## PREFACE

By the Constitution of the Commonwealth of Australia, the Parliament of the Commonwealth is empowered, subject to the Constitution, 'to make laws for the peace, order, and good government of the Commonwealth, with respect to . . . Census and statistics.' In the exercise of the power so conferred, a Census and Statistics Act was passed in 1905, and in the year following the Commonwealth Bureau of Census and Statistics was created. The first Official Year Book was published early in 1908. The publication here presented is the fifty-sixth Official Year Book issued under the authority of the Commonwealth Government.

The special index (preceding the general index) provided at the end of the volume, together with certain references given in the various chapters, will assist in tracing in previous issues special articles and other more or less important miscellaneous matter which, in order to conserve space, have been omitted or abbreviated in the present volume. Where, in the general index, more than one reference to a subject is given, the chief reference (or references) has been specially indicated wherever possible.

In this issue there has been some slight change in the order of chapters. An effort has been made to reduce the overall size of the book and this has necessitated the deletion of some detailed material, particularly at the State level, for which the reader is referred either to an earlier issue or to other specialised publications. In the process of revising the content some chapters have been substantially re-arranged and these include present chapters 13, 14, 15, 17, 18, 20 and 29.

Among new or revised material included the following items may be especially mentioned.

Chapter 6. International Relations. New tables on Australia's contributions in international aid (pages 113-4).

Chapter 7. Population. A section showing selected characteristics of the Aboriginal population at the 1966 Census is included on pages 138-42.

Chapter 8. Vital Statistics. A new table showing long-term age-specific death rates, page 181. The tables showing Causes of Death have been amended to incorporate the Eighth (1965) Revision of the International Classification of Diseases (pages 185-8).

Chapter 12. Transport, Communication and Travel. Special article 'Standardisation of railway gauges' to mark the completion of the Sydney-Perth link. The section on private railways has been expanded (page 364).

Chapter 14. Public Health. Details of a Survey of Chronic Illnesses, Injuries and Impairments are contained in the Appendix.

Chapter 17. Private Finance. Three new tables containing details of Permanent Building Societies are shown on pages 531-2.

Chapter 18. Public Finance. A new table showing Expenditure on War and Defence is given on page 544.

Chapter 20. Education, Cultural Activities and Research. Results of a Survey of Post-School Study Courses are shown on pages 642-4. The section on Colleges of Advanced Education has been expanded.

Chapter 21. Employment and Unemployment. Some results of a Survey of Child Care are shown on pages 705-8.

Chapter 31. Australian Integrated Economic Censuses, 1968-69. This is a special chapter for this issue setting out the aims, the concepts and the methods employed in the 1968-69 integrated censuses of manufacturing, mining, wholesaling and retailing.

The usual series of graphs has been revised and extended.

The material in the Year Book has been carefully checked throughout, but I shall be grateful to those who will be kind enough to point out defects or make suggestions.

The statistics contained in the majority of the chapters of this volume relate to the years ended June or December 1969. More detailed statistics on subjects dealt with in the Year Book are available in the various annual reports published by this Bureau, and more recent statistics are contained in the *Digest of Current Economic Statistics* (monthly), the *Monthly Review of Business Statistics*, the *Quarterly Summary of Australian Statistics*, and in other publications issued monthly, quarterly, half-yearly, or yearly. These publications are listed in Statistical publications of Australia (see Chapter 30, Miscellaneous), and the last pages of this volume contain a list of current and recent printed publications available for purchase, showing issue numbers, dates, and prices.

A State Year Book is published by the Deputy Commonwealth Statistician of each State. These publications contain greater statistical detail and additional supplementary material concerning the individual States which cannot be accommodated in the Commonwealth Year Book. The Deputy Commonwealth Statisticians of all States also issue Pocket Year Books and a number of printed and mimeographed publications dealing with their respective States. These publications are listed, together with publications of the Central Bureau, in *Publications of the Commonwealth Bureau of Census and Statistics* issued annually by this Bureau.

My thanks are tendered to the Deputy Commonwealth Statisticians of the several States, who have collected and compiled the data on which a great part of the information given in the Year Book is based. Thanks are also tendered to the responsible officers of the various Commonwealth and State Departments and to others who have kindly, and often at considerable trouble, supplied information, and to the Government Printer and his staff for their services in printing this Year Book and in assisting and advising throughout its preparation.

This preface provides me with the opportunity to record a tribute to Mr K. M. Archer, O.B.E., who retired from the position of Commonwealth Statistician in October 1970 after a working life devoted to the government statistical service. The period since his appointment as Commonwealth Statistician in 1962 has been one of greatly accelerated development in all facets of the Bureau's work. There have been many new ventures including, for example, the planning and implementation of the 1968-69 censuses of manufacturing, mining, wholesaling and retailing, conducted on a fully integrated basis for the first time. Statistical procedures and techniques have been refined considerably, with extensive use being made of sample survey methods, computer processing and other tools, to produce timely, reliable and relevant statistics. Indeed, Mr Archer was one of the first to recognise the benefits that would accrue from the introduction of electronic computing equipment, so that the Bureau now uses computers in its offices in Canberra and the State capital cities. Throughout his career he strove to foster greater statistical professionalism within the Bureau through in-service training, a statistical cadetship scheme and recruitment of graduates. The high international standing of Australian statistics was recognised in 1967 when the 36th Session of the International Statistical Institute and the 7th Conference of Asian Statisticians were held in Australia, and again in 1968 when Mr Archer was elected Chairman of the United Nations Statistical Commission. In the following year he was made an Honorary Fellow of the Royal Statistical Society. For his services to statistics in Australia, Her Majesty the Queen awarded Mr Archer an O.B.E. in 1965. Mr Archer has by his energy and foresight, done much to advance the development of official statistics in Australia.

J. P. O'NEILL  
Acting Commonwealth Statistician

Commonwealth Bureau of Census and Statistics,  
Canberra, A.C.T. 2600. November 1970

# CONTENTS

PAGE

## CHAPTER 1. DISCOVERY, COLONISATION AND FEDERATION OF AUSTRALIA . . . . . 1

Early Knowledge and discovery of Australia (1); The annexation of Australia (2); The creation of the several Colonies (3); The establishment of the Commonwealth of Australia (4); The Constitution of the Commonwealth (6); The External Territories of Australia (22).

*Plate—1. Map of Australia (frontispiece)*

## CHAPTER 2. PHYSICAL GEOGRAPHY AND CLIMATE . . . . . 25

General description of Australia (25); Weather and climate of Australia—precipitation (28), temperature (35), humidity, evaporation (39), sunshine and cloud, wind (40), storms and tropical cyclones (43), climatological tables (47), weather of 1969 (59).

*Plates—2-4, Rainfall (30-32); 5-8, Temperatures (37, 38); 9, Frost-free period; 10, Evaporation (41); 11-12, Hours of sunshine (42); 13-14, Wind roses (44, 45); 15, Thunderdays (46).*

## CHAPTER 3. GENERAL GOVERNMENT . . . . . 61

Parliamentary, government (61); The Sovereign (61); The Governor-General (61); Governors (63); Ministries (65); Parliaments and elections (69); Commonwealth referendums (75); Cost of parliamentary government (77); Commonwealth legislation (78).

## CHAPTER 4. DEFENCE . . . . . 83

Department of Defence (83); Naval defence (87); Military defence (89); Air defence (92); Department of Supply (93).

## CHAPTER 5. REPATRIATION . . . . . 99

War pensions (99); Service pensions (103); Medical treatment for ex-servicemen and dependants of ex-servicemen (105); General Repatriation benefits and miscellaneous (107); The Services Canteens Trust Fund (109).

## CHAPTER 6. INTERNATIONAL RELATIONS . . . . . 111

Relations with Commonwealth and other countries (111); Participation in the United Nations (112); Australia's contribution in international aid (113); Diplomatic representation (115); Overseas trade representation (118), Commonwealth Migration Offices overseas (119).

## CHAPTER 7. POPULATION . . . . . 121

Types of population statistics (121); The population survey (123); The census (123); Population recorded at censuses (124); Growth and distribution (126); mean population (131); Elements of increase (132); Sex distribution (134); Age distribution (134); General characteristics (135); The Aboriginal population (138); Overseas arrivals and departures (142); Assisted migration (148); Regulation of immigration (151); Passports (152); Citizenship and naturalisation (153); Population of External Territories (155); International population statistics (155).

*Plates—16, Population of Australia (122); 17, Overseas arrivals and departures (144).*

## CHAPTER 8. VITAL STATISTICS. . . . . 159

Provisions for registration and compilation of statistics (159); marriages (160); Births and Fertility—live births and rates (164), masculinity of births (166), fertility rates (166), ex-nuptial births (170), confinements (171), multiple births (173) stillbirths (174); mortality—deaths (175), rates (176), life tables (178), ages at death (179), infant mortality (182), causes of death (183); Vital statistics of External Territories (190); International vital statistics (191).

*Plates—18, Births, deaths and marriages Australia (163); 19, Rates of births, deaths and natural increase (165); 20, Age-specific birth rates (168); 21, Infant mortality rates (184).*

<b>CHAPTER 9. HOUSING AND BUILDING</b> . . . . .	<b>193</b>
Census dwellings (193); Building (198); Government activities in the housing field (210); Advances to home purchasers (221).	
<i>Plates—22, New houses (203); 23, New flats (206).</i>	
<b>CHAPTER 10. LABOUR, WAGES AND PRICES</b> . . . . .	<b>227</b>
Retail prices and price indexes (227); Consumer price index (228); Tabular statements of retail price index numbers (229); International comparisons (233); Wholesale prices and price indexes (234); Export price indexes (240); Arbitration and Wage Boards Acts and associated legislation (243); Incidence of industrial awards, determinations and collective agreements (246); Rates of wage and hours of work (246); Average weekly earnings (253); Surveys of wage rates earnings and hours (254); Determination of wage rates (261); Annual leave (268); Long service leave (269); Industrial disputes (271); Labour organisations (277).	
<i>Plate—24, Industrial disputes (272).</i>	
<b>CHAPTER 11. OVERSEAS TRANSACTIONS</b> . . . . .	<b>283</b>
Overseas trade, constitutional provisions and legislation (283); Government authorities (287); Trade agreements (288); Trade services (291); Export Payments Insurance Corporation (292); Collection and presentation of trade statistics (292); Total overseas trade (295); Classified summary of overseas trade (298); Exports of principal articles of Australian produce (299); Exports, by industrial group (300); Imports of merchandise, by economic class (301); Direction of overseas trade (302); Trade with major groups of countries (319); Trade with United Kingdom (320); Trade with eastern countries (320); Ships' and aircraft stores (321); Trade at Customs ports (322); Movement of bullion and specie (323); Import clearances and net customs duties collected (324); Overseas trade in calendar years (324); Excise (325); Overseas investment by private investors (325); Balance of payments—explanatory notes (331), tables (333); International reserves (335); Indexes of values of exports and imports at constant prices (336).	
<i>Plates—25, Overseas trade (296); 26, Value of exports and imports, proportion by country (318).</i>	
<b>CHAPTER 12. TRANSPORT, COMMUNICATION AND TRAVEL.</b> . . . .	<b>337</b>
The Australian Transport Advisory Council and its standing committees (337); Control of Shipping (337); Collection and presentation of statistics (340); Overseas shipping (341); Interstate shipping (342); Australian trading vessels (343); Shipping at principal ports (344); Shipping cargo (345); World shipping tonnage (350); Vessels registered (350); Shipping casualties (351); Government railways (351); Standardisation of railway gauges (353); Operations, Government railway systems (358); Private railways (364); Tramway, trolley-bus, omnibus, and ferry services (364); Motor vehicles (366), on register (367); registrations of new motor vehicles (367); Licences (368); Road traffic accidents (368); Roads (371); Civil aviation (372), international activity (374), aerodromes, facilities, aircraft on register, licences, accidents (376-7); Postmaster-General's Department, facilities, employees, finances (377-80); Postal services (380); Internal telecommunication services (382); Overseas telecommunication services (385); Radiocommunication stations authorised (387); Broadcasting services (387); Television services (388); Broadcast listeners' and television viewers' licences (389); Travel—overseas movement (391), tourist organisation (397).	
<i>Plates—27, Overseas and interstate cargo (347); 28, Indian-Pacific express crossing the Nullabor Plain: An auto sled upgrading track: 29, Train hauling iron ore, Western Australia: Eight-car all double deck electric trains (between pages 352 and 353) (photographs); 30, Government Railways (354).</i>	
<b>CHAPTER 13. WELFARE SERVICES</b> . . . . .	<b>399</b>
Commonwealth expenditure, National Welfare Fund (399); Commonwealth social services—reciprocal agreements with other countries (401), benefits provided (402), age and invalid pensions (402), widows' pensions (405), funeral benefits (407), maternity allowances (407), child endowment (408), unemployment, sickness, and special benefits (411), sheltered employment allowance (413); Commonwealth Rehabilitation Service (414); Assistance to homes for aged and disabled persons (415); The States Grants (Deserted) Wives Act 1968 (416); Telephone rental concessions, Compassionate allowances (417); Commonwealth provision of welfare services to Northern Territory, Australian Capital Territory—Aboriginal welfare (417-8); State expenditure on certain welfare services (418).	

**CHAPTER 14. PUBLIC HEALTH . . . . . 419**

Commonwealth government activities—quarantine, human, animal and plant (419-22); National health benefits—Pharmaceutical (423), Hospital, nursing home, handicapped children and medical benefits (424); Pensioner Medical Service (425); Anti-tuberculosis campaign (426); anti-poliomyelitis campaign (427); Free milk for school children scheme (427); Commonwealth organisations concerned with health (427); Commonwealth grants to mental hospitals (429); Commonwealth grants to organisations associated with public health (430); State public health legislation and administration (431); Supervision and care of infant life (431); Medical and dental inspection of school children (432); Public hospitals and nursing homes (433); Private hospitals and nursing homes (435); Repatriation hospitals (436); Hansenside hospitals (436); Mental health institutions (436); Notifiable diseases (438); Survey of chronic illnesses, injuries and impairments (440); cremation (440).

**CHAPTER 15. LAW, ORDER, AND PUBLIC SAFETY . . . . . 441**

Lower (magistrates') courts (441); Higher (judges') courts (444); Divorce and other matrimonial causes (446); Bankruptcy (449); Transactions of the High Court (450); Selected crime reported to police (450); Police (454); Prisons (456); Expenditure on the administration of law and order (457); Patents, trade marks and designs (458); Copyright (459).

**CHAPTER 16. NATIONAL ACCOUNTS . . . . . 461**

Description of the National Accounts (461); National accounts and tables (465); Description of items in the National Accounts (473).

*Plate—31, Articulation of Australian National Accounts (462).*

**CHAPTER 17. PRIVATE FINANCE . . . . . 477**

Currency (477); Australian note issue (477); Australian coinage (478); Volume of money (479); Rates of exchange (479); Banking (480); Reserve Bank of Australia (482); Trading banks (485); Savings banks (496); Commonwealth Development Bank of Australia (502); Australian Resources Development Bank Limited (503); Insurance legislation (503); Life insurance (504); Fire, marine and general insurance (513); Export Payments Insurance Corporation (514); Pension and superannuation schemes (514); Finance companies (519); Instalment credit for retail sales (522); Pastoral finance companies (525); Rural debt (526); New capital raisings by companies in Australia (526); Short-term money market (528); Unit trusts, land trusts and mutual funds (530); Registered building societies (531); Friendly societies (533); Co-operative societies (534); Lotteries (535); Betting (536); Probates and letters of administration (536).

*Plates—32, Banking (501): 33, Life Insurance (507).*

**CHAPTER 18. PUBLIC FINANCE . . . . . 537**

Financial provisions of the Constitution (537); Commonwealth Budget (537); All Commonwealth funds—receipts and expenditure (538), expenditure, economic type and function (539), main components of expenditure (543), receipts (555); State Consolidated Revenue Fund—expenditure (563), receipts (565); State receipts—taxation (567); business undertakings (570); State Loan Funds (572); Commonwealth and State finance (573); Government securities on issue (576); Commonwealth loan transactions (583); National Debt Sinking Fund (584); Taxes on income—system (586), assessable income (587), concessional deductions (588), exemptions (589), rates, individuals (589), taxes on specified incomes (591), income tax assessments (592), company income taxes (593), yield of income taxes (595).

*Plates—34, All Commonwealth funds, expenditure and receipts (540); 35, State consolidated revenue funds, expenditure and receipts (566).*

**CHAPTER 19. LOCAL GOVERNMENT. . . . . 597**

Local government authorities (597); Semi-government authorities (597); Local government—State systems (598), area, population, dwellings, valuations etc. (599), finances (600); Local government and semi-government authorities' debt (604); Roads and bridges (606); Water supply, sewerage and drainage (614); Harbour boards and trusts (625); Fire brigades (631).

	PAGE
<b>CHAPTER 20. EDUCATION, CULTURAL ACTIVITIES, AND RESEARCH . . . . .</b>	<b>633</b>
Education in Australian schools (633), Number of schools, teachers and pupils (637); Pre-school education (640); Post-school study courses (640); Universities (644); Colleges of Advanced Education (650); Teacher education (652); Technical education (655); Agricultural and forestry education (656); Organisations associated with education (659); Commonwealth activities in education (660); Expenditure on education (666); State expenditure on education (673); Cultural activities (674); Commonwealth libraries (674); State libraries (675); University libraries (677); Children's libraries and school libraries (677); Archives (678); Museums and art galleries (680); Botanical and zoological gardens (681); Book publishing (682); Film production (684); Censorship (684); Art Council of Australia (685); Australian Elizabethan Trust (686); Australian National Trusts (686); Historic Memorials Committee (687); Commonwealth Art Advisory Board (687); Australian Industrial Research and Development Grants Board (687); Commonwealth Scientific and Industrial Research Organisation (687); Mount Stromlo and Siding Spring Observatories (688); Australian Atomic Energy Commission (689); Scientific societies (690).	
<i>Plates—36, School pupils—diagram (641); 37, University students (647).</i>	
<b>CHAPTER 21. EMPLOYMENT AND UNEMPLOYMENT . . . . .</b>	<b>691</b>
The population census (691); The population Survey (694); The labour force survey (694); Wage and salary earners in employment (700); Commonwealth Employment Service (704); Survey of child care (705).	
<b>CHAPTER 22. MANUFACTURING INDUSTRY . . . . .</b>	<b>709</b>
Introduction (709), standardisation (710), definitions (711); Classification (712); Factory developments since 1901 (714), Number of factories (714); Factory classification by number of persons employed (715); Employment in factories (717); Distribution of sexes in factories (720); Salaries and wages paid, materials used, output, production (721); Indexes of factory production (729); Value of land, buildings, plant and machinery (730); Principal factory products (734); Overseas participation ownership and control in Australian manufacturing industry (740).	
<b>CHAPTER 23 RURAL INDUSTRY. . . . .</b>	<b>745</b>
Disposal of crown lands (745); Closer settlement and war service settlement (747); Alienation and occupation of crown lands (747); Number and area of rural holdings (748); Employment on rural holdings (749); Farm machinery on rural holdings (750); The soils of Australia (752); Soil improvement and conservation (752); Agricultural production—progress, assistance and control (754), distribution, production and value of crops (756), areas and yields, principal crops (760), wheat (762), other cereal crops (772), fodder crops (780), industrial crops (783), vegetables (793), fruit (796), vineyards (799); Pastoral production—livestock numbers (802), sheep (803), cattle (806), horses (808), wool (808), meat (819), other pastoral products (824); The dairying industry (825); The pig industry (836); The poultry industry (837); The bee-farming industry (842); Value of dairy, poultry and bee production (844).	
<i>Plates—38, Area of crops, 1901—1968—69 (758); 39, Wheat for grain, 1935—36—1968—69 (767); 40, Production of oats, barley, etc. 1935—36—1968—69 (777); 41, Production of potatoes, etc. 1935—36—1968—69 (795); 42, Livestock, Australia, 1870—1969 (804); 43, Sheep numbers, Wool 1870—1969 (812); 44, Production of meat, 1912—22—1968—69 (822); 45, Milk production, 1916—1968—69 (830).</i>	
<b>CHAPTER 24. WATER CONSERVATION AND IRRIGATION . . . . .</b>	<b>847</b>
Water resources and their utilisation (847); National and interstate aspects (852); New South Wales (856); Victoria (861); Queensland (864); South Australia (867); Western Australia (870); Tasmania (871); Northern Territory (873); Papua and New Guinea (874).	
<b>CHAPTER 25. FORESTRY . . . . .</b>	<b>875</b>
Source of statistics (875); Forestry in Australia (875), administration and research (879); Employment in forestry (881); Forest production (882); Timber and timber products (884); Overseas trade in forest products, etc. (885).	

<b>CHAPTER 26. FISHERIES</b> . . . . .	<b>887</b>
Fishery resources and their commercial exploitation (887); Fisheries administration and research (888); Collection and presentation of fisheries statistics (889); Boats and equipment used in fisheries (891); Employment in fisheries (892); Production, processing and domestic marketing of fisheries products (893); Consumption of edible fisheries products (899); Overseas trade in fisheries products (900).	
<i>Plate—46, Fisheries map (890).</i>	
<b>CHAPTER 27. MINERAL INDUSTRY</b> . . . . .	<b>903</b>
Geology (903); Mineral resources (904); Administration (908); Government assistance (911); Research (917); International relations (918); Mining and quarrying (920); Overseas participation (933); Mineral exploration (937); Petroleum exploration (939); Mineral processing and treatment (941); Overseas trade (942); Review of recent developments (945).	
<i>Plates—47, Mineral industry map (905); 48, Mine production of principal metals (gold, silver, lead, zinc and copper) (931); 49, Mine production of principal metals (tin, iron) and production of coal (932).</i>	
<b>CHAPTER 28. ELECTRIC POWER GENERATION AND DISTRIBUTION</b> . . . . .	<b>949</b>
Introduction (949); Snowy Mountains Hydro-electric Scheme (950); New South Wales (954); Victoria (956); Queensland (958); South Australia (960); Western Australia (961); Tasmania (962); Statistical summary (963); Commonwealth Territories (963).	
<i>Plates—50, Snowy Mountains Scheme—map (951); 51, Snowy Mountains Scheme—diagrams (952).</i>	
<b>CHAPTER 29. THE TERRITORIES OF AUSTRALIA</b> . . . . .	<b>965</b>
The Northern Territory—general description (965), population (966), advancement of Aborigines (967), production (968), trade, transport and communication (972), education (974), finance (974); Australian Capital Territory—general description (975), National Capital Development Commission (976), works and services (976), production (977), transport and communication (978), social (979), finance (980); Norfolk Island (981); Papua and New Guinea—general description (983), weather and climate (983), population (990), administration (991), judiciary (991), agriculture and animal industry (992), indigenous labour (997), housing (998), secondary industries (998), trade, transport and communication (1000), education and health (1002), finance (1003); Papua—general description (1005), population (1005), land tenure (1005), production (1006); New Guinea—general description (1007), population (1007), land tenure (1008), production (1008); Heard and McDonald Islands (1009); Australian Antarctic Territory (1009); Cocos (Keeling) Islands (1010); Christmas Island (1011).	
<i>Plate—52, Territory of Papua and New Guinea—annual rainfall map, 1969 (989).</i>	
<b>CHAPTER 30. MISCELLANEOUS</b> . . . . .	<b>1013</b>
Valuation of Australian production (1013); Indexes of farm production (1015); Consumption of foodstuffs and beverages (1018); Retail trade (1022); Interstate trade (1024); Statistical organisation in Australia (1024); Statistical and other official publications of Australia (1026).	
<b>CHAPTER 31. AUSTRALIAN INTEGRATED ECONOMIC CENSUSES, 1968-69</b> . . . . .	<b>1041</b>
Outline (1041), meaning of integration (1041); purposes of integration (1042), standardisation of census units (1045), the integrated register of businesses (1046), standardisation of industrial classification (1048), Standardisation of data concepts: establishment statistics (1048), Standardisation of data concepts: enterprise statistics (1053).

## SYMBOLS AND OTHER FORMS OF USAGE IN THIS YEAR BOOK

The following *symbols*, where shown in tables, mean:

- n.a. —not available
- . . —nil or less than half the final digit shown, or not applicable
- p —preliminary—figure or series subject to revision
- r —figure or series revised since previous issue
- n.e.i.—not elsewhere included
- n.e.c.—not elsewhere classified
- n.s. —not stated
- m.—males; f.—females; p.—persons
- Break in continuity of series (where drawn across a column between two consecutive figures).

A blank space in a column of figures means that the figure concerned is not yet available.

The following *abbreviations* are used for the titles of the Australian States and Territories and the Commonwealth of Australia: N.S.W. (New South Wales), Vic. (Victoria), Qld (Queensland), S.A. (South Australia), W.A. (Western Australia), Tas. (Tasmania), N.T. (Northern Territory), A.C.T. (Australian Capital Territory), T.P.N.G. (Territory of Papua and New Guinea), Aust. (Australia), Cwlth (Commonwealth).

In general, the *statistics in this volume relate to the States and Territories of the Commonwealth of Australia*, i.e. they exclude particulars of the External Territories of Australia, which, however, are specifically dealt with in Chapter 29, *The Territories of Australia*. A few series elsewhere include particulars of the Territory of Papua and New Guinea because of the nature of the subject-matter—these series are indicated.

*Yearly periods* shown as e.g. 1969 refer to the year ended 31 December 1969; those shown as e.g. 1968–69 refer to the year ended 30 June 1969. Other yearly periods are specifically indicated. The range of years shown in table headings, e.g. 1901 to 1968–69, indicates the period covered, but does not necessarily imply that each intervening year is included.

*Values* are shown in Australian dollars (\$) or \$A) or cents (c) unless another currency is specified.

*Any discrepancies between totals and sums of components* in tables are due to rounding.

Unless otherwise indicated, the *British system of weights and measures* is used. The weights and measures used in recording production, etc. of different commodities are as follows:

Bushel (bus)	=	approximately 2,218 cubic inches
Gallon (gal)	=	Imperial gallon of approximately 277 cubic inches
Pound (lb)	=	pound avoirdupois
Cental	=	100 pounds
Hundredweight (cwt)	=	112 pounds
Ton	=	Long ton of 2,240 pounds
Short ton	=	2,000 pounds
Bale (of wool)	=	approximately 300 pounds

Cereals, fruit and certain other products are generally recorded in bushels. While the weight of a bushel varies according to the nature of the product, it is also subject to considerable variation for individual products on account of such things as variety and method of packing. However, average bushel equivalent weights, as set out below, may be used for the conversion of each of these products to pounds weight avoirdupois.

**BUSHEL WEIGHTS**  
(lb per bushel)

<i>Product</i>	<i>lb per bushel</i>	<i>Product</i>	<i>lb per bushel</i>	<i>Product</i>	<i>lb per bushel</i>

## CHAPTER 1

# DISCOVERY, COLONISATION, AND FEDERATION OF AUSTRALIA

### Early knowledge and discovery of Australia

The following paragraphs contain only a bare outline of the more important facts relating to the early history of Australian discovery. A more detailed summary of these facts may be found in Year Book No. 39 (see page 1) and earlier issues.

#### Terra Australis

Although references to an Austral land are found in the works of writers in the early centuries after Christ, and evidence appeared in maps, globes, and manuscripts from the Middle Ages onward, there is no definite evidence connecting this so-called *Terra Australis* with Australia. Cornelius Wytfliet's map of 1597, however, indicates roughly the eastern and western coasts of Australia, as well as the gulf of Carpentaria.

#### Early discoveries of Australia

The Portuguese may have discovered part of the Australian coast before 1542, and it has been suggested that the Arabs may have come to Australia even earlier, though there is no evidence to support this theory. For all practical purposes, however, the coastal exploration of Australia may be taken as having begun with the Spaniards and the Dutch.

In 1606 the Spaniard Quiros, on reaching the island that has retained the name of Espiritu Santo (the largest island of the New Hebrides group), thought he had discovered the great land of the south, and therefore named the group *La Australia del Espiritu Santo*. After leaving the New Hebrides Quiros sailed eastward, but Torres, his second-in-command, took a westerly course and passed through the strait that now bears his name. In all probability he sighted the Australian continent but no mention of it is made in his records. This voyage marks the close of Spanish activity in the work of discovery in the South Seas.

The Dutch discovered Australia when the Dutch East India Company sent the *Duyfken* from Bantam, Java, to explore the island of New Guinea. During March 1606 the *Duyfken* coasted along the southern shores of New Guinea and followed the west coast of Cape York peninsula as far as Cape Keer-Weer (Turn Again).

During the following thirty years there were nine visits of Dutch navigators to Australian waters; by 1636, through their efforts, the coast of Australia from Cape York westward around to the Great Australian Bight had been discovered.

In 1642 Abel Janszoon Tasman set out from Batavia to ascertain the extent of the great southern continent. He named Van Diemen's Land, imagining it to be part of Australia proper, and sailing north-easterly discovered New Zealand and returned to Batavia. In his second voyage in 1644 Tasman visited the northern coast of Australia, sailing round the Gulf of Carpentaria and along the north-west coast as far south as the tropic of Capricorn. This voyage of Tasman's may be said to have ended the period of Dutch discoveries, although there were subsequent visits by the Dutch to Australia (de Vlamingh in 1696 and Van Delft in 1705).

#### Discoveries by the English

In the meantime the English had made their first appearance on the Australian coast in 1688, when the north-westerly shores were visited by William Dampier, as supercargo of the *Cygnets*, a trading vessel whose crew had turned buccaneers. In 1699 he again visited Australia, in command of H.M.S. *Roebuck*, and on his return to England published an account in which a description is given of trees, flowers, birds, and reptiles observed, and of encounters with natives.

At the end of the seventeenth century it was uncertain whether Tasmania and New Zealand were parts of Australia or whether they were separated from it but themselves formed part of a great Antarctic Continent. Lieutenant (later Captain) James Cook's first voyage, though undertaken primarily for the purpose of observing the transit of Venus from Tahiti, had also the objective of ascertaining whether the unexplored part of the southern hemisphere was only an immense mass of

water or contained another continent. In command of H.M.S. *Endeavour*, and accompanied by Sir Joseph Banks, the botanist, Dr Solander the naturalist, Green the astronomer, draughtsmen, and servants, Cook, after observing the transit of Venus at Tahiti, turned towards New Zealand, sighting that land on 7 October 1769 in the neighbourhood of Poverty Bay. Circumnavigating the North and South Islands, he proved that New Zealand was connected neither with the supposed Antarctic Continent nor with Australia, and took formal possession thereof in the name of the British Crown.

#### Discovery of Australia by Captain Cook

On 20 April 1770\* Cook sighted the Australian mainland at a place he called Point Hicks, naming it after his first-lieutenant, who first saw it. Coasting northwards, on 29 April 1770\* he discovered Botany Bay, where he landed. Cook sailed along the coast in a northerly direction for nearly 1,300 miles until 11 June 1770, when the *Endeavour* was seriously damaged by striking a coral reef in the vicinity of Trinity Bay. Repairs occupied nearly two months, and the *Endeavour* then again set her course to the north, sailing through Torres Strait and anchoring in the Downs on 13 July 1771. In 1772 Cook was put in command of the ships *Resolution* and *Adventure* with a view to ascertaining whether a great southern continent existed. Having satisfied himself that, even if it did, it lay so far to the south as to be useless for trade and settlement, he returned to England in 1774. Cook's last voyage was undertaken in 1776, and he met his death on 14 February 1779, by which date practically the whole coast of Australia had been explored. The only remaining discovery of importance, the existence of a channel between Tasmania and Australia, was made by Bass and Flinders in 1798.

### The annexation of Australia

#### Possession taken of eastern coast of Australia by Captain Cook

Although representatives of the nations mentioned in the previous section landed or claimed to have landed on the shores of Australia on various occasions during the sixteenth and seventeenth centuries, it was not until 23 August 1770 that the history of Australia was brought into definite political connection with western civilisation. It was on that date that Captain Cook took possession 'of the whole eastern coast, from latitude 38° S. to this place, latitude 10½° S., in right of His Majesty King George the Third', i.e. over only what are now the eastern parts of New South Wales, Victoria and Queensland.

#### Annexation of eastern part of Australian continent and Tasmania

Formal possession, on behalf of the British Crown, of the whole of the eastern part of the Australian continent and Tasmania was not taken until 26 January 1788, when Captain Phillip's Commission, first issued to him on 12 October 1786 and amplified on 2 April 1787, was read to the people whom he had brought with him in the 'First Fleet'. The commission appointed Phillip 'Captain-General and Governor-in-Chief in and over our territory called New South Wales, extending from the Northern Cape or extremity of the coast called Cape York, in the latitude of ten degrees thirty-seven minutes south, to the southern extremity of the said territory of New South Wales or South Cape, in the latitude of forty-three degrees thirty-nine minutes south and of all the country inland westward as far as the one hundred and thirty-fifth degree of east longitude reckoning from the meridian of Greenwich, including all the islands adjacent in the Pacific Ocean within the latitudes aforesaid of ten degrees thirty-seven minutes south and forty-three degrees thirty-nine minutes south'.

#### Extension of New South Wales westward

On 17 February 1824 Earl Bathurst notified Sir Thomas Brisbane that he had recommended to His Majesty the dispatch of a ship of war to the north-west coast of New Holland for the purpose of taking possession of the coast between the western coast of Bathurst Island and the eastern side of Coburg Peninsula. Captain James J. Gordon Bremer of H.M.S. *Tamar*, who was selected for the purpose, took possession on 20 September 1824 of the coast from the 135th to the 129th degree of east longitude. On 16 July 1825 the whole territory between those boundaries was described in Darling's commission as being within the boundaries of New South Wales.

\* Year Book No. 1 shows the dates of these events as '19th April' and '28th April' respectively. In Year Book No. 2 they had been changed to '20th of April' and '29th April', and the following footnote inserted:

1. *Correct dates of Captain Cook's Log.* After the 180° meridian of longitude had been passed, and owing to no allowance having been made for westing, the various log-books of this voyage are in error one day as to dates. Thus those in Captain Cook's private log, in his official log, in Gunner Forwood's, Pickersgill's, Clerke's, Wilkinson's, and Bootie's Journals, in the Pallister copy of Cook's log, and in Wharton's publication, all need correction by adding one day to the date given: that is, the 19th should read the 20th, etc. The anonymous log, doubtless Green's, is erroneously supposed by the author of the "Historical Records of New South Wales," to have been corrected for westing, see the foot-note on page 269 therein. The facts are as follows:—What was known as "ship time" began a day earlier than under the present system of astronomical reckoning, that is to say, Jan. 1 began at noon Dec. 31. The "Astronomical day," however, was a whole day later than the *ship's day*: thus what would be assigned to the 24th in Cook's Journal would appear in Green's Journal as the 23rd. (See "Captain Cook's Journal," 1768-71, by Captain W. J. L. Wharton, R.N., F.R.S., London, 1893, preface pp. xii., xiii.) There can be no doubt as to the need of the correction in the dates, since on reaching Batavia the log reads:—"Wednesday 10th, according to our reckoning, but by the people here Thursday 11th." (Op. Cit., pp. 352-3.) Attention was drawn to this matter by Mr. P. de Jersey Grut in the "Argus," Melbourne, May 15, 18 and 22, 1907.

### Annexation of Western Australia

An expedition under Major Lockyer, sent by Lieutenant-General Sir Ralph Darling, then Governor of New South Wales, to found a settlement at King George Sound, sailed from Sydney on 9 November 1826, landed at the Sound on 26 December following, and on 21 January 1827 hoisted the British flag. Captain Stirling, in command of H.M.S. *Success*, arrived at Sydney a few weeks after the departure of the expedition to King George Sound. He obtained the Governor's permission to visit Swan River with a view to seizing a position on the western coast and reporting upon its suitability as a place of settlement. Captain Stirling left Sydney on 17 January 1827, and on his return in the following April submitted a glowing report on what he described as a 'rich and romantic country', urging its occupation for the purpose of settlement. He left for England in July 1827, continuing his advocacy, notwithstanding much discouragement, with unabated enthusiasm. He was at last successful, the result being due mainly to the formation of an association of prospective settlers having capital at their disposal. He was appointed Lieutenant-Governor and with a party of settlers arrived at Garden Island, near the Swan River, in the ship *Parmelia* in June 1829. On the second of the preceding month Captain Fremantle, in command of H.M.S. *Challenge*, arrived and hoisted the British flag on the south head of Swan River, again asserting possession of 'all that part of New Holland which is not included within the territory of New South Wales'. Thus before the middle of 1829 the whole territory now known as the Commonwealth of Australia had been constituted a dependency of the United Kingdom.

## The creation of the several Colonies

### New South Wales

In Governor Phillip's commission of 1786 the mainland of Australia was divided by the 135th meridian of east longitude into two parts. The earliest colonists believed that the present State of Tasmania was actually joined to the mainland, and it was not until 1798 that the contrary was known. In that year Bass and Flinders proved that it was an island by sailing through Bass Strait. The territory of New South Wales, as originally constituted (1,480,527 square miles, including Van Diemen's Land, 26,215 square miles), and of New Zealand (103,862 square miles), which may be included although Cook's annexation was not properly given effect to until 1840, consisted of 1,584,389 square miles. A further area of 518,134 square miles was added in 1825 when the western boundary was extended to the 129th east meridian. The territory was subsequently reduced by the separation of various areas to form the other colonies, and at the time of the establishment of the Commonwealth the area of New South Wales was 310,372 square miles. Following the transfer of the Australian Capital Territory and an area at Jervis Bay to the Commonwealth in 1911 and 1915 respectively the area was further reduced to 309,433 square miles.

Lord Howe Island, which is a dependency of New South Wales, and for political purposes is included in one of the electorates of Sydney, is situated in latitude 31° 30' south, longitude 159° 5' east, about 487 miles east-north-east of Sydney, and has an area of 3,220 acres.

### Tasmania

Van Diemen's Land, first settled in 1803, was politically separated from New South Wales in 1825, being constituted a separate colony on 14 June. The area of the colony was 26,215 square miles. The name of the colony was officially changed to Tasmania in 1856 when responsible government was established. Following a resurvey of local government areas, the area of Tasmania was determined at 26,383 square miles at the end of 1964.

Macquarie Island, about 1,000 miles south-east of Hobart, together with a few rocky islets nearby, has been a dependency of Tasmania since the nineteenth century. In December 1911 five members of the Australasian Antarctic Expedition landed on the island and remained there until 1915. On 3 March 1948 another party was landed to man a new station which has since been maintained as a scientific base. The island is about twenty-one miles long and two miles wide.

### Western Australia

The territory westward of the 129th meridian, comprising 975,920 square miles, was constituted a colony under the name of Western Australia in June 1829. It was always distinct and independent of New South Wales, except for the settlement on King George Sound (*see above*), which remained under the jurisdiction of New South Wales until 1831.

### South Australia

On 15 August 1834 the Act 4 and 5 William IV., cap. 95, was passed, creating South Australia a 'province', and settlement took place towards the end of the year 1836. The first Governor, Captain Hindmarsh, R.N., arrived at Holdfast Bay on 28 December 1836, and on the same day the new colony was officially proclaimed. The new colony embraced 309,850 square miles of territory, lying south of the 26th parallel of south latitude and between the 141st\* and 132nd

\* The actual surveyed boundary is at 140° 58' east longitude.

meridians of east longitude. On 10 December 1861, by authority of the Imperial Act 24 and 25 Vict., cap. 44, the western boundary of South Australia was extended to coincide with the eastern boundary of Western Australia, namely, the 129th east meridian. The area of the extension was approximately 70,220 square miles. Nearly two years later, on 6 July 1863, the Northern Territory, comprising 523,620 square miles, was brought under the jurisdiction of South Australia, which thereupon controlled an area of 903,690 square miles. The Territory was transferred to the Commonwealth on 1 January 1911 (*see* page 5).

#### **New Zealand**

Although Captain Cook had taken possession of the North Island of New Zealand in November 1769, and of the South Island in January 1770, it is doubtful whether at the time when Captain Phillip's commission was drawn up New Zealand was considered as one of the 'islands adjacent in the Pacific Ocean' (*see* page 2). The fact that under the Supreme Court Act (Imperial) of 1823 British residents in New Zealand were brought under the jurisdiction of the Court at Sydney, and that in 1839 there was a proposal on the part of the British Government to appoint a consul in New Zealand, leaves this an open question, as nothing more than extra-territorial jurisdiction may have been intended. New Zealand does not appear to have become British territory unequivocally until 1840, when Captain Hobson arrived at the Bay of Islands, and on 30 January read his commissions, which extended the boundaries of the Colony of New South Wales so as to embrace and comprehend the islands of New Zealand. In February 1840 the Treaty of Waitangi, made with the native chiefs, was signed. Finally, on 21 May 1840 British sovereignty over the islands of New Zealand was explicitly proclaimed. New Zealand remained a dependency of New South Wales until, by letters patent of 16 November 1840, it was constituted a separate colony under the powers of the Act 3 and 4 Vict., cap. 62, of 7 August 1840. Proclamation of the separation was made on 3 May 1841. The area of the colony was 103,862 square miles. The present area of New Zealand, which acquired responsible government on 7 May 1856 and Dominion status on 26 September 1907, exclusive of island territories but including minor islands, is 103,736 square miles.

#### **Victoria**

In 1851 the 'Port Phillip District' of New South Wales was constituted the colony of Victoria, 'bounded on the north and north-west by a straight line drawn from Cape Howe to the nearest source of the River Murray and thence by the course of that river to the eastern boundary of the colony of South Australia'. The area of the new colony was 87,884 square miles, and its separate existence took effect from 1 July 1851.

#### **Queensland**

The northern squatting districts of Moreton, Darling Downs, Burnett, Wide Bay, Maranoa, Leichhardt, and Port Curtis, together with the reputed county of Stanley, were granted an independent administration and formed into a distinct colony under the name of Queensland by letters patent dated 6 June 1859, although separation from New South Wales was not completed until 10 December of the same year. The territory comprised by the new colony was 'so much of the colony of New South Wales as lies northwards of a line commencing on the sea-coast at Point Danger in latitude about 28° 8' south, running westward along the Macpherson and Dividing Ranges and the Dumaresq River to the MacIntyre River, thence downward to the 29th parallel of south latitude, and following that parallel westerly to the 141st meridian of east longitude, which is the eastern boundary of South Australia, together with all the adjacent islands, their members, and appurtenances in the Pacific Ocean'. The area of the colony thus constituted was 554,300 square miles. By letters patent dated 13 March 1861, forwarded by the Colonial Secretary to the Governor of Queensland on 12 April 1862, the area of Queensland was increased by the annexation of 'so much of the colony of New South Wales as lies to the northward of the 26th parallel of south latitude, and between the 141st and 138th meridians of east longitude, together with all and every the adjacent islands, their members, and appurtenances, in the Gulf of Carpentaria'. With this addition the area of Queensland became 670,500 square miles. Following a thorough revision of the area of each local government area of Queensland, based on the most recent maps available, the Surveyor-General in 1958 determined the area of Queensland as 667,000 square miles—a reduction of 3,500 square miles from the area previously determined.

## **The establishment of the Commonwealth of Australia**

#### **Federation**

On 1 January 1901 the colonies mentioned, with the exception of New Zealand, were federated under the name of the 'Commonwealth of Australia', the designation of 'Colonies'—except in the case of the Northern Territory, to which the designation 'Territory' applied—being at the same time changed to that of 'States'.

**Transfer of the Northern Territory to the Commonwealth**

On 7 December 1907 the Commonwealth and the State of South Australia entered into an agreement for the transfer of the Northern Territory to the Commonwealth, subject to approval by the Parliaments of the Commonwealth and the State. This approval was given by the South Australian Parliament under The Northern Territory Surrender Act, 1907 and by the Commonwealth Parliament under the *Northern Territory Acceptance Act* 1910. The Territory was formally transferred to the Commonwealth on 1 January 1911, and became the Northern Territory of Australia.

By Imperial Order in Council dated 23 July 1931 Ashmore Islands, known as Middle, East and West Islands, and Cartier Island, situated in the Indian Ocean off the north-west coast of Australia, were placed under the authority of the Commonwealth. The islands were accepted by the Commonwealth on 10 May 1934, in the *Ashmore and Cartier Islands Acceptance Act* 1933, under the name of the Territory of Ashmore and Cartier Islands. The Act authorised the Governor of Western Australia to make ordinances having the force of law in and in relation to the Territory. An amendment to the Act in July 1938 annexed the islands to the Northern Territory, whose laws, ordinances, and regulations, wherever applicable, thereupon applied.

The area of Ashmore Reef is approximately 60 square miles (to the limit of the reef), and it is situated 220 statute miles off the western coast of Australia and 520 statute miles west of Darwin. Cartier Island is approximately 17 square miles in area (to the limit of the reef), and is situated 184 statute miles off the western coast of Australia and 490 statute miles west of Darwin.

**Transfer of the Australian Capital Territory to the Commonwealth**

On 18 October 1909 the Commonwealth and the State of New South Wales entered into an agreement for the surrender to and acceptance by the Commonwealth of an area of 911 square miles as the Seat of Government of the Commonwealth. In December 1909, Acts were passed by the Commonwealth and New South Wales Parliaments approving the agreement, and on 5 December 1910 a proclamation was issued vesting the Territory in the Commonwealth on and from 1 January 1911. By the *Jervis Bay Territory Acceptance Act* 1915 an area of 28 square miles at Jervis Bay, surrendered by New South Wales according to an agreement made in 1913, was accepted by the Commonwealth, and was transferred as from 4 September 1915.

**Present composition of the Commonwealth**

Following revision of the areas of Tasmania and Queensland as mentioned on pages 3 and 4, and of the area of the Northern Territory during 1964, the total area of the Commonwealth of Australia has been determined as 2,967,909 square miles. The years in which the respective areas were annexed, the years of first permanent settlement, and the years in which responsible government was granted to the Colonies, and the present areas of the several States and Territories and of the Commonwealth are shown below.

**THE COMMONWEALTH OF AUSTRALIA: COMPONENT STATES AND TERRITORIES**

<i>State or Territory</i>	<i>Year of annexation</i>	<i>Year of first permanent settlement</i>	<i>Year of formation into separate Colony or Territory</i>	<i>Year in which responsible government was granted</i>	<i>Present area in square miles</i>
New South Wales . . . . .	1770	1788	1786	1855	309,433
Victoria . . . . .	1770	1834	1851	1855	87,884
Queensland . . . . .	1770	1824	1859	(a)1859	667,000
South Australia . . . . .	1788	1836	1834	1856	380,070
Western Australia . . . . .	1829	1829	1829	1890	975,920
Tasmania . . . . .	1788	1803	1825	1855	26,383
Northern Territory . . . . .	..	..	(b)1863	..	520,280
Australian Capital Territory . . . . .	..	..	(c)1911	..	939
<b>Commonwealth of Australia</b> . . . . .	..	..	..	(d)	<b>2,967,909</b>

(a) As a separate State—as part of New South Wales, in 1855. (b) Previously part of New South Wales then brought under the jurisdiction of South Australia in 1863—transferred to the Commonwealth in 1911. (c) Previously part of New South Wales. (d) Constituted as from 1 January 1901.

## The Constitution of the Commonwealth

Information regarding the development of the Constitutions of the various Colonies (now States), together with a brief history of the federal movement in Australia, was embodied in this chapter in issues of the Year Book up to and including No. 22.

### Commonwealth Constitution Act

The Commonwealth of Australia Constitution Act, 63 and 64 Vict., Chapter 12, namely: 'An Act to constitute the Commonwealth of Australia', as amended by the *Constitution Alteration (Senate Elections)* 1906, the *Constitution Alteration (State Debts)* 1909, the *Constitution Alteration (State Debts)* 1928, the *Constitution Alteration (Social Services)* 1946, and the *Constitution Alteration (Aboriginals)* 1967, is given *in extenso* hereunder, and the text contains all the alterations of the Constitution which have been made up to and including 31 December 1969.

### THE COMMONWEALTH OF AUSTRALIA CONSTITUTION ACT. 63 & 64 VICT., CHAPTER 12.

*An Act to Constitute the Commonwealth of Australia. (9th July, 1900.)*

**W**HEREAS the people of New South Wales, Victoria, South Australia, Queensland, and Tasmania, humbly relying on the blessing of Almighty God, have agreed to unite in one indissoluble Federal Commonwealth under the Crown of the United Kingdom of Great Britain and Ireland, and under the Constitution hereby established:

And whereas it is expedient to provide for the admission into the Commonwealth of other Australasian colonies and possessions of the Queen:

Be it therefore enacted by the Queen's Most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled and by the authority of the same, as follows:—

1. This Act may be cited as the Commonwealth of Australia Constitution Act.
2. The provisions of this Act referring to the Queen shall extend to Her Majesty's heirs and successors in the sovereignty of the United Kingdom.
3. It shall be lawful for the Queen, with the advice of the Privy Council, to declare by proclamation that, on and after a day therein appointed, not being later than one year after the passing of this Act, the people of New South Wales, Victoria, South Australia, Queensland, and Tasmania, and also, if Her Majesty is satisfied that the people of Western Australia have agreed thereto, of Western Australia, shall be united in a Federal Commonwealth under the name of the Commonwealth of Australia. But the Queen may, at any time after the proclamation, appoint a Governor-General for the Commonwealth.
4. The Commonwealth shall be established, and the Constitution of the Commonwealth shall take effect, on and after the day so appointed. But the Parliaments of the several colonies may at any time after the passing of this Act make any such laws, to come into operation on the day so appointed, as they might have made if the Constitution had taken effect at the passing of this Act.
5. This Act, and all laws made by the Parliament of the Commonwealth under the Constitution, shall be binding on the courts, judges, and people of every State and of every part of the Commonwealth, notwithstanding anything in the laws of any State: and the laws of the Commonwealth shall be in force on all British ships, the Queen's ships of war excepted, whose first port of clearance and whose port of destination are in the Commonwealth.
6. "The Commonwealth" shall mean the Commonwealth of Australia as established under this Act.  
"The States" shall mean such of the colonies of New South Wales, New Zealand, Queensland, Tasmania, Victoria, Western Australia, and South Australia, including the northern territory of South Australia, as for the time being are parts of the Commonwealth, and such colonies or territories as may be admitted into or established by the Commonwealth as States; and each of such parts of the Commonwealth shall be called "a State."  
"Original States" shall mean such States as are parts of the Commonwealth at its establishment.
7. The Federal Council of Australasia Act, 1885, is hereby repealed, but so as not to affect any laws passed by the Federal Council of Australasia and in force at the establishment of the Commonwealth.

Any such law may be repealed as to any State by the Parliament of the Commonwealth, or as to any colony not being a State by the Parliament thereof.

8. After the passing of this Act the Colonial Boundaries Act, 1895, shall not apply to any colony which becomes a State of the Commonwealth; but the Commonwealth shall be taken to be a self-governing colony for the purposes of that Act.

9. The Constitution of the Commonwealth shall be as follows:—

THE CONSTITUTION.

This Constitution is divided as follows:—

- Chapter I.—The Parliament:
  - Part I.—General:
  - Part II.—The Senate:
  - Part III.—The House of Representatives:
  - Part IV.—Both Houses of the Parliament:
  - Part V.—Powers of the Parliament:
- Chapter II.—The Executive Government:
- Chapter III.—The Judicature:
- Chapter IV.—Finance and Trade:
- Chapter V.—The States:
- Chapter VI.—New States:
- Chapter VII.—Miscellaneous:
- Chapter VIII.—Alteration of the Constitution.
- The Schedule.

CHAPTER I.—THE PARLIAMENT.

PART I.—GENERAL.

1. The legislative power of the Commonwealth shall be vested in a Federal Parliament, which shall consist of the Queen, a Senate, and a House of Representatives, and which is hereinafter called “The Parliament”, or “The Parliament of the Commonwealth”.

2. A Governor-General appointed by the Queen shall be Her Majesty’s representative in the Commonwealth, and shall have and may exercise in the Commonwealth during the Queen’s pleasure, but subject to this Constitution, such powers and functions of the Queen as Her Majesty may be pleased to assign to him.

3. There shall be payable to the Queen out of the Consolidated Revenue Fund of the Commonwealth, for the salary of the Governor-General, an annual sum which, until the Parliament otherwise provides, shall be ten thousand pounds.

The salary of a Governor-General shall not be altered during his continuance in office.

4. The provisions of this Constitution relating to the Governor-General extend and apply to the Governor-General for the time being, or such person as the Queen may appoint to administer the Government of the Commonwealth; but no such person shall be entitled to receive any salary from the Commonwealth in respect of any other office during his administration of the Government of the Commonwealth.

5. The Governor-General may appoint such times for holding the sessions of the Parliament as he thinks fit, and may also from time to time, by Proclamation or otherwise, prorogue the Parliament, and may in like manner dissolve the House of Representatives.

After any general election the Parliament shall be summoned to meet not later than thirty days after the day appointed for the return of the writs.

The Parliament shall be summoned to meet not later than six months after the establishment of the Commonwealth.

6. There shall be a session of the Parliament once at least in every year, so that twelve months shall not intervene between the last sitting of the Parliament in one session and its first sitting in the next session.

PART II.—THE SENATE.

7. The Senate shall be composed of senators for each State, directly chosen by the people of the State, voting, until the Parliament otherwise provides, as one electorate.

But until the Parliament of the Commonwealth otherwise provides, the Parliament of the State of Queensland, if that State be an Original State, may make laws dividing the State into divisions and determining the number of senators to be chosen for each division, and in the absence of such provision the State shall be one electorate.

Until the Parliament otherwise provides there shall be six senators for each Original State.\* The Parliament may make laws increasing or diminishing the number of senators for each State, but so that equal representation of the several Original States shall be maintained and that no Original State shall have less than six senators.

The senators shall be chosen for a term of six years, and the names of the senators chosen for each State shall be certified by the Governor to the Governor-General.

8. The qualification of electors of senators shall be in each State that which is prescribed by this Constitution, or by the Parliament, as the qualification for electors of members of the House of Representatives; but in the choosing of senators each elector shall vote only once.

9. The Parliament of the Commonwealth may make laws prescribing the method of choosing senators, but so that the method shall be uniform for all the States. Subject to any such law, the Parliament of each State may make laws prescribing the method of choosing the senators for that State.

The Parliament of a State may make laws for determining the times and places of elections of senators for the State.

10. Until the Parliament otherwise provides, but subject to this Constitution, the laws in force in each State, for the time being, relating to elections for the more numerous House of the Parliament of the State shall, as nearly as practicable, apply to elections of senators for the State.

11. The Senate may proceed to the despatch of business, notwithstanding the failure of any State to provide for its representation in the Senate.

12. The Governor of any State may cause writs to be issued for elections of senators for the State. In case of the dissolution of the Senate the writs shall be issued within ten days from the proclamation of such dissolution.

13. As soon as may be after the Senate first meets, and after each first meeting of the Senate following a dissolution thereof, the Senate shall divide the senators chosen for each State into two classes, as nearly equal in number as practicable; and the places of the senators of the first class shall become vacant at the expiration of [the third year] *three years*,† and the places of those of the second class at the expiration of [the sixth year] *six years*,† from the beginning of their term of service; and afterwards the places of senators shall become vacant at the expiration of six years from the beginning of their term of service.

The election to fill vacant places shall be made [in the year at the expiration of which] *within one year before*† the places are to become vacant.

For the purposes of this section the term of service of a senator shall be taken to begin on the first day of [January] *July*† following the day of his election, except in the cases of the first election and of the election next after any dissolution of the Senate, when it shall be taken to begin on the first day of [January] *July*† preceding the day of his election.

14. Whenever the number of senators for a State is increased or diminished, the Parliament of the Commonwealth may make such provision for the vacating of the places of senators for the State as it deems necessary to maintain regularity in the rotation.

15. If the place of a senator becomes vacant before the expiration of his term of service, the Houses of Parliament of the State for which he was chosen shall, sitting and voting together, choose a person to hold the place until the expiration of the term, or until the election of a successor as hereinafter provided, whichever first happens. But if the Houses of Parliament of the State are not in session at the time when the vacancy is notified, the Governor of the State, with the advice of the Executive Council thereof, may appoint a person to hold the place until the expiration of fourteen days after the beginning of the next session of the Parliament of the State, or until the election of a successor, whichever first happens.

At the next general election of members of the House of Representatives, or at the next election of senators for the State, whichever first happens, a successor shall, if the term has not then expired, be chosen to hold the place from the date of his election until the expiration of the term.

The name of any senator so chosen or appointed shall be certified by the Governor of the State to the Governor-General.

16. The qualifications of a senator shall be the same as those of a member of the House of Representatives.

\* The Parliament has otherwise provided, by means of the *Representation Act* 1948, that the number of senators shall be ten for each State from the first meeting of Parliament after the first dissolution of the House of Representatives occurring after the commencement of the Act (18 May 1948).

† As amended by Section 2 of the *Constitution Alteration (Senate Elections)* 1906. The words in square brackets have been repealed; amendments are shown in italics.

17. The Senate shall, before proceeding to the despatch of any other business, choose a senator to be the President of the Senate; and as often as the office of President becomes vacant the Senate shall again choose a senator to be the President.

The President shall cease to hold his office if he ceases to be a senator. He may be removed from office by a vote of the Senate, or he may resign his office or his seat by writing addressed to the Governor-General.

18. Before or during any absence of the President, the Senate may choose a senator to perform his duties in his absence.

19. A senator may, by writing addressed to the President, or to the Governor-General if there is no President or if the President is absent from the Commonwealth, resign his place, which thereupon shall become vacant.

20. The place of a senator shall become vacant if for two consecutive months of any session of the Parliament he, without the permission of the Senate, fails to attend the Senate.

21. Whenever a vacancy happens in the Senate, the President, or if there is no President or if the President is absent from the Commonwealth the Governor-General, shall notify the same to the Governor of the State in the representation of which the vacancy has happened.

22. Until the Parliament otherwise provides, the presence of at least one third of the whole number of the senators shall be necessary to constitute a meeting of the Senate for the exercise of its powers.

23. Questions arising in the Senate shall be determined by a majority of votes, and each senator shall have one vote. The President shall in all cases be entitled to a vote; and when the votes are equal the question shall pass in the negative.

PART III.—THE HOUSE OF REPRESENTATIVES.

24. The House of Representatives shall be composed of members directly chosen by the people of the Commonwealth, and the number of such members shall be, as nearly as practicable, twice the number of the senators.

The number of members chosen in the several States shall be in proportion to the respective numbers of their people, and shall, until the Parliament otherwise provides, be determined, whenever necessary, in the following manner:—

- (i) A quota shall be ascertained by dividing the number of the people of the Commonwealth, as shown by the latest statistics of the Commonwealth, by twice the number of the senators;
- (ii) The number of members to be chosen in each State shall be determined by dividing the number of the people of the State, as shown by the latest statistics of the Commonwealth, by the quota; and if on such division there is a remainder greater than one-half of the quota, one more member shall be chosen in the State.

But notwithstanding anything in this section, five members at least shall be chosen in each Original State.

25. For the purposes of the last section, if by the law of any State all persons of any race are disqualified from voting at elections for the more numerous House of the Parliament of the State, then, in reckoning the number of the people of the State or of the Commonwealth, persons of that race resident in that State shall not be counted.

26. Notwithstanding anything in section twenty-four, the number of members to be chosen in each State at the first election shall be as follows:—

New South Wales . . . twenty-three;	South Australia . . . six;
Victoria . . . . . twenty;	Tasmania . . . . . five;
Queensland . . . . . eight;	

Provided that if Western Australia is an Original State, the numbers shall be as follows:—

New South Wales . . . twenty-six	South Australia . . . seven;
Victoria . . . . . twenty-three;	Western Australia . . five;
Queensland . . . . . nine;	Tasmania . . . . . five.

27. Subject to this Constitution, the Parliament may make laws for increasing or diminishing the number of the members of the House of Representatives.

28. Every House of Representatives shall continue for three years from the first meeting of the House, and no longer, but may be sooner dissolved by the Governor-General.

29. Until the Parliament of the Commonwealth otherwise provides, the Parliament of any State may make laws for determining the divisions in each State for which members of the House of Representatives may be chosen, and the number of members to be chosen for each division. A division shall not be formed out of parts of different States.

In the absence of other provision, each State shall be one electorate.

30. Until the Parliament otherwise provides, the qualification of electors of members of the House of Representatives shall be in each State that which is prescribed by the law of the State as the qualification of electors of the more numerous House of Parliament of the State; but in the choosing of members each elector shall vote only once.\*

31. Until the Parliament otherwise provides, but subject to this Constitution, the laws in force in each State for the time being relating to elections for the more numerous House of the Parliament of the State shall, as nearly as practicable, apply to elections in the State of members of the House of Representatives.

32. The Governor-General in Council may cause writs to be issued for general elections of members of the House of Representatives.

After the first general election, the writs shall be issued within ten days from the expiry of a House of Representatives or from the proclamation of a dissolution thereof.

33. Whenever a vacancy happens in the House of Representatives, the Speaker shall issue his writ for the election of a new member, or if there is no Speaker or if he is absent from the Commonwealth the Governor-General in Council may issue the writ.

34. Until the Parliament otherwise provides, the qualifications of a member of the House of Representatives shall be as follows:—

- (i) He must be of the full age of twenty-one years, and must be an elector entitled to vote at the election of members of the House of Representatives, or a person qualified to become such elector, and must have been for three years at the least a resident within the limits of the Commonwealth as existing at the time when he is chosen:
- (ii) He must be a subject of the Queen, either natural-born or for at least five years naturalized under a law of the United Kingdom, or of a Colony which has become or becomes a State, or of the Commonwealth, or of a State.†

35. The House of Representatives shall, before proceeding to the despatch of any other business, choose a member to be the Speaker of the House, and as often as the office of Speaker becomes vacant the House shall again choose a member to be the Speaker.

The Speaker shall cease to hold his office if he ceases to be a member. He may be removed from office by a vote of the House, or he may resign his office or his seat by writing addressed to the Governor-General.

36. Before or during any absence of the Speaker, the House of Representatives may choose a member to perform his duties in his absence.

37. A member may by writing addressed to the Speaker, or to the Governor-General if there is no Speaker or if the Speaker is absent from the Commonwealth, resign his place, which thereupon shall become vacant.

38. The place of a member shall become vacant if for two consecutive months of any session of the Parliament he, without the permission of the House, fails to attend the House.

39. Until the Parliament otherwise provides, the presence of at least one-third of the whole number of the members of the House of Representatives shall be necessary to constitute a meeting of the House for the exercise of its powers.

40. Questions arising in the House of Representatives shall be determined by a majority of votes other than that of the Speaker. The Speaker shall not vote unless the numbers are equal, and then he shall have a casting vote.

#### PART IV.—BOTH HOUSES OF THE PARLIAMENT.

41. No adult person who has or acquires a right to vote at elections for the more numerous House of the Parliament of a State shall, while the right continues, be prevented by any law of the Commonwealth from voting at elections for either House of the Parliament of the Commonwealth.

\* The Parliament has otherwise provided, by means of the *Commonwealth Electoral Act 1918-1965*, Sections 39 and 39A (repealing an earlier provision made by the *Commonwealth Franchise Act 1902*). For present qualifications see Chapter 3, General Government.

† The Parliament has otherwise provided, by means of the *Commonwealth Electoral Act 1918-1965*, Section 69. For present qualifications see Chapter 3, General Government.

42. Every senator and every member of the House of Representatives shall before taking his seat make and subscribe before the Governor-General, or some person authorized by him, an oath or affirmation of allegiance in the form set forth in the schedule to this Constitution.

43. A member of either House of the Parliament shall be incapable of being chosen or of sitting as a member of the other House.

44. Any person who—

- (i) Is under any acknowledgment of allegiance, obedience, or adherence to a foreign power, or is a subject or a citizen or entitled to the rights or privileges of a subject or a citizen of a foreign power: or
- (ii) Is attainted of treason, or has been convicted and is under sentence, or subject to be sentenced, for any offence punishable under the law of the Commonwealth or of a State by imprisonment for one year or longer: or
- (iii) Is an undischarged bankrupt or insolvent: or
- (iv) Holds any office of profit under the Crown, or any pension payable during the pleasure of the Crown out of any of the revenues of the Commonwealth: or
- (v) Has any direct or indirect pecuniary interest in any agreement with the Public Service of the Commonwealth otherwise than as a member and in common with the other members of an incorporated company consisting of more than twenty-five persons:

shall be incapable of being chosen or of sitting as a senator or a member of the House of Representatives.

But sub-section (iv) does not apply to the office of any of the Queen's Ministers of State for the Commonwealth, or of any of the Queen's Ministers for a State, or to the receipt of pay, half-pay, or a pension by any person as an officer or member of the Queen's navy or army, or to the receipt of pay as an officer or member of the naval or military forces of the Commonwealth by any person whose services are not wholly employed by the Commonwealth.

45. If a senator or member of the House of Representatives—

- (i) Becomes subject to any of the disabilities mentioned in the last preceding section: or
- (ii) Takes the benefit, whether by assignment, composition, or otherwise, of any law relating to bankrupt or insolvent debtors: or
- (iii) Directly or indirectly takes or agrees to take any fee or honorarium for services rendered to the Commonwealth, or for services rendered in the Parliament to any person or State:

his place shall thereupon become vacant.

46. Until the Parliament otherwise provides, any person declared by this Constitution to be incapable of sitting as a senator or as a member of the House of Representatives shall, for every day on which he so sits, be liable to pay the sum of one hundred pounds to any person who sues for it in any court of competent jurisdiction.

47. Until the Parliament otherwise provides, any question respecting the qualification of a senator or of a member of the House of Representatives, or respecting a vacancy in either House of the Parliament, and any question of a disputed election to either House shall be determined by the House in which the question arises.

48. Until the Parliament otherwise provides, each senator and each member of the House of Representatives shall receive an allowance of four hundred pounds a year, to be reckoned from the day on which he takes his seat.\*

49. The powers, privileges, and immunities of the Senate and of the House of Representatives, and of the members and the committees of each House, shall be such as are declared by the Parliament, and until declared shall be those of the Commons House of Parliament of the United Kingdom, and of its members and committees, at the establishment of the Commonwealth.

50. Each House of the Parliament may make rules and orders with respect to—

- (i) The mode in which its powers, privileges, and immunities may be exercised and upheld;
- (ii) The order and conduct of its business and proceedings either separately or jointly with the other House.

---

\* The Parliamentary allowance has been varied from time to time. For current allowances, see Chapter 3, General Government.

## PART V.—POWERS OF THE PARLIAMENT.\*

51. The Parliament shall, subject to this Constitution, have power to make laws for the peace, order, and good government of the Commonwealth with respect to:—

- (i) Trade and commerce with other countries, and among the States:
- (ii) Taxation; but so as not to discriminate between States or parts of States:
- (iii) Bounties on the production or export of goods, but so that such bounties shall be uniform throughout the Commonwealth:
- (iv) Borrowing money on the public credit of the Commonwealth:
- (v) Postal, telegraphic, telephonic, and other like services:
- (vi) The naval and military defence of the Commonwealth and of the several States, and the control of the forces to execute and maintain the laws of the Commonwealth:
- (vii) Lighthouses, lightships, beacons and buoys:
- (viii) Astronomical and meteorological observations:
- (ix) Quarantine:
- (x) Fisheries in Australian waters beyond territorial limits:
- (xi) Census and statistics:
- (xii) Currency, coinage, and legal tender:
- (xiii) Banking, other than State banking; also State banking extending beyond the limits of the State concerned, the incorporation of banks, and the issue of paper money:
- (xiv) Insurance, other than State insurance; also State insurance extending beyond the limits of the State concerned:
- (xv) Weights and measures:
- (xvi) Bills of exchange and promissory notes:
- (xvii) Bankruptcy and insolvency:
- (xviii) Copyrights, patents of inventions and designs, and trade marks:
- (xix) Naturalization and aliens:
- (xx) Foreign corporations, and trading or financial corporations formed within the limits of the Commonwealth:
- (xxi) Marriage:
- (xxii) Divorce and matrimonial causes; and in relation thereto, parental rights, and the custody and guardianship of infants:
- (xxiii) Invalid and old-age pensions:
- (xxiiiA) †*The provision of maternity allowances, widows' pensions, child endowment, unemployment, pharmaceutical, sickness and hospital benefits, medical and dental services (but not so as to authorize any form of civil conscription), benefits to students and family allowances:*
- (xxiv) The service and execution throughout the Commonwealth of the civil and criminal process and the judgments of the courts of the States:
- (xxv) The recognition throughout the Commonwealth of the laws, the public Acts and records, and the judicial proceedings of the States:
- (xxvi) The people of any race [other than the aboriginal race in any State]‡ for whom it is deemed necessary to make special laws:
- (xxvii) Immigration and emigration:
- (xxviii) The influx of criminals:
- (xxix) External affairs:
- (xxx) The relations of the Commonwealth with the islands of the Pacific:
- (xxxi) The acquisition of property on just terms from any State or person for any purpose in respect of which the Parliament has power to make laws:
- (xxxii) The control of railways with respect to transport for the naval and military purposes of the Commonwealth:

\* Particulars of proposed laws which were submitted to referendums are referred to in Chapter 3, General Government of this Year Book.

† Under Section 2 of the *Constitution Alteration (Social Services)* 1946, the Constitution was amended by the insertion of this paragraph.

‡ Under Section 2 of the *Constitution Alteration (Aboriginals)* 1967, the words in square brackets were omitted.

- (xxxiii) The acquisition, with the consent of a State, of any railways of the State on terms arranged between the Commonwealth and the State:
- (xxxiv) Railway construction and extension in any State with the consent of that State:
- (xxxv) Conciliation and arbitration for the prevention and settlement of industrial disputes extending beyond the limits of any one State:
- (xxxvi) Matters in respect of which this Constitution makes provision until the Parliament otherwise provides:
- (xxxvii) Matters referred to the Parliament of the Commonwealth by the Parliament or Parliaments of any State or States, but so that the law shall extend only to States by whose Parliaments the matters is referred, or which afterwards adopt the law:
- (xxxviii) The exercise within the Commonwealth, at the request or with the concurrence of the Parliaments of all the States directly concerned, of any power which can at the establishment of this Constitution be exercised only by the Parliament of the United Kingdom or by the Federal Council of Australasia:
- (xxxix) Matters incidental to the execution of any power vested by this Constitution in the Parliament or in either House thereof, or in the Government of the Commonwealth, or in the Federal Judicature, or in any department or officer of the Commonwealth.

52. The Parliament shall, subject to this Constitution, have exclusive power to make laws for the peace, order, and good government of the Commonwealth with respect to—

- (i) The seat of Government of the Commonwealth, and all places acquired by the Commonwealth for public purposes:
- (ii) Matters relating to any department of the public service the control of which is by this Constitution transferred to the Executive Government of the Commonwealth:
- (iii) Other matters declared by this Constitution to be within the exclusive power of the Parliament.

53. Proposed laws appropriating revenue or moneys, or imposing taxation, shall not originate in the Senate. But a proposed law shall not be taken to appropriate revenue or moneys, or to impose taxation, by reason only of its containing provisions for the imposition or appropriation of fines or other pecuniary penalties, or for the demand or payment or appropriation of fees for licences, or fees for services under the proposed law.

The Senate may not amend proposed laws imposing taxation, or proposed laws appropriating revenue or moneys for the ordinary annual services of the Government.

The Senate may not amend any proposed law so as to increase any proposed charge or burden on the people.

The Senate may at any stage return to the House of Representatives any proposed law which the Senate may not amend, requesting, by message, the omission or amendment of any items or provisions therein. And the House of Representatives may, if it thinks fit, make any of such omissions or amendments, with or without modifications.

Except as provided in this section, the Senate shall have equal power with the House of Representatives in respect of all proposed laws.

54. The proposed law which appropriates revenue or moneys for the ordinary annual services of the Government shall deal only with such appropriation.

55. Laws imposing taxation shall deal only with the imposition of taxation, and any provision therein dealing with any other matter shall be of no effect.

Laws imposing taxation, except laws imposing duties of customs or of excise, shall deal with one subject of taxation only; but laws imposing duties of customs shall deal with duties of customs only, and laws imposing duties of excise shall deal with duties of excise only.

56. A vote, resolution, or proposed law for the appropriation of revenue or moneys shall not be passed unless the purpose of the appropriation has in the same session been recommended by message of the Governor-General to the House in which the proposal originated.

57. If the House of Representatives passes any proposed law, and the Senate rejects or fails to pass it, or passes it with amendments to which the House of Representatives will not agree, and if after an interval of three months the House of Representatives, in the same or the next session, again passes the proposed law with or without any amendments which have been made, suggested, or agreed to by the Senate, and the Senate rejects or fails to pass it, or passes it with amendments to which the House of Representatives will not agree, the Governor-General may dissolve the Senate and the House of Representatives simultaneously. But such dissolution shall not take place within six months before the date of the expiry of the House of Representatives by effluxion of time.

If after such dissolution the House of Representatives again passes the proposed law, with or without any amendments which have been made, suggested, or agreed to by the Senate, and the Senate rejects or fails to pass it, or passes it with amendments to which the House of Representatives will not agree, the Governor-General may convene a joint sitting of the members of the Senate and of the House of Representatives.

The members present at the joint sitting may deliberate and shall vote together upon the proposed law as last proposed by the House of Representatives, and upon amendments, if any, which have been made therein by one House and not agreed to by the other, and any such amendments which are affirmed by an absolute majority of the total number of the members of the Senate and House of Representatives shall be taken to have been carried, and if the proposed law, with the amendments, if any, so carried is affirmed by an absolute majority of the total number of the members of the Senate and House of Representatives, it shall be taken to have been duly passed by both Houses of the Parliament, and shall be presented to the Governor-General for the Queen's assent.

58. When a proposed law passed by both Houses of the Parliament is presented to the Governor-General for the Queen's assent he shall declare, according to his discretion, but subject to this Constitution, that he assents in the Queen's name, or that he withholds assent, or that he reserves the law for the Queen's pleasure.

The Governor-General may return to the House in which it originated any proposed law so presented to him, and may transmit therewith any amendments which he may recommend, and the Houses may deal with the recommendation.

59. The Queen may disallow any law within one year from the Governor-General's assent, and such disallowance on being made known by the Governor-General by speech or message to each of the Houses of the Parliament, or by Proclamation, shall annul the law from the day when the disallowance is so made known.

60. A proposed law reserved for the Queen's pleasure shall not have any force unless and until within two years from the day on which it was presented to the Governor-General for the Queen's assent the Governor-General makes known, by speech or message to each of the Houses of the Parliament, or by Proclamation, that it has received the Queen's assent.

## CHAPTER II.—THE EXECUTIVE GOVERNMENT.

61. The executive power of the Commonwealth is vested in the Queen and is exercisable by the Governor-General as the Queen's representative, and extends to the execution and maintenance of this Constitution, and of the laws of the Commonwealth.

62. There shall be a Federal Executive Council to advise the Governor-General in the government of the Commonwealth, and the members of the Council shall be chosen and summoned by the Governor-General and sworn as Executive Councillors, and shall hold office during his pleasure.

63. The provisions of this Constitution referring to the Governor-General in Council shall be construed as referring to the Governor-General acting with the advice of the Federal Executive Council.

64. The Governor-General may appoint officers to administer such departments of State of the Commonwealth as the Governor-General in Council may establish.

Such officers shall hold office during the pleasure of the Governor-General. They shall be members of the Federal Executive Council, and shall be the Queen's Ministers of State for the Commonwealth.

After the first general election no Minister of State shall hold office for a longer period than three months unless he is or becomes a senator or a member of the House of Representatives.

65. Until the Parliament otherwise provides, the Ministers of State shall not exceed seven in number, and shall hold such offices as the Parliament prescribes, or, in the absence of provision, as the Governor-General directs.\*

66. There shall be payable to the Queen, out of the Consolidated Revenue Fund of the Commonwealth, for the salaries of the Ministers of State, an annual sum which, until the Parliament otherwise provides, shall not exceed twelve thousand pounds a year.\*

67. Until the Parliament otherwise provides, the appointment and removal of all other officers of the Executive Government of the Commonwealth shall be vested in the Governor-General in Council, unless the appointment is delegated by the Governor-General in Council or by a law of the Commonwealth to some other authority.

\* The number of Ministers of State and the annual appropriation for their salaries have been varied from time to time. For current particulars, see Chapter 3, General Government.

68. The command in chief of the naval and military forces of the Commonwealth is vested in the Governor-General as the Queen's representative.

69. On a date or dates to be proclaimed by the Governor-General after the establishment of the Commonwealth the following departments of the public service in each State shall become transferred to the Commonwealth:—

Posts, telegraphs, and telephones:		Lighthouses, lightships, beacons, and buoys:
Naval and military defence:		Quarantine.

But the departments of customs and of excise in each State shall become transferred to the Commonwealth on its establishment.

70. In respect of matters which, under this Constitution, pass to the Executive Government of the Commonwealth, all powers and functions which at the establishment of the Commonwealth are vested in the Governor of a Colony, or in the Governor of a Colony with the advice of his Executive Council, or in any authority of a Colony, shall vest in the Governor-General, or in the Governor-General in Council, or in the authority exercising similar powers under the Commonwealth, as the case requires.

### CHAPTER III.—THE JUDICATURE.

71. The judicial power of the Commonwealth shall be vested in a Federal Supreme Court, to be called the High Court of Australia, and in such other federal courts as the Parliament creates, and in such other courts as it invests with federal jurisdiction. The High Court shall consist of a Chief Justice, and so many other Justices, not less than two, as the Parliament prescribes.\*

72. The Justices of the High Court and of the other Courts created by the Parliament—

- (i) Shall be appointed by the Governor-General in Council:
- (ii) Shall not be removed except by the Governor-General in Council, on an address from both Houses of the Parliament in the same session, praying for such removal on the ground of proved misbehaviour or incapacity:
- (iii) Shall receive such remuneration as the Parliament may fix; but the remuneration shall not be diminished during their continuance in office.†

73. The High Court shall have jurisdiction, with such exceptions and subject to such regulations as the Parliament prescribes, to hear and determine appeals from all judgments, decrees, orders, and sentences—

- (i) Of any Justice or Justices exercising the original jurisdiction of the High Court:
- (ii) Of any other federal court, or court exercising federal jurisdiction; or of the Supreme Court of any State, or of any other court of any State from which at the establishment of the Commonwealth an appeal lies to the Queen in Council:
- (iii) Of the Inter-State Commission, but as to questions of law only:

and the judgment of the High Court in all such cases shall be final and conclusive.

But no exception or regulation prescribed by the Parliament shall prevent the High Court from hearing and determining any appeal from the Supreme Court of a State in any matter in which at the establishment of the Commonwealth an appeal lies from such Supreme Court to the Queen in Council.

Until the Parliament otherwise provides, the conditions of and restrictions on appeals to the Queen in Council from the Supreme Courts of the several States shall be applicable to appeals from them to the High Court.

74. No appeal shall be permitted to the Queen in Council from a decision of the High Court upon any question, howsoever arising, as to the limits inter se of the Constitutional powers of the Commonwealth and those of any State or States, or as to the limits inter se of the Constitutional powers of any two or more States, unless the High Court shall certify that the question is one which ought to be determined by Her Majesty in Council.

The High Court may so certify if satisfied that for any special reason the certificate should be granted, and thereupon an appeal shall lie to Her Majesty in Council on the question without further leave.

Except as provided in this section, this Constitution shall not impair any right which the Queen may be pleased to exercise by virtue of Her Royal prerogative to grant special leave of appeal from the High Court to Her Majesty in Council. The Parliament may make laws limiting the matters in which such leave may be asked, but proposed laws containing any such limitation shall be reserved by the Governor-General for Her Majesty's pleasure.

\* The *Judiciary Act* 1903 provided for a Chief Justice and two other Justices, increased by subsequent amendments to six.

† The *Judiciary Act* 1903 provided for the payment of a salary of £3,500 (\$7,000) a year to the Chief Justice and of £3,000 (\$6,000) a year to each other Justice. These amounts have been varied from time to time.

75. In all matters—

- (i) Arising under any treaty:
- (ii) Affecting consuls or other representatives of other countries:
- (iii) In which the Commonwealth, or a person suing or being sued on behalf of the Commonwealth, is a party:
- (iv) Between States, or between residents of different States, or between a State and a resident of another State:
- (v) In which a writ of Mandamus or prohibition or an injunction is sought against an officer of the Commonwealth:

the High Court shall have original jurisdiction.

76. The Parliament may make laws conferring original jurisdiction on the High Court in any matter—

- (i) Arising under this Constitution, or involving its interpretation:
- (ii) Arising under any laws made by the Parliament:
- (iii) Of Admiralty and maritime jurisdiction:
- (iv) Relating to the same subject-matter claimed under the laws of different States.

77. With respect to any of the matters mentioned in the last two sections the Parliament may make laws—

- (i) Defining the jurisdiction of any federal court other than the High Court:
- (ii) Defining the extent to which the jurisdiction of any federal court shall be exclusive of that which belongs to or is invested in the courts of the States:
- (iii) Investing any court of a State with federal jurisdiction.

78. The Parliament may make laws conferring rights to proceed against the Commonwealth or a State in respect of matters within the limits of the judicial power.

79. The federal jurisdiction of any court may be exercised by such number of judges as the Parliament prescribes.

80. The trial on indictment of any offence against any law of the Commonwealth shall be by jury, and every such trial shall be held in the State where the offence was committed, and if the offence was not committed within any State the trial shall be held at such place or places as the Parliament prescribes.

#### CHAPTER IV.—FINANCE AND TRADE.

81. All revenues or moneys raised or received by the Executive Government of the Commonwealth shall form one Consolidated Revenue Fund, to be appropriated for the purposes of the Commonwealth in the manner and subject to the charges and liabilities imposed by this Constitution.

82. The costs, charges, and expenses incident to the collection, management, and receipt of the Consolidated Revenue Fund shall form the first charge thereon; and the revenue of the Commonwealth shall in the first instance be applied to the payment of the expenditure of the Commonwealth.

83. No money shall be drawn from the Treasury of the Commonwealth except under appropriation made by law.

But until the expiration of one month after the first meeting of the Parliament the Governor-General in Council may draw from the Treasury and expend such moneys as may be necessary for the maintenance of any department transferred to the Commonwealth and for the holding of the first elections for the Parliament.

84. When any department of the public service of a State becomes transferred to the Commonwealth, all officers of the department shall become subject to the control of the Executive Government of the Commonwealth.

Any such officer who is not retained in the service of the Commonwealth shall, unless he is appointed to some other office of equal emolument in the public service of the State, be entitled to receive from the State any pension, gratuity, or other compensation, payable under the law of the State on the abolition of his office.

Any such officer who is retained in the service of the Commonwealth shall preserve all his existing and accruing rights, and shall be entitled to retire from office at the time, and on the pension or retiring allowance, which would be permitted by the law of the State if his service with the Commonwealth were a continuation of his service with the State. Such pension or retiring allowance shall be paid to him by the Commonwealth; but the State shall pay to the Commonwealth a part thereof

to be calculated on the proportion which his term of service with the State bears to his whole term of service, and for the purpose of the calculation his salary shall be taken to be that paid to him by the State at the time of the transfer.

Any officer who is, at the establishment of the Commonwealth, in the public service of a State and who is by consent of the Governor of the State with the advice of the Executive Council thereof, transferred to the public service of the Commonwealth, shall have the same rights as if he had been an officer of a department transferred to the Commonwealth and were retained in the service of the Commonwealth.

85. When any department of the public service of a State is transferred to the Commonwealth—

- (i) All property of the State of any kind, used exclusively in connexion with the department, shall become vested in the Commonwealth; but, in the case of the departments controlling customs and excise and bounties, for such time only as the Governor-General in Council may declare to be necessary:
- (ii) The Commonwealth may acquire any property of the State, of any kind used, but not exclusively used in connexion with the department; the value thereof shall, if no agreement can be made, be ascertained in, as nearly as may be, the manner in which the value of land, or of an interest in land, taken by the State for public purposes is ascertained under the law of the State in force at the establishment of the Commonwealth:
- (iii) The Commonwealth shall compensate the State for the value of any property passing to the Commonwealth under this section; if no agreement can be made as to the mode of compensation, it shall be determined under laws to be made by the Parliament:
- (iv) The Commonwealth shall, at the date of the transfer, assume the current obligations of the State in respect of the department transferred.

86. On the establishment of the Commonwealth, the collection and control of duties of customs and of excise, and the control of the payment of bounties, shall pass to the Executive Government of the Commonwealth.

87. During a period of ten years after the establishment of the Commonwealth and thereafter until the Parliament otherwise provides, of the net revenue of the Commonwealth from duties of customs and of excise not more than one-fourth shall be applied annually by the Commonwealth towards its expenditure.

The balance shall, in accordance with this Constitution, be paid to the several States, or applied towards the payment of interest on debts of the several States taken over by the Commonwealth.

88. Uniform duties of customs shall be imposed within two years after the establishment of the Commonwealth.

89. Until the imposition of uniform duties of customs—

- (i) The Commonwealth shall credit to each State the revenues collected therein by the Commonwealth.
- (ii) The Commonwealth shall debit to each State—
  - (a) The expenditure therein of the Commonwealth incurred solely for the maintenance or continuance, as at the time of transfer, of any department transferred from the State to the Commonwealth;
  - (b) The proportion of the State, according to the number of its people, in the other expenditure of the Commonwealth.
- (iii) The Commonwealth shall pay to each State month by month the balance (if any) in favour of the State.

90. On the imposition of uniform duties of customs the power of the Parliament to impose duties of customs and of excise, and to grant bounties on the production or export of goods, shall become exclusive.

On the imposition of uniform duties of customs all laws of the several States imposing duties of customs or of excise, or offering bounties on the production or export of goods, shall cease to have effect, but any grant of or agreement for any such bounty lawfully made by or under the authority of the Government of any State shall be taken to be good if made before the thirtieth day of June, one thousand eight hundred and ninety-eight, and not otherwise.

91. Nothing in this Constitution prohibits a State from granting any aid to or bounty on mining for gold, silver, or other metals, nor from granting, with the consent of both Houses of the Parliament of the Commonwealth expressed by resolution, any aid to or bounty on the production or export of goods.

92. On the imposition of uniform duties of customs, trade, commerce, and intercourse among the States, whether by means of internal carriage or ocean navigation, shall be absolutely free.

But notwithstanding anything in this Constitution, goods imported before the imposition of uniform duties of customs into any State, or into any Colony which, whilst the goods remain therein, becomes a State, shall, on thence passing into another State within two years after the imposition of such duties, be liable to any duty chargeable on the importation of such goods into the Commonwealth, less any duty paid in respect of the goods on their importation.

93. During the first five years after the imposition of uniform duties of customs, and thereafter until the Parliament otherwise provides—

- (i) The duties of customs chargeable on goods imported into a State and afterwards passing into another State for consumption, and the duties of excise paid on goods produced or manufactured in a State and afterwards passing into another State for consumption, shall be taken to have been collected not in the former but in the latter State:
- (ii) Subject to the last sub-section, the Commonwealth shall credit revenue, debit expenditure, and pay balances to the several States as prescribed for the period preceding the imposition of uniform duties of customs.

94. After five years from the imposition of uniform duties of customs, the Parliament may provide, on such basis as it deems fair, for the monthly payment to the several States of all surplus revenue of the Commonwealth.

95. Notwithstanding anything in this Constitution, the Parliament of the State of Western Australia, if that State be an Original State, may, during the first five years after the imposition of uniform duties of customs, impose duties of customs on goods passing into that State and not originally imported from beyond the limits of the Commonwealth; and such duties shall be collected by the Commonwealth.

But any duty so imposed on any goods shall not exceed during the first of such years the duty chargeable on the goods under the law of Western Australia in force at the imposition of uniform duties, and shall not exceed during the second, third, fourth, and fifth of such years respectively, four-fifths, three-fifths, two-fifths and one-fifth of such latter duty, and all duties imposed under this section shall cease at the expiration of the fifth year after the imposition of uniform duties.

If at any time during the five years the duty on any goods under this section is higher than the duty imposed by the Commonwealth on the importation of the like goods, then such higher duty shall be collected on the goods when imported into Western Australia from beyond the limits of the Commonwealth.

96. During a period of ten years after the establishment of the Commonwealth and thereafter until the Parliament otherwise provides, the Parliament may grant financial assistance to any State on such terms and conditions as the Parliament thinks fit.

97. Until the Parliament otherwise provides, the laws in force in any Colony which has become or becomes a State with respect to the receipt of revenue and the expenditure of money on account of the Government of the Colony, and the review and audit of such receipt and expenditure, shall apply to the receipt of revenue and the expenditure of money on account of the Commonwealth in the State in the same manner as if the Commonwealth, or the Government or an officer of the Commonwealth, were mentioned whenever the Colony, or the Government or an officer of the Colony, is mentioned.

98. The power of the Parliament to make laws with respect to trade and commerce extends to navigation and shipping, and to railways the property of any State.

99. The Commonwealth shall not, by any law or regulation of trade, commerce, or revenue, give preference to one State or any part thereof over another State or any part thereof.

100. The Commonwealth shall not, by any law or regulation of trade or commerce, abridge the right of a State or of the residents therein to the reasonable use of the waters of rivers for conservation or irrigation.

101. There shall be an Inter-State Commission, with such powers of adjudication and administration as the Parliament deems necessary for the execution and maintenance, within the Commonwealth, of the provisions of this Constitution relating to trade and commerce, and of all laws made thereunder.

102. The Parliament may by any law with respect to trade or commerce forbid, as to railways, any preference or discrimination by any State, or by any authority constituted under a State, if such preference or discrimination is undue and unreasonable, or unjust to any State; due regard

being had to the financial responsibilities incurred by any State in connexion with the construction and maintenance of its railways. But no preference or discrimination shall, within the meaning of this section, be taken to be undue and unreasonable, or unjust to any State, unless so adjudged by the Inter-State Commission.

103. The members of the Inter-State Commission—

- (i) Shall be appointed by the Governor-General in Council:
- (ii) Shall hold office for seven years, but may be removed within that time by the Governor-General in Council, on an address from both Houses of the Parliament in the same session praying for such removal on the ground of proved misbehaviour or incapacity:
- (iii) Shall receive such remuneration as the Parliament may fix; but such remuneration shall not be diminished during their continuance in office.

104. Nothing in this Constitution shall render unlawful any rate for the carriage of goods upon a railway, the property of a State, if the rate is deemed by the Inter-State Commission to be necessary for the development of the territory of the State, and if the rate applies equally to goods within the State and to goods passing into the State from other States.

105. The Parliament may take over from the States their public debts [as existing at the establishment of the Commonwealth],\* or a proportion thereof according to the respective numbers of their people as shown by the latest statistics of the Commonwealth, and may convert, renew, or consolidate such debts, or any part thereof; and the States shall indemnify the Commonwealth in respect of the debts taken over, and thereafter the interest payable in respect of the debts shall be deducted and retained from the portions of the surplus revenue of the Commonwealth payable to the several States, or if such surplus is insufficient, or if there is no surplus, then the deficiency or the whole amount shall be paid by the several States.

105A.† (1.) *The Commonwealth may make agreements with the States with respect to the public debts of the States, including—*

- (a) *the taking over of such debts by the Commonwealth;*
- (b) *the management of such debts;*
- (c) *the payment of interest and the provision and management of sinking funds in respect of such debts;*
- (d) *the consolidation, renewal, conversion, and redemption of such debts;*
- (e) *the indemnification of the Commonwealth by the States in respect of debts taken over by the Commonwealth; and*
- (f) *the borrowing of money by the States or by the Commonwealth, or by the Commonwealth for the States.*

(2.) *The Parliament may make laws for validating any such agreement made before the commencement of this section.*

(3.) *The Parliament may make laws for the carrying out by the parties thereto of any such agreement.*

(4.) *Any such agreement may be varied or rescinded by the parties thereto.*

(5.) *Every such agreement and any such variation thereof shall be binding upon the Commonwealth and the States parties thereto notwithstanding anything contained in this Constitution or the Constitution of the several States or in any law of the Parliament of the Commonwealth or of any State.*

(6.) *The powers conferred by this section shall not be construed as being limited in any way by the provisions of section one hundred and five of this Constitution.*

#### CHAPTER V.—THE STATES.

106. The Constitution of each State of the Commonwealth shall, subject to this Constitution, continue as at the establishment of the Commonwealth, or as at the admission or establishment of the State, as the case may be, until altered in accordance with the Constitution of the State.

107. Every power of the Parliament of a Colony which has become or becomes a State, shall, unless it is by this Constitution exclusively vested in the Parliament of the Commonwealth or withdrawn from the Parliament of the State, continue as at the establishment of the Commonwealth, or as at the admission or establishment of the State, as the case may be.

\* Under Section 2 of the *Constitution Alteration (State Debts) 1909*, the words in square brackets were omitted.

† Under Section 2 of the *Constitution Alteration (State Debts) 1928*, the Constitution was amended by the insertion of this section.

108. Every law in force in a Colony which has become or becomes a State, and relating to any matter within the powers of the Parliament of the Commonwealth, shall, subject to this Constitution, continue in force in the State; and, until provision is made in that behalf by the Parliament of the Commonwealth, the Parliament of the State shall have such powers of alteration and of repeal in respect of any such law as the Parliament of the Colony had until the Colony became a State.

109. When a law of a State is inconsistent with a law of the Commonwealth, the latter shall prevail, and the former shall, to the extent of the inconsistency, be invalid.

110. The provisions of this Constitution relating to the Governor of a State extend and apply to the Governor for the time being of the State, or other chief executive officer or administrator of the government of the State.

111. The Parliament of a State may surrender any part of the State to the Commonwealth; and upon such surrender, and the acceptance thereof by the Commonwealth, such part of the State shall become subject to the exclusive jurisdiction of the Commonwealth.

112. After uniform duties of customs have been imposed, a State may levy on imports or exports, or on goods passing into or out of the State, such charges as may be necessary for executing the inspection laws of the State; but the net produce of all charges so levied shall be for the use of the Commonwealth; and any such inspection laws may be annulled by the Parliament of the Commonwealth.

113. All fermented, distilled, or other intoxicating liquids passing into any State or remaining therein for use, consumption, sale or storage, shall be subject to the laws of the State as if such liquids had been produced in the State.

114. A State shall not, without the consent of the Parliament of the Commonwealth, raise or maintain any naval or military force, or impose any tax on property of any kind belonging to the Commonwealth, nor shall the Commonwealth impose any tax on property of any kind belonging to a State.

115. A State shall not coin money, nor make anything but gold and silver coin a legal tender in payment of debts.

116. The Commonwealth shall not make any law for establishing any religion, or for imposing any religious observance, or for prohibiting the free exercise of any religion, and no religious test shall be required as a qualification for any office or public trust under the Commonwealth.

117. A subject of the Queen, resident in any State, shall not be subject in any other State to any disability or discrimination which would not be equally applicable to him if he were a subject of the Queen resident in such other State.

118. Full faith and credit shall be given, throughout the Commonwealth, to the laws, the public Acts and records, and the judicial proceedings of every State.

119. The Commonwealth shall protect every State against invasion and, on the application of the Executive Government of the State, against domestic violence.

120. Every State shall make provision for the detention in its prisons of persons accused or convicted of offences against the laws of the Commonwealth, and for the punishment of persons convicted of such offences, and the Parliament of the Commonwealth may make laws to give effect to this provision.

#### CHAPTER VI.—NEW STATES.

121. The Parliament may admit to the Commonwealth or establish new States, and may upon such admission or establishment make or impose such terms and conditions, including the extent of representation in either House of the Parliament, as it thinks fit.

122. The Parliament may make laws for the government of any territory surrendered by any State to and accepted by the Commonwealth, or of any territory placed by the Queen under the authority of and accepted by the Commonwealth, or otherwise acquired by the Commonwealth, and may allow the representation of such territory in either House of the Parliament to the extent and on the terms which it thinks fit.

123. The Parliament of the Commonwealth may, with the consent of the Parliament of a State, and the approval of the majority of the electors of the State voting upon the question, increase, diminish, or otherwise alter the limits of the State, upon such terms and conditions as may be agreed on, and may, with the like consent, make provision respecting the effect and operation of any increase or diminution or alteration of territory in relation to any State affected.

124. A new State may be formed by separation of territory from a State, but only with the consent of the Parliament thereof, and a new State may be formed by the union of two or more States or parts of States, but only with the consent of the Parliaments of the States affected.

## CHAPTER VII.—MISCELLANEOUS.

125. The seat of Government of the Commonwealth shall be determined by the Parliament and shall be within territory which shall have been granted to or acquired by the Commonwealth, and shall be vested in and belong to the Commonwealth, and shall be in the State of New South Wales, and be distant not less than one hundred miles from Sydney.

Such territory shall contain an area of not less than one hundred square miles, and such portion thereof as shall consist of Crown lands shall be granted to the Commonwealth without any payment therefor.

The Parliament shall sit at Melbourne until it meet at the Seat of Government.

126. The Queen may authorize the Governor-General to appoint any person, or any persons jointly or severally, to be his deputy or deputies within any part of the Commonwealth, and in that capacity to exercise during the pleasure of the Governor-General such powers and functions of the Governor-General as he thinks fit to assign to such deputy or deputies, subject to any limitations expressed or directions given by the Queen; but the appointment of such deputy or deputies shall not affect the exercise by the Governor-General himself of any power or function.

\*[127. In reckoning the numbers of the people of the Commonwealth, or of a State or other part of the Commonwealth, aboriginal natives shall not be counted.]

## CHAPTER VIII.—ALTERATION OF THE CONSTITUTION.

128. This Constitution shall not be altered except in the following manner:—

The proposed law for the alteration thereof must be passed by an absolute majority of each House of the Parliament, and not less than two nor more than six months after its passage through both Houses the proposed law shall be submitted in each State to the electors qualified to vote for the election of members of the House of Representatives.

But if either House passes any such proposed law by an absolute majority, and the other House rejects or fails to pass it or passes it with any amendment to which the first-mentioned House will not agree, and if after an interval of three months the first-mentioned House in the same or the next session again passes the proposed law by an absolute majority with or without any amendment which has been made or agreed to by the other House, and such other House rejects or fails to pass it or passes it with any amendment to which the first-mentioned House will not agree, the Governor-General may submit the proposed law as last proposed by the first-mentioned House, and either with or without any amendments subsequently agreed to by both Houses, to the electors in each State qualified to vote for the election of the House of Representatives.

When a proposed law is submitted to the electors the vote shall be taken in such manner as the Parliament prescribes. But until the qualification of electors of members of the House of Representatives becomes uniform throughout the Commonwealth, only one-half the electors voting for and against the proposed law shall be counted in any State in which adult suffrage prevails.

And if in a majority of the States a majority of the electors voting approve the proposed law, and if a majority of all the electors voting also approve the proposed law, it shall be presented to the Governor-General for the Queen's assent.

No alteration diminishing the proportionate representation of any State in either House of the Parliament, or the minimum number of representatives of a State in the House of Representatives, or increasing, diminishing, or otherwise altering the limits of the State, or in any manner affecting the provisions of the Constitution in relation thereto, shall become law unless the majority of the electors voting in that State approve the proposed law.

## SCHEDULE.

## OATH.

I, *A.B.*, do swear that I will be faithful and bear true allegiance to Her Majesty Queen Victoria, Her heirs and successors according to law. **SO HELP ME GOD!**

## AFFIRMATION.

I, *A.B.*, do solemnly and sincerely affirm and declare that I will be faithful and bear true allegiance to Her Majesty Queen Victoria, Her heirs and successors according to law.

(NOTE.—*The name of the King or Queen of the United Kingdom of Great Britain and Ireland for the time being is to be substituted from time to time.*)

---

\* Under Section 3 of the *Constitution Alteration (Aboriginals) 1967* the section in square brackets was repealed.

**The Royal Proclamation**

The preceding Act received the Royal assent on 9 July 1900. This made it lawful to declare that the people of Australia should be united in a Federal Commonwealth. This proclamation, made on 17 September 1900, constituted the Commonwealth as from 1 January 1901; it read as follows.

BY THE QUEEN.  
A PROCLAMATION.

(Signed) VICTORIA R.

WHEREAS by an Act of Parliament passed in the Sixty-third and Sixty-fourth Years of Our Reign, intituled "An Act to constitute the Commonwealth of *Australia*," it is enacted that it shall be lawful for the Queen, with the advice of the Privy Council, to declare by Proclamation, that, on and after a day therein appointed, not being later than One year after the passing of this Act, the people of *New South Wales*, *Victoria*, *South Australia*, *Queensland* and *Tasmania*, and also, if Her Majesty is satisfied that the people of *Western Australia* have agreed thereto, of *Western Australia*, shall be united in a Federal Commonwealth under the name of the Commonwealth of Australia.

And whereas We are satisfied that the people of *Western Australia* have agreed thereto accordingly.

We therefore, by and with the advice of Our Privy Council, have thought fit to issue this Our Royal Proclamation, and We do hereby declare that on and after the First day of *January* One thousand nine hundred and one, the people of *New South Wales*, *Victoria*, *South Australia*, *Queensland*, *Tasmania*, and *Western Australia* shall be united in a Federal Commonwealth under the name of the Commonwealth of *Australia*.

Given at Our Court at *Balmoral* this Seventeenth day of *September*, in the Year of Our Lord One thousand nine hundred, and in the Sixty-fourth Year of Our Reign.

GOD SAVE THE QUEEN.

### The External Territories of Australia\*

**Norfolk Island**

In 1856 Norfolk Island was created a distinct and separate settlement under the jurisdiction of New South Wales. Later, in 1896, it was made a dependency under the Governor of that colony, and finally by the passage of the *Norfolk Island Act* 1913 it was accepted as a Territory of the Commonwealth of Australia. The island is situated in latitude 29° 3' 3" S., longitude 167° 57' 5" E., and comprises an area of approximately 14 square miles.

**Papua**

Under the administration of the Commonwealth, but not included in it, is British New Guinea or Papua, finally annexed by the British Government in 1884. This Territory was for a number of years administered by the Queensland Government, but was transferred to the Commonwealth by proclamation on 1 September 1906, under the authority of the *Papua Act* 1905. The area of Papua is about 86,100 square miles.

**Trust Territory of New Guinea**

In 1919 it was agreed by the Principal Allied and Associated Powers that a mandate should be conferred on Australia for the government of the former German territories and islands situated in latitude between the Equator and 8° S., and in longitude between 141° E. and 159° 25' E. The mandate was issued by the League of Nations on 17 December 1920. The Governor-General of the Commonwealth was authorised to accept the mandate by the *New Guinea Act* 1920, which also declared the area to be a Territory under the authority of the Commonwealth by the name of the Territory of New Guinea. The land area comprises about 92,160 square miles, and the administration under the mandate dated from 9 May 1921. New Guinea is now administered under a Trusteeship Agreement with the United Nations, approved on 13 December 1946.

**Australian Antarctic Territory**

An Imperial Order in Council of 7 February 1933 placed under Australian authority 'all the islands and territories other than Adelle Land which are situated south of the 60th degree of South Latitude and lying between the 160th degree of East Longitude and the 45th degree of East Longitude'.

\* Until 31 January 1968 included the former Trust Territory of Nauru, which became independent as the Republic of Nauru on that date. For further information on Nauru see Year Book No. 54, pages 22-3 and 1174, and earlier issues.

The Order came into force with a proclamation issued by the Governor-General on 24 August 1936, after the passing of the *Australian Antarctic Territory Acceptance Act* 1933 by the Commonwealth Parliament. The boundaries of Adelie Land were definitely fixed by a French Decree of 1 April 1938 as latitude 60° S., longitude 136° E., and longitude 142° E.

#### **Heard and McDonald Islands**

Heard and McDonald Islands, about 2,500 miles south-west of Fremantle, were transferred from United Kingdom to Australian control as from 26 December 1947. Heard Island is approximately 27 miles long and 13 miles wide, and McDonald Islands, about 26 miles to the west of Heard Island, are small, rocky and precipitous.

#### **Cocos [Keeling] Islands**

*The Cocos (Keeling) Islands Act* 1955 provided for the acceptance of the Cocos Islands, in the Indian Ocean, as a Territory under the authority of the Commonwealth of Australia and was parallel to an Act of the United Kingdom Parliament transferring authority over the islands to the Commonwealth. Consequent on the passing of these Acts, Her Majesty, by Order in Council, specified 23 November 1955 as the date of transfer. From that date the islands came under Australian administration and an Official Representative of Australia was appointed to take charge of the local administration of the islands. Their area is about 5½ square miles, and they are situated in the Indian Ocean in latitude 12° 5' S. and longitude 96° 53' E.

#### **Christmas Island**

*The Christmas Island Act* 1958 provided for the acceptance of Christmas Island, in the Indian Ocean, as a Territory under the authority of the Commonwealth of Australia. Complementary legislation having been passed by the Parliament of the United Kingdom, the island was transferred to the Australian administration on 1 October 1958, and an Official Representative was appointed to administer the Territory. The area of the island is about 52 square miles and it is situated in the Indian Ocean in latitude 10° 25' 22" S. and longitude 105° 39' 59" E.

## CHAPTER 2

# PHYSICAL GEOGRAPHY AND CLIMATE

### General description of Australia

#### Geographical position

The Australian Commonwealth, which includes the island continent of Australia and the island of Tasmania, is situated in the Southern Hemisphere, and comprises an area of 2,967,909 square miles, the mainland alone containing 2,941,526 square miles. Bounded on the west and east by the Indian and Pacific Oceans respectively, it lies between longitudes 113° 9' E. and 153° 39' E., while its northern and southern limits are the parallels of latitude 10° 41' S. and 43° 39' S., or, excluding Tasmania, 39° 8' S. On its north are the Timor and Arafura Seas and Torres Strait, on its south the Southern Ocean\*. The extreme points are Steep Point on the West, Cape Byron on the east, Cape York on the north, and South-East Cape or, if Tasmania be excluded, Wilson's Promontory, on the south. The difference in latitude between Cape York and Wilson's Promontory is 1,959 miles, and in longitude between Steep Point and Cape Byron 2,489 miles.

#### Tropical and temperate regions

Of the total area of Australia, nearly 39 per cent lies within the tropics. Taking the latitude of the Tropic of Capricorn as 23° 30' S., the areas within the tropical and temperate zones are approximately as follows.

**AREAS OF TROPICAL AND TEMPERATE REGIONS: STATES AND TERRITORIES**  
(Square miles)

<i>Area</i>	<i>N.S.W.</i> ( <i>a</i> )	<i>Vic.</i>	<i>Qld</i>	<i>S.A.</i>	<i>W.A.</i>	<i>Tas.</i>	<i>N.T.</i>	<i>Total</i>

<b>Total area</b> .	<b>310,372</b>	<b>87,884</b>	<b>667,000</b>	<b>380,070</b>	<b>975,920</b>	<b>26,383</b>	<b>520,280</b>	<b>2,967,909</b>

(*a*) Includes Australian Capital Territory (939 square miles).

Fifty-four per cent of Queensland lies within the tropical zone and 46 per cent in the temperate zone; 37 per cent of Western Australia is tropical and 63 per cent temperate; while 81 per cent of the Northern Territory is tropical and 19 per cent temperate. All the remaining States lie within the temperate zone.

#### Area of Australia compared with areas of other countries

The area of Australia is almost as great as that of the United States of America excluding Alaska, four-fifths of that of Canada, more than half as large again as Europe excluding the U.S.S.R., and about twenty-five times that of Great Britain and Ireland. The areas of Australia and of certain other countries are shown in the table on the following page. The areas shown are in the main obtained from the *Statistical Yearbook* 1967, published by the Statistical Office of the United Nations, and the countries have been arranged in accordance with the continental groups used therein.

\* The Southern Ocean is a local designation for the part of the Indian Ocean lying between the southern shores of Australia and Antarctica.

The coastline of Australia is approximately 12,000 miles long—New South Wales, 700 miles; Victoria, 700 miles; Queensland, 3,200 miles; South Australia, 1,500 miles; Western Australia, 4,000 miles; Northern Territory, 1,000 miles; Australian Capital Territory, Jervis Bay area included in New South Wales; Tasmania, 900 miles. These measurements are broadly on a 'direct' basis, but even so they must be regarded as approximate only.

#### Geographical features of Australia

The following description is a broad summary of the main physical characteristics of the Australian continent.

A section through the Australian continent from east to west, at the point of its greatest breadth, shows first a narrow belt of coastal plain. This plain, extending north and south along the whole east coast, is well watered by rivers. It is of variable width, seldom more than sixty or seventy miles, and occasionally only a few miles, the average being roughly about forty to fifty miles. Bordering this plain is the Great Dividing Range, which extends from the north of Queensland to the south of New South Wales, and thence one branch sweeps westwards towards the boundary of Victoria and South Australia, and the other, the main branch, terminates in Tasmania. This range, which rises, often abruptly, from the plain, frequently presents bold escarpments on its eastern face, but the descent on its western slopes is gradual, until, in the country to the north of Spencer's Gulf, the plain is not above sea-level and occasionally even below it. Thence there is another almost imperceptible rise until the mountain ranges of Western Australia are reached, and beyond these lies another coastal plain. The mountains of Australia are relatively low, the highest peak, Mount Kosciusko, in New South Wales, being only about 7,300 feet. Three-quarters of the land-mass of Australia lies between the 600 and 1,500 feet contours in the form of a huge plateau, constituting the most distinctive feature of the Australian continent, to which the peculiarities of Australia's climate can probably be largely ascribed.

The rivers of Australia may be divided into two major classes, those of the coastal plains with moderate rates of fall and those of the central plains with very slight fall. Of the former not many are navigable for any distance from their mouths, and bars make many of them difficult of access or inaccessible from the sea.

The longest two rivers of the northern part of the east coast are the Burdekin and the Fitzroy in Queensland. The Hunter is the largest coastal river of New South Wales, and the Murray River, with its great tributary the Darling, drains part of Queensland, the major part of New South Wales, and a large part of Victoria, finally flowing into the arm of the sea known as Lake Alexandrina, on the eastern side of the South Australian coast. The total length of the Murray is about 1,600 miles, 400 being in South Australia and 1,200 constituting the boundary between New South Wales and Victoria. The total length of the Murray-Darling from the source of the Darling to the mouth of the Murray is about 2,300 miles. The rivers of the north-west coast of Australia (Western Australia), e.g. the Murchison, Gascoyne, Ashburton, Fortesque, De Grey, Fitzroy, Drysdale, and Ord are of considerable size. So also are those in the Northern Territory, e.g. the Victoria and Daly, and those

on the Queensland side of the Gulf of Carpentaria, such as the Gregory, Leichhardt, Cloncurry, Gilbert, and Mitchell. The Rivers of Tasmania have short and rapid courses, as might be expected from the configuration of the country.

The 'lakes' of Australia may be divided into three classes: true permanent lakes; lakes which, being very shallow, become mere morasses in dry seasons or even dry up, and finally present a cracked surface of salt and dry mud; and lakes which are really inlets of the ocean, opening out into a lake-like expanse. The second class is the only one which seems to demand special mention. These are a characteristic of the great central plain of Australia. Some of them, such as Lakes Torrens, Gairdner, Eyre, and Frome, are of considerable extent.

For further information on the geographical features of Australia earlier issues of the Year Book should be consulted. The list of special articles, etc., at the end of this volume indicates the nature of the information available and its position in the various issues.

## Weather and climate of Australia

This section has been prepared by the Director of the Commonwealth Bureau of Meteorology, and the various States and Territories have been arranged in the standard order adopted by that Bureau. The section concludes with a brief summary of the weather of 1969.

### Introduction

Australia extends from about latitude 10° S. to latitude 44° S., but owing largely to the moderating effects of the surrounding oceans and the absence of very pronounced and extensive mountain masses it is less subject to extremes of climate than are regions of similar size in other parts of the world. The average elevation of the land surface is low—probably close to 900 feet above the sea; while the maximum altitude is just above 7,300 feet. Latitude for latitude the Australian climate is generally more temperate than that of the other large land masses of the earth, although it varies considerably from the tropical to the alpine.

The Australian meteorological seasons are: Summer—December, January, February; Autumn—March, April, May; Winter—June, July, August; Spring—September, October, November.

The following general discussion of the climate of Australia is necessarily brief. However, extensive records of Australian climatic data are held and published in various forms by the Bureau of Meteorology. A programme of regional climatic survey has been in progress for some years, and a large number of studies have been published by the Bureau of Meteorology, by the Department of National Development, and by State Development Authorities. The Bureau of Meteorology welcomes inquiries for climatic information, which may be made at its Central Office in Melbourne or through the Regional Offices which are situated in each of the State capital cities and in Canberra and Darwin. Reference may also be made to various bulletins and research papers mentioned in this text for more detailed information on particular topics.

### Precipitation

Precipitation of moisture from the atmosphere may take various forms depending chiefly on the thermal conditions existing at the time. Within the Australian region precipitation occurs chiefly as rain because of the generally mild temperatures, but may also occur as snow or hail. Broadly, the immediate physical cause of rainfall may be said to be the lifting of moist air with resultant cooling, condensation into cloud, and eventual precipitation of the heavy water droplets as rain. This process may be achieved by three different means each of which may be combined with either or both of the others:

- (a) Orographic lifting caused by winds blowing onto rising terrain;
- (b) convectional lifting resulting in the development of individual rain clouds of the cumulus or cumulonimbus type producing showers and thunderstorms;
- (c) lifting of a warm air mass as it rises over cooler air—known as a 'frontal' process.

*Average annual rainfall.* The distribution of the average annual rainfall over Australia is shown in plate 2 page 30, while plate 3 page 31 shows the distribution in 1969.

While Australia is a continent of comparatively low relief, the orographic processes in rain production are very marked in the chain of the Great Dividing Range bordering the whole east coast of the continent, in the ranges of the south-western corner of Western Australia, and in Tasmania. Thus on the east coast the higher rainfall areas lie between the ranges and the Pacific Ocean in the region of prevailing south-east wind circulation. In Tasmania and the south-west of Western Australia the region of high rainfall lies between the ranges and the ocean to the west, these areas lying in a region of predominantly westerly wind flow.

The north-western part of the continent and to some extent the whole region of the Northern Territory and inland north Queensland comes under the influence of the Australian-Asian monsoon. This results in high rainfalls in a summer wet season with the inflow of moist air from the north-west, and a winter dry season with predominantly south-east winds blowing across the dry regions of the interior and producing little rainfall. Tropical cyclones affect the waters adjacent to the north-east and north-west of Australia between December and April. Their frequency varies greatly from season to season, but on the average about three of these disturbances occur in the Coral Sea each season and about two in the eastern Indian Ocean adjacent to the west coast of the continent. When tropical cyclones move close to the tropical coast of the continent they cause very heavy rainfalls over the coastal regions. On occasions these cyclones move over the land and lose intensity, but many still continue to be accompanied by heavy rainfall along their path.

Southern Australia lies in the region of the mid-latitude westerlies for the winter half of the year and is subject to the rain-producing influences of the great depressions of the Southern Ocean and their associated frontal systems. The combined effects of these systems and the topography lead to high winter rainfalls in south-western and south-eastern Australia and in Tasmania, with the highest falls occurring on the windward side of the mountains. The rainfall generally decreases inland with distance from the coast, although the 10-inch isohyet reaches the shore of the Great Australian Bight and the central western coast of Western Australia in regions which are of very flat relief and which, because of their position and the orientation of the coastline, are only rarely exposed to moist winds.

**AREA DISTRIBUTION OF AVERAGE ANNUAL RAINFALL: STATES AND TERRITORIES**

(a) Includes Australian Capital Territory.

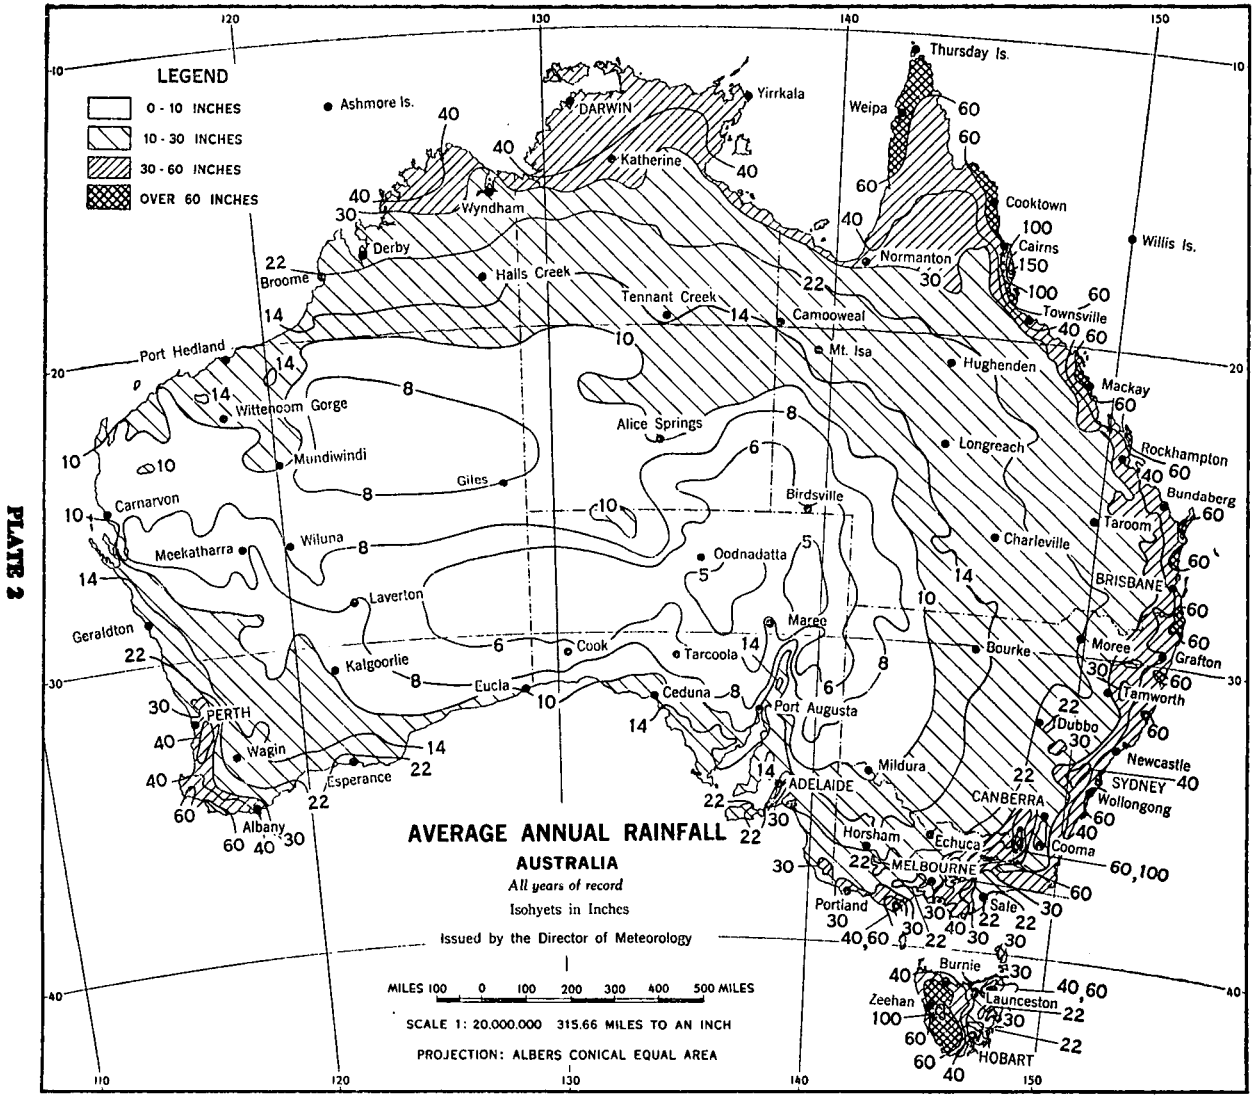

The region with the highest average annual rainfall is the east coast of Queensland between Port Douglas and Cardwell, where Tully has an annual average of 177 inches. A further very high rainfall region is the mountainous west coast of Tasmania, where Lake Margaret has the highest average annual total of 145 inches. The area of lowest average annual rainfall is that of some 180,000 square miles surrounding Lake Eyre in South Australia, where on the average only 4 to 6 inches are received annually. The lowest average over a long period of record is at Troudaninna—4.13 inches. Rain occurs very irregularly, averaging only about one or two days a month in this region.

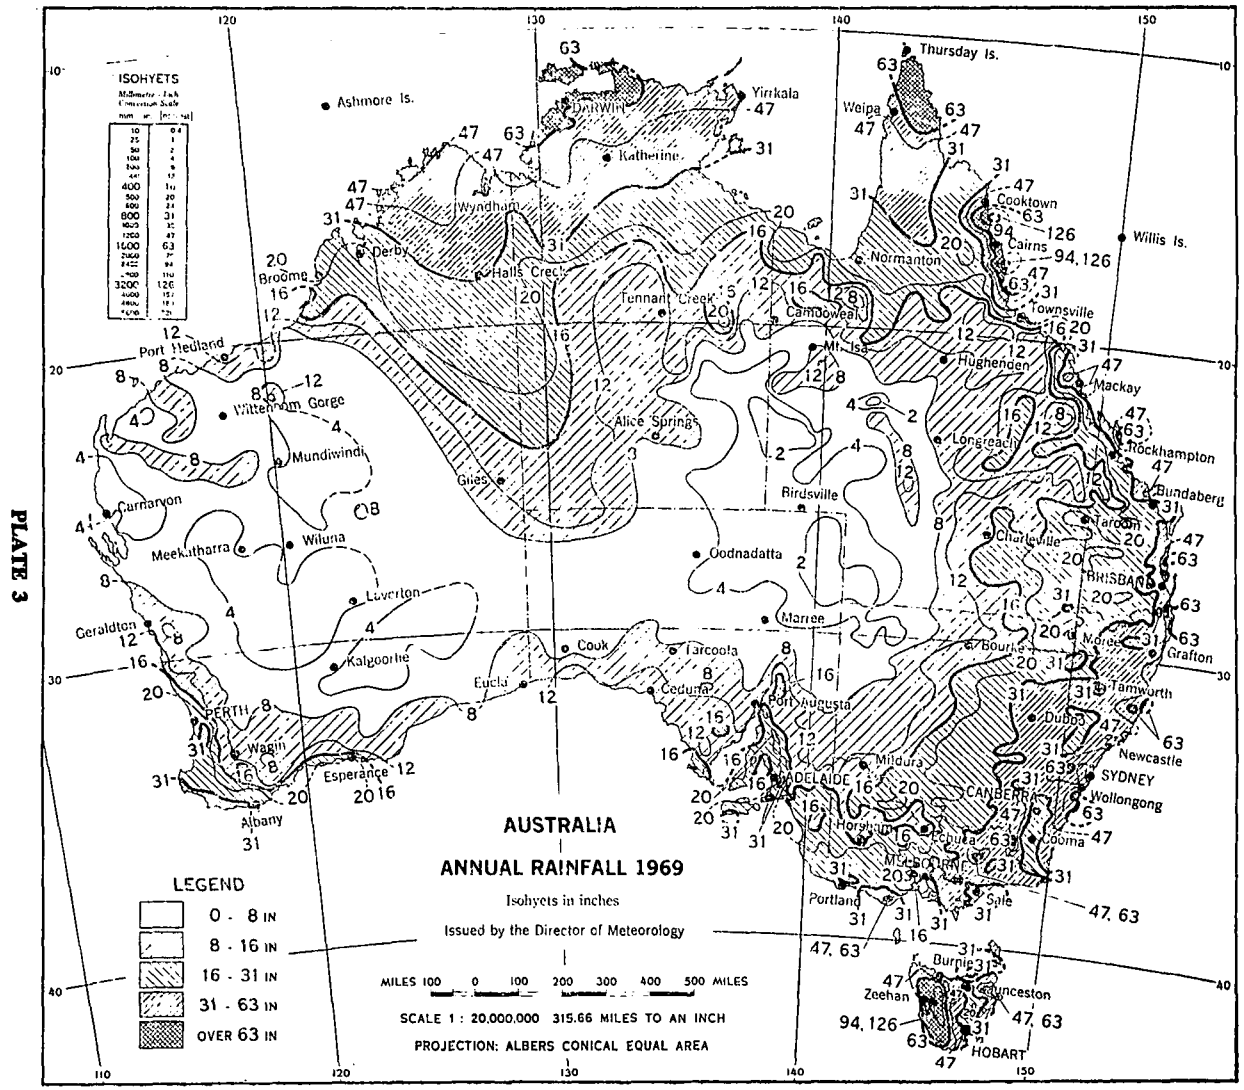

Of all the continents (excluding Antarctica), Australia receives the least average depth of rainfall and has the least run-off from its rivers into the oceans. Only in relatively small areas of the continent could the rainfall be described as abundant.

*Seasonal distribution of rainfall.* The average monthly distribution of rainfall in the various Australian rainfall districts is shown by the histograms of plate 4, page 32.

The following are the most marked features.

- (a) The clearly defined wet summer and dry winter of the monsoon region of northern Australia.
- (b) The more regular distribution of rainfall throughout the year in south-eastern Australia. In the region to the south and west of the Great Dividing Range a less pronounced maximum of rainfall is noticeable in the winter or early spring. On the Gippsland (eastern Victoria) coast the rainfall is fairly evenly distributed throughout the year, but further along the east coast of the continent the rainfall minimum in late winter and early spring begins to appear and becomes more marked as the tropical regions are approached.
- (c) The marked rainfall maximum in the south-western districts of Western Australia in winter—the period of the most active southern depressions and frontal systems in this region.

**EXPLANATION:** The graphs show the average rainfall in each month of the year in the various Rainfall Districts, the boundaries of which are shown by the broken lines on the map. The numbers on the map refer to the districts. The corresponding district names are given in the reference.

The columns for the successive months, January to December, run from left to right.

The length of a vertical column represents the average monthly rainfall according to the scale given below.

#### SCALE

## MONTHLY DISTRIBUTION OF RAINFALL

### OVER AUSTRALIA

ALL YEARS OF RECORD TO 1957

SCALE IN MILES

Issued by the Director of Meteorology

For further information on monthly rainfalls reference may be made to the various Australian rainfall bulletins, to the Climatological Surveys of particular districts, and to the annual rain maps and books of normals (standard 30 year periods), all published by the Bureau of Meteorology.

*Variability of rainfall.* For most agricultural pursuits a more important criterion of the value of rainfall is its variability or reliability. The adequate description of rainfall variability over an extensive geographical area is a matter of some difficulty. Probably the best available measures are to be found in the tables which have been calculated for a number of individual stations in some of the Climatological Survey districts. These tables show the percentage chances of receiving specified amounts of rainfall in monthly seasonal or annual time spans. Statistical indexes of rainfall variation based on a number of different techniques have been used to produce maps which show the main features of the variability of annual rainfall over Australia. A discussion of these methods and the maps is given by F. Loewe in *Some Considerations Regarding the Variability of Annual Rainfall in Australia*, Bureau of Meteorology Bulletin No. 39 (1948).

In general it may be stated that the regions of most reliable rainfall are the south-west of Western Australia, western Tasmania, and western and southern Victoria south of the divide. These areas have one of the most reliable rainfalls in the world. Elsewhere in Australia the degree of variability, in general, increases inland, but the region of the highest variability for low average annual rainfalls extends across the central part of the continent from south-western Queensland to the central coast of Western Australia. Some outstanding examples of the numerous instances of high rainfall variability throughout Australia are given below.

At Onslow (Western Australia) annual totals vary from 0.05 inches to 28 inches, and in the four consecutive years 1921 to 1924 the annual totals were 22.25, 2.71, 26.82, and 2.18 inches respectively. At Whim Creek, where 29.41 inches have been recorded in a single day, only 17 points (0.17 inches) were received in the whole of 1924. Great variability can also occur in the heavy rainfall areas, e.g. at Tully the annual rainfalls have varied from 310.92 inches in 1950 to 104.98 inches in 1943.

The following table of annual rainfall for the Australian capital cities for the past thirty years indicates the variation in rainfall at these sites.

RAINFALL: AUSTRALIAN CAPITAL CITIES, 1939 TO 1968

(a) Fairbairn Aerodrome; records in issues of the Year Book prior to No. 36 were for the station at Acton which closed down in 1939, while from Year Book No. 36 to Year Book No. 53 records were for the Commonwealth Forestry Bureau station. (b) Records taken from present site commenced 1883. (c) 1931-1960. (d) Commonwealth Forestry Bureau.

Prolonged dry spells are fairly common in much of Australia, particularly in inland areas. A detailed discussion of the history of droughts and the frequency in particular areas may be found in Foley, J. C. *Droughts in Australia*, Bureau of Meteorology Bulletin No. 43 (1957). A shorter account of droughts in Australia will be found in a special article in Year Book No. 45, pages 51–6. A more recent account is included with Chapter 22—Water Conservation and Irrigation in Year Book No. 54 of 1968.

*Rainfall and vegetation.* In general, the three main climatic zones of the continent exert a particular controlling influence on the general vegetation. These are the northern third of the continent where rainfall is almost always restricted to the warmer months of the year, the southern third where rainfall is predominantly a winter and spring event, and a transitional zone which experiences rainfall from both sources, although in greatly reduced quantity over the interior, which is subject to frequent drought.

The length of the growing season, or conversely the extent of dry periods during the year, decides the type of vegetation which establishes in a region. The climatic influence on vegetative response is primarily through soil moisture and temperature. Thus in colder south-eastern areas the growing season is mainly temperature dependent, but elsewhere the availability of soil moisture is the prime factor. All rainfall is not equally effective in increasing the soil moisture, its availability from the soil storage to plants depending on the extent of surface run-off, seepage beyond the root zone, and loss by surface evaporation. Furthermore, the effectiveness of available soil moisture depends on the evaporative demand of the local climate; for example, an inch of stored moisture may maintain vigorous plant growth for twice as long in Tasmania as in the warmer, drier atmosphere of inland New South Wales. Thus it is not a sound practice to assess the agricultural potential of different areas simply by reference to average rainfall.

Generally speaking, the length of the growing season exceeds nine months over the far south-west of Western Australia and in all eastern coastal districts from Cape York Peninsula to western Victoria, and within this region humid and semi-humid plant formations thrive. Soil types, of course, also play a part in the distribution of vegetation, but they too are, to a considerable extent, the result of climate and weather.

The climate of Arnhem Land (Northern Territory) is such that there is a considerable surplus of moisture for about five months of the warm season, followed regularly by a virtual drought which frequently reaches severe intensity, and this special combination of meteorological conditions results in annual and perennial vegetation adapted to this cycle.

Over the interior the position is more complex because of the lower levels of the rainfall, its greater variability, and the high evaporative power of the drier, warmer atmosphere. In this vast section of the continent the climatic demands are so severe that the vegetative formations of the moister zones (i.e. the mesophytes, requiring about five months or longer growing season) are unable to exist. Thus a plant species adapted to these very dry and variable conditions (xerophytes), e.g. spinifex, salt bush, blue bush, and stunted eucalypts, capable of maintaining a cattle population, predominates over the arid interior.

The arid and semi-arid lands of Western Australia and inland New South Wales which border the desert carry the majority of the sheep in these States. In New South Wales the most important vegetative formations in these areas are savannah (treeless plains), savannah woodland, mulga scrub, and mallee scrub. In Western Australia sclerophyllous grass steppe and mulga scrub border the deserts and are succeeded to the south by zones of mallee scrub and mallee heath.

*Rainfall intensity.* The study of extremely high rainfall intensities is important in the investigation of the flow characteristics of river systems, and flood prevention measures, the design of irrigation works, and hydro-electric schemes. The highest rainfalls recorded in a period of twenty-four hours up to 1968 for each State and Territory were: Western Australia, Whim Creek, 29.41 inches, 3 April 1898; Northern Territory, Roper Valley, 21.44 inches, 15 April 1963; South Australia, Ardrossan, 8.10 inches, 18 February 1946; Queensland, Crohamhurst, 35.71 inches, 3 February 1893; New South Wales, Dorrigo, 25.04 inches, 24 June 1950; Australian Capital Territory, Jervis Bay, 7.15 inches, 29 April 1963; Victoria, Balook, 10.81 inches, 18 February 1951; and Tasmania, Mathinna, 13.25 inches, 5 April 1929. Most of the very high intensities have occurred in the coastal strip of Queensland, where the combination of a tropical cyclone moving close to mountainous terrain provides ideal conditions for spectacular falls. For other very heavy falls at various localities reference may be made to Year Books No. 14, pages 60–4, No. 22, pages 46–8, No. 29, pages 43, 44 and 51, and No. 53, pages 32–4.

*Snow and hail.* For varying periods from late autumn to early spring snow usually covers the ground to a great extent on the Australian Alps above a level of about 4,500 to 5,000 feet, where in both New South Wales and Victoria ski-ing resorts operate throughout the season.

