that it had decided to recall its Embassy in Australia, and the Ambassador and his staff sailed from Fremantle on 25th April. The Australian Embassy left Moscow on the same date. Royal Commission into espionage in Australia set up. Political conference on Korea and Indo-China opened in Geneva, with Australia represented by the Minister for External Affairs. £3.9 million contract for building the Upper Tumut power station of the Snowy Mountains Scheme let to a French group of contractors. Royal Commission into Television recommended introduction of television into Australia as soon as practicable. Australia took part in Five Power military talks, at Washington, on South-East Asia. Premier

Year.

1954—  
contd.

of South Australia announced two new uranium finds in north-east of State. Australian population census taken. Carnegie Corporation granted £250,000 to help finance the building of a giant radio telescope (the balance, £300,000 to be found in Australia). Pan Indian Ocean Science Congress held in Perth. Australia at the Manila Conference signed a treaty pledging collective defence against aggression in South-East Asia and the South-West Pacific. 3rd Battalion withdrawn from Korea. At Rum Jungle, Prime Minister officially opened first uranium treatment plant established in Australia. Minister for Labour and National Service announced the formation of a National Joint Production Council representing both management and workers. Atomic Energy Commission authorized to construct an advanced type of nuclear reactor and research laboratories as part of a programme of co-operation in atomic research with the United Kingdom. Control of Cocos Islands handed over to Australia by Great Britain. Privy Council ruled that New South Wales State Transport (Co-ordination) Act was invalid insofar as it applied to inter-state transport.

- 1955 Harbour at Cockburn Sound, W.A. opened to provide shipping facilities for Kwinana. Mr. David McNicol first Australian Minister to Vietnam, Laos, and Cambodia. Commonwealth Government announced that about 135 Japanese pearl divers would be permitted to enter Australia to operate with pearling fleets from Broome to Darwin. Dr. N. Tamzil first Ambassador to Australia from Indonesia. Conference of British Commonwealth Prime Ministers held in London; attended by Mr. Menzies. Australia's first Aluminium plant, opened at Bell Bay by Minister of Supply, began production (Feb. 7). Minister for External Affairs after month's tour of South East Asian countries attended first council meeting of signatories to Manila Treaty. Prime Minister visited Washington as guest of President Eisenhower to talk on defence policy and Australia's role in South East Asia. New airport opened for traffic at West Beach, Adelaide, 7 miles closer to city than Parafield. First power generated from Snowy Mountains fed into New South Wales electricity system; Guthega power station opened by Prime Minister. Disastrous floods cover large areas of Central West New South Wales and Hunter Valley, causing damage to townships, stock and grazing lands estimated at £15 million and the loss of many lives. Electoral boundaries changed after examination of Census results by Commissioner. Australian population reaches 9 million. Kwinana Oil Refinery commenced operations. Federal Cabinet lifts ban on passports to certain countries. All price control ended in New South Wales. Announced that Australia would make Salk polio vaccine at Commonwealth Serum Laboratories, Melbourne. Commonwealth Government announced licensing of 4 commercial television stations for Australia (2 in Sydney and 2 in Melbourne). Major contracts let to A.W.A. Limited for construction of National Television Stations in Melbourne and Sydney. Commonwealth Government decided to build an ammunition filling and assembly factory at St. Mary's near Sydney, at an estimated cost of £23 million. Australia's 1955-56 immigration programme to be increased to a basic intake of 125,000 migrants, of whom 70,000 would be assisted-passage. Privileges committee of Commonwealth Parliament found Messrs. Brown and Fitzpatrick guilty of serious breach of privilege. House of Representatives committed both to prison for three months. Commonwealth Full High Court in reserved judgment declared that recent legislation imposing a road tax on interstate hauliers was invalid. South Australian State Government's uranium treatment plant at Port Pirie began operations. Prime Minister announced Australia's acceptance of British invitation to join expedition to cross Antarctic in summer of 1957-58. First International Wool Textile Research Conference to be held in Australia opened in Sydney, and was attended by 100 research workers including 52 scientists

Year.

1955—  
*contd.*

from overseas. First F.A.O. Conference to be held in Australia opened in Brisbane, discussion centred on livestock production under tropical conditions. First S.E.A.C.D.T. defence talks to be held in Australia began in Melbourne, representatives from Australia, New Zealand, Pakistan, the Philippines, Thailand, the United Kingdom and the United States of America were present. Australian task force left for Malaya. New £30 million hot-strip steel mill of Australian Iron and Steel Ltd. at Port Kembla (N.S.W.) opened by Prime Minister who described it as "a great historic event in the development of Australia". Abolition of subsidy on tea results in substantial increase in retail price. Bank of New South Wales Savings Bank Ltd. registered in Sydney, first new savings bank established in Australia for 40 years. Report of Royal Commission on Espionage tabled in House of Representatives. Minister for Health announced that Commonwealth Government had decided to apply means test to Pensioner Medical Service, to be based on income of new pensioners and to apply to all pensions granted under scheme after 31st October. Prime Minister of Ceylon, Rt. Hon. Sir John Kotelawala, K.B.E., visited Australia as guest of Commonwealth Government. New South Wales Government reintroduced quarterly automatic Basic Wage adjustments. Cocos (Keeling) Islands became Territory under authority of Commonwealth. Australian legations in Thailand and the Philippines raised to status of Embassies; Messrs. Hay and Shann first Ambassadors. Government of Victoria issued High Court writ for declaration that present system of uniform taxation is illegal.

# STATISTICAL SUMMARY, AUSTRALIA.

NOTE.—(1) In most cases where figures are available back to 1861, these were shown in Official Year Book No. 39, pp. xxviii-xxix.

(2) Most of the statistics in this Summary relate to the periods shown in the table headings. In those comparatively few cases where the statistics relate to other periods, this is indicated in footnotes.

## APPENDIX.

(Some recent information which has come to hand since the various chapters were sent to press is given hereunder in summarized form. For further or more detailed information, as also the latest available statistics, reference should be made to other publications issued by this Bureau (*see* pages 1133-5), notably the *Monthly Review of Business Statistics* and the *Quarterly Summary of Australian Statistics*.)

### CHAPTER II.—PHYSIOGRAPHY.

#### § 2. Climate and Meteorology of Australia.

**Rainfall:** Australian Capital Cities, p. 52.—Rainfall recorded in Australian capital cities during 1955 (1954 in parentheses) was as follows :—Canberra, 30.85 ins. (18.81 ins.); Perth, 46.52 (28.05 ins.); Adelaide, 24.58 ins. (16.73 ins.); Brisbane, 50.41 ins. (61.36 ins.); Sydney, 72.46 ins. (41.29 ins.); Melbourne, 30.70 ins. (33.53 ins.); Hobart, 22.32 ins. (27.20 ins.).

