SOUTH AUSTRALIAN ECONOMIC INDICATORS

OCTOBER 1995

P.M. GARDNER
Deputy Commonwealth Statistician
and Government Statist

© Commonwealth of Australia 1995

PREFACE

South Australian Economic Indicators is a monthly publication which contains the latest available data at the time of preparation for a range of statistical series that have been identified as indicators of economic activity in this State. In a number of cases the figures presented are preliminary and subject to revision in subsequent issues.

Written and graphic commentary have been included for many of the selected series and analysis has been augmented with the calculation of the percentage change from the previous reference period together with the presentation of comparative Australian data.

Time series information has been included to provide a historical perspective on many of the selected indicators. Future issues may be expanded to include further historical data in response to expressed user needs. This product is under continuous review and any suggestions for enhancement will be welcomed.

More detailed information on each series, including explanatory and technical notes, can be obtained from other Australian Bureau of Statistics publications or alternative data sources. To assist those seeking further information a source publication for each of the series has been documented in the statistical summary.

This issue includes a special article entitled *Retirement and Retirement Intentions*. Future issues will contain further articles on statistical topics which concentrate on longer term trends or other issues pertinent to the South Australian economy.

If you have any inquiries concerning this publication please contact the editor, Brian Moody, telephone (08) 237–7315. All requests for statistical information should be directed to the ABS Information Service, GPO Box 2272 Adelaide SA 5001, telephone (08) 237–7100.

REVIEW

Overview

- The underlying trend estimate for employed persons in South Australia has been increasing since January 1995 with the August 1995 estimate being 2.2% above the level of 12 months ago.
- The trend unemployment rate for South Australia has declined generally over the past twelve months, having fallen from 10.6% in August 1994 to 9.7% in August 1995.
- The July 1995 retail trade trend estimate for South Australia increased by 0.8% from the June aggregate.
- The South Australian provisional trend estimate for new motor vehicle registrations in July 1995 was 2.2% lower than the June estimate. This was the third month of trend decline following an eight month period of growth.
- In July 1995 the South Australian trend estimate for housing finance commitments increased by 2.3% from the June figure but was 13.3% below the July 1994 estimate.
- Over the twelve month period to the June quarter 1995, prices for established houses in Adelaide rose by 0.5% while there was an increase of 2.0% for project homes.
- The July 1995 trend estimate for dwelling approvals in South Australia was 7.1% below the June estimate and 49.2% lower than in July 1994.
- In July 1995 the total value of overseas exports of commodities produced in South Australia fell 10.2% from the previous month, but was 5.8% above the July 1994 level. Merchandise imports into South Australia in July 1995 rose 4.3% from the previous month, and were 12.6% higher than in July 1994.

State Accounts

Gross State Product (GSP)

Note: Care should be taken in interpreting the movements in trend GSP (constant prices). Trend GSP (constant prices) is an experimental series with estimates derived indirectly by calculating a deflator from the expenditure components. The original series may also be deficient as a result of both conceptual issues and the quality or lack of appropriate State data in some instances.

Gross State Product (GSP) trend estimates in 1989-90 prices showed little change (-0.1%) in the March quarter 1995 in contrast to the strong growth in final demand (up 1.4%). This was the fourth consecutive quarter of negative growth in GSP, and over the year GSP has edged down by 0.8%. South Australia was the only State to record negative growth for both the March quarter and for the twelve month period to March 1995. (The national averages were 0.5% and 4.0% respectively.)

Expressed in current prices, the rate of growth in GSP trend has also weakened with a rise of 0.3% in the March quarter and an increase of 2.8% over the year. (The national averages were 1.2% and 5.8% respectively.)

A major contributing factor in the weakening rate of growth in GSP has been wages, salaries and supplements which grew by 0.1% for the second consecutive quarter, considerably below the increases experienced in the preceding nine quarters. Wages, salaries and supplements grew 1.7% for the twelve months ended March 1995 compared with the national average of 6.8%.

State Final Demand

In contrast to the decline in GSP, growth in State Final Demand (trend in 1989-90 prices) grew strongly by 1.4% in the March quarter 1995. At 8.5% South Australia had the highest growth rate of the States and Territories over the twelve months to March 1995. (The national average was 5.8%).

A major contributor to the annual growth in State Final Demand was private gross fixed capital expenditure on equipment, which more than doubled over the year.

Private final consumption expenditure remained strong with a 1.3% increase in the March quarter and 5.0% for the 12 months ended March (this was in line with the national average of 5.1%). In contrast, government final consumption expenditure continued to decline, falling 3.4% in the March quarter to a level 4.5% below that of a year ago.

International Accounts

Exports

The total value of overseas exports of commodities produced in South Australia fell to \$291.0 million in July 1995. This was a decrease of 10.2% from the previous month, but 5.8% greater than the value in July 1994. The fall in value was largely attributable to a \$24.8 million (63.8%) fall in the value of exports of petroleum and petroleum products, but was accentuated by falls in exports of meat and meat preparations (\$8.4 million), metals and metal manufactures (\$6.3 million), and road vehicles, parts and accessories (\$6.8 million). These falls were partly offset by rises in the value of exports of fish and crustaceans (\$7.3 million, a rise of 54.9%), wine (\$2.5 million, 11.5%) and wool and sheepskins (\$1.7 million, 9.1%).