In Tasmania also the highlands are frequently covered above the 3,500 feet level for extended periods of the winter. There are, however, some years when snowfalls are much lighter than normal and even fail completely. Light snow has been known to fall occasionally as far north as the New England plateau in New South Wales (latitude 31° S.), and in exceptional seasons much of the dividing range from Victoria to Toowoomba (Queensland) has been covered above a level of about 4,000 feet. In ravines around Mount Kosciusko small areas of snow may persist throughout the summer after a heavy winter fall. This winter snowfall of south-eastern Australia is important in aiding the reliable flow of many streams which are utilised in the hydro-electric schemes of the Snowy Mountains, northern Victoria, and Tasmania. Snowfall at low terrain elevations occurs from time to time, particularly in Tasmania and Victoria, but falls are usually light and rarely lie more than a few days.

Hail is most frequent in winter and spring along the south-eastern coastal region of the continent and in Tasmania, where it is usually of a relatively small size. Summer storms, however, which are quite frequent, particularly in the highland plateau regions of eastern Australia, often produce stones of large size and of destructive intensity. Very large stones capable of piercing light gauge galvanised iron are reported from time to time, and damage to fruit crops in south-eastern Australia from large hail stones is quite frequent.

*Floods.* In general, flooding in Australia is most pronounced on the shorter streams flowing from the Great Dividing Range into the Pacific Ocean along the seaboard of Queensland and New South Wales. These floods are particularly destructive on the more densely populated coast of New South Wales. The chief rivers in this area are the Tweed, Richmond, Clarence, McLeay, Nepean, Hawkesbury, Hunter, and Shoalhaven, all of which experience quite frequent and considerable flooding. These floods occur chiefly in summer but may occur at any time of the year.

The great Fitzroy and Burdekin river systems in Queensland are also subject to floods during the summer wet season, while much of the heavy monsoon rain in northern Queensland flows southward through the normally dry channels of the network of rivers draining into Lake Eyre. This water may cause extensive floods over a vast area, but it is soon lost by seepage and evaporation and rarely reaches the lake in any quantity. The Condamine and other tributaries of the Darling also carry considerable volumes of water south through western New South Wales to the Murray, and flooding along their courses occurs from time to time.

Flooding also occurs from time to time, usually in autumn, winter, and spring, in the Murray-Murrumbidgee system of New South Wales and Victoria and on the smaller coastal streams of southern Victoria. In Tasmania, flooding of the north coast streams, particularly the South Esk system, is common in the same seasons. In South Australia some flooding has occurred in the lower reaches of the Murray owing to rainfall as far away as Queensland and south-eastern New South Wales. In the north of Western Australia and the Northern Territory, flooding of the coastal streams occurs frequently in summer but is not of such economic importance as the flooding of the eastern coastal streams of the continent, where many localities are more vulnerable to damage.

### Temperature

Conditions vary greatly for a particular individual even in a fixed location, so that it is difficult to describe general comfort variability uniquely throughout a region as varied climatically as Australia. A number of indexes which attempt to incorporate some of the factors concerned\* have been used experimentally from time to time, and further research continues on this very difficult problem. Generally speaking, there is an increase in discomfort northwards within the tropical regions of Australia in summer, owing to the heat and high absolute humidity which reached a maximum in the extreme north of the continent. Such conditions are, however, ameliorated to a large extent in highland areas such as the Atherton Tableland in Queensland. No part of Australia is uncomfortably hot in winter, and only in a small area of the Australian Alps and highland Tasmania does bodily strain due to cold exist in winter. The history of the settlement of the northern regions of Queensland and the Northern Territory indicates that with accelerating development of studies and experience in the arrangement of living and working accommodation, clothing, and general way of life, the effects of extremes of climate can be minimised.

For some further discussion of the problems of temperature and comfort conditions reference may be made to Ashton, H. T., *Meteorological Data for Air Conditioning in Australia*, Bureau of Meteorology Bulletin No. 47 (1964).

*Average seasonal temperature distribution.* Plates 5 to 8, pages 37–38, show the normal daily maximum and minimum temperatures for January and July, which may be taken as indicative respectively of the summer and winter seasons in Australia. Further detailed temperature data are presented on pages 48–57 for the capital cities and more important country towns of the Commonwealth.

---

\* See Year Book No. 53, page 35.

On the basis of average annual mean temperatures, and latitude for latitude, Australia is somewhat cooler than the other land masses of the southern hemisphere and considerably cooler than the same latitudes in the large continental areas of the northern hemisphere. This is due to the insular nature of Australia and the stronger general circulation of the atmosphere in the southern hemisphere resulting in the transport of higher latitude (cooler) air into the subtropical regions.

July is the month with the lowest mean temperature in all parts of the continent, while the month with the highest mean temperature varies from February in Tasmania and southern Victoria to December in the northern part of the continent and November in Darwin. The lateness of the month of highest average temperature in the extreme south of the continent is due in part to the effect of the Southern Ocean, where the sea surface temperature reaches its maximum in February. The cooler period of the late summer in the north is due largely to increased cloudiness associated with the inflow of north-west winds with the onset of the monsoon season.

In January average maximum temperatures exceed 95° F. over a vast area of the interior of the continent, and over large areas exceed 100° F. The hottest part of Australia is situated in the north of Western Australia around the Marble Bar and Nullagine area, where the daily maximum screen temperature during the summer frequently exceeds 100° F. for weeks at a time.

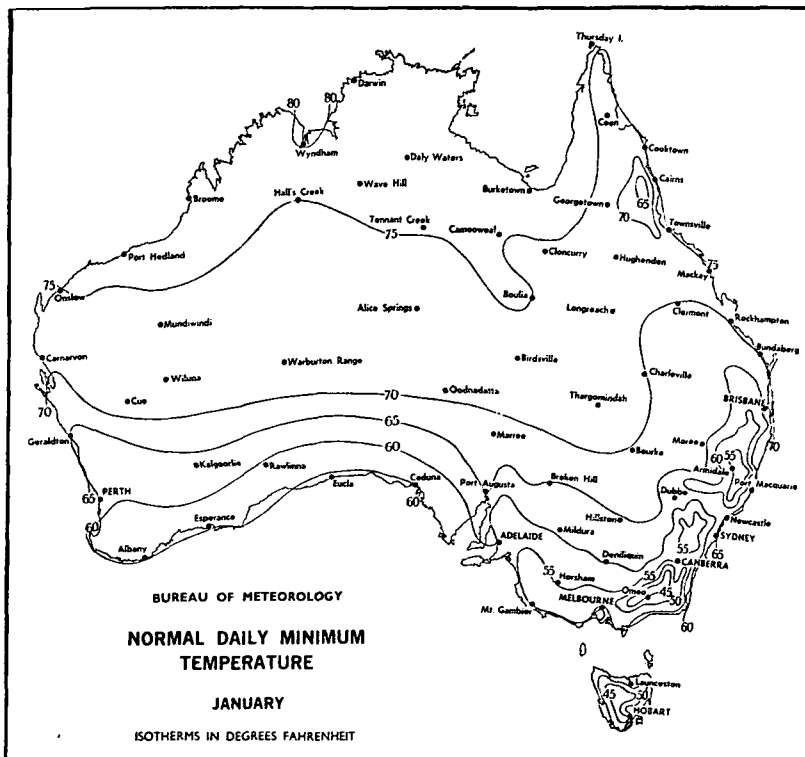

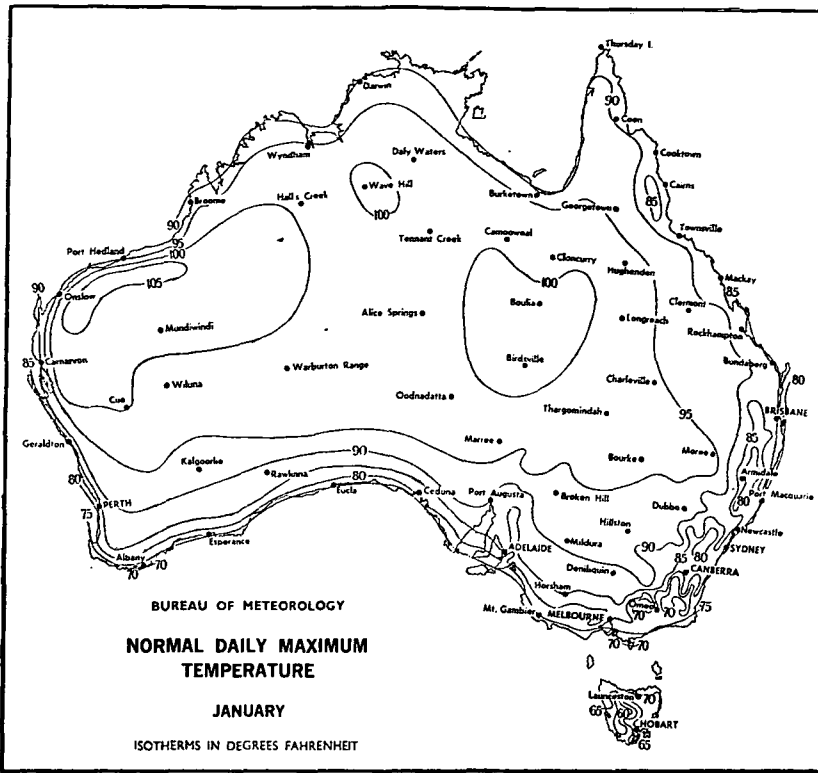

The marked change of maximum temperature in summer with distance from the sea, in areas close to the coasts, particularly along the Great Australian Bight and the Indian Ocean coast of Western Australia, is due to the penetration inland of the vigorous sea breezes which are initiated by the considerable temperature contrast between land and sea surface temperatures. The 75° F. isotherm of January mean maximum temperature skirts the southern coast of the continent from south-western Western Australia to Gippsland.

In January the mean minimum temperatures in the tropics, except for some highland regions, exceed 72° F., with a gradual decrease southward to values of 55° F. in Victoria and 50° F. in Tasmania. Highland regions in the south have mean values of 45° F. and lower. In July a more regular latitudinal distribution of mean maximum temperature is evident, only the extreme north of the continent having mean maxima higher than 80° F. Values lower than 60° F. are general over the south-eastern part of the continent, with mean maxima falling below 40° F. in small alpine areas. Average night minimum temperatures in July fall below 45° F. in areas south of the tropics and away from the coast. Alpine regions again record the lowest temperatures with some areas experiencing means lower than 25° F.

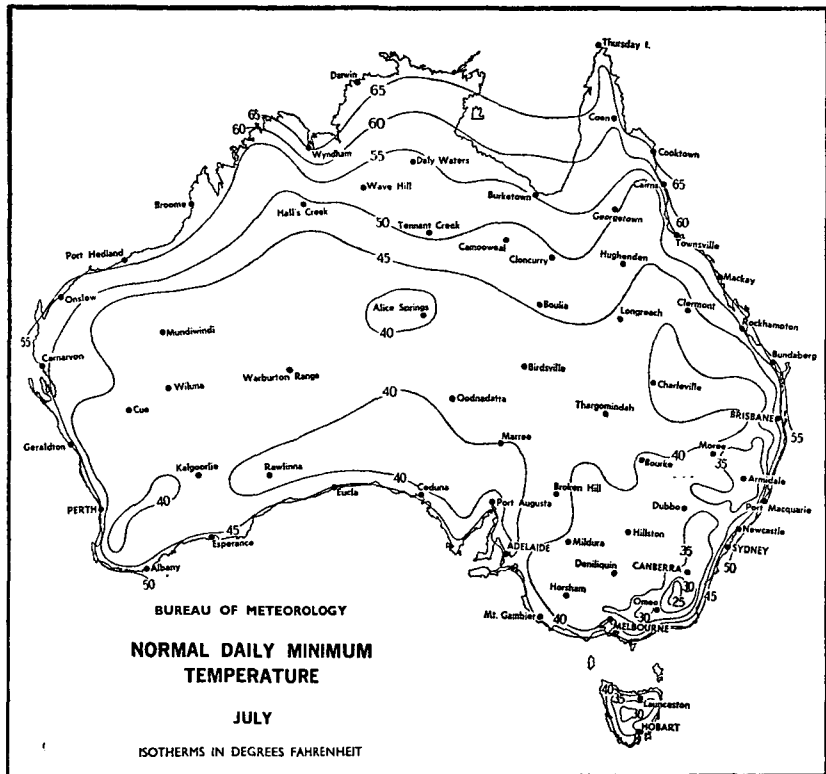

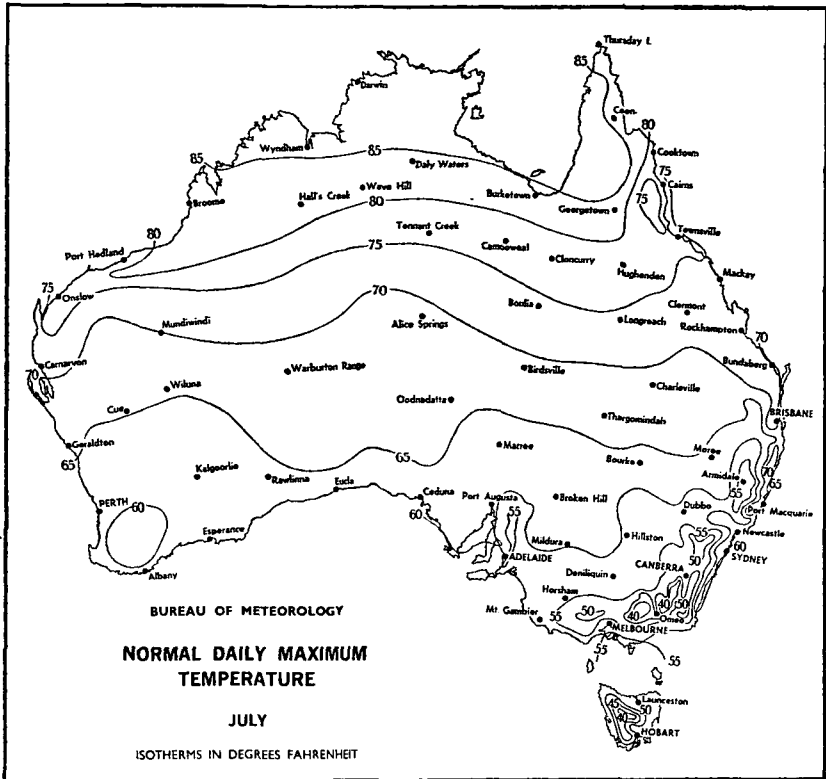

*Extreme variation and daily range.* Only at a few inland places in Australia does the absolute range of temperature (i.e. the range from the highest maximum to the lowest minimum) exceed 100° F. Generally it is in the range 70° F. to 90° F. in the inland areas and somewhat less on the coasts. The highest temperature recorded in Australia was 127.5° F. at Cloncurry (Queensland) on 16 January 1889 and the lowest -8° F. at Charlotte Pass in the southern Alps on 14 July 1945 and again on 22 August 1947. The world record maximum temperature is 136° F. at Azizia (Tripoli) on 13 August 1922 and the world record minimum temperature -126.9° F. at Vostok on the Antarctic plateau on 24 August 1960.

*High temperature.* Heat waves with a number of successive days higher than 100° F. are relatively common in many parts of Australia. With the exception of the north-western coast of Western Australia, however, most coastal areas do not usually experience more than a few days in succession of such conditions. The frequency of such conditions increases inland, and periods of up to twenty days have been recorded over most of the settled areas. This figure increases in western Queensland and north-western Western Australia to more than sixty days in places. The central part of the Northern Territory and the Marble Bar-Nullagine area of Western Australia have recorded the most prolonged heat waves for the Australian region. The longest consecutive period of daily maxima greater than 100° F. was 160 consecutive days recorded in Marble Bar during the summer of 1923-24.

*Frosts.* Injury to the tissues of growing plants is not caused until the temperature has fallen considerably below the freezing point of water (32° F.), and a ground frost is regarded as having occurred when the grass thermometer has fallen below 30.4° F. However, as terrestrial minima are not recorded at all stations, it is usual for statistical purposes to regard the registration of a screen thermometer of 36° F. as indicating a 'light' frost. A map showing frequency of days with screen minima higher than 36° F. (i.e. the frost free period) is reproduced in plate 9, page 41. A 'heavy' frost is taken as a screen reading of less than 32° F. A 'black' frost occurs with a combination of low temperature and low humidity, and, although frost crystals are not observed on the ground, damage takes place to the plant cells by the freezing and expansion of the moisture they contain.

**PLATES 5 and 6**

**PLATES 7 and 8**

The frequency of frost depends largely on altitude, latitude, and proximity to the sea, and locally, to a very large extent, on even minor variations in contour of the land. The parts of Australia which are most subject to frost are the eastern highlands from north-eastern Victoria to the western Darling Downs in southern Queensland. Most stations in this region experience more than ten nights a month with readings of 32° F. or under for three to five months of the year. On Tasmania's Central Plateau similar conditions occur for three to six months of the year. Heavy frosts are comparatively infrequent in Western Australia, except in parts of the south and south-west. In South Australia frosts are most frequent in the agricultural areas of the south-east.

Frosts may occur within a few miles of the coast over the whole continent except the Northern Territory and most of north Queensland. Regions in which frosts may occur at any time of the year comprise most of Tasmania, large areas of the tablelands of New South Wales, much of inland Victoria, particularly the north-east, and a small part in the extreme south-west of Western Australia. Over most of the interior of the continent, and on the highlands of Queensland as far north as the Atherton Plateau, frosts commence in April and end in September, but they are infrequent in these months. Minimum temperatures below 32° F. are experienced in most of the sub-tropical interior in June and July.

For further details of frost conditions in Australia reference should be made to Foley, J. C., *Frost in the Australian Region*, Bureau of Meteorology Bulletin No. 32 (1945).

#### Humidity and saturation deficit

The annual variation of vapour pressure\* for regions outside the tropics closely follows that of temperature. However, the mean relative humidity† in the temperate regions is generally highest in winter and lowest during the summer. In northern Australia the highest relative humidity occurs during the rainy summer season. The relative humidity variation during the day closely follows the diurnal variation of temperature, being highest with low temperatures and lowest with high temperatures. The relative humidity at 9 a.m. for Australian conditions may be considered as a close approximation to the mean for the whole day. In the tables for the capital cities, pages 48-55, the mean monthly vapour pressure and relative humidity for 9 a.m., together with the monthly extremes, are listed. The order of the stations in descending values of mean annual vapour pressure at 9 a.m. is Darwin, Brisbane, Sydney, Perth, Melbourne, Adelaide, Canberra, and Hobart, while the annual mean of the 9 a.m. relative humidities diminishes in the order Darwin, Sydney, Canberra, Melbourne, Brisbane, Hobart, Perth, and Adelaide.

In January the mean saturation deficit‡ at the mean temperature for the month has a maximum value of over 0.90 inches in the central parts of Western Australia and in south-eastern Queensland. Gradual decreases occur towards the coast, where values close to the north, east, and south coastlines are around 0.20 inches. On the western coast values are somewhat higher, and a strong gradient exists in the saturation deficit in the narrow region bordering the Indian Ocean. In July the variation is less, with maxima of 0.40 inches in the dry north of the Northern Territory and Western Australia, slowly decreasing generally to the south, with values over most of the south-east and extreme south-west of the continent being less than 0.10 inches. Extremely low values (less than 0.025 inches) exist in July over the highlands of south-eastern Australia and Tasmania.

#### Evaporation

In Australia the study of evaporation is of great importance, since in its drier regions water conservation must be practised by the use of tanks and dams. The magnitude of the economic loss by evaporation may be appreciated from plate 10, page 41, which shows that the yearly amount varies from 20 inches over the highland areas of central Tasmania to more than 130 inches in the northern and north-western part of South Australia.

Over an area of some 70 per cent of the continent, comprising most inland districts and extending to the coast in the north-west of Western Australia and to the head of the Great Australian Bight, the rainfall does not exceed the evaporation loss in any month of the year. The central and north-western portion of the continent experience evaporation far in excess of their rainfall. Vegetation over these areas is characterised by acacia, scrub steppe, and arid scrub, while many areas are merely sand hills and stony desert. Over many of the drier areas, however, particularly in the inland areas of south-eastern Australia, the loss of rainfall by evaporation is made good to some extent by the development of irrigation schemes. Some of these schemes, such as those at the Murrumbidgee Irrigation Area in New South Wales and at Mildura in Victoria and Renmark in South Australia, have been very successful. The Snowy Mountains Hydro-electric Scheme has also resulted in the

\* Vapour pressure—the pressure exerted by the water vapour of the atmosphere. † Relative humidity—the ratio of the existing vapour pressure to the saturated vapour pressure at the existing temperature, expressed as a percentage.  
‡ Saturation deficit—the difference between the saturation vapour pressure and the actual vapour pressure. See Year Book No. 53, page 37 for further information.

large scale supply of water from the south-eastern highlands of Australia for use in the drier areas to the west of the ranges in New South Wales and Victoria. The future development of such schemes as these holds promise for the reclamation of many marginal areas in Australia, which because of low rainfall and high evaporation are at present of little economic value.

Since the loss by evaporation depends largely on the net radiation absorbed and consequently on the extent of the exposed area, tanks and dams so designed that the surface area shall be a minimum are advantageous. Further, the more protected they are from the direct rays of the sun and from winds by means of suitable tree planting the less will be the evaporation loss. The Mansfield process for the treatment of tanks and dams by a mono-molecular chemical film which materially reduces evaporation is a recent development which is already giving beneficial results, particularly on large water storage areas. Such improvements are of considerable importance to the pastoralists of the drier regions of Australia and to water supply authorities.

Further information on evaporation may be found in Hounam, C. E., *Evaporation in Australia*, Bureau of Meteorology Bulletin No. 44 (1961).

### Sunshine and cloud

The proportion of the sky covered by cloud is of considerable meteorological and climatological importance. A cloud cover inhibits both incoming and outgoing radiation and thus profoundly affects the temperature distribution and other factors at the earth's surface. Cloud amount is measured in eighths of the sky covered.

In Australia the seasonal changes in cloudiness correspond closely to that of rainfall. In the southern or more temperate parts of the continent, particularly in the coastal and low lying areas, the winter months are generally more cloudy than the summer. This is due to the formation of extensive areas of stratiform cloud and fog during the colder months, when the structure of the lower layers of the atmosphere favours the physical processes resulting in this type of cloud. A particularly strong annual periodicity exists in the monsoonal regions of northern Australia, where it is heavily clouded during the summer wet season and practically cloudless during the winter 'dry'. Cloudiness is higher near coasts and on the windward slopes of the mountains of eastern Australia and is least over the dry interior parts of the continent.

A close relationship exists between cloud amount and number of sunshine hours, and it is possible to estimate from cloud data the equivalent number of sunshine hours over a given period. These data can be incorporated with records of direct measurement of sunshine hours, and approximate distribution maps produced for Australia. Maps of the mean sunshine distribution for January and July are reproduced in plates 11 and 12, page 42 and indicate the main features of the variation over Australia in these months.

Except for Tasmania and a narrow fringe bordering the southern, eastern, and northern coasts, the greater part of the continent receives more than 3,000 hours of sunshine each year, and in Central Australia and the mid-western coast of Western Australia totals in excess of 3,500 hours occur. The extreme south coast receives in the main 2,000 to 2,500 hours annually, while the east coast regions of New South Wales and Queensland receive 2,500 to 3,000 hours. A minimum of less than 1,750 hours occurs on the west coast and highlands of Tasmania.

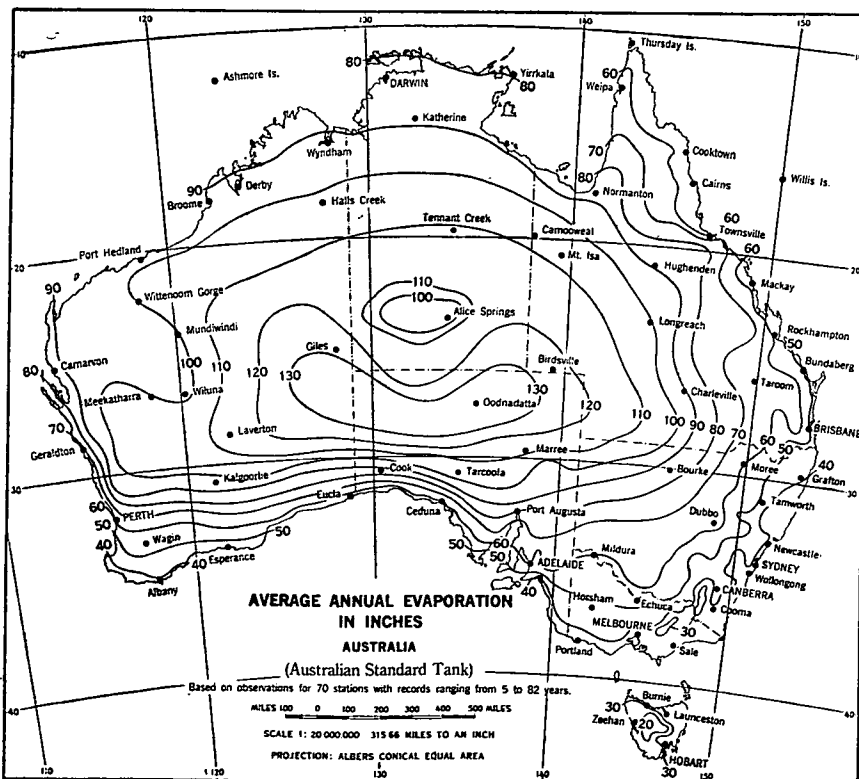

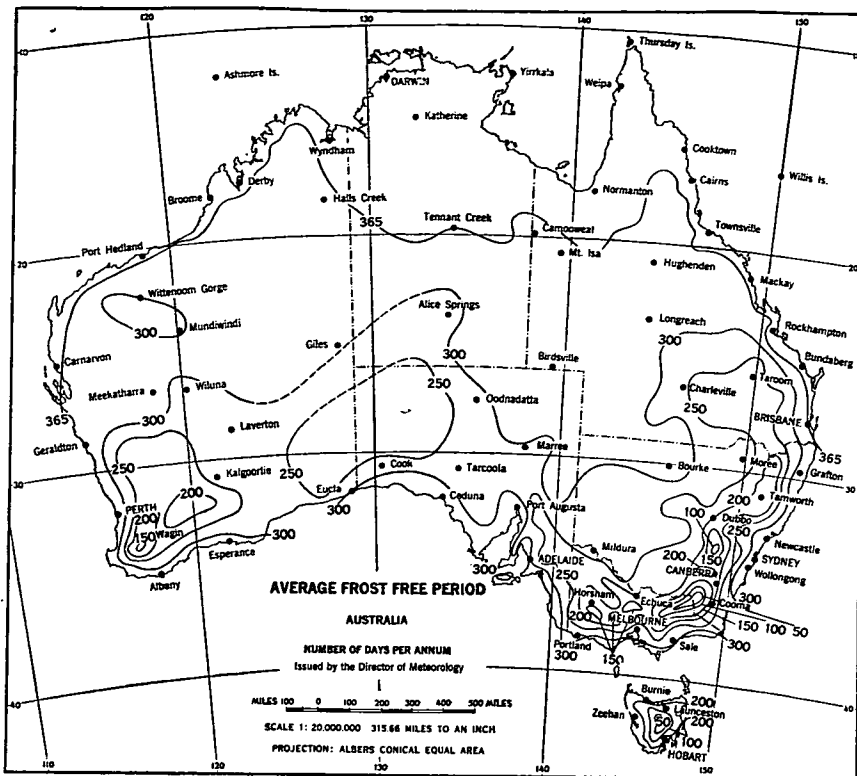

Mean amounts of cloud for each month at the capital cities are included in the tables on pages 48-55, as are the mean daily hours of sunshine. The latter figure is a good single measure of the relative climatic characteristics of the individual cities for different months of the year.

### Wind

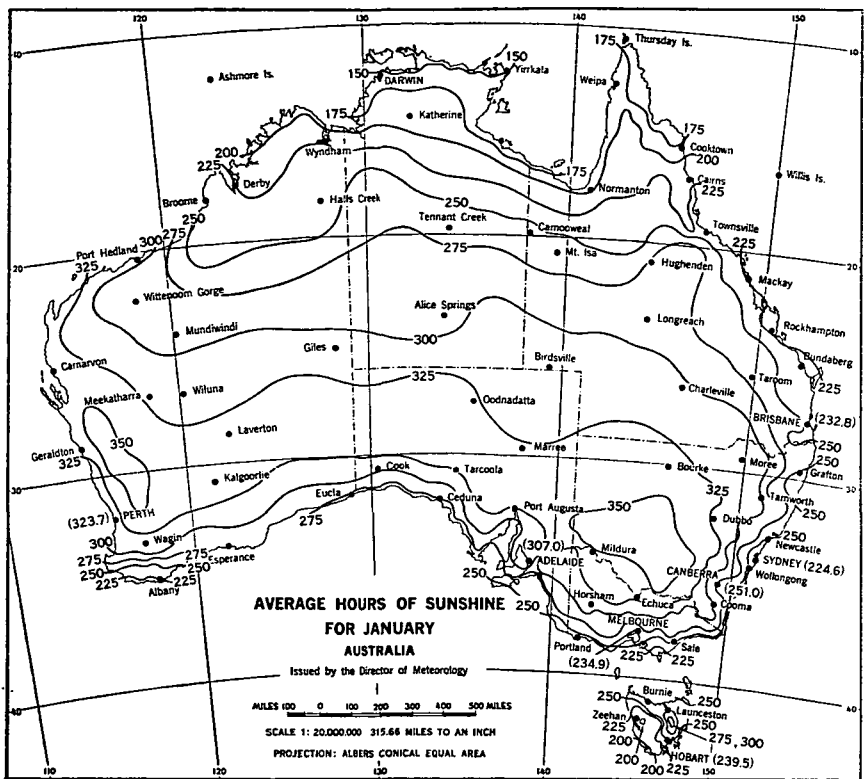

Australia lies in those latitudes of the southern hemisphere where it is influenced largely by two wind systems:

- (a) the south-east trade winds blowing on the equatorial side of the mid-latitude anticyclones; and
- (b) the westerlies south of the mid-latitude anticyclones in which successive low pressure systems move eastward over the Southern Ocean.

The only pronounced seasonal variations of atmospheric pressure in the middle and high latitudes of the southern hemisphere are related to the latitudinal shift in the axes of the sub-tropical high pressure systems and to the change in the tracks of the migratory anticyclones. The latter systems move generally from west to east in the Australian region between the semi-permanent oceanic anticyclones of the Indian and Pacific Oceans. The mean path of these systems lies over southern Australia during the summer but moves northwards during the winter with the thermal equator. The movement is only of a few degrees of latitude but it is of very great importance to the climate of the Australian

PLATES 9 and 10

PLATES 11 and 12

continent. During the summer months, when the anti-cyclones move on a more southerly track, the south-east trades affect the whole coast of eastern Australia north of around latitude 30° S., the westerlies retreating to higher latitudes, and conditions are more settled over southern Australia which then lies close to the axis of the anticyclones. In winter the anticyclones move further north, the trades affect only the northern parts of the continent, and southern Australia is exposed to the westerlies of the Southern Ocean.

In summer, with the retreat of the anticyclones to the south, the whole of northern and north-western Australia is exposed initially to light wind systems, and then during the period from December to April to the effects of the north-west monsoon. This process, which is associated with an inflow of north-west winds and intensive rains, is not as regular or persistent as the south-west monsoon of south-east Asia. However, it is a sufficiently regular feature of the climate of northern Australia to be designated as the north-west season, or, as it is best known in the area, 'the wet'. Its influence affects areas as far south as central Queensland, but southern Queensland and the area east of the Great Dividing Range are largely still under the influence of the south-east trades. Fringe or marginal areas on the southern limits of the monsoonal penetration over the continent have a shorter and more uncertain 'wet' season, which in some years fails to appear at all. With the northward advance of the anticyclones in autumn, the monsoon gives way again to the trades, and 'the dry' of northern and north-western Australia commences.

The general features of these wind patterns may be seen in the wind rose diagrams of plates 13 and 14, pages 44-45. It is important, however, to note the dynamic nature of the atmosphere, and that the continual growth, decay, and motion of the pressure systems result in a wide diversity of wind-flow types. Descriptions of wind conditions for particular geographical areas and seasons can thus be only of a very generalised kind. Further, local features can also be imposed on the overall wind pattern—channelling of winds due to topography (e.g. the high frequency of north-west winds in Hobart) and the marked summer sea breeze characteristics of most of the Australian coast, particularly near the Great Australian Bight as shown in the diagrams of 3 p.m. wind frequencies.

#### Storms and tropical cyclones

In general there are two types of weather systems in Australia which produce very strong winds and heavy rainfalls over large areas of the continent:

- (a) the active depressions which move westwards over the Southern Ocean; and
- (b) the tropical cyclones or hurricanes of north-eastern and north-western Australia.

During the winter the southern shores of the continent are subject to the deep depressions of the southern low pressure belt. They are felt most severely over the south-west of Western Australia, the south-east of South Australia, southern Victoria, and Tasmania, and may move inland in all these regions bringing strong winds and heavy rainfall. Further extensions of this type of system frequently develop close to the coast of New South Wales, often bringing severe weather to this region and to southern Queensland. These are generally known as 'east coast lows'.

The frontal systems (i.e. the narrow zones characterised by cloud and bad weather separating two air masses of different density) which are associated with these depressions vary widely in character. A common type in south-east Australia is a cold front located in a  $\wedge$  shaped trough. Such a system usually brings very strong north to north-west winds in advance of the front with a very abrupt backing of the wind to colder west to south-westerly winds after the frontal passage. Such frontal passages are, in their most severe form, associated with thunderstorms and line squalls, heavy rain, and a change to cold winds and showers. These violent changes with the passage of a cold front and strong southerly winds frequently affect the New South Wales coast as far north as Newcastle during the winter, and are popularly known as 'southerly busters'.

The most extensive rains of inland Australia occur when moist tropical air which has moved inland is lifted by convergence ahead of a slow moving colder air mass moving from the southern Ocean. The coast of Queensland, particularly the section from Cooktown to Mackay and the adjacent waters, is subject to visitations by tropical cyclones (the 'hurricanes' of the Caribbean and 'typhoons' of the China Sea). These destructive systems can affect this region from December to April, normally forming in the Coral Sea, moving south-west close to the coast and then passing away to the South-east into the Pacific. They may, however, cross the coast from time to time and bring torrential rain and violent winds (often more than 100 mph) to the coastal regions.

Similar systems affect the north-west coast of Western Australia where they bear the local name of 'willy willies', a name which is, however, often used generally in Australia for minor local whirlwinds or dust devils. The season in this region generally lasts from November to April, the storms originating in the Timor or Arafura Seas travelling usually south-west and approaching the coast most commonly between latitudes 20° S. and 22° S. Thence the systems may move southwards following the coast,

BUREAU OF METEOROLOGY

WIND ROSES

9 A.M.

SHOWING MONTHLY PERCENTAGE  
FREQUENCY DISTRIBUTION OF  
WIND DIRECTIONS TO EIGHT  
POINTS OF THE COMPASS

EXPLANATION

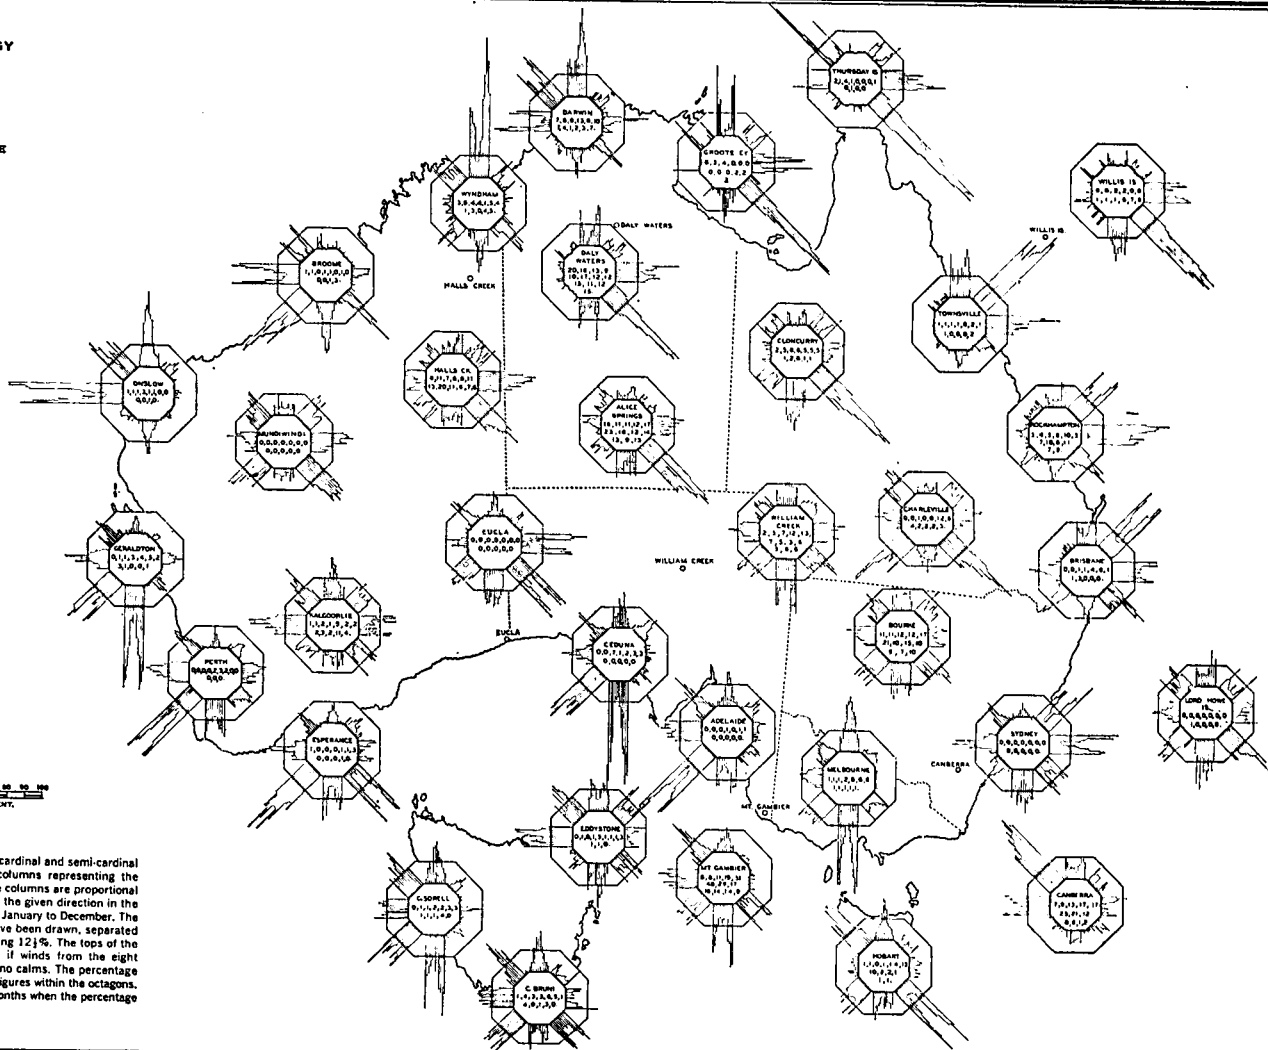

The sides of the octagons face towards the cardinal and semi-cardinal points. Projecting from each side are twelve columns representing the twelve months of the year, and the lengths of the columns are proportional to the percentage frequencies of the winds from the given direction in the successive months, working round clockwise from January to December. The scale is shown above, and the outer octagons have been drawn, separated from the inner octagons by a distance representing 12½%. The tops of the columns would all be on these outer octagons if winds from the eight directions were equally frequent and there were no calms. The percentage frequency of calms in the 12 months is shown by figures within the octagons. Small dashes within the inner octagons indicate months when the percentage of winds from that direction is practically zero.

### EXPLANATION

The sides of the octagons face towards the cardinal and semi-cardinal points. Projecting from each side are twelve columns representing the twelve months of the year, and the lengths of the columns are proportional to the percentage frequencies of the winds from the given direction in the successive months, working round clockwise from January to December. The scale is shown above, and the outer octagons have been drawn, separated from the inner octagons by a distance representing 12%. The tops of the columns would all be on these outer octagons if winds from the eight directions were equally frequent and there were no calms. The percentage frequency of calms in the 12 months is shown by figures within the octagons. Small dashes within the inner octagons indicate months when the percentage of winds from that direction is practically zero.

or sometimes cross inland bringing high rainfalls to the otherwise dry interior of the continent. A further region which is affected somewhat less frequently by tropical cyclones is the coast of Arnhem Land in the Northern Territory and the waters and coasts of the Gulf of Carpentaria.

Tropical cyclones, in general, soon lose their intensity on crossing from sea to land, but, although the wind force rapidly abates, they are still capable of producing the heavy rainfall which leads to flooding of coastal rivers, damage to stock and property, and general disruption of transport.

Thunderstorms which bring local heavy rain and strong winds are common to most of Australia. They are also of particular importance because of the lightning damage which they cause to power transmission lines, and have been extensively studied for the purpose of siting electrical installations as far as possible in areas of low thunderstorm occurrence. Plate 15, page 46, shows the number of days annually on which thunder is heard, which is a better observational criterion than lightning observed. The region of maximum thunderstorm activity is the extreme north-west of the continent and the region south-east of the Gulf of Carpentaria. In the more settled areas maximum thunderstorm occurrence is in central western and south-eastern Queensland and the highland areas of New South Wales. The minimum number of storms occur over the interior of South Australia, western New South Wales, and eastern Tasmania.

#### Climatological tables

The averages and extremes for a number of elements which have been determined from long series of observations at the Australian capitals up to and including the year 1968 (data for Canberra up to 1969) are given in the following pages, together with more limited data for the larger country towns of the Commonwealth.

Barometric and vapour pressure data, which were expressed in inches of mercury in years before 1966, are now expressed in millibars (1 millibar = 0.02953 inches of mercury).

The data for Canberra show the number of days of thunder; the other tables show the number of days of lightning.

The following points apply, except where otherwise stated. Where records are available, prevailing winds have been determined over a standard period of thirty years from 1911 to 1940. Other averages and extremes, including evaporation, temperature, and rainfall records for which thirty years normals have been published for a number of years past, have, since 1965, been extracted from all available years of actual record, but the number of years quoted does not include intervening periods when observations were temporarily discontinued.

(a) 1922-1968. (b) 1915 and 1958.

Figures such as; 30/16, 12/99, etc. indicate, in respect of the month of reference, the day and year of the occurrence. Dates in italics relate to nineteenth century.

## Rainfall and temperatures, various cities

Year Book No. 34, page 28, shows rainfall and temperature, and No. 38, page 42, temperature, for various important cities throughout the world and for the Australian capitals.

## Climatological data for selected Australian country towns

The following table shows some of the more important climatological data for selected Australian country towns, based on standard thirty years normals (1911-1940).

## CLIMATOLOGICAL DATA FOR SELECTED AUSTRALIAN COUNTRY TOWNS

Town	Rainfall		Temperature				Relative humidity			
	Average annual rainfall (inches)	Average number of wet days	Mean	Mean	Mean	Mean	Average index of mean relative humidity(a), January	Average index of mean relative humidity(a), July	Mean 3p.m., January (%)	Mean 3p.m., July (%)
			maxi- mum, January (°F.)	maxi- mum, July (°F.)	mini- mum, January (°F.)	mini- mum, July (°F.)	mean relative humidity(a), January	mean relative humidity(a), July	Mean 3p.m., January (%)	Mean 3p.m., July (%)

(a) The average index of mean relative humidity has been derived from the ratio of the average 9 a.m. vapour pressure to the saturation vapour pressure at the average mean temperature of the month. Being thus related to the mean temperature this value of relative humidity is a good approximation to the daily mean.

The table on the next page gives the latitude, longitude, and altitude of the weather recording station at each of the above towns.

**The weather of 1969 (December 1968 to November 1969)**

The following is a brief summary of weather experiences during the four seasons ended in November 1969. Plate 3, page 31, shows the rainfall distribution for 1969.

*Summer, 1968-69.* Apart from Queensland, rainfall in Australia was generally good during this season although the south-west of Western Australia was below average. Practically the whole of Queensland received below normal rainfall for the summer season with substantial areas recording only 30 per cent, or less of their normal rainfall. As a result of the failure of the 1968-69 wet season, Queensland and part of northern New South Wales at the end of summer were suffering from a serious rainfall deficiency and most of inland Queensland was drought stricken.

Bush and grass fires occurred throughout Australia and in Victoria seventeen people died as a result of the Lara fires on 8 January 1969.

*Autumn, 1969.* The wet season, which was good in the Northern Territory, and the Kimberleys, ended early in April. In inland Queensland, other than the south, a dry autumn followed a dry summer and stock were moved from the drought areas into New South Wales for agistment. In the southern inland regions of Queensland the drought was alleviated by good rains in March and May, the latter extended into the south-eastern corner of the State and greatly improved the prospects for winter. In most other areas of Australia, autumn rains were satisfactory or better in amount, with flooding at the end of the season in what were recently drought areas of eastern Victoria and Tasmania. The rains in March, of record or near record amounts, in north-western Victoria caused severe losses in the dried fruits area around Mildura.

Agriculturally and pastorally, Australia, other than Queensland, moved into winter with conditions ranging from good to excellent.

*Winter, 1969.* Severe drought continued in most of Queensland, extending from the Northern Territory border to the central coast. Winter rainfall in Queensland was 50 to 80 per cent below normal in most districts. In Western Australia, low winter rainfall in the agricultural districts seriously threatened the wheat crop. Rain was urgently needed in most areas of the wheatbelt. Over the remainder of the continent, winter rainfall ranged from average to much above average in parts of eastern New South Wales and the north-east of South Australia.

Winter temperatures were about average or slightly above. Although there were some frosts, particularly in southern New South Wales, conditions were most mild, notably in South Australia, Victoria and Tasmania.

*Spring, 1969.* Spring rainfall was generally below average over the continent, the chief exceptions being eastern New South Wales and south-east Queensland.

In Queensland drought continued to increase in severity over about two thirds of the State and widespread heavy rains are required to overcome the deficiency which has been building up over about 15-17 months. Conditions also deteriorated in the drought stricken south-west coastal and agricultural districts of Western Australia.

In south-east Queensland and eastern New South Wales rainfall was very much above average and some areas experienced their heaviest spring falls since 1950.

Spring temperatures were mostly about average except in New South Wales where they were significantly below average and in Western Australia where temperatures were generally above average.

## CHAPTER 3

# GENERAL GOVERNMENT

### Parliamentary government

#### Scheme of parliamentary government

Under section 1 of the Commonwealth of Australia Constitution the legislative power of the Commonwealth is vested in the Parliament of the Commonwealth, which consists of the Sovereign, the Senate, and the House of Representatives. The Sovereign is represented throughout the Commonwealth by the Governor-General who, subject to the Constitution of the Commonwealth, has such powers and functions as the Sovereign is pleased to assign to him. In each State there is a State Governor who is the representative of the Sovereign for the State and who exercises such powers within the State as are conferred upon him by the Letters Patent which constitute his office and by the instructions which detail the manner in which his duties are to be fulfilled. The Legislature in each State was bicameral until 1922, when the Queensland Upper House was abolished and the Parliament became unicameral. In the bicameral Parliaments the Upper House is known in the Commonwealth Parliament as the Senate, and in the State Parliaments as the Legislative Council, while the Lower House is known in the Commonwealth Parliament as the House of Representatives, in the State Parliaments of New South Wales, Victoria, and Western Australia as the Legislative Assembly, and in the State Parliaments of South Australia and Tasmania as the House of Assembly. In Queensland the sole legislative chamber is known as the Legislative Assembly. The extent of the legislative powers of the Parliaments is defined by the Commonwealth and State Constitutions. In those States that have a bicameral legislature the Legislative Assembly or House of Assembly is the larger House. The members of the Legislative Assembly or House of Assembly, as the case may be, of each State are elected by the people, the franchise extending to adult British subjects with certain residential qualifications. With the exception of the New South Wales Legislative Council, the members of State Legislative Councils are, in common with members of the Lower Houses, elected by the people of the respective States. In New South Wales a quarter of the members of the Legislative Council retire each three years, and the continuing members of the Council and the members of the Legislative Assembly, voting as an electoral body, elect members to fill the vacant positions. In Victoria, Western Australia and Tasmania members of the Legislative Council are elected by adult suffrage, while the franchise is limited in South Australia to the holders of certain property or service qualifications and their spouses. In the Commonwealth Parliament the qualifications for the franchise are identical for both Houses, extending to adult British subjects who have lived in Australia for six months continuously.

#### The Sovereign

On 7 February 1952 the Governor-General and members of the Federal Executive Council proclaimed Princess Elizabeth Queen Elizabeth the Second, Queen of this Realm and of all Her other Realms and Territories, Head of the Commonwealth, Defender of the Faith, Supreme Liege Lady in and over the Commonwealth of Australia. The coronation of Her Majesty in Westminster Abbey took place on 2 June 1953.

#### The Governor-General

*Powers and functions.* As the Queen's representative in Australia, the Governor-General exercises certain prerogative powers and functions assigned to him by the Queen. Other powers and functions are conferred on him by the Constitution. Powers which have been so assigned or conferred include, among others, the power to grant pardons and to remit fines for offences against the laws of the Commonwealth; to appoint certain officers in the Diplomatic or Consular Service of the Commonwealth; to appoint times for holding the sessions of the Parliament, prorogue Parliament, and dissolve the House of Representatives; to cause writs to be issued for general elections of members of the House of Representatives; to assent in the Queen's name to a proposed law passed by both Houses of the Parliament or withhold assent, or to reserve the law for the Queen's pleasure, or to return the proposed law to the House in which it originated and transmit therewith any amendments which he

may recommend; to exercise the executive power of the Commonwealth; to choose and summon Executive Councillors, who hold office during his pleasure; and to appoint Ministers of State for the Commonwealth. In addition, the command-in-chief of the defence forces of the Commonwealth is vested in the Governor-General as the Queen's representative.

Many Acts of the Commonwealth Parliament provide that the Governor-General may make regulations to give effect to the Act. The Governor-General may also be authorised by statute to issue proclamations—for example, to declare an Act in force or a state of things to exist, e.g. the calling out of the Citizen Military Forces in time of war or defence emergency. He has been given power by statute to legislate for certain Territories of the Commonwealth. Under the conventions of responsible government obtaining in British Commonwealth countries, the Governor-General's functions are exercised generally on the advice of Ministers of State.

*HOLDERS OF OFFICE.* The following list shows the names of the Governors-General since the inception of the Commonwealth.

#### GOVERNORS-GENERAL

- Rt Hon. JOHN ADRIAN LOUIS, EARL OF HOPETOUN (afterwards MARQUIS OF LINLITHGOW), P.C., K.T., G.C.M.G., G.C.V.O. From 1 January 1901 to 9 January 1903.
- Rt Hon. HALLAM, BARON TENNYSON, P.C., G.C.M.G. From 17 July 1902 to 9 January 1903 (Acting).
- Rt Hon. HALLAM, BARON TENNYSON, P.C., G.C.M.G. From 9 January 1903 to 21 January 1904.
- Rt Hon. HENRY STAFFORD, BARON NORTHCOTE, P.C., G.C.M.G., G.C.I.E., C.B. From 21 January 1904 to 9 September 1908.
- Rt Hon. WILLIAM HUMBLE, EARL OF DUDLEY, P.C., G.C.B., G.C.M.G., G.C.V.O. From 9 September 1908 to 31 July 1911.
- Rt Hon. THOMAS, BARON DENMAN, P.C., G.C.M.G., K.C.V.O. From 31 July 1911 to 18 May 1914.
- Rt Hon. SIR RONALD CRAUFURD MUNRO-FERGUSON (afterwards VISCOUNT NOVAR OF RAITH), G.C.M.G. From 18 May 1914 to 6 October 1920.
- Rt Hon. HENRY WILLIAM, BARON FORSTER OF LEPE, P.C., G.C.M.G. From 6 October 1920 to 8 October 1925.
- Rt Hon. JOHN LAWRENCE, BARON STONEHAVEN (afterwards 1ST VISCOUNT STONEHAVEN), P.C., G.C.M.G., D.S.O. From 8 October 1925 to 22 January 1931.
- Rt Hon. SIR ISAAC ALFRED ISAACS, G.C.B., G.C.M.G., K.C. From 22 January 1931 to 23 January 1936.
- Brigadier-General the Rt Hon. ALEXANDER GORE ARKWRIGHT, BARON GOWRIE (afterwards 1ST EARL OF GOWRIE), V.C., P.C., G.C.M.G., C.B., D.S.O., K.G.St.J. From 23 January 1936 to 30 January 1945.
- His Royal Highness PRINCE HENRY WILLIAM FREDERICK ALBERT, DUKE OF GLOUCESTER, EARL OF ULSTER AND BARON CULLODEN, K.G., P.C., K.T., K.P., G.C.B., G.C.M.G., G.C.V.O., General in the Army, Air Chief Marshal in the Royal Air Force, One of His Majesty's Personal Aides-de-Camp. From 30 January 1945 to 11 March 1947.
- Rt Hon. SIR WILLIAM JOHN MCKELL, G.C.M.G., Q.C. From 11 March 1947 to 8 May 1953.
- Field Marshal SIR WILLIAM JOSEPH SLIM (afterwards VISCOUNT SLIM OF YARRALUMLA), K.G., G.C.B., G.C.M.G., G.C.V.O., G.B.E., D.S.O., M.C., K.St.J. From 8 May 1953 to 2 February 1960.
- Rt Hon. WILLIAM SHEPHERD, VISCOUNT DUNROSSIL, P.C., G.C.M.G., M.C., K.St.J., Q.C. From 2 February 1960 to 3 February 1961.
- Rt Hon. WILLIAM PHILIP, VISCOUNT DE LISLE, V.C., P.C., G.C.M.G., G.C.V.O., K.St.J. From 3 August 1961 to 22 September 1965.
- Rt Hon. RICHARD GARDINER, BARON CASEY, K.G., P.C., G.C.M.G., C.H., D.S.O., M.C., K.St.J. From 22 September 1965 to 30 April 1969.

*Administrators.* In addition to the holders of the office of Governor-General listed above, certain persons have, from time to time, been appointed as Administrator of the Government of the Commonwealth. Administrators are appointed in the event of the death, illness, or absence from Australia of the Governor-General, or for the period between the departure of a Governor-General and the arrival of his successor. The following is a list of such appointments.

## ADMINISTRATORS

Rt Hon. FREDERIC JOHN NAPIER, BARON CHELMSFORD (afterwards 1st Viscount CHELMSFORD), K.C.M.G. From 21 December 1909 to 27 January 1910.

Lieut.-Colonel the Rt Hon. ARTHUR HERBERT TENNYSON, BARON SOMERS, K.C.M.G., D.S.O., M.C. From 3 October 1930 to 22 January 1931.

Captain the Rt Hon. WILLIAM CHARLES ARCEDECKNE, BARON HUNTINGFIELD, K.C.M.G., K.St.J. From 29 March 1938 to 24 September 1938.

Major-General SIR WINSTON JOSEPH DUGAN (afterwards 1st Baron DUGAN OF VICTORIA), G.C.M.G., C.B., D.S.O. From 5 September 1944 to 30 January 1945; 19 January 1947 to 11 March 1947.

General\* SIR JOHN NORTHCOTT, K.C.M.G., K.C.V.O., C.B., From 19 July 1951 to 14 December 1951; 30 July 1956 to 22 October 1956.

General SIR REGINALD ALEXANDER DALLAS BROOKS, K.C.B., K.C.M.G.†, K.C.V.O., D.S.O., K.St.J. From 8 January 1959 to 16 January 1959; 4 February 1961 to 3 August 1961; 5 June 1962 to 3 October 1962; 21 November 1962 to 18 December 1962.

General SIR ERIC WINSLOW WOODWARD, K.C.M.G., K.C.V.O., C.B., C.B.E., D.S.O., K.St.J. From 16 June 1964 to 30 August 1964.

Colonel SIR HENRY ABEL SMITH, K.C.M.G., K.C.V.O., D.S.O., K.St.J. From 7 May 1965 to 22 September 1965.

Lieut.-General SIR EDRIC MONTAGUE BASTYAN, K.C.M.G., K.C.V.O., K.B.E., C.B. From 24 April 1967 to 1 June 1967.

## Governors of the States

*Powers and functions.* The Queen is represented in each of the States by a Governor, the office having been constituted by Letters Patent under the Great Seal of the United Kingdom of various dates. The Governors of the States exercise prerogative powers conferred on them by these Letters Patent, their Commissions of appointment, and the Governor's Instructions given them under the Royal Sign Manual and Signet or other instrument as specified in the Letters Patent. In addition, they have been invested with various statutory functions by State Constitutions and other Imperial Acts and by Acts of the Parliaments of the States.

A Governor of a State assents in the Queen's name to Bills passed by the Parliament of the State, except those reserved for the Royal assent. The latter include certain classes of Bills which are regulated by the Constitution Acts and by the Governor's Instructions. He administers the prerogative of mercy by the reprieve or pardon of criminal offenders within his jurisdiction, and may remit fines and penalties due to the Crown. In the performance of his functions generally, particularly those conferred by Statute, the Governor of a State acts on the advice of Ministers of State for the State.

*Holders of office.* The names of the present (January 1970) State Governors are as follows:

## STATE GOVERNORS, JANUARY 1970

*New South Wales*—SIR ARTHUR RODEN CUTLER, V.C., K.C.M.G., C.B.E., K.St.J.

*Victoria*—MAJOR-GENERAL SIR ROHAN DELACOMBE, K.C.M.G., K.B.E., C.B., D.S.O., K.St.J.

*Queensland*—SIR ALAN JAMES MANSFIELD, K.C.M.G.

*South Australia*—MAJOR-GENERAL SIR JAMES WILLIAM HARRISON, K.C.M.G., C.B., C.B.E.

*Western Australia*—MAJOR-GENERAL SIR DOUGLAS ANTHONY KENDREW, K.C.M.G., C.B., C.B.E., D.S.O.

*Tasmania*—LIEUT.-GENERAL SIR EDRIC MONTAGUE BASTYAN, K.C.M.G., K.C.V.O., K.B.E., C.B.

## The Cabinet and executive government

Both in the Commonwealth and in the States, executive government is based on the system which was evolved in Britain in the 18th Century, and which is generally known as 'Cabinet' or 'responsible' government. Its essence is that the head of the State (Her Majesty the Queen, and her representative, the Governor-General or Governor) should perform governmental acts on the advice of her Ministers; that she should choose her principal Ministers of State from members of Parliament belonging to the party, or coalition of parties, commanding a majority in the lower House; that the Ministry so chosen should be collectively responsible to that House for the government of the country; and that the Ministry should resign if it ceases to command a majority there.

\* Lieutenant-General Sir John Northcott was granted honorary rank of General while administering the Government of the Commonwealth. † G.C.M.G., 1963.

The Cabinet system operates chiefly by means of constitutional conventions, customs, or understandings, and through institutions that do not form part of the legal structure of the government at all. The Constitutions of the Commonwealth and the States make fuller legal provision for the Cabinet system than the British Constitution does—for example, by requiring that Ministers shall either be, or within a prescribed period become, members of the Legislature. In general, however, the legal structure of the executive government remains the same as it was before the establishment of the Cabinet system.

The executive power of the Commonwealth is exercisable by the Governor-General, and that of the States by the Governor. In each case he is advised by an Executive Council, which, however, meets only for certain formal purposes, as explained below. The whole policy of a Ministry is, in practice, determined by some or all of the Ministers of State, meeting without the Governor-General or Governor under the chairmanship of the Prime Minister or Premier. This group of Ministers is known as the Cabinet.

*The Cabinet.* This body does not form part of the legal mechanism of government. Its meetings are private and deliberative. The actual Ministers of the day alone are present, no records of the meetings are made public, and the decisions taken have, in themselves, no legal effect. In Australia until January 1956 all Ministers were members of the Cabinet. Since then, however, although in the States all Ministers are members of the Cabinet, the Commonwealth ministry is made up of thirteen senior Ministers, who constitute the Cabinet, and other Ministers\* of non-Cabinet rank who attend meetings of the Cabinet only when required, as, for example, when the business of the Cabinet concerns their departments. As Ministers are the leaders of the party or parties commanding a majority in the lower House, the Cabinet substantially controls, in ordinary circumstances, not only the general legislative programme of Parliament, but the whole course of Parliamentary proceedings. In effect, though not in form, the Cabinet, by reason of the fact that all Ministers are members of the Executive Council, is also the dominant element in the executive government of the country. Even in summoning, proroguing, or dissolving Parliament, the Governor-General or Governor is usually guided by the advice tendered him by the Cabinet, through the Prime Minister or Premier, though legally the discretion is vested in the Governor-General or Governor himself.

*The Executive Council.* This body is usually presided over by the Governor-General or Governor, the members thereof holding office during his pleasure. All Ministers of State must be members of the Executive Council. In the Commonwealth, and also in the States of Victoria and Tasmania, Ministers remain members of the Executive Council on leaving office, but are not summoned to attend its meetings, for it is an essential feature of the Cabinet system that attendance should be limited to the Ministers of the day. The Meetings of the Executive Council are formal and official in character, and a record of proceedings is kept by the Secretary or Clerk. At Executive Council meetings the decisions of the Cabinet are, where necessary, given legal form, appointments made, resignations accepted, proclamations issued, and regulations and the like approved.

*The appointment of Ministers.* Legally, Ministers hold office during the pleasure of the Governor-General or Governor. In practice, however, the discretion of the Queen's representative in the choice of Ministers is limited by the conventions on which the Cabinet system rests. When a Ministry resigns, the Crown's custom is to send for the leader of the party which commands, or is likely to be able to command, a majority in the Lower House, and to commission him, as Prime Minister or Premier, to 'form a Ministry'—that is, to nominate other persons to be appointed as Ministers of State and to serve as his colleagues in the Cabinet.

*Ministers in Upper and Lower Houses.* The following table shows the distribution of Ministers in the Houses of each Parliament in January 1970.

AUSTRALIAN PARLIAMENTS: MINISTERS IN UPPER OR LOWER HOUSES  
JANUARY 1970

<i>Ministers with seats in—</i>	<i>Cwlth</i>	<i>N.S.W.</i>	<i>Vic.</i>	<i>Qld</i>	<i>S.A.</i>	<i>W.A.</i>	<i>Tas.</i>	<i>Total</i>
The Upper House . . .	5	2	4	(a)	3	3	..	17
The Lower House . . .	21	16	11	14	6	9	9	86
<b>Total . . .</b>	<b>26</b>	<b>18</b>	<b>15</b>	<b>14</b>	<b>9</b>	<b>12</b>	<b>9</b>	<b>103</b>

(a) Abolished in 1922.

\* Thirteen from 12 November 1969.

**Commonwealth Ministries**

*Names and tenure of office, 1901 to 1969.* The following list shows the name of each Commonwealth Ministry to hold office since 1 January 1901, and the limits of its term of office.

**COMMONWEALTH MINISTRIES, 1901 TO JANUARY 1970**

- (i) BARTON MINISTRY, 1 January 1901 to 24 September 1903.
- (ii) DEAKIN MINISTRY, 24 September 1903 to 27 April 1904.
- (iii) WATSON MINISTRY, 27 April 1904 to 18 August 1904.
- (iv) REID-MCLEAN MINISTRY, 18 August 1904 to 5 July 1905.
- (v) DEAKIN MINISTRY, 5 July 1905 to 13 November 1908.
- (vi) FISHER MINISTRY, 13 November 1908 to 2 June 1909.
- (vii) DEAKIN MINISTRY, 2 June 1909 to 29 April 1910.
- (viii) FISHER MINISTRY, 29 April 1910 to 24 June 1913.
- (ix) COOK MINISTRY, 24 June 1913 to 17 September 1914.
- (x) FISHER MINISTRY, 17 September 1914 to 27 October 1915.
- (xi) HUGHES MINISTRY, 27 October 1915 to 14 November 1916.
- (xii) HUGHES MINISTRY, 14 November 1916 to 17 February 1917.
- (xiii) HUGHES MINISTRY, 17 February 1917 to 10 January 1918.
- (xiv) HUGHES MINISTRY, 10 January 1918 to 9 February 1923.
- (xv) BRUCE-PAGE MINISTRY, 9 February 1923 to 22 October 1929.
- (xvi) SCULLIN MINISTRY, 22 October 1929 to 6 January 1932.
- (xvii) LYONS MINISTRY, 6 January 1932 to 7 November 1938.
- (xviii) LYONS MINISTRY, 7 November 1938 to 7 April 1939.
- (xix) PAGE MINISTRY, 7 April 1939 to 26 April 1939.
- (xx) MENZIES MINISTRY, 26 April 1939 to 14 March 1940.
- (xxi) MENZIES MINISTRY, 14 March 1940 to 28 October 1940.
- (xxii) MENZIES MINISTRY, 28 October 1940 to 29 August 1941.
- (xxiii) FADDEN MINISTRY, 29 August 1941 to 7 October 1941.
- (xxiv) CURTIN MINISTRY, 7 October 1941 to 21 September 1943.
- (xxv) CURTIN MINISTRY, 21 September 1943 to 6 July 1945.
- (xxvi) FORDE MINISTRY, 6 July 1945 to 13 July 1945.
- (xxvii) CHIFLEY MINISTRY, 13 July 1945 to 1 November 1946.
- (xxviii) CHIFLEY MINISTRY, 1 November 1946 to 19 December 1949.
- (xxix) MENZIES MINISTRY, 19 December 1949 to 11 May 1951.
- (xxx) MENZIES MINISTRY, 11 May 1951 to 11 January 1956.
- (xxxi) MENZIES MINISTRY, 11 January 1956 to 10 December 1958.
- (xxxii) MENZIES MINISTRY, 10 December 1958 to 18 December 1963.
- (xxxiii) MENZIES MINISTRY, 18 December 1963 to 26 January 1966.
- (xxxiv) HOLT MINISTRY, 26 January 1966 to 14 December 1966.
- (xxxv) HOLT MINISTRY, 14 December 1966 to 19 December 1967.
- (xxxvi) McEWEN MINISTRY, 19 December 1967 to 10 January 1968.
- (xxxvii) GORTON MINISTRY, 10 January 1968 to 28 February 1968.
- (xxxviii) GORTON MINISTRY, 28 February 1968 to 12 November 1969.
- (xxxix) GORTON MINISTRY, 12 November 1969.

*Names of members of each Ministry to 1 January 1970.* In Year Book No. 17, 1924, the names are given of each Ministry up to the Bruce-Page Ministry (9 February 1923 to 22 October 1929), together with the names of the successive holders of portfolios therein, and issue No. 39 contains a list, commencing with the Bruce-Page Ministry, which covers the period between the date on which it assumed power, 9 February 1923, and 31 July 1951, showing the names of all persons who held office in each Ministry during that period. The names of members of subsequent Ministries are listed in successive issues of the Year Book after No. 39.

This issue shows only particulars of the third Gorton Ministry.

## GORTON MINISTRY—FROM 12 NOVEMBER 1969

(The State in which each Minister's electorate is situated and party affiliation are shown in parenthesis. Party affiliation is indicated by the use of the following abbreviations: C.P.—Australian Country Party, Lib.—Liberal Party of Australia.)

- \*Prime Minister—*  
THE RT HON. J. G. GORTON, M.P. (Vic.) (Lib.)
- \*Deputy Prime Minister and Minister for Trade and Industry—*  
THE RT HON. J. McEWEN, C.H., M.P. (Vic.) (C.P.)
- \*Minister for External Affairs—*  
THE RT HON. W. MC MAHON, M.P. (N.S.W.) (Lib.)
- \*Minister for Primary Industry—*  
THE HON. J. D. ANTHONY, M.P. (N.S.W.) (C.P.)
- \*Postmaster-General and Vice-President of the Executive Council—*  
THE HON. A. S. HULME, M.P. (Qld) (Lib.)
- \*Treasurer—*  
THE HON. L. H. E. BURY, M.P. (N.S.W.) (Lib.)
- \*Minister for Shipping and Transport and Assisting the Minister for Trade and Industry—*  
THE HON. IAN SINCLAIR, M.P. (N.S.W.) (C.P.)
- \*Minister for Supply and Leader of the Government in the Senate—*  
SENATOR THE HON. KEN ANDERSON (N.S.W.) (Lib.)
- \*Minister for Defence—*  
THE HON. MALCOLM FRASER, M.P. (Vic.) (Lib.)
- \*Minister for National Development—*  
THE HON. R. W. C. SWARTZ, M.B.E., E.D., M.P. (Qld) (Lib.)
- \*Minister for Labour and National Service and Leader of the House—*  
THE HON. B. M. SNEDDEN, Q.C., M.P. (Vic.) (Lib.)
- \*Minister for Education and Science—*  
THE HON. N. H. BOWEN, Q.C., M.P. (N.S.W.) (Lib.)
- \*Minister for the Interior—*  
THE HON. P. J. NIXON, M.P. (Vic.) (C.P.)
- Minister for External Territories—*  
THE HON. C. E. BARNES, M.P. (Qld) (C.P.)
- Minister for Health—*  
THE HON. A. J. FORBES, M.C., M.P. (S.A.) (Lib.)
- Minister for Housing—*  
SENATOR THE HON. DAME ANNABELLE RANKIN, D.B.E. (Qld) (Lib.)
- Minister for Immigration and Assisting the Treasurer—*  
THE HON. PHILLIP LYNCH M.P. (Vic.) (Lib.)
- Minister for Social Services and under the Prime Minister, Minister-in-Charge of Aboriginal Affairs—*  
THE HON. W. C. WENTWORTH, M.P. (N.S.W.) (Lib.)
- Minister for Works and under the Minister for Trade and Industry, Minister-in-Charge of Tourist Activities—*  
SENATOR THE HON. R. C. WRIGHT (Tas.) (Lib.)
- Minister for Civil Aviation—*  
SENATOR THE HON. R. C. COTTON (N.S.W.) (Lib.)
- Minister for Customs and Excise—*  
THE HON. D. L. CHIPPE, M.P. (Vic.) (Lib.)
- Minister for Air—*  
SENATOR THE HON. T. C. DRAKE-BROCKMAN, D.F.C. (W.A.) (C.P.)
- Attorney-General—*  
THE HON. T. E. F. HUGHES, Q.C., M.P. (N.S.W.) (Lib.)
- Minister for Repatriation—*  
THE HON. R. McN. HOLTEN, M.P. (Vic.) (C.P.)
- Minister for the Army and Minister Assisting the Prime Minister—*  
THE HON. A. S. PEACOCK M.P. (Vic.) (Lib.)
- Minister for the Navy—*  
THE HON. D. J. KILLEN M.P. (Qld) (Lib.)

\* Minister in the Cabinet.

*Names of Ministers of State.* Year Book No. 38 contains a statement listing the Commonwealth Departments in existence during the period 1 April 1925 to 31 December 1949 and the names of the Ministers of State who had administered them (pages 74-9). This is in continuation of a similar statement covering the period from the inauguration of the Commonwealth Government to 1925 which appears in Year Book No. 18.

**State Ministries, January, 1970**

The names of the members of the Ministries in each State in December 1969 are shown in the following statement. For subsequent changes, *see* Appendix. Party affiliation is indicated in parenthesis after each name. For full party titles *see* page 76.

**STATE MINISTRIES, JANUARY 1970  
NEW SOUTH WALES**

<i>Premier and Treasurer—</i> THE HON. R. W. ASKIN, M.L.A. (Lib.)	<i>Minister for Conservation—</i> THE HON. J. G. BEALE, M.L.A. (Lib.)
<i>Deputy Premier, Minister for Education, and Minister for Science—</i> THE HON. C. B. CUTLER, E. D., M.L.A. (C.P.)	<i>Minister for Agriculture—</i> THE HON. G. R. CRAWFORD, D.C.M., M.L.A. (C.P.)

**Leaders of the Opposition, Commonwealth and State Parliaments, January 1970**

The Leader of the Opposition plays an important part in the Party system of government which operates in the Australian Parliaments. The following list gives the names of the holders of this position in each of the Parliaments in January 1970.

**LEADERS OF THE OPPOSITION, JANUARY 1970**

<i>Commonwealth—</i> E. G. Whitlam, Q.C., M.P. (A.L.P.)
<i>New South Wales—</i> P. D. Hills, M.L.A. (A.L.P.)
<i>Victoria—</i> A. C. Holding, M.P. (A.L.P.)
<i>Queensland—</i> J. W. Houston, M.L.A. (A.L.P.)
<i>South Australia—</i> The Hon. D. A. Dunstan, Q.C., M.P. (A.L.P.)
<i>Western Australia—</i> The Hon. J. T. Tonkin, M.L.A. (A.L.P.)
<i>Tasmania—</i> The Hon. E. E. Reece, M.H.A. (A.L.P.)

**Numbers and salaries of Commonwealth Ministers**

Under sections 65 and 66, respectively, of the Constitution of the Commonwealth the number of Ministers of State was not to exceed seven, and the annual sum payable for their salaries was not to exceed £12,000 (\$24,000), each provision to operate, however, 'until the Parliament otherwise provides'.

Subsequently the number and salaries have been increased from time to time, and from December 1968 the annual sum payable for salaries has been fixed at \$245,500 and the number of Ministers at twenty-six. An additional ministerial allowance of \$10,300 a year has been payable to the Prime Minister since December 1968, and an additional ministerial allowance of \$4,600 a year for senior Ministers and \$4,000 a year for other Ministers.

All amounts payable in the foregoing paragraphs are in addition to amounts payable as Parliamentary allowances (*see page 77*).

**Parliaments and elections****The Commonwealth Parliaments**

The first Parliament of the Commonwealth was convened by proclamation dated 29 April 1901 by His Excellency the Marquis of Linlithgow, then Earl of Hopetoun, Governor-General. It was opened on 9 May 1901 by H.R.H. the Duke of Cornwall and York. The Rt Hon. Sir Edmund Barton, G.C.M.G., K.C., was Prime Minister.

The following table shows the number and duration of Parliaments since federation.

## COMMONWEALTH PARLIAMENTS

<i>Number of Parliament</i>	<i>Date of opening</i>	<i>Date of dissolution</i>
First . . . . .	9 May 1901 . . . . .	23 November 1903
Second . . . . .	2 March 1904 . . . . .	5 November 1906
Third . . . . .	20 February 1907 . . . . .	19 February 1910
Fourth . . . . .	1 July 1910 . . . . .	23 April 1913
Fifth . . . . .	9 July 1913 . . . . .	30 July 1914(a)
Sixth . . . . .	8 October 1914 . . . . .	26 March 1917
Seventh . . . . .	14 June 1917 . . . . .	3 November 1919
Eighth . . . . .	26 February 1920 . . . . .	6 November 1922
Ninth . . . . .	28 February 1923 . . . . .	3 October 1925
Tenth . . . . .	13 January 1926 . . . . .	9 October 1928
Eleventh . . . . .	6 February 1929 . . . . .	16 September 1929
Twelfth . . . . .	20 November 1929 . . . . .	27 November 1931
Thirteenth . . . . .	17 February 1932 . . . . .	7 August 1934
Fourteenth . . . . .	23 October 1934 . . . . .	21 September 1937
Fifteenth . . . . .	30 November 1937 . . . . .	27 August 1940
Sixteenth . . . . .	20 November 1940 . . . . .	7 July 1943
Seventeenth . . . . .	23 September 1943 . . . . .	16 August 1946
Eighteenth . . . . .	6 November 1946 . . . . .	31 October 1949
Nineteenth . . . . .	22 February 1950 . . . . .	19 March 1951(a)
Twentieth . . . . .	12 June 1951 . . . . .	21 April 1954
Twenty-first . . . . .	4 August 1954 . . . . .	4 November 1955
Twenty-second . . . . .	15 February 1956 . . . . .	14 October 1958
Twenty-third . . . . .	17 February 1959 . . . . .	2 November 1961
Twenty-fourth . . . . .	20 February 1962 . . . . .	1 November 1963
Twenty-fifth . . . . .	25 February 1964 . . . . .	31 October 1966
Twenty-sixth . . . . .	21 February 1967 . . . . .	29 September 1969
Twenty-seventh . . . . .	25 November 1969 . . . . .	

(a) A dissolution of both the Senate and the House of Representatives was granted by the Governor-General, acting on the advice of the Cabinet and under section 57 of the Constitution.

There have been twenty-six complete Parliaments since Federation. Until 1927 the Parliament met in Melbourne; it now meets in Canberra, the first meeting at Parliament House, Canberra, being opened by the Duke of York on 9 May 1927.

The twenty-sixth Parliament opened on 21 February 1967 and ended on 29 September 1969 when the House of Representatives was dissolved. Elections for the House of Representatives were held on 25 October 1969. Elections were also held on the same date to fill casual vacancies in the Senate for each of the States of Victoria, and South Australia. Particulars of electors and voting are given on page 72. For particulars of electors enrolled and of electors who voted in the several States and Territories at previous Commonwealth elections, see Year Book No. 55 and earlier issues.

A special article describing the Commonwealth Parliament, its functions and procedure, prepared by the Clerk of the Senate and the Clerk of the House of Representatives, appears in Year Book No. 49, pages 65-71.

#### Qualifications for membership and for franchise—Commonwealth Parliament

Qualifications necessary for membership of either House of the Commonwealth Parliament are possessed by any British subject, twenty-one years of age or over, who has resided in the Commonwealth for at least three years and who is, or is qualified to become, an elector of the Commonwealth. Qualifications for Commonwealth franchise are possessed by any British subject, not under twenty-one years of age and not disentitled on other grounds, who has lived in Australia for six months continuously. Residence in a Subdivision for a period of one month prior to enrolment is necessary to enable a qualified person to enrol. Enrolment and voting are compulsory except that the compulsory enrolment provisions do not relate to an Aboriginal native of Australia. A member of the Defence Force on service outside Australia who is a British subject not less than 21 years of age and has lived in Australia for six months continuously is entitled to vote at Commonwealth elections, whether enrolled or not. In 1966 the franchise was extended to entitle a person who is less than twenty-one years of age, who has lived in Australia for six months continuously and who is, or has been, on 'special service' outside Australia as a member of the Defence Force, to vote at elections as if his name appeared on the roll. 'Special service' takes the same meaning as that term in the Repatriation (Special Overseas Service) Act and means, in relation to a person, service during a period when he is outside Australia and he or his unit is allotted for special duty in a special area.

The principal reasons for disqualification of persons otherwise eligible as members of either Commonwealth House are: membership of the other House, allegiance to a foreign power, being attainted of treason, being convicted and under sentence for any offence punishable by imprisonment for one year or longer, being an undischarged bankrupt or insolvent, holding an office of profit under the Crown (with certain exceptions), or having pecuniary interest in any agreement with the public service of the Commonwealth except as a member of an incorporated company of more than twenty-five persons. Persons of unsound mind, attainted of treason, convicted and under sentence for any offence punishable by imprisonment for one year or longer, or persons who are holders of temporary entry permits under the *Migration Act* 1958–1966 or are prohibited immigrants under that Act are excluded from the franchise. In the main, these or similar grounds for disqualification apply also to State Parliament membership and franchise. Aborigines are entitled to vote at both Commonwealth and State elections in all States.

#### Commonwealth Parliaments and elections

From the establishment of the Commonwealth until 1949 the Senate consisted of thirty-six members, six being returned by each of the original federating States. The Constitution empowers Parliament to increase or decrease the size of the Parliament, and, as the population of the Commonwealth had more than doubled since its inception, the Parliament passed the *Representation Act* 1948 which provided that there should be ten Senators from each State instead of six, increasing the total to sixty Senators, thus enlarging both Houses of Parliament and providing a representation ratio nearer to the proportion which existed at Federation.

In accordance with the Constitution the total number of members of the House of Representatives must be as nearly as practicable double that of the Senate.\* Consequently, in terms of the Constitution and the Representation Act, from the date of the 1949 elections the number of members in the House of Representatives was increased from 74 to 121 (excluding the members for the internal Territories). As the States are represented in the House of Representatives on a population basis, the numbers were increased as follows: New South Wales—from 28 to 47; Victoria—from 20 to 33; Queensland—from 10 to 18; South Australia—from 6 to 10; and Western Australia—from 5 to 8. Tasmania's representation remained at 5 and the total was increased from 74 to 121. The increase in the number of members of Parliament necessitated a redistribution of seats and a redetermination of electoral boundaries. Redistributions are carried out by distribution commissioners appointed for each State. The redistributions are effected on a quota basis, but taking into account community interests, means of communication, physical features, existing boundaries, and other factors.

The population as disclosed by the Census taken on 30 June 1954 necessitated a further alteration in representation in the House of Representatives in respect of New South Wales, South Australia, and Western Australia. Representation as from the general election for the House of Representatives on 10 December 1955 had been: New South Wales 46, Victoria 33, Queensland 18, South Australia 11, Western Australia 9, Tasmania 5, the total number of members (excluding the members for the internal Territories) being increased from 121 to 122.

The population as disclosed by the Census taken on 30 June 1961 revealed that, under the provisions of the Representation Act, New South Wales, Queensland, and Western Australia would each lose one member in the House of Representatives, while Victoria would gain a member. The distribution commissioners' reports were duly laid before both Houses of Parliament, but the Government decided not to proceed with the proposals and announced that it would amend the Representation Act. In November 1964 the formula provided by Section 10 of the Representation Act for determining the number of members of the House of Representatives was amended so as to give a State an additional member for 'any portion of a quota'. The effect of that amendment would have been that at the next redistribution Victoria and South Australia would each gain one member while all other States would retain their existing representation. However, no fresh redistribution was effected prior to the 1966 Census. Resulting from the population disclosed by the 1966 Census the Chief Electoral Officer determined that the number of members of the House of Representatives to be chosen in the several States shall be: New South Wales 45, Victoria 34, Queensland 18, South Australia 12, Western Australia 9, and Tasmania 5. A redistribution of the States into electoral divisions was effected in 1968 by distribution commissioners appointed in each State, and the reports submitted by the distribution commissioners were approved by both Houses of Parliament in respect of all States in October–November 1968. Consequently this new representation became effective at the general election of members of the House of Representatives held on 25 October 1969.

Since the general election of 1922 the Northern Territory has been represented by one member in the House of Representatives, and the Australian Capital Territory has had similar representation since the elections of 1949. The member for the the Australian Capital Territory has had full voting

\* A proposal to alter the Constitution so that numbers of members of the House of Representatives might be increased without necessarily increasing the number of Senators was the subject of a referendum in March 1967, but was rejected. See Year Book No. 54, page 66, for results of the Referendum.

rights since the first sitting of the twenty-sixth Parliament. In May 1968 the Northern Territory Representation Act was amended to give full voting rights to the Member for the Northern Territory effective from 15 May 1968, the day on which the Act received Royal Assent.

The Constitution provides for a minimum of five members for each original State. Members of the House of Representatives are elected for the duration of the Parliament, which is limited to three years. At elections for Senators the whole State constitutes the electorate. For the purpose of elections for the House of Representatives the State is divided into single electorates corresponding in number to the number of members to which the State is entitled. Further information regarding the Senate and the House of Representatives is given in earlier issues of the Year Book.

The *Commonwealth Electoral Act* 1948, introduced with the *Representation Act* 1948 to enlarge the Commonwealth Parliament (see page 71), changed the system of scrutiny and counting of votes in Senate elections from the alternative vote to that of proportional representation. For a description of the system, see Year Book No. 38, pages 82-3. The system of voting for both the Senate and the House of Representatives is preferential.

Particulars of voting at Senate elections and elections for the House of Representatives up to 1967 appear in earlier issues of the Year Book, and additional information is available in the *Statistical Returns* issued by the Chief Electoral Officer following each election.

The numbers of electors and of primary votes cast for the major political parties in each State and Territory at the latest election for each House were as follows.

#### COMMONWEALTH ELECTIONS, 1967 AND 1969

State or Territory	Votes recorded					Others	Informal	Total

**Commonwealth referendums**

In accordance with section 128 of the Constitution any proposed law for the alteration of the Constitution, in addition to being passed by an absolute majority of each House of Parliament, must be submitted to a referendum of the electors in each State, and must be approved also by a majority of the electors in a majority of the States and by a majority of all the electors who voted, before it can be presented for Royal Assent. Twenty-six such proposals have so far been submitted to referendums and the consent of the electors has been received in five cases, the first in relation to the election of Senators in 1906, the second and third in respect of State Debts—one in 1910 and the other in 1928, the fourth in respect of Social Services in 1946, and the fifth in respect of Aborigines in 1967. In addition to referendums for alteration of the Constitution, other Commonwealth referendums have been held, two prior to Federation regarding the proposed Constitution and two regarding military service during the 1914–1918 War. For details of earlier referendums see Year Book No. 52, pages 66–8.

On 1 March 1967 two Bills were introduced in the House of Representatives to alter the Constitution, one to enable the number of members of the House of Representatives to be increased without necessarily increasing the number of Senators, the other to enable the Aboriginal people to be counted in reckoning the population and to omit certain words relating to the Aboriginal race which some people felt were discriminatory. The proposed laws, after being passed by both Houses of Parliament,

were submitted to the electors of the States at referendums held on 27 May 1967. At the referendums the electors voted in all States in favour of the proposal regarding Aborigines, but rejected in all States but New South Wales the proposal for increasing the number of members of the House of Representatives. For a summary of the results of the voting on each of the proposals see Year Book No. 54, page 66.

Consequent upon obtaining the approval of the electors, the Constitution Alteration (Aborigines) was assented to on 10 August 1967. Section 51 of the Constitution is thereby altered by omitting from paragraph (xxvi) the words 'other than the aboriginal race in any State', and Section 127 of the Constitution is thereby repealed.

### The Parliaments of the States

This chapter contains summarised information on the Parliaments of each State, the numbers of Houses and members, and salaries payable. For greater detail, including some historical material, reference should be made to earlier Year Books, particularly No. 50, pages 69-72. Recent changes have been reported in successive issues of the Year Book.

*Membership of State Parliaments.* The following table shows the party distribution in each of the various State Parliaments at the end of 1968.

#### STATE PARLIAMENTS: MEMBERSHIP, BY PARTY AFFILIATION, 31 DECEMBER 1969

<i>Party</i>	<i>N.S.W.</i>	<i>Vic.</i>	<i>Qld</i>	<i>S.A.</i>	<i>W.A.</i>	<i>Tas.</i>

(a) Abolished in 1922. (b) Plus expense allowances—Senators, \$2,650; Members of the House of Representatives, city electorates, \$2,750, country electorates, \$3,350. Certain additional allowances are also provided for holders of parliamentary offices, etc. (c) Plus allowance of \$1,690. An additional \$10 per day is payable to members who live outside the metropolitan area. (d) Plus allowances from \$2,000 for metropolitan to \$2,400 for urban, \$2,800 for inner country, and \$3,100 for outer country electorates. (e) Plus an allowance varying from \$1,400 to \$2,200 depending on distance from Adelaide. (f) Plus expense reimbursement ranging from \$1,600 for a metropolitan member to \$3,300 for a north province member. (g) Plus allowance according to area of electorate and distance from the capital varying from \$600 to \$1,400 in the case of the Legislative Council, and from \$1,100 to \$2,100 in the case of the House of Assembly. (h) Plus allowance varying from \$1,945 to \$2,880 according to location of electorate. (i) Plus individual electoral allowances ranging from \$1,245 to \$2,970.

## Cost of parliamentary government

The table below shows, in broad groups, the expenditure incurred in the operation of the parliamentary system in Australia, comprising the Governor-General and Governors, the Ministries, the Upper and Lower Houses of Parliament, and electoral activities; *it does not attempt to cover the expenditure on Commonwealth and State administration generally.* Only broad groups are shown, but even these are not entirely comparable because of differences in accounting procedures and in the presentation of accounts. A very large part of the expenditure under the head of Governor-General or Governor represents official services entirely outside the Governor's personal interest, carried out at the request of the Government. The item includes salaries of Government House staffs and maintenance of residences, official establishments, grounds, etc., and expenditure on capital works and services.

COST OF PARLIAMENTARY GOVERNMENT, 1968-69  
(\$'000)

## Commonwealth Government Departments

In Year Book No. 49 (pages 87-98) a list appears of the Commonwealth Government Departments, giving particulars of each Department, as at the end of 1962, of the principal matters dealt with and the Acts administered by the Minister concerned. Changes made during 1963 and 1966 are shown, respectively, on page 83 of Year Book No. 50 and page 74 of Year Book No. 53. Changes made during 1968 are shown in the Appendix to Year Book No. 54 (pages 1276-7). For detailed information on the organisation of the Departments and Agencies of the Commonwealth Government see *The Commonwealth Directory* (latest issue 1970).

## Enactments of the Parliaments

In the Commonwealth all laws are enacted in the name of the Sovereign, the Senate, and the House of Representatives. The subjects with respect to which the Commonwealth Parliament is empowered to make laws are enumerated in the Constitution. In the States other than South Australia and Tasmania laws are enacted in the name of the Sovereign by and with the consent of the Legislative Council (except in Queensland) and Legislative Assembly. In South Australia and Tasmania laws are enacted in the name of the Governor of the State, with the advice and consent of the Parliament in the case of South Australia, and of the Legislative Council and House of Assembly in the case of Tasmania. Generally, assent to Bills passed by the legislatures is given by the Governor-General or State Governor acting on behalf of, and in the name of, the Sovereign. In certain special cases Bills are reserved for the Royal assent. The Parliaments of the States are empowered generally, subject to the Commonwealth Constitution, to make laws in and for their respective States in all cases whatsoever. Subject to certain limitations they may alter, repeal, or vary their Constitutions. Where a law of a State is inconsistent with a law of the Commonwealth the latter prevails, and the former is to the extent of the inconsistency invalid.

## The course of Commonwealth legislation

The actual legislation by the Commonwealth Parliament during 1969 is indicated in alphabetical order in *The Acts of the Parliament of the Commonwealth of Australia passed during the year 1969 in the Second Session of the Twenty-sixth Parliament of the Commonwealth, with Appendix, Tables and Index*. A chronological table of Acts passed from 1901 to 1969 showing how they are affected by subsequent legislation or lapse of time is also given, and, further, a table of Commonwealth legislation passed from 1901 to 1969 in relation to the several provisions of the Constitution is furnished in the same volume. Reference should be made to these for complete information.

The Acts passed by the Commonwealth Parliament during the year 1969 are listed on pages 79-82. In many cases the title of the Act indicates the general scope of the Act, but brief explanatory notes have been added where necessary. Appropriate chapters of this Year Book should be referred to for further information which may be available there.

The total enactments of the Commonwealth Parliament for a number of years at fairly even intervals since 1901 show a general increase. Seventeen Acts were passed in 1901, 36 in 1914, 38 in 1927, 87 in 1939, 109 in 1952, 156 in 1965, 157 in 1968, and 102 in 1969.

*Commonwealth legislation passed during 1969*

- Aged Persons Homes Act* 1969 (No. 68) subsidised organisations providing approved personal care services in 'hostel' type accommodation at the rate of \$5.00 per week in respect of all residents over 80 years of age.
- Airline Equipment (Loan Guarantee) Act* 1969 (No. 97) authorised the Treasurer to guarantee loans raised by Ansett Transport Industries in financing the purchase of one Boeing 727 and six Douglas DC9 aircraft.
- Air Navigation (Charges) Act* 1969 (No. 75) increased the rates of air navigation charges payable by domestic airlines and general aviation operators by ten per cent from 1 January 1970.
- Appropriation Act* (No. 3) 1968-69 (No. 27); *Appropriation Act* (No. 4) 1968-69 (No. 28); *Appropriation Act* (No. 1) 1969-70 (No. 85); *Appropriation Act* (No. 2) 1969-70 (No. 86).
- Audit Act* 1969 (No. 20) changed the procedures relating to the Governor-General's warrant; modernised the wording of the original Act and clarified the law relating to existing procedures; provided authority for the Commonwealth to make payments due to small deceased estates; brought the penalty provisions into line with those provided in the Crimes Act.
- Australian Capital Territory Taxation (Administration) Act* 1969 (No. 42); *Australian Capital Territory Tax (Cheques) Act* 1969 (No. 43); *Australian Capital Territory Tax (Hire Purchase Business) Act* 1969 (No. 44); *Australian Capital Territory Tax (Insurance Business) Act* 1969 (No. 45); *Australian Capital Territory Tax (Sales of Marketable Securities) Act* 1969 (No. 46); *Australian Capital Territory Tax (Purchases of Marketable Securities) Act* 1969 (No. 47); *Australian Capital Territory Stamp Duty Act* 1969 (No. 48). These Acts provided for the collection of stamp duties on a range of instruments and transactions connected with the Australian Capital Territory.
- Australian Coastal Shipping Commission Act* 1969 (No. 55) empowered the Australian Coastal Shipping Commission to buy into Australian land-based facilities owned by other companies.
- Book Bounty Act* 1969 (No. 83) provided interim assistance to book manufacturers by payment of a bounty at the rate of twenty-five per cent of the cost of production of each book of a literary or educational character.
- Broadcasting and Television Act* 1969 (No. 21) appointed a full-time member of the Broadcasting Control Board as Vice-Chairman who would act for the Chairman in his absence; made it an offence for any person to interfere with or obstruct the broadcasting or televising of programmes or to interfere with the operation of a station in any way.
- Broadcasting and Television Act* (No. 2) 1969 (No. 31) limited, as from 24 September 1968, the number of broadcasting stations which a person may own or control to four commercial stations in any one State including one metropolitan commercial station; or eight commercial stations in Australia including four metropolitan commercial stations.
- Cellulose Acetate Flake Bounty Act* 1969 (No. 64) extended the operation of the *Cellulose Acetate Flake Bounty Act* 1956-1966 for a further maximum period of six months to 30 June 1970 unless an earlier date of cessation is specified by proclamation.
- Chicken Meat Research Act* 1969 (No. 35) provided for the establishment and operation of a joint Commonwealth-industry research scheme for the chicken meat industry.
- Citizenship Act* 1969 (No. 22) provided that a citizen of any Commonwealth country has the status of British subject; simplified the granting of citizenship for settlers from Commonwealth countries; and reduced the period of residence required for naturalisation to three years for those who can meet the Minister's requirements.
- Commonwealth Aid Roads Act* 1969 (No. 41) provided for grants to the States for roads totalling \$1,252.05m over a five-year period.
- Commonwealth Employees' Compensation Act* 1969 (No. 11) amended Section 15 of the *Commonwealth Employees' Compensation Act* so that the section applied to a determination made by a Deputy Public Service arbitrator, as well as the Public Service Arbitrator.
- Conciliation and Arbitration Act* 1969 (No. 12) amended the *Conciliation and Arbitration Act* 1904-1968 consequent on the provision in the *Public Service Arbitration Act* 1969 for the appointment of Deputy Public Service Arbitrators.
- Conciliation and Arbitration Act* (No. 2) 1969 (No. 15) provided for seven instead of five judges of the Commonwealth Industrial Court, in addition to the Chief Judge.
- Coral Sea Islands Act* 1969 (No. 58) provided for the government of certain islands in the Coral Sea and for those islands to be constituted the Coral Sea Islands Territory.
- Currency Act* 1969 (No. 4) provided for the re-introduction of the 50 cent coin, and for that coin to be 12-sided and made of cupro-nickel.
- Customs Tariff Act* 1969 (No. 8).
- Customs Tariff Act* (No. 2) 1969 (No. 32).
- Customs Tariff Validation Act* 1969 (No. 84).

*Commonwealth legislation passed during 1969—continued*

- Decimal Currency Board (Abolition) Act 1969* (No. 25) provided for the abolition of the Decimal Currency Board and the continuance of the duties of the Board by officers of the Treasury.
- Defence Forces Retirement Benefits Act 1969* (No. 61) provided that a reinstated member under the provisions of the *Defence (Parliamentary Candidates) Act 1969*, may make certain elections under the Defence Forces Retirement Benefits Act.
- Defence (Parliamentary Candidates) Act 1969* (No. 60) repealed the *Defence (Parliamentary Candidates) Act 1966* and permitted all members of the Defence Forces to contest Federal Parliamentary elections, not relieving them thereby of their commitment to serve in the Armed Forces in the event of their being unsuccessful but preserving all their rights and benefits as servicemen.
- Excise Tariff Act 1969* (No. 5).
- Excise Tariff Act* (No. 2) 1969 (No. 33).
- Fishing Industry Research Act 1969* (No. 80) established the Fishing Industry Research Account to support projects of research, education, extension and development of the industry.
- Income Tax Act 1969* (No. 73).
- Income Tax Assessment Act 1969* (No. 18).
- Income Tax Assessment Act* (No. 2) 1969 (No. 93).
- Income Tax Assessment Act* (No. 3) 1969 (No. 101).
- Income Tax (Drought Bonds) Act 1969* (No. 100) imposed the tax payable when the bonds are redeemed for reasons other than drought, fire or flood.
- Income Tax (International Agreements) Act 1969* (No. 24).
- Income Tax (Partnerships and Trusts) Act 1969* (No. 74).
- Independent Schools (Loans Guarantee) Act 1969* (No. 23) authorised the Government to give guarantees on behalf of the Commonwealth in respect of certain loans made to independent schools in the Australian Capital Territory and Northern Territory to assist the independent school authorities to obtain additional loan funds.
- International Sugar Agreement Act 1969* (No. 9) ratified the International Sugar Agreement, 1968.
- Judiciary Act 1969* (No. 39) increased the salaries of the Chief Justice (from \$24,000 to \$30,000 p.a.) and each other Justice (from \$21,000 to \$27,000 p.a.) and provided an allowance of \$2,000 p.a. and \$1,500 p.a. for the Chief Justice and each other Justice respectively.
- Judges' Remuneration Act 1969* (No. 40) increased the salaries of the Chief Judge of the Commonwealth Industrial Court and the President of the Commonwealth Conciliation and Arbitration Commission from \$19,000 to \$24,000 p.a., and provided them with an allowance of \$1,500 p.a.; and increased the salaries of the judges of the Commonwealth Industrial Court, Federal Court of Bankruptcy, Supreme Courts of the Australian Capital Territory and Northern Territory and the deputy presidents of the Commission from \$17,000 to \$22,000 p.a., and provided them with an allowance of \$1,000 p.a.
- Loan (Canadian Dollars) Act 1969* (No. 69) amended the *Loan (Canadian Dollars) Act 1955* to allow a conversion issue to be arranged for a Canadian loan of 15 million Canadian dollars maturing on 1 November 1970.
- Loan (Drought Bonds) Act 1969* (No. 99) provided for the creation, issue and redemption of securities to be known as drought bonds carrying taxation concessions for eligible graziers in arid areas that could be prematurely redeemed to reduce the impact of drought, fire or flood.
- Loan (Housing) Act 1969* (No. 59) authorised the borrowing of \$132,230,000 by the States for housing in the current financial year in accordance with the provisions of the *Housing Agreement Act 1966*.
- Loan (Supplementary Borrowing) Act 1969* (No. 3) provided legislative authority to appropriate loan funds up to \$150 million to enable the proceeds of any further overseas loans to be credited to the Loan Consolidation and Investment Reserve, where they would then be available for investment in the special loan raised to complete the financing of the State's share of the 1968-69 works and housing programme approved by the Loan Council.
- Loan (Swiss Francs) Act 1969* (No. 70) amended the *Loan (Swiss Francs) Act 1955* to allow a conversion issue to be arranged for a Swiss loan of 60 million Swiss Francs maturing on 1 March 1970.
- Loans (Australian National Airlines Commission) Act 1969* (No. 98) approved the borrowings not exceeding \$US 31 million (\$A 27.7 million) for the Australian National Airlines Commission to assist in financing the purchase of one Boeing 727 and six Douglas DC9 aircraft.
- Meat Chicken Levy Act 1969* (No. 36) imposed a levy, for three years, of one-tenth of a cent per meat chicken hatched to finance a programme of meat chicken research.
- Meat Chicken Levy Collection Act 1969* (No. 37) provided for the collection of the levy imposed by the *Meat Chicken Levy Act 1969*.

*Commonwealth legislation passed during 1969—continued*

- Meat Industry Act 1969* (No. 57) increased the number of meat producer representatives on the Australian Meat Board from five to six; empowered the Board to issue, cancel or suspend export licences, and provided the applicant or licensee with a right of appeal to the Minister against a decision of the Board.
- National Health Act 1969* (No. 102) provided adequate insurance cover under the national health scheme for those on low incomes and for migrants during their first two months in Australia.
- New South Wales Grant (Gwydir River Dam) Act 1969* (No. 53) provided a grant of up to \$20 million to accelerate the completion of the Copeton Dam on the Gwydir River.
- Nitrogenous Fertilisers Subsidy Act 1969* (No. 79) extended the existing subsidy on nitrogenous fertilisers a further three years to 31 October 1972 and made provision for payment of subsidy on imported fertilisers under certain specified conditions.
- Northern Territory (Administration) Act 1969* (No. 88) amended section 21 of the *Northern Territory (Administration) Act 1968* concerning the Aborigines Benefits Trust Fund and set out the principles to be followed for the use of Fund revenue.
- Officers' Rights Declaration Act 1969* (No. 13) amended the *Officers' Rights Declaration Act 1928–1968* consequent on the provision in the *Public Service Arbitration Act 1969* for the appointment of Deputy Public Service Arbitrators.
- Patents Act 1969* (No. 34) provided for major changes in the procedures for the granting of patents, including examination no longer automatic; deferred examination; separate fees for examination and annual fees to maintain applications; and modified examination in certain cases.
- Pay-roll Tax Assessment Act 1969* (No. 19).
- Petroleum Search Subsidy Act 1969* (No. 38) extended the period of operation of the *Petroleum Search Subsidy Act 1959–1967* for a further five years.
- Phosphate Fertilisers Bounty Act 1969* (No. 66) provided for an increase in the bounty rate on standard superphosphate by \$4 per ton to bring the total bounty to \$12 per ton, and provided for an increase to \$60 per ton of the bounty on the phosphorus pentoxide content in superphosphate other than standard superphosphate, and other phosphatic fertilisers.
- Public Service Arbitration Act 1969* (No. 10) amended the *Public Service Arbitration Act 1920–68* and provided for the appointment of deputy arbitrators to augment the Public Service arbitration tribunal.
- Public Works Committee Act 1969* (No. 92) provided that the cost limit below which Commonwealth public works need not be referred to the Public Works Committee be raised from \$500,000 to \$750,000 and that the committee may examine only those public works which are carried out by, or for, the Commonwealth within the Commonwealth or within a Territory of the Commonwealth.
- Pyrites Bounty Act 1969* (No. 62) extended the operation of the *Pyrites Bounty Act 1960–1965* for a further maximum period of twelve months to 30 June 1970 unless an earlier date of cessation is specified by proclamation.
- Quarantine Act 1969* (No. 1) revised the maximum penalties imposed upon persons convicted of quarantine offences and provided for a smoother functioning of quarantine administration whilst causing less inconvenience to importers and travellers.
- Raw Cotton Bounty Act 1969* (No. 16) extended the payment of a bounty on raw cotton production in Australia for a further three-year period commencing with the 1969 cotton crop.
- Repatriation Act 1969* (No. 95) increased T.P.I. rate of war pension by \$2.50 to \$36.00 per week; intermediate rate of war pension by \$2.25 to \$26.50 per week; war widows pension and service pensions by \$1.00 to \$15.00 per week; and increases in certain allowances.
- Scholarships Act 1969* (No. 17) provided a legislative basis for the five major scholarship schemes under which the Commonwealth makes awards to students in schools, colleges and universities and repealed the *Education Act 1945–66*.
- Seamen's War Pensions and Allowances Act 1969* (No. 96) increased the pensions and allowances under the *Seamen's War Pensions and Allowances Act*.
- Social Services Act 1969* (No. 94) increased the standard rate of pension for the aged, invalids and widows with children by \$1.00 per week to \$15.00 per week; pensions for married couples by 75 cents per week to \$13.25 per week, and introduced the tapered means test.
- South Australian Grant (Tailm Bend to Keith Pipeline) Act 1969* (No. 52) provided for a contribution of \$6 million to South Australia to accelerate the completion of the Tailm Bend–Keith pipeline scheme.
- Spirits Act 1969* (No. 6) allowed brandy distilled at a strength of up to 45 per cent overproof to be described as 'pure Australian standard brandy' or 'Australian blended brandy'.
- States Grants (Aboriginal Advancement) Act 1969* (No. 77).
- States Grants (Aboriginal Advancement) Act* (No. 2) 1969 (No. 78).

*Commonwealth legislation passed during 1969—continued*

*State Grants (Advanced Education) Act* 1969 (No. 81).

*States Grants (Advanced Education) Act* (No. 2) 1969 (No. 82).

*States Grants (Dwellings for Aged Pensioners) Act* 1969 (No. 87).

*States Grants (Home Care) Act* 1969 (No. 49).

*States Grants (Independent Schools) Act* 1969 (No. 89) introduced special purpose grants to the States for transmission to independent schools as a contribution from the Commonwealth to their running costs.

*States Grants (Nursing Homes) Act* 1969 (No. 51).

*States Grants (Paramedical Services) Act* 1969 (No. 50).

*States Grants (Petroleum Products) Act* 1969 (No. 90) amended the *States Grants (Petroleum Products) Act* 1965 and reviewed subsidy payments on petroleum products in country areas where distribution costs have increased in order to restore the difference between capital city and country wholesale prices to 3.3 cents a gallon.

*States Grants (Special Financial Assistance) Act* 1969 (No. 56).

*States Grants (Universities) Act* 1969 (No. 76).

*Sulphuric Acid Bounty Act* 1969 (No. 63) extended the operation of the *Sulphuric Acid Bounty Act* 1954–1966 for a further maximum period of twelve months to 30 June 1970 unless an earlier date of cessation is specified by proclamation.

*Sulphate of Ammonia Bounty Act* 1969 (No. 65) extended the operation of the *Sulphate of Ammonia Bounty Act* 1962–1966 for a further maximum period of six months to 30 June 1970 unless an earlier date of cessation is specified by proclamation.

*Superannuation Act* 1969 (No. 14) amended the *Superannuation Act* 1922–1968 consequent on the provision in the *Public Service Arbitration Act* 1969 for the appointment of Deputy Public Service Arbitrators.

*Superannuation Act* (No. 2) 1969 (No. 26) provided for non-contributory units, within specified limits, in the Commonwealth superannuation scheme and also reduced the degree of tapering in eligibility for pension benefits under the scheme.

*Supply Act* (No. 1) 1969–70 (No. 29).

*Supply Act* (No. 2) 1969–70 (No. 30).

*Tasmania Grant Act* 1969 (No. 91) authorised payment in 1969–70 of a special grant to Tasmania of 21.9 million.

*Tasmania Grant (Cressy–Longford Irrigation Works) Act* 1969 (No. 71) granted financial assistance of up to \$750,000 for the construction of the Cressy–Longford irrigation scheme.

*Universities (Financial Assistance) Act* 1969 (No. 7).

*Universities (Financial Assistance) Act* (No. 2) 1969 (No. 72).

*Urea Bounty Act* 1969 (No. 67) extended the operation of the *Urea Bounty Act* 1966 for a further maximum period of six months to 30 June 1970 unless an earlier date of cessation is specified by proclamation.

*Victoria Grant (King River Dam) Act* 1969 (No. 54) granted financial assistance of up to \$4 million to enable the earlier construction of the King River Dam.

*Wine Grapes Charges Act* 1969 (No. 2) amended the *Wine Grapes Charges Act* 1929–66 and increased the maximum rates of levy on grapes delivered to wineries and distilleries from \$1.50 per ton for fresh grapes to \$2.50 per ton, and from \$4.50 per ton for dried grapes to \$7.50 per ton.

TOTAL FOR YEAR: 102 Acts.

## CHAPTER 4

### DEFENCE

#### Department of Defence

##### Functions of Department of Defence

The functions of the Department of Defence include: defence policy; joint Service matters and matters having an inter-departmental defence aspect; the financial requirements of defence policy and the allocation of the funds made available; the supply aspect of defence policy including the review of production programmes and capacity; important matters of policy or principle affecting the Defence Forces and their requirements, including the strength, organisation and disposition of the forces, higher appointments in the Services, their weapons and equipment, and defence research and development.

##### Organisation, higher defence machinery, and the control of the joint Service machinery

The joint Service and inter-departmental advisory machinery of the Department consist of various committees and joint staffs headed by the Defence Committee, the Chiefs of Staff Committee, the Defence (Administration) Committee, and the Defence (Industrial) Committee.

The *Defence Committee* is a statutory body consisting of the Secretary, Department of Defence, who is Chairman; the Chairman of the Chiefs of Staff Committee; the Chiefs of Staff of the three Services; the Secretary, Prime Minister's Department; the Secretary, Department of the Cabinet Office; the Secretary, Department of External Affairs; and the Secretary to the Treasury. Its function is to advise the Minister for Defence on: the defence policy as a whole and the co-ordination of military, strategic, economic, financial, and external affairs aspects of defence policy; matters of policy or principle and important questions having a joint Service or an inter-departmental defence aspect; and such other matters having a defence aspect as are referred to the Committee by or on behalf of the Minister for Defence.

The *Chiefs of Staff Committee* meets regularly for the discussion of technical military matters on a joint service basis, and is responsible in peace for the preparation of military appreciations and plans. The functions of the *Defence (Administration) Committee* are the regular review of the progress of the Defence Programme, the co-ordination or integration of Service activities where appropriate in the interests of improved efficiency and economy, and the improvement of methods and organisation.

The *Defence (Industrial) Committee* co-ordinates and makes recommendations regarding the capabilities of Australian industry to meet the material requirements of the Services in peace and war. Members of the Defence Business Board are co-opted as necessary for specific subjects. The *Defence Business Board* is constituted to advise on business matters of common interest to the three Services, or important subjects on which the collective advice of the Board is desired from the business aspect, with a view to promoting efficiency and economy in the execution of the Defence Programme. The Board comprises businessmen who serve in a part-time honorary capacity. Three of the members also serve as business advisers to the separate Service Departments.

Recent years have seen a progressive re-organisation of aspects of defence administration to improve efficiency and keep pace with present requirements. The Defence (Industrial) Committee was established in 1969 and replaced two previous committees. Following a review of intelligence arrangements, a new Joint Intelligence Organisation was established recently in the Department of Defence. The new Organisation, which provides the intelligence assessments on which defence, strategic and eventually programming decisions are made, integrates the former Joint Intelligence Bureau of the Defence Department and certain sections of the Service Intelligence Directorates.

New Joint Planning arrangements, involving a series of staffs comprised of service personnel drawn from the Service departments, together with civilian officers of the Defence and External Affairs Departments, are now fully operative. Planning and policy formulation, as well as management, are being aided by the development of the techniques of systems analysis and programme budgeting. The Defence Science organisation now established within the Department of Defence is making a significant contribution to defence planning and policy formulation in the wider sense, as well as co-ordinating the research and development work necessary to support the Services generally.

The first course at the new Australian Joint Services Staff College commenced in January 1970. Attended by senior officers of the Armed Services and appropriate civilian departments and including students from New Zealand, the six-month course extends beyond purely military matters to include studies on socio-economic-political aspects, countries to our North and modern management practices. The objective is to produce officers well equipped for higher command and staff appointments.

#### Basis of current defence policy

The primary aim of Australian defence policy is to ensure the security of Australia and her Territories against external attack.

Because of the close link between Australian security and wider regional security, Australian policy stresses not only immediate direct defence, but also progress and stability in nearby countries, particularly in the south-east Asian area. In concert with our major allies and in keeping with our resources, Australia continues to make an active military contribution to collective defence arrangements in the area—SEATO, ANZUS and the Five-Power arrangements in Malaysia and Singapore—with the aim of supporting secure and stable independent nation States in south-east Asia with which Australia can establish co-operative relations.

At present Australian forces are on active overseas service in South Vietnam, together with the United States and other allies.

Australia has long-standing defence links with Malaysia and Singapore. The Australian Government has announced that, with New Zealand, it would maintain forces of all arms in the area so long as their presence is actively desired by the two governments concerned. Their presence, and their participation in training and military exercises with Malaysian and Singaporean troops is intended to aid the development of the indigenous defence capacity of the two countries as well as providing additional security while that capacity is built up.

#### New Programming concept

The year 1969–70 marks the change from the period defence programme concept to a continuous 'rolling' programme. In addition, the forward view has been projected ahead for five years rather than for three years as in the previous fixed programmes.

Each year another year—the fifth year forward—will be added to the programme in conjunction with an annual review of defence plans and policies. Because of the continuity thus provided, the consideration of major defence investment proposals will progress continuously rather than in a peak of activity in either annual or triennial cycles.

At the same time proposals can be considered against the background of a five year projection of defence expenditure as a whole in relation to the pressure thus placed on financial and other resources.

#### Personnel strengths.

Of the Army strength some 16,000 are national servicemen. The selective national service scheme is in its fifth year of operation and continues to be essential for the maintenance of Army strength.

Estimated strength at June 1970 . . . . .	23,660	900	750	25,310

**Equipment**

An amount of \$290.5m was spent on equipment of a capital nature in 1968–69; this included \$66.3m under credit arrangements with the United States Government. An amount of \$204.1m is expected to be spent in 1969–70 of which \$36.8m will be under the credit arrangements with the United States Government. The reduction in expenditure in 1969–70 occurs mainly because part of the major equipment programme has been completed and for some of the projects some of the expenditure is being spread into later years.

The major equipment items received in 1968–69 by the Services included: ships (1 DDG Destroyer, 2 Oberon submarines and 12 Patrol boats); aircraft (12 Mirage, 32 Macchi, 10 Pilatus Porter, 26 helicopters, 7 HS748 navigator trainers); and a large quantity of military vehicles and equipment.

Approval has been given by the Government for orders to be placed in 1969–70 for such major capital items as a fast combat support ship, an oceanographic ship and a small hydrographic ship for the Navy; 8 landing craft and 45 radio relay terminals for the Army and 12 medium lift helicopters for the R.A.A.F. Further major equipment proposals are under consideration by the Government.

**Research and development**

The laboratories of the Department of Supply together with the Services' own technical establishments, have continued to work on projects and investigations in support of Service needs. A new agreement with the United Kingdom has been negotiated for the conduct of the Woomera Range and its associated technical facilities, and collaborative programmes in space tracking and other selected topics have been arranged with the U.S.A.

## Defence expenditure

DEFENCE EXPENDITURE, BY DEPARTMENT OR SERVICE, 1964-65 TO 1969-70

(a) Includes defence aid for Malaysia and Singapore.

**Logistic arrangement with United States Government**

A logistic arrangement agreed with the United States Government in respect of Australian equipment purchases continues to operate. The logistic arrangement is in effect a 'package deal' covering all the items required instead of negotiating each separate purchase as it arises, and by this method Australia has obtained more advantageous financial terms together with assurances of better delivery dates to meet our requirements. Under this arrangement, instead of paying for the equipment roughly in line with deliveries, the Government is enabled to spread payments over an extended period.

**Reserve and Citizen Forces**

Citizen and Reserve Forces may be called out by proclamation for continuous full-time service in a 'Time of Defence Emergency'. The particular circumstances giving rise to the proclamation of a time of defence emergency could be varied, but would occur in a situation where the Regular Forces needed the full-time support of the Citizen and Reserve Forces in hostilities short of general war.

The three Services also have volunteer **Emergency Reserves** which may be called out for continuous full-time service when they are needed. These reserves provide a ready means of supplementing and reinforcing operational units.

**Australian forces serving overseas**

In response to an invitation of the Government of South Vietnam Australia has provided forces since 1962 to assist in the defence of that country. The number of men involved was increased progressively reaching 8,000 in the first half of 1968, and has remained at approximately that level during 1969. Details of the increase between 1962 and 1968 are outlined in Year Book No. 53, and Year Book No. 55.

In December 1969, the Australian force in Vietnam comprised:

**Navy**—a destroyer, a clearance diving team, and pilots, ground crew, and supporting personnel.

**Army**—a task force of three infantry battalions, a Centurion tank squadron, artillery field regiment and their combat support units; a logistic support force; and a 99-man Army Training Team.

**Air Force**—a squadron of eight Canberra bombers, a squadron of sixteen Iroquois helicopters, and a squadron of six Caribou transport aircraft.

In Malaysia and Singapore progressive arrangements and redeployments of Australian forces are taking place, which will be completed by the end of 1971. The forces which Australia, together with New Zealand, will retain in the area will consist of:

Navy—two naval ships, one R.A.N. and the other R.N.Z.N., which will be present in the area at all times.

Army—in conjunction with New Zealand a ground force based on a two battalion organisation, to which Australia will contribute approximately 1,200 men, located in Singapore and with one company detached on rotation to Butterworth.

Air Force—two squadrons of Mirage fighters, from which eight aircraft will be detached to Tengah in Singapore, and the remainder based at Butterworth in Malaysia.

#### Defence support aid

In support of Australia's strategic policy of contributing to the common defence of south-east Asia, the Government provides substantial financial aid to our Asian allies. This aid is given in the forms of civil aid and technical assistance, as well as direct defence assistance to support the armed forces of these countries and to increase their defence capability.

Under the SEATO Aid programme assistance to the extent of \$2,400,000 will be provided for South Vietnam, Thailand, Pakistan, and the Philippines during 1969–70. This will include material assistance, the training of service and civilian personnel both in their home countries and in Australia, and, in the case of South Vietnam, special aid in the medical and developmental fields and civic action by the Australian Force Vietnam.

Malaysia is also being further assisted to strengthen its defence capability by the extension of the aid programme commenced in 1964 under which the Australian Government has provided some \$45 million to date. This aid to Malaysia includes ammunition, military vehicles, weapons, small craft, engineer equipment, and general stores. Malaysian servicemen will continue to be trained in Australia and in the Malaysian area, and the seconding of Australian servicemen to the Malaysian armed forces will also be continued. Additionally, in 1969 Australia made a gift of ten Sabre aircraft, spares, ground support equipment and a training simulator to Malaysia and is maintaining a Support Flight of over 100 R.A.A.F. instructors and other personnel at Butterworth to provide training for the R.M.A.F. in both flying and ground support. Defence aid to Singapore comprises engineer equipment, field ambulances, vehicle maintenance equipment, and 2½ ton four-wheel-drive trucks. Army training courses will also be provided in Australia for Singapore services personnel.

### Naval defence

Prior to 1901, naval defence systems were organised under the State Governments. Information regarding these systems is given in Year Book No. 2, page 1084. An outline of the development of Australian naval policy is given in Year Books No. 3, page 1060, and No. 12, page 1012. An account appears in Year Book No 15, pages 921–3, of the building of the Australian Navy, its costs, the compact with the Imperial Government, and other details. The growth and the activities of the Royal Australian Navy during the 1939–45 War are shown in Year Book No. 36, pages 1023–7.

Under the provisions of the Commonwealth of Australia Constitution Act the Minister of State for the Navy administers the Department of the Navy. Under the *Naval Defence Act 1910–1966* the Royal Australian Navy is administered by the Naval Board. The Naval Board consists of the Minister as President, four Naval Members, and the Secretary to the Department of the Navy.

Strong links with the Royal Navy are maintained by a constant exchange of officers for extended tours of duty and by a full exchange of information and ideas. A liaison staff is maintained by the Royal Australian Navy in London and by the Royal Navy in Australia. Advanced training and staff courses in the United Kingdom are provided by the Royal Navy for Royal Australian Navy officers. A liaison staff is also maintained by the Royal Australian Navy in Washington, and a comprehensive exchange of information is provided by this link. Staff courses in the United States are also attended by officers of the Royal Australian Navy.

#### Ships of the Royal Australian Navy

*In commission, December 1969: Melbourne—aircraft carrier; Sydney—transport; Supply—oiler; Stalwart—destroyer tender; Perth, Hobart and Brisbane—guided missile destroyers; Vampire, Vendetta, Duchess, Anzac—destroyers; Yarra, Parramatta, Stuart, Derwent, Queenborough—destroyer escorts; Teal, Ibis—coastal minesweepers; Curlew—coastal minehunter; Moresby, Paluma—surveying ships; Diamantina, Kimbla—oceanographic research ships; Oxley, Otway, Onslow, Owens—submarines; Attack, Aitape, Acute, Adroit, Advance, Archer, Arrow, Assail, Aware, Barbette, Barricade, Bayonet, Bombard, Buccaneer, Ladava, Lae, Madang, Samarai—patrol boats; Banks, Bass—auxiliaries; Jeparit—transport.*

*In reserve, December 1969: Tobruk—destroyer; Quiberon, Quickmatch—destroyer escorts; Gascoyne, Barcoo—oceanographic research ships; Culgoa—barrack ship; Hawk, Gull, Snipe—coastal minesweepers; Ardent, Bandolier—patrol boats; Castlemaine—ocean minesweepers; Sprightly—fleet tug; Kara Kara—boom gate vessel.*

*On service overseas.* During the year ended December 1969 the following ships served in south-east Asian waters as units of the Commonwealth Strategic Reserve with headquarters in Singapore: *Vampire, Stuart, Yarra, Duchess, Derwent*. The following ships served in support of the allied forces in South Vietnam: *Perth, Sydney, Brisbane, Vendetta, Jeparit*.

The ships *Melbourne, Supply, Parramatta, Hawk, Gull, Curlew, Attack, Anzac, Stalwart, Ovens, Queenborough, Otway, Diamantina, Aitape, Lae, Duchess* also made overseas visits.

#### Fleet Air Arm

The Fleet Air Arm of the Royal Australian Navy maintains three front line squadrons for embarkation in the operational carrier H.M.A.S. *Melbourne*. These squadrons currently consist of Skyhawk A4-G fighter/ground attack aircraft, Tracker S2-E anti-submarine aircraft, and Wessex MK. 31B submarine helicopters. Four training and support squadrons are based at the Naval Air Station H.M.A.S. *Albatross* at Nowra, New South Wales. Other aircraft operated by the Navy are the Scout helicopter in *Moresby*, Iroquois helicopter (training and search and rescue), Dakota, Vampire trainer, and Sea Venom (target towing). The latter two aircraft will be replaced by the Macchi MB326H in October 1970.

#### Ship construction and repairs

There are two naval dockyards, one at Garden Island, New South Wales, and one at Williamstown, Victoria. Also, the dockyard at Cockatoo Island, which is operated by the Cockatoo Docks and Engineering Company Pty Ltd by agreement with the Commonwealth, carries out considerable naval work. All three dockyards carry out ship refitting for the Navy.

Included in the present ship construction plan is the building of two destroyer escorts, one each at Cockatoo Island (*Torrens*) and Williamstown (*Swan*) Dockyards. It is expected that *Swan* will enter service in 1970 and *Torrens* in 1970-71. Construction in the United Kingdom of four Oberon Class submarines has been completed. Twenty 100-foot patrol vessels were built by Evans Deakin and Co. Pty Ltd, Brisbane, Queensland, and Walkers Ltd, Maryborough, Queensland (ten by each contractor). H.M.A.S. *Melbourne* underwent an extended refit during 1968 at Garden Island Dockyard. The Daring Class destroyers *Vendetta* and *Vampire* are to have an extended refit, commencing with *Vampire* in 1970. The anti-submarine guided weapon Ikara, which has been designed and developed in Australia, has been fitted into *Perth, Hobart, Yarra, Parramatta, Stuart* and *Derwent* and is being fitted in *Brisbane* at present. Both *Swan* and *Torrens* will be fitted with Ikara.

#### Personnel, entry, training, women's services, reserves

*Personnel.* The estimated strength of the Royal Australian Navy in relation to personnel borne for full-time duty for 1969-70 is 17,693. At 30 November 1969 the actual strength of personnel borne for full-time duty was 1,924 officers and 15,238 sailors, which includes 200 officers and sailors of the Citizen Naval Forces and 25 officers and sailors of the Royal Australian Navy Emergency Reserve.

*Naval college.* The Royal Australian Naval College, H.M.A.S. *Creswell*, is at Jervis Bay. The College was established to provide trained officers for the R.A.N. Junior entry to the College is at the age of fifteen to seventeen years, and senior entry at a maximum age of twenty years. Subsequent training as midshipmen and sub-lieutenants is in ships of the fleet, at universities or technical colleges, and at Royal Navy training establishments in the United Kingdom. In November 1969 there were one hundred and six cadet midshipmen under training.

*Direct entry into Navy.* To meet increasing requirements for officers, direct entries are accepted into the Royal Australian Navy. Short service commissions of seven years are granted on completion of training as seamen or aircrew officers to suitable applicants who have completed their secondary schooling and who are over seventeen years of age and under twenty-three years of age for seamen applicants, and under twenty-four years for aircrew applicants. Other direct entries may be approved outside these age limits from persons with appropriate qualifications and experience.

Opportunities exist for university undergraduates studying medicine, dentistry, mechanical engineering, electrical engineering, or aeronautical engineering to enter the R.A.N., and on successful completion of their studies to commence short or full-time service in the Navy. Fully qualified doctors, dentists, mechanical or electrical engineers, and instructors may also enter the R.A.N. directly if they are of the appropriate age.

*Training establishments.* H.M.A.S. *Cerberus* at Westernport, Victoria, is the main training establishment for adult sailors in the permanent naval forces, while several advanced training schools are established in New South Wales. The period of initial engagement for sailors varies from six years for tradesmen entry to nine or twelve years, and on completion sailors may re-engage for shorter periods up to the age of fifty.

H.M.A.S. *Nirimba* at Quakers Hill, New South Wales, is the naval school for apprentices. It provides secondary education, as well as technical training in trades, to boys aged fifteen to seventeen and a half years. The school was established in 1956 to meet the R.A.N.'s increasing demand for highly skilled tradesmen. In November 1969 there were 603 naval artificer apprentices under training. H.M.A.S. *Leeuwin* at Fremantle, Western Australia, is the junior recruit training establishment. Entrants must be aged between fifteen and a half and sixteen and a half years. Training lasts one year and instruction is mainly academic, the remaining time being devoted to basic naval and disciplinary training. On completion of the course sailors are posted for a period of sea training, after which they proceed to technical and specialist courses. In November 1969 there were 606 junior recruits undergoing training.

*Women's Services.* The present Women's Royal Australian Naval Service was inaugurated in January 1951. The numbers serving in shore establishments in November 1969 were 29 officers and 651 Wrens. The Royal Australian Naval Nursing Service was reconstituted in November 1964, and its strength in November 1969 was 20 officers.

*Emergency Reserve.* In November 1964 approval was given to form the Royal Australian Naval Emergency Reserve to provide a readily available source of trained manpower which may be called on for continuous full-time service. The authorised establishment of this force is 2,000 officers and sailors. At 30 November 1969 the strength of the reserve available for mobilisation was 72 officers and 1,086 sailors, which excludes 3 officers and 22 sailors serving full-time. Members are required to complete thirteen days' training annually and are paid an annual bounty.

*Citizen Naval Forces.* The Citizen Naval Forces consist of the R.A.N. Emergency List, Royal Australian Fleet Reserve, Royal Australian Naval Reserve, Royal Australian Naval Reserve (Sea-going), Royal Australian Naval Volunteer Reserve, and Women's Royal Australian Naval Service Reserve. The authorised establishment of the combined forces is 10,000. At 30 November 1969 there were 1,169 officers and 2,857 sailors in the Citizen Naval Forces. These figures exclude 108 officers and 92 sailors serving full-time. The R.A.N.R. is the training reserve of the Citizen Naval Forces. Members carry out weekly training and thirteen days' continuous training annually; sailors engage for periods of three years. Other reserves do not normally carry out part-time training, but members may volunteer for periods of annual training and for periods of full-time service with the R.A.N. A Women's Royal Australian Naval Service Reserve consisting of ex-permanent naval forces W.R.A.N.S. officers and W.R.A.N.S. was authorised in June 1968 and enlistments commenced in mid-November 1968.

## Military defence

A detailed historical account of the Australian defence forces prior to federation appears in Year Book No. 2, pages 1075-81. *See also* Year Book No. 12, page 999.

### Commonwealth systems

Under the terms of the Commonwealth of Australia Constitution Act the Commonwealth took over control of defence matters in March 1901. The growth of the Commonwealth Military Forces may be considered to have taken place in a number of phases. For particulars of the phases which cover the period from the welding together of the military forces of the States into one homogenous Army in 1902 up to the re-establishment of the Military Board and the organisation of Commands after the 1939-45 War *see* Year Book No. 46 and earlier issues.

National Service Training was introduced in 1951 and suspended in 1959-60. In November 1964 the Government announced that National Service was to be re-introduced from June 1965. The scheme provides for a period of two years full-time duty in the Regular Army followed by three years in the reserve. National Service registrants who are members of the Citizen Military Forces or who join prior to the ballot may elect to serve in the C.M.F. for a total of five or six years, depending on length of previous service, as an alternative to full-time continuous National Service Training. Special C.M.F. units have been formed to provide for those persons who wish to serve in the C.M.F., but who are unable to do so in normal units, because of remote location, etc.

### Organisation

Army Headquarters is responsible for the policy and control of the Australian Army. The Military Board consists of the Minister for the Army, President; the Chief of the General Staff; the Adjutant-General; the Quartermaster-General; the Master-General of the Ordnance; the Deputy Chief of the General Staff; the Citizen Military Forces Member; and the Secretary, Department of the Army. After the 1939-45 War, Command Headquarters were established to implement Army Headquarters policy and to command and administer those units placed under their authority. Command Headquarters are established in the capital cities of Australia and Papua-New Guinea. The geographic extent of Commands is as follows.

*Northern Command*—the State of Queensland.

*Eastern Command*—the State of New South Wales, less those parts included in Southern and Central Commands.

*Southern Command*—the State of Victoria and part of southern New South Wales.

*Central Command*—the State of South Australia, plus a portion of south-western New South Wales.

*Western Command*—the State of Western Australia.

*Tasmania Command*—the State of Tasmania.

*Northern Territory Command*—the Northern Territory.

*Papua-New Guinea Command*—the Territory of Papua-New Guinea.

The Army is divided into the Field Force, Forces in Papua-New Guinea, and the Australian Support Area, with both Regular and Citizen Military Forces elements in each. The basic formation of the Field Force is the division, which consists of nine infantry battalions with supporting arms and services units. Within the division three task force headquarters can command varying combinations of divisional units. The substantial parts of the combat elements of one Regular and two C.M.F. divisions have been raised, together with logistic support units. The Regular element of the Forces in Papua-New Guinea consists of two battalions of the Pacific Islands Regiment with a number of supporting units. An infantry battalion forms the major C.M.F. element. The Australian Support Area provides the training, administrative, and command structure on the mainland.

At 31 December 1969, units of the Australian Regular Army were deployed overseas as follows. In Vietnam a task force of three infantry battalions with supporting units, including aircraft support provided by the Royal Australian Air Force, was serving at the invitation of the Government of that country. In addition there was the major part of an infantry battalion group stationed in Singapore. This battalion group was in the process of moving from its previous location in Malaysia.

### Personnel, training, women's services, cadets

*Personnel.* The effective strength at 26 November 1969 was: Australian Regular Army, 46,841 (including 2,337 Pacific Islanders, 317 Citizen Military Forces on full-time duty, and 984 Women's Services); Citizen Military Forces, 33,026.

*Staff College.* Until 1938 the training of staff officers was carried out in the various Military Districts throughout Australia, except in cases where officers were selected from time to time to attend courses abroad. In 1938 an Australian Command and Staff School, located in the original Officers' Mess at Victoria Barracks, Sydney, was established. Between 1939 and 1945 the training of staff officers was carried out under varying conditions by different schools in accordance with the changing needs of the war.

Early in 1946 the Staff School (Australia) was established at Seymour, Victoria, and redesignated the Staff College in conformity with other Commonwealth training establishments for training officers for command and staff appointments. The College was later moved to Queenscliff, Victoria, where it is at present situated. The course is held annually and is of twelve months' duration. The normal intake is seventy students, and on successfully completing the course an officer is awarded the symbol 'psc'. The course is designed to train selected officers for appointments in all branches of the staff in peace and war and to prepare them to assume, after experience, command and higher staff appointments.

Included in the 1970 course will be students from Canada, Ghana, India, Indonesia, Malaysia, New Zealand, Pakistan, Philippines, South Korea, Thailand, United Kingdom and United States of America. Vacancies on each course are reserved also for officers who may be nominated by the Royal Australian Navy, the Royal Australian Air Force, and the Commonwealth Public Service.

In order to ensure common standards in tactical doctrine and staff and command training throughout the Commonwealth of Nations, liaison is maintained with other Staff Colleges, and to this end there is also a reciprocal exchange of instructors between the United Kingdom, the United States of America, and Australia. An instructor is also provided by New Zealand.

*Royal Military College.* The Royal Military College was established in 1911 at Duntroon in the Australian Capital Territory for the purpose of providing trained officers for the Army. The conditions of entry are laid down in the Royal Military College Regulations. The course is four years of military and academic studies. The first three years are primarily academic and the fourth year military. Following affiliation with the University of New South Wales a Faculty of Military Studies was introduced in 1968. Cadets who meet the requirements for admission to the Faculty may take a course, leading to the award of a degree in Military Studies by the University of New South Wales in one of the following, Arts, Applied Science or Engineering. Cadets not admitted to the Faculty take a diploma course appropriate to their educational background. On graduation, cadets are appointed lieutenants in the Australian Regular Army. The College also trains New Zealand cadets for commissions in the New Zealand Permanent Forces. In 1967 one Thai cadet commenced training at the College.

