## **SOUTH AUSTRALIAN ECONOMIC INDICATORS**

January 1997

P.M. GARDNER Regional Director

**AUSTRALIAN BUREAU OF STATISTICS** 

**CATALOGUE NO. 1307.4** 

© Commonwealth of Australia 1996

Produced by the Australian Government Publishing Service

## **PREFACE**

South Australian Economic Indicators is a monthly publication which contains the latest available data at the time of preparation for a range of statistical series that have been identified as indicators of economic activity in this State. In a number of cases the figures presented are preliminary and subject to revision in subsequent issues.

Written and graphic commentary have been included for many of the selected series and analysis has been augmented with the calculation of the percentage change from the previous reference period together with the presentation of comparative Australian data.

Time series information has been included to provide a historical perspective on many of the selected indicators. Future issues may be expanded to include further historical data in response to expressed user needs. This product is under continuous review and any suggestions for enhancement will be welcomed.

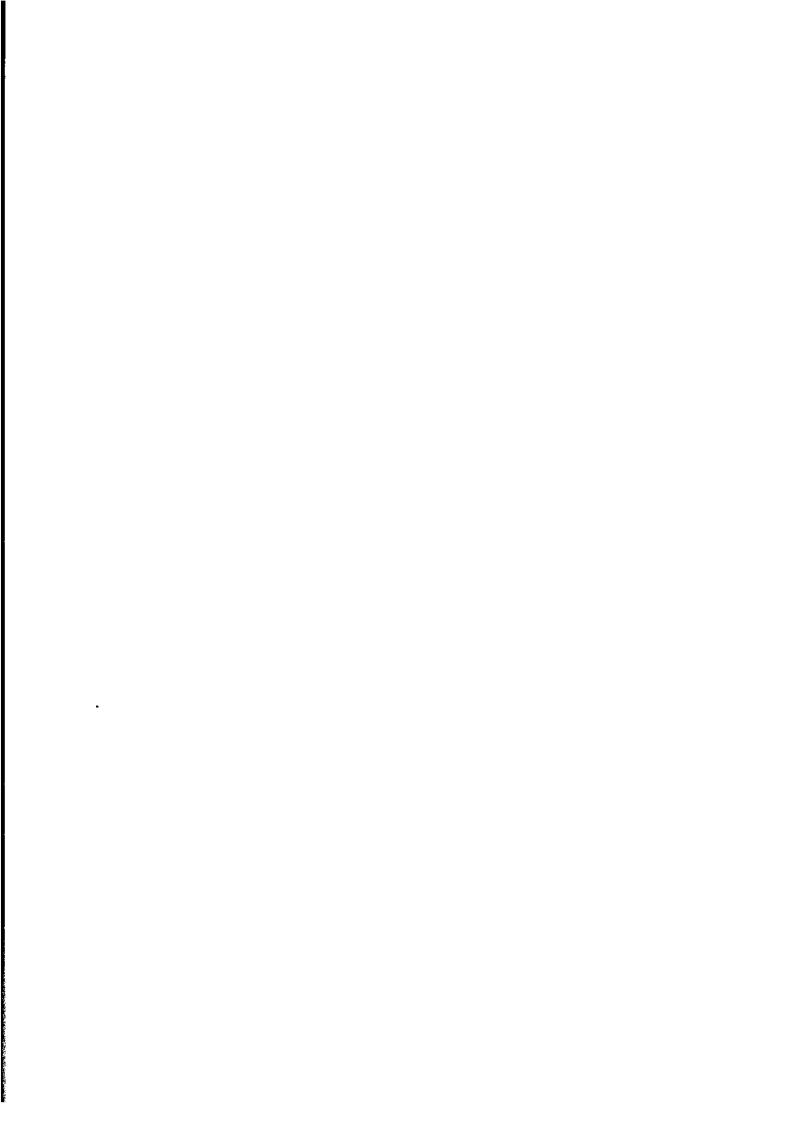

More detailed information on each series, including explanatory and technical notes, can be obtained from other Australian Bureau of Statistics publications or alternative data sources. To assist those seeking further information a source publication for each of the series has been documented in the statistical summary.

This issue includes a special article entitled *South Australian Agriculture Finance Statistics*. Future issues will contain further articles on statistical topics which concentrate on longer term trends or other issues pertinent to the South Australian economy.

If you have any inquiries concerning this publication please contact the editor, John Callinan, telephone (08) 8237–7307. All requests for statistical information should be directed to the ABS Information Service, GPO Box 2272, Adelaide SA 5001, telephone (08) 8237 7100.

## REVIEW

## Overview

- Merchandise exports for the month of October 1996 were \$423.9 million, an increase of 35.0% on September 1996 and 39.2% on October 1995.
- The value of merchandise imports for October 1996 was \$284.8 million, a 1.9% decrease on the previous month and a 10.7% increase on October 1995.
- The trend estimate of retail turnover in South Australia fell by 0.8% in October 1996. The South Australian trend estimate has been in decline from July.
- The downward trend for new motor vehicle registrations in South Australia evident since April 1996 continued in October 1996 with a decrease of 2.6% from September 1996.
- The October 1996 trend estimate for dwelling unit approvals in South Australia continued its upward movement for the fifth consecutive month with a 3.9% increase in September 1996.
- The value of non-residential building in South Australia has halved falling to a low of \$28.5 million for October 1996.
- The Price Index of Materials used in House Building in Adelaide rose 0.4% for the month of October 1996.
- Adelaide recorded an increase of 0.4% in the Price Index of Materials used in Building other than House Building.
- During the September quarter 1996 the Price Index of Established Houses in Adelaide decreased 0.1% and the Project Home Index decreased 0.7%.
- At 30 June 1996 the estimated resident population of South Australia was 1,479,153.
- After remaining flat in the ten months to August 1996, the trend unemployment rate for South Australia has increased to 9.6% in November 1996.
- There were 1,800 working days lost through industrial disputes in South Australia during September 1996.
- During September 1996 there were 5,481 short-term visitor arrivals in South Australia and 13,917 short-term departures.
- In the 12 months to October 1996, the weekly award rates of pay index for full-time employees in South Australia increased by 1.4%.
- The trend estimate for the value of owner-occupied housing commitments continued its upward climb with October rising 1.5% to \$237.0 million.