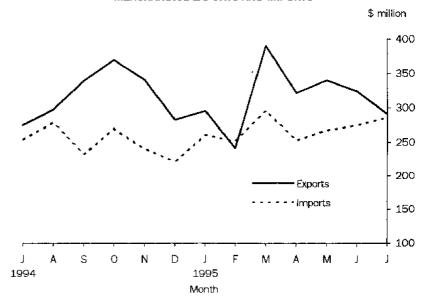

Japan was again the leading destination for South Australian exports, taking 17.1% of the total value. However, this share was down from 20.4% in the previous month, following a fall in the value of goods exported to Japan of \$16.3 million. The region which had the sharpest reduction in value of exports from South Australia in July was the ASEAN group, which fell by \$17.5 million (34.0%). However, July 1995 exports to ASEAN countries were \$9.6 million (39.5%) higher than in July 1994.

Imports

In July 1995 merchandise to the value of \$286.4 million was imported into Australia with South Australia designated as the State of final destination. This was an increase of 4.3% from the previous month, and 12.6% higher than the value of imports in July 1994.

The leading commodity groups were machinery (20.3% of the total), road vehicles, parts and accessories (18.6%) and petroleum and petroleum products (17.8%). While the value of imports of machinery and road vehicles and parts showed a decrease over the previous month, imports of petroleum rose by \$26.7 million (109.6%).

MERCHANDISE EXPORTS AND IMPORTS

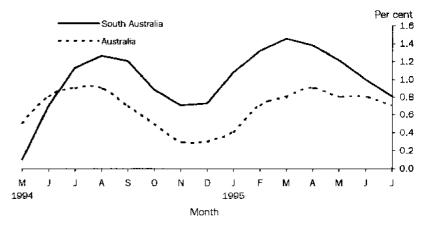

Consumption and Investment

Retail Turnover

The retail trade trend estimate indicates that retail sales in South Australia increased by 0.8% in July 1995 compared with an Australian rise of 0.7%. Increased turnover in the hospitality and services, household good retailing, and department stores groups has been largely responsible for the strong growth during 1995.

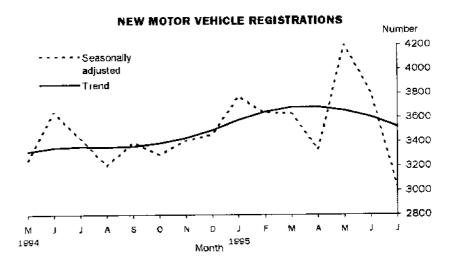

RETAIL TURNOVER PERCENTAGE CHANGE FROM PREVIOUS MONTH Trend Estimates

In seasonally adjusted terms South Australian retail trade in July 1995 increased 0.3% from June 1995. In original terms, South Australian retail turnover was \$729.6 million for July 1995, an increase of 1.7% from June.

New Motor Vehicle Registrations

The South Australian provisional trend estimate for new motor vehicle registrations in July 1995 was 2.2% lower than the June estimate. This was the third month of trend decline following an eight month period of growth. The scasonally adjusted estimate for July 1995 decreased by 20.4% from June 1995 and 1.8% from July 1994.

In original terms there were 2,992 new motor vehicles registered in July 1995, a decrease of 28.5% from June 1995 and 11.8% below the July 1994 total. For new passenger vehicles only, the leading makes registered in July 1995 were Ford (690 vehicles), Holden (663), Toyota (373), Mitsubishi (310) and Mazda (82).

Tourist Accommodation

When the June quarter 1995 is compared with the June quarter 1994, rooms available in hotels, motels and guesthouses in South Australia increased slightly from 10,597 to 10,605 while bed spaces increased from 29,898 to 30,013. Overall the room occupancy rate rose from 47.4% to 50.0%, ranging from 37.2% for one star rated establishments to 69.1% for four star rated establishments. Regional room occupancy rates ranged from 57.8% in the Adelaide Statistical Division to 31.7% in the Eyre Statistical Division. The room occupancy rate of 50.0% was the highest June quarter result since 50.8% in 1989, but well below the 56.2% recorded in 1986. Takings from accommodation increased by 10.0% from \$32.5 million to \$35.8 million with average takings per room night occupied rising from \$71 to \$74.

Private New Capital Expenditure

The trend estimate (in seasonally adjusted current price terms) for private new capital expenditure in South Australia for the March quarter 1995 was \$563 million. The rise of 3.0% from the previous quarter followed rises of 9.5%, 17.7% and 15.2% in the December, September and June 1994 quarters respectively and is an indicator of strong growth over this period. However, the last quarter has seen a flattening in the series, and the South Australian total for the quarter represented only 6.4% of the national figure.

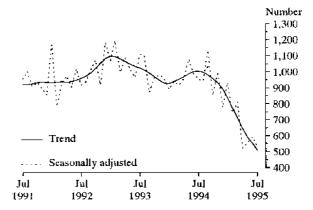

Private new capital expenditure in original terms for the March quarter 1995 was \$483 million, a decrease of 24.0% from the December 1994 quarter. Buildings and structures accounted for \$85 million, and equipment, plant and machinery \$399 million.