*Officer Cadet School.* The Officer Cadet School was established in 1951 at Portsea, Victoria, for the purpose of speeding up the production of junior regimental officers for the Australian Regular Army. Serving members of the Australian Regular Army, the Citizen Military Forces and civilians between the ages of eighteen and a half and twenty-two and a half are eligible to apply for entrance. A special entry provides for candidates up to twenty-four and a half years. The course lasts for forty-four weeks, and on graduation cadets are appointed second-lieutenants in the Australian Regular Army. Graduates normally proceed to further training at the Army School of the Arm and Service to which they have been allotted before being posted to regimental duties. The Officer Cadet School also trains officers on occasions for Malaysia, New Zealand, Thailand, the Philippines, Brunei and the Pacific Islands Regiment.

*Officer Training Unit.* An Officer Training Unit has been established at Scheyville, New South Wales, which is responsible for the training of National Service officers.

*Women's Royal Australian Army Corps School.* The W.R.A.A.C. School, established in 1952 at Mildura, Victoria, moved to Mosman, New South Wales, in 1958. It has three wings, one whose primary task is the training of officer cadets for the W.R.A.A.C., one for the training of non-commissioned officers at all levels and for other special courses, and one which is a basic training wing. The officer cadets are selected from eligible applicants, who may be serving members between nineteen and a half and thirty-two years of age, or civilians between nineteen and a half and thirty years of age. The course is of twenty-seven weeks' duration and on graduation cadets are appointed lieutenants in the Royal Australian Army Nursing Corps or the Women's Royal Australian Army Corps.

*Army Apprentices' School.* The Army Apprentices' School was opened in 1948 at Balcombe, Victoria, with the aim of training youths as skilled tradesmen for the Australian Regular Army and to form a background for an Army career with prospects of promotion. The course is open to youths between the ages of fifteen and seventeen years and provides training in a number of highly skilled trades. A three-year course of intensive theoretical and practical work at the Apprentices' School is followed by one year of training in an appropriate Army workshop or technical unit. At the end of their third year apprentices take the Victorian Apprenticeship Commission's final grade public examinations, which ensures that they will be accepted as qualified tradesmen in civil life when they eventually leave the Army. In addition to trade and military training the Apprentices' School provides general educational facilities up to the School Leaving Standard.

*Other schools.* Army schools have been established for the major Arms and Services for the purpose of training officers and other ranks in the up-to-date techniques of their own Arm or Service, to qualify them for promotion requirements, and to produce trained instructors. Courses at Army schools are conducted for members of both the Australian Army and the Citizen Military Forces.

The following Army schools have been established: Jungle Training Centre, Armoured Centre, School of Artillery, School of Military Engineering, Transportation Centre, School of Military Survey, School of Signals, Infantry Centre, Army Aviation Centre, Army Intelligence Centre, Royal Australian Army Service Corps Centre, Royal Australian Army Medical Corps School of Army Health, Royal Australian Army Ordnance Corps Centre, Royal Australian Electrical and Mechanical Engineers' Training Centre, Royal Australian Army Provost School, School of Music, Air Support Unit (Army Component), and Air Movement Training and Development Unit (Army Component).

*Women's Services.* In July 1950 approval was given for the enlistment of women into the Australian Regular Army on a limited scale. Enlistment commenced into the Royal Australian Army Nursing Service in November 1950 and into the Australian Women's Army Corps early in 1951. In February 1951 the Royal Australian Army Nursing Service became a Corps and was designated the Royal Australian Army Nursing Corps (R.A.A.N.C.). During June 1951 the Australian Women's Army Corps was redesignated the Women's Royal Australian Army Corps (W.R.A.A.C.). The Women's Services in the Australian Regular Army now comprise two Corps only, the Royal Australian Army Nursing Corps and the Women's Royal Australian Army Corps.

Women's Services are incorporated in the Citizen Military Forces, and one company of the Women's Royal Australian Army Corps is located in each Command excluding Northern Territory Command and Papua-New Guinea Command. Companies of the Royal Australian Nursing Corps are located in each Command excluding Northern Territory Command and Papua-New Guinea Command.

*Australian Cadet Corps.* The Australian Cadet Corps is a voluntary organisation. It serves as a training ground to provide, to some extent, the future officers and non-commissioned officers of the Australian Military Forces, and, as such, occupies a foremost position in the scheme of national defence. The Australian Cadet Corps, does not, however, form part of the Australian Military Forces. School Cadet units are raised at educational establishments throughout the Commonwealth and Papua and New Guinea, except in the Northern Territory. The minimum age for enrolment is the year in which the applicant reaches the age of fourteen years, and cadets, who, in the large majority of schools receive a free issue of A.M.F. pattern uniform, may remain in the Cadet Corps until they cease to be pupils of the educational establishments concerned. A few units retain their own pattern school uniform and are not issued with A.M.F. pattern uniforms. Provision is made for the appointment of officers, cadet under-officers, warrant and non-commissioned officers on an authorised establishment scale from within school units. School Cadet units may be, and in many cases are, affiliated with Citizen Military Force units. The establishment of the Corps is 46,000 all ranks, and at 15 October 1969 comprised 346 School Cadet units with a posted strength of 41,213, all ranks.

### Air defence

A statement regarding the preliminary steps taken in connection with the development of air defence appears in Year Book No. 18, page 610, and one on the expansion and development and type of operations of the Royal Australian Air Force during the 1939-45 War in Year Book No. 36, page 1027. Details of the current defence expansion as it affects the R.A.A.F. were outlined by the Prime Minister in his speech in the House of Representatives on 8 November 1965.

#### Higher organisation

The Air Board is responsible to the Minister for Air for the control, organisation, and administration of the Royal Australian Air Force and is constituted as follows: Chief of the Air Staff, Air Member for Personnel, Air Member for Supply and Equipment, Air Member for Technical Services, and the Secretary, Department of Air.

The Air Board administers and controls R.A.A.F. units in Australia and its Territories through two commands, Operational Command and Support Command. The guiding principles of the command organisation within Australia are to decentralise day-to-day operating activities as far as possible and to streamline the force and make it as efficient as possible. The operational units overseas, working within the broad directives issued by the Air Board, comprise the R.A.A.F. component of the British Commonwealth Strategic Reserve located at Butterworth in Malaysia, and the R.A.A.F. component of the Australian forces in South Vietnam.

The members of the Air Board and their staffs are located at the Department of Air in Canberra. An R.A.A.F. representative is located in London, and air attaches are located in Djakarta, Saigon, Paris, and Washington. *Operational Command* is responsible for the command of operational units and the conduct of their operations within Australia and its territories. *Support Command* is responsible for the recruitment and training of personnel, and the supply and maintenance of service equipment.

#### Organisation of units

*Bases.* Each command is established with the units necessary to carry out its allotted function. There is no fixed rule in relation to the number and types of units within each command, as this depends upon the nature of its present and future responsibilities. Where possible, units having similar functions or requiring similar facilities are located together, and the geographical locations are known as bases.

*Formations*—comprising a headquarters unit to control the activities of a number of units at one location; each formation has a base squadron which provides common services to all units at the location.

*Flying squadrons*—strike reconnaissance, air defence, ground attack, medium and short range transport, helicopter, and maritime reconnaissance squadrons which undertake the operational flying and in conjunction with operational conversion units, the operational flying training commitments of the R.A.A.F.

*Operational conversion units*—specialising in operational conversion training of aircrew for the strike reconnaissance, air defence, and ground attack squadrons.

*Aircraft depots*—specialising in major overhaul, etc., of aircraft and equipment.

*Stores depots*—centrally located depots to which stores and equipment ordered by the R.A.A.F. are delivered for distribution to units.

*Airfield construction squadron*—specialising in airfield construction tasks in support of the R.A.A.F. operational component within Australia and the Territories.

*Telecommunications units*—responsible for the communications services of the R.A.A.F.

*R.A.A.F. Hospitals*—hospitals in Australia and at Butterworth providing medical services for the R.A.A.F.

*Flying and ground schools and units*—schools and units specialising in the aircrew and ground staff training required by the R.A.A.F.

*R.A.A.F. Diploma Squadron and R.A.A.F. Academy*—training units, to diploma and university degree level respectively for officer cadet entrants to the R.A.A.F.

*R.A.A.F. Staff College*—trains specially selected R.A.A.F. officers for higher staff and command posts.

### **Aircraft**

The R.A.A.F.'s strike reconnaissance force is equipped with Canberras, and the air defence and ground attack squadrons are equipped with the Mirage 111-O. Transport aircraft currently in use are Hercules C130A and E, Caribou, Dakota, Mystere 20, HS748, and BAC111. The two helicopter squadrons operate the Iroquois and the two maritime squadrons operate Neptune SP2H and Orion P3-B aircraft. Aircraft used for training are the Winjeel, Macchi, HS748, Sabre, and Mirage 111-O.

### **Personnel, reserve, women's services**

At 31 December 1969, the authorised Permanent Air Force establishment was 24,250 and the Citizen Air Force, 1,080; the enlisted strength was Permanent Air Force 21,542 and Citizen Air Force 928, while the strength of the General Reserve was 8,380. The Permanent Air Force figures include the Women's Royal Australian Air Force, which has an establishment of 1,044 and strength of 898, and the R.A.A.F. Nursing Service with an establishment of 105 and strength of 85.

## **Department of Supply**

For information relating to the creation of the Department of Supply and its development up to 1959 see Year Book No. 51, page 1204, and earlier issues. On 18 December 1959 the Department assumed responsibility for the operation and management of space tracking stations in Australia on behalf of the United States National Aeronautics and Space Administration. On 29 March 1962 Australia became a foundation member of the European Launcher Development Organisation, and the Department accepted responsibility for the test firing of the launching rocket for that Organisation's experimental satellite, using the facilities of the Woomera Rocket Range.

On 1 May 1968 the Department took over the administration of the Antarctic Division from the Department of External Affairs.

### **Functions of Department**

The functions of the Department of supply include the following.

Defence research and development, including the operation of the Joint United Kingdom-Australia Weapons Research Project, and Australian research and development.

Operation and management of factories, workshops, and undertakings concerned in the production of munitions (including aircraft), clothing, canvas-ware, and other defence goods.

Manufacture, acquisition, provision, and supply of munitions (including aircraft) and miscellaneous goods and services required by the defence forces.

Arrangement of contracts for the supply of goods and the performance of services.

Operation and management of space tracking stations in Australia on behalf of the United States National Aeronautics and Space Administration.

Test firing of the launching rocket for the European Launcher Development Organisation's experimental satellite, using the facilities of the Woomera Rocket Range.

Acquisition, maintenance, and disposal of strategic materials.

Planning and establishment of manufacturing facilities for the production of munitions and other defence goods.

Investigation and development of Australian sources of supply in connection with defence.

Sale or disposal of surplus Commonwealth property other than land or buildings.

Provision of Commonwealth transport facilities outside the Australian Capital Territory and the Northern Territory.

Provision and control of stores required for or in connection with matters administered by the Department of Supply, and general storage for other Departments as required.

Arrangements for ascertaining costs and the control and limitation of profits in connection with the production of munitions and other defence goods.

Organise expeditions and establish and maintain stations in the Antarctic for the purposes of exploration and conducting scientific studies.

The Minister for Supply administers the *Supply and Development Act 1939-1966*, except in so far as it contains the building (*see also* the chapter Transport and Communication), repair, and maintenance of merchant ships and the building, extension, alteration, repair, and maintenance of shipyards, drydocking, and repair facilities for merchant ships.

The Minister for Supply also administers the *Antarctic Treaty Act 1960*, the *Australian Antarctic Territory Acceptance Act 1933*, the *Australian Antarctic Territory Act 1954-1963*, *Heard Island and McDonald Islands Act 1953-1963*.

### Research and Development

The Research and Development Division is responsible for research and scientific development in relation to war *matériel*, including the operation of the Joint United Kingdom-Australia Weapons Research Project and support of space research programmes for ELDO and NASA. The headquarters of the Division is situated in Canberra, and the following establishments are included in the Division: (a) Weapons Research Establishment, Salisbury, South Australia; (b) Defence Standards Laboratories, Maribyrnong, Victoria; Woodville North, South Australia; and Alexandria, New South Wales; (c) Aeronautical Research Laboratories, Fishermen's Bend, Victoria.

### Weapons Research Establishment

The establishment has four main sections, namely the Trials Wing, the Space Physics Wing, the Weapons Research and Development Wing, and the Engineering Wing. The Trials Wing is concerned with the operation, development, and instrumentation of the Woomera Range, and the planning, execution, and assessment of trials. The Space Physics Wing conducts research and development on behalf of the Australian Services and in support of the United Kingdom-Australia Joint Project.

The Weapons Research and Development Wing is concerned primarily with Australian initiated defence research and development. The Engineering Wing provides engineering design and development and support facilities for other Weapons Research Establishment wings and research establishments and undertakes tasks for the Australian Services.

### United States space projects

Agreements have been signed by the Australian and United States Governments for a co-operative programme for the establishment and operation in Australia for space vehicle tracking stations. The agencies for the Australian and American Governments are the Department of Supply and the National Aeronautics and Space Administration (NASA) respectively.

As part of the world-wide network supporting NASA's space programme the stations are designed to track spacecraft in their orbits around the earth or on their journey into space, to receive telemetered data from the vehicle, and to issue radio commands controlling the vehicle's manoeuvres. The Department of Supply is responsible for managing, staffing and operating the stations on behalf of NASA. The stations which are now in operation are at:

Island Lagoon near Woomera (deep space probes and optical tracking of scientific satellites);

Carnarvon in Western Australia (manned space flights and scientific satellites);

Tidbinbilla in the A.C.T. (deep space probes and manned space flights);

Orroral Valley in the A.C.T. (scientific satellites);

Honeysuckle Creek in the A.C.T. (manned space flights, particularly the 'man on the moon' Apollo project);

Cooby Creek near Toowoomba, Queensland (applications technology satellites).

Work has commenced on the construction of a 210 ft tracking antenna at Tidbinbilla, A.C.T.

An extensive communications system links the tracking stations with the control centres in the United States. At all six stations the responsibility is vested in a station director who is a senior officer of the Department of Supply. Tidbinbilla, Honeysuckle Creek and Carnarvon, together with the C.S.I.R.O.'s 210 ft radio telescope at Parkes, played an important part in the communications network during the successful Apollo 11 and 12 moon landing mission in 1969.

Under the Australian Government's policy of using the resources of private industry wherever possible, contracts for operation and maintenance services at the stations have been let as follows: Hawker Siddeley Electronics (Tidbinbilla and Island Lagoon), Amalgamated Wireless (A'asia) Ltd, (Carnarvon and Cooby Creek), E.M.I. Electronics (Australia) Pty Ltd, (Orroral Valley), and Standard Telephones and Cables Pty Ltd (Honeysuckle Creek).

NASA space projects requiring Australian participation are as follows.

*Manned space flights*

Project Apollo—landing of men on moon and their return to earth.

*Scientific and applications satellites*

Large multiple experiment scientific satellites (Orbiting Geophysical Observatories; Orbiting Astronomical Observatories, etc.). Operations satellites for meteorology (Tiros). Applications technology satellites for communications, navigation, radio propagation, etc. (ATS).

*Deep space probes*

Mariner—probes to Mars, Venus, etc.

Pioneer—interplanetary investigations.

**Defence Standards Laboratories**

This establishment provides a scientific service to the Defence Services, Department of Supply factories and other authorities generally within the field of chemistry, physics, metallurgy and engineering and to a limited extent, in the fields of biochemistry and physiology. It also undertakes background research appropriate to its responsibilities and of significance to the defence requirements of Australia.

**Aeronautical Research Laboratories**

In the aeronautical field this establishment undertakes research and development work on specific defence projects, acts as consultant and conducts investigations for the Services, Government Departments or industries engaged on defence work. Background research related to the execution of its responsibilities and of significance to the defence requirements of Australia is also undertaken.

**Production of munitions**

The Department is responsible for the production of a wide range of munitions required by the Armed Services. Production is carried out substantially in Government factories, although some orders, mainly for components, are placed with private industry.

The following Government factories are currently in operation: Ammunition—Footscray, Victoria; Explosives and Filling—Albion and Maribyrnong, Victoria; Mulwala and St Mary's, New South Wales; Ordnance—Maribyrnong, Bendigo, and Port Melbourne, Victoria; Small Arms—Lithgow, New South Wales; Clothing—South Melbourne, Victoria.

The Ammunition Factory produces the complete round of small arms ammunition and also components for larger calibre gun ammunition, including empty cartridge cases, electronic and mechanical fuses, and primers. The Explosives Factories produce the various types of explosive compositions and propellants required for gun ammunition, rockets, and guided missiles. The Filling Factory at St Mary's fills and assembles into complete rounds of ammunition (other than small arms ammunition) the empty components and materials supplied by the other munitions factories and by private industry.

The Ordnance Factories at Maribyrnong and Bendigo are equipped to produce heavy ordnance equipment, such as naval guns and gun mountings; large turbine gears; steel shell bodies; empty rocket motors for guided missiles; trailers and tank transporters; and other items requiring heavy engineering capacity. As well as work for the Services, the Bendigo Factory produces components for marine diesel engines for Australian shipping and large heavy engineering items for the coal, cement, and steel industries.

The Port Melbourne Factory builds and services large marine diesel engines for the Australian shipbuilding industry. Major forgings and fabrications for these engines are produced at the Ordnance

Factories at Maribyrnong and Bendigo. The Small Arms Factory is equipped to produce the rifles and other small arms required by the Services. Current production is the 7.62-mm automatic rifle, for which orders have also been received from overseas, and the 9-mm carbine which serves as the infantry light machine gun. The Clothing Factories make uniforms and clothing for the three Services, the Postmaster-General's Department and some other Commonwealth authorities.

#### **Production of aircraft and guided weapons**

Production both in Government factories and in industry of military types of aircraft and aero-engines and of other aircraft components required by the Royal Australian Air Force is administered by the Department of Supply. Planning of capacity and the negotiation of contractual arrangements concerning aircraft modification, repair and overhaul, and for the supply of spare parts and airborne equipment for the R.A.A.F., the R.A.N., and the Army are also functions of the Department.

The following factories are operated by the Department: The Government Aircraft Factory at Fishermen's Bend and the Final Assembly Workshops and Test Airfield at Avalon, Victoria, and the Machine Shop at Northfield, South Australia. During 1968 the French Mirage supersonic fighter aircraft production programme for the R.A.A.F. was completed. The current aircraft production programme comprises the Jindivik radio-controlled target aircraft, which has been or is being supplied to Britain, Sweden, and the United States, as well as to the Weapons Research Establishment and the Royal Australian Navy. Apart from the Government Aircraft Factory, the Commonwealth Aircraft Corporation Pty Ltd is the only major aircraft manufacturer in Victoria. The Corporation is the prime contractor for the Australian production for the R.A.A.F. of the Italian Macchi jet trainer and for the production of the British Viper engine that powers this aircraft.

Other major activities carried out in the Government factories or by various private contractors are the manufacture of airframe and engine spare parts; the overhaul, repair, and modification of military aircraft and engines currently in service with the R.A.A.F., R.A.N., and Army; and the reconditioning and servicing of aircraft instruments and other ancillary equipment.

The production of the Ikara anti-submarine missile is continuing at the Government Aircraft Factory at Fishermen's Bend. Production of the complete Ikara system, covering broadly the missile, motor, propellants, guidance equipment, launcher, and magazine handling equipment, is a combined effort by departmental establishments and industry, directed and co-ordinated by the Department.

At St Mary's, New South Wales, a guided weapons repair facility has been established to repair and maintain the Tartar surface-to-air missile supplied by the United States for Australia's new missile destroyers. Later, the facility will be expanded to cater for other Service missiles.

#### **Electronics supply**

The Department is responsible for the technical aspects of production and procurement from Australian industry of telecommunications and electronic equipment for the Australian Services, for Commonwealth authorities such as Directorate of Civil Defence and for external aid programmes administered by the Department of External Affairs.

Some of the more important projects handled for the Services have included a ground to air high-frequency communications system for Air, high-frequency transmitters for Army, high-frequency transmitters and antennae for long-range Navy shore to ship communications, portable shelters for communications equipment for Air and medium-speed data transmission equipment for Army, Navy and Air.

A large contract has been arranged for the domestic development of micro-electronic devices. Other contracts have also been arranged to establish the reliability of Australian made electronic equipment and components.

#### **Contract Board**

The Contract Board, constituted under the *Supply and Development Act 1939-1966*, arranges for the performances of services and the purchase of supplies for the Naval, Military and Air Forces of the Commonwealth and for the Department of Supply. Upon request, the Board also arranges contracts on behalf of other Commonwealth departments and authorities. It also arranges disposal—by means of public tender, auction or otherwise—of all surplus or unserviceable Commonwealth-owned goods.

The Board comprises representatives of three Service Departments and of the Department of Supply. In each State there is a District Contract Board similarly constituted, which is authorised to exercise the functions of the Contract Board within specified financial limitations. The Contract Board has no attached contracting staff of its own, and while all contracts are arranged in the Board's name, its role is to decide the award of contracts in those cases where the value exceeds the delegated authority of District Contract Boards.

The Board's policies and procedures are administered by the Contracts Branch of the Department of Supply in Canberra.

**CONTRACT BOARD ORGANISATION: PURCHASES AND REALISATIONS  
FROM DISPOSALS, 1967-68 AND 1968-69**  
(*\$'000*)

<i>District Contract Board</i>	<i>Purchases</i>		<i>Realisations from disposals</i>	
	<i>1967-68</i>	<i>1968-69</i>	<i>1967-68</i>	<i>1968-69</i>

<b>Total . . . . .</b>	<b>216,277</b>	<b>207,571</b>	<b>8,197</b>	<b>8,510</b>

### Defence supply planning

The central planning authority of the Department is the Production Planning Branch, whose principal functions are:

- to study manufacturing capacity available for the Services' requirements in peace and war;
- to plan for and assist in the development of additional production capacity;
- to provide and administer reserve stock of materials and reserve pools of plant, equipment and other requirements needed for rapid expansion in the event of war;
- to prepare submissions on defence production preparedness to the higher defence machinery;
- to plan the organisation of industrial resources for defence production in war;
- to receive and allocate to appropriate departmental divisions all orders and procurement demands placed on the Department;
- to inform Service and other customers on all matters of price, delivery, and expenditure phasing of requirements allocated for satisfaction by the production divisions;
- to monitor achievement against departmental master delivery programmes;
- to provide advisory services in the field of materials supply and utilisation of Government factories and contractors engaged in the production of munitions requirements;
- to administer the national stockpile of strategic materials, equipment, tooling and components;
- to administer overseas aid programmes allocated to the Department;
- to develop commercial outlets for departmental products, and plans for the full use of production capacity, exploitation of inventions and protection of patents;
- to undertake commercial sales;
- to administer the Board of Management for Production; and
- to provide administrative services to the Industry Advisory Committees.

A series of Industry Advisory Committees has been established to advise the Minister and the Department of the ability of industry to meet the Services' *matériel* requirements for mobilisation in war. The Committees are: Aircraft and Guided Weapons; Chemical; Electrical; Electronics and Telecommunications; Fibres, Textiles, Clothing, and Cordage; Leather and Footwear; Machine Tools and Gauges; Materials; Mechanical Engineering; and Rubber. Members of the Committees include industrialists of wide experience and the highest ability in their chosen fields.

### Stores and Transport Branch

This Branch functions as the central storage and transport authority for most Commonwealth Departments. It is the authority for the arrangement of furniture removals at departmental expense in all States, but not in the Northern Territory. It has agents in Darwin. It also operates a shipping and customs section and the England-Australia bulk air freight scheme for Commonwealth Departments.

On 30 June 1969 the Branch had under its control land, buildings, and works, vehicles, plant, and equipment valued at \$27,441,367; 4,604 motor vehicles and 3,240,000 sq ft of storage space as well as storage facilities for large quantities of chemicals, bulk liquids, and explosives.

**Finance Branch**

The total expenditure on Department of Supply activities in 1968-69 was \$173,930,000, comprising \$92,362,000 from Parliamentary appropriations and \$81,568,000 from Trust Fund accounts. The latter included expenditure of \$17,536,000 for storage and transport and \$57,150,000 in Government Munitions and Aircraft Factories.

In addition, transactions under the United States-Australian logistics arrangement in 1968-69 amounted to \$654,000, comprising \$445,000 relating to Parliamentary appropriations and \$209,000 relating to Trust Fund accounts.

## CHAPTER 5

### REPATRIATION

The Repatriation Commission, established under the *Repatriation Act 1920–1969*, consists of three full-time members. It is responsible for the administration of the Repatriation Act and associated legislation, all matters of policy, and the general administration and overall supervision of the Repatriation Department. The central office is in Canberra and there is a branch office, under the control of a Deputy Commissioner, in each State.

The principal functions of the Department are: the payment of war and service pensions to eligible ex-servicemen and ex-servicewomen and their dependants; the provision of medical treatment for ex-servicemen and ex-servicewomen for injuries and illnesses caused or aggravated by their war service; the provision of medical treatment in certain circumstances for ex-servicemen and ex-servicewomen who are suffering from injuries and illnesses not caused or aggravated by war service; and the provision of medical treatment for widows and dependants of deceased ex-servicemen whose deaths are due to war service.

Benefits are provided in respect of service, not only in the 1914–18 and 1939–45 Wars, but also in the South African War 1899–1902, the Korea and Malaya operations and with the British Commonwealth Far East Strategic Reserve and the Special Overseas Forces serving in prescribed areas.

Other functions of the Repatriation Department are outlined in a later section of this chapter.

For information on war service land settlement *see* Chapter 18, Public Finance; for statistics relating to war service homes *see* Chapters 9, Housing and Building and 18, Public Finance.

For detailed information about repatriation pensions, benefits and services, reference should be made to the annual reports of the Repatriation Commission.

#### War pensions

The first provision for the payment of war pensions to ex-servicemen and their dependants was made by the Commonwealth Parliament in the *War Pensions Act 1914*. This Act was repealed in 1920 by the *Australian Soldiers' Repatriation Act 1920* (amended from 31 December 1950 to the Repatriation Act). Amendments to the Act in 1943 considerably widened the eligibility provisions, to the benefit mainly of members of the Citizen Military Forces who had not served outside Australia.

For a brief description of eligibility for war pensions; the conditions for payment of the various rates and allowances; and of operation of the Appeals Tribunals, *see* pages 91–93 of Year Book 55, Chapter 5, Repatriation.

#### Pensions and allowances

War pensions and associated allowances are not subject to a means test, except in the case of dependants other than wives, widows, widowed mothers and children. Pensions and allowances payable and the main weekly rates from 2 October 1969 are as follows.

*Pensions for war-caused incapacity—Special rate* (totally and permanently incapacitated or blinded), \$36.00; an equivalent rate is payable for temporary total incapacity or to an ex-serviceman pensioned for pulmonary tuberculosis who is, as a result, unfit for employment; *Intermediate Rate*. (Capable of part-time work only), \$26.50; ex-servicemen pensioned for pulmonary tuberculosis and able only to work part-time receive the same rate; *General Rate* (capable of full-time employment), 100 per cent basic rate, \$12. *Dependants*—Pensions are also payable to the dependants of incapacitated ex-servicemen: Wife, \$4.05; children under 16 years, \$1.38; (Maximum rates).

*Pensions in respect of death—War Widows* (where death was due to war service or, at the date of death, the ex-serviceman was receiving a war pension at the special rate, or its equivalent in respect of pulmonary tuberculosis, or as a double amputee) \$15.00; eligible war widows may also receive a domestic allowance, \$7.50; *children* (under 16 years of age), 1st child, \$5.40; 2nd and subsequent children, \$4.25 each; double orphans (both parents deceased), \$10.15.

*Allowances*—various allowances are provided to supplement war pensions and these vary according to the type and severity of disablement and the special needs of the pensioner. The main allowances and maximum weekly rates payable are: *Special compensation allowance* (payable to certain general rate pensioners assessed as being 75 per cent to 100 per cent incapacitated), from \$3.75 to \$5.00; *Attendants allowance* (for the severely disabled), maximum \$14; *Clothing allowances* (where clothing is subject to damage from surgical aids, etc.), from 43 cents to 85 cents; *Domestic allowance* (payable to eligible war widows), \$7.50. Other allowances payable include: *Sustenance allowance*; *Fares, subsistence and attendance allowance*; *Recreation transport allowance*; *Funeral benefits, etc.*

#### Summary of war pensions

The following tables provide a summary of war pensions (excluding miscellaneous war pensions) for the 1914–18 War, the 1939–45 War (including war pensions payable under the *Interim Forces Benefits Act 1947–1966* and the *Native Members of the Forces Act 1957–1968*), the Korea and Malaya operations, the Far East Strategic Reserve, and the Special Overseas Service. Statistics relating to miscellaneous war pensions are shown later in this section.

#### WAR PENSIONS: SUMMARY, AUSTRALIA, 1968-69

	1914-18 War	1939-45 War(a)	Korea and Malaya operations	Far East Strategic Reserve	Special Overseas Service	Total
New claims granted . . . No.	859	14,240	612	200	1,659	17,570
Restorations . . . No.	50	368	8	3	..	429
Claims rejected(b) . . . No.	668	3,610	164	57	451	4,950
Pensions cancelled (gross) . . . No.	213	21,759	219	31	63	22,285
Deaths of pensioners . . . No.	5,556	5,642	40	5	4	11,247
Number of pensions in force at 30 June 1969 . . .	88,525	494,662	11,603	1,668	3,855	600,313
Annual pension liability at 30 June 1969 . . . \$'000	53,661	116,105	1,400	163	490	171,818
Amount paid in pensions during the year 1968-69 \$'000	n.a.	n.a.	n.a.	n.a.	n.a.	(c)182,485

(a) Includes interim forces and native members of the forces. (b) Number of ex-servicemen who had their claims for all their disabilities rejected. (c) Includes five 12-weekly payments

#### WAR PENSIONS: SUMMARY, AUSTRALIA, 1964-65 TO 1968-69

	1964-65	1965-66	1966-67	1967-68	1968-69
New claims granted . . .	27,879	22,750	21,121	19,967	17,570
Restorations . . .	803	571	526	343	429
<i>Total additions</i> . . .	28,682	23,321	21,647	20,310	17,999
Pensions cancelled (gross) . . .	25,948	26,450	25,732	24,539	22,285
Deaths of pensioners . . .	10,342	10,308	10,898	10,950	11,247
<i>Total reductions</i> . . .	36,290	36,758	36,630	35,489	33,532

## Classes of war pensions

The following tables provide an analysis of the total number of new claims granted, pensions in force, and class of pension for 1968-69.

## WAR PENSIONS: NEW CLAIMS GRANTED, AUSTRALIA, 1968-69

<i>Class</i>	<i>1914-18 War</i>	<i>1939-45 War(a)</i>	<i>Korea and Malaya operations</i>	<i>Far East Strategic Reserve</i>	<i>Special Overseas Service</i>	<i>Total</i>
Ex-servicemen . . . . .	375	4,505	126	45	726	5,777
Wives and widows of ex-servicemen . . . . .	453	4,785	135	37	432	5,842
Children . . . . .	25	4,816	348	114	491	5,794
Other dependants . . . . .	6	134	3	4	10	157
<b>Total . . . . .</b>	<b>859</b>	<b>14,240</b>	<b>612</b>	<b>200</b>	<b>1,659</b>	<b>17,570</b>

(a) Includes interim forces and native members of the forces.

## WAR PENSIONS IN FORCE: AUSTRALIA, 30 JUNE 1969

<i>Class</i>	<i>1914-18 War</i>	<i>1939-45 War(a)</i>	<i>Korea and Malaya operations</i>	<i>Far East Strategic Reserve</i>	<i>Special Overseas Service</i>	<i>Total</i>
Ex-servicemen . . . . .	30,738	185,334	3,133	470	1,668	221,343
Wives . . . . .	32,932	159,825	2,477	365	876	196,475
Children . . . . .	345	114,824	5,583	764	1,080	122,596
War widows . . . . .	23,898	23,532	136	20	70	47,656
Children of deceased ex-servicemen . . . . .	52	4,974	161	41	125	5,353
Orphans . . . . .	22	171	2	..	1	196
Parents . . . . .	324	5,515	106	7	30	5,982
Others . . . . .	214	487	5	1	5	712
<b>Total . . . . .</b>	<b>88,525</b>	<b>494,662</b>	<b>11,603</b>	<b>1,668</b>	<b>3,855</b>	<b>600,313</b>

(a) Includes interim forces and native members of the forces.

## WAR PENSIONS IN FORCE BY CLASS OF PENSION, AUSTRALIA 30 JUNE 1969

<i>Class</i>	<i>1914-18 War</i>	<i>1939-45 War(a)</i>	<i>Korea and Malaya operations</i>	<i>Far East Strategic Reserve</i>	<i>Special Overseas Service</i>	<i>Total</i>
Special rate (T.P.I.) or equivalent . . . . .	9,425	14,010	91	5	9	23,540
Intermediate rate . . . . .	192	1,191	15	2	1	1,401
General rate—from 10 per cent to 100 per cent assessed disability . . . . .	21,121	170,133	3,027	463	1,658	196,402
<b>Total . . . . .</b>	<b>30,738</b>	<b>185,334</b>	<b>3,133</b>	<b>470</b>	<b>1,668</b>	<b>221,343</b>

(a) Includes interim forces and native members of the forces.

## Number of war pensions and annual liability, States, etc.

The following table shows the number of pensions in force and annual liability at 30 June 1969, according to place of payment.

**WAR PENSIONS: NUMBER OF PENSIONS AND ANNUAL LIABILITY  
STATES, ETC., 30 JUNE 1969**

Place of payment	Number of war pensions in force at 30 June 1969(a)			Total	Annual pension liability(b) (\$'000)
	Incapacitated ex-servicemen	Dependants of incapacitated ex-servicemen	Dependants of deceased ex-servicemen		
New South Wales(c)	78,707	110,186	21,759	210,652	61,388
Victoria	60,247	87,422	17,024	164,693	48,216
Queensland	33,355	50,285	7,901	91,541	26,835
South Australia(d)	20,573	30,193	5,101	55,867	14,400
Western Australia	18,668	26,529	4,295	49,492	12,333

(a) Includes five 12-weekly payments. (b) Includes Australian Capital Territory. (c) Includes Northern Territory.

**Service pensions**

The *Repatriation Act 1920-1969* provides for a service pension to be paid, subject to a means test of income and property, to the following persons:

ex-servicemen who served in a theatre of war (or in a designated *Operational* or *Special Overseas Service* area) and have attained the age of sixty years or are permanently unemployable;  
ex-servicemen who suffer from pulmonary tuberculosis, irrespective of the area of their service;  
and

ex-servicewomen who suffer from tuberculosis, or who served in a theatre of war, or served abroad or embarked for service abroad and have attained the age of fifty-five years, or are permanently unemployable.

veterans of the South African War 1899-1902 who were members of a naval or military force or contingent raised in Australia for active service in that war.

**Rates of pension**

Maximum service pension rates and allowances are the same as those paid to Age and Invalid pensioners under the *Social Services Act*. The means test provisions relating to payments are similar.

For information on conditions relating to the various rates and allowances and the operation of the means test, see Chapter 13, Welfare Services.

From 2 October 1969, the maximum weekly rates are as follows.

Standard (Single) Rate, \$15; Standard (married) Rate (wife not eligible for Age or Invalid pension) Husband \$15; wife if otherwise eligible, \$7; Married rate (wife receiving Age or Invalid pension from Department of Social Services), \$13.25; *Guardians Allowance*, \$4 (\$6 if caring for a child under 6 years or an invalid child requiring full time care); *Supplementary assistance*, \$2; *Additional pension for eligible children*, \$2.50 for first and \$3.50 for each subsequent child; In addition \$0.25 is payable in respect of the 2nd, 3rd and 4th children.

An ex-serviceman or ex-servicewoman in receipt of a service pension is entitled, with certain exceptions, to free medical benefits for disabilities not caused by war service. These benefits include general practitioner service, specialist service where necessary, full pharmaceutical benefits, surgical aids and appliances (including spectacles), dental treatment, and treatment in Repatriation General Hospitals.

(a) Includes Australian Capital Territory. (b) Includes Northern Territory.

**Medical treatment for ex-servicemen and dependants of ex-servicemen**

Medical treatment is provided for all disabilities which have been accepted as due to war service. In addition, and subject to certain conditions, treatment is provided for disabilities not due to war service for: ex-servicemen and ex-servicewomen receiving war pensions at or exceeding the maximum general (100 per cent) rate; ex-servicemen who have contracted pulmonary tuberculosis; nurses who served in the 1914-18 war; widows and certain dependants of ex-servicemen whose deaths have been accepted as due to war service and of deceased T.P.I. pensioners; and certain service pensioners, including service pensioners of the South African War 1899-1902.

In-patient treatment for eligible patients is provided at the six Repatriation General Hospitals (one in each State) and seven auxiliary hospitals and sanatoriums as follows: *New South Wales*—Lady Davidson Hospital; *Victoria*—Macleod Hospital and Anzac Hostel; *Queensland*—Kenmore Hospital and Rosemount Hospital; *South Australia*—Birrlee Hospital; and *Western Australia*—The Edward Millen Hospital. The Anzac Hostel specialises in the care and treatment of long-term patients.

The total number of available beds for patients in wards or parts of wards, open for use, in all these institutions at 30 June 1969 was 3,978, and expenditure during 1968–69 amounted to \$28,181,029. In addition, expenditure of \$34,561,984 was incurred during 1968–69 on medical services outside these institutions.

#### Repatriation hospitals and institutions

Details of full-time staff in Repatriation general hospitals and other Repatriation institutions are given in the following table.

#### REPATRIATION HOSPITALS AND INSTITUTIONS: FULL-TIME STAFF STATES, 30 JUNE 1969

In addition to the Repatriation institutions, eligible patients are treated in other country and metropolitan hospitals and nursing homes at Repatriation expense. During 1968-69, 15,577 Repatriation in-patients were accommodated and treated in hospitals and 891 in nursing homes.

Repatriation psychiatric patients requiring custodial care are, by agreement with the State Governments, accommodated at the expense of the Repatriation Department in separate wings of psychiatric hospitals administered by the State authorities. Excluding 124 on trial leave, there were 817 Repatriation patients in these hospitals at 30 June 1969.

Out-patient treatment is provided throughout the Commonwealth at Repatriation hospitals and clinics and through the Repatriation Local Medical Officer Scheme. During 1968-69, 605,506 out-patients were treated at Repatriation institutions, and visits to or by local medical officers totalled 2,777,222. The number of Repatriation local medical officers in the Commonwealth at 30 June 1969 was 5,887.

## General Repatriation benefits and miscellaneous

### Other Repatriation Department activities

In addition to the payment of pensions and the provision of medical treatment, the Department also provides various benefits and allowances designed to meet the needs of special classes of ex-servicemen and their dependants.

These include educational and vocational training schemes, namely the *Soldiers' Children Education Scheme* (full details of which appear later in this section), the *Korea and Malaya Training Scheme*, the *Disabled Members' and Widows' Training Scheme* and the *National Service Vocational Training Scheme*.

In addition, gift cars and an annual allowance for their upkeep are provided for ex-servicemen who, as a result of war service, have suffered the amputation of both legs above the knees or amputation of one leg above the knee plus any two other amputations (above the ankle or at or above the wrist) or complete paraplegia resulting in the total loss of the use of both legs. A grant of up to \$50 may be made towards the funeral expenses of eligible ex-servicemen and certain of their dependants. Payment of up to \$10 may be made to provide such necessities as meals, sleeping accommodation etc., for ex-servicemen in need of immediate relief. Also certain concessions in telephone charges are provided for some classes of ex-servicemen and their dependants, including war blinded ex-servicemen, war widows and certain service and special rate war pensioners. Ex-servicemen who have been blinded as a result of war service may be issued with talking book machines. The Australian Red Cross Society supplies 'book' records for these machines, free of charge, thus enabling the blinded to enjoy a wide range of literature.

Expenditure in 1968-69 on general Repatriation benefits for all wars was \$4,719,000, comprising; *Soldiers' Children Education Scheme*, \$3,154,000; recreation transport allowance, \$607,000; and other benefits \$958,000. In addition, \$18,000 was expended by other Commonwealth authorities on Repatriation employment and vocational training.

### Soldiers' Children Education Scheme

The *Soldiers' Children Education Scheme* was established in 1921 and operates with the assistance of the voluntary Education Boards in each State. These Boards consist of representatives of government and non-government education authorities and of ex-service and other organisations which have a general interest in the welfare of the children of ex-servicemen. The objects of the Scheme are to assist and encourage eligible children in acquiring a standard of education compatible with their aptitude and ability, and to prepare them to enter an agricultural, commercial, professional, or industrial calling of their own choice. Eligible children are children of ex-servicemen whose deaths have been accepted as due to war service; or of ex-servicemen who died from causes not due to war service but who were receiving at the date of death a war pension at a special rate for blindness, total and permanent incapacity, pulmonary tuberculosis, or amputation of two or more limbs; or of ex-servicemen who, as a result of war service, are blinded, totally and permanently incapacitated, or receiving the special rate pension for pulmonary tuberculosis and are likely to receive such pension for a period of at least three years. From the commencement of primary education up to twelve years, school requisites and fares are provided. An education allowance is also payable for a child from commencement of secondary education or from the age of twelve years, whichever is the earlier, while the child is undertaking primary or secondary education. Further assistance beyond, or parallel with, the later years of secondary education is provided where an approved beneficiary continues with a course of specialised education or training necessary for a career. At this stage of training, in addition to the education allowance, fees are paid and text books, essential equipment and other minor benefits are provided.

All education allowances are subject to an allowed income limit test, i.e. the amount of education allowance payable depends on the amount of income a child receives over the allowed limit. The scale of maximum allowances payable to eligible children at various stages of education is as follows.

**SOLDIERS' CHILDREN EDUCATION SCHEME  
WEEKLY RATES OF ALLOWANCES, 1 JANUARY 1970**

**Settlement of returned service personnel on the land**

Reference to the settlement of returned service personnel on the land will be found in the chapters Public Finance and Rural Industry.

**Re-establishment benefits for national servicemen**

Subject to prescribed conditions, special re-establishment benefits are provided for national servicemen under the *Defence (Re-establishment) Act 1965-1968*. They apply to all national servicemen whether or not they have served on 'special service' and ensure that servicemen will not be at a disadvantage on their return to civil life. The scheme includes appropriate full or part-time training where it is necessary or desirable for effective re-settlement. The assistance includes payment of tuition fees, other associated fees and fares, and provision of books and equipment as appropriate. A training allowance is also provided for trainees undertaking full-time studies.

Re-establishment loans may be granted, subject to certain conditions, to those national servicemen in need of financial assistance for their re-establishment in civil life and who, prior to call-up, were engaged on their own account in professional practice, business, or agricultural occupations, or who, because of their call-up, were prevented from engaging in these occupations or, in any other case where it is considered desirable in the circumstances to grant a loan.

The maximum amounts of the loans are business and professional \$3,000, agricultural \$6,000.

**Repatriation—Total expenditure 1968-69**

Total expenditure on Repatriation during the year ended 30 June 1969, including \$4,841,789 by other Departments, was \$302,546,435 distributed as follows:

	\$'000
Pensions, allowances and other benefits . . . . .	221,678
Medical treatment . . . . .	62,743
Administration . . . . .	13,196
Works, rent and maintenance . . . . .	4,929
	<hr/>
<b>Total . . . . .</b>	<b>302,546</b>

**The Services Canteens Trust Fund**

The Services Canteens Trust Fund was established under the *Services Trust Funds Act 1947*. Its funds are derived from the assets and profits of wartime services canteens, mess and regimental funds of disbanded units, and several other sources.

The total amount transferred to the Fund to 31 December 1969 was \$11,055,541. The Act prescribed that, of this, \$5 million and such further amounts as the trustees of the Fund might from time to time decide, should be devoted to the provision of education facilities for the children of eligible ex-servicemen and ex-servicewomen, and that the balance of the Fund should be used to provide relief for ex-servicemen and ex-servicewomen and their dependants in necessitous circumstances.

The Fund is administered by eleven honorary trustees appointed by the Governor-General and regional committees appointed by the trustees to assist with administration. The trustees have power to determine the persons or groups of persons to benefit from the Fund and the extent of the benefits to be granted within the provisions of the Act, and to appoint regional committees to assist with the administration. Members of regional committees are all persons who served in the 1939-45 War or are widows of men who served during the war. They serve in an honorary capacity.

**Assistance from the Fund**

Persons eligible for assistance from the Fund are those who, between 3 September 1939 and 30 June 1947, served in the Australian Naval, Military or Air Forces, including members of the canteens staff of any ship of the Royal Australian Navy, persons duly accredited to any part of the Defence Forces who served in an official capacity on full-time paid duty, and their dependants. The trustees have introduced schemes for providing welfare relief for ex-servicemen and ex-servicewomen who are eligible for benefits, and for their dependants; benefits for children of eligible ex-servicemen and ex-servicewomen who are suffering from serious and incapacitating afflictions; and education benefits for the children of eligible ex-servicemen and ex-servicewomen. From its inauguration in 1947 the Fund is to be available for forty years for both welfare relief and educational benefits.

The total assistance granted under these three schemes from the inception of the Fund to 31 December 1969 was \$11,419,522 (\$425,865 during 1969) distributed as follows: *Welfare relief*, \$3,485,245 (\$123,143); *Assistance for Afflicted Children*, \$316,645 (\$6,439); and *Educational assistance*, \$7,617,632 (\$296,283).

For detailed information on the operation of the Fund reference should be made to the annual reports of the Services Canteen Trust Fund.

## CHAPTER 6

# INTERNATIONAL RELATIONS

### Relations with Commonwealth and other countries

Australia's international relations have developed steadily since its attainment of nationhood at the beginning of this century. Initially, association with Britain and co-operation with the Commonwealth countries were a major preoccupation. These links remain important principles of foreign policy. Australia also maintains particularly close relations with the United States of America and is continuing to foster regional association with the countries of Asia.

#### Commonwealth relations

In addition to being represented at the meetings of Commonwealth Prime Ministers, Finance Ministers, and Ministers for Trade, Australia belongs to the sterling area, retains the system of judicial appeal from the States' courts to the Privy Council, maintains High Commissions in 14 other Commonwealth countries, and is a member of the main Commonwealth organisations providing for co-operation in economic, scientific, educational, and other fields.

#### Relations with the United States of America

An important feature of Australia's international relations is its relationship with the United States of America. This relationship is formally expressed in the ANZUS Treaty which was signed pursuant to Articles 51 and 52 of the United Nations Charter. It provides that, in the event of armed attack on any one of them in the Pacific, the United States, Australia, and New Zealand would each act to meet the common danger in accordance with its constitutional processes.

#### Australia and Asia

Geographical location to the south of Asia has become an increasingly important factor in Australia's foreign policy. Australia is active as a member of the South-East Asia Treaty Organisation (SEATO), as a regional member of the United Nations Economic Commission for Asia and the Far East (ECAFE), as a member of the Colombo Plan Consultative Committee, of the Asian Development Bank, and of the Asian and Pacific Council (ASPAC); and also in commercial and professional associations.

#### United Nations

From the time of the drafting of the United Nations Charter, Australia has taken an active role in the United Nations, primarily through participation in the General Assembly but also through membership of the Security Council (1946-47 and 1956-57), the Economic and Social Council (1948-50, 1953-55 and 1962-64), and the Trusteeship Council.

Contributions are made to various forms of international aid through the United Nations and its specialised agencies.

#### SEATO

Following the cessation of fighting in Indo-China in 1954, Australia, with a number of other countries situated in the south-east Asian region, or having responsibilities there, supported a proposal to form a collective defence alliance to guarantee the peace and security of the region from external aggression. On 8 September 1954 Australia, France, New Zealand, Pakistan, the Philippines, Thailand, the United Kingdom and the United States signed the South-East Asian Collective Defence Treaty at Manila. They also signed a Pacific Charter stating the principles on which they had acted. A Protocol to the Treaty extended its operation to Cambodia, Laos and the free territory under the jurisdiction of the State of Vietnam, although no action on these territories would be taken except at the invitation or with the consent of the government concerned.

While primary emphasis has been placed on the defence significance of the Treaty, a civil secretariat was established to co-ordinate wide-ranging activities designed to improve the security, economic and social welfare of the peoples of the Treaty Area. These activities include studies on counter-subversion, cultural improvement, welfare projects and educational training centres. To facilitate this task the Australian Government in 1956 instituted a SEATO Aid Programme, under which by 30 June 1969 aid to the value of \$21.41 million had been given to member countries in Asia to help develop their capacity to resist aggression and subversion and to stimulate economic development. This programme is complementary to Australia's Colombo Plan contribution. Australian SEATO aid projects, completed or in progress, include the provision of geodetic survey vessels for the Philippines; military technical training schools, a vehicle base repair shop, and two 50 kW radio transmitters to Thailand; telecommunications, technical training and workshop equipment to Pakistan; corrugated iron, town water supply systems for Bien Hoa and Can Tho, four surgical teams, and school textbooks for Vietnam. Australia has also provided military training, and technical training in the fields of engineering, telecommunications, naval architecture and dockyard maintenance, security procedures, and surveying for more than 245 trainees from Asian member countries. In addition a number of senior service officers of other member countries have visited Australia to foster understanding and to develop co-operation between the armed forces.

### Participation in the United Nations

#### Australia's contributions to the United Nations

Australia played an active part in drafting the Charter of the United Nations at the Conference on International Organization in San Francisco in 1945 and has been a consistent supporter of the principles and objectives of the United Nations since its foundation. Australia's influence in the affairs of the United Nations has been exerted primarily through the annual debates in the General Assembly, through membership of the Security Council (1946-47 and 1956-57) and the Economic and Social Council (1948-50, 1953-55 and 1962-64), and through the Trusteeship Council. By virtue of responsibility for the administration of the Trust Territory of Nauru prior to Nauru's independence in January 1968 and the continuing administration of the Trust Territory of New Guinea, Australia has been a member of the Trusteeship Council, as an administering power, since the Council's establishment.

In 1950 Australia joined fifteen other member States in answering the Security Council's call to help the Republic of Korea to repel Communist aggression from the north, and members of all three armed services took part in the three years of fighting which followed. Australia has also been directly involved in United Nations activities in many other parts of the world. Australia has contributed its share of the costs, both assessed and voluntary, of all United Nations peace-keeping operations, the largest of which have been the United Nations Emergency Force (UNEF) in the Middle East in 1956-57, the United Nations Operation in the Congo (ONUC) in 1960-64, and the United Nations Force in Cyprus (UNFICYP) since 1964. In addition to financial contributions, an element of fifty Australian policemen has been made available for service with UNFICYP.

Australia was a member, in 1968, of the Ad Hoc Committee on the Sea-bed and was appointed to membership of the Permanent Committee established by the Twenty-third General Assembly. In 1968-69 also, Australia was a member of the Committee on Defining Aggression.

In the economic, social and cultural sphere Australia has contributed to the work of the United Nations through membership of its specialised agencies, of the Economic and Social Council and of the United Nations Conference on Trade and Development (UNCTAD). Australia has been a member of the Trade and Development Board since its inception in 1963. It is a foundation member of one of the four Regional Economic Commissions—the Economic Commission for Asia and the Far East, the 4th, 15th and 23rd Sessions of which were held in Australia. In 1963 Australia became a regional member of ECAFE and in 1970 became a member of the Preparatory Committee for the Second United Nations Development Decade.

Australia has had varying periods of service as a member of the executive bodies of the principal specialised agencies. As a leading agricultural country, Australia played a large part in the establishment of the Food and Agriculture Organization (F.A.O.). Australia is a member of the Board of Governors of the International Atomic Energy Agency. Australia served as a member of the governing body of the International Labour Organisation either as a titular government member or as a deputy member from 1945 to 1960 and from 1963 to 1969. It is also a member of the Executive Board of the World Health Organization, the Administrative Council of the International Telecommunications Union, the Executive Committee of the World Meteorological Organization, and the Council of the Inter-Governmental Maritime Consultative Organisation. It was elected to the Executive Council and the Consultative Committee for Postal Studies and Management Council of the Universal Postal Union.

Australia has also been a prominent member of the International Civil Aviation Organization since its inception, and in 1962 was re-elected to the Council as one of the nine States of principal civil aviation importance. It was a member of the executive board of the United Nations Children's Fund (UNICEF) from 1947 to 1961 and from 1966 to 1969.

### Australia's contributions in international aid

#### Aid

The following table sets out Australia's contribution in international aid from 1964-65 to 1968-69.

AUSTRALIA'S CONTRIBUTION IN INTERNATIONAL AID, 1964-65 TO 1968-69

(a) Administered principally by the Department of Education and Science. (b) The Department of the Treasury has the principal responsibility for the management of Australia's participation in these organisations. (c) The grant to assist the economic development of the Territory of Papua and New Guinea is administered principally by the Department of External Territories.

The current level of Australia's aid represents about \$13 per head of its population and is 0.55 per cent of its Gross National Product. On a world comparison of official assistance flows, Australia is ranked among the first three aid donors.

Some two-thirds of Australia's aid is channelled to Papua and New Guinea (See Chapter 29, The Territories of Australia). The remainder is channelled through multilateral programmes (e.g. through the World Bank, U.N. Agencies and the Asian Development Bank) and through bilateral programmes. The following table sets out the geographic distribution of Australia's bilateral aid.

**AUSTRALIA'S BILATERAL AID BY GEOGRAPHICAL REGION AND COUNTRY**  
(*\$'000*)

<i>Country</i>	<i>Cumulative total expenditure to 30 June 1968</i>	<i>Expenditure 1968-69</i>	<i>Country</i>	<i>Cumulative total expenditure to 30 June 1968</i>	<i>Expenditure 1968-69</i>

This bilateral aid is channelled through a number of programmes, the most important of which is the Colombo Plan—a loose co-ordinating framework of donors and recipients established in 1950. Through these programmes, Australia undertakes a variety of development projects, balance of payments support programmes, provision of equipment, provision of technical assistance experts, and training of students in Australia.

The following table sets out the numbers of students who have been trained in Australia under the aid programmes.

**STUDENTS TRAINED IN AUSTRALIA UNDER AID PROGRAMMES**  
(Number)

SEATO . . . . .	55	10	13
AIAS* . . . . .	108	6	7
<i>Total . . . . .</i>	<i>9,566</i>	<i>1,585</i>	<i>859</i>

\* The Special Commonwealth African Assistance Plan (SCAAP) was established to provide training awards to Commonwealth countries in Africa. The South Pacific Aid Programme (SPAP) provides the same sort of assistance to the islands and territories of the Pacific. A small training programme known as the Australian International Awards Scheme (AIAS) is intended to meet occasional requests from countries outside these regions, particularly those from the Commonwealth countries of the Caribbean and Mediterranean regions.

## Diplomatic representation

The Department of External Affairs is responsible for advising the Minister for External Affairs and the Australian Government on the conduct of foreign affairs and relations with foreign Governments. Its officers staff the Australian diplomatic service and the consular and administrative service.

In December 1969 Australia maintained the following diplomatic and consular missions abroad.

### AUSTRALIAN MISSIONS OVERSEAS

*Portuguese Timor*—Dili.  
*South Africa*—Standard Bank Building, Church Square, Pretoria.  
 Commission in—  
*Fiji*—C.M.L.A. Building, 3 Central Street, Suva.  
 Representative in—  
*Nauru*

The Department of External Affairs is responsible for the control and administration of all the diplomatic and consular missions listed above with the exception of the High Commission, London, which is the responsibility of the Prime Minister's Department.

Specialist officers of the Department of Trade, other Commonwealth Government Departments and the Defence Services stationed abroad are attached to Australian diplomatic or consular missions. Senior attached officers are in some cases accredited to the missions with diplomatic or consular ranks approved by the Minister for External Affairs. In addition, the Department of Trade and Industry maintains Trade Commissioner posts which engage in trade promotion in a number of cities where Australia does not have diplomatic or consular representation (for complete list of Trade Commissioner posts see pages 118–19).

The Department of Immigration similarly maintains offices overseas which engage in recruitment of migrants. A complete list of these offices is given on pages 119–20.

**Agents-General for States**

From early times the Australian colonies maintained agents in London to encourage immigration and to carry out commercial and financial negotiations. Since federation the States have continued to maintain Agents-General in London, all of whom work in close co-operation with the High

\* Administered by Prime Minister's Department. † The Australian High Commissioner in India is concurrently Ambassador to Nepal. ‡ The Australian High Commissioner in Kenya is concurrently High Commissioner to Uganda. § The Australian Ambassador to Germany is also head of the Australian Military Mission in Berlin.

Commissioner for Australia at Australia House, The Strand, London. The addresses of the Agents-General are as follows: New South Wales—56 The Strand, London, W.C.2; Victoria—Victoria House, Melbourne Place, The Strand, London, W.C.2; Queensland—392 The Strand, London, W.C.2; South Australia—South Australia House, 50 The Strand, London, W.C.2; Western Australia—Western Australia House, 115 The Strand, London, W.C.2; Tasmania—458 The Strand, Charing Cross, London, W.C.2.

#### Diplomatic representatives in Australia

There are forty-one non-Commonwealth and ten Commonwealth countries represented by diplomatic missions in Australia.

The following list shows the addresses of the overseas representatives in Australia. Full details of Commonwealth and foreign representation in Australia may be obtained from publications issued by the Department of External Affairs, Canberra. Consular representatives are not included. Particulars of these are contained in a publication *Consular and Trade Representatives in Australia*, issued by the Department of External Affairs, Canberra. There are about 300 such representatives in Australia, and sixty countries are represented.

### DIPLOMATIC REPRESENTATIVES IN AUSTRALIA

#### Embassies (41)

- Argentina*—58 Mugga Way, Red Hill, Canberra, A.C.T. 2603.  
*Austria*—Ainslie Building, 39 Ainslie Avenue, Civic Centre, Canberra, A.C.T. 2601.  
*Belgium*—19 Arkana Street, Yarralumla, Canberra, A.C.T. 2600.  
*Brazil*—6 Monaro Crescent, Forrest, Canberra, A.C.T. 2603.  
*Burma*—85 Mugga Way, Red Hill, Canberra, A.C.T. 2603.  
*Cambodia*—5 Canterbury Crescent, Deakin Canberra, A.C.T. 2600.  
*Chile*—26 Melbourne Avenue, Deakin, Canberra, A.C.T. 2600.  
*China*—70 Empire Circuit, Forrest, Canberra, A.C.T. 2603.  
*Denmark*—Suite 501, C.M.L. Building, University Avenue, Canberra, A.C.T. 2601.  
*Finland*—83 Endeavour Street, Red Hill, Canberra, A.C.T. 2603.  
*France*—6 Darwin Avenue, Yarralumla, Canberra, A.C.T. 2600.  
*Germany, Federal Republic of*—Empire Circuit, Yarralumla, Canberra, A.C.T. 2600.  
*Greece*—22 Arthur Circle, Forrest, Canberra, A.C.T. 2603.  
*Indonesia*—4 Hotham Crescent, Deakin, Canberra, A.C.T. 2600.  
*Ireland*—Bank House, Civic Square, Canberra, A.C.T. 2601.

*United Arab Republic*—125 Monaro Crescent, Red Hill, Canberra, A.C.T. 2603.  
*United States of America*—State Circle, Yarralumla, Canberra, A.C.T. 2600.  
*Uruguay*—82 Dominion Circuit, Deakin, Canberra, A.C.T. 2600.  
*Vietnam*—39 National Circuit, Forrest, Canberra, A.C.T. 2603.  
*Yugoslavia, Socialist Federal Republic of*—27 Endeavour Street, Red Hill, Canberra, A.C.T. 2603.

\* The Nepalese Ambassador to Japan is concurrently Ambassador to Australia and to New Zealand. † The Romanian Ambassador to Japan is concurrently Ambassador to Australia.

**High Commissioners (10)**

- Britain*—Commonwealth Avenue, Canberra, A.C.T. 2600.  
*Canada*—Commonwealth Avenue, Canberra, A.C.T. 2600.  
*Ceylon*—35 Empire Circuit, Forrest, Canberra, A.C.T. 2603.  
*Ghana*—35 Endeavour Street, Red Hill, Canberra, A.C.T. 2603.  
*India*—92 Mugga Way, Red Hill, Canberra, A.C.T. 2603.  
*Malaysia*—71 State Circle, Yarralumla, Canberra, A.C.T. 2600.  
*Malta*—261 La Perouse Street, Red Hill, Canberra, A.C.T. 2603.  
*New Zealand*—M.L.C. Building, London Circuit, Civic Centre, Canberra, A.C.T. 2601.  
*Pakistan*—59 Franklin Street, Forrest, Canberra, A.C.T. 2603.  
*Singapore*—81 Mugga Way, Red Hill, Canberra, A.C.T. 2603.

**Overseas trade representation****The Australian Trade Commissioners Service**

The Department of Trade maintains Trade Commissioners at forty-seven posts in thirty-seven countries. Twenty-eight editions of the Department of Trade's promotion periodical *Austral News* now circulate in more than 100 countries in four languages. (See also Australian Trade Missions in the chapter Overseas Transactions.)

The addresses of Australian Trade Commissioner Posts overseas are shown in the following list.

**Trade Commissioner Service of the Commonwealth of Australia**

- Argentina*—Australian Embassy, Seccion Commercial, Lavalle 1625 Piso 11, Buenos Aires.  
*Austria*—Australian Embassy, Concordia-platz 2/3, Vienna 1.  
*Bahrain*—Almoayyed Building, Government Road, Bahrain.  
*Belgium*—Australian Embassy, 51/52 Avenue des Arts, Brussels-4.  
*Britain*—Australia House, The Strand, London, W.C.2.  
*Canada*—1155 Dorchester Boulevard West, Montreal 2, P.Q.; 1030 W. Georgia Street, Vancouver 5, B.C.; Australian High Commission, 90 Sparks Street, Ottawa 4. Ontario.  
*Ceylon*—Australian High Commission, 3 Cambridge Place, Colombo 7.  
*Chile*—Australian Embassy, Hotel Carera Hilton, Santiago.  
*China (Taiwan)*—Australian Embassy, 400 Tun Hua South Road, Taipei.  
*France*—50 Avenue Des Champs Elysees, Paris, 8e.  
*Germany, Federal Republic of*—Australian Embassy, Kölnerstrasse 157, Bad Godesberg, Bonn; Australian Consulate, Neuer Wall 39, Hamburg 36.  
*Greece*—Australian Embassy, 8 Makedonon Street, Athens.  
*Hong Kong*—Union House, Chater Road, Hong Kong.  
*India*—1/509 Shantipath, Chanakyapuri, New Delhi.  
*Indonesia*—C/o Australian Embassy, Djalan Thamrin 15, Djakarta.  
*Iran*—23 Avenue Arak, Tehran.  
*Italy*—Australian Embassy, Via Sallustiana 26, Rome; Via Turati 40, Milan.  
*Japan*—Sankaido Building, 9-13 Akasaka 1-Chome, Minato-ku, Tokyo; Asahi Seimei Building, 50, 5-Chome, Koraibashi-suji, Higashi-ku, Osaka.  
*Kenya*—Development House, Government Road, Nairobi.  
*Lebanon*—Australian Embassy, S.F.A.H. Building, Kantari Street, Beirut.  
*Malaysia*—117 Jalan Ampang, Kuala Lumpur.  
*Malta*—Australian High Commission, Dolphin Court, Embassy Way, Ta'xbiex.  
*Mexico*—Pases de la Reforma, 195, 50 Piso, Mexico 5.  
*The Netherlands*—143 Koninginnegracht, The Hague.  
*New Zealand*—Australian High Commission, I.C.I. House, Molesworth Street Wellington. A.N.Z. House, 203 Queen Street, Auckland C.1; Bank of New Zealand House, Cathedral Square, Christchurch.  
*Pacific Islands*—C/o Department of Trade and Industry, A.N.Z. Bank Building, cnr Pitt and Hunter Streets, Sydney, N.S.W.  
*Pakistan*—Hotel Metropole, Victoria Road, Karachi 4.  
*Peru*—Australian Embassy, Plaza Building, cnr Avenida Arenales and Natalio Sanchez, Lima.  
*The Philippines*—Australian Embassy, 1414 Roxas Boulevard, Manila.  
*Singapore*—Australian High Commission, 201 Clemenceau Avenue, Singapore 9.  
*South Africa*—St. Mary's Building, 85 Eloff Street, Johannesburg; Mobil House, Hans Strijdom Avenue, Capetown.  
*Sweden*—Australian Embassy, Sergelstorg 12, Stockholm 40.

*Switzerland*—Australian Consulate-General, 56-58 Rue de Moillebeau, Petit Saconnex 1211, Geneva 19.

*Thailand*—Australian Embassy, Anglo-Thai Building, 64 Silom Road, Bangkok.

*Trinidad*—72 South Quay, Port-of-Spain, Trinidad, W.I.

*United Arab Republic*—Australian Embassy, 1097 Corniche el Nil, Garden City, Cairo.

*United States of America*—Paramount Building, 1735 Eye Street, N.W. Washington, D.C.; Australian Consulate-General, 636 Fifth Avenue, New York 10020, New York; Australian Consulate-General, Crocker Plaza, 1 Post Street, San Francisco, California; 3600 Wiltshire Boulevard, Los Angeles 5, California.

#### **Australian Trade Correspondents and Marketing Officers**

Australian Trade Correspondents and Marketing Officers have no official status but supplement the work of the Trade Commissioner Service. Correspondents are located in Addis Abbaba, Ethiopia; and Istanbul, Turkey; Mozambique; Port Louis, Mauritius; Suva, Fiji; Tel Aviv, Israel. Marketing Officers are located in Bombay and Calcutta, India; Brussels, Belgium; Cairo, Egypt; Colombo, Ceylon; Dublin, Ireland; Madrid, Spain; Rangoon, Burma; Rio de Janeiro, Brazil; and Seoul, Korea.

#### **Trade Commissioners of overseas governments in Australia**

*Britain*—Senior British Trade Commissioner—Commonwealth Avenue, Canberra, A.C.T.

British Trade Commissioners—Gold Fields House, Sydney Cove, Sydney, N.S.W.; C.M.L. Building, 330 Collins Street, Melbourne, Vic.; M.L.C. Building, 243 Edward Street, Brisbane, Qld; F.C.A. Building, Franklin Street, Adelaide, S.A.; A.N.Z. House, 84 St George's Terrace, Perth, W.A.

Office of the Fiji Government Representative—38-40 Martin Place, Sydney, N.S.W.

*Canada*—Canadian Trade Commissioners—A.M.P. Building, Circular Quay, Sydney, N.S.W.; 17th Floor, Prince's Gate East Tower, Melbourne, Vic.

*Ceylon*—Ceylon Trade Commissioner—66 Pitt Street, Sydney, N.S.W.

*China*—300 George Street, Sydney, N.S.W.

*India*—Indian Trade Commissioner—167-187 Kent Street, Sydney, N.S.W.

*Malaysia*—Malaysian Trade Commissioner—50 Young Street, Sydney, N.S.W.

*New Zealand*—Senior New Zealand Trade Commissioner—280-288 George Street, Sydney, N.S.W.

New Zealand Government Trade Commissioners—330 Collins Street, Melbourne, Vic.; M.M.I. Building, 344 Queen Street Brisbane, Qld.

*Pakistan*—39-41 York Street, Sydney, N.S.W.

*South Africa*—South African Trade Commissioner—622 St Kilda Road, Melbourne, Vic.

*Sweden*—14th Floor, Prince's Gate West Tower, Melbourne, Vic.

### **Commonwealth Migration Offices overseas**

The Department of Immigration has established offices overseas to handle migration matters, and in some countries regional officers are provided. Inquiries and applications may also be made at any Australian diplomatic, consular or trade post overseas. Special facilities for migration business are available as follows.

*Argentina*—Australian Embassy, Calle Rivadavia 1829, Piso 5, Buenos Aires.

*Austria*—Australian Embassy, Migration Office, Teinfaltstrasse 1, Vienna.

*Belgium*—Australian Embassy, Migration Office, 51/52 Avenue des Arts, Brussels-4.

*Britain*—'Canberra House', Migration Office, 10-16 Maltravers Street, The Strand, London, W.C.2.

*Ceylon*—Australian High Commission, 3 Cambridge Place, Colombo 7, P.O. Box 742.

*Denmark*—Australian Consulate, Hammerengade 4, 1267 Copenhagen, K.

*Fiji*—Australian Commission, C.M.L.A. Building, 3 Central Street, Suva.

*Finland*—Australian Information Office Fabianinkatu, 29-31, Helsinki.

*France*—Australian Embassy, Migration Office, 28 Rue de la Pepiniere, Paris, 8e.

*Germany, Federal Republic of*—Australian Embassy Migration Office, Hohenzollernring 103, Cologne.

*Greece*—Australian Embassy, Migration Office, 8 Makedonon Street Athens.

*Hong Kong*—Australian Government Migration Office, Rooms 901-904, 9th Floor, International Building, Connaught Road, Central Hong Kong.

- India*—Office of the Australian Deputy High Commissioner, Mercantile Bank Building, 52 Mahatma Ghandi Road, Bombay; Office of the Australian Deputy High Commissioner, 9 Shakespeare Sarani, Calcutta.
- Ireland*—Australian Embassy, 33 Fitzwilliam Square, Dublin.
- Italy*—Australian Embassy, Migration Office, Via Magenta 5, Rome.
- Kenya*—Australian High Commission, 3rd Floor, Development House, Government Road, Nairobi.
- Lebanon*—Australian Embassy, Migration Office, 7th Floor, S.F.A.H. Building, Kantari Street, Beirut.
- Malta*—Australian Migration Office, Australian High Commission, Airways House, Gaiety Lane, cnr High Street, Sliema, Valletta.
- The Netherlands*—Australian Embassy, Migration Office, Mauritskade 19, The Hague.
- Norway*—Australian Information Office, Jernbanetorget 2, Oslo.
- Spain*—Australian Embassy, Calle de General Sanjurjo 44, Madrid 3.
- Sweden*—Australian Embassy, Migration Office, Sergelstorg 12, Stockholm 40.
- Switzerland*—Australian Consulate-General, 56–58 Rue de Moillebeau, Petit Saconnex, 1211, Geneva 19.
- Turkey*—Australian Embassy, 83 Nenehatun Caddesi, Gezi Osman Pasa, Ankara.
- United Arab Republic*—Australian Embassy, Migration Office, 12 Hassan Sabri Street, Zamalek, Cairo.
- United States of America*—Australian Consulate-General, International Building, 636 Fifth Avenue, New York 10020, New York.  
Australian Consulate-General, Aetna and Mutual Building, Crocker Plaza, 1 Post Street, San Francisco 8, California, 94108.
- Yugoslavia*—Australian Embassy, Migration Office, Bulevar Revolucije 191–193, Belgrade.

## CHAPTER 7

# POPULATION

Statistics in this chapter cover, in the main, the year 1969. More detailed figures will be found in the annual bulletin *Demography*, and current statistics are published in the *Monthly Review of Business Statistics*, the *Quarterly Summary of Australian Statistics*, and the mimeographed series *Summary of Vital and Population Statistics* and *Overseas Arrivals and Departures*. The final detailed results of the various population censuses are published in a series of printed volumes and parts (see list at end of this Year Book, also the chapter Miscellaneous—Statistical and other official publications of Australia). Pending publication of the 1966 printed volumes a series of mimeographed bulletins have been issued containing the census results in summary form.

With the proclamation of the *Constitution Alteration (Aboriginals)* 1967 on 10 August 1967 the provision of the Constitution in Section 127 requiring the exclusion of Aborigines in reckoning the numbers of the people of the Commonwealth or of a State or other part of the Commonwealth, was repealed. Accordingly, population statistics for all dates subsequent to 10 August 1967 no longer exclude full-blood Aborigines. Estimates for earlier periods back to 30 June 1961 have also been revised to include these Aborigines. However, detailed analyses of the population enumerated in the censuses of June 1961 and 1966 exclude full-blood Aborigines. Particulars of the Aboriginal population are given on pages 138–42 in this chapter.

### Types of population statistics

Statistics of the population and its characteristics for Australia or the component States and Territories or other constituent areas at specific dates are divided in three main ways.

- (i) *Those ascertained by census enumeration.* The population censuses result in comprehensive statistics of characteristics of the population, such as age, sex, birthplace, etc.
- (ii) *Those ascertained by 'population counts'.* From time to time in specific areas there are additional enumerations of the population, which are known as population counts, because normally very little information other than the number of persons and their sex is obtained.
- (iii) *Estimates of number and sex.* Estimates for dates subsequent to a census, for Australia as a whole, take account of natural increase and net overseas migration since the last census. Estimates for States and Territories are approximate, since complete records of interstate migration are not available. The population in each State and Territory is estimated by adding to the population ascertained at the census the natural increase and the recorded net gain to Australia from overseas migration for that State or Territory; gains and corresponding losses that result from movements between States and Territories are also taken into account in so far as they are recorded as transfers of residence under child endowment procedures or Commonwealth electoral procedures. These methods are supplemented by results of any special count or sample survey. Holiday, business, or other similar short-term movements between the States and Territories subsequent to the census are not taken into account.

Estimates carried forward in this way eventually reach the point when another census is taken, and the numbers so ascertained supersede those resulting from the estimates. In the light of the census results the estimates for the newly completed intercensal period are revised to adjust for the differences between the new census result and the population at the census date estimated on the basis of the previous census. This is to bring intercensal estimates into line with the two census results and thus effect adjustment for unrecorded or inaccurately recorded movement of population in the intercensal period. Such a revision is made when the preliminary (field count) results of a census become available. Further revision may be necessary when the final results of a census become available.

Final revised estimates become the permanent population estimates. A mean population for twelve month periods is required for certain purposes, and is calculated by the method described on page 132. As populations at specific dates are used in these calculations, consequential revisions are made to mean populations when the estimates for specific dates are revised as described above.

# POPULATION OF AUSTRALIA, 1788 TO 1969

LOGARITHMIC GRAPH

NOTE: THE VERTICAL SCALE IS LOGARITHMIC, AND THE CURVES RISE AND FALL ACCORDING TO THE RATE OF INCREASE OR DECREASE; ACTUAL NUMBERS ARE INDICATED BY THE SCALE.

\* AUSTRALIAN CENSUS

*The method used for estimating State and Territory populations, as described in (iii) above is different from that used prior to June 1961 (for particulars see Year Book No. 52, page 191). Population estimates subsequent to the 1961 Census are based on a method which excludes holiday, business or other similar short-term movements since the census between States and Territories. As a consequence, marked quarterly seasonal movements in some States due to interstate holiday movements are reflected in population figures prior to 1961 but not for subsequent years. This has some effect on the continuity of the series of mean population figures and should be borne in mind when making calculations which use mean populations as a basis (see page 132). The following two aspects of seasonal movements, however, are reflected in the estimated populations of the States since 30 June 1961.*

- (i) People who were on holiday or other short-term travel interstate at the time of the census are counted in the State where they spent census night.
- (ii) There is some seasonal movement in the population of Australia as a whole which is due to movements of tourists and other visitors from overseas and of Australians travelling overseas for short periods.

All population statistics shown in this issue of the Year Book for dates up to and including June 1966, and all mean populations for calendar years up to 1965 and financial years up to 1965-66, are final. Population statistics for dates or years subsequent to these will be revised in accordance with the results of the next census.

### The population survey

The population survey is the general title given to the household sample survey carried out in February, May, August, and November of each year in all States and Territories. Emphasis in the survey is placed on the collection of data on demographic and labour force characteristics, the principal survey component being referred to as the labour force survey. The remaining part of the population survey consists of supplementary collections which are carried out from time to time in conjunction with the labour force survey. The population survey was instituted in November 1960 in the six State capital cities and was subsequently extended, in February 1964, to include non-metropolitan areas. About 38,000 households, representing one per cent of all households, are selected by area sampling methods and enumerated each quarter, the information being obtained by carefully chosen and specially trained interviewers during a four-week period on each occasion. For information about the results of the surveys see the chapter Employment and Unemployment.

### The census

In Year Book No. 53 a special article was included outlining the history, purposes, legal basis, organisation, and publication of results of the population census in Australia (see pages 164 to 170 of that issue), but considerations of space preclude its repetition in this issue.

#### Early 'musters'

Although regular censuses were not instituted in the several colonies until the years specified in the table below, population returns in one form or another have existed from a very early period in the history of Australia. The earliest enumerations were known as 'musters', and although the actual results of very few of them have been preserved, it is probable that during the early days of colonisation they were of frequent occurrence. The first official 'muster' was taken in 1788 soon after the new settlement at Sydney Cove was formed, and in 1803 the first 'muster' of convicts in Van Diemen's Land (now Tasmania) was conducted.

#### Development of the census

The first regular census in Australia was taken in New South Wales in November 1828, and included the population of Moreton Bay (now Queensland) but not Van Diemen's Land (Tasmania). Particulars were asked concerning the names, ages and civil conditions of the inhabitants. The next census was taken in 1833, and was followed by another in 1836, when arrangements were made for the enumeration of the population of the newly-established settlement at Port Phillip, (Victoria). The first censuses taken in Tasmania, Victoria and Queensland as separate colonies were in 1841, 1854

and 1861 respectively, The first regular census in South Australia was taken in 1844 and in Western Australia in 1848. The 1881 census was the first simultaneous census taken in Australia and formed part of the first simultaneous census of the British Empire.

The following table shows the total population recorded at each census conducted prior to 1891.

POPULATION ENUMERATED(a), CENSUSES IN AUSTRALIA, 1828 TO 1886

(a) Excludes full-blood Aborigines. (b) Previously included with New South Wales. (c) Included with South Australia for the censuses of 1866, 1871 and 1876. Actually Northern Territory was not transferred to the Commonwealth until 1 January 1911.

### Population recorded at censuses

State and Territorial populations recorded at the Australia-wide censuses taken over the period 1881 to 1966 are shown in the following table. The figures relate to the political boundaries of the several States (or Colonies) and Territories as they existed at the date of each census, except that the Northern Territory has been shown separately from South Australia for the censuses prior to its transfer from that State. The years of formation of the separate Colonies and transfer of the Territories are shown in the chapter Discovery, Colonisation and Federation of Australia (page 5).

(a) Excludes full-blood Aborigines. (b) Part of New South Wales before 1911.

Increase since 1901 census

The increases in the populations of the several States and Territories and of Australia as a whole during the last seven intercensal periods are shown in the following table, which distinguishes the numerical increases, the proportional increases (which do not allow for the differences in the length of the intercensal periods) and the average annual rates of increase.

POPULATION: INTERCENSAL INCREASES(a), STATES AND TERRITORIES  
1901 TO 1966

State or Territory	1901-1911 (10 years)	1911-1921 (10 years)	1921-1933 (12½ years)	1933-1947 (14 years)	1947-1954 (7 years)	1954-1961 (7 years)	1961-1966 (5 years)
<b>NUMERICAL INCREASE</b>							
New South Wales(b)	293,602	453,637	500,476	383,991	438,691	493,484	316,809

Australia	1.67	2.01	1.63	0.96	2.46	2.26	1.91

(a) Excludes full-blood Aborigines. (b) Includes Australian Capital Territory before 1911. (c) Part of New South Wales before 1911.

Minus sign (-) denotes decrease.

## Growth and distribution of population

## Growth of population

The table which follows shows the growth in the population of each sex in the various States and Territories as measured by the estimated population at 31 December in 1900 and thereafter at decennial intervals to 1960, and for each year from 1965 to 1969.

(a) Excludes full-blood Aborigines before 1961. The results of the census of 30 June 1966 have been taken into account in the preparation of estimates for dates after the census of 30 June 1961. See text page 121. (b) Part of New South Wales before 1911. (c) Includes all defence personnel enlisted in Australia irrespective of movement after enlistment.

The estimated population at 31 December each year from 1788 to 1946 is shown in *Demography*, Bulletin No. 67, 1949, and for the period 1901 to 1966 in *Demography*, Bulletin No. 84. A graph illustrating the growth of the population of Australia and of each State and Territory appears on plate 16, page 122.

## Proportions of area and of population, density and masculinity

In the following table the proportions of the total area and of the total population represented by each State and Territory are given, together with the density and the masculinity of the population. Additional information about density and masculinity of population appears later in this chapter.

**PROPORTIONS OF AREA AND OF POPULATION: DENSITY AND MASCULINITY  
OF POPULATION: STATES AND TERRITORIES, 31 DECEMBER 1969**

State or Territory	Proportion of total area per cent	Proportion of population, 31 Dec. 1969 (per cent)			Density(a)	Masculinity(b)
		Males	Females	Persons		
New South Wales . . . . .	10.43	36.28	36.51	36.40	14.64	100.76

(a) Number of persons per square mile.

(b) Number of males per 100 females.

**Delimitation of urban centres.**

The principles and criteria used for the delimitation of *urban* centres in Australia at the 1966 Census were as follows.

A boundary was defined for all settlements with a population of 1,000 or more and these were named '*urban centres*' except for the State capitals and Canberra which were named METROPOLITAN AREAS. This boundary is one which, from census to census as urbanisation proceeds, will be moved outwards to encompass any peripheral urban development.

For urban centres with a population of 30,000 and over, and for a few smaller centres, the following criteria were adopted in delimiting urban centres.

- (a) The metropolitan area or urban centre was delimited by including as urban all contiguous census collector's districts with a population density of 500 or more persons per square mile at the date of the 1966 Census.
- (b) Certain collector's districts, although not reaching the required population density were also included by virtue of—
  - (i) land use (e.g. factory areas),
  - (ii) being surrounded by urban collector's districts,
  - (iii) forming a '*bridge*' between the two urban centres less than two miles apart so that they could be regarded as one single urban centre.

For urban centres of less than 30,000 population, local government area boundaries were adopted, unless they contained a large rural component or urban development was known to extend beyond the local government boundary. In these cases they were delimited by inspection of aerial photographs, by field inspection or by consideration of any other information available and the boundaries were set as closely as possible to the periphery of the built-up area without regard to local government boundaries.

In areas with large numbers of holiday homes, many of which are unoccupied at the mid-winter census date, dwelling rather than population criteria were used. These criteria were 250 dwellings (in lieu of the 1,000 population mentioned above) and 125 dwellings per square mile (in lieu of the 500 persons per square mile mentioned above).

Because the new criteria for the delimitation of urban boundaries were adopted only shortly prior to the 1966 Census a few collector's districts containing urban growth were not split into their rural and (potentially) urban components, with the result that significant urban population remained included in large, predominantly rural, collector's districts, which did not meet the density criterion. Such cases occurred mainly around the Sydney Metropolitan Area and Urban Toowoomba. The effect on the Sydney Metropolitan Area is small, probably not more than 5,000 urban population having been omitted. In Toowoomba the effect is proportionately much greater, the urban population probably being understated by up to 3,000 persons.

**Delimitation of capital city statistical divisions and statistical districts**

Around each metropolitan area and urban centre with a population of at least 75,000 and a regional population of at least 100,000 a further boundary was defined, designed to circumscribe an area which would contain the urban development of that centre for at least twenty years and which would generally be socially and economically oriented to the centre. These areas were designated STATISTICAL DIVISIONS (for State capital cities) or STATISTICAL DISTRICTS (for Canberra, Newcastle, Wollongong and Geelong). The boundaries of these areas, unlike urban boundaries, were designed to remain fixed for a number of censuses.

## Classification of urban centres by size

The following table classifies the urban centres in Australia into grades of size of population at the Censuses of 30 June 1961 and 1966. Corresponding details for each State and Territory at the 1966 Census was included in Year Book No. 54, page 127.

A table showing the aggregate urban population at the 1961 Census of all cities and towns outside the metropolitan area of each State with 2,000 or more and 3,000 or more urban inhabitants was included in Year Book No. 51, page 267. A table showing similar data for the 1954 Census was included in Year Book No. 47, page 295 and one for the 1947 Census in Year Book No. 40, page 334. Comparisons between these various tables can be made only if allowance is made for changes in the status and structure of local government areas and for changes in the manner of determining urban population at each census.

(b) Urban centres so classified on grounds other than population and density.

## Urban centres, cities and towns, Australia

The following table shows the population of urban centres, cities and towns with a population of 10,000 or more (except Alice Springs, Northern Territory) in each State and Territory of Australia at 30 June 1966 (census) and 30 June 1969.

Unless otherwise indicated as 'urban centre', 'statistical division' or 'statistical district', the population figures shown in the table relate to areas delimited for local government or other administrative purposes. The figures shown for the several urban centres (or metropolitan areas) and statistical divisions (or districts) are in accordance with the concepts adopted at the 1966 census for the delimitation of metropolitan and other urban areas for statistical purposes. These concepts are described on page 127. Statistical division and statistical district boundaries are expected to remain unchanged for a substantial number of years, whereas the boundaries of metropolitan areas and urban centres will, by definition, change at intervals. The present boundaries of these urban centres (or metropolitan areas) are those established from 1966 census data; it has not been possible to make post-censal estimates for all these urban centres.

(a) Population at Census date. The difference between the statistics published here and those in census publications, which exclude full-blood Aborigines, cannot be taken as reliable statistics of Aboriginal population. (b) From 1 August 1968 parts of the City of Sydney were transferred to adjoining municipalities. (c) Includes part (16,200 at 1969) of Blue Mountains. (d) Includes Maitland (29,650 at 1969) and most (33,740 at 1969) of Greater Cessnock. (e) Includes Shellharbour (29,300 at 1969). (f) Result of population count of Canberra. (g) Includes Queanbeyan (14,260 at 1969) in New South Wales.

**Principal cities of the world.**

The following table shows the population of the world's largest cities at the latest available date. Since the way in which cities are delimited differs from country to country, the table shows data for the urban agglomeration, where available, as well as data for the so-called city proper. The urban agglomeration is defined in the United Nations *Demographic Yearbook* 1968 (page 20), from which most of the figures in the table have been taken, as including the suburban fringe or thickly settled territory lying outside of, but adjacent to, the city boundaries. (See also the Technical Notes on Statistical Tables and footnotes to the table in the *Demographic Yearbook*).

## Mean population

Mean populations are calculated for twelve-month periods to provide an average basis for calculations requiring allowance for the continuous change in population figures during such periods.

The following tables show the mean populations for the calendar and financial years 1960 to 1969.

## MEAN POPULATION(a): CALENDAR YEARS, STATES AND TERRITORIES, 1960 TO 1969

Year ended 31 Dec.—	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
1960	3,834,085	2,857,032	1,491,114	944,861	722,900	346,913	25,107	52,562	10,274,574
1961	3,913,967	2,926,075	1,516,334	970,118	737,596	353,628	26,272	58,852	10,502,842
1962	3,986,796	2,983,715	1,551,249	987,867	766,205	355,682	46,034	66,180	10,743,728
1963	4,050,230	3,041,442	1,578,309	1,010,506	788,457	360,590	48,330	73,300	10,951,158
1964	4,109,559	3,105,685	1,610,809	1,037,495	808,300	364,554	51,528	80,499	11,168,429
1965	4,176,686	3,165,594	1,644,028	1,066,884	826,481	367,970	54,142	88,417	11,390,202
1966	4,240,306	3,221,409	1,674,357	1,094,567	848,837	371,632	56,672	96,502	11,604,282
1967	4,308,944	3,277,131	1,702,689	1,111,675	876,997	376,588	59,664	103,725	11,817,413
1968	4,386,377	3,327,724	1,733,898	1,126,159	910,123	382,298	64,280	112,768	12,043,627
1969	4,479,435	3,387,404	1,769,121	1,145,111	947,203	388,646	68,216	122,244	12,307,380

For footnotes see next page.

## MEAN POPULATION(a): FINANCIAL YEARS, STATES AND TERRITORIES, 1959-60 TO 1968-69

Year ended 30 June—	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
1960 . . .	3,796,452	2,819,650	1,478,129	933,619	717,316	344,111	24,573	50,013	10,163,863
1961 . . .	3,875,921	2,893,417	1,503,703	957,136	729,770	350,077	25,673	55,232	10,390,929
1962 . . .	3,952,259	2,956,769	1,539,634	979,241	755,770	353,175	45,282	62,674	10,644,804
1963 . . .	4,020,774	3,011,833	1,563,347	998,510	777,413	358,180	46,960	69,537	10,846,374
1964 . . .	4,078,917	3,073,384	1,594,993	1,023,448	798,824	362,758	50,010	76,966	11,059,300
1965 . . .	4,142,568	3,136,319	1,626,935	1,052,098	817,157	366,366	52,793	84,400	11,278,636
1966 . . .	4,209,710	3,194,035	1,660,076	1,081,864	837,290	369,600	55,418	92,624	11,500,617
1967 . . .	4,272,703	3,249,913	1,688,078	1,103,973	862,130	373,916	58,081	99,925	11,708,719
1968 . . .	4,346,723	3,302,019	1,717,839	1,118,226	892,537	379,367	61,743	108,175	11,926,629
1969 . . .	4,430,183	3,355,804	1,751,476	1,135,635	928,943	385,685	66,552	117,412	12,171,690

(a) Excludes full blood Aborigines for years before 1962 (and 1961-62). Population estimates after the 1961 census are based on a method which omits holiday, business or other short term movements between States and Territories. As a consequence, marked quarterly seasonal movements in some States due to interstate holiday movements are reflected in the mean population figures for the States before 1962 (and 1961-62), but not in those for 1962 (1961-62) and subsequent years.

The mean population for any year has been calculated by the formula:

$$\text{Mean population} = \frac{a + 4b + 2c + 4d + e}{12}$$

where *a*, *b*, *c*, *d*, and *e*, respectively, are the populations at the end of the quarter immediately preceding the year and at the end of each of the four succeeding quarters; e.g. in the case of a calendar year, 31 December of the preceding year, and 31 March, 30 June, 30 September and 31 December of the year under consideration. This formula gives a close approximation to the mean of a theoretical population progressing smoothly through the five values *a*, *b*, *c*, *d*, and *e*.

## Elements of increase

The two factors which contribute to the growth of a population are 'natural increase', i.e. the excess of births over deaths, and 'net migration', i.e. the excess of arrivals over departures. The 'total increase' of the population is obtained by combining natural increase with the increase by net migration. However, comparison of the total increase so obtained with that derived by subtracting the population recorded at one census from that recorded at the next census reveals differences which can be attributed partly to differences in the coverage of the census enumerations, and partly to deficiencies in the records of the elements of increase.

## Elements of increase, 1941 to 1969

In the following table particulars are given of the elements of increase for each five-year period from 1941 to 1965 and for each of the years 1965 to 1969.

POPULATION(a) ELEMENTS OF INCREASE, BY SEX  
AUSTRALIA, 1941 TO 1969

Period	Natural increase (b)(c)	Net overseas migration gain(d)	Increase in total population(a)(e)		
			Males	Females	Persons
1941-45 . . .	337,678	7,809	151,358	201,253	352,611
1946-50 . . .	529,447	353,084	469,579	407,705	877,284
1951-55 . . .	599,702	413,824	522,372	481,972	1,004,344
1956-60 . . .	679,857	405,022	539,256	540,839	1,080,095
1961-65 . . .	687,432	399,888	(a)519,623	(a)553,784	(a)1,073,407
1965 . . .	123,139	104,856	110,667	114,312	224,979
1966 . . .	118,697	86,926	101,085	103,894	204,979
1967 . . .	126,593	91,909	109,790	108,712	218,502
1968 . . .	131,359	113,053	124,050	120,362	244,412
1969 . . .	143,680	129,046	138,303	134,423	272,726

(a) Excludes full blood Aborigines before 30 June 1961. (b) Excess of births registered over deaths registered. From September 1939 to June 1947, deaths of defence personnel whether overseas or in Australia are included. (c) Excludes full blood Aborigines before 1 January 1967. (d) Excess of recorded overseas arrivals over recorded overseas departures. Excludes troop movements for the period September 1939 to June 1947. (e) Increase in total population as recorded at censuses or as estimated for intercensal periods. It includes, in addition to the recorded figures for natural increase and net overseas migration gain, adjustments to make the series of increases agree with total intercensal increases revealed by successive censuses (up to the Census of 30 June 1966), and adjustments for exclusion of Aboriginal births and deaths between 30 June 1961 and January 1967.

**Rate of population growth**

In the following two tables natural increase refers to the excess of births over deaths (including deaths of Australian defence personnel), net migration refers to excess of overseas arrivals over departures excluding overseas movement of defence personnel for the period of September 1939 to June 1947, and total increase is the sum of natural increase and net migration together with adjustments to make the series of increases agree with total intercensal increases revealed by successive census results (up to the census of 30 June 1966).

**POPULATION(a): ANNUAL RATE OF GROWTH, AUSTRALIA  
1941 TO 1969  
(Per cent)**

<i>Period</i>	<i>Natural increase(b)</i>	<i>Net migration</i>	<i>Total increase(c)</i>
<b>Average annual rate(d)—</b>			
1941-45 . . . . .	0.94	0.02	0.98
1946-50 . . . . .	1.36	0.91	2.26
1951-55 . . . . .	1.38	0.95	2.31
1956-60 . . . . .	1.40	0.83	2.22
1961-65 . . . . .	1.27	0.74	(c)1.98
<b>Annual rate(e)—</b>			
1965 . . . . .	1.09	0.93	1.99
1966 . . . . .	1.03	0.75	1.78
1967 . . . . .	(b)1.08	0.79	1.87
1968 . . . . .	1.10	0.95	2.05
1969 . . . . .	1.18	1.06	2.24

(a) Population on which rates calculated excludes full blood Aborigines before 30 June 1961. (b) Excludes particulars of full-blood Aborigines before 1 January 1967. (c) Excludes full-blood Aborigines before 30 June 1961. (d) The average annual rate of total increase is computed by the formula:

$$P_t = P_0 (1 + r)^t$$

where  $P_0$  and  $P_t$  are the populations at the beginning and end respectively of a  $t$ -year period and  $r$  is the average annual rate of growth. The average annual rate of natural increase and net migration is computed by dividing the average annual rate of total increase between its components in proportion to the fraction of total increase due to each component during the period. Differences between the sum of the rates of natural increase and of net migration and the rate of total increase are due to the intercensal adjustment. (e) Annual rates of natural increase, net migration and total increase, for single years, represent the increase during the year expressed as a proportion (per cent) of the population at the beginning of the year.

The average annual rate of population growth during the present century has been 1.74 per cent, but the results from year to year have deviated widely from this figure. In the following table the period 1 January 1901 to 31 December 1968 has been arranged into certain defined groups of years according to the occurrence of influences markedly affecting the growth of population.

**POPULATION(a): PERIODIC RATES OF GROWTH, AUSTRALIA  
1901 TO 1969**

<i>Period</i>	<i>Interval (years)</i>	<i>Total increase (‘000)</i>	<i>Average annual numerical increase (‘000)</i>	<i>Average annual rate of population growth (per cent)</i>		
				<i>Natural increase (b)</i>	<i>Net migration</i>	<i>Total</i>
1901 to 1913 . . . . .	13	1,128	87	1.55	0.49	2.04
1914 to 1923 . . . . .	10	862	86	1.49	0.15	1.64
1924 to 1929 . . . . .	6	680	113	1.26	0.62	1.88
1930 to 1939 . . . . .	10	569	57	0.82	0.02	0.85
1940 to 1946 . . . . .	7	513	73	0.98	0.01	1.01
1947 to 1952 . . . . .	6	1,222	204	1.37	1.19	2.54
1953 to 1961 . . . . .	9	1,862	207	1.40	0.79	2.17
1962 to 1969 . . . . .	8	1,803	225	1.16	0.83	1.99

(a) Excludes full-blood Aborigines before 1962.

(b) Excludes full-blood Aborigines before 1 January 1967.

Rates of population growth from 1901 are shown for each State and Territory of Australia in the annual bulletin, *Demography*. Estimated rates of growth of the population of Australia in comparison with those for other countries of the world for the years 1963-1968 are shown in the table on pages 157-8.

### Sex distribution

The number of males to each hundred females has been adopted as a measure of the 'masculinity' of the population. With the exception of some dislocation arising from the two World Wars, there was a continuous diminution of the masculinity of the population until 1945. This resulted from the increasing proportion of the population in the higher age groups, in which females preponderate owing to their greater longevity, and the general long-term fall in the birth rate. At the 1947 census the numbers of the sexes were practically equal, but during the following decade there was an increase in masculinity owing to the greater numbers of males as compared with females in net overseas migration, and the recovery of the birth rate in the post-war period from the low levels of the 1930s. In more recent years, however, the trend has declined again.

POPULATION(a): MASCULINITY, STATES AND TERRITORIES, DECEMBER 1900 TO 1969  
(Number of males per 100 females)

31 Dec.—	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
1900 . . .	111.14	101.23	125.33	101.95	157.54	107.97	753.60	(b)	110.55
1910 . . .	109.23	98.71	119.02	103.12	132.90	104.14	486.32	(b)	107.87
1920 . . .	104.31	97.38	112.00	99.83	114.55	101.67	270.04	116.70	103.47
1930 . . .	103.39	99.14	110.66	100.97	117.17	101.53	263.66	118.69	103.85
1940 . . .	100.98	97.85	108.48	98.91	110.38	102.74	240.31	124.62	101.81
1950 . . .	100.88	99.27	106.02	101.83	106.07	102.70	188.05	123.33	101.83
1960 . . .	101.38	101.35	104.16	102.24	103.99	102.88	147.82	111.51	102.22
1965 . . .	100.68	100.52	102.99	101.03	103.99	101.83	123.36	108.70	101.43
1966 . . .	100.64	100.46	102.83	100.91	103.94	101.71	121.93	107.56	101.36
1967 . . .	100.65	100.50	102.75	100.93	103.82	101.73	120.58	106.80	101.35
1968 . . .	100.71	100.60	102.63	100.99	103.68	101.72	118.62	107.16	101.39
1969 . . .	100.76	100.71	102.57	101.06	103.52	101.77	117.59	106.33	101.42

(a) Excludes full blood Aborigines before 1961. (b) Part of New South Wales prior to 1911.

The masculinity of the population in certain countries of the world is shown in the table on pages 157-8.

### Age distribution

The next table shows the changes which have taken place in the age distribution of the population of Australia since 1871.

POPULATION(a): PROPORTIONAL AGE DISTRIBUTION, BY SEX, AUSTRALIA  
1871 TO 1966  
(Per cent)

Census	Males				Females				Persons			
	Under 15 years	15 years and under 65	65 years and over	Total	Under 15 years	15 years and under 65	65 years and over	Total	Under 15 years	15 years and under 65	65 years and over	Total
1871 . . .	38.84	59.11	2.05	100	46.02	52.60	1.38	100	42.09	56.17	1.74	100

(a) Based on the age distribution of all persons enumerated at the Census of 30 June 1966 adjusted for mis-statement of age and on subsequent births, recorded ages at death and recorded ages of migrants.

**General characteristics of the population, censuses, 1961 and 1966**

Particulars of the characteristics of the population of Australia at the 1966 Census compared with the 1961 Census are shown in this section. Corresponding information for the individual States and Territories is shown in Year Book No. 54. Information concerning the industry, occupational status, and occupations of the population as recorded at the 1966 Census is given in the chapter Employment and Unemployment, and on dwellings in the chapter Housing and Building.

The characteristics dealt with in the following pages are: age; marital status; country of birth; period of residence in Australia of overseas born; nationality; religion. Further details are available in a series of mimeographed bulletins which are listed in the chapter Miscellaneous. All tables exclude particulars of full-blood Aborigines.

## POPULATION: AGE (GROUPED AGES)(a), BY SEX, AUSTRALIA, CENSUSES, 1961 AND 1966

Age last birthday (years)	Census, 30 June 1961			Census, 30 June 1966			Increase 1961-1966
	Males	Females	Persons	Males	Females	Persons	
0-4	567,742	541,751	1,109,493	585,949	557,195	1,143,144	33,651

### The Aboriginal population of Australia

In Year Book No. 17, pages 951-61, a brief account was given of the Australian Aboriginal population, its origin, its numbers as estimated from time to time and the steps taken for its protection. On pages 914-16 of Year Book No. 22 particulars were shown for each of the States and Territories of Australia at successive periods, while a special article dealing with the estimated number and distribution of the native population at the date of first settlement of the white race in the continent appeared on pages 687-96 of Year Book No. 23.

Aborigines have been enumerated in all censuses of the Commonwealth, but the degree of coverage and information obtained has varied substantially since 1911. Since the census taken in 1933 the adequacy of the particulars obtained has improved progressively as a result of an increasing number of Aborigines coming into contact with more populated areas.

At the 1966 Census extensive arrangements were made to obtain as full a coverage of Aborigines as possible and to enumerate fully those Aborigines 'out of contact'. Throughout Australia the assistance of Aboriginal welfare bodies, mission superintendents, station owners, patrol officers, and police was sought in an effort to include all Aborigines and to obtain complete information about them, e.g. in the Northern Territory information was obtained from missions and settlements concerning Aborigines normally resident at such locations but who were absent at the time of the census, and of Aborigines resident at such locations but who normally resided elsewhere. The two sets of information were then reconciled to produce what is considered to be a fairly complete and accurate coverage of Aborigines in the Territory.

#### Selected characteristics

The tables which follow present statistics relating to some selected characteristics derived from the 1966 Census. Details of all characteristics enumerated, together with details for States and Territories, and comparisons between the Aboriginal population and the total population, may be found in the publication *The Aboriginal Population of Australia* (reference No. 2.23).

At censuses prior to the 1966 Census, the instructions relating to race were insufficient to enable respondents to classify themselves according to degree of race mixture. For example, from 1933 to 1961 persons were asked to state:

'For persons of European Race, wherever born, write "European". For non-Europeans state the race to which they belong, for example, "Aboriginal", "Chinese", "Negro", "Afghan", etc. If the person is half-caste with one parent of European race, write also "H.C.", for example "H.C. Aboriginal", "H.C. Chinese", etc.,

At the 1966 Census the instructions were redesigned as follows in an endeavour to obtain precise data on race mixture and also to avoid the opprobrium attaching to the term 'half-caste':

'State each person's race. For persons of European race wherever born, write "European". Otherwise state whether Aboriginal, Chinese, Indian, Japanese, etc., as the case may be. If of more than one race give particulars, for example,  $\frac{1}{2}$  European— $\frac{1}{2}$  Aboriginal,  $\frac{2}{3}$  Aboriginal— $\frac{1}{3}$  Chinese,  $\frac{1}{2}$  European— $\frac{1}{2}$  Chinese.'

Investigations made by matching the replies of individuals at the 1961 and 1966 Censuses and by comparing overall Census results with data available from the State instrumentalities responsible for Aboriginal welfare suggest that considerable doubt attaches to the validity of the replies given to the question on race at the 1966 and previous Censuses.

It has now been concluded:

- (a) that reporting by Aborigines in the 1966 Census was insufficiently precise to differentiate persons who are 50 per cent Aboriginal from those who are more than 50 per cent Aboriginal;
- (b) that similar dissections obtained at censuses prior to the 1966 Census were similarly imprecise; and
- (c) that even a total of all persons who are 50 per cent or more Aboriginal may be suspect, primarily because of the inclusion of persons who are less than 50 per cent Aboriginal and described themselves simply as 'Aboriginal', but also because of persons who are 50 per cent Aboriginal stating their race as 'European'.

Nevertheless, the statistics herein, which relate to persons who have described themselves as 50 per cent or more Aboriginal or simply as 'Aboriginal', are presented subject to these limitations in the hope that comments and suggestions will lead to the compilation of more reliable data in future censuses.

The following table shows particulars of the Aboriginal population of Australia at the Censuses of 30 June, 1954, 1961, and 1966. Because of some doubt about the accuracy of separate figures for full-blood and half-blood Aborigines as shown in previous issues of the Year Book, their separate publication has been discontinued.

**ABORIGINAL POPULATION(a): STATES AND TERRITORIES  
CENSUSES, 1954, 1961 AND 1966**

State or Territory	Census, 1954(a)			Census, 1961(a)			Census, 1966(b)		
	Males	Females	Persons	Males	Females	Persons	Males	Females	Persons
New South Wales . . . . .	6,278	5,935	12,213	7,494	7,222	14,716	7,343	6,876	14,219
Victoria . . . . .	691	704	1,395	899	897	1,796	856	934	1,790
Queensland . . . . .	8,368	7,781	16,149	10,146	9,550	19,696	9,644	9,359	19,003
South Australia . . . . .	1,675	1,537	3,212	2,607	2,277	4,884	2,914	2,591	5,505
Western Australia . . . . .	6,564	6,135	12,699	8,351	7,925	16,276	9,505	8,934	18,439
Northern Territory . . . . .	5,990	5,798	11,788	9,013	8,747	17,760	10,651	10,468	21,119
Australia(c) . . . . .	29,716	28,006	57,722	38,612	36,697	75,309	40,984	39,223	80,207

(a) Prior to the 1966 Census, Aborigines 'out of contact' were not enumerated and estimates of these were made by authorities responsible for native welfare. It is estimated that at the 1954 Census 12,956 Aborigines (of which 2,311 were estimated to be in Queensland, 1,760 in South Australia, 3,516 in Western Australia, and 5,369 in the Northern Territory) were not contacted by census collectors and were not included in the census. Increasing numbers, however, were coming into contact and at the 1961 Census it is estimated that 2,000 Aborigines in Western Australia and 1,944 in the Northern Territory were not contacted by census collectors. At the 1966 Census, efforts were made to obtain complete coverage. (b) The figures relate to those persons who described themselves in the 1966 Census as being 50 per cent or more Aboriginal or simply as 'Aboriginal'. For reasons stated above, it has not been possible to differentiate between persons who are 50 per cent Aboriginal from those who are more than 50 per cent Aboriginal. (c) Separate figures for Tasmania and the Australian Capital Territory are not shown in the following tables although in all cases the Australian totals include Aborigines enumerated in these two areas.

Torres Strait Islanders are not included in the above table, but are included in the census figures shown elsewhere in this chapter. At the 1966 Census they numbered 5,403 persons.

**THE ABORIGINAL POPULATION(a): URBAN AND RURAL, AUSTRALIA  
CENSUS, 30 JUNE 1966**

	Persons			Aboriginal population as a proportion of total population in each area

	F	10	49	500	3,311	1,647	4,489	6,136	462	10,468
	P	19	84	925	6,865	3,275	8,984	12,259	967	21,119

(a) See footnote (b) to table on page 139. (b) Due to differing examination and education systems, the levels of educational attainment for each State and Territory are not strictly comparable. This applies particularly to the primary and secondary levels. Consequently no figures for Australia as a whole have been shown in this table. (c) Includes University degrees and other tertiary qualifications which require evidence of professional or semi-professional knowledge, obtained by tertiary study extending beyond secondary schooling. (d) Or junior or secondary school certificate level. (e) For example high, technical, post primary, but passed no examination at intermediate level or above. (f) Or passed final primary examinations.

THE ABORIGINAL POPULATION(a), BY OCCUPATIONAL STATUS

**Comparative summary of Aboriginal and non-Aboriginal population**

A percentage distribution of the population of Australia according to the characteristics of age, marital status, birthplace, religion, occupational status, occupation and industry may be found in *The Aboriginal Population of Australia* (Reference No. 2.23).

**Overseas arrivals and departures**

In this section summary figures are given of the total movement of overseas passengers, and full details are given in respect of permanent arrivals and departures. For information on passengers in other categories, see Chapter 12, Transport, Communication and Travel.

More detailed statistics of overseas arrivals and departures, covering country of residence, country of embarkation or disembarkation, mode of travel, month of arrival or departure, etc., are shown in the tables of Section II, Overseas Arrivals and Departures, of the annual bulletin *Demography*. Monthly and quarterly mimeographed bulletins, containing the latest available statistics of overseas arrivals and departures, are also issued.

**Overseas arrivals and departures since 1936**

Earlier issues of the Year Book contain, in summary form, tables showing the increase of population by net migration from 1861 to the latest date, while information for individual years from 1901 is published in the annual bulletin *Demography*. The following table shows, for Australia, arrivals and departures since 1936, and refers to total movement irrespective of length of stay. Air crews and ships' crews, persons passing through Australia on board the same ship or flight, and also persons on short pleasure cruises in the south-west Pacific commencing and finishing in Australia on ships not then engaged in regular voyages, are excluded from Australian statistics of overseas arrivals and departures.

**OVERSEAS ARRIVALS AND DEPARTURES, BY SEX: AUSTRALIA, 1936 TO 1969**

<i>Period</i>	<i>Total arrivals</i>			<i>Total departures</i>			<i>Excess of arrivals over departures</i>		
	<i>Males</i>	<i>Females</i>	<i>Persons</i>	<i>Males</i>	<i>Females</i>	<i>Persons</i>	<i>Males</i>	<i>Females</i>	<i>Persons</i>

(a) Excludes movements of defence personnel from September 1939 to June 1947.

**Excess of arrivals over departures**

The excess of total overseas arrivals over departures is one of the elements of population increase taken into account in preparing the estimated population for other than census dates (*see* pages 121 and 132 of this chapter). It is necessary to use statistics of total overseas arrivals and departures for this purpose, because Australian population statistics relate to the total population present in Australia at the date of the census or estimate, and not the population normally resident in Australia (which would include those temporarily overseas and exclude those temporarily visiting Australia). The following table gives particulars of the net gain or loss of population due to overseas migration, according to age and marital status.

**EXCESS OF ARRIVALS OVER DEPARTURES, BY SEX: AGE DISTRIBUTION AND MARITAL STATUS, AUSTRALIA, 1968 AND 1969**

Age and marital status	1968			1969

**Classification of travellers**

Since 1 July 1924 overseas travellers have been classified into two principal categories, distinguishing movements for short terms from movements for longer periods (including permanently). Prior to 1957 these categories were *temporary* and *permanent*. Thereafter the categories were entitled *short-term* and *permanent and long-term*, but the basis of classification was not changed and the figures are directly comparable for the whole period. For short-term travel, overseas visitors and Australian residents are identified separately.

Revised questions for travellers were introduced in mid-1958, and these enabled the separation, from 1 January 1959, of permanent from other long-term movements and also the identification among the permanent departures of former settlers departing.

# OVERSEAS ARRIVALS AND DEPARTURES: AUSTRALIA

1946 TO 1969

PLATE 17  
144

The principal categories of travellers' movements are as follows:

*Permanent*—consists of persons arriving with the stated intention of settling permanently in Australia (settlers), and Australian residents departing with the stated intention of residing permanently abroad; the latter include *former settlers*, i.e. persons who, on departure from Australia, stated that they had come to Australia to settle, had stayed for a period of twelve months or more and were now departing permanently.

*Long-term*—consists of the arrival of overseas visitors and the departure of Australian residents with the stated intention of staying (in Australia or in a country abroad respectively) for twelve months or more; and the departure of visitors and the return of residents who have stayed (in Australia or in a country abroad respectively) for twelve months or more.

*Short-term*—consists of all other movements, including the movement of Australian troops irrespective of period of stay, and U.S. troops visiting Australia on rest and recreation leave.

This classification is based on statements made by the traveller on arrival in, or departure from, Australia. They represent the travellers' intention at that time. Many travellers subsequently change their intentions, and this must be borne in mind in interpreting the statistics.

The numbers so classified since 1 January 1941 are as follows:

### OVERSEAS ARRIVALS AND DEPARTURES: CLASSIFICATION OF TRAVELLERS AUSTRALIA, 1941 TO 1969

#### ARRIVALS

#### Permanent movement

In the following paragraphs particulars are given of the persons who on arrival in Australia stated that they came intending to settle, and of Australian residents who on their departure from Australia stated their intention of residing permanently abroad, classified according to nationality, occupation, age, marital status, and State or Territory of intended residence (arrivals) or of last residence (departures).

*State or Territory of intended residence (arrivals) or last residence (departures).* The following table shows the number of settlers arriving in Australia by State or Territory of intended residence and the number of Australian residents departing permanently by State or Territory of last residence, for the years 1967 to 1969. Settlers are asked, on or before arrival, the State or Territory of Australia in which they next intend to stay for twelve months or more. The statements represent the settlers' intentions at the time and may not be realised. The allocation to States and Territories in the table is based on these statements, except that settlers proceeding to the migrant reception centre, Bonegilla, Victoria, are allocated, as far as is practicable, to the State or Territory of their placement from the centre. Residents departing permanently are asked the State or Territory in which they last stayed for twelve months or more.

**OVERSEAS ARRIVALS AND DEPARTURES—PERMANENT MOVEMENT  
SETTLERS ARRIVING AND RESIDENTS DEPARTING, BY STATE OR TERRITORY OF

### Assisted migration into Australia

Detailed statistics of assisted migration into Australia are shown in *Australian Immigration: Consolidated Statistics* and *Australian Immigration: Quarterly Statistical Summary* published by the Department of Immigration.

Immigration has been a major factor in Australia's economic growth. Since the 1939-45 War immigration programmes have been pursued as a central feature of government policies for national development. Since 1945 successive Australian governments have borne a substantial part of the passage costs of selected migrants from overseas countries. The following table shows the numbers of persons who were assisted to come to Australia by the Australian Government under all assisted passage schemes during the period 1946 to 1969.

#### ASSISTED MIGRATION: AUSTRALIA, 1946 TO 1969

<i>Period</i>	<i>Nominated and selected (assisted) arrivals</i>
1946-50 . . . . .	273,195
1951-55 . . . . .	275,241
1956-60 . . . . .	305,517
1961-65 . . . . .	337,132
1963 . . . . .	62,914
1964 . . . . .	79,604
1965 . . . . .	93,653
1966 . . . . .	89,743
1967 . . . . .	82,247
1968 . . . . .	105,102
1969 . . . . .	125,958

Details of the joint scheme of assisted immigration arrived at by agreement between the Commonwealth and State Governments, which operated from 1920 to 1939, were published in earlier issues of the Year Book (*see* No. 38, page 576). After the outbreak of hostilities in 1939 it was decided to discontinue the grant of assisted passages for the duration of the war.

#### Migration from Britain

At the conclusion of the 1939-45 War two migration agreements were negotiated between the Australian and British Governments and came into operation on 31 March 1947. One of these provided for the grant of free passages to British ex-servicemen and their dependants and was terminated on 28 February 1955. The other migration agreement to provide assisted passages has continued in operation by renewal from time to time. It is now valid until 31 May 1972.

*Assisted passages.* The British Government now contributes £Stg150,000 per annum towards the cost of the movement of migrants to Australia. Each migrant 19 years of age or over contributes £Stg10 towards his passage costs. Migrants under 19 years of age make no contribution. The Australian Government meets the balance of the transport costs.

Eligibility for consideration for assisted passages is confined generally to citizens of the United Kingdom and Colonies, normally resident in Britain.

Hostels are operated by the Australian Government and also by the State Governments to provide transit or temporary accommodation for certain groups of newly arrived migrants.

*Number of arrivals.* The numbers of British migrants who came to Australia under the United Kingdom Assisted Passage Agreement during the period January 1947 to June 1969 are given in the following table according to the State or Territory of intended residence.

UNITED KINGDOM ASSISTED PASSAGE AGREEMENT: NUMBER OF MIGRANTS(a)  
STATES AND TERRITORIES OF INTENDED RESIDENCE  
JANUARY 1947 TO JUNE 1969

(a) Includes child migrants.

#### Maltese migration

A scheme of assisted migration entered into by the Australian and Maltese Governments in 1948 has been renewed from time to time and the current agreement was signed on 28 April 1965. The present scheme provides for selected persons aged 19 years and over to contribute \$A25 towards passage costs. Migrants under 19 years of age make no contribution.

The Australian Government meets the balance of the transport costs.

#### Foreign migration

Australia has migration agreements and arrangements with Austria, Belgium, Germany, Greece, Italy, Netherlands, Spain, Turkey and recently with Yugoslavia whereby selected persons aged 19 years and over may migrate to Australia for a personal contribution of \$A25 towards passage costs, with no contribution required from those under 19 years. Assisted passage schemes for refugees are operated in several of these countries. Details of schemes may be found in Year Book No. 55, pages 148 and 149.

The Special Passage Assistance Programme is a unilateral scheme which provides financial assistance of up to \$A335 for persons 19 years and over and up to \$A360 for those under 19. It applies to selected Europeans ineligible under other schemes who are resident in Britain, Ireland, Western Europe, and also certain countries in Central and South America, Africa and Asia. Single women in any of those countries and in Yugoslavia may be nominated under the Special Passage Assistance Programme.

A scheme similar to the Special Passage Assistance Programme applies to the United States of America.

Residents of Australia may nominate their wives and dependent children for consideration for assisted migration.

#### The Intergovernmental Committee for European Migration (ICEM)

This Committee, like the office of the United Nations High Commissioner for Refugees, was established to perform functions that had formerly been carried out by the International Refugee Organization. In addition to assuming responsibility for the resettlement of refugees, ICEM has been concerned with the movements of national migrants from Europe. Australia was one of the sixteen foundation members of the Committee; there are now thirty-one member countries including the British Commonwealth countries of Australia and Malta.

The three main functions of ICEM are the movement of national migrants and the provision of related services; the resettlement of refugees and the provision of related services; and developmental activities and technical co-operation (this includes activities such as language teaching, vocational and orientation training).

Up to 31 December 1969 ICEM had moved 1,696,743 persons, of whom 548,753 (383,352 nationals and 165,401 refugees) had departed for Australia.

#### Summary of arrivals of assisted migrants

The following table shows the number of assisted migrants who arrived in Australia in each of the last five financial years and since January 1947. All arrivals included in this table have obtained some financial assistance from the Australian Government towards payment of their passage money. Transport to Australia for the migrants concerned has been arranged on ships and aircraft under charter to the Department of Immigration, ships and aircraft under charter to the Intergovernmental Committee for European Migration, and normal commercial shipping and airlines. The arrivals under these schemes include a small number of nationals of countries other than those referred to, and stateless persons.

#### ARRIVALS UNDER ASSISTED MIGRATION SCHEMES: AUSTRALIA, JANUARY 1947 TO JUNE 1969

(a) Mostly Scandinavians, U.S. Americans, and British nationals from countries other than the United Kingdom.

### **Immigration Advisory, Planning and Publicity Councils**

Three bodies have been established to advise the Minister for Immigration on the social, economic and publicity aspects of the immigration programme.

The *Immigration Advisory Council*, established in 1947, consists of representatives of certain national organisations (e.g. the Australian Council of Trade Unions, the Returned Servicemen's League of Australia, and the National Youth Council) and advises the Minister in the sociological aspects of immigration. The *Immigration Planning Council*, established in 1949, consists of eminent persons chosen in their own right; it advises the Minister on the economic considerations affecting the immigration programme. The *Immigration Publicity Council*, established in 1962, advises on publicity and publications used in Australia and overseas. Its members represent the press (including the foreign language newspapers), radio, advertising and television interests.

### **Professional migration**

The Department of Immigration, working in co-operation with the Department of Labour and National Service, provides a special service, including advisory staff in London, to encourage immigration of professionally qualified persons by giving advice and information on prospects in Australia and by putting such applicants in touch with Australian employers.

On 27 March 1969, the Minister for Immigration announced the establishment of a Committee on Overseas Professional Qualifications, which has the task of collating information about, and evaluating the comparability of overseas with Australian professional qualifications.

## **The regulation of immigration into Australia**

### **Powers and legislation of the Commonwealth**

Under section 51 (ix), (xxvii) and (xxviii) of the Commonwealth Constitution, the Parliament of the Commonwealth is empowered to make laws with respect to immigration, emigration, aliens and the influx of criminals. Immigration into Australia is regulated by the *Migration Act 1958-1966* which came into force on 1 June 1959.

Any immigrant entering Australia after the commencement of the Act without having been granted an 'entry permit' or who is not within an exempted class is a prohibited immigrant. Exempted persons include diplomatic, consular and trade representatives of other countries, and seamen who enter with leave while their ships are in Australian ports. For the purposes of the Migration Act an immigrant includes a person entering for temporary stay.

An entry permit is normally granted at the port of entry by means of a stamp in the traveller's passport or equivalent travel document. No form of application is involved. Temporary permits are granted to visitors and persons whose stay is to be of limited duration. For other persons permits are issued without limitation as to stay. A person who is refused an entry permit must not be permitted (by the carrier company) to enter Australia; otherwise the carrier company is liable to a fine of \$1,000.

The Act contains provision for the deportation of persons who enter Australia without an entry permit, who overstay their approved period of residence or who are convicted of crimes. It also contains provisions relating to the emigration of children and Aborigines.

The Act does *not* affect passport or visa requirements for travel to Australia.

The *Aliens Act 1947-1966* provides that a register of aliens shall be maintained for every State and mainland Territory of Australia. Unless exempted, aliens 16 years of age and over are required to register with the Department of Immigration and to notify that Department of their address, occupation, or employment during the month of September each year. They are required to notify marriage within thirty days of marriage taking place. The Act provides also that the consent of the Department must be obtained before an alien may change his surname.

The *Immigration (Guardianship of Children) Act 1946-1966* provides that the Minister for Immigration becomes the legal guardian of every person under the age of 21 years who enters Australia (except for certain exempted groups) other than in the charge of, or for the purpose of living in the care of, a parent or adult relative. It is primarily administered through the child welfare authorities in each State and mainland Territory who, as the Minister's delegates under the Act, supervise the welfare of each 'immigrant child'.

### **Conditions of immigration into Australia**

*Admission of non-Europeans.* Australia's immigration policy is based on the need to maintain a predominantly homogeneous population. It is fundamental to the policy that people coming to Australia for residence should be capable of ready integration into the community.

Australia does not exclude from residence persons of other than European origin. Immigration laws and policy permit the Minister to authorise their entry, taking into account the qualifications of persons wishing to settle here, their ability to integrate readily into the community, and other aspects including considerations of a humanitarian nature and broad national interest.

The present policy provides, *inter alia*, that:

non-Europeans, who are the spouses, unmarried minor children, aged parents or fiancées of Australian citizens, and of other British subjects already having resident status, or eligible to enter with such status, may be admitted for permanent residence (the non-European wife and unmarried minor children of a European alien in similar circumstances may also be admitted for residence);

non-Europeans who have already been admitted under temporary permit but with the expectation of indefinite stay may, after completing five years' residence, qualify to apply for resident status and subsequently for citizenship.

The following examples of persons may be considered for entry for settlement, accompanied by their wives and children, on the basis of their general suitability and possession of qualifications positively useful to Australia:

persons with specialised technical skills for appointments for which local residents are not available;

persons of high attainment in the arts and sciences, or of prominent achievement in other ways; persons eligible to practice in a profession in Australia in which they may be absorbed without difficulty;

executives, technicians, and other specialists who have spent substantial periods in Australia—for example, with the branches here of large Asian companies—and who have qualifications or experience in positive demand here;

businessmen who in their own countries have been engaged in substantial international trading and would be able to carry on such trade from Australia;

persons who have been of particular and lasting help to Australia's interest abroad in trade or in other ways;

persons who by former residence in Australia or by association with Australia have demonstrated an interest in or identification with Australia that should make their future residence here feasible.

In addition to visitors and students, provision exists also for the entry on a limited temporary residence basis of staffs of companies, professional, technical and specialist personnel, and of persons coming for medical treatment, religious training, or as sportsmen and entertainers, and in other miscellaneous categories.

*Private students.* Young people may enter Australia for the purpose of study, irrespective of their countries of origin. The greater proportion of such private students in Australia are from Asia, the Pacific area and, to a lesser extent, from the continent of Africa (there are at present about 10,000 private students in Australia). The objective is to provide the opportunity for young people in these areas to come to Australia for advanced secondary, tertiary and other post-secondary study and training which will result in qualifications in demand and of use in their countries. The student, as well as meeting other requirements of entry, must have the capacity to undertake the course of study proposed and produce evidence of enrolment and assurances as to maintenance and accommodation. The student is admitted with temporary resident status and is required to acknowledge that he is obliged to return home on completing the approved course of study or training and that authority for stay and for extensions of stay as a student is dependent upon satisfactory academic progress.

*Persons of European descent.* Aliens of European descent, Maltese, Cypriots, Mauritiens and residents of the Seychelle Islands desiring to settle permanently in Australia are required to obtain authority for admission from the Department of Immigration or an Australian overseas post. Their admission under the present policy is subject to clearance on health, character, and security grounds, and depends on their suitability as settlers generally.

## Passports

Australian passports are issued under the *Passports Act 1938-1966* and *Passport Regulations*. Passports are obtainable on application at offices of the Commonwealth Department of Immigration in each State, the Northern Territory, and the Australian Capital Territory, from overseas offices of that Department, from any Australian diplomatic or consular mission abroad, or from the office of any Australian Government Trade Commissioner overseas. Applicants for passports must furnish evidence of their identity and nationality and pay a fee of four dollars. Approximately 130,000 Australian passports are issued each year in Australia and abroad.

## Citizenship and naturalisation

### Commonwealth legislation

The *Nationality and Citizenship Act 1948* which came into force on 26 January 1949 created the status of 'Australian citizenship', declared Australian citizens to be British subjects and recognised as British subjects the citizens of other Commonwealth countries. Australian citizenship was acquired automatically by persons who were British subjects on 26 January 1949 and who (a) were born in Australia or New Guinea, (b) were naturalised in Australia, (c) had been ordinarily resident in Australia or New Guinea for the five years immediately prior to that date, (d) were the wives of persons who became Australian citizens on that date and had entered Australia with resident status prior to 26 January 1949, or (e) were the children born abroad of persons referred to in (a) or (b) and who entered Australia without being placed under immigration restriction.

For the purposes of the Act 'Australia' includes the Territories of the Commonwealth that are not Trust Territories.

Australian citizenship may be acquired (a) by birth in Australia, (b) by birth abroad subject to registration of the birth at an Australian Consulate, (c) by naturalisation in the case of aliens or protected persons, and (d) by registration in the case of citizens of other Commonwealth countries and Irish citizens. Generally, aliens are required to spend five years residence in Australia but those who can read and write English proficiently may be naturalised after three years. Citizenship may be granted earlier to persons who are the spouses of Australian citizens, persons who have lived in other Commonwealth countries, persons who have served in the Commonwealth Armed Forces, persons who were formerly Australian citizens or are minors.

The Act recognises the independence of married women. Australian citizenship is not lost solely by marriage to an alien nor do alien women acquire Australian citizenship upon marriage to an Australian citizen. Alien wives of Australian citizens may be naturalised under easier conditions than those which apply to other aliens.

On 4 June 1969 the Act became the *Citizenship Act 1948-1969*.

### Persons granted Australian citizenship by naturalisation and registration during 1968-69

The following table shows the previous nationalities of persons who became Australian citizens by naturalisation and registration.

#### PERSONS GRANTED AUSTRALIAN CITIZENSHIP BY NATURALISATION, 1968-69

French . . . 2,368	Norwegian . . . 1,269	Ukrainian . . . 20,093	

More detailed statistics of persons granted Australian citizenship are shown in *Australian Immigration: Consolidated Statistics* published by the Department of Immigration.

## Migrant integration

An integration programme operates to aid the social settlement of migrants into the Australian community. In addition to direct welfare work the programme includes the following activities.

English-language tuition is arranged by the Department of Immigration to assist migrants to overcome their language problems. The services provided include instruction in Europe, on board ships travelling to Australia, and adult education classes within Australia which are supplemented by television, radio and correspondence courses. At 31 December 1968, 13,949 migrants were enrolled in 973 language classes throughout Australia and 7,266 students were enrolled to receive instruction through the correspondence lessons.

A team of psychologists undertakes surveys and other research into migrant integration and welfare in Australia and migrant selection overseas.

The Good Neighbour Movement operates as a voluntary and direct service organisation throughout Australia to assist in the integration of migrants. Membership of the movement is made up of hundreds of community organisations whose activities are co-ordinated by State Councils. The Commonwealth Government assists each Council financially through grants to cover administrative expenses.

Transitory accommodation is provided for Commonwealth nominated assisted migrants. The main types of accommodation used are hostels (present capacity 26,000) and furnished flats (present capacity 850). Migrants may stay up to twelve months in a hostel and up to six months in a flat. Operating costs of hostels, and flat rentals, are subsidised by the Government. Accommodation for

unaccompanied single girls is provided in private hostels operated by the Y.W.C.A., Salvation Army and Traveller's Aid Society. Special reception facilities are provided for non-British migrants at the Bonegilla Migrant Centre, Victoria. A subsidy towards the cost of accommodation in private establishments is available to migrants wishing to settle in country areas where there are no hostels or flats.

*Citizenship Conventions.* Citizenship Conventions are convened in Canberra at two-yearly intervals by the Commonwealth Government. Delegates from a wide range of community organisations and from Commonwealth and State Governments participate. The subjects discussed relate to the integration of migrants, Australian citizenship and the role of immigration in Australia's development.

### Population of External Territories

Ordinances of the individual External Territories under the control of Australia provide for a census of the population to be taken on the day prescribed for the taking of a census in the Commonwealth of Australia. The following table shows the population of the Territories of Christmas Island, Cocos (Keeling) Islands, Norfolk Island, Papua and the Trust Territory of New Guinea at the census of 30 June 1966 and as estimated at 30 June 1969.

POPULATION: EXTERNAL TERRITORIES, 30 JUNE 1966 AND 1969

Territory	Census 30 June 1966			Estimate
	Males	Females	Persons	30 June 1969
Christmas Island . . .	2,154	1,232	3,386	3,439
Cocos (Keeling) Islands . . .	375	309	684	607
Norfolk Island . . .	563	584	1,147	1,377
Papua—				
Indigenous population . . .	(a)310,153	(a)281,806	(a)591,959	637,006
Non-indigenous population . . .	8,307	6,070	14,377	n.a.
<i>Total, Papua</i> . . .	<i>318,460</i>	<i>287,876</i>	<i>606,336</i>	<i>(b)n.a.</i>
Trust Territory of New Guinea—				
Indigenous population . . .	(a)810,154	(a)748,209	(a)1,558,363	1,702,280
Non-indigenous population . . .	11,744	8,547	20,291	n.a.
<i>Total, New Guinea</i> . . .	<i>821,898</i>	<i>756,756</i>	<i>1,578,654</i>	<i>(b)n.a.</i>

(a) The 1966 Census of Papua and New Guinea was the first to include the indigenous population, and was based upon a 10 per cent sample of rural villages in the two Territories.

(b) The total population for Papua and New Guinea was 2,382,677 at 30 June 1969.

Further particulars concerning the indigenous populations of the Territories are given in the chapter The Territories of Australia.

### International statistics of population

In the following tables the population, density, rate of growth, natural increase and masculinity are shown in respect of all countries which had an estimated population of at least five million persons in 1968, excepting for the group 'Oceania', which is treated in more detail. The source of these figures is the 1968 *Demographic Yearbook*, which is prepared and published by the Statistical Office of the United Nations. The tables include figures varying in reliability and accuracy, there being considerable variation in the quality of demographic statistics of between countries, but this information has been shown to provide a guide as to the magnitude and trend of population movements in overseas countries.

Where the information available to the Statistical Office of the United Nations relates to only part of the population of a country, the population characteristic (e.g. rate of growth), or vital statistics rate (e.g. marriages), has been omitted from the tables, and this is indicated by a footnote.

For fuller particulars of the differences in the quality of the statistics and their reliability and for other qualifications, references should be made to the detailed explanations contained in the *Demographic Yearbook* of the Statistical Office of the United Nations (see particularly Technical Notes on Statistical Tables and footnotes to the tables).

#### Population, rate of growth and density: world, continents and regions

The following table shows for the world, continents and regions, estimated population in 1930, 1940, 1950, 1960, 1963 and 1968. The annual rate of increase (per cent), together with the average annual increase, during the period 1960-1968, is also shown. Population figures have been adjusted for under enumeration and errors in estimation. In preparing these figures, the Population Branch of the United Nations revises, from time to time, the estimates for previous years as new data become available, for example, from a census. The figures are estimates only.

#### POPULATION, DENSITY AND RATE OF INCREASE FOR THE WORLD AND CONTINENTS—SELECTED YEARS

(Source: United Nations *Demographic Yearbook*, 1968)

#### Population, density, rate of growth, natural increase, and masculinity of selected countries.

Certain details of the population of the more populous countries within continental groups are shown in the following table. As explained above, reference should be made to the detailed comments contained in the United Nations *Demographic Yearbook*, 1968, regarding geographical units used, boundaries of areas, reliability of estimates, etc.

## POPULATION, DENSITY, RATE OF INCREASE, NATURAL INCREASE AND MASCULINITY—SELECTED COUNTRIES

(Source: United Nations *Demographic Yearbook*, 1968)

Country	Population mid-year 1968 (thousands)	Density (persons per square mile)	Annual rate of increase 1963-68 (per cent)	Natural increase		Masculinity at latest census

## CHAPTER 8

### VITAL STATISTICS

The tables in this chapter are confined to the principal characteristics of vital statistics for Australia and relate, in the main, to the year 1969 for marriages and 1968 for births, deaths, and infant deaths. Comparisons have been restricted, in general, to the individual years 1965 to 1969 and the five-year periods 1941-45 to 1961-65, while age data have been shown in five-year groups. Comparisons over longer periods, together with more detailed figures such as single age particulars and cross-classifications of various characteristics, will be found in the annual bulletins, *Demography* and *Causes of Death*. Current information is published in the *Monthly Review of Business Statistics*, the *Quarterly Summary of Australian Statistics*, and a mimeographed series issued at intervals throughout the year on population and vital statistics.

For years before 1967 the statistics of births, deaths and marriages exclude particulars of full-blood Aborigines. Differences between the statistics now published and those formerly published which implied the exclusion of Aboriginal vital events cannot be taken as reliable statistics of births, deaths, or marriages among full-blood Aborigines, because in many areas no satisfactory administrative or other basis existed for distinguishing vital events among full-blood Aborigines from those among part-Aborigines or the rest of the population.

Vital statistics for certain countries of the world are set out in International Vital Statistics at the end of this chapter.

#### Provisions for registration and compilation of statistics

In Australia vital statistics are compiled from information supplied for the registration of births, deaths, and marriages. Each State and Territory has an independent system of registration. Provisions for the civil registration of births, deaths, and marriages have been in force in Tasmania from 1839, in Western Australia from 1841, in South Australia from 1842, in Victoria from 1853, and in New South Wales and Queensland (then part of New South Wales) from 1856. Registration in the Territories is administered by the Commonwealth Government, registration having been taken over from South Australia in 1911 in respect of the Northern Territory and from New South Wales in 1930 in respect of the Australian Capital Territory. The authority responsible for the registration of births, deaths, and marriages occurring within his particular State or Territory is the Registrar-General (the Government Statist in Victoria) or the Principal Registrar.

Information concerning a birth is required to be supplied within 28 days in the Australian Capital Territory and the Northern Territory, and 60 days in the States. For the registration of a death the period allowed is 8 days in Tasmania, 14 days in South Australia, Western Australia, Australian Capital Territory, and Northern Territory, 21 days in Victoria, and 30 days in New South Wales and Queensland.

The *Marriage Act* 1961-1966 came into operation on 1 September 1963, placing the marriage laws of all States, the mainland Territories and Norfolk Island on a uniform basis. Provision is made for the celebration of marriage by ministers of religion registered with the Registrar of Ministers of Religion appointed in each State and Territory by the Attorney-General, and by certain civil officers. In all cases the authorised celebrant is required to register particulars of the parties married with the appropriate registering authority in each State or Territory. The celebrant is requested to register a marriage as soon as practicable and in any case not later than fourteen days after the marriage.

Information is required in all States and Territories concerning what have been commonly known as 'stillbirths'. These are excluded from all the tables of births and deaths in this chapter and are included only in the special tables of stillbirths shown on page 175. The statistics of stillbirths shown relate to those, in several States, of at least seven months gestation or, in other States and the two Territories, the approximate equivalent of twenty-eight weeks. The statistics relate to periods up to the end of 1968. Compulsory registration was introduced in Western Australia in 1908, the Australian Capital Territory in 1930, New South Wales in 1935, South Australia in 1937, the Northern Territory in 1949, Victoria in 1953, Queensland in 1959 and Tasmania in 1967.

The data for the compilation of vital statistics are obtained from registry records and dispatched, through the Statistical Office in each State and Territory, to the Commonwealth Statistician. The compilation and publication of vital statistics for Australia is one of the functions of the Commonwealth Statistician. The Deputy Commonwealth Statisticians compile and publish statistics relating to their respective States.

## Marriages

### Numbers of marriages and crude marriage rates

The numbers of marriages registered in each State and Territory in five-year periods from 1941-45 to 1961-65, and for each of the years 1965 to 1969, and crude marriage rates for the same periods are shown in the following tables. Annual averages for each five-year period from 1861 to 1950 were published in Year Book No. 39, page 575.

#### MARRIAGES(a): STATES AND TERRITORIES, 1941 TO 1969

Period	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
Annual average—									
1941-45 . . .	28,506	19,450	10,563	6,517	4,668	2,097	71	109	71,981

1956-60 . . .	28,432	20,422	10,254	6,517	5,145	2,573	190	321	73,854
1961-65 . . .	31,788	23,262	11,437	7,514	5,768	2,700	248	533	83,250
Annual total—									
1965 . . .	35,176	26,421	12,967	8,680	6,448	2,888	296	670	93,546
1966 . . .	35,575	27,089	13,325	9,051	7,001	2,946	312	747	96,046
1967 . . .	37,077	28,004	13,634	9,434	7,430	3,213	325	883	100,000
1968 . . .	39,213	29,724	14,860	9,652	8,086	3,426	419	965	106,345
1969 . . .	41,286	30,860	15,669	10,599	8,993	3,532	413	1,118	112,470

(a) Excludes particulars of full-blood Aborigines before 1967.

#### CRUDE MARRIAGE RATES(a): STATES AND TERRITORIES, 1941 TO 1969

Period	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
Average annual rate—									
1941-45 . . .	9.97	9.86	10.04	10.61	9.74	8.61	7.2	7.6	9.94
1946-50 . . .	9.90	9.72	9.41	9.87	10.01	9.56	9.4	9.4	9.77
1951-55 . . .	8.41	8.34	7.91	8.11	8.44	8.35	9.1	8.2	8.29
1956-60 . . .	7.70	7.50	7.14	7.26	7.36	7.69	8.6	7.5	7.50
1961-65 . . .	7.86	7.64	7.27	7.42	7.43	7.49	8.1	7.3	7.63
Annual rate—									
1965 . . .	8.43	8.35	7.94	8.16	7.91	7.85	8.4	7.6	8.25
1966 . . .	8.40	8.41	8.01	8.29	8.36	7.93	8.3	7.7	8.31
1967 . . .	8.60	8.55	8.01	8.49	8.47	8.53	5.5	8.5	8.46
1968 . . .	8.94	8.93	8.57	8.57	8.89	8.96	6.5	8.6	8.83
1969 . . .	9.22	9.11	8.86	9.26	9.49	9.09	6.1	9.1	9.14

(a) Number of marriages per 1,000 of mean population. Excludes particulars of full-blood Aborigines before 1967.

NOTE. In some instances rates are based on too few marriages to warrant calculation to the second decimal place.

The crude marriage rates for Australia and the more populous countries of the world are shown for the latest available year in International Vital Statistics at the end of this chapter.

**Previous marital status**

The following table shows the relative marital status of bridegrooms and brides in 1969.

**MARITAL STATUS OF BRIDEGROOMS AND BRIDES  
AUSTRALIA, 1969**

<i>Previous Marital status of bridegrooms</i>	<i>Previous Marital status of brides</i>			<i>Total bride- grooms</i>
	<i>Spinsters</i>	<i>Widows</i>	<i>Divorced</i>	
Bachelors . . .	97,644	1,191	3,401	102,236
Widowers . . .	913	1,672	840	3,425
Divorced . . .	3,629	843	2,337	6,809
<b>Total brides . . .</b>	<b>102,186</b>	<b>3,706</b>	<b>6,578</b>	<b>112,470</b>

**Age and marital status at marriage**

Particulars of age at marriage in age groups, and previous marital status, of bridegrooms and brides in 1969 are given hereunder. There were 16,046 males under 21 years of age married during 1969, while the corresponding number of females was 47,090. At the other extreme there were 1,123 bridegrooms and 578 brides in the age group 65 years and over.

**AGE AND PREVIOUS MARITAL STATUS OF BRIDEGROOMS AND BRIDES  
AUSTRALIA, 1969**

The average age at marriage of brides and bridegrooms has declined during recent years. The average ages, in years, of brides for each of the five years to 1969 were: 1965, 24.09; 1966, 24.02; 1967, 24.03; 1968, 23.90; and 1969, 23.84. The average ages, in years, of bridegrooms were: 1965, 27.24; 1966, 27.10; 1967, 27.01; 1968, 26.76; and 1969, 26.63. The difference in the average age at marriage between brides and bridegrooms is generally about three years, the difference in 1969 being 2.79 years.

#### Countries of birth of persons marrying

The following table shows the relative countries of birth of bridegrooms and brides married in 1969.

#### RELATIVE COUNTRIES OF BIRTH OF BRIDEGROOMS AND BRIDES AUSTRALIA, 1969

#### Celebration of marriages

Under the provisions of the *Marriage Act 1961-1966* marriages may be celebrated either by ministers of religion who are registered for that purpose with the Registrars of Ministers of Religion in each State or Territory, or by certain civil officers, in most cases district registrars. Most of the marriages are celebrated by ministers of religion. The registered ministers in 1969 belonged to more than fifty different religious denominations. The figures for 1969 are shown in the following table.

#### MARRIAGES BY AUTHORISED CELEBRANTS: STATES AND TERRITORIES, 1969

#### Divorce

The number of dissolutions of marriage, nullities of marriage and judicial separations was 10,789 in 1968 and 10,979 in 1969. Further information may be found in the chapter Public Justice.

# BIRTHS, DEATHS AND MARRIAGES: AUSTRALIA 1870 TO 1969

NOTE. EXCLUDES PARTICULARS OF FULL-BLOOD ABORIGINES BEFORE 1967

### Births and Fertility

Natural increase of a population has been defined as the excess of births over deaths, and the relation between fertility and mortality determines the rate of reproduction or replacement of the population.

#### Number of live births

There are various methods of measuring the fertility of the population by relating the number of births to the numbers of the population. In each the basic data are, of course, the numbers of live births. Statistics of live births registered in Australia between 1941 and 1969 are contained in the following table which shows the average annual number of live births in each State and Territory for each five-year period from 1941 to 1965 and the total number of live births for each year from 1965 to 1969. Corresponding figures for each five-year period from 1861 to 1950 were published in Year Book No. 39, page 583.

#### LIVE BIRTHS(a): STATES AND TERRITORIES, 1941 TO 1969

(a) Excludes particulars of full-blood Aborigines before 1967.

#### Crude birth rates

The oldest and most popular method of measuring fertility is to relate the number of births to the total population, which gives the crude birth rate. The crude birth rate measures the rate per thousand persons (irrespective of age or sex) at which the population has added to its numbers by way of births during a given period. Other methods of measuring fertility are shown on pages 167 and 169. Crude birth rates for each five-year period from 1941 to 1965 and for each year from 1965 to 1969 are set out below for each State and Territory.

#### CRUDE BIRTH RATES(a): STATES AND TERRITORIES, 1941 TO 1969

Period	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
Average annual rates—									
1941-45 .	19.79	19.27	22.28	20.43	21.72	22.23	11.4	26.8	20.28

1968 .	18.62	21.10	20.30	18.84	21.47	21.76	32.4	23.4	20.00
1969 .	19.21	20.97	20.67	19.19	21.91	21.73	33.3	25.2	20.33

(a) Number of births per 1,000 of mean population. Excludes particulars of full-blood Aborigines before 1967.

NOTE. In some instances rates are based on too few births to warrant calculation to the second decimal place.

# RATES OF BIRTHS, DEATHS AND NATURAL INCREASE: AUSTRALIA

1870 TO 1969

NOTE. EXCLUDES PARTICULARS OF FULL BLOOD ABORIGINES BEFORE 1967

PLATE 19  
165

The birth rates in the table above are based on *live births registered in the respective States and Territories*. Some confinements, however, take place in States other than the State in which the mother usually resides, particularly in areas near State borders. The variations thus caused in the birth rates for the States and Territories by referring the birth registrations to the mother's usual residence are shown by the following corrected rates for 1968—New South Wales, 18.66; Victoria, 21.08; Queensland, 20.23; South Australia, 18.79; Western Australia, 21.50; Tasmania, 21.80; Northern Territory, 33.01; and Australian Capital Territory, 23.04.

A graph showing the birth rate for each year from 1870 to 1969 is shown on page 165. The crude birth rates of Australia and the more populous countries of the world for the latest available year are shown in International Vital Statistics at the end of this chapter.

#### Masculinity of live births

The masculinity of live births, i.e., the number of males born for every 100 female births, has remained fairly stable for Australia at about 105. But when the number of births for which masculinity is being calculated is small (for example, totals for smaller States) considerable variation is shown. The averages for the ten years 1951–60 were as follows: New South Wales, 105.38; Victoria, 105.50; Queensland, 105.80; South Australia, 104.89; Western Australia, 105.25; Tasmania, 104.96; Northern Territory, 107.16; Australian Capital Territory, 108.77; Australia, 105.43. The following table shows the figures for Australia for each ten-year period from 1901 to 1960 and for each of the years 1967 to 1969.

#### MASCULINITY(a) OF LIVE BIRTHS REGISTERED: AUSTRALIA, 1901 TO 1969

	1901–10	1911–20	1921–30	1931–40	1941–50	1951–60	1967	1968	1969
Total births	105.22	105.27	105.55	105.12	105.38	105.43	105.43	105.41	105.22
Ex-nuptial births	104.08	105.25	105.16	105.36	105.34	103.99	106.16	104.21	

(a) Number of males born for every 100 female births. Excludes particulars of full-blood Aborigines before 1967.

#### Fertility rates

The principal demographic factors affecting the level of crude birth rates are the proportion of women of child-bearing age in the population and the proportion of such women who are married. These factors may vary considerably at different periods and for different countries, and a population with a high proportion of married women of child-bearing age will have a higher crude birth rate than one with a low proportion, although the fertilities of the two populations may be identical. In order to compare fertilities, births are sometimes related to the number of women of child-bearing age or, alternatively, nuptial births are related to the number of married women of child-bearing age. Thus births are related to potential mothers, giving the fertility rate.

The following table sets out for certain periods, commencing with 1880–82, the number of births per thousand of mean population, the number of births per thousand women of child-bearing age and the number of nuptial births per thousand married women of child-bearing age. For purposes of this table the child-bearing age has been taken to be fifteen to forty-four years inclusive, but births to mothers who were stated to be under fifteen or over forty-four years have been included in the compilations.

#### CRUDE BIRTH RATES AND FERTILITY RATES: AUSTRALIA, 1880-82 TO 1965-67(a)

Period	Average annual rates			Index Nos (Base: 1880–82 = 100)		
	Fertility rates			Fertility rates		
	Crude birth rate(b)	Births per 1,000 women aged 15–44 years	Nuptial births per 1,000 married women aged 15–44 years	Crude birth rate(b)	Births per 1,000 women aged 15–44 years	Nuptial births per 1,000 married women aged 15–44 years
1880–82		35.3	170	100	100	100
1890–92		34.5	159	98	94	103
1900–02		27.2	117	77	69	73
1910–12		27.2	117	77	69	74
1920–22		25.0	107	71	63	61
1932–34		16.7	71	47	42	41
1946–48		23.6	104	67	61	50
1953–55		22.7	109	64	64	46
1960–62		22.5	112	64	66	48
1965–67		19.5	95	55	56	41

(a) Excludes particulars of full-blood Aborigines before 1965–67. (b) Number of births per 1,000 of mean population.

The table above shows how increasing proportions both of women of child-bearing age and of married women of child-bearing age inflate the crude birth rate. Thus, while the nuptial birth rate for married women increased by only 22 per cent over the period 1932-34 to 1946-48, the crude birth rate rose by 41 per cent owing principally to the greatly increased number of marriages during that period.

#### Age-specific birth rates

So long as customary ages at marriage do not change drastically the main demographic factor affecting the number of births is the age composition of the potential mothers in the population. Within the child-bearing group the fertility of women of different ages varies considerably, and a clearer view of the fertility of the population can be obtained from an examination of what are known as its age-specific birth rates, that is the number of births to women of specified ages per thousand women of those particular ages.

Age-specific birth rates are more commonly expressed in age groups than in single ages. In the following table such rates are shown in five-year age groups for Australia for the period 1941 to 1968. A graph on the following page shows the age-specific birth rates for each year during the period 1921 to 1968.

AGE-SPECIFIC BIRTH RATES(a): AUSTRALIA, 1941 TO 1968

Age group (years)	1941	1946	1951	1956	1961	1966	1967	1968
15-19 . . .	24.27	26.13	38.62	42.99	47.35	48.89	48.37	48.88
20-24 . . .	121.02	151.07	177.23	210.87	225.81	173.07	170.76	173.64
25-29 . . .	143.46	183.18	185.32	203.04	221.21	183.88	184.97	190.80
30-34 . . .	104.94	131.72	123.10	123.52	131.11	105.12	102.77	103.30
35-39 . . .	57.82	78.29	65.03	64.20	63.38	50.62	47.85	46.74
40-44 . . .	19.61	24.57	21.02	19.74	19.17	14.16	13.49	12.89
45-49 . . .	1.67	2.10	1.61	1.58	1.41	1.04	1.09	1.05

(a) Number of births per 1,000 of women in each age group. Excludes particulars of full-blood Aborigines before 1967.

#### Gross and net reproduction rates for females

A single measure of reproduction, known as the gross reproduction rate, is obtained by adding together the specific fertility rates for each age in the child-bearing group. This measure indicates the number of female children who would be born on an average to women living right through the child-bearing period, if the conditions on which the rate is based continue. The rate is unaffected by the age composition of the potential mothers, and consequently it shows more clearly than the crude birth rate the reproductive propensity of the population. It is, however, an imperfect measure of reproduction because it does not take into account the females who fail to live from birth to the end of the reproductive period. A more accurate measure of this nature is obtained by multiplying the specific fertility rates by the number of females in the corresponding age group of the stationary or life table population and summing the products. Allowance is thus made for the effect of mortality and the result is known as the net reproduction rate. The net reproduction rate indicates the average number of female children who would be born to women during their lifetime if they were subject at each age to the fertility and mortality rates on which the calculation is based. A constant net reproduction rate of unity indicates that the population will ultimately become stationary. If it continues greater than unity, the population will ultimately increase; if less than unity it will ultimately decrease. The following table should be read in the light of the comment which follows it and of the index of marriage fertility, page 169.

GROSS AND NET REPRODUCTION RATES(a): AUSTRALIA, 1881 TO 1968

Year	Gross reproduction rate	Net reproduction rate	Year	Gross reproduction rate	Net reproduction rate
1881(b)	2.65	(c)1.88	1951.	1.486	(h)1.428
1891(b)	2.30	(c)1.73	1954.	1.559	(i)1.499

# BIRTH RATES, BY AGE OF MOTHER: AUSTRALIA

1921 TO 1968

(NUMBER OF BIRTHS PER 1,000 OF FEMALE POPULATION IN EACH AGE GROUP)

Note. (1) The vertical scale is logarithmic, and the curves rise and fall according to the rate of increase and decrease; actual numbers are indicated by the scale.  
 (2) There is a break in continuity between 1966 and 1967. From 1967 the figures include Aborigines. Prior to 1967 birth registrations identified as those of full-blood Aborigines were excluded.

It is not strictly correct to assume, as in the calculations of the rates above, that a particular age-specific fertility rate can be applied to a hypothetical group of women reaching that age, without taking into account previous fertility and marriage experience. Reproduction rates are therefore unreliable when birth and marriage rates have been changing. The indexes of marriage fertility shown on the next page are also of doubtful reliability in similar circumstances.

In the following table a comparison is given of the gross and net reproduction rates recorded for various countries in the period 1954 to 1968. These represent the latest available international comparisons. The registration of vital events has not been fully established in many countries and consequently details for the calculation of reproduction rates for those countries are not available. In order that the table should be as representative as possible some countries have been included even though the gross reproduction rate is the only figure available.

## GROSS AND NET REPRODUCTION RATES: VARIOUS COUNTRIES

Country	Period	Reproduction rate		Country	Period	Reproduction rate	
		Gross	Net			Gross	Net
Venezuela . . . . .	1963	3.04	2.69	Norway . . . . .	1965	1.41	1.37
Mauritius . . . . .	1966	2.70	2.34	France . . . . .	1966	1.35	1.32
Malaya . . . . .	1960	2.9	..	Australia . . . . .	1968	1.41	1.36
Ceylon . . . . .	1961	2.5	..	England and Wales . . . . .	1966	1.33	1.29
Thailand . . . . .	1954	2.26	1.70	Belgium . . . . .	1965	1.33	1.28
Chile . . . . .	1964	2.16	1.83	Yugoslavia . . . . .	1965	1.32	..
Ireland, Republic of . . . . .	1966	1.86	1.81	Czechoslovakia . . . . .	1964	1.22	1.17
New Zealand . . . . .	1965	1.62	1.67	Germany—			
Canada . . . . .	1966	1.37	1.33	Federal Rep. . . . .	1965	1.22	1.17
United States of				Democratic Rep. . . . .	1965	1.22	1.16
America . . . . .	1966	1.33	1.29	Sweden . . . . .	1966	1.15	1.13
Netherlands . . . . .	1965	1.48	1.43	Switzerland . . . . .	1965	1.23	1.19
Portugal . . . . .	1964	1.52	1.35	Japan . . . . .	1965	1.04	1.01
Scotland . . . . .	1966	1.40	1.35	Hungary . . . . .	1966	0.91	0.86

In comparing the reproduction rates of the countries shown allowance should be made for any differences in years, as the rates for any one country from year to year are affected by variations in the incidence of marriage, as well as the stationary or life table population used.

## Fertility of marriages

More satisfactory estimates of the fertility of marriages may be made by relating nuptial births in each year to the marriages from which they could have resulted. Births to women of a certain number of years duration of marriage are related to the number of marriages taking place that number of years previously and the resulting rates are added to give a total for all durations. The table below sets out this index of current fertility per marriage in respect of births in the individual years shown.

## FERTILITY OF MARRIAGES(a): AUSTRALIA, 1957 TO 1968

Year	Nuptial births per marriage	Year	Nuptial births per marriage	Year	Nuptial births per marriage
1957 . . . . .	2.69	1961 . . . . .	2.84	1965 . . . . .	2.42
1958 . . . . .	2.69	1962 . . . . .	2.78	1966 . . . . .	2.32
1959 . . . . .	2.73	1963 . . . . .	2.72	1967 . . . . .	2.31
1960 . . . . .	2.76	1964 . . . . .	2.58	1968 . . . . .	2.09

(a) Excludes particulars of full-blood Aborigines before 1967. For 1967, births of full-blood Aborigines resulting from tribal marriages have also been excluded, as particulars of tribal marriages are not available.

See text at top of this page.

The figure for a particular year gives the estimated number of children which a marriage would produce according to the fertility conditions of that year.

Births are omitted from the calculation if the marriage did not take place in Australia. Births which occur overseas to Australian marriages cannot be included and hence some understatement is present. Furthermore the results do not take account of the previous reproductive history of a marriage or of age at marriage.

**Ex-nuptial live births**

The variations in the proportions of ex-nuptial live births as between the individual States and Territories for 1968 and for Australia at intervals from 1901 to 1968 are shown in the following tables.

**EX-NUPTIAL LIVE BIRTHS  
NUMBER AND PROPORTION, STATES AND TERRITORIES, 1968**

	<i>N.S.W.</i>	<i>Vic.</i>	<i>Qld</i>	<i>S.A.</i>	<i>W.A.</i>	<i>Tas.</i>	<i>N.T.</i>	<i>A.C.T.</i>	<i>Aust.</i>
Number . . . . .	6,622	4,166	3,756	1,558	2,014	657	312	86	19,171
Proportion of total births % . . . . .	8.11	5.93	10.67	7.35	10.31	7.90	14.97	3.25	7.96

**EX-NUPTIAL LIVE BIRTHS: NUMBERS, PROPORTION AND RATES(a)  
AUSTRALIA, 1901 TO 1968**

	<i>Annual average</i>						1964	1965	1966	1967	1968
	1901-10	1911-20	1921-30	1931-40	1941-50	1951-60					
Number . . . . .	6,498	6,836	6,238	5,133	6,780	9,013	14,925	15,531	16,541	17,734	19,171
Rates(b) . . . . .	1.60	1.39	1.04	0.76	0.90	0.97	1.34	1.37	1.43	1.50	1.59
Proportion of total births % . . . . .	6.05	5.22	4.66	4.40	4.13	4.25	6.51	6.97	7.43	7.73	7.96

(a) Excludes particulars of full-blood Aborigines before 1967. (b) Number of ex-nuptial births per 1,000 of mean population.

A further measure of ex-nuptiality is obtained by calculating the number of ex-nuptial births per thousand of the single, widowed and divorced female population aged from 15 to 44 years. On this basis, the number of ex-nuptial births per 1,000 unmarried women of ages 15 to 44 is as follows: 1880-82, 14.49; 1890-92, 15.93; 1900-02, 13.30; 1910-12, 12.53; 1920-22, 10.50; 1932-34, 6.91; 1946-48, 11.45; 1953-55, 14.45; 1960-62, 18.49; and 1965-67, 20.96. Particulars of full-blood Aborigines are excluded throughout. Ex-nuptial births to married women, which are not recorded separately, are included in these figures and it is not possible to determine to what extent they influence the trend shown.

**Legitimations**

Under the provisions of the Commonwealth *Marriage Act* 1961-1966, which came into operation on 1 September 1963, a child whose parents were not married to each other at the time of its birth becomes legitimised on the subsequent marriage of its parents. The legitimisation takes place whether or not there was a legal impediment to the marriage of the parents at the time of the child's birth and whether or not the child was still living at the time of the marriage, or in the case of a child born before 1 September 1963, at that date. Prior to the introduction of this Act, legitimations took place under Acts passed in the several States to legitimise children born before the marriage of their parents, provided that no legal impediment to the marriage existed at the time of birth. On registration in accordance with the provisions of the Legitimation Acts, any child who came within the scope of their purposes, born before or after the passing thereof, was deemed to be legitimate from birth by the post-natal union of its parents and entitled to the status of offspring born in wedlock. The number of children legitimised in Australia during 1968 was 3,167.

**Multiple births**

Because the current Australian birth statistics are based only on those confinements which resulted in a live-born child, the number of confinements for multiple births for Australia is understated—firstly, because in cases where all children of a multiple birth are stillborn the confinement is excluded, and secondly, because some cases of multiple births in which only one child was live born are registered as single births.

## Number of confinements

The following table shows the number of confinements resulting in one or more live births and the number of live births. The figures exclude cases where the births were of stillborn children only.

## LIVE BIRTHS AND CONFINEMENTS: STATES AND TERRITORIES, 1968

## STILLBIRTHS ASSOCIATED WITH MULTIPLE BIRTHS INCLUDED ABOVE

Twins . . .	31	18	16	1	8	1	2	..	77
Triplets . . .	2	..	1	..	..	..	..	..	3

## CONFINEMENTS RESULTING IN BIRTHS SHOWN ABOVE

Nuptial . . .	74,309	65,383	31,102	19,465	17,348	7,576	1,750	2,532	219,465
Ex-nuptial . . .	6,557	4,123	3,722	1,549	1,994	651	309	86	18,991
<b>Total . . .</b>	<b>80,866</b>	<b>69,506</b>	<b>34,824</b>	<b>21,014</b>	<b>19,342</b>	<b>8,227</b>	<b>2,059</b>	<b>2,618</b>	<b>238,456</b>

NOTE. Owing to the registration procedure adopted in some States, it is possible that in some cases where one child only of a multiple pregnancy was liveborn, the confinement has been treated as a single birth. However, the numbers of multiple births are not significantly affected. See also page 173.

Multiple births recorded on this basis during 1968 comprised 2,472 cases of twins, 24 cases of triplets, two cases of quadruplets and one case of quintuplets, the resulting number of live born and stillborn children respectively 4,867 and 77 for twins, 69 and 3 for triplets, 8 live born children for quadruplets and 5 liveborn children for quintuplets. This represents an average of 10.37 recorded cases of twins and 0.10 recorded cases of triplets per 1,000 confinements or, alternatively, mothers of twins represented 1 in every 96 mothers and mothers of triplets 1 in every 9,936. Total cases of multiple births represented 10.47 per 1,000 confinements or 1 in every 95 mothers. The proportion of mothers of multiple births to total mothers does not vary greatly from year to year.

## Confinements—ages of parents

The relative ages of the parents of children whose births were registered in 1968 have been tabulated separately for male and female births, multiple births being distinguished from single births. For confinements and for multiple births, the relative ages of parents are shown in *Demography*, Bulletin No. 85. In the following table the relative ages of parents are shown in five-year groups.

## CONFINEMENTS, BY RELATIVE AGES OF PARENTS: AUSTRALIA, 1968

Age of father (years)	Age of mother (years)									Total
	Under 15	15-19	20-24	25-29	30-34	35-39	40-44	45 and over	Not stated

Other and unspecified	1,819	38	339	69	189	63	25	81	16	105	2,660	5,404
Total mothers	164,932	1,243	16,516	2,976	8,288	9,772	2,257	3,085	2,398	3,161	4,837	219,465

## Confinements—age, duration of marriage and issue of mothers

The total number of nuptial confinements resulting in live births in 1968 was 219,465, comprising 217,155 single births, 2,287 cases of twins, 20 cases of triplets, two cases of quadruplets, and one case of quintuplets. The following tables relating to previous issue exclude the issue of former marriages and stillborn children. On the other hand, they include in some States children by the same father who were born to the mother prior to the marriage. Children born at the present confinement are included in the total issue shown.

The following table shows that in 1968 the duration of marriage of mothers of nuptial children ranged from less than one year to over 25 years and that the average family increased fairly regularly with the duration of marriage. The average issue of married mothers who bore children in 1968 was 2.34, compared with 2.38 in 1967, 2.42 in 1966, 2.48 in 1965, and 2.56 in 1964.

**NUPTIAL CONFINEMENTS BY DURATION OF MARRIAGE, AND AVERAGE ISSUE OF MOTHERS: AUSTRALIA, 1968**

<b>Total married mothers</b>	<b>18,132</b>	<b>77,199</b>	<b>69,657</b>	<b>34,251</b>	<b>15,416</b>	<b>4,451</b>	<b>(f)359</b>	<b>219,465</b>

(a) Includes three confinements for which the age of mother was not stated. (b) Includes five confinements for which the age of mother was not stated. (c) Includes one confinement for which age of mother was not stated. (d) Includes two confinements for which age of mother was not stated. (e) Includes two confinements for which the previous issue was not stated. (f) Includes fourteen confinements for which the age of mother was not stated.

**Multiple births—previous issue of mothers**

Of married mothers of twins in 1968, 681 had no previous issue either living or dead, 651 had one child previously, 417 had two previous issue, 241 three, 123 four, 83 five, 28 six, 27 seven, 16 eight, 8 nine, 6 ten, 2 eleven, 2 twelve, and 2 thirteen. Of the 20 cases of nuptial triplets, two cases of quadruplets and one case of quintuplets registered during 1968, 4 mothers had no previous issue, 7 had one, 6 had two, 2 had three, 2 had four, 1 had five, and 1 had six previous issue.

## Nuptial first births

The following table shows the number of nuptial first births classified by grouped ages of mothers and grouped durations of marriage of mothers.

NUPTIAL FIRST BIRTHS, BY AGE OF MOTHER AND DURATION OF MARRIAGE  
AUSTRALIA, 1968

Duration of marriage	Age of mother (years)							Not stated	Total
	Under 20	20-24	25-29	30-34	35-39	40-44	45 and over		
Under 8 months	10,842	8,619	1,199	308	148	55	1	..	21,172

The following table provides a comparison between the numbers of nuptial first births and subsequent births in periods since 1911 and shows also the proportion of first to total nuptial confinements.

NUPTIAL FIRST BIRTHS AND SUBSEQUENT BIRTHS<sup>(a)</sup>  
AUSTRALIA, 1911 TO 1968

Period	Nuptial confinements			Proportion of first to total nuptial confinements (per cent)
	First births	Other births	Total	
<i>Annual average—</i>				
1911-20	33,595	88,997	122,592	27.40
1921-30	38,120	88,086	126,206	30.20
1931-40	39,243	71,136	110,379	35.55
1941-50	58,818	96,994	155,812	37.75
1951-60	64,379	136,264	200,643	32.09
<i>Annual total—</i>				
1964	68,586	143,437	212,023	32.35
1965	70,197	134,941	205,138	34.22
1966	73,462	130,499	203,961	36.02
1967	76,127	133,302	209,429	36.35
1968	81,341	138,124	219,465	37.06

(a) Excludes particulars of full-blood Aborigines before 1967.

## Stillbirths

Interstate comparisons of the figures and rates in the following tables are affected by the differences in the definitions of stillbirths adopted by the various States, and only the trends in the rates for the States should be compared. For various reasons, the registration of stillbirths is not as complete as for live births and deaths; particulars for the Territories and the smaller States are more affected by this than are those for the larger States. Stillbirth registration was not compulsory in Tasmania until 1967. The figures shown in the tables represent those stillbirths voluntarily registered during the year.

## STILLBIRTHS(a): STATES AND TERRITORIES, 1936 TO 1968

Period	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
Annual average—									
1936-40 . . . . .	1,409	854	n.a.	(b)274	234	144	n.a.	5	n.a.
1941-45 . . . . .	1,478	966	(c)657	324	248	143	n.a.	9	cd3,825
1946-50 . . . . .	1,405	949	626	368	274	161	n.a.	12	(d)3,795
1951-55 . . . . .	1,239	849	581	290	271	139	8	16	3,393
1956-60 . . . . .	1,253	839	558	274	235	109	6	19	3,293
1961-65 . . . . .	1,104	794	468	264	194	87	17	18	2,946
Annual total—									
1964 . . . . .	1,003	771	402	252	170	69	13	15	2,695
1965 . . . . .	947	747	391	256	181	89	15	23	2,649
1966 . . . . .	964	762	405	237	168	111	11	31	2,689
1967 . . . . .	863	797	372	211	188	83	(e)49	24	2,587
1968 . . . . .	806	734	365	217	183	79	(f)39	26	2,449

(a) Excludes particulars of full-blood Aborigines before 1967. (b) Three years 1938-40. (c) Figures for Queensland are not available for 1941. (d) Excludes Northern Territory. (e) Includes 25 foetal deaths occurring in remote localities for which the period of gestation was not stated. The Registration Ordinance requires registration of any foetal death of at least twenty weeks gestation. (f) Includes 13 foetal deaths.

The incidence of stillbirths in each State and Territory as measured by the rate per 1,000 of all births, both live and still, is as follows.

## PROPORTION OF STILLBIRTHS(a)(b): STATES AND TERRITORIES, 1936 TO 1968

Period	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
Average annual rate—									
1936-40 . . . . .	28.7	27.4	n.a.	(c)27.5	25.7	28.7	n.a.	22.2	n.a.

1946-50 . . . . .	20.0	19.6	21.9	22.1	20.5	22.3	n.a.	16.3	(e)20.46
1951-55 . . . . .	16.5	15.5	18.4	15.8	17.0	17.5	17.2	17.1	16.57
1956-60 . . . . .	15.5	13.5	16.1	13.5	13.7	12.6	8.6	14.3	14.59
1961-65 . . . . .	13.1	12.0	13.1	12.2	11.4	10.2	18.4	9.3	12.49
Annual rate—									
1964 . . . . .	12.3	11.7	11.4	11.9	10.1	8.3	(f)	(f)	11.62
1965 . . . . .	12.0	11.6	11.5	12.1	11.1	11.7	(f)	10.5	11.75
1966 . . . . .	12.2	11.8	12.2	11.5	9.8	14.8	(f)	13.2	11.93
1967 . . . . .	10.8	12.0	10.6	10.2	10.3	10.9	24.9	9.9	11.16
1968 . . . . .	9.8	10.3	10.3	10.1	9.3	9.4	18.4	9.7	10.11

(a) Numbers of stillbirths per 1,000 of all births (live and still). (b) Excludes particulars of full-blood Aborigines before 1967. (c) Three years 1938-40. (d) Figures for Queensland are not available for 1941. (e) Excludes Northern Territory. (f) Less than twenty events; rates not calculated.

NOTE. Because of the smallness of the numbers of stillbirths occurring in the Australian Capital Territory and the Northern Territory the rates for these Territories (i.e. the number per thousand live births and stillbirths) are subject to considerable fluctuation.

## Mortality

## Number of deaths

The following tables show the number of deaths, male and female, registered in each State and Territory during 1969. Stillbirths, although registered as both births and deaths in some States are excluded from the death statistics published herein.

## DEATHS, SEXES: STATES AND TERRITORIES, 1969

Sex	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
Males . . . . .	22,607	15,860	9,184	5,207	4,313	1,876	295	344	59,686
Females . . . . .	18,058	13,116	6,602	4,130	3,037	1,433	190	244	46,810
Persons . . . . .	40,665	28,976	15,786	9,337	7,350	3,309	485	588	106,496

A summary of the number of deaths in each State and Territory from 1941 to 1969 is given in the following table. Annual averages for each five-year period from 1861 to 1950 were published in Year Book No. 39, page 597.

**DEATHS(a): STATES AND TERRITORIES, 1941 TO 1969**

<i>Period</i>	<i>N.S.W.</i>	<i>Vic.</i>	<i>Qld</i>	<i>S.A.</i>	<i>W.A.</i>	<i>Tas.</i>	<i>N.T.</i>	<i>A.C.T.</i>	<i>Aust.</i>
Annual average—									
1941-45(b)	27,807	20,964	9,715	6,303	4,724	2,488	64	71	72,136
1946-50(b)	29,552	21,827	10,357	6,507	4,802	2,459	76	103	75,683
1951-55	32,135	22,900	11,187	7,182	5,263	2,576	109	131	81,483
1956-60	34,002	24,254	12,008	7,732	5,523	2,668	117	184	86,488
1961-65	37,514	26,569	13,570	8,388	6,043	2,939	152	290	95,465
Annual total—									
1965	38,949	28,031	14,114	8,788	6,274	3,043	161	355	99,715
1966	40,546	28,673	14,861	9,323	6,772	3,159	154	441	103,929
1967	39,613	28,373	14,736	9,071	6,779	3,228	527	376	102,703
1968	41,803	29,967	16,078	9,916	7,468	3,284	543	488	109,547
1969	40,665	28,976	15,786	9,337	7,350	3,309	485	588	106,496

(a) Excludes particulars of full-blood Aborigines before 1967. (b) Excludes deaths of defence personnel and of internees and prisoners of war from overseas for the period September 1939 to June 1947.

**Crude death rates**

The commonest method of measuring the mortality rate is to relate the number of deaths for a given period to the mean population for that period, thus obtaining the crude death rate. This rate for a given period measures the number per thousand of population by which the population is depleted through deaths during that period.

**CRUDE DEATH RATES(a): STATES AND TERRITORIES, 1941 TO 1969**

<i>Period</i>	<i>N.S.W.</i>	<i>Vic.</i>	<i>Qld</i>	<i>S.A.</i>	<i>W.A.</i>	<i>Tas.</i>	<i>N.T.</i>	<i>A.C.T.</i>	<i>Aust.</i>
Average annual rate—									
1941-45(b)	9.73	10.63	9.24	10.26	9.86	10.21	6.4	5.0	9.96
1946-50(b)	9.70	10.37	9.13	9.76	9.23	9.30	6.3	5.3	9.74
1951-55	9.49	9.55	8.71	9.25	8.49	8.48	6.9	4.58	9.25
1956-60	9.20	8.91	8.36	8.62	7.90	7.97	5.32	4.31	8.78
1961-65	9.27	8.73	8.63	8.28	7.78	8.15	4.95	3.94	8.75
Annual rate—									
1965	9.33	8.86	8.64	8.26	7.70	8.27	4.6	4.0	8.79
1966	9.57	8.90	8.93	8.54	8.09	8.50	4.1	4.6	8.99
1967	9.19	8.66	8.65	8.16	7.73	8.57	8.8	3.6	8.69
1968	9.53	9.01	9.27	8.81	8.21	8.59	8.4	4.3	9.10
1969—									
Males	10.05	9.33	10.25	9.05	8.95	9.57	6.0	5.4	9.63
Females	8.09	7.77	7.56	7.25	6.53	7.44	6.1	4.1	7.66
Persons	9.08	8.55	8.92	8.15	7.76	8.51	7.1	4.8	8.65

(a) Number of deaths per 1,000 of mean population. Excludes particulars of full-blood Aborigines before 1967. (b) Excludes deaths of defence personnel, etc., from September 1939 to June 1947.

NOTE. Crude death rates (i.e. the number of deaths per thousand of mean population) are affected by the particular age and sex composition of the population. In the Australian Capital Territory and the Northern Territory the population at risk in the higher ages is lower proportionately than in other States, largely as a result of the rapid increases of the population in the lower ages. In some instances rates are based on too few deaths to warrant calculation to the second decimal place.

A graph showing the crude death rate for each year from 1870 to 1969 will be found on page 165.

### Standardised death rates

The death rates quoted on page 176 are crude rates, i.e. they simply show the number of deaths per thousand of mean population without taking into consideration differences in the sex and age composition of the population. Other conditions being equal, however, the crude death rate of a community will be low if it contains a large proportion of young people (not infants), and conversely it will be relatively high if the population includes a large proportion of elderly people. The foregoing table of crude death rates, therefore, does not indicate comparative incidence of mortality either as between States in the same year or in any one State over a period of years. In order to obtain a comparison of mortality rates on a uniform basis as far as sex and age constitution are concerned, 'standardised' death rates may be computed. For a description of the method used, and a table showing standardised death rates as compared with crude death rates as at Census dates from 1921 to 1966 see Year Book No. 55, page 184.

### True death rates

The main objections to standardised death rates are that the choice of a standard population is arbitrary and that the standardised rates have little value except for comparative purposes, and even then variation of the standard population may make appreciable differences. However, a correct measurement of the mortality of the population can be obtained from life tables. A life table represents the number of survivors at each age from a group of newly-born children who are subject to given mortality conditions, and from such a table the complete expectation of life at birth can be calculated. The reciprocal of this figure is known as the true death rate, since, if the complete expectation of life of a person at birth is fifty years, say, then each person will on the average die fifty years after birth, so that in a stationary population one person in fifty or twenty per thousand, will die each year. The true death rate for a given period is unaffected by the particular age distribution of that period and is determined solely by the mortality experience of the period as manifested in the rate of survival from each year of age to the next. The table below sets out true death rates for the periods covered by Australian life tables together with estimates for recent years based on abridged life tables calculated by the Commonwealth Statistician. These estimates are subject to revision when the Australian life tables 1965-1967 become available.

TRUE DEATH RATES: AUSTRALIA  
1881-90 TO 1967(a)

Period	True death rate	
	Males(b)	Females(c)
1881-90 . . .	21.19	19.67
1891-1900 . . .	19.58	18.26
1901-10 . . .	18.12	17.00
1920-22 . . .	16.91	15.80
1932-34 . . .	15.75	14.89
1946-48 . . .	15.14	14.16
1953-55 . . .	14.89	13.75
1960-62 . . .	14.72	13.48
1964(d) . . .	14.84	13.55
1965(d) . . .	14.77	13.48
1966(d) . . .	14.80	13.51
1967(d) . . .	14.76	13.43
1968(d) . . .	14.83	13.50

(a) Excludes particulars of full-blood Aborigines before 1967. (b) Number of deaths per 1,000 males in stationary population. (c) Number of deaths per 1,000 females in stationary population. (d) Based on abridged life tables calculated by the Commonwealth Statistician. These tables are based on estimates of population by age, adjusted to take into account the 1966 census.

The crude death rates and the true death rates of Australia and the more populous countries of the world for the latest available year are shown in the table in International Vital Statistics at the end of this chapter.

**Australian Life Tables**

*Life Tables prior to 1961.* It has been the practice at each census from 1911 onwards to prepare Life Tables representative of the mortality experience of Australia. The mortality of the Australian population for the thirty years from 1881 to 1910 inclusive was investigated in 1911 by the Commonwealth Statistician. Tables were compiled for each State and for Australia as a whole in respect of each sex for each of the decennial periods 1881-90, 1891-1900 and 1901-10. These compilations furnished a comprehensive view of Australian mortality in respect of sex, time, and geographical distribution, and practically superseded all Life Tables prepared in Australia prior to 1911. In addition, mortality tables based on the experience for the whole of Australia for the ten years 1901-10 were prepared and published. At the census of 1921 Life Tables were prepared by the Commonwealth Statistician from the recorded census population and the deaths in the three years 1920 to 1922. In 1933, 1947 and 1954, Life Tables based on the census population and the deaths in the years 1932 to 1934, 1946 to 1948 and 1953 to 1955 respectively were compiled by the Commonwealth Actuary.

*Life Tables of census of 1961.* On the occasion of the 1961 Census the eighth Life Tables in the series were compiled by the Commonwealth Actuary. These were based on the population recorded at the census, adjusted to allow for variation in the net movement into Australia over the years 1960 to 1962, and deaths during these years. Full particulars of the data used, the method of construction and the tabulation of these Life Tables will be found in the report of the Commonwealth Actuary, which was published by the Commonwealth Statistician in 1966. This report also appears in Volume VIII of the detailed tables of the 1961 census. The main features of the tables, including comparisons with earlier Australian tables, are set out in the Year Book No. 55, pages 186 and 187. The table most frequently used by the general reader is that relating to expectation of life, and is published below.

**COMPLETE EXPECTATION OF LIFE ( $e_x^0$ ) AT SELECTED AGES**

Age (x)	Males				Females			
	1901-10	1946-48	1953-55	1960-62	1901-10	1946-48	1953-55	1960-62
0	55.20	66.07	67.14	67.92	58.84	70.63	72.75	74.18
10	53.53	59.04	59.53	59.93	56.38	63.11	64.78	65.92
20	44.74	49.64	50.10	50.40	47.52	53.47	55.06	56.16
30	36.52	40.40	40.90	41.12	39.33	44.08	45.43	46.49
40	28.56	31.23	31.65	31.84	31.47	34.91	35.99	36.99
50	21.16	22.67	22.92	23.13	23.69	26.14	27.03	27.92
60	14.35	15.36	15.47	15.60	16.20	18.11	18.78	19.51
70	8.67	9.55	9.59	9.77	9.96	11.14	11.62	12.19
80	4.96	5.36	5.47	5.57	5.73	6.02	6.30	6.68

NOTE.  $e_x^0$  = complete expectation of life at specified ages.

The progress towards lower mortality rates for both males and females has continued over the past sixty years or more. For example, the probability of a child born in 1961 dying in one year is less than one-quarter of the probability of death in one year attached to the child who was born sixty years ago. Even at advanced ages, the reductions which have occurred in mortality rates as compared with sixty years ago are very substantial. With the exception of males of ages forty to forty-seven and ages sixty-two to sixty-six lower mortality rates were experienced by males and females during 1960 to 1962 than for the period 1953 to 1955.

There is evidence that female longevity continues to increase at a faster rate than male longevity. It would seem that the risks associated with child-bearing for females are out-weighed by the greater accident propensity of younger males and the more rapid deterioration of health of older males.

An improvement has occurred in male mortality from accidents of all types, although there is some indication that for females the accident rates have deteriorated slightly. The rates for females are, nevertheless, still substantially below the corresponding rates for males.

## Age distribution at death

Age at death is recorded for statistical purposes in days for the first week of life, in weeks for the first four weeks, in months for the first year and in completed years of life thereafter. These ages are usually combined in groups for publication, the most common being weeks for the first four weeks, months or groups of months for the first year, single years of age for the first five years, and thereafter the five-year groups 5-9 years, 10-14 years, etc. A summary in this form for the year 1968 is given for Australia in the following table.

## DEATHS, BY AGE AT DEATH AND SEX: AUSTRALIA, 1968

Age at death	1968			Age at death	1968		
	Males	Fe- males	Per- sons		Males	Fe- males	Per- sons
Under 1 week	1,650	1,168	2,818	5-9 years	290	216	506

There are different mortality rates at various stages of life, and the actual number of deaths in any period is related to the numbers living at the respective stages. Changes in the number of deaths from one period to another are associated with changes in the rate of mortality in the various age groups and by the changed proportions of persons living in the different groups. The combined effect of various influences, i.e. the steady decline in the rate of mortality, the long term decline in the birth-rate, and the effects of past and present migration on the age distribution of the population, is shown in the following table, which shows the proportion of deaths in various age groups in ten-year periods from 1901 to 1960 and for the year 1968.

## PROPORTION OF DEATHS IN EACH AGE GROUP: AUSTRALIA, 1901 TO 1968(a)

(Per cent)

Age at death (years)	1901-1960						1968		
	1901-10	1911-20	1921-30	1931-40	1941-50	1951-60	Males	Females	Persons
Under 1 year	20.51	16.66	13.09	7.40	6.79	5.59	4.02	3.78	3.91
1-4	6.45	6.09	4.51	2.56	1.71	1.33	0.73	0.80	0.76
5-14	3.71	3.47	3.00	2.29	1.34	1.04	0.95	0.74	0.86
15-24	6.22	5.10	4.33	3.61	2.09	1.71	2.79	1.18	2.08
25-34	7.31	7.40	5.92	4.49	2.87	2.30	1.93	1.19	1.60
35-44	8.39	8.02	7.72	6.25	4.52	4.00	3.96	2.96	3.52
45-54	9.29	10.34	9.99	10.34	9.15	8.29	9.28	6.50	8.05
55-64	9.74	12.12	14.82	15.11	16.67	15.81	18.97	11.74	15.77
65-74	13.39	13.51	17.85	22.53	23.09	25.47	25.15	21.51	23.54
75 and over	14.99	17.29	18.77	25.42	31.77	34.46	32.22	49.61	39.91
<i>Total</i>	<i>100.00</i>	<i>100.00</i>	<i>100.00</i>	<i>100.00</i>	<i>100.00</i>	<i>100.00</i>	<i>100.00</i>	<i>100.00</i>	<i>100.00</i>

(a) Excludes particulars of full-blood Aborigines before 1967.

A table showing these proportions for males and females separately for the period 1901 to 1950 was published in Year Book No. 39, page 614.

### Age-specific death rates

In previous issues of the Year Book, average annual age-specific death rates, i.e. the average number of deaths per 1,000 of population in each age group, were given for each State and Australia for the periods 1932-1934, 1946-1948, 1953-1955, 1960-1962, and 1965-1967 (see Year Books, No. 37, pp. 778-9, No. 39, pp. 615-6, No. 44, pp. 640-1, No. 52, p. 253, and No. 55, p. 189). These rates were based on the age distribution of the population at the relevant censuses.

Age-specific death rates for the year 1968 are shown in the following table.

#### AGE-SPECIFIC DEATH RATES<sup>(a)</sup>: STATES, 1968

85 and over . . . . .	243.5	247.5	227.4	223.2	214.0	210.3	197.4	224.0

(a) Number of deaths per 1,000 of population of the same age group and sex. The populations used in the calculation of these rates are based on census populations at 3 April 1911, 4 April 1921 and 30 June 1933, 1947, 1954, 1961 and 1966, and the estimated population at 30 June 1968. (b) Average annual rate per 1,000 of census population, based on deaths in the three year period, i.e. census year and the years preceding and following it. Full-blood Aborigines are excluded. (c) For purposes of comparison with earlier periods for which full-blood Aborigines are excluded, and because published figures for 1965 and 1966 exclude Aborigines, the figures for the 1967 component have been adjusted to exclude full-blood Aborigines. (d) Includes Aborigines. (e) Infant deaths per 1,000 live births registered.

**Infant deaths and death rates—States and Territories**

The next table shows for each State and Territory for the period 1941 to 1969, the number of deaths under one year of age and the rates of infant mortality under one year. Rates for Australia and the more populous countries of the world for the latest available year are shown in the table International Vital Statistics at the end of this Chapter.

**INFANT MORTALITY UNDER ONE YEAR(a): STATES AND TERRITORIES, 1941 TO 1969**

1969 . . . . .	18.9	15.0	18.9	15.8	21.8	16.5	48.3	18.8	17.92

(a) Excludes particulars of full-blood Aborigines before 1967. (b) Number of deaths of children aged under one year per 1,000 live births registered. (c) Less than twenty events; rate not calculated.

Because of the smallness of the numbers of these deaths occurring in the Australian Capital Territory and the Northern Territory, the rates for these Territories (i.e. number of such deaths per thousand live births) are subject to considerable fluctuation.

**Infant deaths and death rates—Australia**

The fact that out of 588,365 male infants born from 1964 to 1968, 12,066 (20.51 per 1,000) died during the first year of life, while of 556,466 female infants only 8,933 (16.05 per 1,000) died during the first year, accords with the universal experience that during the first few years of life the higher death rate of male infants tends to counteract the excess of male births. Stillbirths, for which masculinity is also higher, are not included in any of the tables relating to deaths.

As shown by the following table, the disparity is greater during the first four weeks of life, termed the neonatal period, than during the remainder of the first year of life, or the post-neonatal period.

## INFANT DEATHS AND MORTALITY RATES(a): AUSTRALIA

(a) Excludes particulars of full-blood Aborigines before 1967. (b) Age four weeks and under three months.  
(c) Number of deaths of children aged under one year per 1,000 live births registered.

Plate 21, on page 184 shows infant mortality rates for each year from 1910 to 1968.

## Causes of death

The classification of causes of death adopted for Australia by the Commonwealth Bureau of Census and Statistics at the inception of its mortality statistics in 1907 was that introduced by the International Institute of Statistics in 1893, reviewed by that Institute in 1899, and revised by an International Commission in 1900. This classification became known as the International List of Causes of Death, and further international revisions in 1909 (Second), 1920 (Third), 1929 (Fourth), 1938 (Fifth), 1948 (Sixth), 1955 (Seventh) and 1965 (Eighth), were successively adopted for use in Australian statistics.

For 1968, the causes of death are classified according to the Eighth (1965) Revision of the International Classification of Diseases. This is the first year in which the Eighth Revision has been used in Australia and hence cause of death figures for 1968 and subsequent years will not be comparable, for some causes, with figures for 1967 and earlier years.

In order to facilitate the concise presentation of cause of death statistics, the present International Classification provides two special lists of causes for tabulation—the Intermediate List of 150 causes and the Abbreviated List of 50 causes. The latter has been used as the base of the cause of death tabulations for 1968 which follow. Some categories have been sub-divided to show additional particulars of interest in Australian statistics. Table A shows the total number of males and females who died, the death rates per million of mean population, and the percentage of total deaths. Table B shows deaths for males and females, classified by age groups.

# INFANT MORTALITY RATES: AUSTRALIA

1910 TO 1968

(INFANT DEATHS PER 1,000 LIVE BIRTHS)

NOTE. EXCLUDES PARTICULARS OF FULL-BLOOD ABORIGINES BEFORE 1967

(a) In 1968, there were no male deaths recorded in the following categories: B1, Cholera (000); B2, Typhoid fever (001); B7, Plague (020); B8, Diphtheria (032); B10, Streptococcal sore throat and scarlet fever (034); B12, Acute poliomyelitis (040-043); B13, Smallpox (050); B16, Malaria (084). No female deaths were recorded in the following categories: B1; B7; B8; B12; B13; B15, Typhus and other rickettsioses (080-083); B16.

#### Causes of death—children under one year

Causes of death of children under one year of age should be considered in relation to age at death, because the emphasis on various causes changes rapidly as age at death varies. A summary for 1968 of deaths of children under one year of age, classified according to principal causes of death and age at death, is given in the following table.

**DEATHS OF CHILDREN UNDER ONE YEAR OF AGE, BY CAUSE OF DEATH:  
AUSTRALIA, 1968**

Inter- national Classi- fication of Diseases number	Cause of death	Age at death										
		Days			Weeks			Months			Total under one year	
		Under 1	1-6	one week	1	2	3	Total under four weeks	1-2 (a)	3-5		6-11

(c) E800-E910, E914-E999

**Deaths from certain important causes**

In the preceding tables, particulars have been given for each of the causes of death comprising the Abbreviated Classification according to the Eighth Revision of the International List. Certain important causes are treated in detail hereunder. The Abbreviated Classification numbers used in tables A and B (pages 185 and 187) are indicated in parentheses for each cause or group of causes.

*All forms of tuberculosis (B5, B6).* The reduction in mortality from tuberculosis is shown by the decline in the crude death rate from tubercular diseases, which fell from 49 per 100,000 of mean population in 1931 to 18 in 1951, and to 2 in 1968. The reductions in the younger age groups are much greater. In making these comparisons, consideration of the effect of the change in basis from the Fifth to the Sixth Revision of the International List is particularly important.

*Malignant neoplasms, including neoplasms of lymphatic and haematopoietic tissues (B19).* Deaths classified under this heading according to the Sixth, Seventh and Eighth Revisions of the International List (used in Australia for deaths registered since 1950) are not directly comparable in total with those on the Fifth Revision basis (see Year Book No. 39, p. 628).

The most common sites of malignant neoplasms causing death in 1968 were as follows: digestive organs (males, 3,125; females, 2,663); lung (males, 2,516; females, 377); genital organs (males, 1,015; females, 1,124); breast (males, 19; females, 1,427); urinary organs (males, 513; females, 253); leukaemia and aleukaemia (males, 399; females, 315).

The ages of males and females who died from malignant neoplasms in 1968 are given below, together with figures for 1931, 1941, 1951 and 1961. The increase in the number of deaths from malignant neoplasms in the years since 1931 is due principally to the increase in the number of people in the higher age groups, at which ages the risks of cancer are much greater. While the total population increased by about 84 per cent between 1931 and 1968, the number of people aged 55 years and over increased by about 134 per cent. The increase in the number of deaths in the lower age groups from 1951 is due partly to the inclusion of neoplasms of lymphatic and haematopoietic tissues, and it is probable also that part of the increased number of deaths from cancer recorded in recent years has been due to improved diagnosis and certification on the part of the medical profession.

**DEATHS FROM MALIGNANT NEOPLASMS(a), BY AGE GROUP AND SEX  
AUSTRALIA, 1931 TO 1968(b)**

Age group (years)	Males					Females

<b>Total</b> . . . . .	<b>3,484</b>	<b>4,255</b>	<b>5,515</b>	<b>7,380</b>	<b>9,562</b>	<b>3,105</b>	<b>4,223</b>	<b>5,104</b>	<b>6,309</b>	<b>7,556</b>

(a) Includes neoplasms of lymphatic and haematopoietic tissues prior to 1967.

(b) Excludes particulars of full-blood Aborigines

The death rates from malignant neoplasms have continued to rise over recent years. The rates are crude death rates representing the number of deaths from malignant neoplasms per 100,000 of mean population and do not take account of changes in the age constitution of the population, and to a substantial extent they reflect the increasing age of the population rather than the true change in mortality from malignant neoplasms (see previous paragraph). In 1931 the rate for Australia was 101 (males, 105; females, 97); in 1941 it was 119 (males, 119; females, 120); and in 1951 it had risen to 126 (males, 130; females, 122). Figures for 1961 gave a rate of 130 (males, 139; females, 121), and for 1968 a rate of 142 (males, 158; females, 126).

Death rates from malignant neoplasms per 100,000 of mean population for Australia and for various other countries are as follows: Brazil, 94; Israel, 110; Japan, 113; Poland, 129; Canada and South Africa (white population), 137; Australia, 142; United States of America, 157; Italy, 168; Netherlands, 190; France, 204; England and Wales, 228; Scotland, 234. The rates are for the latest available year in each case.

*Maternal causes (B40, B41).* It was shown in Year Book No. 39, page 634, that the changes introduced with the Sixth Revision of the International List did not significantly affect the comparability of the total number of deaths from maternal causes. The Seventh Revision, introduced in 1958, and the Eighth Revision in 1968, did not affect comparability. The death rate from these causes has fallen rapidly during recent years and in 1968 the rate of 0.3 per 1,000 live births, compared with a rate of 6 per 1,000 in 1936. The 68 deaths in 1968 are equivalent to a death rate of 1.14 per 100,000 females. The death rate may be expressed in other terms by stating that for every 3,543 babies born alive in 1968 one woman died from maternal causes. The death rate per 1,000 live births from maternal causes in various countries for the latest available year is as follows: Sweden, 0.1; Denmark, Canada, United Kingdom and New Zealand, 0.2; Australia, Netherlands, Norway, France, Finland and United States of America, 0.3; Switzerland, 0.4; Italy and Japan, 0.7.

*Causes of infant mortality.* See paragraphs devoted to causes of infant deaths on pages 187-8.

*Diseases of the circulatory system (B25-B30, part B46).*

This class is the largest among causes of death, representing 56 per cent of total deaths in 1968. The following table shows the number of deaths and death rates per 100,000 of mean population from diseases of the circulatory system for the years 1950-68. Comparability of the figures is not affected by the various revisions of the International Classification of Diseases.

**DEATHS AND DEATH RATES(a) FROM DISEASES OF THE CIRCULATORY SYSTEM  
BY SEX, AUSTRALIA, 1950 TO 1968**

Year	Cerebrovascular disease			Heart disease				Other diseases of circulatory system				Total				
	Number		Rate(a)	Number		Rate(a)		Number		Rate(a)		Number		Rate(a)		
	M	F	M	F	M	F	M	F	M	F	M	F	M	F	M	
1950 . . . . .	4,035	5,351	98	132	14,687	10,256	356	253	1,736	1,802	42	44	20,458	17,409	499	429
1955 . . . . .	4,811	6,224	103	137	16,382	11,303	352	249	1,843	1,886	40	42	23,036	19,413	495	427
1960 . . . . .	5,183	6,659	100	131	18,654	13,173	359	259	2,068	1,970	40	39	25,905	21,802	499	429
1965 . . . . .	5,809	7,835	101	139	21,843	15,546	381	275	2,029	2,071	35	37	29,681	25,452	517	450
1968 . . . . .	6,653	8,711	110	146	23,520	17,193	388	288	2,385	2,468	39	41	32,558	28,372	537	475

(a) Per 100,000 of mean population.

*Accidents, poisonings and violence (BE47 to BE50).* Deaths in this class are classified according to external cause and not according to nature of injury. The classification provides sub-groups for accidents, including adverse reactions to prophylactic inoculations, therapeutic misadventures and late effects of accidental injury; suicide; homicide and injuries purposely inflicted by other persons; injuries undetermined whether accidentally or purposely inflicted; and injury resulting from operations of war, including delayed effects.

The following table, showing the death rates in the main sub-groups per 100,000 of mean population, indicates that the death rate from violence is between two and three times as great for males as for females. The low level of the rates and proportions for the years 1941-45 is due largely to the exclusion of deaths of defence personnel from accidents, suicide and homicide, though the rates have been based on total mean population (including defence personnel). A further contributing factor is the decrease during this period in the number of automobile accidents. From July 1947 deaths of defence personnel from accidents, etc. have again been included.

ACCIDENTS, POISONINGS, AND VIOLENCE: DEATH RATES(a), BY SEX  
AUSTRALIA, 1936 TO 1968(b)

Period	Death rate from—										All violence, proportion per 10,000 deaths	
	Motor vehicle accidents		Suicide		Homicide(c)		Other violence(d)		Total violence			
	Male	Female	Male	Female	Male	Female	Male	Female	Male	Female	Male	Female
1936-40	32	8	17	5	2	1	55	20	105	34	980	399
1941-45	19	5	11	5	1	1	48	21	79	31	730	348
1946-50	30	6	14	5	1	1	46	21	91	33	844	383
1951-55	38	9	15	5	2	1	44	22	99	37	964	453
1956-60	37	11	17	6	2	1	38	20	93	39	957	495
1961-65	38	13	19	9	2	1	34	19	93	42	954	550
1966	41	15	17	11	2	1	32	19	92	46	933	572
1967	42	15	19	11	2	1	35	20	97	47	1,008	611
1968	43	14	17	8	2	1	33	20	95	45	943	551

(a) Number of deaths per 100,000 of mean population. (b) Excludes particulars of full-blood Aborigines before 1967. (c) Includes deaths from injury purposely inflicted by other persons (not in war) and legal intervention. (d) Includes deaths from injury undetermined whether accidentally or purposely inflicted.

In 1968 the total number of deaths from *accidental causes (BE47, BE48)* was 6,499 (4,494 males and 2,005 females). Over half of the accidental deaths were the result of transport accidents. Of these, the numbers attributable to the major causes, and the percentages of the total accidental deaths in each case, were as follows: Motor vehicle traffic accidents, 3,377 (51.96 per cent); motor vehicle non-traffic accidents, 78 (1.20 per cent); other road vehicle accidents, 46 (0.71 per cent); railway accidents, 87 (1.34 per cent); water transport accidents, 90 (1.38 per cent); aircraft accidents, 41 (0.63 per cent); a total of 3,719 (57.22 per cent). Other important causes were accidental falls, 1,186 (18.25 per cent); accidental drowning, 382 (5.88 per cent); accidents caused by fires and flames, 232 (3.57 per cent); and accidental poisonings, 153 (2.35 per cent).

Deaths from *suicide (BE49)* in 1968 numbered 1,527 (males, 1,022; females, 505). Poisoning, other than by gases, was used in 626 cases (41.00 percent of total deaths by suicide). Other important modes adopted, together with the numbers and relevant percentages, were as follows: firearms and explosives, 353 (23.12 per cent); poisoning by gases, 229 (15.00 per cent); hanging or strangulation, 153 (10.02 per cent); submersion (drowning), 80 (5.24 per cent); other and unspecified modes, 86 (5.63 per cent). Of the 1,022 males who committed suicide, 329 (32.19 per cent) used firearms or explosives. For females the most common mode was poisoning (other than by gases). This was used in 325 cases (64.36 per cent).

Of the 406 deaths recorded in 1968 to all other external causes (*BE50*), there were 190 deaths from homicide and injury purposely inflicted by other persons, 1 death from legal execution, 212 deaths from injury undetermined whether accidentally or purposely inflicted (of which 100 were due to poisoning other than by gases) and 3 deaths from late effects of injury due to operations of war.

### Vital statistics of External Territories

The following table shows, for the year 1968, the number of marriages, births and deaths registered in the External Territories under the control of Australia. More detailed information will be found in a series of tables in *Demography*, Bulletin No. 86.

## EXTERNAL TERRITORIES: VITAL STATISTICS, 1968

Territory	Marriages	Births	Deaths
Christmas Island(a)	3	26	14
Cocos (Keeling) Islands(a)	..	2	..
Norfolk Island(a)	10	27	12
Territory of Papua and New Guinea(b)	294	1,108	111

(a) Total population. (b) Non-indigenous population only.

## International vital statistics

In the following table vital statistics rates for certain countries are shown. Crude marriage, birth, and death rates represent the number of 'events' reported for the year stated per 1,000 of the population. Infant mortality rates are the number of deaths which occurred under one year of age per 1,000 live births. The true death rates (reciprocals of the expectation of life at birth) have been computed from the life tables for the respective countries as published in the United Nations *Demographic Yearbook*, 1968 (see explanation of true death rates, page 177).

In many instances the rates shown in the following table are estimates and the results of sample surveys only. Reference should be made to the detailed comments contained in the United Nations *Demographic Yearbook*, 1968 (see particularly Technical Notes on Statistical Tables and footnotes to the tables). The countries are arranged in the same order as in the table on pages 157-58 of the Population chapter.

## CHAPTER 9

### HOUSING AND BUILDING

Pages 193–8 of this chapter give details of the *characteristics of dwellings as obtained from censuses*, pages 198–210 contain a *summary of building activities*, pages 210–20 outline *government activities in the field of housing*, and pages 221–226 on relate to *financial arrangements associated with the erection or purchase of homes*.

Further information on dwellings obtained from censuses is available in the detailed tables of the 1961 Census and earlier censuses and in the mimeographed statements of the 1966 Census (see the chapter Miscellaneous of this Year Book).

More detailed information on building activity is contained in the annual bulletin *Building and Construction* and the *Quarterly Bulletin of Building Statistics*, and current information is obtainable also in the *Quarterly Summary of Australian Statistics*, the *Monthly Review of Business Statistics*, the *Digest of Current Economic Statistics*, and the mimeographed statements *Building Statistics: Number of New Houses and Flats* (quarterly), and *Building Approvals* (monthly). Details for particular States are available from publications issued regularly by the Deputy Commonwealth Statisticians.

Commonwealth Government activities relate in the main to the provision of moneys to State Governments under Commonwealth-State Housing Agreements, to the assistance of ex-service personnel in the erection and purchase of homes, to assistance to young married couples under the Home Savings Grant Act, to the operation of the Housing Loans Insurance Corporation, and to the provision of homes in the Territories. Further details of activities of the Commonwealth and State Housing Authorities are shown in the reports issued by these authorities.

#### Census dwellings

At each census of the population, in addition to the questions relating to personal particulars, there have been a number of questions relating to dwellings. A 'dwelling' is defined as any habitation occupied by a household group living together as a domestic unit, whether comprising the whole or only part of a building, and includes, *in addition to houses and flats*, a great variety of dwellings ranging from a single-roomed shack to a multi-roomed hotel or institution. This section contains particulars of such information on dwellings as is available from the 1966 Census, together with information from earlier censuses. All statistics in this section are exclusive of particulars of dwellings occupied solely by Aborigines.\*

#### Number of dwellings

The following table shows the number of occupied and unoccupied dwellings in Australia at each census from 1911 to 1966. Occupied dwellings are classified into 'private' and 'other than private' dwellings (see page 194 for definitions of 'private' and 'other than private' dwellings). Unoccupied dwellings include dwellings whose occupants are temporarily absent, holiday homes, and other temporarily vacant dwellings (see page 197 for full explanation of the term 'unoccupied').

DWELLINGS: AUSTRALIA, CENSUSES, 1911 TO 1966

Census	Occupied		Total	Unoccupied
	Private	Other than private		
1911 . . . . .	894,389	29,070	923,459	33,473
1921 . . . . .	1,107,010	46,275	1,153,285	51,163
1933 . . . . .	1,509,671	37,705	1,547,376	68,772
1947 . . . . .	1,873,623	34,272	1,907,895	47,041
1954 . . . . .	2,343,421	36,932	2,380,353	112,594
1961 . . . . .	2,781,945	35,325	2,817,270	194,114
1966 . . . . .	3,151,926	33,730	3,185,656	263,873

\* See page 66 for results of *Constitution Alteration (Aboriginals) 1967 Referendum*.

The following table shows the number of occupied and unoccupied dwellings in the urban and rural areas of Australia at the Census of 30 June 1966. For delimitation of 'urban centres' see this Year Book, page 127.

DWELLINGS: URBAN AND RURAL, AUSTRALIA, CENSUS, 30 JUNE 1966

Division	Occupied				Unoccupied	
	Private	Other than private	Total		Number	Percentage of total
			Number	Percentage of total		
Urban—						
Metropolitan . . .	1,886,055	14,287	1,900,342	59.65	86,826	32.90
Other . . . . .	778,681	9,500	788,181	24.74	81,748	30.98
Rural . . . . .	487,190	9,943	497,133	15.61	95,299	36.12

<b>Australia . . . . .</b>	<b>2,817,270</b>	<b>194,114</b>	<b>3,185,656</b>	<b>263,873</b>

Class of dwelling (1961 and 1966)

The following table shows the numbers of the various classes of occupied dwellings in the metropolitan urban, other urban, and rural areas of Australia at the Censuses of 1961 and 1966. The 1961 dwellings data in the following table have not been compiled for the separate divisions of State according to criteria adopted at the 1966 Census (see page 127), and consequently accurate comparison between 1961 and 1966 figures for divisions of State cannot be made. The numbers of the various classes of dwelling for each State and Territory at the 1966 Census are given in the table on page 195.

Private dwellings are classified into the following categories:

*private house*—includes houses, sheds, huts, garages, etc., used for dwelling purposes;

*share of private house*—portion of a shared private house which is occupied separately and for which portion a separate householder's schedule was received;

*flat*—part of a house or other building which can be completely closed off and which has its own cooking and bathing facilities;

*other private dwelling*—includes private dwellings such as rooms, apartments, etc., which are parts of buildings but are not self-contained units.

**Other than private dwellings** includes hotels; motels; boarding houses, lodging houses and hostels; educational, religious and charitable institutions; hospitals; defence and penal establishments; police and fire stations; clubs; staff barracks and quarters, etc.

OCCUPIED DWELLINGS, BY CLASS: URBAN AND RURAL(a), AUSTRALIA  
CENSUSES, 1961 AND 1966

Class of dwelling	Census, 30 June 1961		Census, 30 June 1966			Percentage of total occupied dwellings	Inter-censal increase or decrease	
	Total	Percentage of total occupied dwellings	Urban		Rural			
			Metro-politan	Other				
Private dwellings—								
Private house	2,393,169	84.95	1,529,059	692,742	459,924	2,681,725	84.18	288,556
Share of private house	79,550	2.82	(b)20,940	(b)3,682	(b)1,292	25,914	0.81	-53,636
Self-contained flat	217,586	7.72	274,367	63,338	7,880	345,585	10.85	129,167
Share of self-contained flat	(c)	(c)	(d)9,556	(d)193	(d)19	1,168	0.04	(c)
Shed, hut, tent, etc.	41,997	1.49	5,084	9,541	16,431	31,056	0.97	-10,941
Other private dwellings	49,643	1.76	55,649	9,185	1,644	66,478	2.09	16,835
Total private dwellings	2,781,945	98.75	1,886,055	778,681	487,190	3,151,926	98.94	369,981
Non-private dwellings(e)	35,325	1.25	14,287	9,500	9,943	33,730	1.06	-1,595
Total occupied dwellings	2,817,270	100.00	1,900,342	788,181	497,133	3,185,656	100.00	368,386

(a) See text on page 194 regarding comparability between censuses. (b) Represents 10,077 private houses in metropolitan areas, 1,799 in other urban areas and 637 in rural areas. (c) At the 1961 Census share of self-contained flat was not separately identified. In cases where more than one household group were occupying a self-contained flat they were counted as one household group occupying a self-contained flat. (d) Represents 460 self-contained flats in metropolitan areas, 93 in other urban areas and 9 in rural areas. (e) Details of the number of each of the types of non-private dwellings are available on request.

Minus sign (-) denotes decrease.

(a) So described in individual Census Schedules. (b) At the 1961 Census, dwellings with walls of brick veneer were not separately identified and for tabulation purposes were included with brick walled dwellings. (c) In the small number of cases where material of outer walls was not stated a material was selected during processing of the 1966 Census schedules. Selection was based upon the answer given for the geographically nearest dwelling of the same class as the dwelling for which material of outer walls was not stated.

## Number of rooms (1961 and 1966)

## OCCUPIED PRIVATE DWELLINGS, BY NUMBER OF ROOMS AND CLASS OF DWELLING AUSTRALIA, CENSUSES, 1961 AND 1966

<b>Total</b>	<b>2,393,169</b>	<b>100.00</b>	<b>2,681,725</b>	<b>100.00</b>	<b>217,586</b>	<b>100.00</b>	<b>345,585</b>	<b>100.00</b>

(a) See text on page 194 regarding comparability between censuses.

At the 1961 Census persons paying interest only on a mortgage on the dwelling were instructed to enter 'owner', but a person buying a house by regular payments including interest and principal was instructed to enter 'purchaser by instalment'. It is probable, however, that some 'purchasers by instalment' described themselves on 1961 Census schedules as 'owners' especially where they possessed the title to the property. However, the extent of such mis-statements has not been measured. At the 1966 Census, as the two categories can be logically grouped, separate details for 'owners' and 'purchasers by instalment' were not collected.

## Facilities (1961 and 1966)

OCCUPIED PRIVATE HOUSES AND SELF-CONTAINED FLATS, BY FACILITIES  
AUSTRALIA, CENSUSES, 1961 AND 1966

Facilities	Private houses		Self-contained flats	
	Census 30 June 1961	Census 30 June 1966	Census 30 June 1961	Census 30 June 1966
With gas only	5,386	5,169	171	481
With electricity only	1,322,300	1,505,550	63,378	128,072
With gas and electricity	1,008,763	1,139,868	153,231	214,876
Neither gas nor electricity	87,839	23,497	277	271
Not stated	10,878	7,641	529	1,885
<b>Total</b>	<b>2,435,166</b>	<b>2,681,725</b>	<b>217,586</b>	<b>345,585</b>
With television set	1,139,578	2,154,321	97,226	235,083

NOTE. Dwellings for which electricity was not stated but which had television have been classified as having electricity and therefore included as such in this table.

## Unoccupied dwellings (1961 and 1966)

The following table classifies unoccupied dwellings by class. Unoccupied dwellings include vacant dwellings available for sale or renting; dwellings such as 'week-ender', 'holiday home', 'second home', 'seasonal workers' quarters', which were not occupied on the night of the census; dwellings normally occupied, but whose usual occupants were temporarily absent on the night of the census; newly completed dwellings whose owners or tenants had not entered into occupation on the night of the census; dwellings described as 'to be demolished', 'condemned', 'deceased estate', 'exhibition home', etc.; and buildings constructed as dwellings but used for non-dwelling purposes on the night of the Census. The total number of unoccupied dwellings shown for any area does not, therefore, represent the number of vacant houses and flats available for sale or renting.

**UNOCCUPIED DWELLINGS, BY CLASS: URBAN AND RURAL, AUSTRALIA  
CENSUSES, 1961 AND 1966**

Class of dwelling	Census 30 June 1961 Total	Census, 30 June 1966			
		Urban		Rural	Total
		Metropolitan	Other		
Private house . . . . .	156,473	55,636	66,362	79,149	201,147
Self-contained flat . . . . .	21,887	26,922	11,923	1,397	40,242
Other private dwellings(a) . . . . .	7,073	4,157	3,133	8,881	16,171
Non-private dwellings(a) . . . . .	1,443	111	330	5,872	6,313
Not stated . . . . .	7,238	..	..	..	..
<b>Total unoccupied dwellings . . . . .</b>	<b>194,114</b>	<b>86,826</b>	<b>81,748</b>	<b>95,299</b>	<b>263,873</b>

(a) The inter-censal increase in unoccupied other private and non-private dwellings is mainly the result of a better coverage at the 1966 Census of dwellings occupied for only a short period of time each year, such as shearers' huts, seasonal workers' quarters, etc.

## Building

### Statistics of building approved

Statistics of building approvals have been compiled since the year 1953-54 from (a) permits issued by local government authorities in the areas subject to building control by these authorities, and (b) contracts let or work commenced and day labour projects authorised by governmental authorities. They relate only to approvals for buildings as distinct from the construction of roads, railways, bridges, earthworks, water storages, etc. Values shown represent the estimated cost when completed (excluding cost of land) of new buildings and alterations and additions to existing buildings. Before 1 July 1966 additions of \$10,000 and over were included with new buildings in all States except New South Wales, where they were included in 'alterations and additions'. From 1 July 1966 alterations and or additions of \$10,000 and over are included with new buildings in all States.

### Statistics of building commenced, completed and under construction

These relate to building by private contractors, government authorities and owner-builders. The following outlines the scope of the statistics: (a) only the erection of new buildings as distinct from the construction of roads, railways, bridges, earthworks, water storages, etc., is covered; (b) before 1 July 1966 major new additions to existing buildings in all States and major alterations in New South Wales were included with new buildings, while from 1 July 1966 alterations and or additions of \$10,000 and over are included with new buildings in all States; (c) minor additions, alterations, renovations and repairs are excluded because of the difficulty of obtaining details of this work; (d) temporary dwellings, sheds, huts, etc., are excluded; (e) figures for houses exclude flats and dwellings attached to other new buildings (the value of dwellings attached to other new buildings is included with the value of buildings to which they are attached); figures for flats include 'home units'; (f) details obtained from government authorities and building contractors refer to all areas, whereas details for owner-builders cover only areas subject to building control by local government authorities.

The following definitions of terms used in this section are necessary for interpretation of the data presented.

*Private or government ownership.* A building is classified as 'private' or 'government' according to ownership at date of commencement. Thus 'government' includes buildings erected for Commonwealth and State Governments, semi-governmental and local government authorities, either by contractor or by day-labour, whether these buildings are for their own use or for rental or sale after completion. Houses erected for particular persons under government-sponsored home building schemes or with government financial assistance are classified as 'private'.

*Owner-built.* An 'owner-built' house is one actually erected or being erected by the owner or under the owner's direction without the services of a contractor who is responsible for the whole job.

*Contract-built.* Includes the operations of all building contractors and government authorities which undertake the erection of new buildings.

*Commenced.* A building is regarded as having been commenced when work on foundations has begun. Owing to the difficulty of defining the exact point that this represents in building operations, classifications made by informants may not be entirely uniform.

*Completed.* A building is regarded as having been completed when the contractor has fulfilled the terms of the contract. As with commencements, the classifications made may not be entirely uniform.

*Under construction.* A building is regarded as being under construction if it has been commenced but not completed, whether or not work on the building is actively proceeding.

*Values.* All values shown exclude the value of land and represent the estimated value of buildings on completion.

*Values of work done.* The values of work done during the period represent the estimated value of work actually carried out on buildings during the period. For any building the sum of these values obtained during its construction equals the value of the building on completion. Data relating to the value of work done on owner-built houses are not collected. However, the figures shown for the value of work done include a component relating to owner-built houses calculated on the basis of the figures collected for the value of owner-built houses commenced, completed and under construction.

*Type of building.* Classification is according to the function a building is intended to serve. A building which is ancillary to other buildings or forms part of a group of related buildings is classified according to the function of the group as a whole.

*Persons working.* Figures relate to persons working on the jobs of contractors who undertake the erection of new buildings and of government authorities which erect new buildings on their own account. They include persons working on alterations, additions, repairs and maintenance when these jobs are undertaken by such contractors and authorities. Contractors are asked to give details of all persons working on their jobs *on a specified day*, including working principals, men working as or for sub-contractors and men temporarily laid off on account of weather. Because of the intermittent employment of various types of sub-contractors on any particular job, it is sometimes difficult for contractors and authorities to provide precise particulars of the number of sub-contractors and the number of employees of sub-contractors working on their jobs on the specified day. This factor may cause some estimation by persons completing returns and some degree of understatement in figures shown in tables. On the other hand, because of frequent movement between jobs of some types of tradesmen (such as electricians) who may work on several jobs on the one day, a small element of duplication may occur. The figures *exclude* persons working on owner-built houses, and employees of builders who undertake only alterations, additions, repairs and maintenance.

#### New houses approved, commenced, completed and under construction

The next table provides a summary for 1968-69 of the number of new houses approved, commenced, completed and under construction in each State and Territory. For a graph showing the number of new houses commenced, completed and under construction for the period 1959-60 to 1968-69 see plate 22, page 203.

**Value of building approved**

The following table shows the values of approvals for houses and flats, other new buildings, and alterations and additions in Australia for the years 1964-65 to 1968-69. Before 1 July 1966 additions of \$10,000 and over were included with new buildings in all States except New South Wales, where they were included in 'alterations and additions'. From 1 July 1966 alterations and or additions of \$10,000 and over are included with new buildings in all States.

### Government activities in the housing field

#### Housing Agreements between Commonwealth and State Governments

Under the Commonwealth-State Housing Agreements the Commonwealth Government makes substantial long-term loans to the States for the provisions of housing.

*The 1945 Agreement.* In November 1945 the Commonwealth Government entered into an Agreement with the Governments of the States whereby the Commonwealth Government would provide finance for, and the State Governments would undertake the building of, housing projects. Between 1945-46 and 1955-56, under this Agreement, the Commonwealth Government advanced to the States a total of \$481,118,000.

Initially, dwellings constructed under the 1945 Agreement were only sold to tenants if the tenant was able to arrange payment of the full purchase price to the State immediately on sale. Subsequent amendments to the Agreement progressively eased conditions of sale. For information on the conditions of sale, etc., under the 1945 Agreement see Year Book No. 48, page 367.

*The 1956 Agreement.* In 1956 the Commonwealth and the States entered into a new Agreement under which added emphasis was placed on the construction of dwellings for private ownership. The Agreement provided that parts of the loans advanced to each State were to be advanced to building societies and other approved institutions for lending to private home builders and

purchasers. The balance of the amounts advanced to each State was used by the States for the erection of dwellings for either rental or sale. The Commonwealth was entitled to specify that up to five per cent of the moneys allocated for the erection of dwellings by the State be set aside for the erection of dwellings for serving members of the defence forces. For features of the 1956 Commonwealth and State Housing Agreement see Year Book No. 48, pages 367-8.

*The 1961 Agreement.* The period during which Commonwealth advances to the States could be made under the 1956 Agreement terminated on 30 June 1961. A new Agreement was entered into which extended for a further five years the period during which advances could be made and also amended the 1956 Agreement in certain respects concerning funds for the erection of dwellings for rental to servicemen and the rate of interest payable on Commonwealth advances.

*The 1966 Agreement.* A new Agreement was entered into which extended for a further five years the period during which advances could be made, and also amended the 1956-1961 Agreement in certain respects concerning the definition of 'member of the forces', the erection by the States of blocks of flats in metropolitan areas, the erection of dwellings for rental to servicemen, and the provision of finance to home builders in rural areas.

For further information regarding the above Agreements see Year Book No. 53, pages 276-7.

#### Operations under the various Housing Agreements

The following tables show the operations under the various Housing Agreements during 1968-69 and to 30 June 1969. The earliest single year for which details are given in the tables is 1964-65; for earlier years see Year Book No. 53, pages 278-9.

**War service homes**

The *War Service Homes Act* 1918-1968 makes provision for assistance to be granted to persons who satisfy the eligibility conditions set out in the Act, to enable them to acquire on concessional terms a soundly constructed home that they would occupy as a residence.

Persons eligible for assistance under the Act include members of the Australian forces and nursing services enlisted or appointed for or employed on active service outside Australia or on a ship of war during the 1914-1918 and 1939-1945 Wars and persons who served in the warlike operations in Korea or Malaya or who have served on 'special service' as defined in the *Repatriation (Special Overseas Service) Act* 1962-1968. 'Special service' includes 'special duty' in an area which by reason of warlike operations or a state of disturbance has been declared a 'special area' under the Repatriation (Special Overseas Service) Act. The areas declared as a 'special area' under the Act are:

- Vietnam (Southern Zone) from 31 July 1962;
- certain areas of Borneo, Sabah and Sarawak from 8 December 1962 to 30 September 1967;
- certain areas of Malaya from 28 May 1963;
- Malaysia (the remainder) and Singapore from 7 July 1965 to 30 September 1967;
- Vietnamese waters from 1 March 1967.

The categories of eligible persons also include the widow and, in some circumstances, the widowed mother of an eligible person and persons domiciled in Australia and employed in certain sea-going service during the 1914-1918 and 1939-1945 Wars.

The maximum amount of loan or advance which may be granted under the *War Service Homes Act* 1918-1968 is \$8,000. The period of repayment may be up to forty-five years. In the case of a widow or widowed mother of an Australian ex-serviceman, the period may be extended to a maximum of fifty years.

The Director of War Service Homes is responsible for the execution of the War Service Homes Act subject to the directions of the Minister for Housing.

#### Operations under the War Service Homes Act

The following tables give details of the operations under the War Service Homes Act in the year 1968-69 and from the inception of the scheme on 6 March 1919 to 30 June 1969. The earliest single year for which details are given in the tables is 1964-65; for earlier years *see* previous issues of the Year Book. The figures shown include operations in the Territories of Papua, New Guinea and Norfolk Island.

(d) Included in New South Wales.

In addition to the homes provided under the War Service Homes Act and shown above, 2,554 homes, which had been provided originally under the Housing Agreements with the States, have been taken over in accordance with those Agreements.

**Home Savings Grant Scheme**

The administration of the Home Savings Grant Scheme is a function of the Commonwealth Department of Housing. The purpose of the Scheme is to assist young married persons, and young widowed persons with dependent children, to purchase or build their own homes. A further objective is to increase the proportion of total private savings available for housing purposes by encouraging young people to save with those institutions which provide the bulk of long-term housing finance. The Scheme is governed by the *Homes Savings Grant Act 1964-1967*. The Act authorises the payment of grants from the National Welfare Fund.

The Scheme provides for the payment of grants of \$1 for every \$3 saved by eligible persons under 36 years of age for the first home they own after marriage. The savings must be made over a period of at least three years and held in an approved form. The maximum grant to a married couple, or to husband or wife if only one is eligible, or to a widowed person, is \$500 on savings of \$1,500 or more. Smaller grants down to a minimum of \$10 are payable on lesser amounts saved. To be eligible for the

grant, a person must be married, or widowed with one or more dependent children, and must have—or must be married to a person who has—entered into a contract to buy a home or have one built, or begun to build a home as an owner-builder. The person must be under 36 years of age at the time of marriage and at the date of the contract to buy or build or the date building began, must have either been an Australian citizen or lived in Australia during the three years immediately preceding that date, and must also have saved in Australia in an approved form throughout that period. Those three years are known as the applicant's 'savings years'. The grant is payable in respect of existing homes and homes being built. Flats and home-units may also be eligible provided separate title can be obtained. The value of the home, including the land, the house itself and any other improvements, must not exceed \$15,000, or \$14,000 if the contract to buy or build the home was made, or the building of the home as an owner-builder began, before 28 November 1966. Most homes are eligible, the main exception being homes purchased from State housing authorities which have been built with money advanced by the Commonwealth under the Commonwealth-State Housing Agreement at concessional rates of interest.

The main forms of savings acceptable under the Scheme are Home Savings Accounts with savings banks, fixed deposits with trading banks designated as Home Savings Accounts, and deposits with or shares in registered building or co-operative housing societies. Savings spent in connection with the purchase or construction of the home prior to the date of the contract to buy or build the home, or the date building began, are also acceptable. In addition, savings in certain other forms up to 31 December 1964 were acceptable up to 31 December 1967. These forms were accounts with savings and trading banks other than Home Savings Accounts, and deposits with registered friendly societies and credit unions. However, all new and additional savings after 1 January 1965 must be in one or more of the forms mentioned earlier to be acceptable. The amount of savings that qualify for a grant is the sum of the amounts saved, in acceptable forms, in each savings year. However, the limit on the amount of savings in any savings year that can qualify for a grant is \$1,120 for savings years commencing before 1 January 1965, \$500 for savings years commencing on or after 1 January 1965, and \$600 for savings years commencing on or after 1 May 1966.

Full details of the Scheme are set out in the official pamphlet *A Grant for Your Home* available from banks, building and housing societies, post offices, and offices of the Commonwealth Department of Housing throughout Australia. Additional statistical information is contained in the Annual Reports by the Secretary, Department of Housing, on the *Homes Savings Grant Act 1964-1967*, which are available from the Government Printer, Canberra.

#### Operations under the Home Savings Grant Scheme

Particulars of applications received and approved during 1968-69 and during the period from 20 July 1964, when the scheme commenced to operate, to 30 June 1969 are set out below.

### Housing loans insurance scheme

The Housing Loans Insurance Corporation was established by the *Housing Loans Insurance Act 1965* to insure approved lenders against losses arising from the making of housing loans. The main purpose of the activities of the Corporation is to assist people to borrow, as a single loan at a reasonable rate of interest, the money they need and can afford to repay to obtain a home suited to their requirements.

The Corporation will insure loans of up to \$30,000. The maximum loan to valuation ratio is 95 per cent for loans up to \$15,000 for the purchase or construction of houses. For new loans the maximum is 90 per cent. A once-and-for-all premium of 1½ per cent of the amount of the loan is charged by the Corporation for the insurance of loans representing 80 per cent or more of valuation. The premium rate falls to a minimum of 0.5 per cent on loans of less than 71 per cent of valuation. The premium normally is payable by the borrower, but lenders may agree to add it to the amount of the loan for repayment by the borrower over the duration of the loan. The maximum rate of interest that may be charged on insured loans is 7½ per cent (February 1970) per annum and the maximum period for repayment is forty years. The maximum rate of interest is kept under continuing review and may be varied by the Corporation, with the concurrence of the Minister for Housing, whenever changes appear to be warranted by movements in interest rates generally or by other developments.

The Corporation insures loans that are made for a wide range of purposes in addition to the purchase or construction of a dwelling. The other purposes include alterations, extensions or improvements to a dwelling, and the provision or improvement of roads, kerbing and footpaths. An insured loan may be made only by an approved lender. Approved lenders are appointed by the Corporation from within approved classes of lenders specified by the Minister for Housing. The approved classes include banks, housing and building societies, friendly societies, life and general insurance companies, trustee companies, superannuation and other retirement funds, mortgage management companies and solicitors. The Corporation commenced its operations in November 1965. At the end of December 1969 the face value of insurances current amounted to \$343 million.

### State housing authorities

The following paragraphs describe briefly the organisation of the various State housing authorities and their activities in the fields of home construction and provision of homes on a rental basis (*see* pages 221–3 for their financial advances to persons wishing to purchase or build a home). For summarised figures of total government construction of houses and flats, *see* pages 200–1, and 204–5. For a fuller description of the activities of State housing authorities and their financial advances to home purchasers or builders *see* Year Book No. 53, pages 283–91.

*New South Wales—The Housing Commission of New South Wales.* The Housing Commission of New South Wales was constituted in 1942, its principal function being the provision of low-cost housing for rental or sale to persons in the lower or moderate income groups.

Advances from the Commonwealth have provided most of the Housing Commission's capital funds and by 30 June 1969 had aggregated \$497,245,606 of which \$54,662,144 had been repaid. Other net funds of the Commission at 30 June 1969 comprised repayable advances from the State, \$15,750,001, public loans raised by the Commission, \$1,000,000, grants from the State, \$16,813,740 (including \$8,741,844 from consolidated revenue and \$8,000,000 from taxes on poker machines), provision for maintenance of properties, \$5,127,821, and accumulated surplus, \$35,595,595. In addition, the Commission owed \$5,667,709 to creditors, mainly for purchase of land and work-in-progress. These funds were represented by fixed assets, \$514,059,086 (including \$165,280,737 debtors for purchase of homes) and current assets, \$8,479,242. In 1968–69, the Commission's income was \$35,172,216 (including rent \$24,661,370 and interest \$8,244,140), expenditure \$33,517,643 (interest, \$16,363,078), and capital expenditure (including construction of houses for sale on rental purchase terms) \$35,301,000.

Most of the permanent dwellings provided by the Commission have been erected under the Commonwealth-State Housing Agreements. In 1968–69, 4,277 houses and flats, valued at \$27,432,000, were completed for the Housing Commission by private builders on contract to the Commission.

Upon request by other State Departments the Housing Commission will erect houses for employees of those Departments, the Departments providing the necessary lands and funds. In addition, the Commission erects (with State funds) dwellings for employees of industries connected with decentralisation and development. Specially designed units are erected by the Housing Commission to provide dwellings for elderly persons at rentals within their means. The rents of these units, since October 1969, are approximately \$2.50 a week for elderly single persons and \$3.75 a week for elderly couples, and 4,550 units had been completed at 30 June 1969.

Applicants for Commission housing may elect either to purchase or to rent the dwelling allocated to them. Terms of sale provide for a minimum deposit of \$100 with repayments spread over a maximum period of forty-five years. Further, those tenants who originally elect to rent may subsequently purchase the dwellings occupied by them on similar terms. Applicants may also apply to have a standard type of dwelling erected on their own block of land.

*Victoria—Housing Commission, Victoria.* The Housing Commission, Victoria, was set up in 1938 as a result of the Housing Act of the previous year. The objects of the Commission as now laid down are the improvement of existing housing conditions; the provision of suitable rental housing for persons displaced by slum reclamation or living under unsatisfactory conditions, and for other eligible persons; the sale of houses to eligible persons and the making of advances to such persons to enable them to own their homes; the development of land for housing and related purposes; and the responsibility of maintaining housing standards. Since the signing of the 1945 Commonwealth-State Housing Agreement the construction of dwellings has been financed by the Commonwealth Government and Commission Funds.

At 30 June 1969 the Housing Commission had completed 1,328 dwelling units under the State Housing Scheme, and 62,823 dwelling units under Commonwealth-State Agreements. Specially designed dwelling units are erected by the Commission to provide dwellings for elderly persons at rentals within their means. To 30 June 1969, 3,782 units had been completed.

*Queensland—The Queensland Housing Commission.* The Queensland Housing Commission was established in 1945 to assist in meeting the housing shortage. In addition, the Commission was empowered to build houses itself, either for sale or for rental.

The Housing Commission finances its operations through two Treasury Trust Funds—the Queensland Housing Commission Fund and the Commonwealth-State Housing Fund. In addition, a Home Builders' Deposit Trust Fund is available to assist eligible persons to accumulate money to acquire land and erect a Commission dwelling thereon, or to purchase a dwelling under contract of sale conditions. Total disbursements by the Commission for the year 1968–69 amounted to \$32,318,877, representing \$8,368,740 from the Queensland Housing Commission Fund and \$23,950,137 from the Commonwealth-State Housing Fund, while the Home Builders' Deposit Fund had a balance of nil at 30 June 1969.

During 1968–69 the Commission completed 1,678 house units, bringing the total completions under all schemes since the revival of housing construction in 1944–45 to 38,283. Of this number, 22,590 houses, or 59.0 per cent, were for home ownership, and 15,693, or 41.0 per cent, were for rental.

In the field of rental housing the Commission administers and acts as the constructing authority under the Commonwealth-State Housing Agreements. Operating under the provisions of *'The State Housing Acts, 1945 to 1966'* the Commission, through its scheme of workers' dwellings, makes advances for the construction of dwellings to eligible persons who own a suitable building site. The number of workers' dwellings completed during 1968–69 amounted to 249, making a total of 30,626 completions since the inception of the scheme. The Commission also has power to make advances, secured by mortgage, to firms for housing of employees. The Commission has power to sell houses under contract of sale conditions. Contract of sale agreements were made to purchase 517 of the Commission's houses during 1968–69.

*South Australia—The South Australian Housing Trust.* The South Australian Housing Trust operates under the South Australian Housing Trust Act, 1936–1965 and the Housing Improvements Act, 1940–1966 for the purpose of providing houses for families of limited means. Houses are built for both rental and sale, and to 30 June 1969, 66,381 had been completed throughout the State, of which some 35,011 had been built and sold under various schemes. At 30 June 1969 the rents of five-roomed (i.e. three bedrooms) double-unit houses ranged from \$7.00 a week for houses of an older type to \$9.50 a week for houses then being completed. Single unit rents ranged between \$5.50 and \$14.50. Two- and three-storey groups of flats with weekly rentals ranging from \$8.75 to \$15.50 per flat have been built in the Metropolitan Area and at Elizabeth; 1,246 of these flats have been completed in the Metropolitan Area and 220 at Elizabeth. In 1953 the Trust began building cottage or pensioner flats for elderly people. At 30 June 1969 it had built 995 cottage flats from its own resources and an additional 665 for charitable and non-profit organisations. As an agent for the South Australian Government, the Trust also constructs houses in country areas for married couples of limited means. Rents charged in these cases are below economic rents.

During 1962–63 the Trust commenced construction of rental-purchase houses. The aim of this scheme is to provide less expensive houses for the lower income groups. It is expected that such houses will, to some extent, replace double-unit type rental houses. The Trust has also undertaken the construction of houses for various State Government Departments which require to house staff in

country districts. In addition, 198 houses in country areas have been built for the State Department of Aboriginal Affairs. The letting of these houses to selected Aboriginal families is administered by the Department. In order to assist primary producers the Trust will erect houses on the applicant's own land for his own use or that of his employees, either using local materials or transporting pre-fabricated houses to the site.

*Western Australia—State Housing Commission of Western Australia.* The activities of the State Housing Commission extend throughout the whole State and, in addition to construction of houses and flats under the State Housing Act and Commonwealth-State Housing Agreements, include:

The management as agent of the Commonwealth War Service Homes Scheme in Western Australia;

Construction of houses for other Government Departments (both Commonwealth and State) in Western Australia;

Construction and maintenance of houses for the Government Employees Housing Authority.

At 30 June 1969, the Commission had completed under all schemes since 30 June 1944, a total of 48,017 units of houses and flats throughout the State.

During the twelve months ended 30 June 1969, 1,863 houses and flats were completed: metropolitan area, 1,186; country, 553; and north of 26th parallel, 124; and a further 1,870 units were under construction.

To conserve land resources and to make the most economical use of available facilities such as sewerage, water, and power, the Commission has programmed construction in the metropolitan region to include flats and terrace houses, in addition to individual homes.

At 30 June 1969, medium density accommodation valued at \$13,500,000 (representing 1,569 units) was either under construction or out to tender throughout the metropolitan region.

The greatly increased rate of construction in recent years has created a high demand for serviced building sites, particularly in the metropolitan area, with a consequential rise in land prices.

Despite the high rate of home construction and the ready availability of private project-built homes for purchase, the demand—particularly from the lower income groups—continues to be high. A large proportion of this demand is directed to the State Housing Commission.

Under the provisions of the Commonwealth-State Housing Agreement, 30 per cent of the loan funds is made available each year to building societies. At 30 June 1969, it was estimated that at least 22,000 homes were being purchased with the assistance of building society finance, and the assets of all societies approximated \$130 million. Currently, fifteen permanent societies and 246 terminating societies are operating.

Complementing the activities of the building societies, is the Housing Loan Guarantee Act, which provides means for financial institutions to make large-scale loans to lending institutions with full security by way of a 100 per cent guarantee. The Act was introduced in 1957 and with subsequent amendments, now enables lending institutions to make high ratio advances to families of low and moderate means without any additional charge. The interest rate charged may not exceed 6½ per cent per annum reducible. The maximum loan permitted is \$10,000 in metropolitan and country areas, and \$13,000 in areas north of the 26th parallel; and the value of the house, excluding land, must not exceed \$10,000 in the metropolitan area; \$11,000 in country areas; and \$17,500 in areas north of the 26th parallel.

*Tasmania—The Housing Department.* The Housing Department was established in July 1953 and is responsible for administering that portion of the *Homes Act* 1935 which relates to the acquisition and development of land for housing purposes and the erection of homes for rental and ultimate sale, and the *Casual Workers' and Unemployed Persons' Homes Act* 1936.

During 1968-69, 638 dwellings were completed. Construction since 1944 has comprised 11,464 dwelling units, of which 10,886 were single units (9,020 of timber), 260 were elderly persons' flatettes, 22 were maisonettes, and 296 were multi-unit flats.

Flats, maisonettes and elderly person's homes are for rental only. Single unit dwellings are normally allotted on a purchase contract basis, but in some special cases may be occupied on a rental basis. The rental of a newly erected three-bedroom timber house in the Hobart metropolitan area approximated \$15.10 in the June quarter of 1969. In certain necessitous cases rental rebates are allowed. Under the current rental rebate formula a married couple whose only income is the age pension pay \$3.80, while a single person solely dependent on the pension pays \$2 a week.

Allotments are usually made on a no-deposit purchase contract basis, repayments being over a maximum term of fifty-three years. Purchase contracts are sometimes surrendered to the Department. Net of surrenders, 7,770 purchase contracts had been entered into by June 1969. The sale price, excluding land, of a new three-bedroom house in the Hobart metropolitan area was approximately \$9,275 in the June quarter of 1969.

**Housing schemes in Commonwealth Territories**

*Northern Territory.* In 1946 control of all government-owned residences in the Territory (excluding those belonging to the Defence Services or Commonwealth Railways, or attached to post offices) was vested in the Administration. The Northern Territory Housing Commission provides rental housing for persons of limited means who are not adequately housed and who are not officers of either the Commonwealth or the Northern Territory Public Service. The Commission was established in 1959 and operates under authority of the *Housing Ordinance 1959-1968*; to 30 June 1969 a total of 1,785 houses and flats had been completed; 1,206 of these are in Darwin (including 326 flats), 381 in Alice Springs (including 51 flats), 91 in Katherine (including 10 flats), and 97 in Tennant Creek (including 9 flats); 6 houses in Pine Creek and 2 each at Elliot and Mataranka. A further 425 houses and 164 flats were under construction.

*Australian Capital Territory.* The Commonwealth Government provides houses and flats for rental to persons employed in the Australian Capital Territory. At 30 June 1969 the Department of the Interior controlled 8,197 houses and 2,022 flats for rental purposes. Government rental houses may be purchased by tenants. From 1 July 1950 to 30 June 1969, 6,974 houses had been sold to tenants.

*Papua and New Guinea.* In 1960 the Administration, through the Commissioner for Housing, commenced a scheme for providing low-cost houses for rental and eventual sale, where possible, to indigenes, mixed race peoples and Asians. To 30 June 1969, 601 houses had been completed.

A Housing Commission has been established to improve existing housing conditions, to provide adequate and suitable housing for letting and sale to persons who are of limited means or unsatisfactorily housed, to make advances for home purchase, and to develop land for housing. The *Housing Commission Ordinance 1967* received the Governor-General's assent on 1 June 1967.

**Summary of rental activities of government authorities**

The first of the two following tables shows the revenue from rental for dwellings under control of government housing authorities each year from 1964-65 to 1968-69, and the second the number of tenants paying rent for dwellings under control of government housing authorities at the end of each year 1964-65 to 1968-69.

(a) Excludes tenanted temporary dwellings. (b) Excludes temporary and emergency dwellings. (c) Number of occupied dwellings at 30 June.

### Advances to home purchasers

Many prospective home purchasers wish to borrow for the purpose of constructing or purchasing their own homes. Usually the loan is covered by way of mortgage of the home to be constructed or bought. Such loans are provided from a number of private sources and from agencies owned or guaranteed by the State or Commonwealth Governments. The information in this section concerns the direct loans made to home purchasers by the more important institutional lenders. Loans to institutions which in turn lend moneys to home purchasers and loans to contract builders, etc. are excluded as far as possible. The loans may be for the construction of new dwellings, the purchase of existing dwellings, for additions, renovations, etc., as first or subsequent mortgages, overdrafts and so on. While figures of all loans to home purchasers are not available, the institutions mentioned account for a significant proportion of total loans. Details of the terms and conditions of lending are given, together with available information on the number and value of loans made.

#### State authorities and agencies

##### *New South Wales*

*Rural Bank of New South Wales—Sale of Homes Agency.* A Sale of Homes Agency was established in 1954 to arrange for the sale on terms of houses erected by the Housing Commission of New South Wales. The Agency's operations began with the sale to selected purchasers of 100 houses made available by the Commission during 1954-55 and 1955-56. The sales were made on the basis of 10 per cent deposit and repayment of the balance over a maximum period of forty years, with interest at 4.5 per cent per annum. Total advances under that scheme amounted to \$646,648; at 30 June 1969 the advances outstanding amounted to \$344,360 in respect of 73 houses.

Since 1956 the Sale of Homes Agency has acted as the agent of the Housing Commission in arranging the sale on terms of houses erected under the Commonwealth-State Housing Agreements. The terms of sale provide for a minimum deposit of \$100 and repayment of the balance over a maximum period of forty-five years, with interest rates, since the inception of the scheme, ranging from 4.25 to 5.15 per cent per annum. Particulars of the advances made by the Agency in connection with the sale of houses erected under the 1956, 1961, and 1966 Agreements are given in the following table.

**RURAL BANK OF NEW SOUTH WALES—SALE OF HOMES AGENCY  
ADVANCES FOR HOMES SOLD UNDER THE 1956, 1961 AND 1966  
COMMONWEALTH-STATE HOUSING AGREEMENTS  
1964-65 TO 1968-69**

Year	Advances during year		Advances outstanding at end of year(a)	
	Number of houses	Amount	Number of houses	Amount
		\$'000		\$'000
1964-65 . . .	1,777	14,356	16,042	105,648
1965-66 . . .	1,486	12,197	17,126	114,154
1966-67 . . .	1,073	9,005	17,763	119,077
1967-68 . . .	1,444	12,866	18,724	127,288
1968-69 . . .	1,227	11,167	19,406	133,363

(a) Comprises principal outstanding and loan charges due but not paid.

The Sale of Homes Agency also acts as agent for the Housing Commission in arranging the sale of houses erected by the Commission on applicants' land. Under this scheme persons who have established a housing need may apply to the Commission to have a standard-type dwelling erected on their own land. The houses are sold, at a price equivalent to their capital cost, on the same terms as for houses erected under the 1956-1966 Housing Agreements. Up to 30 June 1969, 525 houses had been built under this scheme at a cost of \$3,684,923, the balance of indebtedness at that date was \$3,254,949.

*Rural Bank of New South Wales—Other loans.* The Rural Bank of New South Wales provides assistance to individuals for the erection or purchase of homes and for other approved purposes associated with homes. Advances are based on the bank's official valuation of the dwelling. The rate of interest on long-term loans for housing purposes is 5.75 per cent per annum.

*Victoria*

*Housing Commission, Victoria.* Very few houses were sold by the Commission until 1954. The amendments to the Commonwealth-State Housing Agreement in 1955-56 have had the effect of substantially increasing the number of houses sold. Whereas between 1949 and 1954 only about 100 houses were sold, a total of 26,923 houses were sold on terms to 30 June 1969, the total value of terms sales exceeding \$220 million. Until 1964-65, houses were sold on a minimum deposit of \$200, but during that year provision was made to sell without deposit in very special circumstances. The maximum repayment term is forty-five years with interest currently at 4½ per cent.

*Home Finance Trust.* In 1956 a Home Finance Trust was established with the object of receiving money from institutions and others in order to make loans for the erection or purchase of houses. Applicants for loans must declare that they intend to use the houses as homes for themselves, their families and dependants.

Loans granted are on the basis of a first mortgage over the house. Loans are not to exceed ninety-five per cent of the value of the security (house and land) and are not made if the value of the security exceeds \$11,600. The house must not have been erected more than two years before the date of mortgage. Repayment of loans may be made over a maximum period of thirty years, with interest charges determined by the Trust. At 30 June 1969, 3,536 loans totalling \$23,527,019 were outstanding.

In 1963 the Trust was empowered to make housing loans on the security of second mortgages subject to conditions similar to those applying to the first mortgage loans, except that the maximum term for repayment of a loan is ten years and no restriction is placed on the percentage of loan to valuation. At 30 June 1969, 2,005 second mortgage loans were outstanding, the amount involved being \$2,394,310.

(See Savings Banks, page 224, for activities of the State Savings Bank of Victoria.)

*Queensland*

*Queensland Housing Commission.* The present maximum advance allowable under the Acts is \$9,000 for a timber, brick veneer, brick, or concrete building. The rate of interest charged on new advances in 1968-69 was 5½ per cent per annum. Repayment may be made at the option of the borrower over either a thirty year or a forty-five year period.

*Workers' dwellings.* From 4 October 1962 the maximum advance under this scheme was increased to \$7,000 for all types of workers' dwellings. This was increased to \$8,000 from 2 June 1966 and to \$9,000 from 22 May 1969. Total advances made for dwellings since operations commenced in 1910 to 30 June 1969 amounted to \$69,323,932.

*South Australia*

*South Australian Housing Trust Sales Schemes.* Prospective purchasers of Housing Trust houses (other than Rental Purchase houses) may purchase either by paying cash or by paying a deposit and arranging for a loan on security of a first mortgage from any of the recognised lending authorities. In cases where the deposit and the first mortgage so raised are insufficient, the Trust may advance the balance of the house price on security of a second mortgage, the term of which is usually coterminous but not exceeding 30 years. The interest rate is 6½ per cent and the principal is adjusted quarterly. During 1968-69 the Trust commenced 635 second mortgages valued at \$1,226,000. At 30 June 1969 second mortgages totalled 9,116 and the balance outstanding at that date was \$9,650,000. A minimum deposit of \$100 is required for houses built under the Rental Purchase Scheme. The balance of the purchase price is repayable to the Trust in weekly instalments over periods up to 40 years at 5½ per cent interest.

*State Bank of South Australia.* The State Bank, together with the Housing Trust, are the principal agents of the State Government for the distribution through the Home Builders' Fund of moneys received under the Commonwealth-State Housing Agreement. During 1968-69 the Bank opened 1,551 new accounts worth \$11,469,288 in the Home Builders' Fund. The balance of loans in this Fund outstanding at 30 June 1969 totalled \$83,245,156. In addition, during 1968-69, \$638,233 was advanced to the public under the Advances for Homes Act, 1928-1958, which is administered by the Bank on behalf of the State Government. Under this Act 98 new accounts were opened during 1968-69, leaving a balance outstanding at 30 June 1969 of \$23,662,332. The present maximum housing loan under either of these schemes is \$8,000, repayable over a period not exceeding fifty years at a rate of interest of 6 to 6½ per cent per annum calculated on monthly balances.

*Western Australia*

*State Housing Commission of Western Australia.* Under the State Housing Act and the Commonwealth-State Housing Agreement the maximum loan is \$8,000 by way of mortgage, while under contract of sale the maximum is \$6,500 on the building plus the value of the land in the metropolitan area, and greater amounts in rural areas, depending on the circumstances.

To proceed under the mortgage conditions, a deposit of not less than 10 per cent is required, but under contract of sale the deposit may be as low as \$200. The interest rate on all advances is  $5\frac{3}{8}$  per cent per annum and the repayment period is forty-five years. The income eligibility figure varies according to the movement of the basic wage, and currently an applicant in the Metropolitan Area cannot have an income exceeding \$2,799 a year, plus \$100 for each dependent child under twenty-one years of age. For the country the corresponding amount is \$3,311 per annum plus \$100 for each dependent child under twenty-one years, and north of the twenty-sixth parallel the Minister may allow families with an income of up to \$4,378 plus \$100 for each dependent child under twenty-one years of age to be given financial assistance. A second-mortgage scheme exists under the State Housing Act, which provides that assistance be limited to those applicants who are building or purchasing new homes, the cost of which, excluding land, does not exceed \$10,000. The Commission limits the second mortgage to a maximum of \$2,000.

(See Savings Banks, page 225, for activities of the Savings Bank Division of The Rural and Industries Bank of Western Australia).

*Tasmania*

*Housing Department.* The interest rate on purchase contract loans from the Housing Department signed after 1 May 1965 is  $4\frac{1}{4}$  per cent. To be eligible for a house on purchase contract terms an applicant must be married or about to be married, or have dependants for whom it is necessary to provide a home. The number of loans outstanding at 30 June 1969 was 7,099, and the amount outstanding \$48,940,000.

*Agricultural Bank of Tasmania.* The Agricultural Bank, as an approved institution under the Commonwealth-State Housing Agreement, receives part of those funds allocated for advances to home builders. To be eligible for a loan an applicant must be married or about to be married, be over the age of twenty-one, and own a block of land. The maximum amount of an advance to an applicant is \$8,000 for all types of houses in certain areas, provided that the total advance does not exceed ninety per cent of the Bank's valuation of land and dwelling. Advances to borrowers are repayable by equated instalments over thirty-one years. Advances made as from 1 July 1965 were at an interest rate of  $5\frac{3}{8}$  per cent.

During 1968-69, 338 advances were approved, valued at \$1,815,000. Since November 1945 a total of 4,013 loans amounting to \$24,105,000 has been approved, of which 3,232 have been for erection of dwellings and 781 for the purchase of existing homes. Total advances outstanding at 30 June 1969 amounted to \$17,697,000. These figures exclude advances to building societies.

**Commonwealth authorities and Territories***Department of Housing*

In December 1963 the Department of Housing was created, and to it were transferred the functions and staff of the War Service Homes Division and the Housing and Building Industry Branch of the Department of National Development. Further details relating to the Department of Housing may be found on page 83 of Year Book No. 50.

*War Service Homes*

For details of the operations under the War Service Homes Act, see pages 212-14.

*Northern Territory*

*Loans Scheme.* This scheme was commenced in 1953 and is administered by the Home Finance Trustee under the *Housing Loans Ordinance* 1949-1967. Advances may be made for the erection of a house, the purchase or enlargement of an existing house, the completion of a partially erected dwelling, or the discharge of a mortgage already existing. Loans are provided on a deposit of 5 per cent of the first \$4,000 and 10 per cent of the balance of the Trustee's valuation up to a maximum of \$8,000. The rate of interest charged is  $6\frac{1}{4}$  per cent per annum reducible to  $5\frac{1}{4}$  per cent per annum if instalment payments are made by the due date. The maximum period of repayment is forty-five years. Up to 30 June 1969, 1,249 loans totalling \$7,010,730 had been approved. These were for: erection, 756; purchase, 371; enlargement or completion, 67; discharge of mortgage, 55.

*Sales Scheme.* Tenants of government-owned houses under the control of the Administration may purchase the dwellings they occupy either for cash or on terms requiring a minimum deposit of 5 per cent of the first \$4,000 and 10 per cent of the balance of the purchase price with repayments over a maximum period of forty-five years including interest at 4½ per cent per annum.

*Housing Commission Sales Scheme.* Since the November 1963 amendment of the *Housing Ordinance* 1959–1968 the Housing Commission has been permitted to sell its houses to tenants in occupation. The terms require a minimum cash deposit of \$200 and repayment of the remainder of the loan over a period not exceeding forty-five years; there is no prescribed limit to the amount of the loan and the rate of interest is fixed by the Commission from time to time.

#### *Australian Capital Territory*

Loans may be granted by the Commissioner for Housing to enable persons to purchase or build a new house in the Australian Capital Territory. Where the Commissioner's valuation does not exceed \$4,000 the maximum loan may not exceed ninety-five per cent of the valuation. If the Commissioner's valuation exceeds \$4,000, the maximum loan is ninety-five per cent of the first \$4,000 and ninety per cent of the balance (but in no case can the amount lent exceed \$8,000). Repayment may be made over a maximum period of forty-five years. The current rate of interest is 6½ per cent per annum with a concession of 1 per cent for payments made on or before the due date. At 30 June 1969, 6,139 houses were under mortgage to the Commissioner.

Government rental houses may be purchased by tenants. The basis of the sale is a minimum deposit of 5 per cent of the purchase price fixed by the Department of the Interior with no limit to the amount which may be held on mortgage from the Department. Repayment of the amount covered by mortgage may be made over a maximum period of forty-five years. The interest rate is 6½ per cent per annum with a concession of 1 per cent for payment made on or before the due date. To 30 June 1969, 6,974 houses had been sold to tenants.

#### *Papua and New Guinea*

Under authority of the *Housing Loans Ordinance* 1953–1963 the Commissioner for Housing may make advances to any member of the community for the erection of a house, the purchase or enlargement of an existing house, the completion of a partially erected dwelling, or the discharge of a mortgage already existing. The maximum loan is \$7,000. The maximum period of repayment is twenty-five years for timber and thirty-five years for brick dwellings. The Commissioners' responsibilities were transferred to the Housing Commission on 1 July 1968. Minimum cash deposit is 5 per cent of the first \$4,000 plus 10 per cent of the remainder of the Commissioner's valuation. The effective rate of interest is 5 per cent per annum. Up to 30 June 1969, 472 loans totalling \$2,537,535 had been approved.

#### **Savings banks**

All savings banks lend funds for housing to both individuals and building societies. Separate figures of loans to individuals are not available for periods prior to 1 July 1969. The amounts outstanding on housing loans of all savings banks (including loans to building societies) were \$1,549 million, \$1,751 million and \$1,961 million at the end of June 1967, 1968 and 1969 respectively. Some details in respect of three savings banks are shown below.

*State Savings Bank of Victoria.* The Bank grants long-term loans to depositors to enable them to build, purchase or improve homes. These loans are granted by both the Crédit Foncier and Savings Bank Departments.

The maximum proportion of valuation to be granted as Crédit Foncier loan is eighty per cent and the maximum loan is \$8,000. Interest is 5½ per cent and the term of the loan is ten years, subject to renewal. The maximum proportion of valuation granted as Savings Bank Department loan is seventy-five per cent and the maximum loan is \$12,000. For a property to be occupied by the borrower the interest rate is 6 per cent to 7 per cent, depending on the amount of the loan. The above conditions are those current as at 16 February 1970 but are subject to review and alteration by the Bank at any time. During the year 1968–69 the Bank advanced \$69,457,090 to 9,482 borrowers in addition to \$96,439 to Co-operative Housing Societies and \$300,000 to the Home Finance Trust. At 30 June 1969 the total debt of 68,954 individual borrowers was \$361,040,233, while indebtedness of Co-operative Housing Societies and the Home Finance Trust amounted to \$13,728,883 and \$9,594,037 respectively.

*Savings Bank of South Australia.* The bank grants mortgage loans for the building or purchase of houses for personal occupation, the maximum loan available being \$8,000 for existing houses or \$8,500 for houses not previously occupied or those to be erected. Normally advances are made up to 85 per cent of the Bank's valuation in respect of existing houses or 90 per cent in respect of houses

not previously occupied or those to be erected but, 95 per cent of such valuation may be advanced (maximum loan, \$6,000 or less.) The maximum loan period is thirty years at a rate of interest of 5½ per cent per annum; this rate is subject to review after one year. During 1968-69 the Bank advanced \$15,340,153 by way of housing loans, the number of new loans totalling 2,085. At 30 June 1969 there were 26,462 housing loans current with a balance outstanding of \$131,280,060.

*Rural and Industries Bank of Western Australia (Savings Bank Division).* The Rural and Industries Bank of Western Australia is authorised by the *Rural and Industries Bank Act, 1944-1966* to make loans from moneys on deposit with its Savings Bank Division to a person or body for the purchase or erection of a dwelling. It is the policy of the Bank to provide funds for housing primarily for occupancy by the borrower. There is no fixed limit on the amount of a loan. The average loan in the case of a brick or timber house is \$8,700. The rate of interest varies with the current bank rate and is usually ¾ per cent lower. The rate at 30 June 1969 was 6 per cent. Loans may be approved up to 30 years but the average term of housing loans is eighteen years.

The bank undertakes the sub-division and development of land and the erection of homes which are sold under conditions which ensure that the purchasers are genuine home seekers. This activity commenced in May 1967. The number of homes built to 30 June 1969 was 120, whilst another 39 were under construction. Another 72 building lots (under certain restrictions) were made available to project builders for the erection and sale of houses. A further 314 building lots have been auctioned to the public under restrictions designed to favour genuine home seekers.

#### Trading banks

Apart from loans by certain State banks as Government agencies (*see* pages 221-3) advances for housing to individuals are also provided by the trading banks. Amounts outstanding in respect of advances to individuals for housing purposes made by the major trading banks were \$294 million on the second Wednesday of July 1969 (*see* the chapter Private Finance for further details).

#### Life insurance companies

The life insurance companies are another source of funds for housing. Details of new loans made during the twelve months ended June 1965 to 1969 are given in the following table.

LIFE INSURANCE COMPANIES: HOUSING LOANS PAID OVER STATES AND TERRITORIES, 1963-64 TO 1967-68

State or Territory	Amount (\$'000)				
	1964-65	1965-66	1966-67	1967-68	1968-69
New South Wales . . . . .	23,073	24,821	22,486	23,729	29,130
Victoria . . . . .	17,788	17,112	16,843	19,471	22,549
Queensland(a) . . . . .	5,665	5,538	4,856	4,918	6,098
South Australia(b) . . . . .	4,686	4,808	4,371	4,559	5,366
Western Australia . . . . .	3,561	3,563	4,157	5,331	6,446
Tasmania . . . . .	1,396	1,526	1,321	1,171	1,530
Australian Capital Territory . . . . .	827	869	945	631	666
Total . . . . .	56,995	58,237	54,979	59,810	71,784

(a) Includes loans made in Papua and New Guinea.

(b) Includes loans made in Northern Territory.

Amounts outstanding at the end of June 1965, 1966, 1967, 1968 and 1969 in respect of housing loans made by insurance companies were \$339 million, \$356 million, \$366 million, \$378 million and \$398 million respectively.

#### Registered building societies

There were 4,550 registered building societies operating in Australia during the year ending 30 June 1968 of which 159 are permanent societies and the remainder terminating societies. The permanent societies are in the main investment societies which make loans for housing purposes, usually on *crédit foncier* terms, and obtain their funds from share capital deposits and borrowings from banks and other lending institutions. The terminating societies are co-operative societies which make loans to members from funds obtained from lending institutions (usually government guaranteed), members' subscriptions, and, since 1956, from moneys provided under the Commonwealth-State Housing Agreements. Details of new loans paid over and net advances outstanding for each of the years ended June 1964 to 1968 are given in the following table (*see also* the chapter Private Finance).

## REGISTERED BUILDING SOCIETIES: STATES, 1963-64 TO 1967-68

<i>Year</i>	<i>N.S.W.</i>	<i>Vic.</i>	<i>Qld</i>	<i>S.A.</i>	<i>W.A.</i>	<i>Tas.</i>	<i>Total</i>
LOANS PAID OVER DURING YEAR (\$'000)							
1963-64 . .	72,284	29,106	13,184	3,102	10,430	5,721	133,827
1964-65 . .	82,329	35,848	16,550	3,819	13,091	6,445	158,082
1965-66 . .	90,635	33,137	18,560	3,521	12,611	5,425	163,888
1966-67 . .	112,738	36,492	20,641	4,412	14,031	6,338	194,652
1967-68 . .	142,084	49,456	29,369	5,121	24,436	9,553	260,018
NET ADVANCES OUTSTANDING(a) AT END OF YEAR (\$'000)							
1963-64 . .	351,841	198,684	55,543	13,967	35,483	17,798	673,316
1964-65 . .	393,343	212,438	64,449	15,790	44,171	21,413	751,605
1965-66 . .	441,676	223,595	74,659	17,239	52,182	23,775	833,128
1966-67 . .	507,093	236,145	85,730	19,470	61,015	26,659	936,112
1967-68 . .	593,438	259,574	103,194	22,388	77,254	32,204	1,088,053

(a) Net of borrowing members' funds.

**Other lenders**

Little information is available on advances made by other lenders such as superannuation and other trust funds, private finance and investment companies, etc. In South Australia advances on first mortgage made by the South Australian Superannuation Fund are granted under the Homes Act, 1941-1968, on a *crédit foncier* basis, by which the State Government guarantees up to 25 per cent of the value of the mortgage, thus raising the limit of the advance. Loans so made are limited to 95 per cent of the Superannuation Board's valuation to a maximum of \$6,000, or 85 per cent of the Board's valuation to a maximum of \$8,000. The rate of interest is 6½ per cent per annum, calculated on quarterly balances, reducing to 5½ per cent when payments are made within a prescribed period of twenty-one days from the end of the quarter. The term of the mortgage may run for thirty years on a stone or brick home or twenty years on a timber-framed construction. Trustee mortgages may be granted as an alternative to the foregoing. A maximum of 70 per cent of the Board's valuation may be granted for a trustee mortgage, other conditions being those applicable to mortgages granted under the Homes Act. At 30 June 1969 there were 5,628 loans current, the principal outstanding totalling \$25,009,613. During 1968-69 the value of advances made was \$1,780,259.

## CHAPTER 10

### LABOUR, WAGES AND PRICES

For particulars of the Farm Production Price Index, see the chapter Miscellaneous. For current information on the subjects dealt with in this chapter, see the *Monthly Review of Business Statistics*, the *Digest of Current Economic Statistics* (monthly), and the *Quarterly Summary of Australian Statistics*, also the mimeographed statements *Wage Rates and Earnings*, *Consumer Price Index*, *Wholesale Price (Basic Materials and Foodstuffs) Index*, *Wholesale Price Indexes—Price Index of Electrical Installation Materials*, and *Export Price Index*. For further information on these subjects, except the Export Price Index, see the *Labour Report* issued by this Bureau.

#### RETAIL PRICES AND PRICE INDEXES

Retail prices of food and groceries and average rentals of houses for years extending back to 1901 have been collected by the Commonwealth Statistician, and in some cases were recorded by the Statisticians of various States for earlier years.

Retail prices of a more extensive range of commodities (including clothing) and certain services in common demand have been ascertained at frequent and regular intervals since 1923, and comparable information was ascertained for the month of November in each year from 1914 to 1922. The range of items for which retail prices data are obtained was considerably expanded in 1948 and in later years. Average retail prices of certain food and grocery items in current periods are published in the annual *Labour Report*.

An explanation of the nature and purposes of retail price indexes is given in the various editions of the annual *Labour Report*, together with further particulars of indexes then current. Previous retail price indexes for Australia are briefly described below. The current retail price index, entitled the Consumer Price Index, was published for the first time in August 1960. It was compiled retrospectively to 1948–49. A description of the Consumer Price Index is given on pages 228–9.

#### Previous retail price indexes

Five series of retail price indexes had been compiled at various times for Australia by the Commonwealth Statistician prior to 1960. Each of these was continued until changed conditions required the compilation of indexes more directly relevant to current conditions. The respective indexes were as follows.

- (i) *The 'A' Series Index* (covering food, groceries and house rents) was first compiled in 1912 with the year 1911 as base = 1,000. It was discontinued in June 1938.
- (ii) *The 'B' Series Index* (covering food, groceries and rent of 4 and 5 roomed houses) was first compiled in 1925 and continued until December quarter 1953. It was the food and rent constituent of the 'C' Series Index and was designed to replace the 'A' Series Index for general statistical purposes.
- (iii) *The 'C' Series Index* (covering food and groceries, rent of 4 and 5 roomed houses, clothing, household drapery, household utensils, fuel, lighting, fares, smoking, and some other miscellaneous items) was first compiled in 1921. It was last issued on its original basis for December quarter 1960. For certain transitional purposes a 'C' Series Index was issued for some quarters after that. This was calculated by varying the index numbers of December quarter 1960 in proportion to movements shown by the Consumer Price Index.
- (iv) *The 'D' Series Index*, derived by combining the 'A' and 'C' Series Indexes, was used by the Commonwealth Court of Conciliation and Arbitration from May 1933 to May 1934 and then discontinued.
- (v) *The Interim Index* (covering food and groceries, rent of 4 and 5 roomed houses, clothing, household drapery, household utensils, fuel, lighting, fares, smoking, certain services and some miscellaneous items) was first compiled in 1954 with the year 1952–53 as base = 100. As its title indicated, it was constructed as a transitional index. Its compilation was discontinued following its replacement by the Consumer Price Index in June quarter 1960.

An index of retail price movements from 1901 to 1969 is shown on page 233 of this Year Book. It is derived by linking together successive indexes (the 'A' Series, the 'C' Series and the Consumer Price Index) available for that period.

In 1937 the Commonwealth Court of Conciliation and Arbitration introduced a 'Court' Index for the purpose of its system of making automatic quarterly adjustments to the basic wage within its jurisdiction. By decision of the Court the 'Court' Index ceased to be issued by the Industrial Registrar as at December quarter 1953. These 'Court' Index numbers were an arithmetical conversion of the 'C' Series Retail Price Index.

### Consumer Price Index

This retail price index was first compiled in 1960, retrospectively to September quarter 1948. A full description of the index is given in *Labour Report* No. 53, 1967.

#### Origin

The list of component items and the weighting pattern of the 'C' Series Retail Price Index, first adopted in 1921, were slightly revised by a Conference of Statisticians in 1936, but otherwise continued almost unchanged until the index was discontinued in 1960. The reasons for this and the circumstances which led to the present Consumer Price Index appear from ensuing paragraphs.

From the outbreak of war in 1939 to late in 1948, periodic policy changes in regard to various war-time controls (including rationing) caused recurrent changes in consumption and in the pattern of expenditure. This rendered changes desirable, but made it impracticable either to produce a new index, or to revise the old one, on any basis that would render the index more representative than it already was of the changing pattern of household expenditure in those years.

When commodity rationing had virtually ceased in the latter part of 1948, action was taken by the Statistician to collect price data of about 100 additional items and to gather information about current consumption and expenditure patterns. This was done to facilitate review of the component items and weighting system of the 'C' Series Retail Price Index in the light of the new pattern of wage-earner expenditure and consumption that appeared to be emerging. But there supervened, in the next few years, conditions which caused wide price dispersion coupled with a very rapid rise in prices and a new sequence of changes in consumption and in the pattern of wage-earner expenditure. Under these conditions it was not possible to devise any new weighting pattern likely to be more continuously representative of conditions then current than was the existing 'C' Series Retail Price Index on the 1936 revision.

A Conference of Statisticians considered the matter in June 1953, and resolved (in part) as follows:

- '(a) that, in view of the persistence of recurrent changes in the pattern of consumer expenditure in the post-war period it is undesirable to make a general revision of the list of items and weighting system of the 'C' Series Retail Price Index at present, unless industrial tribunals expressly desire some revision for special purposes;
- '(b) that an Interim Retail Price Index be compiled with putative weights and components representative, as nearly as may be, of the post-war pattern of consumer usage and expenditure.'

The 'C' Series Index continued to be compiled on its pre-war basis without significant change in procedures. The Interim Retail Price Index was introduced in 1954 and continued until March quarter 1960.

The Interim Index was a transitional index designed to measure retail price variations on the 'C' Series model in terms of post-war consumption weights as emerging in the early 1950's. It embraced a wider range of commodities and services than did the 'C' Series Retail Price Index, but it did not take into account successive major changes in the pattern of expenditure and modes of living that began to occur early in 1950 and through to 1960. These changes could not in fact be detected and measured promptly and incorporated into an index concurrently with their happening. Nor was it envisaged as desirable to adopt fundamentally new procedures in price index construction until it was fully evident that far-reaching procedural changes were necessary to meet the situation that had developed between about 1950 and 1960.

In this period home-owning largely replaced house-renting, the use of the motor car greatly increased and partly replaced use of public transport, and various items of electrical household equipment and television came into widespread use. The impact of these (and other) changes in usage upon the pattern of household expenditure was heightened by disparate movements in prices. Together, they rendered nugatory the attempt to meet the situation by devising a single Interim

Retail Price Index. As studies progressed and new data became available it was clear that no single list of items and no single set of fixed weights would be adequately representative as a basis for measuring retail price changes at all times throughout the post-war period. In consequence, the situation was met by compiling the Consumer Price Index constructed as a chain of linked indexes with significant changes in composition and weighting effected at short intervals.

#### **Purpose, scope and composition**

The Consumer Price Index is a quarterly measure of variations in retail prices for goods and services representing a high proportion of the expenditure of wage-earner households. The weighting pattern relates to estimated aggregates of wage-earner household expenditures and not to estimated expenditures of an 'average' or individual household of specified size, type, or mode of living. In this way it is possible to give appropriate representation to owner-occupied houses as well as rented houses and to include motor cars, television sets, and other major expenditures which relate to some households and not of others.

Consumer (retail) price indexes are sometimes loosely called 'cost of living indexes' and are thought to measure changes in the 'cost of living'. Neither the Consumer Price Index nor any other retail price index measures those changes in the cost of living that result directly from changes in the mode or level of living. Changes of that kind are matters for consideration apart from price indexes, but the change in prices of goods and services is a very important part of the change in the cost of living and this part is measured by consumer (retail) price indexes.

The Consumer Price Index covers a wide range of commodities and services arranged in the following five major groups:

- Food;
- Clothing and drapery;
- Housing;
- Household supplies and equipment;
- Miscellaneous.

These groups do not include every item of household spending. It is both impracticable and unnecessary for them to do so. Prices are collected regularly for specified quantities and qualities of a large and representative selection of commodities and services. Movements in the prices of these items, when combined in suitable proportions, provide a representative measure of price change as affecting a high proportion of the expenditure of wage-earner households.

#### **Structure—a chain of linked indexes**

Substantial changes have occurred in consumer usage and patterns of expenditure since the 1939-45 War. In order to keep the weighting pattern representative of current expenditures it has been necessary to construct indexes with additional items and changes in the weighting pattern at intervals, rather than on the basis of a list of items and set of weights that remained unchanged throughout the whole period covered. For the six State capital cities six series for short periods (namely, from the September quarter of 1948 to the June quarter of 1952, from the June quarter of 1952 to the June quarter of 1956, from the June quarter of 1956 to the March quarter of 1960, from the March quarter of 1960 to the December quarter of 1963, from the December quarter of 1963 to the December quarter of 1968, and from the December quarter of 1968 onwards) have therefore been constructed and linked to form a continuous retail price index series known as the Consumer Price Index. (For information regarding these links for Canberra see *Labour Report* No. 53, 1967.)

During each period between links the items and weighting remained unchanged. At times of linking the weighting pattern was altered, and new items (mainly ones that had become significant in household expenditure) were introduced. Under this method, in effect, average percentage price movements are assessed on one pattern up to the time of the link and on another pattern thereafter. The process of linking ensures that the series reflects only price variations and not differences in cost of the old and new lists of items. The introduction of new items and weights by linking does not, of itself, raise or lower the level of the index.

## **Tabular statements of retail price index numbers**

### **Consumer Price Index**

The index has been compiled for each quarter from September quarter 1948 and for each year from 1948-49. 'All Groups' index numbers and 'Group' index numbers for each of the five major groups are compiled and published regularly for the six State capital cities combined and separately

and for Canberra. The reference base for each of these indexes is: year 1966-67 = 100.0. Prior to March quarter 1969, all indexes were published on the base: 1952-53 = 100.0. For further details see *Labour Report* No. 53, 1967. Figures appearing after the decimal point possess little significance for general statistical purposes. They are inserted to avoid distortions that would occur in rounding off the figures to the nearest whole number.

Index numbers for each quarter are first issued in mimeographed statistical bulletins available from the Commonwealth Statistician about three weeks after the end of the quarter. These bulletins contain comment on the index and on significant price movements in that quarter. Tables showing index numbers for preceding quarters and years are presented.

The following table shows Consumer Price Index Numbers (Total all groups) for the six State capital cities combined and separately and for Canberra, for periods from the year 1952-53.

**CONSUMER PRICE INDEX: ALL GROUPS INDEX NUMBERS  
SIX STATE CAPITAL CITIES AND CANBERRA, YEARS 1952-53 TO 1968-69 AND QUARTERS  
MARCH 1967 TO DECEMBER 1969**

(Base of each index: year 1966-67 = 100.0)(a)

The separate city indexes measure price movements within each city individually. They do not compare price levels as between cities.

Period	<i>State Capital Cities—Combined and Separately</i>

(a) Figures appearing after the decimal point possess little significance for general statistical purposes. They are inserted to avoid distortions that would occur in rounding off the figures to the nearest whole number.

The following table shows Consumer Price Index Group Index numbers for each State capital city and for Canberra for recent years and quarters.

**CONSUMER PRICE INDEX: GROUP INDEX NUMBERS  
SIX STATE CAPITAL CITIES AND CANBERRA, YEARS 1948-49 TO 1968-69  
AND QUARTERS MARCH TO DECEMBER 1969**

*(Base of each index: year 1966-67 = 100.0) (a)*

The index numbers hereunder are designed to measure movements in retail prices of specified groups of items for specified cities individually. They measure variations from time to time and not differences in price level as between cities.

(a) Figures appearing after the decimal point possess little significance for general statistical purposes. They are inserted to avoid distortions that would occur in rounding off the figures to the nearest whole number. (b) Weighted average.

## Retail Price Index Numbers, 1901 to 1969

The index numbers shown below are presented as a continuous series, but they give only a broad indication of long-term trends in retail price levels. They are derived by linking a number of indexes that differ greatly in scope. The successive indexes used are: from 1901 to 1914, the 'A' Series Retail Price Index; from 1914 to 1946-47, the 'C' Series Retail Price Index; from 1946-47 to 1948-49, a composite of Consumer Price Index Housing Group (partly estimated) and 'C' Series Index excluding Rent; and from 1948-49 onwards, the Consumer Price Index.

RETAIL PRICE INDEX NUMBERS: SIX STATE CAPITAL CITIES  
COMBINED, 1901 TO 1969  
(Base: Year 1911 = 100)

Year	Index number	Year	Index number	Year	Index number
1901	88	1924	164	1947	198
1902	93	1925	165	1948	218
1903	91	1926	168	1949	240

1918(a)	150	1941	167	1964	483
1919(a)	170	1942	181	1965	502
1920(a)	193	1943	188	1966	517
1921(a)	168	1944	187	1967	534
1922(a)	162	1945	187	1968	548
1923	166	1946	190	1969	564

(a) November.

## International comparisons

The following table shows index numbers of consumer (retail) prices for various countries. Except where otherwise noted, the year 1963 is taken as base (= 100). The index numbers show fluctuations in prices in each country, and do not measure relative price levels as between countries.

(a) Consumer Price Index converted to base 1963 = 100 by Commonwealth Statistician. (b) Prior to 1962, index for Paris—base: 1962=100. (c) Beginning 1969, new index—base: 1960=100. (d) Prior to 1964, 28 cities only. (e) Beginning 1964, new index—base: 1961=100. (f) Index for Europeans only. (g) Prior to 1964, excluding Alaska and Hawaii.

NOTE. Symbol — on each side of an index number (e.g. -95-) indicates that two series have been linked during that period. Symbol — between two index numbers indicates that it is not possible to link two series (because of change in scope, etc.) and therefore the index numbers are not comparable with each other even though they may be shown on the same base period.

### WHOLESALE PRICES AND PRICE INDEXES

Two indexes of wholesale prices of basic materials have been compiled by the Commonwealth Bureau of Census and Statistics. These are:

- (i) the Melbourne Wholesale Price Index;
- (ii) the Wholesale Price (Basic Materials and Foodstuffs) Index.

New series of wholesale price index numbers relating to materials used and articles produced by defined areas of the economy are being developed. The first of these indexes, the Wholesale Price Index of Materials used in Building other than House Building, was issued in April 1969. Work is continuing on the preparation of two further measures, relating to materials used in house building and in manufacturing industry respectively. Taken together, these first three series will, to a considerable extent, constitute a currently representative replacement for the Wholesale Price (Basic Materials and Foodstuffs) Index. In the meantime that index will continue to be published in the form shown below. This is to meet the needs of those who, for special purposes, require the particular indexes included. However, it should be noted that the Building Materials group has been largely superseded by the Wholesale Price Index of Materials used in Building other than House Building, referred to above.

A special purpose index 'Wholesale Price Index of Electrical Installation Materials' is also published by the Bureau (*see page 239*).

#### Melbourne Wholesale Price Index

An index of Melbourne wholesale prices was first compiled in 1912. It related chiefly to basic materials and foods weighted in accordance with consumption in the years immediately preceding that year. Neither the list of items nor the weighting was varied, except for some changes in the building materials group in 1949. The series has some historical significance as a measure of changes, since the year 1861, in the prices of its component items combined in the proportions in which they were in common use about the year 1910. A description of the index and a list of the commodities included in it were published in *Labour Report* No. 38, 1949, pages 43-5. Index numbers up to the year 1961, the last period for which the index was compiled, were published in *Year Book* No. 48, 1962.

## Wholesale Price (Basic Materials and Foodstuffs) Index

### General

A list of the commodities and other information concerning the Wholesale Price (Basic Materials and Foodstuffs) Index is given in *Labour Report* No. 53, 1967. However, since February 1969 the published groups of this index have been limited to the five series shown in the table below.

Commodities in the index are priced in their primary or basic form wherever possible and as nearly as may be at the point where they first make effective impact on the Australian price structure. The prices of imported goods, for instance, are on an ex-bond or into factory basis. The prices used have, in the main, been obtained directly from manufacturers and merchants. With a few important exceptions, they are from Melbourne sources.

The index is calculated on the simple aggregative fixed-weights formula. The weights (quantity-multipliers) are based on estimates of the average annual consumption of the commodities in Australia during the period 1928-29 to 1934-35 inclusive. The validity of the weighting and the representativeness of the index have become increasingly affected by changes in usage and in industrial structure.

### Index numbers

Index numbers for selected groups of commodities, and for all groups combined, for the index of wholesale prices of basic materials and foodstuffs are given in the following table. Current index numbers on the base: average of three years ended June 1939 = 100 are published monthly in the mimeographed statement *Wholesale Price (Basic Materials and Foodstuffs) Index* and in the *Monthly Review of Business Statistics*. A table showing index numbers computed to the base: 1928 = 100 is published in the *Labour Report*.

### WHOLESALE PRICE (BASIC MATERIALS AND FOODSTUFFS) INDEX NUMBERS YEARS 1954-55 TO 1968-69 AND MONTHS 1969-70

(Base of each index: average of 3 years ended June 1939 = 100)

Period	Basic materials			Foodstuffs and tobacco (b)	Total, all groups (a)
	Basic materials		Total (a)		
	Metals and coal	Building materials			
1954-55.	391	372	330	315	322
1955-56.	404	415	345	325	334

December . . . . .	437	555	p380	p399	p390
January . . . . .	p447	548	p381	p403	p393

(a) In addition to the groups shown, includes oils, fats and waxes; textiles; chemicals; and rubber and hides. (b) Excludes potatoes and onions.

## Wholesale Price Index of Materials used in Building other than House Building

### General

This index was introduced in April 1969 and relates to the construction of buildings other than houses. It is the first of a series of indexes which will be prepared as circumstances permit and which will relate to materials used and articles produced by important and defined areas (or 'sectors') of the economy. To a considerable extent it provides an up-to-date replacement for the Building Materials group of the Wholesale Price (Basic Materials and Foodstuffs) Index.

Further information concerning the method of compiling the Index, as well as more detailed group index numbers for each capital city, will be found in the publication *Price Index of Materials used in Building other than House Building* (reference no. 9.6) of 23 April 1969 and subsequent issues, as well as in the Appendix to *Labour Report* No. 53.

### Scope and composition

The index measures changes in prices of selected materials used in the construction of buildings other than houses and 'low-rise' flats (in general, those up to three storeys).

Its composition is in accordance with the materials usage in actual building projects which were selected as representative for the purpose. The building 'use-types' (e.g. office building, factory, etc.) directly represented are:

- (i) 'High-rise' flats (in general, those of more than three storeys)
- (ii) Offices
- (iii) Factories
- (iv) Health buildings (i.e. hospitals, nurses' quarters, clinics, etc.)
- (v) Education buildings (i.e. schools, universities, kindergartens, etc.)
- (vi) Other Commercial Premises (i.e. the Building Statistics categories of Hotels, Hostels, etc.; Shops; and Other Business Premises).

The completed values of these types of buildings constituted approximately 86 per cent of the completed values of all new buildings other than houses and low-rise flats in the years 1964-65 to 1966-67 inclusive. Not directly represented are buildings for entertainment and recreation purposes, buildings for religious purposes, and the Building Statistics category 'Miscellaneous' buildings.

The index includes 72 items, combined in eleven groups, in addition to an 'All Group' index. Some items carry the weights of similar items not directly priced. Items are described in terms of fixed specifications with the aim of recording price changes for representative materials of constant quality.

Although the selected materials (or many of them) are also used in house (and low-rise flat) building, in building repair, maintenance and alteration work, and in 'engineering construction' work (e.g. projects such as roads, dams, bridges and the like), the weighting pattern of the index, being designed for the specific purpose mentioned in the first paragraph of this Section, is not applicable to these other activities of the Construction industry. In addition, since the weights are based on an average materials usage over the stated range of building use-types, the index is not necessarily applicable to any specific building or any of the separate use-types.

### Base period and method of calculation

The reference base of the index is the year 1966-67 = 100.0. The weighting base corresponds broadly with the reference base, but does not exactly coincide because of the nature of the data from which the weights were derived.

The index is a fixed-weights index and is calculated by the method known as 'the weighted arithmetic mean of price relatives'.

### Derivation of items and weights

The items and weights used in the index were derived from reported values of each material used in selected representative buildings constructed in or about 1966-67. The selection took account of building use-type and construction characteristics (e.g. type of frame, wall, floor, etc.) within use-types. Information of the former was obtained from building statistics, and of the latter from an ad hoc survey of approximately 800 buildings.

The form used to obtain particulars of materials used in each selected building was set out on a 'trades' basis in the manner employed in a Bill of Quantities, using trades headings broadly based on those set out in the second edition of the *Australian Standard Method of Measurement of Building Works*. Under each heading it was required that each material used in that particular phase of building should be specified, together with its value.

Satisfactory analyses were received for 83 buildings, whose aggregate value was equivalent to approximately ten per cent of the value of building (other than house building) completed during 1966-67. The data from these analyses were combined to obtain a single list of materials and values relating to the sum of all building use-types directly represented in the index. Within each use-type the data were combined in accordance with the estimated relative importance of buildings of different value sizes. The data for the different use-types were then combined in accordance with their relative proportions by value in building commencements in Australia over the three years ended June 1967. The final step was to combine the hundreds of different varieties, etc., of materials into index items and to determine groupings thereof.

#### The weights

The weighting pattern used in the index is given in Year Book No 55, pages 1259-60. This single weighting pattern, relating to the whole of Australia, is applied (with minor exceptions) to local price measures in calculating indexes for each State capital city.

The index for the six State capital cities combined is a weighted average of individual city indexes. The relative weighting of the capitals is in proportion to the estimated value on completion of building other than house building in the separate States during the three years ended June 1967.

#### Prices

Price series used relate to specified standards of each commodity and are obtained in all State capital cities from representative suppliers of materials used in building. In the main they are collected as at the mid-point of the month to which the index refers, or as near thereto as practicable. However, the indicator used for the group Electrical Installation Materials is the existing wholesale price index described on pages 239-40, for which index prices were obtained each February, May, August and November until February 1969 when monthly compilation was commenced. In the Electrical Installation Materials group index observations are therefore quarterly up to February 1969, with the last observed level being used in intervening months, and monthly from February 1969 onwards.

There are some exceptions to the use of local prices in the indexes for each capital city. In a few cases where suitable price series are not currently available for an item in a given city, imputation is necessary. For each capital city, the whole of the group Electrical Installation Materials and the majority of the items in the group Mechanical Services Components are based on Sydney and Melbourne price series.

The point of pricing adopted for the new index is in keeping with sector wholesale price index concept. In terms of this concept a 'ring-fence' is set up around building other than house building. The items to be priced for index purposes are then those materials which are used in building activity within the ring-fence, and the point of pricing is that at which the materials cross the ring-fence. In general, this is the price 'delivered on-site'.

#### Index numbers

The index has been compiled for each month from July 1966, and for the financial years from 1966-67. Index numbers for the individual groups and all groups for the weighted average of the six State capital cities, and for all groups combined for each State capital city, are given on pages 238-9. Figures are published to one decimal place to avoid distortions that would occur in rounding off the index numbers to the nearest whole number.

The separate city indexes measure price movements in each State capital city individually. They enable comparisons to be drawn between capitals as to differences in degree of price movement from period to period, but not as to differences in price level.

January . . .	111.6	109.8	110.5	109.0	108.7	109.6	110.5

(a) Figures are shown to one decimal place to avoid distortions that would occur in rounding off the index numbers to the nearest whole number.

**Wholesale Price Index of Electrical Installation Materials**

This special purpose index was introduced in 1964, and index numbers were published at quarterly intervals from August 1959 to February 1969, when monthly publication commenced. In addition to its use in connection with the Bureau's constant price estimates in the national accounting field, the index has a direct value as a measure of changes in aggregate cost of materials used in an important part of the building industry (other than house building).

**Commodities and grouping**

The items in this index have been selected as representative of materials used in electrical installation in structures such as hospitals, schools, factories and multi-storeyed commercial buildings and flats. These items are divided into three main groups for which separate indexes are compiled in addition to the All Groups index. The combination of materials selected is fixed as to quantity and quality.

**Price quotations**

The items are priced as at the middle of the month for which index numbers are published. The basis of pricing is the price to electrical contractors, delivered on site or into store, metropolitan area, Sydney and Melbourne. The price series used relate to specific standards for each item and in some cases are combinations of prices for different makes, types, etc. The units of quantity specified as the basis for collecting prices are representative lots normally purchased by electrical contractors, inclusive of quantity discounts and packing and quantity extras, etc.

**Method of construction**

The index is a fixed-weights index with the reference base: year 1959-60 = 100. In general, the weights were derived from information relating to the values of materials used in selected representative projects in Sydney and Melbourne during the three years 1960-61 to 1962-63. The projects selected for this purpose had a minimum electrical materials and labour content of \$10,000. Selected representative items carry the weights of similar items not directly priced. The index is calculated by the method known as 'the weighted arithmetic mean of price relatives'. For each period, base period, percentage value weights are applied to indexes of price movement relative to 1959-60.

## Index numbers

Index numbers for each group of items and for all groups combined for the index of wholesale prices of electrical installation materials are given in the following table. Current index numbers are published monthly in the mimeographed statement *Wholesale Price Indexes—Price Index of Electrical Installation Materials*.

**WHOLESALE PRICE INDEX OF ELECTRICAL INSTALLATION MATERIALS  
GROUP INDEX NUMBERS, YEARS 1959-60 TO 1968-69 AND  
AUGUST 1968 TO JANUARY 1970**

(Base of each index: year 1959-60 = 100.0) (a)

November . . . . .	137.9	109.2	119.6	124.3
December . . . . .	143.8	109.3	119.6	126.7
January . . . . .	144.0	109.3	119.9	126.9

(a) Figures are shown to one decimal place to avoid distortions that would occur in rounding off the index numbers to the nearest whole number. (b) Simple average of index numbers for the months of August, November, February and May in each year.

### EXPORT PRICE INDEXES

An annual index of export prices has been published by the Bureau since its inception. Brief descriptions of indexes issued between 1901 and 1962 (that is, prior to the introduction of the current Export Price Index) are shown in Year Book No 55, 1969, pages 256-7.

### The current Export Price Index

The current Export Price Index was first published in October 1962, but index numbers were compiled back to July 1959. The reference base of this index is: year 1959-60 = 100. This index is a fixed-weights index, and its purpose (as was that of the previous fixed-weights index) is to provide comparisons monthly, over a limited number of years, of the level of export prices of the selected items, making no allowance for variations in quantities exported. The index numbers are thus measures of price change only. The price series used in the index relate to specified standards for each commodity and in most cases are combinations of prices for a number of representative grades, types, etc. For some commodities price movements in the predominant market, or markets, are used,

while for other commodities average realisations in all export markets are used. As nearly as possible, prices used are on the basis f.o.b. at the main Australian ports of export. The index is calculated by the method known as 'the weighted arithmetic mean of price relatives'.

#### Composition and weighting

There are twenty-nine items in the current index compared with twenty items in the previous index. The weights for the current index are based on average annual values of exports during the five years 1956-57 to 1960-61. During that period the twenty-nine items in the index constituted 83 per cent of the total value of Australian exports. In recent years this proportion has decreased and in 1966-67 and 1967-68 was less than 75 per cent of the total value. A review of the content and weighting pattern of the index is proceeding.

The following table sets out a list of the items, and groups of items, in the index, together with the percentage contribution of each item and group to the All Groups index in the reference base year 1959-60. The weights used for some of the items are adjusted to cover some related commodities which are not priced directly. The most important instances of this are wool, which includes wool exported on sheepskins, and copper, zinc, lead and silver, which include the estimated metallic content of ores and concentrates exported. In the previous index the weight for gold was derived from production instead of export figures. For the period 1956-57 to 1960-61 production and exports of gold were similar, and therefore in the current index the weight for gold (as for the other items) is based on average annual exports during the period.

#### Index numbers

Index numbers for each of the groups and 'All groups' are shown in the table on page 242. The yearly index numbers are simple averages of the twelve monthly index numbers in each year.

## Link between current and previous indexes

In order to show approximate movements in export prices over a long period, the 'All groups' indexes of the previous and current series have been linked together at the year 1959-60, the earliest year for which the new index has been compiled. The table at the foot of this page shows this linked series and a long-term price index for wool, which is the most important single component in the movement of the 'All groups' index.

**EXPORT PRICE INDEX NUMBERS**

## WAGES, EARNINGS AND HOURS

### Arbitration and Wages Boards Acts and associated legislation

Particulars regarding the operation of Commonwealth and State Laws for the regulation of wages, hours and other conditions of employment were first compiled for the year 1913, and revised particulars have appeared annually in the *Labour Report*. A summary of the Commonwealth legislation and brief particulars of Commonwealth and State industrial tribunals are given in the following paragraphs.

#### Commonwealth industrial legislation and tribunals

Under placitum (xxxv) of section 51 of the Commonwealth of Australia Constitution, the Commonwealth Parliament is empowered to make laws with respect to 'conciliation and arbitration for the prevention and settlement of industrial disputes extending beyond the limits of any one State'. The Parliament has made such a law, namely the *Conciliation and Arbitration Act 1904-1969*.

This Act defines an 'industrial dispute' as:

'(a) A dispute (including a threatened, impending or probable dispute) as to industrial matters which extends beyond the limits of any State; and (b) a situation which is likely to give rise to a dispute as to industrial matters which so extends; and includes—(c) such a dispute in relation to employment in an industry carried on by, or under the control of, a State or an authority of a State; (d) a dispute in relation to employment in an industry carried on by, or under the control of, the Commonwealth or an authority of the Commonwealth, whether or not the dispute extends beyond the limits of any one State; and (e) a claim which an organization is entitled to submit to the Commission under section eleven A of the *Public Service Arbitration Act 1920-1969* or an application or matter which the Public Service Arbitrator has refrained from hearing, or from further hearing, or from determining under section fourteen A of that Act, whether or not there exists in relation to the claim, application or matter a dispute as to industrial matters which extends beyond the limits of any one State.'

The Conciliation and Arbitration Act was extensively amended by an Act (No. 44 of 1956) assented to on 30 June 1956. This amendment altered the structure of the arbitration machinery by separating the judicial functions from the conciliation and arbitration functions. The Commonwealth Industrial Court was established to deal with judicial matters under the Act, and the Commonwealth Conciliation and Arbitration Commission to handle the functions of conciliation and arbitration. A summary of the provisions of the *Conciliation and Arbitration Act 1904-1969* is given in the following paragraphs.

The Commonwealth Industrial Court is at present composed of a Chief Judge and seven other Judges. The jurisdiction of the Court shall be exercised by not less than two Judges, except in the following circumstances. A single Judge may exercise the jurisdiction of the Court with respect to the dismissal or injury of an employee on account of industrial action, interpretation of awards, questions concerning eligibility of membership of an organisation, disputes between an organisation and its members, and a prescribed matter of practice or procedure. A single Judge may refer a question of law for the opinion of the Court constituted by not less than two Judges. The Court is a Superior Court of Record with the same power to punish contempts of its power and authority as is possessed by the High Court. In general, decisions of the Industrial Court are final; however, an appeal lies to the High Court, but only when the latter grants leave to appeal. The Act provides for the registration of associations of employees and employers, and for inquiries to be held concerning disputed elections in organisations; and certain powers in connection therewith are, by the Act, given to the Industrial Court. Provision is also made for the Commission to exercise the powers of the Court with regard to an application for cancellation of registration of an organisation. Any such change of jurisdiction must be notified by proclamation. This provision could be used if the powers of the Court in this regard were declared, in whole or in part, to be invalid.

Special provision is made concerning the right of audience before the Commonwealth Industrial Court. Briefly, except in proceedings which, in general, involve questions of law or offences against the Act, parties are able to elect whether to appear personally or to be represented by lawyers or officials. Even in proceedings involving questions of law, except appeals from decisions by other Courts to the Industrial Court, on matters arising under this Act or the *Public Service Arbitration Act 1920-1969*, the parties may, if they wish and the Court grants leave, be represented by officials.

The Commonwealth Conciliation and Arbitration Commission at the end of 1969 was composed of a President, five Deputy Presidents, a Senior Commissioner, eleven Commissioners and four Conciliators. The Commission is empowered to prevent or settle industrial disputes by conciliation or arbitration, and to make suggestions and to do such things as appear right and proper for (a) effecting a reconciliation between parties to industrial disputes; (b) preventing and settling industrial disputes by amicable agreement; and (c) preventing and settling, by conciliation or arbitration, industrial disputes not prevented or settled by amicable agreement. The Commission may exercise its powers of its own motion or on the application of a party.

The President may assign a Commissioner to deal with industrial disputes relating to particular industries, or members of the Commission to deal with a particular industrial dispute. However subject to the approval of the President, it is the duty of the Senior Commissioner to organise and allocate the work of the Commissioners and Conciliators. When an industrial dispute occurs or is likely to occur, a Commissioner shall take steps for the prompt prevention or settlement of that dispute by conciliation or, if in his opinion conciliation is unlikely to succeed or has failed, by arbitration. A Commissioner may arrange with the Senior Commissioner for a Conciliator to assist the parties to reach an amicable agreement and shall do so if the parties so request. If an agreement is reached, a memorandum of its terms shall be made in writing, and may be certified by the Commission. A certified memorandum shall have the same effect as an award.

Only the Commission in Presidential Session, that is, the Commission constituted by at least three presidential members nominated by the President, has the power to make awards, or to certify agreements, concerning standard hours, basic wages and long-service leave. Upon application by a party to an industrial dispute, a Commissioner shall consult with the President as to whether in the public interest any matter in dispute should be dealt with by a Commission constituted by not less than three members nominated by the President, at least one of whom shall be a presidential member and one, where practicable, the Commissioner concerned. The President may direct the Commission to hear the matter in dispute; however, after consideration, the Commission may refer the matter in dispute back for determination to the Commissioner originally dealing with the dispute.

An appeal against the decision of a Commissioner shall be heard by not less than three members nominated by the President, of whom at least two shall be presidential members of the Commission. However, an appeal will not be heard unless the Commission considers it is necessary as a matter of public interest. The President, after taking account of the views of the parties to a dispute, may appoint a member of the Commission to take evidence on behalf of a presidential bench of the Commission, so that it may have this evidence before it when it commences its hearing.

Full benches of the Commission not constituted by the same persons may sit in joint session at the direction of the President when he considers it desirable and has the opinion that a question is common to the matters before those benches. A joint session may be held whether the benches concerned are constituted pursuant to the Conciliation and Arbitration Act or the Public Service Arbitration Act, and whether they are constituted to hear references or appeals. However, it is left to each appropriate full bench to determine any of the matters before it.

Provision is also made in the Act for a presidential member of the Commission to handle industrial matters in connection with the maritime industries, the Snowy Mountains Area and the stevedoring industry, except in those matters for which the Act requires that the Commission shall be constituted by more than one member. The Commonwealth Conciliation and Arbitration Commission also deals with disputes and industrial matters, interstate or intra-state, associated with undertakings or projects of the Commonwealth Government which have been declared by the Minister to be Commonwealth projects for the purposes of this Act. In effect, this places employees of Commonwealth projects, so declared, under the jurisdiction of the Commission. The Minister has the power to exempt certain persons or classes of persons working on these projects from the jurisdiction of the Commission.

The Commission may make an award in relation to an industrial dispute concerning employees of a Commonwealth project or when the Public Service Arbitrator refrains from dealing with claims made by a Public Service employee organisation or consents to the claims being presented to the Commission, though such an award may be inconsistent with a law of the Commonwealth relating to salaries, wages, rates of pay or terms or conditions of service of employees in the Public Service as defined by section three of the *Public Service Arbitration Act 1920-1969*, not being the *Commonwealth Employees' Compensation Act 1930-1968*, the *Commonwealth Employees' Furlough Act 1943-1968*, the *Superannuation Act 1922-1969* or any other prescribed Act.

An amendment of the Conciliation and Arbitration Act operative from November 1967 provided for the appointment of a person to be the Flight Crew Officers Industrial Tribunal empowered to prevent or settle industrial disputes relating to pilots, navigators, or flight engineers of aircraft.

The Conciliation and Arbitration Act provides that where a State law, or an order, award, decision or determination of a State industrial authority is inconsistent with or deals with a matter dealt within an award of the Commission, the latter shall prevail, and the former, to the extent of the inconsistency or in relation to the matter dealt with, shall be invalid.

For further particulars regarding Commonwealth arbitration legislation, see the annual *Labour Report*. For information concerning the Australian Stevedoring Industry Authority and the Coal Industry Tribunal see the Transport and Communication chapter and the Mineral Industry chapter respectively of this Year Book, and for further information on the Commonwealth Public Service Arbitrator see the *Labour Report*.

### State industrial tribunals

#### New South Wales

The controlling authority is the Industrial Commission of New South Wales, consisting of a President and seven other Judges. Subsidiary tribunals are the Conciliation Commissioners, the Apprenticeship Commissioner, Conciliation Committees, and Apprenticeship Councils constituted for particular industries. Each Conciliation Committee consists of a Conciliation Commissioner as Chairman and equal numbers of representatives of employers and employees. The Apprenticeship Commissioner and the members of the Conciliation Committee for an industry constitute the Apprenticeship Council for the industry. These subsidiary tribunals may make awards binding on industries, but an appeal to the Industrial Commission may be made against any award. Special Commissioners with conciliatory powers and limited arbitration powers may be appointed. Compulsory control commenced in 1901, after the earlier Acts of 1892 and 1899 providing for voluntary submission of matters in dispute had proved abortive.

#### Victoria

The authorities are separate Wages Boards for the occupations and industries covered, each consisting of a chairman and equal numbers of representatives of employers and employees, and a Court of Industrial Appeals, the latter presided over by a Judge of the County Court. The system was instituted in the State in 1896, and represented the first example in Australia of legal regulation of wage rates.

#### Queensland

Legal control was first instituted in 1908 with the passing of the Wages Boards Act. 'The Industrial Conciliation and Arbitration Act of 1961' established the Industrial Conciliation and Arbitration Commission and preserved and continued in existence the Industrial Court. The Industrial Court is constituted by the President (a Judge of the Supreme Court of Queensland) sitting alone, and the Full Industrial Court by the President and two Commissioners. The Conciliation and Arbitration Commission is constituted by a Commissioner sitting alone; and the Full Bench of the Commission by at least three Commissioners. Not more than five Commissioners shall be appointed. A Commissioner shall not be capable of being a member of the Executive Council or of the Legislative Assembly, and shall not take part in the management of any business.

#### South Australia

In South Australia from July 1966 the system of control consists of an Industrial Commission, an Industrial Court, and Conciliation Committees. The Industrial Commission is composed of a President, Deputy President, and two Commissioners and has power to make awards. The President of the Commission is also Judge of the Industrial Court which deals with legal matters. The two Commissioners are chairmen of each of the Conciliation Committees consisting of an equal number of representatives of employers and employees. These committees issue awards. Where complete agreement cannot be reached in these committees the chairman sits as a Commissioner to determine the unresolved matters. Provision is made for references and appeals to the full Commission.

#### Western Australia

Legal control dates back to 1900. The present system of control comprises a four-man Western Australian Industrial Commission and an Industrial Appeal Court consisting of three Supreme Court Judges who are nominated by the Chief Justice of Western Australia. A Commissioner may, in relation to any dispute or other matter, refer such matters to the Commission in Court Session. Similarly, appeals from decisions of a single Commissioner are heard by the other three Commissioners acting as the Commission in Court Session, but such hearings are restricted to the evidence and matters raised in the proceedings before the single Commissioner. Up to December 1966 the Commission in

Court Session fixed and adjusted the basic wage. In December 1966 legislation provided that the Western Australian basic wage rates should be the same as the Commonwealth Six Capitals rates as soon as these exceeded the State rates. However Commonwealth basic wages were eliminated from Commonwealth awards in July 1967. Western Australian Legislation operative from 22 November 1968 fixed the State basic wages for adult males and adult females and provided for the Commission to review the basic wage at least every twelve months (for further details see page 267). Appeals from the Commission to the Industrial Appeal Court are limited to matters which are erroneous in law or in excess of jurisdiction. The Court has the power to impose penalties for disobedience of orders made by the Commission.

The Western Australian Coal Industry Tribunal, established under the *Mining Act, 1904-1969*, has power to determine any industrial matter in the coal mining industry. It consists of a chairman and four other members (two representatives each of employers and employees). Boards of reference may be appointed by the Tribunal, and decisions of the Tribunal may be reviewed by the Court of Arbitration on the application of a party subject to the decision.

#### Tasmania

The authority consists of Wages Boards for separate industries, comprising a Chairman (who is common to all Wages Boards) appointed by the Governor, and equal numbers of representatives of employers and employees appointed by the Minister administering the Act. The system was instituted in 1910.

### Incidence of industrial awards, determinations and collective agreements

In May 1968 a survey ascertained the approximate proportions of employees whose wages, salaries and conditions of work were normally varied in accordance with variations in awards, determinations and registered collective agreements of Commonwealth and State industrial authorities. The scope, results, etc. of this survey were published in a statistical bulletin *Survey of the Incidence of Industrial Awards, Determinations and Collective Agreements*, May 1968, dated 19 June 1969.

### Rates of wage and hours of work

This section contains indexes (with base: year 1954 = 100) of minimum weekly and hourly rates of wage and standard hours of work for adult males and adult females for Australia and each State. In the indexes there are fifteen industry groups for adult males and eight industry groups for adult females. For relevant periods these indexes replace cognate indexes (base: year 1911 = 1,000 for males and April 1914 = 1,000 for females) published in Year Books before No. 46, 1960. The current indexes are based on the occupation structure existing in 1954. Weights for each industry and each occupation were derived from two sample surveys made in that year. The first was the Survey of Awards in April 1954 which showed the number of employees covered by individual awards, determinations and agreements. This provided employee weights for each industry as well as a basis for the Survey of Award Occupations made in November 1954. This second survey showed the number of employees in each occupation within selected awards, etc. thereby providing occupation weights.

The industrial classification used in the current indexes, shown in the table on page 248, does not differ basically from the previous classification, the alterations being largely in the arrangement of classes. The former Pastoral, agricultural, etc. group and the domestic part of the Amusement, hotels, personal service, etc. group are excluded from the current indexes because of coverage difficulties.

The minimum wage rates and standard hours of work used in the current indexes are for representative occupations within each industry. They have been derived entirely from representative awards, determinations and agreements in force at the end of each month or quarter, commencing with March 1939 for adult males and March 1951 for adult females. Particulars have been available as at the end of each month for adult males from January 1957 and for adult females from July 1967. The index for adult males includes rates and hours for 3,415 award designations. However, as some of these designations are operative within more than one industry, or in more than one State, the total number of individual award occupations is 2,313. For adult females the corresponding numbers are 1,100 and 515. Using the industry and occupation weights derived from the surveys described above, these rates and hours were combined to give weighted averages for each industry group for each State and Australia.

Because the indexes are designed to measure movements in prescribed minimum rates of 'wages' as distinct from 'salaries', those awards, etc. which relate solely or mainly to salary earners are excluded.

A more detailed description of the current indexes of minimum rates of wage and standard hours of work is given in the *Labour Report*, which also contains an extensive tabular presentation of the minimum rates of pay for adult males and females in the principal occupations in the capital city of each State. Further particulars of wage rates and index numbers will be found in mimeographed bulletins *Minimum Wage Rates, March 1939 to June 1965* and *Wage Rates Indexes, June 1965 to June 1968*. Current figures are published in the monthly bulletin *Wage Rates and Earnings*.

**Weekly wage rates—adult males**

The following table shows, for each State and Australia, the weighted average minimum weekly rates of wage payable to adult male workers for a full week's work and index numbers at the dates specified.

*Adult males—components of total wage rate.* A dissection of weighted average minimum weekly wage rates for adult males into three components of the total wage, i.e. basic wage, margin, and loading, with separate particulars for employees covered by awards etc. within Commonwealth and State jurisdictions, has been calculated for months to June 1967 and published in the mimeographed bulletins *Minimum Wage Rates, March 1939 to June 1965* and *Wage Rates Indexes, June 1965 to June 1968*.

*Adult males—jurisdiction.* Weighted average minimum weekly wage rates for adult males covered by *Commonwealth awards etc.* and for those covered by *State awards etc.* (as defined below) are shown separately in the following table. For the purposes of the index, *Commonwealth awards etc.* include awards of, or agreements registered with, the Commonwealth Conciliation and Arbitration Commission, and determinations of the Commonwealth Public Service Arbitrator. *State awards etc.* include awards or determinations of, or agreements registered with, State industrial tribunals, together with certain unregistered agreements when these are dominant in the particular industries to which they refer.

**Standard hours of work**

In the fixation of weekly wage rates most industrial tribunals prescribe the number of hours constituting a full week's work for the wage rates specified. The hours of work so prescribed form the basis of the compilation of the weighted averages and index numbers on page 252. The main features of the reduction of hours to forty-four and later to forty per week are summarised below. Further details will be found in previous issues of the Year Book.

#### The 44-hour week

No permanent reduction to a 44-hour week was effected until 1925, although temporary reductions had been achieved earlier. In 1920 the New South Wales legislature granted a 44-hour week to most industries, but in the following year this provision was withdrawn. Also in 1920 the President of the Commonwealth Court of Conciliation and Arbitration (Higgins J.), after inquiry, granted a 44-hour week to the Timber Workers' Union, and in the following year he extended the same privilege to the Amalgamated Society of Engineers. In 1921, however, a reconstituted Commonwealth Court of Conciliation and Arbitration unanimously rejected applications by five trade unions for the shorter standard week and re-introduced the 48-hour week in the case of the above-mentioned two unions then working forty-four hours. During 1924 the Queensland Parliament passed legislation to operate from 1 July 1925 granting the 44-hour standard week to employees whose conditions of work were regulated by awards and agreements of the Queensland State industrial authority. Similar legislative action in New South Wales led to the re-introduction of the 44-hour week in that State as from 4 January 1926.

In 1927 the Commonwealth Court of Conciliation and Arbitration granted a 44-hour week to the Amalgamated Engineering Union and intimated that this reduction in standard hours of work would be extended to industries operating under conditions similar to those in the engineering industry. Applications for the shorter hours by other unions were, however, treated individually, the nature of the industry, the problem of production, the financial status, and the amount of foreign competition being fully investigated. The economic depression delayed the extension of the standard 44-hour week until the subsequent improvement in economic conditions made possible its general extension to employees under Commonwealth awards.

In States other than New South Wales and Queensland the change to the shorter week extended over the years from 1926 to 1941.

#### The 40-hour week

The New South Wales Parliament passed legislation granting a 40-hour week, operative from 1 July 1947, to industries and trades regulated by State awards and agreements. In Queensland similar legislation was passed by Parliament providing for the 40-hour week to operate from 1 January 1948.

The Commonwealth Court of Conciliation and Arbitration, in its judgment of 8 September 1947 in the *Standard Hours Inquiry*, 1947 granted the reduction to the 40-hour week from the beginning of the first pay-period commencing in January 1948. On 27 October 1947 the South Australian Industrial Court approved the incorporation of the 40-hour standard week in awards of that State. The Court of Arbitration of Western Australia, on 6 November 1947, approved that provision for a 40-hour week could be incorporated in awards of the Court, commencing from 1 January 1948.

In Victoria and Tasmania the Wages Board met and also incorporated the shorter working week in their determinations, so that from the beginning of 1948 practically all employees in Australia whose conditions of labour were regulated by industrial authorities had the advantages of a standard working week of forty hours or, in certain cases, less.

#### Hourly wage rates

The average rates of wage in the preceding tables are based on the minimum rates prescribed for selected occupations in awards, etc. for a full week's work, excluding overtime. However, the number of hours constituting a full week's work differs in some instances between various occupations in each State, and between the same occupations in the several States. For some purposes a better comparison may be obtained by reducing the results in the preceding paragraphs to a common basis, namely the rate of wage per hour. The particulars of weighted average minimum hourly rates of wage, given in the following tables relate to all industry groups except Rural, and Shipping and stevedoring. The Rural industry is not included in the index, and Shipping and stevedoring has been excluded because, for some of the occupations in this group, definite particulars for the computation of average working hours and hourly rates of wage are not available.

The following table shows the weighted average minimum hourly rates of wage payable to adult male workers and index numbers of hourly rates in each State.

*(a) The amounts shown should not be regarded as actual current averages, but as an index expressed in money terms, indicative of trends.*

**Weighted average standard weekly hours of work**

The 40-hour week has operated in Australia generally from 1 January 1948, and in New South Wales from 1 July 1947 (see page 251). However, as stated on page 251, the number of hours constituting a full week's work (excluding overtime) differs between occupations and or between States. The weighted average standard hours of work (excluding overtime) prescribed in awards, determinations and agreements for a full working week, in respect of adult male workers in all industry groups except Rural, and Shipping and stevedoring, at 31 December 1969, were: New South Wales, 39.95; Victoria, 39.97; Queensland, 39.98; South Australia, 39.96; Western Australia, 39.89; Tasmania, 39.97; Australia, 39.96. Corresponding figures for adult female workers at 31 December 1969 were: New South Wales, 39.53; Victoria, 39.81; Queensland, 39.70; South Australia, 39.77; Western Australia, 39.78; Tasmania, 39.63; Australia, 39.67.

**Average weekly earnings**

NOTE. Particulars of average weekly earnings for the years 1966-67 to 1969-70 were being revised when this chapter was sent for press. Revised figures will be found in the Appendix.

The figures in this section are derived from particulars of employment and of wages and salaries recorded on pay-roll tax returns, from other direct collections, and from estimates of the unrecorded balance. The figures relate to civilians only.

Particulars of wages and salaries paid are not available for males and females separately from these sources; average weekly earnings have therefore been calculated in terms of male units, i.e. total male employees plus fifty-five per cent of female employees. This proportion is derived from the estimated ratio of female to male earnings in Australia. As it was not possible to estimate the ratio of female to male earnings in the several States the same ratio has been used in each State. Because the actual ratio may vary between States precise comparisons between average earnings in different States cannot be made on the basis of the figures shown in the following table. Quarterly figures corresponding to those shown in the table are published in the quarterly statement *Average Weekly Earnings*, in the monthly bulletin *Wage Rates and Earnings* and in the *Monthly Review of Business Statistics*.

Particulars of average weekly earnings per employed male unit are shown in the following table for each of the years 1959-60 to 1965-66.

**AVERAGE WEEKLY EARNINGS PER EMPLOYED MALE UNIT<sup>(a)</sup>**  
STATES, 1959-60 TO 1965-66  
(\$)

Year	N.S.W.(b)	Vic.	Qld	S.A.(c)	W.A.	Tas.	Aust.
1959-60	45.70	45.50	39.40	41.80	39.20	41.90	43.90
1960-61	48.10	47.20	41.60	43.40	41.60	43.30	46.00
1961-62	49.10	48.50	43.20	44.70	43.00	45.30	47.20
1962-63	50.20	50.10	44.40	45.80	44.20	45.90	48.40
1963-64	52.60	52.50	46.90	48.20	47.20	48.40	50.90
1964-65	56.50	56.40	50.40	52.00	49.50	51.00	54.60
1965-66	58.60	59.20	52.50	53.80	54.10	53.80	57.00

(a) Includes, in addition to wages at award rates, earnings of salaried employees, overtime earnings, over-award and bonus payments, payments made in advance or retrospectively during the periods specified, etc. See explanatory notes above. (b) Includes Australian Capital Territory. (c) Includes Northern Territory.

The following table shows, for 'All industries' and for 'Manufacturing', the movement in average weekly earnings from 1959-60 to 1965-66. The 'All industries' index is based on pay-roll tax returns and other data. It relates to average weekly earnings per employed male unit. The index for manufacturing industries is based on the average earnings of male wage and salary earners employed in factories as disclosed by annual factory censuses (see the chapter Manufacturing Industry).

The index numbers for 'All industries' and 'Manufacturing' show the movement in average earnings for each group over a period of time. However, they do not give, at any point of time, a comparison of actual earnings in the two groups. The base of each series is: year 1953-54 = 100, and both series have been seasonally adjusted.

**INDEXES OF AVERAGE WEEKLY EARNINGS(a)(b): AUSTRALIA

### Surveys of wage rates, earnings and hours, 1960 to 1968

Since 1960 a number of statistical surveys of wages and hours of work in Australia have been undertaken by this Bureau. The object of these surveys has been to obtain information on wage rates, actual weekly earnings and hours of work on a more comprehensive scale than previously available in Australia. A summary of the scope and coverage of each of these surveys is shown on the following pages.

#### Survey of wage rates and earnings, September 1960

This survey, relating to the last pay-period in September 1960, obtained information about marginal rates of wage and the dissection and distribution of actual weekly earnings of adult male employees (excluding part-time and casual employees). In addition to the exclusion of government and semi-government employees, and private employees in rural industry and in private domestic service, the survey did not cover the following—shipping and stevedoring industries; the motion picture industry; certain businesses such as those of accountants, consultant engineers, etc.; and trade associations, etc. The survey was based on a stratified random sample of private employers in other industries who were subject to pay-roll tax (that is, employers paying more than \$400 a week in wages and salaries). For information on the results of the survey see Year Book No. 51, pages 439 to 442.

#### Survey of weekly earnings, October 1961

This survey was conducted for the last pay-period in October 1961 and provided information about the distribution of actual weekly earnings for adult male employees (excluding part-time and casual employees). The survey did not cover government or semi-government employees, private employees in rural industry and in private domestic service, or employees not covered by pay-roll tax returns. The survey was based on a stratified random sample of private employers in other industries who were subject to pay-roll tax (that is, employers paying more than \$400 a week in wages and salaries). The results of the survey were published in Year Book No. 51, pages 442-4.

#### Surveys of weekly earnings and hours, October 1962 to 1968 (excluding October 1965)

For details of these surveys see pages 255-61.

#### Survey of weekly earnings, October 1965

A survey of weekly earnings of male employees was conducted for the last pay-period in October 1965. The survey was conducted by means of: (i) a sample of private employers subject to pay-roll tax (that is those paying more than \$400 a week in wages and salaries); (ii) a complete coverage of Commonwealth and State government departments and semi-government authorities; and (iii) a sample of local government authorities. It related to certain specified industry groups only.

The object of the survey was to obtain estimates of the numbers and proportions of full-time adult male employees in various weekly earnings groups and a dissection of total weekly earnings paid to full-time adult males into: (i) overtime earnings; (ii) ordinary time earnings at 'award, etc. rates'; and (iii) ordinary time earnings in excess of those at 'award, etc. rates' (divided into (a) payment by measured result and (b) other) as defined. The survey also provided figures of average weekly earnings for full-time adult male and junior male employees. Separate details were obtained for (i) managerial, executive, professional and higher supervisory staff, and (ii) other full-time male employees. The results of the survey were published in previous issues of the Year Book. For further details see *Labour Report* No. 52, 1965 and 1966.

### Surveys of weekly earnings and hours, October 1962 to October 1968

Sample surveys in respect of most private employers subject to pay-roll tax (i.e. those paying more than \$400 per week in wages and salaries) have been conducted as at the last pay-period in October during recent years. Some results of the 1968 survey and comparisons with earlier such surveys are contained in the following tables. Further particulars including averages for each State were published in statistical bulletin, *Survey of Weekly Earnings and Hours*, October 1968.

In addition to obtaining data for the calculation of average weekly earnings, average weekly hours paid for, and average hourly earnings, the October 1966, 1967 and 1968 surveys obtained information on overtime and ordinary time earnings and hours for full-time employees (other than managerial, etc. staff). The figures of average overtime earnings and average overtime hours are the averages for *all* employees (in the specified category) represented in the survey whether or not they worked overtime. The survey figures do not show the average overtime earnings or hours of only those employees who worked overtime.

Figures for average weekly earnings, average weekly hours paid for, and average hourly earnings as at the selected pay-periods are presented for males and females (adult and junior) separately by industry groups and by States. They reflect the effects of differences (and of changes between points of time) in amounts paid for the various occupations; in amounts paid for the same occupations; in occupational structures within industries; in industry structure; in degrees of business activity (incidence of overtime, etc.); and in the incidence of incentive schemes, piece-work and profit-sharing scheme payments, etc.

#### Coverage

The results of the surveys are based on returns from stratified random samples of private employers subject to pay-roll tax. Employees in rural industry and in private domestic service are excluded because most employers in these two industries are not subject to pay-roll tax. Also excluded from the surveys are: employees of government and semi-government authorities; employees of religious, benevolent and other similar organisations exempt from pay-roll tax; and all employees in the Northern Territory and the Australian Capital Territory. The earnings and hours of waterside workers employed on a casual basis are excluded because they are subject to wide fluctuations for short periods such as those covered by these surveys.

Approximately 4,080 employers were included in the October 1968 survey and the sample represented 1,567,000 male and 684,000 female wage and salary earners.

As the survey was based on a sample, the resultant estimates are subject to sampling variability, that is, variations which might occur by chance because only a sample of employers was surveyed. The extent of the detail published has been determined after considering estimated measures of sampling variability.

#### Comparability of results

In addition to affecting the results of each sample survey, sampling variability also affects comparison between each year's results.

The industry classification adopted for the 1968 and previous earnings and hours surveys from 1963 onwards (including the 1965 survey) is that used for the 1961 and 1966 population censuses. Because the October 1962 survey was based on a different industry classification only broad comparison with more recent surveys is possible (see tables in previous Year Book). Some comparison of the results of the surveys of 1963, 1964, 1966, 1967 and 1968 are shown in the tables on pages 258-60.

The October 1965 Survey of Weekly Earnings was a special purpose survey on a different basis from the surveys compared in this section and, therefore, its results are not shown herein. Results of the 1965 survey were published in detail in *Labour Report* No. 52, 1965 and 1966.

In the surveys of October 1962, 1963 and 1964 employees 'whose hours of work were not known' were reported with managerial, etc. staff. Beginning with the October 1966 survey employers were asked to report these employees in their correct classification, and if necessary estimate their hours of work. It is considered that any reporting differences will have had only a slight effect on comparability of the surveys.

The allocation of employees between 'Managerial, executive, professional and higher supervisory staff' and 'All other full-time employees' (as defined) depends upon the employers' interpretation of the definitions (*see below*).

### Definitions

The following definitions refer to terms used in the surveys and in the tables in this section.

*Employees* refers to male and female employees on the pay-roll and who received pay for the last pay-period in October.

*Adults* includes all employees 21 years of age and over and those employees who, although under 21 years of age, are paid at the adult rate for their occupation.

*Juniors* refers to those employees under 21 years of age who are not paid at the adult rate for their occupation.

*Full-time employees* refers to those employees who ordinarily work 30 hours or more a week and who received pay for the last pay-period in October. Included are 'full-time' employees on short-time; 'full-time' employees who began or ceased work during the pay-period; and 'full-time' employees on paid annual leave, paid sick leave, long service leave and paid holidays taken during the pay-period.

*Part-time employees* refers to employees who ordinarily work less than 30 hours a week. Employees on short-time who normally work 30 hours or more a week are classified as full-time employees.

*Other than managerial, etc. staff* includes minor supervisory employees, leading hands, clerical and office staff as well as ordinary wages employees. It excludes *managerial, executive, professional and higher supervisory staff* who were not further defined.

*Weekly earnings* refers to gross earnings for the last pay-period in October before taxation and other deductions have been made. It includes ordinary time earnings, overtime earnings, shift allowances, penalty rates, commission and similar payments; and that part of paid annual leave, paid sick leave, long service leave and paid holidays taken during the pay-period. It includes one week's proportion of payments made other than on a weekly basis, e.g. salary paid fortnightly or monthly; paid annual or other leave taken during the pay-period; periodical payments under incentive, piecework, profit sharing schemes, etc.; commissions; annual or periodical bonuses, etc. Retrospective payments are excluded.

*Overtime earnings* refers to that part of gross earnings for hours paid for in excess of award, standard or agreed hours of work. Overtime earnings were not reported for managerial, etc. staff.

*Ordinary time earnings* refers to that part of gross earnings for award, standard or agreed hours of work. It includes shift allowances, penalty rates, commissions, bonuses and incentive payments, and that part of paid annual and other leave, which relates to these hours.

*Weekly man-hours paid for* refers to the sum of man-hours for which payment was made. It includes ordinary time hours, overtime hours, paid stand-by or reporting time; and paid annual leave, paid sick leave, long service leave and paid holidays taken during the specified pay-period. For employees paid other than weekly, hours are converted to a weekly basis. For employees who began or ceased work, or were absent without pay for any reason during the specified week, only the man-hours actually paid for are included. Where agreed hours of work are less than award hours, man-hours are based on agreed hours. Hours of work were not reported for managerial, etc. staff.

*Overtime hours* refers to hours in excess of award, standard or agreed hours of work.

*Ordinary time hours* refers to award, standard or agreed hours of work. It includes man-hours of stand-by or reporting time which are part of standard hours of work, and that part of paid annual leave, paid sick leave and long service leave taken during the specified week.

### Survey of weekly earnings and hours, October 1969

The results of this survey were first published in a mimeographed statement *Survey of Weekly Earnings and Hours, October 1969* (dated 10 June 1970) which also contains comparisons with the surveys of October 1962 to 1968.

### Determination of wage rates in Australia

Before June 1967, when the Commonwealth Conciliation and Arbitration Commission decided to eliminate basic wages and margins from Commonwealth awards and to introduce total wages (see below), the concept of a basic or living wage was common to wage rates determined by industrial authorities in Australia. Initially, the concept of a basic wage (for adult males) was interpreted as the wage necessary to maintain an average employee and his family in a reasonable state of comfort. However, it was later generally accepted that the basic wage should be fixed at the highest amount which the economy could sustain and that the dominant factor was the capacity of the community to carry the resultant wage levels. Basic wages were determined for adult females as well as for adult males.

In addition to the basic wage, secondary wage payments, including margins for skill, etc. and various kinds of loadings peculiar to the occupation or industry, were determined by industrial authorities. The basic wage and the secondary wage made up the minimum wage rate for a particular occupation.

In the following paragraphs is set out a brief history of the determination of wage rates in Australia by Commonwealth and State industrial authorities. For more detailed information including the history of basic wage determination in Australia see previous issues of the Year Book and the annual *Labour Report*.

#### Commonwealth Basic Wage

Basic wages were a feature of awards of the Commonwealth Conciliation and Arbitration Commission (and the Commonwealth Court of Conciliation and Arbitration) over the period 1907 to 1967.

In 1907 the first declaration of a basic wage (\$4.20 a week for Melbourne) was made by Mr Justice Higgins, President of the Commonwealth Court of Conciliation and Arbitration. The wage was known as the 'Harvester' wage and the amount was considered reasonable 'for a family of about five'. From this date onwards basic wages became incorporated into Commonwealth awards.

In 1913 the Commonwealth Court of Conciliation and Arbitration took cognisance of the 'A' Series retail price index numbers for the thirty more important towns of Australia published by the Commonwealth Statistician, and as awards came up for review the Court usually revised the basic wage rate of the award in proportion to variations in the retail price index. In 1921 the system of making automatic quarterly adjustments to the basic wage in direct ratio to variations in 'A' Series retail price index numbers was first introduced. The practice of making automatic quarterly adjustments to the basic wage in proportion to variations in retail price index numbers continued until September 1953.

In addition to the automatic adjustments to the basic wage described in the previous paragraph, basic wage rates in Commonwealth awards were varied as a result of basic wage or national wage inquiries. The last time basic wages were varied in this way was in July 1966, when, as a result of the Basic Wage, Margins and Total Wage Cases of 1966, rates were increased by \$2 a week for adult males and \$1.50 a week for adult females. At that time Commonwealth basic wage rates for capital cities ranged from \$31 to \$33.50 a week for adult males and from \$23.25 to \$25.10 a week for adult females. These rates continued to operate until the decision of the Commonwealth Conciliation and Arbitration Commission in the National Wage Cases of 1967 to eliminate basic wages and margins from Commonwealth awards and introduce total wages to operate from the beginning of the first pay-period to commence on or after 1 July 1967 (see page 263).

For table showing Commonwealth basic wage rates for adult males and adult females see previous issues of the Year Book and the Appendix to *Labour Report* No. 53, 1967.

#### **Basic wage rates for females**

As a result of the 1949-50 Basic Wage Inquiry the Commonwealth Court of Conciliation and Arbitration fixed the basic weekly wage for adult females at 75 per cent of the corresponding male rate from the beginning of the first pay-period commencing in December 1950. This percentage continued to be prescribed in subsequent inquiries and operated until the basic wage was eliminated from Commonwealth Awards in July 1967 (see above). Prior to December 1950 the relationship of female basic wages to male basic wages varied from award to award, but was generally between 54 and 56 per cent.

For further particulars regarding female basic wage rates see *Labour Report* No. 46, pages 75-81. Tables of rates are published in the Appendix to *Labour Report* No. 53, 1967.

#### **Basic wage rates, Australian Territories**

The determination of basic wage rates in the Northern Territory and the Australian Capital Territory came within the jurisdiction of the Commonwealth Conciliation and Arbitration Commission. Basic wage rates were eliminated from awards operating in these Territories in July 1967 (see above), and total wages were introduced. For tables of basic wages in the Northern Territory and the Australian Capital Territory see Appendix to *Labour Report* No. 53, 1967. For further information on the determination of basic wages in the Territories see previous issues of the Year Book and the annual *Labour Report*.

#### **Commonwealth wage margins**

In addition to basic wage rates, awards of Commonwealth and State industrial tribunals specified secondary wage payments consisting of margins and loadings. Margins have been defined as 'minimum amounts awarded above the basic wage to particular classifications of employees for the features attaching to their work which justify payments above the basic wage, whether those features are skill or experience required for the performance of that work, its particularly laborious nature, or the disabilities attached to its performance.'

In the Commonwealth jurisdiction prior to 1954 the Commonwealth Court of Conciliation and Arbitration had not made any general determination in respect of wage margins, but general principles of marginal rate fixation had been enunciated by the Court in the Engineers Case of 1924, the Merchant Service Guild Case in 1942, and the Printing Trades Case of 1947. Major decisions of the Commonwealth Court of Conciliation and Arbitration, and later the Commonwealth Conciliation and Arbitration Commission, affecting margins in Commonwealth awards were made in 1954, 1959, 1963, 1965, and 1966. Details of these decisions can be found in earlier issues of the Year Book and the annual *Labour Report*.

As a result of a decision of the Commonwealth Conciliation and Arbitration Commission in the National Wage Cases of 1967, basic wages and margins were eliminated from Commonwealth awards and total wages were introduced with effect from the beginning of the first pay-period to commence on or after 1 July 1967.

#### **Commonwealth work value inquiries**

In addition to variations of wage margins in Commonwealth awards as a result of the general inquiries in 1954 to 1966 (see above), variations of margins for various occupations were made by the Commission as individual awards came up for review or upon application by trade unions. Similar procedures existed in regard to awards of State industrial tribunals.

As a result of its decision in the Basic Wage, Margins and Total Wage Cases of 1966, the Commonwealth Conciliation and Arbitration Commission, over the period September 1966 and November 1967, undertook a work value inquiry concerning classifications appearing in the Metal Trades award. On 11 December 1967 the Commission issued a majority decision (Gallagher *J.* and Commissioner Winter, with Moore *J.* dissenting), granting increases to adult male classifications to operate from the beginning of the first pay-period commencing on or after 22 January 1968. Of the total 320 classifications, 18 classifications received no increase, 178 received \$1, 9 received \$1.30, 27 received \$2.75, 16 received \$3.75, 47 (tradesmen) received \$7.40, and the remaining 25 classifications varying amounts varying between 10 cents and \$10.05 per week. Adult females received proportionate increases. Further details appear in the previous issue of the Year Book.

Following applications by employers concerning the question of absorption in over-award payments of the increases granted to the metal trades in December 1967, the Commonwealth Conciliation and Arbitration Commission heard submissions by employers and trade unions on 14 to 16 February 1968. The pronouncement of the majority of the Commission was made on 21 February 1968.

The Commission, in its pronouncement, made the following decisions. The work value decisions of the Commission in December 1967 (*see above*) in regard to its amounts should stand. However it was decided that 70 per cent of the prescribed increases should be payable in accordance with the decision of 11 December and that 30 per cent should be deferred. But where the increase was \$1.60 or less per week, the full amount should be paid without deferment, and where the increase was more than \$1.60 the increase payable without deferment should be at least \$1.60. The decision applied to increases granted to adult males and adult females. Adjustments to rates would be in multiples of 5 cents.

The bench of the Commission, which would deal with the economic wage case expected to commence on 6 August 1968, should decide when the deferred portion of the increases should be payable.

On 6 August 1968 the Commonwealth Conciliation and Arbitration Commission decided that the metal trades increases deferred by the February decision (*see above*) would become payable from the beginning of the first pay period commencing on or after 21 August 1968.

#### Commonwealth total wages

In the national wage cases of 1964 and 1965 applications by employers that basic wages and margins should be deleted from Commonwealth awards and total wages introduced were rejected by the Commonwealth Conciliation and Arbitration Commission. However, in its decisions in the Basic Wage, Margins and Total Wage Cases of 1966 the Commission decided to defer the conversion of the wage structure to the basis of a single wage pending further consideration of the present structure of marginal rates (*see page 262*) and further argument. As a result of the National Wage Cases of 1967, in which the employers again applied for a total wage, the Commonwealth Conciliation and Arbitration Commission announced the elimination of basic wages and margins from Commonwealth awards and the introduction of total wages. The total wages were arrived at by adding an amount of \$1 a week to the weekly award wages for each adult male and adult female classification to operate from the beginning of the first pay-period to commence on or after 1 July 1967.

Trade unions unsuccessfully challenged in the High Court the abolition of basic wages and the adoption of total wages by the Commonwealth Commission.

On 4 October 1968 in its decision in the National Wage Case 1968 the Commonwealth Conciliation and Arbitration Commission increased all wage rates for adults (male and female) in Commonwealth awards by \$1.35 a week. The minimum wage for adult males was increased by the same amount. Male and female juniors including apprentices received proportionate increases. The variations came into operation from the beginning of the first pay-period commencing on or after 25 October 1968.

On 1 December 1969 the Commonwealth Conciliation and Arbitration Commission made the following decisions in the National Wage Case 1969. An increase of 3 per cent was awarded to total award wages of adult males and females other than the minimum wage for adult males which was increased by \$3.50 per week. Male and female juniors and apprentices also received a 3 per cent increase in their wage rates. All these variations operated from the beginning of the first pay period commencing on or after 19 December 1969.

#### Commonwealth minimum wage

In July 1966 the Commonwealth Conciliation and Arbitration Commission, in its decisions in the Basic Wage, Margins and Total Wage Cases of 1966, inserted in Commonwealth awards provisions for a minimum wage for adult males. The Commission said that it had given detailed consideration to lower paid classifications in the Metal Trades Award and had decided to grant some

immediate relief to low wage earners. The Commission in its judgment said that it intended to insert a new provision in awards by which it would be prescribed that no adult male employee should be paid as a weekly wage for working the standard hours of work an amount less than the minimum wage, i.e. his appropriate basic wage rate plus \$3.75 a week. The minimum wage was prescribed for adult male employees only and was applied for all purposes of the award, for example, in calculation of overtime and other penalty rates, piece-work, casual employment, sick leave and annual leave. The Commission stated that the provision for a minimum wage for adult male employees was designed to meet the circumstances of employees in the lowest classifications who were in receipt of award rates and no more. It was not intended to affect the wage of any employee who was already receiving the prescribed minimum through over-award payment. The provision for a minimum wage for adult males operated from the beginning of the first pay-period to commence on or after 11 July 1966. The rates of minimum wage for adult males inserted in Commonwealth awards ranged from \$34.75 to \$37.25 a week for capital cities. These rates were increased by \$1 a week as a result of the decision of the Commonwealth Conciliation and Arbitration Commission in the National Wage Cases of 1967, the increases to operate from the beginning of the first pay-period commencing on or after 1 July 1967. Increases of \$1.35 a week operated from the beginning of the first pay-period commencing on or after 25 October 1968 as a result of the National Wage Case 1968. As a result of the National Wage Case 1969 increases of \$3.50 per week operated from the beginning of the first pay-period commencing on or after 19 December 1969.

#### Equal pay

Two benches of the Commonwealth Conciliation and Arbitration Commission sat jointly from 25 February 1969 to 22 May 1969 to take evidence and hear argument on trade union claims for equal pay between the sexes in the Equal Pay Cases 1969.

Both benches of the Commission reached a common conclusion and on 19 June 1969 published their decision and reasons for their decision. The Commission said it was prepared to implement the principal of equal pay for equal work by introducing into Commonwealth awards and determinations the principles contained in State Acts on equal pay. The Commission stated that no increases should be granted to adult females without an examination of the work done. It also suggested a number of principles to be applied in deciding applications for equal pay. In summary these were: (i) the work considered should be restricted to that performed by both adult males and adult females under terms of the same determination or award; (ii) the work should be the same or of a like nature and of equal value (from the point of view of wage or salary assessment), and to be of the same range and volume and performed under the same conditions; (iii) consideration should be restricted to the general work situation under the determination or award and not to that of one establishment; and (iv) equal pay should not be provided where the work is essentially or usually performed by females but upon which male employees may also be employed.

The Commission decided that implementation of equal pay should be spread over a period so that as from 1 January 1970 implementation would be the same as that under South Australian, Western Australian and Tasmanian Acts. Where a decision was reached prior to 1 October 1969 the female rate would become 85 per cent of the male rate from the beginning of the first pay period to commence on or after 1 October 1969, increase to 90 per cent of the male rate from the beginning of the first pay period to commence on or after 1 January 1970, increase to 95 per cent of the male rate from the beginning of the first pay period to commence on or after 1 January 1971, and become equal to the male rate from the beginning of the first pay period to commence on or after 1 January 1972. Where a decision was reached on or after 1 October 1969 it should not operate retrospectively. For decisions reached between 1 October 1969 and up to 1 January 1970, 85 per cent of the male rate at the date of operation should apply, and so on according to the above scale. No female rates should be reduced by operation of these formulae.

### Determination of wage rates in State awards, etc.

#### New South Wales

The first determination of a standard living wage for adult male employees under New South Wales State awards operated from 16 February 1914, when the Court of Arbitration fixed the rate at \$4.80 a week for the metropolitan area. The first living wage for adult females (\$3.00 a week) was declared by the Board of Trade to operate from 17 December 1918.

From 1926 to 1937 basic wage rates were determined by the Industrial Commission of New South Wales. From July 1927 a State scheme of child endowment became operative in New South Wales, and this continued until superseded by the Commonwealth Government scheme in July 1941.

From October 1937 to October 1955 the State adult male basic wage for Sydney was the same as the Commonwealth basic wage for Sydney. From the beginning of the first pay-period in November 1955 the State basic wage was automatically adjusted each quarter in accordance with movements in retail price index numbers. (Automatic adjustment of Commonwealth basic wages was discontinued in September 1953.) These automatic adjustments continued until October 1964, when legislation provided that the Commonwealth basic wage for Sydney should apply in State awards and industrial agreements to operate from the beginning of the first pay-period which commenced on or after 19 June 1964.

Between October 1937 and November 1950 the State adult female basic wage for Sydney was 54 per cent of the adult male rate. In December 1950 the adult female rate became 75 per cent of the adult male rate. From January 1963 for male and female employees performing work of the same or like nature and of equal value, the Industrial Commission may prescribe in State awards the same basic wage and secondary wage. In March 1967 the Industrial Commission in Court Session, when considering the adoption of Commonwealth marginal increases for State awards, stated that the general principal in future would be to inject Commonwealth wage increases on economic grounds into the State award structure.

Following the increase of \$1 a week in total wages in Commonwealth awards in July 1967, the Industrial Commission increased award rates of wages and salaries for adult males and adult females by the addition of a fixed loading of \$1 per week, described as 'July 1967 economic loading', to take effect from the beginning of the first pay period to commence on or after 1 July 1967. Subsequently legislation increased the basic wage for adult males from \$33.50 to \$34.50 per week and for adult females from \$25.10 to \$26.10 per week to operate from 1 January 1968. The increase of \$1 per week in each basic wage absorbed the 'July 1967 economic loading', which was deleted from State awards and agreements. The legislation also provided for the adjustment of wage rates in State awards by the Industrial Commission subsequent to a decision of the Commonwealth Conciliation and Arbitration Commission to vary Commonwealth wage rates wholly or partly on economic grounds. Changes in the State basic wage for adult males shall not be more than the amount of increase in Commonwealth minimum wages for adult males, and the increase in the adult female basic wage not less than 75 per cent of the increase in the male basic wage. The Industrial Commission and Conciliation Committees were given power to include provisions for minimum wages for adult males or adult females in State awards.

The Industrial Commission of New South Wales increased the basic wages for adult males and adult females by \$1.35 a week from the beginning of the first pay-period commencing on or after 25 October 1968. The weekly basic wage rates then became \$35.85 for adult males and \$27.45 for adult females.

The Industrial Commission of New South Wales on 12 December 1969 determined that rates of wages for timeworkers in State awards should increase by 3 per cent and this resulted in increased basic wages, margins and certain loadings. The adult male basic wage increased by \$1.05 to \$36.90 per week and the adult female basic wage by 85c to \$28.30 per week. Marginal rates for adult males and adult females were increased by 3 per cent as also were certain loadings (e.g. shift allowances, leading hand allowances). Junior rates of pay were also increased by 3 per cent. These variations operated from the beginning of the first pay period commencing on or after 19 December 1969.

Further information on New South Wales basic wages is published in previous issues of the Year Book and the annual *Labour Report*. State basic wage rates for Sydney are published in the Appendix to *Labour Report* No. 53, 1967.

## Victoria

In Victoria, Wages Boards constituted for each industry group or calling from representatives of employers and employees with an independent chairman determine rates of wages and conditions of work.

Except for the period November 1953 to August 1956, when automatic quarterly adjustments to the basic wage in Wages Board determinations operated, Wages Boards in determining wage rates had adopted Commonwealth basic wage rates. The basic wage rates of August 1956 continued to operate until June or July 1959 when the Commonwealth rates for Melbourne, determined as a result of the 1959 Basic Wage Inquiry, were incorporated into Wages Board determinations.

Subsequent to the decisions of the Commonwealth Conciliation and Arbitration Commission in the National Wage Cases of 1967 (see page 263), the Industrial Appeals Court decided that basic wages and margins for adult males and adult females should be deleted from Wages Board determinations and that wage rates expressed as total wages should operate from the beginning of the first pay-period in July 1967. At the same time total wages for both adult males and females were increased by \$1 a week.

Total wages for both adult males and adult females in Wages Board determinations were further increased by \$1.35 a week operative from the beginning of the first pay-period commencing on or after 25 October 1968.

On 23 December 1969 the Industrial Appeals Court ordered that wage rates in Wages Board determinations should be increased by 3 per cent operative from the beginning of the first pay-period commencing on or after 19 December 1969. The Court also ordered that a minimum wage for adult males of \$42.30 a week should operate in all determinations from the same operative date.

For further information on basic wages in Victorian Wages Board determinations see previous issues of the Year Book and the annual *Labour Report*. Rates for adult males and adult females from November 1953 are published in the appendix to *Labour Report* No. 53, 1967.

### Queensland

The first formal declaration of a basic wage in Queensland determined a basic wage of \$8.50 for adult males and \$4.30 for adult females to operate from 1 March 1921. Prior to this declaration the rate of \$7.70 a week for adult males had been generally recognised in awards as the 'basic' or 'living' wage.

Since 1961 the full bench of the Industrial Conciliation and Arbitration Commission, consisting of not less than three Commissioners, has power to make declarations concerning the basic wage for males and females and the standard hours of work. The basic wage for adult males must be sufficient to maintain an employee, his wife, and family of three children in a fair and average standard of comfort. The basic wage for adult females should be not less than is sufficient to enable an employee to support herself in a fair and average standard of comfort. All persons interested must be given an opportunity to be heard before any general declaration regarding the basic wage is made, and the Commission must take into consideration any probable economic effect of such declaration. From 1 May 1961 the basic wage for adult females has been 75 per cent of the male rate.

In March 1965 the Commission stated that it had been decided as a matter of policy, that in the future, it did not propose to deal with an application to vary the basic wage solely because of a change in the Consumer Price Index, unless such a change warranted an alteration of 40 cents or more in the basic wage for adult males.

Following the decision of the Commonwealth Conciliation and Arbitration Commission to increase total wages by \$1 a week in July 1967, the Industrial Commission increased all award rates of pay for both adult males and adult females by \$1 per week to operate from 3 July 1967.

The Industrial Conciliation and Arbitration Commission decided on 25 October 1968 that the increase of \$1.35 per week for adult males and adult females granted by the Commonwealth Conciliation and Arbitration Commission (see page 264) should flow to Queensland State awards, and that the increases should be added to basic wages and operate from 28 October 1968. The Commission also decided that the basic wage concept should be maintained and that the \$1 increase granted to adult males and females in July 1967 should be absorbed in the basic wages.

The basic wage rates payable in the Southern Division (Eastern District) including Brisbane were \$35.55 for adult males and \$27.25 for adult females operative from 28 October 1968. For basic wages in other areas of the State district allowances are added to these rates (see previous issues of the Year Book and the annual *Labour Report*).

The Industrial Conciliation and Arbitration Commission of Queensland on 12 December 1969 declared that the basic wages for the Eastern District of the Southern Division should be increased by \$1.10 for adult males to \$36.65 per week and by 80 cents for adult females to \$28.05 per week as from 22 December 1969. The Commission further declared by way of a general ruling that the ascertainable marginal content of each adult male and female wage or salary rate should be increased by 3 per cent from the same date of operation. The rates of pay for juniors were increased proportionally to the adult increases.

For further particulars of basic wage determination in Queensland see previous issues of the Year Book and the annual *Labour Report*. Tables of basic wages are published in the Appendix to *Labour Report* No. 53, 1967.

### South Australia

The first declaration of a living wage for adult male employees in the metropolitan area was \$7.95 a week operative from 4 August 1921. The first adult female living wage of \$3.50 a week operated from 1 September 1921.

Before July 1966 the Board of Industry had power to declare after public inquiry living wages to be paid to adult males and adult females. Since that date the power has been vested in the Industrial Commission constituted by the President and two Commissioners. However, the South

Australian Industrial Code also provides for the declaration of living wages by proclamation to prevent unjustifiable differences between State and Commonwealth rates of wages. This latter method has been used in recent years to declare living wages.

The State living wage for adult males was the same as the Commonwealth basic wage for Adelaide from February 1950 to July 1967, when basic wages were deleted from Commonwealth awards and total wages introduced. The State living wage for adult females was the same as the Commonwealth basic wage for Adelaide from December 1950 to July 1967 and was 75 per cent of the adult male rate.

Following the increase of \$1 a week in total wages in Commonwealth awards in July 1967 (*see* page 263), by proclamation the State living wages for both adult males and adult females were increased by \$1 a week to operate from 3 July 1967. Further increases of \$1.35 a week were proclaimed to operate from 28 October 1968. The rates then became \$34.65 for adult males and \$26.55 for adult females.

A minimum wage for adult males similar in concept to the Commonwealth award provisions of a minimum wage (*see* page 263) operates in South Australian State awards. From 28 October 1968 the rate prescribed was \$38.40 a week.

The South Australian Industrial Commission granted the following increases in State awards from 22 December 1969. An 'economic loading' of 3 per cent of the sum of the living wage plus margins was included in all awards and the minimum wage for adult males was increased by \$3.50 to \$41.90 per week.

For further information on South Australian living wages see previous issues of the Year Book and the annual *Labour Report*. Tables of living wages are published in the Appendix to *Labour Report* No. 53, 1967.

#### Western Australia

The first declaration of the basic wage by the Court of Arbitration operated from 1 July 1926, when rates of \$8.50 for adult males and \$4.59 for adult females were fixed.

Before December 1966 the Western Australian Industrial Commission in Court Session consisting of three Commissioners (previously the Court of Arbitration) could declare a basic wage at any time on its own motion and must do so when requested by a majority of industrial unions or by the Western Australian Employers' Federation, with the limitation that no new determination should be made within twelve months of the preceding inquiry. Legislation also provided that the Commission (or the Court) might make adjustments to the basic wage each quarter after considering retail price index numbers.

From August 1931 to September 1964 separate basic wages were declared for three areas of the State, namely (a) the metropolitan area, (b) south-west land division, and (c) goldfields areas and other parts of the State. In September 1964, when the Commission increased the basic wage after an inquiry, one rate was declared for the whole of the State.

In December 1951 the basic wages for adult females became 65 per cent of the corresponding male rate, and in January 1960 this proportion was increased to 75 per cent. In each case marginal rates of pay for females were reduced or deleted to offset the increase in the female basic wage.

In December 1966 legislation provided that the Western Australian basic wage rates should be the same as the Commonwealth Six Capitals rates as soon as these exceeded the State rates (\$33.50 a week for adult males and \$25.13 a week for adult females) operative from 24 October 1966.

Following the decision of the Commonwealth Conciliation and Arbitration Commission to increase total wages by \$1 a week from July 1967 (*see* page 263), the Industrial Commission made the following decisions. Wage rates for adult males not in receipt of the minimum weekly wage and for adult females were increased by 60 cents a week by way of a special loading. The minimum weekly wage for adult males (*see* page 263) payable under certain awards was increased from \$36.55 to \$37.55 a week. These increases operated from the beginning of the first pay-period commencing on or after 1 July 1967.

In October 1968 the Western Australian Industrial Commission decided upon application by trade unions, to increase by \$1.35 a week the special loading of 60c (*see* above) payable to adult males and adult females, to operate from the beginning of the first pay-period commencing on or after 25 October 1968. At the same time the Commission increased the minimum wage for adult males from \$37.55 to \$38.90 a week.

Legislation operative from 22 November 1968 fixed the basic wage for adult males at \$35.45 and for adult females at \$27.08 a week. These new rates absorbed the special loading of \$1.95 a week which was deleted from awards. The legislation also provided for the Commission to review the basic wage at least every twelve months, the variations in the basic wage to take effect only after the

expiration of twelve months from the last variation unless there were special reasons. The Commission was also required, upon application, to insert in awards provision for equal pay for male and female workers performing work of the same or like nature and of equal value. If application for equal pay was made before 30 June 1970 the difference in male and female basic wages would be removed not later than 1 January 1972. The equal pay provisions do not apply to persons engaged in work essentially or usually performed by female workers but upon which males may be employed.

The Western Australian Industrial Commission on 21 November 1969 increased the adult male basic wage by \$1.00 to \$36.45 per week and the adult female basic wage by 80c to \$27.88 per week operative from 24 November 1969. Later, following the decision in the National Wage Case, the Commission increased the minimum wage for adult males in State awards by \$3.50 to \$42.40 per week operative from the beginning of the first pay period commencing on or after 19 December 1969.

More detailed information on State basic wages in Western Australia appear in earlier issues of the Year Book and the annual *Labour Report*. Basic wage rates for the metropolitan area are published in the Appendix to *Labour Report* No. 53, 1967.

### Tasmania

Wages Boards are constituted for a number of industries from representatives of employers and employees with an independent chairman (common to all Wages Boards) with power to determine rates of wage in each industry.

Except for the period February 1956 to August 1956, when Wages Boards adjusted basic wages in accordance with movements in retail price index numbers, Wages Boards generally adopted Commonwealth basic wage rates. From August 1956 the basic wages in determinations remained unchanged until July 1959, when the rates were made the same as the Commonwealth basic wages.

In January 1961 Wages Boards adopted the basic wage for Hobart as the uniform rate applicable throughout the State. During 1962 a number of Wages Boards provided in their determinations for the automatic adoption of Commonwealth basic wages as and when they varied.

In July and August 1967, subsequent to the increase of \$1 in total wages in Commonwealth awards, Wages Boards varied their determinations by increasing basic wages for adult males and adult females by \$1 a week.

In November 1968 the Chairman of Wages Boards recommended a \$1.35 increase in the basic wage for adult males and adult females in Wages Board determinations. The new basic wages operative from the beginning of the first pay-period commencing on or after 15 October 1968 became \$35.75 a week for adult males and \$27.40 for adult females. The increase also applied to the minimum wage for adult males (*see* page 263) which rose from \$38.15 to \$40.45 a week.

Wages Board determinations were amended as follows, these variations operating from the beginning of the first pay period commencing on or after 19 December 1969. The adult male basic wage was increased by \$1.05 to \$36.80 per week and the adult female basic wage by 80c to \$28.20 per week. Margins were increased by 3 per cent and the minimum wage for adult males was increased by \$2.55 to \$43.00 per week.

Further details of basic wages in Tasmanian Wages Board determinations are published in earlier issues of the Year Book and the annual *Labour Report*. Hobart basic wage rates adopted by Wages Boards from February 1956 are published in the Appendix to *Labour Report* No. 53, 1967.

### Annual leave

As summarised in the following paragraphs, the majority of employees in Australia at present receive at least three weeks' paid annual leave. Further information will be found in previous issues of the Year Book.

In its judgment in the Three Weeks Annual Leave Inquiry, 1963, the Commonwealth Conciliation and Arbitration Commission said that it would implement its intention of granting three weeks' annual leave generally in secondary industry, subject to special cases. A period of twenty-one consecutive days' leave would be allowed to employees who had completed twelve months' continuous service by or after 20 November 1963.

Employees in New South Wales in private industry, other than those covered by Federal awards, were granted three weeks' annual leave by an amendment to the Annual Holidays Act passed in 1958. In 1964 the State Government granted its employees four weeks' annual leave effective from 1 January 1964. From 29 September 1964 annual holiday pay for employees covered by provisions of the Annual Holidays Act has been calculated on the basis of the employee's current weekly earnings instead of current award rates.

Following the decision of the Commonwealth Conciliation and Arbitration Commission in 1963 (*see above*) individual Victorian Wages Boards commenced to alter provisions of their determinations to grant employees an extra week of leave. By September 1963 the majority of Boards had included three weeks' annual leave in their determinations.

In June 1963 the Full Bench of the Queensland Industrial Conciliation and Arbitration Commission granted an extra week of annual leave to employees under State awards with twelve months' continuous service on or after 30 November 1963. The decision applied to day workers and non-continuous shift workers receiving two weeks' leave; continuous shift workers receiving three weeks' leave; and day workers and shift workers receiving additional leave in lieu of extra payment for working on statutory holidays. The order became effective as from 1 June 1963.

The Full Bench of the South Australian Industrial Court in May 1963 announced an increased standard of annual leave in the State, adopting three weeks as the standard as fixed by the Commonwealth Conciliation and Arbitration Commission (*see above*).

Following a general inquiry concerning Annual Leave and Public Holidays the Western Australian Court of Arbitration in June 1963 adopted three weeks as the new standard for the normal period of annual leave in State awards, with four weeks for seven-day shift workers. The date of operation was the same as that decided by the Commonwealth Conciliation and Arbitration Commission (*see above*). The standard number of public holidays was retained at ten a year.

Following an amendment to the Wages Board Act in 1961, Tasmanian Wages Boards were permitted to grant employees up to three weeks' paid recreational leave. Between June 1962 and early 1963 determinations of Wages Boards were amended to provide for three weeks annual leave for employees, to operate from 1 January 1963.

### Long service leave

Paid long service leave, i.e. leave granted to workers who remain with the one employer over an extended period of time, has been included in the provisions of Commonwealth and State industrial legislation and industrial awards, and a brief summary is given in the following paragraphs. After fifteen years' continuous employment with the one employer, most employees in Australia are now entitled to at least thirteen weeks' paid long service leave. In all cases the transfer of ownership of a business does not constitute a break in continuity of service with the same employer. Further information is contained in previous issues of the Year Book.

#### Commonwealth

Until May 1964 the Commonwealth Conciliation and Arbitration Commission had not included provisions for long service leave in its awards, and had refrained from determining disputes relating to this subject except in the case of the Northern Territory and the Australian Capital Territory (*see below*). Consequently, until then, the provisions of the various State Acts relating to long service leave applied to workers covered by awards of the Commonwealth.

In May 1964, following hearing of claims for insertion of long service leave provisions in Commonwealth awards, the Full Bench of the Commonwealth Conciliation and Arbitration Commission announced its decision that long service leave entitlement would be calculated on the basis of thirteen weeks for twenty years of unbroken employment, in respect of employment before 11 May 1964 (or, in New South Wales, 1 April 1963), and at the rate of thirteen weeks for fifteen years in respect of service after 11 May 1964 (or, in New South Wales, 1 April 1963). After further periods of ten years, employees would be entitled to an additional *pro rata* period of leave calculated on the same basis. Those employees who completed an unbroken contract of employment of ten years but less than fifteen years, and whose employment was terminated by death or by the employer for any cause other than serious and wilful misconduct, or by the employee on account of illness, incapacity or domestic or other pressing necessity, would be entitled to *pro rata* payment. The rates of payment while on leave would be current award rates which would be subject to basic wage changes and marginal adjustments which occurred during the leave period.

*Australian Territories.* Long service leave codes for employees covered by Northern Territory and Australian Capital Territory awards were originally prescribed on 4 December 1961 by the Commonwealth Conciliation and Arbitration Commission in Presidential Session. The Commission decided that employees should be granted three months' long service leave after twenty years' service with one employer, even if part of this service was outside the Territory. In addition, the Australian Capital Territory code prescribed that employees presently employed might 'go back for a period of 25 years in regard to the calculation of their present or future entitlement of long service leave'. In December 1964 the Commission amended the majority of awards covering employees in the Northern Territory and the Australian Capital Territory by granting long service leave on the basis of thirteen weeks after fifteen years' service.

*Stevedoring Industry.* The *Stevedoring Industry Act* 1962, which came into force on 19 November 1962, amended the *Stevedoring Industry Act* 1956–1961 by extending the eligibility and qualifying periods of the long service leave provisions of the Act. No changes were made to the entitlement for long service leave, which remained at thirteen weeks after twenty years' qualifying service and six and a half weeks for each subsequent ten years' qualifying service. The *Stevedoring Industry Act* 1966, which operated from 29 October 1966, reduced the qualifying period for thirteen weeks leave from twenty years to fifteen years.

#### New South Wales

Long service leave was first introduced for the majority of workers by the Industrial Arbitration Act, 1951, which provided such leave for workers under State awards. This Act was replaced by the Long Service Leave Act, 1955, which extended the benefits to any worker within the State. An amendment to the Act in April 1963 provided for three months' long service leave for fifteen years' continuous service with the same employer and proportionate amounts on the same basis after a minimum of five years' service. The Long Service Leave (Metalliferous Mining Industry) Act, 1963 conferred on certain workers in the metalliferous mining industry the right to three months' long service leave after ten years' service. This Act operated from 1 January 1964.

#### Victoria

The *Factories and Shops (Long Service Leave) Act* 1953 first provided for long service leave for workers in Victoria, the provisions of this Act being subsequently incorporated in the Labour and Industry Act. Leave provided for was thirteen weeks for twenty years' continuous service with the same employer. Contributions by employers to retirement schemes were to be taken into consideration in dealing with exemptions from the Act.

An amendment to the Labour and Industry Act in December 1964 granted employees, from 1 January 1965, thirteen weeks' leave after fifteen years' continuous service. Workers who terminated their employment after ten years but less than the qualifying fifteen years would be able to obtain a *pro rata* entitlement subject to the existing special conditions of the Act. Following amendment to the Public Service Act in 1964, public servants became entitled to four and a half months' leave after fifteen years' service instead of six months after twenty years.

#### Queensland

In 1952 the Industrial Conciliation and Arbitration Acts were amended to include long service leave provisions for employees within the jurisdiction of the Industrial Court, and the Acts were amended again in 1955 to extend these provisions to any employee in respect of whose employment there was not in force an award or industrial agreement under the Act and to seasonal workers in sugar mills and meat works. Leave provided for was thirteen weeks for twenty years' continuous service with the same employer.

An amendment to The Industrial Conciliation and Arbitration Acts was passed and assented to in December 1964, granting employees long service leave of thirteen weeks after fifteen years' continuous service. The amendment retained *pro rata* leave entitlement after ten years' service and operated on and from 11 May 1964.

#### South Australia

The Long Service Leave Act, 1967 provides for thirteen calendar weeks' leave after fifteen years' service with the same employer and for eight and two-thirds weeks' leave for each subsequent complete period of ten years' service. After seven and before fifteen completed years of service the worker is entitled on termination of employment to proportionate payment in lieu of leave for the period worked, except in certain specified circumstances. Entitlement for qualifying service prior to January 1966 is to be calculated at the rate of thirteen weeks' leave for twenty years' service, and an employer shall not be required to grant leave until the worker's total entitlement is thirteen weeks.

An employer may be exempted by the Industrial Commission from the leave entitlement provisions of the Act provided that the employees are entitled under some other scheme to long service leave benefits no less favourable than those provided by the Act.

#### Western Australia

The Long Service Leave Act was passed in 1958, but it did not apply to employees whose conditions of work were regulated under the Western Australian Industrial Arbitration Act. The Court of Arbitration of Western Australia in an order dated 1 April 1958 incorporated in most of the awards and agreements within its jurisdiction provisions similar to those in the Long Service Leave Act.

Leave provided for was thirteen weeks for twenty years' continuous service with the same employer. Contributions by employers to retirement schemes can be taken into consideration in dealing with exemptions from the Act.

In September 1964 the Industrial Commission began to amend the long service leave provisions of its awards and industrial agreements to provide for thirteen weeks' leave after fifteen years' service on or from 1 October 1964. *Pro rata* entitlement would accrue after ten years' service. The *Long Service Leave Amendment Act (No. 2) 1964*, introduced in October 1964, was in the same terms as the amendments made by the Commission to the various awards and agreements.

#### Tasmania

The *Long Service Leave Act*, which was passed in 1956, provided for thirteen weeks' leave for twenty years' continuous service with the same employer. Contributions by employers to retirement schemes could be taken into consideration in dealing with exemptions from the Act. An amendment to the *Long Service Leave Act*, assented to on 17 December 1964, granted thirteen weeks' leave after fifteen years' continuous service. The amendment operated on and from 11 May 1964.

### INDUSTRIAL DISPUTES

Detailed information regarding industrial disputes involving stoppage of work is given in the *Labour Report*. A table showing statistics of industrial disputes for each year from 1913 is contained in the Appendix to *Labour Report* No. 53, 1967.

Particulars of all disputes in progress during the year are included in the annual figures, whether the dispute commenced in that year or was in progress at the beginning of the year. Consequently, details of 'the number of disputes' and 'workers involved' in disputes which commenced in any year, and were still in progress during the following year, are included in the figures for both years.

The following table gives, for Australia as a whole, particulars of industrial disputes which were in progress during 1969, classified according to industry groups.

#### INDUSTRIAL DISPUTES(a): INDUSTRY GROUPS, AUSTRALIA, 1969

Industry group	Number	Workers involved			Working days lost	Estimated loss in wages (\$'000)
		Directly	Indirectly (b)	Total		
Agriculture, grazing, etc.	..	..	..	..	..	..
Coal mining	235	53,666	..	53,666	76,100	941.3
Other mining and quarrying	39	17,491	3,315	20,806	76,863	1,277.3
Engineering, metals, vehicles, etc.	543	358,584	8,356	366,940	643,569	7,415.3
Textiles, clothing and footwear	10	7,375	85	7,460	10,826	113.6
Food, drink and tobacco	190	75,775	7,757	83,532	119,027	1,291.3
Sawmilling, furniture, etc.	1	5,734	32	5,766	7,818	79.7
Paper, printing, etc.	25	11,227	393	11,620	27,897	343.0
Other manufacturing	165	59,938	1,389	61,327	155,177	1,946.6
Building and construction	273	186,818	855	187,673	276,350	3,667.1
Railway and tramway services	27	96,183	17,527	113,710	153,391	1,532.2
Road and air transport	63	82,056	803	82,859	117,939	1,207.8
Shipping	47	7,890	496	8,386	11,906	143.9
Stevedoring	291	151,833	17	151,850	136,209	1,505.8
Amusement, hotels, personal service, etc.	39	42,046	79	42,125	41,564	423.9
Other industries(c)	66	87,416	62	87,478	103,321	1,096.8
<b>Total</b>	<b>2,014</b>	<b>1,244,032</b>	<b>41,166</b>	<b>1,285,198</b>	<b>1,957,957</b>	<b>22,985.7</b>

(a) Refers only to disputes involving a stoppage of work of ten man-days or more. (b) Persons thrown out of work at the establishments where the stoppages occurred but not themselves parties to the dispute. (c) Includes communication; finance and property; wholesale and retail trade; public authority (n.e.i.); and community and business services.

A graph on plate 24, page 272 shows, for the years 1957 to 1969, the working days lost as a result of industrial disputes in the main industry groups.

The following table gives particulars of the number of industrial disputes in each State and Territory, together with the number of workers involved and the losses in working days and wages caused by disputes which were current during each of the years 1965 to 1969.

# INDUSTRIAL DISPUTES: AUSTRALIA

1957 TO 1969

PLATE 24

## INDUSTRIAL DISPUTES(a): STATES AND TERRITORIES, 1965 TO 1969

State or Territory	Year	Number	Workers involved			Working days lost	Estimated loss in wages (\$'000)
			Directly	Indirectly (b)	Total		
New South Wales	1965	832	244,900	6,156	251,056	367,942	3,479.1
	1966	835	203,701	6,315	210,016	400,111	4,026.0

	1969	2,014	1,244,032	41,166	1,285,198	1,957,957	22,985.7

(a) Refers only to disputes involving a stoppage of work of ten man-days or more. (b) Persons thrown out of work at the establishments where the stoppage occurred but not themselves parties to the dispute.

## Duration of disputes

The duration of each industrial dispute involving a loss of work, i.e. the time between the cessation and resumption of work, has been calculated in working days, exclusive of Saturdays, Sundays and holidays, except where the establishment involved carries on a continuous process (e.g. metal smelting and cement manufacture).

The following table shows, for the year 1969, industrial disputes in coal mining, stevedoring and other industries classified according to duration.

## INDUSTRIAL DISPUTES(a): DURATION, BY INDUSTRY GROUP, AUSTRALIA, 1969

Duration (working days)	Workers involved(b)			Working days lost		Estimated loss in wages (\$'000)
	Number	Number	Proportion of total (per cent)	Number	Proportion of total (per cent)	
<b>COAL MINING</b>						
1 day and less . . . . .	148	29,732	55.4	26,744	35.1	317.0
2 days and more than 1 day . . . . .	45	19,285	35.9	29,212	38.4	367.5
3 days and more than 2 days . . . . .	18	2,198	4.1	5,491	7.2	63.4

(a) Refers only to disputes involving a stoppage of work of ten man-days or more. (b) Includes workers indirectly involved. See footnote (b) to table on page 273.

**Causes of disputes**

Stoppages are analysed in three separate groups, 'Coal mining', 'Stevedoring', and 'Other industries'. Causes have been grouped under four main headings: (1) Wages, hours and leave; (2) Physical working conditions and managerial policy; (3) Trade unionism; (4) Other causes. The first group is restricted to disputes involving general principles relating to wages, hours and leave; minor questions regarding the claims to pay or leave by individual employees are included under managerial policy. The second group comprises disputes regarding physical working conditions and general questions of managerial policy, including disciplinary action, the promotion of employees, the employment of particular individuals, personal disagreements between employees and supervisory staff, and disputes arising from the computation of wages, leave, etc., in individual cases. The third group includes stoppages over employment of non-unionists, inter-union and intra-union disputes, disputes over recognition of union activities, and sympathy stoppages in support of employees in another industry. The last group comprises disputes by way of protest against situations not arising from the usual relationship of employer and employee, e.g. political matters, and cases (occurring mainly in the coal mining industry) where the cause of the stoppage is not officially made known to the management.

The following table shows particulars of industrial disputes classified according to cause, in three industry groups for 1969.

INDUSTRIAL DISPUTES(a): CAUSES, INDUSTRY GROUPS, AUSTRALIA, 1969

<i>Cause of dispute</i>	<i>Coal mining</i>	<i>Stevedoring</i>	<i>Other industries</i>	<i>All industries</i>

### WORKERS' COMPENSATION LEGISLATION

A conspectus of the principal provisions of Workers' Compensation Acts and Ordinances in force in Australia at 31 December 1967 is included in *Labour Report* No. 53, pages 191-203.

## LABOUR ORGANISATIONS

### Labour organisations in Australia

The figures shown in this section are prepared from a special collection of membership of labour organisations at 31 December each year. The affairs of single unions are not disclosed in the published results and this has assisted in securing complete information. The Bureau is indebted to the secretaries of trade unions for their co-operation in supplying information. More detailed statistics appear in the annual *Labour Report*.

#### Trade unions

The trade unions in Australia are very diverse in character, and range from the small independent association to the large interstate organisation, which, in its turn, may be a branch of an international body. Broadly speaking, there are four distinct classes of labour organisations: (a) the local independent, (b) the State, (c) the interstate, and (d) the Australasian or international; but a number of variations occur from each of these classes. The schemes of organisation of interstate or federated unions vary greatly in character. In some unions the State organisations are bound together under a system of unification with centralised control, while in others the State units are practically independent and self-governing, the federal bond being loose and existing only for one or two specified purposes. Statistics relating to interstate or federated trade unions are shown in a table on page 279.

Returns showing membership by States and Territories at 31 December each year are obtained for all trade unions and employee organisations. The following table shows the position at the end of each of the years 1967 to 1969.

**TRADE UNIONS: NUMBER AND MEMBERSHIP, STATES AND TERRITORIES  
DECEMBER 1967 TO 1969**

State or Territory	Number of separate unions			Number of members ('000)			Percentage increase in membership(a)		
	1967	1968	1969	1967	1968	1969	1967	1968	1969
New South Wales . . . . .	213	210	210	832.8	861.5	884.8	1.9	3.4	2.7
Victoria . . . . .	152	153	152	545.5	550.7	559.8	1.1	1.0	1.7
Queensland . . . . .	138	135	135	344.0	334.1	336.4	-2.2	-2.9	0.7
South Australia . . . . .	133	133	135	182.2	185.6	194.2	2.1	1.9	4.6
Western Australia . . . . .	155	157	153	152.3	160.9	162.2	3.9	5.6	0.8
Tasmania . . . . .	107	111	112	68.1	68.2	69.9	4.0	0.1	2.4
Northern Territory(b) . . . . .	40	39	43	4.5	5.6	5.9	(b)	(b)	(b)
Australian Capital Territory(b) . . . . .	65	70	70	22.0	24.1	26.0	(b)	(b)	(b)
<b>Australia . . . . .</b>	<b>(c) 324</b>	<b>(c) 319</b>	<b>(c) 309</b>	<b>2,151.3</b>	<b>2,190.7</b>	<b>2,239.1</b>	<b>1.3</b>	<b>1.8</b>	<b>2.2</b>

(a) On preceding year. (b) Some unions in the Territories are affiliated with State organisations and their membership is reported under the heading of that State. More accurate reporting of membership by location over the years is reflected in the annual figures for the Territories and this affects their comparability over time. (c) Without interstate duplication see below.

Minus sign (—) denotes decrease.

In the preceding table, under the heading 'Number of separate unions', a union reporting members in a State or Territory is counted as one union within that State or Territory. The figures do not add to the Australian total (shown in the last line) because a union represented in more than one State or Territory is included in the figure for each State or Territory in which it is represented, but is counted only once in the Australian total.

A table showing the number and membership of trade unions in Australia for the years 1912 to 1967 is included in Appendix XIV to *Labour Report* No. 53.

The following table shows the number of unions and members thereof in Australia at the end of each of the years 1967 to 1969 classified according to industry group. The table does not supply a precise classification of trade unions and their members by industry, because where the members of a union are employed in a number of industries they have been classified to the predominant industry for the union concerned. Comparability between years of membership figures for an industry group may be affected by amalgamation of trade unions classified to different industry groups.

**TRADE UNIONS: INDUSTRY GROUPS, AUSTRALIA, DECEMBER 1967 TO 1969**

Industry group	1967		1968		1969

(a) Without interstate duplication. See text above. (b) Includes communication, municipal, etc. (c) Includes community and business services.

*Number of trade union members and proportion of wage and salary earners.* The following table shows the approximate percentages of wage and salary earners in employment who are members of trade unions. The estimates of total wage and salary earners have been obtained by adding the number of employees in agriculture and in private domestic service recorded at the June 1966 population census to the estimates of employees in all other industries at the end of each year. For this reason, and also because the membership of trade unions includes some persons not in employment, the percentages shown in the table are approximations. In comparing the percentages shown in this table with those shown in the previous issues of the Year Book, allowance should be made for the fact that the present estimates are based on a new series of employment estimates as from June 1966 see chapter 21, Employment and Unemployment. The change is of most significance for female employees as the new employment estimates include a considerable number of part-time employees who had previously been excluded.

**TRADE UNIONS: NUMBER OF MEMBERS AND PROPORTION OF TOTAL WAGE AND SALARY EARNERS, AUSTRALIA, 1966 TO 1969**

End of December—	Number of members (‘000)			Proportion of total wage and salary earners(a) (Per cent)		
	Males	Females	Persons	Males	Females	Persons
1966 . . .	1,657.5	466.0	2,123.5	60	37	53
1967 . . .	1,663.7	487.6	2,151.3	59	37	52
1968 . . .	1,691.1	499.5	2,190.7	59	36	51
1969 . . .	1,717.5	521.6	2,239.1	58	36	50

(a) See text above.

*Interstate or federated trade unions.* The following table gives particulars of the number and membership of interstate or federated trade unions in 1969.

**INTERSTATE OR FEDERATED TRADE UNIONS(a): AUSTRALIA, DECEMBER 1969**

	Unions operating in—					Total
	2 States	3 States	4 States	5 States	6 States	
Number of unions . . . . .	10	7	18	23	84	142
„ „ members (‘000) . . . . .	22.5	31.0	130.0	294.8	1,571.9	2,050.2

(a) Certain unions in this group have, in addition to branches in the States, branches in the Northern Territory or the Australian Capital Territory or both.

**Organisations registered under the (Commonwealth) Conciliation and Arbitration Act**

Under Part VIII of the *Conciliation and Arbitration Act* 1904–1969 any association of employers in an industry who have, or any employer who has, employed, on an average taken per month, not less than 100 employees during the six months preceding application for registration, and any association of not less than 100 employees in any industry, may be registered. However, the Public Service Arbitration Act provides that an association of less than 100 employees may be registered as an organisation under the Conciliation and Arbitration Act if its members comprise at least three-fifths of all persons engaged in that industry in the Public Service. Such organisations are included in the following figures. Registered unions include both interstate associations and associations operating within one State only. Registration under Commonwealth legislation began in 1906. At the end of 1969 the number of employers’ organisations registered under the provisions of the Act was 75. The number of unions registered at the end of 1969 was 149, with membership of 1,901,000, representing 84 per cent of the total membership of all trade unions in Australia. Lists of organisations of employees and of employers registered under this Act are contained in the *Industrial Information Bulletin*, Vol. 25, No. 1, January 1970 published by the Department of Labour and National Service.

**Central labour organisations**

*Trades and Labour Councils.* Delegate organisations, usually known as Trades Hall Councils or Labour Councils and consisting of representatives of a number of trade unions, have been established in the capital cities and in a number of other centres in each State. In the centres where these councils

exist most unions or local branches operating in the district are affiliated. The district councils obtain their finance by means of a *per capita* tax on members of affiliated unions. In States other than Western Australia the district councils are generally independent bodies, although provision usually exists in the rules of the central council in the capital city for the organisation of district councils, or for their representation on the central council. Since 1962 in Western Australia separate Trades and Labour Councils, with provincial councils, have been established outside the framework of the Australian Labor Party. At the end of 1963 only the central council (the Trades and Labour Council of Western Australia) was operating, but a number of provincial councils were established from 1964.

The following table shows, for each State and Territory, the number of trades and labour councils and the number of affiliated unions or branches of unions at the end of 1969. The figures for the number of unions do not necessarily represent separate unions, since the branches of a large union may be affiliated with the local trades councils in the several towns in which they are represented.

CENTRAL LABOUR ORGANISATIONS: NUMBER, AND UNIONS AND BRANCH UNIONS AFFILIATED, STATES AND TERRITORIES, DECEMBER 1969

	N.S.W.	Vic.	Qld	S.A.	W.A. (a)	Tas.	N.T.	A.C.T.	Total
Number of councils . . . . .	10	9	13	5	3	2	..	1	43
Number of unions and branch unions affiliated . . . . .	334	279	191	149	136	91	..	19	1,199

(a) See explanation in text above.

As well as trades and labour councils there are councils organised on trade lines and composed of delegates from separate unions whose members' interests are closely connected by reason of their occupations. Delegate councils of bakers, bread carters and mill employees, or of unions connected directly or indirectly with the metal trades, or with the building trades, are examples of such organisations.

*Australian Council of Trade Unions.* A central labour organisation, now called the Australian Council of Trade Unions, came into being during 1927. The Council was created to function on behalf of the trade unions of Australia, and was founded at an All-Australian Trade Union Congress held in Melbourne in May 1927. The A.C.T.U. consists of affiliated unions and approved State Trades and Labour Councils and Provincial Councils. The State Trades and Labour Council in each State is the State Branch of the A.C.T.U. and it has the right to appoint one representative to act on the executive of the Council. In addition to the four A.C.T.U. officers and representatives of the State Branches of the A.C.T.U., seven delegates are elected by and from Congress, one from each, of the following industry groups: Building, Food and distributing services, Manufacturing, Metal Services, Transport, and the A.W.U. group. The President and Secretary are full-time officials and, with the two Vice-Presidents, are elected by and from the Australian Congress of Trade Unions.

The ordinary meetings of Congress are held in alternate years. The 1969 Biennial Congress was held in September 1969, and was attended by 755 delegates from affiliated organisations, States branches of the A.C.T.U., and provincial councils. Special meetings of Congress are held whenever deemed advisable by decision of the executive, as approved by the majority of its branches, or by resolution supported by unions representing one-third of the total membership of the A.C.T.U.

The objectives of the A.C.T.U. are the socialisation of industry, i.e. production, distribution and exchange, and the utilisation of the resources of Australia for the benefit of the people—ensuring full employment, with rising standards of living, real security, and full cultural opportunities for all. The methods to be adopted are: the closer organisation of the workers by the transformation of the Australian trade union movement from the craft to an industrial basis, by grouping of unions in their respective industries and by the establishment of one union in each industry; the consolidation of the Australian labour movement with the object of unified control, administration, and action; the centralised control of industrial disputes, educational propaganda among unions; and political action to secure satisfactory working-class legislation.

The A.C.T.U. was the first interstate body in Australia with authority to deal with industrial matters of an interstate character affecting the trade union movement generally. It is also the body responsible for submitting to the Commonwealth Government the names of persons suitable for selection as the Australian workers' delegate to the annual International Labour Conference.

### International Labour Organisation

The International Labour Organisation (I.L.O.) was established on 11 April 1919 as an autonomous institution associated with the League of Nations. Its original constitution was adopted as Part XIII of the Treaty of Versailles and formed part of other treaties of peace. During the years between its establishment and the outbreak of the 1939-45 War the I.L.O., with headquarters at Geneva, played a leading role in promoting the improvement of labour conditions throughout the world.

In 1940, in order to ensure that the I.L.O. should be able to continue to function freely, a working centre was established at Montreal, Canada. In 1946 the Organisation became the first of the specialised agencies of the United Nations. Under the terms of agreement the United Nations recognises the I.L.O. as a specialised agency having responsibility in the field defined by its constitution, which embraces labour conditions, industrial relations, employment organisations, social security and other aspects of social policy. The Organisation has three basic parts. These are the International Labour Conference, its highest authority, which as a rule meets annually; the Governing Body, its executive council, which usually meets three times each year; and the International Labour Office, which provides the secretariat of the Organisation. The Conference is composed of delegations from the Member States of the Organisation. At the end of 1969 there were 118 Member States, each of which is entitled to be represented by four delegates—two government, one representing employers and one representing workers together with their advisers. Each delegate speaks and votes independently, so that all points of view in each country are fully expressed. The Governing Body consists of the representatives of twenty-four governments and twelve employers' and twelve workers' representatives. Of the twenty-four government representatives, ten are from the ten countries of major industrial importance and fourteen are elected by the remaining governments. These latter fourteen government representatives and the twelve employers' and twelve workers' titular delegates and the deputy members of the three groups are elected by their groups at the Conference every three years. Particulars are given in *Labour Report* No. 53 of the proceedings of International Labour Conferences up to the 51st Session, held in Geneva in June 1967. For details of I.L.O. conventions ratified by Australia, see *Labour Report* No. 53, pages 213-14.

## CHAPTER 11

# OVERSEAS TRANSACTIONS

This chapter includes statistics of overseas trade, balance of payments, and overseas investment by private investors, but because of limitations of space the statistics are, in the main, restricted to summarised form. For detailed information see the *Annual Bulletin of Overseas Investment, Australia*; and the other annual bulletins *Overseas Trade* (preliminary and final), *Australian Exports*, *Australian Imports*, *Imports Cleared for Home Consumption* issued in six parts as from 1968–69 and incorporating Tariff descriptions; and the half-yearly bulletin *Balance of Payments*. Preliminary information is available in summary form in the statements *Balance of Payments—Quarterly Summary*, *Overseas Investment—Preliminary Bulletin* (annual), *Australian Overseas Trade—Exports and Imports* (monthly), *Overseas Trade—Exports by Commodity Divisions* (monthly), and *Overseas Trade—Imports by Commodity Divisions* (monthly). Current information is included in the *Quarterly Summary of Australian Statistics*, the *Monthly Review of Business Statistics*, the *Digest of Current Economic Statistics*, and in more detail in the *Monthly Bulletin of Overseas Trade Statistics*. There are also the following additional mimeographed statements: *Exports of Principal Products of Australian Origin* (monthly), *Imports of Assembled New Motor Cars* (monthly), *Overseas Trade with Major Groups of Countries* (quarterly), *Highlights of Overseas Trade* (quarterly), and *Trade of Australia with Eastern Countries* (annually). Additional unpublished details of exports and imports can be supplied on request.

A subscription service is available from this Bureau to provide for the detailed requirements of individual users of overseas trade statistics. These special periodical returns are obtainable monthly or quarterly and show trade according to items of the Australian Export and Import Commodity Classifications or statistical key code dissections of Australian Customs Tariff items. A nominal charge is made which varies depending on the amount of detail required.

## OVERSEAS TRADE

### Constitutional provisions and legislation

#### Constitutional provisions

By the Commonwealth of Australia Constitution Act, section 51 (1), the power to make laws with respect to trade and commerce with other countries was conferred on the Commonwealth Parliament. Under section 86 of the Constitution, the collection and control of duties of customs and excise passed to the Executive Government of the Commonwealth on 1 January 1901. Other references to trade and commerce are contained in sections 87 to 95 of the Constitution (see pages 17–18).

#### Commonwealth legislation

Commonwealth legislation affecting overseas trade includes: the Customs Act, the Customs Tariff and the Customs Tariff (Dumping and Subsidies) Act. The Customs Act is the administrative Act under which the Department of Customs and Excise operates. The Customs Tariff provides the statutory authority for imposing the actual rates of duty operative from time to time, while the Customs Tariff (Dumping and Subsidies) Act provides protection for Australian industry against various forms of unfair trading.

#### The Customs Tariff

The first Commonwealth Customs Tariff was introduced by Resolution on 8 October 1901, from which date uniform duties came into effect throughout Australia. The Australian Customs Tariff has been developed in conformity with the policy of protecting economic and efficient Australian industries and of granting preferential treatment to certain imports from countries of the Commonwealth, and certain developing countries. Duties are imposed on some goods, generally of a luxury nature, for revenue purposes. Customs collections are a major source of revenue, but in its protective character the tariff has an important influence on the Australian economy.

The present tariff provides for general and preferential rates of duty, and its structure is based on the 'Brussels Nomenclature' which has its origins in the Convention on Nomenclature for the Classification of Goods in Customs Tariffs, signed in Brussels on 15 December 1950. Australian has operated a 'Brussels-type' tariff since 1 July 1965.

*Preferential rates.* Preferential rates apply to goods the produce or manufacture of the United Kingdom, Ireland, Canada, New Zealand, Papua, and New Guinea, and certain goods the produce or manufacture of specified countries, provided that such goods comply with the laws in force at the time affecting the grant of preference.

The following are the rules of origin for preference purposes.

'151.—(1.) For the purposes of this Act and the *Customs Tariff 1966–1968* (other than section twenty of the last-mentioned Act), goods shall be treated as the produce of a country if they are unmanufactured raw products of the country.

(2.) For the purposes of this Act and the *Customs Tariff 1966–1968* (other than section twenty or a direction under section thirty-three "c" of the last-mentioned Act), goods shall be treated as the manufacture of a country—

- (a) if the goods were wholly manufactured in the country from materials of one or more of the following classes:
- (i) unmanufactured raw products;
  - (ii) materials wholly manufactured in the country or in Australia, or in the country and in Australia; and
  - (iii) imported materials that the Minister has, in relation to the country, determined, by notice published in the *Gazette*, to be manufactured raw materials; or
- (b) if the goods were partly manufactured in the country, the process last performed in the manufacture of the goods was performed in the country and—
- (i) not less than three-quarters, or, in a case where the country is New Zealand, one-half, of the factory or works cost of the goods is represented by the value of labour or materials, or of labour and materials, of the country or of the country and Australia;
  - (ii) in a case where the goods are goods of a class or kind not commercially manufactured in Australia, not less than one-quarter of the factory or works cost of the goods is represented by the value of labour or materials, or of labour and materials, of the country or of the country and Australia; or
  - (iii) in a case where the country is New Zealand, not less than three-quarters of the factory or works cost of the goods is represented by the value of labour or materials, or of labour and materials, of New Zealand and the United Kingdom or of New Zealand, Australia and the United Kingdom.

(3.) For the purposes of a direction under section thirty-three "c" of the *Customs Tariff 1966–1968* goods shall be treated as the manufacture of a country if—

- (a) the process last performed in the manufacture of the goods was performed in the country; and
- (b) not less than one-half of the factory or works cost of the goods is represented by the value of labour or materials, or of labour and materials, of the country or of the country and one or more of the following countries, that is to say, Australia and countries that, at the time the goods are entered for home consumption, are less developed countries, other than a country that, by virtue of a direction under sub-section (2) of section eleven of the *Customs Tariff 1966–1968* is not to be treated as a less developed country in relation to the class of goods in which the goods are included.

'151A.—(1.) For the purposes of this Act and the *Customs Tariff 1966–1968* (other than section twenty or a direction under section thirty-three "c" of the last-mentioned Act), goods shall not be treated as the produce or manufacture of the United Kingdom, Canada, New Zealand, Ireland, Malawi, Southern Rhodesia, Zambia, the Territory of Papua or the Territory of New Guinea unless they have been shipped from that country to Australia and, except where the Collector is satisfied that the intended destination of the goods when originally shipped from that country was Australia, have not been transhipped.

(2.) The last preceding sub-section does not apply—

- (a) to goods the produce or manufacture of a country other than New Zealand that are imported into Australia from New Zealand; or
- (b) to goods the produce or manufacture of a country other than the Territory of Papua or the Territory of New Guinea that are imported into Australia from the Territory of Papua or the Territory of New Guinea.

(3.) For the purposes of a direction under section thirty-three “c” of the *Customs Tariff 1966-1968*, goods shall not be treated as the produce or manufacture of a country unless they have been shipped from that country to Australia and, except where the collector is satisfied that the intended destination of the goods when originally shipped from that country was Australia, have not been transhipped.

(4.) For the purposes of this section—

- (a) goods may be treated as having been shipped from the Territory of Papua or the Territory of New Guinea if they have been shipped from either of those territories; and
- (b) goods may be treated as having been shipped from Malawi, Southern Rhodesia or Zambia if they have been shipped from any of those countries or from Lourenco Marques or Beira in Mozambique’.

*Declared preference countries.* 10.—(1.) The Minister may, by order published in the *Gazette*, declare that a country specified in the order is a declared preference country for the purposes of this Act.

(2.) An order under the last preceding sub-section has effect, or shall be deemed to have had effect, from and including such date (which may be a date earlier than the date of publication of the order in the *Gazette*) as is specified in the order.

(3.) The Minister may, by order published in the *Gazette*, revoke an order under sub-section (1.) of this section.

(4.) An order under the last preceding sub-section has effect from and including such date (which shall not be a date earlier than the date of publication of the order in the *Gazette*) as is specified in the order.

(5.) Goods shall not be treated as the produce or manufacture of a declared preference country for the purposes of this Act unless, at the time the goods are entered for home consumption, the order under sub-section (1.) of this section in which the declared preference country is specified has effect or is deemed to have had effect.

Declared preference countries comprise:

Bahama Islands	Ghana	Republic of Cyprus
Barbados	Gibraltar	Republic of Singapore
Bermuda	Gilbert and Ellice Islands	St Helena and Ascension
British Honduras	Colony	Seychelles and Dependencies
British Solomon Islands Protectorate	Guyana	Sierra Leone
Brunei	Hong Kong	Tanzania
Ceylon	Jamaica and Dependencies	Tonga
Falkland Islands and Dependencies	Kenya	Trinidad and Tobago
Federation of Malaysia	Leeward Islands	Uganda
Fiji	Maldive Islands	Virgin Islands of the United Kingdom
Gambia	Malta	Windward Islands
	Mauritius and Dependencies	
	Nigeria	

*General rates.* General rates apply to goods from all countries which do not qualify for preferential rates of duty under a particular tariff classification.

*By-law provisions.* Customs By-laws and Ministerial Determinations are instruments made by the Minister for Customs and Excise under the authority of sections 271 to 273D of the Customs Act by which goods may be admitted free of duty or at rates of duty lower than those normally applicable. By-laws and determinations may only be made under a by-law classification, which is a tariff classification containing the words ‘as prescribed by by-law’. Such a classification sets out the by-law duty rates which will apply to goods only when such goods are included in a by-law or determination made under that classification. A prerequisite for by-law admission is that suitably equivalent goods be not reasonably available from Australian production. A by-law covers goods by general description with no limit on quantity and may be used by any importer of the goods. A determination generally covers a specific quantity of particular goods and may be used only by the importer mentioned in the determination.

*Primage duties.* In addition to the ordinary duties of customs imposed by the Customs Tariff, *ad valorem* primage duties at rates of five per cent or ten per cent are charged on some goods according to the types of goods and origin thereof. Other goods are exempt from primage duty. Goods the produce or manufacture of New Zealand, Norfolk Island, Fiji, Cocos (Keeling) Islands, Christmas Island, Papua, and New Guinea are exempt from primage duty.

*Anti-dumping duties.* The *Customs Tariff (Dumping and Subsidies) Act 1961–1965* provides protection for Australian industry against various forms of unfair trading. Under this Act dumping duty may be imposed on goods that are sold to Australian importers at a price which is less than the normal value of the goods, where this causes or threatens material injury to an Australian industry. 'Normal value' under the Act means:

- (a) fair market value in the country of export;
- (b) price in the country of export to a third country;
- (c) fair market value in a third country; or
- (d) cost of production, plus f.o.b. charges, plus selling costs and profit.

The amount of dumping duty is the difference between the normal value and f.o.b. export price.

Countervailing duty may be levied on goods in respect of which any subsidy, bounty, reduction or remission of freight, or other financial assistance has been, or is being, paid or granted directly or indirectly upon the production, manufacture, carriage or export of those goods. The amount of the countervailing duty in respect of any goods is a sum equal to the amount of the subsidy, bounty, reduction or remission of freight or other financial assistance.

#### **Import controls—Customs (Import Licensing) Regulations**

A comprehensive system of import licensing was introduced in Australia at the beginning of the second World War under the authority of the Customs (Import Licensing) Regulations. Following the gradual relaxation of the restrictions from the end of the War, import licensing was reimposed on 8 March 1952 and continued in force until 18 October 1962. From that date restrictions were removed from all commodities with the exception of some goods retained under control for reasons associated with the protection of Australian industry. Further information on import controls is given in Year Book No. 51, page 492.

#### **Export controls and incentives**

*Export restrictions.* Section 112 of the Customs Act provides that the Governor-General may, by regulation, prohibit the exportation of goods from Australia and that this power may be exercised by: (a) prohibiting the exportation of goods absolutely; (b) prohibiting the exportation of goods to a specified place; and (c) prohibiting the exportation of goods unless prescribed conditions or restrictions are complied with. Goods subject to this export control are listed in the Customs (Prohibited Exports) Regulations.

*Exchange control—Banking Act 1959–1967.* As an integral part of the framework of exchange control, a control over goods exported from Australia is maintained under the provisions of Part III of the Banking (Foreign Exchange) Regulations, to ensure that the full proceeds of such goods are received into the Australian banking system and that these proceeds are received in the currency and in the manner prescribed by the Reserve Bank of Australia. This action is complementary to that taken under other parts of the Banking (Foreign Exchange) Regulations and under Part IV of the Banking Act to control the movement out of Australia of capital in the form of securities, currency and gold.

Export licences are issued subject to terms and conditions specified in the Banking (Foreign Exchange) Regulations, and may be subject to such further terms and conditions as are determined, or may be free from terms and conditions. On the receipt in Australia by the Reserve Bank, or by a bank acting as agent for that Bank, of advice that the foreign currency has been paid to the Reserve Bank or to an agent of the Bank in payment for goods exported in accordance with a licence granted under the regulations, the Bank, or an agent of the Bank, pays the licensee, or such other person as is entitled to receive it, an amount in Australian currency equivalent to the foreign currency received. In addition to commercial transactions involving exports, movements of personal effects are also controlled. Persons leaving Australia for overseas are required to obtain licences to cover their bona fide baggage, personal effects and household effects in any individual case where the gold content thereof exceeds \$1,000, or where jewellery and other articles of high intrinsic worth either exceed \$10,000 in value and those goods have not been the personal property of the passenger for at least twelve months.

*Export incentives.* The Commonwealth Government provides taxation concessions as financial incentives to export. A special income tax allowance for export market development expenditure is designed to encourage firms to incur promotion expenditure in advance of export sales and to assist exporters and potential exporters to expand sales in the existing markets and to enter new overseas markets. The allowance is in the form of a special deduction equal and additional to the ordinary deduction allowable in respect of specified expenses allowable in determining taxable income. Rebates of pay-roll tax are also granted to employers whose export sales of goods or property rights have increased above their average annual level in a base period. The rebate is available in the first place to employers who are producers for export, but a producer for export may issue an export certificate to an employer who has supplied components embodied in the final product.

#### Trade descriptions

*The Commerce (Trade Descriptions) Act 1905–1966* gives power to require the application of a proper trade description to certain prescribed goods imported into or exported from Australia. Goods which must bear a prescribed trade description upon importation into Australia are specified in the Commerce (Imports) Regulations. As regards exports from Australia, marking requirements are prescribed in regulations issued under the Act and relating to specified export commodities.

### Government authorities

#### Tariff Board

*The Tariff Board Act 1921–1966* provides for the appointment of a Tariff Board consisting of eight members. Of these, two must, and three may, be members of the Commonwealth Public Service at the time of their appointment (or first appointments in the case of re-appointments). Members of the Board are appointed for terms of not less than one year and not more than five years. The purpose of the Tariff Board is to advise the Government on matters relating to the protection and encouragement of Australian industry.

The Minister of State for Trade and Industry is required to refer to the Board for inquiry and report the following matters; the necessity for new, increased, or reduced duties; the necessity for granting bounties and the effect of existing bounties; and any complaint that a manufacturer is taking undue advantage of the protection afforded him by the Tariff or by the restriction of the importation of any goods by charging unnecessarily high prices for his goods or acting in restraint of trade. In addition, the Minister may refer the following matters to the Tariff Board for inquiry and report: the general effect of the working of the Customs Tariff and the Excise Tariff; the fiscal and industrial effects of the Customs laws on the Commonwealth; the incidence between the rates of duty on raw materials and on finished or partly finished products; and other matters affecting the encouragement of primary and secondary industries in relation to the Tariff. The Minister of State for Customs and Excise may refer to the Tariff Board for inquiry and report the following matters: the classification of goods in the Customs Tariff or Excise Tariff and matters in connection with the interpretation of these Tariffs; the question of the value for duty of goods; whether goods not prescribed in departmental by-laws should be so prescribed; and any matters in respect of which action may be taken under the *Customs Tariff (Dumping and Subsidies) Act 1961–1965*.

Where a matter of the necessity for new or increased duties on any goods has been referred to the Board for inquiry and report, the Board may, in its report, recommend the restriction of the importation of those goods for such period as is specified in the report.

Inquiries conducted by the Board relating to a revision of the Tariff, a proposal for a bounty, a question under the Customs Tariff (Dumping and Subsidies) Act, or any complaint that a manufacturer is taking undue advantage of the protection afforded him by the Tariff or by the restriction of the importation of any goods, are held in public, and evidence in such inquiries is taken in public on oath, unless the Board accepts evidence as confidential or in the form of a written statement by a witness on oath. The Board is required to make available to the public the contents of any such written statement except any matter which it accepts as confidential.

#### Special Advisory Authority

The Minister for Trade and Industry may also request a Special Advisory Authority to inquire into cases where urgent action appears necessary to protect an Australian industry against import competition pending receipt and consideration of a full report by the Tariff Board. The Special Advisory Authority's report must be submitted to the Minister within thirty days of the making of the request. Temporary protection recommended by a Special Advisory Authority may be imposed, but may only operate for a period of up to three months after the date of receipt of the final report by the Tariff Board on the goods concerned.

## Trade agreements

### Multilateral—General Agreement on Tariffs and Trade

The General Agreement on Tariffs and Trade (G.A.T.T.), which came into force on 1 January 1948, is a multilateral trade treaty designed to facilitate trading relations between participating countries by reducing tariff and other barriers to the free interchange of goods. The Agreement provides a framework within which negotiations can be held to reduce barriers to trade, and a structure for embodying the results of such negotiations in a legal instrument. Features of the Agreement are the schedules of tariff concessions participating countries have negotiated with each other, the application of most-favoured-nation treatment among the participants, the avoidance of trade discrimination, and a code of agreed commercial policy rules for international trading. Each participating country retains the right (a) to impose new or increased duties for protective purposes, except in respect of particular products where rates of duty have been bound against increase in negotiations under the Agreement; (b) by negotiation to modify or withdraw concessions formerly agreed; (c) to impose import restrictions to protect the balance of payments; (d) to take emergency action where any industry is endangered by reason of any obligation incurred under the Agreement.

There have been six main tariff negotiations under the provisions of the Agreement, and a number of smaller scale negotiations preceding the accession of individual countries. As a result the tariff rates for a great many items entering into world commerce have been reduced and or bound against increase. Australia has obtained tariff concessions from individual countries on a number of her principal or potential exports to them, as a result both of direct negotiation by Australia and of negotiation by other countries. In the latter case the benefits occurred through the operation under the Agreement of the most-favoured-nation principle. The latest series of trade negotiations, the Kennedy Round, was based on a plan for linear tariff cuts by industrial countries on all industrial products, with a minimum of exceptions, and on the reduction of non-tariff barriers to trade and the creation of acceptable conditions of access to world markets for agricultural products. It concluded in June 1967 after three years of negotiations. Concessions were negotiated on trade valued at over \$36,000 million. The average reductions in tariffs on industrial goods was roughly one-third, while in agriculture the most important item was the agreement reached on the basis for a new world grains arrangement. Overall results were substantial, but were unevenly spread in that efforts to reduce trade barriers were very much more successful for manufacturers than for primary products. In the post-Kennedy Round period, therefore, Australia is placing particular emphasis on the work of the Committee on Agriculture, created in November 1967, to examine the problems in the agricultural sector.

Up to the end of 1969 the contracting parties had held twenty-five sessions, nearly all in Geneva, to deal with matters arising from the administration of the Agreement. As a general rule the contracting parties meet once a year, although in a few instances they have met twice. In 1960 a Council of Representatives was established to undertake work, both of an urgent and of a routine character, between the regular sessions of the contracting parties. Some of the provisions of the Agreement were revised in 1954 and 1955. The revised Agreement contains tighter provisions on non-tariff barriers to trade, and allows more freedom for countries to revise individual tariff items which had been bound against an increase in tariff negotiations under the Agreement.

Since G.A.T.T. has not been accepted definitively by any country except Haiti, the Agreement is at present being applied provisionally pursuant to a Protocol of Provisional Application. At the end of January 1970 seventy-six countries, whose foreign trade represents over eighty per cent of the total volume of world trade, were full contracting parties to the Agreement, two had acceded provisionally, and thirteen applied the Agreement on a *de facto* basis.

Increasing attention has been focused in G.A.T.T. on specific trade and development problems of developing countries, and in February 1965 a new Part IV of G.A.T.T., aimed at helping developing countries solve these problems, was introduced on a *de facto* basis coming legally into force in June 1966. The new Part IV embodies commitments by individual and joint action by contracting parties, aimed at ensuring that the less developing countries can increasingly find the means to raise standards of living and promote rapid economic development through participating in international trade and achieving sustained growth of their export earnings.

As a means of helping to offset the competitive disadvantages faced by the new industries of the developing countries, and of putting these countries in a better position to compete with major industrial countries in the Australian market, Australia formulated in 1965 a system of tariff preferences on a range of manufactured and semi-manufactured products, all of which had been nominated by developing countries as being of export interest to them. It was recognised that Australia's initiative might well give a lead to other countries which might wish to use preferences to assist developing countries, and so lead to a compounding of the benefits to the developing countries.

Before the Australian system could be introduced, it was necessary to obtain a waiver from the G.A.T.T. 'no-new-preference' provisions. Such a waiver was granted at the end of March 1966 and the first preferences for developing countries became effective in April 1966. The Australian system has been extended in scope from time to time and is successfully stimulating imports of the products concerned from developing countries. Features of the system are that it is non-reciprocal (in that Australia seeks nothing in return), that it contains safeguards for Australian industries and for the interests of third countries, and that it is subject to international supervision through the G.A.T.T.

#### **Bilateral agreements**

*United Kingdom.* The original United Kingdom and Australia Trade Agreement (Ottawa Agreement) was signed on 20 August 1932. The provisions and history of the agreement were published in Year Book No. 43, page 329. A new Trade Agreement designed to replace the original agreement and correct the imbalance in benefits which had emerged in the twenty-five years of its operation came into effect on 9 November 1956. Briefly, this agreement preserves security for Australian exports in the United Kingdom market, but lowers the obligatory margins of preference which Australia extends to the United Kingdom. The agreement provides for re-negotiation after the initial five-year period, but by arrangement between the two Governments this re-negotiation has been postponed. In the meantime the agreement continues subject to six months notice of termination by either country. Further details of the 1956 Agreement may be obtained from Year Book No. 51, page 495.

*Canada.* The existing agreement between Australia and Canada came into force on 30 June 1960, replacing an agreement signed on 3 August 1931. The agreement provides for Australian goods to receive British Preferential Tariff rates, or better, upon entry into Canada, and for Canada to maintain margins of preference in favour of Australia on a range of commodities. The agreement specifies that Canadian goods, with some exceptions, shall receive the benefit of the British Preferential Tariff upon importation into Australia and that Australia shall maintain margins of preference in favour of Canada on a range of commodities. The agreement continues subject to six months notice.

*New Zealand.* The New Zealand-Australia Free Trade Agreement came into force on 1 January 1966. The agreement provides for free trade in certain scheduled goods. Provision is made for the addition of items to the schedule. The provision of the 1933 Trade Agreement between Australia and New Zealand continues in force as part of the Free Trade Agreement, except as superseded or modified by it.

*Rhodesia.* A trade agreement was negotiated with the Federation of Rhodesia and Nyasaland in June 1955. This agreement consisted mainly of an exchange of preferential tariff treatment over a range of items. The Federation was dissolved on 31 December 1963, but application of the Agreement was continued on a provisional basis between Australia and each of the three constituent territories Zambia (Northern Rhodesia), Rhodesia (Southern Rhodesia) and Malawi (Nyasaland). Zambia terminated the Trade Agreement with Australia on 30 June 1966 and the Agreement between Malawi and Australia lapsed on 1 January 1967. Following the unilateral declaration of independence by the Rhodesian Government in November 1965 tariff preferences between Australia and Rhodesia were suspended by both countries. Hence the trade agreement between Australia and Rhodesia is inoperative at the present time.

*Malaysia.* A trade agreement with the then Federation of Malaya became effective in August 1958. Under the agreement Malaya undertook to protect Australian wheat and flour from dumped or subsidised competition and to extend to Australia any tariff preferences it accords. Australia guaranteed free entry for natural rubber so long as the Papua-New Guinea crop was absorbed, and assured the Federation that natural rubber would not be at a disadvantage compared with synthetic rubber in respect of tariff or import licensing treatment. The Agreement continues to apply between Australia and that portion of Malaysia known previously as the Federation of Malaya.