### CHAPTER III.—GENERAL GOVERNMENT.

#### § 1. Scheme of Parliamentary Government.

**Number and Salary of Members of the Legislatures, p. 69.**—At 30th June, 1956 the annual salaries of members of the Queensland and Western Australian Legislatures were £2,480 10s. and £2,120 respectively. The annual salary of members of the Tasmanian Legislature at 31st December, 1955 was £1,382.

#### § 2. Parliaments and Elections.

**Commonwealth Elections, p. 71.**—Following the dissolution of the twenty-first Parliament on 4th November, 1955 a Commonwealth election for the Senate and the House of Representatives was held on 10th December, 1955.

(a) *Senate.* Particulars of electors and voting in the several States are as follows :—

THE HON. A. J. WHITE.	

Leaders of the Opposition, p. 83.—The Leader of the Opposition in the Tasmanian House of Assembly is the Hon. W. Jackson.

### § 5. Cost of Parliamentary Government, p. 86.

The cost of Parliamentary Government, Commonwealth and individual States, for the year 1954-55 was as follows:—

Commonwealth, £2,007,013 (4s. 5d. per head); New South Wales, £710,639 (4s. 1d.); Victoria, £535,939 (4s. 4d.); Queensland, £348,458 (5s. 3d.); South Australia, £281,351 (7s. 0d.); Western Australia, £320,572 (9s. 11d.); Tasmania, £189,699 (12s. 1d.); and total, £4,393,671 (9s. 8d.).

The amounts expended under the major headings for all Governments during 1954-55 were:—Governor-General or Governor, £321,477; Ministry, £266,194; Parliament, £2,923,630; Electoral, £762,725.

## CHAPTER IV.—LAND TENURE AND SETTLEMENT.

### § 9. Settlement of Returned Service Personnel: 1939-45 War.

War Service Land Settlement Scheme, pp. 98-101.—At 30th June, 1955 an area of 16,163,037 acres had been submitted by the several States for land settlement. Of this, 13,893,774 acres had been approved by the Commonwealth as suitable for soldier settlement and 12,968,172 acres had actually been acquired by the States. The acreages and holdings allotted to ex-servicemen by the States at 30th June, 1955 were as follows:—New South Wales, 8,522,677 (2,320); Victoria, 913,122 (2,356); Queensland, 218,640 (470); South Australia, 312,750 (658); Western Australia, 1,136,547 (711); Tasmania, 121,000 (217); total 11,224,736 (6,732).

The total expenditure of the War Service Land Settlement Division to 30th June, 1955, £56,396,887, includes War Service Land Settlement, £45,434,123; agricultural loans, £6,201,644; agricultural allowances, £2,277,500; administrative expenses, £1,061,628; rural training, £1,422,792. Aggregate expenditure in the States and Territories to 30th June, 1955 was as follows:—New South Wales, £5,007,555; Victoria, £3,853,664; Queensland, £1,571,803; South Australia, £14,925,015; Western Australia, £22,874,672; Tasmania, £8,146,990; Northern Territory, £10,748; New Guinea, £6,440.

After deducting repayments of expenditure to 30th June, 1955, £7,668,265 and miscellaneous receipts, £5,981,719, the net expenditure to 30th June, 1955 was £42,746,903.

### § 11. Alienation and Occupation of Crown Lands.

Summary, p. 110.—The alienation and occupation of Crown lands in Australia at 31st December, 1955, were as follows:—

Private Lands—154,266,000, acres (8.1 per cent.) alienated; 32,652,000 acres (1.7 per cent.) in process of alienation.

Crown Lands—1,025,901,000 acres (53.9 per cent.) leased or licensed; 690,913,000 acres (36.3 per cent.) other Crown lands.

## CHAPTER VI.—LABOUR, WAGES AND PRICES.

### A. RETAIL PRICES AND PRICE INDEXES.

#### § 4. Tabular Statements of Retail Price Index Numbers.

The Interim Retail Price Index, p. 158.—The following table shows the interim retail price index numbers for the March and June quarters, 1956 for each capital city and for the six capital cities combined, showing separate series for each of the four main groups of items:—

#### INTERIM RETAIL PRICE INDEX NUMBERS.

(Base of each Index: Year 1952-53 = 100.)

Period.	Sydney.	Mel- bourne.	Brisbane.	Adelaide.	Perth.	Hobart.	Six Capitals. (a)
GROUP I.—FOOD.							
March Qtr., 1956 ..	109.1	112.6	108.7	110.1	112.0	114.7	110.6
June „ „ ..	113.1	117.2	111.1	115.2	113.9	115.8	114.5

For footnotes see next page.

INTERIM RETAIL PRICE INDEX NUMBERS—*continued*.

Period.	Sydney.	Mel- bourne.	Brisbane.	Adelaide.	Perth.	Hobart.	Six Capitals. (a)
GROUP II.—CLOTHING AND DRAPEY.							
March Qtr., 1956 ..	102.8	104.0	103.1	103.1	103.0	104.5	103.3
June " " ..	103.1	104.0	103.2	102.5	103.3	105.4	103.4
GROUP III.—RENT(b) (4 AND 5 ROOMED HOUSES).							
March Qtr., 1956 ..	111.7	120.7	107.3	116.1	160.4	139.4	118.8
June " " ..	112.0	121.3	107.8	118.0	164.1	145.2	119.7
GROUP IV.—OTHER ITEMS.(c)							
March Qtr., 1956 ..	103.6	110.7	110.0	102.8	106.2	109.9	106.7
June " " ..	106.2	114.6	114.7	106.6	109.9	113.5	110.1
ALL GROUPS.							
March Qtr., 1956 ..	106.2	110.4	107.3	106.8	113.1	113.0	108.3
June " " ..	108.5	113.3	109.5	109.7	115.2	115.1	110.8

(a) Weighted average. (b) The rent index numbers measure the proportionate rise and fall in the average weekly rentals paid for houses of four and five rooms taking corresponding houses throughout. See footnote (b) on page 159. (c) A group of items under the following headings—Electricity, Gas, and Firewood; Household Sundries; Services; Cinema Admission, Radio Licences, and Newspapers; Fares; and Tobacco and Cigarettes.

## § 5. The "C" Series Retail Price Index.

"C" Series Retail Price Index, Six Capital Cities, p. 161.—The following table shows "C" Series index numbers for the year 1955 and the March and June quarters, 1956, for the six capital cities combined:—

## "C" SERIES RETAIL PRICE INDEX NUMBERS: SIX CAPITAL CITIES COMBINED.

(Base of each Group: Weighted Average of Six Capital Cities, 1923-27 = 1,000.)

Period.	Food and Groceries.	Rent (4 and 5 Roomed Houses).(a)	Clothing.	Miscel- laneous.	Total "C" Series Index.
1955—Year ..	2,811	1,226	3,237	2,081	2,393
1956—March Quarter ..	2,926	1,310	3,243	2,137	2,465
June " " ..	3,054	1,320	3,248	2,212	2,528

(a) See footnote (b), page 159.

## B. WHOLESALE PRICES AND PRICE INDEXES.

## § 2. Wholesale Price (Basic Materials and Foodstuffs) Index.

Index Numbers, p. 163.—Index numbers for each group of commodities and for all groups combined for the index of wholesale prices of basic materials and foodstuffs are shown below for the year 1955-56.

## WHOLESALE PRICE (BASIC MATERIALS AND FOODSTUFFS) INDEX NUMBERS.

(Base of each Group : Average of three years ended June, 1939 = 100.)

Period.	Basic Materials.							Food- stuffs and To- bacco.	Basic Materials and Foodstuffs.		
	Metals and Coal. (a)	Oils, Fats and Waxes.	Tex- tiles.	Chem- icals.	Rub- ber and Hides.	Build- ing Ma- terials.	Total.		Goods princi- pally Im- ported. (b)	Goods princi- pally Home Pro- duced.	Total All Groups
1955-56—

January ..	405	216	453	317	330	407	343	327	288	354	334
February ..	405	216	453	317	325	408	343	318	288	347	329
March ..	405	230	446	317	323	425	350	332	299	357	340
April ..	403	230	456	318	326	442	353	337	303	362	344
May ..	410	231	477	317	322	444	357	344	304	369	350
June ..	409	231	482	318	326	444	357	351	299	376	353
Year 1955-56 ..	404	220	456	317	328	415	345	332	292	357	338

(a) Special purpose index for the "Metals and Coal" group excluding coal and briquettes was 429 for June, 1956 and 406 for the year 1955-56.

(b) Represents only such imported commodities as are included in the Wholesale Price Index and does not measure changes in price of all imports.

(c) Subject to revision.

## D. WAGES.

## § 1. Arbitration and Wages Boards Acts and Associated Legislation.

**Commonwealth Conciliation and Arbitration Act 1904-1956.**—An amendment to the Commonwealth Conciliation and Arbitration Act 1904-1955, assented to on 30th June, 1956, altered the structure of the arbitration machinery by setting up two authorities, namely, the Commonwealth Industrial Court and the Commonwealth Conciliation and Arbitration Commission, to handle the respective judicial and arbitral functions under the Act.

The Commonwealth Industrial Court, as constituted, comprises a Chief Judge and not more than two other Judges and is empowered to carry out judicial and award enforcement functions under the Act.

The Commonwealth Conciliation and Arbitration Commission, as constituted, shall consist of the following members:—(i) a President, (ii) not less than two Deputy Presidents, (iii) a Senior Commissioner and (iv) not less than five Commissioners. In addition Conciliators shall be appointed for the purposes of this Act.

The Commission is empowered to prevent or settle industrial disputes by conciliation or arbitration, and shall make all suggestions and do all such things as appear to it to be right and proper (a) for effecting a reconciliation between parties to industrial disputes, (b) for preventing and settling industrial disputes by amicable agreement and (c) for preventing and settling, by conciliation or arbitration, industrial disputes not prevented or settled by amicable agreement. The Commission may exercise its powers under the Act on its own motion or on the application of a party to an industrial dispute or of an organization or person bound by an award.

The President may assign a Commissioner to deal with industrial disputes relating to particular industries, or members of the Commission to deal with a particular industrial dispute. However, subject to the approval of the President, it is the duty of the Senior Commissioner to organize and allocate the work of the Commissioners and of the Conciliators.

When an industrial dispute occurs or appears likely to occur, a Commissioner shall take such steps as he thinks fit for the prompt prevention or settlement of that dispute by conciliation or, if in his opinion conciliation is unlikely to succeed or has failed, by arbitration. A Commissioner may arrange with the Senior Commissioner for a Conciliator to assist the parties to reach an amicable agreement. If an agreement is arrived at between the parties to an industrial dispute, a memorandum of its terms shall be made in writing, and may be certified by a Commissioner. A certified memorandum shall have the same effect as an award for all purposes of the Act.

The Commission in Presidential Session (that is, the Commission constituted by at least three presidential members) and not otherwise, is empowered to deal with the making of awards or certifying agreements in so far as they concern standard hours, basic wages and long service leave.

A Commissioner shall, upon application by a party to an industrial dispute which is being dealt with by him, decide, in consultation with the President, whether the dispute is of such importance that in the public interest it should be dealt with by the Commission constituted by not less than three members nominated by the President, of whom at least one is a presidential member of the Commission, and another, where practicable, is the Commissioner concerned. The President may direct this Commission to hear the dispute; however, after consideration the Commission may refer the dispute or part of the dispute back to the Commissioner originally dealing with the dispute, for determination.

An appeal against the decision of a Commissioner may be heard by a Commission of not less than three members nominated by the President, of whom at least two are presidential members of the Commission. However, an appeal will not be heard unless the Commission considers it is a matter of public interest.

The following appointments were announced on 12th August, 1956:—

(i) *The Commonwealth Industrial Court—*

Chief Justice Spicer, Justices Dunphy, Morgan.

(ii) *The Commonwealth Conciliation and Arbitration Commission—*

(a) President, Kirby, J.

(b) Deputy Presidents, Foster, Wright, Ashburner, J.J.

(c) Senior Commissioner, E. A. Chambers.

(d) Commissioners, L. P. Austin, J. R. Donovan, G. A. Findlay, F. D. Kelly, J. H. Portus, E. W. Tonkin, F. J. Webb.

In effect, Judges of the previous Arbitration Court were made either members of the Commonwealth Industrial Court or presidential members of the Commonwealth Conciliation and Arbitration Commission. Conciliation Commissioners became non-presidential members of the Commission.

The first meeting of the Commonwealth Industrial Court was held on 23rd August, 1956 and that of the Commonwealth Conciliation and Arbitration Commission on 21st August, 1956.

The Public Service Arbitration Act, the Navigation Act, the Coal Industry Act and the Snowy Mountains Hydro-electric Power Act have been amended to make provision for the revised structure of the Commonwealth Conciliation and Arbitration Act.

## § 2. Rates of Wage and Hours of Labour.

Weekly Rates of Wage, pp. 168-9.—The following table shows for each State and Australia the weighted average nominal weekly rates of wage payable, and the index numbers based thereon, for adult males and for adult females, at the end of each quarter during the period 31st March, 1955 to 30th June, 1956.

(a) Weighted average for Australia.

### § 3. Average Weekly Wage Earnings.

Average Weekly Total Wages Paid and Average Earnings, p. 178.—Particulars of average weekly total wages paid and average earnings per employed male unit for the year 1955-56 are shown in the following table :—

#### AVERAGE WEEKLY TOTAL WAGES PAID AND AVERAGE EARNINGS, 1955-56.

Particulars.	N.S.W.(a)	Vic.	Qld.	S.A.(b)	W.A.	Tas.	Aust.
Average Weekly Total Wages Paid . . £'000.	18,955	13,358	5,809	4,195	2,897	1,476	46,690
Average Weekly Earnings per Employed Male Unit £	18.16	18.22	15.34	17.10	16.37	16.66	17.51

(a) Includes Australian Capital Territory. (b) Includes Northern Territory. (c) Male units represent total male employment plus a proportion of female employment based on the approximate ratio of female to male earnings. The same ratio has been used in each State, and because the average ratio of female to male earnings may vary between States, precise comparisons between average earnings in different States cannot be made on the basis of the figures above.

### § 4. Basic Wages in Australia.

Basic Wage Enquiry, 1955-56.—On 4th November, 1956, the Amalgamated Engineering Union and others made application to the Commonwealth Court of Conciliation and Arbitration for an alteration of the basic wage in the following respects, namely, for an increase in the basic wage to the amount it would have reached if automatic quarterly adjustments, deleted by the Court in September, 1953, had remained in force ; an increase of a further 20s. in the basic wage ; the reintroduction of automatic quarterly adjustments ; and the abolition of the 3s. country differential.

The hearing commenced on 13th December, 1955, but later that day was adjourned until 14th February, 1956, after the Court had considered questions of procedure for the purpose of expediting the hearing of the case. The Commonwealth Government indicated to the Court its intention to intervene in the public interest under Section 26 of the Conciliation and Arbitration Act, and each of the State Governments was represented as a respondent.

When the hearing was resumed, the Court, consisting of Kirby, Dunphy, Wright and Morgan JJ., heard evidence from the parties, and then the Commonwealth Government, appearing as an intervenor in the public interest, submitted factual and statistical material about the state of the economy. The hearing concluded on 16th April, 1956 and the Court reserved its decision.

The Court's decision was announced on 25th May, 1956, rejecting (a) the claim for restoration of the system of automatic quarterly adjustments abolished in 1953 ; (b) the claim that the differential of 3s. less for country districts than the basic wage for the capital cities should be abolished ; (c) the claim for an increase in the basic wages to the amounts which they would have reached if the provisions for automatic quarterly

adjustments, deleted by the Court in 1953, had remained; and increasing the adult male basic wage by 10s. per week from the beginning of the first pay-period in June, 1956. Adult females received 7s. 6d. per week and juniors proportionate increases.

The new basic wage rates of the Commonwealth Court of Conciliation and Arbitration for adult males payable in the capital city of each State from the beginning of the first pay-period in June, 1956 are as follows:—

Sydney.	Melbourne.	Brisbane.	Adelaide.	Perth.	Hobart.	Six Capital Cities.(a)
s. d.	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.
253 0	245 0	228 0	241 0	246 0	252 0	246 0

(a) Weighted average.

State Basic Wage Rates, p. 192.—The table below shows the "basic" weekly wage rates of State industrial tribunals, operative in May and August, 1956.

#### STATE BASIC WAGE—WEEKLY RATES.

Tasmania(g) .. .. .	May, 1956	268 0	201 0	Aug., 1956	272 0	204 0

(a) Where dates are not quoted wage rates operate from beginning of first pay-period commencing in month shown. (b) Automatic adjustment discontinued from 23rd October, 1953, following decision of the Commonwealth Court of Conciliation and Arbitration on 12th September, 1953 (see page 188). Automatic adjustment re-introduced from first pay-period in November, 1955. (c) No basic wage declared but rates shown (Melbourne) are those commonly adopted by Wages Boards. The Victorian Labour and Industry Act requires Wages Boards to provide for the automatic adjustment of wage rates in accordance with variations in retail price index numbers. (d) The Queensland Industrial Court each quarter announces the variation, if any, in the basic wage after considering movements in the "C" Series retail price index numbers. (e) The "living wage" declared applies to the whole State except for a 5s. loading at Whyalla. Quarterly variations in the "living wage" were discontinued, following the decision of the Commonwealth Court of Conciliation and Arbitration on 12th September, 1953. On 31st May, 1956, the Governor proclaimed a 10s. increase in the "living wage" payable from 4th June, 1956 to conform with the increase of 10s. announced on 25th May, 1956 by the Commonwealth Court of Conciliation and Arbitration. (f) The Western Australian Arbitration Court each quarter announces the variation, if any, in the basic wage, after considering movements in the cost of living statements prepared by the Government Statistician. (g) None declared but rates shown (Hobart) are those commonly adopted by Wages Boards. Commencing with the first pay-period in February, 1956, Wages Boards re-introduced automatic quarterly adjustments, based on movements in the "C" Series retail price index numbers.

## E. EMPLOYMENT AND UNEMPLOYMENT.

## § 1. Employment.

Wage and Salary Earners in Civilian Employment, pp. 197-9.—The following are particulars of wage and salary earners in civilian employment, excluding rural wage earners, females in domestic work in private homes, persons on the paid strength of the Defence Forces and National Service trainees in camp, for the month of June, 1956.

## WAGE AND SALARY EARNERS IN CIVILIAN EMPLOYMENT, JUNE, 1956.

(Excluding Rural Wage Earners, Female Domestics in Private Homes, Persons on Paid Strength of Defence Forces and National Service Trainees in Camp.)

('000.)

(a) Includes exchange.

(b) Partly estimated.

NOTE.—Minus sign (—) denotes loss.

