## ABOUT THIS PUBLICATION

The *Monthly Summary of Statistics, Australia* contains, at the time of printing, the latest available data on a wide range of topics. It provides a comprehensive overview of the economic and social conditions in Australia.

In the contents pages, tables of series containing seasonally adjusted indicators are marked with a dagger (†).

As well as being adjusted for normal seasonal factors, some of the statistical series included in the *Monthly Summary of Statistics, Australia* have been adjusted for the effects of calendar variation: namely, 'trading-day' effects (arising from the varying numbers of Sundays, Mondays, Tuesdays, etc. in a month) and the influence of movable holidays, for example, Easter and Australia Day.

Trend estimates are shown for some series in which the seasonally adjusted series have been smoothed to reduce the impact of the irregular component.

## SYMBOLS AND OTHER USAGES

The following is an explanation of the symbols used in this publication:

n.a.	not available
n.e.c.	not elsewhere classified
n.e.s.	not elsewhere stated
n.y.a.	not yet available
.	not applicable
n.p.	not available for publication unless otherwise indicated but included in totals where applicable
p	preliminary — figure or series may be subject to revision
r	figures or series revised since previous issue
—	nil or rounded to zero
—	break in continuity of series (where drawn across a column between two consecutive figures)
*	subject to sampling variability too high for most practical purposes.

Yearly periods shown as, for example, 1993, refer to the year ended 31 December 1993, those shown as, for example, 1992–93, refer to the year ended 30 June 1993.

Values are shown in Australian dollars (\$).

Where figures have been rounded, discrepancies may occur between sums of the component items and totals. Also, minor revisions to figures already published are not applied for periods more than one quarter prior to the quarter of publication. Hence, small discrepancies may occur between annual data and totals derived by summing the data for each of the four quarters.

Most of the original and all of the seasonally adjusted series are subject to revision.

## FOR MORE INFORMATION

The ABS has a far wider range of information on Australia than that contained in this publication. Information is available in the form of regular publications, electronic data services, special tables and from investigations of published and unpublished data.

Current publications produced by the ABS are listed in the *Catalogue of Publications and Products, Australia* (1101.0). The ABS also issues, on Tuesdays and Fridays, a *Release Advice* (1105.0) which lists products to be released in the next few days. The Catalogue and Release Advice are available from any ABS office.

For further information about ABS statistics and services please contact any of the ABS offices (see the back of this publication).

(a) The estimates relate to all persons aged 15 and over except members of the permanent defence forces, certain diplomatic personnel of overseas governments, overseas residents in Australia and members of non-Australian defence forces in Australia. For definitions see Explanatory Notes in the latest issue of the monthly publication *The Labour Force, Australia* (6203.0). (b) Original labour force estimates are now based on population estimates obtained from the 1991 Census of Population and Housing. (c) The number of unemployed in each group as a percentage of the labour force in the same group. (d) The labour force in each group as a percentage of the civilian population aged 15 and over in the same group.

(a) Prior to September 1991 disputes affecting more than one industry and/or State have been counted as separate disputes in each industry and State and in the Australian total. From that time such disputes, while still counted separately in each industry and/or State, are counted just once at the broader industry and Australia level. (b) Disputes which occurred during the period encompasses those disputes which started in a previous month or year and ended in the reference period or began and ended in the reference period or began in the reference period and continued into the next period or started prior to the reference month or year, continued through the reference period and into the next period. (c) Comprises workers involved in disputes which commenced during the month and additional workers involved in disputes which continued from the previous month.

(a) See Explanatory Notes in the latest issue of *Consumer Price Index* (6401.0). (b) The statistics for Germany refer to Western Germany (Federal Republic of Germany before the unification of Germany). (c) Revised to accord with definition adopted in recent Canadian CPI review (implemented in January 1995). The revised series includes traveller accommodation and is comparable to the series for Australia. (d) From March quarter 1994 the statistics for New Zealand refer to 'all groups excluding housing and credit services'.

(a) Includes natural gas. (b) Total electricity generated by establishments predominantly engaged in the generation of electricity. (c) This series replaces the previously published 'Iron and Steel in Primary Forms' and 'Blooms and Slabs from rolling and forging'. Changes in industry practices mean that almost all raw steel is now used to produce Blooms and Slabs using continuous casting methods. (d) For structural purposes. (e) Source: Australian Bureau of Agricultural And Resource Economics. Quarterly figures are expressed in terms of green off sawn volumes.

(a) All figures are \$A values at end of period shown. Changes in the \$A value of holdings of official reserve assets in any period reflect both valuation effects and transactions. The latter include sales and purchases (including swaps) of, and earnings on, foreign exchange by the Reserve Bank of Australia and certain transactions with official institutions overseas. The foreign currency value of overseas assets is based, where applicable, on market quotations; accrued interest is normally taken into account. Conversion into \$A equivalent is based on end-month rates of exchange. (b) Gold is valued at the \$A equivalent of the 3 p.m. price fix in the London gold market on the last business day of the month. See also table on Official Reserve Assets and Exchange Rates in the Balance of Payments section, page 40.

(a) In using this seasonally adjusted series extra care should be exercised because of the difficulties associated with reliably estimating its seasonal pattern.

NOTE: These statistics are designed primarily to measure trends in investment in stocks by private enterprises. The statistics in this table differ somewhat from the item *Increase in stocks* in the table on page 30 as a result of the different methods of compilation of these two sets of statistics.

(a) The figures in this table are derived from returns submitted by banks authorised under the *Banking Act 1959*, together with similar returns voluntarily submitted by the State banks; they exclude the Reserve Bank. (b) All certificates of deposits issued by banks have been shown as resident deposits. (c) Includes issues of term subordinated debt, loan capital and similar instruments. (d) Excludes shareholders' funds. (e) Break in series due to establishment of new bank(s), which may have caused the switching of assets and liabilities from NBFIs to banks.

(a) The Statutory Reserve Deposit ratio for trading banks was set at zero on 27 September 1988 and balances transferred to non-callable accounts. On 12 October 1988, stand-alone savings banks made their first deposits under arrangements for all banks to hold non-callable deposits with the Reserve Bank. (b) Break in series due to establishment of new bank(s), which may have caused the switching of assets and liabilities from NBFIs to banks.

(a) Includes government-owned vehicles except those belonging to the defence services. Excludes plant and equipment, caravans and trailers. Data from December 1990 in this table is based on the System of Vehicle Identification Numbers (VIN) introduced by motor vehicles authorities from July 1990 onwards. The system allows more accurate identification and classification of newly registered vehicles and as a result there is a reduction in the level of new vehicle registrations through better identification of duplicate registrations and those registered previously.