NOTE: Deficiencies in the data sources used to estimate gross operating surplus for recent quarters may at times lead to the current price estimates of gross state product GSP(I) being under or over stated for particular States. Consequently, the measured growth rate for constant price GSP(I) for those States will also be affected.

The constant price series for gross state product (GSP) have been labelled as 'experimental'. Users are cautioned that these estimates are derived indirectly by calculating a deflator from the expenditure components. It is emphasised that, at times, movements that can not be fully explained may be introduced into the constant price GSP(I) series through the use of this proxy deflator.

Trend Estimates (Current Prices)

Gross state product (GSP) grew 0.8% in the June quarter compared with the national average of 1.4%. This is the third consecutive quarter in which the rate of increase in GSP has slowed and is considerably below the strong growth of 2.3% recorded in the September quarter 1995.

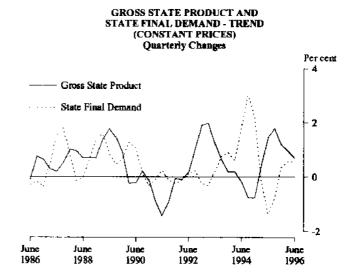

Wages, salaries and supplements grew 0.8%, slightly lower than in recent quarters. Growth continues to be below the national rate, a trend evident since the December quarter 1993. Growth through the year to June quarter 1996 was 4.8% compared with the national average of 6.2%.

Gross operating surplus grew by 1.0% in the June quarter, continuing a pattern of falling growth rates evident from December quarter 1995. By contrast the national average has remained fairly constant at about 1.8% for the past 3 quarters.

Indirect taxes less subsidies grew by 0.4% in the June quarter, continuing a pattern of falling growth rates evident from the September quarter 1995.

Trend Estimates (Constant Prices)

The experimental GSP at constant prices grew 0.7% in the June quarter and was 4.7% above June quarter 1995. The increase in GSP outstripped that of state final demand for the sixth consecutive quarter although the gap has narrowed significantly over the past 2 quarters.

Growth in state final demand of 0.6% in the June quarter is below the national growth of 0.9% in domestic final demand. Growth in state final demand has been below the national average for 6 consecutive quarters although the gap has narrowed over the past 2 quarters.

Private final consumption expenditure grew 0.4% in the June quarter compared with the national average of 0.8%. Growth in private final consumption expenditure has been fairly constant over the past 3 quarters. Growth through the year to the June quarter 1996 was 2.1%, approximately half the national rate of 4.1%.

Private gross fixed capital expenditure grew 2.8% in the June quarter compared with the national average of 1.8%. Increases in expenditure on equipment and non-dwelling construction more than offset the decline in expenditure on dwellings, which fell for the seventh consecutive quarter.

The decline of 0.1% in public final demand reflects a fall in government final consumption expenditure (which fell for the sixth consecutive quarter) and quite strong growth in public gross fixed capital expenditure.

## International Accounts

**Exports** 

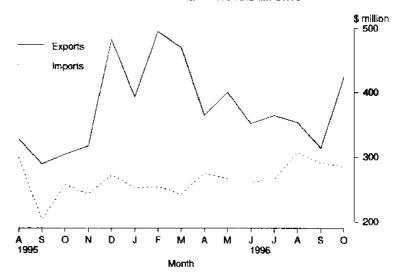

Merchandise exports, where the final stage of production was in South Australia, for the month of October 1996 were \$423.9 million, an increase of 35.0% on September and 39.2% on October 1995.

The major commodity groups exported during October 1996 were road vehicles, parts and accessories with \$75.9 million an increase of \$39.1 million on last month, cereal and cereal preparations \$47.3 million, metals and metal manufactures \$46.3 million and wine \$40.6 million.

On an industry of origin basis the machinery and equipment manufacturing industry increased \$34.1 million to \$110.8 million for the month of October. Other large increases occurred in the mining sector \$21.5 million after a very low September figure of \$2.0 million and metal product manufacturing \$14.5

The United States of America was the major country of destination in October 1996 with a value of \$74.2 million. Japan with \$65.8 million was next, followed by New Zealand with \$40.3 million.

## MERCHANDISE EXPORTS AND IMPORTS

**Imports** 

The value of merchandise imports for October 1996 was \$284.8 million, a 1.9% decrease on the previous month and a 10.7% increase on October 1995. Machinery accounted for the largest proportion of imported goods with \$72.1 million or 25.3% of total imports, followed by petroleum and petroleum products \$50.3 million (17.6%) and road vehicles, parts and accessories \$48.3 million (17.0%).

## Consumption and Investment

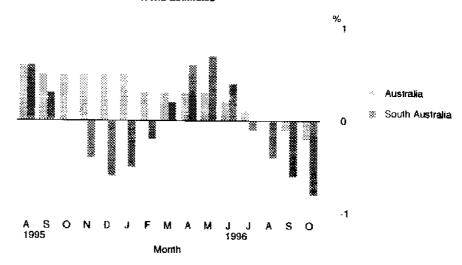

Retail Turnover

The trend estimate of retail turnover in South Australia fell by 0.8% in October 1996. The South Australian trend estimate has been in decline from July. The trend estimate for Australia fell by 0.2%.

Over the past three months the trend estimate for South Australia fell by \$13.6 million caused by the decreases of \$8.8 million in hospitality and services, \$6.6 million in other retailing, \$3.4 million in household good retailing, \$3.3 million in clothing and soft good retailing, and \$1.7 million in department stores. This was partly offset by increases of \$9.2 million in food retailing and \$1.2 million in recreational good retailing group.

The seasonally adjusted estimate of retail trade in October 1996 decreased 0.8%. In original terms, South Australian retail turnover was \$771.8 million, a decrease of 0.3% on October 1995.

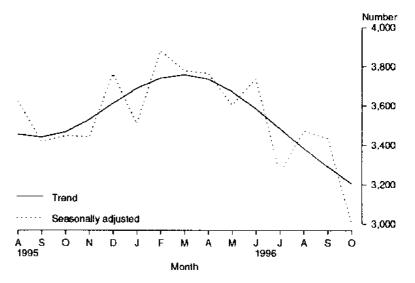

#### PERCENTAGE CHANGE FROM PREVIOUS MONTH Trend Estimates

New Motor Vehicle Registrations The downward trend for new motor vehicle registrations in South Australia evident since April 1996 continued in October 1996 with a decrease of 2.6% from September 1996. The seasonally adjusted estimate for October 1996 dropped by 12.6% from September 1996 and by 12.9% from October 1995.

In original terms there were 3,360 new motor vehicles registered in October 1996, a decrease of 2.2% from September 1996 and 7.9% from October 1995. For new passenger vehicles, the leading makes registered in October 1996 were Holden (644 vehicles), Ford (637), Mitsubishi (430), Toyota (392) and Hyundai (169).

#### **NEW MOTOR VEHICLE REGISTRATIONS**

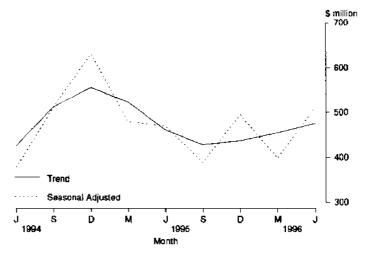

## **Tourist Accommodation**

When the September quarter 1996 is compared with the September quarter 1995, the number of rooms available in hotels, motels and guesthouses in South Australia increased from 10,703 to 10,879 while bed spaces increased from 30,227 to 30,848. Room nights occupied fell by 1.1% resulting in an occupancy rate of 48.9%. Regional room occupancy rates ranged from 55.9% in the Adelaide Statistical Division to 39.6% in the South East Statistical Division. Takings from accommodation increased by 1.3% from \$37.1 million to \$37.6 million with average takings per room night occupied rising from \$75 to \$77.

Private New Capital Expenditure The trend estimate (in current prices) for private new capital expenditure in South Australia for the June quarter 1996 was \$476 million. The increase of 4.6% from the previous quarter is a continuation of trend growth which commenced in December quarter 1995. The Australian figure rose by 6.6%. The South Australian total for the quarter now represents 4.7% of the Australian figure.

Private new capital expenditure in original terms for the June quarter 1996 was \$513 million, an increase of 36.8% from the March quarter 1996. Buildings and structures accounted for \$108 million, and equipment, plant and machinery \$405 million. Expenditure for the 12 months to June 1996 fell by 15.3% from 12 months to June 1995 with the Australian figure rising by 10.2%.

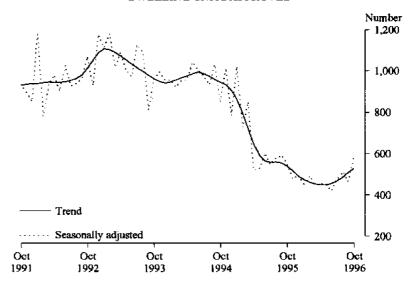

## **Production**

**Dwelling Approvals** 

The October 1996 trend estimate for dwelling unit approvals in South Australia continued its upward movement for the fifth consecutive month with a 3.9% increase in September 1996 but was still 2.0% lower than the October 1995 trend estimate. In original terms the number of new private sector houses approved fell by 57 but this was off set by an increase of 97 other residential buildings including one aged care development of 45 dwellings.

The national trend estimate for the total number of dwelling units approved in October 1996 was 0.8% higher than the estimate for September and 2.9% higher than October 1995. In original terms, South Australia accounted for 4.8% of the total dwelling units approved in Australia during October 1996.

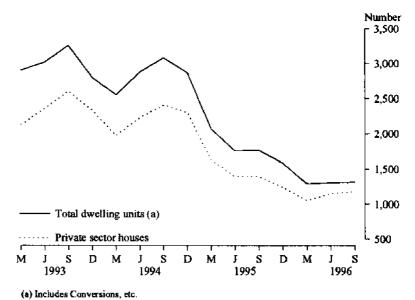

#### DWELLING UNITS APPROVED

**Dwelling Commencements** 

For the Building Activity Survey, it was estimated that 1,315 dwelling units were commenced in South Australia during the September quarter 1996. The latest figure for South Australia remained steady compared with a 3.2% fall nationally. The September quarter figure for South Australia was 25.7% below the figure for the September quarter 1995, while the national decrease over the twelve month period was 12.4%.

## DWELLING UNITS COMMENCED

Value of Building Approvals

The value of new residential building approved in South Australia has remained steady at \$43.7 million for October 1996. This was due to a 11.1% fall in the value of new houses approved to \$35.1 million being balanced by the value of other residential buildings approved more than doubling to \$8.6 million for October.

The value of non-residential building in South Australia has halved falling to \$28.5 million for October 1996.

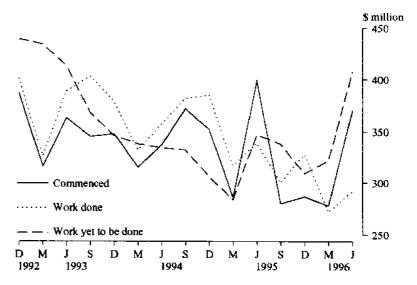

Overall for October 1996, the value of all buildings approved fell by 25.6% to \$84.2 million from the September 1996 value of \$113.2 million.

Value of Total Building Activity The total value of building work commenced in South Australia during the June quarter 1996 increased by 33.2% to \$370.9 million. This increase was generally confined to the non-residential building sector (64.8% increase) in particular shops, other business premises and entertainment and recreational categories. South Australia had a 7.0% decrease in building commencements from the June quarter 1995 while the total for Australia showed a 4.0% decrease. The South Australian share of total building commencements was 5.8% for the June quarter 1996.

The total value of building work done during the June quarter 1996 increased by 7.5% to \$292.2 million compared with an increase of 9.2% nationally. Compared with the June quarter 1995, South Australia had a 13.8% decrease in the value of total building work done while the national movement was an 8.0% decrease.

