

CENSUS OF POPULATION AND HOUSING
30 JUNE 1971

Reference No. 2 71

FIELD COUNT STATEMENT NO. 1 - POPULATION STATES AND TERRITORIES OF AUSTRALIA

This statement contains preliminary results of the 1971 Census of Population and Housing. It shows the population of the States and Territories of Australia together with comparative final figures for the previous Census taken in 1966. The figures have been compiled during the taking of the Census by field personnel and are subject to amendment.

At the 1966 Census, in conformity with Section 127 of the Constitution, Aborigines were excluded from the published population. In 1967 the Constitution was altered to remove this provision, and the 1971 Census therefore includes Aborigines. In order to provide comparability between the two censuses the 1966 population in this statement has been amended to include Aborigines and therefore differs from the 1966 population previously published.

TABLE 1. - POPULATION : STATES AND TERRITORIES OF AUSTRALIA

State or Territory	Census 30 June 1966(a)			Census 30 June 1971		
	Males	Females	Persons	Males	Females	Persons
New South Wales	2,126,652	2,111,249	4,237,901	2,302,110	2,287,446	4,589,556

	APPENDIX A List of field count statements	
	APPENDIX B Notes on certain urban centres	
	APPENDIX C Delimitation of urban centres	

This statement contains preliminary results of the 1971 Census of Population and Housing. The figures have been compiled during the taking of the Census by field personnel and are subject to amendment.

At the 1966 Census, in conformity with Section 127 of the Constitution, Aborigines were excluded from the published population. In 1967 the Constitution was altered to remove this provision and the 1971 Census therefore includes Aborigines. In order to provide comparability between the two censuses the 1966 populations in this statement have been amended to include Aborigines and therefore differ from the 1966 populations previously published.

A list of 1971 Field Count Statements being issued showing dates of publication (where already issued) is contained in Appendix A to this statement.

EXPLANATORY NOTES

Urban centres and other bounded localities: A detailed description of the concepts and methods used in 1971 in defining urban centres is contained in Appendix C. These methods were similar to those used at the 1966 Census, the main changes being:

1. The elimination of the "indentation" provision. At the 1966 Census an indented area was included within the urban centre if the distance across the "neck" was less than one mile.
2. A re-interpretation of the "enclosure" rule. At the 1966 Census land was included within the urban centre if it was completely surrounded by the urban centre itself (or in part by the sea or a wide unbridged river). In 1971, if one part of this surround was the sea or a wide unbridged river this rule was not applied.

At the 1971 Census these concepts were used to determine the urban boundaries of all those centres expected to reach 25,000 population in 1971.

Around other urban centres and non-urban localities, boundaries were delineated, where possible, when the population was expected to reach at least 200 by 1971. For this purpose, the most recent available aerial photography was used in order to identify as closely as possible the periphery of the built up area.

1966 Census population: In addition to the 1971 population of urban centres the "comparable" 1966 populations have been shown wherever possible. However there are both conceptual and practical difficulties in determining comparable figures and the choice of such a figure may well depend upon the uses to which the data are to be put.

Urban centres usually grow both vertically (i.e. within the original boundary) and horizontally (i.e. by spreading over the original boundary into surrounding areas).

Generally in this publication an attempt has been made to show 1966 figures which illustrate the total growth (i.e. horizontal plus vertical).

However when boundaries are extended to encompass intercensal horizontal growth they may take in areas previously uninhabited, areas previously sparsely populated or areas previously quite densely populated (e.g. another urban centre may have been absorbed).

In general, with the notable exception of Queanbeyan, which has been absorbed by Urban Canberra, the population in such areas in 1966 are small relative to the size of the centre which has absorbed them.

For the purposes of this publication therefore, it has been decided that most 1966 figures shown should represent the population encompassed by the 1966 boundary. These figures do not include population enumerated in 1966 in areas now absorbed by any boundary change which may have occurred.

In determining the 1966 figures the following rules have been followed:

1. For urban centres the boundaries of which were, in 1971, determined by using the density criteria, the 1966 figures shown are those which result from the application of the amended criteria (See Appendix C) to the 1966 situation.
2. For centres the boundaries of which were, in 1971, not determined by the density criteria, the 1966 population is that encompassed by the 1966 boundary, with the following exceptions.
 - (a) Where a centre has absorbed another centre with a population greater than 5 per cent of its own population, the figure shown is the combined population of the two centres in 1966.
 - (b) Where an urban centre coincides with a local government area which has undergone a boundary change intercensally, the 1966 population is that estimated to have been contained within the new boundary in 1966.
 - (c) Where information gained after the 1966 Census indicated that the 1966 boundary was faulty and excluded significant urban population the 1966 figure is an estimate of the population contained within a revised 1966 boundary.

In all cases the 1966 populations include Aborigines, where applicable, which they did not do when published in the 1966 series of bulletins.

Where it has not been possible to determine a comparable 1966 figure, n.a. has been shown.

A minus sign appearing before a figure indicates a decrease in population, e.g. -125.

APPENDIX BNOTES ON CERTAIN URBAN CENTRES

I. The following urban centres at the 1966 Census do not appear in 1971, because of absorption since 1966 by larger centres:

<u>1966 Urban Centre</u>	<u>State</u>	<u>1966 Population</u>	<u>Absorbed by</u>
Glenbrook - Faulconbridge	N.S.W.	13,732	Sydney
Queanbeyan	N.S.W.	12,515	Canberra
Dromana - Sorrento	VIC.	9,935	Melbourne
Mornington - Balcombe	VIC.	7,349	Melbourne
Birkdale - Wellington Point	QLD	2,275	Brisbane
Cleveland	QLD	1,735	Brisbane
Lawnton - Petrie	QLD	2,510	Brisbane
Woodridge	QLD	1,484	Brisbane
Reynella - Port Noarlunga	S.A.	11,834	Adelaide
Armadale	W.A.	3,463	Perth
Kalamunda - Gooseberry Hill	W.A.	3,083	Perth
Kwinana Industrial	W.A.	1,272	Rockingham

II. The following urban centres appearing in this field count statement were non-urban in 1966:

<u>Urban Centre</u>	<u>State</u>	<u>1971 Population</u>
Brightwaters	N.S.W.	642
Narellan	N.S.W.	1,103
Terrey Hills	N.S.W.	1,917
Craigieburn	VIC.	1,342
Cranbourne	VIC.	2,421
Emerald	VIC.	1,583
Hampton Park	VIC.	1,328
Leopold	VIC.	1,444
Melton	VIC.	4,491
Albany Creek	QLD	1,523
Roleystone	W.A.	1,193
Wanneroo	W.A.	1,525

III. The composition of certain urban centres which appear in this field count statement is shown below. Also shown are the urban centres with more than 20,000 persons in 1971 which cross State borders.

<u>Urban Centre</u>	<u>State</u>	<u>Composition</u>
Albury - Wodonga	N.S.W./VIC.	Includes Glenroy and Bandiana 1966 Population 23,379 in N.S.W. and 8,653 in VIC. 1971 Population 27,383 in N.S.W. and 10,533 in VIC.
Avondale	N.S.W.	Includes Cooranbong
Ballarat	VIC.	Includes Alfredton, Mt Clear, Mt Pleasant, Sebastopol, Nerrina and Wendouree
Bendigo	VIC.	Includes Strathdale, Spring Gully, Diamond Hill, Kangaroo Flat and Kennington
Berwick	VIC.	Includes Beaconsfield
Cairns	QLD	Includes Freshwater, Machans Beach, Redlynch and Stratford
Canberra	A.C.T./N.S.W.	Includes Queanbeyan 1966 Population 92,311 in A.C.T. 1971 Population 140,966 in A.C.T. and 15,368 in N.S.W.
Crib Point	VIC.	Includes Bittern
Gold Coast	QLD/N.S.W.	Includes Angler's Paradise, Hollywell, Paradise Point, Tweed Heads West and Tweed Heads South 1966 Population 49,358 in QLD and 3,830 in N.S.W. 1971 Population 68,974 in QLD and 5,147 in N.S.W.
Gosford - Woy Woy	N.S.W.	Includes Narara, Point Clare, Tascott, Koolewong, Umina, Pearl Beach, Phegans Bay and Ettalong Beach
Hastings	VIC.	Includes Old Tyabb
Kwinana New Town	W.A.	Includes Calista, Medina and Orelia
Mackay	QLD	Includes Andergrove and Slade Point
Moe-Yallourn	VIC.	Includes Newborough, Hernes Oak and Yallourn North
Orange	N.S.W.	Includes Bloomfield
Rockingham	W.A.	Includes Kwinana Industrial, Safety Bay and Warnbro
Tamworth	N.S.W.	Includes Oxley Vale
Toowoomba	QLD	Includes Drayton

IV. As a result of the changes in urban-rural classification in I and II above, 1966 figures for individual areas may not add to the urban and rural totals shown.

APPENDIX CCRITERIA FOR THE DELIMITATION OF URBAN BOUNDARIES

The criteria used for delimiting urban centres, as determined by the Thirty-First Conference of Statisticians, October 1969, were:

1. At each Census of Population and Housing a boundary shall be defined in accordance with these Resolutions for each population cluster of 1,000 or more population (and, for known holiday resorts of less population, if they contain 250 or more dwellings of which at least 100 are occupied). These clusters shall be named "urban centres" and the population and dwellings enumerated in them shall be classified as urban for statistical purposes.
2. Around each urban centre with a population of at least 100,000, a further boundary shall be defined, after consultation with planners, to contain the anticipated development of the urban centre and associated smaller urban centres for a period of at least twenty years. Such a boundary should delimit an area which is now, or is expected to be, socially and economically oriented towards the urban centre. It shall consist of complete Local Government Areas if possible. This fixed boundary (as distinct from the urban boundary which is moving) will delimit an area which, for general statistical purposes, is free from the practical problems imposed by the moving boundary, but which nevertheless represents the city in a wider sense.
3. In delimiting urban centres with 25,000 or more population:
 - (a) All contiguous Census Collector's Districts which have a population density of 500 or more persons per square mile shall be included. Consequently, State, Statistical Division, Local Government Area and other administrative boundaries shall be disregarded;
 - (b) A Collector's District which is known to contain a high proportion of holiday homes shall be classified as urban if the dwelling density is 125 dwellings per square mile or greater;
 - (c) A Collector's District consisting mainly of land used for factories, airports, small sports areas, cemeteries, hostels, institutions, prisons, military camps or certain research stations shall be classified as urban if contiguous with Collector's Districts which are themselves urban;
 - (d) Any Collector's District which consists mainly of land used for large sporting areas, large parks, explosives handling and munitions areas, or holding yards associated with meatworks and abattoirs shall be classified as urban only if it is bordered on three sides by Collector's Districts which are themselves urban;
 - (e) Any area which is completely surrounded by Collector's Districts which are urban must itself be classified as urban;

- (f) Where an urban centre of 25,000 or more population is separated from another urban centre by a gap in actual development of less than two miles (by the shortest rail or road distance), the gap shall be bridged by classifying a connecting Collector's District or Districts as urban, and therefore treating the urban centres as one; if the gap is two or more miles (and whether or not it is comprised mainly of reserved land or a natural barrier) the urban centres shall remain separate;
- (g) Any area included in an urban centre in 1971 or thereafter under the provisions of this Resolution shall continue to be so included unless the population of the urban centre falls below 25,000, in which case this Resolution will cease to apply;
- (h) Large peripheral Collector's Districts in growth areas shall be fragmented; and so far as the availability of visible boundary features allows, the fragments so created shall be as near square-shaped as possible and of such a size that they will contain a collector's workload when fully developed. For the purposes of delimiting urban centres such fragments shall be regarded as Collector's Districts.

4. In delimiting urban centres with less than 25,000 population:

- (a) The urban centres shall be delimited subjectively (by the inspection of aerial photographs, by field inspection and/or by consideration of any other information that is available);
- (b) All continuous urban growth is to be included (which, in small urban centres, would not necessarily occur if the density criterion were applied), together with any close but non-contiguous development which could be clearly regarded as part of the centre. However, cognisance shall be taken of Resolution 3, where appropriate, particularly in urban centres which are approaching a population of 25,000.

5. In selecting the boundaries for the splitting of Collector's Districts, cognisance shall be taken, where appropriate, of the boundaries of land-use zones.

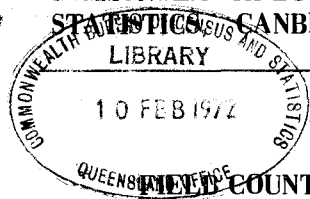

6. (a) For State capital cities, nomenclature for the area delimited by

- (i) the urban, and
- (ii) the outer boundary

shall be (using Melbourne as the example) -

- (i) Urban Melbourne, and
- (ii) Melbourne Statistical Division;

- (b) In other cases where the dual boundary concept is employed, the nomenclature shall be (using Newcastle as the example) -
 - (i) Urban Newcastle, and
 - (ii) Newcastle Statistical District;
- (c) In cases where only a single boundary is delineated, the nomenclature shall be (using Cairns as the example) Urban Cairns;
- (d) Where an urban centre is formed by the coalescence of two or more named localities, the urban centre shall be assigned a name agreed upon after consultation with the Deputy Commonwealth Statistician of the State concerned.

CENSUS OF POPULATION AND HOUSING

30 JUNE 1971

FIELD COUNT STATEMENT NO. 3 - POPULATION: LOCAL GOVERNMENT AREAS AND TOWNS
NEW SOUTH WALES

Reference No. 2.73

<u>Table</u>	<u>CONTENTS</u>	<u>Page</u>

	APPENDIX B Major changes to statistical divisions and local government areas, 1966-1971	
	APPENDIX C Notes on certain urban centres	
	APPENDIX D Delimitation of urban centres	
	APPENDIX E Outline maps: Sydney Statistical Division, Newcastle Statistical District, Wollongong Statistical District and Canberra Statistical District	

This statement contains preliminary results of the 1971 Census of Population and Housing. The figures have been compiled during the taking of the Census by field personnel and are subject to amendment.

At the 1966 Census, in conformity with Section 127 of the Constitution, Aborigines were excluded from the published population. In 1967 the Constitution was altered to remove this provision, and the 1971 Census therefore includes Aborigines. In order to provide comparability between the two censuses the 1966 populations in this statement have been amended to include Aborigines and therefore differ from the 1966 populations previously published.

A list of 1971 Field Count Statements being issued showing dates of publication (where already issued) is contained in Appendix A to this statement.

EXPLANATORY NOTES

Urban centres and other bounded localities: A detailed description of the concepts and methods used in 1971 in defining urban centres is contained in Appendix D. These methods were similar to those used at the 1966 Census, the main changes being:

1. The elimination of the "indentation" provision. At the 1966 Census an indented area was included within the urban centre if the distance across the "neck" was less than one mile.
2. A re-interpretation of the "enclosure" rule. At the 1966 Census land was included within the urban centre if it was completely surrounded by the urban centre itself (or in part by the sea or a wide unbridged river). In 1971, if one part of this surround is the sea or a wide unbridged river, this rule is not applied.

At the 1971 Census these concepts were used to determine urban boundaries for the following centres or parts of centres in New South Wales: Sydney, Newcastle, Wollongong, Canberra, Gold Coast, Gosford - Woy Woy, Albury-Wodonga, Broken Hill, Wagga Wagga, Tamworth and Maitland. Around other urban centres and non-urban localities, boundaries were delineated, where possible, where the population was expected to reach at least 200 by 1971. For this purpose, the most recent available aerial photography was used in order to identify as closely as possible the periphery of the built up areas. Those centres with a population of 200 or more persons are included in the tables in this bulletin.

Notes on the composition of certain of the urban centres are given in Appendix C to this statement.

1966 Census population: For comparative purposes the population of statistical divisions, local government areas and urban and rural centres at the 1966 Census is shown.

Where the boundaries of local government areas or statistical divisions have been changed (see Appendix B) an estimate has been made of the 1966 population in the 1971 area.

For those urban centres where the density criteria for determining urban boundaries have been used, the 1966 population shown is that resulting from the application of these same criteria at the time of the 1966 Census.

For most of the bounded towns and for some urban components of local government areas it has not been possible to make satisfactory estimates of 1966 population. These cases are shown in the tables as "N.A."

Major urban population: This term has been applied to population enumerated in urban centres with a total population of 100,000 or more and supersedes the use of "metropolitan" at previous Censuses. In New South Wales it represents the total urban population of Sydney, Newcastle, Wollongong and that part of Queanbeyan Municipality which is included in urban Canberra. The urban population of each of these areas is shown in Tables 2 and 3.

Abbreviations: The following abbreviations have been used in the tables and appendixes.

U - urban, R - rural, C - City, M - Municipality,

S - Shire, N.A. - not available

A minus sign, when appearing after a figure, indicates a decrease in population, e.g. 125-

APPENDIX BI. STATISTICAL DIVISIONS

Statistical Divisions in New South Wales were redefined to represent regions characterised by social and economic links under the unifying influence of one or more major cities or towns. Under the new system which was introduced in 1970 there are thirteen primary Statistical Divisions (including Lord Howe Island) and twenty-one Statistical Subdivisions. These are described in detail in the publication "Statistical Divisions and Subdivisions of New South Wales" which is available from the Deputy Commonwealth Statistician, Sydney.

II. LOCAL GOVERNMENT AREAS

The 1966 figures in this statement have been adjusted to take account of Local Government Area boundary changes effective between 1 July 1966 and 30 June 1971. The following table indicates the major changes and further information about other amendments to Local Government Area boundaries may be obtained from the Commonwealth Statistician.

MAJOR LOCAL GOVERNMENT AREA CHANGES, 1 JULY 1966 - 30 JUNE 1971

<u>Local Government Area</u>	<u>Nature of Change</u>	<u>Net Change in Area</u>	<u>Estimated Population Involved</u>	<u>Date of Change</u>
Armidale (C)	Gained from Dumaresq (S)	3,414 acres	350	1.1.71
Blacktown (M)	Lost to Holroyd (M)	73 acres	350-	1.1.69
Cudgegong (S)	Gained from Turon (S)	45,000 acres	22	1.10.66
Denman (S)	Formerly Muswellbrook (S)	-	-	19.4.68
Dubbo (C)	Gained from Talbragar (S)	766 acres	34	7.10.66
Dumaresq (S)	Lost to Armidale (C)	3,414 acres	350-	1.1.71
Dungog (S)	Gained from Port Stephens (S)	8,162 acres	38	1.1.68
Holroyd (M)	Gained from Blacktown (M)	73 acres	350	1.1.69
Inverell (M)	Gained from MacIntyre (S)	1,230 acres	120	1.1.68
Leichhardt (M)	Gained from Sydney (C)	550 acres	15,850	1.8.68

<u>Local Government Area</u>	<u>Nature of Change</u>	<u>Net Change in Area</u>	<u>Estimated Population Involved</u>	<u>Date of Change</u>
MacIntyre (S)	Lost to Inverell (M)	1,230 acres	120-	1.1.68
Marrickville (M)	Gained from Sydney (C)	423 acres	16,560	1.8.68
Mitchell (S)	Lost to Wagga Wagga (C)	3,200 acres	30-	1.1.68
Muswellbrook (M)	Gained from Muswellbrook (S)	700 acres	55	1.1.68
Muswellbrook (S)	Name changed to Denman (S) and lost to Muswellbrook (M)	700 acres	55-	1.1.68
Namoi (S)	Lost to Narrabri (M)	1,939 acres	37-	28.11.69
Narrabri (M)	Gained from Namoi (S)	1,939 acres	37	28.11.69
Port Stephens (S)	Lost to Dungog (S)	8,162 acres	38-	1.1.68
South Sydney (M)	Constituted from Sydney (C) as Northcott (M) and name changed to South Sydney (M)	2,603 acres	40,450	1.8.68
Sydney (C)	Lost varying areas to Leichhardt (M), Marrickville (M), Woollahra (M) and Northcott (M)	3,906 acres	88,190-	1.8.68
Talbragar (S)	Lost to Dubbo (C)	766 acres	34-	7.10.66
Turon (S)	Lost to Cudgegon (S)	45,000 acres	22-	1.10.66
Wagga Wagga	Gained from Mitchell (S)	3,200 acres	30	1.1.68
Wollongong (C)	Formerly Greater Wollongong (C)	-	-	21.10.70
Woollahra (M)	Gained from Sydney (C)	330 acres	15,330	1.8.68

APPENDIX CNOTES ON CERTAIN URBAN CENTRES

I. In those instances where urban centres extend across State boundaries, the tables in this statement only include that part which is situated within New South Wales. The total populations of each of these urban centres are shown in the following list. There is also one non-urban locality, Mungindi, which crosses the State's borders and its total population in 1966 was 978 and in 1971 848.

The composition of urban centres which have absorbed rural localities or merged with other urban centres is also shown below.

URBAN CENTRE

Albury-Wodonga	Includes Glenroy. Total population of Albury-Wodonga (U) 1966, 32,032; 1971, 37,916.
Avoca Beach	Includes Copacabana and Kincumber.
Avondale	Includes Cooranbong.
Barham-Koondrook	Total population of Barham-Koondrook (U) 1966, 1743 ; 1971, 1724.
Bateman's Bay	Includes Batehaven.
Brightwaters	Includes Sunshine and Silverwater.
Budgewoi Lake	Includes Toukley, Gorokan, Budgewoi, Norah Head, Buff Point, Charmhaven, Kanwal, Rocky Point and Tuggerawong.
Camden Haven	Includes Laurieton and North Camden.
Canberra	Includes Queanbeyan in 1971. Total population of Canberra (U) 1966, 92,311; 1971, 156,334.
Corowa-Wahgunyah	Includes Corowa South. Total population of Corowa-Wahgunyah (U) 1966, 2709; 1971, 3,308.
Echuca-Moama	Total population of Echuca-Moama (U) 1966, 8,011; 1971, 8,636.
Gerrington	Includes Gerroa.
Gold Coast	Includes Tweed Heads West and Tweed Heads South. Total population of Gold Coast (U) 1966, 53,188; 1971, 74,121
Gosford-Woy Woy	Includes Narara, Point Clare, Tascott, Koolewong, Umina, Pearl Beach, Phegans Bay and Ettalong Beach.
Griffith	Includes Yoogali.
Gundagai	Includes South Gundagai.

Huskisson	Includes Vincentia.
Katoomba-Wentworth Falls	Includes Leura.
Kempsey	Includes Greenhill.
Lawson-Hazelbrook	Includes Bullaburra and Woodford.
Mittagong	Includes Welby.
Murrumburrah	Includes Harden.
Murwillumbah	Includes Condong.
Orange	Includes Bloomfield.
St. Georges Basin East	Includes St. Georges Basin.
Sawtell	Includes Boambee.
Sussex Inlet	Includes Sussex Inlet South.
Tamworth	Includes Oxley Vale.
Taree	Includes Purfleet.
The Entrance	Includes Chittaway Point and Forresters Reach.
Ulladulla	Includes Mollymook, Kings Point and Burrill Lake.
Wagstaffe-Kilcare	Includes Pretty Beach and Kilcare Heights.
West Wyalong	Includes Wyalong.
Wyang	Includes Tuggerah.
Yarrawonga-Mulwala	Total population of Yarrawonga-Mulwala (U) 1966, 3,990; 1971, 3,977

II. The following urban centres were non-urban at the 1966 Census:

Berry	Manning Park
Brightwaters	Narellan
Crescent Head	Richmond North
Culburra	Shoalhaven Heads
Currarong	Talbingo
Fingal Head	Tathra
Greenwell Point	Terrey Hills
Iluka	Wagstaffe-Kilcare
Lake Munmorah	

III. The rural localities of Culcairn, Khancoban and Lockhart were urban for the 1966 Census but failed to meet urban criteria for the 1971 Census.

IV. Urban centres in 1966 whose names do not appear in this Bulletin are:

Glenbrook-Faulconbridge which has been absorbed by Urban Sydney.

Queanbeyan which has been absorbed by Urban Canberra.

Toukley-Gorokan-Budgewoi which has been renamed Budgewoi Lake.

Woy Woy-Umina which is incorporated in Urban Gosford-Woy Woy.

V. As a result of the changes in urban-rural classification in II, III and IV above, 1966 figures for individual areas may not add to the urban and rural totals shown.

APPENDIX DCRITERIA FOR THE DELIMITATION OF URBAN BOUNDARIES

The criteria used for delimiting urban centres, as determined by the Thirty-First Conference of Statisticians, October 1969, were:

1. At each Census of Population and Housing a boundary shall be defined in accordance with these Resolutions for each population cluster of 1,000 or more population (and, for known holiday resorts of less population, if they contain 250 or more dwellings of which at least 100 are occupied). These clusters shall be named "urban centres" and the population and dwellings enumerated in them shall be classified as urban for statistical purposes.
2. Around each urban centre with a population of at least 100,000, a further boundary shall be defined, after consultation with planners, to contain the anticipated development of the urban centre and associated smaller urban centres for a period of at least twenty years. Such a boundary should delimit an area which is now, or is expected to be, socially and economically oriented towards the urban centre. It shall consist of complete Local Government Areas if possible. This fixed boundary (as distinct from the urban boundary which is moving) will delimit an area which, for general statistical purposes, is free from the practical problems imposed by the moving boundary, but which nevertheless represents the city in a wider sense.
3. In delimiting urban centres with 25,000 or more population:
 - (a) All contiguous Census Collector's Districts which have a population density of 500 or more persons per square mile shall be included. Consequently, State, Statistical Division, Local Government Area and other administrative boundaries shall be disregarded;
 - (b) A Collector's District which is known to contain a high proportion of holiday homes shall be classified as urban if the dwelling density is 125 dwellings per square mile or greater;
 - (c) A Collector's District consisting mainly of land used for factories, airports, small sports areas, cemeteries, hostels, institutions, prisons, military camps or certain research stations shall be classified as urban if contiguous with Collectors' Districts which are themselves urban;
 - (d) Any Collector's District which consists mainly of land used for large sporting areas, large parks, explosives handling and munitions areas, or holding yards associated with meatworks and abattoirs shall be classified as urban only if it is bordered on three sides by Collector's Districts which are themselves urban;
 - (e) Any area which is completely surrounded by Collector's Districts which are urban must itself be classified as urban;

- (f) Where an urban centre of 25,000 or more population is separated from another urban centre by a gap in actual development of less than two miles (by the shortest rail or road distance), the gap shall be bridged by classifying a connecting Collector's District or Districts as urban, and therefore treating the urban centres as one; if the gap is two or more miles (and whether or not it is comprised mainly of reserved land or a natural barrier) the urban centres shall remain separate;
- (g) Any area included in an urban centre in 1971 or thereafter under the provisions of this Resolution shall continue to be so included unless the population of the urban centre falls below 25,000, in which case this Resolution will cease to apply;
- (h) Large peripheral Collector's Districts in growth areas shall be fragmented; and so far as the availability of visible boundary features allows, the fragments so created shall be as near square-shaped as possible and of such a size that they will contain a collector's workload when fully developed. For the purposes of delimiting urban centres such fragments shall be regarded as Collector's Districts.

4. In delimiting urban centres with less than 25,000 population:

- (a) The urban centres shall be delimited subjectively (by the inspection of aerial photographs, by field inspection and/or by consideration of any other information that is available);
- (b) All continuous urban growth is to be included (which, in small urban centres, would not necessarily occur if the density criterion were applied), together with any close but non-contiguous development which could be clearly regarded as part of the centre. However, cognisance shall be taken of Resolution 3, where appropriate, particularly in urban centres which are approaching a population of 25,000.

5. In selecting the boundaries for the splitting of Collector's Districts, cognisance shall be taken, where appropriate, of the boundaries of land-use zones.

