# COMMENTARY

## NEW MOTOR VEHICLE REGISTRATIONS, QUEENSLAND, TREND

Source: ABS, 9303.0

New motor vehicle registrations in trend estimate terms for June 1995 was 10 355, falling slightly from the May 1995 figure but increasing 2.9% from the June 1994 figure of 10 061. Registrations of new passenger vehicles decreased slightly to 8 019 in June 1995 from the May 1995 figure of 8 063 but increased 4.3% from June 1994.

## TOTAL DWELLING UNITS APPROVED, QUEENSLAND, TREND

Source: ABS, 8731.0

In trend estimate terms, Queensland's total dwelling units approved for June 1995 was 2 932, continuing the decline which began in July 1994. Total new dwelling units approved has decreased by 1.6% from May 1995 to June 1995 and by 38.9% since June 1994. The number of dwelling units approved is at its lowest since May 1991.

# EXPLANATORY NOTES

\*\*\*\*\*

## INTRODUCTION

**1** This publication contains latest estimates for a comprehensive range of economic indicators. Statistics shown in this publication are the latest available at the date of preparation and may be subject to revision in subsequent issues. In a number of cases figures appearing in this publication are preliminary and are subject to revision in subsequent issues. Reference should therefore always be made to the latest issue or to the statistical publication on the specific subject.

## SEASONAL ADJUSTMENT AND TREND ESTIMATION

**2** Seasonal adjustment is a means of removing the estimated effects of normal seasonal variation from the series so that the effects of other influences on the series can be more clearly recognised. Seasonal adjustment does not aim to remove the irregular or non-seasonal influences which may be present in any particular month. This means that month-to-month movements of the seasonally adjusted estimates may not be reliable indicators of trend behaviour.

**3** The smoothing of seasonally adjusted series reduces the impact of the irregular components of the seasonally adjusted series and creates trend estimates. These trend estimates are derived by applying a 13-term Henderson-weighted moving average to all months except the last six. The last six monthly trend estimates are obtained by applying surrogates of the Henderson average to the seasonally adjusted series. Trend series are used to analyse the underlying behaviour of the series over time.

**4** While this smoothing technique enables estimates to be produced for the latest month, it does result in revisions to the most recent months as additional observations become available. Generally, subsequent revisions become smaller and after 3 months have a negligible impact on the series. Revisions also occur as a result of the annual review of seasonal factors.

**5** Users may wish to refer to the ABS Publication: *A Guide to Interpreting Time Series – Monitoring 'Trends' - An Overview* (1348.0) for more detailed information on smoothing seasonally adjusted time series data.

## COMPOSITE LEADING INDICATOR

**6** The CLI is calculated as a simple average of the short-medium term movements in eight indicators. On average during the 1970's and 1980's, the CLI led turning points in the GDP(A) growth cycle by around two quarters, but the lead time for individual peaks and troughs varied considerably. Expansions and slow downs in activity are measured relative to the historical long-term trend; thus *peaks and troughs in the CLI provide early signals of turning points in the growth cycle*, not signals of recessions and recoveries.

## RELATED PUBLICATIONS

**7** Current publications produced by the ABS are listed in the *Catalogue of Publications and Products* (1101.0). The ABS also issues, on Tuesdays and Fridays, the *Release Advice* (1105.0) which lists publications to be released in the next few days. The Catalogue and *Release Advice* are available from any ABS office.

## UNPUBLISHED STATISTICS

**8** As well as the statistics included in this and related publications, the ABS may have other relevant unpublished data available. Inquiries should be made to Information Inquiries on (07) 3222 6351 or to any ABS office.

## EFFECTS OF ROUNDING

**9** Estimates have been rounded and discrepancies may occur between totals and sums of the component items.

## SYMBOLS AND OTHER USAGES

n.a.	not available
n.y.a.	not yet available
..	not applicable
—	nil or rounded to zero

## FOR MORE INFORMATION

The ABS publishes a wide range of information on Australia's economic and social conditions. A catalogue of publications and products is available from any of our offices (see below).

### INFORMATION CONSULTANCY SERVICES

Information tailored to special needs of clients can be obtained from the Information Consultancy Service available at ABS Offices (see below).

### ABS PRODUCTS

A large number of ABS products is available from the ABS Bookshops (see below). The ABS also provides a subscription service – you can telephone the ABS Subscription Service Australia wide toll free on 1800 0206 08.

### ELECTRONIC SERVICES

A large range of data is available via on-line services, diskette, magnetic tape, tape cartridge and CD ROM. For more details about our electronic data services, contact any ABS office (see below) or e-mail us at:
