

CENSUS OF POPULATION AND HOUSING

30 JUNE 1971

FIELD COUNT STATEMENT NO. 5 - POPULATION : LOCAL GOVERNMENT AREAS AND TOWNS  
QUEENSLAND

Reference No. 2.75

<u>Table</u>	<u>CONTENTS</u>	<u>Page</u>
..	Explanatory Notes	2
1	Index of local government areas (with area and population) 1971	4
2	Population: Urban centres and other bounded localities, 1966 and 1971	6
3	Population: Local government areas and components, 1966 and 1971	9
4	Population: Urban centres and other bounded localities, 1966 and 1971 in size order	20
5	Urban Centres: Number and population in groups of various sizes, 1966 and 1971	23
	APPENDIX A List of field count statements	
	APPENDIX B Major changes to local government areas, 1966-1971	
	APPENDIX C Notes on certain urban centres	
	APPENDIX D Delimitation of urban centres	
	APPENDIX E Outline map: Brisbane Statistical Division.	

This statement contains preliminary results of the 1971 Census of Population and Housing. The figures have been compiled during the taking of the Census by field personnel and are subject to amendment.

At the 1966 Census, in conformity with Section 127 of the Constitution, Aborigines were excluded from the published population. In 1967 the Constitution was altered to remove this provision, and the 1971 Census therefore includes Aborigines. In order to provide comparability between the two censuses the 1966 populations in this statement have been amended to include Aborigines and therefore differ from the 1966 populations previously published.

A list of 1971 Field Count Statements being issued showing dates of publication (where already issued) is contained in Appendix A to this statement.

EXPLANATORY NOTES

Urban centres and other bounded localities: A detailed description of the concepts and methods used in 1971 in defining urban centres is contained in Appendix D. These methods were similar to those used at the 1966 Census, the main changes being:

1. The elimination of the "indentation" provision. At the 1966 Census an indented area was included within the urban centre if the distance across the "neck" was less than one mile.
2. A re-interpretation of the "enclosure" rule. At the 1966 Census land was included within the urban centre if it was completely surrounded by the urban centre itself (or in part by the sea or a wide unbridged river). In 1971, if one part of this surround is the sea or a wide unbridged river, this rule is not applied.

At the 1971 Census the concepts were used to determine urban boundaries for the following centres or parts of centres in Queensland: Brisbane, Gold Coast, Townsville, Toowoomba, Rockhampton, Cairns, Mackay, Bundaberg.

Around other urban centres and non-urban localities, boundaries were delineated, where possible, where the population was expected to reach at least 200 by 1971. For this purpose, the most recent available aerial photography was used in order to identify as closely as possible the periphery of the built up area. Those centres with a population of 200 or more persons are included in the tables in this bulletin.

Notes on the composition of certain of the urban centres are given in Appendix C to this statement.

1966 Census population: For comparative purposes the population of statistical divisions, local government areas and urban and rural centres at the 1966 Census is shown.

Where the boundaries of local government areas have been changed (see Appendix B) an estimate has been given of the 1966 population in the 1971 area.

For those urban centres where the density criteria for determining urban boundaries have been used, the 1966 population shown is that resulting from the application of these same criteria at the time of the 1966 Census.

For most of the bounded towns and for some urban components of local government areas it has not been possible to make satisfactory estimates of 1966 population. These cases are shown in the tables as "N.A.".

Major urban population: This term has been applied to population enumerated in urban centres with a total population of 100,000 or more and supersedes the use of "metropolitan" at previous Censuses. In Queensland this represents the population of urban Brisbane. The urban population of Brisbane and of other smaller centres is shown in Tables 2 and 3.

Abbreviations: The following abbreviations have been used in the tables and appendixes.

U - urban, R - rural, C - City, M - Municipality,

S - Shire, T - Town, N.A. - not available

A minus sign, when appearing after a figure indicates a decrease in population, e.g. 125 -

APPENDIX BLOCAL GOVERNMENT AREAS

The City of Brisbane is divided into fifty-six statistical areas which are not, however, separately administered for local government purposes. For the purposes of this publication, these statistical areas are treated as if they were local government areas.

In Table 3, these statistical areas are grouped into a convenient number of major areas based upon their location.

Since the 1966 Census two new statistical areas, Wynnum West and Fruitgrove, have been created. Wynnum West was part of the Eastern Statistical Area while Fruitgrove was part of the South Eastern Statistical Area.

The 1966 figures in this statement have been adjusted to take account of local government area boundary changes effective between 1 July 1966 and 30 June 1971. The following table indicates the major changes and further information about other amendments to local government area boundaries may be obtained from the Commonwealth Statistician.

MAJOR LOCAL GOVERNMENT AREA CHANGES, 1 JULY 1966 - 30 JUNE 1971

Local Government Area	Nature of change	Net change in area	Estimated population	Date of change
CALLIOPE (S)	Lost to Gladstone (T)	3,840 acres	-35	1.7.70
DUARINGA (S) *	Gained from Emerald (S)	252,800 acres	+40	29.8.70
EMERALD (S) *	Lost to Duaringa (S)	252,800 acres	-40	29.8.70
GLADSTONE (T)	Gained from Calliope (S)	3,840 acres	+35	1.7.70
GOOBURRUM (S) *	Gained from Miriam Vale (S)	13 sq mls.	+40	1.7.66
MIRIAM VALE (S)*	Lost to Gooburrum (S)	13 sq mls.	-40	1.7.66

\* Statistical Division change.

APPENDIX CNOTES ON CERTAIN URBAN CENTRES

I. As Urban Gold Coast extends into New South Wales, the tables in this statement only include that part which is situated within Queensland. The total population of this urban centre is shown in the following list. There is also one non-urban locality, Mungindi, which crosses the State border and its total population in 1966 was 978 and in 1971, 848.

The composition of urban centres which have absorbed rural localities or merged with other urban centres is also shown below.

URBAN CENTRE

Bongaree	: Includes Bellara
Bowen	: Includes Queens Beach
Cairns	: Includes Freshwater, Machans Beach, Redlynch and Stratford
Caloundra	: Includes Currimundi
Collinsville	: Includes Scottsville
Gold Coast	: Includes Anglers Paradise, Hollywell and Paradise Point. Total population of Gold Coast (U) 1966, 53,188 ; 1971, 74,121.
Hervey Bay	: Includes Point Vernon, Pialba, Scarness, Torquay and Urangan
Innisfail	: Includes Goondi and Hudson
Mackay	: Includes Andergrove, Glenalla, Racecourse and Slade Point
Maryborough	: Includes Tinara
Mount Morgan	: Includes North Calliungal
Tewantin-Noosa	: Includes Noosaville and Sunshine Beach
Toowoomba	: Includes Drayton

II The following urban centres were non-urban at the 1966 Census:

Albany Creek	Moranbah
Bargara	Moura
Beachmere	Ravenshoe
Blackwater	Tin Can Bay
Buderim	Woorim
Coolum Beach	

III The rural locality of Tara was urban for the 1966 Census but failed to meet urban criteria for the 1971 Census.

IV Urban Centres in 1966 whose names do not appear in this bulletin are:

Birkdale-Wellington Point, Cleveland, Lawnton-Petrie and Woodridge, which have been absorbed by Urban Brisbane, and Slade Point, which has been absorbed by Urban Mackay.

V As a result of the changes in urban-rural classification in II, III and IV above, 1966 figures for individual areas may not add to the urban and rural totals shown.

APPENDIX DCRITERIA FOR THE DELIMITATION OF URBAN BOUNDARIES

The criteria used for delimiting urban centres, as determined by the Thirty-First Conference of Statisticians, October 1969, were:

1. At each Census of Population and Housing a boundary shall be defined in accordance with these Resolutions for each population cluster of 1,000 or more population (and, for known holiday resorts of less population, if they contain 250 or more dwellings of which at least 100 are occupied). These clusters shall be named "urban centres" and the population and dwellings enumerated in them shall be classified as urban for statistical purposes.

2. Around each urban centre with a population of at least 100,000, a further boundary shall be defined, after consultation with planners, to contain the anticipated development of the urban centre and associated smaller urban centres for a period of at least twenty years. Such a boundary should delimit an area which is now, or is expected to be, socially and economically oriented towards the urban centre. It shall consist of complete Local Government Areas if possible. This fixed boundary (as distinct from the urban boundary which is moving) will delimit an area which, for general statistical purposes, is free from the practical problems imposed by the moving boundary, but which nevertheless represents the city in a wider sense.

3. In delimiting urban centres with 25,000 or more population:

- (a) All contiguous Census Collector's Districts which have a population density of 500 or more persons per square mile shall be included. Consequently, State, Statistical Division, Local Government Area and other administrative boundaries shall be disregarded;
- (b) A Collector's District which is known to contain a high proportion of holiday homes shall be classified as urban if the dwelling density is 125 dwellings per square mile or greater;
- (c) A Collector's District consisting mainly of land used for factories, airports, small sports areas, cemeteries, hostels, institutions, prisons, military camps or certain research stations shall be classified as urban if contiguous with Collectors' Districts which are themselves urban;
- (d) Any Collector's District which consists mainly of land used for large sporting areas, large parks, explosives handling and munitions areas, or holding yards associated with meatworks and abattoirs shall be classified as urban only if it is bordered on three sides by Collector's Districts which are themselves urban;
- (e) Any area which is completely surrounded by Collector's Districts which are urban must itself be classified as urban;

- (f) Where an urban centre of 25,000 or more population is separated from another urban centre by a gap in actual development of less than two miles (by the shortest rail or road distance), the gap shall be bridged by classifying a connecting Collector's District or Districts as urban, and therefore treating the urban centres as one; if the gap is two or more miles (and whether or not it is comprised mainly of reserved land or a natural barrier) the urban centres shall remain separate;
- (g) Any area included in an urban centre in 1971 or thereafter under the provisions of this Resolution shall continue to be so included unless the population of the urban centre falls below 25,000, in which case this Resolution will cease to apply;
- (h) Large peripheral Collector's Districts in growth areas shall be fragmented; and so far as the availability of visible boundary features allows, the fragments so created shall be as near square-shaped as possible and of such a size that they will contain a collector's workload when fully developed. For the purposes of delimiting urban centres such fragments shall be regarded as Collector's Districts.

4. In delimiting urban centres with less than 25,000 population:

- (a) The urban centres shall be delimited subjectively (by the inspection of aerial photographs, by field inspection and/or by consideration of any other information that is available);
- (b) All continuous urban growth is to be included (which, in small urban centres, would not necessarily occur if the density criterion were applied), together with any close but non-contiguous development which could be clearly regarded as part of the centre. However, cognisance shall be taken of Resolution 3, where appropriate, particularly in urban centres which are approaching a population of 25,000.

5. In selecting the boundaries for the splitting of Collector's Districts, cognisance shall be taken, where appropriate, of the boundaries of land-use zones.