*Japan.* An Agreement on Commerce between the Commonwealth of Australia and Japan was signed on 6 July 1957, and formally ratified on 4 December 1957. It was provided that the Agreement would remain in force until 5 July 1960, and thereafter unless prior notice of termination should be given by either Government. The agreement provides that each country shall extend most-favoured-nation treatment to the other in respect of customs duties and similar charges, and import and export licensing. Japan is not entitled to claim the benefit of preferences accorded by Australia to Commonwealth countries and dependent territories. Japan also gave certain specific commitments on some important Australian export commodities.

Following a review of the agreement, a Protocol of Amendment was signed on 5 August 1963 and formally ratified on 27 May 1964. Under the Protocol Australia agreed to withdraw action against Japan under Article XXXV of the General Agreement on Tariffs and Trade, and thus a full G.A.T.T. relationship was established between the two countries.

The specific undertakings agreed in 1957 have now lapsed and the following commitments have been entered into.

Japan has:

- (a) undertaken not to accord less favourable import treatment (apart from tariff) for raw wool than for raw cotton,
- (b) stated that it has no present intention of imposing a duty on wool,
- (c) undertaken to continue imports of Australian soft wheat at a stabilised level, and to purchase Australian hard wheat when necessary requirements are met,\*
- (d) stated that it will endeavour to expand opportunities for imports into Japan of Australian sugar, canned meat, leather, motor vehicles, butter, and cheese.

Australia has:

- (a) undertaken to consult Japan on temporary protection cases affecting Japanese products (in such consultations Japan will consider whether the need for temporary protection can be obviated by measures taken in Japan),
- (b) stated that equal opportunities of fair and equal competition are accorded to Japanese products in Australian Government purchases overseas.

The new agreement will be effective for three years from the date of ratification and thereafter subject to three months' notice of termination by either Government. There is provision for consultations to take place at least annually.

*Indonesia.* This agreement came into operation on 1 July 1959. It records the desirability of expanding trade between Australia and Indonesia. It also gives special recognition to the importance of the flour trade from Australia to Indonesia. Australia recognises the importance to Indonesia of its traditional exports to Australia. The agreement is subject to review and renewal annually.

*Philippines.* A trade agreement with the Philippines was signed in Manila on 16 June 1965. The agreement provides for an exchange of non-discriminatory treatment† while recognising existing preferences. The agreement is to operate for one year initially and continue thereafter unless one Government gives ninety days' notice of its intention to terminate it. The Philippines is not a member of G.A.T.T.

*U.S.S.R.* A trade agreement between Australia and the U.S.S.R. was signed in Moscow on 15 October 1965. The agreement provides for the exchange of non-discriminatory treatment between the two countries, while recognising existing preferences. It operates initially for a period of four years. There is provision for consultation on request about any matter affecting the operation of the agreement.

*Korea.* On 21 September 1965 a trade agreement was signed in Seoul between Australia and South Korea. Basically the agreement provides for an exchange of non-discriminatory treatment with allowances for existing preferences. The agreement, to run for one year with provision for automatic extension, also provides for non-discrimination by State trading enterprises. Both Governments undertake to use their best endeavours to increase the volume of trade between the two countries.

*Poland.* A trade agreement between Australia and Poland was signed in Warsaw on 20 June 1966. The agreement provides for the exchange of non-discriminatory treatment between the two countries, while recognising existing preferences. It operates initially for a period of four years. There is provision for consultation on request about any matter affecting the operation of the agreement.

*Bulgaria.* A trade agreement between Australia and Bulgaria was signed in Sofia on 22 June 1966. The agreement provides for the exchange of non-discriminatory treatment between the two countries, while recognising existing preferences. It operates initially for a period of four years. There is provision for consultation on request about any matter affecting the operation of the agreement.

*Romania.* A trade agreement between Australia and Romania was signed in Bucharest on 18 May 1967. The agreement provides for the exchange of non-discriminatory treatment between the two countries, while recognising existing preferences. It operates initially for a period of four years. There is provision for consultation on request about any matter affecting the operation of the agreement.

---

\* 'Soft' wheat is fair average quality wheat; 'hard' wheat is premium grade wheat similar to that grown in North America. † An agreement, with reservations, not to discriminate against each other with tariff or non-tariff barriers.

*Hungary.* A trade agreement between Australia and Hungary was signed in Budapest on 5 December 1967. The agreement provides for the exchange of non-discriminatory treatment between the two countries, while recognising existing preferences. It operates initially for a period of four years. There is provision for consultation on request about any matter affecting the operation of the agreement.

*Republic of China (Taiwan).* On 22 April 1968 a trade agreement was signed in Canberra between Australia and the Republic of China. The agreement provides for an exchange of non-discriminatory treatment while recognising existing preferences. The agreement operated for one year initially and continues thereafter unless one government gives ninety days notice of its intention to terminate it. The Republic of China is not a member of the G.A.T.T.

## Trade services

### Trade Commissioner Service

The stimulation of interest abroad in Australia's exports is an important government activity in which the Australian Trade Commissioner Service plays a prominent part. A brief account of the establishment and growth of the Trade Commissioner Service before the Second World War is available in Year Book No. 51, page 496. Since the War the service has increased steadily, and by early 1970 there were over 131 Trade Commissioners and Assistant Trade Commissioners in forty-six posts in thirty-five countries. In 1957 Australia's official commercial representation overseas was extended by the introduction of a system of Government Trade Correspondents. These correspondents who as a rule already reside in particular centres overseas, are engaged on a part-time basis to carry out market research, arrange introductions between buyer and seller, and generally promote Australia's trade interests in the same way as Trade Commissioners. Each Trade Correspondent operates under the general direction of a Trade Commissioner nearby.

Trade Commissioners and, to a lesser extent, Trade Correspondents, are responsible for commercial intelligence in their territories. Particular facilities provided for Australian exporters and export organisations include: surveys of market prospects; advice on selling and advertising methods; arranging introductions with buyers and agents; providing reports on the standing of overseas firms; advice and assistance to business visitors; helping to organise and carry through trade missions, trade displays, newspaper supplements, and other promotion and publicity media; providing information on import duties, import licensing, economic conditions, quarantine and sanitary requirements, and other factors affecting the entry and sale of goods; helping to attract desirable investment.

In some countries Trade Commissioners also participate in inter-governmental negotiations in the economic and commercial fields. In certain countries where there is no diplomatic or consular mission Trade Commissioners are called upon to act as the Australian representative.

Trade Commissioners and Assistant Trade Commissioners are drawn from either private enterprise or the public service, and applications for entry into the Service are invited periodically by public advertisement. Recruitment is generally at the Assistant Trade Commissioner level and persons selected are promoted to Trade Commissioner as experience and performance warrant. In the majority posts the Trade Commissioner is supported by an Assistant Trade Commissioner.

The Trade Commissioner Service is administered by the Commonwealth Department of Trade and Industry (as distinct from the diplomatic and consular services administered by the Department of External Affairs), but in countries where there is an Australian diplomatic or consular mission it is the practice for Trade Commissioners to be attached to the mission and to hold an appropriate diplomatic or consular rank (Commercial Counsellor, Commercial Secretary or Commercial Attache).

The overseas trade representation is shown in the chapter International Relations.

### Trade Missions

Since 1954 the Australian Government has sent a number of trade missions abroad as part of the campaign to increase exports. The experience acquired has indicated the need for flexibility in techniques to suit particular products or markets. At present the following types of trade missions are in use.

*Survey missions.* These are organised to obtain precise knowledge about the export trade potential for specific products in an overseas market. Such methods are used to explore export prospects in new or developing areas where commercial intelligence is not readily available or where a complex industry is involved and the industry requires special export knowledge.

*Specialised and general trade missions.* Arrangements are made for specific industries or groups of firms representing a number of industries to participate in a planned selling campaign in overseas markets with known sales potential. The mission visits the market, publicises its products and negotiates sales.

Up to the end of 1969 Australia has sent overseas forty-five trade and survey missions and five trade ships.

Further details on trade missions are included in Year Book No. 49, page 544.

### **Export Payments Insurance Corporation**

The Export Payments Insurance Corporation was established by the Commonwealth Government in 1956 with the objective of encouraging exports by providing insurance against risks of non payment of overseas accounts. The Corporation is charged to be self-supporting, i.e. over a period its income should be adequate to cover the expenses of operation and any payments of claims which may be incurred.

The main risks of loss against which the Corporation insures are the 'commercial' risks of the insolvency or protracted default of the buyer and 'political' risks. The latter include exchange transfer difficulties; the imposition of government regulations which prevent the import of the goods into the buyer's country; war, revolution or civil disturbance in the buyer's country. For most 'political' risks insurance cover is available to a maximum of 90 per cent of the amount of loss in the pre-shipment period and a maximum of 95 per cent in the post-shipment period. The rate of cover for 'commercial' risks is fixed at 85 per cent.

The Corporation may submit to the Government, for consideration in the national interest, applications for payment insurance which are commercially unacceptable to the Corporation. In considering such applications the Government takes account of both political and economic factors.

An amendment to the *Export Payment Insurance Corporation Act* 1956 in November 1964 gave E.P.I.C. the authority to issue guarantees of payment to banks on money raised at banks for the purpose of financing exports. The existence of E.P.I.C. bank guarantees has facilitated the raising of finance by exporters.

In addition to providing the above facilities, the Corporation insures, on behalf of the Commonwealth Government, eligible Australian investments in overseas countries against the main non-commercial risks associated with investing overseas, e.g. expropriation, exchange transfer difficulties, and war damage. For an investment to be eligible it must confer benefits on both Australia and the investment host country. As at 31 December 1969, 50 policies had been written for 17 investments mainly in south-east Asia. The face value of these policies was \$21 million.

Since the first policy was issued in September 1957, Australian exporters have made increasing use of the facilities of E.P.I.C. At 31 December 1969 the Corporation had 763 policies current on its commercial account (i.e. not including Government business) with a face value of over \$320 million. The Corporation has issued policies covering exports to 146 countries and has insured a wide range of Australian exports.

A Consultative Council, composed of eight leading figures in the fields of banking, commerce, and industry, and two Government members advises the Corporation on its activities. The council meets two or three times a year and is appointed for a term of three years.

Further information on the Corporation is contained in Year Book No. 49, page 544. For particulars of its operations see Chapter 17, Private Finance of this Year Book.

### **Collection and presentation of statistics**

#### **Basic documents**

Overseas trade statistics are compiled by the Commonwealth Bureau of Census and Statistics from copies of export and import entries submitted by exporters and importers or their agents to the Department of Customs and Excise as required by the Customs Act. The entries show the port of shipment and country of consignment for exports, and port of entry and country of origin for imports, the date, the description, quantity where required, the value (f.o.b.) of the goods, and for imports, the amount of duty paid thereon. The export statistical item is inserted by the exporter or his agent; the importer or his agent is required to insert the Tariff item number under which the goods are admitted and the statistical key code. These are verified by officers of the Department of Customs and Excise in the local offices of the Collectors and Sub-collectors of Customs.

### Scope of the statistics

Overseas trade statistics are not confined to goods which are the subject of a commercial transaction and all goods moving into or out of Australia are recorded, except for those exclusions listed below. Among the items included are:

- (a) Exports and imports on government account including defence equipment.
- (b) Outside packages (containers, crates, etc.). These are included as a separate item in the tabulation of imports, but in exports the value recorded for each item includes the value of the outside package.

### Exclusions

- (a) Direct transit trade, i.e. goods being transhipped or moved through Australia for purposes of transport only.
- (b) Bunkers and stores supplied to vessels and aircraft. (However, a separate 'Ships' Stores' collection is made and details are shown on page 321.)
- (c) Those migrants' and passengers' effects for which a customs entry is not received.
- (d) Those parcel post exports and imports of small value for which customs entries are not received.
- (e) Certain materials for intergovernmental defence projects for which customs entries are not required.
- (f) The value of ores and concentrates exported and imported includes the value of the gold content and the gold content is therefore not included in exports and imports of gold.
- (g) Vessels and aircraft engaged in the transport of passengers or goods between Australia and other countries.
- (h) Vessels and aircraft purchased for use on overseas routes and any subsequent sales made overseas of such vessels and aircraft.
- (i) Fish and other sea products landed abroad directly from the high seas by Australian vessels.

### Areas applying

The area to which all overseas trade statistics issued by this Bureau apply is the whole of the Commonwealth of Australia, comprising the States of New South Wales, Victoria, Queensland, South Australia, Western Australia, and Tasmania, the Northern Territory and the Australian Capital Territory. Non-contiguous territories under Australian administration are treated as outside countries and trade transactions between Australia and those non-contiguous territories are part of the overseas trade of Australia. Such transactions are shown separately, i.e. the trade of Australia with each particular area is separately recorded and tabulated.

### Period covered by statistics

*Exports and imports* are recorded statistically in the month in which the entries are passed by the Department of Customs and Excise. Normally this is within a few days of loading or discharge of cargo, although delays sometimes occur in the lodging of entries and shipments are at times delayed by abnormal factors affecting sales deliveries for exports and loading of ships. Because of the distances involved entries from outlying ports are terminated on 21st of the month. Exports shipped by container from the terminal ports of Sydney, Melbourne and Fremantle are recorded in the same manner as other exports. Entries at the feeder ports of Brisbane and Adelaide are lodged prior to the movement of containers to terminal ports.

*Year of compilation.* Since July 1914, detailed trade statistics have been compiled for financial years (July to June). Prior to that details were compiled on a calendar year basis.

### Valuation

Commencing with the Bureau publications issued at the close of 1965 values in overseas trade statistics have been expressed in \$A. Prior to this values were expressed in £ (Aust.) except for imports into Australia which, up until 15 November 1947, were recorded in British currency values. Full explanatory notes on the methods of recording import values before and since 15 November 1947 were included in Year Book No. 37, page 396.

All values in overseas trade statistics are determined on a 'free on board (f.o.b.) port of shipment' basis. This means that all charges (in particular the cost of freight and insurance) incurred after the goods have been exported from the port of shipment are excluded. Only transport and service charges incurred, or usually incurred, prior to export are included in the determination of trade values.

The procedure adopted to value exports and imports is as follows.

*Exports.* The recorded value of goods exported includes the cost of containers and outside packages and has been determined, since July 1937, as follows.

- (a) Goods sold to overseas buyers before export are valued at the Australian f.o.b. port of shipment equivalent to the actual price at which the goods were sold.
- (b) Goods shipped on consignment are valued at the Australian f.o.b. port of shipment equivalent to the price paid for similar goods of Australian origin in the principal markets of the country to which they are dispatched for sale.

An account of the bases of valuation in operation prior to July 1937 is given on page 396 of Year Book No. 37.

*Imports.* The recorded value of goods imported is the amount on which duty is payable or would be payable if the duty were *ad valorem*. Value for duty is the f.o.b. port of shipment equivalent of either:

- (a) the actual price paid or to be paid by the Australian importer plus any special deduction (transactions value); or
- (b) 'the current domestic value' of the goods; whichever is the higher.

'Current domestic value' is defined as 'the amount for which the seller of the goods to the purchaser in Australia is selling or would be prepared to sell for cash, at the date of exportation of those goods, the same quantity of identically similar goods to any and every purchaser in the country of export for consumption in that country.'

### Quantity data

Where quantities are shown they are generally, but not invariably, expressed in terms of the normal trade unit. Where 'cental' is used, the unit is equivalent to 100 lb avoirdupois. Quantities are not tabulated in respect of statistical items for which there is no appropriate unit of quantity (for example, a statistical item which covers a number of commodities that cannot be recorded under a uniform unit of quantity).

### Statistical concepts of trade

*Trade systems.* There are two generally accepted systems of recording overseas trade statistics, namely (a) special trade and (b) general trade. The Statistical Office of the United Nations defines the two systems as follows.

'*System of Trade.* Two systems of recording trade are in common use, differing mainly in the way warehoused and re-exported goods are recorded.

(a) *Special Trade.* Special imports are the combined total of imports directly for domestic consumption (including transformation and repair) and withdrawals from bonded warehouses or free zones for domestic consumption. Special exports comprise exports of national merchandise, namely, goods wholly or partly produced or manufactured in the country, together with exports of nationalised goods. (Nationalised goods are goods which, having been included in special imports, are then exported without transformation.)

(b) *General Trade.* General imports are the combined total of imports directly for domestic consumption and imports into bonded warehouse or free zone. General exports are the combined total of national exports and re-exports. Re-exports, in the general trade system, consist of the outward movement of nationalised goods plus goods which, after importation, move outward from bonded warehouse or free zone without having been transformed.

*Direct transit trade,* i.e. goods merely being transhipped or moving through the country for purposes of transport only, is excluded from the statistics of both special and general trade.'

Statistics in this volume are compiled on the 'general trade' basis; imports on a 'special trade' basis are published in the bulletin *Imports Cleared for Home Consumption*, issued annually.

Australian produce (national produce) is defined as goods, materials or articles which have been produced, manufactured or partly manufactured in Australia, except goods which were originally imported and have undergone only repair or minor operations which leave them essentially unchanged.

Re-exports are defined as goods, materials or articles originally imported which are exported either in the same condition in which they were imported, or after undergoing repair or minor operations which leave them essentially unchanged. 'Minor operations' include blending, packaging, bottling, cleaning, sorting, husking, and shelling.

*Merchandise and non-merchandise trade.* Total trade is divided into merchandise and non-merchandise trade. Merchandise trade is the equivalent of total exports and imports less certain items specified as non-merchandise. Since July 1965 merchandise and non-merchandise trade have been defined in accordance with international standards recommended by the United Nations. A complete description of the commodities included is contained in the Australian Export and Import Commodity Classifications published by the Bureau of Census and Statistics.

*Balance of trade.* Statistics of the balance of trade for balance of payments purposes are derived by making certain adjustments, relating both to scope and valuation to statistics of merchandise exports and imports. Statistics on the adjusted basis are published in statistical bulletins relating to the balance of payments. The adjustments include the following: imports are adjusted for the overall excess of recorded value for duty over the actual selling price to the importer; exports and imports of goods for repair and return and the value of repairs are deducted from merchandise trade; exports and imports of ships and aircraft for use on overseas routes, certain imports of defence equipment, and other trade items for which customs entries are not required are added. Adjustments are also made for timing differences between the change of ownership and the lodgment of import entries in the case of certain large items of equipment (e.g. warships).

The balance of trade is derived by comparing statistics of exports on a balance of payments basis with statistics of imports on that basis.

#### **Balance of payments**

Estimates of the balance of trade do not, however, measure Australia's total balance of payments which includes other transactions such as freight and insurance charges on imports, shipping expenditure in Australian ports, overseas travel, payments of profits and interest, and private and government borrowing overseas.

#### **Country of consignment or origin**

'Country of consignment' referred to in exports tables means the country to which goods were consigned at the time of export. Where the country of consignment is not determined at the time of export the goods are recorded as exported 'For orders'. 'Country of origin' referred to in import tables means the country of production. Classification of imports according to country of shipment was discontinued after the year 1920-21. A brief account of the dual system of import classification by country operating prior to the year 1921-22 is given on page 500 of Year Book No. 51.

Throughout this chapter, countries listed are shown in alphabetical order.

#### **Commodity classifications**

Overseas trade statistics were compiled according to the Statistical Classification of Imports and Exports up to and including 1964-65 for imports and 1965-66 for exports. From July 1965 imports have been classified according to the Australian Import Commodity Classification and exports have been classified according to the Australian Export Commodity Classification from July 1966. Both classifications are based on the Standard International Trade Classification, Revised (S.I.T.C.), which is closely related to the Brussels Tariff Nomenclature used in the Australian Customs Tariff introduced in July 1965.

#### **Pre-federation records**

In the years preceding federation each State recorded its trade independently and in so doing did not distinguish other Australian States from external countries. The aggregation of the records of the several States is necessarily the only available means of ascertaining the trade of Australia for comparison with later years, but the results obtained are subject to error, since past records of values and the direction of exports and imports were not on uniform lines. Exports and imports for years prior to federation may be found in early issues of the Year Book, particularly Year Book No. 2. On the introduction of the *Customs Act* 1901 the methods of recording values were made uniform throughout the States.

### **Total overseas trade**

The following table shows the total trade of Australia with overseas countries from 1901 to 1968-69. The period 1901 to 1965-66 has been divided into five-year periods, and the figures shown represent the annual averages for the periods specified. Figures for the individual years were published in earlier issues, but figures for imports in issues prior to No. 37 were expressed in British currency.

### Classified summary of Australian overseas trade

The following table shows exports and imports according to divisions of the Australian Export and Import Commodity Classifications (based on the Standard International Trade Classification) during each of the years 1966-67 to 1968-69.

#### EXPORTS AND IMPORTS: DIVISIONS OF THE AUSTRALIAN EXPORT AND IMPORT COMMODITY CLASSIFICATIONS, 1966-67 TO 1968-69 (\$'000 f.o.b.)

Division No.	Description	Exports			Imports		
		1966-67	1967-68	1968-69	1966-67	1967-68	1968-69
00	Live animals . . . . .	6,085	5,891	5,444	2,563	2,745	2,681
01	Meat and meat preparations . . . . .	278,822	279,155	285,800	486	957	1,044
02	Dairy products and eggs . . . . .	114,401	92,855	79,473	3,655	3,817	4,506
03	Fish and fish preparations . . . . .	24,968	34,000	37,025	28,793	27,463	30,677
04	Cereals and cereal preparations . . . . .	463,203	419,087	351,400	2,875	3,790	6,332
05	Fruit and vegetables . . . . .	100,349	110,780	96,757	17,538	19,268	21,311
06	Sugar, preparations, honey . . . . .	105,514	104,972	129,753	2,268	2,495	2,606
07	Coffee, tea, cocoa, and spices . . . . .	4,776	2,915	2,867	50,272	46,334	49,288
08	Feeding stuff for animals . . . . .	7,185	6,383	8,314	7,881	8,176	6,502
09	Miscellaneous food preparations . . . . .	2,831	2,949	3,420	1,937	2,051	2,853
11	Beverages . . . . .	6,790	7,535	7,363	10,401	13,457	15,464

## Exports, by industrial group

The following table provides an analysis of Australian exports for the years 1966-67 to 1968-69. This analysis is designed to show fluctuations in exports of Australian produce dissected according to the main industry of their origin, although any such classification is necessarily somewhat conventional.

**EXPORTS OF AUSTRALIAN PRODUCE, BY INDUSTRIAL GROUP**  
1966-67 TO 1968-69

<i>Industrial group</i>	<i>Value (\$'000 f.o.b.)</i>			<i>Proportion of value of exports of Australian produce (excluding gold) (per cent)</i>		
	<i>1966-67</i>	<i>1967-68</i>	<i>1968-69</i>	<i>1966-67</i>	<i>1967-68</i>	<i>1968-69</i>
<b>Agriculture, horticulture and viticulture—</b>						
Unprocessed . . . . .	452,580	411,004	350,384	15.5	14.1	10.8

<b>Total Australian produce (excluding gold) . . . . .</b>	<b>2,918,127</b>	<b>2,919,783</b>	<b>3,222,373</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>
<b>Re-exports (excluding gold) . . . . .</b>	<b>87,674</b>	<b>109,519</b>	<b>129,185</b>	<b>..</b>	<b>..</b>	<b>..</b>
<b>Gold exports . . . . .</b>	<b>18,096</b>	<b>15,373</b>	<b>22,706</b>	<b>..</b>	<b>..</b>	<b>..</b>
<b>Total value of recorded exports . . . . .</b>	<b>3,023,897</b>	<b>3,044,675</b>	<b>3,374,263</b>	<b>..</b>	<b>..</b>	<b>..</b>

The items enumerated indicate how arbitrary is the line necessarily drawn between primary produce and manufactures in any classification of this kind. The value of processed primary products exported includes some element of value added by the simpler processes of manufacture, while the value shown for manufactures exported necessarily includes the value of raw materials (primary produce) used in those manufactures.

## Imports of merchandise, by economic class

The following table shows imports of merchandise into Australia during the years 1966-67 to 1968-69 classified according to economic classes of (i) purpose and (ii) degree of manufacture.

IMPORTS OF MERCHANDISE, BY ECONOMIC CLASS: AUSTRALIA  
1966-67 TO 1968-69

	Value (\$'000 f.o.b.)			Proportion of value of imports of merchandise (per cent)		
	1966-67	1967-68	1968-69	1966-67	1967-68	1968-69
<b>PURPOSE</b>						
Producers' materials for use in—						
Building and construction . . . . .	86,742	99,887	131,369	2.9	3.1	3.9

Grand total . . . . .	3,003,973	3,215,003	3,423,276	100.0	100.0	100.0

(a) Owing to insufficient information, it is not possible to treat unassembled tractors and other machinery in a similar manner to motor vehicles, and all such machinery and replacement parts therefor are treated as capital equipment whether imported in an assembled or unassembled condition. (b) Excludes a percentage for piece goods to be sold at retail, and paper to be used solely for wrapping, which are recorded in Finished consumer goods, All other, and Auxiliary aids to production, respectively. (c) See footnote (a). (d) Includes a percentage for piece goods to be sold at retail; see footnote (b). (e) Excludes crude petroleum, which is included in Producers' materials, Manufacturing—Other. (f) Includes a percentage for paper to be used solely for wrapping; see footnote (b). (g) The class Fuels and lubricants consists of goods 'simply transformed', and the classes Capital equipment and Munitions and war stores entirely of goods 'more elaborately transformed'. The class Auxiliary aids to production is about equally divided between goods 'simply transformed' and 'elaborately transformed'.

## Direction of Overseas Trade

## Exports and imports, by country of consignment or of origin

The following two tables show the value and percentage of Australian exports and imports during each of the years 1966-67 to 1968-69 according to principal country of consignment or origin. The proportions of Australian exports and imports by country of origin or consignment are shown graphically on plate 26 on page 318.

**AUSTRALIAN EXPORTS AND IMPORTS, VALUE BY COUNTRY OF CONSIGNMENT  
OR ORIGIN, 1966-67 TO 1968-69**  
( $\$'000$  f.o.b.)

Country	Exports			Imports

Ross Dependency	Mali	Poland	Thailand
St Helena and Ascension	Mauritania	Romania	United Arab Republic
Seychelles	Morocco	U.S.S.R.	Uruguay
Sierra Leone	Netherlands	Vietnam (North)	Venezuela
Singapore			Vietnam, Republic of
Solomon Is			Yemen
South Africa			Yugoslavia

(a) Other than United Kingdom.

## Trade with the United Kingdom

Since 1908, permanent resident Commissioners appointed by the British Board of Trade have been located in Australia for the purpose of advising manufacturers and merchants in Britain about Australian trade affairs. Particulars of British trade representation in Australia are given in the chapter International Relations. From 8 August 1907 the Commonwealth Customs Tariffs have provided preferential rates of customs duties on certain goods the produce or manufacture of the United Kingdom, with the object of assisting the British manufacturer to retain or improve his position in this market in relation to other countries. The main provisions in these Acts relating to preference are dealt with on pages 284-5 in this chapter. For details of exports to and imports from the United Kingdom, by divisions of the Australian Export and Import Commodity Classifications, see tables on pages 309 and 317 respectively.

## Trade with eastern countries

Details of exports to and imports from eastern countries are shown in the following table. Further information for principal eastern countries, by divisions of the Australian Export and Import Commodity Classifications, is shown in the tables on pages 304-10 and 311-17 respectively.

## TRADE OF AUSTRALIA WITH EASTERN COUNTRIES, BY COUNTRY OF CONSIGNMENT OR ORIGIN, 1966-67 TO 1968-69

(\$'000 f.o.b.)

### Total import clearances, dutiable clearances, and net customs duties collected

The following table shows the value of total import clearances, total dutiable clearances, and the net customs duties collected during each of the years 1964-65 to 1968-69 together with the ratio of total dutiable clearances to total clearances.

#### TOTAL IMPORT CLEARANCES, DUTIABLE CLEARANCES, AND NET CUSTOMS DUTIES 1964-65 TO 1968-69

	1964-65	1965-66	1966-67	1967-68	1968-69
Total import clearances . . . . . \$'000	2,890,332	2,914,520	3,030,897	3,265,116	3,432,209
Total dutiable clearances . . . . . „	1,239,936	1,230,459	1,228,320	1,371,780	1,508,391
Total net customs duties collected . . . . . „	263,015	265,590	269,296	306,590	340,940
Ratio of dutiable clearances to total clearances . . . . . per cent	42.9	42.2	40.5	42.0	43.9
Ratio of duties collected to dutiable clearances . . . . . „	21.2	21.6	21.9	22.3	22.6

### Overseas trade in calendar years

For the purpose of comparison with countries which record overseas trade in calendar years, the following table has been compiled to show estimates of Australian exports and imports for each of the calendar years 1965 to 1969.

#### OVERSEAS TRADE IN CALENDAR YEARS, AUSTRALIA, 1965 TO 1969 (\$'000 f.o.b.)

Year	Merchandise		Non-merchandise		Total	
	Exports	Imports	Exports	Imports	Exports	Imports
1965 . . . . .	2,603,723	2,959,404	79,513	55,789	2,683,236	3,015,193
1966 . . . . .	2,742,315	2,853,925	88,960	41,199	2,831,275	2,895,124
1967 . . . . .	3,004,232	3,082,991	101,181	47,108	3,105,413	3,130,099
1968 . . . . .	3,036,221	3,443,943	112,227	45,143	3,148,448	3,489,086
1969 . . . . .	3,615,710	3,573,713	155,469	52,800	3,771,179	3,626,513

## Excise

Although excise goods have no immediate bearing on overseas trade, the rate of excise duty is in some cases related to the import duty on similar goods. Moreover, as the Excise Acts are administered by the Department of Customs and Excise, it is convenient to publish here the quantities of Australian produce on which excise duty has been paid. Particulars of customs and excise revenue are shown in the chapter Public Finance. The following table shows the quantities of spirits, beer, tobacco, etc., on which excise duty was paid in Australia during the years 1967-68 and 1968-69.

QUANTITY OF SPIRITS, BEER, TOBACCO, ETC. ON WHICH EXCISE DUTY WAS PAID: AUSTRALIA, 1967-68 AND 1968-69

Article	1967-68	1968-69	Article	1967-68	1968-69

				6,805	7,676

(a) Includes supplies to Commonwealth Government on which excise was paid. During the years 1967-68 and 1968-69 refunds were made on 46,662,000 and 58,870,000 gallons, respectively.

## OVERSEAS INVESTMENT BY PRIVATE INVESTORS

Surveys of overseas investment have been conducted since 1947-48 to obtain particulars of certain types of private capital flows to and from Australia. The surveys, when supplemented by other information, provide statistics of overseas investment in companies in Australia and in Australian public authority securities repayable in Australian currency, as well as statistics of Australian investment in companies overseas and in foreign government securities. Particulars of investment income from most of those classes of investment are also obtained from the surveys.

Certain types of private overseas investment are not included in the statistics which follow. Investment in real estate (except when made through companies) and loans between Australian individuals and non-resident individuals are not covered. Nor are changes in short-term liabilities between exporters and importers in Australia and overseas covered, except in so far as they arise from exports and imports between branches or subsidiaries and their home offices. In this case they are included in the figures of investment in branches or subsidiaries.

In the tables which classify investment in Australia according to country of origin, the investment is shown as an inflow from the country which is the immediate source of the capital. Income payable overseas is classified on a similar basis, i.e. it is classified to the country to which it is directly payable.

Remittances between Australia and overseas by Australian life insurance companies are regarded as capital transactions made to bring assets located in overseas countries into line with commitments in those countries, and are included as a flow of investment between Australia and overseas. Similar considerations apply to overseas life insurance companies with branches in Australia.

The following are explanatory notes relating to some of the terms used in the tables.

*Companies.* In these statistics the term 'companies' relates to both incorporated and unincorporated businesses.

*Australian branches.* Australian branches of companies incorporated overseas whose net liabilities to home office or whose net profit or loss exceeds \$10,000, or which maintain in Australia a branch register of shares, debentures or unsecured notes.

*Australian subsidiaries.* For the purpose of these statistics an Australian subsidiary is a company in which there is ownership of 25 per cent or more of the company's ordinary shares (or voting stock) by one company or a group of associated companies in one overseas country, or ownership of 50 per cent or more of the company's ordinary shares (or voting stock) by individual persons or individual companies in one overseas country.

*Direct investment.* For the purpose of these statistics direct investment is overseas investment made through a branch or subsidiary (as defined above) by the overseas persons or overseas companies which hold the specified proportions of ordinary shares (or voting stock) in the subsidiary.

*Overseas.* For the purpose of these statistics, Papua and New Guinea and the other external territories under the control of Australia are regarded as overseas countries.

*Portfolio investment and institutional loans.* Investment other than direct investment, including loans raised overseas from financial institutions and other companies which have no direct investment in the borrowing company.

*Undistributed profits.* This term refers, in the case of Australian subsidiaries, to the equity of the overseas parent in the net earnings for taxation purposes of the Australian company, less tax (or tax provision) and less dividends declared. In the case of overseas subsidiaries of Australian companies, this term represents the equity of the Australian parent in the book value of the net earnings of the subsidiary after tax, less dividends paid or payable.

*Unremitted profits.* For these statistics this represents the net earnings of branches during the year, after tax, less remittances by the branches to their home offices during the year of net earnings and interest (irrespective of the period to which the earnings and interest relate). 'Net earnings' of Australian branches of overseas companies are, in general, based on the value of their income for taxation purposes.

The annual bulletin *Insurance and Other Private Finance* and the *Annual Bulletin of Overseas Investment* contain additional figures relating to overseas investment, including a longer range of years covered, and also a more detailed description of the figures.

**Private overseas investment in companies in Australia and investment income payable overseas by companies in Australia.**

The inflow of private overseas investment in Australia since 1964-65 is shown in the next three tables.

**ANNUAL INFLOW OF PRIVATE OVERSEAS INVESTMENT IN COMPANIES IN AUSTRALIA BY CATEGORY OF INVESTMENT AND TYPE OF COMPANY(a), 1964-65 TO 1968-69**  
(\$ million)

(a) Increases in investment by some Australian investors are offset against withdrawals of investment by other Australian investors. (b) Excludes portfolio investment and institutional loans. (c) Included with 'Other countries'.

Minus sign (-) denotes inflow.

The next two tables show income from direct investment receivable by Australian companies from companies overseas, and the countries from which it is receivable.

## OVERSEAS TRANSACTIONS

**INCOME FROM DIRECT INVESTMENT RECEIVABLE BY AUSTRALIAN COMPANIES FROM COMPANIES OVERSEAS, BY TYPE OF COMPANY AND CATEGORY OF INCOME, 1964-65 TO 1968-69**

(\$ million)

Year	Overseas branches		Overseas subsidiaries		Total
	Unremitted profits (net)	Remitted profits and interest	Undistributed profits (net)	Dividends and interest receivable	
1964-65	-1	5	20	18	41
1965-66	2	4	16	16	38
1966-67	-1	5	15	21	39
1967-68	2	6	18	19	45
1968-69	-1	5	21	24	49

**INCOME FROM DIRECT INVESTMENT RECEIVABLE BY AUSTRALIAN COMPANIES FROM COMPANIES OVERSEAS, BY COUNTRY FROM WHICH RECEIVABLE 1964-65 TO 1968-69**

(\$ million)

Year	United Kingdom	New Zealand	U.S.A. and Canada	Papua and New Guinea(a)	Other countries	Total
1964-65	2	21	..	(b)	19	41
1965-66	1	16	1	6	12	38
1966-67	1	18	1	6	13	39
1967-68	3	18	1	9	14	45
1968-69	2	17	2	12	17	49

(a) Excludes portfolio investment and institutional loans. (b) Included with 'Other countries'.

**Net annual flow of investment**

The net annual flow of investment between Australia and overseas, and its classification by country, are shown in the following two tables. In addition to private overseas investment, the annual inflow of overseas investment in Australian public authority securities and net overseas remittances by life insurance companies have been incorporated in both tables.

**NET ANNUAL FLOW OF INVESTMENT BETWEEN AUSTRALIA AND OVERSEAS COUNTRIES(a)**

1964-65 TO 1968-69

(\$ million)

Year	Annual inflow of investment	Annual outflow of investment	Net annual flow
1964-65	558	16	542
1965-66	662	27	635
1966-67	532	30	501
1967-68	1,096	39	1,057
1968-69	1,112	53	1,059

(a) Increases in investment by some overseas investors are offset against withdrawals of investment by other investors.

## NET ANNUAL FLOW OF INVESTMENT BETWEEN AUSTRALIA AND OVERSEAS COUNTRIES, BY COUNTRY, 1964-65 TO 1968-69

(\$ million)

Year	United Kingdom	New Zealand	U.S.A. and Canada	Other countries	I.B.R.D. (a)	Net annual flow
1964-65 . . .	218	..	279	46	-1	542
1965-66 . . .	230	-16	343	85	-7	635
1966-67 . . .	57	-14	396	85	-23	501
1967-68 . . .	346	-11	606	139	-23	1,057
1968-69 . . .	434	-23	364	307	-24	1,059

(a) Particulars are not available of the domicile of securities issued to the International Bank for Reconstruction and Development.

Minus sign (-) denotes outflow.

## BALANCE OF PAYMENTS

Estimates of a country's balance of payments are prepared for the purpose of providing a systematic record in money terms of the economic transactions which take place over a period between that country and all other countries. Such records are essential to the examination of influences which external factors have on the domestic economy. The Australian economy is subject to fairly large fluctuations in export income, and it is also affected in important respects by variations in the level of foreign investment and the demand for imports. Consequently, these estimates have always assumed particular importance in this country.

Official estimates of Australia's balance of payments covering the period 1928-29 to 1930-31 were included in the Appendix to Year Book No. 24, 1931. Except for the war years (1939 to 1945), estimates have since been published annually. Detailed estimates are currently provided twice yearly in the form of a mimeographed publication *Balance of Payments*. This publication brings the estimates forward to the end of the most recent financial year or half-year and, together with a printed volume *The Australian Balance of Payments, 1928-29 to 1950-51*, provides also a description of the various items included and the sources from which the information is obtained. A summarised statement of the principal current account items and capital movements is prepared and issued on a quarterly basis in the *Balance of Payments—Quarterly Summary*.

The form of presentation of the Australian estimates has recently been revised in order to bring it more closely into line with the recommendations of the Balance of Payments Manual of the International Monetary Fund (I.M.F.). The basic distinction remains, however, between 'current account' and 'capital account' transactions. Current account transactions may be defined as those involving changes in the ownership of goods or the rendering of services between residents of Australia and the rest of the world and include such items as exports, imports, shipping freights, dividends, profits and interest, travel, and government expenditure. The current account also includes the value of transfers in the form of gifts in cash or kind made or received by residents of Australia, both private and government, to or from the rest of the world. Capital account transactions may be defined as those involving claims to money and titles of investment between residents of one country and those of another country and include government loan-raising operations overseas, investment by overseas residents in Australian companies, the investment of Australian residents in companies overseas, and transactions involving changes in the overseas assets and liabilities of certain Australian marketing authorities.

By definition, the balance of payments on current account and the balance of payments on capital account during a given period must exactly offset one another. Errors and omissions, however, occur in the estimation of the amounts involved in various items in both the current and capital accounts, and, in addition, there are differences in timing between the statistical recording of trade and invisible transactions and the relevant foreign exchange transactions. It is therefore necessary to introduce into the estimates a 'balancing item' which allows the identity between the current and capital account balances to be preserved. The 'balancing item' is included in the capital account, but, as mentioned above, it includes discrepancies in the current account and does not, as is frequently supposed, include only errors, omissions and timing differences related to capital transactions.

Details of the estimates are assembled from a variety of sources of which the following are the more important: (i) statistics of exports and imports obtained from Australian trade statistics; (ii) details of the import valuation adjustment obtained from a sample of the invoices submitted to the Department of Customs and Excise in respect of imports into Australia; (iii) information on particular invisible current account items and capital movements obtained by regular inquiry from

private organisations and government departments; (iv) details of receipts and payments of foreign exchange provided by the banking system; (v) information on dividends remitted, undistributed income and private investment in companies provided by statistics of overseas investment collected by this Bureau; (vi) information on freight on imports and other items concerned with overseas shipping obtained from a sample of the invoices submitted to the Department of Customs and Excise in respect of imports into Australia and a survey of shipping operations conducted by this Bureau; and (vii) information on international reserves supplied by the Reserve Bank of Australia.

#### Current account

The balance of payments on current account is arranged to show a series of credit items and a corresponding series of debit items. Primarily, entries on the credit side include all current transactions which result in receipts of foreign exchange (for goods and services, property income or transfers), and on the debit side the similar transactions which result in payments of foreign exchange. The principal exceptions to this rule are the amounts shown for undistributed income and where debts incurred for current account items, principally goods, are subsequently capitalised. In respect of these amounts no movements of foreign exchange takes place, the amounts concerned being treated as credits or debits in the relevant sections of the current account, and as corresponding outflows or inflows in the relevant sections of the capital account. A further exception occurs in the case of transfers in kind where no foreign exchange movement takes place. The values of transfers received or provided in kind are shown as credits or debits respectively.

The largest items shown in the current account are exports and imports, and the difference between them represents the balance of trade. This is usually the most variable relationship in the balance of payments and is, therefore, a most important one. *For balance of payments purposes, certain adjustments are made to the recorded trade statistics.* Briefly, these adjustments are made to exclude those transactions for which there is no change of ownership between residents and non-residents of Australia and to include certain transactions for which there has been a change of ownership but for which customs entries are not required. In addition, a valuation adjustment is made to the recorded import statistics in order to remove the overstatement which results from the basis of valuation for customs duty. A full description of the adjustments is provided in the Appendix to the publication *Balance of Payments, 1968-69*. A full evaluation of the overall position on current account, however, occurs only after the invisible items have been taken into account. In value terms the most important of these are the transportation items. Entries appear on both the debit and credit sides, the principal component on the debit side being freight payable overseas on imports into Australia. The principal component on the credit side is expenditure by overseas carriers, which represents mainly overseas ships' expenditure for stevedoring, port charges, etc. incurred in loading and discharging goods at Australian ports, and stores purchased in Australia. The items next in importance are those concerning income from property. Debit entries under this heading include dividends, profits, interest and royalties payable overseas, while the credit entries include similar details of amounts receivable by Australian residents. These items include undistributed income for which, as mentioned above, no monetary payments occur. The remaining items are smaller than those mentioned above, and include travel, government transactions, transfers (including foreign aid made available by the Australian Government), and, on the credit side, the net value of Australian gold production.

#### Capital account

The capital account is also arranged to show a series of net credits and debits. Entries on the credit side represent a net increase in non-residents' assets in Australia or a net decrease in Australian assets overseas, while debit entries represent a net decrease in non-residents' assets in Australia or a net increase in Australian assets overseas.

Capital account transactions are also grouped according to the sector of the Australian party to the transactions. The government sector, therefore, includes all capital transactions of central, State, and local governments with the exception of transactions of monetary institutions (which are included in the monetary sector), while the private sector covers transactions of all resident individuals and private institutions (again, excepting monetary institutions). The monetary sector covers all banking institutions, including government-owned banks. Transactions of the monetary sector are further sub-divided into official and non-official transactions. Official transactions of Australian monetary institutions are those which cause changes in international reserves and in Australia's net I.M.F. position and transactions between the Reserve Bank of Australia and foreign central monetary institutions. Non-official transactions include all other transactions of Australian monetary institutions.

In the government sector the most important items include transactions by non-residents in government securities domiciled overseas and in Australia and transactions involving changes in Australia's assets with and liabilities to international non-monetary institutions such as the International Bank for Reconstruction and Development and the Asian Development Bank. Other

government transactions are largely a reflection of the net effect on the balance of payments of leads and lags between payments made overseas for items of equipment for the defence services or government airlines and the delivery of the equipment. In periods where payments exceed the value of deliveries a net debit results; in periods where the value of deliveries exceeds payments a net credit is recorded.

In the private sector the most important items are overseas investment in Australian companies, Australian investment in companies overseas, and the transactions of marketing authorities. The figures for marketing authorities represent changes in the estimated value of commodity stocks held overseas by, or in amounts owed by overseas debtors to, the principal Australian marketing authorities.

In the monetary sector the most important item is that which shows the net change in Australia's international reserves. Also important are transactions involving changes in Australia's position with the I.M.F.

The balancing item includes errors and omissions and timing differences, referred to on pages 331-2.

#### Tables—Balance of payments

The following tables show, for the three years 1966-67 to 1968-69, particulars of:

- (i) the balance of payments; and
- (ii) the balance of payments on current account, by major groups of countries.

<b>Balance on capital account</b>	<b>653</b>	<b>..</b>	<b>1,123</b>	<b>..</b>	<b>1,006</b>	<b>..</b>

(a) The amounts shown represent the recorded trade figures adjusted for balance of payments purposes. Adjustments affect both coverage and valuation. (b) Total freight and insurance on imports, whether payable overseas or in Australia, is estimated at \$340 million in 1966-67, \$401 million in 1967-68 and \$414 million in 1968-69. (c) Excludes a reduction of \$113 million in the Australian dollar equivalent during November 1967 due to the devaluation of the pound sterling and a number of other currencies held as part of Australia's international reserves.

## IMPORTS OF MERCHANDISE, 1959-60 TO 1968-69

Indexes of Values at Average 1966-67 Prices

(Base: Year 1966-67 = 100)

	<i>Food, beverages, and tobacco</i>	<i>Fuels</i>	<i>Basic materials</i>	<i>Chemicals (including plastics)</i>	<i>Textiles, fabrics, etc.</i>	<i>Metal manufactures, machinery, transport equipment</i>	<i>Other imports</i>	<i>All imports of merchandise (a)</i>
1959-60 . . . . .	}	}	}	}	}	}	}	64
1960-61 . . . . .								75
1961-62 . . . . .								61
1962-63 . . . . .								73
1963-64 . . . . .								81
1964-65 . . . . .								98
1965-66 . . . . .	98							
1966-67 . . . . .	100	100	100	100	100	100	100	100
1967-68 . . . . .	99	100	107	109	107	111	111	109
1968-69 . . . . .	110	105	106	123	114	116	121	116

(a) The series shown for years prior to 1966-67 are not strictly comparable to the series shown from 1966-67 onwards (see the bulletin referred to in the headnote to these two tables). (b) These percentages may be used in analysing the contribution of each group to movements in the total index.

## CHAPTER 12

### TRANSPORT, COMMUNICATION AND TRAVEL

The statistics in this chapter relate in the main to the year 1968–69, with comparisons restricted to a few recent years. More detailed figures and particulars for earlier years are included in the annual bulletins, *Transport and Communication*, *Commonwealth Finance*, and *State, Territory and Local Government Authorities' Finance and Government Securities*, and in the annual mimeographed statement *Motor Vehicle Registrations*. Current information on subjects dealt with in this chapter appears in the *Quarterly Summary of Australian Statistics*, the *Monthly Review of Business Statistics*, the *Digest of Current Economic Statistics*, *Overseas Shipping Cargo* (quarterly), *Motor Vehicle Registrations* (monthly) and two preliminary monthly statements *Registrations of New Motor Vehicles*, *Road Traffic Accidents involving Casualties* (quarterly), *Road Accident Fatalities* (monthly), and *Overseas Arrivals and Departures* (monthly and quarterly)—see page 391. Greater detail on the latter subject is contained in the annual bulletin *Demography*.

Information additional to that contained in Bureau publications is available in the annual reports and other statements of the Department of Shipping and Transport, the various harbour boards and trusts, the several Government railways authorities, the Department of Civil Aviation, the Postmaster-General's Department, the Overseas Telecommunications Commission, the Australian Broadcasting Control Board, and the Australian Broadcasting Commission.

#### THE AUSTRALIAN TRANSPORT ADVISORY COUNCIL AND ITS STANDING COMMITTEES

The Australian Transport Advisory Council, established April 1946, comprises the Commonwealth Minister for Shipping and Transport as Chairman, the Commonwealth Minister for the Interior and each State Minister for Transport. The administration of the Council and the standing committees it has established is the responsibility of the Commonwealth Department of Shipping and Transport. The general practice is that the Council convenes twice a year, the meetings moving successively from one capital city to another. The Council primarily considers policy matters relating to transport operation, co-ordination and development.

The regulation of, and the executive responsibility for, transport is shared between the Commonwealth and State Governments. The Australian Transport Advisory Council is the meeting ground of Commonwealth and States at a ministerial level and provides an effective means of inviting discussion and reaching, by way of mutual consent and understanding, a uniformity of approach towards transport policy and administrative procedures. It also provides a means of reviewing and discussing proposals for the national solution of pressing transport problems.

Some of the Council's most useful work has been accomplished through the agency of committees established by the Council from time to time. Some committees are of a semi-permanent nature. They were established to initiate discussion and action on transport problems referred by member Ministers and other authorities and to undertake specialised work. These committees have recently been reconstituted. The current committees are: The Standing Committee of Advisers, The Advisory Committee on Safety in Vehicle Design, The Advisory Committee on Vehicle Performance, The Advisory Committee on Road User Performance, The Advisory Committee on Transport of Dangerous Goods, and The Australian Road Safety Council.

Details of the work of the Australian Transport Advisory Council and the standing committees that have been operating until recently, were given in Year Book No. 53, 1967, pages 421–4.

### SHIPPING

#### Control of shipping

##### Commonwealth navigation and shipping legislation

For an outline of the development and scope of Commonwealth legislation, see Year Book No. 55, pages 366–7.

*Commonwealth Acts connected with shipping are: the Navigation Act 1919–1968, the Sea Carriage of Goods Act 1924, the Seamen's Compensation Act 1911–1968, the Seamen's War Pensions and Allowances Act 1940–1969, the Pollution of the Sea by Oil Act 1960–1965, the Australian Coastal Shipping Commission Act 1956–1969, the Australian Coastal Shipping Agreement Act 1956, the Stevedoring Industry Act 1956–1966, the Beaches, Fishing Grounds and Sea Routes Protection Act 1932–1966, the Submarine Cables and Pipelines Protection Act 1963–1966, and the Lighthouses Act 1911–1966, the last-mentioned being made under Section 51 (vii) of the Constitution, which provides power in respect of 'lighthouses, lightships, beacons and buoys'.*

#### **Australian Coastal Shipping Commission**

The Commission, replacing the Australian Shipping Board, was established in 1956 for the purpose of maintaining and operating interstate, overseas and territorial shipping services. It operates The Australian National Line, a Commonwealth owned merchant shipping service which at 30 June 1969 comprised thirty-four vessels totalling 289,585 tons deadweight.

These vessels include three vehicle deck passenger ships, *Empress of Australia* 12,037 tons gross, *Princess of Tasmania* 3,981 tons gross, and *Australian Trader* 7,005 tons gross, one vehicle deck cargo ship of 4,129 tons gross; four ore carriers totalling 97,950 tons deadweight; thirteen bulk carriers totalling 128,278 tons deadweight; twelve general cargo ships totalling 52,562 tons deadweight; and one grain carrier of 2,014 tons deadweight.

At 30 June 1969 vessels on order at Australian Shipyards for the Commission included three vehicle deck cargo vessels, each of 4,417 tons deadweight, a 54,800 tons deadweight ore carrier; a 12,100 tons deadweight ore container ship for the Darwin trade. Overseas, a 14,082 tons deadweight vehicle deck container ship for the Australia–Japan trade is on order from a Japanese shipyard and at a West German yard, two container vessels each of 26,420 tons deadweight are on order for the Australia–Europe and Australia–East Coast of North America trades.

Terminals have been established in Brisbane, Sydney, Melbourne and Tasmania to service the Line's vehicle deck vessels, whilst at the 30 June 1969 construction was nearing completion of terminals in Queensland at Mackay, Rockhampton, Townsville and Cairns. New terminals are also under construction at Port Kembla and Adelaide and will come into operation with the commissioning of the third of the new vehicle deck ships.

During the twelve months ending 30 June 1969 the passenger vessels *Empress of Australia*, *Princess of Tasmania*, and in the closing stages *Australian Trader*, together with the vehicle deck cargo vessel *Bass Trader*, supplemented occasionally by conventional tonnage carried a total of 115,128 passengers and 1,384,819 tons of cargo between the Australian mainland and Tasmania. Over the same period, a total of 7,860,661 tons of cargo was carried by The Australian National Line vessels.

#### **Australian Shipping Board**

Established in March 1941 as a wartime measure under the National Security (Shipbuilding) Regulations and constituted in 1948 under the *Supply and Development Act 1939–1948*, the Board from 1951 has operated under the control of the Minister for Shipping and Transport. In November 1963 it became a division of the Department of Shipping and Transport. The Division's staff numbers 130 including naval architects, engineers, accountants and clerical staff.

The Board consist of a Chairman, and four Members, one of whom is also a Member of the Naval Board. Members are appointed by the Minister for Shipping and Transport.

The functions of the Board are to advise the Minister on matters concerning the shipbuilding industry including the consideration of tenders for ships to be built in Australia, the prices at which vessels may be purchased and sold on behalf of the Commonwealth, and the state and prospects of the industry generally.

To 31 December 1969 the Board had arranged for the construction of 190 vessels valued at approximately \$496 million.

As well as specialised merchant vessels the Board has also arranged for the construction of one semi-submersible oil drilling rig, dredgers of various types, specialised offshore oil drilling service vessels, a large floating crane in addition to bulk carriers, oil tankers and container ships.

Orders held by the Board at 31 December 1969 were valued at \$86 million and numbered twenty-five vessels. These included large bulk carriers of 78,000 and 55,000 tons deadweight, one 62,000 tons deadweight oil tanker, two 24,000 tons deadweight oil tankers, one 12,000 tons deadweight bulk container vessel, one roll-on roll-off cargo vessel, one 1,500 tons deadweight cargo vessel, two ferries, one seismic exploration vessel, one offshore supply vessel, one tug, a 111 ft derrick boat, one cargo barge, three dredgers and eight fast patrol launches.

There are five major Australian shipyards building merchant vessels—two in Queensland, two in South Australia, and one in New South Wales; and two shipyards engaged principally in naval

shipbuilding—one in New South Wales and one in Victoria. There are also numerous small yards, situated in every State, building smaller steel and wooden working and pleasure craft.

*Shipbuilding subsidy.* The Australian shipbuilding industry has been subsidised since 1947, and following the 1963 Tariff Board inquiry into measures of assistance to the Australian shipbuilding industry, the Government decided to extend the shipbuilding subsidy at its existing rate of up to one-third of the cost of construction to include all types of vessels of 200 tons gross and over built in recognised shipyards and intended for use in Australian coastal or inland waterways. This came into effect on 20 May 1964. In respect of vessels of less than 200 tons gross, Australian shipbuilders are afforded protection under the Customs Tariff.

The Tariff Board again inquired into the Australian shipbuilding industry during 1969. The report and recommendations arising from the inquiry have not yet been submitted to the Government.

#### **Australian Stevedoring Industry Authority**

In March 1947 legislation established a permanent Stevedoring Industry Commission to continue in peace-time the functions performed during the war by the Commission established under National Security legislation. In June 1949 legislation was enacted to abolish the Stevedoring Industry Commission, on which employers and employees were represented, and establish in its place a Stevedoring Industry Board of three members, to attend to administrative matters formerly under the control of the Commission, such as the operation of labour bureaux at ports, payment of attendance money and provision of amenities. The industrial functions which previously came within the province of the Commission were assigned to a single Judge of the Commonwealth Court of Conciliation and Arbitration. In August 1956, following a Committee of Inquiry into the stevedoring industry, the Stevedoring Industry Board was replaced by the Australian Stevedoring Industry Authority of three members, including a representative of the management side of industry and a representative of the trade union movement. At the same time the judicial and non-judicial functions formerly exercised by the Commonwealth Court of Conciliation and Arbitration were divided between the Commonwealth Industrial Court and the Commonwealth Conciliation and Arbitration Commission respectively. Awards of the Conciliation and Arbitration Commission subsequently placed payment of sick pay, public holiday pay and annual leave under the administration of the Authority. Under amending legislation, which operated from 6 June 1961, the Authority became responsible for payment of long service leave to registered waterside workers, and its disciplinary powers were strengthened to reduce the time lost through unauthorised stoppages. Further amending legislation which operated from 8 October 1965 made the Authority responsible for the recruitment of waterside workers.

In October 1965 the Government invited the Australian Council of Trade Unions, the Waterside Workers' Federation of Australia, the Association of Employers of Waterside Labour, the Australian Stevedoring Industry Authority, and the Department of Labour and National Service to confer under the Chairmanship of Mr A. E. Woodward, Q.C., with the overall objective of improving the long-term conditions in the stevedoring industry. Following a series of meetings, the Conference, known as the National Stevedoring Industry Conference, published a General Report in April 1967 recording agreement between the parties on a number of matters. These included *inter alia* weekly hire for all registered waterside workers in major ports, together with a pension scheme and provision for reducing the statutory retirement age progressively from seventy to sixty-five years of age. Special arrangements have been agreed to cover any prospective redundancy problems. Following adoption of the Report by all the parties, including the Government, enabling legislation was introduced to allow the changes to be implemented. Permanent employment was commenced in Sydney on 27 November 1967, in Melbourne, Port Kembla, Adelaide, Fremantle and Brisbane on the respective dates, 8 January, 19 February, 4 March, 18 March and 12 August 1968 and in Newcastle on 10 March 1969. Other appropriate ports will follow progressively.

The statutory provisions relating to the industry are now contained in the *Stevedoring Industry (Temporary Provisions) Act 1967* (and Regulations made thereunder), the *Stevedoring Industry Act 1956-1966*, and Division 4 of Part III of the *Conciliation and Arbitration Act 1904-1967*.

#### **Trade Practices Act 1965-1967 (Part XA)**

The Trade Practices Act Part XA (Overseas Cargo Shipping) is administered by the Minister for Trade and Industry.

The Act provides for the filing, with the Clerk of Shipping Agreements, of certain agreements of a specified character between shipowners operating in the outward trades from Australia. A shipowner who is a party to such an agreement may be called upon to negotiate with a 'shipper body' with regard to arrangements for, and the terms and conditions that are to be applicable to, the cargo shipping to which the agreement relates. A 'shipper body' is an association, designated by the Minister, that represents the interests of producers and shippers of Australian export goods. Whether a ship-

owner has failed so to negotiate, or whether the services provided pursuant to the agreement are adequate, efficient or economical, are matters that may be referred by the Minister for inquiry and report by the Trade Practices Tribunal. Certain powers are vested in the Governor-General to disapprove an agreement after consideration of a report to the Minister by the Tribunal. A probable effect of such a disapproval would be to force the shipowners to carry on business as individuals, and not as members of a 'conference'. ('Conferences' are the associations into which shipowners traditionally combine in the cargo liner trades.) The Governor-General may, however, in his discretion approve such a shipowner entering into another similar agreement.

Since the Act came into force two shipper bodies have been designated by the Minister—the Australia to Europe Shipping Association and the Singapore and West Malaysia Shipping Association. Shippers are in the process of forming additional bodies for other trades.

In addition to the provisions relating to conferences the Act also makes similar provisions for trades where only one line is operating. Such a line may, as a result of a declaration by the Governor-General, be prohibited from engaging in certain specified activities in carrying on that business, e.g. engaging in freight-cutting with the object of substantially damaging the business of another shipowner.

The Act also contains provisions which secure rights for Australian flag vessels to operate in the trades from Australia.

### Collection and presentation of statistics

#### Basic documents

From July 1966 shipping statistics have been compiled by the Commonwealth Bureau of Census and Statistics from returns submitted by shipping companies or their representatives to Customs Houses at the various seaports throughout Australia. A return is required for the departure of a vessel from a port as well as for its arrival at that port and shows the following details:

- name of the port at which the return is submitted;
- name of vessel;
- type of shipping service (liner, tramp, bulkship, tanker);
- port registered;
- registered net tonnage;
- last port of call (arrival) or next port of call (departure);
- with cargo or in ballast;
- date of arrival or date of departure;
- ports of loading of cargo (arrival) or ports of discharge of cargo (departure);
- quantity of cargo for each port of loading or discharge.

Prior to July 1966 returns were completed by officers of the Department of Customs and Excise at each port, the major differences then being that the system did not, in the main, rely on information supplied direct by shipping companies or their representatives, and the detail on returns did not include information on type of shipping service or ports of loading and discharge of cargo.

#### Scope of the statistics

Arrivals and departures of vessels are treated separately in shipping statistics. Not all vessels are included in the statistics as returns are not required for (i) naval vessels; (ii) yachts and other craft used for pleasure; (iii) foreign fishing vessels that neither load nor discharge cargo; (iv) Australian registered fishing vessels operating from Australian ports; (v) geographical survey vessels, seismic survey vessels, oceanographic survey vessels; (vi) offshore oil drilling rigs and vessels servicing them; (vii) vessels of 200 registered net tons and under.

#### Period covered by the statistics

Monthly shipping statistics relate to vessels arriving at and departing from each port in a calendar month. Annual statistics are published on a financial year basis.

#### Statistics of vessels

Statistics of vessels are compiled in terms of registered net tonnages. Net tonnage is expressed in units of 100 cubic feet (i.e. 100 cu ft equals 1 ton) and represents the volume of enclosed space which can be utilised for cargo or passengers.

#### Statistics of vessel movements

Returns show the last or next port of call of a vessel according to whether an arrival or departure at a port is being reported. Each vessel is classified to either the overseas or the coastal fleets serving

Australia. This information, supplemented by the voyage of the vessel indicated by ports it visits to load or discharge cargo, is the basis on which each vessel movement is allocated to one of the following classifications: overseas direct; overseas via other States; interstate direct; interstate via ports in the same State; intrastate via ports in the same State.

#### Cargo loaded or discharged

Returns for arrivals show cargo discharged, and for departures cargo loaded, in terms of units of weight or in terms of units of measurement, depending on the basis on which freight is charged. A ton measurement is a unit of 40 cubic feet. Cargo statistics show separate figures for cargo recorded in tons weight and cargo recorded in tons measurement.

#### Type of service

Overseas shipping cargo statistics are classified by type of service. Coastal shipping cargo statistics, on the other hand, combine all service types.

For overseas shipping, cargo shipped in liners is shown separately from cargo shipped in tramps, bulkships and tankers. A liner is a vessel which, on the voyage on which cargo is loaded or discharged at an Australian port, is operated by a common carrier in providing services on a specified route on a relatively regular basis.

Statistics of cargo shipped in liner services do not necessarily provide a measure of cargo carried by ships operating under shipping conference arrangements. For example, liner services may be provided by shipping companies which are not parties to conference agreements. Cargo may also be shipped under shipping conference conditions in vessels operating on a voyage charter basis for specific cargo, and, in the statistics, such cargo is classified as cargo shipped in tramp vessels.

#### Country of loading or discharge of overseas cargo

In statistics of overseas shipping cargo, country of loading or discharge of cargo is the country of location of the port where the cargo was loaded on to, or is to be discharged from, a reporting vessel. The countries shown are not necessarily the countries of origin or ultimate destination of cargo because previous or subsequent transshipments of cargo are not taken into account. The statistics of cargo classified by the country in which it was loaded or discharged cannot therefore be compared directly with statistics of overseas trade classified by country of origin or consignment.

#### Transshipments of cargo within Australia

The State of loading or discharge shown in the statistics is the State in which cargo is loaded on to, or discharged from, reporting vessels. Cargo loaded in a given State can therefore include cargo previously shipped interstate, while cargo discharged can include cargo which would subsequently be shipped interstate.

## Overseas shipping

#### Total movement

The following table shows the number of entrances and clearances (combined) of vessels from and to overseas countries, and the aggregate net tonnage, during each of the years 1964-65 to 1968-69.

OVERSEAS SHIPPING: ENTRANCES AND CLEARANCES  
(COMBINED) OF VESSELS DIRECT, AUSTRALIA  
1964-65 TO 1968-69

	1964-65	1965-66	1966-67(a)	1967-68(a)	1968-69(a)
Number of vessels . . . . .	7,601	7,958	7,994	7,985	8,750
Net tonnage . . . . . '000 tons	43,295	46,382	55,062	60,387	72,578

(a) Excludes vessels of 200 net tons and under.

Particulars of the total overseas movement of shipping for each year from 1822 to 1920-21 were published in Year Book No. 15, page 507, those for each year from 1921-22 to 1950-51 in Year Book No. 40, page 97, and those for each year from 1941-42 in Year Book No. 54, page 1266.

#### Total overseas shipping, States, etc.

The following table shows, for each State and the Northern Territory, the number of entrances and clearances of vessels direct from and to overseas countries, and the aggregate net tonnage, during the year 1968-69.

**OVERSEAS SHIPPING: ENTRANCES AND CLEARANCES OF VESSELS DIRECT, STATES AND NORTHERN TERRITORY, 1968-69(a)**

		<i>N.S.W.</i>	<i>Vic.</i>	<i>Qld</i>	<i>S.A.</i>	<i>W.A.</i>	<i>Tas.</i>	<i>N.T.</i>	<i>Aust.</i>

# OVERSEAS AND INTERSTATE SHIPPING CARGO: AUSTRALIA

1921-22 TO 1968-69

## Overseas cargo according to major trade areas and type of service

The tables on pages 348-9 show for the years 1966-67 to 1968-69 particulars of cargo loaded in Australia for discharge overseas, and cargo discharged in Australia from overseas, classified according to the major trade areas of the world, by type of shipping service (i.e. liner or tramp, bulkship and tanker).

## World shipping tonnage

At 1 July 1969 the total number of steamships and motorships 100 gross tons and upwards throughout the world was 50,276 with a gross tonnage of 211,660,893. Of those totals, steamships numbered 8,676 for 77,870,727 gross tons, and motorships 41,600 for 133,790,166. This includes 5,869 oil tankers of 100 gross tons and upwards with a gross tonnage of 77,391,689. Australian steamships and motorships, 321 for 893,613 gross tons constituted 0.64 per cent and 0.42 per cent respectively of the total number and gross tonnage. This information has been derived from *Lloyd's Register of Shipping*.

## Vessels registered in Australia

The following table shows the number and gross tonnage of trading vessels of 200 tons and over registered in Australia at 31 December 1969, classified according to: (i) year of construction, (ii) type of trade in which the vessels were engaged, and (iii) vessels built in Australian or in overseas shipyards.

(a) 200 gross tons and over.

### Miscellaneous

#### Shipping freight rates

Lists of shipping freight rates for selected commodities are shown annually in the bulletin *Transport and Communications* and quarterly, in less detail, in the *Quarterly Summary of Australian Statistics*.

#### Shipping casualties

Courts of Marine Inquiry are constituted by a magistrate assisted by skilled assessors, and, when necessary, are held at the principal port in each State and at Launceston (Tasmania). Such courts have power to deal with the certificates of officers who are found at fault. Particulars of shipping losses and casualties reported on or near the coast during each of the years 1964-65 to 1968-69 are shown in the table below.

#### SHIPPING CASUALTIES TO OVERSEAS AND INTERSTATE STEAM AND MOTOR VESSELS(a) AUSTRALIA, 1964-65 TO 1968-69

Year	Shipping losses			Other shipping Casualties			Total shipping casualties		
	Vessels	Net tons	Lives lost	Vessels	Net tons	Lives lost	Vessels	Net tons	Lives lost
1964-65	..	..	..	87	315,762	..	87	315,762	..
1965-66	1	287	13	87	375,161	..	88	375,448	13
1966-67	..	..	..	104	545,927	..	104	545,927	..
1967-68	..	..	..	100	416,332	..	100	416,332	..
1968-69	..	..	..	105	434,028	..	105	434,028	..

(a) Vessels over 50 net tons.

#### Lighthouses; distances by sea; depth of water and tides at main ports

A list of the principal lighthouses on the coast of Australia, giving details of the location, number, colour, character, period, candle-power and visibility of each light will be found in *Transport and Communications*, Bulletin No. 60.

The distances by sea between principal ports of Australia and some important ports in other countries which trade with Australia and the depths of water and tides at principal ports of Australia will be found in *Transport and Communications*, Bulletin No. 60.

## RAILWAYS

### Government railways

Government railways in Australia operate in all States and Territories and provide an important means of transportation. In 1968-69 a total of 75.7 million tons of freight were carried, an increase of 82.9 per cent over the 41.4 million tons carried in 1948-49. However, in the same twenty-year period the number of passengers carried (mostly within the suburban areas of Sydney and Melbourne) declined by 11.7 per cent from 506.7 millions in 1948-49 to 447.4 millions in 1968-69. The number of train miles run during 1968-69 (93.8 million) was only 1.6 per cent greater than in 1948-49, which is an indication of the trend towards heavier train loads with the more powerful motive power now available. Since the introduction of the first mainline diesel-electric locomotives in 1950 their numbers have increased greatly until at 30 June 1969 there were 1,188 throughout Australia. Diesel-electric locomotives during 1968-69 hauled 56 million train-miles, while steam locomotives hauled only 5 million train-miles.

#### Railway development

The first steam-operated railway in Australia ran between Melbourne and Port Melbourne, a distance of two miles, and was opened on 12 September 1854. It was owned and operated by the Melbourne and Hobson's Bay Railway. Within a short time privately-owned railways opened in other States, but owing to the small volume of traffic available they were soon in financial difficulties and all were taken over by the respective State Governments. Under the policy of Government ownership and control the railway networks expanded until at 30 June 1941 there were 27,234 route-miles open for traffic in Australia. This was the greatest mileage ever recorded. Since the 1939-45

War many uneconomic branch lines have been closed. From 1 July 1948 to 30 June 1969, 3,030 miles have been closed, the greatest lengths being in Western Australia (997 miles), Queensland (842 miles), and Victoria (611 miles). During this same period 904 miles of new railway were added to the networks. The following table sets out the route-miles of government railways in each State and Territory at various dates since 1855.

(a) At 31 December.

One feature of the Australian government railways is the variety of gauges to which they are built. There are three principal gauges, 'broad' (5ft 3in), 'standard' (4ft 8½in), and 'narrow' (3ft 6in). Extensive route-mileages of 3ft 6in gauge railway were built in areas where traffic volumes were initially known to be small and where it was imperative to minimise the costs of construction. The following table shows the mileages open in each State and Territory at 30 June 1969 according to gauge.

**GOVERNMENT RAILWAYS: ROUTE-MILEAGE OPEN, BY GAUGE

## Government railway systems

There are six separate State Government railway systems and one Commonwealth railway system. As the Commonwealth system includes mileages in South Australia and Western Australia, and the Victorian system extends into New South Wales, the system route-mileages shown in the following table do not represent mileages within each State and Territory. These are shown in the previous table. The route-mileage of each system open for traffic, according to gauge, at 30 June 1969 is shown in the following table.

GOVERNMENT RAILWAYS: ROUTE-MILEAGE OPEN, BY GAUGE AND SYSTEM  
30 JUNE 1969  
(Miles)

System	Gauge					Total
	5ft 3in	4ft 8½in	3ft 6in	2ft 6in	2ft 0in	
New South Wales	..	(a)6,061	..	..	..	6,061
Victoria	(b)3,965	202	..	9	..	4,176
Queensland	..	69	5,725	..	30	5,824
South Australia	1,631	..	829	..	..	2,460
Western Australia	..	445	(c)3,381	..	..	3,826
Tasmania	..	..	500	..	..	500
Commonwealth	..	1,330	918	..	..	2,248
<b>Australia</b>	<b>5,596</b>	<b>8,107</b>	<b>11,353</b>	<b>9</b>	<b>30</b>	<b>25,095</b>

(a) Includes 270 route-miles which are electrified. (b) Excludes 202 route-miles of 5ft 3in gauge line which almost parallels the 4ft 8½in gauge line between Melbourne and the Murray River. Includes 263 route-miles which are electrified. (c) Excludes 248 miles of 3ft 6in gauge line which parallels the 4ft 8½in gauge line and 68 miles of 3ft 6in/4ft 8½in dual gauge line which are included in the 4ft 8½in gauge line.

The New South Wales system is based on Sydney and extends throughout the State. The Victorian system based on Melbourne radiates throughout the State, extending into areas of southern New South Wales. The Queensland system extends along the coast from Brisbane to Cairns in the north, while branch lines extend inland from Brisbane and the larger coastal cities of Rockhampton and Townsville. The main South Australian system is in the south-east of the State, but an isolated narrow-gauge system operates in the Eyre Peninsula area. The railway system in Western Australia is established in the south-western section of the State, but extends north to Meekatharra and east to Kalgoorlie and Esperance. In Tasmania the main line connects Hobart and Launceston, and there are branch lines along the northern coast.

The Commonwealth Railways comprises four separate railways. The Trans-Australian Railway, extending from Port Pirie to Kalgoorlie, is of 4ft 8½in gauge, as is that part of the Central Australia Railway from Port Augusta (Sterling North) to Maree. A further extension of this railway from Maree to Alice Springs is of 3ft 6in gauge, as is the North Australia Railway from Darwin to Birdum. The Australian Capital Territory Railway from Queanbeyan to Canberra is of 4ft 8½in gauge. In this chapter particulars of the four Commonwealth railways are combined; however, particulars for each railway are shown separately in the annual bulletin *Transport and Communication*.

A graph showing the route-mileages and traffic of all Government railways from 1870 to 1969 appears on plate 30 on page 354.

## Standardisation of railway gauges

### Introduction

The completion of the standard gauge line from Broken Hill to Cockburn in November 1969 saw the final step in the standard gauge link between Fremantle (Western Australia) and Sydney (New South Wales). The first through freight services to operate between Sydney and Fremantle commenced on 12 January 1970 and the new passenger service over the same route was inaugurated on 23 February 1970. This passenger service has been named the *Indian-Pacific* after the oceans it links.

# GOVERNMENT RAILWAYS: AUSTRALIA, 1870 TO 1968-69

## ROUTE MILEAGE AND TRAFFIC

At this stage all mainland capital cities, except Adelaide, are linked by the standard gauge system. This system now extends from South Brisbane to Sydney via Kyogle (New South Wales); from Sydney to Melbourne via Albury (New South Wales); from Sydney to Cockburn (on the South Australia/New South Wales border) via Parkes and Broken Hill; from Cockburn to Port Pirie (South Australia); from Port Pirie to Kalgoorlie (Western Australia) via Port Augusta (South Australia); and from Kalgoorlie to Fremantle via Koolyanobbing, Merredin and Northam (Western Australia). Although the task of linking Australia by standard gauge was commenced in 1912 with the beginning of construction of the standard gauge line between Port Augusta and Kalgoorlie it took almost sixty years to complete. Major factors contributing to the delay in construction were a lack of funds and the failure of successive State and Commonwealth Governments to agree on matters concerning the introduction of the standard gauge.

### Benefits

With the opening of the line from the east coast to the west coast of Australia it was possible for freight and passengers to travel for the first time in the one vehicle for the whole journey. In the past it had been necessary for rail freight consigned across the continent to be transhipped, or bogie exchanged, three times with consequent delays, damage and losses. Similarly passengers had to change trains five times on the journey between Sydney and Perth.

The major benefits of standardisation are the saving in time and costs due to the elimination of the multiple handling of goods and the trans-shipment of passengers at points of break-in-gauge. The through freight services between Sydney and Perth will take 3½ days compared with the 8 to 10 days which applied previously. Similarly passenger services have been improved and travelling time cut from about 80 hours to 65 hours. Further improvements will follow as the new track settles down and higher operating speeds become possible.

### Historical background

The historical background to the standardisation of railway gauges was described in detail in Year Book No. 53, pages 440-445, and therefore will receive only a brief mention in this article. At Federation in 1901 there were three main gauges in operation in the various States. As early as 1846 the British Secretary of State for the Colonies recommended a uniform gauge of 4ft 8½in for railway construction in the Australian colonies. The main purpose of this recommendation was to avoid the problems encountered in England where different gauges were employed. In 1850 the chief engineer of the Sydney Railway Company recommended a gauge of 5ft 3in, the gauge in use in Ireland. The Secretary of State for the Colonies agreed, notified the States of Victoria and South Australia which accepted the gauge of 5ft 3in as the standard for Australia. However, in 1854 the next chief engineer of the Sydney Railway Company advised that a gauge of 4ft 8½in be used, the gauge in use in England and Scotland. This gauge was adopted in New South Wales but Victoria and South Australia did not conform as orders had been placed for 5ft 3in rolling stock. The adoption of 3ft 6in gauge by Queensland, Western Australia and Tasmania and the subsequent use of this gauge for certain lines in South Australia appears to have been based on geographical, financial and economic considerations. It is also likely that the possibility of links between States was considered to be remote.

The difficulties of the railways in providing satisfactory interstate travel and freight transport services were greatly emphasised during both world wars when serious delays occurred in the movement of troops and equipment. A Royal Commission, set up in 1921 to investigate the standardisation of gauges, recommended the conversion of the entire Victorian and South Australian networks to standard gauge and the construction of standard gauge links between Fremantle and Kalgoorlie (Western Australia), Port Augusta and Adelaide (South Australia), and Kyogle (New South Wales) and South Brisbane (Queensland). It recommended the adoption of 4ft 8½in gauge as the standard gauge because of its carrying capacity, speed tolerance, and, more importantly, because the relative cost of converting lines and rolling stock to 4ft 8½in was considerably less expensive than a similar conversion to 5ft 3in. The 4ft 8½in gauge was accepted as the standard gauge at a Premiers' Conference in November 1921. However the only practical result of the 1921 Commission was the extension of the standard gauge from Kyogle (New South Wales) to South Brisbane, which was completed in 1930, with the cost being borne by the Commonwealth Government.

In 1935 an agreement was reached between the Commonwealth and South Australian Governments for the Commonwealth to extend the standard gauge from Port Augusta to Port Pirie (South Australia). This project was completed in 1937.

In March 1944 the Commonwealth Government requested Sir Harold Clapp, Director-General of Land Transport, to submit a report and recommendations regarding the standardisation of Australia's railway gauges on the basis of a 4ft 8½in gauge. As well as making recommendations

similar to those made by the Royal Commission in 1921, the Clapp Report recommended the construction of standard gauge links between Bourke (New South Wales), Dajarra and Townsville (Queensland); and between Dajarra and Birdum (Northern Territory); conversion to standard gauge of the lines between Birdum and Darwin (Northern Territory); and acquisition and conversion of the Silverton Tramway Company's line between Broken Hill (New South Wales) and Cockburn (South Australia); for further details see Year Book No. 53, pages 442-3. Following the Clapp Report an agreement was reached in 1949 between the South Australian and Commonwealth Governments providing for the conversion of the South Australian railway network, except for the narrow gauge in the Port Lincoln Division, to standard gauge. As an interim measure the Commonwealth Government agreed to the conversion of the narrow gauge in the south-east of South Australia (Bordertown-Naracoorte-Mt Gambier and branches) to broad gauge pending conversion to standard gauge when required. This work was completed in 1958.

Another Committee in 1956 under the direction of Mr W. C. Wentworth, M.P., modified the proposals of the Clapp Report and formed a more acceptable plan to standardise the main trunk lines from Albury (New South Wales) to Melbourne (Victoria), from Broken Hill (New South Wales) to Adelaide via Port Pirie (South Australia) and from Kalgoorlie to Fremantle (Western Australia). Except for the standard gauge link between Adelaide and Port Pirie this plan has been achieved.

#### Highlights of capital city standard gauge rail link-up

September 1930 . . .	Kyogle to South Brisbane standard gauge line opened.
March 1945 . . .	Clapp Report on Gauge Standardisation.
October 1956 . . .	Wentworth Report on Gauge Standardisation.
January 1962 . . .	Melbourne-Albury standard gauge line opened.
November 1962 . . .	Work started on Western Australia standard gauge project.
April 1963 . . .	Work started on South Australian standard gauge project
November 1966 . . .	First section of Western Australian standard gauge (Merredin to Fremantle) opened.
April 1967 . . .	First iron ore train from Koolyanobbing to Kwinana.
August 1968 . . .	Western Australian standard gauge line linked with Trans-Australian Railway at Kalgoorlie.
November 1968 . . .	First through Port Pirie-Perth freight train.
March 1969 . . .	Port Pirie-Cockburn standard gauge line completed.
June 1969 . . .	Through passenger service, Port Pirie-Perth inaugurated.
November 1969 . . .	Cockburn-Broken Hill standard gauge line completed.
January 1970 . . .	First through Sydney-Perth freight service.
February 1970 . . .	Official inauguration of <i>Indian-Pacific</i> passenger express.

#### Sydney-Melbourne standard gauge

Sydney and Melbourne were linked by standard gauge in January 1962 when the line from Sydney to Albury was extended to Melbourne in parallel with the existing Victorian 5ft 3in gauge. This line links the two most populous and highly industrialised States and is the busiest interstate rail route in Australia. Since the standard gauge line was opened, rail freight traffic between New South Wales and Victoria has increased by about two-thirds.

To enable work on this project to commence in 1957, an agreement was reached between the Commonwealth, Victorian and New South Wales Governments whereby the Commonwealth advanced the funds and accepted responsibility for 70 per cent of the cost, with the Victorian and New South Wales governments being equally responsible for repaying the remaining 30 per cent plus interest over a 50 year period.

#### The *Indian-Pacific* (Perth to Sydney) Route

The following describes the standardisation of each section of the route followed by the *Indian-Pacific* service and the work undertaken to establish the 2,461 miles of uniform high grade track needed for a fast and efficient freight and passenger train service between Sydney and Perth.

*Sydney to Parkes* (277 miles). This section has always been of standard gauge. It involves the complicated grades, curves and tunnels required to cross the Blue Mountains. Electric motive power is used as far as Lithgow. The track is of a high standard although clearances are limited through the Blue Mountains.

*Parkes to Broken Hill* (422 miles). This line was originally opened in 1927. Although of standard gauge it was built as a developmental line with light rails and only earth ballast. To enable it to handle fast interstate traffic, an upgrading programme was devised. The work included replacement of sleepers and ballasting, and improvement of grades, curves and bridges, at a total cost of about \$12 million, of which \$10 million was provided as a direct grant by the Commonwealth Government. The immediate programme did not include the provision of new rails, and the New South Wales Government has agreed to do this work at its own cost as it becomes necessary.

*Broken Hill to Port Pirie* (247 miles). Previously this line was operated in two parts. The first 35 miles, which were in New South Wales, were owned and operated by a private company The Silverton Tramway Company Limited, and were built under an 1886 Act of the New South Wales Parliament. From the South Australian border (Cockburn to Port Pirie) the line was owned and operated by the South Australian Railways. Both these sections were of 3ft 6in gauge. However, the standardisation project, financed by the Commonwealth Government under the Railway Standardisation (South Australia) Agreement of 1949, covered construction of a new standard gauge railway between Cockburn and Port Pirie. A new railway was constructed in New South Wales between Broken Hill and Cockburn on a more direct route than that operated by The Silverton Tramway Company. The latter work required a new agreement between the Commonwealth, New South Wales and South Australian Governments, resulting in the Railway Agreement (New South Wales and South Australia) of 1968. This railway is owned and operated by the South Australian Railways. The Silverton Tramway Company has ceased mainline operations but is continuing to operate the mine sidings in Broken Hill. Generally, the South Australian section follows the old narrow gauge route.

The project also included provision for extensive marshalling complexes at Broken Hill, Peterborough, Gladstone, and Port Pirie. A short 14 mile section of narrow gauge line between Terowie and Peterborough was converted to broad (5ft 3in) gauge to give a direct link from Adelaide without the previous transfer at Terowie. There are bogie exchange facilities at Port Pirie and Peterborough for transfers between broad (5ft 3in) and standard (4ft 8½in) gauges, and other transfer facilities have been provided at these locations and at Gladstone, where breaks of gauge still exist.

The total cost of the Broken Hill/Port Pirie work, including rolling stock, was about \$52.5 million, all of which was provided by the Commonwealth Government, with 30 per cent to be repaid by South Australia over 50 years.

*Port Pirie to Kalgoorlie* (1,108 miles). This section is known as the Trans-Australian Railway, which is operated for the Commonwealth Government by the Commonwealth Railways. That part of the line from Port Augusta to Kalgoorlie was opened for service in 1917, and that from Port Augusta to Port Pirie in 1937. The Trans-Australian Railway has always been of standard (4ft 8½in) gauge, but until recently the track was not of a very high grade. An upgrading programme is in process involving replacement of the old 80 lb per yard rails with new continuously welded 94 lb per yard rails, and improved sleepers and ballasting. About 300 miles remain to be completed. The total cost of the upgrading work will be about \$15 million, all of which will be provided by the Commonwealth Government.

*Kalgoorlie to Perth* (407 miles). Previously all Western Australian railways were of narrow (3ft 6in) gauge and interstate traffic had to be transhipped at Kalgoorlie (bogie exchange techniques being not suitable for narrow gauge operations). The old narrow gauge line had severe operating restrictions, particularly across the Darling ranges, east of Perth.

This project involved the construction of a new standard gauge railway between Kalgoorlie and the Perth area. The route passes through Koolyanobbing to serve the iron ore traffic from that point. In the Perth area there are connections to a passenger terminal at East Perth, the wharves at Fremantle, the grain terminal at Leighton, the industrial area at Kwinana, and to a major marshalling and servicing complex at Kewdale-Forrestfield which will replace several existing narrow gauge yards in the Perth area.

It also includes a new 64 mile section of track through the Avon Valley. This section is of double dual gauge (i.e. two separate tracks, each with three rails, enabling them to carry both 4ft 8½in and 3ft 6in gauge trains). This section replaces the old narrow gauge line across the Darling Ranges.

The project is financed under the Railway Agreement (Western Australia) of 1961. Of the total cost of about \$130 million, \$110 million will be provided initially by the Commonwealth. The State Government has undertaken further works in conjunction with the project and these are estimated to cost a further \$30 million.

**Future developments in standardisation**

The Commonwealth Government has announced its intention to finance a standard gauge connection between Adelaide and the new standard gauge railway. Details of the connection have yet to be decided. When this link is forged all mainland state capital cities will then be connected to the interstate standard gauge network. However, the most direct link between Adelaide and Melbourne will still be broad gauge (5ft 3in).

The Commonwealth Government has also announced the intention to build a new standard gauge railway between Port Augusta and Whyalla (South Australia). This will be 47 miles long and will be owned and operated by Commonwealth Railways. It will connect Whyalla with the interstate standard gauge network. In addition to general goods and passenger traffic, it will be used for the carriage of considerable quantities of steel products which are at present transported by road between Whyalla and Port Augusta (for rail transport to Melbourne and Sydney).

The Commonwealth Government is also considering proposals for a new standard gauge railway, about 522 miles long, between Tarcoola on the Trans-Australian Railway, and Alice Springs. This would replace the existing narrow gauge railway between Marree and Alice Springs.

The Western Australian Government is considering the possibility of converting to standard gauge the existing narrow gauge railway between Kalgoorlie and Esperance, a distance of about 258 miles.

**Operations of Government railway systems**

Particulars of train-mileages, passenger-journeys, passenger-miles, freight tons carried, and freight ton-miles included in this section refer only to operations for which revenue is received.

Australia	15,885	14,227	1,478	56	15,761	72,775	6,665	1,581	2,836	83,857	-52,211

(a) Includes interest and exchange. (b) Grants to meet losses on country developmental lines, to subsidise payments due from superannuation account. (c) Loan management and loan flotation expenses. (d) Kerang-Koondrook tramway recoup from Treasury. (e) Interest on opened and unopened lines, interest and redemption Mount Isa project fund, and interest on the Queensland 4ft 8½in gauge system. (f) Queensland 4ft 8½in gauge system only. (g) Demolished assets written off. (h) Includes deficit (\$538,823) on the Queensland 4ft 8½in gauge system. (i) Grants towards working expenses and debt charges. (j) Interest and repayment under Railway Standardisation and Railway Equipment Agreements. (k) Miscellaneous goods revenue from rail-ferry service traffic not carried by rail.

## Employment, salaries and wages

The average number of staff employed and salaries and wages paid (\$'000) during the year 1968-69 were as follows: N.S.W. 44,778 (\$150,657), Vic. 27,203 (\$87,292), Qld 23,421 (\$70,892), S.A. 8,027 (\$29,239), W.A. 10,998 (\$34,790), Tas. 2,156 (\$6,700), Cwlth 3,662 (\$13,035, Aust. 120,245 (\$392,605).

### Private railways

There are many private railways operating in Australia. Most of them have been built in conjunction with mining operations and some operate on a very large scale. At 30 June 1970 only three private railways offered services to the public. These are the Emu Bay Railway Company which operates 84 miles of 3ft 6in gauge line from Burnie to Rosebery (Tasmania), the South Maitland Railway Company which operates 14 miles of 4ft 8½in gauge line between Maitland and Cessnock (New South Wales), and the Aramac Shire Council which operates 42 miles of 3ft 6in gauge line from Barcaldine to Aramac (Queensland). Three other private railways which previously offered services to the public have ceased operations in recent years. The Mount Lyell Mining and Railway Company Limited closed its 21 mile line from Strahan to Queenstown (Tasmania) in August 1963. The 277 mile line from Midland Junction to Walkaway (Western Australia) which was owned by the Midland Railway of Western Australia was incorporated in the Western Australian Government Railways system in August 1964. The 35 mile line of the Silverton Tramway Company which linked Broken Hill (New South Wales) with the South Australian Railways at Cockburn (on the South Australia/New South Wales border), closed when the direct standard gauge line between Broken Hill and Cockburn began operating as part of the Sydney to Perth line in January 1970. Each of these three lines was of 3ft 6in gauge.

Several private colliery railways in the Newcastle-Maitland and Wollongong areas (New South Wales) have also closed in recent years. The remaining colliery railways in the Newcastle-Maitland area (including the South Maitland Railways) now operate as subsidiaries of Coal and Allied Industries Limited.

By the year 1965 private railways (excluding sugar cane railways) were operating less than 300 route miles of line. However in recent years this situation has changed radically and private railways are becoming increasingly important for the transport of mineral ores. Four heavy duty 4ft 8½in gauge private railways have opened recently. In 1966 Goldsworthy Mining Limited opened a 70 mile railway from Port Hedland to Mount Goldsworthy, and Hamersley Iron Proprietary Limited opened a 182 mile railway from Dampier to Mount Tom Price. Both of these lines serve recently discovered high grade iron ore deposits in the Pilbara district of Western Australia. A third railway was opened in this area during 1969 by Mount Newman Mining Company Proprietary Limited. It links Port Hedland with Mount Newman, a distance of 265 miles. An extension of Hamersley Iron's line from Mount Tom Price to Paraburdoo (approximately 65 miles) is under construction, and other privately owned railways are planned. In 1967 Broken Hill Proprietary Company Limited began operating a 25 mile railway between Port Lincoln and the lime sands deposits at Coffin Bay (South Australia). This company also operates 60 miles of 3ft 6in gauge railway between Whyalla and the iron ore deposits at Iron Knob and Iron Baron (South Australia), and 4ft 8½in gauge colliery railways in the Wollongong area (New South Wales). There are many smaller private railways serving mines and industrial complexes which, together with the railways mentioned above, now total approximately 900 route miles.

There are also approximately 2,000 route miles of permanent privately operated sugar cane railways or 'tramways' along the north-east coast of Australia, predominantly of 2 ft 0 in gauge. Additional temporary lines are laid during the cane harvesting season. Sugar railways are used for carrying cane and raw sugar in the vicinities of Cudgen (New South Wales), Nambour, Bundaberg, Mackay, Proserpine, Ayr, Giru, Ingham, Tully, Innisfail, Babinda, Gordonvale, Cairns and Mossman (Queensland). They service a total of 30 mills, including seven near Mackay and six near Bundaberg, and connect all mills, except Mossman, with Government Railway systems.

At one time there were a number of short mineral lines operating in Tasmania, and some thousands of miles of various gauges were used for hauling timber from the forests of Victoria, Western Australia and other States, but the last of these was closed in recent years.

## TRAMWAY, TROLLEY-BUS, OMNIBUS, AND FERRY SERVICES

### Systems in operation

*Tramway and trolley-bus.* At 30 June 1969 tramway services were in operation in Melbourne, Bendigo and Ballarat, Victoria and in Adelaide, South Australia. Trolley-buses were in operation in Perth, Western Australia only and these are gradually being replaced by diesel omnibuses. In Brisbane, Queensland, tramway and trolley-bus services were replaced by omnibuses during 1968-69. In Hobart and Launceston, Tasmania, trolley-buses were replaced by omnibuses on 22 November 1968 and 26 July 1968 respectively.

In many parts of Australia private lines used for special purposes in connection with the timber, mining, sugar, or other industries are often called tramways, but they are more properly railways, and the traffic on them has nothing in common with that of the street tramways used for the conveyance of passengers, which are dealt with in this section. For further details, see page 364.

*Motor omnibus.* Services are operated by government or municipal authorities and private operators. Statistics are collected for government and municipal omnibus services located in all State capital cities; Canberra, Australian Capital Territory; Newcastle, New South Wales; Rockhampton, Queensland; Fremantle and the Eastern Goldfields area, Western Australia; Hobart, Launceston and Burnie, Tasmania; Darwin, Northern Territory; and for country road services operated by the Western Australian Government Railways. Omnibus services operated by the Tasmanian Transport Commission in Hobart, Tasmania ceased on 7 December 1968. Particulars of motor omnibus services under the control of private operators for the States of Victoria, Queensland, South Australia, and Western Australia are given in previous issues of this Year Book and in the annual bulletin *Transport and Communication*.

*Ferry.* Ferry passenger services are operated in the following States: New South Wales, at Sydney and Newcastle; Western Australia, on the Swan River at Perth; Tasmania, on the Mersey River at Devonport. Control is exercised by both governmental authorities and private operators. Particulars of the operations of these services are given in previous issues of this Year Book and in the annual bulletin *Transport and Communication*. In Victoria and Queensland the services operated are not extensive. There are no ferry passenger services in South Australia.

#### Government and municipal tramway, trolley-bus and omnibus services

Because of the development in recent years of the various forms of public road transport under the control of single authorities, and the gradual replacement of tramway and trolley-bus services by motor omnibus services, it is not possible to obtain separate statistics for all phases of the activities of each form of transport, particularly financial operations. The two following tables present combined statistics of public tramway, trolley-bus and motor omnibus services with separate details shown for each form of transport where possible.

#### TRAMWAY, TROLLEY-BUS AND OMNIBUS SERVICES: GOVERNMENT AND MUNICIPAL, STATES AND TERRITORIES, 1968-69

### MOTOR VEHICLES

The arrangements for the registration of motor vehicles and the licensing of drivers and riders are not uniform throughout Australia, since they are the function of a separate authority, or authorities, in each State and Territory. Particulars of registration, licences, fees payable, etc., in each State and Territory at 30 June 1970 are shown in *Transport and Communication*, Bulletin No. 60, 1968-69.

Tables in this section include vehicles owned by private individuals, local government authorities, State Governments, and the Commonwealth Government (excluding those belonging to the defence services).

#### Motor vehicles on register

Details of motor vehicles on the register are compiled by up-dating motor vehicle census data from information made available by the various motor vehicle registration authorities in the States and Territories. Censuses of motor vehicles are taken periodically, and at these census dates considerably greater information concerning the particulars shown in the tables following is available. Particulars of the 1962 Census are shown in Year Book No. 53, 1967, *Transport and Communication*, Bulletin No. 54, 1962-63, and in special census publications.

1968(c) . . . . .	354	364	364	386	409	391	335	411	367
1969(c) . . . . .	369	376	378	399	431	394	350	422	381

(a) Excludes tractors, trailers, plant and equipment, etc. (b) Based on motor vehicle census figures. (c) Subject to revision.

## Registrations of new motor vehicles

Particulars of registrations of new motor vehicles are shown by type and make of vehicle in the annual bulletin *Transport and Communication*, and by type, make, and horsepower of vehicle in monthly and annual bulletins of Motor Vehicle Registrations.

In these statistics 'registrations' means registrations processed by the motor vehicle registration authorities in the States and Territories during the period.

## REGISTRATIONS OF NEW MOTOR VEHICLES, BY TYPE OF VEHICLE

State or Territory and year	Motor cars	Station wagons	Ambulances and hearses	Utilities	Panel vans	Trucks	Other truck-types	Omni-buses	Motor cycles	Total
1969—										
New South Wales . . . . .	130,633	20,804	114	12,510	7,539	9,134	506	558	11,999	193,797
Victoria . . . . .	92,039	15,390	56	7,131	3,773	7,550	556	462	4,071	131,028

Australia . . . . .	342,440	58,439	355	36,510	17,279	29,688	1,407	2,041	25,386	513,545
1968 . . . . .	310,051	58,785	393	34,734	16,318	26,705	970	1,745	22,887	472,588
1967 . . . . .	275,594	59,947	329	34,726	15,546	24,590	871	1,470	17,306	430,379
1966 . . . . .	245,175	61,513	349	33,154	13,351	22,970	837	1,399	9,738	388,486
1965 . . . . .	258,082	73,673	346	32,948	14,177	25,373	886	1,544	8,056	415,085
1964 . . . . .	250,050	82,973	336	32,983	14,598	25,360	805	1,384	6,488	414,977

(a) Most other truck-types included with trucks.

## Drivers' and riders' licences

At 30 June 1969 the numbers of licences in force to drive or ride motor vehicles were: New South Wales, 1,907,877; Victoria, 1,435,797; South Australia, 506,036; Western Australia, 404,705; Tasmania, 161,373; Northern Territory, 33,176; Australian Capital Territory, 71,853. Particulars are not available for Queensland.

## ROAD TRAFFIC ACCIDENTS

## Accidents involving casualties, persons killed, persons injured

## ROAD TRAFFIC ACCIDENTS INVOLVING CASUALTIES(a): NUMBER OF ACCIDENTS, PERSONS KILLED OR INJURED STATES AND TERRITORIES, 1968

State or Territory	Number of accidents	Persons killed	Persons injured	Per 100,000 of mean population			Per 10,000 motor vehicles registered(b)		
				Number of accidents	Persons killed	Persons injured	Number of accidents	Persons killed	Persons injured
New South Wales	22,774	1,211	30,919	519	28	705	153	8	207
Victoria	15,377	949	22,095	462	29	664	131	8	188
Queensland	7,118	477	10,151	411	28	585	117	8	167
South Australia	6,421	275	8,902	570	24	790	154	7	213
Western Australia	4,708	320	6,553	517	35	720	132	9	184
Tasmania	1,240	118	1,928	324	31	504	88	8	137

(a) Accidents reported to the police which occurred in public thoroughfares and which resulted in death within thirty days or in bodily injury to an extent requiring surgical or medical treatment. (b) Includes parked vehicles.

## ROADS

## Summary of roads used for general traffic

*Proclaimed or declared roads.* The table following is a summary of the roads proclaimed or declared under the Acts of the several States relative to the operations of the central road authorities, and shows the lengths of various classes proclaimed or declared as at 30 June 1969. The central road authority in each State assumes responsibility under the Act for the whole, or a proportion, of the cost of construction and or maintenance of these roads, the extent varying from State to State and with the class and locality of the roads. Before proclamation of a main road, consideration is given, in general, to the following points: availability of funds; whether the road is, or will be, within one of several classes of main trunk routes; the value of the roads as connecting links between centres of population or business; whether the district is, or will be, sufficiently served by railways. Provision is also made in some States for the declaration of roads other than main roads. The absence of a particular class in any State does not necessarily imply that there are no roads within that State that might be so classified; the classes are restricted only to roads proclaimed or declared under the Acts. A further point to make is that, through various causes, e.g. insufficiency of funds, man-power or materials, etc., construction or maintenance may not keep pace with gazettals of mileages, and, therefore, the condition of a road may not match its status.

PROCLAIMED OR DECLARED ROADS: LENGTHS, STATES, 30 JUNE 1969

(a) 30 June 1967.

Further information on roads, including financial particulars, is included in Chapter 19, Local Government.

### **Australian Road Research Board**

The Australian Road Research Board was established by the road authorities of the Commonwealth and State Governments in 1960 as a national centre for road research. The Board was incorporated in January 1965 as a public company by guarantee, memorandums and articles of association being drafted in general conformity with the constitution which had been accepted in 1960. The company members are the Commonwealth of Australia, the commissioners of the central road authorities in New South Wales, Queensland, South Australia, and Western Australia, the Department of Public Works, Tasmania, and the Country Roads Board, Victoria. The Director-General of the Commonwealth Department of Public Works and the departmental heads of the other road authorities constitute the Board, which controls all policy and activities. Finance for all activities has been provided by the company members on an agreed basis.

The objectives of A.R.R.B. include planning an adequate programme of research and development, arranging for individual projects to be carried out directly and by co-operating organisations, and providing conferences and publications to bring these and other advances to everyone interested in roads. Publications include *Proceedings* of biennial national research conferences commencing in 1962, the journal *Australian Road Research* issued four times a year, and separate reports and bulletins resulting from special research projects. The following list of possible subjects indicates the range of studies provided for in the original constitution: road planning, location, design, safety, materials, construction, maintenance, structures, equipment, traffic and transport, economics, administration, financing, management, accounting, and any other matters affecting the provision, upkeep, use, protection, and development of roads. In planning a creative programme the Board continues to look for those subjects which seem to offer the highest profit to road engineers and the community.

The work on research projects is carried out either directly by the Board's own staff, in many cases acting in co-operation with the road authorities of the various governments, or through co-operative projects established with departments of universities in Adelaide, Brisbane, Melbourne, Perth, and Sydney. The Board has endeavoured to provide or sustain the additional staff required for these external projects, but university staff members furnish advice and co-operation in all parts of these studies.

As with most research organisations, the Board has made very full use of systematic consultation through various advisory groups. Members of these groups have been recruited from persons with the ability to contribute, who were prepared to serve as individuals and not as representatives of particular organisations. In an attempt to secure completely unfettered counsel, most of the members of the advisory groups were drawn from outside the Board and its staff. The various committees include a general Advisory Council and several particular types of specialist committees. In addition, the technical committees of the National Association of Australian State Road Authorities have, from the initiation of A.R.R.B., been a continuing and valuable source of advice and consultation. In this way, therefore, exceedingly valuable advice has been obtained from individuals drawn from the State road authorities, local authorities, C.S.I.R.O., Australian universities, several Commonwealth departments, and from private companies and consultants.

### **Commonwealth Bureau of Roads**

The Commonwealth Bureau of Roads is a Statutory Authority established under the provisions of the *Commonwealth Bureau of Roads Act* 1964. The Bureau consists of a full-time Chairman and two part-time Members appointed by the Governor-General and is served by a small secretariat. Broadly, the responsibilities of the Bureau are to advise the Commonwealth Government, through the Minister for Shipping and Transport, on matters relating to roads and road transport and government financial assistance in this area.

## **CIVIL AVIATION**

### **Department of Civil Aviation**

Control of civil aviation in Australia is exercised by the Department of Civil Aviation, which was established in 1939 to take over from the Civil Aviation Board the regulation of civil aviation in Australia. The Department's jurisdiction covers not only Australia but also Papua, New Guinea and areas of the Indian and Pacific Oceans. Year Books Nos 16, 19 and 38 trace the establishment of civil aviation control in Australia and the appropriate Acts of Parliament and Regulations under which this control is exercised. The present functions of the Department are shown in Year Book No. 51, pages 578-9, and further details about its operations are given in the annual reports to the Commonwealth Parliament by the Minister for Civil Aviation.

**Regular air services within Australia**

*Interstate services.* Scheduled interstate services with passenger and all-freight aircraft are provided by two airlines only, the private enterprise airline Ansett Airlines of Australia (a subsidiary of Ansett Transport Industries) and the Commonwealth-owned Trans-Australia Airlines. All principal routes are competitive, with both airlines providing equal capacities in accord with legislation passed by the Commonwealth Parliament. The two principal Acts which establish the legislative basis of this controlled competition are the *Airlines Agreement Act 1952-1961* and the *Airlines Equipment Act 1958*. The Airlines Equipment Act established the machinery for the achievement and maintenance of comparable, but not necessarily identical, aircraft fleets between T.A.A. and Ansett Airlines of Australia, and is designed to prevent the provision of excess aircraft capacity. The Airlines Agreement Act established the basis of control of the two-airline competitive system and extended this machinery to 1977.

In addition to purely interstate services, both Ansett Airlines of Australia and Trans-Australia Airlines operate routes to New Guinea and non-competitive intrastate routes in Australia. The Ansett Airlines of Australia non-competitive routes radiate mainly from Melbourne, while those of Trans-Australia Airlines are located mainly within Queensland and Tasmania. In addition, Trans-Australia Airlines operate services within Papua-New Guinea in competition with another Ansett subsidiary, Ansett Airlines of Papua, and the independent Papuan Airlines.

At 30 June 1969 the Ansett Airlines of Australia fleet included four Boeing 727's, five DC-9's, three Electras, five Viscounts, eight Friendships, three Carvairs, a number of DC-4's and DC-3's and two helicopters. At the same date Trans-Australia Airlines operated a fleet of four Boeing 727's, five DC-9's, three Electras, four Viscounts, twelve Friendships and smaller aircraft.

*Intrastate services.* In addition to the intrastate services operated by Ansett Airlines of Australia and Trans-Australia Airlines there are a number of smaller regional airlines operating from Sydney (Airlines of New South Wales and East-West Airlines), Adelaide (Airlines of South Australia), Perth (MacRobertson Miller Airlines), and Alice Springs (Connellan Airways). With the exception of Connellan Airways, which provides regular service to outback homesteads and communities, all of these are concerned primarily with traffic moving to and from the respective capital city. With the exception of the independently owned East-West Airlines and Connellan Airways, all regional airlines are subsidiaries of Ansett Transport Industries. The larger aircraft used by these regional airlines are Fellowships, Friendships and Convairs, supported by DC-3's. Connellan Airways uses smaller aircraft types.

*Commuter services.* These are not airline services but regular flights by charter firms with small single and twin-engined aircraft operating to fixed and published timetables. They provide regular air links between many centres, towns and country areas which are either not served by the major airlines or have no direct air service with their capital or nearest major provincial city. The first commuter service approved was for Opal Air Pty Ltd, of Coober Pedy (S.A.), to operate between Adelaide and the South Australian opal fields. At 30 June 1969 sixteen charter operators were operating commuter services in Australia. Details of the operations of these commuter services are excluded from the statistics shown in this section.

*Internal operations.* Particulars of the revenue operations of all regular internal air services during each of the years 1964-65 to 1968-69 are set out in the next table.

**CIVIL AVIATION: OPERATIONS OF REGULAR INTERNAL SERVICES  
AUSTRALIA(a), 1964-65 TO 1968-69**

		1964-65(b)	1965-66	1966-67	1967-68	1968-69
Hours flown . . . . .	number	256,231	261,535	255,510	240,801	244,606
Miles flown . . . . .	'000	52,323	55,020	56,759	56,724	60,348
Passengers—						
Embarkations . . . . .	number	3,763,936	4,157,873	4,424,652	4,668,153	5,184,828
Passenger-miles . . . . .	'000	1,639,087	1,831,360	1,972,469	2,125,314	2,401,783
Freight—

Tons uplifted . . . . .	short tons	7,736	8,633	9,587	9,417	9,876
Ton-miles(c) . . . . .	'000	4,074	4,587	5,144	5,174	5,498

(a) Includes flights of all Australian-owned airlines with the exception of those of Qantas Airways Limited between airports located within the Commonwealth. (b) Excludes, for flights between Australia and Papua-New Guinea, operations between airports located within the Commonwealth. (c) In terms of short tons.

*Internal passenger embarkations and disembarkations*

Traffic statistics have been compiled by aggregating for all individual airline flights the traffic loaded and unloaded at each airport. Flights between Australia and Papua-New Guinea and Australia and Norfolk Island are included. At ports where different flights connect, figures are overstated to the extent of the through traffic transferring between flights.

**INTERNAL AIRWAYS PASSENGER EMBARKATIONS AND  
DISEMBARKATIONS AT PRINCIPAL AUSTRALIAN AIRPORTS  
1964-65 TO 1968-69**

**International activity**

*International organisations.* A full report of the formation of the International Civil Aviation Organization, the Commonwealth Air Transport Council, and the South Pacific Air Transport Council appeared in Year Book No. 37, and particulars of subsequent activity in the international field were included in No. 38. The International Civil Aviation Organization had a membership of 116 nations in June 1969. Australia has continued its position as a member of the Council, which it has held since I.C.A.O. was established in 1947. Further details will be found in Year Book No. 40 and earlier issues.

*International agreements.* Australia had air service agreements with twenty-two countries at 31 December 1969. They were Austria, Britain, Canada, Ceylon, France, Federal Republic of Germany, India, Indonesia, Iran, Ireland, Italy, Japan, Lebanon, Malaysia, Nauru, Netherlands, New Zealand, Singapore, South Africa, Thailand, United Arab Republic, and the United States of America. Under these agreements Australia is granted rights to operate services between Australia to and through the countries in question; these rights are exercised by Australia's international airline Qantas. In return, the designated airline of the other countries which are partners to these agreements is granted traffic rights in Australia. Australia also had air service arrangements with fifteen other countries at 31 December 1969. These were Burma, Cambodia, the Republic of China, Greece, Iraq, Laos, Mexico, the Philippines, Portugal, Saudi Arabia, Syria, Turkey, the Republic of Vietnam, and Yugoslavia. Qantas also operates services through several of these countries under these arrangements and in other cases overflies the country concerned.

*International air services.* In October 1969 fourteen overseas international airlines were operating regular scheduled services to Australia. These are: Air-India (India), Air New Zealand (New Zealand), Alitalia (Italy), British Overseas Airways Corporation (United Kingdom), Canadian Pacific Air Lines (Canada), Deutsche Lufthansa (Federal Republic of Germany), Garuda (Indonesia), Japan Air Lines (Japan), K.L.M. Royal Dutch Airlines (Netherlands), Malaysia-Singapore Airlines (Malaysia and Singapore), Pan-American World Airways (United States of America), Philippine Air Lines (Philippines), South African Airways (South Africa), and Union de Transports Aeriens (France). Trans-Australia Airlines operates between Darwin and Portuguese Timor under charter to Transportes Aereos de Timor. Qantas, Australia's international airline, operates a fleet of twenty-eight aircraft of which twenty-one are Boeing 707-338C jet aircraft. Qantas has also ordered four Boeing 747B superjet aircraft for delivery between August and September 1971. All the shares in Qantas Airways Limited are owned by the Commonwealth Government.

*International operations.* The table following shows particulars of international airline traffic during 1968-69 moving into and out of an area which embraces the Commonwealth of Australia, Papua-New Guinea, and Norfolk Island. These figures do not include traffic between Australia and Papua-New Guinea and Norfolk Island.

**CIVIL AVIATION: INTERNATIONAL AIRLINE TRAFFIC  
TO AND FROM AUSTRALIA(a), 1968-69**

<i>Type of traffic</i>	<i>Aircraft movements</i>	<i>Passengers</i>	<i>Freight</i>	<i>Mail</i>
Traffic to Australia—			short tons	short tons
Qantas Airways Limited . . . . .	2,680	204,801	8,198	918
Other airlines . . . . .	3,549	247,913	8,094	1,915
<i>All airlines . . . . .</i>	<i>6,229</i>	<i>452,714</i>	<i>16,292</i>	<i>2,833</i>
Traffic from Australia—				
Qantas Airways Limited . . . . .	2,765	189,563	4,802	953
Other airlines . . . . .	3,541	211,730	4,426	861
<i>All airlines . . . . .</i>	<i>6,306</i>	<i>401,293</i>	<i>9,228</i>	<i>1,814</i>

(a) Australian mainland and adjacent Territories (Papua-New Guinea and Norfolk Island).

Particulars of revenue operations of Australian regular overseas services are shown in the following table. These operations include all stages of Qantas flights linking Australia with external territories and overseas countries, and stages external to the Commonwealth for flights of other Australian-owned airlines; they exclude flights over stages located within Papua-New Guinea (*see* footnote (a) to table following for 1964-65).

**CIVIL AVIATION: OPERATIONS OF AUSTRALIAN REGULAR OVERSEAS SERVICES  
1964-65 TO 1968-69**

	<i>1964-65(a)</i>	<i>1965-66</i>	<i>1966-67</i>	<i>1967-68</i>	<i>1968-69</i>

Miles flown . . . . . '000	28,126	29,635	29,201	31,914	33,591
Passengers—					
Embarkations . . . . . number	443,665	448,623	466,849	562,855	642,524
Passenger-miles . . . . . '000	1,527,039	1,569,513	1,608,868	1,970,008	2,247,241
Freight—					
Tons uplifted . . . . . short tons	10,293	11,451	12,259	13,733	18,537
Ton-miles(b) . . . . . '000	51,826	61,836	62,939	67,733	92,488
Mail—					
Tons uplifted . . . . . short tons	3,124	3,252	2,697	3,170	2,862
Ton-miles(b) . . . . . '000	19,891	20,914	16,500	19,209	15,680

(a) Includes, for flights between Australia and Papua-New Guinea, operations over stages located within the Commonwealth and within Papua-New Guinea. (b) In terms of short tons.

### General aviation

General aviation activity, which covers all non-airline operations such as charter, aerial work and private flying, has grown rapidly throughout Australia in the post-war period so that now it is an important sector of the Australian aviation industry. In 1968, hours flown totalled 1.033m. compared with 341,594 hours flown by Australian airline aircraft. At 30 June 1969, aircraft employed in general aviation numbered 3,357.

### Aerodromes

The number of aerodromes throughout Australia and its External Territories at 30 June 1969 was 681. One hundred and eighteen were owned by the Commonwealth Government and 563 by local authorities and private interests. Capital expenditure on aerodrome and building construction was \$29.0 million in 1968-69. Maintenance expenditure on Commonwealth-owned aerodromes during 1968-69 was \$3.75 million, and development grants to licensed aerodromes participating in the Local Ownership Plan totalled \$750,000. The two major projects at Melbourne and Sydney are proceeding satisfactorily. The work at Sydney, which involves a major runway extension and a new international terminal (opened in May 1970), is estimated to cost \$50 million. The new Melbourne airport is to cost \$50 million including site acquisition. The projects as a whole are expected to be completed in 1970, but progressive use is being made of the facilities as they become available.

### Airways facilities

A total of 365 navigational aids were in service in September 1969. The total includes 205 non-directional beacons (NDB), 96 distance measuring equipment (DME) (including 4 international standard units), 23 visual-aural ranges (VAR), 25 VHF Omni-directional ranges (VOR), 14 instrument landing systems (ILS) and 2 twin locator approach systems.

One hundred and seventeen aerodromes are now equipped with night landing facilities and forty-two visual approach slope indicators (VASIS) are now operating comprising thirty-six Australian designed 'T' systems and six ICAO Red-White systems.

Five long range surveillance radars are in operation.

### Aircraft on the Australian register

#### CIVIL AVIATION: AIRCRAFT ON AUSTRALIAN REGISTER, 30 JUNE 1969

Type of aircraft	Number of engines				Total aircraft
	One	Two	Three	Four	
Fixed-wing powered aircraft—					
Turbo-jet . . . . .	..	14	8	22	44
Turbo-prop . . . . .	6	68	..	26	100
Piston-engined 20,000 lb and over maximum take-off weight . . . . .	..	52	..	15	67
Piston-engined under 20,000 lb maximum take-off weight . . . . .	2,879	370	6	3	3,258
Helicopters . . . . .	89	1	..	..	90
<i>Total powered aircraft . . . . .</i>	<i>2,974</i>	<i>505</i>	<i>14</i>	<i>66</i>	<i>3,559</i>
Gliders . . . . .	..	..	..	..	240

Particulars of powered aircraft according to manufacturer and air navigation class in which registered, and further details of gliders, may be found in the bulletin *Transport and Communication*, No. 60, 1968-69.

### Civil aviation registrations, licences, etc., in force in Australia

At 30 June 1969 there were 3,559 aircraft registered in Australia (including 240 gliders) and 1,951 registered aircraft owners. There were also, at 30 June 1969, 25,783 pilots' licences in force of which 10,218 were private pilots' licences, 3,357 commercial pilots' licences, and 10,512 student pilots' licences. Flight radio-telephone operators' licences numbered 16,331. The number of aerodromes in Australia at 30 June 1969 totalled 491 of which 108 were government and 383 licensed, i.e. under the control of a municipality, shire, station owner, etc. There were also 13 flying boat bases in operation.

Accidents and casualties

CIVIL AVIATION: ACCIDENTS INVOLVING CASUALTIES(a)  
AUSTRALIA(b), 1964-65 TO 1968-69

	1964-65	1965-66	1966-67	1967-68	1968-69
Number . . . . .	17	37	38	36	17
Persons killed . . . . .	15	29	66	47	47
Persons seriously injured . . . . .	7	28	24	29	20

(a) Accidents involving civil aircraft which resulted in death or serious injury. Excludes parachutists killed on contact with earth after an uninterrupted fall. (b) Excludes accidents outside Australia involving aircraft on the Australian register.

POSTS; INTERNAL AND OVERSEAS TELECOMMUNICATION SERVICES  
RADIOCOMMUNICATION STATIONS

In this division particulars for the Australian Capital Territory are included with those for New South Wales, and the South Australian figures include particulars for the Northern Territory, unless otherwise indicated. The Central Office of the Postmaster-General's Department is located in Melbourne, Victoria.

Postmaster-General's Department—General

Under the provisions of the *Post and Telegraph Act* 1901-1968 the Postmaster-General's Department is responsible for the control and operation of postal, telegraphic and telephonic services throughout Australia. The Postmaster-General's Department is also responsible for the provision and operation of the transmitters and technical facilities, other than studio equipment, required for broadcasting and television services by the Australian Broadcasting Commission (*see* pages 387-89), and, in conjunction with the Overseas Telecommunications Commission (*see* pages 385-87), with whom there is close co-operation, provides facilities for communication with overseas countries. Subsidiary to its major activities, the Postmaster-General's Department performs a number of important functions for other Commonwealth and State departments including the collection of broadcast and television licence fees, war service and repatriation repayments, the provision of banking facilities on behalf of the Commonwealth Savings Bank, the sale of tax and duty stamps, the collection of land tax and the over-the-counter distribution of a variety of official forms.

Research

The Postmaster-General's Department maintains its own research facilities as part of the headquarters organisation in Melbourne. The P.M.G. Research Laboratories had an establishment in 1969 of 390 including 128 professional staff, mainly engineers, physicists, chemists and metallurgists. The main responsibilities of the laboratories are to conduct research and development in telecommunications theory and practice, particularly as applying to the Australian region; to appraise new developments in telecommunication equipment; and to design apparatus and systems required for special applications in the telecommunications and mail handling networks in Australia in cases where these needs could not be met from commercial sources.

Postal facilities

The following table shows the number of post offices, the area in square miles and the number of inhabitants to each post office (including non-official offices), and the number of inhabitants to each 100 square miles in each State and in Australia at 30 June 1969.

POSTAL FACILITIES: RELATION TO AREA AND POPULATION, STATES  
30 JUNE 1969

	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	Aust.

<b>Australia</b>	<b>153,037</b>	<b>58,808</b>	<b>1,584</b>	<b>2,106</b>	<b>2,245,006</b>	<b>412,196</b>	<b>22,092</b>	<b>12,748</b>

(a) Number of distinct articles handled. (b) Includes letters, cards and other postal articles enclosed in envelopes and sorted with letters. (c) Includes newspapers and postal articles not included in letter mail. (d) Includes registered, cash on delivery and duty parcels. (e) Includes registered articles other than parcels.

POSTAL ARTICLES HANDLED(a): AUSTRALIA, 1964-65 TO 1968-69

('000)

Year	Letters (b)	Newspapers and packets (c)	Parcels (d)	Registered articles (e)	Total postal articles handled
1964-65	2,032,287	380,178	18,156	12,190	2,442,811
1965-66	2,123,338	401,578	18,327	12,886	2,556,128
1966-67	2,232,881	417,980	19,196	13,097	2,683,154
1967-68	2,203,089	411,091	20,783	12,908	2,647,871
1968-69	2,245,006	412,196	22,092	12,748	2,692,042

(a) Number of distinct articles handled. (b) Includes letters, cards and other postal articles enclosed in envelopes and sorted with letters. (c) Includes newspapers and postal articles not included in letter mail. (d) Includes registered, cash on delivery and duty parcels. (e) Includes registered articles other than parcels.

During 1968-69 the cost of the carriage of mails, as disclosed by the Profit and Loss Account of the Postal Service, was as follows: road, \$11,181,902; railway, \$4,527,645; sea, \$645,853; air—internal, \$4,746,175, overseas, \$14,576,520; total, \$35,678,095.

Money orders and postal orders

The issue of money orders and postal orders is regulated by sections 74-9 of the *Post and Telegraph Act 1901-1968*. The maximum amount for which a single money order payable within Australia may be obtained is \$80, but additional orders will be issued upon request when larger amounts are to be remitted. The maximum amount permitted to be sent by any one person to a person or persons outside Australia is \$50 a week. A postal order is not available for a sum larger than eight dollars. The following table shows the number and value of money orders and postal orders issued in Australia on each of the years 1964-65 to 1968-69 and the income therefrom which has accrued to the Post Office.

**MONEY ORDERS AND POSTAL ORDERS(a): TRANSACTIONS, AUSTRALIA  
1964-65 TO 1968-69**

Year	Money orders(b)			Postal orders(a)		
	Issued		Total commission received	Issued		Fee
	Number	Value		Number	Value	
	'000	\$'000	\$'000	'000	\$'000	\$'000
1964-65 . .	(c)12,176	376,356	2,103	15,338	16,737	618
1965-66 . .	(c)12,634	407,275	2,200	15,010	16,184	604
1966-67 . .	(c)12,594	434,942	2,332	13,499	18,454	629
1967-68 . .	(c)11,373	438,668	2,544	(d)12,364	22,149	657
1968-69 . .	9,672	209,868	2,637	13,525	27,262	772

(a) Postal orders replaced postal notes on 1 June 1966. (b) Money orders issued for payment in Australia and overseas. (c) Includes official money orders used in bringing to account telephone accounts and collections on War Service Homes repayments. (d) Postal orders for \$5, \$6, \$7 and \$8 were introduced in October 1967. Until then the highest denomination was \$4.

Of the total money orders issued in Australia during 1968-69, 9,223,363 valued at \$206,020,143 were payable in Australia, and 448,966 valued at \$3,847,895 were payable overseas. Of the total money orders paid in Australia during 1968-69, 9,633,920 (\$207,873,861) were issued in Australia, and 197,244 (\$3,614,993) were issued overseas.

Of the total postal orders paid in Australia during 1968-69 (13,729,761 valued at \$27,700,293), 10,333,785 (\$21,690,035) were paid in the State in which issued, and 3,395,976 (\$6,010,258) were paid in States other than those in which issued.

### Internal telecommunication services

A review of the development of telegraph services in Australia up to 1921 appeared in Year Book No. 15, page 625, and subsequent developments of importance have been dealt with in later issues. Internal telecommunication operations now comprise telephone, telegraph, and telegraph exchange (telex) services.

#### Wire and pole mileages

At 30 June 1969 there were 20,972,767 single wire miles of cable and 1,160,006 miles of aerial wire used for telecommunication purposes in Australia. The aerial wires are mounted on 110,943 miles of pole routes.

#### Coaxial cable and broadband relay systems

In recent years trunk telephone, telegraph and television channels have been increasingly provided by coaxial cable and radio relay systems. Broadband radio relay systems and coaxial cables are an alternative means of providing transmission facilities, each radio bearer being similar in carrying capacity to a coaxial tube. At 30 June 1969 there were 12,919 tube miles of coaxial cable and 26,400 bearer miles of radio relays in operation.

#### Telephone services in operation

The following table shows the number of services in operation in each State at 30 June 1969 classified according to type of service, type of exchange to which connected, and location. Telephone services connected to exchanges located within fifteen miles of the Sydney and Melbourne and ten miles of the Brisbane, Adelaide, Perth, and Hobart General Post Offices are defined as being within a metropolitan area.

## Internal telephone traffic

LOCAL AND TRUNK LINE TELEPHONE CALLS: AUSTRALIA  
1964-65 TO 1968-69

Year	Effective paid local calls		Trunk line calls		Total calls '000
	Total '000	Per service number	Total '000	Per service number	
1964-65	2,043,000	1,016	106,500	53	2,149,500
1965-66	2,081,000	1,008	116,600	56	2,197,600
1966-67	2,179,000	1,001	134,200	62	2,313,200
1967-68	2,295,000	999	151,600	66	2,446,600
1968-69	2,442,000	1,004	172,200	71	2,614,200

Subscriber trunk dialling (S.T.D.) facilities were introduced during the year 1961-62 from Canberra to the Sydney network and from Warragul (Victoria) to Melbourne. At the end of June 1969 subscriber trunk dialling was in operation at 659 exchanges, connected to approximately 1,670,695 services.

## Internal telegraphs

Telegrams can be lodged at any post office, telephone office or from any public telephone equipped for multi-coin operation. In addition, telegrams can be despatched from any subscriber's telephone or telegraph exchange (telex) equipment. The number of telegrams of various types transmitted within the Commonwealth during the years 1964-65 to 1968-69 is set out hereunder.

INTERNAL TELEGRAPH TRAFFIC: AUSTRALIA, 1964-65 TO 1968-69  
( '000 )

Year	Ordinary (a)	Urgent	Press	Letter- grams	Meteoro- logical service	Service	Total telegrams
1964-65	18,302	532	96	65	912	643	20,550
1965-66	18,605	550	100	59	1,005	717	21,036
1966-67	19,019	494	78	47	1,014	719	21,372
1967-68	18,723	440	68	38	1,060	719	21,047
1968-69	18,543	440	68	33	1,068	718	20,869

(a) Includes radiograms.

## Teleprinter exchange service (telex)

Particulars of the operations of the teleprinter exchange network, which are additional to the telegraph traffic shown above, are as follows:

TELEPRINTER EXCHANGE NETWORK (TELEX)  
SERVICES AND INTERNAL CALLS, AUSTRALIA  
1963-64 TO 1968-69

Year	Services at end of year	Internal calls during year
1963-64	1,815	1,492,024
1964-65	2,179	1,867,701

### Overseas telecommunication services

The Overseas Telecommunications Commission (Australia) is the authority responsible for the establishment, maintenance and operation of telecommunication services between Australia and other countries, with ships at sea and to and between Australia's external Territories.

The Commission was established under the *Overseas Telecommunications Act 1946*. This Act implemented, in Australia, a recommendation of the 1945 Commonwealth Telecommunications Conference for national ownership of the external telecommunications services of the British Commonwealth countries concerned. (Details of overseas communication systems operating in Australia prior to 1946 and developments leading to the establishment of the Commission were published in Year Book No. 37, pages 220-4.)

In 1966 the Commonwealth countries completed a review of the machinery for their collaboration in telecommunications and the period since then has been one of transition from the arrangements which were established by the Commonwealth Telegraphs Agreement of 1948 to those of the Commonwealth Telecommunications Organisation recommended by the 1966 Commonwealth Telecommunications Conference. On 31 March 1969, the Commonwealth Telegraphs Agreements of 1948 and 1963 were formally terminated and from 1 April 1969 the new Commonwealth Telecommunications Organisation became fully operative. Also with effect from 1 April 1969 the Commonwealth Telecommunications Organisation Financial Agreement entered into force providing financial arrangements previously provided under the Commonwealth Telegraphs Agreements.

In association with the Post Office within Australia and with communication carriers in other Commonwealth and foreign countries, the Commission provides public message telegram, telephone, telex, photo-telegram, leased circuit and television services to most countries and places throughout the world.

To meet Australia's increasing demand for overseas communication channels, and because of limitations to performance and capacity inherent in telegraph cables and high frequency radio systems, the Commission, in partnership with the overseas telecommunications authorities of Britain, Canada and New Zealand, installed a large capacity telephone cable across the Pacific Ocean, connecting Australia, New Zealand and Canada via Suva and Honolulu. The cable (COMPAC) was opened in December 1963 and forms part of a British Commonwealth large capacity cable scheme, in which a complementary cable between Britain and Canada (CANTAT) was officially opened in December 1961. The two cable connections are linked across Canada by a microwave system. The Commonwealth cable system feeds into the United States of America network at Hawaii and into the European network at London.

The south-east Asia cable project (SEACOM), extending the large capacity telephone cable system from Sydney to Singapore and Kuala Lumpur via Cairns, Madang, Guam, Hong Kong, and Kota Kinabalu, was opened for service on 30 March 1967.

The Commonwealth Cable Management Committee, comprising representatives of Britain, Canada, Australia, New Zealand, Malaysia and Singapore, administers COMPAC and SEACOM.

In 1964 a number of countries, including Australia, agreed to establish a global commercial communications satellite system at an estimated cost, for the space segment, of \$US200m. Broadly the term 'space segment' describes the orbiting satellites and the tracking, control, command, and related facilities required to support their operation. Australia, represented by the Commission, is one of the eighteen representatives on the Interim Communications Satellite Committee (ICSC) which is the management body of the sixty-nine nation International Telecommunications Satellite Consortium (INTELSAT).

In December 1968, the Interim Communications Satellite Committee completed its report to INTELSAT member Governments on permanent arrangements to supersede those which had been provided for in the 1964 Interim Agreement. As prescribed in that Agreement, an intergovernmental Conference, to consider the Committee's report and to define the permanent arrangements for the International Telecommunications Satellite Consortium (INTELSAT), was held in Washington during February/March 1969. The Conference did not reach agreement on the new arrangements and resumed in Washington in February 1970.

In March 1968 a satellite earth station at Moree, New South Wales, owned and operated by the Commission, commenced commercial communications, including a capability for television transmissions/receptions, through an INTELSAT II satellite launched in January 1967 and positioned in stationary orbit 22,300 miles above the equator. This station was the first in Australia constructed as a 'standard' station of the INTELSAT network and carries direct circuits between Australia and other countries in the Pacific Region. Since 15 February 1969 these services have been provided through a Pacific Ocean INTELSAT III satellite. The link with Japan, the first by satellite from Australia to an Asian country, was established for commercial operation on 14 March 1969.

The Commission's small satellite earth station at Carnarvon continued to provide a direct link between Western Australia and the United States of America for the National Aeronautics and Space Administration (NASA).

On 1 February 1969 the Carnarvon earth station commenced service as a tracking, telemetry and command (T.T. & C.) station for INTELSAT satellites. In the period up to 1 October 1969 it performed this function on a part-time basis while also providing communications for the National Aeronautics and Space Administration. From 1 October 1969 when the new standard earth station at Carnarvon became available for commercial services, the original station was fully devoted to T.T. & C.

The T.T. & C. function provides for four such stations to be spaced around the world so that any INTELSAT satellite can be viewed and controlled no matter where it may be. These stations keep a continuous check of the position of each satellite and its functioning by means of signals transmitted by the satellite. When required, signals are transmitted to a satellite to control the direction of its antenna and to change its orbital position. During launches, these stations transmit the commands which fire the satellite motor to place it in final orbit. The Interim Communications Satellite Committee selected the Carnarvon station for this purpose after calling competitive tenders from earth station owners in the coverage zone of the Indian Ocean and Pacific Ocean satellites.

An additional satellite earth station for the Commission, at Ceduna, South Australia, was officially opened in February 1970. This station, will operate through an Indian Ocean INTELSAT III satellite to earth stations in the United Kingdom, Europe, Africa, the Middle East and Asia.

#### International telecommunication traffic

Particulars of the volume of international telegraph services, originating and terminating in Australia, during the years ended 31 March 1968 and 1969 are shown in the following table.

#### INTERNATIONAL TELEGRAPH SERVICES: AUSTRALIA YEARS ENDED 31 MARCH 1968 AND 1969 (\*000 words)

### Coastal stations

The Overseas Telecommunications Commission operates fifteen coastal radio stations at points around the Australian coast, three on the Papua-New Guinea coast, and one at Norfolk Island. Three of these stations are operated in conjunction with the Department of Civil Aviation. During the year ended 31 March 1969 the coastal radio service handled 6,096,191 paid words to ships and 3,504,773 words from ships. Ship calls over the radiotelephone service extended over 80,416 paid minutes.

### Radiocommunication stations authorised

At 30 June 1969 there were 117,040 civil radiocommunication stations authorised for operation in the Commonwealth and its Territories. Of these, 5,292 were stations established at fixed locations, 9,266 were land stations which were established at fixed locations for communication with mobile stations, 96,519 were mobile stations and 5,963 amateur stations. Particulars of broadcasting stations and broadcast listeners' licences are shown on pages 388 and 390 respectively.

## BROADCASTING AND TELEVISION

Broadcasting and television services in Australia operate under the *Broadcasting and Television Act 1942-1969* and comprise the National Broadcasting Service, the National Television Service, the Commercial Broadcasting Service, and the Commercial Television Service. General control of these services is a function of the Australian Broadcasting Control Board. Licence fees for commercial broadcasting and television stations are payable under the *Broadcasting Stations Licence Fees Act 1964-1966* and the *Television Stations Licence Fees Act 1964-1966* respectively.

Particulars of the composition, functions and responsibilities of the Australian Broadcasting Control Board are shown in Year Book No. 51, pages 594-5. The functions of the Board as shown therein were subsequently amended by repealing the Board's power to regulate the establishment and operation of networks. Pursuant to the *Broadcasting and Television Act 1942-1969*, the Australian Broadcasting Commission now consists of nine members, one of whom shall be a woman.