Production

Dwelling Approvals

The July 1995 trend estimate for dwelling approvals in South Australia was 510, a fall of 7.1% from June and 49.2% below the July 1994 total. In original terms, the number of dwelling units approved in July 1995 was 576, a decrease of 10.8% from the previous month.

DWELLING UNITS APPROVED

The national trend estimate for the total number of dwelling units approved in July 1995 (11,339) was 2.2% lower than the estimate for June and 32.3% below the July 1994 estimate. In original terms, South Australia accounted for 5.1% of the total dwellings approved in Australia during July 1995.

Dwelling Commencements

From the Building Activity Survey, it was estimated that 2,064 dwelling units were commenced in South Australia during the March quarter 1995, the lowest since the December quarter 1987. The latest figure represented a fall of 770 dwelling units (27.2%) from the previous quarter and can be compared with a 22.9% fall nationally. The latest figure for South Australia was 19.0% below the total for the March quarter 1994 while the national decrease over the twelve month period was 13.6%.

Value of Non-residential Building Approvals In July 1995 the value of non-residential projects approved in South Australia was \$36.3 million. This amounted to 4.7% of the total value of Australian non-residential building approvals (\$772.9 million) in this month.

Expressed in average 1989-90 prices the value of non-residential building approvals in South Australia for the June quarter 1995 was \$157.8 million, a 34.0% increase from the March quarter.

Value of Total Building Activity

The total value of *building work commenced* during the March quarter 1995 fell by \$73.8 million or 20.9% (16.4% nationally) from the previous quarter to \$278.6 million, the lowest for 8 years. Most of the decrease was accounted for by a fall of \$60.5 million in private sector residential commencements. Building commencements in South Australia comprised 4.6% of the national total in the March quarter.

The total value of building work done during the March quarter 1995 was \$314.3 million, also the lowest for 8 years. It represents a decline of \$70.4 million (18.3%) from the previous quarter and compares with a 17.6% fall nationally. Compared with the March quarter 1994, the latest figure for South Australia represents a 5.2% decrease in the value of total building work done, while the corresponding national movement was a 6.8% increase.

Building work yet to be done was valued at \$280.3 million at the end of March 1995, a fall of 8.5% from the previous quarter and the lowest since the September quarter 1984. Compared to a year earlier, work yet to be done was down 17.0% in South Australia but up 6.8% nationally. Work yet to be done in South Australia comprised only 3.1% of the national figure in the March quarter 1995.

Value of Engineering Construction

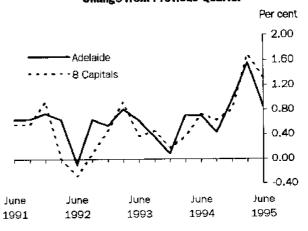

In the March quarter 1995, engineering construction work done in South Australia fell by 8.4% (8.7% nationally) to \$156.8 million. The latest figure for South Australia was 13.8% below the level of a year earlier, and compared with a 1.4% decrease nationally.

Prices

Consumer Price Index

In the June quarter 1995 the all groups Consumer Price Index increased by 1.3% nationally and this contributed to an annual increase of 4.5%. For Adelaide, the quarterly movement was 0.8% while the annual increase was 3.8%. Both of these movements were the lowest recorded of the eight capital cities.

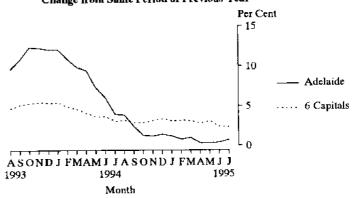

CONSUMER PRICE INDEX Change from Previous Quarter

House Building Materials

In July 1995 the Price Index of Materials Used in House Building for Adelaide recorded a fall of 0.3% from the previous month. All other cities recorded a rise or no movement. Hobart recorded a rise of 0.8%, with Sydney and Brisbane showing no movement. At 0.7%, Adelaide recorded the smallest rise over the twelve months from July 1994 with the largest rise occurring in Hobart (5.2%), followed by Perth (3.5%) and Sydney (2.9%).

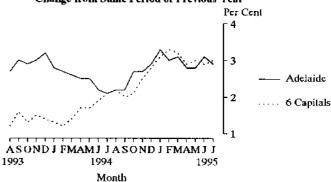

MATERIALS USED IN HOUSE BUILDING Change from Same Period of Previous Year

Non-house Building Materials

In July 1995 the Price Index for Materials Used in Building Other than House Building in Adelaide rose 0.2% from the previous month. This was the lowest rise of the Capital cities. The highest rise from the previous month (0.6%) was recorded by both Melbourne and Perth, followed by Sydney (0.5%). Over the twelve months to July 1995 the largest increase was recorded in Perth (3.8%), followed by Brisbane (3.6%) and Hobart (3.5%). Adelaide recorded a rise of 2.9% over the twelve months with Melbourne recording the smallest rise (2.4%).

MATERIALS USED IN BUILDING OTHER THAN HOUSE BUILDING Change from Same Period of Previous Year

House Prices

Between the March and June quarters 1995 the price index of established houses in Australia fell by 0.7% while project home prices increased by 0.6%. Over the same period, prices of established houses in Adelaide decreased by 0.4%, while project home prices rose by 0.2%.