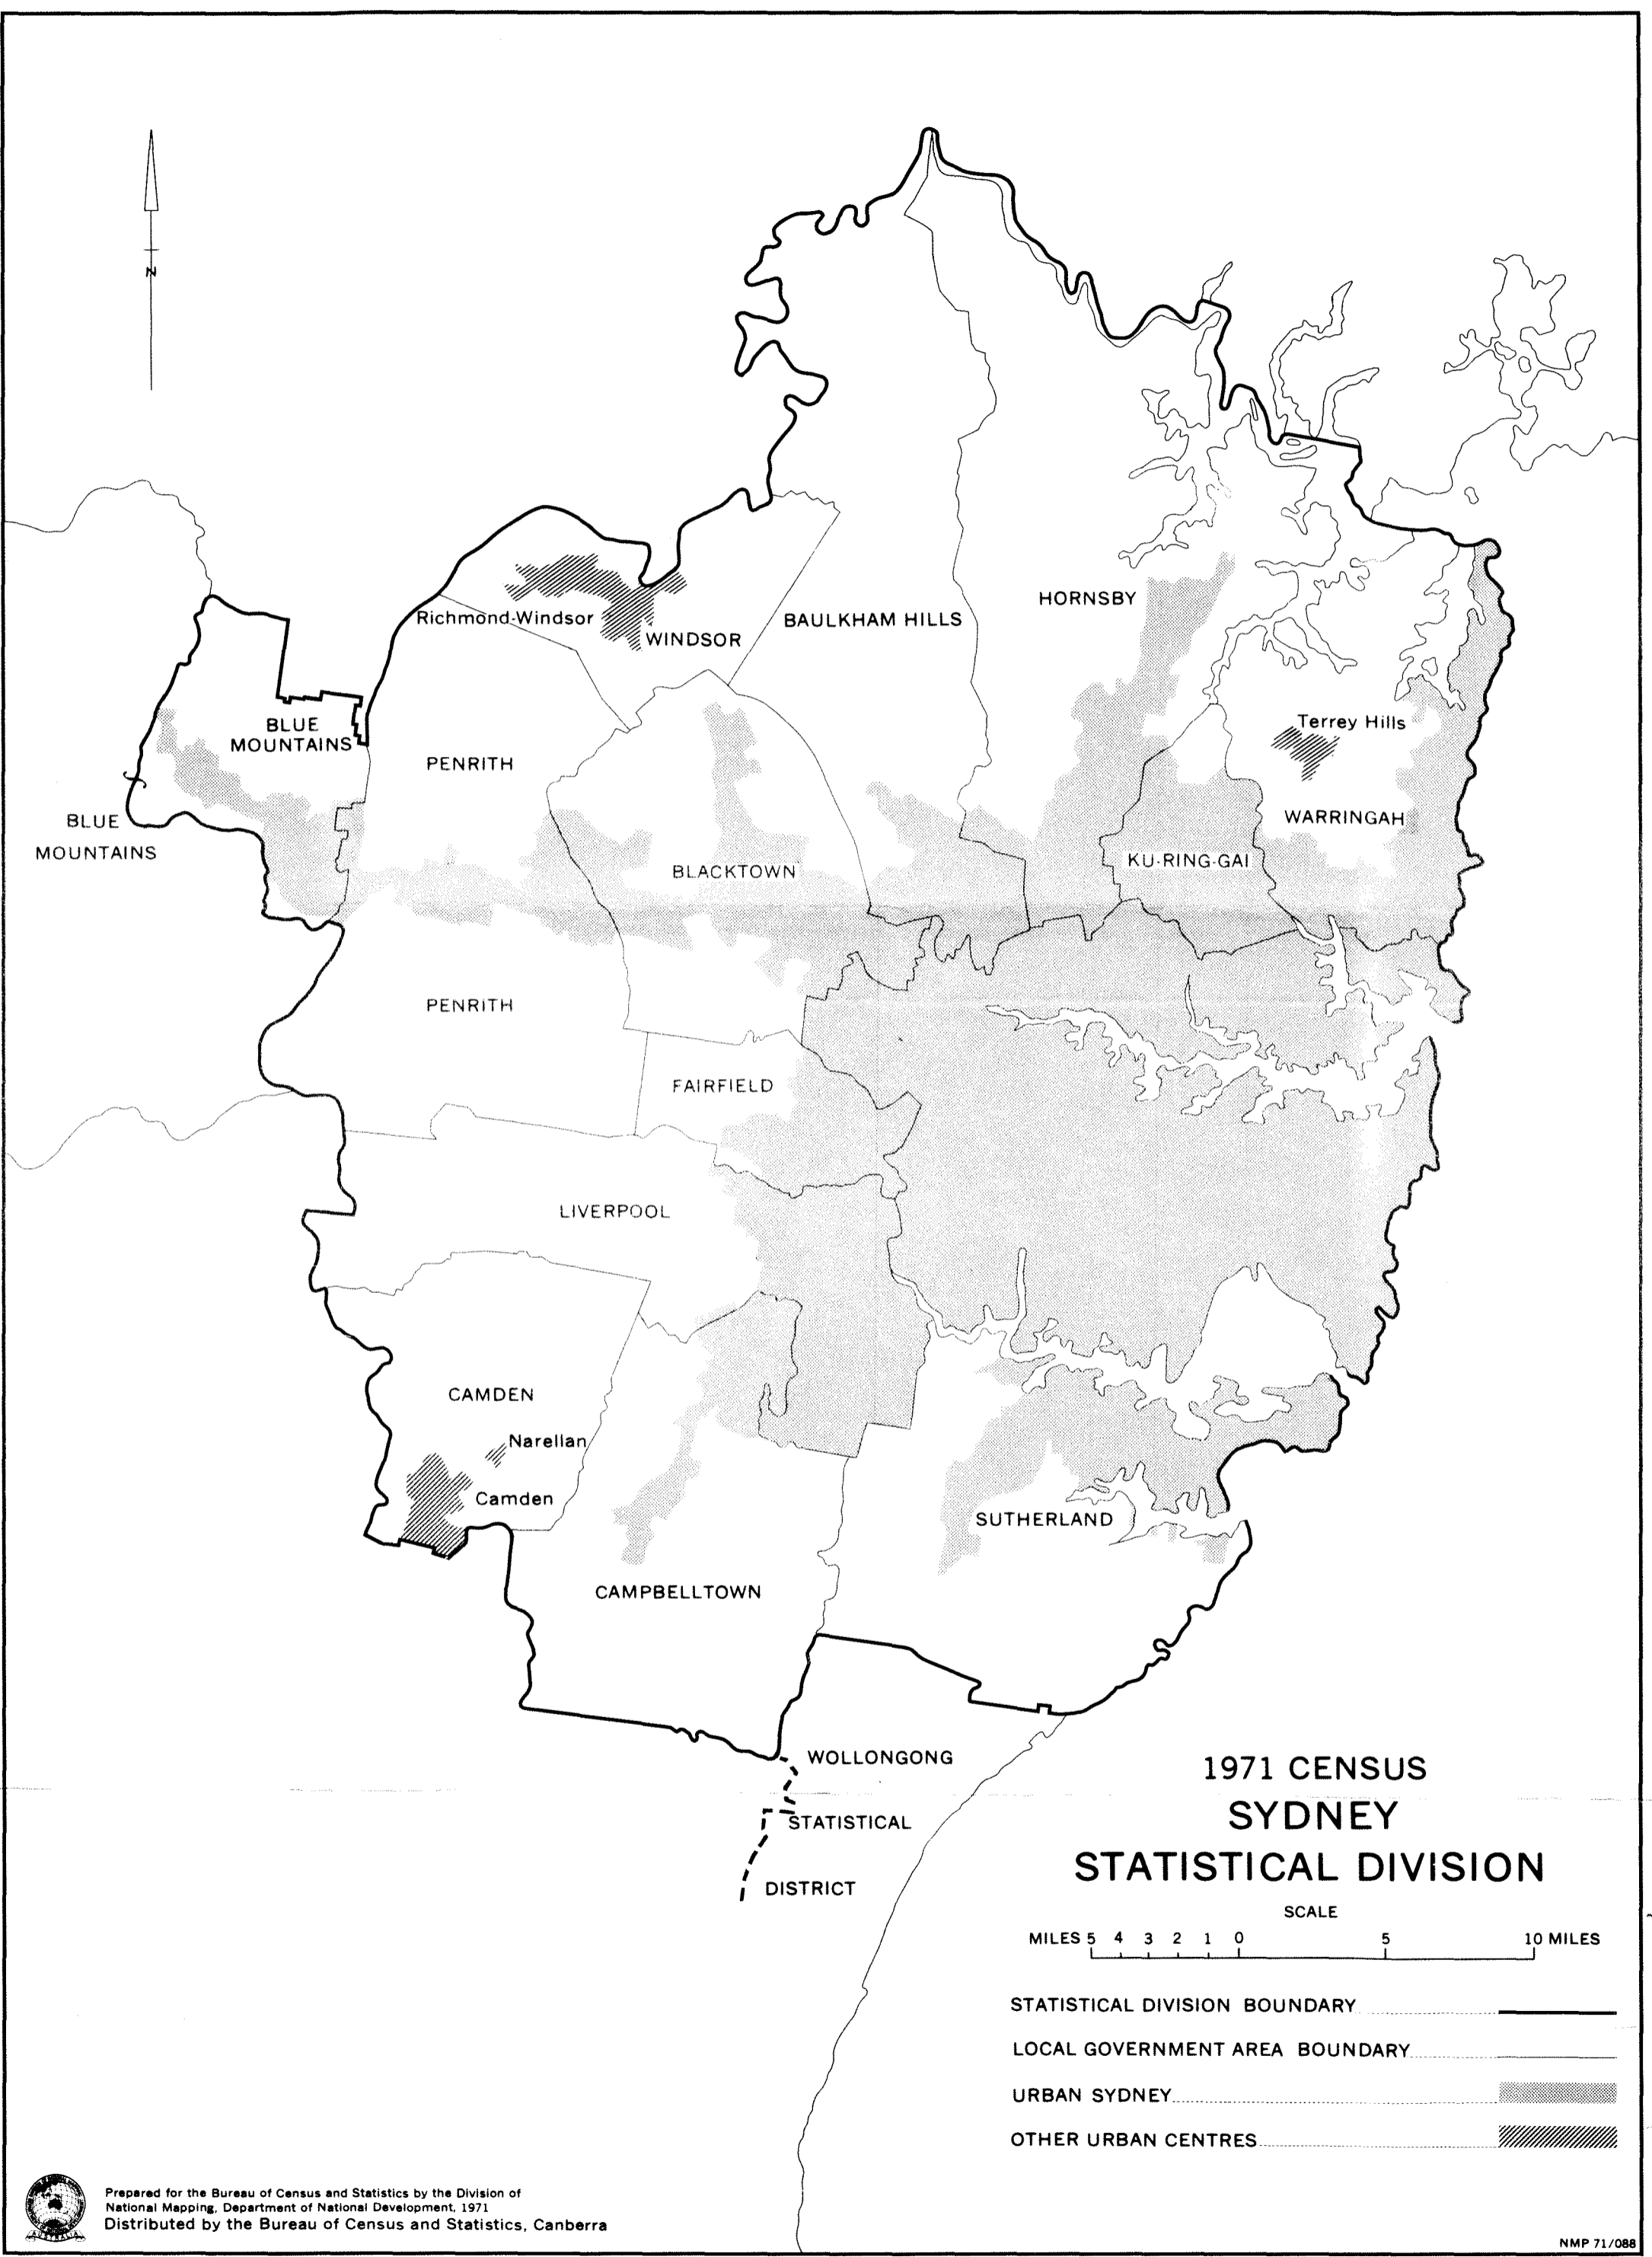

6. (a) For State capital cities, nomenclature for the area delimited by

- (i) the urban, and
- (ii) the outer boundary

shall be (using Melbourne as the example) -

- (i) Urban Melbourne, and
- (ii) Melbourne Statistical Division;

- (b) In other cases where the dual boundary concept is employed the nomenclature shall be (using Newcastle as the example) -
 - (i) Urban Newcastle, and
 - (ii) Newcastle Statistical District;
- (c) In cases where only a single boundary is delineated, the nomenclature shall be (using Cairns as the example) Urban Cairns;
- (d) Where an urban centre is formed by the coalescence of two or more named localities, the urban centre shall be assigned a name agreed upon after consultation with the Deputy Commonwealth Statistician of the State concerned:

This statement contains preliminary results of the 1971 Census of Population and Housing. The figures have been compiled during the taking of the Census by field personnel and are subject to amendment.

At the 1966 Census, in conformity with Section 127 of the Constitution, Aborigines were excluded from the published population. In 1967 the Constitution was altered to remove this provision, and the 1971 Census therefore includes Aborigines. In order to provide comparability between the two censuses the 1966 populations in this statement have been amended to include Aborigines and therefore differ from the 1966 populations previously published.

A list of 1971 Field Count Statements being issued showing dates of publication (where already issued) is contained in Appendix A to this statement.

EXPLANATORY NOTES

Urban centres and other bounded localities: A detailed description of the concepts and methods used in 1971 in defining urban centres is contained in Appendix D. These methods were similar to those used at the 1966 Census, the main changes being:

1. The elimination of the "indentation" provision. At the 1966 Census an indented area was included within the urban centre if the distance across the "neck" was less than one mile.
2. A re-interpretation of the "enclosure" rule. At the 1966 Census land was included within the urban centre if it was completely surrounded by the urban centre itself (or in part by the sea or a wide unbridged river). In 1971, if one part of this surround is the sea or a wide unbridged river, this rule is not applied.

At the 1971 Census these concepts were used to determine urban boundaries for the following centres or parts of centres in Victoria: Melbourne, Geelong, Ballarat, Bendigo, Albury-Wodonga.

Around other urban centres and non-urban localities, boundaries were delineated, where possible, where the population was expected to reach at least 200 by 1971. For this purpose, the most recent available aerial photography was used in order to identify as closely as possible the periphery of the built up area. Those centres with a population of 200 or more persons are included in the tables in this bulletin.

Notes on the composition of certain of the urban centres are given in Appendix C to this statement.

1966 Census population: For comparative purposes the population of statistical divisions, local government areas and urban and rural centres at the 1966 Census is shown.

Where the boundaries of local government areas have been changed (see Appendix B) an estimate has been given of the 1966 population in the 1971 area.

For those urban centres where the density criteria for determining urban boundaries have been used, the 1966 population shown is that resulting from the application of these same criteria at the time of the 1966 Census.

For most of the bounded towns and for some urban components of local government areas it has not been possible to make satisfactory estimates of 1966 population. These cases are shown in the tables as "N.A.".

Major urban population: This term has been applied to population enumerated in urban centres with a total population of 100,000 or more and supersedes the use of "metropolitan" at previous Censuses. In Victoria it represents the total urban population of Melbourne and Geelong. The urban population of each of these is shown in Tables 2 and 3.

Abbreviations: The following abbreviations have been used in the tables and appendixes.

U - urban, R - rural, B - Borough, C - City,

M - Municipality, S - Shire, T - Town,

N.A. - not available.

A minus sign when appearing after a figure indicates a decrease in population, e.g. 125-

APPENDIX B1. STATISTICAL DIVISIONS

Since early 1969, the Shire of Kilmore has been wholly incorporated within the North Central Statistical Division. Previously it had been in both the West Central Statistical Division and the North Central Statistical Division.

2. LOCAL GOVERNMENT AREAS

The 1966 figures in this statement have been adjusted to take account of local government area boundary changes effective between 1 July 1966 and 30 June 1971. The following table indicates the major changes and further information about other amendments to local government area boundaries may be obtained from the Commonwealth Statistician.

MAJOR LOCAL GOVERNMENT AREA CHANGES, 1 JULY 1966 - 30 JUNE 1971

Local Government Area	Nature of change	Net change in area	Estimated population	Date of change
AVON (S)	Lost to Sale (C)	947 acres	-65	31. 5.67
BAIRNSDALE (T)	Proclaimed a Town	6,720 acres	+7,960	31. 5.67
BAIRNSDALE (S)	Lost to Bairnsdale (T)	6,720 acres	-7,960	31. 5.67
HEYTESBURY (S)	Gained from Otway (S)	6,400 acres	+20	31. 5.69
NEWTOWN AND CHILWELL (C)	Renamed Newtown (C)	14.11.67
OTWAY (S)	Lost to Heytesbury (S)	6,400 acres	-20	31. 5.69
OXLEY (S)	Lost to Wangaratta (C)	147 acres	-44	1. 6.68
PORTLAND (T)	Gained from Portland (S)	2,450 acres	+325	31. 5.68
PORTLAND (S)	Lost to Portland (T)	2,450 acres	-325	31. 5.68
SALE (C)	Gained from Avon (S)	947 acres	+65	31. 5.67
WANGARATTA (S)	Lost to Wangaratta (C)	326 acres	-43	1. 6.68
WANGARATTA (C)	Gained from Oxley (S) and Wangaratta (S)	473 acres	+87	1. 6.68

C-1
APPENDIX C

NOTES ON CERTAIN URBAN CENTRES

In those instances where urban centres extend across State boundaries, the tables in this statement only include that part which is situated within Victoria. The total populations of each of these urban centres are shown in the following list.

The composition of urban centres which have absorbed rural localities or merged with other urban centres is also shown below.

URBAN CENTRE

Albury-Wodonga	:	Includes Bandiana. Total population of Albury-Wodonga (U) 1966, 32,032; 1971, 37,916
Bacchus Marsh	:	Includes Darley
Ballarat	:	Includes Alfredton, Mt. Clear, Mt. Pleasant, Sebastopol, Nerrina and Wendouree
Barham-Koondrook	:	Total population of Barham-Koondrook (U) 1966, 1,743; 1971, 1,724
Bendigo	:	Includes Strathdale, Spring Gully, Diamond Hill, Kangaroo Flat and Kennington
Berwick	:	Includes Beaconsfield
Castlemaine	:	Includes Chewton and Campbell's Creek
Colac	:	Includes Elliminyt
Corowa-Wahgunyah	:	Includes Corowa South. Total population of Corowa-Wahgunyah (U) 1966, 2,709; 1971, 3,308
Cowes	:	Includes Ventnor
Crib Point	:	Includes Bittern
Daylesford	:	Includes Hepburn Springs
Echuca-Moama	:	Total population of Echuca-Moama (U) 1966, 8,011; 1971, 8,636
Hastings	:	Includes Old Tyabb
Lakes Entrance	:	Includes Kalimna and Cunninghame
Moe-Yallourn	:	Includes Newborough, Hernes Oak and Yallourn North
Mt. Beauty	:	Includes Tawonga South
Ocean Grove-Barwon Heads	:	Includes Collendina
Queenscliff	:	Includes Point Lonsdale
Yarrawonga - Mulwala	:	Total population of Yarrawonga-Mulwala (U) 1966, 3,990; 1971, 3,977

2. The following urban centres were non-urban at the 1966 Census:

Churchill

Corowa-Wahgunyah (part)

Craigieburn

Cranbourne

Emerald

Hampton Park

Leopold

Melton

3. The rural localities of Avoca, Hopetoun, Koo-Wee-Rup, Sea Lake, Tallangatta and Wycheproof were urban for the 1966 Census but failed to meet urban criteria for the 1971 Census.

4. Urban centres in 1966 whose names do not appear in this bulletin are Dromana-Sorrento and Mornington-Balcombe, which have been absorbed by Urban Melbourne.

5. As a result of the changes in urban-rural classification in 2, 3, and 4 above, 1966 figures for individual areas may not add to the urban and rural totals shown.

APPENDIX DCRITERIA FOR THE DELIMITATION OF URBAN BOUNDARIES

The criteria used for delimiting urban centres, as determined by the Thirty-First Conference of Statisticians, October 1969, were:

1. At each Census of Population and Housing a boundary shall be defined in accordance with these Resolutions for each population cluster of 1,000 or more population (and, for known holiday resorts of less population, if they contain 250 or more dwellings of which at least 100 are occupied). These clusters shall be named "urban centres" and the population and dwellings enumerated in them shall be classified as urban for statistical purposes.
2. Around each urban centre with a population of at least 100,000, a further boundary shall be defined, after consultation with planners, to contain the anticipated development of the urban centre and associated smaller urban centres for a period of at least twenty years. Such a boundary should delimit an area which is now, or is expected to be, socially and economically oriented towards the urban centre. It shall consist of complete Local Government Areas if possible. This fixed boundary (as distinct from the urban boundary which is moving) will delimit an area which, for general statistical purposes, is free from the practical problems imposed by the moving boundary, but which nevertheless represents the city in a wider sense.
3. In delimiting urban centres with 25,000 or more population:
 - (a) All contiguous Census Collector's Districts which have a population density of 500 or more persons per square mile shall be included. Consequently, State, Statistical Division, Local Government Area and other administrative boundaries shall be disregarded;
 - (b) A Collector's District which is known to contain a high proportion of holiday homes shall be classified as urban if the dwelling density is 125 dwellings per square mile or greater;
 - (c) A Collector's District consisting mainly of land used for factories, airports, small sports areas, cemeteries, hostels, institutions, prisons, military camps or certain research stations shall be classified as urban if contiguous with Collectors's Districts which are themselves urban;
 - (d) Any Collector's District which consists mainly of land used for large sporting areas, large parks, explosives handling and munitions areas, or holding yards associated with meatworks and abattoirs shall be classified as urban only if it is bordered on three sides by Collector's Districts which are themselves urban;
 - (e) Any area which is completely surrounded by Collector's Districts which are urban must itself be classified as urban;

- (f) Where an urban centre of 25,000 or more population is separated from another urban centre by a gap in actual development of less than two miles (by the shortest rail or road distance), the gap shall be bridged by classifying a connecting Collector's District or Districts as urban, and therefore treating the urban centres as one; if the gap is two or more miles (and whether or not it is comprised mainly of reserved land or a natural barrier) the urban centres shall remain separate;
- (g) Any area included in an urban centre in 1971 or thereafter under the provisions of this Resolution shall continue to be so included unless the population of the urban centre falls below 25,000, in which case this Resolution will cease to apply;
- (h) Large peripheral Collector's Districts in growth areas shall be fragmented; and so far as the availability of visible boundary features allows, the fragments so created shall be as near square-shaped as possible and of such a size that they will contain a collector's workload when fully developed. For the purposes of delimiting urban centres such fragments shall be regarded as Collector's Districts.

4. In delimiting urban centres with less than 25,000 population:

- (a) The urban centres shall be delimited subjectively (by the inspection of aerial photographs, by field inspection and/or by consideration of any other information that is available);
- (b) All continuous urban growth is to be included (which, in small urban centres, would not necessarily occur if the density criterion were applied), together with any close but non-contiguous development which could be clearly regarded as part of the centre. However, cognisance shall be taken of Resolution 3, where appropriate, particularly in urban centres which are approaching a population of 25,000.

5. In selecting the boundaries for the splitting of Collector's Districts, cognisance shall be taken, where appropriate, of the boundaries of land-use zones.