### Broadcasting services

#### The National Broadcasting Service

In sound broadcasting the programmes of the National Broadcasting Service are provided by the Australian Broadcasting Commission through transmitters operated by the Postmaster-General's Department.

*Technical facilities.* At 30 June 1969 the National Broadcasting Service comprised seventy-nine transmitting stations, of which seventy-one were medium frequency and eight high frequency.

The medium-frequency transmitters operate in the broadcast band 525 to 1,605 kilocycles a second. The high-frequency stations, using frequencies within the band three to thirty megacycles a second, provide services to listeners in sparsely populated parts of Australia such as the north-west of Western Australia, the Northern Territory, and northern and central Queensland.

Many of the programmes provided by country stations are relayed from the capital cities, high-quality programme transmission lines being used for the purpose. A number of programme channels are utilised to link national broadcasting stations in the capital cities of Australia, and, when necessary, this system is extended to connect both the national and commercial broadcasting stations.

At 30 June 1969 fifty-nine of the Australian medium-frequency stations were situated outside the six State capital cities. Two additional country stations had been authorised but had not commenced to operate at 30 June 1969.

*Programme facilities.* The programmes of the Australian Broadcasting Commission cover a wide range of activities. The proportion of broadcasting time allocated to the various types of programme during 1968-69 was as follows: classical music, 24.1 per cent; entertainment, 28.4 per cent; news, 8.9 per cent; sporting, 6.4 per cent; light music, 2.6 per cent; spoken word, 6.7 per cent; drama and features, 3.9 per cent; education, 3.5 per cent; Parliament, 4.2 per cent; religious, 3.0 per cent; children's programmes, 2.4 per cent; rural, 2.5 per cent; and presentation, 3.4 per cent. Further particulars of the operations of the Australian Broadcasting Commission in respect of music, drama and features, youth education, talks, rural broadcasts, news, and other activities are shown in Year Book No. 51, pages 596-7.

### The Commercial Broadcasting Service

Commercial broadcasting stations are operated under licences granted and renewed by the Postmaster-General after taking into consideration any recommendations which have been made by the Broadcasting Control Board. The initial period of a licence is five years and renewals are granted for a period of one year. The fee payable for a licence is \$50 on the grant of the licence, and thereafter \$50 a year plus an amount ascertained by applying the following rates to 'gross earnings', within the meaning of the *Broadcasting Stations Licence Fees Act 1964-1966*, during the preceding financial year—1 per cent up to \$1,000,000; 2 per cent \$1,000,001 to \$2,000,000; 3 per cent \$2,000,001 to \$4,000,000; and 4 per cent over \$4,000,000.

### Overseas Broadcasting Service

There are seven high-frequency stations at Shepparton and two at Lyndhurst, Victoria, which provide the overseas service known as 'Radio Australia'. As in the case of the National Broadcasting Service, these stations are maintained and operated by the Postmaster-General's Department, and their programmes are arranged by the A.B.C. The programmes, which give news and information about Australia presented objectively, as well as entertainment, are directed mainly to south-east Asia and the Pacific. The overseas audience has grown very substantially in recent years, as evidenced by a large and increasing number of letters from listeners abroad.

### Broadcasting stations

#### BROADCASTING STATIONS: STATES AND TERRITORIES, 30 JUNE 1969

Tables showing the call sign, location, frequency, and aerial power of national and commercial broadcasting stations in operation at 30 June 1969 are shown in *Transport and Communication*, Bulletin No. 60.

## Television services

### The National Television Service

The National Television Service is provided by the Australian Broadcasting Commission through transmitters operated by the Postmaster-General's Department. The first national station (ABN Sydney) commenced regular transmission on 5 November 1956. At 30 June 1969 thirty-nine stations were operating, excluding twenty-two translator stations. Five additional national television stations and thirty-eight low powered stations (in remote localities) had been authorised but had not commenced to operate by that date.

The television programmes provided by the Australian Broadcasting Commission cover a wide range of activities. The proportion of television time allocated among the A.B.C.'s various departments to 30 June 1969 was as follows: drama, 30.1 per cent; public interest, 12.9 per cent; sporting, 10.6 per cent; news, 6.9 per cent; variety and acts, 6.1 per cent; education, 17.9 per cent; musical performances, 1.5 per cent; religious, 1.8 per cent; rural, 0.9 per cent; special arts and aesthetics, 5.7 per cent; presentation, 5.6 per cent. Further particulars of the operation of the National Television Service in respect of talks, drama and features, music, rural services, education, news and other activities are shown in Year Book No. 51, pages 598-9. Transmission time for the year ended 30 June 1969 totalled 230,532 hours.

### The Commercial Television Service

Commercial television stations are operated under licences granted and renewed by the Postmaster-General. The first commercial station (TCN Sydney) commenced regular transmission on 16 September 1956. At 30 June 1969 forty-five television stations were operating.

The initial grant of a licence is for a period of five years and thereafter the licence is renewable annually. The fee payable is \$200 for the first year and thereafter \$200 a year plus an amount ascertained by applying the following rates to 'gross earnings', within the meaning of the *Television Stations Licence Fees Act 1964-1966*, during the preceding financial year—1 per cent up to \$1,000,000; 2 per cent \$1,000,001 to \$2,000,000; 3 per cent \$2,000,001 to \$4,000,000; and 4 per cent over \$4,000,000.

### Television stations

During the year ended 30 June 1969 no new national television station commenced regular transmissions. The following commercial television stations commenced regular transmissions during the year: New South Wales—BKN Channel 7, Broken Hill; Queensland—MVQ Channel 6, Mackay; Western Australia—GSW Channel 9, Southern Agricultural Area. The following table shows the number of television stations in operation at 30 June 1969.

TELEVISION STATIONS: STATES AND AUSTRALIAN CAPITAL TERRITORY

Tables showing the call sign, location, frequencies, polarisation, aerial power, and weekly hours of transmission of National and Commercial television stations in operation at 30 June 1969 are shown in *Transport and Communication*, Bulletin No. 60.

### Broadcast listeners' and television viewers' licences

Broadcast listeners', television viewers', and combined receiving licences are issued at post offices in accordance with the provisions of the *Broadcasting and Television Act 1942-1969*, which stipulates that, except as prescribed, a person shall not use, maintain or have in his possession a broadcast or television receiver unless there is in force a licence which applies to that receiver. A Broadcast listener's licence or a television viewer's licence, whichever is appropriate, authorises the operation of any broadcast receiver or any television receiver, which is: (a) in the possession of the holder of a licence, or of a member of his family, at the address specified in the licence and is ordinarily kept at that address; (b) installed in a vehicle which is ordinarily in the possession of the holder, or a member of his family, and is ordinarily kept at that address when not in use. A person who has both broadcast and television receivers at the one address may take out a combined receiving licence, provision for which was introduced by legislation effective from 1 April 1965.

A licence may be granted free of charge to a blind person over 16 years of age or to a person or authority conducting a school, and at a concession rate to certain classes of pensioners. Receivers provided for the use of inmates of an approved institution (including a hospital) are covered by an appropriate licence held by the institution. Persons residing in Zone 2 may also be granted a broadcast listener's licence at a reduced rate. Zone 1 is the area within 250 miles of specified broadcasting stations and Zone 2 is the remainder of Australia.

Each broadcast or television receiver let out on hire (except under a hire purchase agreement) must be covered by a hirer's licence held by the person or firm from whom the receiver is hired. The keeper of a lodging house (which includes a hotel, motel, boarding house, or any other premises

where lodging or sleeping accommodation is provided for reward) must take out a lodging house licence for each broadcast or television receiver provided by the proprietor in any room or part of the lodging house occupied or available for occupation by lodgers.

The fees payable for the various classes of licence at 30 June 1969 were as follows:

**BROADCAST LISTENERS' AND TELEVISION VIEWERS' LICENCES  
RATES**

<i>Licence</i>		<i>Ordinary rate</i>	<i>Pensioner rate</i>
		\$	\$
Broadcast listener's licence and hirer's licence for a broadcast receiver . . . . .	Zone 1	6.50	1.00
	Zone 2	3.30	0.70

(a) Includes Australian Capital Territory. (b) Includes Northern Territory in respect of broadcast licence fees.

## TRAVEL

An article outlining the history and growth of travel and the structure of tourist organisations in Australia, prepared by the Australian National Travel Association, appeared in Year Book No. 52, pages 1158-84. The following pages contain statistics of travel to and from Australia, together with some descriptive matter. Current statistics on overseas travel are published in monthly and quarterly (mimeographed) statements *Overseas Arrivals and Departures*.

### Overseas travel

Statistics about travellers to and from Australia are classified in the first instance by the length of time they intend to stay or have been staying in Australia or by the length of time away from Australia; this classification distinguishes between permanent and temporary (i.e. short term and long term) movement.

Statistics of *permanent* arrivals and departures (immigrants and emigrants) are analysed in Chapter 7—Population.

Statistics of temporary *arrivals and departures* which are in the nature of visitor statistics are included in this chapter on travel. They comprise two main categories of travellers.

- (i) *Short term*. Those who intend to stay or have actually stayed in Australia (overseas visitors) or in a country overseas (Australian residents) for less than a year.
- (ii) *Long term*. Those who intend to stay or have actually stayed in Australia (overseas visitors) or in a country overseas (Australian residents) for a year or more, but not permanently.

#### Visitor statistics (overseas visitors and Australian residents)

In addition to the classification between short-term and long-term travellers mentioned above, visitor statistics are further classified as between Australian residents departing for, or returning from a visit overseas and overseas visitors arriving for, or departing after a visit in Australia.

The *short-term* visitors are more numerous than long-term visitors, and have come to be regarded as 'Tourists' by many users of these statistics. Short-term refers basically to travellers, who intend to, or actually do, spend a period of less than twelve months in a country abroad or in Australia. The short-term classification includes Australian troops (regardless of length of their stay abroad) and persons who come to Australia or go abroad for paid work or to study or for holidays or for other reasons (as long as their intended or actual length of stay is less than one year). It excludes all crew, and persons who arrive in and depart from Australia on the same ship's voyage or on the same flight (variously called direct transit passengers or 'through' passengers) and passengers on short pleasure cruises in the south-west Pacific commencing and finishing in Australia on ships not then engaged in regular voyages. However, it includes persons who, on arrival, declare their purpose of visiting Australia to be 'in transit', as long as a change of ship or flight takes place.

*Short-term* travel excludes visitors to Australia and Australian residents on visits abroad if their stay in Australia or in a country abroad is one year or more.

Australian residents visiting abroad may be away from Australia for more than a year but still be included as short-term as long as their intended stay in any one country abroad is not for a year or more.

As from October 1967 when United States troops commenced coming to Australia on rest and recreation leave their arrival and departure have also been included with statistics of short-term

travellers. For statistical purposes they are classified as short-term visitors travelling by air for holiday purposes and their country of residence and country of embarkation or disembarkation is shown as 'Asia—other'. During the period October 1967 to December 1969, 155,419 United States troops arrived in Australia on rest and recreation leave.

The *long-term* classification relates to the arrival of visitors or temporary departure of Australian residents who state their intention of staying in Australia or in a country abroad respectively for twelve months or more, and the departure of visitors or return of Australian residents who have stayed in Australia or in a country abroad respectively for twelve months or more.

The number of persons visiting Australia and Australian residents visiting overseas during each year from 1965 to 1969 are shown in the following table.

**VISITOR STATISTICS—SUMMARY, AUSTRALIA  
1965 TO 1969**

Year	Overseas Visitors				Australian Residents			
	Short-term		Long-term		Short-term		Long term	
	Arriving in Australia	Departing from Australia	Arriving in Australia	Departing from Australia	Departing from Australia	Returning to Australia	Departing from Australia	Returning to Australia
1965 . . .	173,328	178,933	17,497	12,429	161,692	160,544	46,313	26,260
1966 . . .	187,262	194,876	19,234	11,999	183,161	181,770	54,321	28,292
1967 . . .	221,821	231,762	21,637	12,801	217,746	223,038	52,148	35,655
1968 . . .	299,889	311,181	23,473	12,617	251,880	252,773	51,386	36,387
1969 . . .	361,277	372,747	26,867	15,602	288,805	288,990	59,027	38 308

In addition to the basic classification of visitors shown above, certain other characteristics of visitors are also ascertained. These characteristics are as follows.

- (i) For all travellers: sex, age, marital status, nationality, country of birth, occupation, intended and actual length of stay, purpose of journey and mode of transport.
- (ii) For arrivals: country of last residence, country of embarkation, State of intended residence and State of disembarkation.
- (iii) For departures: country of intended residence, country of disembarkation, State of residence in Australia and State of embarkation.

Many of the categories of visitors shown in the previous tables are cross-classified by the characteristics listed above and the resulting visitor statistics are shown in considerable detail in the quarterly bulletin *Overseas Arrivals and Departures* and in the annual bulletin *Demography*. Certain unpublished information is available on request. Selected visitor statistics are shown in the following tables.

The sex, marital status and age of visitors arriving and of Australian residents departing are shown below.

### Long-term travel

Many long-term visitors travel for business and education purposes and intend to follow an occupation in the country visited during their stay in Australia or overseas. This is evident from the statistics shown in the table on page 394 which classify visitors according to the purpose of their journey. Statistics of the occupations of long-term visitors arriving in Australia and Australian residents departing overseas (long-term) are therefore of some general interest and are shown in the following table.

OVERSEAS VISITORS ARRIVING AND AUSTRALIAN RESIDENTS DEPARTING, BY OCCUPATION AND SEX: AUSTRALIA, 1969

Occupation group	Overseas visitors arriving			Australian residents departing		
	Males	Females	Persons	Males	Females	Persons

### Direct transit travellers

As indicated on page 391, all the preceding figures in this section exclude persons who arrive in and depart from Australia on the same ship's journey or on the same flight. Persons thus excluded are not normally considered visitors to Australia. For instance, settlers or other persons going to New Zealand, Papua and New Guinea, or other neighbouring countries, or leaving such countries may travel through Australia on their way. On the other hand, all persons visiting Australia on cruise vessels, which may remain in Australian waters for a considerable time, are also treated as direct transit travellers and are thus excluded from the figures shown on previous pages. Information about direct transit passengers on ships calling at Australian ports is given in the next table.

OVERSEAS SHIPPING PASSENGERS IN DIRECT TRANSIT<sup>(a)</sup>  
AUSTRALIA, 1968 AND 1969

Approximate period from first to last Australian port (days)	1968		1969	
	Passengers	Passenger days	Passengers	Passenger days

3 and less than 5 . . . . .	6,376	20,377	4,237	12,990
5 and less than 7 . . . . .	3,914	23,300	5,960	34,001
7 and less than 9 . . . . .	7,179	54,128	5,735	43,840
9 and less than 11 . . . . .	5,850	54,463	4,549	41,376
11 and less than 22 . . . . .	381	6,398	1,341	15,958
22 and over . . . . .	212	6,408	109	3,395
<b>Total . . . . .</b>	<b>26,415</b>	<b>168,612</b>	<b>25,920</b>	<b>158,161</b>

(a) Persons who arrived in and departed from Australia on the same ship's voyage.

### Sea cruises from Australia

Excluded from the foregoing statistics are passengers on short pleasure cruises in the south-west Pacific, commencing and finishing in Australia on ships not then engaged in regular voyages. During 1969 forty-one such cruises, carrying 38,803 passengers, were completed.

### Tourist organisation

The Australian Tourist Commission was established by the Commonwealth Government under the *Australian Tourist Commission Act 1967*. Its objectives are the encouragement of visits to Australia, and travel in Australia by people from other countries. The seven man Commission comprises a chairman appointed by the Commonwealth Government; two appointees to represent private industry, selected by the Commonwealth Government from a panel of names put forward by the Australian National Travel Association; two other voting members, at least one of whom is an officer of the Public Service of the Commonwealth; and two non-voting representatives nominated by the State Governments.

For 1969-70 the Commonwealth Government provided \$2,100,000 to the Commission, to be spent, mainly in overseas countries, on advertising campaigns and in associated promotional activities. The Commission brings to Australia travel agents, writers, photographers and other publicists to see at first hand what the country has to offer visitors. It takes no part in the detailed organisation of tourist activities in Australia but is a member of the Tourist Directors' Council and the Minister in Charge of Tourist Activities is a member of the Tourist Ministers' Council, together with the six States, the Northern Territory and the Territory of Papua and New Guinea. It has its Head Office in Melbourne and branch offices in London, Frankfurt, New York, San Francisco, Los Angeles, Auckland, Tokyo and Sydney.

The Australian National Travel Association, which is described on pages 1161-2 of the special article Travel and Tourism in Year Book No. 52, was formerly responsible, *inter alia*, for the promotion overseas of Australia as a tourist destination. Since the creation of the Australian Tourist Commission, the Association concentrates on the encouragement of the growth and development of travel and tourism within Australia, and the improvement of the standard and variety of facilities and services provided by private enterprise for the use of both domestic and overseas visitors. It acts as a co-ordinating body for its members, provides a clearing house for information, and conducts surveys into aspects of local tourist activity. The Association is governed by a Board representative of travel and tourist interests. The Commonwealth Government is no longer represented on the Board. The Association's office is located in Sydney.

## CHAPTER 13

### WELFARE SERVICES

This chapter relates to welfare services other than those concerned specifically with education, health and repatriation. The latter are dealt with, in the main, in the relevant chapters of this Year Book. Apart from a summary of government expenditure on welfare services, the chapter is devoted to a description in some detail of the services provided by the Commonwealth. For information on the many important welfare services provided by State and local governments, especially in the fields of child and Aboriginal welfare, reference should be made to the Year Books or Statistical Registers of the States and the annual reports of the State departments concerned. Information on pension and superannuation schemes provided for government and semi-government employees, mine workers, parliamentarians, and employees of private business is included in the chapter Private Finance. See also Year Book No. 55, 1969, page 456, for short descriptions of the National Safety Council of Australia, lifesaving organisations, the Royal Humane Society and the Order of St John.

There are numerous welfare services provided by charitable and other non-government institutions and organisations. There are institutions providing shelter and caring for needy, aged, infirm or handicapped persons, neglected children, destitute persons, wayward boys and girls, and the like. Many organisations, too, provide aid in kind (food, clothing, etc.), auxiliary medical and nursing services, and other assistance to relieve suffering and hardship. Considerable work is also done by such organisations in the rehabilitation or establishment in the community of various types of people, such as prisoners and migrants, and in the prevention and alleviation of cruelty and maltreatment of any sort. Comprehensive information regarding the activities of such organisations is not available.

Further information on subjects dealt with in this chapter is included in the annual bulletins *Australian National Accounts*; *Commonwealth Finance*; and *State, Territory and Local Government Authorities' Finance and Government Securities*. Current and summarised information on Commonwealth social services is contained in the *Quarterly Summary of Australian Statistics* and the *Monthly Review of Business Statistics*.

#### Commonwealth expenditure on welfare services

This section deals with various government payments for the relief of the aged, indigent, infirm, widowed and unemployed, assistance to families, Aboriginal welfare, etc. For summary statements of cash payments to persons made by public authorities under various functional heads, see *Australian National Accounts* and the other annual bulletins mentioned above. Expenditure by State governments on certain welfare services and on Aboriginal welfare is shown on page 417. Commonwealth expenditure on welfare services is, in the main, financed through the National Welfare Fund. A brief description of the operation of this trust fund and details of the itemised welfare expenditure are provided in the following sections. The cost of other welfare services is met from general or special departmental appropriations; other trust funds; or specific purpose grants to the States. Information on the major items which are not paid from the National Welfare Fund is included on pages 415–18. Chapter 18—Public Finance and, in more detail, the bulletin *Commonwealth Finance* provide analyses of Commonwealth expenditure by function and economic type. The cost of administering each Commonwealth benefit is not separately compiled.

#### The National Welfare Fund

The National Welfare Fund was established by the *National Welfare Fund Act* 1943 to finance a scheme of national welfare and has operated from 1 July 1943. At the Fund's commencement it was used to finance funeral benefits and maternity allowances, but other social and health benefits were made a charge on the fund from time to time, and at present expenditure on all benefits except repatriation, telephone rental concessions and a few minor social and health benefits is met from the fund. The fund is used only to finance the benefits themselves; it is not used to finance the cost of

administering the benefits, or of capital works associated with the benefits. Since the contributions to the fund from Consolidated Revenue equal expenditure from the fund the balances in the fund grow each year by the interest on investment of these balances.

### Commonwealth social services

Under the provisions of section 51 of the Constitution, the Commonwealth Government is empowered to legislate on:

'(xxiii) Invalid and old age pensions:

'(xxiiiA) The provision of maternity allowances, widows' pensions, child endowment, unemployment, pharmaceutical, sickness and hospital benefits, medical and dental services (but not so as to authorize any form of civil conscription), benefits to students and family allowances:'.

The latter paragraph was inserted in the Constitution after being accepted by the electors at a referendum in 1946.

Before 1947, Commonwealth social service benefits were paid under various Acts. On 1 July 1947, with the passage of the *Social Services Consolidation Act 1947*, all Acts providing social service benefits were amalgamated. The Act is at present styled the *Social Services Act 1947-1969*.

### Reciprocal social services agreements with other countries

*New Zealand.* An agreement between the Governments of Australia and New Zealand for reciprocity in social services came into operation on 3 September 1943 and was amended from 1 July 1949. The reciprocal arrangements cover age and invalid pensions, widows' pensions, child endowment, and unemployment and sickness benefits, and apply to both permanent and temporary changes of residence. Residence in one country may be treated as residence in the other country in relation to entitlement to benefits in which a residential qualification applies. Persons from one country taking up a permanent residence in the other country become eligible for any of the specified benefits of the new country under the same conditions (with one or two exceptions) as apply to citizens of that country. Persons in receipt of any of the specified benefits in one country may continue to receive those benefits while temporarily absent in the other country.

*United Kingdom.* A reciprocal agreement on social services between United Kingdom and Australia came into operation on 7 January 1954. Amendments became effective from 1 April 1958 and 1 October 1962. Under the current agreement residence in one country may be treated as residence in the other country as the basis for entitlement to benefits in which a residential qualification applies. Australians going to the United Kingdom for permanent residence are treated in the United Kingdom as if they had been insured under the National Insurance Scheme while in Australia, so that they can qualify for various National Insurance benefits. There is also provision for the safeguard of social service rights for persons going from one country to the other for temporary residence.

#### Social service benefits provided

The social service benefits provided by the Commonwealth Government under the *Social Services Act 1947-1969*, and the date on which each came into operation, are:

Age pension . . . . .	1 July 1909
Wives' and children's allowances for age pensioners . . . . .	14 October 1965
Invalid pension . . . . .	15 December 1910
Guardians' allowances for widowers and other unmarried age and invalid pensioners with children in their care . . . . .	14 October 1965
Wives' and children's allowances for pensioners who are invalids . . . . .	8 July 1943
Special payments to a surviving pensioner . . . . .	10 October 1968
Widows' pensions . . . . .	30 June 1942
Supplementary assistance (age, invalid and widows' pensions) . . . . .	15 October 1958
Widows' pensions—children's allowances . . . . .	2 October 1956
Funeral benefit . . . . .	1 July 1943
Maternity allowance . . . . .	10 October 1912
Child endowment . . . . .	1 July 1941
Child endowment—student children . . . . .	14 January 1964
Unemployment benefit . . . . .	1 July 1945
Sickness benefit . . . . .	1 July 1945
Special benefit . . . . .	1 July 1945
Sheltered employment allowance . . . . .	30 June 1967
Commonwealth Rehabilitation Service . . . . .	10 December 1948
Training scheme for widow pensioners . . . . .	27 September 1968

#### Age and invalid pensions

Age pensions are payable to men, sixty-five years of age and over, and women, sixty years of age and over, who have lived in Australia continuously for at least ten years, which need not be immediately prior to the date of claim for a pension. If a person has completed five years', but not ten years', continuous residence, and has lived in Australia for periods which exceed a total of ten years, the period of continuous residence otherwise required is reduced by the total of his periods of residence in Australia in excess of ten years. Any periods of absence during which a person's home remains in Australia, and absences in certain other circumstances, are counted as residence, and any absence in an external Territory of the Commonwealth, while not counting as residence, does not interrupt continuity of residence in Australia. Residence in New Zealand or the United Kingdom may be treated as residence in Australia.

Invalid pensions are payable to persons, sixteen years of age and over, who have lived in Australia for a continuous period of five years (including certain absences) at any time, and who are permanently incapacitated for work to the extent of at least eighty-five per cent, or permanently blind. If the incapacity or blindness first occurred outside Australia, except during a temporary absence, the residence qualification is the same as for an age pension.

*Current rates of pension.* The maximum standard rate was increased to \$780 per annum (\$15 a week) from 9 October 1969. This is payable to a single, widowed, or divorced pensioner, a married man whose wife receives a wife's allowance, or a married pensioner whose spouse is not receiving an age or invalid pension, a tuberculosis allowance, or a service pension. The standard rate may also be paid to married pensioner couples who, because of failing health, have lost the economies of living together. The maximum married rate was also increased from 9 October 1969, and is \$1,378 per annum (\$26.50 a week) for a married couple, both pensioners, i.e. \$689 per annum (\$13.25 a week) each. For a married person whose spouse receives a tuberculosis allowance, or a service pension, the maximum rate is also \$689 per annum (\$13.25 a week)

A wife's allowance may be granted, subject to the means test, to the wife of an invalid pensioner or of an age pensioner permanently incapacitated, blind, or who has the care of a child, if she is not receiving an age or invalid pension, or a service pension under the *Repatriation Act 1920-1969* (see Chapter 5, Repatriation). The maximum annual rate of a wife's allowance is \$364 per annum (\$7 a week).

Additional pension for dependent children under 16 years is payable, subject to a means test, at the rate of \$130 per annum (\$2.50 a week) for the first child and \$182 per annum (\$3.50 a week) for each other child. Single or widowed age or invalid pensioners with a dependent child may receive a guardian's allowance of up to \$4 a week, or up to \$6 a week if the child is under 6 years of age or is an invalid child requiring full-time care. Eligibility for the additional pension for children is extended to include a child over sixteen years until he reaches twenty-one years, provided he is wholly or substantially dependent on the pensioner and is receiving full-time education at a school, college or university. Supplementary assistance of up to \$2 a week, subject to a means test, is available to pensioners receiving the maximum standard rate pension if they pay rent or pay for board and lodging or for lodging.

At 30 June 1969, 609,462 age pensioners (86 per cent of all age pensioners) and 113,865 invalid pensioners (94 per cent of all invalid pensioners) were receiving the maximum pension and 149,162 age and invalid pensioners were in receipt of supplementary assistance.

If the pensioner is an inmate of a benevolent home, the maximum payable to him is \$5.10 a week if he is eligible for the standard rate pension, or \$4.80 a week otherwise. The rest is paid to the home for his maintenance. The balance is not paid to the home if the pensioner is in an infirmary ward, as payments under the Commonwealth Hospital Benefits Scheme are made in that case. The maximum payable to a standard rate pensioner is increased if supplementary assistance is also payable.

Special payments to a surviving pensioner became operative from 10 October 1968. On the death of one member of a married pensioner couple the surviving pensioner spouse becomes entitled to receive, for up to six fortnightly instalments, the equivalent of the two pensions that would have been paid if the spouse had not died. For the purpose of this provision the term 'pensioner' includes a person in receipt of an age, invalid or service pension; a wife's allowance; a rehabilitation allowance; or a sheltered employment allowance.

A table showing the maximum rates of pension operating since 1 July 1909 at dates prior to 14 October 1965 is included on page 608 of Year Book No. 51. Details of the respective rates and allowances payable since 14 October 1965 are included in subsequent Year Books.

*Means test.* Age and invalid pensions (other than pensions paid to blind persons) and allowances paid to wives are subject to a means test which applies to income and property. The rate of pension payable depends on the claimant's *means as assessed*. These consist of his annual rate of income plus a property component equal to \$2 for each complete \$20 of his net property above \$400. A person's *means as assessed* may consist entirely of income, entirely of the property component, or of various combinations of income and property component. Since 27 September 1969, the rate of pension payable in any case is reduced by half of the amount by which *means as assessed* exceed \$442 where the pensioner is married or \$520 where the pensioner is single, widowed, or divorced, instead of the full amount in excess of these limits as under the previous means test. Where the standard rate applies, no pension is payable where the value of property is \$21,200 or more (\$25,360 or more if qualified for a guardian's allowance at the lower rate and \$27,440 at the higher rate) if the pensioner is single, widowed or divorced; or \$18,600 if the pensioner is married. Where the married rate applies, no pension is payable where the value of property is \$18,600 or more. The wife's allowance is affected by income and property on the same basis as the pension, i.e. it is reduced by half the amount of *means as assessed* over \$442. Supplementary assistance is reduced by the amount by which *means as assessed* exceed \$52.

Certain types of income are excepted. The main exceptions are: income from property: gifts or allowances from children, parents, brothers, or sisters; benefits (other than annuities) from friendly societies; child endowment or other payments for children; Commonwealth health benefits and amounts received from registered benefit organisations. A pensioner's income may also be reduced by up to \$208 per annum (\$4 a week) for each dependent child under sixteen years (twenty-one years if a full-time student).

Certain types of property are disregarded. They include the permanent home of the pensioner, his furniture and personal effects, the surrender value (up to \$1,500) of life insurance policies, the capital value of annuities or contingent interests, and the value of any reversionary interests.

For the purposes of the means test the income and property of a married person are considered to be half the total income and property of the husband and wife unless they are legally separated or in other special circumstances.

(a) Number of pensioners per 1,000 persons of pensionable age (males aged 65 years and over and females aged 60 years and over). (b) Includes allowances and supplementary assistance. (c) Includes supplementary assistance. (d) For earlier years persons of pensionable age—see footnote (a)—excludes Aborigines, while the number of pensioners includes Aborigines throughout. (e) The 1967-68 figures are adjusted by reducing the number of invalid pensioners by 3,178 and increasing the number of age pensioners by 1,485 following the introduction of computer processing in New South Wales. (f) Decrease in average rates for age pensions at 30 June 1968 was due to the increased number of new pensioners who became eligible for part pensions as a result of amending legislation approved in April 1967. (g) The 1968-69 figures are adjusted by reducing the number of invalid pensioners by 1,583 and increasing the number of age pensioners by 1,223 following the introduction of computer processing in Victoria.

**Widows' pensions**

*Rates and conditions.* Widows' pensions are payable according to the following classes. The rates shown have been in operation since September 1969.

*Class 'A'.* A widow who has the custody, care and control of one or more children under the age of sixteen years—The amount payable is the standard rate pension of \$780 per annum (\$15 a week) and a mother's allowance of \$208 per annum (\$4 a week) which is increased to \$312 per annum (\$6 a week) if caring for a child under six years of age or an invalid child requiring full-time care. In addition, extra pension of \$130 per annum (\$2.50 a week) for the first child under sixteen years and \$182 per annum (\$3.50 a week) for each other child under sixteen years is payable, subject to the means test. Payment may be made for a child over sixteen years until he reaches twenty-one years, if he is wholly or substantially dependent on the widow and is receiving full-time education at a school, college or university.

*Class 'B'.* A widow who has no children under sixteen years of age or eligible full-time student children in her custody, care and control, and who is not less than fifty years of age or who, after having attained the age of forty-five years, ceased to receive a Class 'A' widows' pension because she no longer had the custody, care and control of a child—\$689 per annum (\$13.50 a week).

*Class 'C'.* A widow who is under fifty years of age and has no children under the age of sixteen years, or eligible full-time student children, in her custody, care and control, but is in necessitous circumstances within the twenty-six weeks after the death of her husband—\$13.50 a week for not more than twenty-six weeks after the death of her husband. If the widow is pregnant this period may be extended until the child's birth. She may then become eligible for a Class 'A' widow's pension.

Widow pensioners may receive supplementary assistance of up to \$104 per annum (\$2 a week), subject to a means test, if they pay rent or pay for board and lodging or for lodging.

For classes 'A' and 'B' the term 'widow' includes a wife who has been deserted by her husband without just cause for a period of at least six months; a divorcee; a woman whose husband has been imprisoned for at least six months; and a woman whose husband is in a mental hospital. Certain dependent females also may qualify for 'A', 'B' or 'C' Class pensions.

A period of residence in Australia before claiming pension is not required if a woman and her husband were residing permanently in Australia when she became a widow. In other circumstances, five years continuous residence immediately preceding lodgment of the claim is required, but this is waived in the case of a woman whose husband has died overseas if she has resided continuously in Australia for ten years at any time and returns to Australia to live.

A widow's pension is not payable to a woman receiving an age or invalid pension, a sheltered employment allowance, a tuberculosis allowance, or a war widow's pension, or to a deserted wife or divorcee who has not taken reasonable action to obtain maintenance from her husband or former husband.

*Means test.* Widows' pensions are subject to a means test on income and property. The pension payable depends on the claimant's *means as assessed*. These consist of her annual rate of income together with a property component equal to \$2 for every complete \$20 by which the value of her property is in excess of a stipulated sum. A Class 'A' widow has a basic exemption of \$2,000 when the value of her property exceeds \$4,500, but no property component is calculated where she has property of no more than \$4,500 in value. A Class 'A' pension is not payable where a widow has property valued at \$26,960 or more, or, if caring for a child under six years of age or an invalid child requiring full-time care, has property valued at \$29,040 or more. In the case of a Class 'B' widow, \$400 of property is exempt and no Class 'B' pension is payable where property is \$19,380 or more. In each case the maximum rate of pension is reduced by half the amount by which the widow's *means as assessed* exceed \$520. There is no specific means test for the Class 'C' pension, which is paid only where it is evident that a widow has insufficient means of support. The types of income and property disregarded for means test purposes are the same as for age and invalid pensions. Supplementary assistance is reduced by the amount by which *means as assessed* exceed \$52.

The average age of new widow pensioners admitted during 1968-69 was: Class 'A', 37.6 years; Class 'B', 58.2 years; Class 'C', 43.4 years; and for all classes, 47.0 years.

1968-69 . . . . .	15,993	38,038	39,768	91	77,897	17.63	69,080

(a) Excludes transfers from one class to another. (b) Includes supplementary assistance and allowances. (c) Includes payments to benevolent homes for maintenance of pensioners. (d) During 1967-68, a reduction of 769 Class 'A' and 233 Class 'B' pensioners was made following the introduction of computer processing in New South Wales. (e) Decrease in average rate due mainly to the increased number of new pensioners who became eligible for part pension as a result of amending legislation approved in April 1967.

For details of training scheme for widow pensioners, see page 415.

**Funeral benefits**

A funeral benefit of up to \$20 is payable to the person who has paid, or is liable to pay, the cost of the funeral of a pensioner. The maximum amount payable is increased to \$40 where a pensioner is liable for the funeral expenses of a spouse, dependent child under 16 years or student child 16 to 21 years, or of another pensioner.

For the purpose of funeral benefits, a pensioner means a person in receipt of an age, invalid or widow's pension or of a tuberculosis, rehabilitation or sheltered employment allowance. It also includes a person who, immediately prior to his or her death was an eligible claimant for such pension or allowance if qualified under the means test in operation before 27 September 1969.

Total cost of funeral benefits granted during 1968-69 was \$1,570,915.

**Maternity allowances**

Maternity allowances are paid to provide financial assistance towards the expenses associated with the birth of children and are additional to the benefits provided under the Commonwealth health scheme. They are not subject to a means test.

Subject to certain conditions, a maternity allowance is payable to a woman who gives birth to a child, either in Australia or on board a ship proceeding to Australia or from a port in Australia or an Australian Territory to another such port, and, on the date on which she lodges her claim, is residing in Australia or is in Australia and intends to remain permanently, provided she receives no benefit similar to a maternity allowance from the country from which she came. A woman who gives birth to a child during a temporary absence from Australia may also be eligible. An alien mother may receive the allowance if she or her husband resided in Australia for at least twelve months immediately prior to the birth of the child, or if she is likely to remain in Australia permanently.

*Rates of allowance.* The allowance is \$30 if the mother has no other children, \$32 if she has one or two children under sixteen, and \$35 if she has three or more other children under sixteen. The amount is increased by \$10 for each additional child born at a birth. An advance payment of \$20 may be made four weeks before the expected date of birth. The balance is payable immediately after the birth. Payment may be made in respect of the birth of a still-born child, or a child which lives for less than twelve hours, if the child had developed for at least five and a half months.

## Child endowment

A person who is resident in Australia and has the custody, care and control of one or more children under the age of sixteen years or of a full-time student child over sixteen but under twenty-one years, or an approved institution of which children are inmates, is qualified to receive an endowment in respect of each such child. Full-time student children are those receiving full-time education at a school, college or university and who are not in employment or engaged in work on their own account. There are provisions to meet cases of families divided because of divorce, separation, unemployment or death of a parent. There is no means test.

Twelve months' residence in Australia is required if the claimant and the child were not born here, but this requirement is waived if the Department of Social Services is satisfied that they are likely to remain in Australia permanently. Where the child's father is not a British subject, endowment is payable if the child was born in Australia, if the mother is a British subject, or if the Department is satisfied that the child is likely to remain permanently in Australia. Under certain conditions, endowment may be paid to Australians who are temporarily absent overseas.

*Rates of endowment.* Since 19 September 1967 the weekly rates have been: children under sixteen years—50 cents for the first or only child in a family; \$1.00 for the second; \$1.50 for the third; and then increases of 25 cents for each subsequent child, making \$1.75 for the fourth, \$2.00 for the fifth and so on. For each eligible student child in a family the rate is \$1.50, which is also the rate payable for each child under sixteen years, or full-time student child in an approved institution.

*Number of claims and endowed children—children under sixteen years.* The number of families receiving child endowment at 30 June 1969 in respect of children under sixteen years was 1,701,914 an increase of 32,285 or 1.9 per cent during the year.

1968-69 . . . . .	1,701,914	187,500	493	3,996,042	202,034	193,263

(a) Claims by families with children under sixteen and student children are shown in both columns. Information on the number of families having such dual claims is not available. (b) A number of endowments are paid every twelve weeks. During two years out of every three there are four such payments but every third year there are five. Figures for annual liability therefore, reflect trends in expenditure on child endowment more accurately than do figures for payments. (c) Expenditure for this year includes five twelve-weekly payments.

**Unemployment, sickness, and special benefits**

Unemployment and sickness benefits are paid to males over sixteen and under sixty-five years of age, and females over sixteen and under sixty years of age, who are unemployed or who are temporarily incapacitated for work and thereby suffer loss of income. They must have been living in Australia during the preceding twelve months or be likely to remain permanently in Australia. A person receiving an age, invalid or widow's pension, or a service pension (as distinct from a war pension) under the *Repatriation Act 1920-1969* or a tuberculosis allowance, is ineligible to receive a benefit.

To qualify for an unemployment benefit a person must establish that he is unemployed and that his unemployment is not due to his being a direct participant in a strike, that he is capable and willing to undertake suitable work, and that he has taken reasonable steps to obtain such work. Registration with the local Commonwealth District Employment Office is necessary. To qualify for a sickness benefit, a person must establish that he is temporarily incapacitated for work because of sickness or accident and that he has thereby suffered a loss of salary, wages or other income. A married woman is not eligible to receive a sickness benefit if it is reasonably possible for her husband to maintain her. Where her husband is able to maintain her only partially, a benefit may be paid at such rate as is considered reasonable in the circumstances. In exceptional cases a married woman may qualify for unemployment benefit in her own right.

A special benefit may be granted to a person not qualified for unemployment or sickness benefit who is not receiving an age, invalid or widow's pension or a service pension, and who, because of age, physical or mental disability or domestic circumstances, or for any other reason, is unable to earn a sufficient livelihood for himself and his dependants. Recipients of special benefits include, among others, deserted wives, persons caring for invalid parents, and persons ineligible for age, invalid or widows' pensions because of lack of residence qualifications.

Special benefits are also paid to migrants who are in Commonwealth centres or hostels awaiting their first placement in employment in Australia. During this time they receive a short instruction in English and in Australian conditions to facilitate their assimilation into the community and employment.

*Rates of benefit.* The maximum weekly rates of benefit payable and permissible income in respect of benefit periods which commenced on or after 27 September 1969 are as follows.

	<i>Maximum weekly rate</i>	<i>Permissible weekly income</i>
	\$	\$
Adult (21 and over) or married minor . . . .	10.00	6.00
Unmarried person, aged 18-20 years . . . .	6.00	3.00
Unmarried person, aged 16-17 years . . . .	4.50	3.00

The adult rate of benefit is payable to unmarried minors having no parent living in Australia.

An additional benefit of \$7 a week may be paid for a dependent spouse and \$2.50 a week for the first dependent child and \$3.50 for each other dependent child under sixteen years of age resident in Australia. Additional benefit, at the same rate as that for a dependent spouse, may be paid where a woman is keeping house for a claimant who has one or more children under sixteen years of age in his care. It may be granted only if no such benefit is payable for his wife, and the housekeeper is substantially dependent on him but not employed by him.

The weekly rate of benefit is reduced by the amount by which a beneficiary's other income exceeds the amount of permissible income. For unemployment benefit purposes the income of the spouse is also taken into account unless the claimant and his spouse are permanently separated. For sickness benefit purposes the income from an approved friendly society or other similar approved body in respect of the incapacity for which sickness benefit is payable is disregarded. 'Income' does not include child endowment or other payments for children, Commonwealth hospital and pharmaceutical benefits, a tuberculosis allowance, or an amount paid in reimbursement of medical, dental or similar expenses. There is no means test on property.

The amount of compensation, damages or similar payment, or war pension, if paid in respect of the same incapacity as that for which sickness benefit is claimed, is deducted from the sickness benefit. If not paid in respect of the same incapacity, compensation is regarded as income and war pension is ignored.

There is a waiting period of seven days during which unemployment or sickness benefit is not payable, but this waiting period is not required more than once in any period of thirteen weeks.

(a) Includes migrants in Commonwealth centres or hostels awaiting their first placement in employment in Australia. (b) Since June 1968, special benefits instead of sickness or unemployment benefits, became payable for confinement cases.

## Sheltered employment allowance

This allowance was introduced on 30 June 1967 as an alternative to an invalid pension. It is available to disabled employees engaged in approved sheltered employment and who are either invalid pensioners or are likely to become permanently incapacitated to a pensionable degree and are otherwise qualified to receive an invalid pension.

The maximum rate of the allowance is the same as the maximum rate of invalid pension. Additional benefits such as wife's allowance and additional pension for children that would be paid if the person were an invalid pensioner are added to the sheltered employment allowance to form one composite payment. The means test is the same as for invalid pensions.

At 30 June 1969, twenty workshops were approved under the *Social Services Act 1947-68* to pay sheltered employment allowances on behalf of the Department of Social Services. Nine workshops were paying the allowances to 488 employees including 456 who had been tentatively transferred from invalid pensions and who are also included in the number of invalid pensioners shown in the tables on pages 404 and 405. Employees in other sheltered workshops continued to receive invalid pensions. Expenditure during the year 1968-69 was \$288,276.

#### Commonwealth Rehabilitation Service

The Commonwealth Rehabilitation Service was set up to help persons who are unable to work because of physical handicap, or who have had to give up their employment because of sickness or injury. It helps disabled persons to reach their maximum physical fitness and to prepare for suitable employment. They are given suitable treatment and training, the cases selected being those in which the person's disability is remediable and there are reasonable prospects of his engaging in a suitable vocation within three years after the commencement of treatment or training.

The service is available to invalid and widow pensioners, persons receiving unemployment, sickness or special benefits, persons receiving tuberculosis allowances, and persons aged fourteen or fifteen who, without treatment and training, would be likely to qualify for an invalid pension on reaching the age of sixteen years. During treatment, payment of pension or benefit continues. When vocational training begins the pension or benefit is suspended and a rehabilitation allowance, together with a training allowance of \$4.00 a week, is paid instead. With an invalid pensioner, or a sickness, unemployment, or special beneficiary, the rehabilitation allowance is equivalent to and calculated in the same manner as an invalid pension. For a widow pensioner the rate is the same as that of the widow's pension.

Living-away-from-home allowances are paid where necessary. Fares and living expenses (including those of an attendant where required) incurred in connection with treatment, training or attendance for an interview or for medical examination may also be paid. Necessary artificial replacements, surgical aids and appliances may be provided, free of charge, to a person receiving treatment and training or who needs them to assist him to engage in a suitable vocation after the discontinuance of his treatment and training or who needs them otherwise to assist in his rehabilitation. He may also be provided with books, equipment and tools of trade costing up to \$80 in any period of twelve months. Where books, equipment and tools of trade provided to assist a person to engage in a suitable vocation are retained by him, he is liable to repay the cost but is not required to make repayment until after he has commenced employment. The repayment may be made by instalments. If the treatment or vocational training does not result in the trainee being able to engage in employment, he receives the pension or benefit to which he is entitled. Disabled persons who cannot qualify for the free service may pay for rehabilitation themselves, or they may be sponsored by government or private organisations.

*Numbers dealt with by the service*

#### COMMONWEALTH REHABILITATION SERVICE: AUSTRALIA, 1968-69

Class of beneficiary	Referred	Accepted	Completed training	Placed in employment		Expenditure during year \$'000

<b>Total . . . . .</b>	<b>24,414</b>	<b>1,435</b>	<b>306</b>	<b>286</b>	<b>818</b>	

(a) Includes persons who had received training prior to 1 July 1968.

(b) Excludes widows accepted under the *Training Scheme for Widow Pensioners* (see page 415).

Of the 1,435 persons accepted during 1968-69, 75 per cent were under forty years of age. The average number undergoing rehabilitation at the end of each month during the year was 943.

#### Training scheme for widow pensioners

In September 1968 a scheme was introduced to help widow pensioners acquire vocational skills which will enable them to undertake gainful employment. Training may take the form of refresher courses or it may involve training for new skills. During training the widow continues to receive her pension for as long as she remains eligible. In addition to pension, she may qualify for a training allowance of \$4 a week and a living-away-from-home allowance of \$5 a week. The cost of tuition fees and fares may also be met. Of the 2,119 applications received during 1968-69, 1,117 were accepted for training and of this number, 883 commenced training; 89 completed training and 66 were placed in employment. Expenditure during the year was \$137,328.

#### Commonwealth assistance to aged persons homes and sheltered workshops and for accommodation for disabled persons employed in sheltered workshops

*The Aged Persons Homes Act 1954-1969* is designed to encourage the provision of homes in which aged persons may reside in conditions approaching normal domestic life.

To be eligible for assistance under the Act an organisation must be:

- (a) carried on otherwise than for the purposes of profit or gain to the individual members; and
- (b) a religious organisation, an organisation of which the principal objects or purposes are charitable or benevolent, an organisation of former members of the defence forces established in every State or a State branch of such an organisation, an organisation approved by the Governor-General for the purposes of the Act, or a local governing body.

An organisation conducted or controlled by, or by persons appointed by, the Government of the Commonwealth or of a State is not eligible for assistance under the Act.

The Director-General of Social Services may make a grant of money to an organisation as assistance towards meeting the cost of the construction or purchase of a home, including land, to be used permanently for the accommodation of aged persons. The grant is made on a basis of \$2 for each \$1 raised by the organisation (\$1 for each \$1 from 1954 to 1957), not counting money which the organisation receives from a governmental body (other than a local governing body) or borrowed. Before a grant is made the Director-General must be satisfied that the sum of the money expended and the money at present available for expenditure by the organisation towards the capital cost of the home, together with the amount of the grant, will be not less than the capital cost of the home.

The following table gives information regarding grants approved during 1968-69. The amounts granted include new grants approved in 1968-69 together with adjustments made during the year in respect of grants originally approved in earlier years.

1966-67 . . .	158	11,095	3,227
1967-68 . . .	170	10,220	2,831
1968-69 . . .	193	12,704	3,342

Since the commencement of the Act in December 1954, 1,851 grants amounting to \$92,422,564 have been approved, and accommodation has been provided for 32,617 aged persons.

On 12 September 1969 the Aged Persons Homes Act was amended to provide a *Personal care subsidy* of \$5 a week for persons of eighty years of age or over who receive approved personal care while living in hostel type accommodation provided by organisations eligible under the Aged Persons Homes Act.

*The Sheltered Employment (Assistance) Act 1967* superseded the *Disabled Persons Accommodation Act 1963*. Under the latter Act, which was in operation from 25 November 1963 to 30 June 1967, total grants of \$372,118 had been approved. The new Act, which came into operation on 30 June 1967, provides for subsidies of \$2 for \$1 to eligible organisations towards the capital cost of sheltered workshops, the equipment for them, and accommodation for disabled people employed or likely to be employed in sheltered workshops. The Act covers the erection of buildings and the purchase of existing buildings. In both cases the cost of land is included in the capital cost as is the cost of any necessary conversion of an existing building. The subsidy may also be paid towards the rental, for up to three years, where rented premises are used to provide sheltered employment. Organisations eligible for grants under the Act are the same as those specified under the Aged Persons Homes Act. A substantial number of the people employed in the sheltered workshop must be medically qualified for an invalid pension, or be likely to become so qualified if not provided with sheltered employment, and must receive payment for their work before the organisation can qualify for a subsidy.

The total subsidy for the 249 grants approved during 1968-69 amounted to \$1,797,165. Of these grants, 34 were for workshop buildings and extensions involving a subsidy of \$1,169,074. The increased number of grants during the year was due mainly to the greater demand for equipment and, to a lesser extent, to the construction and rental of more workshops. The remaining grants and subsidies approved were divided as follows: 198 grants totalling \$253,798 for workshop equipment; 14 in respect of rental of premises used as sheltered workshops, \$27,654; and 3 grants involving \$346,639 for projects providing accommodation for 99 disabled workshop employees.

#### Commonwealth assistance to States

*The States Grants (Deserted) Wives Act 1968* came into operation on 21 June 1968 with retrospective effect from 1 January 1968. The Act provides for assistance to be given by the Commonwealth to the States in respect of aid for mothers with children where there is no bread-winner and the mothers are not eligible for benefits under the Social Services Act. Broadly, these include deserted wives during the first six months of desertion, wives during the first six months of the husband's imprisonment, deserted de facto wives and de facto wives of prisoners, and other unmarried mothers who are ineligible for Commonwealth widows' pension.

The type of assistance attracting a Commonwealth grant may be provided in the form of cash, food or clothing. The grant is made by the Commonwealth to the States on the basis of half the cost of the approved assistance paid to the mother or half the amount of Class A widow's pension whichever is the lesser.

All States, with the exception of Victoria, participated in the Scheme in 1968-69. Payments by the Commonwealth amounted to \$1,149,282 compared with \$200,733 during 1967-68.

*The States Grants (Home Care) Act 1969* provides that the Commonwealth will share on a \$1 for \$1 basis with participating States the cost of approved housekeeping or other domestic assistance provided wholly or mainly for aged persons in their homes. The Commonwealth will also share on a \$1 for \$1 basis with participating States up to a maximum of one-third of the capital cost of approved senior citizens' centres as well as meeting on a \$1 for \$1 basis with the States the cost of a salary of a welfare officer employed by such a centre.

**Telephone rental concessions**

Effective from 1 October 1964 an amendment to the Telephone Regulations of the Post and Telegraph Act provides that a telephone service for qualified age, invalid and widow pensioners and blind people is available at an annual rental equal to two-thirds of the amount otherwise payable. The Department of Social Services re-imburses the Postmaster-General's Department for the cost of the scheme including administrative costs. Expenditure during 1968-69 was \$1,895,672, plus administrative costs amounting to \$56,751.

**Compassionate allowances**

These allowances are paid by the Commonwealth on a discretionary basis to certain people who are unable to qualify for pensions or other benefits under the provisions of the Social Services Act. Expenditure on compassionate allowances and payments of a similar nature during 1968-69 was \$94,116.

**Northern Territory and Australian Capital Territory Welfare Services**

Provision of general Welfare services in these two Territories is the responsibility of the Commonwealth. In so far as Welfare items can be identified for accounting purposes, the following table shows the cost of providing these services for each of the years 1964-65 to 1968-69. The amounts shown exclude administrative costs; payments from the National Welfare Fund (*see* pages 400-1); and Commonwealth expenditure on Aboriginal Welfare shown in the table on page 418 for the Northern Territory and Australian Capital Territory.

**Aboriginal welfare**

The Aboriginal population as defined at the 1966 Census of Population and Housing includes persons who, at the Census, stated themselves to be 'Aboriginal', or who stated themselves to be more than half Aboriginal, or who were half Aboriginal and half European. The number enumerated in this group at the 1966 Census was 80,207 persons. This figure excludes Torres Strait Islanders, persons who stated that they were less than half Aboriginal and persons who are half Aboriginal and half non-European. An independent estimate, which includes each of these categories, made by the Commonwealth Office of Aboriginal Affairs set the total Aboriginal population in 1969 at about 140,000 persons. The Aboriginal population is increasing at a rate faster than the Australian average. Few Aborigines still live a nomadic life; most live a settled, but in many other ways traditional, life. There are others at all stages between this and full participation in the life of the Australian community.

A referendum in May 1967 led to the repeal of section 127 of the Constitution which provided that in reckoning the numbers for census purposes, Aborigines should not be counted; and to the deletion of the words 'other than the Aboriginal race in any State' from Section 51 (xxvi) which relates to the power of the Commonwealth Parliament to make laws with respect to people of any race. The Federal Government, whose aim is to help the Aborigines to become an integral part of Australian community life, now shares with the States power and responsibilities for the advancement of Aborigines. The Commonwealth Government has created an office of Aboriginal Affairs, in Canberra, as the agency co-ordinating policy affecting Aborigines, as well as continuing its financial and administrative responsibilities for Aborigines in the Northern Territory and Australian Capital Territory through the Department of the Interior. The Office serves a Council, comprising a Chairman and two members, which has two functions: to advise in the framing of national policies for the

Aboriginal citizens of Australia; and to consult with Commonwealth Departments and authorities whose activities have a bearing on Aboriginal welfare.

In recent years the Commonwealth, State and Northern Territory legislatures have been active in progressively removing all discriminatory legislation from the relevant Acts of the Commonwealth and State Parliaments and from the relevant Ordinances of the Northern Territory, and therefore direct benefits are not as readily identifiable as they were in the past. In the legal and formal sense none of the opportunities open to Australians generally is closed to Aborigines. There are no indigenous Aborigines in Tasmania.

In the 1969-70 Budget the Commonwealth provided \$7.2 million in an Aboriginal Trust Account of which \$5.4 million was for grants to the States for assistance in the specific fields of health, housing, education and employment; and \$1.8 million for direct expenditure by the Commonwealth (see table below.) From the Capital Fund for Aboriginal Enterprises, established in 1968 for corporate or individual ventures with economic potential, loans totalling \$328,000 had been approved to 30 June 1969.

*Commonwealth and State expenditure from Consolidated Revenue.* Expenditure out of Commonwealth and State Consolidated Revenue Funds specifically on Aboriginal welfare during the years 1964-65 to 1968-69 is shown in the following table. The figures hereunder do not represent total Commonwealth and State expenditure on Aborigines. They exclude expenditure from Trust Funds and Loan Funds and there may be some other activities for which figures are not available. As citizens, Aborigines benefit like other Australians from services provided by various Government departments.

**ABORIGINAL WELFARE: EXPENDITURE FROM CONSOLIDATED REVENUE

(a) Not available—expenditure included in amounts paid from general welfare, etc., appropriations.

**STATE EXPENDITURE ON CERTAIN WELFARE SERVICES**

The following table shows net expenditure from State government funds on certain welfare services. The figures exclude expenditure on unemployment, bush fire, flood, etc., relief, Aboriginal welfare, and some other items which are excluded because information cannot be obtained for all States. Loan fund expenditure is excluded also. Because of differences in organisation and accounting methods, the information shown for some classes is not on exactly the same basis for all States; it may also be incomplete because particulars of some activities are not separately recorded and are therefore excluded. The expenditure shown is 'net' in the sense that receipts for services rendered have been deducted from gross expenditure.

## CHAPTER 14

### PUBLIC HEALTH

This chapter is concerned with the activities of the Commonwealth Department of Health (including quarantine, national health benefits, and Commonwealth grants for health purposes); activities of the State health departments; statistics of hospitals and nursing homes, hansenide hospitals, and mental health institutions; statistics of notifiable diseases, and chronic illnesses and impairments; and cremations. Statistics relating to causes of death are presented in Chapter 8, Vital Statistics (pages 185–90).

Further information about the administration of public health services is contained in the annual reports of the Commonwealth Director-General of Health; the annual reports of the State health authorities; and in the Year Books and Statistical Registers published by the State offices of the Bureau of Census and Statistics. For more detailed statistics of in-patient institutions, see the annual bulletin *Hospitals and Nursing Homes* (reference no. 16.1).

#### COMMONWEALTH GOVERNMENT ACTIVITIES

At the time of federation the only health function given to the Commonwealth Government under the Constitution was the power to make laws with respect to quarantine. Following on the passing of the *Quarantine Act* 1908 a branch of the Department of Trade and Customs, under the control of a Director of Quarantine, was created on 1 July 1909. The Commonwealth Department of Health was formed in 1921 by the extension and development of the quarantine service, the Director of Quarantine becoming the Director-General of Health. An amendment to the Constitution in 1946 gave the Commonwealth power to make laws with respect to pharmaceutical, hospital and sickness benefits, and medical and dental services. In addition, the Commonwealth Government has used its powers under Section 96 of the Constitution to make grants to the States for health purposes. The Commonwealth Government also gives financial assistance to certain organisations concerned with public health matters. A number of Commonwealth health organisations have been established; detailed information on the functions and operations of these organisations is given in Year Book No. 53, pages 561–6, and in the annual reports of the Commonwealth Director-General of Health.

#### Quarantine

The *Quarantine Act* 1908–1969 is administered by the Commonwealth Department of Health and has three sections of disease control, as follows: (i) human quarantine, which ensures that persons arriving from overseas are free of quarantinable disease; (ii) animal quarantine, which controls the importation of animals and animal products from overseas and the security of other animals present on vessels in Australian ports; and (iii) plant quarantine, which regulates the conditions of importation of all plants and plant products with the object of excluding plant diseases, insect pests and weeds.

In respect of interstate movements of animals and plants, the Act becomes operative only if the Governor-General considers that Commonwealth action is necessary for the protection of any State or States, and in general the administration of interstate movements of animals and plants is left in the hands of the States.

##### Human quarantine

All passengers and crews arriving in Australia from overseas, whether by air or sea, are subject to a medical inspection for the purpose of preventing the introduction of disease into Australia. At the major ports full-time quarantine officers carry out the work, but in the minor ports local doctors act as part-time quarantine officers. In each State, quarantine activities are controlled by the Commonwealth Director of Health, who is a senior medical officer of the Commonwealth Department of Health.

The main concern of the examining officers is to detect cases of the quarantinable diseases smallpox, cholera, yellow fever, plague, and typhus fever. These diseases are not endemic to Australia and it is of great importance to prevent their entry. Quarantine stations at the major ports and at Darwin and Townsville are kept ready for occupation at all times. In addition, persons arriving in Australia and suffering from infectious diseases such as chicken pox, mumps, scarlet fever, and measles are directed to appropriate care and placed in isolation where necessary.

Valid vaccination certificates are required of travellers to Australia as follows:

*Smallpox.* All arrivals from all countries except American Samoa, Antarctic Territories, Christmas (Indian Ocean), Cocos (Keeling) and Cook Islands, Fiji, Gilbert and Ellice Islands Colony (including Ocean and Fanning Islands), Hawaii, Lord Howe Island, Nauru, New Caledonia, New Hebrides, New Zealand, Niue and Norfolk Islands, Papua and New Guinea, Society Archipelago, Solomon and Tokelau Islands, Tonga, Western Samoa, provided travellers have not been outside these areas for at least fourteen days before arrival and that these areas are free from smallpox. Australia reserves the right, in respect of arrivals from other countries, to isolate any person who arrives by air without a smallpox vaccination certificate and refuses to be vaccinated. Children under one year of age are exempt. For passengers arriving in Australia by sea, exemption is granted to infants under twelve months of age and to persons who hold religious convictions against vaccination or who are suffering from a medical condition certified by a medical practitioner to contra-indicate smallpox vaccination.

*Cholera.* All arrivals from locally infected areas and from Burma, India, Indonesia, Republic of Korea, Malaysia, Pakistan, Philippines, Thailand, Republic of Vietnam. No certificate is required in respect of children under one year of age.

*Yellow fever.* All arrivals from yellow fever endemic zones.

All passengers, whether they arrive by sea or air, are required to give their intended place of residence in Australia, so that they may be traced if a case of disease occurs among the passengers on the aircraft or ship by which they travelled to Australia.

*Isolation.* Under the Quarantine Act, airline and shipping operators are responsible for the expenses of isolation of all travellers who disembark and (i) have come from a cholera infected area, or a cholera area specified above, within 14 days and do not possess a cholera vaccination certificate; or (ii) have come from an endemic zone within 14 days and do not possess a yellow fever vaccination certificate; or (iii) arrive by air without a smallpox vaccination certificate and refuse to be vaccinated on arrival.

The numbers of cases of infectious (non-quarantinable) diseases which were discovered among the passengers and crew of overseas vessels and aircraft calling at Australian ports during 1968-69 and during the preceding four years are shown in the following tables.

**HUMAN QUARANTINE: CASES OF INFECTIOUS  
(NON-QUARANTINABLE) DISEASES ON OVERSEAS VESSELS AND  
AIRCRAFT CALLING AT AUSTRALIAN PORTS, 1968-69**

Disease	Number of overseas vessels and aircraft on which cases were found	Number of cases of infectious disease	
		Passengers	Crew
Chicken pox . . . . .	22	41	..
Infectious hepatitis . . . . .	2	2	..
Measles . . . . .	18	203	1

Other . . . . .			
Total . . . . .	(a) 184	272	38

(a) On some vessels there were cases of more than one disease.

**HUMAN QUARANTINE: OVERSEAS VESSELS AND AIRCRAFT ARRIVING  
IN AUSTRALIA AND CASES OF INFECTIOUS (NON-QUARANTINABLE)  
DISEASES FOUND, 1964-65 TO 1968-69**

Year	Number of overseas vessels and aircraft cleared		Number of overseas vessels and aircraft on which cases were found	Number of cases of infectious disease	
	Ships	Aircraft		Passengers	Crew
1964-65 . . . .	3,359	2,936	107	333	19
1965-66 . . . .	3,488	3,297	201	360	122
1966-67 . . . .	4,040	3,918	246	523	172
1967-68 . . . .	4,440	4,968	238	312	289
1968-69 . . . .	4,813	5,896	184	272	249

The provisions of the State Health Acts with regard to the compulsory notification of infectious diseases and statistics of cases notified in 1969 are dealt with on pages 438-9 of this chapter.

**Animal quarantine**

Animal quarantine, authorised by the provisions of the *Quarantine Act* 1908-1969, aims at preventing the introduction or spread of animal diseases. It covers the importation of all animals, raw animal products and biological cultures associated with animal diseases, and goods associated with animals.

Of the domesticated animals, only horses, dogs, cats, and poultry are admitted from a limited number of countries depending on diseases being absent in the country of origin. All must be accompanied by health certificates which may include prescribed tests. On arrival in Australia, they are subject to quarantine detention. Zoological specimens are imported into registered zoos, where they remain in permanent quarantine. Circuses are also registered if exotic species of animals are kept. In a similar manner, animals for scientific purposes are imported to approved laboratories. All these premises are kept under constant surveillance. Raw animal products such as hair, types of wool skins, and hides are specially treated under quarantine control. Such items as raw meat and eggs, which cannot be sterilised, are admitted only from New Zealand. Other items may be treated to destroy any possible infection. Special attention is given to the importation of biological substances of animal origin. The Animal Quarantine Service is also responsible for the health certification of animals for export overseas in accordance with the requirements of the various countries.

The Division of Veterinary Hygiene was created in 1926 to deal with the administration of animal quarantine. The central administration is situated within the Health Department at Canberra, with a director, an assistant director and veterinary officers. The Principal Veterinary Officer of the Department of Agriculture in each State is appointed Chief Quarantine Officer (Animals) of that State, and members of his staff Quarantine Officers (Animals). These State officers carry out the quarantine policy formulated by the central administration. Quarantine accommodation is provided in permanent animal quarantine stations at each State capital.

The Division participates in world-wide international notifications of the more serious contagious diseases of animals and maintains a census of such diseases throughout the world. Information regarding animal diseases and parasites in Australia is also collected and disseminated by means of service publications. Consultation on technical matters is maintained with various scientific institutions. In matters of policy and the quarantine control of imports there is a close liaison with the Department of Customs and Excise.

The Division collaborates with the General and Plant divisions of the quarantine service. Many diseases of animals are communicable to man, and for this reason animal and general quarantine administration are in some respects inseparable. Similarly the interests of animal and plant divisions overlap, many items such as insects, fodder and straw being the subject of combined control.

### **Plant quarantine**

Since 1 July, 1909 the importation into Australia of all plants or parts of plants, cuttings, seeds, and fruits, whether living or dead, has been subject to an increasingly stringent quarantine with the object of preventing the introduction of insect pests, plant diseases and weeds not yet established in this country. Under the *Quarantine Act* 1908–1969, quarantine inspectors are required to examine all plant material at the first port of entry and to release only material free from diseases and pests. Everyone entering Australia is required to declare if he or she has any plant material in luggage or personal effects. Heavy penalties are laid down for those found evading the regulations. All plant material entering as cargo must also be declared.

When the Commonwealth became responsible for all plant quarantine as applied to the entry of plants and plant material into Australia, the State Governments agreed to co-operate by providing and maintaining inspection facilities and personnel, for which they are reimbursed by the Commonwealth. In 1921 the administration of the regulations came under the newly-formed Department of Health, and in 1927 the Plant Quarantine Branch was created. It is controlled by a director who is responsible for policy and legislation and for co-ordinating the work of the State officers who carry out the detailed administration in their capacity as Commonwealth officers.

Any plant material found carrying diseases or pests, or suspected of doing so, may be ordered into quarantine for remedial treatment. If treatment or return to sender is impracticable, the material may be destroyed. The cost of treatment is met by the importer. Regulations governing the different types of plants are based on the following broad principles. Importation of plants likely to be infected with plant diseases or pests, of noxious plants or fungi, and of poison plants is prohibited. Agricultural seed, not restricted under quarantine legislation, must conform to standards of purity and insect pest and disease freedom. Seed of commercial crops which could introduce diseases are prohibited imports except with special permission. All plant products not specifically restricted, such as timber, logs, crates, furniture and articles containing bamboo, cane and rattan are subject to inspection upon arrival and treatment if necessary. Many commodities, including hops, cotton, peanuts in shell, potatoes, and certain crop seeds, may be imported only by approved importers under specified conditions. All nursery stock, including bulbs, must be grown in post-entry quarantine. Prior approval is necessary, and such material may be imported only by approved importers who are registered for this purpose. The number of plants which may be imported in any one year is limited. The importation of propagating material of commercial fruits, vines, and berries is permitted only after special prior approval and is subject to specific screening for virus by qualified authorities. Soil is a prohibited import, and any vehicles or goods contaminated with soil are required to be thoroughly cleaned, at the expense of the importer, before entry is permitted. (In order to prevent the spread of plant diseases and pests already in Australia, the various State Governments administer plant quarantine regulations under which the movement of certain plant materials or fruits from one State to another or to certain specified districts within a State is controlled.)

### **Expenditure from the National Welfare Fund on health benefits and services**

For particulars of expenditure from all Commonwealth funds, analysed by function and economic type, see Chapter 18, Public Finance. This section deals with Commonwealth expenditure from the National Welfare Fund through which most Commonwealth health benefits and services are financed. The fund is not used to finance the cost of administering the benefits, or of capital works associated with benefits. For a brief description of the operation of this trust fund and details of expenditure from it on social welfare, see Chapter 13, Welfare Services. The following table shows expenditure from the Fund on national health benefits and miscellaneous health services.

COMMONWEALTH EXPENDITURE FROM THE NATIONAL WELFARE FUND

<b>Grand total</b>	<b>441,064</b>	<b>299,212</b>	<b>179,714</b>	<b>108,692</b>	<b>85,827</b>	<b>36,334</b>	<b>(p)3,691</b>	<b>(p)4,955</b>	<b>1,162,350</b>

(a) Includes expenditure on some items which are not available by State and Territory. (b) Payments to approved chemists, doctors, and private hospitals. (c) Included in the amount shown for South Australia. (d) Included in the amount shown for New South Wales. (e) Includes pharmaceutical benefit payments not available by State: \$135,000 for the Royal Flying Doctor Service; \$3,000 for Commonwealth and immigration medical services; and \$17,000 for biological products. (f) Payments on behalf of uninsured and pensioner patients only. (g) Payments to residents of the Northern Territory and the Australian Capital Territory who are insured with a hospital or medical fund are made through organisations registered in the States and are included in the amounts shown for the respective States. (h) Commenced 1 January 1969. (i) Includes allowances paid by the Department of Social Services. (j) Payments to Commonwealth Serum Laboratories to cover costs of processing and production. (k) Expenditure on this item is not available by State and Territory. (l) Costs of purchases by the Commonwealth X-ray and Radium Laboratory, including \$135,000 for purchases made overseas. (m) Purchases of component parts by the Commonwealth Acoustic Laboratories, including \$103,000 for purchases made overseas. (n) Includes \$635,000 paid to residents living abroad. (o) Grants under the Home Savings Grant Act 1964, and contributions for losses on rental housing under the Commonwealth and State Housing Agreement Act 1945. (p) Incomplete. See earlier footnotes.

In the following paragraphs the function and nature of each of the benefits and services shown in the above table are described.

## National health benefits

## Pharmaceutical benefits

A comprehensive range of drugs and medicines is made available to all persons receiving treatment from a medical practitioner registered in Australia. The benefits are supplied by an approved pharmacist upon presentation of a prescription, or by an approved hospital to patients receiving treatment at the hospital. The patient pays the first 50 cents of the cost of a prescription dispensed by an approved pharmacist, but pensioners who are eligible for treatment under the Pensioner Medical Service (see page 425) receive all benefits without any contribution being made. Special arrangements exist to cover prescriptions dispensed at locations outside the normal conditions of supply, e.g. in remote areas. Total Commonwealth expenditure on pharmaceutical benefits in the year 1968-69 was \$118,373,359.

The following table sets out the number of prescriptions and expenditure on the more frequently prescribed therapeutic preparations under the Pharmaceutical Benefits Scheme for 1967-68 and 1968-69. The expenditure for both years includes patient contributions, which totalled \$20,129,402 in 1968-69. Prescriptions issued free to pensioners are included, and these amounted to \$36,609,257 in 1968-69. Benefits dispensed by hospitals and those covered by special arrangements are not included; these amounted to \$17,739,119 in 1968-69.

**PRESCRIPTIONS DISPENSED UNDER THE PHARMACEUTICAL BENEFITS SCHEME(a)  
1968 AND 1969**

Therapeutic category	Year ended 30 June			
	1968		1969	
	Prescriptions	Expenditure	Prescriptions	Expenditure

(a) Excludes benefits dispensed by hospitals and those covered by special arrangements.

**Hospital, nursing home, handicapped children, and medical benefits**

Details of the provisions and benefits of these schemes under the *National Health Act 1953-1968* are set out in Year Book No. 55, pages 462-6. The hospital and medical insurance provisions were changed in 1969 to allow for free insurance under certain circumstances. As from 1 January 1970 the Government has made free hospital and medical insurance available to families whose income does not exceed \$39.00 a week; to people on unemployment or sickness benefit; and to migrants during their first two months residence in Australia. Persons in these categories are entitled to hospital benefits in the form of payment of public ward fees in approved hospitals, and entitled to medical benefits equivalent to those available to contributors to the highest medical benefit table in their State. See Appendix for information regarding changes made by amendments to the National Health Act in 1970.

*Expenditure on hospital, nursing home, and handicapped children benefits.* The following table shows the amount of these Commonwealth benefits paid during 1968-69. This does not include expenditure on mental hospitals (see page 429).

**COMMONWEALTH HOSPITAL, NURSING HOME, AND HANDICAPPED CHILDREN  
BENEFITS PAID STATES AND TERRITORIES, 1968-69**

(\$'000)

(a) Excludes payments of \$7,113,208 towards special accounts deficits in 1968-69. (b) Members who live in the Northern Territory or the Australian Capital Territory, or who are abroad, receive their Commonwealth benefit and fund benefit through membership of an organisation registered in one of the States, and payments to them are included in the respective States. (c) New South Wales includes Australian Capital Territory. (d) South Australia includes Northern Territory. (e) Introduced on 1 January 1969.

*Registered hospital benefits organisations.* The following table shows the number of registered hospital benefits organisations, the membership at 30 June 1969, and fund benefits paid during 1968-69. As many persons contribute on behalf of both themselves and their dependants, the total number of persons covered by hospital benefit schemes is considerably higher than the number of members.

**HOSPITAL BENEFITS: ORGANISATIONS AND FUND BENEFITS, STATES, 1968-69**

	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	Aust.
Registered organisations at 30 June 1969(a) . . . . .	(b)32	40	4	13	8	9	106
Membership at 30 June 1969 '000 . . . . .	1,507	1,191	328	419	317	115	(c)3,877
Fund benefits paid(d) \$'000 . . . . .	42,545	26,800	6,182	9,823	8,505	3,228	(c)97,083

(a) Excludes interstate branches. (b) Includes one organisation registered in the Australian Capital Territory (c) Members who live in the Northern Territory or the Australian Capital Territory, or who are abroad, receive their Commonwealth benefit and fund benefit through membership of an organisation registered in one of the States, and payments to them are included in the respective States. (d) Includes \$3,182,000 ancillary benefits.

*Expenditure on medical benefits.* The following table shows the number of registered medical benefit organisations, their membership, the number of medical services rendered to members and their dependants, and payments of Commonwealth benefits and medical fund benefits to members of registered organisations. As many persons contribute on behalf of both themselves and their dependants, the total number of persons covered by medical benefit schemes is considerably higher than the number of contributors. At 30 June 1969 the estimated number of persons covered by contributory medical schemes was 9,017,000.

**MEDICAL BENEFITS: SUMMARY, STATES, 1968-69**

	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	Aust(a)
Registered organisations(b)(c) . . . . .	No. (d)28	19	6	8	8	9	78

Fund benefit(f) . . . . .	'000 24,699	14,747	5,640	6,354	4,888	1,704	58,031

(a) Members who live in the Northern Territory or the Australian Capital Territory, or who are abroad, receive their Commonwealth benefit and fund benefit through membership of an organisation registered in one of the States. (b) Excludes interstate branches. (c) At end of period. (d) Includes one registered in the Australian Capital Territory. (e) Excludes payments of \$1,145,623 towards special accounts deficits. (f) Includes \$2,492,377 ancillary fund benefits.

**Pensioner Medical Service**

The Pensioner Medical Service, which commenced in 1951, was introduced under the authority of the National Health (Medical Services for Pensioners) Regulations made under the provisions of the *National Health Services Act 1948-1949*. The service has been continued under the provisions of the *National Health Act 1953-1969*.

Persons eligible to receive the benefits of the Pensioner Medical Service are those who receive a full or part age, invalid or widow's pension, or a sheltered employment allowance, under the *Social Services Act 1947-1969*; or a full or part service pension under the *Repatriation Act 1920-1969*; and who are able to satisfy the means test in force immediately prior to 1 October 1969; and their dependants. Also eligible are persons in receipt of an allowance under the *Tuberculosis Act 1948*, and their dependants.

The benefits provided to eligible persons consist of free medical service of a general practitioner nature such as that ordinarily rendered in the surgery or at the patient's home, including treatment at home following an operation. Specialist services, general anaesthetics, the setting of fractures, and operations are not covered. Patients may be charged a small fee by doctors for travelling and attendance outside normal surgery or visiting hours. Most general practitioners are enrolled in the scheme and are paid on a fee-for-service basis by the Commonwealth Government.

Qualified persons are entitled to a wide range of medicines without charge at any pharmacy, on presentation of a doctor's prescription. Free hospital treatment is also provided for public ward patients in public hospitals.

At 30 June 1969 the total number of pensioners and dependants enrolled in the Pensioner Medical Service was 1,163,660, while the number of doctors participating in the scheme at that date was 6,417. During 1968-69 doctors in the scheme provided 9,157,078 services (visits and surgery consultations) for persons enrolled in the scheme. For these services they were paid \$16,912,226. The average number of services rendered by doctors to each enrolled person was 8.1.

**Anti-tuberculosis Campaign**

Under an arrangement with the Commonwealth Government, each State conducts a campaign against tuberculosis. The Commonwealth Government reimburses the State for all approved capital expenditure in relation to tuberculosis, and for net maintenance expenditure to the extent that it exceeds net maintenance expenditure for the year 1947-48. Thus the States carry out the physical or field work of the national campaign and the Commonwealth acts in an advisory, co-ordinating, and financial capacity. For this reason the Commonwealth has not found it necessary to make much use of its powers under Section 6 of the Tuberculosis Act. An advisory council, known as the National Tuberculosis Advisory Council, has been set up. There are twelve members, the chairman being the Commonwealth Director-General of Health.

To help reduce the spread of infection the Commonwealth Government pays allowances to persons suffering from infectious tuberculosis, so that they may give up work and undergo treatment. These allowances have been in operation since 13 July 1950. The rates now payable are: married sufferer with a dependant wife, \$29.75 a week; sufferer without a spouse but with a dependent child or children, \$23.00 a week; dependent child or children under sixteen years of age and full-time student children from sixteen to twenty-one years, \$2.50 a week for the first dependent child and \$3.50 a week for each other dependent child (additional to child endowment); sufferer without dependants, \$18.25 a week (reducible to \$15.00 a week if a person is maintained free of charge in an institution). In addition to the above rates, there may be payable a mother's or guardian's allowance of \$2.00 a week or supplementary assistance of up to \$2.00 a week.

There is a means test on income but not on property. The allowance is reduced by the amount by which a person's income from sources other than his allowance exceeds, in the case of a person receiving the married person rate, \$17.00 a week; a person who is without a spouse or dependent female and is entitled to a 'single person' rate, \$10.00 a week; and a person with a spouse but who is not entitled to a 'married person' rate, \$8.50 a week.

*Commonwealth expenditure.* Expenditure by the Commonwealth Government on its anti-tuberculosis campaign is set out in the following tables. The figures for maintenance include administrative costs, and therefore the totals for allowances and maintenance differ from those shown for the tuberculosis campaign in the National Welfare Fund table on page 423.

**COMMONWEALTH EXPENDITURE ON ANTI-TUBERCULOSIS CAMPAIGN  
STATES AND TERRITORIES, 1968-69  
(\$'000)**

<i>State or Territory</i>	<i>Allowances</i>	<i>Maintenance (a)</i>	<i>Capital</i>	<i>Total</i>
New South Wales . . . . .	314	4,353	572	5,239

<b>Australia . . . . .</b>	<b>921</b>	<b>11,743</b>	<b>847</b>	<b>13,511</b>

(a) Includes \$282,778 for administrative costs.

**COMMONWEALTH EXPENDITURE ON ANTI-TUBERCULOSIS  
CAMPAIGN: AUSTRALIA, 1964-65 TO 1968-69  
(\$'000)**

<i>Year</i>	<i>Allowances</i>	<i>Maintenance (a)</i>	<i>Capital</i>	<i>Total</i>
1964-65 . . . . .	1,458	10,354	696	12,508
1965-66 . . . . .	1,286	13,586	696	15,569
1966-67 . . . . .	1,193	11,247	499	12,939
1967-68 . . . . .	1,091	11,511	780	13,382
1968-69 . . . . .	921	11,743	847	13,511

(a) Includes administrative costs.

**Anti-poliomyelitis campaign**

Information concerning the initial production by the Commonwealth Government in 1955 of anti-poliomyelitis vaccine in Australia, and of the testing procedures which were carried out, is contained in Year Book No. 49 and earlier issues. Information regarding the campaign against poliomyelitis, using Salk vaccine, is contained in Year Book No. 53 (page 560) and in earlier issues.

Following a recommendation of the National Health and Medical Research Council in May 1966, all States except Victoria indicated that Sabin oral vaccination campaigns would be commenced during 1967. Sabin vaccine is now in use in all States and Territories.

Sabin vaccine is taken by mouth. Three doses of vaccine are given at intervals of at least eight weeks.

**Free milk for school children scheme**

The *States Grants (Milk for School Children) Act* 1950 was passed with the object of improving the diet of school children by the addition of a small quantity of milk each day. All children under the age of thirteen years attending government or non-government primary schools, including nursery schools, kindergartens, creches and missions for Aborigines, are eligible to receive free milk. The cost of the milk and half the capital or incidental costs, including administrative expenses of the scheme, are reimbursed by the Commonwealth to the States. All States now participate in the scheme. At the end of 1968 approximately 1,838,500 children were entitled to receive free milk under this scheme. Expenditure by the Commonwealth Government during the years 1964-65 to 1968-69 was as follows.

**COMMONWEALTH EXPENDITURE ON MILK FOR SCHOOL CHILDREN SCHEME  
STATES AND TERRITORIES, 1964-65 TO 1968-69**  
(\$'000)

<i>Year</i>	<i>N.S.W.</i>	<i>Vic.</i>	<i>Qld</i>	<i>S.A.</i>	<i>W.A.</i>	<i>Tas.</i>	<i>N.T.</i>	<i>A.C.T.</i>	<i>Aust.</i>
1964-65 .	2,881	2,069	1,215	760	640	389	72	60	8,085
1965-66 .	2,916	2,386	1,259	801	622	408	56	74	8,521
1966-67 .	3,073	2,394	1,400	860	701	451	77	93	9,049
1967-68 .	3,357	2,628	1,376	955	853	511	75	106	9,861
1968-69 .	3,380	2,641	1,549	1,065	800	431	110	109	10,085

The figures in the foregoing table differ slightly from those in the Welfare Fund table, as they include capital and administrative costs. Figures in the latter table represent only the cost of the milk.

**Miscellaneous health services**

Fifteen *Commonwealth Health Laboratories* have been established under the *National Health Act* 1953-1969, principally in country areas throughout Australia, to provide facilities for the investigations into public health and preventive medicine and to assist local medical practitioners in the investigation and diagnosis of disease. The laboratories are situated in the following centres: Albury, Alice Springs, Bendigo, Cairns, Canberra, Darwin, Hobart, Kalgoorlie, Launceston, Lismore, Port Pirie, Rockhampton, Tamworth, Toowoomba, and Townsville. During 1968-69 these laboratories performed 4,186,261 examinations and tests (Nuffield points score system) in respect of 674,832 patients. Administrative costs were \$1,596,546 and expenditure on plant and equipment was \$176,360.

The *Commonwealth Serum Laboratories* are controlled by the Commonwealth Serum Laboratories Commission, which is a body corporate established under the *Commonwealth Serum Laboratories Act* 1961-1966. The main functions of the Commission are to produce and sell prescribed biological products used for therapeutic purposes and to ensure the supply of prescribed essential biological products in accordance with national health needs. These functions include research and development relating to prescribed biological products and allied fields, and the maintenance of potential production capacity for use in emergencies. The Commission is expected under the Act to generate sufficient revenue from the sale of its products to finance its activities relating to prescribed biological products. Certain services, determined by the Minister for Health from time to time, are payable by the Commonwealth. This includes reimbursement for the issue of a wide range of blood products which are processed from whole blood supplied by the Australian Red Cross Blood Transfusion Services and distributed throughout Australia free of charge for medical purposes.

The *Home Nursing Subsidy Scheme*, under the *Home Nursing Subsidy Act 1956*, provides for a Commonwealth subsidy to assist the States in the expansion of home nursing activities. Organisations eligible for the subsidy are those which are non-profit making, employ registered nurses, and receive assistance from a State Government, local government body or other authority established by or under State legislation. At 30 June 1969 there were 79 home nursing services in the States employing approximately 750 trained nurses. Commonwealth assistance to the States during 1968-69 was \$956,129. Home nursing services in the Northern Territory and the Australian Capital Territory are provided by the Commonwealth Department of Health.

The *Commonwealth X-ray and Radium Laboratory* was originally established in 1929 as the Commonwealth Radium Laboratory, and has served from that time as the Commonwealth centre for radiological physics and as custodian of all Commonwealth-owned radium used for medical purposes. The laboratory's functions have expanded over the years to include the physical aspects of X-rays; the distribution of all radio-isotopes used in Australia for medical purposes; the maintenance of facilities for radio-chemical investigation; and the assay of radioactive substances in the Australian environment. The laboratory also provides assistance in matters relating to protection against ionising radiations and operates a film-badge service to monitor the radiation exposure of those who work with such radiation. In 1968-69 there were 2,482 deliveries of radio-isotopes, comprising 49 different isotopes, procured for use in medicine and medical research. Of these, 1,946 deliveries were obtained from the Australian Atomic Energy Commission. Free issues for medical diagnosis and therapy supplied for patients throughout Australia were 86,944, the cost of \$257,277 being met from the National Welfare Fund. Film badges, numbering 81,682, were processed, assessed, and reported on. The Laboratory also supplies radon to approved hospitals and private practitioners in Australia and New Zealand. In 1968-69, 24,941 millicuries of radon were issued. Administrative costs for 1968-69 were \$284,214 and \$47,683 was expended on plant and equipment.

The *Commonwealth Acoustic Laboratories* were established under the *Acoustic Laboratories Act 1948* to undertake scientific investigations into hearing and problems associated with noise as it affects individuals. The laboratories also provide assistance in the general aural rehabilitation of ex-service personnel and school and pre-school children. The provision and maintenance of hearing aids is available free of charge to persons under twenty-one years of age, but replacement batteries must be purchased by those in remunerative employment. In April 1968 a hearing aid service was made available to pensioners for a nominal fee of \$10. To qualify for assistance persons should be receiving an age, invalid or widow's pension or a sheltered employment allowance under the Social Services Act, a service pension under the Repatriation Act or an allowance under the Tuberculosis Act. Dependants of eligible persons are also entitled to the service. The cost of these services is met from the National Welfare Fund. The laboratories' functions also include the provision and maintenance of hearing aids on behalf of the Repatriation and other Commonwealth Departments. During 1968-69 the number of new cases examined at the laboratories was 27,601, including 7,791 children, 4,979 repatriation cases, 1,294 members of the defence forces, 11,601 pensioners and 880 civil aviation referrals; 17,214 calaid hearing aids were fitted and 40,295 maintained. The cost of supply and maintenance of hearing aids to persons under twenty-one years of age and pensioners was \$558,054. Administrative costs of the laboratories were \$745,791 and expenditure on plant and equipment \$117,173.

### Other Commonwealth health organisations

The *National Health and Medical Research Council* was established in 1936 to replace the National Health Council. Its main functions are to advise Commonwealth and State Governments on all matters of public health legislation and administration, on matters concerning the health of the public, and on medical research. It also advises the Commonwealth and State Governments on the merits of reputed cures or methods of treatment which are from time to time brought forward for recognition. The Council advises the Commonwealth Minister for Health on the application of expenditure from the Medical Research Endowment Fund which was established under the *Medical Research Endowment Act 1937* to provide assistance to departments of the Commonwealth or of a State engaged in medical research; to universities for the purpose of medical research; to institutions and persons engaged in medical research and in the training of persons in medical research. The Commonwealth makes a triennial appropriation for the Fund, that for 1970 to 1972 being \$6,262,000.

The *School of Public Health and Tropical Medicine* was established in 1930 by the Commonwealth Government at the University of Sydney under an agreement with that University. It provides training for medical graduates and students in public health and tropical medicine in addition to research and consultative activities in these and allied fields. During 1968-69, 6 diplomas were awarded in Public Health and 7 in Tropical Medicine and Hygiene. Costs met by the Commonwealth during 1968-69 were \$515,936 for administration and \$26,622 for plant and equipment.

The *Institute of Child Health* is associated with the School of Public Health at the University of Sydney and with the Royal Alexandra Hospital for Children at Camperdown. Its activities include research into medical and social problems of childhood, undergraduate and post-graduate teaching at the University of Sydney and collaboration with other national and international organisations concerned with child health and disease. Costs of the Institute paid by the Commonwealth during 1968-69 were \$106,815 for administration and \$87,675 for plant and equipment.

The *Commonwealth Bureau of Dental Standards* operates under Section 9 of the *National Health Act* 1953-1969. It is part of the Commonwealth Department of Health and is concerned with research, standards and testing related to dental and allied materials and processes. Its functions include the provision of a consultative service and testing facilities for manufacturers and distributors of dental materials. The number of these products tested during 1968-69 was 213. Expenditure on plant and equipment was \$16,997.

The *Australian Institute of Anatomy* is also part of the Commonwealth Department of Health. The scientific research work of the Institute is mostly concentrated on problems of nutrition by field surveys of dietary status and laboratory investigation into the biochemistry of nutrition and metabolism. During 1968-69 work continued to be directed towards nutritional problems in the Territory of Papua and New Guinea. The Institute also contains a museum section which includes a display of anatomical specimens and models.

The *National Biological Standards Laboratory* was set up under the *Therapeutic Substances Act* 1953-1959 which empowers the Commonwealth to ensure that therapeutic substances used for the prevention, diagnosis, and treatment of disease in man and animals are safe, pure, and potent. The Commonwealth Director-General of Health is authorised under the Act to set up laboratories to test such substances. Of the 1,439 samples examined by the Laboratory during 1968-69, 350 failed to meet the required standards. In addition, 1,022 safety tests were performed, 29 were failed, and 8 were deferred for further testing. Administrative costs for 1968-69 were \$671,590 and \$116,483 was expended on plant and equipment.

## Commonwealth grants to States

### Grants for mental hospitals

Following a survey of the Mental health facilities and needs in Australia made in 1955, the Commonwealth made an offer of \$20 million to the States as part of a capital expenditure programme of \$60 million on increasing and improving patient accommodation. All States accepted the Commonwealth offer. By 1963 more than three-quarters of the total grant under the *States Grants (Mental Institutions) Act* 1955 had been distributed and the Commonwealth Government announced in November 1963 its intention of continuing assistance to the States towards capital costs on a similar basis, but without overall limit, for a period of three years. In May 1964 the *States Grants (Mental Health Institutions) Act* 1964 was passed to implement that policy. This Act provided for the continuation of Commonwealth aid of \$1 for every \$2 of capital expenditure by the States on mental health facilities for the three-year period ending 30 June 1967. With the passing of the *States Grants (Mental Health Institutions) Act* 1967, this date has been extended to 30 June 1970. The following table sets out the amounts which have been paid to the State Governments by the Commonwealth Government from 1964-65 to 1968-69.

EXPENDITURE ON MENTAL HOSPITALS BY THE COMMONWEALTH GOVERNMENT: STATES, 1964-65 TO 1968-69  
(\$'000)

Year	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	Aust.
1964-65(a)	659	711	225	265	447	197	2,504
1965-66	1,717	1,567	146	242	338	529	4,539
1966-67	2,217	1,192	288	193	260	823	4,973
1967-68	2,095	1,381	196	63	148	358	4,243
1968-69	1,925	1,200	323	433	375	399	4,655

(a) Expenditure for 1964-65 includes final grants, totalling \$406,454, made under the 1955 Act as follows: New South Wales, \$274,938; Queensland, \$21,210; and South Australia, \$110,306.

There are no mental hospitals in the Northern Territory or in the Australian Capital Territory.

### Paramedical Services

The *States Grants (Paramedical Services) Act 1969* provides for the Commonwealth to share on a \$1 for \$1 basis with participating States the cost of approved paramedical services, such as chiropody, occupational therapy, physiotherapy and speech therapy, provided wholly or mainly for aged persons in their homes. It is estimated that grants in 1969-70 will amount to \$190,000.

### Commonwealth grants to organisations associated with public health

In addition to providing the services mentioned on pages 419-29, the Commonwealth Government gives financial assistance to certain organisations concerned with public health. Examples of organisations included in this category are given in the following text. More detailed information on their operations and functions is given in Year Book No. 53, pages 570-3.

The *Commonwealth National Fitness Council* operates under the *National Fitness Act 1941-1969*. Its main function is to advise the Minister for Health concerning the promotion of national fitness. The Act also provides for the establishment of a trust account, known as the National Fitness Fund, to assist in financing the movement. During 1968-69 the Commonwealth's contribution to the Fund was \$368,000, of which \$68,000 was for assistance towards capital expenditure. Expenditure from the Fund during 1968-69 was \$351,069, distributed as follows: State National Fitness Councils, \$224,908; State Education Departments, \$34,000; State Universities \$24,800; Australian Recreation Leadership Course, \$4,000; capital expenditure on national fitness projects, \$51,038; grants to Australian Capital Territory organisation, \$5,800; and administration, \$6,523.

The *Royal Flying Doctor Service* is a non-profit organisation providing medical services in the remote areas of Australia. It is distinct from, but co-ordinates with, the Aerial Medical Services operated by the Commonwealth Department of Health from Darwin and Alice Springs in the Northern Territory. The Royal Flying Doctor Service is financed mostly from donations and government contributions. During 1968-69 the Commonwealth Government contributed \$350,000, of which \$170,000 was for capital expenditure, and \$180,000 towards operating costs. The Service made 3,161 flights during 1968-69, travelling 1,422,460 miles and transporting 3,399 patients. In the same period medical staff conducted a total of 75,704 consultations and dental treatment was given to 3,791 patients. The radio network of the Service handled 327,416 telegrams.

The *Red Cross Blood Transfusion Service* is conducted by the Australian Red Cross Society throughout Australia. The operating costs of the service in the States are met by the State Governments paying 60 per cent; the Commonwealth, 30 per cent; and the Society, 10 per cent. In the Northern Territory and Australian Capital Territory the Commonwealth pays 90 per cent and the Society 10 per cent. Commonwealth expenditure for each State and Territory during 1968-69 was as follows: New South Wales, \$195,705; Victoria, \$193,348; Queensland, \$138,534; South Australia, \$115,042; Western Australia, \$74,985; Tasmania, \$25,364; Northern Territory, \$13,854; and the Australian Capital Territory, \$8,440, making a total of \$765,272 compared with \$655,565 for 1967-68.

*Lady Gowrie Child Centres* were established in 1940 by the Commonwealth Government in each of the six State capitals. The functions of these centres include specialised demonstration and research relating to problems of physical growth and nutrition, physical and mental development, and also to test and demonstrate methods for the care and instruction of the young child. The centres are administered by local committees under supervision of the Australian Pre-school Association and are financed mainly by Commonwealth grants. The Commonwealth contribution for 1968-69 was \$120,000 for the Centres and \$14,800 for the Australian Pre-school Association.

The *National Heart Foundation of Australia* is a private national organisation established to promote research in cardiovascular disease, to rehabilitate heart sufferers and to foster the dissemination of information about heart diseases. Formed in 1960, as a result of a public appeal yielding \$5 million to which the Commonwealth Government contributed \$20,000, the Foundation has its headquarters in Canberra. From its inception to the end of 1969 the Foundation has allocated more than \$3 million for grants-in-aid towards research in university departments, hospitals and research institutes; research fellowships tenable in Australia and overseas; and overseas travel grants. Most of the annual expenditure of about \$700,000 is devoted to supporting research into cardiovascular disease.

The *World Health Organization (WHO)* is a specialised agency of the United Nations acting as a directing and co-ordinating authority on international health work. It also provides health services and facilities to people of trust territories and other groups if requested by the United Nations. Australia was represented at the Twenty-second World Health Assembly held at Boston in July 1969, and at the Twentieth Western Pacific Regional Committee Meeting at Manila in September 1969. The Commonwealth contribution to WHO during 1968-69 was \$765,814, which included a grant of \$12,000 to the Commonwealth Serum Laboratories for WHO influenza research.

The *International Agency for Research on Cancer* was established by the World Health Organization, and participation by Australia was approved by the Government in 1965. The objectives of the Agency are to promote international collaboration in cancer research and to provide a means through which countries and interested organisations may co-operate in the stimulation and support of research into cancer. The Commonwealth contribution to the Agency in 1968-69 was \$134,771.

## STATE GOVERNMENT ACTIVITIES

(Includes activities of the Commonwealth Government in the Northern Territory and the Australian Capital Territory)

### Public health legislation and administration

For details of the administration of health services in each State, the Northern Territory, and the Australian Capital Territory, see pages 543-50 of Year Book No. 53. For administrative changes which took place in 1968, see page 457 of Year Book No. 55. The following paragraphs refer briefly to recent administrative changes.

In *New South Wales*, the Health Education Section of the Department of Public Health was elevated to the status of a Division, and has commenced surveys to determine community needs and advise on programmes consistent with these needs. The Noxious Trades Act, 1902 has been amended to extend the provisions of the Act to the whole of the State. The amendment enabled the councils of the few remaining municipalities and shires not previously covered by the Act to take necessary measures to control noxious trades in their areas. It also brought about an increase in fees for the licensing of noxious trades. The Hospitals Commission has tentatively allocated all public hospitals in the State to regions in order to assist with the planning for complete regionalisation of hospital services. Provision has been made for three Sydney metropolitan regions, and so far the Newcastle and Hunter Valley Region, Riverina Region, the North Western Region, and the Metropolitan Western Region have been established.

In *Queensland*, the *Chiropodists Act of 1969* was brought into operation and a registration board of seven members constituted. Subject to this Act, a person is entitled to be registered as a chiropodist in Queensland if he applies to the Board, pays the prescribed fee for registration, and satisfies the Board that he is of good character and is suitably qualified.

In *Tasmania*, the *Alcohol and Drug Dependency Act 1968* was introduced to make provision for the treatment and control of persons suffering from alcohol and drug dependency. Its main aim is to detect alcohol and drug dependents in the early stages and provide for their early treatment and rehabilitation. The *Pesticides Act 1968* was introduced to make provision for contemporary requirements for the control, sale and use of pesticides. The *Fluoridation Act 1968* was introduced to make provision for the addition of fluoride to public water supplies.

In the *Australian Capital Territory*, the Ambulance Service was transferred from the Canberra Community Hospital to the A.C.T. Health Services Office in February 1968. The operation of Infant Welfare Centres was transferred from the Canberra Mothercraft Society to the A.C.T. Health Services Office in July 1969. The Canberra Abattoir was purchased by a private company from the Commonwealth Government in 1969; however, meat inspection and supervision of hygiene is maintained by officers of the A.C.T. Health Services Office.

### Supervision and care of infant life

Because the health of mothers and infants depends largely on pre-natal attention as well as after-care, government, local government and private organisations provide instruction and treatment for mothers before and after confinement. The health and well-being of mother and child are looked after by infant welfare centres, baby clinics, creches, etc.

In all States, Acts have been passed with the object of supervising the conditions of infant life and reducing the rate of mortality. (Information about infant mortality will be found in Chapter 8, Vital Statistics.) Stringent conditions regulate the adoption, nursing and maintenance of children placed in foster-homes by private persons.

Under the provisions of the *Social Services Act 1947-1969* maternity allowances provide financial assistance towards the expenses associated with the birth of children. Information about maternity allowances is given in Chapter 13, Welfare Services.

### Nursing activities

Several State Governments maintain institutions which provide treatment for mothers and children and, in addition, subsidies are granted to various associations engaged in welfare work.

*Infant welfare centres.* The following table gives particulars of the activities of infant welfare centres for the year 1969. The figures relate to all centres, whether permanently staffed or on a temporary or part-time basis. Centres may be located at accommodation specially provided for this purpose, or at halls, schools, etc.

INFANT WELFARE CENTRES: STATES AND TERRITORIES, 1969

	N.S.W.	Vic.	Qld(a)	S.A.(a)	W.A.	Tas.	N.T.(a)	A.C.T.	Aust.
Number of centres	443	715	301	284	139	111	27	33	2,053
Attendances at centres	1,096,082	1,537,963	470,313	270,522	265,314	147,636	25,098	58,022	3,870,950
Visits by nurses to homes	n.a.	157,753	1,861	34,846	28,662	77,569	8,933	7,030	n.a.
Visits by nurses to hospitals	n.a.	26,335	30,034	n.a.	18,825	n.a.	1,354	..	n.a.

(a) Year ended 30 June 1969

Mobile units are used to service centres in some States. In 1969, the numbers of units and centres served, included in the above table, were as follows: Victoria, 4 and 11; Queensland, 3 and 30; South Australia, 2 and 20; Western Australia, 3 and 63; and the Northern Territory, 1 and 6. The number of centres for Tasmania includes 13 areas visited by sisters in cars.

Since 1930, the number of attendances at the infant welfare centres has increased more than four-fold. The numbers of attendances at ten year intervals since 1930 were as follows: 1930, 919,893; 1940, 2,035,299; 1950, 3,049,375; 1960, 3,482,383; and 1969, 3,870,950.

*Bush Nursing Associations.* Treatment for mothers and children is also provided by the Bush Nursing Associations. The numbers of centres maintained by the Associations in 1969 were: New South Wales, 16; Victoria, 58; Queensland, 5; South Australia, 33; Western Australia, 19; and Tasmania, 1. In Tasmania, all but one of the district nursing centres have been taken over by the nearest public hospital and are no longer distinct entities.

### Medical and dental inspection of school children

For details of the administration of school health services in each State, the Northern Territory, and the Australian Capital Territory, see Year Book No. 55, pages 458-61. Further information about the operation of the school medical and dental services is given in State Year Books. The following paragraphs summarise features common to most States.

Medical and dental inspection of school children is carried out in all States under the control of State health departments, and in the Northern Territory and the Australian Capital Territory under the control of the Commonwealth Department of Health. The school health services are available to both government and non-government schools in metropolitan areas and larger country towns. In some States, special arrangements are made for children attending schools in more remote country areas.

The aim of the school medical services is to medically examine all children at least once during their school careers, usually on entry into primary school. Review examinations or, in some States, tests of vision and hearing by school nurses, are conducted in upper-primary and lower secondary grades. Parents or guardians are notified of any departure from normal health and advised to seek further attention if necessary.

The aim of the school dental services is to examine and give regular dental treatment to children. Usually, acceptance for treatment is limited to children in primary schools. Some school children are treated at hospital dental clinics. Aboriginal missions and orphanages are also visited by school dentists. The consent of a parent or guardian is necessary before treatment can be given. In some States, priority is given to children who live in areas beyond the easy reach of other dental services. Treatment in remote areas is facilitated by the use of travelling dental clinics.

The following table summarises school health services in the States and Territories. Uniform concepts and definitions, have not been developed, so Australian totals have not been shown.

**SCHOOL HEALTH SERVICES: STATES AND TERRITORIES, 1969**

(a) Year ended 30 June 1969. (b) Full-time and part-time. (c) Excludes some children tested for hearing and vision by school sisters. (d) Includes pre-school children. (e) Partly estimated. (f) There is also a dental team with the Royal Flying Doctor Service (based at Broken Hill). (g) In addition, portable dental equipment is possessed by 13 dental officers who function from departmental vehicles. (h) Only children who reside in more remote areas.

**HOSPITALS AND OTHER STATISTICS**

This section provides statistical information on hospitals and nursing homes; notifiable diseases; a survey of chronic illnesses and impairments; and cremations. The institutions referred to under this heading are classified into the following groups: public hospitals and nursing homes; private-hospitals and nursing homes; repatriation hospitals; hansenide hospitals; and mental health institutions. Statistics of quarantine stations, and of hospitals maintained by the Armed Services, are not included.

**Public hospitals and nursing homes**

The statistics shown for public hospitals and nursing homes refer to the following institutions: *New South Wales*—all institutions which are under the authority of the New South Wales Hospitals Commission, and which receive a government subsidy during the year, and the six State hospitals and nursing homes under the control of the Department of Public Health; *Victoria*—all subsidised hospitals and subsidised hospitals for the aged under the authority of the Victorian Hospitals and Charities Commission, two tuberculosis sanatoria, and the Peter MacCallum Clinic, but not the infectious diseases block at the Fairfield Hospital; *Queensland*—all hospitals controlled by the State Government or by the State hospital boards, including some institutions for out-patients or first-aid treatment only and some other hospitals which provide public accommodation in the form of public wards or designated public beds; *South Australia*—all hospitals controlled and maintained by, or which receive a regular annual grant or subsidy for maintenance purposes from, the South Australian Government, and hospitals controlled and maintained by local government or semi-governmental authorities; *Western Australia*—all departmental and subsidised board hospitals, including the Perth Dental Hospital; *Tasmania*—all public hospitals designated as such by the Director-General of Health Services, together with three homes for the aged, and one chest hospital; *Northern Territory*—departmental hospitals at Darwin, Alice Springs, Tennant Creek, and Katherine; *Australian Capital Territory*—the Canberra Hospital and the Queen Elizabeth II Coronation Home for post-natal care.

A number of institutions classified by the Commonwealth Department of Health as 'public' hospitals or nursing homes are not included in the statistics of public hospitals and nursing homes: there were 102 such institutions at June 1968, with an approved bed capacity of 4,475.

## Number, staff and accommodation

## PUBLIC HOSPITALS AND NURSING HOMES: NUMBER, STAFF AND ACCOMMODATION, STATES AND TERRITORIES, JUNE 1968

	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
Number of hospitals and nursing homes . . . . .	268	157	145	66	95	25	4	2	762

(a) Includes honorary and visiting medical officers who may hold appointments at more than one hospital.  
 (b) Qualified and student nurses, assistant nurses, assistant nurse trainees, nursing aides, and nursing aide trainees.

## In-patients treated

The following table gives particulars of in-patients treated. The figures shown refer to cases, that is to say, a person who is admitted to hospital or nursing home twice during a year is counted twice. Newborn babies are excluded unless they remain in hospital or nursing home after their mothers' discharge.

## PUBLIC HOSPITALS AND NURSING HOMES: IN-PATIENTS TREATED STATES AND TERRITORIES, 1967-68

Females . . . . .	11,669	n.a.	4,954	1,981	2,596	1,188	216	n.a.	n.a.
Persons . . . . .	21,332	13,249	8,753	3,536	4,800	2,105	443	479	54,697
Average daily number resident . . . . .	20,929	13,014	8,561	3,435	4,648	2,004	398	478	53,467

In addition to those admitted to the hospitals and nursing homes, there are large numbers of out-patients treated. During 1967-68 there were approximately 1,823,000 out-patients treated in New South Wales, 837,000 in Victoria, 971,000 in Queensland, 161,000 in South Australia, 280,000 in Western Australia, 119,000 in Tasmania, 146,000 in the Northern Territory (includes two clinics), and 29,000 in the Australian Capital Territory, making an estimated total for Australia of 4,365,000. The figures quoted refer to cases, as distinct from persons and attendances.

## Revenue and expenditure

Details of revenue and expenditure for the year 1967-68 are shown in the next table. 'Government aid' includes municipal aid which was shown as a separate revenue item for some States in previous Year Books. Commonwealth pharmaceutical benefits and tuberculosis allowances paid direct to the institutions have also been included as 'government aid'.

Commonwealth hospital and nursing home benefits paid direct to public hospitals and nursing homes (in either full or part payment of fees incurred by pensioners and other uninsured patients) are treated on the same basis as Commonwealth benefits used to reimburse insured patients, and included in the amounts shown for 'fees'. Details of Commonwealth expenditure on each of the different categories of hospital benefits are shown on pages 424-5.

For some States, expenditure on capital items out of hospitals' own funds are not included in the figures shown. Comparison between the States should therefore be made with caution.

(a) Excludes loans from semi-government authorities; these loans are included in 'other' revenue. (b) Includes transfers from hospital reserve accounts.

### Summary for Australia

A summary of statistics relating to public hospitals and nursing homes in Australia is given in the following table.

**PUBLIC HOSPITALS AND NURSING HOMES: AUSTRALIA, 1963-64 TO 1967-68**

	1963-64	1964-65	1965-66	1966-67	1967-68
Hospitals and nursing homes . . . . .	756	761	766	765	762
Medical staff—					
Salaried . . . . .	3,428	3,674	3,967	4,125	4,487
Other(a) . . . . .	7,980	8,389	8,824	8,728	8,834
Nursing staff(b) . . . . .	43,762	45,244	47,656	49,640	52,236
Beds and cots . . . . .	69,230	70,043	71,226	73,748	74,768
Admissions . . . . .	1,325,934	1,364,077	1,395,519	1,439,959	1,500,662
Total in-patient (cases) treated . . . . .	1,374,471	1,416,388	1,447,900	1,494,709	1,554,331
Average daily number resident . . . . .	49,047	49,732	50,161	52,331	53,467
Out-patients (cases)(c) . . . . .	3,342,000	3,579,000	3,820,000	3,993,000	4,365,000
Revenue . . . . .	\$'000 282,021	310,687	341,741	376,343	413,183
Expenditure . . . . .	\$'000 284,791	309,434	341,007	377,457	411,869

(a) Includes honorary and visiting medical officers, who may hold appointments at more than one hospital. (b) Qualified and student nurses, assistant nurses, assistant nurse trainees, nursing aides, and nursing aide trainees. (c) Partly estimated.

### Private hospitals and nursing homes

The figures shown in the following table refer to those private hospitals and nursing homes which have been approved for the payment of Commonwealth hospital benefits under the *National Health Act* 1953-1969. A small number of institutions classified as 'private' by the Commonwealth Health Department are included in public hospital statistics, and these have been omitted from the following two tables. Statistical information about patients, staff and finance of these institutions is not available on a uniform Australia-wide basis.

**PRIVATE HOSPITALS AND NURSING HOMES: STATES, 1964 TO 1968**

State	30 June—				
	1964	1965	1966	1967	1968

<b>Australia . . . . .</b>	<b>30,225</b>	<b>32,694</b>	<b>34,133</b>	<b>36,178</b>	<b>38,150</b>

(a) Includes one institution in the Northern Territory.

There were no institutions of this nature in the Australian Capital Territory in 1968.

**Repatriation hospitals**

The medical care of eligible ex-servicemen and dependants of deceased ex-servicemen is a major function of the Commonwealth Repatriation Department, which provides a comprehensive service.

In-patient treatment is provided at Repatriation General Hospitals in each capital city, at six auxiliary hospitals and at one sanatorium. In-patient treatment may also be provided in country hospitals at the Department's expense in certain circumstances. Mental patients requiring custodial care are, by agreement with the State Governments, accommodated at the expense of the Department in mental hospitals administered by the State authorities.

Details of patients, staff and expenditure on Repatriation institutions and other medical services are given in Chapter 5, Repatriation.

**Hansenide hospitals**

There are four isolation hospitals in Australia for the care and treatment of persons suffering from Hansen's disease (leprosy). The numbers of isolation patients at these hospitals at 31 December 1969 were: Little Bay (New South Wales), 9; Fantome Island (North Queensland), 13; Derby (Western Australia), 151; and East Arm Settlement (Northern Territory), 9. In addition, there were 83 voluntary patients resident in the East Arm Settlement, mostly for the purpose of reconstructive surgery. With the exception of the Institute of Tropical Medicine at Little Bay, nursing services are provided mostly by sisters of religious orders under supervision of Government medical officers.

Special wards for the isolation and treatment of leprosy patients are also provided at other centres. The location of these wards and the number of isolation patients resident at 31 December 1969, were: Fairfield (Victoria), 3; Princess Alexandra Hospital (Queensland), 4.

**Mental health institutions**

The presentation of meaningful statistics of mental health services has become increasingly difficult because of changes in recent years in the institutions and services for the care of mental patients. The emphasis has shifted from institutions for care of patients certified insane to a range of mental health services provided for in-patients and out-patients at psychiatric hospitals, admission and reception centres, day hospitals, out-patient clinics, training centres, homes for the mentally retarded and geriatric patients, psychiatric units in general hospitals, and the like.

To enable valid comparisons to be made of mental health statistics in each State the mental health authorities of all States have proposed standard statistical definitions. The statistical recording systems of a number of States are currently being reviewed for this purpose. Meanwhile certain limited information is available which is shown in the following paragraphs. Since a common measure has not yet been achieved, the figures for States should not be added to form Australian totals.

**In-patient institutions**

The following table shows the number of major in-patient institutions in each State in 1968, the accommodation they provide for patients, and their staff. In-patient care for voluntary patients is also provided at many general public and a number of private hospitals. There are also psychiatric units attached to gaols, juvenile corrective centres and similar institutions. Only the following institutions are included in this table: *New South Wales*—the fourteen State psychiatric centres (a psychiatric hospital and associated admission centre being regarded as one psychiatric centre) and the two authorised private psychiatric hospitals (several other institutions provide in-patient care for voluntary patients only, but are excluded from the scope of the statistics); *Victoria*—the four psychiatric hospitals, ten mental hospitals, five informal hospitals, and ten intellectual deficiency training centres and schools; *Queensland*—four mental hospitals and one epileptic home; *South Australia*—four mental hospitals; *Western Australia*—the three approved mental hospitals; and *Tasmania*—the Lachlan Park-Royal Derwent hospital complex.

**MENTAL HEALTH: IN-PATIENT INSTITUTIONS, ACCOMMODATION AND STAFF  
STATES AT 30 JUNE 1968**

	<i>N.S.W.</i>	<i>Vic.</i>	<i>Qld</i>	<i>S.A.</i>	<i>W.A.</i>	<i>Tas.</i>

Staff—Medical . . . . .	(c)231	(a)150	(d)31	27	17	10
Nursing . . . . .	(e)3,523	(a)(e)3,016	(d)1,232	701	497	331

(a) At 31 December 1968. (b) The number of beds and cots occupied on 31 October 1968. (c) Includes visiting specialists who are paid for their services. (d) Full-time staff only. (e) Includes attendants.

There are no separate in-patient institutions for mental patients in the Northern Territory or the Australian Capital Territory. With the appointment of a Director of Psychiatric Services the organisation of a psychiatric service was begun in the Australian Capital Territory in 1967-68.

**Patients**

The following table sets out statistics of in-patients under the care of the respective State mental health services.

**IN-PATIENTS UNDER THE CARE OF STATE MENTAL HEALTH SERVICES, 1967-68**

	<i>N.S.W.</i>	<i>Vic.(a)(b)</i>	<i>Qld</i>	<i>S.A.</i>	<i>W.A.</i>	<i>Tas.</i>
<b>In-patients at beginning of year—</b>

Persons . . . . .	11,558	10,326	3,736	2,465	2,091	914

(a) Year ended 31 December 1968. (b) Includes transfers from one institution to another.

### State government expenditure on mental health services

The following figures show particulars of expenditure by States for the year 1967-68. Maintenance expenditure represents expenditure on wages and salaries, upkeep and repair of buildings and grounds, and other maintenance. The figure for New South Wales relates to the 14 State psychiatric centres and the Master in Protective Jurisdiction of the Supreme Court. Capital expenditure is expenditure under the *State Grants (Mental Health Institutions) Act 1964-1967* only. For details of Commonwealth financial assistance to the States for mental health services, see page 429.

#### MENTAL HEALTH: EXPENDITURE, STATES, 1967-68 (\$'000)

	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.
Maintenance . . .	25,351	22,029	6,785	5,067	3,177	2,167
Capital . . . . .	6,256	4,144	587	190	445	1,075

### Notifiable diseases

*Methods of prevention and control.* Provision exists in the Health Acts of all States for the compulsory notification of certain infectious and other diseases and for the application of preventive measures. When any such disease occurs the local authority must be notified at once, and in some States notification must be made also to the Health Department.

As a rule, the local authorities are required to report from time to time to the Central Board of Health in each State on the health, cleanliness and general sanitary state of their several districts and on the appearance of certain diseases. Regulations provide for the disinfection and cleansing of premises and for the disinfection or destruction of bedding, clothing or other articles which have been exposed to infection. Regulations also provide that persons suspected to be suffering from, or to be carriers of, infectious disease must submit to clinical and laboratory examination. Persons suffering from certain diseases, for example, smallpox and leprosy, are detained in isolation.

*Notifiable diseases and cases notified, 1969.* The following table shows, by State and Territory, the number of cases notified in 1969 for those diseases notifiable in all States and Territories. In May 1965 the National Health and Medical Research Council at its Fifty-ninth Session proposed a basic list of diseases to be notifiable in each State and Territory, and this table is based upon that proposal. The table does not include all diseases which are notifiable in a State or Territory. Factors such as the following affect both the completeness of the figures and the comparability from State to State and from year to year: availability of medical and diagnostic services; varying degrees of attention to notification of diseases; and enforcement and follow-up of notifications by Health Departments.

#### NOTIFIABLE DISEASES(a): NUMBER OF CASES NOTIFIED STATES AND TERRITORIES, 1969

1969 . . . . .	..	1	..	..	..	..	..	..	1

### Chronic illnesses, injuries, and impairments

As part of the quarterly population survey (*see* Chapter 23, Employment and Unemployment) a survey was conducted in May 1968, in all States except Victoria, in order to obtain estimates of the incidence of chronic illnesses, injuries and impairments in the population, the nature of these conditions and their cause (e.g. whether they were congenital or due to war, accident, etc.). In addition, the survey obtained information on the effect of these conditions on the activities of those who suffered from them.

Estimates derived from the survey were published in a mimeographed bulletin *Chronic Illnesses, Injuries and Impairments, May 1968* (Ref. No. 17.3). A summary of the principal results is given in the Appendix to this Year Book.

### Disposal of dead by cremation

The first crematorium in Australia was opened in South Australia in 1903. At 31 December 1969 there were twenty-six crematoria in Australia, situated as follows: New South Wales, 10; Victoria, 4; Queensland, 5; South Australia, 2; Western Australia, 2; Tasmania, 2; Australian Capital Territory, 1. There is no crematorium in the Northern Territory. The following table shows the number of cremations and total deaths in each State and Territory for each of the years 1965 to 1969.

CREMATIONS AND TOTAL DEATHS: STATES AND TERRITORIES(a), 1965 TO 1969

State or Territory	1965		1966		1967		1968		1969

(a) Cremations are not necessarily carried out in the State or Territory where the death was registered. (b) Com-  
menced operation 8 July 1966.

## CHAPTER 15

### LAW, ORDER, AND PUBLIC SAFETY

This chapter provides summary information about criminal and civil court proceedings (including divorce and bankruptcy); selected crime reported or becoming known to the police; police strengths; prisons; expenditure on law and order; and patents, trademarks and copyright. The main sources for further information for individual States are the State Year Books and Statistical Registers, and the annual reports of the relevant justice authorities.

The statistics in this chapter are influenced by a number of factors which affect comparability from State to State and from year to year, such as differences in the jurisdiction of courts; changes in the law in particular States and differences in the laws between States; differences in the methods of compiling the figures (e.g. in respect of persons convicted for more than one offence); the prevailing attitude to laws such as those connected with liquor, vagrancy, gaming, and traffic offences; and the strength and distribution of the police forces.

Details of the development and structure of the State, Territory, and Commonwealth legal systems are given in Year Book No. 55, pages 565 to 567. The only notable change has occurred in Western Australia. *The District Court of Western Australia Act, 1969* came into operation on 1 April 1970, establishing the District Court of Western Australia. Provision has been made for the appointment of District Court Judges and the appointment of one of the District Court Judges to be the Chairman of Judges. Under the Act, the District Court has all the jurisdiction and powers that the Supreme Court has in respect of any indictable offence, except for those offences where the maximum term of imprisonment exceeds fourteen years, or for which the penalty is death. In civil actions, the Court has the same jurisdiction to hear and determine, and may exercise all the powers and authority, that the Supreme Court has, except that jurisdiction is limited in most cases to claims not exceeding \$6,000. In all respects, except as expressly provided by or under the Act, the practice and procedure of the Court is the same as the practice and procedure of the Supreme Court in like matters. Any party may appeal to the Full Court of the Supreme Court.

#### Lower (magistrates') courts

Particulars of the powers of magistrates, and of special provisions for dealing with juvenile offenders in special courts in the various States and Territories are given in Year Book No. 55, pages 567 to 571. The statistics in the following tables are influenced by the factors listed at the beginning of this chapter and, in particular by differences in the jurisdiction of lower courts in the various States.

##### Criminal proceedings

The number of charges heard at magistrates' courts in each State and Territory in the years 1964 to 1968 are given in the following table. The statistics relate to individual offences for which persons were charged, except for Queensland where proceedings against a person for a number of offences at the one hearing are counted as one charge.

**MAGISTRATES' COURTS(a): CHARGES HEARD, STATES AND TERRITORIES  
1964 TO 1968(b)**

<i>State or Territory</i>	<i>1964</i>	<i>1965</i>	<i>1966</i>	<i>1967</i>	<i>1968</i>
New South Wales . . . . .	341,351	341,171	338,808	336,746	337,540
Victoria . . . . .	303,096	323,644	307,465	318,172	326,445
Queensland(c)(d) . . . . .	97,878	113,568	111,743	95,155	100,046
South Australia(c) . . . . .	64,401	71,468	83,080	98,588	117,081
Western Australia . . . . .	60,510	67,244	66,863	76,458	86,836
Tasmania . . . . .	31,702	36,535	37,624	36,550	38,674
Northern Territory . . . . .	(e)6,581	(e)7,519	(e)7,961	10,336	10,459
Australian Capital Territory . . . . .	7,797	7,845	9,025	7,318	7,647
<b>Australia . . . . .</b>	<b>913,316</b>	<b>968,994</b>	<b>962,569</b>	<b>979,323</b>	<b>1,024,728</b>

(a) Includes Children's Courts, except for Northern Territory. (b) Excludes minor traffic offences settled without court proceedings. (c) Year ended 30 June. (d) A person charged on several counts at the one hearing is included only once. (e) Excludes courts at Tennant Creek and Katherine.

Differences between States in the preceding table, and within States over a period of time, are influenced by the large number of traffic offences and the arrangements which have been introduced at various times for dealing with them. Provision exists in the States and the Australian Capital Territory for settlement of parking and minor traffic offences by payment of fines without court proceedings. The numbers involved are shown in the next table.

**MINOR TRAFFIC OFFENCES SETTLED BY PAYMENT OF FINES  
WITHOUT COURT PROCEEDINGS, STATES AND A.C.T., 1964 TO 1968**

<i>State and Territory</i>	<i>1964</i>	<i>1965</i>	<i>1966</i>	<i>1967</i>	<i>1968</i>
New South Wales . . . . .	381,058	400,459	464,122	411,447	431,066
Victoria . . . . .	181,479	229,478	313,529	343,432	410,857
Queensland(a) . . . . .	101,276	115,446	209,417	264,617	253,429
South Australia(a) . . . . .	198,943	121,535	240,359	240,014	239,619
Western Australia . . . . .	49,488	51,167	64,842	62,827	83,146
Tasmania . . . . .	38,555	40,917	50,914	45,081	55,677
Australian Capital Territory . . . . .	(b)1,419	5,145	3,949	10,132	6,867
<b>Total . . . . .</b>	<b>952,218</b>	<b>964,147</b>	<b>1,347,132</b>	<b>1,377,550</b>	<b>1,480,661</b>

(a) Year ended 30 June. (b) From 14 September 1964.

The following tables show the number of cases dealt with in magistrates' courts, in which convictions were made.

**CASES AT MAGISTRATES' COURTS(a) IN WHICH CONVICTIONS WERE MADE, BY  
CLASS OF OFFENCE: STATES AND TERRITORIES, 1968(b)**

<i>Class of offence</i>	<i>N.S.W.</i>	<i>Vic.</i>	<i>Qld (c)(d)</i>	<i>S.A. (c)</i>	<i>W.A.</i>	<i>Tas.</i>	<i>N.T.</i>	<i>A.C.T.</i>	<i>Aust.</i>
Against the person . . . . .	4,246	3,783	862	644	1,057	502	277	184	11,555

Australian Capital Territory . . . . .	331	401	377	313	316
<b>Australia . . . . .</b>	<b>135,143</b>	<b>136,385</b>	<b>129,665</b>	<b>130,742</b>	<b>134,173</b>

(a) Includes Children's Courts except for Northern Territory. (b) Year ended 30 June.  
(c) Excludes courts at Tennant Creek and Katherine.

**Convictions for certain serious offences at lower (magistrates') courts**

The figures given in the preceding tables refer to all convictions, and include offences of a technical nature, drunkenness, and minor breaches of good order, which come under the heading of crime in a very different sense from the more serious offences. The following table has therefore been prepared to show convictions at magistrates' courts for the years 1964 to 1968 for offences against the person, offences against property, forgery, and offences against the currency.

**CONVICTIONS FOR CERTAIN SERIOUS OFFENCES<sup>(a)</sup> AT MAGISTRATES'  
COURTS<sup>(b)</sup>: STATES AND TERRITORIES, 1964 TO 1968**

<i>State or Territory</i>	<i>1964</i>	<i>1965</i>	<i>1966</i>	<i>1967</i>	<i>1968</i>
New South Wales . . . . .	31,826	34,585	34,911	35,809	37,367
Victoria . . . . .	23,131	23,785	25,804	27,355	26,338
Queensland <sup>(c)(d)</sup> . . . . .	5,707	6,160	6,900	6,789	6,604
South Australia <sup>(c)</sup> . . . . .	4,145	4,813	5,085	5,180	5,817
Western Australia . . . . .	8,017	7,991	9,357	10,207	12,065
Tasmania . . . . .	2,122	3,670	3,285	3,278	3,650
Northern Territory . . . . .	(e)469	(e)627	(e)647	818	941
Australian Capital Territory . . . . .	480	627	761	895	1,133
<b>Australia . . . . .</b>	<b>75,897</b>	<b>82,258</b>	<b>86,750</b>	<b>90,331</b>	<b>93,910</b>

(a) Offences against the person, offences against property, forgery, and offences against the currency. (b) Includes Children's Courts except for Northern Territory. (c) Year ended 30 June. (d) A person convicted on several counts at the one hearing is included only once. (e) Excludes courts at Tennant Creek and Katherine.

**Committals to higher (judges') courts**

In the case of other than minor offences a preliminary hearing is held before a stipendiary magistrate or justice of the peace for the purpose of determining whether a prima facie case has been made out. If the magistrate or justice of the peace finds that there is a case to answer, the person charged is committed for trial at a higher court. The numbers of such committals are shown in the following tables.

**COMMITTALS TO HIGHER COURTS(a), BY CLASS OF OFFENCE: STATES AND TERRITORIES, 1968**

<i>Class of offence</i>	<i>N.S.W.</i>	<i>Vic.</i>	<i>Qld (b)(c)</i>	<i>S.A. (b)</i>	<i>W.A.</i>	<i>Tas.</i>	<i>N.T.</i>	<i>A.C.T.</i>	<i>Aust.</i>
Against the person . . .	1,830	1,268	374	280	139	83	22	67	4,063
Against property . . .	5,924	3,468	1,023	406	810	545	118	150	12,444
Forgery and offences against the currency . . .	246	731	15	19	43	77	37	8	1,176
Against good order . . .	175	63	5	9	1	2	5	..	260
Other . . . . .	54	662	11	12	44	9	14	15	821
<b>Total . . . . .</b>	<b>8,229</b>	<b>6,192</b>	<b>1,428</b>	<b>726</b>	<b>1,037</b>	<b>716</b>	<b>196</b>	<b>240</b>	<b>18,764</b>

(a) Includes committals from Children's Court except for Northern Territory. (b) Year ended 30 June. (c) A person committed on several counts at the one hearing is included only once.

**COMMITTALS TO HIGHER COURTS(a): STATES AND TERRITORIES  
1964 TO 1968**

<i>State or Territory</i>	<i>1964</i>	<i>1965</i>	<i>1966</i>	<i>1967</i>	<i>1968</i>
New South Wales . . . . .	7,575	7,908	8,758	7,954	8,229
Victoria . . . . .	5,343	4,745	5,308	5,655	6,192
Queensland(b)(c) . . . . .	1,270	1,477	1,614	1,611	1,428
South Australia(b) . . . . .	602	753	737	713	726
Western Australia . . . . .	474	515	523	609	1,037
Tasmania . . . . .	610	414	486	549	716
Northern Territory . . . . .	(d)65	(d)169	(d)127	176	196
Australian Capital Territory . . . . .	177	224	137	170	240
<b>Australia . . . . .</b>	<b>16,116</b>	<b>16,205</b>	<b>17,690</b>	<b>17,437</b>	<b>18,764</b>

(a) Includes committals from the Children's Court except for Northern Territory. (b) Year ended 30 June. (c) A person committed on several counts at the one hearing is included only once. (d) Excludes courts at Tennant Creek and Katherine.

### Civil proceedings

Civil proceedings in the lower courts refer to those in the Small Debts Courts in New South Wales, Courts of Petty Sessions in Victoria, Magistrates' Courts in Queensland, Local Courts in South Australia and Western Australia, Courts of Requests in Tasmania, Local Courts in the Northern Territory, and the Court of Petty Sessions in the Australian Capital Territory. Statistics of civil proceedings in the lower courts are given on page 446.

### Higher (judges') courts

Higher courts are presided over by a judge, sometimes with a jury. The general jurisdiction of the higher courts in the States and Territories, which for this purpose include District, County and Supreme Courts, includes appeals from the lower courts, cases of serious crime committed from lower courts, and civil cases involving common law, commercial causes, equity, etc. Under the Commonwealth *Matrimonial Causes Act* 1959-1966, the Supreme Courts of the various States and Territories have exclusive jurisdiction in matrimonial causes, and under the *Bankruptcy Act* 1966-1969, the Federal Court of Bankruptcy, the Supreme Courts of New South Wales, Queensland, Western Australia, Tasmania and the Northern Territory, and the Courts of Insolvency in Victoria and South Australia, can deal with bankruptcy cases. However, the Federal Court handles bankruptcy cases in New South Wales and Victoria.

Proceedings at higher courts include therefore criminal, civil, divorce, and bankruptcy proceedings. Separate details of each are given in the following paragraphs.

### Criminal proceedings

The statistics in the following tables are influenced by the factors listed at the beginning of this chapter.

**PERSONS CONVICTED<sup>(a)</sup> AT HIGHER COURTS, BY NATURE OF OFFENCE: STATES  
AND TERRITORIES, 1968**

<i>Offence</i>	<i>N.S.W.</i>	<i>Vic.</i>	<i>Qld (b)</i>	<i>S.A.</i>	<i>W.A.</i>	<i>Tas.</i>	<i>N.T.</i>	<i>A.C.T.</i>	<i>Aust.</i>

<b>Australia</b>	<b>6,783</b>	<b>7,078</b>	<b>7,625</b>	<b>7,643</b>	<b>7,820</b>

(a) See note (a) above. (b) Year ended 30 June.

### Capital punishment

There were no executions in Australia in 1969. For a brief account of the law relating to capital punishment in Australia, see Year Book No. 55, page 573.

### Civil proceedings

The following table shows civil judgments (excluding those for divorce and bankruptcy) in the higher courts during 1968. The particulars given below include the number and amount of judgments entered by default or confession or agreement.

## CIVIL CASES AT HIGHER COURTS: STATES AND TERRITORIES, 1968

		N.S.W. (a)	Vic.	Qld (b)	S.A.	W.A. (c)	Tas.	N.T.	A.C.T.
Judgments . . . . .	number	52,840	9,171	885	311	780	n.a.	n.a.	635
Amounts awarded	\$'000	n.a.	8,112	5,595	2,051	3,845	n.a.	n.a.	1,414

(a) Excludes Common Law Jurisdiction. (b) Year ended 30 June. (c) Judgments signed and entered.

Because of differences in the jurisdictions of higher and lower courts in respect of civil proceedings in each State and Territory, the figures above should be read in conjunction with the following table, showing the numbers of plaints entered and amounts awarded to plaintiffs in the lower courts in 1968.

## CIVIL CASES AT LOWER COURTS: STATES AND TERRITORIES, 1968

		N.S.W.	Vic.	Qld (a)	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
Plaints entered . . . . .	number	160,549	208,682	57,376	92,724	57,689	40,919	(b)2,998	6,443	627,380
Amounts awarded to plaintiffs	\$'000	5,548	16,927	3,363	4,776	2,812	1,528	n.a.	n.a.	n.a.

(a) Year ended 30 June. (b) Excludes Tennant Creek.

## Divorce and other matrimonial causes

A description of Commonwealth legislation governing divorce and other matrimonial causes in Australia is contained in Year Book No. 55, page 580. Under this legislation a court may grant decrees of dissolution of marriage (divorce), nullity of marriage, judicial separation, restitution of conjugal rights, and jactitation of marriage (i.e., that a person should refrain from making a false claim that a marriage has taken place between him and another person). Orders may be made for maintenance, the custody and welfare of children, and settlement of property, and damages for adultery. The following statistics refer only to petitions for, and decrees of, dissolution, nullity, and judicial separation. Detailed statistics are published in the annual and quarterly *Divorce* bulletins, and the annual *Demography* bulletin.

## Petitions filed

Statistics of petitions exclude cross-petitions contained in answers by respondents. The following table shows the number of petitions for dissolution of marriage, nullity of marriage, and judicial separation filed in each State and Territory during 1969.

PETITIONS FILED FOR DISSOLUTION, NULLITY, AND JUDICIAL SEPARATION  
STATES AND TERRITORIES, 1969

Petition for—		N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
Dissolution—										
By husband . . . . .		2,056	1,185	664	480	496	202	44	78	5,205

**Decrees granted**

Statistics of decrees granted refer to decrees *nisi* made absolute except for the following cases, where no decree *nisi* is granted.

- (i) Decrees of judicial separation, which do not dissolve the marriage and may be discharged on resumption of cohabitation.
- (ii) Decrees of nullity of void marriage, as distinct from nullity of voidable marriage. A void marriage is invalid because of failure to meet a legal requirement, and the original decree of nullity is final. A valid marriage is voidable on proof of one or more of the grounds set out in Section 21 of the *Matrimonial Causes Act 1959-1966*, e.g. that either party is incapable of consummating the marriage.

The following tables show the number of dissolutions of marriage, nullities of marriage, and judicial separations granted in each State and Territory during 1969 classified according to petitioner, and the grounds on which decrees were granted during the years 1965 to 1969.

## Divorced persons at each census, 1911 to 1966

The following table shows the number and proportion of divorced persons in Australia as recorded from returns supplied at each census from 1911 to 1966. A classification of divorced persons by ages for the censuses from 1891 to 1947 appeared in earlier issues of the Year Book (*see* No. 39, page 269). Before 1911 no record was made of divorced persons in South Australia, so comparisons cannot be made beyond that date.

## DIVORCED PERSONS AT CENSUS DATES: AUSTRALIA, 1911 TO 1966

Sex	Number							Number per 10,000 of males or females 15 years of age and over

## The High Court of Australia

The High Court of Australia consists of a Chief Justice and six other Justices. Its principal seat is in Melbourne, but sittings are held in every State capital as occasion requires. The High Court has both original and appellate jurisdiction. Its original jurisdiction is usually exercised by a single Justice, appellate jurisdiction by at least three Justices. The following table sets out transactions in its original and appellate jurisdiction for 1968 and 1969.

## TRANSACTIONS OF THE HIGH COURT OF AUSTRALIA, 1968 AND 1969

<i>Original jurisdiction(a)</i>	1968	1969	<i>Appellate jurisdiction</i>		
			1968	1969	
Number of writs issued . . .	98	103	Number of appeals—		
Number of causes entered for trial . . .	43	25	Set down for hearing . . .	89	61
Judgment for plaintiffs . . .	7	8	Allowed . . . . .	49	32
Judgments for defendants . . .	3	1	Dismissed . . . . .	70	62
Otherwise disposed of . . .	21	20	Otherwise disposed of . . .	20	14
Amounts of judgments . . .	\$441,760	\$126,612			

(a) Some matters dealt with by the High Court neither originate as writs nor are entered as causes.

During 1968 and 1969, respectively, the High Court dealt also with the following: appeals from assessments under the Taxation Assessment Acts, 19, 55; special cases stated for the opinion of the Full Court, 6, 9; applications for prohibition, etc., 5, 9. The fees collected amounted to \$12,764 in 1968 and \$13,094 in 1969.

## Selected crime reported to police

The following tables show some details of certain categories of offences reported or becoming known to police. This series, which commenced in 1964, is derived from police records and is based, as far as possible, on definitions and procedural arrangements uniformly determined for all States. The following explanations are necessary in order to interpret the figures in this series.

*Offences reported or becoming known.* All incidents reported or becoming known to the police which are found to constitute offences within the scope of the crimes covered are included. Offences are shown as 'reported or becoming known' in the period during which it has been established that the incident constitutes a crime, not necessarily in the period when the incident occurred. However, the incident is included when the police are satisfied that a crime has been committed, even though it may be established in subsequent proceedings that no crime or a crime of a different nature was committed. As far as possible, the offences are recorded in respect of the State in which the incident occurred, regardless of which police force undertakes investigations or prosecutions, or where an arrest is made. In the case of homicide, assault, robbery, and rape, one offence is counted in respect of each victim, regardless of the number of offenders involved. In the case of breaking and entering, and fraud, etc., one offence is counted for each act or series of directly related acts occurring at the same time and place, and under the same circumstances. Each motor vehicle stolen is counted as constituting a separate offence.

*Offences cleared.* An offence of the type included in this series is counted as 'cleared' when an information (charge, arrest or summons to appear) has been laid against at least one person involved. However, an offence may also be counted as 'cleared' without an information being laid. This may occur when the offender has received an official caution or has died, has committed suicide, has been committed to a mental institution, or is in another jurisdiction from which extradition is not desired or available, or is serving a sentence; or if there are other obstacles to prosecution, such as diplomatic immunity or that the complainant refuses to prosecute. A clearance is always shown against the classification under which the offence was 'reported', regardless of the nature of the charge laid or changes in the description of an offence due to later information. The entries are made in respect of the year when the offence was 'cleared', whether or not the offence was 'reported' in that or an earlier year.

*Persons involved in crimes cleared.* This is the sum of the number of persons dealt with in each of the offences shown as 'cleared'. If more than one person is involved in the one offence, each person is counted. If the same person is involved in more than one offence cleared, he is counted separately for each offence. Persons involved are shown against the categories of offences to which an incident was originally allocated, regardless of the actual offences they are charged with. This basis of counting 'persons involved in offences cleared' was adopted to reveal trends in crime participation by persons in various age-groups. The figures in this series are not directly comparable with statistics of persons charged or convicted in court, or of cases brought before the courts; nor do these figures reveal the number of offenders in the community.

#### Offences included in the statistics

*Homicide.* Separate details are provided for murder, attempted murder (i.e. acts done with intent to murder) and manslaughter (unlawful killing other than murder), excluding manslaughter arising from motor traffic accidents.

*Serious assault.* These are assaults normally dealt with on indictment. Includes woundings, offences causing bodily harm, assaults with a weapon, etc., and attempts of this nature. Excludes sexual assault and robbery. *Uniform interpretation of this definition between States is especially difficult to effect.*

*Robbery.* Stealing anything, if at or immediately before or after the time of stealing, the offender uses or threatens to use violence to any person or property in order to obtain the thing stolen, or to prevent or overcome resistance to its being stolen. Includes attempts of this nature.

*Rape.* Includes attempted rape and assault with intent to rape. Excludes unlawful carnal knowledge (i.e. where consent is given, but the girl is below the legal age of consent) and indecent assault.

*Breaking and entering.* Breaking and entering a building (or entering a building and breaking out) and committing or intending to commit a crime. Includes burglaries. Separate details are shown according to the type of building involved, namely, *dwellings* (including unoccupied dwellings, tents, caravans, etc., used as dwellings, and the residential parts of hotels, schools, etc.); *shops* (including kiosks, service stations, restaurants, bars, non-residential clubs, etc.); and *offices, factories and warehouses* (including parts of buildings, but excluding dwellings and shops used for such purposes). Includes attempts. From 1967 the figures exclude breakings involving property valued at \$100 or less.

*Motor vehicle thefts, illegal use, etc.* Includes all offences of illegal, unlawful or unauthorised use, use without consent, unlawfully assuming control, etc., no matter under which legislation these offences are prescribed. Excludes cases of 'interference', but includes attempts at illegal use. The number of stolen motor vehicles which are recovered is also shown.

*Fraud, forgery, false pretences.* Includes embezzlement, 'omit to account', misappropriation, fraudulent appropriation, conversion, larceny as bailee, falsification of accounts, company fraud, forgery, uttering, false pretences, passing of valueless cheques and offences by trustees. Includes attempts, but excludes imposition. As a general rule, offences are included only if there is an element of deception or trickery. Separate details are shown for *valueless cheque* offences (i.e. passing of valueless cheques, whether there is no account, insufficient funds or a false signature of the purported drawer of the cheque. However, this sub-group excludes cases where a genuine cheque is altered or the endorsement of the payee is forged. These cases are regarded as forgery and or uttering and included in 'other').

#### Offences reported or becoming known to police

The following table shows, for each State and Territory, the number of offences in each of the seven categories covered by this series which were reported or became known to police during the years 1965 to 1969. The table excludes offences reported to and investigated by the Commonwealth Police, which are shown on page 454.

(a) See definition on pages 451-2. (b) All reported breakings, etc. (c) Excludes offences involving property valued at \$100 or less.

#### Crimes cleared and persons involved

The tables which follow show, for the various categories of offences, the numbers of offences reported, the numbers cleared, and the numbers of persons involved according to age and sex. Sub-divisions of the categories homicide, breaking and entering, and fraud, etc., are provided. See pages 450-2 for definitions used and the bases on which these statistics are prepared.

**HOMICIDE: CRIMES REPORTED OR BECOMING KNOWN, CRIMES CLEARED AND PERSONS INVOLVED, AUSTRALIA, 1967 TO 1969**

	<i>Murder</i>			<i>Attempted murder</i>			<i>Manslaughter</i>			<i>All homicide</i>

(a) Age last birthday at time of clearance.

The number of stolen motor vehicles recovered was: 1967, 24,701; 1968, 27,191; 1969, 29,371.

**Offences reported or becoming known to Commonwealth Police.**

In addition to the offences shown in the preceding tables, the following statistics relate to those offences in the selected crime series which were reported to and investigated by the Commonwealth Police in 1969.

	<i>Breaking and Entering</i>	<i>Valueless cheques</i>	<i>Other Fraud</i>
Numbers reported or becoming known . . .	4	646	5,484
Numbers cleared . . .	2	229	1,088
Persons(a) involved in crimes cleared—			
Aged(b)—			
16 years and under . . .	..	..	1
17 and 18 years . . .	1	3 (1)	19 (4)
19 and 20 years . . .	1	9 (2)	34 (15)
21 years and over . . .	..	217 (35)	1,096 (313)
Total persons involved . . .	2	229 (38)	1,150 (332)

(a) Numbers of females are shown in brackets.

(b) Age last birthday at time of clearance.

**Police**

The primary duties of the police are to prevent crime, to detect and detain offenders, to protect life and property, to enforce the law, and to maintain peace and good order. In addition, they perform many duties in the service of the State, e.g. they act as clerks of petty sessions in small centres, as crown land bailiffs, foresters, mining wardens, and inspectors under the fisheries and various other Acts. In metropolitan and large country areas they also regulate the street traffic. With the exception of the Commonwealth Police Force and the police in the Northern Territory and the Australian Capital Territory, the police forces of Australia are under the control of the State Governments, but their members perform certain functions for the Commonwealth Governments, such as acting as aliens registration officers and policing various Commonwealth Acts and Regulations.

Women police perform special duties at places where young women and girls are subject to moral danger, control traffic at school crossings and lecture school children on road safety. They also assist male police as required in the performance of normal police duties.

The strength of the police force and the duties and ranks of the personnel involved in each State and Territory for 1969 are shown in the following table. Comparability between States is affected by differences in the classification of ranks and duties, and known differences between States are mentioned in footnotes.

Also included in the table are statistics of ancillary and civilian staff employed by police departments. Differences between States in the use of such staff are considerable. These differences arise, on the one hand, from differences in the extent to which police make use of such staff for police functions and, on the other hand, in the extent to which such staff are required to undertake additional functions (such as parking control) which are allocated to the police in varying degree between States. There is also some overlap between duties of ancillary and civilian staff as defined in footnotes (i), (j), (k) and (m) of the following table.

**POLICE FORCES AND ASSISTANT STAFF: STATES AND TERRITORIES, 30 JUNE 1969**

POLICE FORCES AND ASSISTANT STAFF: STATES AND TERRITORIES, 30 JUNE 1969—  
*continued*

<i>Duty and rank(a)</i>	<i>N.S.W.</i>	<i>Vic.</i>	<i>Qld</i>	<i>S.A.</i>	<i>W.A.</i>	<i>Tas.</i>	<i>N.T.</i>	<i>A.C.T.</i>
<b>TOTAL STAFF</b>								
<b>Grand total—</b>								
Full-time . . . . .	8,128	5,594	3,533	2,506	1,867	809	243	339
Part-time . . . . .	..	81	26	11	127	..	..	..

(a) Where more than one duty is involved, officers have been allocated to the category of duties in which the greater part of their time is spent. The allocation of executive officers and inspectors to categories of duties is necessarily somewhat arbitrary and varies from State to State. (b) Includes probationary constables. (c) Excludes probationary constables; included with trainees and cadets. (d) Includes sub-inspectors. (e) Does not include transport and maintenance; each section undertakes its own transport, and maintenance is done on contract and/or by the government transport pool. (f) Includes officers engaged on motor vehicle examination and testing and licensing drivers. (g) Includes 1 chief inspector. (h) Includes 1 commissioner's inspector and 1 chief inspector. (i) Parking police, native trackers, wardresses, etc.; special constables in New South Wales and Tasmania; police reservists in Victoria. (j) Includes clerical workers in the Women Police Auxiliaries. (k) Clerks, typists, artisans, cleaners. (l) Does not include cleaning which is done by the Cleaning Services Branch of the Government Stores Department. (m) Includes 52 cadets whose appointment is not subject to the Police Act.

Ancillary and civilian staff are excluded from the following table:

**POLICE FORCES: STATES AND TERRITORIES, 1965 TO 1969**

<i>30 June—</i>	<i>N.S.W.</i>	<i>Vic.</i>	<i>Qld</i>	<i>S.A.</i>	<i>W.A.</i>	<i>Tas.</i>	<i>N.T.</i>	<i>A.C.T.</i>	<i>Aust.</i>
1965 . . . . .	6,121	4,527	2,810	1,926	1,306	633	155	165	17,643
1966 . . . . .	6,486	4,656	2,975	1,994	1,349	619	157	186	18,422
1967 . . . . .	6,765	4,711	3,056	2,059	1,375	645	151	215	18,977
1968 . . . . .	7,111	4,825	3,083	2,214	1,421	632	172	228	19,686
1969 . . . . .	7,259	4,743	3,179	2,255	1,490	670	195	288	20,079

**Commonwealth Police Force**

The Commonwealth Police Force commenced operations on 21 April 1960, and is the principal agency for the enforcement of the laws passed by the Commonwealth Parliament. It is also responsible for the protection of Commonwealth property and interests at various buildings and establishments under the control of the Commonwealth. This force co-ordinates the work of other Commonwealth investigation and law enforcement agencies and acts on behalf of the United Nations Organization for the suppressing of traffic in women and the suppression of obscene literature.

Under the control of the force is the Australian Police College at Manly, New South Wales, which provides training for officers of various police forces and other agencies in Australia and New Zealand. The force has its Head Office in Canberra and District Offices in each capital city. The strength of the force at 30 June 1969 was 855 policemen and 3 policewomen. At that date there were, in addition, 96 civilian employees.

**Prisons**

**Prisons and prison accommodation**

**PRISONS AND PRISON ACCOMMODATION: STATES AND NORTHERN TERRITORY, 30 JUNE 1968**

	<i>N.S.W.</i>	<i>Vic.</i>	<i>Qld</i>	<i>S.A.</i>	<i>W.A.</i>	<i>Tas.</i>	<i>N.T.</i>	<i>Aust.</i>
Prisons . . . . .	20	13	8	15	20	1	2	79
Accommodation . . . . .	3,381	2,582	1,158	1,276	1,276	417	113	10,203

There is no gaol in the Australian Capital Territory, but there is a lock-up attached to the police station at Canberra and another lock-up at Jervis Bay where offenders are held for short periods. Prisoners remanded or sentenced by a court in the Australian Capital Territory for more than five days are usually held in New South Wales prisons.

## Convicted prisoners

## CONVICTED PRISONERS: STATES AND TERRITORIES, 1964 TO 1968

30 June—	N.S.W. (a)	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	Australia	
								Number	Per 10,000 of popu- lation
1964 . . .	3,090	1,981	801	726	825	232	74	7,729	6.9
1965 . . .	2,957	1,879	949	796	803	210	129	7,723	6.8
1966 . . .	3,140	1,872	995	818	863	259	107	8,054	6.9
1967 . . .	3,334	1,994	1,021	866	1,137	275	112	8,739	7.4
1968 . . .	3,292	2,103	958	926	1,150	281	120	8,830	7.3

(a) Includes Australian Capital Territory prisoners held in New South Wales prisons.

## Cost of administration of law and order

## Expenditure by the States

The tables following show identifiable net expenditure (i.e. gross expenditure less receipts from fees, recoups for services rendered, etc.) from Consolidated Revenue in connection with the administration of justice, police and prisons. The figures exclude Loan Fund expenditure and expenditure on debt charges, pay-roll tax and superannuation payments. Because of differing legislative and administrative arrangements in the various States, the activities covered by the figures shown are not exactly the same in each State. Small differences also result from differing accounting practices. However, the figures shown for individual States are comparable from year to year.

## STATE NET EXPENDITURE ON LAW AND ORDER, 1968-69

State	Net expenditure			Per head of population		
	Justice	Police	Prisons(a)	Justice	Police	Prisons(a)
	\$'000	\$'000	\$'000	\$	\$	\$
New South Wales . . .	7,408	30,551	6,479	1.67	6.90	1.46
Victoria . . .	3,650	23,575	3,342	1.09	7.03	1.00
Queensland . . .	2,658	15,470	2,095	1.52	8.83	1.20
South Australia . . .	211	9,266	1,688	0.19	8.16	1.49
Western Australia . . .	(b)-432	7,178	2,219	(b)-0.46	7.73	2.39
Tasmania . . .	619	3,043	801	1.60	7.89	2.08
Total . . .	14,114	89,083	16,624	1.18	7.43	1.39

(a) Excludes expenditure on reformatories as follows: N.S.W., \$2,608,796; Qld, \$169,388; S.A. \$560,817; W.A., \$767,416; Tas., \$182,241. Expenditure on reformatories in Victoria is not separately identifiable. (b) Receipts for legal fees and registrations exceed expenditure.

STATE NET EXPENDITURE ON LAW AND ORDER  
AUSTRALIA, 1964-65 TO 1968-69

(\$'000)

1965-66 . . .	13,183	68,132	10,261
1966-67 . . .	13,396	77,197	11,824
1967-68 . . .	13,744	82,286	14,072
1968-69 . . .	14,114	89,083	16,624

(a) Excludes expenditure on reformatories, as follows: 1964-65, \$1,970,083; 1965-66, \$3,239,536; 1966-67, \$3,672,797; 1967-68, \$3,926,779; 1968-69, \$4,288,658. Expenditure on reformatories in Victoria is not separately identifiable.

**Commonwealth expenditure**

Since the functions of the Commonwealth Government in the administration of law and order differ considerably from those of the States, precise comparison between Commonwealth and State expenditure in this field is not possible. The following tables show expenditure by the Commonwealth Government on the services it performs in relation to law and order.

**Patents, trade marks and designs****Patents**

Patents for inventions are granted under the *Patents Act* 1952-1966, which applies to the Commonwealth of Australia and the Territories of Norfolk Island, Papua and New Guinea. The act is administered by a Commissioner of Patents. The principal fees payable up to and including the grant of a patent amount to \$39. Renewal fees are payable as follows: \$10 before the expiration of the fourth year, and an amount progressively increasing by \$2 before the expiration of each succeeding year up to the final fee of \$32, payable before the expiration of the fifteenth year. An extension of time for six months for payment of a renewal fee may be obtained.

Letters patent sealed . . . . .	7,277	6,140	6,356	5,537	7,127

## Trade marks and designs

Under the *Trade Marks Act* 1955-1966 the Commissioner of Patents is also Registrar of Trade Marks. Provision is made for the registration of users of trade marks and for their assignment with or without the goodwill of the business concerned. A new classification of goods was adopted in 1958, and trade marks registered under repealed Acts are reclassified on renewal. Under the *Designs Act* 1906-1968 the Commissioner of Patents is also Registrar of Designs.

## Copyright

Copyright is regulated by the Commonwealth *Copyright Act* 1968, which came into force on 1 May 1969. On that date Australia ratified its adherence to the Brussels revision of the Berne Copyright Convention and to the Universal Copyright Convention, whereby citizens of member countries are accorded protection by complying with the convention formality requiring proprietors to place on their works the symbol © together with their name and the year of first publication, in such a manner and location as to give reasonable notice of their claim of copyright in the works so identified. The new legislation contains no provision for the registration of copyright, and the Copyright Office ceased to exist on 1 May 1969. Copyright is now administered by the Attorney-General's Department.

## CHAPTER 16

# NATIONAL ACCOUNTS

## NATIONAL INCOME AND EXPENDITURE

National accounting aims at providing a systematic summary of the transactions taking place in the economy, especially of those that relate to the production and use of goods and services, and to transfers of income or capital between sectors of the economy.

Estimates of national income and expenditure have been compiled by the Bureau since 1944–45 and have been published annually as papers entitled *National Income and Expenditure* accompanying the Commonwealth Budgets. Detailed annual estimates of national income and expenditure on a revised basis were published in *Australian National Accounts, National Income and Expenditure, 1968–69*. Preliminary estimates (less detailed) for 1968–69 were published earlier in a Budget Paper. Quarterly estimates are published in *Quarterly Estimates of National Income and Expenditure*.

The figures shown on pages 465–72 are as published in *Australian National Accounts, National Income and Expenditure, 1968–69*.

### Description of the National Accounts

A brief description of the conceptual basis of national accounts is given in this section, but for a more detailed treatment of the concepts and structure of the Australian National Accounts reference should be made to *Australian National Accounts, National Income and Expenditure, 1968–69*, or to Year Book No. 50, pages 1253–68.

#### Definition and relationship of the concepts of product, income and expenditure

The main concepts of product, income and expenditure in the Australian National Accounts are defined and expressed in equivalents as follows.

*Gross national expenditure* is the total expenditure within a given period on final goods and services (i.e. excluding goods and services used up in the process of production) bought for use in the Australian economy. It is equivalent to gross national product plus imports of goods and services less exports of goods and services.

*National turnover of goods and services* is the total flow within a given period of final goods and services (i.e. excluding any goods and services used up during the period in the process of production) entering the Australian economy from production and imports. This value is equivalent to gross national product plus imports of goods and services or, alternatively, to gross national expenditure plus exports of goods and services.

*Gross national product* is the total market value of goods and services produced in Australia within a given period after deduction of the cost of goods and services used up in the process of production but before deducting allowances for the consumption of capital equipment. Thus gross national product less indirect taxes plus subsidies. *Gross farm product at factor cost* is that part of gross national product at factor cost arising from production in rural industries (excluding forestry). *Gross non-farm product at factor cost* arises from production in all other industries.

*Gross national product at factor cost* is that part of the cost of producing the gross national product which consists of gross payments to factors of production (labour, land, capital, and enterprise). It represents the value added by these factors in the process of production and is equivalent to gross national product less indirect taxes plus subsidies. *Gross farm product at factor cost* is that part of gross national product at factor cost arising from production in rural industries (excluding forestry). *Gross non-farm product at factor cost* arises from production in all other industries.

*Net national product* is the part of the value added within a given period by factors of production (labour, land, capital, and enterprise) which accrues as income to their suppliers after allowing for the depreciation of capital equipment. It is equivalent to gross national product at factor cost less depreciation allowances.

*National income* is the net income accruing within a given period to Australian residents from their services in supplying factors of production (labour, land, capital, and enterprise) in Australia or overseas. It is equivalent to net national product plus income receivable from overseas less income payable overseas.

*Personal income* is the total income, whether in cash or kind, received by persons normally resident in Australia. It includes both income received in return for productive activity (such as wages, salaries and supplements, incomes of unincorporated enterprises, etc.) and transfer incomes (such as cash, social service benefits, interest, etc.). Personal income also includes any property income received by non-taxable organisations such as private schools, churches, charitable organisations, etc. However, it excludes any income which might be said to accrue to persons in the form of undistributed company income and retained investment income of life insurance, etc., funds.

#### Framework of accounts and sectors

In the accounts shown in Tables 1 to 7 four internal sectors are distinguished—trading enterprises, financial enterprises, persons and public authorities. In addition, there is an overseas sector which shows a summary of the transactions into which overseas governments, persons and businesses enter with Australian residents. All the sectors (except the overseas sector) engage in productive activity, but in the tables a national production account for the whole economy is shown instead of separate accounts for each sector. Similarly, the tables show only a national capital account for the economy, but a current (or income appropriation) account is shown for each sector. The system of accounts as thus envisaged is a completely articulated system in that a credit in any account must be matched with a corresponding debit in some other account—or in the same account if a complete consolidation of the transactions appropriate to that account has not been carried through.

The framework of sectors and accounts underlying the form of social accounts shown in this Year Book is set out in the following diagram. As stated in the previous paragraph, each sector could be envisaged as having separate production, appropriation and capital accounts, but in the tables compiled for Australia the production and capital accounts have been combined. In the diagram the solid rectangles depict the actual form of the tables, and the remaining rectangles show the full amount of detail which would be needed to provide a complete articulation of the accounts. The appropriate number of each table on pages 465–9 is shown on the left of the diagram.

**PLATE 31**

#### Description of the accounts

The *national production account* is a consolidation of the production accounts of each sector. The production account is shown as receiving revenue from the sale of goods and services to final buyers; all intermediate goods and services are cancelled out, since they represent a cost to one producer to offset the revenue of the other. On the payments side are shown the payments of indirect taxes, and,

since the account is presented from the point of view of the producing unit, the wages and salaries paid to employees. The balance is the gross operating surplus which is carried to the trading enterprises income appropriation account.

The *trading enterprises income appropriation account* is shown as receiving the gross operating surpluses from the national production account and property incomes (dividends, non-dwelling rent and interest) from other sectors. This total of receipts is appropriated to depreciation allowances and to various transfer payments (interest, etc., paid, income tax payable, dividends payable and undistributed income). All net income of unincorporated enterprises is treated as being transferred to persons and the same is true of personal income from dwelling rent. Any income of trading companies not distributed but retained for use in the business is shown as undistributed income and transferred to the national capital account either directly or by way of the overseas current account (where accruing to non-residents).

The *financial enterprises income appropriation account* is, in the main, similar to the preceding account. However, there is no operating surplus, as property income (which is treated as transfer income, not as income of factors of production) is the sole receipt.

The *personal current account* records all receipts on current account whether of factor incomes (wages and salaries) or transfer incomes (interest, etc., dividends, net business incomes, cash benefits from public authorities, and remittances from overseas). On the payments side are shown current payments for goods and services and transfer payments (taxes, interest, etc., remittances to overseas). The balance is transferred to the national capital account under the heading of personal saving.

The *public authorities current account* reflects a distinction between current and capital expenditure, which is necessarily arbitrary in some measure and has been made on the basis of excluding from the current account expenditure on public works and increase in stocks. Expenditure on public works is taken to include new buildings, construction, plant and machinery, and any replacement of assets charged to loan funds or capital works votes. Current account excludes capital expenditure of public enterprises (including replacement of assets charged to depreciation reserves but not those, if any, charged directly to working expenses) and all expenditure on roads, because a satisfactory distinction between new works and maintenance cannot be made. All defence expenditure is included in the current account.

The income of public enterprises shown in this account is derived by deducting from their operating surplus any depreciation shown by these enterprises in their published accounts, except in the case of enterprises whose accounts are included in the Commonwealth or State budgets and are at present analysed on the basis of cash accounts in which depreciation is not allowed. These depreciation allowances are included in the capital account. As in the case of persons, all overseas gifts are included in the current account. These include gifts for international relief, technical assistance, etc., grants, contributions to international organisations and expenditure in connection with the administration of Papua and New Guinea.

The *overseas current account* records all transactions of a current nature between Australian and overseas residents. It should be emphasised that this account is shown here from the point of view of overseas residents, i.e. receipts from Australia are shown as credits, and payments to Australia as debits. Australians temporarily overseas are regarded as residents, and visitors to Australia as non-residents.

Capital transactions of the four domestic sectors and the net deficit on current account with overseas are shown in the *national capital account*. On the receipts side are shown the savings of the various sectors—saving by enterprises, personal saving, the retained investment income of insurance funds, and the public authority surplus on current account. Net apparent capital inflow from overseas and withdrawal from monetary reserves are reflected in the item 'overseas balance on current account'. On the payments side are shown the purchases by all sectors of new buildings and capital equipment and the increase in the value of stocks. The private component of capital expenditure includes new dwellings, additions and major alterations to dwellings and expenditure of a capital nature by private non-profit institutions (churches, schools, clubs, etc.) but excludes motor vehicles for personal use and other durable consumer goods, which are included in personal consumption expenditure.

#### Estimates at constant prices

For certain types of economic analysis it is useful to examine estimates of the principal flows of goods and services in the economy revalued in such a way as to remove the direct effects of changes in their prices which have occurred over the period under review. Such estimates, conventionally described as 'at constant prices', are presented in Table 8 for gross national product, exports and imports of goods and services, and gross national expenditure and its principal components.

In concept, constant price estimates may be thought of as being derived by expressing the value of every component commodity as the product of a price and a quantity, and by substituting for each actual current price the corresponding price in the chosen base year. Aggregates at constant prices for each year are then obtained by summation. In practice, the quality and quantity of the available data are such that a number of methods are used in the preparation of estimates at constant prices. These estimates involve approximations and assumptions, and this should be borne in mind in the interpretation and use of the results.

Gross national product is equivalent to gross national expenditure, plus exports of goods and services, less imports of goods and services. This relationship has been used in deriving the estimates of gross national product at constant prices shown in Table 8. A supplement to the bulletin *Australian National Accounts, National Income and Expenditure, 1953-54 to 1966-67* entitled *Estimates of Gross Product by Industry at Current and Constant Prices, 1959-60 to 1965-66* contains estimates of gross national product measured by the 'production method'.

For a considerable part of personal consumption expenditure and exports and imports of goods and services, it is possible to identify specific units of quantity and price, and revalue the quantities at base year prices. Where it is not possible to express the values in successive years as the product of prices and homogeneous units of quantity, the treatment generally adopted is to divide values by appropriate price indexes.

With the remaining components of gross national expenditure, a greater degree of approximation and assumption is involved. For example, when information about the commodity content of a flow is limited (e.g. various components of gross fixed capital expenditure), special purpose price indexes relating to selected commodities are applied to the expenditure on the full range of commodities they represent. In other cases, for instance, where the expenditure relates to 'unique' goods (e.g. goods not homogeneous from year to year), revaluation is achieved by use of an index reflecting the price change of the direct materials and direct labour components of the unique goods in question. This method of revaluation is also applied to current expenditure by financial enterprises and public authorities. The resulting estimates have, therefore, considerable limitations for many uses, for example in studies of productivity.

The method used to estimate changes in stocks at constant prices involves an adjustment for stock revaluation. This adjustment, referred to as the stock valuation adjustment, arises because of a revaluation of existing stocks (for example, such revaluations are sometimes made by business enterprises so as to show stocks at the lower of cost or market value for balance sheet purposes) or more commonly, because stocks used or disposed of during the year are replaced by new stocks of the same goods but at different prices.

Part 1 of *Australian National Accounts, National Income and Expenditure, 1968-69* contains a fuller discussion of the conceptual problems involved in making these estimates and Appendix B of that publication contains a brief account of the sources and methods used in preparing the estimates.

### Reliability and revisions

Estimates of national income and expenditure are necessarily prepared from a very wide range of statistical information, some of which is available quickly, some of it only with a delay of several years after the period to which it relates. Some of it is closely related to the desired national income concepts, but some of it is not completely satisfactory in various respects, including coverage, concepts and timing. Estimates, in particular for the most recent years, are therefore subject to revision.

This applies particularly to estimates based on income tax statistics—income of companies, non-farm unincorporated enterprises, depreciation, and part of gross private fixed investment—which are subject to substantial revisions for the last two years, as tabulations of income tax statistics do not become available until about twenty-two months after the end of each financial year.

It is not possible to put precise limits on the degree of revision likely in any particular series, nor to state degrees of reliability in a statistical sense. These depend in large part on the range and quality of the basic statistical data. For illustrations of common causes of revisions reference should be made to *Australian National Accounts, National Income and Expenditure, 1968-69*.

New series of constant price estimates rebased on 1966-67 prices are presented in this issue for the period 1964-65 to 1968-69. Previously separate series of estimates at average 1953-54 and at 1959-60 prices were published in earlier issues of the Year Book. For information about these series and about the differences between them and the new series at 1966-67 prices, reference should be made to the bulletins *Australian National Accounts, National Income and Expenditure, 1967-68, and 1968-69*.

## National accounts and tables

Items in tables 1 to 7 are consecutively numbered from 1 to 28, with or without the addition of a letter, and this system is used to identify the corresponding credit and debit entries in the accounts and as a key to the notes on pages 473-6. In some cases the items correspond exactly, while in other cases an entry in one table is the sum of two or more entries in other tables; here the total is given a number, and the components have a number and a letter. In the remaining type of case all entries are given the same number and a distinguishing letter, because in this group one item is not the sum of one or more entries. The relationship between these items can still be traced through because the sum of all credit entries must equal the sum of all debit entries.

## Description of items in the National Accounts

### Tables 1 to 7

*Item 1. Wages, salaries and supplements.* Payments in the nature of wages and salaries as defined for pay-roll tax, including allowances for income in kind (board and quarters, etc.), together with supplements to wages, and pay and allowances of members of the forces. In addition to wages and salaries paid by employers subject to pay-roll tax, this item includes wages and salaries paid by employers not subject to pay-roll tax, based on estimates of employment and average earnings. Supplements consist of employers' contributions to pension and superannuation funds, direct payments of pensions and retiring allowances, and amounts paid as workers' compensation for injuries. Pay and allowances of members of the forces consist of active pay, field, subsistence and dependants' allowances, and the value to the members of the forces of food, clothing, normal medical attention, etc. supplied in kind. They include deferred pay, but exclude war gratuities which are included in item 25.

*Item 2. Gross operating surplus of trading enterprises.* The operating surplus, before deduction of depreciation provisions, dividends, interest, rent and royalties, and direct taxes payable, of all trading enterprises operating in Australia. Trading enterprises include all companies, public enterprises, partnerships and self-employed persons engaged in the production of goods and services for sale, but exclude financial enterprises. Public trading enterprises are government undertakings which attempt to recover all, or a substantial part, of their costs through charges made to the public for the sale of goods and services. All owners of dwellings are included whether they let the dwellings or occupy them themselves. Trading enterprises' gross operating surplus is shown separately for companies (item 2a), unincorporated enterprises (item 2b), dwellings owned by persons (item 2c), and public enterprises (item 2d).

*Item 3. Indirect taxes less subsidies.* Indirect taxes (item 3a) comprise taxes on purchases, sales or other transactions, or on the ownership of property, etc. paid by enterprises, public authorities and persons. They include licence fees in respect of rights conferred, such as liquor licenses, etc. Subsidies (item 3b) are transfer payments made by public authorities, credited to the production accounts of enterprises, with the object of providing incentives to, or of assisting, certain industries or activities. Such payments may take the form of bounties on goods produced, subsidies to producers to ensure a guaranteed price, payments to transport undertakings to permit a reduction of freights on certain classes of goods, assistance to producers, etc.

*Item 4. Imports of goods and services.* The value of goods imported from overseas and amounts payable overseas for services. In table 6 this item is sub-divided into the following components.

*Item 4a. Imports f.o.b.* Recorded trade figures adjusted for the purpose of balance of payments estimates. The principal adjustments are the addition of unrecorded imports, including ships and aircraft for use on overseas routes, the subtraction of films imported on a rental basis, imports of gold, passengers' personal effects, goods for repair and goods intended for re-export, and the deduction of a 'valuation adjustment' representing the excess of the recorded value of imports (based on value for duty) over the estimated selling price to the importer as shown on invoices accompanying customs entries.

*Item 4b. Transportation.* Freight payable to foreign carriers on goods imported into Australia and transported between Australian ports, fares payable in Australia including fares paid by the Commonwealth government for the carriage of migrants under various assisted passage schemes. It also includes the overseas expenditure of Australian ships and aircraft, and premiums (less claims) on marine insurance payable overseas on imports into Australia, less the net earnings on marine insurance business undertaken by Australian firms in respect of both exports and imports.

*Item 4c. Travel.* Expenditure less refunds, by Australians visiting overseas for pleasure and for business, which may take the form of travellers' cheques, letters of credit, etc.

*Item 4d. Government transactions.* Expenditure overseas for defence, including the pay and allowances of personnel serving overseas, expenditure overseas on diplomatic, consular and trade representation, grants, contributions to international organisations, government pensions paid abroad, administrative expenditure overseas on immigration, and other miscellaneous payments for services.

*Item 4e. Other goods and services.* Cinema and television film rentals payable overseas, expenses of Australian firms transacting business overseas, commissions, brokerage, etc., and the value of repairs on goods previously exported for repair and return, etc.

*Item 5. Net current expenditure on goods and services—personal consumption.* Net expenditure on goods and services for purposes of consumption by persons and private non-profit making bodies serving persons. This item excludes the purchase of dwellings and capital expenditure by non-profit making bodies (included in item 8), and maintenance of dwellings (treated as expenses of private enterprises), but includes personal expenditure on motor vehicles and other durable goods and the imputed rent of owner-occupied dwellings. Purchase of motor vehicles is the estimated expenditure by persons on new motor vehicles, second-hand motor vehicles purchased from business enterprises and public authorities, and net dealers' margins on purchases and sales of motor vehicles within the personal sector. Motor vehicles include cars, station wagons, motor cycles, and motor scooters bought on personal account. The value of income in kind (e.g. food produced and consumed on farms, board and lodging provided free to employees) is included in both personal income and personal consumption expenditure, but goods chargeable to business (expense) accounts are excluded.

*Item 6. Net current expenditure on goods and services.—financial enterprises.* The current expenditure of banks, instalment credit companies, short-term money market companies, and building societies after deduction of bank charges to customers. Charges by instalment credit companies are treated as interest receipts and therefore are not offset against expenditure. This item includes wages, salaries and supplements, indirect taxes, and other payments for goods and services. Public financial enterprises are government businesses (mainly banks, including the Reserve Bank) which operate in a manner analogous to other financial enterprises, in that their current expenditure is largely financed by the net receipt of interest. The interest received by government housing authorities is treated as a receipt by public financial enterprises, but their other receipts, including net profit on sale of houses, and all their expenditure, are included in those of public trading enterprises.

*Item 7. Net current expenditure on goods and services—public authorities.* Expenditure by public authorities (not public enterprises) which does not result in the creation of fixed tangible assets or in the acquisition of land, buildings or second-hand goods (other than imported). It comprises expenditure on wages, salaries, and supplements, and on goods and services other than fixed assets and stocks. Fees, etc. charged by public authorities for goods sold and services rendered are offset against purchases. Net expenditure overseas by public authorities and purchases from public enterprises are included. All expenditure on defence is classified as current.

*Item 8. Gross fixed capital expenditure—private.* Expenditure on fixed assets whether for additions or replacements. This item includes expenditure on dwellings (item 8a), other building and construction (item 8b), and vehicles, plant, machinery, etc. (item 8c). It includes also expenditure on second-hand assets (other than houses purchased from public authorities) as well as new assets, less sales of existing assets. Expenditure on ordinary repair and maintenance of fixed assets is excluded as being chargeable to current account. Major additions are, however, regarded as capital expenditure. New dwellings purchased by persons from public housing authorities are included in private capital expenditure.

*Item 9. Gross fixed capital expenditure—public enterprises.* Expenditure on fixed assets whether for additions or replacements, including wages and salaries paid by public enterprises in connection with capital works.

*Item 10. Gross fixed capital expenditure—public authorities.* Expenditure on fixed assets whether for additions or replacements other than for defence purposes. Because it has not been possible to make a satisfactory dissection, all expenditure on roads, including maintenance, is classified as fixed capital expenditure. Expenditure on housing, included in this item, includes the estimated expenditure on construction of dwellings for rental purposes and hostels for migrants and others, but excludes houses built for sale, which are included in private capital expenditure. Also excluded are advances under the *War Service Homes Act* and other advances for financing home purchase schemes, and expenditure on development and sub-division of land for residential purposes.

*Item 11. Increase in value of stocks.* The change in book value of non-farm stocks held by trading enterprises and public authorities and the change in the value of farm stocks. The increase in the value of stocks is shown as consisting of the value of the physical change in stocks (item 11a), and a stock valuation adjustment (item 11b).

*Item 12. Statistical discrepancy.* The difference between the sum of the direct estimates of gross national product and imports of goods and services on the one hand and the sum of the estimates of components of gross national expenditure and exports of goods and services on the other hand. Conceptually these two totals are the same. Inclusion of the discrepancy on the expenditure side of the national production account implies nothing as to the relative accuracy of the estimates of gross national product and expenditure. Similarly its inclusion in the capital account does not imply that estimates in this table are less accurate than those in other tables, or that capital expenditure estimates are less accurate than estimates on the receipts side of this account.

*Item 13. Exports of goods and services.* The value of goods exported overseas and receipts from overseas for other goods and services. In Table 6 this item is sub-divided into the following components.

*Item 13a. Exports f.o.b.* The recorded trade figures adjusted for balance of payments purposes. The adjustments are similar to those made to the recorded import figures except that no change is made to the basis of valuation. The adjustment for unrecorded exports includes exports of uranium ores.

*Item 13b. Transportation.* The expenditure of overseas carriers in Australian ports, the overseas earnings of ships owned or chartered by Australian operators, and earnings by Australian airlines overseas.

*Item 13c. Travel.* Expenditure less refunds by persons visiting Australia for pleasure or business, which may take the form of travellers' cheques, letters of credit, etc. including expenditure in Australia of foreign students studying under the Colombo Plan; and earnings of Australian domestic airlines for the carriage of overseas visitors over Australian domestic air routes.

*Item 13d. Government transactions.* Receipts for services rendered by the Australian Government to other governments and international organisations, and other payments in Australia by foreign governments on defence and other projects, on diplomatic, consular and trade representation, and for pensions paid in Australia.

*Item 13e. Other goods and services.* The value of Australian production of gold less net industrial usage, business expenses of overseas firms in Australia, and commissions, brokerage, etc.

*Item 14. Depreciation allowances.* The financial provisions made for depreciation which are deducted to obtain net income. The estimates represent, in the main, amounts allowed under income tax legislation, but include also the estimated depreciation on tenanted and owner-occupied dwellings and provisions made by public enterprises. This item is divided into depreciation allowances of trading enterprises (item 14a) and of financial enterprises (item 14b).

*Item 15. Interest, etc.* Comprises interest, non-dwelling rent and royalties. This item appears in most accounts as receipts and payments of interest, etc., but in the case of some entries the amounts are combined with dividends and overseas profits. The item is shown net of intra-sector receipts and payments. Payment of interest, etc. by public enterprises is included in item 15g. Payment of interest, etc., by trading enterprises (item 15a) includes interest charged on borrowings for the purchase of houses by persons, which is treated as an appropriation from the gross operating surplus of dwellings owned by persons. Non-dwelling rent includes only actual payments and is estimated net of the expenses of the owner of the premises on rates, maintenance, etc., which are treated as working expenses of the enterprises renting the building. Royalties include mining and forestry royalties paid to public authorities, and royalties and fees for use of trade marks, patents, etc. paid overseas.

*Item 16. Income tax, estate and gift duties.* Income tax payable by trading and financial companies (items 16a and 16b) and persons (item 16c) are amounts payable at rates of taxation applicable in each year. Income tax payable by companies in respect of the most recent year's income is estimated on the basis of rates of tax applicable in respect of the preceding year's income. The difference between the amounts of income tax payable and the cash receipts by public authorities (part of item 16e) is included in item 16f. Income tax payable by persons (item 16c) includes the total income tax payable by individuals on all forms of income whether wages, business income or property income. Estate and gift duties (item 16d) are the amounts actually paid by persons in that year.

*Item 17. Dividends.* All receipts and payments of dividends, including dividends payable overseas and the remitted profits of Australian branches of overseas enterprises. Dividends payable (items 17a and 17c) are the dividends declared by trading and financial companies in respect of the year (including an estimate of dividends to be declared in respect of the most recent year). Receipts of dividends (other than dividends receivable from overseas subsidiaries) are cash receipts, and the difference between the amounts payable and received is included in item 17h. The items are shown net of intra-sector receipts and payments.

*Item 8. Undistributed income.* The undistributed income of companies comprising trading enterprises (item 18a) and financial enterprises (item 18c) is the balance of total company income, including profits receivable from overseas (items 18b and 18d) after deduction of income tax and dividends payable, and is equal to the sum of undistributed income accruing to overseas residents (item 18f) and undistributed company income accruing to residents (item 18g). Profits receivable from overseas is the unremitted part of profits earned by overseas branches of Australian companies and undistributed profits of overseas subsidiaries of Australian companies.

*Item 19. Unincorporated enterprises income.* The gross operating surplus of unincorporated enterprises less depreciation allowances and interest, etc. paid. It comprises the income of farm unincorporated enterprises (item 19a) and the income of all other unincorporated enterprises (item 19b).

*Item 20. Personal income from dwelling rent.* The gross operating surplus of dwellings owned by persons less depreciation allowances and interest, etc. paid.

*Item 21. Public enterprises income.* Includes income of public trading enterprises (item 21a) and income of public financial enterprises (item 21b). For trading enterprises it is equal to gross operating surplus after the deduction of depreciation allowances; for financial enterprises it is the net income after depreciation allowances, interest paid, and net current expenditure on goods and services by government banks are deducted from total receipts of interest and non-dwelling rent. Depreciation allowances deducted in arriving at the income of public trading enterprises are those shown in their published accounts, except in the case of enterprises whose accounts are included in the Commonwealth or State budgets and are analysed on the basis of their cash accounts (in which depreciation is not charged).

*Item 22. Retained investment income of life insurance funds, etc.* Total dividends, interest, etc., received by life insurance and superannuation funds, less rent and interest paid, depreciation allowances, income tax and dividends payable.

*Item 23. Overseas grants, contributions and remittances.* All transfers to or from overseas on public authority or private account which are not payments for goods and services or payments of dividends, interest, etc.

*Item 23a. Personal remittances overseas.* Gifts of money by resident persons and private institutions, payments for sustenance, and transfers of emigrants' funds and legacies from Australia to overseas, together with the value of goods exported as gifts.

*Item 23b. Personal remittances from overseas.* Gifts of money received from non-resident persons and private institutions, receipts for sustenance, and transfers of immigrants' funds and legacies from overseas to Australia.

*Item 23c. Public authority overseas grants and contributions.* Grants to, and payments made on behalf of the Territories of Papua and New Guinea, and expenditure overseas in respect of technical assistance and relief under the Colombo Plan and United Nations projects. Includes contributions to United Nations and other organisations due by virtue of membership of these organisations.

*Item 24. Personal saving.* The excess of personal income over the sum of personal consumption expenditure, interest paid, income tax payable, estate and gift duties paid, and remittances overseas. Personal saving is estimated as the balancing item in the personal current account. It includes saving through life insurance and superannuation funds (defined as premiums, etc. paid less claims, etc. received and administrative expenses of life insurance offices) and the increase in assets of marketing authorities. Personal saving may also take the form of increases in holdings of cash and net purchases of securities, the net increase in bank deposits less advances, the reduction in the outstanding advances of instalment credit companies to persons and unincorporated enterprises, and the increase in the equity of persons in dwellings and in capital equipment, buildings and stocks of unincorporated enterprises.

*Item 25. Cash benefits.* Current transfers to persons from public authorities in return for which no services are rendered or goods supplied. Principal components are scholarships; hospital, medical, pharmaceutical, maternity, sickness, and unemployment benefits; child endowment; widows', age, invalid, and repatriation pensions; and attendance money for waterside workers.

*Item 26a. Grants towards private capital expenditure.* Grants to meet part of the costs of private capital expenditure, e.g. Commonwealth Home Savings grants, grants towards construction of science laboratories in private schools and houses for aged persons, payments under the *Currency Act* in relation to the conversion of accounting and other machines following introduction of decimal currency, etc.

*Item 26b. Devaluation compensation.* Compensation to primary industry marketing authorities for losses on overseas debts outstanding at the time of sterling devaluation.

*Item 27. Public authorities surplus on current account.* The excess of current revenue, including income of public enterprises, over current outlay. Current outlay includes current expenditure on goods and services, as defined in item 7, and transfer payments (interest, cash benefits, subsidies, grants towards private capital expenditure, and overseas grants). The surplus is transferred to the capital account where it is shown as part of total funds available for financing capital outlay.

*Item 28. Overseas balance on current account.* The excess of payments to the rest of the world on current account over receipts from the rest of the world on current account. In the national capital account it is shown divided into drawings on Australia's overseas monetary reserves (item 28a) and net apparent capital inflow (item 28b).

## CHAPTER 17

### PRIVATE FINANCE

Further information on the subjects dealt with in this chapter is contained in the annual bulletins *Banking and Currency* and *Insurance and Other Private Finance*. Current information is contained in the *Quarterly Summary of Australian Statistics*, the *Monthly Review of Business Statistics*, the *Digest of Current Economic Statistics* (monthly), and the following mimeographed statements: monthly—*Monthly Bulletin of Banking Statistics*; *Banking Statistics* (preliminary statement); *Savings Bank Statistics* (preliminary statement); *Monthly Bulletin of Life Insurance Statistics*; *Finance Companies*; *Instalment Credit for Retail Sales* (preliminary statement); *Permanent Building Societies*; quarterly—*Instalment Credit for Retail Sales*; *New Capital Raisings by Companies in Australia* (bulletin and preliminary statement); *Capital and Maintenance Expenditure by Private Business in Australia*; *Unit Trusts, Land Trusts and Mutual Funds*. Other relevant annual mimeographed bulletins are *Life Insurance*; *Australian Fire, Marine and General Insurance Statistics*; *Government Pension and Superannuation Schemes*; *Survey of Selected Private Pension Funds*; *Finance Companies*; and *Registered Building Societies*.

#### CURRENCY

Until 13 February 1966 Australian currency was based on the British unit, which is the pound (£) divided into 20 shillings (s) each of 12 pence (d). A decimal currency system was introduced in Australia on 14 February 1966 based on a major unit—the dollar—equal to ten shillings in the old currency. The minor unit—the cent—is one-hundredth part of the major unit and is equal to 1.2 pence in the old currency. Decimal notes and coins became legal tender from 14 February 1966. The par value of the Australian dollar, under the terms of the International Monetary Fund, was established at 0.99531 grams of fine gold.

The *Reserve Bank Act 1965* authorised the Reserve Bank of Australia to issue Australian notes in denominations of \$1, \$2, \$5, \$10, \$20, or \$50, or in any other denomination that the Treasurer, by instrument of writing published in the Gazette, determines. All Australia's coin requirements are met by the Royal Australian Mint, Canberra, with the Melbourne and Perth branches of the Royal Mint providing some bronze coins on contract to the Commonwealth Treasury.

For additional information on note issue and coinage refer to List of Special Articles, etc., at end of this Year Book.

#### RESERVE BANK OF AUSTRALIA: NOTE ISSUE DEPARTMENT LIABILITIES AND ASSETS, 30 JUNE 1968 AND 1969 (\$ million)

Liabilities	1968	1969	Assets	1968	1969
Notes on issue(a) . . . . .	998.5	1,091.5	Gold and balances held abroad (including money at short call) . . . . .	315.5	164.5

(a) Excludes Government and inter-bank deposits, but includes deposits of the public with the Reserve Bank. (b) Interpolated 'weekly average' based on end of month figures.

## Gold receipts, issues and price

Since early in the 1939-45 War all gold has been acquired by the Reserve Bank, and the export and use of gold has been subject to regulation by the Commonwealth Government. All trading banks in Australia, the Deputy Master of the branch of the Royal Mint in Perth, and three private refining companies are authorised under the Banking (Gold) Regulations to deal in gold on behalf of the Reserve Bank. The Melbourne Mint ceased to deal in gold in 1964. The Royal Australian Mint at Canberra is not authorised to receive and issue gold.

The average price of gold in Australia is fixed by the Reserve Bank and at present reflects the parity value of Australian currency established in conformity with the *International Monetary Agreements Act 1947*. The average price paid for gold delivered to the Reserve Bank of Australia or to persons authorised by the Bank to purchase gold is fixed by the Reserve Bank of Australia, and has been \$31.25 per fine ounce since 1 May 1954.

In December 1951 arrangements were made whereby producers could sell a proportion of newly-mined gold for industrial purposes on overseas premium markets. Under these arrangements gold is acquired by the Reserve Bank in the usual manner and sold, at the Bank's buying price, to an association representing gold producers participating in the scheme. The association pays the Bank's handling charges and the costs of preparation of the gold and makes arrangements for export and sale. Profits earned by the association after meeting administrative expenses are distributed to members in proportion to the quantity of gold delivered to the Reserve Bank. Until August 1952, when permission was given for the export of fine gold, gold exported under this arrangement was not to exceed a fineness of 22 carats (11/12ths).

The average prices per fine ounce in Australian currency obtained for gold exported under this scheme for each month during 1968-69 were: July \$36.640; August \$34.161; September \$31.251; October \$35.460; November \$36.195; December \$37.516; January \$34.315; February \$38.413; March \$35.773; April \$34.155; May \$36.629; and June \$35.840.

## OVERSEAS EXCHANGE RATES(a): PAR OF EXCHANGE AND AVERAGE TELEGRAPHIC TRANSFER SELLING RATES FOR SYDNEY ON OVERSEAS COUNTRIES, 1968-69

(a) Based on rates quoted daily by the Commonwealth Trading Bank of Australia, or where these were not available, rates used by the Department of Customs and Excise in converting import values to \$A for purposes of calculating customs duty. (b) As at 30 June 1969, established under International Monetary Fund Agreement. (c) Not a member of the International Monetary Fund. (d) No par value established.

## BANKING

The Australian banking system has developed along the lines of the British system with widespread branch banking conducted by relatively few banks.

### Development since federation

With federation in 1901 the new Commonwealth Parliament was given power, under section 51 of the Commonwealth Constitution, to legislate with respect to 'Banking, other than State Banking, also State Banking extending beyond the limits of the State concerned, the incorporation of banks, and the issue of paper money'. In 1911 the Commonwealth entered the field of banking, with the establishment of the Commonwealth Bank of Australia, which conducted both trading bank and savings bank operations. A separate Commonwealth Savings Bank was established in 1928.

### Central bank

Central banking functions of the Commonwealth Bank developed gradually over the years prior to and during the second world war. In November 1935 a Royal Commission was appointed by the Commonwealth Government to inquire into the monetary and banking systems in operation in Australia and to report whether any, and if so what, alterations were desirable in the interests of the people of Australia as a whole, and the manner in which any such alterations should be effected. The Commission presented its report in July 1937, and a summary of the recommendations appears in Year Book No. 31, page 1010.

In 1945 the Commonwealth Government legislated to give full legal effect to the central banking functions already being exercised by the Commonwealth Bank of Australia and to regulate the banking system as a whole. The Commonwealth Bank of Australia further developed mainly as a central bank when from 3 December 1953 the Commonwealth Trading Bank of Australia was established to take over most of the general trading bank functions of the Commonwealth Bank of Australia.

Legislation in 1959 completed the separation of the trading and central banking functions of the Commonwealth Bank of Australia with the establishment of the Commonwealth Development Bank of Australia under the *Commonwealth Banks Act 1959* to take over the Industrial Finance Department and Mortgage Bank Department of the Commonwealth Bank of Australia.

A new bank, the Reserve Bank of Australia, was established under the *Reserve Bank Act 1959* as the nation's central bank to administer the provisions of a new banking Act (*Banking Act 1959*). A statutory corporation, the Commonwealth Banking Corporation, was set up under the *Commonwealth Banks Act 1959* to control the Commonwealth Trading Bank of Australia, the Commonwealth Development Bank of Australia, and the Commonwealth Savings Bank of Australia.

### Trading banks

Commercial banking in Australia is predominantly carried on by eight major trading banks. One of these banks is owned by the Commonwealth Government and seven are privately owned companies established by Act or Charter or incorporated under State or British law. Since 1945 no new private trading banks may be established without the approval of the Commonwealth. In June 1969 the English, Scottish and Australian Bank Ltd and the Australia and New Zealand Bank Ltd became subsidiary companies of the Australia and New Zealand Banking Group Ltd (incorporated in the United Kingdom) but continued to operate as separate banks. It is intended that as from October 1970 this separation will be discontinued. The Rural Bank of New South Wales, the State Bank of South Australia and the Rural and Industries Bank of Western Australia are State-owned banks which operate only in their respective States. The Brisbane Permanent Building and Banking Co. Ltd (which became the Bank of Queensland on 11 May 1970) confines its operations to the Brisbane area, and three foreign banks, Bank of China, Bank of New Zealand and Banque Nationale de Paris operate on a restricted basis.

### Term Loan Fund

Lending by trading banks is generally conducted on an overdraft basis. A departure from this practice followed discussions during 1961-62 involving the Commonwealth Government, the Reserve Bank and the major trading banks, which resulted in arrangements whereby the banks agreed to create a fund known as the Term Loan Fund, the resources of which would be employed to make loans for capital expenditure on production in the rural, industrial and (to a lesser extent) commercial fields and to finance exports. The loans would be made for fixed terms, varying usually between three and eight years. The term lending arrangements operated from April 1962.

### *Farm Development Loan Fund*

Discussions in March 1966 between the Commonwealth Government, the Reserve Bank and the major trading banks resulted in the establishment of a fund known as the Farm Development Loan Fund, from which resources would be available to provide rural producers, particularly smaller producers, with greater access to medium and long-term finance. The Fund was established in April 1966.

### **Savings banks**

Until 1956 savings bank operations were, apart from two small trustee banks in Tasmania, conducted by the Commonwealth Government and some State Governments. In January 1956 private savings banks were established as subsidiary companies by two of the private trading banks. By mid-1962 all the major private trading banks had established savings bank subsidiary companies.

### **Development banks**

The Commonwealth Development Bank of Australia was established by the *Commonwealth Banks Act 1959* and commenced operations on 14 January 1960. The Australian Resources Development Bank was established by the eight major trading banks with the support of the Reserve Bank of Australia and commenced operations in February 1968. For further information on these banks see page 502 and page 503 respectively.

### **Current legislation**

Operations of banks and banking in Australia are currently governed by (i) Commonwealth legislation enacted in 1959 in respect of banking other than State banking, and (ii) State legislation relating to the incorporation of banks and management of State banks.

### *Commonwealth banking legislation*

(a) The *Banking Act 1959–1967* provides for the regulation of banking and for the protection of the currency and the public credit of the Commonwealth. This Act, which replaced the *Banking Act 1945–1953*, was assented to on 23 April 1959 and came into operation on 14 January 1960 as the *Banking Act 1959*. It was amended by the *Banking Act 1965* and the *Statute Law Revision (Decimal Currency) Act 1966* in order to make certain changes required by the change to decimal currency and by the *Banking Act 1967* relating to the Papua and New Guinea Development Bank and the Australian Resources Development Bank Limited. It applies to all banks, including savings banks, operating in Australia or the Territories of the Commonwealth except State banks trading in their own State. The objects of the Act are: (i) to provide a legal framework uniform throughout Australia for regulating the banking system; (ii) to safeguard depositors of the banks from loss; (iii) to provide for the co-ordination of banking policy under the direction of the Reserve Bank; (iv) to control the volume of credit in circulation and bank interest rates; (v) to mobilise and to provide machinery for the control of the foreign exchange and gold resources of the Australian economy. A summary of the main provisions of the *Banking Act 1959* is given in Year Book No. 46, pages 759–60.

(b) The *Reserve Bank Act 1959–1966* provides for the constitution and management of the Reserve Bank of Australia and the management of the Australian note issue.

(c) The *Commonwealth Banks Act 1959–1968* provides for the constitution and management of the Commonwealth Banking Corporation, Commonwealth Trading Bank of Australia, Commonwealth Savings Bank of Australia, and Commonwealth Development Bank of Australia.

The Commonwealth Banking Corporation came into being on 14 January 1960. It is the controlling body for the Commonwealth Trading Bank, Commonwealth Savings Bank and Commonwealth Development Bank. Under the *Banking Act 1959–1967* the Corporation and its constituent banks are subject to the same central banking controls as are the private trading banks.

The Board of the Corporation consists of the Managing Director of the Corporation, the Deputy Managing Director, the Secretary to the Treasury, and eight other members appointed by the Governor-General of whom one is Chairman and another Deputy Chairman. In addition, there is an Executive Committee of the Board for each of the three separate banks. These Executive Committees are appointed by the Treasurer, after consultation with the Board, and are charged with taking such action as is necessary to ensure that effect is given by the respective banks to the policies laid down for them and to any directions given by the Board in relation to their affairs. Under the Board the Corporation is managed by the Managing Director and the Deputy Managing Director. Each of the three constituent banks of the Corporation has its own statutory functions and responsibilities and its separate identity within the framework of the Corporation. Each bank is managed by a General Manager under the Managing Director of the Corporation.

*State banking legislation*

The State Acts under which the various banks are incorporated differ. While some of the older banks were incorporated by special Act or Charter, e.g. the Bank of New South Wales by Act of Council 1817, the Bank of Adelaide by Act of the South Australian Parliament, and the Bank of New Zealand by Act of the General Assembly of New Zealand, most of the banks are incorporated under a companies Act of the States or the United Kingdom. This is also the case with those banks which were reconstructed after the financial crisis of 1893. State banks, constituted under State Acts, transacting general banking business are The Rural Bank of New South Wales, the State Bank of South Australia, and the Rural and Industries Bank of Western Australia. State savings banks, constituted under State Acts, transacting savings bank business are The State Savings Bank of Victoria, The Savings Bank of South Australia and the Savings Bank Division of the Rural and Industries Bank of Western Australia.

**Presentation of banking statistics**

Because of the different purposes they serve in the Australian financial system, Australian banks have been divided for statistical purposes into the following groups and a separate series is presented for each.

(i) *The Reserve Bank of Australia.* Statistics of the Central Banking Business, the Note Issue Department, and the Rural Credits Department are shown separately.

(ii) *Trading banks.*

*Major trading banks.* These comprise the Commonwealth Trading Bank of Australia, Australia and New Zealand Bank Ltd, The Bank of Adelaide, Bank of New South Wales, The Commercial Bank of Australia Ltd, The Commercial Banking Company of Sydney Ltd, The English, Scottish and Australian Bank Ltd, The National Bank of Australasia Ltd.

*All trading banks.* These comprise the major trading banks and the following banks—the Bank of China, Bank of New Zealand, The Brisbane Permanent Building and Banking Co. Ltd, Banque Nationale de Paris, the General Bank Department of the Rural Bank of New South Wales, the State Bank of South Australia, and the Rural Department of the Rural and Industries Bank of Western Australia.

(iii) *Savings banks. These comprise:*

*Commonwealth Savings Bank.* The Commonwealth Savings Bank of Australia was established as a separate institution on 9 June 1928, having functioned previously as a department of the Commonwealth Bank.

*State savings banks.* State savings banks at present operating (with date of establishment shown in parentheses) are: The State Savings Bank of Victoria (1841); The Savings Bank of South Australia (1848); the Savings Bank Division of the Rural and Industries Bank of Western Australia (1956).

*Trustee savings banks.* Two trustee savings banks, The Hobart Savings Bank and Launceston Bank for Savings, operate within Tasmania. These Banks commenced business in 1845 and 1835 respectively.

*Private Savings banks.* The Bank of New South Wales Savings Bank Ltd, the Australia and New Zealand Savings Bank Ltd, and the C.B.C. Savings Bank Ltd commenced business in 1956, the E.S. & A. Savings Bank Ltd in 1961, The Bank of Adelaide Savings Bank Ltd, The National Bank Savings Bank Ltd, and The Commercial Savings Bank of Australia Ltd in 1962.

(iv) *Development banks.* These comprise the Commonwealth Development Bank of Australia and the Australian Resources Development Bank Ltd.

**Reserve Bank of Australia**

The Reserve Bank of Australia, established under the *Reserve Bank Act* 1959, which came into operation on 14 January 1960, continued in existence the body corporate known as the Commonwealth Bank of Australia. An account of the progress and development of that bank is given in earlier issues of the Year Book (*see* No. 37, pages 570–2, and No. 45, pages 735–7).

The general functions of the Reserve Bank are set out in Section 10 of the *Reserve Bank Act* 1959–1966, which states:

‘It is the duty of the Board, within the limits of its powers, to ensure that the monetary and banking policy of the Bank is directed to the greatest advantage of the people of Australia and that the powers of the Bank under this Act, the *Banking Act* 1959, and regulations under that Act are exercised in such a manner as, in the opinion of the Board, will best contribute to,

(a) the stability of the currency of Australia; (b) the maintenance of full employment in Australia; and (c) the economic prosperity and welfare of the people of Australia.’

In addition to its functions as a Central Bank, the Bank controls the Australian Note Issue through a Note Issue Department, provides special banking facilities through the Rural Credits Department, and acts as a banker to the Commonwealth and some of the States.

### Management

Under the provisions of the *Reserve Bank Act* 1959–1966 the policy of the Reserve Bank is determined by a Board consisting of the Governor (Chairman), the Deputy Governor, the Secretary to the Treasury, and seven other members appointed by the Governor-General. The Bank is managed by the Governor, who acts in accordance with the policy of the Board and with any directions of the Board. The Bank is required to inform the Government of the monetary and banking policy of the Board. In the event of a disagreement between the Government and the Board as to whether the monetary and banking policy of the Bank is directed to the greatest advantage of the people of Australia, the Governor-General, acting with the advice of the Executive Council, may determine the policy to be adopted by the Bank.

### Central banking business

Under the powers it possessed under the *Commonwealth Bank Act* 1911–1943 and under its war-time powers under the National Security Regulations the Commonwealth Bank gradually assumed the functions of a Central Bank. Part III of the *Commonwealth Bank Act* 1945 formally constituted the Bank as a Central Bank and granted the necessary powers to carry on the business of a Central Bank, and these powers were carried through into the present Act constituting the Reserve Bank. Under the provisions of the *Reserve Bank Act* 1959–1966 the capital for the Central Banking Business is the capital of the Commonwealth Bank for Central Banking purposes immediately prior to 14 January 1960, and such other sums as are transferred from the Reserve Bank Reserve Fund. The profits of the Bank are distributed as follows: (a) such sums as the Treasurer, after consultation with the Bank, determines shall be placed to the credit of the Reserve Bank Reserve Fund and (b) the remainder shall be paid to the Commonwealth.

### Note Issue Department

The Note Issue Department, established in 1920 when the control of the Australian note issue was transferred from the Commonwealth Treasury to the Commonwealth Bank, was maintained in the same form under the *Reserve Bank Act* 1959. The Reserve Bank may, through this Department, issue, re-issue and cancel Australian notes. Under the *Reserve Bank Act* 1959–1966 the profits of the Note Issue Department are paid to the Commonwealth.

### Rural Credits Department

The Rural Credits Department, established in 1925 for the purpose of making short-term credit available for the orderly marketing of primary produce, was continued in the same form under the *Reserve Bank Act* 1959. The Reserve Bank may, through this Department, make advances upon the security of primary produce placed under the legal control of the Bank, or other security associated with the production or marketing of primary produce, to co-operative associations or marketing boards formed under the laws of the Commonwealth or a State or Territory of the Commonwealth or other bodies specified by proclamation. The period of the advance shall not exceed one year. Under the provisions of the *Reserve Bank Act* 1959–1966 the capital of the Rural Credits Department is the capital of the Rural Credits Department of the Commonwealth Bank immediately prior to 14 January 1960, and \$4,000,000 provided by the Reserve Bank. The profits of the Rural Credits Department are dealt with as follows: (a) one-half to the credit of the Rural Credits Department Reserve Fund and (b) one-half to the credit of the Rural Credits Development Fund.

### Trading banks

Not all trading banks use 30 June as the end of their accounting year. In the tables on pages 486-8 balance sheet and profit and loss account information for the years 1968 and 1969 is shown for each bank as at the date on which its accounting year ends. The dates used are: 30 June—Commonwealth Trading Bank of Australia, The Commercial Bank of Australia Ltd, The Commercial Banking Co. of Sydney Ltd, The Rural Bank of New South Wales and the State Bank of South Australia; 30 September—Australia and New Zealand Bank Ltd, The Bank of Adelaide, Bank of New South Wales and The National Bank of Australasia Ltd; 30 August—The Brisbane Permanent Building and Banking Co. Ltd; 31 March—The Rural and Industries Bank of Western Australia. Up to 1968 The English, Scottish and Australian Bank Ltd used 30 June as the end of its accounting period but as from 1969 this bank changed to 30 September. These tables relate to liabilities and assets both inside and outside Australia and exclude the overseas banks, namely the Bank of China, Bank of New Zealand and Banque Nationale de Paris.

In the tables on pages 489-90 figures shown for averages of liabilities and assets are the average of liabilities and assets within Australia (including Papua, New Guinea and other External Territories) of the banks, including the three overseas banks, on the weekly balance days (Wednesdays) during the period concerned. Averages of debits to customers' accounts and new lending commitments are averages for weeks ended on the Wednesdays during the period.

In the classification of bank advances, borrowers are classified into two main groups:

*Resident borrowers* comprising all institutions (including branches of overseas institutions) engaged in business in Australia and individuals permanently residing in Australia, and

*Non-resident borrowers* comprising all other persons and institutions, including companies incorporated abroad, which, although represented, do not carry on business in Australia.

Advances to resident borrowers are classified into:

*Business advances* which are advances to partnerships, companies and other institutions engaged in business in Australia, advances to individuals actively engaged in business or a profession on their own behalf if the advances are mainly for purposes of that business or profession, and advances to mutual, co-operative and benefit societies which distribute their profits to members by way of dividends, rebates of charges for goods and services, or increased benefits.

Separate figures are shown for business advances to companies and to other (unincorporated) businesses and advances are also classified to the main industry of borrower.

*Advances to public authorities* which are advances to local and semi-governmental authorities including separately constituted government business undertakings but not Commonwealth and State governments.

*Personal advances* which are advances to individuals for purposes other than carrying on a business or profession.

*Advances to non-profit organisations* which are advances to organisations which are not operated for the purpose of making a profit or gain to individual members, but for the purposes of the organisations or for the benefit of the community in general.

The classification used for overdraft limits is the same as that used for the classification of bank advances (see above) while abridged versions of this classification are used for bank deposits and new and increased lending commitments.

At 30 June 1969 the maximum rate of interest paid by trading banks on fixed deposits for the following terms were: 30 days but less than 3 months—4.25 per cent; 3 months but less than 12 months—4.25 per cent; 12 months but less than 18 months—4.50 per cent; 18 months—4.75 per cent; and over 18 months to 24 months—4.75 per cent. The maximum rate of interest charged on overdrafts was 7.50 per cent and the maximum flat rate on unsecured personal loans was 6.00 per cent.

(a) Covers all trading banks and in addition the Rural Credits Department of the Reserve Bank and the Commonwealth Development Bank. Excludes debits to Commonwealth and State Government accounts in capital cities

### Savings banks

For information on the origin of savings banks in Australia, see Year Book No. 50, page 854, and earlier issues.

All savings banks, including trustee savings banks, but not State savings banks, are subject to the *Banking Act* 1959–1967. Details of this Act and the special provisions applying to savings banks are given in Year Book No. 46, pages 759–60.

Not all savings banks use 30 June as the end of their accounting year. In the following tables balance sheet and profit and loss account information for the years 1968 and 1969 is shown for each bank as at the date on which its accounting year ends. The dates used are: 30 June—Commonwealth Savings Bank of Australia, The Commercial Savings Bank of Australia, C.B.C. Savings Bank Ltd, The State Savings Bank of Victoria and The Savings Bank of South Australia; 30 September—Australia and New Zealand Savings Bank Ltd, The Bank of Adelaide Savings Bank Ltd, Bank of New South Wales Savings Bank Ltd and The National Bank Savings Bank Ltd; 31 August—The Hobart Savings Bank and Launceston Bank for Savings. Up to 1968 the E.S. & A. Savings Bank Ltd used 30 June as the end of its accounting period but as from 1969 this bank changed to 30 September. These tables relate to liabilities and assets both inside and outside Australia.

The information in the following tables for the Commonwealth Savings Bank, the trustee savings banks and the private savings banks has been obtained from the annual returns lodged with the Commonwealth Statistician under Section 53 of the *Banking Act* 1959–1967, whereas that for State savings banks has been compiled from information in their published annual reports. Particulars for the Commonwealth Savings Bank, The State Savings Bank of Victoria, The Savings Bank of South Australia, The Rural and Industries Bank of Western Australia and the Hobart Savings Bank relate to the end of the month, those for the Launceston Bank for Savings to the last Monday in the month, and those for the other savings banks to the last Wednesday in the month.

The number of operative accounts excludes school bank accounts and small inoperative accounts. The other sections of the tables relating to depositors' balances, etc., include school bank accounts, small inoperative accounts, investment accounts, deposit stock and non-interest bearing cheque accounts at the State Savings Bank of Victoria and the Savings Bank of South Australia, and fixed deposit accounts and non-interest bearing cheque accounts at the trustee savings banks in Tasmania.

At 30 June 1969 all except four savings banks were paying interest on deposits at 3.75 per cent. The other four banks were paying interest at 4 per cent. For accounts other than friendly and other societies the maximum interest bearing amount in any one account was \$10,000. For accounts for friendly and other societies the maximum amount in any one account on which interest was paid at the above rates varied between different banks and a lower rate of interest (usually 2.25 per cent) was paid on any excess amount. The maximum rate on loans to local government authorities was 5.875 per cent, the rates on Credit Foncier housing and mortgage loans were 5.50 per cent—6.25 per cent and the rates on loans to co-operative building and housing societies were 5.50—6.00 per cent.

# BANKING: AUSTRALIA

1950 TO 1969

\* EXCLUDES COMMONWEALTH AND STATE GOVERNMENTS

### Development banks

#### Commonwealth Development Bank of Australia

The Commonwealth Development Bank of Australia was established by the *Commonwealth Banks Act 1959* and commenced operations on 14 January 1960. It was formed basically from an amalgamation of the Mortgage Bank and Industrial Finance Departments of the Commonwealth Bank. Under the Act the Bank is authorised to provide assistance for the development of worthwhile enterprises in the fields of primary and secondary industries, which would otherwise be unable to obtain the necessary finance on reasonable and suitable terms and conditions. The Commonwealth Development Bank is managed by a General Manager under the Managing Director of the Commonwealth Banking Corporation, and its policy is determined by the Board of that Corporation. The capital of the Development Bank consists of the capital of the Mortgage Bank and Industrial Finance Departments of the Commonwealth Bank immediately prior to 14 January 1960, \$10 million provided by the Reserve Bank, \$20 million appropriated from the Consolidated Revenue Fund in 1961-62 by the *Commonwealth Banks Act 1961* and the *Commonwealth Banks Act 1962*, \$10 million appropriated in 1963-64 by the *Commonwealth Banks Act 1963*, and such other sums as are provided from the Commonwealth Development Bank Reserve Fund. The net profits of the Bank are paid to the Commonwealth Development Bank Reserve Fund, which at 30 June 1969 stood at \$27.2 million. Net profits in 1967-68 and 1968-69 amounted to \$2.1 million and \$1.9 million respectively.

**Australian Resources Development Bank Limited**

The Australian Resources Development Bank Limited was established in 1967 with equity capital of \$3 million subscribed in equal proportions by the eight major trading banks. It was given the status of a bank by the *Banking Act* 1967 and opened for business on 29 March 1968. The main object of the Australian Resources Development Bank is to assist Australian enterprises to participate more fully in the development of Australia's natural resources. It provides finance to enterprises engaged in major developmental projects by direct loans, investing in equity capital or by refinancing loans made by trading banks acting individually or as a group. The Australian Resources Development Bank obtains funds by accepting deposits and by borrowing on the Australian and overseas capital markets.

**INSURANCE****Legislation**

Section 51 of the Commonwealth Constitution confers the necessary powers on the Commonwealth Parliament to legislate with respect to 'insurance other than State insurance; also State insurance extending beyond the limits of the State concerned'. Commonwealth legislation includes the *Marine Insurance Act* 1909–1966 defining the limits of marine insurance and regulating the terms of contracts, etc., the *Insurance Act* 1932–1966 requiring the lodgment of deposits by insurance companies, and the *Life Insurance Act* 1945–1965 generally regulating life insurance business in Australia. The *Marine Insurance Act* 1909–1966 and the *Insurance Act* 1932–1966 have limited application, and except for life insurance business, which is regulated by the *Life Insurance Act* 1945–1965, insurance business is conducted almost entirely under State laws.

**Insurance Act 1932-1966**

Companies, persons or associations of persons carrying on insurance business in Australia or in, any Territory of Australia are required to lodge a deposit with the Commonwealth Treasurer. Money deposited is invested by the Treasurer in prescribed securities selected by the depositor, and all interest is paid to depositors. Deposits remain as security against liability to policy holders, and are available to satisfy judgments obtained in respect of policies. Deposits held by States on 1 February 1932 could, however, remain with the States subject to the conditions embodied in the laws of the States, and depositors to the extent of the value of these deposits were exempt from liability to make deposits under the Commonwealth Act.

The following are not regarded as insurance business under the Act: staff superannuation schemes; schemes of religious organisations solely for insurance of their property; friendly society, union and association schemes involving superannuation or insurance benefits to employees.

This Act does not apply to State insurance within the limits of the State concerned, and under the *Life Insurance Act 1945-1965* ceased to apply to life insurance business.

**Life Insurance Act 1945-1965**

The objects of this Act are: (a) to replace all State legislation on the subject of life insurance, except that relating to the life insurance operations of State Government insurance offices within the State concerned, and to provide uniform legislation for the whole of Australia; (b) to appoint an Insurance Commissioner to exercise active supervision of the activities of life insurance companies, with a view to securing the greatest possible protection for policy holders; (c) to set up adequate machinery for dealing with any company that fails to maintain a required minimum standard of solvency. The Act came into operation on 20 June 1946. A summary of the provisions of the Act is given in Year Book No. 37, pages 595-7. The Insurance Commissioner issues an annual report which contains detailed information on the operations of life insurance companies.

**Deposits under Insurance Acts**

Deposits lodged under the Insurance Acts at 30 June 1969 totalled \$36.6 million, comprising \$4.6 million held by the Commonwealth in respect of life insurance, and \$32.0 million held by the Commonwealth in respect of other forms of insurance. The deposits consisted of Commonwealth Government securities \$22.1 million, United Kingdom Government securities \$1.8 million, fixed deposits \$0.6 million, bank guarantees and undertakings \$8.5 million, corporation debentures and stock \$0.9 million, and titles and mortgages \$2.7 million.

**Life insurance**

Since 1947, returns lodged under the *Life Insurance Act 1945-1965* have been used to compile life insurance statistics. Except where otherwise indicated, the figures in the succeeding paragraphs refer only to Australian business. Business in the Territories of Papua and New Guinea is, however, included in the Australian figures unless otherwise stated. The information shown has been compiled from returns of life insurance business submitted in the financial years which ended during the year stated.

**Offices transacting business**

The number of offices which transacted life insurance business in Australia during 1968 was 47, including 2 State Government institutions which conduct life insurance business only in their own States. Of the remaining 45 offices, 32 were companies incorporated outside Australia or were subsidiaries of such companies. Eight companies, including 3 incorporated outside Australia, were mutual companies. All companies conducted ordinary business and 44 conducted superannuation business. Industrial business was conducted by 12 companies, 11 of which also conducted superannuation business.

### Fire, marine and general insurance

The following statistics, which are in respect of the Australian business of companies operating in Australia and State Government insurance offices, conform to the following definitions and should be interpreted accordingly.

- (a) *Premiums* represent the full amount receivable in respect of policies issued or renewed in the year, less returns, rebates and bonuses paid or credited to policy-holders during the year. They are not adjusted to provide for premiums unearned at the end of the year and consequently the amounts differ from 'earned premium income' appropriate to the year. In recent years, as the volume of premiums receivable has been increasing, the figures shown in the tables are greater than the premiums earned by insurers.
- (b) *Claims* comprise payments made during the year, plus the estimated amount of outstanding claims at the end of the year, less the estimated amount of outstanding claims at the beginning of the year. Salvage and other amounts recoverable have been deducted.
- (c) *Contributions to fire brigades, commission and agents' charges, and expenses of management* are mainly charges paid during the year.
- (d) *Taxation* is mainly payments made during the year, and includes income tax, pay-roll tax, licence fees, stamp duty (where paid by the company), etc. Income tax paid during the year is based on the income of earlier years.

The figures relate to selected items of statistics and are not construable as 'Profit and Loss' statements or 'Revenue Accounts'.

During 1968-69 revenue from premiums amounted to \$802.1 million, and that from net interest on investments, etc. to \$52.0 million, a total of \$854.1 million. Expenditure on claims amounted to \$523.3 million, contributions to fire brigades \$20.5 million, commission and agents' charges \$70.7 million, and expenses of management \$132.4 million, a total of \$746.9 million.

(a) Excludes workers' compensation insurance in coal-mining industry in New South Wales.

### Export Payments Insurance Corporation

The Export Payments Insurance Corporation was established under the *Export Payments Insurance Corporation Act 1956* to provide exporters with insurance against risks associated with overseas trade which are not usually acceptable to commercial insurers, and to give certain guarantees in connection with that trade. The Corporation commenced business in 1957. Where the Corporation is not in a position to accept business on its commercial account it may be authorised under its statute to provide insurance facilities on the Commonwealth Government's account in the national interest.

### PENSION AND SUPERANNUATION SCHEMES

#### Government, local government and semi-governmental pension and superannuation schemes

The Commonwealth and all State Governments have established pension and superannuation schemes for their employees. These schemes are operated through funds to which both the Governments and their employees make contributions. Employees of local government and semi-governmental authorities are covered either by the Commonwealth and State Government schemes or by a separate scheme of the authority which is operated either through a separately constituted fund or through a life insurance office.

## Schemes operated through separately constituted funds

(a) Operating in all States except South Australia.

### Private superannuation, pension and retiring allowance schemes

In 1955-56, 1960-61, 1961-62, and 1962-63 sample surveys were conducted of pension and retiring allowance schemes in private businesses subject to pay-roll tax, other than in rural industries, private domestic service, and certain businesses such as accountants, trade associations, consultant engineers, etc. Commonwealth Government airlines and banks were included where they had established their own funds separately from the Commonwealth superannuation funds, but statutory coal miners' pension funds were excluded. Details were asked for three types of pension and retiring allowance schemes. They were (a) schemes operated through life insurance offices, (b) schemes operated through separately constituted funds, and (c) direct payments of pensions and retiring allowances.

The results of the 1955-56 survey are available in *Finance Bulletin* No. 47, Part I—*Public and Private Finance*, and the 1960-61, 1961-62 and 1962-63 survey results were published in *Insurance and Other Private Finance*, Bulletin No. 2 and Year Book No. 51 (pages 898-900). Details of the operations of government and semi-governmental superannuation schemes were published in *Insurance and Other Private Finance*, Bulletins No. 1 and No. 2 for 1961-62 and 1962-63 respectively, and in Part I of the *Finance Bulletin* for years prior to 1961-62. The results of the 1967-68 survey of government and semi-governmental superannuation schemes were published in September 1969 in a mimeographed bulletin. The monthly bulletin of *Life Insurance Statistics* contains some information on the superannuation business of life insurance offices.

In the years 1956-57 to 1958-59, 1963-64 and 1964-65 information was collected from a small number of selected larger funds, and for the years 1955-56 and 1960-61 to 1962-63 the returns for the selected pension schemes were extracted from the sample surveys and tabulated in respect only of the business of their separately constituted funds. In order to improve the coverage of the surveys of selected pension funds, a larger number of funds were surveyed in 1964-65 than in previous surveys of selected funds. The results of the 1964-65 survey were published in September 1966 in a mimeographed bulletin.

Further surveys, relating to the same funds that were included in the 1964-65 survey of selected private pension funds, were made in respect of 1965-66, 1966-67, 1967-68 and 1968-69. The results of the 1968-69 survey are shown below, together with details of the 1964-65, 1965-66, 1966-67 and 1967-68 surveys for comparison. The separately constituted private pension funds included in the 1964-65 survey accounted in 1962-63 for about 72 per cent of the total contributions, 71 per cent of the income, 68 per cent of the expenditure, and 77 per cent of the assets of all the funds covered by the 1962-63 sample survey.

Since the *Survey of Selected Private Pension Funds* for 1968-69 was not a representative sample, it is not known to what extent their share of the whole field has changed since the 1962-63 survey; nor is the pattern of income, expenditure and asset distribution of the large funds included in this survey necessarily representative of the whole field.

(a) Book values at balance dates.

(b) Includes loans to authorised dealers in the short-term money market and loans to building societies.

## FINANCE COMPANIES

Information relating to the lending operations of finance companies in Australia is given in the following tables. A comprehensive account of the scope of these statistics and fuller details of the transactions of finance companies, together with definitions of the various categories of finance agreements and of the items of data given in the tables, are provided in the bulletin *Finance Companies*, 1969 and in the monthly statements *Finance Companies*. For the purpose of these statistics, finance companies are defined as companies which are engaged mainly in providing to the general public (businesses as well as persons in their private capacity) credit facilities of the following types: hire purchase and other instalment credit for retail sales, wholesale hire purchase, other consumer and commercial loans, and factoring. The finance companies covered in these statistics, insofar as they provide instalment credit for retail sales, are also included in the statistics of Instalment Credit for Retail Sales (see pages 522-4).

In general, companies which are engaged both in financing activities and other activities come within the scope of these statistics, provided that the major portion of their assets consists of financial assets of the types listed above and or a major proportion of their income is derived from such assets. Companies are excluded if the major proportion of their balances outstanding consists of agreements written for the purpose of financing their own sales. Companies which are engaged mainly in financing, in any way, the operations of related companies ('related' as defined in the Companies Act) are also excluded from these statistics, as are unincorporated finance companies. Also excluded are the following classes of financial and quasi-financial institutions: banks; life insurance companies; fire, marine, and general insurance companies; short-term money market dealers; pastoral finance companies; investment companies; unit trusts; land trusts; mutual funds and management companies for the foregoing trusts and funds; pension and superannuation funds; building and friendly societies; credit unions.

### INSTALMENT CREDIT FOR RETAIL SALES

Information relating to instalment credit for retail sales in Australia is given in the following tables. More detailed information may be found in the annual bulletin *Insurance and Other Private Finance* and in the monthly and quarterly statements relating to instalment credit for retail sales issued by this Bureau (*see* beginning of chapter).

The statistics cover operations of all types of instalment credit schemes which relate primarily to the financing of retail sales of goods, whether the credit is advanced by a retail business or by a non-retail finance business. In general, the term 'instalment credit' is defined as relating to schemes in which repayment is made by regular pre-determined instalments. Types of schemes covered include hire purchase, time payment, budget account, and personal loan schemes which relate primarily to the financing of retail sales of goods. In these statistics the term 'retail sales' relates not only to retail sales by retail establishments coming within the scope of the Censuses of Retail Establishments conducted periodically by this Bureau, but includes also other sales of goods to final purchasers (e.g. plant and machinery).

Figures for amounts financed *exclude* interest, hiring charges, insurance, etc. Figures for balances outstanding and collections *include* interest, hiring charges, insurance, etc. Details are not available of these charges or of other items (e.g. rebates allowed for early payments, late payment charges, bad debts written off) which affect the reconciliation of the three main instalment credit series—amount financed, collections, and balances outstanding.

Statistics of amounts financed are classified by type of goods, defined as follows: *motor vehicles* (new and used separately)—motor cars and motor cycles, commercial vehicles, tractors, caravans, trailers, motor parts and accessories, etc.; *plant and machinery*—farm machinery and implements, earth-moving equipment, aircraft, industrial plant and machinery, business machines and equipment (including commercial refrigeration equipment), etc.; *household and personal goods*—furniture, furnishings and floor coverings, domestic refrigerators, electrical goods, radios, television, musical instruments, bicycles, motor mowers, clothing, etc.

(a) Compiled from returns supplied to the Reserve Bank by major pastoral finance companies. (b) Excludes Commonwealth Government securities.

## RURAL DEBT

Major sources of credit for rural purposes include banks, Commonwealth and State government financial agencies, pastoral finance companies, and life insurance companies. The following table shows the estimated rural debt to these lenders.

## ESTIMATED RURAL DEBT TO SPECIFIED LENDERS, 30 JUNE 1965 TO 1969

(Source: Reserve Bank of Australia)

(\$ million)

Lender	30 June—				
	1965	1966	1967	1968	1969
Major trading banks . . . . .	584	650	751	918	939
Ex-service settlement . . . . .	104	99	92	88	83
Other government, including State banks and State savings banks . . . . .	218	245	274	315	335
Pastoral finance companies . . . . .	259	250	285	314	338
Commonwealth Development Bank . . . . .	72	92	120	143	162
Life insurance companies . . . . .	65	75	81	97	115
<b>Total . . . . .</b>	<b>1,302</b>	<b>1,411</b>	<b>1,603</b>	<b>1,875</b>	<b>1,972</b>

In addition, credit is supplied to the rural sector by finance companies, merchants, co-operative producer organisations, and by private lenders and investors, the most noteworthy of these last-mentioned sources involving family arrangements and property vendors. No data are currently available on the extent of the outstanding debt by the rural sector to these sources.

## NEW CAPITAL RAISINGS BY COMPANIES IN AUSTRALIA

Information relating to capital raised by companies in Australia is given in the following tables. More detailed information may be found in the annual bulletin *Insurance and Other Private Finance* and in quarterly bulletins dealing with capital raisings (see beginning of chapter).

The statistics (the collection of which commenced in July 1954) relate to capital raised by companies through issues of shares, and in the case of companies listed on stock exchanges, through the issue of debentures, notes and similar securities and the acceptance of deposits, and in the case of unlisted companies, by way of loans secured over the entire assets of the company. Capital obtained by way of bank overdraft or bank loans, trade credit, temporary advances, and loans secured over part only of the assets of the company is not included. Totally unsecured loans are included in the case of listed companies, but are excluded in the case of unlisted companies.

Separate statistics are given for listed and unlisted companies. Listed companies are companies incorporated in Australia or the Australian territories and listed on one or more of the Australian stock exchanges. All other companies incorporated in Australia, including subsidiaries of listed companies, are classified as unlisted companies. Companies incorporated overseas, whether listed on an Australian stock exchange or not, are excluded from the statistics of share issues. However, subsidiaries of overseas companies, if incorporated in Australia, are included in the statistics of share issues. The statistics of new capital raised through issues of debentures, notes, etc., and the acceptance of deposits, include, in addition to capital raised by companies incorporated in Australia (including subsidiaries of overseas companies), capital raised in this way from Australian sources by overseas public companies through their Australian offices. Where an issue is made at the same time on Australian and overseas markets, that part of the issue which is taken up through overseas brokers is excluded.

The following are explanatory notes relating to some of the items shown in the tables.

*New money.* This is the net amount of cash transferred from the investing public to the companies. For this purpose the 'investing public' includes banks and life insurance companies (except when subscribing to issues by associated companies) and government and private superannuation funds, but excludes other government agencies. Subscriptions by associated companies, whether local or overseas, are excluded. In the tables which follow the amount of new money is obtained by deducting from the total cash raised the 'amount not involving new money'.

*Amount not involving new money.* This amount includes cash subscriptions received by issuing companies from associated companies. Such subscriptions represent inter-company transfers only, and do not involve a receipt of funds from the 'investing public'. Also included are amounts which, although subscribed by the 'investing public' (i.e. subscribers other than 'associated companies'), are not retained by the issuing company or its associates, but are used to redeem shares, debentures or unsecured notes, etc., or are used to purchase from individuals existing shares, debentures, etc., in other companies, including existing shares, etc., in associated and subsidiary companies. The funds used in this way are thus returned to another section of the 'investing public' and do not represent a *net* transfer of cash from the 'investing public' to the companies. (Besides these purchases of existing shares, etc., from individuals, purchases of existing shares, etc., from companies other than associates of the issuing company might also be included in this item, but the amounts involved are small and separate details have not been collected.)

**LISTED COMPANIES(a): NEW CAPITAL RAISED THROUGH ISSUES OF SHARES

(a) Includes preference shares. (b) Excludes deposits accepted by banks, insurance companies, pastoral companies and building societies, and loans to authorised dealers in the short-term money market. (c) Includes only loans which are secured by charges over the companies' entire assets. (d) Excess of repayments over receipts of new money. (e) Small share issues of less than \$2,000 for which returns have not been collected have not been included in the industrial classification but are included in All industries.

### SHORT-TERM MONEY MARKET

For some years prior to 1959 leading stockbrokers had been actively engaged in the acceptance of short-term funds against the security of government securities, but their operations were limited by the absence of suitable short-term securities and their liquidity requirements. In February 1959 the Commonwealth Bank (now the Reserve Bank) gave official status to the market by announcing that under certain conditions it would act as lender of last resort to authorised dealers in the short-term money market.

The form of organisation consists of nine companies whose functions are:

- (i) to accept loans overnight, at call or for fixed periods, in minimum amounts of \$50,000 and to invest these funds in money market securities.
- (ii) to engage as traders in the buying and selling of money market securities.

The types of securities that may be used as money market securities are subject to the approval of the Reserve Bank. At present they comprise Commonwealth Government securities maturing within five years, commercial bills of any maturity that have been accepted or endorsed by a trading bank, bank's certificates of deposit maturing within five years, and non-bank commercial bills maturing within 180 days.

Dealers are required to have a minimum paid up capital of \$400,000 and there is a limit on the maximum ratio of loans to shareholders' funds. Dealers are required to lodge with the Reserve Bank 'margins' in the form of money market securities as general backing for their operations. These 'margins' are minimum proportions, at market values, of a dealer's holdings of money market securities. In April 1969 the Reserve Bank announced that the requirement to lodge 'margins' would be withdrawn from a date to be announced.

Under the lender of last resort arrangements dealers may borrow from the Reserve Bank for a minimum of seven days and at a high rate of interest against the lodgment of Commonwealth Government securities.

## FRIENDLY SOCIETIES AND CO-OPERATIVE SOCIETIES

## Friendly societies

In 1968 the total membership of friendly societies in Australia was about 431,000, but as certain benefits such as medical attendance and free medicines, and in many cases funeral expenses, are granted to members' families as well as to members themselves, this figure must be more than doubled to arrive at an estimate of the number of persons who receive some direct benefit from these societies, even when due allowances are made for young and unmarried members. Legislation has conferred certain privileges on friendly societies, but, on the other hand, it insists on their registration, and it is the duty of the Registrars in the various States, prior to registering a new society, to see that its proposed rules conform to the law, and that the scale of contribution is sufficient to provide the promised benefits. Societies are obliged to forward to the Registrar annual returns about their membership and their finances, and reports dealing with the returns received are published in most of the States.

(a) Excludes juvenile branches, dispensaries, medical institutes, and certain miscellaneous societies. Receipts and payments of subsidy under the Commonwealth medical and hospital benefit schemes are excluded. (b) Includes the Australian Capital Territory. (c) Year 1968.

## Co-operative societies

Co-operative societies are divided into three classes: (i) those engaged in the manufacture and marketing of primary products and trade requirements; (ii) those engaged in retailing general household requirements; and (iii) those engaged in activities covered by both classes (i) and (ii). The first class may be described briefly as producers' co-operative societies and the second as consumers' co-operative societies. The particulars given for New South Wales relate to societies registered under the Co-operation Act, 1923-1967. A summary of the business of all co-operative societies for the year 1967-68 for all States is given in the following table. Separate particulars for each of the three types of co-operative societies are given in the annual bulletin *Insurance and Other Private Finance*, and issue No. 6, 1967-68 contains details for 1966-67.

**LOTTERIES AND BETTING**

**Lotteries**

State Governments operate lotteries in New South Wales, Queensland, South Australia, and Western Australia. The Lotteries Commission of South Australia commenced operations on 15 May 1967. Tattersall Sweep Consultations are operated under government licence in Victoria and also sell tickets under government licence in Tasmania and New Zealand. The statistics of sales of tickets and prizes for Victoria include sales and allotments of prizes in Tasmania and New Zealand by Tattersall Sweep Consultations, Victoria. Tasmanian Lotteries were operated under government licence until 30 September 1961, when they surrendered their licence. In general, revenue derived by the State Governments from these lotteries is used directly or indirectly to provide funds for expenditure on hospitals, charities, etc. For information as to the origin, purpose and method of payment of proceeds or taxes to State revenues *see* Year Book No. 46, page 808 and earlier issues.

(a) Total estates of deceased persons assessed for death duty. (b) Net value includes duty-free bequests of \$1,028,000. (c) Estates dealt with by the Taxation Department.

## CHAPTER 18

### PUBLIC FINANCE

The subject of public finance is dealt with in this chapter under the two major divisions of Commonwealth Finance and State Finance. The close financial relations between the Commonwealth and States, however, particularly since the Financial Agreement has been in operation, demand also a combination of these two divisions under the heading of Commonwealth and State Finance. Under the Financial Agreement the Commonwealth assumed the liability to bondholders for the States' securities existing at the date of the Agreement and now arranges for all borrowings for and on behalf of the Commonwealth or any State and for all conversions, renewals, redemptions and consolidations of such securities. In view of this it is convenient to deal with the Commonwealth and State Government securities on issue in a separate division of this chapter (pages 576–82). The subject of income taxes is also dealt with in a separate division at the end of this chapter (pages 586–95).

For further detailed information on the subjects covered by this chapter see the annual bulletins published by this Bureau: *Australian National Accounts*; *National Income and Expenditure*; *Commonwealth Finance*; *State, Territory and Local Government Authorities' Finance and Government Securities*; and *Commonwealth Taxation Assessments*. Current information in summarised form is contained in the *Quarterly Summary of Australian Statistics*, the *Monthly Review of Business Statistics*, and the *Digest of Current Economic Statistics*. A mimeographed bulletin *Commonwealth, State and Territory Taxation Collections* is issued annually as soon as possible after the relevant information has been assembled.

### COMMONWEALTH FINANCE

#### Financial provisions of the Constitution

The main provisions of the Constitution relating to the initiation and development of the financial system of the Commonwealth are contained in Sections 81 to 105A of the Commonwealth Constitution (see pages 16–19 of this Year Book). Two other sections which have a most important bearing on questions of Commonwealth finance are sections 69 and 51.

Section 69 provides for the transfer from the States to the Commonwealth of certain specified departments, and Section 51, in outlining the powers of the Commonwealth Parliament, implies the transfer or creation of other departments. Sections 87 and 96 deal with the financial relations between the Commonwealth and the States. These matters have been treated in previous issues of the Year Book, and on pages 548–54 of this issue a summary is given of the present provisions for Commonwealth financial assistance to the States.

The *Audit Act* 1901–1969 lays down the procedure which must be followed in accounting for the receipt and disbursement of public funds. The general administration of Commonwealth finances is the responsibility of the Treasurer of the Commonwealth.

#### Commonwealth Budget

The Commonwealth Budget results include transactions of the Consolidated Revenue Fund, the Trust Fund and the Loan Fund. Ordinary revenues from taxation and other sources are paid into the Consolidated Revenue Fund, from which the main expenditures are for defence, war and repatriation services, social services, payments to the States and administration. The Trust Fund covers special transactions outside the ordinary operations of departmental expenditures, such as pension funds and moneys held for expenditure by the Commonwealth at some future time. The Loan Fund receives its funds from the sale of Commonwealth securities, and expenditures from the Fund are made in accordance with the purpose of issue of each loan. The main disbursements from the Loan Fund are to the States, either by way of distribution of the proceeds of loans raised by the Commonwealth

on their behalf or in accordance with the provisions of the Commonwealth and State Housing Agreements, and the remaining disbursements are for Commonwealth purposes such as defence or war service land settlement.

#### Summary of receipts and expenditure

A summary of Commonwealth Budget results for 1968-69 and the four preceding years is given in the table which follows. The transactions are recorded on a cash basis.

#### COMMONWEALTH BUDGET: SUMMARY OF TRANSACTIONS 1964-65 TO 1968-69 (\$ million)

	1964-65	1965-66	1966-67	1967-68	1968-69
Expenditure(a)	4,448	4,969	5,525	6,099	6,514
Receipts(a)	4,266	4,714	4,973	5,456	6,129
Deficit	183	255	552	642	385
Financing—					
United States Defence Credit (net)	..	..	91	118	55
Other overseas borrowings	-14	-23	-62	14	88
Issue of securities in Australia—					
Net loan proceeds(b)	252	298	408	297	381
Net change in Treasury notes on issue	-72	36	-26	184	-68
Borrowings from the Reserve Bank	38	-36	165	51	-127
Total securities issued in Australia	218	298	546	532	186
Funds provided for International Monetary Fund drawings of Australian currency	-22	-40	-27	-59	-5
Use of Cash Balances	-4	..	-1	..	..
Other financing transactions in Australia(c)	4	21	5	37	62
Deficit	183	255	552	642	385

(a) Comparisons between the figures for the years 1966-67 to 1968-69 and those for 1964-65 and 1965-66 are affected by accounting changes. (b) Includes State domestic raisings. (c) Includes funds obtained from coinage and bullion transactions, amounts borrowed by Commonwealth trust accounts, net amounts available from Commonwealth trust account transactions in Commonwealth Government securities, amounts available from moneys held in trust, etc.

Minus sign (-) denotes decrease.

#### All Commonwealth funds: summary of receipts and expenditure

The following table represents a reclassification of Commonwealth Government receipts and outlay in a National Accounts form. It includes the Commonwealth Government components (with slight re-arrangement) of tables 57 and 60 in *Australian National Accounts, National Income and Expenditure 1968-69*. However, an important conceptual difference in this table is that no adjustment is made for the difference between deliveries of, and payments for, major items of defence equipment from overseas. Advances to semi-governmental authorities are included in 'Other advances'. The table differs from that shown in Statement No. 6 attached to the Budget Speech in that the transactions of the post office are included on a commercial basis, whilst borrowing and the corresponding advances in respect of State works programmes are excluded. The treatment of certain other advances and repayments also varies slightly in this table. They are all classified on the outlay side whereas in the Budget table some are included in the deficit.

ALL COMMONWEALTH FUNDS: RECEIPTS AND EXPENDITURE, 1964-65 TO 1968-69  
(\$ million)

**Main components of all Commonwealth funds expenditure**

The tables on pages 543-51 supply details of some of the main components of total expenditure of the Commonwealth Government.

**Net expenditure on goods and services**

The following table classifies by function net expenditures on goods and services derivable from the table on page 539 together with identified final expenditures on goods and services included in that table under 'grants to semi-government authorities'. It includes the Commonwealth Government component of Tables 66 and 75 in the Australian National Accounts together with net expenditure on stocks.

## Subsidies

The following table shows details of Commonwealth expenditure from all funds on subsidies and bounties for the years 1964-65 to 1968-69. Other assistance to primary producers is included in, for example, tables relating to cash benefits and payments to the States and additional information is given in chapter 23, Rural Industry. Details of price stabilisation subsidies and of various forms of assistance to primary producers for earlier years are given on pages 414 and 1014-15, respectively, of Year Book No. 38.

### Payments to or for the States

An outline of the provisions of the Constitution providing for the Commonwealth to make payments to the States, and of the systems which followed, is given in earlier issues of the Year Book (see No. 37, pages 633 to 638). In the following summary tables, a distinction is made between (a) direct Commonwealth financial assistance to the States in the form of grants to provide revenue for general and specific purposes and (b) those forms of assistance for developmental and other specific purposes which include, in part or in total, payments made in the form of repayable advances. Some information about the more important or most recent of these forms of financial assistance is given on pages 551-4, but for greater detail on these and other forms of financial assistance see earlier issues. Further information is available also in the chapters of this issue dealing with the respective subjects.

*Grants.* The following three tables show particulars of the amounts paid to the States as grants for the purposes referred to in (a) above.

Minus sign (-) denotes excess of repayments.

Further information concerning items included in the functional classifications of the two preceding tables is given in the annual bulletin *Commonwealth Finance* 1968-69.

*The Financial Assistance Grants.* Under the provisions of the *States Grants Act* 1965-1968, the financial assistance grant paid to each State is determined by increasing the grant paid to that State for previous financial year (with the addition of \$2,000,000 to the grant paid to Queensland in each year up to 1969-70) in accordance with a formula using the percentage change of the population of the State during the year ending 31 December of the year of payment, the percentage increase in average wages for Australia as a whole for the year ended 31 March of the year of payment, and a betterment factor of 1.2 per cent. Western Australia's withdrawal from the 'special grants' system as from 1968-69 did not affect existing formula grants arrangements as, in 1968-69 and 1969-70, additional Commonwealth payments of \$15,500,000 were made to that State.

*Contributions under Financial Agreement.* Details of the Financial Agreement between the Commonwealth and the States are given in Year Book No. 37, pages 685-90. Under this Agreement the Commonwealth undertook to contribute \$15,169,824 per annum towards interest payable on the State loan securities for a period of 58 years from 1 July 1927. This amount is distributed among the States as follows: New South Wales, \$5,834,822; Victoria, \$4,254,318; Queensland, \$2,192,470; South Australia, \$1,407,632; Western Australia, \$946,864; Tasmania, \$533,718. In addition, under the Financial Agreement the Commonwealth agreed to make certain contributions to the National Debt Sinking Fund for redemption of State loan securities. Details of these are given on page 585 of this chapter.

*Special grants.* The Commonwealth Grants Commission inquires into and reports upon claims made by any State for a special grant and any matters relevant thereto. The recommendations of the Commission in respect of the years 1965-66 to 1969-70 for Tasmania, and in respect of Western Australia for the years 1965-66 to 1968-69, are shown in their two parts in the following table. One part is the Commission's estimate of the indispensable need of the claimant State for the year in which the payment is to be made after allowing a sufficient margin for safety. The other part is an adjustment of this estimate for an earlier year after an examination of the audited accounts for that year. Thus the grants for 1969-70 include an estimate of the indispensable need of the claimant State for 1969-70 and an adjustment to the estimated grant for 1967-68.

(a) Adjustment to estimated grant paid two years previously.

*Natural disasters.* Under the States Grants (Drought Assistance) Acts, New South Wales, Victoria, Queensland, South Australia and Tasmania have been given Commonwealth financial assistance to relieve the effects of drought. In addition, the Commonwealth is assisting States to meet budgetary problems arising from the effects of drought on their revenues.

The Commonwealth has provided financial assistance to Tasmania for the rehabilitation and restoration of damage caused by bushfires in February 1967 and to Western Australia for earthquake relief in the Meckering area of that State following the disaster in October 1968. Bushfire relief grants of \$100,000 to New South Wales and of \$200,000 to Victoria were made in 1968-69 and 1969-70 respectively.

The *Commonwealth Aid Roads Act* 1969 provided for principal and supplementary grants totalling \$1,252,050,000 to be paid to the States over the five-year period commencing on 1 July 1969. Supplementary grants totalling \$52,050,000 are to be made to South Australia, Western Australia and Tasmania to assist in the transition from arrangements under the 1964 Act and the principal grant of \$1,200,000,000 is to be allocated specifically as follows: Urban-arterial and sub-arterial roads \$600,690,000; Rural-arterial roads \$186,760,000 and other rural roads \$394,550,000 and planning and research \$18,000,000. Total grants of \$1,252,050,000 payable in the five-year period from 1969-70 to 1973-74 are to be allocated on the following basis: New South Wales \$380,400,000; Victoria, \$254,400,000; Queensland, \$231,600,000; South Australia, \$129,000,000; Western Australia, \$200,400,000 and Tasmania \$56,250,000. For details of previous legislation see earlier yearbooks.

*Beef cattle roads.* The *States Grants (Beef Cattle Roads) Act* 1968 provided for grants of \$39,500,000, \$9,500,000, and \$1,000,000 for Queensland, Western Australia, and South Australia respectively for a further programme of beef cattle road construction over a period of seven years commencing from 1 July 1967.

*Health reimbursement under Tuberculosis Act 1948.* The *Tuberculosis Act 1948* provided for the reimbursement by the Commonwealth of capital and maintenance expenditure incurred by the States in the provision of facilities for the diagnosis, treatment and control of tuberculosis.

The *States Grants (Mental Health Institutions) Act 1964-1967* authorised assistance to the States amounting to one-third of their total expenditure on building and equipping approved mental health institutions during the six years ending 30 June 1970.

### *Education*

Payments to the States for universities were first introduced in 1951-52, and details of the States Grants (Universities) Acts under which they were continued are given in earlier issues of the Year Book (see No. 51 page 923 and No. 52 page 770). The *Universities (Financial Assistance) Act 1966-1968* authorised grants totalling approximately \$182,500,000 for the Commonwealth share of the agreed programme of development of State Universities for the years 1967 to 1969. (See also Chapter 20, Education, Cultural Activities, and Research.)

*Colleges of Advanced Education.* Under the States Grants (Advanced Education) Acts, the Commonwealth is providing financial assistance to the States for recurrent and capital expenditures of Colleges of Advanced Education.

The *States Grants (Science Laboratories) Act 1968* extended for the three years ending 30 June 1971 the operation of the scheme outlined in Official Year Book No. 54 page 745. A total payment of \$37.7m is provided for and not more than one-third may be authorised for payment before 30 June 1969 and two-thirds before 30 June 1970.

Grants for buildings and equipment for use in technical training in schools and colleges conducted by States only are provided for under the *States Grants (Science Laboratories and Technical Training) Act 1964* and the *States Grants (Technical Training) Act 1965-1966*.

Under the *States Grants (Teachers Colleges) Act 1967* the Commonwealth provided for a maximum 1967-1969 triennium \$9,000,000 to support selected research projects.

Under the *States Grants (Teachers College) Act 1967* the Commonwealth provided for a maximum amount of \$24,000,000 over the three years ending 30 June 1970 for the construction and equipping of teachers colleges.

Under the *States Grants (Secondary School Libraries) Act 1968* grants totalling \$27m are to be made to the States over the three years commencing 1 January 1969 to finance buildings and associated capital facilities for libraries in government and non-government secondary schools.

The *States Grants (Pre-school Teachers Colleges) Act 1968* provided for capital grants totalling \$2.5m over the three financial years commencing 1968-69 for the purpose of increasing the physical capacity of approved pre-school teachers colleges.

### *Railway projects*

The *Railway Agreement (New South Wales) Act 1968* provided for a contribution of \$10m towards the cost of improving the existing railway from Parkes to Broken Hill as a work necessary to provide a uniform gauge railway across Australia.

*Other railway projects.* The Commonwealth is also continuing to provide financial assistance to South Australia and Western Australia under its railway standardisation agreements with those two States.

### *Water resources*

*Investigation and measurement of water resources.* The *States Grants (Water Resources Measurement) Act 1967* authorised payments to the States of up to \$4,500,000 during the three years ending 30 June 1970 to assist State programmes of water measurement and investigation of underground water resources.

*Chowilla and Dartmouth Reservoirs.* Investigations into and considerations of the feasibility and cost of alternative storage and hydro-electric facilities are being continued by contracting Governments under the River Murray Waters Agreement.

*Fairbairn Dam.* The *Queensland Grant (Maraboon Dam) Act 1968* provided for grants to Queensland of up to \$20,000,000 for the construction of a dam on the Nogoia River near Emerald.

*Copeton Dam.* Commonwealth grants up to \$20,000,000 will be made to New South Wales under the *New South Wales Grant (Gwydir River Dam) Act 1969* for the construction of a dam on the Gwydir River near Copeton.

*King River Dam.* Under the *Victoria Grant (King River Dam) Act* 1969 the Commonwealth is providing grants of up to \$4,000,000 to Victoria for the construction of a dam on the King River south of Cheshunt.

*Tailem Bend to Keith Pipeline.* The construction of a pipeline and certain associated works to carry water from Tailem Bend to Keith in South Australia is being assisted financially by provision of grants up to \$6,000,000 under the *South Australia Grant (Tailem Bend to Keith Pipeline) Act* 1969.

*Ord River Irrigation Project.* The *Western Australia (Ord River Irrigation) Act* 1968 provided for financial assistance to Western Australia on the basis of grants for dam construction and interest-bearing loans in respect of the irrigation works.

*River Murray Salinity reduction.* The *Victoria Grant (River Murray Salinity) Act* 1968 provides for grants to Victoria of up to \$3,600,000 for two salinity reduction projects on the River Murray.

*Flood mitigation, New South Wales.* Commonwealth payments under the *New South Wales Grant (Flood Mitigation) Act* 1964–1968 are limited to \$8,000,000 in respect of flood mitigation works on the Macleay, Clarence, Richmond, Tweed, Shoalhaven, and Hunter Rivers. The Commonwealth grants will match State expenditure which, in turn, will be in a prescribed ratio to local authority expenditure on flood mitigation works.

*Blowering Reservoir, New South Wales.* The Blowering Reservoir was constructed at the expense of the State of New South Wales mainly by the Snowy Mountains Hydro-electric Authority, and the Commonwealth is financing half the cost in the form of repayable interest-bearing loans to that State.

Under the *Western Australia (South-west Region Water Supplies) Agreement Act* 1965, the Commonwealth is providing financial assistance of up to \$10,500,000 by way of interest-bearing loans to Western Australia to accelerate works undertaken by the State to extend the comprehensive water supply scheme in the south-west portion of the state.

#### *Other specific purpose payments*

*Brigalow lands.* Under the Brigalow Lands Agreement Acts Commonwealth advances to the State of Queensland for specified works associated with the production of beef cattle and other primary products in the Fitzroy River Basin and the supply of beef for export were fixed at an overall limit of \$23,000,000. Repayments over a twenty-year period commenced in 1968 in respect of advances made prior to 1 July 1967 and in 1971 in respect of advances made after 1 July 1967.

*Development of Exmouth township, Western Australia.* The Commonwealth has assisted the Western Australian Government in financing the cost of developing a township at Exmouth in connection with the United States Naval Communications Station established at North West Cape.

*Weipa development, Queensland.* Under the *Weipa Development Agreement Act* 1965 the Commonwealth provided financial assistance of \$3,270,000 during 1965–66 and 1966–67 to Queensland by way of interest-bearing advances to finance harbour works carried out at Weipa on Cape York Peninsula.

*Natural gas pipeline, South Australia.* Under the *Natural Gas Pipeline (South Australia) Agreement Act* 1967 the Commonwealth is providing a maximum of \$15,000,000 by way of interest-bearing loans to help finance the construction of a pipeline to transport gas from natural gas fields at Gidgealpa and Moomba.

*Softwood forestry.* The *Softwood Forestry Agreement Act* 1967 authorised the Commonwealth to provide assistance during the five years ending 30 June 1971 for increased planting of softwood forests. Total assistance of the order of \$20,000,000 is in the form of interest-bearing loans repayable over twenty-five years.

The *Tasmania Agreement (Hydro-Electric Power Development) Act* 1968 provided for interest-bearing loans with an overall limit of \$47m to Tasmania for the financing of a five-year programme of accelerated hydro-electric development based on the commencement of development of the Gordon River area in the south west of the State.

*Aboriginal Advancement.* The *States Grants (Aboriginal Advancement) Act* 1968 provided for the payment to the States of grants totalling \$3,650,000 in 1968–69 and \$5 320,000 in 1969–70 for Aboriginal advancement particularly in the fields of housing, education and health. A loan of \$350,000 is to assist in the development of an irrigation project at Bamaga in the far north of Cape York for the benefit of the Aborigines living in the area.

*Home care programme and nursing homes.* Information on the range of services which are provided mainly for aged persons and which are financed by the Commonwealth in association with the States is given in the chapters on Welfare Services and Public Health.

## All Commonwealth funds: receipts

## Commonwealth taxation

Taxation constitutes the main sources of Commonwealth revenue, accounting for 87.7 per cent in 1968-69. The following tables on pages 555-7 show details of taxation receipts from each source during the years 1964-65 to 1968-69 and summarised information on their proportions of the totals. For detailed information on taxes on income *See* separate section at end of this chapter, pages 586-95.

In addition to these details of collections of customs and excise duties, further information is given in Chapter 11, Overseas Transactions.

#### Primary production taxes and charges

The following section shows current rates of charges, and receipts from, primary production and other charges during the years 1964-65 to 1968-69. Further information relating to primary production charges is given in Chapter 23, Rural Industry.

*Wool tax.* The present rate of wool tax is 1 per cent of the sale value of the wool and this rate has operated since 1 August 1970.

*Wheat export charge and wheat tax.* The *Wheat Export Charge Act* 1968 provided for an export charge on wheat and wheat products for the seasons 1968-69 to 1972-73 inclusive. The charge which may be levied is the excess of the export price over the sum of the guaranteed price and five cents per bushel, the maximum charge being 15 cents per bushel. Under the *Wheat Industry Stabilization Act* 1968, to which the *Wheat Export Charge Act* is complementary, the Commonwealth Government guaranteed a return to wheatgrowers of 145 cents per bushel for the 1968-69 Pool and 145.9 cents for the 1969-70 Pool for fair average quality bulk wheat, free on board vessel, on up to 200 million bushels of wheat harvested each season exported from Australia. Collections from the wheat export charge are paid into the Wheat Prices Stabilization Fund, out of which payments are made to the Australian Wheat Board, when required, for the purpose of building up the average export price for any season to the guaranteed price in respect of exports up to 200 million bushels. When the fund is exhausted (as it was at 30 June 1968) payments will be made as necessary from the Consolidated Revenue Fund. As the return from exports has been below the guaranteed price, there have been no collections of the wheat export charge since the 1956-57 (No. 20) Pool, when \$3,178,000 was collected. The *Wheat Tax Act* 1957-1966 imposes a tax of three-tenths of a penny (0.25 cents) for each bushel of wheat delivered to the Wheat Board on or after 1 October 1965. (See also Chapter 23, Rural Industry.)

*Miscellaneous export charges.* These consist of charges levied on exports of apples and pears (*Apple and Pear Export Charges Act 1938–1968*), canned fruits (*Canned Fruits Export Charges Act 1926–1966*), dried fruits (*Dried Fruits Export Charges Act 1924–1965*), and eggs (*Eggs Export Charges Act 1947–1965*).

*Stevedoring Industry Charge.* The rates in operation since 27 November 1967 have been as follows:

Class of Waterside Worker		Rate
		\$
A	.. ..	16.85 per man-week
B	.. ..	0.80 per man-hour
C	.. ..	0.55 per man-hour

Class A waterside workers are regular waterside workers on weekly hire in permanent and non-permanent continuous ports. Class B are regular casual workers in non-permanent continuous ports and Class C are regular casual workers in non-continuous and seasonal ports and irregular workers in all ports.

*Tobacco charge.* The rates of tobacco charge currently in force are as follows:

(a) in respect of leaf sold to a manufacturer:

(i) one half cent per pound of leaf, payable by the grower or other persons who own the leaf immediately before sale, and

(ii) one cent per pound of leaf, payable by the manufacturer;

(b) in respect of leaf grown and used by grower-manufacturers:

(i) where the manufacturer grows nine-tenths of the leaf used by him—one half cent per pound of leaf.

(ii) in other cases—one cent per pound of leaf.

(See also the chapter, Rural Industry.)

*Dairy produce and butterfat levies.* The *Butter Fat Levy Act 1965–1966*, and the *Dairy Produce Export Charge Act 1924–1962* provide for a maximum rate of \$0.60 per hundredweight of butterfat content of specified dairy produce and for the apportionment of the proceeds between overseas marketing (40 per cent), local promotion (40 per cent), and research (20 per cent). (See also Chapter 23, Rural Industry).

*Canning-fruit charge.* The present rate of canning-fruit charge is \$0.75 per ton of fruit. This rate has operated since 1 December 1964.

*Honey levy.* The current rate of levy on honey sold for domestic consumption in Australia is four-tenths of a cent per pound.

*Livestock slaughter levy.* The present operative rate of levy for cattle is 33 cents per head of which 20 cents is for beef research, 1 cent for research into the meat processing industry and 12 cents to finance the operations of the Australian Meat Board. For sheep and lambs the levy is 3.1 cents per head and the components are 1.75 cents for sheep meat research, 0.1 cents for research into the meat processing industry and 1.25 cents for the Australian Meat Board.

*Dried Vine Fruits Contributory Charge.* This charge was discontinued after it was levied in respect of 1968 season fruits.

*Poultry industry levy.* The rates of levy for each hen kept for commercial purposes (the first twenty hens being exempt) were 4.0 cents per fortnight from 1 July 1969 to 9 June 1970, 2.0 cents per fortnight from 10 June 1970 to 30 June 1970 and 4.0 cents per fortnight from 1 July 1970.

*Meat chicken levy.* The rate of levy is 10 cents per hundred meat chickens hatched, payable by any hatchery with 20,000 chickens or more.

**Other Commonwealth taxation**

Taxes other than customs and excise duties, the various export charges and some taxes on particular commodities are assessed and collected by the Commissioner of Taxation. The Commissioner's organisation comprises a head office in Canberra and an office in each State.

Details of the purposes and rates applicable to the main forms of Commonwealth taxation, excluding customs and excise, currently imposed and of current legislation are given in the following pages. Historical information is given in Year Book No. 51, pages 905-10, and in earlier issues. Taxes on income are treated separately on pages 586-95 and customs and excise duties are dealt with in Chapter 11, Overseas Transactions. For detailed statistics relating to Commonwealth income taxes, estate duty, gift duty, and sales tax see the annual bulletin *Commonwealth Taxation Assessments*.

*Sales tax.* The general rate of tax levied on all goods other than those specified in the schedules to the *Sales Tax (Exemptions and Classifications) Act* 1935-1968 was raised from 12½ per cent to 15 per cent from 14 August 1968 and goods subject to special rates are taxed at either 2½ per cent or 25 per cent.

Particulars of the net amount of sales tax payable and the sales of taxable and exempt goods in each State for 1968-69 are given in the following table. The figures relate to sales during the period 1 July to 30 June. The figures for sales tax payable differ from those for net collections shown on page 555 because the latter include some adjustments in respect of earlier tax years and relate to tax payable on returns lodged during the year, which in general cover sales for the period June to May.

Sales of taxable and exempt goods and sales tax payable for Australia are shown in the following table for the years 1964-65 to 1968-69.

**COMMONWEALTH SALES TAX AND AMOUNT OF SALES  
AUSTRALIA, 1964-65 TO 1968-69  
(\$ million)**

<i>Year of sale</i>	<i>Net sales on which sales tax was payable</i>	<i>Sales of exempt goods by registered persons</i>	<i>Total sales of taxable and exempt goods</i>	<i>Sales tax payable</i>
1964-65 . . . . .	2,589	6,819	9,408	365
1965-66 . . . . .	2,645	7,112	9,757	367
1966-67 . . . . .	2,838	7,802	10,640	386
1967-68 . . . . .	3,095	8,394	11,489	424
1968-69 . . . . .	3,367	8,933	12,300	498

In the foregoing tables sales include goods transferred to stock for sale by retail, goods imported by persons other than registered taxpayers, and goods used in the business of the taxpayer. Exempt sales relate to goods exempted from sales tax under the *Sales Tax (Exemptions and Classifications) Act 1935-1968*. The figures shown do not represent the total sales of all commodities, as vendors trading only in exempt goods are not required to be registered, and consequently the volume of their sales is not included in the statistics above. In addition, non-taxable sales (i.e. goods sold by one registered taxpayer to another registered taxpayer) are excluded.

*Pay-roll tax* came into operation on 2 May 1941 and provided for the imposition of a tax on wages accruing after 30 June 1941. The relevant laws are *Pay-roll Tax Assessment Act 1941-1969*, *Pay-roll Tax Act 1941-1966*, and *Pay-roll Tax Regulations*. From 1 September 1957 pay-roll tax of 2½ per cent (rate unchanged since its inception) was payable by employers on all wages and salaries in excess of \$400 a week or \$20,800 per annum. Collections of pay-roll tax amounted to \$184,416,000 in 1967-68 and \$205,568,000 in 1968-69.

The *Payroll Tax Assessment Act 1968* continues for five years until 30 June 1973, with some important modifications, the operation of the payroll tax rebate which was introduced in 1961 as an export incentive and which expired on 30 June 1968.

A rebate of payroll tax is available in certain circumstances to employers who increased the level of their annual export sales above their average annual export sales in a base period. For export sales up to 30 June 1968 the base period was the two years ended 30 June 1960. From 1 July 1968 the base period is represented by the first three years of the eight year period preceding the rebate

year. A special formula applies in the case of a new exporter by which a person who did not export in any of the three years ended on 30 June 1961 progressively reaches the same position as an established exporter. The rebate is equivalent to 10.5 per cent of the increase in exports for the rebate year over the average annual exports in the base period.

*Estate duty.* Under the *Estate Duty Assessment Act 1914-1967* estate duty is assessed on the net value of the estate less a statutory exemption determined in accordance with the following formula: (a) where the whole of the estate passes to the widow or widower, children (including adopted children, step-children and ex-nuptial children), or grand-children of the deceased, \$20,000 decreasing by \$2 for every \$8 by which the value exceeds \$20,000; (b) where no part of the estate passes to the widow or widower, children or grand-children, \$10,000 decreasing by \$2 for every \$8 by which the value exceeds \$10,000; and (c) where only part of the estate passes to the widow or widower, children or grand-children, an amount calculated proportionately under (a) and (b). Special exemptions are also allowed in respect of estates of defence personnel who die on active service or within three years of termination of their active service from injuries received or diseases contracted while on active service, and prescribed personal property held in Australia by certain United States personnel who are in Australia solely for purposes connected with projects of the United States Government. A rebate of duty may be allowable if the deceased was a beneficiary in an estate (upon which duty is payable or has been paid) of a person who predeceased him by not more than five years.

The rates of duty levied under the *Estate Duty Act 1914-1966* increase as the value of the estate for duty increases, as follows: does not exceed \$20,000, 3 per cent; \$20,001 to \$40,000, 3 per cent to 6 per cent; \$40,001 to \$240,000, 6 per cent to 26 per cent; \$240,001 to \$1,000,000, 26 per cent to 27.9 per cent; \$1,000,000 or more, 27.9 per cent.

Particulars of the number and value of estates and duty assessed, for each of the assessment years 1964-65 to 1968-69, are given in the following table.

## COMMONWEALTH ESTATE DUTY ASSESSMENTS, 1964-65 TO 1968-69

		1964-65	1965-66	1966-67	1967-68	1968-69

Average duty assessed per estate	\$	3,295	3,508	3,634	3,983	4,541

(a) Debts, Exempt Estate and State Probate Succession Duties.

*Gift duty.* The *Gift Duty Act 1941-1966* and the *Gift Duty Assessment Act 1941-1967* impose a gift duty on gifts which are defined as dispositions of property made otherwise than by will, without adequate consideration in money or money's worth. There is a liability on both the donor and the donee to furnish a return, and both are jointly and severally liable for payment of the duty. However, if a return is furnished by the donor, the donee is relieved of this obligation.

Certain exemptions from duty are provided, the more important being: payments to an employees' superannuation or like fund; retiring allowances or gratuities granted to employees; gifts to non-profit institutions or organisations; gifts to the Commonwealth or a State; and small gifts not exceeding \$100.

The rate of gift duty applicable to any particular gift is fixed by reference to the total value of all gifts made by the same donor within the period of eighteen months before and eighteen months after the time of making that gift. Where the total value of all gifts as defined does not exceed \$4,000 no duty is payable; The present rates of duty are (a) \$4,001 to \$20,000, 3 per cent provided that the gift duty payable shall not exceed one half of the amount by which the gift exceeds \$4,000 or a proportionate amount where more than one gift is involved; (b) \$20,001 to \$40,000, 3 per cent to 6 per cent; (c) \$40,001 to \$240,000, 6 per cent to 26 per cent; (d) \$240,001 to \$1,000,000 and over, 26 per cent to 27.9 per cent.

Particulars of the number of gift duty assessments, value of gifts as assessed and duty assessed for each of the assessment years 1964-65 to 1968-69 are given in the following table.

COMMONWEALTH GIFT DUTY ASSESSMENTS, 1964-65 TO 1968-69

Duty assessed . . . . "	6,870	5,911	7,633	8,701	9,501

*Australian Capital Territory Stamp Duty and Tax.*

*Stamp Duty and Tax* on a range of instruments and transactions connected with the Australian Capital Territory, including Jervis Bay, came into operation on 1 July 1969.

The Australian Capital Territory Taxation (Administration) Act 1969 provides for the administrative procedures necessary for assessment and collection of duty and tax.

Six additional Acts specify the range of dutiable instruments or transactions subject to duty or tax which are as under:

*Cheques and Other Bills of Exchange and Promissory Notes:* Five cents on each.

*Hire Purchase Agreements:* 1½ per cent of the purchase price (if over \$100) after excluding any deposit and any terms or insurance charges.

*Insurance Business:* Five per cent of premiums other than for life assurance, third party motor vehicle insurance or workers' compensation insurance.

*Sales and Purchases of Marketable Securities:* 40 cents in each \$100 or part thereof. Where the value is less than \$100 the rate is 10 cents in each \$25 or part thereof.

*Conveyances, grants and assignments of leases of land:* \$1 for each \$100 or part thereof of the value of the interest transferred where a lease is granted by a person other than the Commonwealth, in addition duty is payable at 30 cents for each \$100 or part thereof of the total rent payable for the specified period for which a lease is given.

A general exemption is provided from all duties for public hospitals, public benevolent institutions, religious institutions, public educational institutions, visiting diplomatic personnel and their families. The total amount collected as Australian Capital Territory Stamp Duty and Tax for the year 1969-70 was \$1,969,000.

## STATE FINANCE

### Functions of State Governments

In comparing the financial results of the State allowances must be made for the various functions discharged by the respective State Governments and for local conditions in each case. Direct comparisons of the revenue, expenditure and debt of the individual States are difficult owing to the fact that functions which in one State are assumed by the central government are in another delegated to local government or semi-government bodies which are vested with certain defined borrowing powers and whose financial transactions are not included with those of the central government. Care is needed, therefore, in making comparisons, and the particulars contained in this chapter should be read with those contained in the chapter, Local Government.

### Accounts of State Governments

The various financial transactions of the States are in each case concerned mainly with one or other of three funds—the Consolidated Revenue Fund, the Trust Fund and the Loan Fund.

All revenue (except certain items paid into special funds) collected by a State is paid into its *Consolidated Revenue Fund*, from which payments are made under authority of an annual Appropriation Act passed by the legislature, or by a permanent appropriation under a special Act. Figures relating to New South Wales represent the transactions of the Consolidated Revenue Fund and the business undertakings included in the annual budget papers. These undertakings are: railways, tramways and omnibuses, and Sydney Harbour Trust Section of the Maritime Services Board. Adjustments have been made to the Budget figures, however, in order to eliminate duplications caused by inter-fund payments. Particulars for all other States relate to the transactions of the Consolidated Revenue Fund.

The *Trust Fund* comprises all moneys held in trust by the Government and includes such items as superannuation funds, road funds, insurance companies' deposits, etc.

The *Loan Fund* is debited with all loan moneys raised for the State and credited with the expenditure therefrom on public works or other purposes.

#### Inter-relation of Commonwealth and State finances

A statement in some detail, covering the inter-relation of Commonwealth and State finances during the period from the inception of federation to the passing of the *Financial Agreement Act 1928*, was published in Year Book No. 22, pages 379-80. Changes in the financial relations between the Commonwealth and States since the passing of the Financial Agreement Act have been described in issues of the Year Book from year to year.

### State Consolidated Revenue Fund: expenditure

The principal heads of State expenditure from Consolidated Revenue Funds are: (a) interest, exchange and debt redemption charges in connection with debt; (b) working expenses of business undertakings; (c) education; (d) health and charitable expenditure; (e) justice; (f) police; (g) penal establishments; and (h) all other expenditure, including expenditure on public works, lands and surveys, agriculture and forestry, legislative and general administration, pensions, and miscellaneous.

In 1968-69 education constituted 26.0 per cent of the total expenditure from the State Consolidated Revenue Funds; the working expenses of railways, tramways, and omnibuses, 19.2 per cent; debt charges, 16.9 per cent; charitable, public health and hospitals, 13.8 per cent; and law, order and public safety, 6.1 per cent.

#### Total expenditure

The total expenditure from the Consolidated Revenue Funds of the several States and the expenditure per head of population during each of the years 1964-65 to 1968-69 are shown in the following table.

#### STATE CONSOLIDATED REVENUE FUND EXPENDITURE, 1964-65 TO 1968-69

## State Consolidated Revenue Fund: receipts

The principal sources of State revenue are: (a) taxation; (b) the business undertakings controlled by the State Governments; (c) sale of and rental from Crown lands; (d) interest on advances; (e) payments by the Commonwealth Government under the Financial Agreements, Special Grants and Financial Assistance Acts, etc.; (f) Commonwealth National Welfare Fund payments; and (g) miscellaneous sources, comprising fines, fees, etc.

Of these sources, that yielding the largest revenue to the Consolidated Revenue Funds for the States as a whole in the year 1968-69 was Commonwealth payments under financial assistance and other grants (40.6 per cent of the total revenue). Next in magnitude was the group of business undertakings (23.7 per cent), the principal contributors being the Government railways and tramways, followed by taxation receipts (20.6 per cent). More than one-quarter of the total State taxation collections are not paid into Consolidated Revenue Funds, however, but into trust and other funds (see pages 568-9). Of the remaining sources of revenue, interest (n.e.i.) constituted 4.1 per cent, land revenue 2.5 per cent, and National Welfare Fund payments 1.1 per cent.

## Total receipts

The following table shows particulars of the total receipts and the receipts per head of population of the Consolidated Revenue Funds of the several States.

## STATE CONSOLIDATED REVENUE FUND RECEIPTS, 1964-65 TO 1968-69

Year	N.S.W.(a)	Vic.	Qld	S.A.	W.A.	Tas.	Total
RECEIPTS (\$'000)							
1964-65 . . . . .	729,091	480,668	267,139	214,181	180,143	75,828	1,947,050
