SUMMARY OF FINDINGS

UPDATED SERIES

Series updated since the October 1996 issue are: labour force, industrial disputes; building approvals; consumer price index, average retail prices; retail turnover; and new motor vehicle registrations. A feature article on the 1995 Survey of Motor Vehicle Use in the ACT is included on page 6.

NOTABLE MOVEMENTS

- Labour force The trend number of persons employed in the ACT has fallen for each of the last 12 months from a peak of 159,700 persons in October 1995 to 154,100 persons in October 1996 (of this 5,600 decline in persons employed, 3,200 were in full-time jobs). Over the same period, the trend unemployment rate increased from 7.0% to 8.5% and the trend participation rate has decreased from 74.3% to 72.1%. The trend unemployment rate has stabilised at 8.5% over the last 5 months.
- Industrial disputes In July 1996, there were 123 working days lost per 1,000 employees in the ACT compared with 128 working days lost per 1,000 employees nationally. For the ACT, this was the highest rate of working days lost per thousand employee since the 137 reported for the year ended September 1988 and was mainly due to disputes in the construction industry and public service.
- Housing and construction The trend number of dwelling units approved in the ACT increased by 1.3% to 141 dwelling units in September 1996. This compares to 209 dwelling units approved in September 1995. Nationally the total number of dwelling units approved fell by 0.3% in September 1996.
- Prices The All Groups CPI for the ACT did not increase at all during the September quarter 1996, while annually there was an increase of 1.9%. Nationally the All Groups CPI increased by 0.3% over the September quarter 1996 and 2.1% over the year.
- Retail turnover The trend estimate for retail turnover in the ACT for September 1996 was \$197.9 million, up on the previous month's figure of \$196.5 million. Nationally trend retail turnover has increased by 3.6% over the last 12 months compared to 7.3% for the ACT.
- Motor vehicle registrations The trend estimate for new motor vehicle registrations for the ACT in September 1996 was 891. The series has declined for each of the months since January 1996 which recorded 1,069 new vehicles registered. Nationally, the trend for total new registrations in September 1996 recorded its fourth consecutive monthly fall.

Results from the 1995 Survey of Motor Vehicle Use relate to an estimated 180,392 vehicles in the ACT. There were 153,414 passenger vehicles, representing 85% of all vehicles registered for road use. Light commercial vehicles accounted for a further 10% of vehicles; motor cycles for 2.8%; rigid trucks for 2%; and articulated trucks, buses and non-freight carrying trucks for less than 1% each.

Between 1991 and 1995 the total number of road-using vehicles increased by 10.6%. Passenger vehicle numbers increased by 10.5% and freight carrying vehicles (light commercials, rigid and articulated trucks) by 16.2%. Since 1991 motor cycle numbers have shown an overall increase of 3.9% to 1995.

The estimated total distance travelled by all motor vehicles in the 12 months ended 30 September 1995 (3.0 million) increased by 8.3% over the corresponding period in 1991. However, the average distance travelled by motor vehicles in 1995 (16,800 kilometres) showed a decrease of 1.8% from 1991 (17,100 kilometres). Vehicles registered in Queensland recorded the highest distance travelled per vehicle at 17,000 kilometres, followed by the ACT, while Tasmania (13,500 kilometres) recorded the lowest average distance travelled.

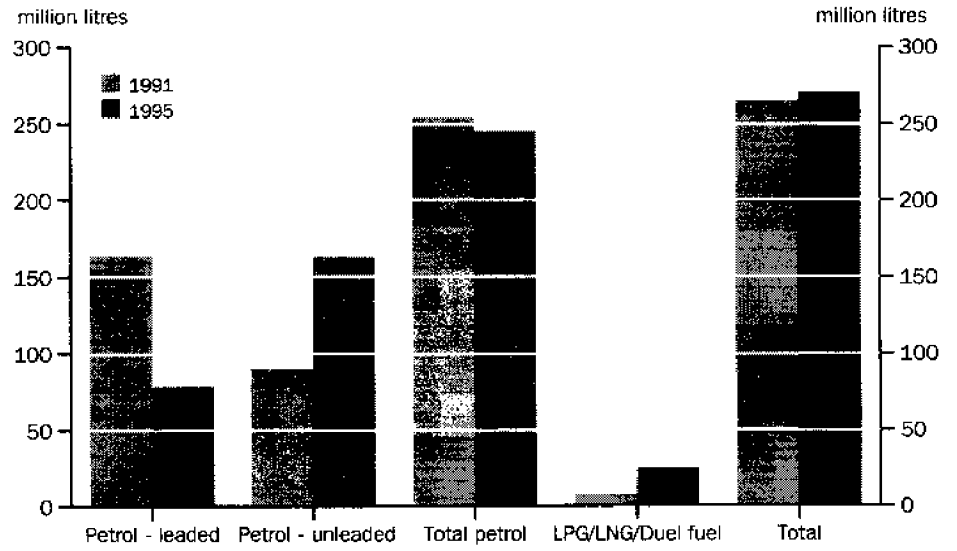

Passenger vehicles accounted for 83% (2,510 million kilometres) of total distance travelled in the ACT; light commercial vehicles 11.5% (349,000 kilometres); rigid trucks 2.5% (76,000 kilometres); articulated trucks, buses and motorcycles for 1%.

About 45.2% (1,366 million kilometres) of the total distance travelled by passenger vehicles was for private use, 28% (863 million kilometres) was for travel to and from work, and 26.3% (745 million kilometres) was for business use. Vehicles registered in the ACT and South Australia recorded the highest average vehicle use for private purposes with averages of 8,900 and 8,400 kilometres respectively.

Total fuel consumption by all vehicles in the ACT for the 12 months ended 30 September 1995 was estimated at 357.5 million litres, down from the 1991 estimate of 360.6 million litres. Passenger vehicles accounted for 76% (270.3 million litres) of the total fuel consumed, followed by freight carrying vehicles with 24% (76.2 million litres) and buses with 2.7% (4.6 million litres).

The use of unleaded petrol now exceeds leaded petrol. In 1995, unleaded petrol accounted for 51% (183.1 million litres) of all petrol consumption, compared to 29% (103.2 million litres) in 1991. Both leaded and unleaded petrol accounted for 77% (275.2 million litres) of total fuel consumption in 1995, down from 82% (294.9 million litres) in 1991.