Nationally, over the twelve month period from the June quarter 1994, prices for established houses rose by 1.4% while the increase for project homes was 1.7%. In Adelaide there was an price increase of 0.5% for established houses and a rise of 2.0% for project homes.

Labour Force and Demography

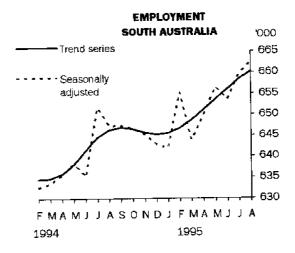

Population

At 31 December 1994 the estimated resident population of South Australia was 1,471,871, an increase of 0.06% (916) over the September quarter, and 0.35% higher than December 1993. This was well below the national annual growth rate of 1.1%. The low growth rate in this State was mainly attributable to a net outflow of 4,741 persons in interstate migration over the twelve month period.

Employment

The underlying trend estimate for employed persons in South Australia has been increasing since January 1995. The August 1995 estimate (660,200) was 2.2% higher than the level of 12 months ago.

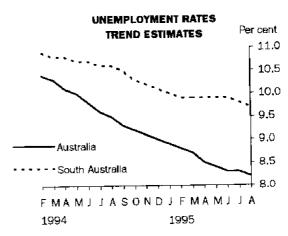

The underlying trend estimate of employed persons in Australia has been increasing since February 1993, reaching 8,282,900 in August 1995. Over the past 12 months, full-time and part-time employment have increased by 3.5% and 6.0% respectively.

Unemployment

The trend unemployment rate for South Australia has declined generally over the past twelve months, having fallen from 10.6% in August 1994 to 9.7% in August 1995. Over this period, the trend unemployment rate for males decreased from 10.9% to 10.8%, while the rate for females fell from 10.1% to 8.3%.

The provisional trend estimate unemployment rate for Australia was 8.2% in August 1995. This continued the general downward movement evident since January 1993.

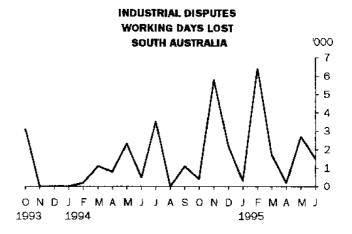

Overtime

Industrial Disputes

The proportion of employees who worked overtime in South Australia in May 1995 was 16.7% compared with 16.3% in February 1995.

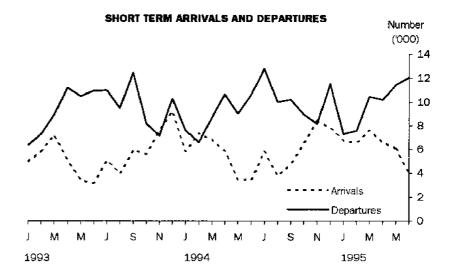

There were 1,500 working days lost through industrial disputes in South Australia during June 1995. At 3.8% of the Australian total (39,000 working days), South Australia experienced a relatively low level of disputation.

In the twelve months to June 1995, 18,000 working days were lost through industrial disputation in South Australia.

Short-term Overseas Visitor Arrivals

There were 4,000 short-term overseas visitor arrivals to South Australia in June 1995. This was a fall of 34.4% from the number of visitors in the previous month but was 17.6% higher than the number of arrivals in June 1994.

Short-term Resident Departures

Short term departures of South Australian residents in June 1995 totalled 12,000. This was 5.3% higher than the May figure and 13.2% higher than the number of short term resident departures in June 1994.

incomes

Average Weekly Earnings

Average weekly ordinary time earnings of full-time adult employees in South Australia decreased from \$619.90 in February 1995 to \$611.70 in May 1995. Male full-time ordinary time earnings fell from \$648.40 in February 1995 to \$635.10 in May 1995. Over the same period the comparable level for females increased from \$560.80 to \$563.90.

Between February 1995 and May 1995, average weekly total earnings of all employees in South Australia decreased from \$527.90 to \$513.30.

The trend estimate for average weekly ordinary time earnings of full-time adult employees in South Australia rose from \$611.10 in February 1995 to \$616.70 in May 1995. Male full-time ordinary time earnings increased from \$636.60 in February 1995 to \$643.40 in May 1995. Over the same period, the comparable level for females increased from \$560.80 to \$563.40.

Between February 1995 and May 1995, the trend estimate of average weekly total earnings of all employees in South Australia increased from \$515.50 to \$518.00.

Since it is an average of earnings across all employees, changes in average weekly earnings may occur through changes in employment as well as changes in pay levels.

Award Rates of Pay

Over the 12 months to July 1995, the weekly award rates of pay index for full-time employees in South Australia increased by 1.2%.

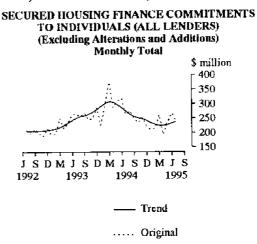

For full-time adult male employees, the largest annual movement of the index occurred in the recreation, personal and other services industry (an increase of 2.5% since July 1994).

For full-time adult female employees, the largest annual movement of the index occurred in the recreation, personal and other services industry (an increase of 2.1% since July 1994).

Financial Markets

Housing Finance

In July 1995 total housing finance commitments (original figures including alterations and additions) in South Australia fell by \$27.6 million (9.5%) from the previous month to \$261.5 million. This was \$22.8 million (8.0%) lower than the July 1994 total.

The largest category, finance commitments for the purchase of established dwellings was down by \$18.7 million (10.9%) to \$153.5 million from June. The total for finance commitments for the construction of dwellings was down marginally by \$1.1 million to \$30.0 million. Commitments for the purchase of newly erected dwellings were down by \$4.8 million (25.5%) to \$14.1 million from the year's peak of \$18.9 million in June.

Refinancing accounted for 17.0% and alterations and additions were 7.4% of total new lending commitments.

The July 1995 trend estimate for total value of commitments (excluding alterations and additions) increased marginally by \$5.3 million to \$237.1 million from June but was down 36.4 million (13.3%) from July 1994.

Personal Finance

In July 1995 personal finance commitments in South Australia decreased by \$40.8 million (17.5%) to \$192.7 million from the record high figure recorded in the previous month. The fall was mainly attributable to the decrease in unsecured commitments under revolving credit facilities which had almost doubled in June.

Sales of used motor vehicles and station wagons, the largest category under fixed loan commitments, decreased by \$3.0 million (7.2%) to \$38.6 million from June and compared with \$36.5 million in July 1994. Sales of new motor vehicles and station wagons decreased by \$1.9 million (13.3%) to \$12.1 million and was \$0.6 million (4.4%) lower than in July 1994.

Total personal finance commitments under fixed loan commitments decreased by \$11.7 million (9.0%) to \$118.9 million in July 1995 marginally above the \$116.3 million of July 1994. Total personal finance commitments under revolving credit commitments decreased by \$29.1 million (28.2%) to \$73.8 million but this was the second highest monthly figure in the past eight years.

Commercial Finance

In June 1995 total commercial finance commitments in South Australia decreased marginally from the May figure by \$32.1 million (5.4%) to \$556.7 million, \$38.6 million (6.5%) below the corresponding month in 1994. Finance commitments under fixed loan facilities increased while commitments under revolving credit facilities decreased.

Commercial finance commitments under fixed loan facilities increased by \$40.5 million (13.2%) to \$346.9 million, the highest June figure since 1991. Large increases were recorded in the categories of property and business services, recreation, personal and other services, and other industries, while community services fell back from the high May figure.

Commitments under revolving credit facilities fell by \$72.6 million (25.7%) to \$209.8 million. Agriculture, forestry, fishing and hunting, wholesale trade and other industries fell back following substantial increases in May. Manufacturing, construction, retail trade and property and business services had considerable increases during June.

Lease Finance

In July 1995 the value of goods under new finance lease commitments in South Australia decreased by \$4.3 million (13.6%) from the June figure to \$27.4 million but was \$1.0 million (3.6%) above July 1994.

Lease commitments for new motor vehicles and station wagons not subject to depreciation, the largest category, decreased by \$1.4 million (19.3%) to \$5.6 million (27.7% below July 1994). Used motor vehicles and station wagons not subject to depreciation decreased by \$0.9 million (24.9%) to \$2.7 million. New motor vehicles subject to depreciation fell by \$1.0 million to a total of \$2.6 million from the highest June figure since 1991.

New finance lease commitments for office machines doubled in July to reach \$2.0 million while the figures for new light trucks and used heavy trucks had big falls following the high June aggregates.

Forward Outlook

Composite Leading Indicator

The Composite Leading Indicator (CLI) is a single time series produced by aggregating eight individual economic indicators, and has been developed by the ABS as an experimental series to supplement existing forms of economic analysis and modelling.

The CLI summarises the early signals contained in a selection of economic indicators and is designed to help in the detection of turning points between successive expansions and contractions of economic activity but does not attempt to forecast the level of economic activity.

The main features of the Australian June quarter 1995 data were:

- confirmation of the narrowing in the deviation of GDP(A) from its long-term trend (predicted by the December 1994 CLI);
- a continuation of the downward movement in the CLI evident since the September quarter 1994 peak, and the acceleration in this downward movement (-0.28% in the December quarter 1994, -0.62% in the March quarter 1995 and -0.72% in the June quarter 1995).

The quarterly data are released in more detail in the Australian Economic Indicators (1350.0). The CLI was the topic of the Focus article in the September 1993 edition of South Australian Economic Indicators (1307.4).

Australian Business Expectations

Surveys of business expectations have been a feature of the economic intelligence available to decision makers for a number of years. The main output from these surveys has been a qualitative indicator which provides the net proportion of businesses predicting a rise or fall in future business conditions. Further details about these surveys which are conducted quarterly by the ABS are available in *Australian Business Expectations* (1250.0), the September 1994 edition of *Australian Economic Indicators* (1350.0) and the May 1994 edition of *South Australian Economic Indicators* (1307.4).

AUSTRALIAN BUSINESS EXPECTATIONS SOUTH AUSTRALIA AND AUSTRALIA SALES OF GOODS AND SERVICES

E	XPECTED PERCENT	AGE AGGREGA	ATE CHANGE

199 5				• •
March quarter	1.8	1.4	1.1	3.0
June quarter	0.2	1.3	0.8	2.3

(a) Short term is the following quarter. (b) Medium term is the same quarter in the following year.

Short term

Businesses in South Australia expected a rise of 0.2% in sales in the September quarter compared with the June quarter 1995 while the national expectation was a 1.3% increase.

Medium term

Businesses in South Australia expected a lower growth in sales (0.8%) than the national expectation of 2.3% for the June quarter 1996 compared with the June quarter 1995.

FOCUS

Retirement and Retirement Intentions

Introduction

A survey of persons aged 45 and over was conducted by the Australian Bureau of Statistics (ABS) in November 1994 as a supplement to the monthly Labour Force Survey. The survey focused on the characteristics of persons who had retired from full-time work, including age at retirement, main source of income and retirement scheme membership. Persons aged 45 and over who intended to retire from full-time work were asked about the age at which they intended to retire; their expected main source of income at retirement; retirement scheme membership and superannuation cover. Similar surveys had been undertaken in 1989 and 1992.

Overview

In November 1994 there were an estimated 5,771,500 persons aged 45 and over usually resident in Australia. Of these persons, 3,146,100 (55%) had retired from full-time work, 2,107,000 (37%) had not retired from full-time work, and 518,400 (9%) had never worked full-time and did not intend to work full-time. In South Australia there were 505,940 in this age group of whom 57% had retired, 33% had not retired and 10% had never worked full-time and did not intend to work full-time.

Nationally, of those who had not retired, 1,898,500 (90%) intended to retire from full-time work and 208,500 did not intend to retire from full-time work. The proportion of South Australians who intended to retire was slightly higher at 92%.

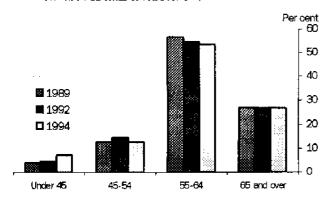

Age at retirement

In November 1994, of the 1,269,200 males aged 45 and over who had retired from full-time work:

- 26% had retired aged 65 and over;
- 52% had retired aged 55 to 64;
- 15% had retired aged 45 to 54;
- 7% had retired aged less than 45.

The percentages were similar for South Australia but a slightly greater proportion (54%) had retired aged 55 to 64 and a smaller proportion (13%) had retired aged 45 to 54.

SOUTH AUSTRALIAN MALES WHO HAD RETIRED FROM FULL-TIME WORK: AGE AT RETIREMENT

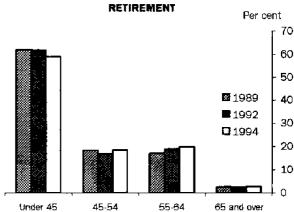

In contrast, of the 1,876,900 females aged 45 and over who had retired from full-time work:

- 3% had retired aged 65 and over;
- 21% had retired aged 55 to 64;
- 20% had retired aged 45 to 54;
- 57% had retired aged less than 45.

Again the South Australian percentages were similar but there were smaller proportions in the 55 to 64 (20%) and 45 to 54 (18%) categories and a higher proportion (59%) had retired before reaching 45 years.

SOUTH AUSTRALIAN FEMALES WHO HAD RETIRED FROM FULL-TIME WORK: AGE AT

Of the 1,061,100 females who had retired younger than 45 years of age, 37% (397,700) reported that they had ceased their last full-time job to get married. Of these, 46% were aged 70 and over. The proportion of female retirees who had ceased their last full-time job to get married increased with age, from 15% of those aged 45 to 49, to 63% of those aged 70 and over. A further 26% of females who had retired before reaching 45 years of age had left their last full-time job to have children. For South Australian women who had retired younger than 45 years a higher proportion (41%) had ceased their last full-time job to get married. Other percentages for South Australia were similar to the national figures.

Of the 91,900 males who had retired before the age of 45, 66% (60,500) reported that they ceased their last full-time job because of their own ill-health or injury. The South Australian proportion was similar (67%).

Early retirement

In the survey, persons who retired aged 45 and over, but before the standard retirement ages of 60 years for females and 65 years for males, were asked to give the main reason they decided not to work full-time until that standard age. The proportions of males and females who retired before the standard ages were similar. Of the 1,177,300 males who were aged 45 and over when they retired, 847,800 (72%) had retired early, compared with 577,400 (71%) of females. In South Australia the proportion was 71% for both genders.

The main reasons for retiring early were similar for males and females, although the proportions differed. The most common reason given for retiring early was 'own ill-health or injury' (48% of males and 25% of females), followed by 'decided not to work any more, more leisure time' (18% of males and 25% of females). For males, a further 7% gave their main reason for retiring early as 'retrenched, early retirement package, reached compulsory retirement age in that job', whereas for females, the next most frequently reported reason for retiring early was 'family reasons' (20%). The South Australian proportions were generally in line with the national experience but a lower proportion of males (45%) gave the reason 'own ill-health or injury' and a greater proportion (21%) stated 'decided not to work any more, more leisure time'.