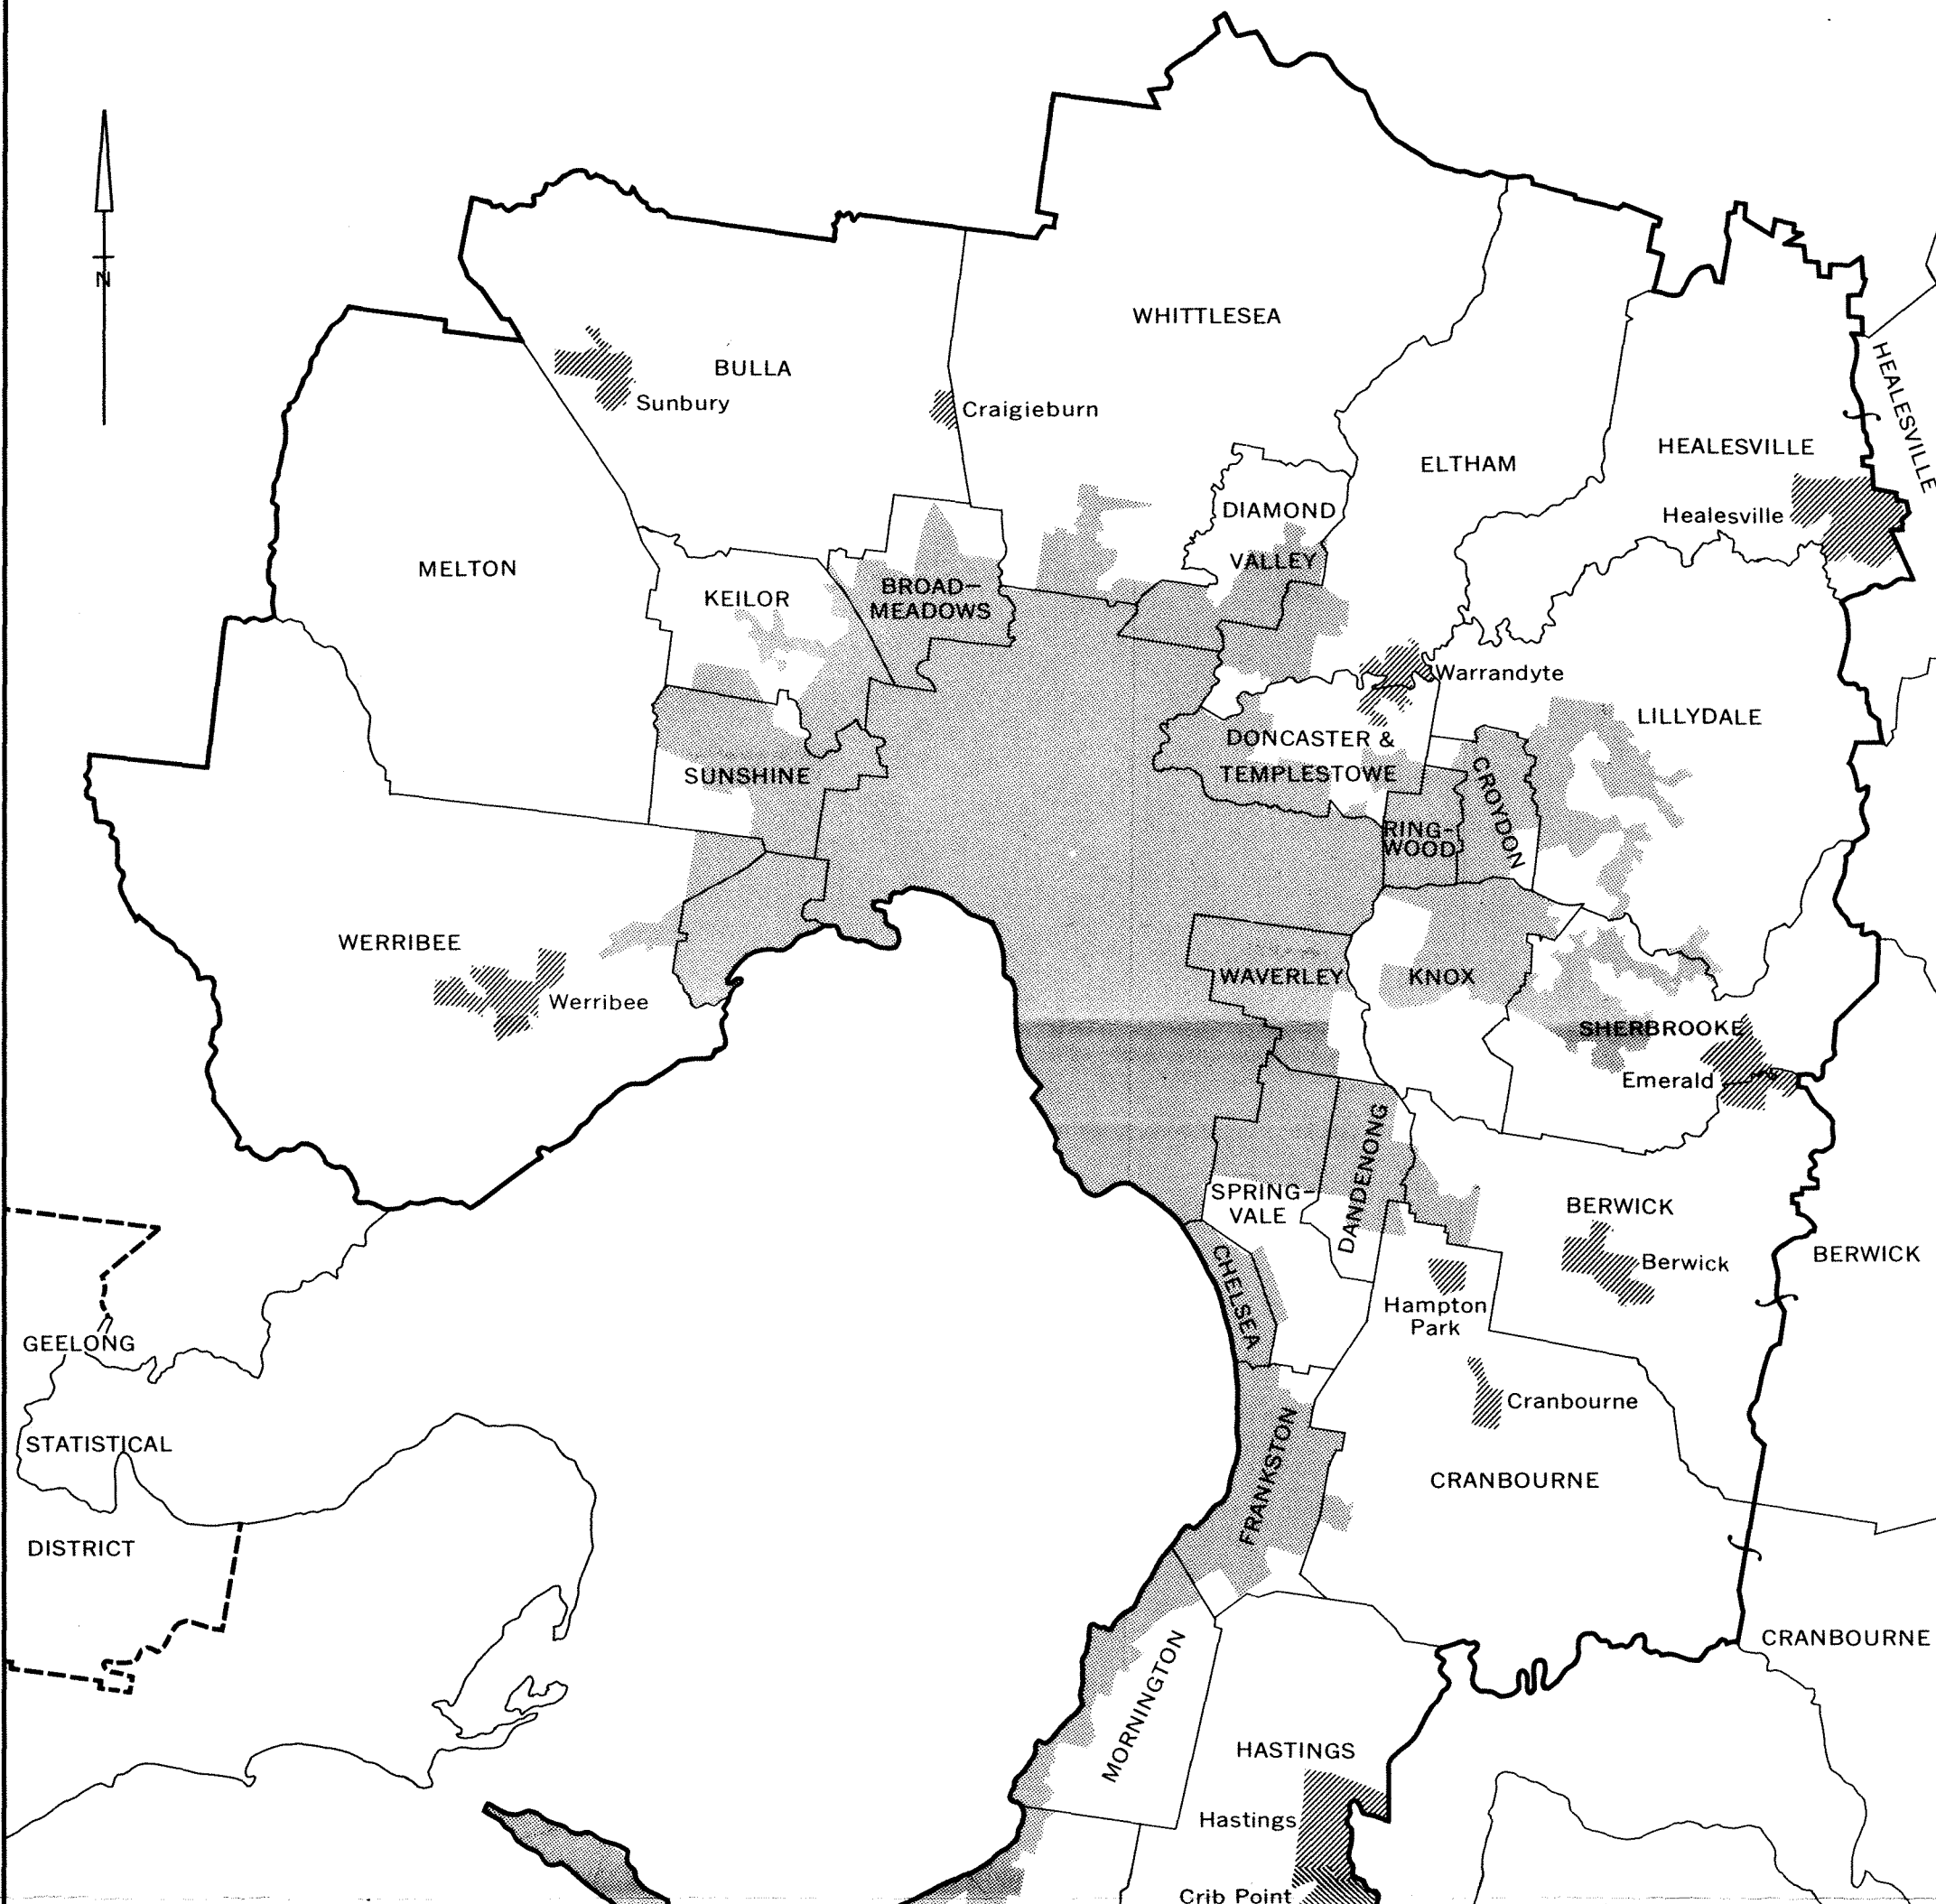

6. (a) For State capital cities, nomenclature for the area delimited by

- (i) the urban, and
- (ii) the outer boundary

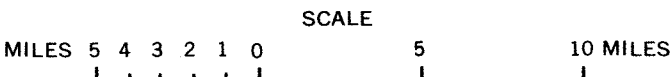

shall be (using Melbourne as the example) -

- (i) Urban Melbourne, and
- (ii) Melbourne Statistical Division;

- (b) In other cases where the dual boundary concept is employed the nomenclature shall be (using Newcastle as the example) -
 - (i) Urban Newcastle, and
 - (ii) Newcastle Statistical District;
- (c) In cases where only a single boundary is delineated, the nomenclature shall be (using Cairns as the example) Urban Cairns;
- (d) Where an urban centre is formed by the coalescence of two or more named localities, the urban centre shall be assigned a name agreed upon after consultation with the Deputy Commonwealth Statistician of the State concerned:

	APPENDIX C Notes on certain urban centres	
	APPENDIX D Delimitation of urban centres	
	APPENDIX E Outline map: Brisbane Statistical Division.	

This statement contains preliminary results of the 1971 Census of Population and Housing. The figures have been compiled during the taking of the Census by field personnel and are subject to amendment.

At the 1966 Census, in conformity with Section 127 of the Constitution, Aborigines were excluded from the published population. In 1967 the Constitution was altered to remove this provision, and the 1971 Census therefore includes Aborigines. In order to provide comparability between the two censuses the 1966 populations in this statement have been amended to include Aborigines and therefore differ from the 1966 populations previously published.

A list of 1971 Field Count Statements being issued showing dates of publication (where already issued) is contained in Appendix A to this statement.