The total value of building work yet to be done in South Australia was \$407.8 million at the end of June 1996, a rise of 26.8% from the previous quarter while the corresponding national figure remained steady. Expressed as a proportion of the national total, the total value of building work yet to be done in South Australia was 4.4% for the June quarter up from the previous quarter of 3.5%.

## VALUE OF BUILDING ACTIVITY

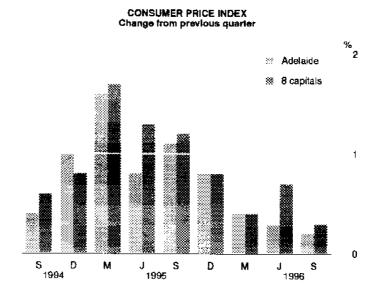

Value of Engineering Construction In the June quarter 1996 the value of engineering construction work done in South Australia increased by 13.9% to \$225.7 million compared with a 19.9% increase nationally. South Australia had a 5.5% share of the national total of \$4,114.7 million. The value of work commenced during the quarter fell by 36.1% to \$196.1 million for South Australia while the corresponding national figure fell by 31.4% to \$3,072.4 million. The State's proportion of national commencements was 6.8% for the June quarter 1996.

## **Prices**

Consumer Price Index

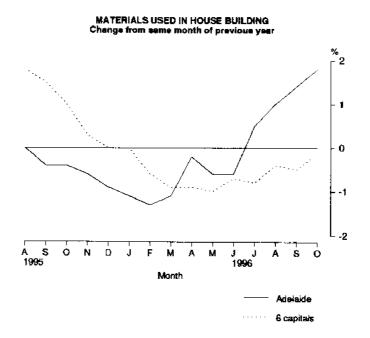

For the September quarter 1996 the Consumer Price Index (all groups) increased 0.2% for Adelaide compared with an increase of 0.3% for the 8 capital cities. These are the lowest quarterly increases recorded since December quarter 1993. The annual increase was 1.7% for Adelaide and 2.1% for the 8 capital cities.

House Building Materials

The Price Index of Materials used in House Building in Adelaide rose 0.4% for the month of October. This was due to an increase in the prices of ready mixed concrete, plaster products and paint. The Index for the weighted average of the 6 State capitals rose by 0.2%

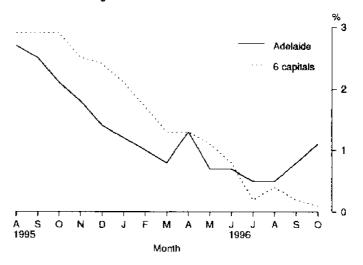

For the 12 months to October, the index has shown an increase of 1.8% for Adelaide and the weighted average of the 6 State capitals a decrease of 0.1%.

Non-house Building Materials Adelaide recorded an increase of 0.4% in the Price Index of Materials used in Building other than House Building due to increases in the prices for ready mixed concrete, reinforcing steel bar and fabric and paint which were slightly off-set by decreases for non-ferrous pipes and fittings resulting from a drop in the world copper prices. For October, the index for the weighted average of the 6 State capitals rose by 0.1%

The index increased 1.1% in Adelaide for the 12 months to October whilst the weighted average of the 6 State capitals rose by 0.1%.

#### MATERAIALS USED IN BUILDING OTHER THAN HOUSE BUILDING Change from Same Month of Previous Year

House Prices

During the September quarter 1996 the Price Index of Established Houses in Adelaide decreased 0.1% whilst the Project Home Index showed a 0.7% decrease. The weighted average of the 8 capital cities index, over the same period showed a 0.4% increase for established houses and a 0.2% decrease for project houses.

Between September quarter of 1995 and 1996 the Price Index for Established Houses in Adelaide decreased by 2.0% and project homes by 1.7%. Nationally, for the 12 month period established house prices recorded a 1.2% increase and project homes decreased by 0.8%.

Passenger Transport Costs

The passenger transport cost index measures changes in the costs of operating a public transport passenger bus service in Adelaide. Costs covered include labour costs, leasing charges, registration and insurance, repairs and maintenance, fuel and overheads. The index has been compiled on a quarterly basis from September 1995 with a base of 100.0 in 1993-94. The September quarter 1996 index was 104.1, down from 104.2 in June 1996. The index showed a 1.5% increase in the 12 months to September 1996.

## Labour Force and Demography

Population

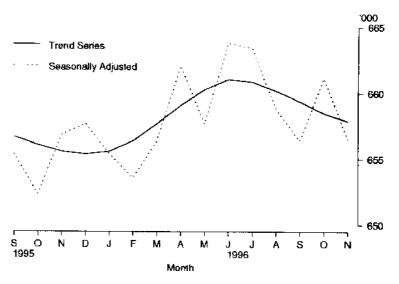

At 30 June 1996 the estimated resident population of South Australia was 1,479,153. This was an increase of 0.1% (1,422) persons from the March quarter. The continuing low growth rate for South Australia is attributable to a net outflow in interstate migration of 1,093 persons which was partly offset by a net inflow of overseas migration of 697 persons. In the June quarter there was a natural increase of 1,818 persons.

**Employment** 

In the five months to November 1996, the trend estimate of employed persons in South Australia has decreased to 657,900, thus reversing the continuous growth evident in the first half of this year.

In the seven months to November 1996, the trend estimate of employed persons in Australia has increased to 8,383,900, thus reversing the decreases evident in the early part of the year.

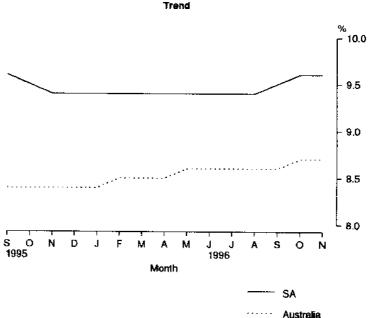

## EMPLOYED PERSONS

Unemployment

After remaining flat in the ten months to August 1996, the trend unemployment rate for South Australia increased to 9.6% in October and remained unchanged in November 1996.

## **UNEMPLOYMENT RATES**

The trend unemployment rate for Australia has shown a similar pattern to South Australia rising to 8.7% for October and November 1996.

Overtime

The proportion of employees who worked overtime in South Australia in August 1996 was 14.3%. This was lower than the August 1995 level of 15.9%.

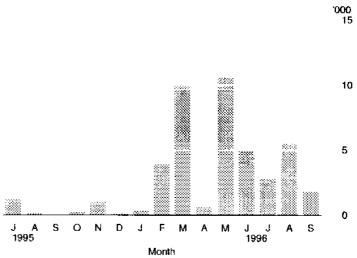

Nationally, the proportion of employees working overtime in August 1996 was 14.9% compared with 16.2% a year earlier.

Employees working overtime in South Australia recorded an average of 6.7 overtime hours per week in August 1996. This was lower than the corresponding national level of 6.8 hours.

Industrial Disputes

There were 1,800 working days lost through industrial disputes in South Australia during September 1996. At 5.3% of the national total (34,000 working days lost), South Australia experienced a relatively low level of industrial disputation.

## INDUSTRIAL DISPUTES Working Days Lost

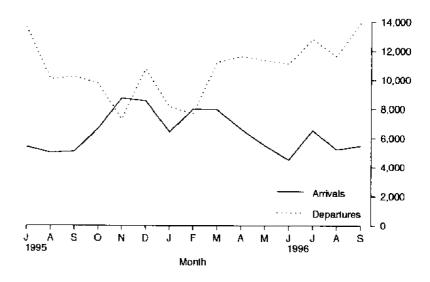

Short term Overseas Visitor Arrivals During September 1996 there were 5,481 short-term visitor arrivals in South Australia bringing the total number of overseas visitors during the nine months from January 1996 to 56,309, an increase of 6.0% over the corresponding period in 1995. In September 1996 the South Australian share of the Australian total was 1.8%.

Short term Resident Departures

There were 13,917 short-term resident departures from South Australia during September 1996 bringing the total for the period January to September 1996 to 99,476. This was an increase 7.0% compared with the same period in 1995. South Australian resident departures accounted for 4.9% of the national total in September 1996.

## SHORT TERM OVERSEAS ARRIVALS AND DEPARTURES

## Incomes

## Average Weekly Earnings

The trend estimate of average weekly ordinary time earnings of full-time adult employees in South Australia increased by 0.7% in August 1996. Male full-time ordinary time earnings rose by 0.7% in August 1996. Over the same period, the increase for females was less pronounced; increasing by 0.6%.

Between May 1996 and August 1996, the trend estimate of average weekly total earnings of all employees in South Australia increased from \$528.00 to \$532.00.

Note: Since it is an average of earnings across all employees, changes in average weekly earnings may occur through changes in employment as well as changes in pay levels.

## Award Rates of Pay

In the 12 months to October 1996, the weekly award rates of pay index for full-time employees in South Australia increased by 1.4%. This compares with an increase in the index of 1.3% for Australia.

For full-time adult male employees in South Australia, the largest annual movement of the index occurred in the manufacturing industry division, with an increase of 1.9%.

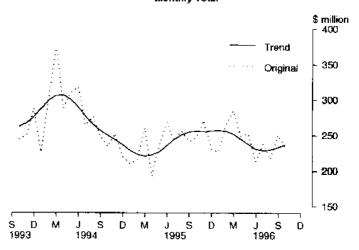

For full-time adult female employees, the largest annual movement of the index occurred in the public administration and defence industry division, with an increase of 3.0%.

## **Financial Markets**

Housing Finance

The trend estimate for the value of owner-occupied housing commitments continued its upward climb with October rising 1.5% to \$237.0 million, however this was still 7.5% below October 1995. The national trend increased 1.7% for the month 11.9% above the previous October.

# SECURED HOUSING FINANCE COMMITMENTS TO INDIVIDUALS (ALL LENDERS) (Excluding Alterations and Additions) Monthly Total

Total housing finance commitments (original figures including alterations and additions) decreased 8.3% in October to \$247.6 million, 7.1% below October 1995. The main decrease occurred for refinancing, down \$23.2 million (33.9%) to \$45.4 million. The other decreases were for alterations and additions down 27.9% to \$14.0 million and the purchase of newly erected dwellings down 23.1% to \$6.4 million. Nationally, refinancing declined 22.3% during the month but was still 19.3% above the previous October.

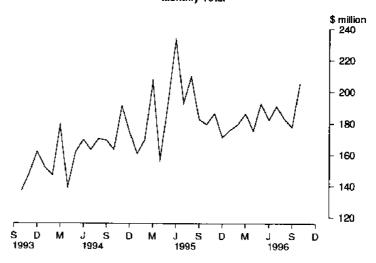

Loans for construction of dwellings increased 18.1% to \$27.6 million (3.5% below October 1995) to represent 5.0% of the national total. The other increase was for the purchase of established dwellings, up marginally to \$154.2 million, 6.3% of the Australian figure.

Personal Finance

Total commitments for October increased 15.6% to \$205.3 million, 14.5% above the previous October. The national increase for the month was 11.7%, also 14.5% above October 1995. South Australian commitments increased marginally to 6.7% of the national total.

Both fixed loan commitments and revolving credit facilities increased with fixed loans up 7.4% to \$123.0 million and revolving credit facilities up 30.6% to \$82.3 million, 40.6% above October 1995.

# PERSONAL FINANCE COMMITMENTS (ALL LENDERS) Monthly Total

Used motor vehicles and station wagons, the largest category of fixed loan commitments, increased 13.2% to \$40.1 million and new motor vehicles and station wagons increased 8.1% to \$14.8 million (12.9% above the previous October). Alterations and additions to dwellings were nearly double September's commitments, the highest since April 1989. Refinancing increased 10.9% to \$19.6 million while debt consolidation decreased marginally, one of the few categories that did fall.

Secured commitments under revolving credit facilities increased 27.7% to \$36.7 million, which is more than double the previous October and the highest recorded monthly figure. Unsecured commitments increased 33.0% to \$45.6 million, 5.5% above the previous October.

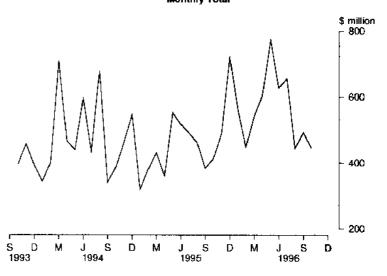

Commercial Finance

Total commercial finance commitments decreased 9.4% to \$445.9 million, 8.1% above October 1995. Nationally, commercial finance commitments increased 4.8% during the month, 20.8% higher than the previous October. South Australia's proportion of the national total dropped to 3.9%. Every month for the past year, except August has however been significantly above the corresponding month of the previous year.

Commitments under fixed loan facilities decreased 12.1% to \$273.4 million during October, 8.5% above October 1995. The main decrease was for property and business services, down 47.8% to \$20.3 million following four high months. Significant decreases also occurred for finance, investment and insurance down 48.0% to \$12.7 million and community services down 64.8% to \$6.7 million. Mining increased by \$2.2 million to \$3.9 million, which is its highest month since September 1991.

Revolving credit facilities decreased 4.9% to \$172.6 million, 7.5% above October 1995. The main decrease was for wholesale trade down 68.0% to \$6.1 million, the lowest month since December 1995. The other main decreases were for retail trade and recreation, personal and other services. Construction and property and business services had the main increases.

## COMMERCIAL FINANCE COMMITMENTS Monthly Total

Lease Finance

The value of goods under new finance lease commitments decreased 31.2% to \$15.3 million, 18.9% below the previous October. South Australia's proportion of the national total dropped to 2.6%.

The main fall in commitments was for construction and earthmoving equipment, down \$5.2 million following the very high September figure. New motor cars and station wagons not subject to depreciation decreased 19.1% to \$4.2 million for the month and down 14.1% on the previous October to be 2.6% of the national figure. New motor cars and station wagons subject to depreciation decreased 73.5% to be the lowest figure ever recorded for that category.

Used motor cars and station wagons not subject to depreciation had the largest increase among vehicles, up 25.3% to \$2.2 million following the low September amount. Manufacturing equipment quadrupled after two very low months.

## Forward Outlook

## Composite Leading Indicator

The Composite Leading Indicator (CLI) is a single time series produced by aggregating eight individual economic indicators, and has been developed by the ABS as an experimental series to supplement existing forms of economic analysis and modelling.

The CLI summarises the early signals contained in a selection of economic indicators and is designed to assist the detection of turning points between successive expansions and slow downs of economic activity as measured by constant price GDP(A). It does not attempt to forecast the level of economic activity.

In the September quarter 1996:

- the experimental CLI rose 0.18%, following a 0.31% rise in the June quarter 1996.
- The CLI is showing a trough at the September quarter 1995 followed by strong growth.

The quarterly data are released in more detail in the Australian Economic Indicators (1350.0). The CLI was the topic of the Focus article in the September 1993 edition of South Australian Economic Indicators (1307.4).

Australian Business Expectations Surveys of business expectations have been available to decision makers for a number of years from several sources. These surveys provided qualitative indicators in the form of the net proportion of businesses expecting a rise or fall in future business conditions. Since the December quarter 1993, the ABS has been compiling a quantitative indicator of business expectations in the form of an expected weighted aggregate change in a range of economic variables. These data are available on a quarterly basis in Australian Business Expectations (5250.0).

## AUSTRALIAN BUSINESS EXPECTATIONS SOUTH AUSTRALIA AND AUSTRALIA **SALES OF GOODS AND SERVICES** EXPECTED PERCENTAGE AGGREGATE CHANGE

	Short te	rm	Medium term  Expected aggregate change between			
	Expected aggregate of	change between				
Reference Period	June 1996 and Sep. 1996	Sep. 1996 and Dec. 1996	June 1996 and June 1997	Sep. 1996 and Sep. 1997		
	%	%	%	96		
South Australia	0.3	2.1	2.3	3.3		
Australia	1.6	1.6	3.6	3.1		

## Short term

Businesses in South Australia expect a rise of 2.1% in sales of goods and services in the December quarter 1996 compared with the September quarter while the national expectation was a 1.6% increase.

## Medium term

Businesses in South Australia expect sales of goods and services in the September quarter 1997 to be 3.3% above September quarter 1996. Australia wide the expectation was for 3.1% growth.

## **FOCUS**

## South Australian Agriculture, Finance Statistics

This article was contributed by the Economic Statistics Unit, ABS, Adelaide.

#### Introduction

Since 1986-87 an Agricultural Finance Survey (AFS) has been conducted Australia-wide with the aim of providing financial statistical information that allows analysis of the structure of the agriculture sector. It also provides users with a comprehensive range of agricultural financial statistics to allow comparative analysis of the economic performance of the various agricultural industries

The survey forms part of the ABS Economy Wide Surveys Program that provides a wide range of financial and structural information about each of Australia's economic sectors.

## **Survey Results**

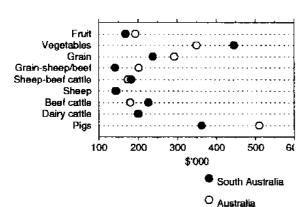

While these 1994-95 results are the most detailed available for the agricultre sector it should be recognised that the survey cannot be completed until farm accounts are finalised. Aggregate preliminary estimates of value of production made from the 1995-96 Agicultural Census are available. These show the gross value of agricultural commodities produced in South Australia increasing 34.0% from \$2,464.6 million in 1994-95 to \$3,299.9 million in 1995-96. This rise was driven by good prices for an increased cereal harvest with the gross value of crops increasing 55.1%, from \$1,493.1 million to \$2,315.7 million.

### Turnover

The estimated South Australian turnover for the agricultural industry rose to \$2,353.8 million in 1994-95, an increase of \$306.6 million (15.0%) from 1993-94.

This compares favourably with the national turnover for agriculture which rose \$1,822.0 million (8.4%) to reach a level of \$23,516.3 million in 1994-95. Turnover in South Australia made up 10.0% of the national total.

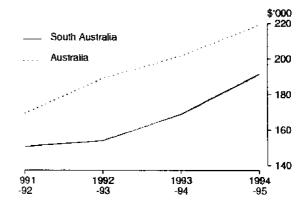

#### AVERAGE TURNOVER OF AGRICULTURAL INDUSTRIES 1994-95

The main industries in terms of turnover during 1994-95 for South Australia were grain (\$554.6 million, down 16.2% and nationally down 20.6%), grain-sheep/beef (\$490.9 million, up 93.6% and nationally up 20.2%) and fruit (\$334.2 million, up 50% and 19% nationally). The vegetable industry recorded a significant increase of \$83.6 million (64.6% and 23.0%). The graph indicates the average turnover for selected industries in South Australia compared with Australia.

In 1994-95, the average turnover per farm business in South Australia increased \$22,700 (13.4%) to \$191,600 compared with the national figure of \$219,200 (up 8.7%). These increases in average turnover continue an upward trend evident from the graph below.

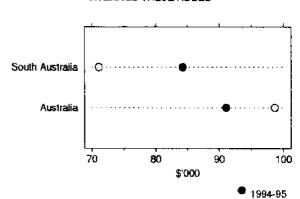

#### AVERAGE TURNOVER PER FARM BUSINESS

## Value Added

The average value added contributed to the South Australian economy by farm businesses in the agricultural industry for 1994-95 was \$84,200. This was \$13,100 (18.4%) above the 1993-94 figure. Over the same period average value added for the Australian economy fell \$7,600 (7.7%) to \$91,000 partly as a result of the drought experienced in the eastern States.

## AVERAGE VALUE ADDED

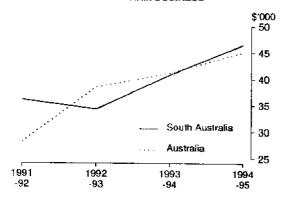

O 1993-94

## **Cash Operating Surplus**

The aggregate cash operating surplus for South Australia rose from \$491.4 million in 1993-94 to \$570.7 million in 1994-95, an increase of 16.1%. This is significant when compared with the surplus for Australia which rose by 9.1% to \$4,835.7 million. The largest component of the surplus for South Australia was grain (\$150.6 million) which fell by 16.6% from the 1993-94 figure. Grain-sheep/beef recorded a 132.6% increase over the twelve months to reach \$102.8 million. Some of this movement can be attributed to movement of farm businesses between industries.

The average cash operating surplus per farm business for South Australia was \$46,500 (up 14.0%) for 1994-95, \$1,400 higher than the Australian average of \$45,100 (up 9.5%).

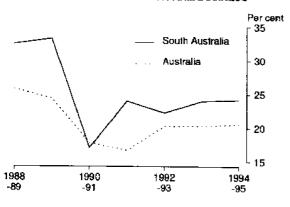

#### AVERAGE CASH OPERATING SURPLUS PER FARM BUSINESS

## **Profit Margins**

Farm businesses in South Australia recorded an increase in profit margins of 0.2% to reach a level of 24.2% in 1994-95. South Australia ranked second only to Western Australia in farm business profit margins for the twelve months. The national farm business profit margin in 1994-95 was 20.6% marginally larger than the 1993-94 figure of 20.4%.

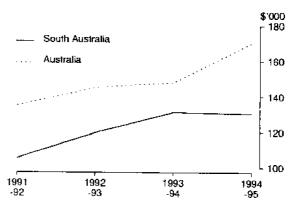

## PROFIT MARGINS PER FARM BUSINESS

## Gross and net indebtedness

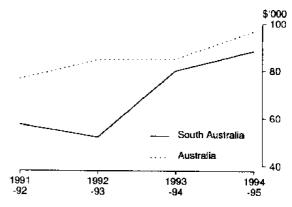

The average gross indebtedness per farm business at the end of 1994-95 for South Australia was \$130,600 a decrease of \$700 (0.5%). Apart from South Australia and Tasmania all other States recorded significant increases in average gross indebtedness up to the end of 1994-95 with the national average increasing from \$148,100 to \$170,300 (15.0%).

#### AVERAGE GROSS INDEBTEDNESS

The level of South Australian average net indebtedness increased by \$8,400 (10.5%) to \$88,300. This meant that South Australia had the second lowest level of debt per farm business of all the States. Nationally the level of net indebtedness climbed to \$96,800 in 1994-95, an increase of \$11,800 (14.5%).

## AVERAGE NET INDEBTEDNESS

At the end of 1994-95, South Australian farm businesses owed \$1,604.7 million. This was \$12.9 million above the level of debt at the end of 1993-94. Net indebtedness (gross indebtedness less the value of financial assets) was \$1,085.0 million, \$116.8 million higher than in 1993-94.

Gross indebtedness nationally increased by \$2,346 million (14.7%) to reach \$18,267.7 million while aggregate net indebtedness increased to \$10,385.8 million (up 13.6%).

The grain industry in South Australia had a fall in net indebtedness (10.0%) and gross indebtedness (28.0%) in 1994-95. This can be contrasted with the grain-sheep/beef industry where the aggregate level of indebtedness rose significantly. The gross indebtedness increased to \$322.5 million (130.8%) while the net indebtedness moved to \$253.7 million (up 162.6%). Some of this movement can be attributed to movement of farm businesses between industries.

## Interest Coverage Ratio

The interest coverage ratio (how many times the interest bill could be paid from cash operating surplus before deducting interest payments) was 4.8 for South Australia in 1994-95 compared with 5.2 for 1993-94. This was 0.6 higher than the national interest coverage ratio of 4.2. The table below shows the full set of figures since 1989-90 for the interest coverage ratio. The ratio has been higher in South Australia than Australia in all but one of the past six years.