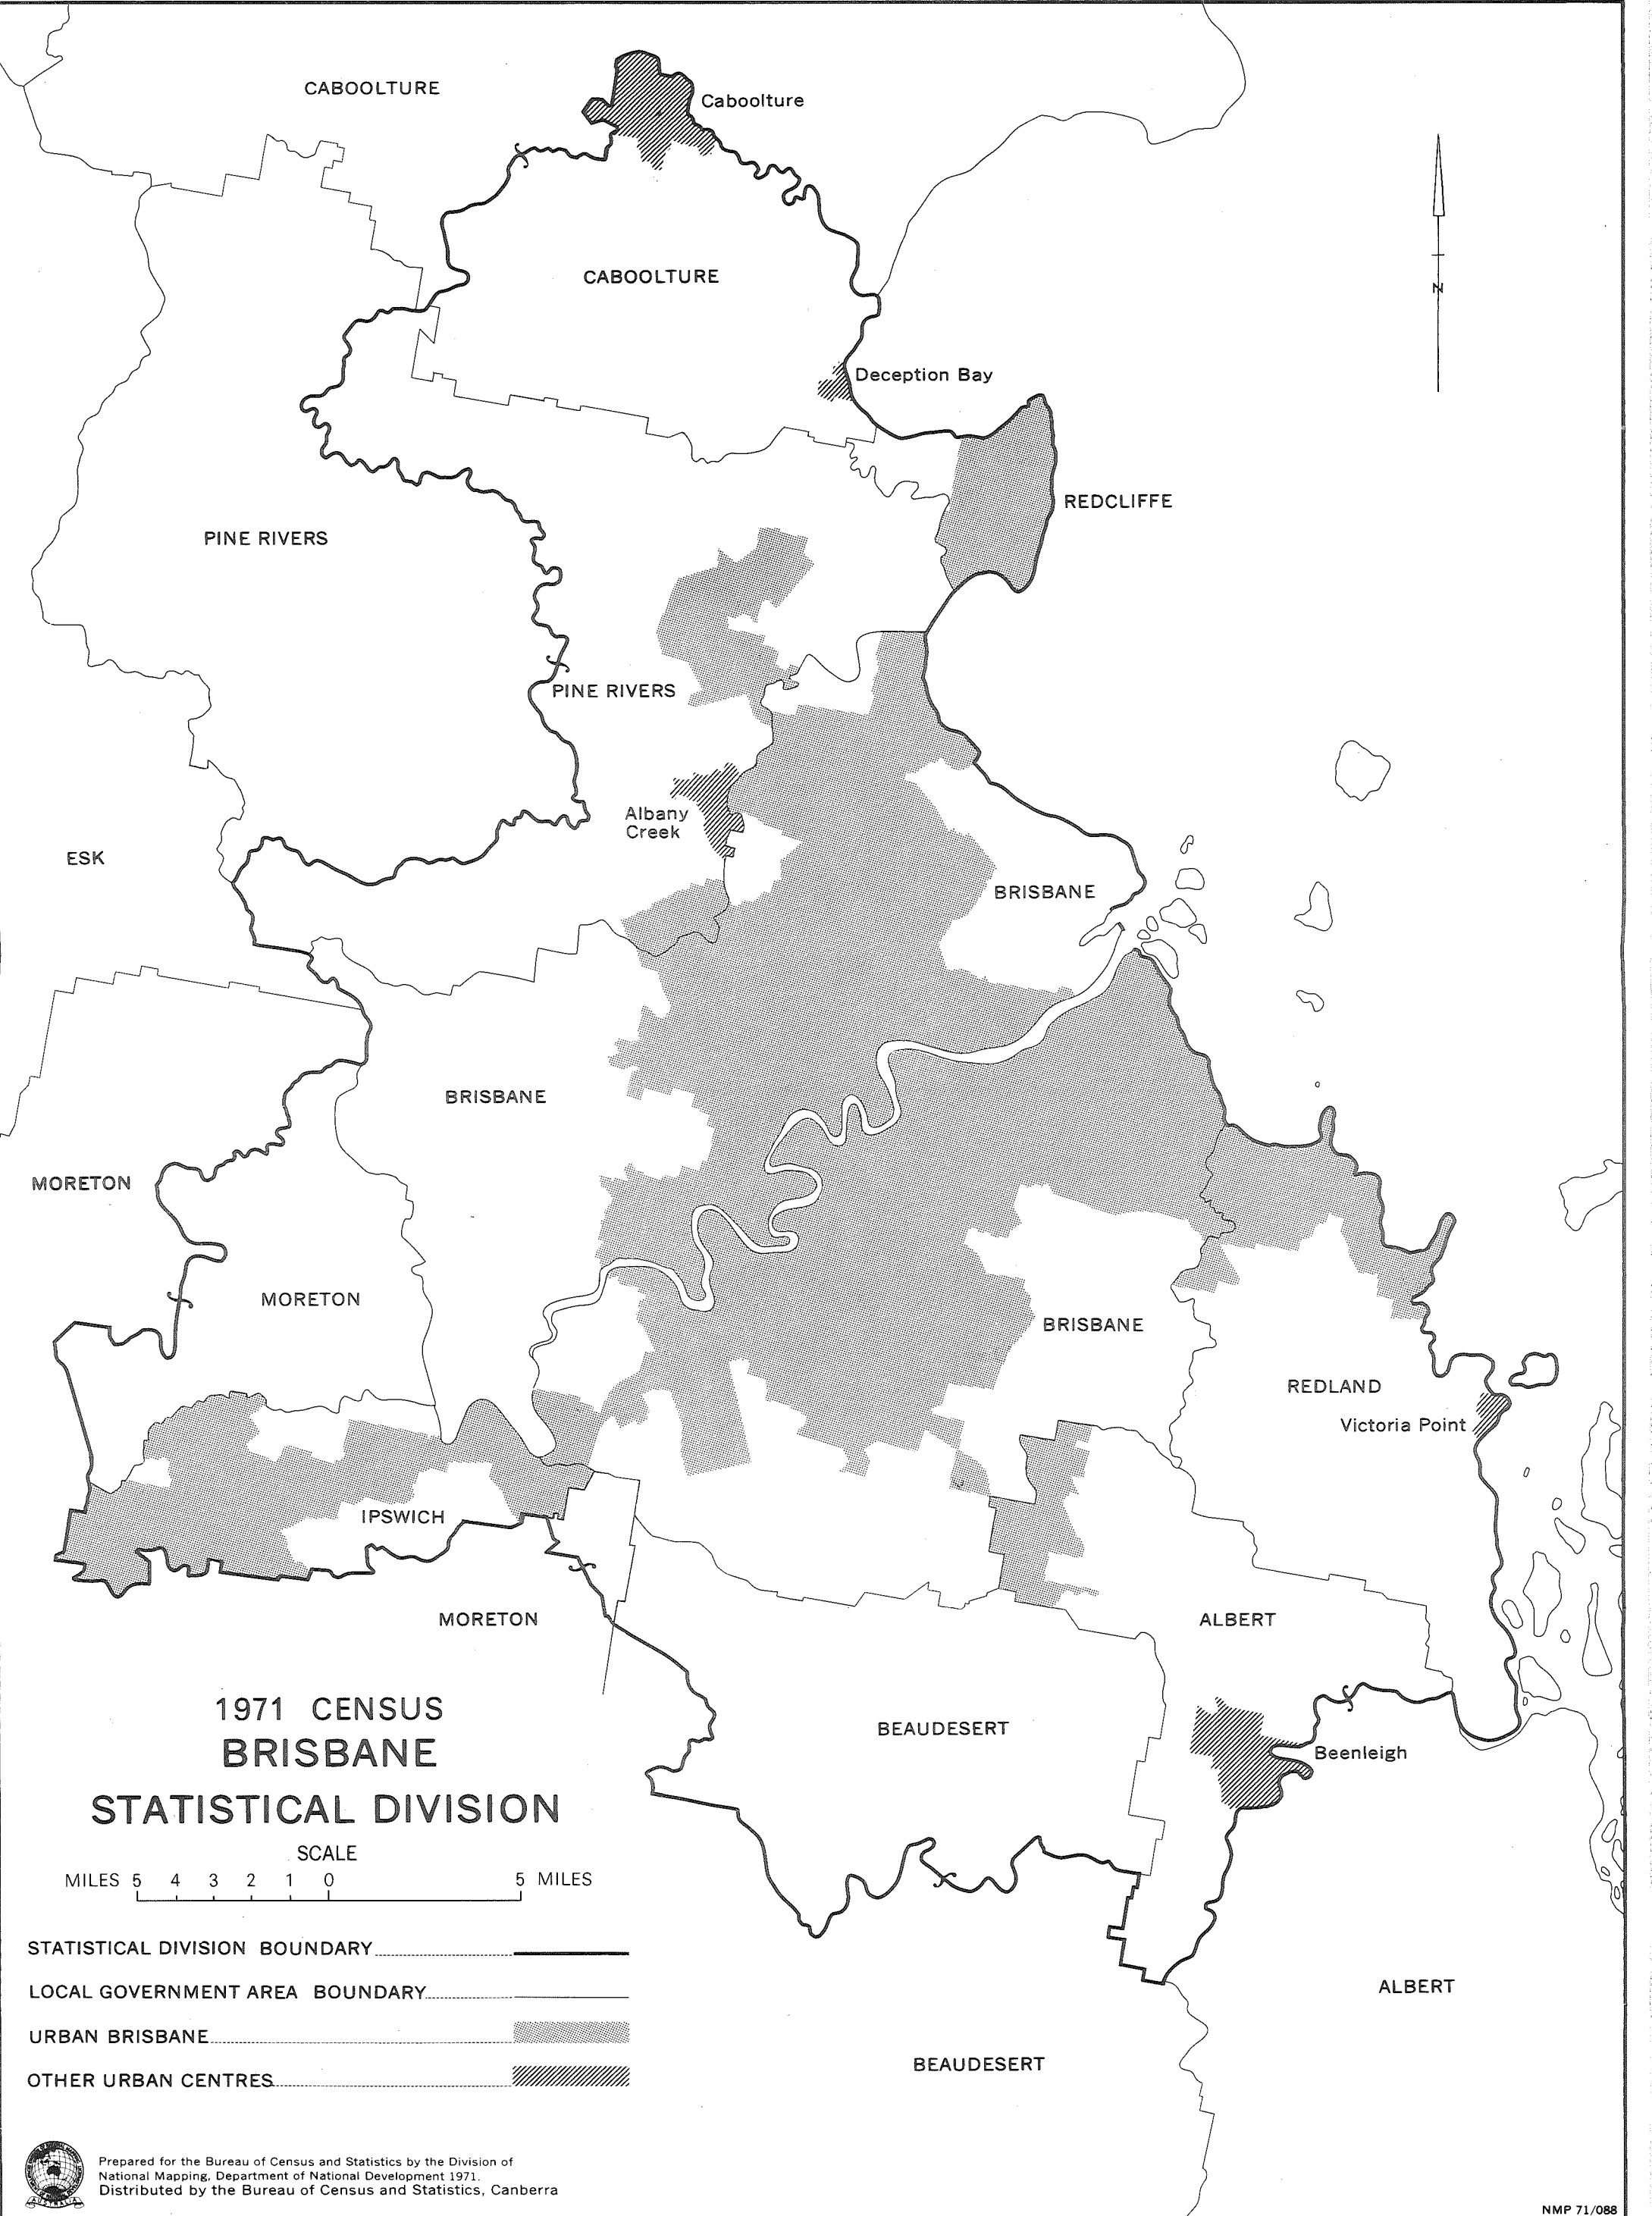

6. (a) For State capital cities, nomenclature for the area delimited by

- (i) the urban, and
- (ii) the outer boundary

shall be (using Melbourne as the example) -

- (i) Urban Melbourne, and
- (ii) Melbourne Statistical Division;

- (b) In other cases where the dual boundary concept is employed the nomenclature shall be (using Newcastle as the example) -
  - (i) Urban Newcastle, and
  - (ii) Newcastle Statistical District;
- (c) In cases where only a single boundary is delineated, the nomenclature shall be (using Cairns as the example) Urban Cairns;
- (d) Where an urban centre is formed by the coalescence of two or more named localities, the urban centre shall be assigned a name agreed upon after consultation with the Deputy Commonwealth Statistician of the State concerned:
