Monthly Summary of Statistics

New South Wales

NOTES

SYMBOLS AND OTHER USAGES	kWh	kilowatt hour
	l	litre
	MJ	megajoule
	n.a.	not available
	n.e.c.	not elsewhere classified
	n.e.s.	not elsewhere specified
	n.p.	not available for publication but included in totals where applicable
	n.y.a.	not yet available
	r	figure or series revised since previous issue
	*	subject to sampling variability too high for most practical purposes
	..	not applicable
	—	nil or rounded to zero
	—	break in continuity of series (where a line is drawn across a column between two consecutive figures)

NOTE: Monthly Summary of Statistics preliminary figures are not indicated by the symbol 'p'. All revisions, however, will be indicated by the symbol 'r'.

SEASONALLY ADJUSTED INDICATORS

In most instances, the aim in compiling monthly or quarterly economic time series is to provide evidence of movement, in order to indicate the effects changing conditions are having on the activities being measured — and, in so doing, to signal what might be likely to occur in the near future. Seasonal adjustment is a technique designed to assist in these processes of analysis and interpretation by removing the estimated effects of normal seasonal variation from statistical series, so that the effects of other influences on the series may be more clearly recognised.

Details of the methods used in deriving the seasonally adjusted figures shown in this publication are given in the publication *Seasonally Adjusted Indicators* (1308.0), last issued in 1983 by the Central Office of the ABS.

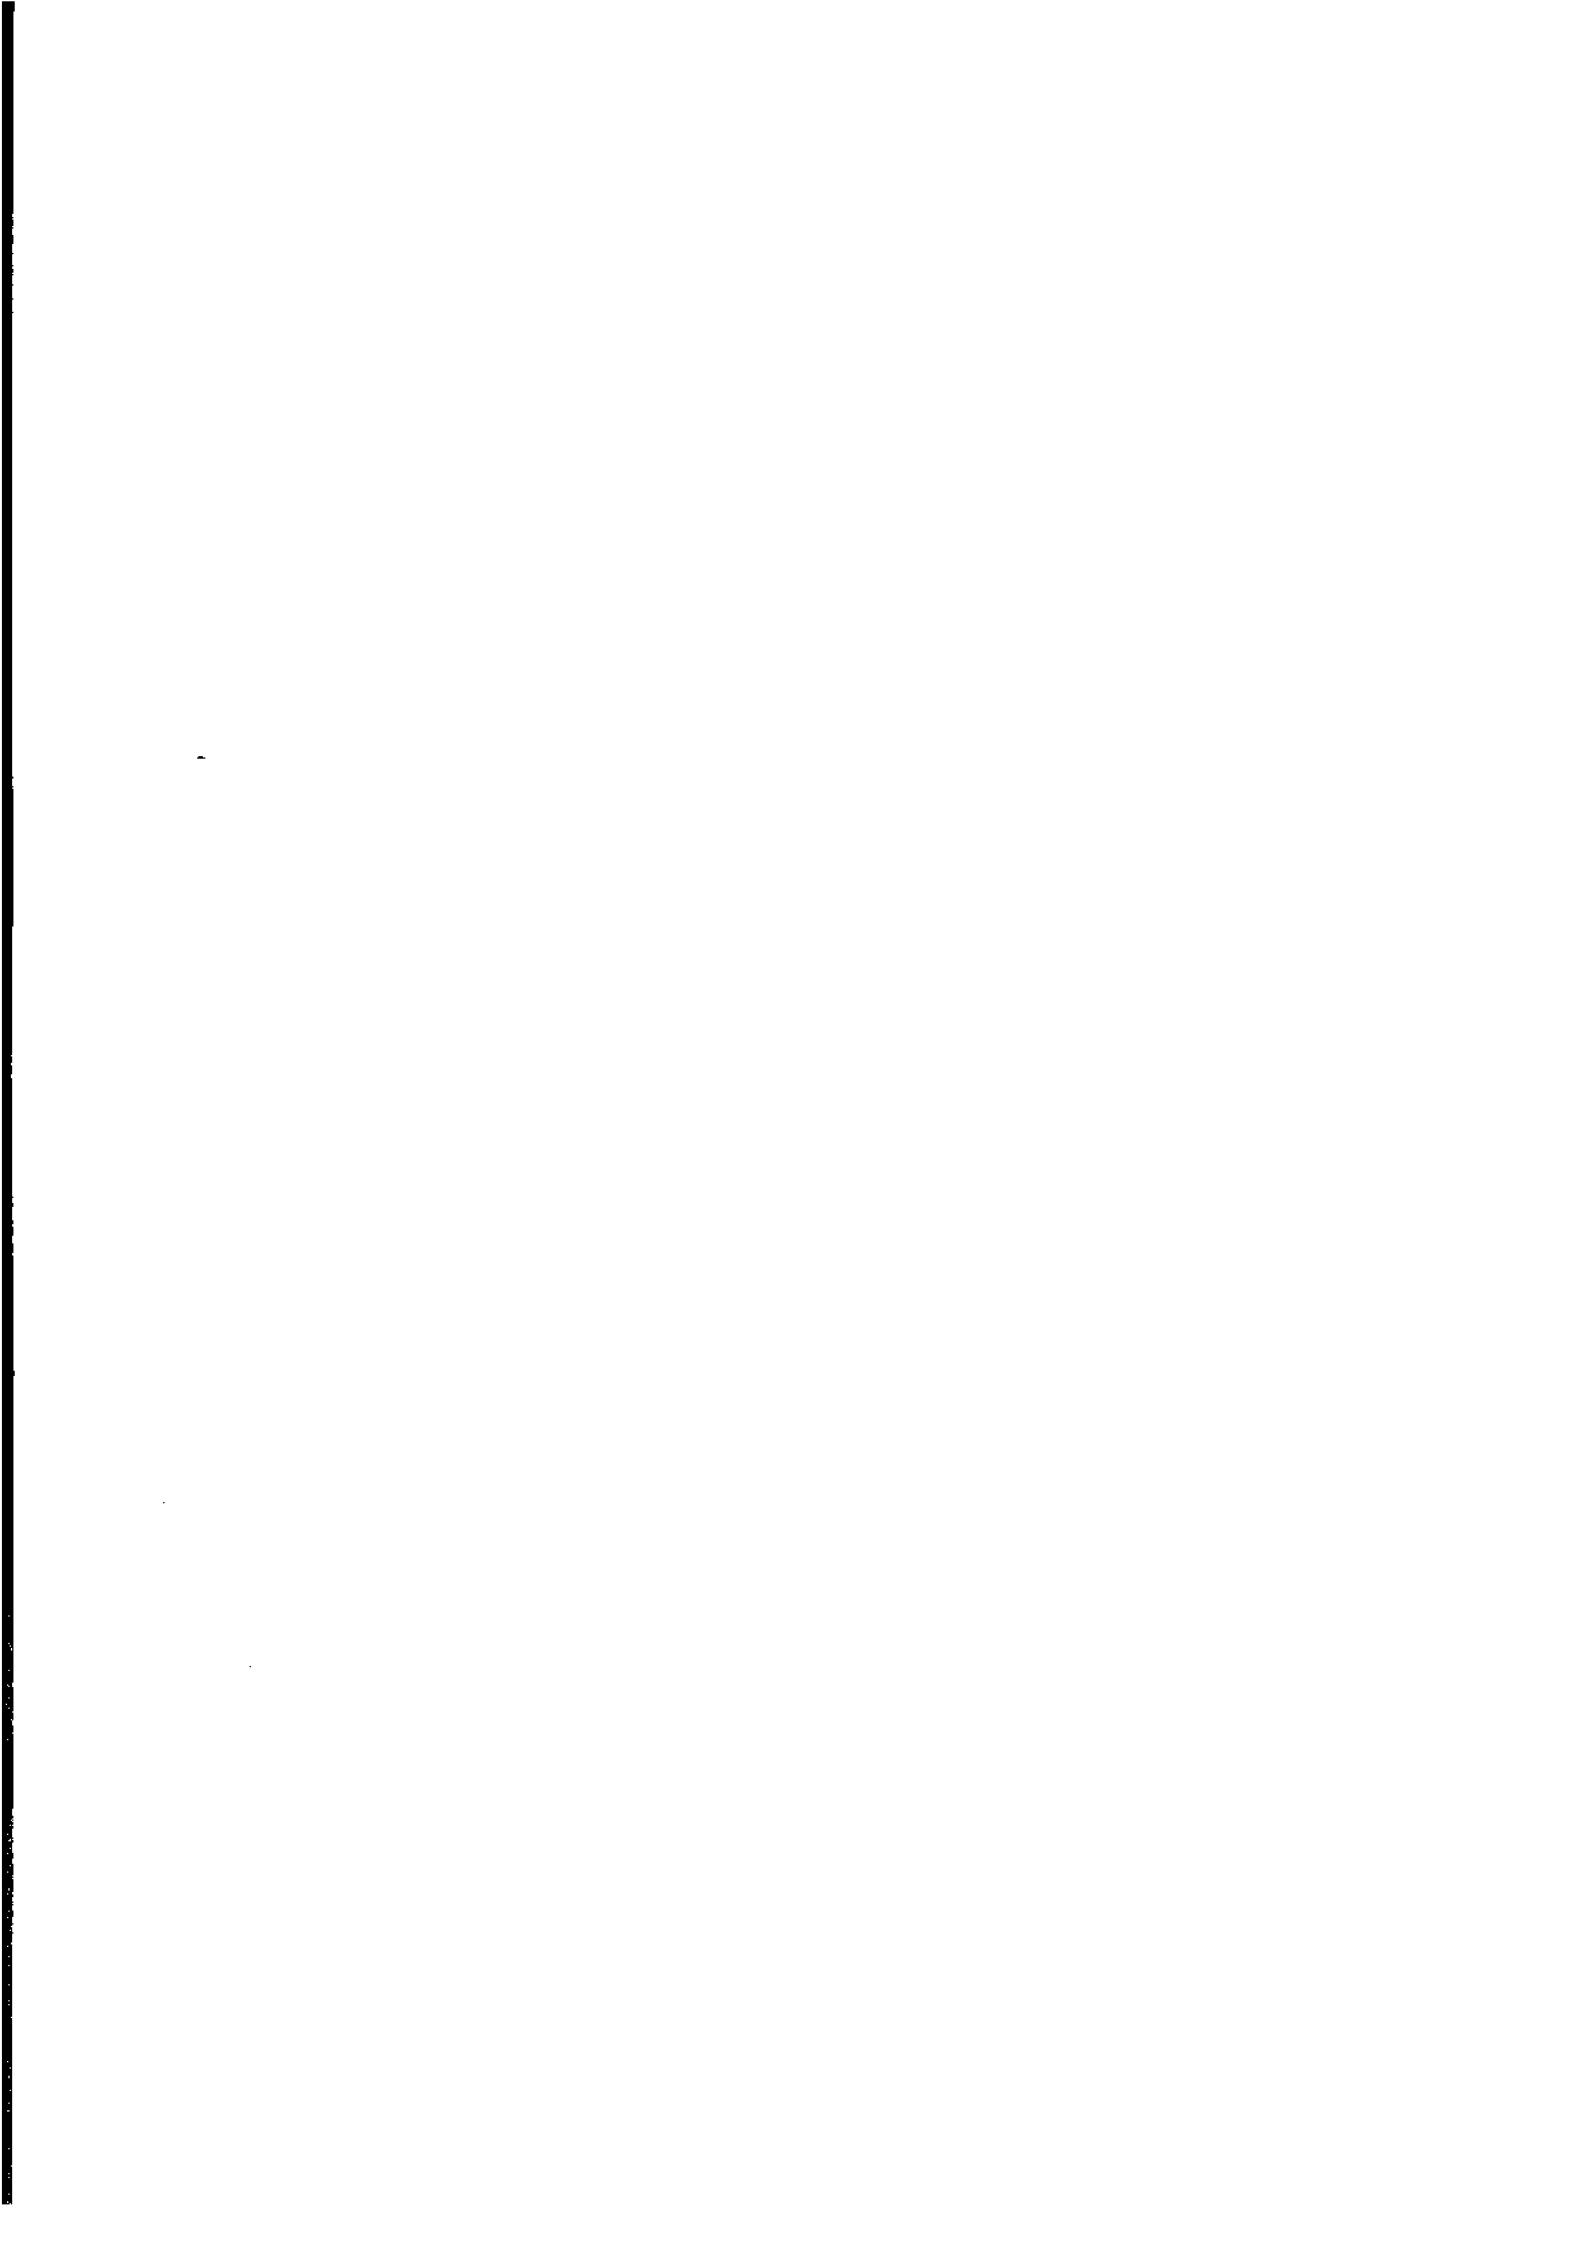

Seasonally adjusted statistics are revised following revision to the original data and as additional data are brought into the analysis each year.

For series where one of the components and the total of the components have been seasonally adjusted (e.g. private dwellings and total dwellings), any figures derived by deduction (in the example quoted — government dwellings) do not amount to a formally seasonally adjusted series for the balance of the components.

INQUIRIES

For information about other ABS statistics and services, please refer to the back of this publication.

Gregory W. Bray
Regional Director
New South Wales

RATE(d)					
1993	14.7	7.1	6.2	6.5	2.5
1994	14.5	7.4	6.4	6.4	2.3
1995	14.0	7.2	5.7	6.2	2.4

(a) Statistics in this table relate to vital events which occurred in each quarter and year shown, and are registered up to the release of this publication. Because of late registrations, they are likely to be revised, particularly the most recent periods.

(b) Births and deaths statistics relate to events which occurred in Australia where the usual residence was within NSW.

(c) Deaths under one year of age.

(d) Number per 1 000 of estimated resident population at 30 June, or number of infant deaths per 1 000 live births.

NOTE: The tables on pages 7 to 11 contain estimates derived from the Monthly Population Survey which is conducted on a sample basis throughout Australia. Explanatory notes and a technical note about the

estimates and further detailed estimates (including industry and occupation details) are contained in Labour Force, New South Wales and Australian Capital Territory (6201.1) which is issued quarterly and is available from the Sydney Office of the ABS.

(a) Sydney Major Statistical Region is equivalent to Sydney Statistical Division.

(c) The labour force in each group expressed as a percentage of the civilian population aged 15 years and over in the same group.

(b) The number of unemployed in each group expressed as a percentage of the labour force in the same group.

(a) Period from the time the person began looking for work or was stood down to the end of the reference week. Period of unemployment is recorded in complete weeks and this results in a slight understatement of duration.

(b) Average duration is obtained by dividing the aggregate number of weeks a group has been unemployed by the number of persons in that group.

(a) Full-time employees are permanent, temporary and casual employees who normally work the agreed or award hours for a full-time employee in their occupation and received pay for any part of the reference period. If agreed or award hours do not apply, employees are regarded as full-time if they ordinarily work 35 hours or more per week.

(b) Part-time employees are permanent, temporary and casual employees who are not full-time employees as previously defined.

NOTE: The tables on pages 12 and 13 contain estimates derived from the Survey of Employment and Earnings, an Australia-wide employer-based survey. Explanatory notes are contained in *Employed Wage and Salary Earners, Australia* (6248.0), which is issued quarterly and is available from the Sydney Office of the ABS. Estimates derived from the Survey of Employment and Earnings will differ from labour force estimates derived from the Monthly Population Survey for the reasons set out in the Information Paper *Comparison of Employment Estimates from the Labour Force Survey and the Survey of Employment and Earnings* (6263.0).

August	2.57	1.05	6.80	15.50
November	2.50	1.18	7.28	16.28

- (a) Overtime is time worked in excess of award, standard or agreed hours of work for which payment is received. Overtime hours represent the number of hours of overtime paid for.
- (b) The figures shown are based on the last pay period ending on or before the third Friday of the month shown.
- (c) Calculated by dividing total overtime hours paid for in each group by the total number of employees in the same group.
- (d) Calculated by dividing total overtime hours paid for by the number of employees who were paid for overtime.
- (e) The number of employees who were paid for overtime as a percentage of the total number of employees.

(a) Working days lost refer to days lost by:

- (i) employees who were directly involved in the dispute, and
- (ii) employees who worked in establishments where stoppages occurred but were not themselves parties to the disputes; excluded is the time lost, as a result of the disputes, by employees in other establishments.

(b) Relates to industrial disputes involving a stoppage of work for a minimum of 10 working days, regardless of the length of the stoppage, for example, 80 employees on strike for one hour. Disputes are classified by industry according to the Australian and New Zealand Standard Industrial Classification (ANZSIC). Disputes prior to January 1994 are classified by industry according to the Australian Standard Industrial Classification (ASIC).

(a) Supermarket sales

(b) Rice prices now relate to long grain and are not comparable to previous periods.

(c) Eggs in Sydney have a net carton weight of 700g per dozen.

NOTE: Prices shown are the averages of prices for specified grades, qualities, brands, etc. charged by a number of selected retailers in Sydney. They should be regarded as no more than approximate indicators of price levels and price changes for the items concerned.

(a) Base of each group index: 1989-90 = 100.0

(b) Weighted average of eight capital cities.

NOTE: The Consumer Price Index is designed to measure quarterly variations in the level of retail prices for goods and services which represent a high proportion of the expenditure of wage and salary earner households. The index covers a large and representative selection of commodities and services arranged in eight major groups.

(a) These are gross contents of metallic minerals produced, as determined by assay, and make no allowance for losses in smelting and refining. The quantities shown are therefore, in general, greater than those actually recoverable.

(b) Content of fine metal.

(c) Includes the metallic contents (when finally separated) of zircon–rutile concentrates recovered in NSW and finally separated in Queensland. Excludes the metallic contents of zircon–rutile concentrates recovered in Queensland or imported into Australia and finally separated in NSW.
