## Chapter 5

## DEMOGRAPHY

## POPULATION

## Historical

In 1803, Lieutenant John Bowen's expedition of 49 persons made the first white settlement at Risdon Cove; at the 30th June, 1969 , Tasmania's population was estimated as 366,024 persons. This section describes, in broad outline, the pattern of population growth from the days of the first settlement.

The "Statistical Tables, Tasmania, 1804 to 1823 " show the first population record in 1816 when the white inhabitants numbered 1,461 , analysed as 1,032 free, 409 convicts and 20 children of convicts. In 1819, a "Muster Roll"' was taken by Commissary Hull, his count being 4,411 persons. From the year 1816, there exists a continuous annual record of Tasmania's population.

## Source of Population Figures

There are two principal methods by which population figures can be obtained: (i) by census enumeration; (ii) by application of vital and migration statistics to census data. The second method involves taking account of natural increase (excess of births over deaths), and net migration (excess of arrivals over departures) and applying these net figures to information obtained from an earlier census, the result being termed an intercensal estimate.

In the early days of settlement, frequent "musters" of the population were carried out but the first census, in the modern sense, dates from 1841. Subsequent censuses were conducted by the State in 1847, 1891, 1857, 1861, 1870, 1881, 1891 and 1901; the Commonwealth Statistician became responsible for censuses with the establishment of the Commonwealth Bureau of Census and Statistics and conducted them in 1911, 1921, 1933, 1947, 1954 and 1961. There is some doubt as to the extent and reliability of the data used in making the earlier intercensal estimates; birth and death registrations appear as a continuous published series from 1828 while the immigration and emigration published series commences from 1847, although earlier official records are known to have been available to those concerned with preparing estimates.

## Population from 1820

The table that follows is based on the traditional historical series and has been compiled to show the population at the end of each decade from 1820, and also to show the average annual growth in each decade on two bases, firstly gross and secondly, attributable to natural increase. There is a minor break in the comparability of the traditional historical series, the British military establishment being included up to 1842 but excluded in subsequent years. The effect of this break can be gauged when the strength of the establishment is taken as approximately 1,000 both in 1840 and 1850 .

Historical Summary of Population in Decades

| Year |  | Estimated Population (a) |  |  | Average Annual Increase For Decade (b) |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Males | Females | Persons | Total Population | From Natural Increase $(c)$ |
| 1820 | $\ldots$ | 4,057 | 1,343 | 5,400 |  | . |
| 1830 | . | 18,108 | 6,171 | 24,279 | 1,888 |  |
| 1840 | . | 32,040 | 13,959 | 45,999 | 2,172 | 106 |
| 1850 | $\ldots$ | 44,229 | 24,641 | 68,870 | 2,287 | 656 |
| 1860 | . | 49,653 | 40,168 | 89,821 | 2,095 | 1,214 |
| 1870 | . | 53,517 | 47,369 | 100,886 | 1,107 | 1,622 |
| 1880 | . | 60,568 | 54,222 | 114,790 | 1,390 | 1,542 |
| 1890 | $\ldots$ | 76,453 | 68,334 | 144,787 | 2,998 | 2,496 |
| 1900 | . | 89,763 | 83,137 | 172,900 | 2,811 | 2,776 |
| 1910 | $\cdots$ | 97,026 | 92,781 | 189,807 | 1,691 | 3,322 |
| 1920 | . | 106,236 | 103,189 | 209,425 | 1,962 | 3,649 |
| 1930 | . | 111,148 | 108,835 | 219,983 | 1,056 | 3,127 |
| 1940 |  | 121,911 | 118,280 | 240,191 | 2,021 | 2,438 |
| 1950 |  | 140,339 | 135,563 | 275,902 | 3,571 | 3,768 |
| 1960 |  | 174,379 | 169,531 | 343,910 | 6,801 | 5,523 |
| 1965 (d) |  | 185,344 | 180,680 | 366,024 | 4,423 | 5,500 |
| 1966 (e) | . | 187,267 | 183,950 | 371,217 | .. | .. |

(a) Up to 1900, at 31st December; from 1910, at 30th June.
(b) Decade ending in year shown.
(c) Excess of births over deaths in calendar years.
(d) Incomplete decade;"averages"based on five-year period only.
(e) Preliminary Census figures.

## Pattern of Net Migration

By comparing the last two columns in the previous table, it is possible to make an assumption as to whether net migration (excess of arrivals over departures) tended to be positive or negative in any decade. Thus, in the six decades ended 1860, growth of population was largely attributable to positive net migration with natural increase playing only a minor role; growth in this period was temporarily set back by something of an exodus to the Victorian goldfields in the 1850 's.

In the next two decades ended 1880, natural increase was becoming a more significant factor but the growth of population was checked by negative net migration. Important mining discoveries (e.g. Mt. Bischoff, Zeehan and Mt. Lyell) brought prosperity, to the State, and the two decades ended 1900 were characterised by positive net migration despite an Australia-wide depression in the early 1890 's.

The main characteristic of the five decades ended 1950 was persistent loss of population due to negative net migration, the decade most affected ending in 1930; the decade 1921-1930 was one of general prosperity for Australia apart from the final two years and the implication of the population loss is that Tasmania was "depressed" even before the general depression. This trend in net migration loss persisted till the end of World War II (1945). The Commonwealth Government's post-war immigration policy and the increasing industrialisation of the State combined to reverse the adverse trend of the previous half-century, and the last decade, ending 1960, was characterised by positive net migration. In the present incomplete decade, loss of population by negative net migration is becoming apparent.

## Census Populations from 184 x

The following table records the population and masculinity at each Census since 184 I and compares the rate of inter-censal growth.

Population and Masculinity at each Census from 1841

| Census Date | Population |  |  | Average Annual Percentage Rate of Increase (a) | Masculinity <br> (b) |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | Males | Females | Persons |  |  |
| 31st Dec., 1841 | 34,493 | 17,006 | 51,499 |  | 202.83 |
| 31st Dec., 1847 | 47,828 | 22,336 | 70,164 | 5.29 | 214.13 |
| 1st March, 1851 | 44,648 | 25,482 | 70,130 | - 0.01 | 175.21 |
| 31st March, 1857 | 46,606 | 34,886 | 81,492 | 2.53 | 133.60 |
| 7th April, 1861 | 49,593 | 40,384 | 89,977 | 2.51 | 122.80 |
| 7th Feb., 1870 | 52,853 | 46,475 | 99,328 | 1.11 | 113.72 |
| 3rd April, 1881 | 61,162 | 54,543 | 115,705 | 1.40 | 112.14 |
| 5th April, 1891 | 77,560 | 69,107 | 146,667 | 2.40 | 112.23 |
| 31st March, 1901 | 89,624 | 82,851 | 172,475 | 1.64 | 108.18 |
| 3rd April, 1911 | 97,591 | 93,620 | 191,211 | 1.04 | 104.24 |
| 4th April, 1921 | 107,743 | 106,037 | 213,780 | 1.12 | 101.61 |
| 30th June, 1933 | 115,097 | 112,502 | 227,599 | 0.52 | 102.31 |
| 30th June, 1947 | 129,244 | 127,834 | 257,078 | 0.87 | 101.10 |
| 30th June, 1954 | 157,129 | 151,623 | 308,752 | 2.65 | 103.63 |
| 30th June, 1961 | 177,628 | 172,712 | 350,340 | 1.82 | 102.85 |
| 30th June, 1966 (c) | 187,267 | 183,950 | 371,217 | 1.16 | 101.80 |

(a) Intercensal increase in total population as compound rate of growth per cent.
(b) Number of males per 100 females.
(c) Preliminary figures.

It should be noted that the Census figures up to 1870 include the British military establishment; the last Imperial troops were withdrawn later in 1870. (The traditional annual series previously quoted excludes the establishment after 1842 .)

## Comparison with other States

The following table compares the Tasmanian population at successive Censuses from 1901 with that of other States and Territories:

Australia: Census Populations of States and Territories
('000 Persons)

| State or | Territory | 1901 | 1911 | 1921 | 1933 | 1947 | 1954 | 1961 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| N.S.W. |  | 1,355 | 1,647 | 2,100 | 2,601 | 2,985 | 3,424 | 3,917 |
| Victoria | . | 1,201 | 1,315 | 1,531 | 1,820 | 2,055 | 2,452 | 2,930 |
| Queensland |  | 498 | 606 | 756 | 947 | 1,106 | 1,318 | 1,519 |
| S.A. |  | 359 | 409 | 495 | 581 | 646 | 797 | 969 |
| W.A. |  | 184 | 282 | 333 | 439 | 502 | 640 | 737 |
| Tasmania | . | 172 | 191 | 214 | 228 | 257 | 309 | 350 |
| N.T. . $\quad$ - |  | 5 | 3 | 4 | 5 | 11 | 17 | 27 |
| A.C.T. (a) |  | . | 2 | 3 | 9 | 17 | 30 | 59 |
| Australia | . | 3,774 | 4,455 | 5,436 | 6,630 | 7,579 | 8,987 | 10,508 |

(a) Part of New South Wales prior to 1911.

The next table shows the average annual rate of increase of population in each State and Territory during successive intercensal periods from 19011911.

Australia: Average Annual Percentage Rate of Increase of Population
During Intercensal Periods Duting Intercensal Periods

| State or Territory |  |  |  | 1901-11 | 1911-21 | 1921-33 | 1933-47 | 1947-54 | 1954-61 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| N.S.W. | . |  |  | 1.97 | 2.46 | 1.76 | 0.99 | 1.98 | 1.94 |
| Victoria |  |  |  | 0.91 | 1.53 | 1.42 | 0.87 | 2.56 | 2.58 |
| Queensland | $\cdots$ |  |  | 1.98 | 2.24 | 1.86 | 1.11 | 2.53 | 2.04 |
| S.A. | $\cdots$ |  |  | 1.32 | 1.94 | 1.31 | 0.76 | 3.05 | 2.83 |
| W.A. | . |  | $\cdots$ | 4.36 | 1.66 | 2.29 | 0.97 | 3.51 | 2.03 |
| Tasmania . | . |  |  | 1.04 | 1.12 | 0.52 | 0.87 | 2.65 | 1.82 |
| N.T. | $\ldots$ |  |  | -3.67 | 1.57 | 1.87 | 5.93 | 6.12 | 7.40 |
| A.C.T. (a) | . |  |  |  | 4.14 | 10.71 | 4.65 | 8.70 | 9.93 |
| Australia | . |  | - | 1.67 | 2.01 | 1.63 | 0.96 | 2.46 | 2.26 |

(a) Part of N.S.W. prior to 1911.

It will be observed that only in the period 1947-54 did the Tasmanian rate of growth exceed that for Australia as a whole and that 1921-33 was the period of minimum Tasmanian growth.

## Intercensal Adjustment

Earlier, mention was made of the method for calculating intercensal estimates of population by taking account of recorded natural increase and recorded net migration. The following two tables show these factors in successive intercensal periods from 1911 to 1961 inclusive:

Analysis of Intercensal Increase in Population
(i) Recorded Natural Increase and Recorded Net Migration

| Intercensal <br> Period | Births | Deaths | Natural <br> Increase | Arrivals | Departures | Net <br> Migration |
| :---: | ---: | ---: | ---: | ---: | ---: | ---: |
| 3.4.1911 to $4.4 .1921(a) \ldots$ | 56,459 | 20,011 | 36,448 | 386,377 | 396,642 | $-10,265$ |
| 4.4 .1921 to $30.6 .1933(b) \cdots$ | 61,955 | 25,174 | 36,781 | 507,209 | 535,780 | $-28,571$ |
| 30.6 .1933 to 30.6 .1947 | $\cdots$ | 73,130 | 34,767 | 38,363 | 482,577 | 493,305 |
| 30.1947 to 30.6 .1954 | $\cdots$ | 51,615 | 17,557 | 34,058 | 870,768 | 845,009 |
| 30.6 .1954 to 30.6 .1961 | $\cdots$ | 59,282 | 18,631 | 40,651 | $1,070,297$ | $1,065,254$ |
|  |  |  |  |  |  | 5,043 |

(a) Numbers recorded between the March quarters of 1911 and 1921, i.e. the quarter nearest to the census date.
(b) Numbers recorded from the March quarter of 1921.
(ii) Census Population, Intercensal Records and Intercensal Adjustment

| Census Date | Population | Numbers Recorded Since Previous Census |  | Intercensal Adjustment (a) |
| :---: | :---: | :---: | :---: | :---: |
|  |  | Natural Increase | Net <br> Migration |  |
| 4.4.1921 | 213,780 | 36,448 | - 10,265 | - 3,614 |
| 30.6.1933 | 227,599 | 36,781 | - 28,571 | $\begin{array}{r}\text { + } \\ + \\ \hline\end{array}$ |
| 30.6.1947 | 257,078 | 38,363 | - 10,728 | + 1,844 |
| 30.6.1954 | 308,752 | 34,058 | + 25,759 | - 8,143 |
| 30.6.1961 | 350,340 | 40,651 | + 5,043 | - 4,106 |

(a) For definition, see following section.

In general, two population estimates are made for any specific date: (i) Original estimates for dates subsequent to a census made before another census is taken. These estimates represent the population ascertained at the census, plus natural increase and recorded net migration since the census. As complete records of interstate migration are not available, the estimated State population so derived is approximate and subject to revision when the actual population is ascertained at the next census. (ii) Revised estimates for each newly completed intercensal period to adjust for the difference between the new census result and the comparable estimate. This is to bring intercensal estimates into line with the two census populations and thus effect adjustment for unrecorded movement of population in the intercensal period.

