CENSUS OF POPULATION AND HOUSING
30 JUNE 1971

FIELD COUNT STATEMENT NO. 6 - POPULATION : LOCAL GOVERNMENT AREAS AND TOWNS
SOUTH AUSTRALIA

Reference No. 2.76

<u>Table</u>	<u>CONTENTS</u>	<u>Page</u>
..	Explanatory Notes	2
1	Index of local government areas (with area and population) 1971	4
2	Population: Urban centres and other bounded localities, 1966 and 1971	6
3	Population: Local government areas and components, 1966 and 1971	8
4	Population: Urban centres and other bounded localities, 1966 and 1971 in size order	17
5	Urban Centres: Number and population in groups of various sizes, 1966 and 1971	19
	APPENDIX A List of field count statements	
	APPENDIX B Major changes to statistical divisions and local government areas, 1966-1971	
	APPENDIX C Notes on certain urban centres	
	APPENDIX D Delimitation of urban centres	
	APPENDIX E Outline map: Adelaide Statistical Division	

This statement contains preliminary results of the 1971 Census of Population and Housing. The figures have been compiled during the taking of the Census by field personnel and are subject to amendment.

At the 1966 Census, in conformity with Section 127 of the Constitution, Aborigines were excluded from the published population. In 1967 the Constitution was altered to remove this provision, and the 1971 Census therefore includes Aborigines. In order to provide comparability between the two censuses the 1966 populations in this statement have been amended to include Aborigines and therefore differ from the 1966 populations previously published.

A list of 1971 Field Count Statements being issued showing dates of publication (where already issued) is contained in Appendix A to this statement.

EXPLANATORY NOTES

Urban centres and other bounded localities: A detailed description of the concepts and methods used in 1971 in defining urban centres is contained in Appendix D. These methods were similar to those used at the 1966 Census, the main changes being:

1. The elimination of the "indentation" provision. At the 1966 Census an indented area was included within the urban centre if the distance across the "neck" was less than one mile.
2. A re-interpretation of the "enclosure" rule. At the 1966 Census, land was included within the urban centre if it was completely surrounded by the urban centre itself (or in part by the sea or a wide unbridged river). In 1971, if one part of this surround is the sea or a wide unbridged river, this rule is not applied.

At the 1971 Census these concepts were used to determine the urban boundaries of Adelaide and Whyalla.

Around other urban centres and non-urban localities, boundaries were delineated, where possible, where the population was expected to reach at least 200 by 1971. For this purpose, the most recent available aerial photography was used in order to identify as closely as possible the periphery of the built up area. Those centres with a population of 200 or more persons are included in the tables in this bulletin.

Notes on the composition of certain of the urban centres are given in Appendix C to this statement.

1966 Census population: For comparative purposes the population of statistical divisions, local government areas and urban and rural centres at the 1966 Census is shown.

Where the boundaries of local government areas or statistical divisions have been changed (see Appendix B) an estimate has been given of the 1966 population in the 1971 area.

For those urban centres where the density criteria for determining urban boundaries have been used, the 1966 population shown is that resulting from the application of these same criteria at the time of the 1966 Census.

For most of the bounded towns and for some urban components of local government areas it has not been possible to make satisfactory estimates of 1966 population. These cases are shown in the tables as "N.A.".

Major urban population: This term has been applied to population enumerated in urban centres with a total population of 100,000 or more and supersedes the use of "metropolitan" at previous Censuses. In South Australia, it represents the population of Urban Adelaide.

Abbreviations: The following abbreviations have been used in the tables and appendixes.

U - urban, R - rural, C - City, M - Municipality

D.C. - District Council, N.A. - not available.

A minus sign, when appearing after a figure, indicates a decrease in population, e.g. 125-.

2.80	No. 10	Population: Commonwealth Electoral Divisions	

APPENDIX B1. STATISTICAL DIVISIONS

Statistical Divisions in South Australia were redefined to represent closely allied and meaningful areas of production and community of interest. This new system was introduced during 1970 and has nine primary Statistical Divisions. These Statistical Divisions together with the new Statistical Subdivisions are described in detail in the publication "Divisional Statistics, 1970" which is available from the Deputy Commonwealth Statistician, Adelaide.

2. LOCAL GOVERNMENT AREAS

The 1966 figures in this statement have been adjusted to take account of local government area boundary changes effective between 1 July 1966 and 30 June 1971. In 1966 publications, the City of Whyalla incorrectly included 850 persons who, for this publication, are included in the unincorporated area of the Northern Statistical Division. The following table indicates the major changes and further information about other amendments to local government area boundaries may be obtained from the Commonwealth Statistician.

MAJOR LOCAL GOVERNMENT AREA CHANGES, 1 JULY 1966 - 30 JUNE 1971

Local Government Area	Nature of change	Net change in area	Estimated population	Date of change
BURRA(T) & BURRA BURRA (D.C.)	United to form Burra Burra (D.C.)	24.4.69
CENTRAL YORKE PENINSULA (D.C.)	Formerly Maitland (T) and Yorke Peninsula (D.C.)	1.4.69
CLARE(T) & CLARE (D.C.)	United to form Clare (D.C.)	9.1.69
ENFIELD (C)	Lost to Walkerville (T)	260 acres	-2,165	5.7.70
KANYAKA (D.C.)	Lost to Port Augusta (C)	200 acres	-325	28.3.68
MAITLAND(T) & YORKE PENINSULA (D.C.)	United to form Central Yorke Peninsula (D.C.)	1.4.69
PORT AUGUSTA (C)	Gained from Kanyaka (D.C.)	200 acres	+325	28.3.68
PORT ELLIOT (D.C.)	Name changed to Port Elliot & Goolwa (D.C.)	11.7.68
QUORN(T) & KANYAKA (D.C.)	United to form Kanyaka - Quorn (D.C.)	1.4.69
SADDLEWORTH (D.C.) & UPPER WAKEFIELD (D.C.)	United to form Saddleworth & Auburn (D.C.)	5.7.70
WALKERVILLE (T)	Gained from Enfield (C)	260 acres	+2,165	5.7.70