Compulsory retirement

In November 1994 there were 419,100 Australian retirees whose reason for leaving their last full-time job was that they had reached compulsory retirement age in that job. Of these, about one-third (138,700) would have liked to continue working full-time. A similar proportion of the 37,100 South Australian retirees also would have liked to continue working full-time.

Main source of income at retirement

The main source of income at retirement varied according to sex. Males who had retired from full-time work aged 45 years and over reported their main source of income as follows:

- · invalid, age or sole parent's pension (29%);
- superannuation, life assurance, other retirement schemes (16%);
- investments, interest, stocks, debentures etc. (11%);
- sickness, special and other benefits (11%).

The percentages were generally of the same order for South Australian males but a higher proportion (14%) obtained most of their retirement income from sickness, special and other benefits.

For females who retired aged 45 years and over the main sources of income most frequently reported were:

- someone else's income, pension or superannuation (38%);
- invalid, age, sole parent or widow's pension (26%);
- part-time work (7%).

Again the percentages were similar for South Australia, although a smaller proportion (35%) were relying on someone else's income, pension or superannuation.

These results can be compared with the expectations of persons who intend to retire. In November 1994 there were 1,320,700 males aged 45 and over and 577,800 females aged 45 and over who intended to retire. The respective totals for South Australia were 108,550 and 45,180.

For males in this group, the main source of income at retirement was expected to be:

%);

- superannuation (32%);
- invalid, age or sole parent

• investments, interest, stocks, debentures, etc. (10%).

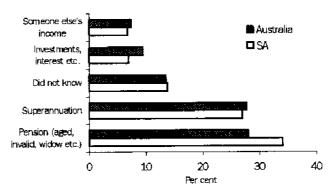

Expectations for South Australian males varied somewhat from these percentages in that 31% anticipated that their main source of income would be superannuation; 33%, invalid, age or sole parent's pension; and only 7%, investments, interest, stocks, debentures, etc.

Females aged 45 and over who intended to retire expected their main source of income to be:

- invalid, age, sole parent's or widow's pension (29%);
- someone else's income (19%);
- superannuation (19%).

South Australian females expectations differed considerably from the national experience in that a much greater proportion (37%) were looking to an invalid, age, sole parent's or widow's pension as their main source of retirement income while 20% were to rely on someone else's income and 16% on superannuation.

PERSONS INTENDING TO RETIRE: EXPECTED MAIN SOURCE OF INCOME, 1994

The proportion of persons intending to retire who expected superannuation to be their main source of income at retirement (28%) was greater than the proportion of persons who retired aged 45 years and over whose main source of income was superannuation (10%). This may reflect to some extent the increasing proportion of persons intending to retire who have superannuation cover (from 67% in November 1989 to 82% in November 1994).

Change in main source of income

In November 1994, there were 762,300 (63,390 in South Australia) retired persons whose main source of income had changed since retirement. For males whose main source of income had changed, the main source of income at retirement most frequently reported was 'sickness, special and other benefits' (25%) and 'savings or sale of assets' (25%). The respective percentages for South Australian males at 35% and 18% showed some variation from the national data.

For females whose main source of income had changed, the most frequently reported main source of income at retirement was 'someone else's income' (56%). The South Australian proportion (58%) was similar.

For both males and females who had changed their main source of income since retirement, most (63% of males and 67% of females) gave their main source of income at the time of the survey as 'invalid, age,

sole parent's, widow's pension'. The South Australian proportions were 67% and 73% respectively.

Retirement scheme membership at retirement

In November 1994, 53% of persons who had retired at age 45 years and over belonged to a retirement scheme, compared with 47% in October 1992. The proportion of retired males aged 45 and over who belonged to a retirement scheme was 61% in November 1994, an increase from 58% in October 1992. For retired females aged 45 and over, retirement scheme membership increased to 41% in November 1994 from 31% in October 1992. The South Australian responses were generally in line with the national data.

The increase in the level of retirement scheme membership reflected an increased level of superannuation cover. In 1994, 50% of persons who had retired aged 45 and over reported that they had superannuation cover, compared with 43% in 1992. In contrast, the small percentage of persons reporting life assurance or other schemes fell from 3.8% in 1992 to 2.7% in 1994. The South Australian percentages were similar but the movement in the number who had life assurance or other schemes was from 5.4% to 3.6%.

Main source of income at November 1994 and retirement scheme membership at retirement

In November 1994, of the 1,993,100 (179,440 in South Australia) persons who had retired from work aged 45 and over, more than one-half (53%) belonged to a retirement scheme. Of the 1,048,900 retirees who belonged to a retirement scheme, the most frequently reported main sources of income at November 1994 were 'invalid, age, sole parent's, widow's pension' (39%); 'superannuation, life assurance or some other retirement scheme' (18%); 'investments, interest, stock debentures, etc.' (10%) and 'war disability, repatriation, service, war widow's pension' (10%).

In comparison 66% (71% in SA) of retired persons who did not belong to a retirement scheme at retirement reported 'invalid, age, sole parent's, widow's pension' as their main source of income. A further 11% (13% in SA) reported 'war disability, repatriation service, war widow's pension' as their main source of income.

Retirement Intentions

In November 1994, there were 1,898,500 (153,730 in SA) persons aged 45 and over who intended to retire.