## D. MOTOR OMNIBUS SERVICES.

Government and Municipal Services, p. 240.—The following is a summary of the operations of government and municipal motor omnibus services in Australia during 1954-55 :—Length of route, 4,492 miles; gross revenue, £9,613,000; working expenses, £12,063,000; omnibus-miles run, 57,513,000; passenger-journeys, 346,749,000 (including estimated figures for the Australian Capital Territory). Revenue and working expenses include particulars for Queensland trolley-buses. All items except route-mileage exclude particulars of Hobart and Launceston Municipal Council Omnibus Services.

Private Services, p. 245.—The following is a summary of the operations of motor omnibus services under the control of private operators during 1954-55 in the States of New South Wales (Metropolitan and Newcastle Transport Districts only), South Australia and Western Australia respectively :—Gross revenue, £2,536,000; £669,000; £1,674,000; omnibus-miles run, 20,587,000; 6,213,000; 13,190,000; passenger-journeys, 89,508,000; 14,058,000; 33,860,000.

## F. MOTOR VEHICLES.

Motor Vehicle Registrations, p. 247.—Motor vehicles registered at 30th June, 1956 and new motor vehicles registered during 1955-56 were as follows :—

## MOTOR VEHICLES : REGISTRATIONS, 1955-56.

State or Territory.	Number of Motor Vehicles Registered at 30th June, 1956.(a)				Number of New Motor Vehicles Registered, 1955-56.(a)			
	Motor Cars.(b)	Com-mercial Vehicles.(c)	Motor Cycles.	Total.	Motor Cars.(b)	Com-mercial Vehicles.(c)	Motor Cycles.	Total.
New South Wales ..	483,397	242,514	37,039	762,950	56,074	25,994	2,971	85,039
Victoria(d) ..	498,644	151,597	27,675	677,916	53,511	16,882	2,360	72,753
Queensland ..	179,190	127,393	20,394	326,977	19,629	11,371	1,689	32,689
South Australia ..	154,358	63,630	20,713	238,701	17,461	6,510	1,925	25,896
Western Australia ..	98,875	65,626	13,873	178,374	10,115	5,258	1,089	16,462
Tasmania ..	48,973	22,975	4,800	76,748	5,461	2,632	332	8,425
Northern Territory ..	1,911	3,077	566	5,554	214	343	63	620
Aust. Capital Territory ..	6,978	2,580	515	10,073	1,133	322	101	1,556
Total ..	1,472,326	679,392	125,575	2,277,293	163,598	69,312	10,530	243,440

(a) Excludes Defence Service vehicles. Prior to 1st January, 1956 Department of the Navy vehicles were included. Excludes also trailers, road tractors, etc., and dealer's plates. (b) Includes taxis and hire cars. (c) Includes lorries, vans, buses and utilities. (d) Registration in Victoria is according to purpose of use and not type of vehicle; consequently, motor cars registrations are overstated by the inclusion of commercial vehicles registered for private use.

Drivers' and riders' licences in force at 30th June, 1956 numbered 2,457,246. This figure excludes licences in Queensland which are no longer issued on an annual basis.

## G. ROAD TRAFFIC ACCIDENTS.

Total Accidents Recorded, p. 249.—The following table is a summary of the total number of accidents (known to the police) which occurred in public thoroughfares during 1954-55, the number involving casualties and the number of persons killed or injured in each State and the Commonwealth excluding the Northern Territory.

## ACCIDENTS (KNOWN TO THE POLICE) WHICH OCCURRED IN PUBLIC THOROUGHFARES: ACCIDENTS RECORDED AND CASUALTIES, 1954-55.

State or Territory.	Total Accidents Recorded. (a)	Accidents Involving Casualties.	Casualties.	
			Persons Killed.	Persons Injured.(b)
New South Wales .. .. .	35,315	12,557	798	15,959

## CHAPTER XII.—EDUCATION.

### § 2. Government Schools.

**Number of Schools, Teachers and Pupils, p. 462.**—The following table gives a summary of particulars relating to government schools in 1954. It excludes senior technical colleges.

State or Territory.	Schools open at end of year.	Teachers Employed (Excluding Teachers in Training).	Teachers in Training.	Net Enrolment.
New South Wales(a) .. .. .	2,557	15,521	2,875	501,923
Victoria .. .. .	2,003	10,924	2,413	313,963
Queensland .. .. .	1,555	6,407	1,608	191,648
South Australia .. .. .	679	4,326	480	122,994
Western Australia .. .. .	483	3,051	752	(b) 88,748
Tasmania .. .. .	321	2,048	312	54,333
Northern Territory(c) .. .. .	9	68	..	(b) 1,676
Australia .. .. .	7,607	42,345	8,440	1,275,285

(a) Includes Australian Capital Territory.  
ended 30th June, 1955.

(b) Average weekly enrolment.

(c) Year

**Average Enrolment and Attendance of Pupils, p. 462.**—The following table gives a summary of average enrolment and attendance of pupils in government schools in 1954. It excludes senior technical colleges.

State or Territory.	Average Weekly Enrolment.	Average Daily Attendance.	Percentage of Attendance to Enrolment.
New South Wales(a) .. .. .	467,441	415,860	88.96
Victoria .. .. .	299,070	272,548	90.95
Queensland .. .. .	184,210	161,835	87.85
South Australia .. .. .	117,245	109,395	93.30
Western Australia .. .. .	88,748	82,677	93.16
Tasmania .. .. .	51,825	47,169	91.02
Northern Territory(b) .. .. .	1,676	1,520	90.69
Australia .. .. .	1,110,315	1,091,004	90.10

(a) Includes Australian Capital Territory.

(b) Year ended 30th June, 1955.

Expenditure on Government Schools, pp. 463-4.—The following table gives a summary of particulars of net expenditure on maintenance of government schools, and on government school buildings in 1954. It excludes senior technical colleges.

State or Territory.	Net Expenditure on Maintenance.	Net Expenditure on Buildings.	Total net Expenditure on Government Schools.
	£	£	£
New South Wales(a) .. .. .	21,486,088	5,493,800	26,979,888
Victoria(b) .. .. .	14,446,872	4,667,265	19,114,137
Queensland .. .. .	6,978,485	1,286,620	8,265,105
South Australia .. .. .	4,443,816	1,146,487	5,590,303
Western Australia .. .. .	5,143,030	1,458,278	6,601,308
Tasmania .. .. .	(c)	(c)	(c)
Northern Territory .. .. .	125,062	15,608	140,670
 Australia .. .. .	 (c)	 (c)	 (c)

(a) Gross figures, receipts not being available. Includes Australian Capital Territory. (b) Excludes junior technical schools. (c) Not yet available.

### CHAPTER XIII.—PUBLIC JUSTICE.

#### § 2. Lower (Magistrates') Courts, § 3. Higher (Judges') Courts,

#### § 4. Civil Courts. § 5. Police and Prisons.

Convictions, Bankruptcies, Police, Prisons, pp. 502, 503, 505, 510, 512-3.—The following table is a summary of the more important statistics of this chapter for the latest year for which information is available.

#### PUBLIC JUSTICE: SUMMARY, 1954.

Particulars.	N.S.W.	Vic.	Qld. (a)	S.A.	W.A.	Tas.	N.T. (a)	A.C.T.	Aust.
Convictions for serious crime, magistrates' courts .. No.	17,085	7,471	3,546	1,867	4,241	898	177	231	35,516

(a) Rents relate to tenanted private houses (one family) in 1947 and to all tenanted private houses, excluding those occupied by "Tenants (Governmental Housing)" in 1954.

**Date of Building.**—The numbers of occupied private dwellings in Australia at the Census of 30th June, 1954, classified according to date of building, were as follows:—Built before 30th June, 1947, 1,758,448; 1st July–31st December, 1947, 19,742; 1948, 60,360; 1949, 63,897; 1950, 78,965; 1951, 85,852; 1952, 91,712; 1953, 88,467; 1st January–30th June, 1954, 44,725; built after 30th June, 1947 but particular year not stated, 19,641; not stated, 31,612; total, 2,343,421.

## § 9. Oversea Migration.

**Classes of Arrivals and Departures, p. 608.**—Arrivals and departures during 1955 were:—Permanent new arrivals, 130,795; Australian residents returning from abroad, 52,877; temporary visitors arriving, 53,565; total arrivals, 237,237; Australian residents departing permanently, 35,478; Australian residents departing temporarily, 52,180; temporary visitors departing, 52,324; total departures, 139,982.

## § 11. Citizenship and Naturalization.

**Certificates Granted, p. 620.**—The number of certificates granted under the Nationality and Citizenship Act 1948–1955 during the year 1955 was 17,160. Former nationalities of the recipients were: Polish, 3,229; Hungarian, 2,300; Italian, 1,749; Czechoslovak, 1,583; Latvian, 1,288; Yugoslav, 1,172; other nationalities, 5,839.

## § 12. Population of Territories, p. 621.

The population of the external Territories of Australia at 30th June, 1955 was as follows:—Norfolk Island, 880; Papua, 6,794 (non-indigenous); New Guinea, 12,545 (non-indigenous) and Nauru, 1,741 (non-indigenous).

## CHAPTER XVII.—VITAL STATISTICS.

## § 1. Marriages, § 2. Fertility and Reproduction, and § 3. Mortality.

Numbers and Rates, pp. 624-5, 633-4, 644-5 and 649.—The following table shows totals and rates for marriages, live births, deaths and infant deaths for 1955 :—

## MARRIAGES, BIRTHS, DEATHS AND INFANT DEATHS, 1955.

Particulars.	N.S.W.	Vic.	Qld.	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
Marriages .. { Number	27,645	20,056	10,098	6,226	5,145	2,600	151	251	72,172
Rate(a)	7.92	7.94	7.54	7.59	7.81	8.22	8.86	7.74	7.84
Live Births .. { Number	74,407	56,336	32,352	18,494	16,623	8,089	515	861	207,677
Rate(a)	21.31	22.30	24.16	22.55	25.23	25.59	30.22	26.56	22.57
Deaths .. { Number	32,553	22,527	11,307	7,536	5,379	2,489	119	126	82,036
Rate(a)	9.32	8.92	8.44	9.19	8.17	7.87	6.98	3.89	8.91
Infant Deaths.. { Number	1,850	1,035	656	431	373	189	26	12	4,572
Rate(b)	24.86	18.37	20.28	23.30	22.44	23.37	50.49	13.94	22.01

(a) Number per 1,000 of mean population. (b) Number of deaths of children aged under one year per 1,000 live births registered.

## § 1. Marriages.

Age and Conjugal Condition at Marriage, p. 626.—A summary of the previous conjugal condition of bridegrooms and brides in 1955 in relation to age at marriage is as follows :—

## AGE AND CONJUGAL CONDITION OF BRIDEGROOMS AND BRIDES : AUSTRALIA, 1955.

Age at Marriage (Years).	Bridegrooms.				Brides.			
	Bachelors.	Widowers.	Divorced.	Total.	Spinsters.	Widows.	Divorced.	Total.
Under 20 ..	2,643	..	..	2,643	16,689	4	10	16,703
20-24 ..	29,779	6	43	29,828	31,663	66	304	32,033
25-29 ..	20,135	85	543	20,763	9,150	223	1,025	10,398
30-34 ..	6,541	168	990	7,699	3,183	350	1,227	4,760
35-39 ..	2,443	219	566	3,528	1,272	412	956	2,640
40-44 ..	1,331	320	834	2,485	772	493	759	2,030
45-49 ..	769	392	555	1,717	450	496	387	1,333
50-54 ..	357	418	368	1,143	240	408	230	878
55-59 ..	220	423	185	828	122	366	88	576

## CHAPTER XIX.—PRIVATE FINANCE.

### A. CURRENCY.

#### § 2. Coinage.

Issues of Australian Coins, p. 714.—The net issues of Australian coins to 30th June, 1956, were:—silver, £34,722,000; bronze, £2,884,000; total, £37,606,000.

#### § 3. Notes.

The Australian Note Issue, p. 716.—The average value of notes in circulation for the year 1955–56 was £376,336,000. This amount was distributed in denominations as follows:—10s., £10,496,000; £1, £70,564,000; £5, £180,565,000; £10, £113,809,000; £20, £4,000; £50, £46,000; £100, £50,000; and £1,000, £802,000. The amount held by the banks was £42,909,000 and by the public, £333,427,000.

### B. BANKING.

#### § 1. Cheque-Paying Banks.

Commonwealth Bank, p. 725.—The average liabilities of the Central Banking Business (including Note Issue Department) of the Commonwealth Bank for the year ended June, 1956 amounted to £906,229,000. Capital and Reserve Funds amounted to £14,945,000; Notes on Issue to £374,096,000; Special Accounts of Trading Banks to £272,841,000; Other Deposits of Trading Banks to £35,630,000; Other Liabilities to £208,717,000.

Particulars of the average assets were as follows:—Gold and Balances held abroad; £298,885,000; Australian Coin, £2,364,000; Cheques and Bills of other Banks, £6,505,000, Government and Other Securities (including Treasury Bills), £515,716,000; Bills Receivable and Remittances in Transit, £3,746,000; and Other Assets, £79,013,000.

Commonwealth Trading Bank, pp. 726 and 729.—The average liabilities in Australia of the Commonwealth Trading Bank for the year ended June, 1956, were £199,670,000. Of this amount Deposits not bearing interest amounted to £135,617,000; Deposits bearing interest to £46,243,000; Balances due to other Banks to £314,000; Other Liabilities to £17,496,000.

The average assets in Australia, £202,071,000, included Cash and Cash Balances £10,213,000; Special Deposit Account with Central Bank, £33,155,000; Balances with other Banks, £1,238,000; Treasury Bills, £6,333,000; Other Australian Public Securities, £38,599,000; Other Securities, £1,824,000; Loans, Advances and Bills Discounted, £103,894,000; Other Assets, £6,815,000.

Private Trading Banks, p. 729.—Average liabilities in Australia of the Private Trading Banks for the year ended June, 1956, were £1,319,044,000. Interminable Deposits or Deposit Stock amounted to £6,000; Deposits not bearing interest to £1,032,332,000; Deposits bearing interest to £263,107,000; Notes in Circulation to £158,000; Balances due to other Banks to £6,528,000; Other Liabilities to £16,913,000.

Average assets in Australia amounted to £1,355,623,000. These comprised Cash and Cash Balances, £66,883,000; Special Accounts with Commonwealth Bank, £238,803,000; Balances with other Banks, £19,672,000; Treasury Bills, £50,015,000; Other Australian Public Securities, £113,977,000; Other Securities, £5,821,000; Loans, Advances and Bills Discounted, £804,392,000; All Other Assets, £56,060,000.

Classification of Advances within Australia—Commonwealth Trading Bank and Private Trading Banks, p. 732.—Advances within Australia at the end of December, 1955 dissected by industries were:—Business advances—Agriculture, Dairying and Grazing, £212,375,000; Manufacturing, £178,955,000; Transport, Storage and Communication, £16,198,000; Finance and Property, £90,348,000; Commerce, £155,532,000; Miscellaneous, £59,437,000; Not elsewhere specified, £10,969,000; Total Business advances, £723,814,000; Advances to Public Authorities, £21,686,000; Personal advances, £147,869,000; Total, £893,369,000.

Clearing House Returns, p. 734.—The average weekly bank clearings in each capital city for the year ended June, 1956 were as follows:—Sydney, £109,975,000; Melbourne, £101,153,000; Brisbane, £22,488,000; Adelaide, £21,021,000; Perth, £14,089,000; Hobart, £3,962,000; Total, £272,688,000.

Debits to Customers' Accounts—All Cheque-paying Banks, p. 734.—The average weekly debits to customers' accounts in each State for the year 1955-56 for all cheque-paying banks (excluding debits to accounts of Australian Governments in capital cities) were as follows:—New South Wales, £200,852,000; Victoria, £185,369,000; Queensland, £56,028,000; South Australia, £39,564,000; Western Australia, £26,918,000; Tasmania, £11,615,000; Australian Capital Territory, £1,025,000; Total, £521,371,000.

## § 2. Savings Banks.

All Savings Banks, pp. 736-737.—The amounts on deposit in the several States at 30th June, 1956 were:—New South Wales, £386,676,000; Victoria, £386,176,000; Queensland, £132,700,000; South Australia, £135,756,000; Western Australia, £57,934,000; Tasmania, £37,211,000; Northern Territory and Australian Capital Territory £4,666,000; Total, £1,141,119,000. Total excess of deposits over withdrawals during 1955-56 was £44,440,000 and interest added was £23,285,000.

The number of operative accounts in the several States at 30th June, 1956 was:—New South Wales, 2,463,000; Victoria, 2,232,000; Queensland, 907,000; South Australia, 787,000; Western Australia, 446,000; Tasmania, 285,000; Northern Territory and Australian Capital Territory, 32,000; Total, 7,152,000.

## D. INSURANCE.

### § 2. Life Assurance.

'Life Assurance, pp. 747-753.—The following is a summary of the life assurance business transacted in Australia during 1955 (figures for 1954 in parentheses) compiled from monthly returns collected from the 20 companies registered under the Life Insurance Act 1945-1953, and excluding the Government Insurance Office of New South Wales and the Queensland State Government Insurance Office which operate only within their respective States. Particulars shown are therefore not entirely comparable with those in Chapter XIX., which are derived from annual returns and include business of the State Government Offices.

Ordinary Department and Industrial Department, respectively:—New Policies issued in Australia—Number, 289,560 (283,945), 213,124 (234,504); Sum Assured, £324,017,000 (£271,148,000), £32,775,000 (£33,395,000); Policies Matured or Otherwise Discontinued in Australia—Number, 155,820 (146,320), 273,298 (270,167); Sum Assured, £102,206,000 (£86,803,000), £22,756,000 (£21,705,000). Particulars of annuities are excluded.

Premium receipts of Ordinary and Industrial Departments in Australia in 1955 amounted, respectively, to £66,072,000 (£58,696,000) and £14,634,000 (£14,417,000.) Claims, etc., paid amounted to £25,348,000 (£22,627,000) and £9,199,000 (£8,445,000) respectively. Particulars of annuities are included.

## CHAPTER XX.—PUBLIC FINANCE.

### A. COMMONWEALTH FINANCE.

Consolidated Revenue Fund, pp. 764 and 772.—The table below shows details of revenue and expenditure for the years 1954–55 and 1955–56:—

#### COMMONWEALTH CONSOLIDATED REVENUE FUND: REVENUE AND EXPENDITURE.

(a) During 1954-55, and 1955-56 £2,521,000 and 43,383,000 respectively were drawn against loans made available by the International Bank for Reconstruction and Development. In 1954-55 a loan of 60,000,000 Swiss francs was raised in Switzerland. (b) Australian loans bearing interest at 4½ per cent. were issued at par and those at 3 per cent. were issued at prices ranging from £99 15s. to £98 10s. London loans raised in 1954-55 were issued at par. The New York loan was issued at £99, and the Canadian loan at £98 5s.

## CHAPTER XXI.—AGRICULTURAL PRODUCTION.

## § 3. Distribution, Production and Value of Crops.

Principal Crops, pp. 740-3.—The following table shows the area, production and yield per acre of wheat in each State for 1954-55 and 1955-56.

## WHEAT FOR GRAIN: AREA, PRODUCTION AND YIELD PER ACRE.

Season.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Aust.