APPENDIX CNOTES ON CERTAIN URBAN CENTRES

1. The composition of urban centres which have absorbed rural localities or merged with other urban centres is shown below:

URBAN CENTRE

Ceduna	:	Includes Thevenard
Mannum	:	Includes Cowirra
Moonta	:	Includes Port Hughes and Port Moonta
Mount Barker	:	Includes Littlehampton
Port Elliot	:	Includes Ocean View
Victor Harbor	:	Includes Encounter Bay and Harborough

2. The following urban centres were non-urban at the 1966 Census:

Coober Pedy

Quorn

Waikerie

3. The rural localities of Gladstone and Leigh Creek were classified as urban for the 1966 Census but failed to meet urban criteria for the 1971 Census.

4. The 1966 urban centre of Reynella - Port Noarlunga was absorbed by Urban Adelaide and therefore does not appear as a separate urban centre in this bulletin.

5. As a result of the changes in urban-rural classification in 2, 3 and 4 above, 1966 figures for individual areas may not add to the urban and rural totals shown.

APPENDIX DCRITERIA FOR THE DELIMITATION OF URBAN BOUNDARIES

The criteria used for delimiting urban centres, as determined by the Thirty-First Conference of Statisticians, October 1969, were:

1. At each Census of Population and Housing a boundary shall be defined in accordance with these Resolutions for each population cluster of 1,000 or more population (and, for known holiday resorts of less population, if they contain 250 or more dwellings of which at least 100 are occupied). These clusters shall be named "urban centres" and the population and dwellings enumerated in them shall be classified as urban for statistical purposes.
2. Around each urban centre with a population of at least 100,000, a further boundary shall be defined, after consultation with planners, to contain the anticipated development of the urban centre and associated smaller urban centres for a period of at least twenty years. Such a boundary should delimit an area which is now, or is expected to be, socially and economically oriented towards the urban centre. It shall consist of complete Local Government Areas if possible. This fixed boundary (as distinct from the urban boundary which is moving) will delimit an area which, for general statistical purposes, is free from the practical problems imposed by the moving boundary, but which nevertheless represents the city in a wider sense.
3. In delimiting urban centres with 25,000 or more population:
 - (a) All contiguous Census Collector's Districts which have a population density of 500 or more persons per square mile shall be included. Consequently, State, Statistical Division, Local Government Area and other administrative boundaries shall be disregarded;
 - (b) A Collector's District which is known to contain a high proportion of holiday homes shall be classified as urban if the dwelling density is 125 dwellings per square mile or greater;
 - (c) A Collector's District consisting mainly of land used for factories, airports, small sports areas, cemeteries, hostels, institutions, prisons, military camps or certain research stations shall be classified as urban if contiguous with Collector's Districts which are themselves urban;
 - (d) Any Collector's District which consists mainly of land used for large sporting areas, large parks, explosives handling and munitions areas, or holding yards associated with meatworks and abattoirs shall be classified as urban only if it is bordered on three sides by Collector's Districts which are themselves urban;
 - (e) Any area which is completely surrounded by Collector's Districts which are urban must itself be classified as urban;

- (f) Where an urban centre of 25,000 or more population is separated from another urban centre by a gap in actual development of less than two miles (by the shortest rail or road distance), the gap shall be bridged by classifying a connecting Collector's District or Districts as urban, and therefore treating the urban centres as one; if the gap is two or more miles (and whether or not it is comprised mainly of reserved land or a natural barrier) the urban centres shall remain separate;
- (g) Any area included in an urban centre in 1971 or thereafter under the provisions of this Resolution shall continue to be so included unless the population of the urban centre falls below 25,000, in which case this Resolution will cease to apply;
- (h) Large peripheral Collector's Districts in growth areas shall be fragmented; and so far as the availability of visible boundary features allows, the fragments so created shall be as near square-shaped as possible and of such a size that they will contain a collector's workload when fully developed. For the purposes of delimiting urban centres such fragments shall be regarded as Collector's Districts.

4. In delimiting urban centres with less than 25,000 population:

- (a) The urban centres shall be delimited subjectively (by the inspection of aerial photographs, by field inspection and/or by consideration of any other information that is available);
- (b) All continuous urban growth is to be included (which, in small urban centres, would not necessarily occur if the density criterion were applied), together with any close but non-contiguous development which could be clearly regarded as part of the centre. However, cognisance shall be taken of Resolution 3, where appropriate, particularly in urban centres which are approaching a population of 25,000.

5. In selecting the boundaries for the splitting of Collector's Districts, cognisance shall be taken, where appropriate, of the boundaries of land-use zones.

6. (a) For State capital cities, nomenclature for the area delimited by

- (i) the urban, and
- (ii) the outer boundary

shall be (using Melbourne as the example) -

- (i) Urban Melbourne, and
- (ii) Melbourne Statistical Division;

- (b) In other cases where the dual boundary concept is employed, the nomenclature shall be (using Newcastle as the example) -
 - (i) Urban Newcastle, and
 - (ii) Newcastle Statistical District;
- (c) In cases where only a single boundary is delineated, the nomenclature shall be (using Cairns as the example) Urban Cairns;
- (d) Where an urban centre is formed by the coalescence of two or more named localities, the urban centre shall be assigned a name agreed upon after consultation with the Deputy Commonwealth Statistician of the State concerned.

1971 CENSUS ADELAIDE STATISTICAL DIVISION