Thus, all original estimates of population for the intercensal periods from igit to 196 r have been revised to reconcile with the results of successive censuses from 1921 to 1961 and can be regarded as final. Estimates of population for dates after 30 th June, 1961, must be regarded as subject to revision, and will in fact be revised when the results of the I 966 census become available. In the preceding table, it will be seen that the intercensal adjustment for the latest period (1954 to 1961) was minus 4,106, equivalent to an average accumulating adjustment of approximately minus 587 per annum for revision of the original intercensal estimates.

## Population Estimates from 1950

The following are estimates of State population since 1950:
Estimated Population, 30th June and 31st December

| Year | At 30th June |  |  | At 31st December |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Males | Females | Persons | Males | Females | Persons |
| 1950 | 140,339 | 135,563 | 275,902 | 147,103 | 143,230 | 290,333 |
| 1951 | 145,279 | 140,914 | 286,193 | 153,721 | 148,066 | 301,787 |
| 1952 | 151,100 | 145,199 | 296,299 | 157,702 | 151,856 | 309,558 |
| 1953 . | 155,161 | 148,919 | 304,080 | 161,305 | 155,160 | 316,465 |
| 1954 (a) | 157,129 | 151,623 | 308,752 | 162,393 | 156,825 | 319,218 |
| $1955$ | 159,861 | 154,231 | 314,092 | 165,356 | 159,563 | 324,919 |
| 1956 | 162,196 | 156,274 | 318,470 | 168,695 | 162,645 | 331,340 |
| 1957 | 165,940 | 160,190 | 326,130 | 172,186 | 166,621 | 338,807 |
| 1958 | 169,123 | 163,943 | 333,066 | 174,465 | 169,433 | 343,898 |
| 1959 | 172,097 | 167,279 | 339,376 | 178,109 | 173,240 | 351,349 |
| 1960 | 174,379 | 169,531 | 343,910 | 180,511 | 175,458 | 355,969 |
| 1961 (a) | 177,628 | 172,712 | 350,340 | 185,661 | 178,473 | 364,134 |
| 1962 | 180,956 | 175,981 | 356,937 | 187,833 | 181,570 | 369,403 |
| 1963 | 182,743 | 178,577 | 361,320 | 189,515 | 184,125 | 373,640 |
| 1964 | 183,968 | 180,598 | 364,566 | 189,974 | 185,294 | 375,268 |
| 1965 | 185,344 | 180,680 | 366,024 | 191,808 | 187,299 | 379,107 |

(a) Figures at 30 th June as recorded at Census.
"De Facto" and "De Jure"
In the preceding table, it will be observed that the State's estimated population in December invariably exceeds the figure for the following June. This originates in the fact that Australian censuses credit persons to the State where they happen to be at census date (de facto basis) and not to the State where they normally reside (de jure basis). It follows that the factors used in making intercensal estimates-natural increase and net migration-are necessarily compiled on the same basis, (e.g. a Victorian resident dying in

## Demography

Tasmania is counted as a Tasmanian death for calculating natural increase; in calculating net migration, no distinction is made between a Tasmanian resident returning and a Victorian resident entering the State). Since intercensal estimates are produced on a de facto basis, the December estimates are inflated by positive net migration due to the seasonal tourist influx.

## Mean Population

Mean populations are calculated for twelve-month periods to provide a satisfactory average basis for calculations requiring allowance for the continuous change in population figures during such periods, (e.g. a year's expenditure requires division by the mean population to produce per capita expenditure).

From 1901 onwards, the mean population for any year has been calculated by the formula:

$$
\text { Mean Population }=\frac{a+4 b+2 c+4 d+e}{12}
$$

where $a$ is the population at the end of the quarter immediately preceding the year and $b, c, d$ and $e$ are the populations at the end of the quarters making up the year under consideration, (e.g. in the case of a mean population for the calendar year 1960, the populations in the formula represented by $a, b, c, d$ and $e$ are those at the following dates:-31.12.1959, 31.3.1960, 30.6.1960, 30.9.1960 and 31.12.1960).

The following table shows the State's mean population on two bases: (i) for financial years; (ii) for calendar years.

Mean Population, Financial and Calendar Years

| Year | Estimated Mean Population |  | Year | Estimated Mean Population |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | Year Ended 30th June | Year Ended 31st December |  | Year Ended 30th June | Year Ended 31st December |
| 1950 | 274,493 | 278,785 | 1958 | 332,046 | 335,382 |
| 1951 | 283,526 | 288,294 | 1959 | 338,628 | 341,423 |
| 1952 | 293,340 | 298,361 | 1960 | 344,111 | 346,913 |
| 1953 | 302,529 | 306,318 | 1961 | 350,077 | 353,613 |
| 1954 | 309,416 | 311,055 | 1962 | 356,686 | 359,408 |
| 1955 | 312,694 | 315,565 | 1963 | 362,111 | 364,280 |
| 1956 | 318,309 | 321,039 | 1964 | 366,187 | 367,359 |
| 1957 | 324,666 | 328,435 | 1965 | 368,086 | 369,421 |

## Arrivals and Departures

Earlier in this chapter, reference was made to net migration as one factor determining the growth of the State's population. Net migration, for any period, is the difference between arrivals and departures, such movements being reported by the shipping companies and airlines. "Arrivals" in the following table applies to all persons arriving in Tasmania from overseas or from other Australian States; it includes Tasmanians returning home. Similarly, "departures" applies to all persons leaving Tasmania for overseas or for other Australian States; it includes visitors returning home. The table below shows
annual arrivals and departures since 1953 and also quarterly arrivals and departures since 1962, but the intercensal adjustments referred to in an earlier section have not been applied to the figures:

Recorded Arrivals In and Departures From Tasmania, Interstate and Overseas

| Period | Arrivals | Departures | Period | Arrivals | Departures |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 1953 | 127,484 | 125,812 | 1962-March Qr. | 53,769 | 61,049 |
| 1954 | 126,976 | 128,424 | June Qr. | 42,623 | 45,684 |
| 1955 | 137,834 | 137,144 | September Qr. | 34,552 | 35,140 |
| 1956 | 143,104 | 141,686 | December Qr. | 54,324 | 44,150 |
| 1957 | 143,601 | 141,310 | 1963-March Qr. | 58,364 | 65,112 |
| 1958 | 141,814 | 141,995 | June Qr. | 44,404 | 48,703 |
| 1959 | 162,761 | 160,569 | September Qt. | 36,898 | 37,438 |
| 1960 | 182,537 | 183,513 | December Qr. | 58,777 | 48,665 |
| 1961 | 186,423 | 184,165 | 1964-March Qr. | 67,122 | 74,092 |
| 1962 | 185,268 | 186,023 | June Qr. | 47,372 | 52,018 |
| 1963 | 198,443 | 199,918 | September Qr. | 42,015 | 43,161 |
| 1964 | 219,930 | 223,380 | December Qr. | 63,421 | 54,109 |
| 1965 | 248,964 | 249,617 |  |  |  |

If annual arrivals and departures are added, the result may conveniently be termed "annual movements" and a comparison of "annual movements" over the years gives some indication of the degree to which travel and tourism have affected the State. Thus, in 1901, the year of Federation, annual arrivals and departures together totalled 51,000 ; in 1913, 91,800 ; in 1931, 58,500 ; in 1939, 120,200 and in 1965, 499,000. The marked increase in "annual movements" since World War II is largely attributable to the growing use of air travel. Another factor has been industrial legislation providing for paid holidays (two weeks' leave was increased to three weeks by the Federal Arbitration Commission in 1963); this has not only increased the tourist inflow but also has resulted in more Tasmanians taking holidays in the continental States.

The quarterly figures show a marked seasonal pattern with arrivals at their maximum in the spring and summer quarters (those ending December and March). Net migration figures also show a seasonal pattern with substantial increments, approximating ro,000 persons, in the December quarter and substantial losses in the March quarter.

The data on arrivals and departures in the previous table are compiled simply on the basis of individual journeys and yield no classifications such as "permanent movement", "long-term movement" or "short-term movement", (these classifications are employed to describe arrivals and departures for the Commonwealth of Australia as a whole). It follows, therefore, that the percentage of "movements" involving Tasmanians, as opposed to visiting tourists, is at present unknown.

## CENSUS OF 30th JUNE, 1961

## Age Distribution

In addition to giving the number of the State's population, the Census of 30th June, 1961, provided a variety of data on characteristics of that population.

The table below shows the age distribution at 30th June, 1961 and the change since 1954:

Age Distribution of the Population at 30th June, 1961

| Age Last Birthday (Years) |  | Males | Females | Persons |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  | Total | Per Cent of Total | Intercensal Increase (a) |  |
|  |  |  |  |  |  | Number | Per Cent |
| 0-4 |  | 21,350 | 20,344 | 41,694 | 11.90 | 4,673 | 12.62 |
| 5-9 |  | 19,714 | 19,001 | 38,715 | 11.05 | 4,832 | 14.26 |

| 100 and Over | . | 1 | 5 | 6 |  | 4 | 200.00 |
| Total .. | .. | 177,628 | 172,712 | 350,340 | 100.00 | 41,588 | 13.47 |
| Under 21 | . | 76,383 | 73,429 | 149,812 | 42.76 | 26,439 | 21.43 |
| 21-64 | . | 89,401 | 84,119 | 173,520 | 49.53 | 11,492 | 7.09 |
| 65 and Over | .. | 11,844 | 15,164 | 27,008 | 7.71 | 3,657 | 15.66 |

(a) Increase since Census of 30th June, 1954.

## Conjugal Condition

The next table shows the conjugal condition of the population at the Census of 1961 and at the previous Census of 1954:

| Conjugal Condition | Conjugal Condition of the Population |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Census, 30th June, 1954 |  | Census, 30th June, 1961 |  |  |  |
|  | Persons |  | Males | Females | Persons |  |
|  | Total | Per Cent of Total |  |  | Total | Per Cent of Total |
| Never MarriedUnder 15 years of age 15 years and over .. | $\begin{aligned} & 97,452 \\ & 54,890 \end{aligned}$ | $\begin{aligned} & 31.56 \\ & 17.78 \end{aligned}$ | $\begin{aligned} & 59,814 \\ & 33,939 \end{aligned}$ | $\begin{aligned} & 57,485 \\ & 24,100 \end{aligned}$ | $\begin{array}{r} 117,299 \\ 58,039 \end{array}$ | $\begin{aligned} & 33.48 \\ & 16.57 \end{aligned}$ |
| Total | 152,342 | 49.34 | 93,753 | 81,585 | 175,338 | 50.05 |
| Married . . | 136,248 | 44.13 | 76,861 | 76,153 | 153,014 | 43.68 |
| Married but permanently separated | 3,553 | 1.15 | 2,016 | 2,080 | 4,096 | 1.17 |
| Widowed | 14,030 | 4.54 | 3,817 | 11,746 | 15,563 | 4.44 |
| Divorced | 2,002 | 0.65 | 1,181 | 1,148 | 2,329 | 0.66 |
| Not Stated | 577 | 0.19 | (a) | (a) | (a) | (a) |
| Grand Total | 308,752 | 100.00 | 177,628 | 172,712 | 350,340 | 100.00 |

(a) In processing the 1961 Census data, a conjugal condition was allocated prior to tabulation in all instances where this information was not stated.

## Birthplaces of the Population

The table that follows is of particular interest in view of the Commonwealth's post-war policy of actively encouraging migration from Europe. It shows birthplaces of the population at the Census of 1961 and at the previous Census of 1954:

Birthplaces of the Population

| Birthplace | Census, 30 | June, 1954 | Census, 30th June, 1961 |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Persons |  | Males | Females | Persons |  |
|  | Total | Per Cent of Total |  |  | Total | Per Cent of Total |
| Australia.. | 282,491 | 91.49 | 159,081 | 158,397 | 317,478 | 90.62 |
| New Zealand | 1,112 | 0.36 | 559 | 569 | 1,128 | 0.32 |
| United Kingdom \& Eire | 14,113 | 4.57 | 8,776 | 7,965 | 16,741 | 4.78 |
| Germany | 1,794 | 0.58 | 1,300 | 923 | 2,223 | 0.63 |
| Greece | 150 | 0.05 | 345 | 144 | 489 | 0.14 |
| Italy | 974 | 0.32 | 1,043 | 493 | 1,536 | 0.44 |
| Netherlands | 2,340 | 0.76 | 1,903 | 1,653 | 3,556 | 1.02 |
| Poland . | 1,594 | 0.52 | 1,108 | , 500 | 1,608 | 0.46 |
| Other European Countries | 2,791 | 0.90 | 2,466 | 1,226 | 3,692 | 1.05 |
| Total Europe | 23,756 | 7.70 | 16,941 | 12,904 | 29,845 | 8.52 |
| Other Birthplaces | 1,393 | 0.45 | 1,047 | 842 | 1,889 | 0.54 |
| Grand Total | 308,752 | 100.00 | 177,628 | 172,712 | 350,340 | 100.00 |

The analysis of the birthplaces of the population at 30th June, 1961 , can be viewed broadly as a measure of the degree to which migration from overseas has contributed to population growth over a long period.

The following table contrasts the position throughout the Commonwealth at 30 th June, 196 r .

Australia: Birthplaces of the Population, Census of 30th June, 1961
Proportion of Population of State or Territory According to Birthplace
(Per Cent)

| Birthplace | N.S.W. | Vic. | Qld. | S.A. | W.A. | Tas. | N.T. | A.C.T. | Aust. |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Australia | 84.00 | 80.55 | 88.30 | 80.80 | 77.67 | 90.62 | 79.42 | 73.32 | 83.07 |
| New Zealand. . | 0.62 | 0.39 | 0.38 | 0.19 | 0.26 | 0.32 | 0.91 | 0.76 | 0.45 |
| U.K. and Eire | 6.87 | 7.05 | 6.15 | 8.13 | 11.32 | 4.78 | 7.65 | 9.62 | 7.19 |
| Other European Countries .. | 7.02 | 10.69 | 4.27 | 10.01 | 9.01 | 3.74 | 9.31 | 14.15 | 8.00 |
| Other Birthplaces | 1.49 | 1.32 | 0.90 | 0.87 | 1.74 | 0.54 | 2.71 | 2.15 | 1.29 |
| Total | 100.00 | 100.00 | 100.00 | 100.00 | 100.00 | 100.00 | 100.00 | 100.00 | 100.00 |

It will be observed that the Tasmanian pattern appears to vary quite significantly from that of other States and Territories, the most similar being that of Queensland. The following table shows particulars of the period of residence in Australia of persons born outside Australia, both for Tasmania and for the Commonwealth:

Period of Residence in Australia of Persons Born Outside Australia
Census, 30th June, 1961

| Period of Residence (Years) | Tasmania |  | Australia |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Persons |  | Persons |  |
|  | Total | Per Cent of Total | Total | Per Cent of Total |
| Born Outside Australia- |  |  |  |  |
| Under 1 | 1,976 | 0.57 | 123,516 | 1.17 |
| 1 and under 2 | 1,768 | 0.50 | 86,981 | 0.83 |
| 2 and under 3 | 1,695 | 0.48 | 90,067 | 0.86 |
| 3 and under 4 | 1,656 | 0.48 | 78,993 | 0.74 |
| 4 and under 5 | 1,605 | 0.46 | 83,879 | 0.80 |
| 5 and under 6 | 1,755 | 0.50 | 96,167 | 0.92 |
| 6 and under 7 | 1,376 | 0.39 | 92,042 | 0.88 |
| Under 7 | 11,831 | 3.38 | 651,645 | 6.20 |
| 7 and under 14 | 13,782 | 3.93 | 600,441 | 5.72 |
| 14 and under 21 | 1,075 | 0.31 | 40,290 | 0.38 |
| 21 and over | 5,431 | 1.55 | 449,676 | 4.28 |
| Not Stated | 743 | 0.21 | 37,120 | 0.35 |
| Total Born Outside Australia | 32,862 | 9.38 | 1,779,172 | 16.93 |
| Born in AustraliaGrand Total | 317,478 | 90.62 | 8,729,014 | 83.07 |
|  | 350,340 | 100.00 | 10,508,186 | 100.00 |

Of persons born outside Australia, those with residence of less than 14 years constitute a decisive majority, both in the Tasmanian and Australian populations, and this fact can be related to the Commonwealth's post-war migration policy since the 14 years in question cover the period 1947-1961.

The table shows that this policy has had considerably less effect on the Tasmanian population than on the population of Australia.

## Nationality of Population

Comparable percentages of persons of British nationality at 30th June, ${ }^{1961}$ were:-N.S.W., 95.48; Victoria, 92.97; Queensland, 97.73; S.A., 94.04; W.A., 95.40 ; Tasmania, 97.74 ; N.T., 92.97 ; A.C.T., 89.93 ; Australia, 95.01 . It should be noted that the Nationality and Citizenship Act 1948 created, for the first time, the status of "Australian Citizen"; all Australian citizens, under the provisions of this Act, are declared to be British subjects. From the earlier table on birthplaces of the Tasmanian population, it is established that $95.7^{2}$ per cent were born in Australia, N.Z., the United Kingdom or Eire. While birthplace does not necessarily determine nationality in all cases, comparison of the two tables suggests that the percentage of naturalised British subjects was probably less that 3 per cent of the State population at 3oth June, 1961.

The following table shows the nationality of the Tasmanian population at 30th June, 1961 and also at 30th June, 1954:

Nationality (i.e. Allegiance) of the Population

| Nationality | Census, 30th June, 1954 |  | Census, 30th June, 1961 |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Persons |  | Males | Females | Persons |  |
|  | Total | Per Cent of Total |  |  | Total | Per Cent of Total |
| British (a)- |  |  |  |  |  |  |
| Born in Australia | 282,491 | 91.49 | 159,081 | 158,397 | 317,478 | 90.62 |
| Born outside Australia | 17,443 | 5.65 | 13,605 | 11,322 | 24,927 | 7.12 |
| Total British | 299,934 | 97.14 | 172,686 | 169,719 | 342,405 | 97.74 |
| Foreign- |  |  |  |  |  |  |
| Dutch | 2,363 | 0.77 | 1,180 | 1,061 | 2,241 | 0.64 |
| German | 1,262 | 0.41 | 756 | 467 | 1,223 | 0.35 |
| Greek | 125 | 0.04 | 264 | 120 | 384 | 0.11 |
| Italian | 924 | 0.30 | 818 | 395 | 1,213 | 0.35 |
| Polish | 1,205 | 0.40 | 392 | 257 | 649 | 0.18 |
| Yugoslavian .. . | , 324 | 0.10 | 303 | 94 | . 397 | 0.11 |
| Other (incl. Stateless) | 2,615 | 0.84 | 1,229 | 599 | 1,828 | 0.52 |
| Total Foreign | 8,818 | 2.86 | 4,942 | 2,993 | 7,935 | 2.26 |
| Grand Total | 308,752 | 100.00 | 177,628 | 172,712 | 350,340 | 100.00 |

(a) All persons of individual citizenship status who, by virtue of the Nationality and Citizensbip Act 1948, are deemed to be British subjects. Includes naturalised British. For purposes of this table, Irish nationality is included with British.

## Industry

The next table shows the main groups of industry for the population of Tasmania at 30 th June, 1961, compared with 1954. For industry groups Finance and Property, Public Authority (n.e.i.) and Defence Services, and Community and Business Services (including Professional), the figures derived from the 1954 classification have been adjusted to the classification used in 196r.

## Meaning of "Work Force"

Persons usually engaged in industry are regarded as being "in the work force", while the remainder of the population, which at the 1960 Census comprised 219,423 persons, is classified as not being in the work force. The term "in the work force" includes persons of all ages who are employees, employers, self-employed, unpaid helpers engaged in industry and those who usually work for a living but who have lost their jobs. Persons who do not earn their living by doing work for monetary reward, such as children, housewives, full-time students, retired persons, pensioners and inmates of institutions (excluding temporary inmates of hospitals and members of religious orders) are regarded as not being in the work force.

In the case of employees, the basis of classification is the industry of the employer; thus a carpenter employed by a mining company will appear under "Mining and Quarrying", not under "Building and Construction". Employees in the government sector (Commonwealth, State, Semi-Government and Local Government) are not recorded separately but are allocated to appropriate industry groupings, e.g. State railway workers to "Transport",

## Demography

postal workers to "Communication", \&c. Government employees not classified under any of the major industry groups in the following table appear under "Public Authority, n.e.i.".

It should be emphasised that "work force" should not be confused with wage and salary earners since the term, by definition, includes not only employees but also employers, the self-employed and certain categories of the unemployed.

Industry of Population at 30th June, 1961

| Industry Group | Census, 30th June, 1954 |  | Census, 30th June, 1961 |  |  |  |

| Grand Total | 308,752 | . | 177,628 | 172,712 | 350,340 | . |

(a) On wage or salary.
(b) Not on wage or salary.
(c) Includes those who stated they were usually engaged in work, but were not actively seeking a job at the time of the Census by reason of sickness, accident, etc., or because they were on strike, changing jobs, or temporatily laid off, \&c. It includes also persons able and willing to work but unable to secure employment, as well as casual and seasonal workers not actually in a job at the time of the Census. The numbers shown as "Not at work", therefore, do not represent the number of unemployed available for work and unable to obtain it.
(d) In processing the 1961 Census data, an occupational status was allocated prior to tabulation in all instances where this information was not stated.
The Census classification "Not at Work" is not, by definition, intended as a measure of unemployment. The Department of Social Services reported the following receiving unemployment benefit in Tasmania near the respective Census dates (i.e. on the last Saturday of the month): June 1954, 109 persons; June 1961, 1,336 persons. The Department of Labour and National Service reported the following registered for employment in Tasmania near the Census dates: at 25 th June, 1954, 555 persons; at 30th June, 1961, 3,213 persons. A definition of these registrations is: "Persons who claimed, when registering with the Commonwealth Employment Service, that they were not employed and who were recorded as unplaced. Includes those referred to employers and those who may have obtained employment without notifying the Employment Service. Includes also persons receiving unemployment benefit". Registration is voluntary but those seeking the payment of unemployment benefit are required to register. (For further details, see the "Employment" and "Unemployment" sections of Chapter io.)

The Census term "Not at work" does not apply to persons who are only temporarily absent from their jobs through illness, accident, annual holidays, long-service leave, etc. The distinction between employees and helpers is that the former receive wages or salary while the latter do not, (e.g. "helpers" on the farm or in the family shop, not working for wages or salary).

The following table compares the proportions of the population in the work force of Tasmania and Australia at the respective Census dates (30th June, 1954 and 1961):

Tasmania and Australia: Proportions of Population in Work Force (Per Cent)

| Particulars | Census, 30th June, 1954 |  |  | Census, 30th June, 1961 |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Males | Females | Persons | Males | Females | Persons |
| Total in Work Force- |  |  |  |  |  |  |
| Tasmania | 59.81 | 15.98 | 38.29 | 57.02 | 17.15 |  |
| Australia | 62.84 | 19.04 | 41.20 | 59.59 | 20.38 | 40.21 |

## Religion

Commencing with the Census of 1933 , the collection forms carried a note reminding the public that there was no legal obligation to answer the question on religion; the same reminder was given in subsequent censuses. A proportion of the population (8.97 per cent in 1954, 10.28 per cent in 1961) left the question on religion unanswered and appear in associated tables as "No Reply".

The table below analyses the Tasmanian population according to religion, as reported at the Censuses of 30 th June, 1954 and 30 th June, 196r. Over the seven-year intercensal period, there appears to have been little change in the proportion of adherents to the various religions:

Religions of the Population

| Religion | Census, 30th June, 1954 <br> Persons |  | Census, 30th June, 1961 |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Males | Females | Persons |  |
|  | Total | Per Cent of Total |  |  | Total | Per Cent of Total |
| Christian:- |  |  |  |  |  |  |
| Baptist | 6,293 | 2.04 | 3,547 | 3,680 | 7,227 | 2.06 |
| Brethren | 2,347 | 0.76 | 973 | 1,035 | 2,008 | 0.57 |
| Catholic (a) | 53,042 | 17.18 | 32,804 | 31,189 | 63,993 | 18.27 |
| Churches of Christ | 2,267 | 0.73 | 1,226 | 1,281 | 2,507 | 0.72 |
| Church of England . | 147,407 | 47.74 | 79,982 | 79,119 | 159,101 | 45.41 |
| Congregational | 4,425 | 1.43 | 1,993 | 2,200 | 4,193 | 1.20 |
| Greek Orthodox | , 593 | 0.19 | 1,647 | 2,362 | 1,009 | 0.29 |
| Lutheran .. | 1,046 | 0.34 | 849 | 706 | 1,555 | 0.44 |
| Methodist | 38,236 | 12.38 | 20,770 | 21,466 | 42,236 | 12.06 |
| Presbyterian | 15,607 | 5.06 | 8,350 | 8,407 | 16,757 | 4.78 |
| Protestant (Undefined) | 2,157 | 0.70 | 1,037 | ,938 | 1,975 | 0.56 |
| Salvation Army $\quad \because$ | 1,815 | 0.59 | 1,114 | 1,202 | 2,316 | 0.66 |
| Seventh Day Adventist | 1,280 | 0.42 | 704 | 863 | 1,567 | 0.45 |
| Other (including Christian Undefined) | 2,972 | 0.96 | 2,483 | 2,607 | 5,090 | 1.45 |
| Total Christian | 279,487 | 90.52 | 156,479 | 155,055 | 311,534 | 88.92 |
| Non Christian:Hebrew | 158 | 0.05 | 80 | 70 | 150 | 0.04 |
| Other | 98 | 0.03 | 86 | 32 | 118 | 0.04 |
| Total Non-Christian | 256 | 0.08 | 166 | 102 | 268 | 0.08 |
| Indefinite | 796 | 0.26 | 915 | 851 | 1,766 | 0.50 |
| No Religion | 516 | 0.17 | 529 | 246 | 1,775 | 0.22 |
| No Reply | 27,697 | 8.97 | 19,539 | 16,458 | 35,997 | 10.28 |
| Grand Total | 308,752 | 100.00 | 177,628 | 172,712 | 350,340 | 100.00 |

(a) Includes Catholic and Roman Catholic. (The Census forms do not list religions and adherents of the one religion may describe it under different titles.)

The apparent decline in the total proportion of the population adhering to Christian faiths should be weighed against the increase in the two categories, "Indefinite" and "No Reply", (i.e. a decline of 1.60 per cent against an increase of 1.55 per cent).

## Population in Local Government Areas

The next table shows the population in cities, municipalities and statistical divisions at the Censuses of 1954 and 1961, together with the estimated distribution at 30th June, 1963 and 1964:

Population in Local Government Areas and Statistical Divisions

Population in Local Government Areas and Statistical Divisions-continued

| Local Government Area and Statistical Division |  |  | Population at 30th June |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| Migratory .. | . | .. | 650 | 879 | 880 | 800 |
| Total Tasmania |  | .. | 308,752 | 350,340 | 361,320 | 364,566 |

(a) Includes suburban areas adjacent to City of Launceston.
(b) Includes suburban areas adjacent to City of Hobart.