1955-56(a)	..	37,000	41,083	14,922	28,892	33,250	129	153,295
AVERAGE YIELD PER ACRE (BUSHELS).								
1954-55	..	12.9	20.3	24.0	18.6	11.5	21.7	15.4
1955-56(a)	..	20.9	19.2	25.7	18.0	18.4	20.7	19.6

(a) Preliminary, subject to revision.

The area, production and yield per acre of other principal crops in Australia during 1954-55 are set out hereunder :—

Area (acres) : Oats, 2,574,000 ; Maize, 170,000 ; Hay, 1,984,000 ; Sugar-cane, 386,000 ; Total Crops, 21,695,000.

Production : Oats, 32,834,000 bushels ; Maize, 5,076,000 bushels ; Hay, 2,856,000 tons ; Sugar-cane crushed, 10,087,000 tons ; Cane sugar, 1,328,000 tons.

Yield per Acre : Oats, 12.8 bushels ; Maize, 29.9 bushels ; Hay, 1.4 tons ; Sugar-cane, 27.0 tons ; Cane-sugar, 3.6 tons. (Sugar-cane and cane sugar yields are per acre of productive crop.)

## CHAPTER XXII.—PASTORAL PRODUCTION.

Livestock, Meat and Wool Produced.—The following table shows, for each State, the numbers of live stock at 31st March, 1955, and 1956, and the amounts of meat and wool produced during 1954-55 and 1955-56 :—

### LIVESTOCK, MEAT AND WOOL PRODUCED.

(a) Preliminary, subject to revision. (b) Includes an estimate of farm production. (c) Includes Northern Territory, 69 tons. (d) Includes Northern Territory, 65 tons. (e) Includes Northern Territory, 68 tons. (f) Receipts from consignors and sales by producer agents. (g) Includes Northern Territory, 1,180 lb. (h) Not yet available.

## CHAPTER XXVI.—MINERAL INDUSTRY.

## § 1. The Mineral Wealth of Australia.

Quantity and Value of Production, pp. 985-6.—In the table hereunder particulars are given of the quantity and value of production in Australia of the principal minerals during the year 1955 :—

## MINERAL PRODUCTION : QUANTITIES AND VALUES, AUSTRALIA.

## METALLIC MINERALS.

Year.	Principal Contents of Metallic Minerals Produced.								Total Value of Output of Metal Mining.
	Copper.	Gold.	Iron.	Lead.	Silver.	Tin.	Zinc.	Sulphur. (a)	
	Tons.	Fine oz.	Tons.	Tons.	'000 fine oz.	Tons.	Tons.	Tons.	
1955 (b) ..	45,496	1,049,039	2,304,165	295,944	14,555	2,017	256,564	267,183	84,374

## NON-METALLIC AND FUEL MINERALS.

Year.	Quantities Produced.						Total Value of Output of Non-metal and Fuel Mining.
	Coal.		Gypsum.	Limestone. (d)	Mica.	Salt.	
	Black.	Brown.					
	'000 tons.	'000 tons.	Tons.	Tons.	lb.	Tons.	£'000.
1955(b) .. ..	19,275	10,112	470,014	3,997,696	76,809	370,000	65,742

(a) Includes sulphur content of spent oxide roasted. (b) Subject to revision. (c) Estimated  
(d) Excludes limestone used as a construction material.

Industrial Census of the Mining and Quarrying Industry, 1954, pp. 989.—A summary of the statistics collected for 1954 is shown in the following table.

## MINING AND QUARRYING : SUMMARY OF OPERATIONS, AUSTRALIA, 1954.

Particulars	Unit.	Metal Mining.	Fuel Mining.	Non-Metal (excluding Fuel) Mining. (a)	Total All Mining.	Construction Material Quarrying. (b)	Total All Mining and Quarrying.
Mines and Quarries ..	No.	818	306	683	1,807	687	2,494
Persons Employed (c) ..	"	21,366	28,268	2,858	52,492	4,121	56,613
Salaries and Wages Paid (d)(e) ..	£'000.	23,308	27,545	1,693	52,546	2,045	54,591
Value of Output (f) ..	"	71,155	58,829	7,015	136,999	12,383	149,382

Value of Production (g) ..	"	53,858	48,187	5,593	107,638	10,428	118,066
Value of Fixed Assets (d)(h) ..	"	44,030	41,327	4,062	89,419	4,201	93,620

(a) Incomplete for some industries outside the normal administrative control of State Mines Departments (e.g., clays and salt). (b) Incomplete in some States. (c) Average number employed (including working proprietors) during whole year. (d) Excludes mines and quarries employing less than four persons (less than five persons in Western Australia). (e) Excludes drawings by working proprietors; the amounts are net after deducting value of explosives sold to employees. (f) Value at mine or quarry. (g) Value of output less cost of power, fuel and light and other materials and stores used; depreciation and maintenance costs have not been deducted. (h) Depreciated value (i.e., book value less any depreciation reserves) at end of year.

**§ 2. Gold, § 3. Silver, Lead, Zinc, § 4. Copper, § 5. Tin, pp. 990-1001.**

The smelter and refinery production of the principal metals in Australia during the year 1955 is shown below.

**SMELTER AND REFINERY PRODUCTION OF PRINCIPAL METALS, AUSTRALIA.**

Year.	Refined Gold.	Refined Silver. (a)	Refined Lead. (a)	Lead Content of Lead Bullion Produced for Export. (a)	Refined Zinc. (a)	Refined Copper. (a)	Refined Tin. (a)

## LIST OF SPECIAL ARTICLES AND MISCELLANEOUS MATTER CONTAINED IN PREVIOUS ISSUES.

This list refers to special articles and other more or less important miscellaneous matter which have appeared in previous issues of the Official Year Book, but which are not included, or are included in abbreviated form only, in the present issue. The list is, in the main, restricted to articles, etc., to which references are not given in the various chapters of this issue.

The figures below indicate, respectively, the number and page of the Official Year Book to which reference is made. In cases where matter was published in more than one previous issue, the volume and page for the last issue containing such matter are given. For possible revisions, however, issues immediately following the one referred to should also be consulted.

## GENERAL INDEX.\*

NOTE.—This index is preceded by a list of special articles, etc., in previous issues of the Official Year Book. A list of maps and graphs contained in this issue will be found on pp. ix and x. Area, population, etc., of particular localities are indexed under the locality concerned. Subject matter extending continuously over more than one page is indexed according to the first page only. *Where more than one reference to a subject is given, the chief reference, wherever it has been possible to determine it, is indicated by italic type. Two references to a subject so indicated signify major, and approximately equal, importance.*