Of the 1,320,700 males who intended to retire:

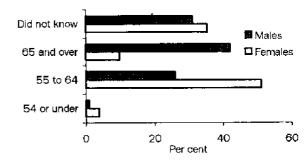

- 42% intended to retire aged 65 and over;
- 28% intended to retire aged 55 to 64 years;
- 28% did not know at what age they intended to retire.

Of the 577,800 females aged 45 and over who intended to retire:

- 11% intended to retire aged 65 and over;
- 51% intended to retire aged 55 to 64;
- 32% did not know at what age they intended to retire.

Details on the 108,550 South Australian males and the 45,180 females who intended to retire tended to reflect the national figures.

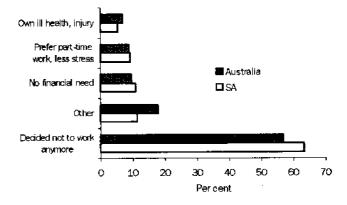

AGE OF INTENDED RETIREMENT: PERSONS WORKING FULL-TIME, AGED 45 AND OVER SOUTH AUSTRALIA

Whether intended to retire early

In November 1994, there were 532,100 (39,580 in SA) persons aged 45 and over who intended to retire early, 28% (26%) of all those who intended to retire. The most common reason given for retiring early was 'decided not to work any more, more leisure time' (57% of males and 58% of females). In South Australia 63% of both males and females in this category gave their reason for early retirement as 'decided not to work any more, more leisure time'.

PERSONS INTENDING TO RETIRE EARLY: MAIN REASONS

Retirement scheme membership at November 1994

The level of retirement scheme membership for those intending to retire had increased from 81% in 1992 to 84% in 1994. The proportion of persons intending to retire covered by superannuation had increased over the same period from 77% to 82%. For males, retirement scheme membership increased from 83% in 1992 to 86% in 1994, while for females, 80% belonged to a retirement scheme in 1994 compared with 74% in 1992. Although a similar proportion (81%) of South Australians intending to retire were covered by superannuation schemes in 1992, the 1994 survey showed greater coverage for South Australians than the national average (86% compared with 84%).

Further Reference

More detailed information on the Australian data has been included in the April 1995 issue of the ABS publication, *Iabour Force, Australia* (6203.0) which is available from ABS Bookshops in all capital cities. Inquiries for additional South Australian data should be directed to Arnold Strals, telephone (08) 237 7365.

FCAUSSTATS

Online access to the latest statistical information from the ABS

The most accessible statistics in Australia . . .

With PC AUSSTATS, getting access to ABS information has never been easier.

Online, all the time . . .

You'll never be without vital information again. PCAUSSTATS will let you access the information you need, when you need it — 24 hours a day, 7 days a week.

You can connect to the ABS database and find the information you want, simply and quickly. And once you've selected the information, downloading to your PC is done for you by the PC AUSSTATS software.

Ready to go . . .

Once downloaded, the data is in .wks format — compatible with all the most common spreadsheet packages available today — so it's ready for instant analysis and manipulation on your own PC.

And with thousands of series covering the most important economic and social data, it's like having your own private ABS library — with librarian.

With the latest information . . .

By using PC AUSSTATS, you will know that you have the latest information available.

The main PC AUSSTATS database is updated daily, giving you full access to the latest facts and figures about the nation.

Plus, you don't have to worry about revisions or corrections to the data — the PC AUSSTATS database is updated in line with any revisions to our printed publications.

... and a historical perspective

The database that you access with PC AUSSTATS gives you time series data.

So you get not only the latest information, but also a historical perspective — and this gives you the base you need to perform your own trend analysis.

Historical information is typically available for a 15 year period for all series on PC AUSSTATS — and this includes monthly, quarterly, half yearly and yearly series.

Arrange a demonstration today . . .

For a demonstration of this powerful new information resource, call Graham Duncan on (08) 237 7609.

ABS PUBLICATIONS AND PRODUCTS

Statistics collected by the ABS are generally made available to clients in published form. Some, including those not published, are available in one or more of the following forms: microfiche, magnetic tape, computer printout, CD, floppy disk, photocopy and clerically extracted tabulation.

Current publications produced by the ABS are listed in the Catalogue of Publications and Products, Australia (1101.0). The ABS also issues on Tuesdays and Fridays a Release Advice (1105.0) which lists publications to be released within the next few days. The Catalogue and Publications Advice are available from any ABS Office.

To receive ABS publications on a regular basis contact the ABS *Publication Mailing Service* on (008) 02 0608.

A large range of data is available via on-line services, diskette, magnetic tape, tape cartridge and CD ROM. For more details about our electronic data services, contact any ABS Office.

The ABS Information Consultancy Service has specialist staff to assist and advise clients with their statistical inquiries. For more detailed information

about these services call at the ABS, 55 Currie Street, Adelaide, telephone the Information Officer on (08) 237 7100, or write to Information Service, ABS, GPO Box 2272, Adelaide 5001.

The ABS also provides a *Statistical Consultancy Service*, for expert assistance in survey, sample and questionnaire design, data collection, processing and analysis, and statistical modelling. For more information contact Gary Niedorfer, telephone (08) 237 7379.