## Hobart and Suburbs

The City of Hobart is ringed by other local government areas which continue the pattern of urban development. For statistical purposes, this whole urban area is referred to as "Hobart and Suburbs"; it should be noted that "Hobart and Suburbs" is a combination of local government areas and parts of local government areas designed to define an homogeneous group and is not an area specified for any administrative purpose of local government.
"Hobart and Suburbs" is composed as follows: (i) City of Hobart; (ii) City of Glenorchy; (iii) part of Clarence Municipality (Derwent suburbs from Mount Direction to Howrah); (iv) part of Kingborough Municipality (Derwent suburbs from Taroona to Blackmans Bay).

The details of the suburban localities follow:
Suburbs of Hobart

| Glenorchy (City) | Clarence (Part) | Kingborough (Part) |
| :---: | :---: | :---: |
| All <br> Extends parallel to Der- <br> went River from New <br> Town Creek to Granton) | Bellerive, Geilston Bay, <br> Howrah, Lindisfarne, Risdon <br> Vale, Warrane | Blackmans Bay, Kingston, <br> Kingston Beach, Taroona |

The next table shows the growth of "Hobart and Suburbs" since the Census of 30th June, 1954:

Population of Hobart and Suburbs

| Local Government Area | At 30th June |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | $\begin{gathered} \text { Census, } \\ 1954 \end{gathered}$ | $\begin{gathered} \text { Census, } \\ 1961 \end{gathered}$ | Estimated, 1963 | $\begin{aligned} & \text { Estimated, } \\ & 1964 \end{aligned}$ |
| City of Hobart | 54,887 | 54,021 | 53,746 | 53,719 |
| Municipality of Clarence (Part) | 10,686 | 20,734 | 24,206 | 25,323 |
| City of Glenorchy . . | 25,810 | 35,682 | 37,471 | 37,972 |
| Municipality of Kingborough (Part) | 3,823 | 5,495 | 5,852 | 5,935 |
| Total Hobart and Suburbs | 95,206 | 115,932 | 121,275 | 122,949 |

The area defined as "Hobart and Suburbs" for the Census of 30 th June, 1961 was increased by taking in Risdon Vale and Mount Direction in the Municipality of Clarence; these areas had been treated as "country" in the 1954 Census. The extension of the boundary hardly affects the comparability of the above figures since, at the Census of 1954, the Risdon Vale and Mount Direction areas were very thinly populated.

Population figures for the "fringe" municipalities, showing suburban and "country" components, are as follows:
Municipalities of Clarence and Kingborough: Suburban and Country Populations

| Municipality |  | At 30th June |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | $\begin{aligned} & \text { Census, } \\ & 1954 \end{aligned}$ | $\begin{gathered} \text { Census, } \\ 1961 \end{gathered}$ | $\begin{aligned} & \text { Estimated, } \\ & 1963 \end{aligned}$ | $\begin{gathered} \text { Estimated, } \end{gathered}$ |
| $\begin{gathered} \text { Clarence - Suburban } \\ \text { Country } \end{gathered}$ | . | $\begin{array}{r} 10,686 \\ 1,918 \end{array}$ | $\begin{array}{r} 20,734 \\ 2,406 \end{array}$ | $\begin{array}{r} 24,206 \\ 2,656 \end{array}$ | 25,323 2,777 |
| Total | $\cdots$ | 12,604 | 23,140 | 26,862 | 28,100 |
| Kingborough - Suburban | $\cdots$ | $\begin{aligned} & 3,823 \\ & 4,512 \end{aligned}$ | $\begin{aligned} & \mathbf{5 , 4 9 5} \\ & 4,530 \end{aligned}$ | $\begin{aligned} & 5,852 \\ & 4,530 \end{aligned}$ | $\begin{aligned} & 5,935 \\ & 4,585 \end{aligned}$ |
| Total | . | 8,335 | 10,025 | 10,382 | 10,520 |

## Launceston and Suburbs

The City of Launceston is ringed by other local government areas which continue the pattern of urban development. For statistical purposes, this whole urban area is referred to as "Launceston and Suburbs"; it should be noted that "Launceston and Suburbs" is a combination of local government areas and parts of local government areas designed to define an homogeneous group and is not an area specified for any administrative purpose of local government.
"Launceston and Suburbs" is composed as follows: (i) City of Launceston; (ii) part of Municipality of Beaconsfield (Tamar suburbs as far north as Cormiston; (iii) part of Municipality of Lilydale (Tamar suburbs, east bank); (iv) part of Municipality of St. Leonards (as far east as Waverley and St. Leonards township); (v) part of Municipality of Westbury (as far west as Prospect Vale).

Details of the suburban localities follow:
Suburbs of Launceston

| Beaconsfield <br> (Part) | Lilydale (Part) | St. Leonards <br> (Part) |  |
| :---: | :---: | :---: | :---: |
| Cormiston, Maraway- <br> lee, <br> Trevallyn Riverside, | Mayfield, Newnham, <br> Rocherlea, Vermont | Elphin, Franklin <br> Village, Norwood, <br> Punchbowl, Ravens- <br> wood, St. Leon- <br> ards (town), Waver- <br> ley, Young Town | Prospect, Prospect <br> Vale |

The next table shows the growth of "Launceston and Suburbs" since the Census of 30th June, 1954:

Population of Launceston and Suburbs

| Local Government Area | At 30th June |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | $\begin{gathered} \text { Census, } \\ 1954 \end{gathered}$ | $\begin{aligned} & \text { Census, } \\ & 1961 \end{aligned}$ | $\begin{gathered} \text { Estimated, } \\ 1963 \end{gathered}$ | $\begin{gathered} \text { Estimated, } \\ 1964 \end{gathered}$ |
| City of Launceston. . . . . |  | 38,118 | 38,141 | 37,940 |
| Municipality-Beaconsfield (Part) | 2,629 | 3,162 | 3,339 | 3,361 |
| Lilydale (Part) .. | 2,392 | 4,462 | 4,936 | 5,225 |
| St. Leonards (Part) | 6,302 | 10,222 | 11,218 | 11,792 |
| Westbury (Part) . | 353 | 757 | 807 | 872 |
| Total Launceston and Suburbs | 49,303 | 56,721 | 58,441 | 59,190 |

The area defined as "Launceston and Suburbs" remained the same for the Censuses of 1954 and 1961.

Population figures for the "fringe" municipalities, showing suburban and country components, are as follows:
Municipalities Containing Launceston Suburbs: Suburban and Country Populations

| Municipality |  | At 30th June |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | $\begin{gathered} \text { Census, } \\ 1954 \end{gathered}$ | $\begin{gathered} \text { Census, } \\ 1961 \end{gathered}$ | $\begin{gathered} \text { Estimated, } \\ 1963 \end{gathered}$ | Estimated, |

| Westbury | $\ldots$ | 7,095 | 11,032 | 12,044 | 12,618 |
|  | $\cdots$ | $\begin{array}{r} 353 \\ 3,621 \end{array}$ | $\begin{array}{r} 757 \\ 3,824 \end{array}$ | $\begin{array}{r} 807 \\ 3,941 \end{array}$ | $\begin{array}{r} 872 \\ 3,941 \end{array}$ |
| Total | . | 3,974 | 4,581 | 4,748 | 4,813 |

## Urban and Rural

The following table analyses the growth of population since the 1954 Census in broad areas:

Population in Urban and Rural Areas

| Area | Census, 30.6.54 |  | Census, 30.6.61 |  | Estimated, 30.6.64 |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Persons | Per Cent of Total | Persons | Per Cent of Total | Persons | Per Cent of Total |
| Hobart and Suburbs | 95,206 | 30.84 | 115,932 | 33.09 | 122,949 | 33.72 |
| Other UrbanLaunceston and Suburbs Other (a) | $\begin{aligned} & 49,303 \\ & 58,825 \end{aligned}$ | $\begin{aligned} & 15.97 \\ & 19.05 \end{aligned}$ | $\begin{aligned} & 56,721 \\ & 73,882 \end{aligned}$ | $\begin{aligned} & 16.19 \\ & 21.09 \end{aligned}$ | $\begin{gathered} 59,190 \\ (b) \end{gathered}$ | $\underset{(b)}{16.24}$ |
| 'Total | 108,128 | 35.02 | 130,603 | 37.28 | (b) | (b) |
| $\begin{array}{lll} \text { Rural } & . & . . \\ \text { Migratory } & . & . \end{array}$ | $\begin{array}{r} 104,768 \\ 650 \end{array}$ | $\begin{array}{r} 33.93 \\ 0.21 \end{array}$ | $\begin{array}{r} 102,926 \\ 879 \end{array}$ | $\begin{array}{r} 29.38 \\ 0.25 \end{array}$ | $\begin{aligned} & (b) \\ & 800 \end{aligned}$ | $\begin{aligned} & (b) \\ & 0.22 \end{aligned}$ |
| Total Tasmania. . | 308,752 | 100.00 | 350,340 | 100.00 | 364,566 | 100.00 |

(a) Non-municipal towns with population exceeding 750 persons.
(b) Not available separately.

The next table compares the average annual rate of growth per cent in the two main urban centres:

Average Annual Rate of Growth in Hobart and Suburbs, Launceston and Suburbs and Remainder of State

| Area | Average Annual Rate of Growth Per Cent (a) |  |  |
| :---: | :---: | :---: | :---: |
|  | $\begin{aligned} & \text { Seven Years } \\ & \text { 30.6.54 to } \\ & 30.6 .61 \end{aligned}$ | $\begin{aligned} & \text { Ten Years } \\ & 30.6 .54 \text { to } \\ & 30.6 .64 \end{aligned}$ | $\begin{aligned} & \text { Three Years } \\ & \text { 30.6.61 to } \\ & 30.6 .64 \end{aligned}$ |
| Hobart and Suburbs <br> Launceston and Suburbs <br> Remainder of State | $\begin{aligned} & 2.85 \\ & 2.02 \\ & 1.12 \end{aligned}$ | $\begin{aligned} & 2.62 \\ & 1.87 \\ & 1.06 \end{aligned}$ | $\begin{aligned} & 1.99 \\ & 1.44 \\ & 0.98 \end{aligned}$ |
| Total Tasmania | 1.82 | 1.67 | 1.32 |

(a) Compound rate of increase.

## Urban and Rural Distribution

Particulars of the distribution of the population between urban and rural areas are available only from a census.

Urban areas in Tasmania are defined as follows: (i) Hobart and Suburbs; (ii) Launceston and Suburbs; (iii) non-municipal towns with population exceeding 750 persons. Only three local government areas are classified, in total, as urban, specifically the Cities of Hobart, Glenorchy and Launceston. The remaining 46 local government areas are dealt with as follows: (i) in the case of a municipality not having any town exceeding the limit of 750 persons, the whole population is classified as "rural"; (ii) in the case of a municıpality having towns with populations exceeding 750 persons, the town population is classified as urban and the balance as rural; (iii) in the case of a "fringe"
municipality bordering Hobart or Launceston, population within the respective suburban boundaries is classified as urban; the balance of the municipality is then allocated to rural or urban by the criterion just described.

The next table compares the proportions of urban and rural population of the Australian States at the Census of 30th June, 196r. (In the table, Hobart and Suburbs appears as 'Metropolitan' and Launceston and Suburbs is included with 'Other Urban'.)

Proportion of Urban and Rural Population, Australian States and Territories
(Per Cent)

| Classification | Proportion of Total Population of State |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | N.S.W. | Vic. | Qld. | S.A. | W.A. | Tas. | N.T. | A.C.T. | Aust. |
| Urban- |  |  |  |  |  |  |  |  |  |
| Metropolitan | 55.74 | 65.25 | 40.92 | 60.66 | 57.03 | 33.09 |  | 95.96 | 56.12 |
| Other (a) | 29.41 | 19.59 | 35.35 | 18.30 | 17.07 | 37.28 | 62.65 |  | 25.82 |
| Rural | 14.58 | 15.00 | 23.60 | 20.64 | 25.49 | 29.38 | 36.38 | 4.04 | 17.82 |
| Migratory | 0.27 | 0.16 | 0.13 | 0.40 | 0.41 | 0.25 | 0.97 | 4.04 | 17.82 |
| Total | 100.00 | 100.00 | 100.00 | 100.00 | 100.00 | 100.00 | 100.00 | 100.00 | 100.00 |

(a) In all States except Tasmania, non-municipal towns included are those with populations of 1,000 persons or more; in Tasmania, those with populations of 750 or more.

## Decentralisation of Population

It will be observed that Tasmania differs very significantly from the five continental States in three respects: (i) lowest proportion in the metropolitan area; (ii) highest proportion classified as "other urban"; (iii) highest proportion classified as "rural". The Tasmanian distribution is unique in one respect-none of the continental States has a non-metropolitan urban centre with a population approaching so per cent of that in the metropolitan area; this is the Tasmanian situation, however, such a centre being Launceston and Suburbs (included in "other urban" in the above table). This deviation from an Australian pattern is partly explained by the relative proximity of Launceston to the principal mainland markets, a factor also operating in favour of towns along the north west coast; the chief of these, Burnie and Devonport, together contain 8 per cent of the State's population. The Tasmanian distribution is of particular interest since, in the continental States, decentralisation is currently being urged as a policy necessary to check the excessive concentration of population in metropolitan areas. Growth of population in Tasmania since the 1954 Census has been concentrated, to a large degree, in the metropolitan area (nearly 50 per cent of the intercensal increase in State population from 1954 to 1961 was recorded in Hobart and Suburbs); if this trend continues, then Tasmania will lose advantages attributable to its present state of relative decentralisation.

## "Urban" and "Rural" in Local Government Areas

The following table shows the distribution of the Tasmanian population in local government areas, statistical divisions and in urban and rural areas at the 196 I Census:

Population in Local Government Areas Classified as Metropolitan, Other Urban and Rural: Census, 30th June, 1961

| Local Government Area and Statistical Division | Total Population | Population Classified As: |  |  | Non-Municipal Towns with Populations Classed as "Other Urban" |
| :---: | :---: | :---: | :---: | :---: | :---: |

| Spring Bay | 1,155 |  |  | 1,155 |  |
| Total S.E. Div. | 33,058 | 20,734 | $\cdots$ | 12,324 |  |

Population in Local Government Areas Classified as Metropolitan, Other Urban and Rural: Census, 30th June, 1961-continued

(a) Component of "Launceston and Suburbs".
(b) Component of "Hobart and Suburbs".

## City of Glenorchy

In the preceding tables, Glenorchy has been shown as a city; it acquired city status on 24th October, 1964, and was a municipality at the Census of 30 th June, 196i. As there were no boundary changes, it follows that statistical series for the previous Municipality of Glenorchy are continuous, without any break in comparability, with series for the City of Glenorchy.

## Populations of Australian Capital Cities

The populations of Australian capital cities at each Census, 1901 to 1961 , are shown in the following table:

Australia: Populations of Capital Cities at Census Dates

| Metropolitan Area (a) | 1901 | 1911 | 1921 | 1933 | 1947 | 1954 | 1961 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Sydney . . . . ('000) | 482 | 630 | 899 | 1,235 | 1,484 | 1,863 | 2,183 |
| Melbourne .. (, ) | 496 | 593 | 783 | 1,235 | 1,226 | 1,524 | 1,912 |
| Brisbane .. (,$>$ ) | 119 | 139 | 210 | 300 | 402 | 502 | 622 |
| Adelaide .. ( , , ) | 162 | 190 | 256 | 313 | 382 | 484 | 588 |
| Perth .. .. ( $\quad$ ) | 67 | 107 | 155 | 208 | 273 | 349 | 420 |
| Hobart .. .. (") | 35 | 40 | 52 | 60 | 77 | 95 | 116 |
| Canberra .. ( $\%$ ) | . | .. | . . | 7 | 15 | 28 | 56 |
| Total-Persons ('000) | 1,361 | 1,699 | 2,355 | 3,115 | 3,859 | 4,845 | 5,897 |
| Percentage (b) | 36 | 38 | 43 | 47 | 51 | 54 | 56 |

(a) Some of the apparent increase in the percentage of total population living in capital cities is due to periodic revision and extension of metropolitan boundaries.
(b) Percentage of total Australian population.

The Tasmanian metropolitan population has grown over the sixty years 1901-1961 at an average annual rate of two per cent; the corresponding rate for the Australian metropolitan population approaches 2.5 per cent.

## VITAL STATISTICS

## Historical

In 1839, John Montagu, Colonial Secretary of Van Diemen's Land, submitted to the Governor, Sir John Franklin, a series of statistical returns; below is shown part of Return No. 17:

Vital Statistics of Van Diemen's Land

| Year |  |  | Births | Deaths | Marriages |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 1824 | $\ldots$ | . | 177 | 132 | 75 |
| 1828 | $\cdots$ | $\cdots$ | 309 | 250 | 120 |
| 1829 | $\cdots$ | . | 301 | 260 | 166 |
|  | $\cdots$ | $\cdots$ | 460 | 270 | 163 |

The complete table covers the period 1824-1838 but entries for 1825, 1826, 1827 and 1832 read "No Returns". In a commentary for the Governor's guidance, Montagu wrote: "I would also observe that the number of births and deaths are those only returned by ministers of the Church of England, and the former column refers to those only who have been christened; and although the number of deaths must be near the truth, yet the actual number of births has been very much under-stated". Thus, even though the Tasmanian record of births, deaths and marriages covers a period of 140 years, these early figures cannot be accepted as being very reliable.

## Registration Provisions

Franklin's Legislative Council had passed in 1838 "An Act for Registering Birtbs,, Deaths and Marriages in the Islana of Van Diemen's Land and its Dependencies." This provided for the establishment of a central register in Hobart Town; the division of the colony into registration districts; the appointment of a Registrar in Hobart and of Deputy Registrars in the districts; the recording of births and deaths by the Deputy Registrars, and finally the reporting of these events to the Registrar by the Deputies. The ministers celebrating marriages were required to make returns direct to the Registrar but Deputy Registrars could also officiate and had certain licensing functions. With the establishment of such machinery, the recording of births, deaths and marriages could be expected to improve but as late as 1867, the Government Statistician complained that Section 22 of the 1838 Act was an impediment to compiling accurate death rates. Section 22 reads: 'And be it enacted that nothing contained in this Act shall extend or apply to the registration of the death of any prisoner of the Crown serving under an unexpired sentence of transportation in the island or its Dependencies whether the same shall have been partially remitted or not." E. C. Nowell, the Statistician, had this to say: "This is a very inconvenient provision, and I would submit that it should be repealed as being at variance with the practice in other countries, and opposed to the interests of Science." However, in 1868, he reported that the death rate could be accepted as correct since "only one transported offender died during the year." This would certainly suggest that deaths recorded by successive Registrars in the period 1839-1866 were not total deaths for the island.

Some difficulties in maintaining the central registration of marriages may account for an $184^{2}$ amendment specifying $\$ 50$ penalties for ministers of religion who failed to make returns as required by the Act.

The registration function has been merged at times with those of other offices. Thus, from 1857 to 1882, the Registrar of the Supreme Court was also Registrar of Births, Deaths and Marriages; from 1882 to 1919, the Government Statistician was the Registrar; as from 1919, the Registrar-General's Department operated as a separate entity.

## The Registrar General

The principal Act under which the Registrar General operates is the Registration of Births and Deaths Act 1895 as amended which provides for district Registrars and the appointment of a Registrat General to be responsible for the maintenance of central registers; in essence, the regional approach of the 1838 Act is retained. The functions of the Registrar General in relation to the registration of marriages were last defined in the Marriage Act 1942. However, in 1961, the Commonwealth Parliament passed the Marriage Act 1961. A few minor provisions (relating mainly to certain extensions of the application of the prohibited degrees) came into operation on the date the Act received the Royal Assent (6th May, 1961) and the remainder of the Act came into operation on ist September, 1963. On this date, the Act superseded the marriage laws of all the States but did not affect the essential function of the Registrar General in the central registration of marriages. (The Commonwealth's passage of a uniform marriage law for Australia was the sequel to negotiations with all States.)

At the office of the Registrar General, there is kept for reference a collection of all registrations made since 1839 , as well as church records relating to earlier periods.

## Summary of Principal Statistics

The principal numbers and rates relating to vital statistics in Tasmania for recent years are given in the following table:

Summary of Vital Statistics

| Year | Number of- |  |  |  | Rate per 1,000 of Mean Population |  |  | Infant <br> Mortality |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Marriages | Live <br> Births | Deaths | Infant Deaths (a) | Marriages | Live Births | Deaths | Deaths Under One Year per 1,000 Live Births |
| 1954 | 2,512 | 7,770 | 2,696 | 186 | 8.08 | 24.98 | 8.67 | 23.9 |
| 1955 | 2,600 | 8,089 | 2,489 | 189 | 8.24 | 25.63 | 7.89 | 23.4 |
| 1956 | 2,601 | 8,104 | 2,513 | 170 | 8.10 | 25.24 | 7.83 | 21.0 |
| 1957 | 2,507 | 8,435 | 2,670 | 170 | 7.63 | 25.68 | 8.13 | 20.2 |
| 1958 | 2,475 | 8,568 | 2,708 | 167 | 7.38 | 25.55 | 8.07 | 19.5 |
| 1959 | 2,567 | 8,625 | 2,780 | 202 | 7.52 | 25.26 | 8.14 | 23.4 |
| 1960 | 2,713 | 8,853 | 2,670 | 169 | 7.82 | 25.52 | 7.70 | 19.1 |
| 1961 | 2,677 | 8,982 | 2,789 | 151 | 7.57 | 25.40 | 7.89 | 16.8 |
| 1962 | 2,485 | 8,894 | 2,870 | 184 | 6.91 | 24.75 | 7.99 | 20.7 |
| 1963 | 2,579 | 8,530 | 2,818 | 153 | 7.08 | 23.42 | 7.74 | 17.9 |
| 1964 | 2,869 | 8,252 | 3,174 | 166 | 7.81 | 22.46 | 8.64 | 20.1 |
| 1965 | 2,888 | 7,535 | 3,043 | 125 | 7.82 | 20.40 | 8.24 | 16.6 |

(a) Deaths under one year; included also in total deaths.

## "Crude Rate" Comparisons

The rates per 1,000 of mean population for births, deaths and marriages are referred to as crude rates. It will be seen, in regard to marriages, that not all the population is "at risk", children and those already married being obvious excluded examples. Similarly, births are clearly events related to certain fertile age groups of women and not to the total population; births also are directly related to the number of married persons and to the age structure of the married proportion of the community. Finally, deaths have a definite relationship with the numbers of each sex and the age structure of the community.

To illustrate, a community experiencing a new trend involving loss of population by migration in the age group $20-35$ years, all things being equal, might be expected to show a decline in the crude marriage and birth rates and an increase in the crude death rate. These variations in crude rates would occur despite the fact that there had been no change in the propensity to marry at specific ages, no change in fertility in specific age groups and no change in life expectancy. It follows that comparisons over time in terms of crude rates may be meaningful in the short term but invalid for longer periods when the age structure and the proportion of married persons may have undergone significant changes.

Subject to these limitations, the following historical comparisons exist as from 1880 :

1. Crude Marriage Rate: highest 10.51 (1946); lowest 5.50 (1895 and 1896).
2. Crude Birth Rate: highest 36.63 (1884); lowest 19.39 (1935).
3. Crude Death Rate: highest 17.41 (1883); lowest 7.70 (1960).

It is probably significant that 1946 was the year of rapid demobilisation after World War II and that a similar marriage trend was recorded for 1919 and 1920 after World War I; as to the minima for marriage and birth rates, the 1890's and 1930's were decades characterised by severe economic depression.

## Reviesy of Infant Mortality

Infant mortality relates to the number of deaths under one year and the rate is expressed as the number of such deaths per 1,000 live births. It follows that comparisons over long periods of time are valid and not affected by the limitations attached to crude rates. In the record of infant mortality, the drop in rates has been dramatic:

Infant Mortality Rate, Selected Years, from 1880

| Year | Deaths under One Year Per 1,000 Live Births | Year | Deaths under One Year Per 1,000 Live Births | Year | Deaths under One Year Per 1,000 Live Births |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 1880 | 112.3 | 1920 | 65.5 | 1960 | 19.1 |
| 1890 | 105.6 | 1930 | 50.6 | 1963 | 17.9 |
| 1900 | 80.0 | 1940 | 35.2 | 1964 | 20.1 |
| 1910 | 101.7 | 1950 | 23.8 | 1965 | 16.6 |

The peak year since 1880 was 1883 with a rate of $\mathbf{1 2 4 . 0}$. In the period $1880-$ 1910, the annual infant mortality rate exceeded 100 on 14 occasions. By way of contrast, the rate in 1965 reached a record minimum of 16.6 .

At the turn of the century, 20 to 25 per cent of all deaths were those of infants under one year. It is apparent that the rapid fall in infant mortality rates will have markedly affected crude death rates, infant deaths being a
component of total deaths. Infant mortality rates are used by some authorities as an index of the degree of civilisation attained by a community; by such standards, Tasmania, in common with other Australian States, ranks extremely high, in comparison with other countries of the world.

## Marriages

The following table summarises the number of marriages and the crude marriage rate since 1880:

Marriages and Crude Marriage Rates, Selected Years from 1880

| Year | Marriages |  | Year | Marriages |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | Number | Crude Rates (a) |  | Number | Crude Rates (a) |
| 1880 | 840 | 7.39 | 1940 | 2,476 | 10.27 |
| 1890 | 954 | 6.66 | 1950 | 2,422 | 9.18 |
| 1900 | 1,332 | 7.72 | 1960 | 2,713 | 7.82 |
| 1910 | 1,493 | 7.82 | 1963 | 2,579 | 7.08 |
| 1920 | 1,999 | 9.50 | 1964 | 2,869 | 7.81 |
| 1930 | 1,450 | 6.56 | 1965 | 2,888 | 7.82 |

(a) Number of marriages per 1,000 of mean population.

A feature of recent years has been the increase in the proportion of marriages which involve minors. This trend, dating from the end of World War II, still continues as shown in the following table:

Marriages of Minors

| Year | Age in Years |  |  |  |  |  |  | Total |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 14 | 15 | 16 | 17 | 18 | 19 | 20 | Number | Percentage of Total Marriages (a) |
| Bridegrooms |  |  |  |  |  |  |  |  |  |
| 1959 | . |  |  | 12 | 56 | 98 | 165 | 331 | 12.89 |
| 1960 | $\ldots$ | $\cdots$ | 1 | 13 | 66 | 118 | 203 | 401 | 14.78 |
| 1961 | $\ldots$ | . | 3 | 5 | 66 | 132 | 198 | 404 | 15.09 |
| 1962 | . |  | 1 | 10 | 58 | 120 | 195 | 384 | 15.45 |
| 1963 | $\ldots$ |  | 2 | 18 | 71 | 118 | 228 | 437 | 16.94 |
| 1964 | . | $\cdots$ |  | 8 | 79 | 142 | 254 | 483 | 16.84 |
| Brides |  |  |  |  |  |  |  |  |  |
| 1959 | 1 | 7 | 80 | 179 | 264 | 321 | 355 | 1,207 | 47.02 |
| 1960 | 2 | 12 | 94 | 209 | 283 | 347 | 344 | 1,291 | 47.59 |
| 1961 |  | 8 | 93 | 185 | 290 | 359 | 331 | 1,266 | 47.29 |
| 1962 | 1 | 14 | 79 | 192 | 286 | 329 | 318 | 1,219 | 49.06 |
| 1963 | 2 | 12 | 94 | 193 | 296 | 361 | 311 | 1,269 | 49.20 |
| 1964 |  | 1 | 118 | 237 | 314 | 382 | 370 | 1,422 | 49.56 |

(a) i.e. percentage of all marriages, including those involving adults.

The next table analyses the ages of all bridegrooms and brides contracting marriages in 1964:

Age of Bridegrooms and Brides, 1964

The prevailing trend towards earlier marriage still continues as shown in the table below, the indicator being the average age of bridegrooms and brides:

## Average Age of Bridegrooms and Brides (Years)

| Particulars | 1959 | 1960 | 1961 | 1962 | 1963 | 1964 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Average Age of Bridegrooms- |  |  |  |  |  |  |
| Bachelors | 25.00 | 24.96 | 24.65 | 24.74 | 24.23 | 24.25 |
| Widowers | 54.76 | 56.06 | 54.58 | 55.12 | 56.63 | 57.44 |
| Divorcees | 39.81 | 40.25 | 40.06 | 40.07 | 41.43 | - 42.02 |
| All Bridegrooms | 27.04 | 27.17 | 26.79 | 26.89 | 26.48 | 26.64 |
| Average Age of Brides- |  |  |  |  |  |  |
| Spinsters | 21.53 | 21.22 | 21.48 | 21.22 | 21.16 | 21.09 |
| Widows | 47.46 | 49.33 | 45.64 | 49.86 | 49.25 | 51.39 |
| Divorcees | 35.08 | 35.99 | 35.52 | 37.47 | 36.97 | 38.14 |
| All Brides | 23.42 | 23.36 | 23.37 | 23.41 | 23.10 | 23.30 |

In the next table, the conjugal condition of persons marrying is shown for a six-year period:

Conjugal Condition of Persons Marrying

| Year | Bridegrooms |  |  | Brides |  |  | Total Marriages |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Bachelors | Widowers | Divorced | Spinsters | Widows | Divorced |  |
| 1959 | 2,308 | 95 | 164 | 2,304 | 104 | 159 | 2,567 |
| 1960 | 2,444 | 111 | 158 | 2,428 | 120 | 165 | 2,713 |
| 1961 | 2,403 | 100 | 174 | 2,406 | 119 | 152 | 2,677 |
| 1962 | 2,225 | 91 | 169 | 2,221 | 93 | 171 | 2,485 |
| 1963 | 2,334 | 100 | 145 | 2,332 | 89 | 158 | 2,579 |
| 1964 | 2,581 | 112 | 176 | 2,592 | 122 | 155 | 2,869 |

Over the last ten years, the months in which marriages most frequently occur are April, followed by December and January in that order; July appears
to be the least popular. The numbers of marriages performed according to the rites of the principal religious denominations and of civil marriages contracted before Registrars are shown below for recent years:

Marriages, Religious and Civil

| Particulars of Celebration | 1959 | 1960 | 1961 | 1962 | 1963 | 1964 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Religious Rites- |  |  |  |  |  |  |
| Church of England | 923 | 975 | 974 | 855 | 934 | 1,108 |
| Catholic .. | 522 | 564 | 567 | 522 | 518 | 605 |
| Presbyterian | 133 | 138 | 152 | 125 | 113 | 138 |
| Methodist | 388 | 439 | 406 | 367 | 398 | 377 |
| Congregational | 40 | 36 | 31 | 43 | 46 | 31 |
| Baptist | 66 | 61 | 76 | 64 | 85 | 75 |
| Church of Christ | 25 | 22 | 23 | 16 | 23 | 25 |
| Salvation Army | 26 | 27 | 25 | 19 | 20 | 21 |
| Seventh Day Adventist | 6 | 4 | 10 | 3 | 5 | 6 |
| Other . . | 42 | 52 | 51 | 60 | 74 | 71 |
| Civil Ceremonies (a) | 396 | 395 | 362 | 411 | 363 | 412 |
| Total | 2,567 | 2,713 | 2,677 | 2,485 | 2,579 | 2,869 |

(a) Marriages contracted before Registrars.

## Divorce

Divorce in Tasmania was previously provided for under the Matrimonial Causes Act 1860 as amended in 1864, 1874 and 1959. However, as from rst February, 1961, Australia came under uniform divorce law, the new Matrimonial Causes Act 1959 of the Commonwealth Parliament having come into effect on that date. (Like the uniform marriage law, the Commonwealth legislation relating to divorce was the sequel to negotiations with the States.)

In 1964, dissolutions of marriage exceeded eight per cent of the number of marriages contracted for that year ( 230 dissolutions against 2,869 marriages). The increase in the number of annual dissolutions is summarised in the historical table which follows.

Dissolutions of Marriage (a) Granted, Summary from 1881

| Decade Ending- | Maximum in Decade |  | Minimum in Decade |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Year | Number | Year | Number |
| 1890 | 1886 | 6 | 1884 |  |
| 1900 | 1894 | 6 | 1896 | 3 |
| 1910 | 1909 | 13 | 1904 | 2 |
| 1920 | 1920 | 18 | 1916 | 2 |
| 1930 | 1928 | 55 | 1924. | 20 |
| 1940 | 1938 | 109 | 1937 | 30 |
| 1950 | 1949 | 266 | 1942 | 83 |
| 1960 | 1954 | 233 | 1958 | 176 |

(a) Includes nullities of marriage and judicial separations.

The following table gives the number of petitions filed by husbands and wives respectively, and the number of dissolutions of marriage during the last six years. Every decree of dissolution of marriage is, in the first instance, a decree nisi and is not made absolute till the expiration of not less than three months thereafter.

Vital Statistics
Petitions Filed and Dissolutions Granted

| Particulars | 1959 | 1960 | 1961 | 1962 | 1963 | 1964 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Petitions for Dissolution (a) Filed By- |  |  |  |  |  |  |
| Husband .. .. .. | 123 | 136 | 154 | 127 | 126 | 149 |
| Wife | 160 | 138 | 168 | 153 | 147 | 175 |
| Total Petitions | 283 | 274 | 322 | 280 | 273 | 324 |
| Dissolutions (a) Granted on Petition of- |  |  |  |  |  |  |
| Husband | 100 | 93 | 124 | 125 | 108 | 116 |
| Wife | 122 | 117 | 162 | 124 | 153 | 114 |
| Total Dissolutions | 222 | 210 | 286 | 249 | 261 | 230 |

(a) Includes nullities of marriage and judicial separations.

The next table deals with petitions filed in 1964:
Petitions Filed, 1964

| Petition For- | Petitioner |  | Total |
| :---: | :---: | :---: | :---: |
|  | Husband | Wife |  |
| Dissolution . Nullity | 149 | 173 | 322 |
| Judicial Separation . . | $\cdots$ | 2 | 2 |
| Total | 149 | 175 | 324 |

The table that follows analyses the grounds on which dissolutions were granted during 1964:

Dissolutions Granted According to Grounds, 1964

| Grounds | Petitioner |  | Total |
| :---: | :---: | :---: | :---: |
|  | Husband | Wife |  |
| Dissolution of Marriage |  |  |  |
| $\begin{array}{ccc}\begin{array}{c}\text { Single Ground- } \\ \text { Desertion }\end{array} & & \\ \text { Adultery } & \ldots & \ldots \\ \text { Separation (a) } & \cdots & \ldots \\ \text { Cruelty .. } & \ldots & \ldots \\ \text { Drunkenness } & \cdots & . .\end{array}$ | 48 37 20 | 47 17 25 9 6 | 95 54 45 9 6 |
| Dual GroundsDesertion and Adultery Desertion and Separation Cruelty and Drunkenness | 5 4 1 | 2 4 2 | 7 8 3 |
| Three Grounds or More . . | . | 2 | 2 |
| Total | 115 | 114 | 229 |
| Nullity |  |  |  |
| Pregnant at time of marriage | 1 | . | 1 |

[^0]Below is given a summary of the more frequent grounds for the granting of dissolutions:

Dissolutions (a) Granted According to More Frequent Grounds

| Grounds |  | 1959 | 1960 | 1961 | 1962 | 1963 | 1964 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| On Petition of Husband- |  |  |  |  |  |  |  |
| Adultery | $\ldots$ | 52 | 49 | 47 | 42 | 32 | 37 |
| Desertion | . | 48 | 44 | 63 | 60 | 46 | 48 |
| Separation (b) | $\cdots$ | . | .. | 13 | 18 | 23 | 20 |
|  |  | . | $\cdots$ | 1 | 5 | 7 | 11 |
| On Petition of Wife- |  |  |  |  |  |  |  |
| Adultery .. | . | 30 | 20 | 34 | 14 | 27 | 17 |
| Desertion . |  | 87 | 91 | 102 | 54 | 66 | 47 |
| Separation (b) |  |  |  | 18 | 41 | 40 | 25 |
| Other .. | $\cdots$ | 5 | 6 | 8 | 15 | 20 | 25 |
| Total | . | 222 | 210 | 286 | 249 | 261 | 230 |

(a) Includes nullities and judicial separations.
(b) Separation became a ground for dissolution under the Commonwealth Matrimonial Causes Act, 1959.
In the following table, an analysis is made of the ages of the parties concerned in the dissolutions of marriage during 1964:

Dissolutions of Marriage, 1964—Ages of Parties at Time of Dissolution

| Age of Husband (Years) | Age of Wife (Years) |  |  |  |  |  | Total Husbands |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Under $21$ | 21-29 | 30-39 | 40-49 | 50-59 | 60 and over |  |
| Under 21 |  |  |  | $\cdots$ | . | $\cdots$ |  |
| 21-29.. | 4 | 39 | 1 | $\cdots$ | $\cdots$ | . | 44 |
| 30-39... | 7 | 40 | 34 | 3 | $\cdots$ | . | 84 |
| 40-49 . . | . . | 4 | 24 | 31 | 1 |  | 60 |
| 50-59 . . . | $\ldots$ | . | 1 | 15 | 12 |  | 28 |
| 60 and over | $\ldots$ |  | . | 1 | 8 | 5 | 14 |
| Total Wives | 11 | 83 | 60 | 50 | 21 | 5 | 230 |

In the next table, particulars are given of the duration of marriage and issue in respect of dissolutions of marriage during 1964:

Dissolutions of Marriage, 1964-Duration of Marriage and Issue

| Duration of Marriage (Years) | Dissolutions of Marriages with- |  |  |  |  |  | Total Marriages Dissolved | Total Number of Children (a) |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | $\begin{array}{\|c\|} \hline \text { No } \\ \text { Children } \end{array}$ | $\stackrel{1}{\text { Child }}$ | $\begin{array}{\|c} 2 \\ \text { Children } \end{array}$ | $\begin{gathered} 3 \\ \text { Children } \end{gathered}$ | $\begin{gathered} 4 \\ \text { Children } \end{gathered}$ | 5 or more Children |  |  |
| 0-4 | 13 | 14 | 3 |  |  |  | 30 | 20 |
| 5-9 | 21 | 13 | 19 | 3 | 1 | 1 | 58 | 69 |
| 10-14 | 9 | 10 | 18 | 7 | 4 | 3 | 51 | 99 |
| 15-19 | 5 | 6 | 4 | 6 | 5 | 3 | 29 | 70 |
| 20-24 . | 4 | 9 | 9 | 5 | 2 | 2 | 31 | 64 |
| 25-29 .. | 7 |  | 4 | 1 | . | . | 12 | 11 |
| 30-34 | 10 | 2 | 1 | .. | . . | . | 13 | 4 |
| 35-39 | 1 |  | 1 | $\ldots$ | . | . | 2 | 2 |
| 40-44 . | 3 | 1 | . | . | . | . | 4 | 1 |
| 45 and over | . | . | . | . | .. |  |  | . |
| Total Dissolutions | 73 | 55 | 59 | 22 | 12 | 9 | 230 | . |
| Total Children (a) | . | 55 | 118 | 66 | 48 | 53 | . | 340 |

[^1]Petitions and Dissolutions, 1965
In 1965, 331 petitions were filed for dissolution of marriage, (including 3 for declarations of nullity). In the same year, 279 dissolutions of marriage were granted, not including one judicial separation.

## Births

The following table summarises births and crude birth rates from 1880:

| Number of Births and Crude Birth Rates, Selected Years from 1880 |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Year | Births |  | Year | Births |  |
|  | Number | Per 1,000 of Mean Population |  | Number | Per 1,000 of Mean Population Population |
| 1880 | 3,739 | 32.90 | 1930 | 4,785 | 21.66 |
| 1885 1890 | 4,637 4 4 | 36.29 | 1935 | 4,456 | 19.39 |
| 1895 | 4,813 4,790 | 33.60 31.16 | 1940 | 4,994 <br> 5 <br> 785 | 20.71 |
| 1900 | 4,864 | 28.18 | 1950 | 7,742 | 23.27 25.96 |
| 1905 | 5,257 | 28.50 | 1955 | 8,089 | 25.63 25.63 |
| 1910 | 5,586 | 29.25 | 1960 | 8,853 | 25.52 |
| 1915 | 5,845 5 | 29.78 | 1963 | 8,530 | 23.42 |
| 1920 | 5,740 5,218 | 27.29 24.21 | 1964 | 8,252 <br> 8,535 | 22.46 20.40 |
|  |  | 24.21 | 1965 | 7,535 | 20.40 |

The next table shows, for a six-year period, the number of births and the age-groups of the mothers:
Number of Births Classified According to Age of Mother, and Crude Birth Rates

| Age Group of Mothers (Years) | 1959 | 1960 | 1961 | 1962 | 1963 | 1964 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 10-14 | 3 | 6 | 3 | 8 | 5 | 2 |
| 15-19 | 829 | 894 | 957 | 988 | 1,001 | 1,073 |
| 20-24 | 2,801 | 2,925 | 2,949 | 2,997 | 2,869 | 2,834 |
| 25-29 | 2,329 | 2,378 | 2,383 | 2,371 | 2,302 | 2,190 |
| 30-34 | 1,484 | 1,540 | 1,536 | 1,471 | 1,368 | 1,196 |
| $35-39$ $40-44$ | 922 | 856 | 879 | 772 | 717 | 704 |
| 45 and over | 242 15 | 234 20 | 254 21 | 264 23 | 255 13 | 231 |
| Total .. | 8,625 | 8,853 | 8,982 | 8,894 | 8,530 | 8,252 |
| Crude Birth Rate (a) | 25.26 | 25.52 | 25.40 | 24.75 | 23.42 | 22.46 |

(a) Births per 1,000 of mean population.

One common observation is that births of males, in total, usually exceed those of females. The next table shows births by sex and indicates masculinity:

Births by Sex and Masculinity

| Particulars |  | 1959 | 1960 | 1961 | 1962 | 1963 | 1964 |
| :---: | :---: | ---: | ---: | ---: | ---: | ---: | ---: |
| Births of- |  |  |  |  |  |  |  |
| Males | $\ldots$ | 4,423 | 4,483 | 4,635 | 4,629 | 4,428 | 4,218 |
| Females | .. | 4,202 | 4,370 | 4,347 | 4,265 | 4,102 | 4,034 |
| Total .. | .. | 8,625 | 8,853 | 8,982 | 8,894 | 8,530 | 8,252 |
| Masculinity (a) | .. | 105.26 | 102.59 | 106.63 | 108.53 | 107.95 | 104.56 |

[^2]In the following table, births are analysed by sex and by the age of the mother and classified as nuptial or ex-nuptial:

Births by Sex, Age of Mother and Nuptial State, 1964

| Age Group of Mothers (Years) | Nuptial |  |  |  | Ex-Nuptial |  | All Births |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | First Born (a) |  | Subsequent Birth |  | Male | Female | Male | Female | 'Total |
|  | Male | Female | Male | Female |  |  |  |  |  |
| 10-14 |  |  |  |  |  | 12 |  | ${ }_{511}^{2}$ | 2 1073 |
| 15-19 | 336 | 293 | 101 | 111 | 125 | 107 | 562 | 511 | 1,073 |
| 20-24 | 532 | 562 | 860 | 753 | 57 | 70 | 1,449 | 1,385 | 2,834 |
| 25-29 | 198 | 182 | 897 | 853 | 32 | 28 | 1,127 | 1,063 | 2,190 |
| 30-34 | 59 | 57 | 519 | 526 | 19 | 16 | 597 | 599 | 1,196 |
| 35-39 | 28 | 35 | 320 | 291 | 10 | 20 | 358 | 346 | 704 |
| 40-44 | 4 | 9 | 106 | 98 | 3 | 11 | 113 | 118 | 231 |
| 45 and over |  | 1 | 11 | 8 | 1 | 1 | 12 | 10 | 22 |
| Total | 1,157 | 1,139 | 2,814 | 2,640 | 247 | 255 | 4,218 | 4,034 | 8,252 |

(a) In case of plural births with no previous issue, first child born alive is recorded as "First Born" and subsequent child or children as "Subsequent Birth".
The table that follows summarises, for a six-year period, births according to whether the child was first-born or the issue of a subsequent birth:

## Births of First Born and Subsequent Births; Nuptial State of Mothers

It should be noted that "first born" in the previous tables refers specifically to the union from which the child originates; thus a mother married for the second time could be credited with a "first-born" child despite issue from the previous union.

## Birth Registrations

In 1964, the following were recorded by the Registrar General: nuptial births, 7,750; ex-nuptial births, 502; registrations under Births Legitimation Act, 58 .

## Infant Mortality

Infant mortality relates to children dying within one year of birth. The table that follows analyses such deaths at specified ages but a break in comparability occurs in 1962 when a more detailed analysis was employed and "one month" was replaced by "four weeks". The break in comparability is partly bridged by quoting 1962 figures both on the old and new basis of classification.

Infant Mortality-Number of Deaths and Mortality Rates at Specific Ages

| Year |  | Infant Deaths |  | Mortality Rate (a) at Age Specified- |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Number | Per 1,000 Live Births | Under 1 Week | 1 Week and under 1 Mth. | 1 Month and under 12 Mths |
| 1954 |  | 186 | 23.9 | 15 | 2 | 7 |
| 1955 | $\cdots$ | 189 | 23.4 | 15 | 2 | 6 |
| 1956 | . | 170 | 21.0 | 13 | 2 | 6 |
| 1957 |  | 170 | 20.2 | 12 | 1 | 7 |
| 1958 | $\cdots$ | 167 | 19.5 | 10 | 2 | 7 |
| 1959 |  | 202 | 23.4 | 13 | 2 | 9 |
| 1960 | $\cdots$ | 169 | 19.1 | 10 | 1 | 8 |
| 1961 |  | 151 | 16.8 | 11 | 1 | 5 |
| 1962 | . $\cdot$ | 184 | 20.7 | 12 | 2 | 7 |
| Year | Infant Deaths |  | Mortality Rate (a) at Age Specified- |  |  |  |
|  | Number | Per 1,000 <br> Live Births | Under 1 Day | 1 Day and under 1 Week | 1 Week and under 4 Wks | 4 Weeks and under 12 M ths |
| 1962 | 184 | 20.7 | 7 | 5 | 2 | 7 |
| 1963 | 153 | 17.9 | 6 | 5 | 1 | 6 |
| 1964. | 166 | 20.1 | 6 | 7 | 1 | 6 |

(a) Infant deaths per 1,000 live births; rates have been rounded to whole numbers.

## Cause of Infant Deaths

The next table shows the causes of infant deaths during the last six years, with specification of groups of items and single items:

Infantile Mortality-Causes of Deaths Under One Year

(a) Principally infective and parasitic diseases.

All death statistics, including those relating to infant mortality, are compiled in accordance with the Seventh Revision (1955) of the International List of Causes of Death (World Health Organisation).

## Deaths

The following table summarises the number of deaths and crude death rates since 1880 :

Number of Deaths and Crude Death Rates, Selected Years from 1880

A marked difference exists between male and female crude death rates as shown in the next table:

Male and Female Deaths and Crude Rates

| Year | Number of <br> Deaths |  |  |  | Deaths Per 1,000 of <br> Mean Population |  |  | Ratio of Male <br> to Female <br> Crude Death |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  |  |  |  |  |  |
| 1954 | $\ldots$ | 1,493 | 1,203 | 2,696 | 9.43 | 7.87 | 8.67 | 1.198 |
| 1955 | $\cdots$ | 1,351 | 1,138 | 2,489 | 8.41 | 7.34 | 7.89 | 1.146 |
| 1956 | $\cdots$ | 1,378 | 1,135 | 2,513 | 8.43 | 7.20 | 7.83 | 1.171 |
| 1957 | $\cdots$ | 1,514 | 1,156 | 2,670 | 9.06 | 7.17 | 8.13 | 1.263 |
| 1958 | $\cdots$ | 1,534 | 1,174 | 2,708 | 9.01 | 7.11 | 8.07 | 1.267 |
| 1959 | $\cdots$ | 1,553 | 1,227 | 2,780 | 8.97 | 7.29 | 8.14 | 1.230 |
| 1960 | $\cdots$ | 1,546 | 1,124 | 2,670 | 8.79 | 6.57 | 7.70 | 1.338 |
| 1961 | $\cdots$ | 1,601 | 1,188 | 2,789 | 8.93 | 6.82 | 7.89 | 1.309 |
| 1962 | $\cdots$ | 1,622 | 1,248 | 2,870 | 8.90 | 7.04 | 7.99 | 1.264 |
| 1963 | $\cdots$ | 1,601 | 1,217 | 2,818 | 8.68 | 6.77 | 7.74 | 1.282 |
| 1964 | $\cdots$ | 1,797 | 1,377 | 3,174 | 9.67 | 7.58 | 8.64 | 1.276 |

In the following table, crude death rates for Tasmania are compared with those of the continental States:

Australian States-Crude Death Rates (a)

| State | 1921 (b) | 1933 (b) | 1947 (b) | 1954 (b) | 1961 (b) | 1963 | 1964 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| N.S.W. | 9.50 | 8.58 | 9.53 | 9.46 | 8.95 | 9.19 | 9.58 |
| Victoria | 10.52 | 9.59 | 10.44 | 9.20 | 8.37 | 8.81 | 8.80 |
| Queensland | 9.37 | 8.83 | 9.15 | 8.64 | 8.42 | 8.50 | 9.16 |
| S.A. | 10.02 | 8.44 | 9.62 | 9.02 | 8.06 | 8.13 | 8.63 |
| W.A. | 10.42 | 8.64 | 9.39 | 8.38 | 7.77 | 7.73 | 8.14 |
| Tasmania.. | 10.30 | 9.60 | 9.17 | 8.67 | 7.89 | 7.74 | 8.64 |
| Australia (c) | 9.91 | 8.92 | 9.69 | 9.10 | 8.47 | 8.69 | 9.03 |

(a) Deaths per 1,000 of mean population.
(b) Census year.
(c) Includes Australian Capital Territory and Northern Territory.

## Death Rates for Specific Age Groups

Previously in this chapter, crude death rates were described as unsuitable for comparisons over long periods of time due to changes in the age structure of the community. In the following table, this difficulty is overcome by calculating death rates for specific age groups. The method employed is to obtain the average annual deaths for specific age groups over those three-year periods which are broken in equal parts by a census of population (e.g. 3oth June, 1933, is the census date for a calculation of rates in the three years 1932I934 inclusive). Rates can then be calculated by comparing the average number of deaths for each group with the number of persons in each group as revealed by the census. In theory, the calculation of such rates need not be restricted to periods for which a census date forms the midpoint but the advantage of accepting such restriction lies in the accuracy of the age distribution obtained from the census. In the table, three-year periods have been selected appropriate to the censuses of 1933 and ig6i.

Death Rates for Specific Age Groups (a)

(a) Rate per 1,000 of the population in the specified age group at census date.

While specific death rates for females in the age groups $55-74$ years have decreased in the period covered by the table, corresponding rates for males in the same age groups have actually increased. Attention is also called to the differential rates applying to males and females in age groups $15-34$ for the period 1960-62.

## Causes of Death

The Sixth (1948) Revision of the International List of Causes of Death was adopted for use in classifying causes of death in 1950.

The Revision introduced international rules for a uniform method of selecting the underlying cause of death to be tabulated if more than one cause is stated on the death certificate. The adoption of the 1948 revision affected the comparability of statistics for years prior to 1950 with those for 1950 and subsequent years.

## Demography

The Seventh (1955) Revision of the International List of Causes of Death was adopted for use in 1958 but has not materially affected comparability. The causes of deaths registered in Tasmania in 1964, classified according to the abbreviated list of the Seventh (1955) Revision, the rates per 100,000 of mean population and the proportion of deaths from each cause are shown in the following table:

Causes of Death: Numbers and Rates, 1964

| Cause of Death | Detailed List Numbers | Number of Deaths | Rate per 100,000 of Mean Population | Percentage of Total Deaths |
| :---: | :---: | :---: | :---: | :---: |
| 1. Tuberculosis of Respiratory System. . | 001-008 | 7 | 2 | 0.22 |

| 48. All Other Accidents | E800-E802, |  |  |  |
|  | E840-E962 | 121 | 33 | 3.81 |
| 49. Suicide and Self-inflicted Injuries | $\begin{gathered} \text { E963, E970 } \\ \text { - } 9979 \end{gathered}$ | 42 | 12 | 1.32 |
| 50. Homicide and Operations of War | $\begin{aligned} & \text { E964, E965, } \\ & \text { E980-E999 } \end{aligned}$ | 3 | 1 | 0.09 |
| All Causes | $\cdots$ | 3,174 | 864 | 100.00 |

(a) $040,043,045-048,050,051,055-058,080,084,085,100-108,110-117$.
(b) Lesis than 0.5 .
(c) 030-039, 041, 042, 044, 052-054, 059-074, 081-083, 086-096, 120-138.
(d) $140-148,160,161,164,165,190-203,205$.

It will be noted that Items $4-16$ inclusive in the previous table were not listed, few associated deaths having been recorded. The specification of causes reads: (4) Typhoid Fever; (5) Cholera; (6) Dysentery, All Forms; (7) Scarlet Fever and Streptococcal Sore Throat; (8) Diphtheria; (9) Whooping Cough; (10) Meningococcal Infections; (II) Plague; (I2) Acute Poliomyelitis; (13) Smallpox; (I4) Measles; (15) Typhus and Other Rickettsial Diseases; (16) Malaria. Uncertainty as to diagnosis in earlier periods makes comparison difficult but, at the turn of the century, whooping cough, diphtheria, typhoid fever and scarlet fever were diseases associated with numerous deaths.

## Causes of Death in Age Groups

The previous table showing causes of death makes no reference to age, a complete dissection by age and cause being beyond the scope of a Year Book. Nevertheless, there is an extremely significant relationship between age and cause of death and the next table indicates, in summary form, their close inter-connection.

For each of the specified causes in the table, two percentages are shown:
(i) Deaths in a particular age group as a proportion of total deaths from all causes in that age-group.
(ii) Deaths in a particular age group as a proportion of total deaths from the same cause at all ages.
The causes chosen and specified are such that they account, in total, for approximately 75 per cent or more of deaths in any given age group.

Attention is called to "Accidental and Violent Deaths" (800-999) which account for over 50 per cent of deaths in the age groups five to 14 , is to i9, 20 to 24 , and 25 to 34 years. Also noteworthy is the present relative unimportance of "Infective and Parisitic Diseases" (001-138). The most important group, in a total sense, is "Diseases of the Heart" (401, 410-443) followed by "Malignant Neoplasms-All Forms" (140-205); then "Vascular Lesions Affecting Central Nervous System" (330-334) followed by "Pneumonia, Bronchitis and Influenza" ( $480-502,763$ ); nevertheless, the inter-connection between age and cause of death is so close that none of these causes needs to be specified for some age-groups in the table.

Main Causes of Death (in Age Groups), 1964

Vital Statistics
Main Causes of Death (in Age Groups), 1964-continued

| International List Number | Age Group and Cause of Death | Deaths from Specified Cause |  |  |  |

|  |  | 140 | 10.8 | 296 | 47.3 |
|  | Pneumonia, bronchitis and influenza Other causes | 226 | 17.6 |  |  |

(a) Deaths in the specified age group as a percentage of total deaths for a particular cause.
(b) Includes Hodgkin's disease and the leukaemias.

## Heart Diseases

As the previous table indicates, heart diseases (list items $40 \mathrm{r}, 4 \mathrm{TO}-443$ ) are the greatest single cause of death. In the following record of deaths due to heart diseases, 1950 has been chosen as a start-point since earlier figures are not strictly comparable:

Deaths from Heart Diseases (All Causes) (a)

| Year | Number of Deaths |  |  | Death Rate Per 100,000 of Mean Population | Deaths <br> as a Percentage of Deaths from All Causes |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | Males | Females | Persons |  |  |
| 1950 | 413 | 304 | 717 | 257 | 29.1 |
| 1959 | 553 | 347 | 900 | 264 | 32.4 |
| 1960 | 535 | 356 | 891 | 257 | 33.4 |
| 1961 | 580 | 370 | 950 | 269 | 34.1 |
| 1962 | 622 | 405 | 1,027 | 286 | 35.8 |
| 1963 | 599 | 426 | 1,025 | 281 | 36.4 |
| 1964 | 677 | 454 | 1,131 | 308 | 35.6 |

(a) List items 401, 410-443.

## Tuberculosis

A development of recent years has been the marked decline in deaths attributed to tuberculosis. In the following table, 1950 has been chosen as
the start-point, earlier figures being not strictly comparable due to changes in classification and in the method of determining a single cause of death where multiple causes are shown on the death certificate.

Deaths from Tuberculosis (All Forms) (a)

| Year |  | Number of Deaths |  |  | Death Rate Per 100,000 of Mean Population | Deaths as a Percentage of Deaths from All Causes |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Males | Females | Persons |  |  |
| 1950 | . . | 27 | 44 | 71 | 25 | 2.9 |
| 1959 | .. | 13 | 6 | 19 | 6 | 0.7 |
| 1960 | $\ldots$ | 14 | 8 | 22 | 6 | 0.8 |
| 1961 | . | 10 | 5 | 15 | 4 | 0.5 |
| 1962 |  | 11 | 1 | 12 | 3 | 0.4 |
| 1963 | $\cdots$ | 10 | 4 | 14 | 4 | 0.5 |
| 1964 | . | 10 | 1 | 11 | 3 | 0.3 |

(a) List items 001-019.

## Malignant Neoplasms

In the next table, deaths attributed to list items 140-20) are analysed, the causes being summarised as "Malignant Neoplasms including Hodgkin's Disease and the Leukaemias":

Deaths from Malignant Neoplasms (All Causes) (a)

| Year |  | Number of Deaths |  |  | Death Rate <br> Per 100,000 of <br> Mean Population | Deaths as a Percentage of Deaths from All Causes |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Males | Females | Persons |  |  |
| 1950 | . | 159 | 164 | 323 | 115 | 13.1 |
| 1959 |  | 197 | 171 | 368 | 108 | 13.2 |
| 1960 |  | 230 | 177 | 407 | 117 | 15.2 |
| 1961 |  | 200 | 196 | 396 | 113 | 14.2 |
| 1962 | . | 263 | 203 | 466 | 129 | 16.2 |
| 1963 | . | 207 | 211 | 418 | 115 | 14.8 |
| 1964 | . | 230 | 221 | 451 | 123 | 14.2 |

(a) List items 140-205.

## Lung Cancer

There has been considerable interest recently in lung cancer because of its suspected connection with smoking habits. The following table shows deaths attributed to Malignant Neoplasm of Respiratory System (i60-165) since 1950:

Deaths from Malignant Neoplasm of Respiratory System

| Year | Deaths, List Items 160-165 |  |  | Year | Deaths, List Items 160-165 |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Males | Females | Persons |  | Males | Females | Persons |
| 1950 | 20 | 4 | 24 | 1958 | 29 | 10 | 39 |
| 1951 | 19 | 5 | 24 | 1959 | 43 | 11 | 54 |
| 1952 | 16 | 6 | 22 | 1960 | 40 | 3 | 43 |
| 1953 | 19 | 1 | 20 | 1961 | 47 | 3 | 50 |
| 1954 | 23 | 5 | 28 | 1962 | 70 | 8 | 78 |
| 1955 | 33 | 7 | 40 | 1963 | 44 | 9 | 53 |
| 1956 | 35 | 9 | 44 | 1964 | 51 | 16 | 67 |
| 1957 | 43 | 7 | 50 |  |  |  |  |

## Expectation of Life and Life Tables

Previously reference was made to the limitations of crude death rates as a measure of mortality. However, a correct measurement of the mortality of the population can be obtained from life tables.

A life table is, in effect, a mathematical model, its starting point being a hypothetical population (say ioo,coo) of newly-born males or females. Using data for a given period (e.g. single year age distribution of an actual population, deaths at single ages, etc.), the compiler calculates the theoretical number of survivors at each age in the hypothetical population until there are no survivors remaining.

In the table that follows, $l_{x}$ is the number of persons surviving at exact age $x$. From this survivors' table, other measures can then be computed, namely:-

Lx:- the average number living between any year $x$ and $x+\mathbf{I}$
$\mathrm{e}^{\mathrm{o}} \mathrm{x}$ :- the complete expectation of life (i.e. the average number of years lived after age $x$ by each of a group of persons aged exactly $x$ ).

Not only does the $\mathrm{l}_{\mathrm{x}}$ column give numbers of survivors at each age but, if accumulated, it gives an approximate measure of the total number of years lived by the life-table population. To obtain a more refined measure of the total number of years lived, it is necessary to accumulate Lx values. These can be obtained by averaging each consecutive pair of $l_{x}$ values.

Taking the male life table as an example:

$$
\begin{array}{ll}
\text { Total of all } 1 \times \text { values }(0-105) & =6,763,970 \text { years } \\
\text { Total of all } 1 \times+1 \text { values }(1-105) & =6,663,970 \text { years } \\
\text { Therefore, total } L \times \text { values }(0-105) & =6,713,970 \text { years }
\end{array}
$$

According to the table, 100,000 males live a total of $6,713,970$ years. It follows, then, that the complete expectation of life ( $e^{\circ} \mathrm{x}$ ) can be taken as 67.14 years as from birth.

The above calculation shows the derivation of $\mathrm{e}^{0} \mathrm{x}$ where $x$ is 0 . The same logic applies to all other ages:

Again taking the male life table as an example:

$$
\begin{array}{ll}
\text { Total of } \mathrm{l}_{\mathrm{x}} \text { values (io-105) } & =5,79 \mathrm{I}, 97^{8} \text { years } \\
\text { Total of all } \left.\mathrm{l}_{\mathrm{x}+1} \text { values ( } \mathrm{I} \mathrm{t}-\mathrm{to5}\right) & =5,695,490 \text { years } \\
\text { Therefore, total } \mathrm{Lx} \text { values (10-105) } & =5,743,734 \text { years }
\end{array}
$$

According to the table, 96,488 males live a total of a further $5,743,734$ years. It follows then that each male aged ro has an average life expectancy of a further 59.53 years (i.e. $\frac{5,743,734}{96,488}$ )

From these examples, it will be seen that $\mathrm{e}^{\circ} \mathrm{x}$ is simply an average or per capita figure, the two elements involved being the total number of years lived by a given population and the given population itself.

For the sake of brevity in the table, the following usual values have not been given:
$d x$; the number of deaths in the year of age $x$ to $x+1$ among the $\mathrm{l}_{\mathrm{x}}$ persons who enter on that year.
$p x$; the probability of a person aged $x$ living a year.
$q x$; the probability of a person aged $x$ dying within a year.
If required, these values can be computed from the tables as follows:
$d x=\mathrm{l}_{x}-\mathrm{l}_{\mathrm{x}+1}$

$$
l_{x+1}
$$

$p x=\frac{}{1 \mathrm{x}}$
and $q x=1-p x$

## Australia: Life Tables, 1953-55

## Survivors (1x) and Complete Expectation of Life ( $e^{\circ} \times$ )

Males

| Age $\times$ | 1 x | $e^{0} x$ | Age : | 1 x | $e^{\circ} \mathrm{x}$ | Age $x$ | 1 x | $e^{0} \times$ |

| 34 | 95,643 | 41.62 |  | 71,712 | 12.27 | 104 | 15 | $\cdots$ |

The tables are extracts from those produced by the Commonwealth Actuary, the source data being supplied by the Commonwealth Statistician and comprising: (i) the number of males and females living at each age last birthday, as shown by the 1954 Census; (ii) the number of male and female deaths at each age (last birthday) in the years 1953, 1954 and 1955.

There are no life tables prepared on the basis of Tasmanian experience and in most legal and actuarial situations, it is normal to use the Australian Life Tables. (Life Tables, 1960-62, have now been published.)

## True Death Rates

The true death rate is the reciprocal of the complete expectation of life of a person at birth. In calculating $\mathrm{e}^{\circ} \times$ where $x$ is 0 , the sum of the Ls values was taken as the total number of years lived by the original 100,000 over a period of a century or more. To arrive at the true death rate, the life-table can also be regarded as the experience of a single year so that the sum of the Ls values
no longer represents years lived but simply persons "at risk" in association with roo,000 deaths. By way of illustration, in the male life table the sum of all survivors ( $\mathrm{L} x$ values) is $6,713,970$ males associated with 100,000 deaths:

$$
\text { True Death Rate }=\frac{100,000}{6,713,970}=14.89 \text { per } 1,000
$$

The true death rate for a given period is unaffected by the particular age distribution of that period, and is determined solely by the mortality experience of the period as manifested in the rate of survival from each year of age to the next. The table below sets out complete expectation of life at birth and true death rates for the periods covered by Australian life tables:

Australia-Complete Expectation of Life at Birth and True Death Rates

| Period | Complete Expectation of Life At Birth (Years) |  | True Death Rate (a) |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Males | Females | Males | Females |
| 1881-1890 | 47.20 | 50.84 | 21.19 | 19.67 |
| 1891-1900 | 51.06 | 54.76 | 19.58 | 18.26 |
| 1901-1910 | 55.20 | 58.84 | 18.12 | 17.00 |
| 1920-1922 | 59.15 | 63.31 | 16.91 | 15.80 |
| 1932-1934 | 63.48 | 67.14 | 15.75 | 14.89 |
| 1946-1948 | 66.07 | 70.63 | 15.14 | 14.16 |
| 1953-1955 | 67.14 | 72.75 | 14.89 | 13.75 |

(a) Number of deaths per 1,000 in stationary (or life-table) population.

While the complete expectation of life at birth has shown a marked increase in successive tables, the increase at other ages has not been so pronounced. The following table compares the complete expectation of life at selected ages for the period 1891-1900 with that for 1953-1955:

| Age $\times$ |  | Expectation of Life ( $\mathrm{e}^{\circ} \mathrm{x}$ ) at each age according to experience of period. |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Male Lives |  | Female Lives |  |
|  |  | 1891-1900 | 1953-1955 | 1891-1900 | 1953-1955 |
| 0 | . | 51.06 | 67.14 | 54.76 | 72.75 |
| 5 | $\cdots$ | 55.61 | 64.32 | 58.64 | 69.61 |
| 10 | . | 51.43 | 59.53 | 54.46 | 64.78 |
| 15 | . | 46.98 | 54.72 | 49.97 | 59.90 |
| 20 | . | 42.81 | 50.10 | 45.72 | 55.06 |
| 25 | . | 38.90 | 45.54 | 41.69 | 50.24 |
| 30 |  | 35.11 | 40.90 | 37.86 | 45.43 |
| 35 | . | 31.34 | 36.25 | 34.14 | 40.67 |
| 40 | . | 27.65 | 31.65 | 30.49 | 36.00 |
| 45 | $\cdots$ | 23.99 | 27.18 | 26.69 | 31.44 |
| 50 5 | $\cdots$ | 20.45 | 22.92 | 22.93 | 27.03 |
| 55 | $\cdots$ | 17.08 | 19.00 | 19.29 | 22.81 |
| 60 | $\ldots$ | 13.99 | 15.47 | 15.86 | 18.78 |
| 65 | $\cdots$ | 11.25 | 12.33 | 12.75 | 15.02 |
| 70 | $\cdots$ | 8.90 8.70 | 9.59 | 9.89 | 11.62 |
| 75 | . | 6.70 | 7.33 | 7.37 | 8.69 |
| 80 | - | 5.00 | 5.47 | 5.49 | 6.30 |

It will be noted that $\mathrm{e}^{\circ} \mathrm{x}$ for age s years in the period $189 \mathrm{~T}-1900$ was actually higher than for age o years. This peculiarity was associated with the extremely high rate of infant mortality then prevailing.

[^0]:    (a) Separation became a ground for dissolution under the Commonwealth Matrimonial Causes Act, 1959.

[^1]:    (a) Under 21 years of age.

[^2]:    (a) Number of male births per 100 female births.