	South Australia	Australia	
1989-90	4.4	3.4	
1990-91	2.4	2.7	
1991-92	3.9	2.7	
1992-93	3.9	3.7	
1993-94	5.2	4.4	
1994-95	4.8	4.2	

## **Net Worth**

The average net worth of all farm businesses in South Australia was \$781,800 at the end of 1994-95, an increase of \$11,300 (1.5%) on the 1993-94 average net worth value. For Australia average net worth increased by \$32,500 (3.5%) to \$968,700.

The average net worth for beef cattle in South Australia has increased by 48.7% in 1994-95 to \$1.9 million. In Australia there has been only an 11.3% increase for beef cattle. The other significant change in average net worth for South Australia has been in the pig industry with a fall of 36.6% to a new level of \$726,600. Further industry comparisons for average net worth are shown in the graph below.

#### PERCENTAGE CHANGE IN NET WORTH 1993-94 AND 1994-95

## OTHER SURVEY INFORMATION

## Sample design constraints

- \* The relative standard error (RSE) of estimates of total industry turnover at the Australian level will not exceed 2%;
- \* the RSE of estimates of industry turnover at the Australian level will not exceed 10%;
- \* the RSE of estimates of total industry turnover at the State level will not exceed 5%.

Estimates are produced for all items by industry at the Australian and State levels.

#### Data Collection

Total sample size is 2,500 farm businesses and is allocated across each State and agricultural industry according to RSE constraints described above.

Data are collected using a combination of self enumeration (ie a form is posted out to respondents for completion) and personal interview by trained interviewer staff. The self-enumeration component of the sample consists principally of remote units (ie those in difficult to access regions), very large business units with accounting systems set up to readily provide data and units that prefer to receive a questionnaire rather than take part in an interview.

Of the 2,500 units, 2,100 are collected by field interview. An average interview lasts around two to three hours and draws extensively upon farm accounting records.

A total of about 250 income, expense, debt and asset value items are asked. The questions include details of

- \* proceeds from sale of crops (barley, rice, wheat, cotton, sugar, fruit, etc.), livestock (beef cattle, dairy cattle, sheep and lambs, pigs, poultry, goats and other livestock), livestock products (wool, milk, eggs, other) and other income;
- \* expenses directly associated with raising livestock and growing crops;
- \* other expenses (eg marketing costs, fuels, insurance, leasing costs, repair and maintenance, wages and salaries, administrative costs, etc):
- \* acquisition and disposal of assets;
- \* farm debt and debt source;
- \* farm capital expenditure;
- \* expenditure on land management and other environment related issues.

## Data Organisation

Standard aggregate financial measures collected or derived in other ABS economic statistical collections can be derived from the items collected. Measures such as turnover, value added, adjusted value added, gross operating surplus and cash operating surplus can be calculated along with a range of performance indicators such as profit margin and return on operating costs. In addition, information about labour, indebtedness, asset value and expenditure on land management and related matters are collected.

The major published variables are:

Sales from crops

Sales from livestock

Sales from livestock products

Turnover

Purchases and selected expenses

Value added

Adjusted value added

Gross operating surplus

Total interest paid

Cash operating surplus

Total net capital expenditure

Total value of assets

Gross indebtedness

Net indebtedness

Net worth

Principal peformance ratios derived and published include:

Profit margin

Return on assets

Debt to asset ratio

Turnover to debt ratio

Interest coverage ratio

The information is available in summary form in printed publications and in detailed form electronically. Detailed data item estimates are available at the Australian and State levels and limited regional data are available. As the geographic level becomes finer the RSE's of estimates increase significantly and hence, should be used with caution. Upon request the ABS can produce output, as hard copy or electronically, according to client specification.

The data enables analysis of debt structure, return on assets, operating costs, profitability, debt to equity, interest coverage (i.e. the capacity for farms businesses to pay their interest bill), capital replacement and expenditure. Analyses can be done for the farm sector in total or for individual industries, at the Australian and/or State levels.

Industries for which data are available are:

Fruit (ANZSICs 0114 to 0119)

Vegetables (ANZSIC 0113)

Grain (ANZSIC 0121)

Grain-sheep-beef (ANZSIC 0122)

Sheep-beef cattle (ANZSIC 0123)

Sheep (ANZSIC 0124)

Beef cattle (ANZSIC 0125)

Dairy cattle (ANZSIC 0130)

Pigs (ANZSIC 0151)

Sugar (ANZSIC 0161)

Cotton (ANZSIC 0162)

Other agriculture (ANZSICs 0111, 0112, 0152 to 0159, 0169)

#### **Publications**

Preliminary data are published in Agricultural Industries Financial Statistics, Australia, Preliminary (7506.0) in January each year.

Final results are published in Agricultural Industries Financial Statistics, Australia (7507.0) released about July each year.

Comparative statistics for other industries are published in *Business Operations and Industry Performance* (8140.0) annually.

For further information about the survey, or availability of data contact Frank McCallum on (03) 6220 5939.

#### **ABS PUBLICATIONS AND PRODUCTS**

Statistics collected by the ABS are generally made available in published form. Some, including those not published, are available in one or more of the following forms: microfiche, magnetic tape, computer printout, CD, floppy disk, photocopy and clerically extracted tabulation.

Current publications produced by the ABS are listed in the Catalogue of Publications and Products, Australia (1101.0). The ABS also issues on Tuesdays and Fridays a Release Advice (1105.0) which lists publications to be released within the next few days. The Catalogue and Release Advice are available from any ABS Office.

To receive ABS publications on a regular basis contact the ABS Publication Mailing Service on 1800 02 0608.

A large range of data is available via on-line services, diskette, magnetic tape, tape cartridge and CD ROM. For more details about our electronic data services, contact any ABS Office.

The ABS Information Consultancy Service has specialist staff to assist and advise clients

with their statistical inquiries. For more detailed information about these services call at the ABS, 55 Currie Street, Adelaide, telephone the Information Officer on (08) 8237 7100, or write to Information Service, ABS, GPO Box 2272, Adelaide SA 5001.

The ABS also provides a Statistical Consultancy Service, for expert assistance in survey, sample and questionnaire design, data collection, processing and analysis, and statistical modelling. For more information contact Gary Niedorfer, on (08) 8237 7379.
