preface

The *Pocket Year Book* is compiled to provide concise, useful and accurate information about Tasmania for the general reader.

Subjects include Tasmania's history, physical features and climate, as well as a wide range of economic and social statistics collected by the ABS. State Government departments and other authoritative organisations have also contributed information which we gratefully acknowledge.

For readers who need more detail than provided here, the Hobart Office of the ABS has extensive information about your area, the State and Australia. This information is available in statistical form in publications, on disk or as part of a tailored consultancy service.

We are happy to assist you:

- at 175 Collins Street, Hobart

- by fax (002) 20 5995

William P. McReynolds
Deputy Commonwealth Statistician and
Government Statistician of Tasmania

Australian Bureau of Statistics Hobart, May 1995

chronology

Aboriginal people first settled Tasmania when it was connected to the Australian mainland by a land bridge, the Bass Plain, over 35 000 years ago.

- 1642 Abel Tasman landed on the east coast naming his discovery Van Diemen's Land.
- 1772 Marion Du Fresne landed at Marion Bay.
- 1777 James Cook anchored in Adventure Bay.
- 1788 William Bligh anchored in Adventure Bay.
- 1798 Bass and Flinders circumnavigated Van Diemen's Land.
- 1803 First settlement at Risdon Cove by John Bowen.
- 1804 Sullivan's Cove settled by David Collins.
- 1806 Settlers moved from York Town to Launceston area.
- 1816 First issue of Hobart Town Gazette circulated.
- 1822 Penal settlement established at Macquarie
- 1828 Martial law proclaimed against Aborigines.
- 1829 First settlement at Emu Bay (Burnie).
- 1830 Beginning of the 'Black Line' to round up Aborigines. Penal settlement of Port Arthur established.
- 1832 Maria Island closed as a penal settlement.
- 1833 Macquarie Harbour penal settlement closed
- 1835 Van Diemen's Land divided into counties and parishes.
- 1842 Hobart made a city. Peak year for convict arrivals (5329).
- 1853 Arrivals of last transported convicts.
- 1854 Passage of a Bill establishing responsible government.
- 1856 Name of Van Diemen's Land changed to Tasmania. Opening of new bi-cameral parliament with W.T.N. Champ as Tasmania's first Premier.
- 1868 Compulsory primary education.
- 1876 Main Line Railway opened for traffic.
- 1877 Port Arthur closed as a penal settlement.
- 1880 First telephone operated in Tasmania.
- 1892 Mount Lyell Mining Co. established.

- 1901 Proclamation of the Commonwealth, first elections held for Senate and House of Representatives, Population 172 475
- 1903 Voting rights extended to women
- 1905 First experiments in wireless telegraphy between Tasmania and the mainland
- 1909 State's first Labor Government under John Earle.
- 1912 Disastrous fire at North Eyell mane. Oueenstown.
- 1914 First aeroplane flight in Tasmania. Departure of first Tasmanian contingent to fight in Great War. Formation of Hydro-Electric Department.
- 1917 Establishment of Electrolytic Zinc Co. at Risdon and a carbide works at Snug.
- 1919 First export of frozen meat.
- 1921 Population 213 780 (Census).
- 1922 Completion of Waddamana power station.
- 1924 First superphosphate manufactured by Electrolytic Zinc Co. at Risdon.
- 1929 Beginning of economic depression. Serious floods throughout the State.
- 1930 Export prices fell to half the 1928 level.
- 1932 Tasmanian, Joseph Lyons was sworn in as Prime Minister.
- 1934 Beginning of 35 years of continuous Labor Government with the election of the A.G. Ogilvie Ministry.
- 1936 Tasmania linked with Victoria by submarine
- 1938 Paper mill using native hardwoods established at Burnie
- 1939 Outbreak of World War II. Prime Minister Lyons died in office.
- 1940 Tasmanians sailed for Middle East with Australian 6th, 7th and 9th Divisions.
- 1941 Newsprint production began at Boyer. Tasmanians sailed for Malaya with Australian 8th Division
- 1947 'Displaced persons' began to arrive from Europe. Population 257 078 (Census).
- 1948 Forty-hour week awarded to most workers.
- 1954 Foundation of the Metropolitan Transport Trust.
- 1955 Comalco aluminium plant at Bell Bay officially opened.
- 1959 Princess of Tasmania commenced roll-on roll-off ferry service. Melbourne to Devonport.

- 1960 Inland Fisheries Commission created. First Tasmanian television broadcast.
- 1964 Tasman Bridge opened. Hobart's water supply fluoridated.
- 1966 Decimal currency introduced. STD (Subscriber Trunk Dialling) introduced.
- 1967 On 7 February, bushfires in Southern Tasmania resulted in 62 deaths, over 1000 houses destroyed, total property damage over \$25m.
- 1968 Capital punishment abolished.
- 1969 Centre Party-Liberal coalition government. Full bench of Federal Arbitration Commission granted equal pay to females performing equal work. Copper smelter at Mount Lyell closed.
- 1970 Introduction of daylight saving.
- 1971 APPM Ltd Wesley Vale paper plant opened. Population 390 413 (Census).
- 1973 The first legal casino in Australia, Wrest Point, officially opened. The \$121m Mersey-Forth HEC scheme officially opened.
- 1974 Workers under State Wages Board's awards granted four-weeks annual leave. Women under State Wages Board's determinations awarded equal pay Gordon Dam completed.
- 1975 The Australian National Line ore carrier, *Lake Illawarra*, collided with the Tasman Bridge. Hotels allowed to open for Sunday trading.
- 1976 Sea cargo to and from Tasmania was subsidised by a freight equalisation scheme.
- 1977 Commonwealth Government confirmed Kingston as the site of Australia's new Antarctic Division Headquarters. Tasman Bridge re-opened.
- 1978 Tasmanian Railways came under full control of the Australian National Railways Commission. All regular passenger train services ceased.
- 1979 HEC released a report which recommended a \$1360m power development scheme involving the Lower Gordon, Franklin and King rivers.
- 1981 The Premier, Doug Lowe, deposed. A referendum concerning the State's next power development mostly supported the Gordon-below-Franklin option.
- 1982 The Liberal Party formed government in its own right for the first time in Tasmania's history The World Heritage Commission listed Tasmania's South-West Wilderness Area. Despite the listing, the State Govt commenced the Gordon-below-Franklin scheme.

- 1983 The Commonwealth Labor Govt intervened to stop the Gordon-below-Franklin Dam and the State Govt's High Court challenge failed.
- 1984 New projects opened included the Bowen Bridge in Hobart, the Southern Outlet to the Huon Valley and the Launceston International Velodrome
- 1985 The Abel Tasman took over the Bass Strait ferry run.
- 1986 The State Liberal Govt won a second term. Environmental issues were involved in conflict over logging, and construction of the Sheraton Hotel.
- 1987 The Commonwealth Govt's Helsham Inquiry was established to decide whether the Lemonthyme and Southern forests were of World Heritage value.
- 1988 Bicentennial celebrations attracted 200 ships to Hobart. The Tasmanian Govt agreed to protect 80% of the Helsham Inquiry area, the Lemonthyme and Southern forests. In exchange the Commonwealth Govt would not pursue World Heritage Listing and offered \$40m compensation. Burnie and Clarence gained city status.
- 1989 The State election resulted in a Labour-Green Accord, Newly elected Labor MHA, Jim Cox, was offered a bribe to support the Liberal Govt.
- 1990 The World Rowing Championships were held at Lake Barrington Businessman Edmund Rouse pleaded guilty to attempting to bribe Labor MHA. Jim Cox.
- 1991 A 100 km/h maximum speed limit introduced for Tasmanian roads. Ray Groom replaced Robin Gray as leader of the Liberal Party.
- 1992 The Liberal Party won office in Tasmania with 19 seats.
- 1993 Joanne Dick from Launceston won the Miss Australia Title. The *Spirit of Tasmania* replaced the *Abel Tasman* on the Bass Strait service.
- 1994 New tougher gun laws came into operation Anthony Power Station, Tribute, came on line. Local Govt elections in 18 councils were held by postal ballot rather than the traditional polling booth method Catamaran Condor II grounded on Black Jack Rocks. The Morling Report recommended no reduction in the number of members of the House of Assembly or Legislative Council.

tasmania in brief

Tasmania, the smallest of Australia's six States, is an island lying below the south-east corner of the Australian mainfand. Roughly triangular in shape, the main island is surrounded by a number of smaller islands, including King, Flinders and Bruny islands.

The total area of the State, including the smaller islands, is 68 331 km² or about 0.9 per cent of the total area of Australia. It is separated from the mainland by Bass Strait, a shallow body of water with an average width of 240 kilometres. The remaining coastline is bounded by the Southern Ocean on the south and west and the Tasman Sea on the east. At its greatest length, Tasmania spans some 296 kilometres from north to south; at its greatest width, it is 315 kilometres from the eastern coast to the western coast.

CITIES

Hobart

Hobart, Tasmania's capital city, is situated in the south of the State, 20 kilometres from the mouth of the Derwent River. The city extends over both sides of the river, the western extent being bounded by Mount Wellington (1269 metres).

It is the second oldest city in Australia, having been founded in 1804. There are many examples of early colonial architecture in Hobart, such as Australia's oldest theatre, the Theatre Royal, built in 1837 and still in use today. The growth of the city accelerated in the mid-nineteenth century as Hobart became a major whaling port and important ship-building centre. Today, its modern deepwater port can handle the largest ships, and there is a modern container terminal. Hobart has become a popular port for visiting luxury cruising ships.

Attractions around Hobart include the beautiful Botanical Gardens featuring a wide range of native and introduced flora; the

Derwent River and surrounding beaches, which provide many recreational activities: Constitution Dock, which plays host to hundreds of sailors who compete in the Sydney to Hobart and Westcoaster yacht races during the Christmas-New Year period; and Australia's first legal casino, Wrest Point.

Launceston

Launceston is situated at the head of the Tamar River at the confluence of the South and North Esk rivers. It was settled in 1806 and is Australia's third oldest city. Like Hobart, it has many historical buildings and places of interest. The Queen Victoria Museum and Art Gallery houses a notable collection of historical and contemporary artwork. Launceston possesses some particularly attractive parks and gardens dating from the Victorian and Edwardian eras. The City Park, Princes Square and the Gorge Reserve have some fine examples of the architecture of these periods.

Glenorchy

Glenorchy, part of the Hobart metropolitan area. was proclaimed a city in 1964. It consists mainly of residential areas, business and light industry. The Bowen Bridge across the Derwent provides a direct link between Glenorchy and the Eastern Shore.

Devonport

Devonport gained city status in 1981 to become the first city on the North-West Coast. The Bass Strait passenger ferry terminal is located at Devonport, hence the common description of the city as 'The Gateway to Tasmania'.

Visitors can see the steam locomotive collection running on the Don Railway, swim at The Bluff, or simply tour the surrounding countryside taking in the many scenic attractions of the North-West Coast.

Burnie became Tasmania's fifth city in 1988. Situated on Emu Bay, it is a deepwater port which serves the West Coast mining areas. It has expanded rapidly, largely because of its industrial base, which includes North Forest Products (a major forest-products complex) and

Tioxide Australia Pty Ltd (a manufacturer of titanium pigments).

Clarence

Clarence obtained city status in 1988. Situated on the eastern shore of the Derwent River it forms part of the Hobart metropolitan area. The population of Clarence has increased steadily over many years and consists mainly of residential areas, retail businesses and community support services.

REGIONS

South

Southern Tasmania is dotted with historic townships, for example Richmond. New Norfolk and Hamilton, all of which retain enough of their original features to allow the visitor a glimpse of the conditions under which the early settlers existed. Richmond in particular remains a model example of the early penal outstation, with its gaol, renowned bridge and churches.

The rugged coastline and rock formations of the Tasman Peninsula today provide spectacular scenery for travellers on the road from Hobart to Port Arthur; for the convict population held on the peninsula in the early nineteenth century the rugged terrain was a means of imprisonment. The remaining convict buildings are centred around Port Arthur, where today the impressive remains of the never-consecrated church and the model prison and penitentiary portray the severity of the convict era of Tasmania's history.

Orchard fruit, mainly apples and pears, as well as berry fruit, are grown in the south for both local consumption and export. The advent of the European Common Market diminished the apple industry, for which the State was famous, but fruit production remains a significant activity in the Huon.

Industries in the southern area include the Cadbury Schweppes cocoa and confectionery factory at Claremont, Pasminco Metals-EZ at Risdon, the Australian Newsprint Mills at Boyer. Stanley Tools, Textile Industries Australia, International Catamarans and the Cascade

Brewery, established in 1824, the oldest brewery still in operation in Australia.

Fast Coast

A popular holiday destination, the East Coast features miles of white beaches with excellent surf. as well as many other places of interest. Freycinet Peninsula, the Blow Hole at Bicheno and Maria Island are all easily accessible to tourists.

A variety of fishing activities is based in the ports of St Helens and Bicheno. Catches include crayfish (southern rock lobster) and abalone.

North-East

The rich soil of this area provides good land for farming, an activity important to the State's economy. Beef and dairy cattle, wool sheep and prime lambs are run here. Vegetables, grown mainly for processing, are a significant component of the region's agriculture. A wide variety of crops is grown, and the Department of Defence maintains an experimental establishment in Scottsdale to investigate ways of processing and packaging produce for the use of troops in the field. Hop growing is also an important commercial activity

North

Northern Tasmania's varied attractions include the lavender farm at Nabowla, the gold mine ruins at Beaconsfield, the Ben Lomond ski fields and the colonial villages of Evandale and Hadspen. Entally House, at Hadspen, and Clarendon, at Nile, are two of the finest restored homesteads in Australia. A number of vineyards have been established in recent years at Pipers Brook and along the banks of the Tamar River.

Industries in the region include the knitting yarn producers Coats Patons, the automotive parts manufacturer ACL Bearing Company and the aluminium smelter and refinery Comalco, at George Town. Woodchip production and timber processing are also important.

North-West

The fertile, deep red volcanic loams and lush pastures of this region are ideal for vegetable

growing and dairy farming. Vegetable processing factories, United Milk Products and Lactos cheesemakers were established on the coast to process the large quantities of milk and vegetables produced. Some farmers engage in pig and sheep farming and others have turned to poppy farming to provide oil for pharmaceutical preparations.

Manufacturing is dominated by forest-based industries with North Forest Products processing paper and hardboards at Burnie, and magazine paper and particle board at Wesley Vale. Cement is produced at Railton and titanium pigments at Burnie. Beaches at Boat Harbour, Ulverstone and Port Sorell, as well as Sisters and Turners Beaches, are ideal holiday spots and surfing beaches. The historical village of Stanley, which is the birthplace of Joseph Lyons Australia's only Tasmanian-born Prime Minister, is noted for its unusual geographical feature, The Nut. The Lake Barrington rowing course, of international standard, is a popular recreational asset.

West

Dense forests and lofty mountain ranges are typical of this rugged region, with windswept beaches, wild rivers and moonscape hills making the west vastly different from any other Tasmanian region. Strahan, on Macquarie Harbour, is the starting point for cruises to the Gordon River, which winds deep into the dense forests of the South-West.

Mining is the predominant industry of this area, with zinc being mined at Rosebery, tin at Renison Bell and iron ore at Savage River.

South-West

Much of this isolated region is inaccessible and uninhabited. It contains some of the most spectacular scenery in the world and the Tasmanian Wilderness World Heritage Area has been listed by the World Heritage Commission. Dense rainforest, horizontal scrub, wild rivers, rapids and ravines, unpredictable weather, walking tracks and rugged mountains can be tackled only by experienced bushwalkers.

Chalets and cabins have been erected in the more accessible areas to cater for bushwalkers.

Central Lakes Area

Hydro-electric schemes dominate this mountainous area with many rivers harnessed and new lakes created to produce electricity for the State's power grid. Trout-fishing is popular in the area and many record catches have been reported.

Midlands

Early pioneers surveyed a road through the Midlands to provide a link between Hobart and Launceston. Today the upgraded road provides a comfortable $2-2^{1}/2$ hour journey between the two cities.

Sheep farming mainly for wool, is the principal agricultural activity of the region, with some beef cattle grazing also being undertaken. Throughout the Midlands there are historical villages with old roadside inns, cottages and churches. The most notable towns are Oatlands. Tunbridge. Ross and Campbell Town.

King and Flinders Islands

Situated in Bass Strait, these islands are rich in marine and bird life. Muttonbird, duck, quail and pheasant are all found here. Marine life includes crayfish, abalone, mullet and salmon. King and Flinders islands have prosperous beef industries, and quality dairy products are produced. The unpredictable weather and vicious storms often experienced in Bass Strait have resulted in many ships being lost in the area. King Island in particular is virtually ringed by shipwrecks.

national parks & state reserves

The National Parks and Wildlife Act 1970 provides for three broad reserve categories:

Conservation Areas

generally provide protection for fauna and its nesting or breeding place, but not its broad habitat. They are called Wildlife Sanctuary or Conservation Area depending on whether they are set aside to fulfill particular wildlife objectives (e.g. Tamar River Wildlife Sanctuary) or whether they are large general management areas (e.g. Southwest Conservation Area). Mutton Bird Reserves are another type of Conservation Area allowing mutton birding.

State Reserves

have much greater protection.

- National Park— (e.g. Maria Island, Mount Field) have high conservation, scenic and recreational values and, in general, are greater than 4000 ha in area.
- Nature Reserve— (e.g. Macquarie Is., Dismal Swamp) are especially important for nature conservation. Public use is not prohibited but it is generally not encouraged.
- Historic Site— (e.g. Entally House, the Shot Tower) where places or structures of European historic significance are involved.
- Aboriginal Site (e.g. Mt Cameron West, Sundown Point) where the place is of prehistoric significance. Protected Sites can also be created under the Aboriginal Relics Act 1975.
- State Reserves (e.g. Hastings Caves) small areas of high natural or cultural value.

Game Reserves

are reserved areas where one or more species of wildlife can be taken (e.g. Bruny Island Neck). They are virtually nature reserves in which limited hunting, with permits, is allowed.

world heritage area

The Tasmanian Wilderness World Heritage Area comprises about 1 383 640 hectares (approximately 20 per cent of the State) of essentially wild, natural country in central and south-western Tasmania. It was jointly nominated for World Heritage Listing by the Commonwealth and State Governments in September 1989 and inscribed on the World Heritage List by the World Heritage Committee of UNESCO in December 1989.

Within the World Heritage Area are rare and ancient plants, very tall eucalypt forests, distinctive and uncommon animals, important alpine and sub-alpine areas, karst and glacial features and scenery of sweeping grandeur and intimate beauty. There are also extensive cave systems, ice age Aboriginal cave-art sites and sites of European cultural significance.

flora

Tasmania's climate is generally conducive to the development of forests. In the higher rainfall areas of the central highlands and the west, rainforest predominates, although treeless habitats are frequent on water-logged soils. This is in contrast with the drier, more open eucalypt forests of the east. Exposed mountain summits contain treeless areas of alpine moorland heath and bog with alpine plants resistant to heavy frosts, waterlogging, snow and cold winds.

Of the 1500 or so flowering plants native to Tasmania about 300 are endemic. Many of the endemic species are found in Tasmania's rich alpine flora. (Up to 60 per cent of the alpine flora is endemic). Rainforests are another haven for Tasmania's endemic species. However, overall. Tasmania's flora is closely related to that of mainland Australia. This is particularly true for the eucalypt forests which have a high proportion of species in common with South Eastern Australia.

Links with the ancient floras of the southern continents are also evident in Tasmania's flora. For example, the southern beeches (Nothofagus spp.) are still present as scattered forests in Australasia and South America. In Tasmania, Myrtle Beech (N cunninghamii) is a dominant rainforest tree and Deciduous Beech (N. gunnii) is a subalpine shrub. Nothofagus fossil pollen records in these areas and in Antarctica extend back to the age of the dinosaurs. Other plants with affinities to southern continents include heaths, Leatherwood. Tasmanian Native Laurel, Bauera and Horizontal Scrub. Tasmania has no endemic plant families. Some families prominent in southern mainland Australia (e.g. mistletoes) are absent.

Prominent and characteristic Tasmanian plants include:

 Button Grass, which grows extensively on wet infertile peats, mainly in the west and south of the State. Button Grass is a

- tussock-like sedge with conspicuous, spherical fruiting-heads on long stems;
- native conifers, present within rainforest and alpine communities that have not been burnt. King Billy Pines and Pencil Pines occasionally also form forests of up to 30 metres in height in elevated valleys and on subalpine plateaux respectively. They can reach ages of over 1000 years:
- "horizontal", a rainforest plant with an unusual growth form. While these trees sometimes grow erect to a height of 15 metres or more, typically slender saplings 8-9 metres high arch back towards the ground. Many erect branches arise from an almost horizontal trunk and these in turn bend over, interlacing with each other and with branches of adjacent trees. In this way dense and springy platforms form, often at a considerable height above the ground; and
- cushion plants, which are common in Tasmanian alpine vegetation. Tasmania has five species of woody shrubs that form cushions: mounds or compact Donatia Pterygopappus lawrencii: novae-zelandiae: Dracophyllum minimum; Abrotanella collensoi: Phyllachne forsterioides. This plant community closely resembles those found in comparable habitats in New Zealand and in the Magellanic moorland of South America. The species of Donatia and of Phyllachne are common to Tasmania and New Zealand. As the cushion plants spread and adjoin, they form a mosaic which has a continuous level or undulating surface. These plants serve as seed beds for others: the white-flowered Drosera arcturi is often conspicuous and the endemic plaintain, Plantago gunnii, is confined to this habitat. But a cushion plant does not continue to expand to an indefinite size: after a time it dies in the centre allowing the establishment of plants such as the fern Gleichenia alpina, Calorophus minor (syn. Hypolaena lateriflora, family Restionaceae), Astelia alpina (pine-apple grass, family Liliaceae) and also various shrubby species.

fauna

Isolated since the last ice age, some 12 000 years ago, several species have developed uniquely Tasmanian forms while some vary from their mainland counterparts to a small degree. Others, including migratory birds, are shared with mainland Australia and other continents.

Mammals

Tasmania's fauna includes representatives of the three main groups of mammals: placental, monotremes and marsupials. The Tasmanian Devil, the Tasmanian Tiger or Thylacine (probably extinct) and the Long-tailed Mouse are examples of mammals which are unique (endemic) to Tasmania.

Tasmania's egg-laying mammals or monotremes are the Platypus and the Echidna.

Marsupials give birth to embryonic offspring which are nurtured in a pouch. Common Tasmanian marsupials include the Brushtail Possum and Ringtail Possum, Tasmanian Pademelon, Bennetts Wallaby, bandicoots and the Common Wombat. Less commonly encountered are the Pygmy Possum, Bettong, Potoroo, Forester Kangaroo, Tasmanian Devil. Spotted-tailed Quoll, Eastern Quolf, Dusky Antechinus and Swamp Antechinus. The two species of antechinus (formerly called marsupial mice), the Tasmanian Devil and the quolls are carnivorous.

Placental mammals, which are more typical of mammals generally, are represented in Tasmania by native rodents, bats and, of course, domestic stock and humans.

Tasmanian Aborigines were probably less influential on the fauna than their mainland Australian counterparts. They did not introduce the dingo or use the boomerang and woomera. The Tasmanian Devil and Thylacine, both also known as recent fossils on mainland Australia, have probably survived longer in Tasmania due to lack of competition from dingoes and the introduced fox.

An important feature of Tasmania's mammal fauna is the relative abundance of some species. The Potoroo, Bettong, Eastern Barred Bandicoot and the quolls remain at least locally common here but are severely depleted or extinct on the mainland. This is probably because of habitat retention and the lack of destructive introduced animals in Tasmania.

Birds

Of Tasmania's 320 or so recorded species of birds. 11 species and 23 sub-species are endemic and about one-quarter are seabirds. Non-migratory species shared with the mainland often exhibit minor variations, an example being the Tasmanian Emu (now extinct), which was smaller than the mainland species. Prominent endemic birds include the Green Roselia, the Forty-spotted Pardalote, several varieties of honeyeater, the Tasmanian Native Hen and the Orange-bellied Parrot, one of the rarest birds in the world.

Reptiles

Snakes and lizards (skinks) represent the reptile group in Tasmania, although occasionally marine turtles appear. Six of the 17 Tasmanian lizard species are endemic to the State, while the three species of snakes (Tiger Snake, Copperhead Snake and White-lipped Whip Snake), all of which are venomous, are shared with the mainland. A new species of skink Niveoscincus orocryptus has been discovered at Mt Anne, Southwest Tasmania. The Pedra Branca Skink lives on a rocky outcrop and is one of Tasmania's rarest species.

Amphibians

Tasmania has 11 species of frogs, three of which are endemic: the Tasmanian Tree Frog, Tasmanian Froglet and the recently discovered Moss Froglet.

Fish

Of Tasmania's 50 species of freshwater fish, 16 are endemic. Most of the endemic fish are in the family *Galaxiidae*, and occupy freshwater habitats in Tasmania's mountains.

climate

TEMPERATURE

Tasmania's climate is classified as temperate maritime. Near the coast the diurnal range of temperatures is about 7 degrees, but inland this value is almost doubled. The maximum temperature recorded in the State is 40.8°C — observed at Hobart in January 1976 and Bushy Park in December 1945. The State's lowest temperature (-13.0 degrees) was registered in June 1983 at Tarraleah, Butlers Gorge and Shannon.

RAINFALL

Rainfall over Tasmania is largely governed by the interaction of airstream and topography. Since the prevailing winds are westerly, the higher annual rainfall totals are recorded in the western highlands areas but there are parts of the north-east which very efficiently intercept the less frequent bursts of humid north-easterly winds. In the west annual rainfall totals vary from 1500 to 3500 millimetres whereas in the eastern half the range is from 500 millimetres in the north-east highland area.

WIND

The prevailing airstream over Tasmania is westerly with actual winds varying from north-west to south-west. The greatest strength and persistence of winds occurs during late winter and early spring. In the summer, when the westerlies are weak, afternoon sea breezes become the predominant wind in coastal areas.

SUNSHINE

Bright sunshine ranges from an average of 2500 hours per year in the northern Midlands to less than 1750 hours per year on the west coast and western highlands. Hobart receives an average of 2100 hours annually and Launceston around 2400 hours.

state emblems

COAT-OF-ARMS

The Tasmanian coat-of-arms features two Tasmanian Tigers supporting a shield. Contained within the shield are five symbols, a ram, a sheaf of wheat, apples, hops and a thunderbolt.

Above the shield is a lion. A pick and shovel, representative of the mining industry, appear in front of the lion. The motto ubertas et fidelitas interpreted as fertility and faithfulness completes the coat-of-arms which was promulgated in 1919.

FLAG

Tasmania's flag was adopted for general State Government use in 1876, but it was not until 3 December 1975 that the design was officially gazetted. The flag features a blue ensign with a red lion on a white shield superimposed. The Union Jack occupies the upper quarter next to the staff.

FLORAL EMBLEM

The Tasmanian Blue Gum, Eucalyptus globulus, was proclaimed as the floral emblem of Tasmania on 27 November 1962.

government

On 1 January 1901. Tasmania joined with the other Australian colonies of Britain to become a federation of six States: the Commonwealth of Australia

Government in all States is exercised in three jurisdictions: Commonwealth Government, with powers derived from a written constitution and centred in Canberra; State Government, with residual powers (powers not reserved for the Commonwealth), which in Tasmania is centred in Hobart, and Local Government with authority derived from State Acts and operating in 23 municipalities and six cities.

Parliamentary Secretary to Cabinet

Parliament

Tasmania has a bicameral parliament. The majority party in the House of Assembly (Lower House) forms the government while the Legislative Council (Upper House) is the house of review.

Legislative Council

19 members

19 single-member electorates

Term: six years

Three members retire each year except in every sixth year (1989, 1995 etc.) when four retire. Voting for the Council is compulsory. All persons over the age of 18 are eligible to vote provided they have resided in Tasmania for six months, they are Australian citizens, or natural born or naturalised British subjects on the electoral role at 25 January 1984; and their name is on the electoral roll for a Council division.

House of Assembly

The House of Assembly consists of 35 members elected from five seven-member electorates for a term of four years.

Tasmania uses the Hare-Clark system (i.e. proportional representation by the single transferable vote) in elections for the Assembly. The legal voting age is 18 years and over. Electors must vote one to seven but can show further preferences if they desire. Voting is compulsory.

A State election held in February 1992 saw the election of 19 Liberals, 11 Labor members and five Independents.

LOCAL GOVERNMENT

Local government in Tasmania is administered by the councils of 23 municipalities and 6 cities (Hobart, Launceston, Glenorchy, Devonport, Burnie and Clarence).

They provide services such as garbage and waste disposal facilities, roads and footpaths, drainage, health inspection, parks, recreation facilities, gardens, cemeteries and community centres as well as water supply and sewerage.

public finance

Australian government is organised at three levels: the Commonwealth Government, State governments and their instrumentalities, and local government authorities.

In the Australian National Accounts and Government Finance Statistics, a distinction is made between general government enterprises and public trading enterprises. General government enterprises operate outside the market place, and may provide goods and services significantly below the cost of production. The major sources of revenue for State general government enterprises are Commonwealth grants and State taxes. Public trading enterprises (for example the HEC) produce goods and services for sale in the market place, with the intention of recovering all or most of their operating costs through charges.

Local government provides goods and services such as garbage and waste disposal facilities, roads, water supply and sewerage. The principal source of revenue for local government authorities is rates.

Age and sex composition of population

At 30 June 1994, 22.6 per cent of Tasmanians were aged less than 15 years (compared to 21.5 per cent of total Australians); 44.6 per cent between 15 and 44 years, (46.3 per cent of total Australians); 20.4 per cent between 45 and 64 years, (20.4 per cent of total Australians) and 12.4 per cent were aged 65 years or older. (11.8 per cent of total Australians).

The median age of Tasmanians was 33.7 years, an increase of 1.3 years on the 32.4 years recorded at 30 June 1991.

There were 98.4 males for every 100 females, which is slightly less than the total Australian ratio, which is 99.2 males per 100 females.

Tasmania's population is more evenly spread across the State than the population elsewhere in Australia is spread; almost 60 per cent of Tasmania's population reside outside the capital city statistical division.

In regional terms, 227 500 people or 48.2 per cent of Tasmania's population lived in the Greater Hobart-Southern Region. In the Northern Region there were 133 130 people or 28.2 per cent of Tasmania's population, while 111 730 people or 23.7 per cent lived in the Mersey-Lyell Region.

Since April 1993 Tasmania has had 29 local government areas. Largest in population terms is Launceston with an estimated resident population in June 1994 of 65 830, or 13.9 per cent of Tasmania's population. Other large local government areas are Clarence (49 840, or 10.6 per cent of Tasmania's population), Hobart (47 629 people, 10.1 per cent) and Glenorchy (43 986 people, 9.3 per cent).

The two island municipalities of Flinders (912 people, 0.2 per cent) and King Island (1894 people, 0.4 per cent) are the smallest.

The smallest Tasmanian mainland municipalities are Tasman (2004 people, 0.4 per cent) and Central Highlands (2894 people, 0.6 per cent).

labour

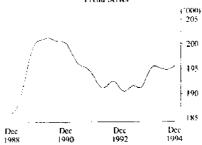

Over the past two decades the Tasmanian labour force has undergone significant changes. Women now comprise a significantly greater proportion of the labour force than at any time since the Second World War.

Employment

Tasmanian employment peaked in April 1990 with 198 700 people employed

in 1994, employment in Tasmania was around 195 000. Female and male employment throughout 1994 were around 82 000 and 113 000 respectively.

Unemployment

in March 1990, there were 18 500 Tasmanians unemployed. During 1994, the number of unemployed varied between 26 700 in January and 23 000 in August.

The number of unemployed females in 1994 was around 9000. The number of unemployed males varied between 14 500 and 17 400.

Unemployment rate

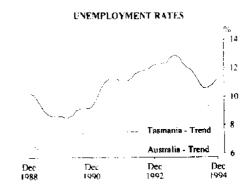

The unemployment rate in Tasmania throughout 1994 was the highest of any Australian State.

In early 1990, the unemployment rate was at its lowest since mid-1986, 8.5 per cent. In 1994 the unemployment rate varied between 12.0 per cent and 10.6 per cent.

social welfare

The main objective of the system of social welfare is the alleviation of poverty. The introduction of a pension for aged persons in 1909 began Australia's national provision of social security payments. While it is the Federal Government that provides almost all income maintenance payments, the State Government and voluntary agencies provide many services and personalised help to people in need.

Child care users, June 1993 ('000) (a)

retail industry

Estimates of Tasmanian retail turnover, during the period between Retail Censuses, are made by contacting a sample of retailers throughout the State. During 1994 Tasmania's retailers had a turnover of \$2768.6 million, an increase of 2.6 per cent on the 1993 figure of \$2699.1 million

The 1991-92 Retail Census showed that at 30 June 1992, there were 4839 retail establishments operating in Tasmania. These establishments employed 26 350 persons. Average employment per establishment at 30 June 1992 was 5.4 persons.

Thirty-one per cent of all retail establishments in Tasmania were food stores. Food stores employed 39 per cent of persons employed in the industry and contributed 44 per cent to industry turnover.

