## **MAIN FEATURES**

**EMPLOYMENT** 

State comparisons trend estimates

The Australian and State *trend* series comparisons are given on page 25. There was a decrease of 5.1% in Tasmania's employment over the year to July 1997. The largest percentage increase in employment was in Queensland (1.9%). Next followed Western Australia (1.2%), Victoria (0.6%), New South Wales and South Australia (both 0.3%).

### EMPLOYMENT, TASMANIA

Regional comparisons original terms In the Hobart and Southern Statistical Divisions the estimate of employment in *original terms* in June 1997 was 94,200, and compares with 98,900 in June 1996. The estimate of employment in the Northern Statistical Division in June 1997 was 53,600 and compares with 58,000 in June 1996. The estimate of employment in the Mersey-Lyell Statistical Division was 41,800 in June 1997, and compares with 44,300 in June 1996.

(See tables 3-8, pages 2-7.)

### THE LABOUR FORCE

Trend estimates

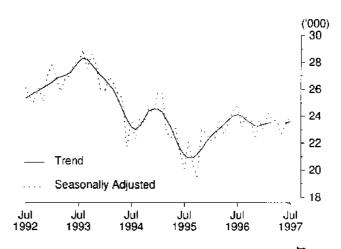

There were an estimated 214,500 persons (based on *trend* estimates) in the labour force in July 1997, and an estimated 369,700 civilian Tasmanians aged 15 years or more, yielding a labour force participation rate of 58.0%. This compares with 61.1% in July 1996. For males, the *trend* estimate of the participation rate was 68.9%, compared with 72.1% for July 1996. For females, the *trend* estimate of the participation rate was 47.5%, compared with 50.4% in July 1996. (See table 3, page 2.)

### UNEMPLOYMENT

Trend estimates

The trend estimate of the number of unemployed persons in Tasmania for July 1997 was 23,600. This compares with 24,100 for July 1996. The *trend* estimate of the unemployment rate of 11.0% in July 1997 compares with 10.7% in July 1996. (See tables 3-8, pages 2-7.)

## UNEMPLOYMENT, TASMANIA

### AWARD RATES OF PAY INDEXES

Original terms

From June 1996 to June 1997, weekly award rates of pay indexes for Tasmania increased 1.1% for full-time adult female employees and 0.7% for full-time adult male employees, with a combined annual increase of 0.8%. For Australia, the figures were 1.9% for females and 1.2% for males, with a combined annual increase of 1.4%.

For full-time adult female employees in Tasmania, the largest industry increases over the same 12 month period occurred in the Transport and storage industry (6.9%); and the Recreational, personal and other services industry (2.3%).

For the same period for full-time adult male employees in Tasmania, the largest industry increases occurred in the Recreation, personal and other services industry (1.9%); and the Transport and storage industry (1.6%).

The largest occupation increases over the same period for full-time adult female employees were for Para-professionals (2.6%); Tradespersons (1.2%); and Clerks (1.2%).

For full-time adult male employees the largest occupation increase over the period were for Clerks (0.9%); and Salespersons and personal service workers (0.9%).

Source: Award Rates of Pay Indexes, Australia, ABS catalogue no. 6312.0.

## BUILDING MATERIALS PRICE INDEXES

Original terms

The price index of materials used in house building in Hobart decreased by 0.3% over the twelve months ending June 1997. All other capital cities have increased with Adelaide being the highest with 3.0%. The weighted average of the eight capital cities increased by 1.4%.

For June 1997, the index for Hobart remained steady compared with the previous month, while that of the weighted average of the eight capital cities increased by 0.1%.

The price index of materials used in building other than house building in Hobart increased by 1.2% over the twelve months ending June 1997. Other than Melbourne, which remained unchanged, all other capital cities experienced an increase, with Brisbane being the highest with 2.1%. The weighted index for the average of the eight capital cities increased by 1.2%.

For June, the index for Hobart and Adelaide remained steady compared with the previous month. Perth experienced a decrease of 0.1% while all other capital cities experienced increases. The weighted index for the average of the eight capital cities for June increased by 0.2%. (See tables 15 and 18, pages 11 and 13.)

### LIVESTOCK SLAUGHTERING

Trend estimates

For June 1997, the *trend* estimate for the slaughtering of cattle and calves in Tasmania was 0.2% lower than for the previous month. The number of sheep and lambs slaughtered decreased by 2.0%, and the number of pigs slaughtered decreased by 2.4% over the same period.

The *trend* estimate of the number of cattle and calves slaughtered in June 1997 was 23,900, which was 22.6% above the number slaughtered in June 1996.

The *trend* estimate for the number of sheep and lambs slaughtered in June 1997 was 67,200, which was 14.6% above the number slaughtered in June 1996. This was the third successive monthly decrease in the number of sheep and lambs slaughtered in Tasmania, and well below the *trend* estimate of 73,300 slaughtered in June 1995.

The *trend* estimate of 6,700 pigs slaughtered in June 1997 was 2.7% below the number slaughtered in June 1996, and 12.7% below the number slaughtered in June 1995. (See table 21, page 16.)

## **BUILDING APPROVALS**

Original terms

There were 117 new dwelling units approved during June 1997 in Tasmania. This was 19.9% below the May 1997 figure of 146 and a 39.7% decrease on the number recorded for June 1996 (194).

For the twelve months ended June 1997, there were 1,844 new dwelling units approved, 27.4% below the 2,539 units recorded for the twelve months ended June 1996.

The value of new residential building approved, at current prices, in June 1997 was \$9.5 million, 25.9% below the May 1997 figure, and 41.4% below the figure recorded for June 1996.

The value of all building approved, at current prices, in June 1997 was \$25.6 million, 23.8% below the May 1997 figure and 18.1% below the June 1996 figure.

(See table 27, page 20.)

### HOUSING FINANCE

Trend estimates

The *trend* estimate for the number of new secured housing finance commitments entered into in Tasmania in June 1997 was 806 dwellings, a decrease of 0.6% from the previous month's figure, and a decrease of 7.6% from the June 1996 figure.

The value of new commitments at June 1997 was \$57.6 million. This value fluctuated over the last twelve months, between lows of \$56.4 million in February and March 1997 and a high of \$72 million in September 1996. Nationally the total number of Australian dwelling commitments increased 5.2% from June 1996 to 40,203 dwellings in June 1997. The value of these commitments increased 15.5% to \$4,331.0 million in June 1997 from June 1996. (See table 28, page 20.)

### STATE ACCOUNTS

Original terms

Tasmanian gross state product (GSP) grew by 2.8% in constant price terms (1989-90 values) during the 1995-96 financial year, increasing from \$8,613 million to \$8,854 million. This compares to growth of 3.9% in Australia's constant price gross product (GDP), Western Australia's gross product experienced the highest growth in real GSP during 1995-96, at 6.4%. However, Tasmania experienced higher growth in real GSP during 1995-96 than Queensland (2.6%) and the Northern Territory (1.9%).

Tasmania's share of Australia's gross product in constant price terms was 2.0% in 1995-96, compared to 2.4% in 1984-85. Tasmania's share has decreased due to a pattern of low annual growth rates relative to those recorded for Australia as a whole. Over the entire period 1984-85 to 1995-96, the average annual compound growth rate of constant price GSP in Tasmania was 1.6%; less than half the corresponding figure for Australia of 3.3%.

## NEW MOTOR VEHICLE REGISTRATIONS

Original terms

There were 1,128 new motor vehicles (excluding motorcycles) registered in Tasmania during June 1997. This was 6.9% below the 1,211 registered in May 1997 but 13.5% above the figure for June 1996 (994).

Of the new motor vehicles (excluding motorcycles) registered in June 1997 in Tasmania, 22 were vehicles registered by vehicle rental businesses. This compared with 6 registered by vehicle rental businesses in May 1997 and 9 in June 1996. (See table 34, page 24.)

## RETAIL

Original terms

In *original terms*, the estimate of retail turnover in Australia during June 1997 was \$9,787.3 million, 1.1% above the figure recorded in June 1996.

In *original terms*, the estimate of retail turnover in June 1997, for Tasmania, was \$234.2 million, 1.6% above the figure recorded for June 1996.

Trend estimates

The *trend* estimate of retail turnover in Australia during June 1997, was \$10,477.5 million, 2.2% higher than for June 1996.

The *trend* estimate of retail turnover in Tasmania for June 1997, was \$254.5 million, an increase of 3.7% on the June 1996 figure.

The monthly *trend* estimate for turnover of retail and selected service establishments for Tasmania has increased for each of the last ten months to June 1997. (See table 35, page 24.)

Source: Australian Dairy Corporation		-		0-1	_

Source: Australian Dairy Corporation. Includes the whole milk equivalent of farm cream intake. Includes butter equivalent of butter oil.

Includes butter equivalent of butter oil.

Includes spinning, weaving and carpet making. Reported by establishments which manufacture textiles only, or manufacture clothing and textiles in the one plant.

Excludes production of directory newsprint and high grade specialty paper.

Metallurgical refining index (Base: 1979–80 = 100.0) Output from selected establishments covering the smelting and refining of ferro-alloys, zinc and establishments, value added was apportioned to products on the basis of gross receipts from each product.

a Radiata pine.

A locuses blackwood, myrde, sassalias etc.
Radiata pine.

Includes Huon pine, celery top pine and King William pine.
(Source: ABS unpublished data.)

Both hardwoods and softwoods, separate details are not available.

Capable of producing at end of year or actually producing during quarter.

Data reported by weight, converted to cubic measure by the factor 0.95 m³ per tonne.

Includes log equivalent of limbwood and billets.

(Source: ABS unpublished data.)

Commitment is a firm offer of housing finance. It either has been, or is normally expected to be, accepted. Includes commitments to provide housing finance to employees and commitments accepted and cancelled in the same month. Excludes alterations and additions. Includes refinancing. Includes new dwellings, established dwellings and refinancing. Excludes arterations and additions.
 (Source: Housing Finance for Owner Occupation, Australia, ABS catalogue 5609.0.)

New individual dwelling units (e.g. flats, home units and villa units).
 Valued at \$10,000 and over.
 Comprises non-residential building (new plus alterations and additions) valued at \$50,000 and over.
 (Source: Building Approvals, Tasmania, ABS catalogue number 8731.6.)

There is an annual recalculation of seasonal adjustment factors to include the most recent year's arrivals. This occurs at the end of each financial year and may cause revisions to previously published seasonally adjusted and trend figures. A full time series of seasonally adjusted and trend series from January 1971 is available on request, telephone (03) 6222 5912.
(Source: Tourism Tasmania, ABS unpublished data.)

The proportion of departing passengers who were visitors was shown to be about 58% in the 1981 Tasmanian Visitor Survey, 55% in the 1984 Tasmanian Visitor Survey, 53% in the 1986 Tasmanian Visitor Survey, 65% in the 1990 Tasmanian Visitor Survey, 60% in the 1994 survey, and 58% in the 1995 Tasmanian Visitor Survey.

## **EXPLANATORY NOTES**

INTRODUCTION

1 This publication contains latest figures for a comprehensive range of economic indicators. Statistics shown in this publication are the latest available at the date of preparation and may be subject to revision in subsequent issues. In a number of cases figures appearing in this publication are preliminary and are subject to revision in subsequent issues. Reference should therefore always be made to the latest issue or to the statistical publication on the specific subject.

SEASONAL ADJUSTMENT AND TREND ESTIMATION

- 2 Seasonal adjustment is a means of removing the estimated effects of normal seasonal variation from the series so that the effects of other influences on the series can be more clearly recognised. Seasonal adjustment does not aim to remove the irregular or non-seasonal influences which may be present in any particular month. This means that month-to-month movements of the seasonally adjusted estimates may not be reliable indicators of trend behaviour.
- 3 The smoothing of seasonally adjusted series reduces the impact of the irregular components of the seasonally adjusted series and creates trend estimates. These trend estimates are derived by applying a 13-term Henderson-weighted moving average to all months except the last six. The last six monthly trend estimates are obtained by applying surrogates of the Henderson average to the seasonally adjusted series. Trend series are used to analyse the underlying behaviour of the series over time.
- 4 While this smoothing technique enables estimates to be produced for the latest month, it does result in revisions to the most recent months as additional observations become available. Generally, subsequent revisions become smaller and after 3 months have a negligible impact on the series. Revisions also occur as a result of the annual review of seasonal factors.
- 5 Users may wish to refer to the ABS Publication A Guide to Interpreting Time Series - Monitoring 'Trends' - An Overview (1348.0) for more detailed information on smoothing seasonally adjusted time series data.

RELATED PUBLICATIONS

**6** Current publications produced by the ABS are listed in the *Catalogue of* Publications and Products (1101.0). The ABS also issues, on Tuesdays and Fridays, the Release Advice (1105.0) which lists publications to be released in the next few days. The Catalogue and Release Advice are available from any ABS office.

**UNPUBLISHED STATISTICS** 

7 As well as the statistics included in this and related publications, the ABS may have other relevant unpublished data available. Inquiries should be made to Information Inquiries on (03) 6222 5800 or to any ABS office.

EFFECTS OF ROUNDING

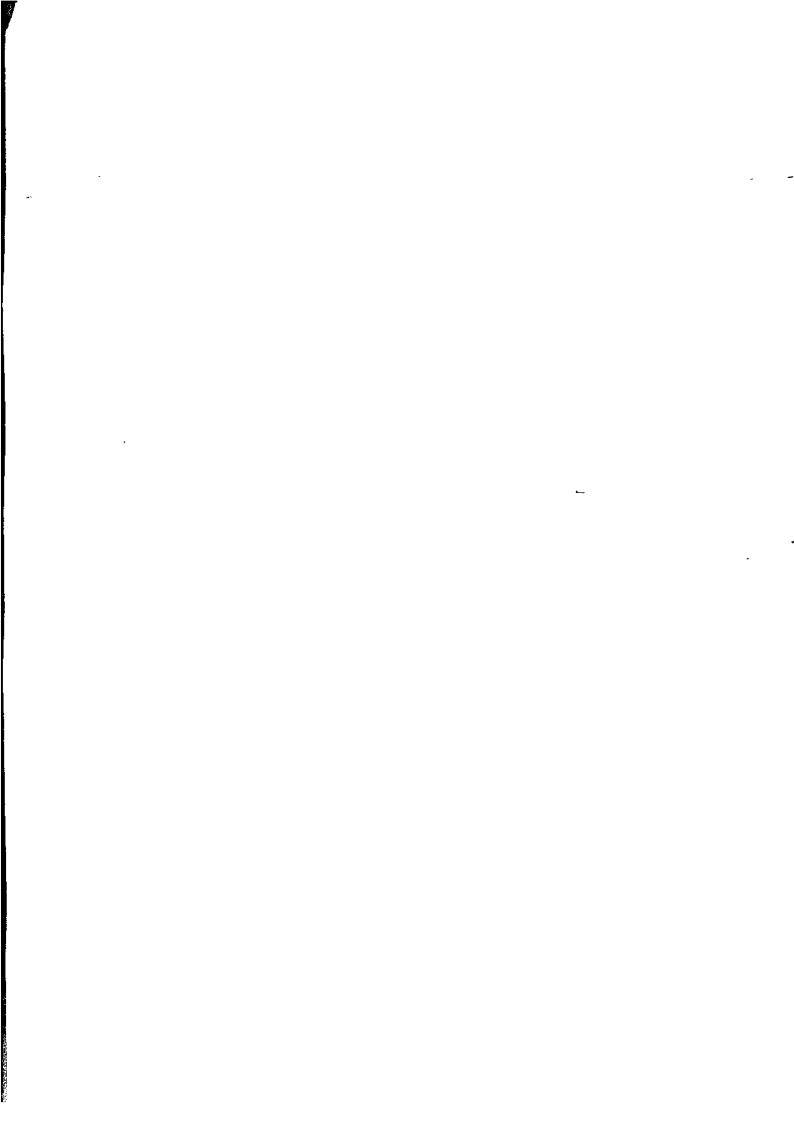

8 Some figures have been rounded and discrepancies may occur between totals and sums of the component items.

SYMBOLS AND OTHER USAGES

n.a. not available not yet available n.v.a. not applicable

nil or rounded to zero

preliminary—figure or series subject to revision р figure or series revised since previous issue

## For more information . . .

The ABS publishes a wide range of statistics and other information on Australia's economic and social conditions. Details of what is available in various publications and other products can be found in the ABS Catalogue of Publications and Products available from all ABS Offices.

## **ABS Products and Services**

Many standard products are available from ABS bookshops located in each State and Territory. In addition to these products, information tailored to the needs of clients can be obtained on a wide range of media by contacting your nearest ABS Office. The ABS also provides a Subscription Service for standard products and some tailored information services.

## National Dial-a-Statistic Line

0055 86 400

Steadycom P/L: premium rate 25c/21.4 secs.

This number gives 24-hour access, 365 days a year, for a range of important economic statistics including the CPI.

## Internet

http://www.statistics.gov.au

A wide range of ABS information is available via the Internet, with basic statistics available for each State, Territory and Australia. We also have Key National Indicators, ABS product release details and other information of general interest.
