## SUMMARY OF FINDINGS

### UPDATED SERIES

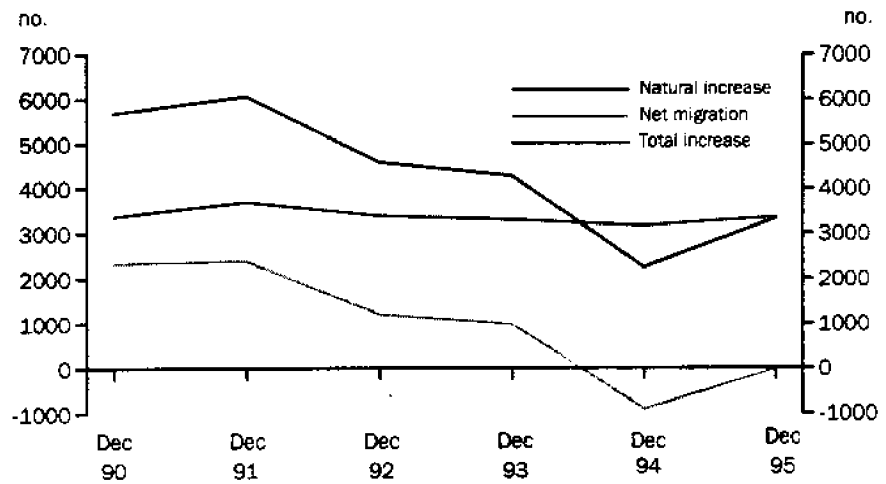

Series updated since the May 1996 issue are: population; labour force, industrial disputes; housing finance, building approvals; price indexes; average weekly earnings; retail turnover; and new motor vehicle registrations. A feature article on Superannuation in the ACT is included on page 6.

### NOTABLE MOVEMENTS

- Population** The estimated resident population of the ACT as at 31 December 1995 was 304,900 the same as that reported for the previous quarter. The ACT population growth rate during the 12 months to 31 December 1995 was 1.1%, slightly below the 1.3% recorded nationally.
- Unemployment** The trend number of persons employed in the ACT has fallen for each of the last six months from a peak of 159,700 persons in October 1995 to 154,900 persons in May 1996 (an overall fall of 4,800 persons or -3.0%). Over the same period, the trend unemployment rate has steadily increased from 7.0% to 8.5% and the trend participation rate has decreased from 74.3% to 72.9%.
- Industrial disputes** In February 1996, there were only 26 working days lost per 1,000 employees in the ACT compared with 79 working days lost per 1,000 employees nationally.
- Housing** The trend number of dwelling units financed (includes refinancing) in the ACT has fallen for the last three months from a peak of 869 dwellings units financed in December 1995 to 844 dwellings units financed in March 1996 (an overall fall of 2.9%). The trend estimate for the value of commitments in the ACT in March 1996 was \$86.4 million, a decrease of 0.5% on the previous month.
- The trend number of dwelling units approved in the ACT has fallen for each of the last five months from a peak of 245 dwellings in November 1995 to 150 dwellings in April 1996 (an overall fall of 38.8%). Over the same period nationally, it increased by 1.6%.
- The quarterly established house price index for Canberra fell by 1.2% in March 1996 after an increase of 0.5% in December 1995. This was greater than the decrease of 0.2% for the weighted average of the six State capital cities. In the 12 months from March 1995, the price index decreased 2.9% for the ACT compared to a 0.9% decrease for the capital cities' weighted average.
- Earnings** Trend estimates of average weekly earnings for the ACT continued the steady upward movement of the past two years. The average weekly earnings for February 1996 was \$638.60, an increase of 0.9% from the previous month. Nationally average weekly earnings increased by 0.7% to \$558.40.
- Retail turnover** The trend estimate for retail turnover in the ACT for April 1996 was \$188.9 million, up slightly on the previous month's figure of \$188.1 million. Nationally trend retail turnover increased by 7.0% over the last 12 months compared to 3.8% for the ACT.
- New motor vehicle registrations** The trend estimate for new motor vehicle registrations for the ACT in April 1996 was 1,062, an increase of 0.1% over March 1996, and 1.0% lower than for April 1995. Nationally, the trend for total new registrations has shown consecutive rises since October 1995, with April 1996 recording a 1.1% increase.

## FEATURE ARTICLE

## SUPERANNUATION, NOVEMBER 1995

Summarised below are results for the ACT from the Superannuation Survey which was run in association with the November 1995 Labour Force Survey. The survey provides information on superannuation coverage in the ACT for persons aged 15–74 years.

The survey results show that in November 1995, there were 208,077 persons aged 15–74 in the ACT. Some 153,075 (74%) of these persons were employed, of whom 132,102 (86%) were covered by superannuation — that is, they were personally contributing to a superannuation scheme and/or their employer or business was contributing to a superannuation scheme on their behalf. This compares to the same level of superannuation coverage amongst employed persons in November 1993 but is significantly higher than that of November 1991 (77% covered).

In November 1995, 91% of full-time workers in the ACT were covered by a superannuation scheme. This compares to the same level of coverage in 1993, but an increase from 87% in 1991. The proportion of part-time workers who were covered increased from 38% in November 1991, to 68% in 1993, and then to 70% in 1995.

In November 1995, 88% of employed males and 85% of employed females were covered by a superannuation scheme, compared to 86% of employed males and 85% of employed females in November 1993.

Superannuation was not consistent across age groups. Coverage was highest for employed persons aged 20–54 (88%) and those aged 55–64 (80%). Superannuation coverage for employed persons aged 15–19 was 61%.

The ACT Electricity, gas and water supply industry recorded the highest level of superannuation coverage with 100% of all persons employed in the industry covered. Lowest coverage was recorded in the Agriculture, forestry and fishing industry where 44% of workers were covered.