Building activity

The value of all building completed during 1993-94 was \$454.5m, a decrease of one per cent on the previous year's figure of \$461.0m.

The value of new residential building completed fell from \$289.1m in 1992-93 to \$284.4m in 1993-94, a decrease of two percent.

In the non-residential sector the value of Education building completed and Health building completed rose from \$14.4m and \$15.9m respectively in 1992-93 to \$29.1m and \$23.6m respectively in 1993-94, and the value of offices completed dropped from \$57.1m in 1992-93 to \$19.0m in 1993-94. The value of non-residential building completed in 1993-94 was \$130.6m, a decrease of four per cent on the \$136.2m recorded in 1992-93.

VALUE OF AGRICULTURAL PRODUCTION

Agricultural Commodities: Gross and local values of agriculture refer to recorded production only; i.e., production by establishments outside the scope of the Agricultural Census is excluded (see page 68).

Gross Value of Production: is the value placed on recorded production at the wholesale price(s) realised in the market place. (Exports are valued at f.o.b. Tasmanian ports.)

Local Value of Production: is the value placed on recorded production at the place of production and is ascertained by deducting marketing costs from the gross value of commodities produced.

The total gross Value of Agricultural Production (VACP) in Tasmania increased by just over nine per cent from \$568.7m recorded in 1992-93 to \$620.3m in 1993-94, after having fallen by 14 per cent between 1989-90 and 1991-92.

There was a 16 per cent increase in the value of livestock slaughtering and other disposals from \$136 0m in 1992-93 to \$157.9m in 1993-94.

Between 1992-93 and 1993-94 the value of livestock products increased by nearly twelve per cent to \$209.6m. The value of wool increased by 18 per cent to \$74.2m and the value of whole milk production increased by 9 per cent to \$126m.

The value of vegetables harvested in 1993-94 was \$118.3m, nearly eleven per cent more than in 1992-93. Between 1992-93 and 1993-94 potato production increased by 24 per cent to \$66.8m. Potatoes and onions made up 69 per cent of the total value of vegetable production. In 1993-94 the value of fruit production (mainly apples) was \$42.9m, 6 per cent less than in 1992-93.

fishing

Tasmania's commercial fishing industry has seen dramatic growth in diversity in recent years as traditional fish species become scarce and more expensive. This has seen the advent of aquaculture as a major component of Tasmania's fishing industry; many believe fish culture is a way of assuring a better future by creating and maintaining your own resource.

Research and development form an integral part of effectively managing Tasmania's fisheries. A lack of research can lead to poor understanding, inadequate management and exploitation of Tasmania's fish resource. Research programs into Orange Roughy, Southern Rock Lobster, scallops and Jack Mackerel have resulted in changes to management policies by the Division of Sea Fisheries in order to halt the depletion of Tasmania's fish stocks.

For the 1992-93 season total fish production was provisionally estimated to be 38 078 tonnes, valued at \$158.9m.

forestry

Some 20 000, or one in seven, Tasmanian workers are directly or indirectly employed in Tasmania's forest industries. This makes these industries the State's third largest employer group.

Tasmania produces timbers of softwoods and native hardwoods. Native hardwood timbers are derived mainly from native forests, while softwoods are a plantation resource, mostly comprising Radiata Pine.

Tasmania's land area is roughly divided into the following vegetation categories:

- 48 per cent is native forest;
- 2 per cent contains hardwood and softwood plantations;
- 33 per cent is non-forest, including woodland, lakes, scrub; and
- 17 per cent is pasture, crops, rough grazing and urban settlement.

About one quarter of Tasmania's forests are protected in formal conservation reserves, such as national parks and forest reserves,or are focated in Recommended Areas for Protection. About 36% of the forest is in multiple use forest land. Private forest is also available for logging under the same conditions.

energy

The 1988-89 Household Expenditure Survey (HES) estimated that Tasmanian households spent an average \$13.95 a week on household fuel and power (2.6 per cent of average weekly household income), and \$22.72 a week on motor vehicle fuel, lubricants and additives (4.2 per cent of average weekly household income). Tasmania's expenditure was more than the national expenditure figures of \$12.87 a week on household fuel and power and \$21.37 a week on motor vehicle fuel, lubricants and additives.

Estimates for Tasmanian households from the 1984 HES were \$10.91 (2.8 per cent) for household fuel and power and \$16.43 (4.2 per cent) for motor vehicle fuel, lubricants and additives.

trade

Tasmania's contribution to Australian exports is of a similar proportion to its population: around three per cent. In 1993-94 Tasmania exported \$1558m worth of goods or 2.4 per cent of the Australian total of \$64 628m. Estimates of Tasmanian imports are not as reliable as export estimates because only those goods imported directly into the State and not via a mainland port are recorded. In 1993-94, Tasmania imported \$447m worth of goods or just under one per cent of the Australian total of \$64 470m.