EXPLANATORY NOTES

Urban centres and other bounded localities: A detailed description of the concepts and methods used in 1971 in defining urban centres is contained in Appendix D. These methods were similar to those used at the 1966 Census, the main changes being:

1. The elimination of the "indentation" provision. At the 1966 Census an indented area was included within the urban centre if the distance across the "neck" was less than one mile.
2. A re-interpretation of the "enclosure" rule. At the 1966 Census land was included within the urban centre if it was completely surrounded by the urban centre itself (or in part by the sea or a wide unbridged river). In 1971, if one part of this surround is the sea or a wide unbridged river, this rule is not applied.

At the 1971 Census the concepts were used to determine urban boundaries for the following centres or parts of centres in Queensland: Brisbane, Gold Coast, Townsville, Toowoomba, Rockhampton, Cairns, Mackay, Bundaberg.

Around other urban centres and non-urban localities, boundaries were delineated, where possible, where the population was expected to reach at least 200 by 1971. For this purpose, the most recent available aerial photography was used in order to identify as closely as possible the periphery of the built up area. Those centres with a population of 200 or more persons are included in the tables in this bulletin.

Notes on the composition of certain of the urban centres are given in Appendix C to this statement.

1966 Census population: For comparative purposes the population of statistical divisions, local government areas and urban and rural centres at the 1966 Census is shown.

Where the boundaries of local government areas have been changed (see Appendix B) an estimate has been given of the 1966 population in the 1971 area.

For those urban centres where the density criteria for determining urban boundaries have been used, the 1966 population shown is that resulting from the application of these same criteria at the time of the 1966 Census.

For most of the bounded towns and for some urban components of local government areas it has not been possible to make satisfactory estimates of 1966 population. These cases are shown in the tables as "N.A."

Major urban population: This term has been applied to population enumerated in urban centres with a total population of 100,000 or more and supersedes the use of "metropolitan" at previous Censuses. In Queensland this represents the population of urban Brisbane. The urban population of Brisbane and of other smaller centres is shown in Tables 2 and 3.

Abbreviations: The following abbreviations have been used in the tables and appendixes.

U - urban, R - rural, C - City, M - Municipality,

S - Shire, T - Town, N.A. - not available

A minus sign, when appearing after a figure indicates a decrease in population, e.g. 125 -

APPENDIX BLOCAL GOVERNMENT AREAS

The City of Brisbane is divided into fifty-six statistical areas which are not, however, separately administered for local government purposes. For the purposes of this publication, these statistical areas are treated as if they were local government areas.

In Table 3, these statistical areas are grouped into a convenient number of major areas based upon their location.

Since the 1966 Census two new statistical areas, Wynnum West and Fruitgrove, have been created. Wynnum West was part of the Eastern Statistical Area while Fruitgrove was part of the South Eastern Statistical Area.

The 1966 figures in this statement have been adjusted to take account of local government area boundary changes effective between 1 July 1966 and 30 June 1971. The following table indicates the major changes and further information about other amendments to local government area boundaries may be obtained from the Commonwealth Statistician.

MAJOR LOCAL GOVERNMENT AREA CHANGES, 1 JULY 1966 - 30 JUNE 1971

Local Government Area	Nature of change	Net change in area	Estimated population	Date of change
CALLIOPE (S)	Lost to Gladstone (T)	3,840 acres	-35	1.7.70
DUARINGA (S) *	Gained from Emerald (S)	252,800 acres	+40	29.8.70
EMERALD (S) *	Lost to Duaringa (S)	252,800 acres	-40	29.8.70
GLADSTONE (T)	Gained from Calliope (S)	3,840 acres	+35	1.7.70
GOOBURRUM (S) *	Gained from Miriam Vale (S)	13 sq mls.	+40	1.7.66
MIRIAM VALE (S)*	Lost to Gooburrum (S)	13 sq mls.	-40	1.7.66

* Statistical Division change.

APPENDIX CNOTES ON CERTAIN URBAN CENTRES

I. As Urban Gold Coast extends into New South Wales, the tables in this statement only include that part which is situated within Queensland. The total population of this urban centre is shown in the following list. There is also one non-urban locality, Mungindi, which crosses the State border and its total population in 1966 was 978 and in 1971, 848.

The composition of urban centres which have absorbed rural localities or merged with other urban centres is also shown below.

URBAN CENTRE

Bongaree	: Includes Bellara
Bowen	: Includes Queens Beach
Cairns	: Includes Freshwater, Machans Beach, Redlynch and Stratford
Caloundra	: Includes Currimundi
Collinsville	: Includes Scottsville
Gold Coast	: Includes Anglers Paradise, Hollywell and Paradise Point. Total population of Gold Coast (U) 1966, 53,188 ; 1971, 74,121.
Hervey Bay	: Includes Point Vernon, Pialba, Scarness, Torquay and Urangan
Innisfail	: Includes Goondi and Hudson
Mackay	: Includes Andergrove, Glenalla, Racecourse and Slade Point
Maryborough	: Includes Tinara
Mount Morgan	: Includes North Calliungal
Tewantin-Noosa	: Includes Noosaville and Sunshine Beach
Toowoomba	: Includes Drayton

II The following urban centres were non-urban at the 1966 Census:

Albany Creek	Moranbah
Bargara	Moura
Beachmere	Ravenshoe
Blackwater	Tin Can Bay
Buderim	Woorim
Coolum Beach	

III The rural locality of Tara was urban for the 1966 Census but failed to meet urban criteria for the 1971 Census.

IV Urban Centres in 1966 whose names do not appear in this bulletin are:

Birkdale-Wellington Point, Cleveland, Lawnton-Petrie and Woodridge, which have been absorbed by Urban Brisbane, and Slade Point, which has been absorbed by Urban Mackay.

V As a result of the changes in urban-rural classification in II, III and IV above, 1966 figures for individual areas may not add to the urban and rural totals shown.

APPENDIX DCRITERIA FOR THE DELIMITATION OF URBAN BOUNDARIES

The criteria used for delimiting urban centres, as determined by the Thirty-First Conference of Statisticians, October 1969, were:

1. At each Census of Population and Housing a boundary shall be defined in accordance with these Resolutions for each population cluster of 1,000 or more population (and, for known holiday resorts of less population, if they contain 250 or more dwellings of which at least 100 are occupied). These clusters shall be named "urban centres" and the population and dwellings enumerated in them shall be classified as urban for statistical purposes.
2. Around each urban centre with a population of at least 100,000, a further boundary shall be defined, after consultation with planners, to contain the anticipated development of the urban centre and associated smaller urban centres for a period of at least twenty years. Such a boundary should delimit an area which is now, or is expected to be, socially and economically oriented towards the urban centre. It shall consist of complete Local Government Areas if possible. This fixed boundary (as distinct from the urban boundary which is moving) will delimit an area which, for general statistical purposes, is free from the practical problems imposed by the moving boundary, but which nevertheless represents the city in a wider sense.
3. In delimiting urban centres with 25,000 or more population:
 - (a) All contiguous Census Collector's Districts which have a population density of 500 or more persons per square mile shall be included. Consequently, State, Statistical Division, Local Government Area and other administrative boundaries shall be disregarded;
 - (b) A Collector's District which is known to contain a high proportion of holiday homes shall be classified as urban if the dwelling density is 125 dwellings per square mile or greater;
 - (c) A Collector's District consisting mainly of land used for factories, airports, small sports areas, cemeteries, hostels, institutions, prisons, military camps or certain research stations shall be classified as urban if contiguous with Collectors's Districts which are themselves urban;
 - (d) Any Collector's District which consists mainly of land used for large sporting areas, large parks, explosives handling and munitions areas, or holding yards associated with meatworks and abattoirs shall be classified as urban only if it is bordered on three sides by Collector's Districts which are themselves urban;
 - (e) Any area which is completely surrounded by Collector's Districts which are urban must itself be classified as urban;

- (f) Where an urban centre of 25,000 or more population is separated from another urban centre by a gap in actual development of less than two miles (by the shortest rail or road distance), the gap shall be bridged by classifying a connecting Collector's District or Districts as urban, and therefore treating the urban centres as one; if the gap is two or more miles (and whether or not it is comprised mainly of reserved land or a natural barrier) the urban centres shall remain separate;
- (g) Any area included in an urban centre in 1971 or thereafter under the provisions of this Resolution shall continue to be so included unless the population of the urban centre falls below 25,000, in which case this Resolution will cease to apply;
- (h) Large peripheral Collector's Districts in growth areas shall be fragmented; and so far as the availability of visible boundary features allows, the fragments so created shall be as near square-shaped as possible and of such a size that they will contain a collector's workload when fully developed. For the purposes of delimiting urban centres such fragments shall be regarded as Collector's Districts.

4. In delimiting urban centres with less than 25,000 population:

- (a) The urban centres shall be delimited subjectively (by the inspection of aerial photographs, by field inspection and/or by consideration of any other information that is available);
- (b) All continuous urban growth is to be included (which, in small urban centres, would not necessarily occur if the density criterion were applied), together with any close but non-contiguous development which could be clearly regarded as part of the centre. However, cognisance shall be taken of Resolution 3, where appropriate, particularly in urban centres which are approaching a population of 25,000.

5. In selecting the boundaries for the splitting of Collector's Districts, cognisance shall be taken, where appropriate, of the boundaries of land-use zones.

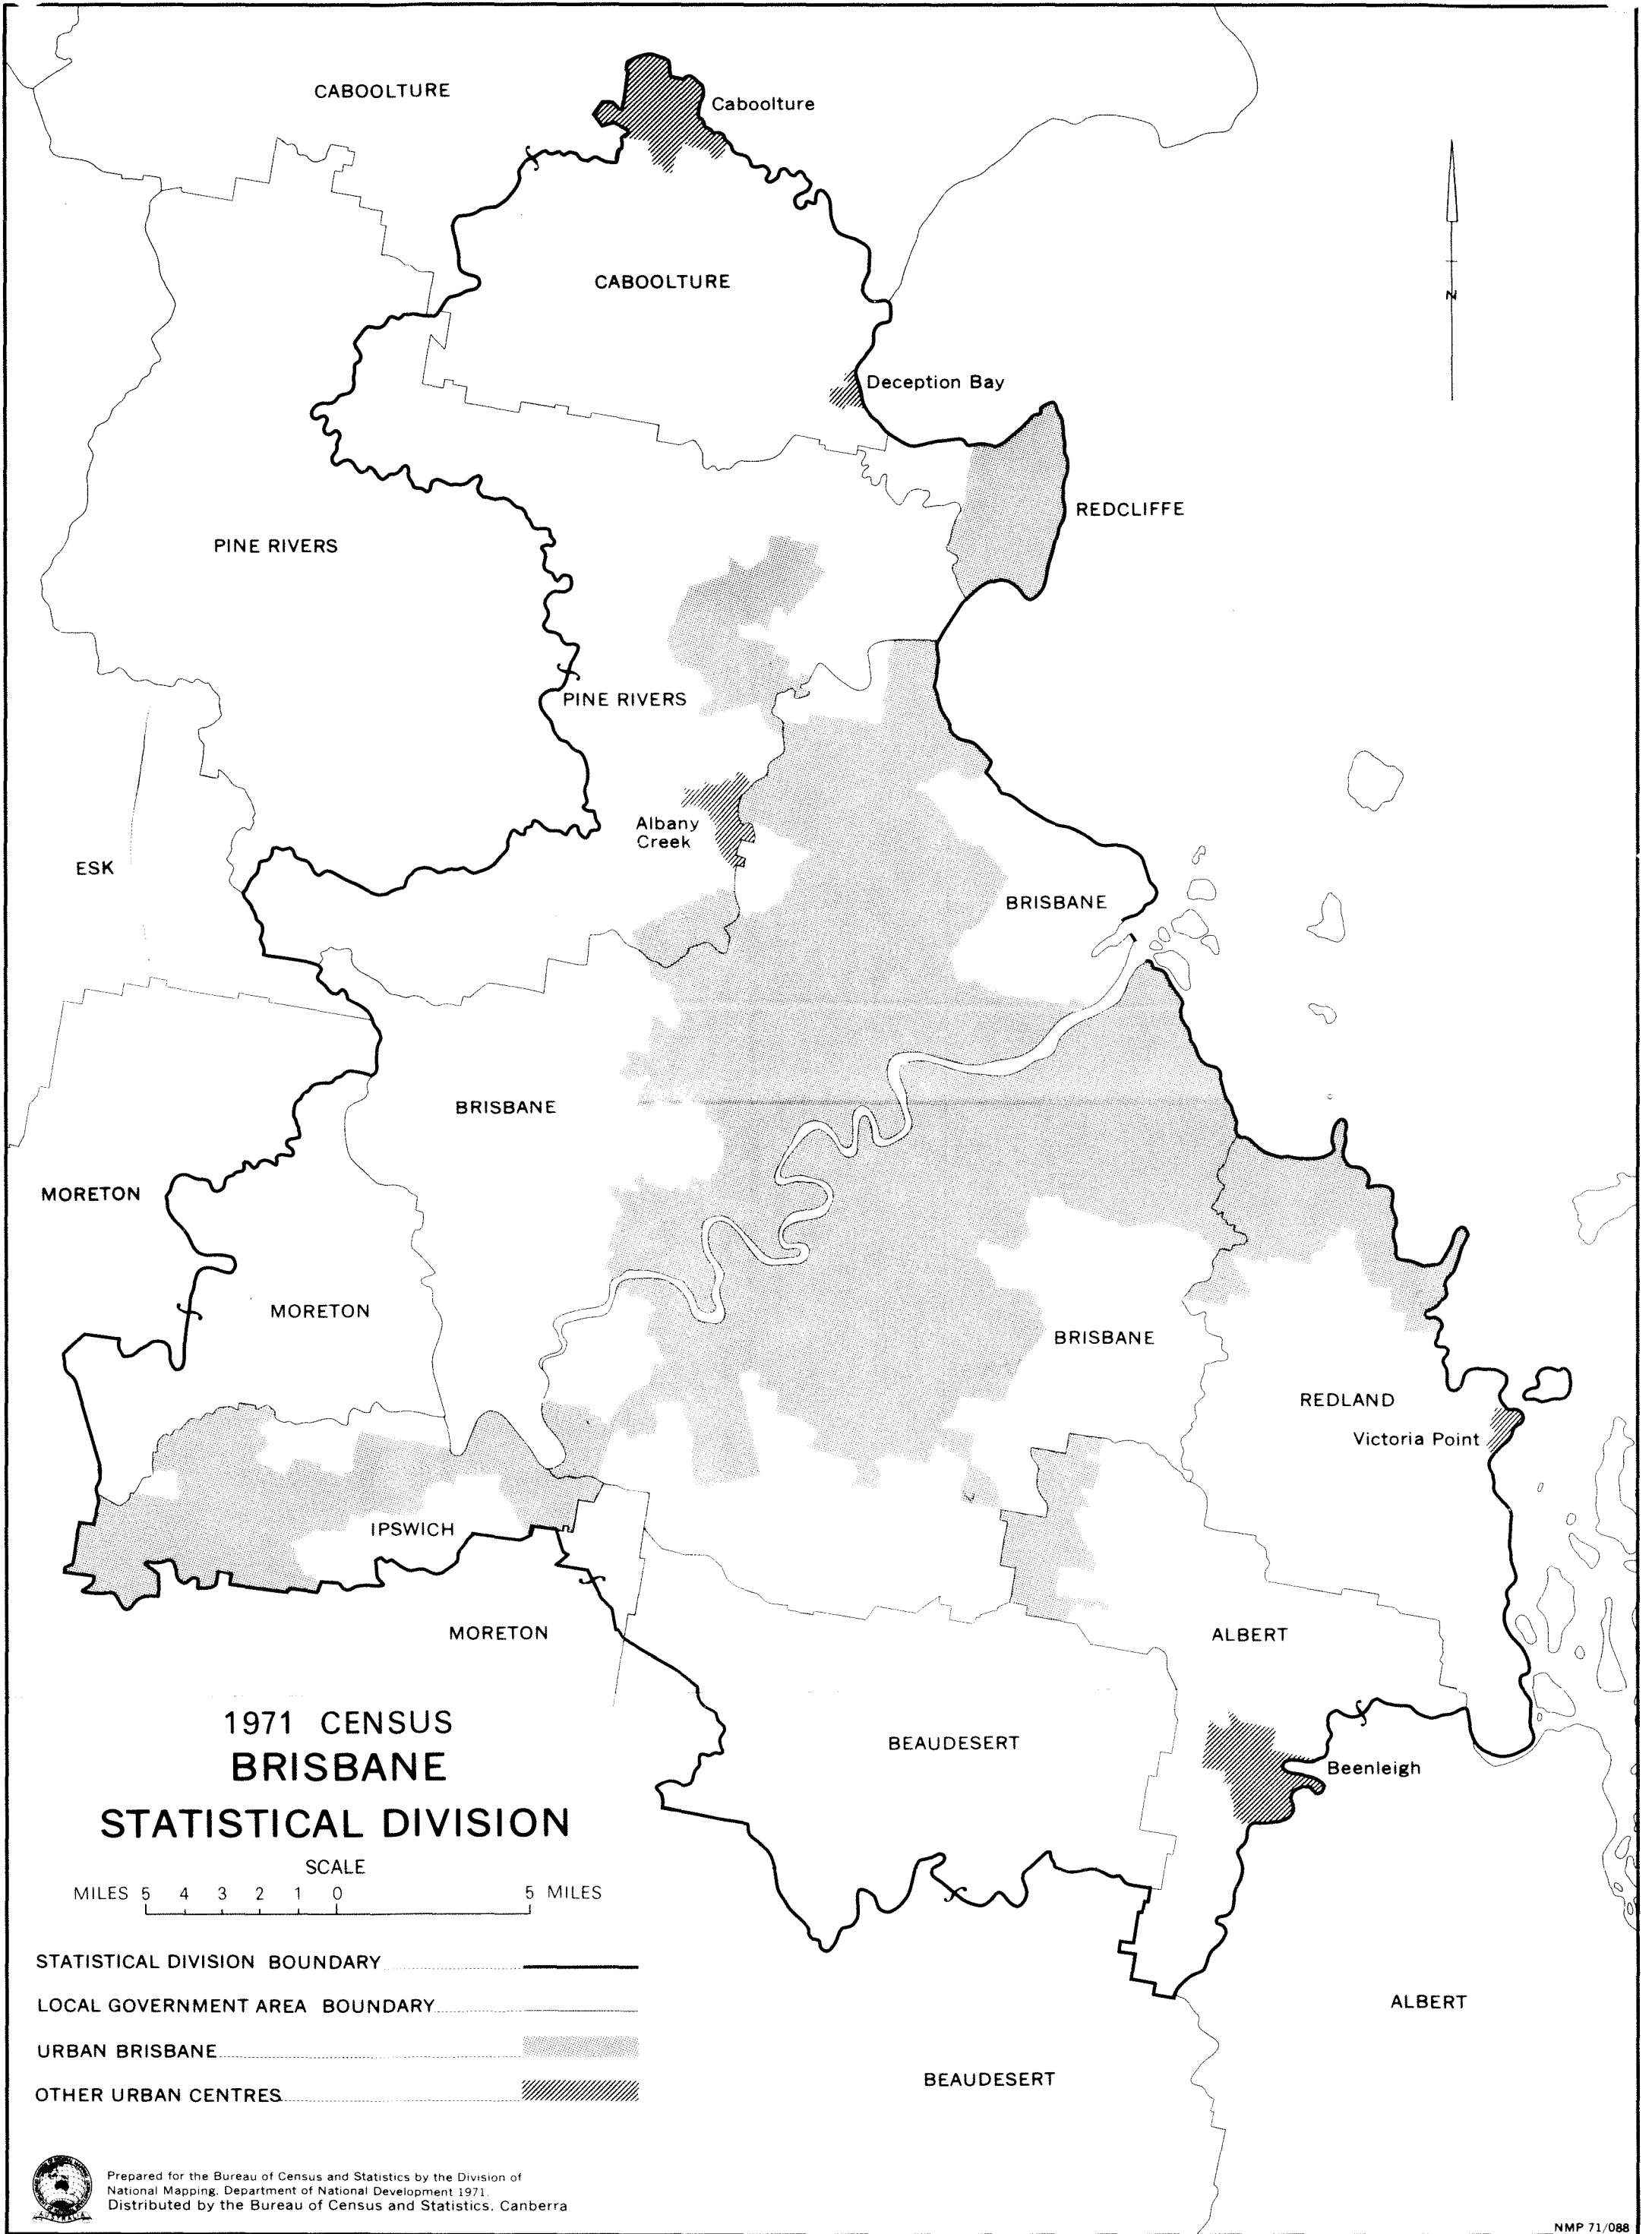

6. (a) For State capital cities, nomenclature for the area delimited by

- (i) the urban, and
- (ii) the outer boundary

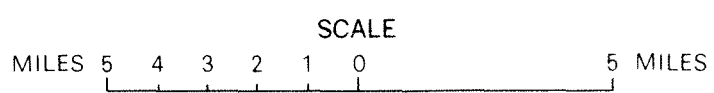

shall be (using Melbourne as the example) -

- (i) Urban Melbourne, and
- (ii) Melbourne Statistical Division;

- (b) In other cases where the dual boundary concept is employed the nomenclature shall be (using Newcastle as the example) -
 - (i) Urban Newcastle, and
 - (ii) Newcastle Statistical District;
- (c) In cases where only a single boundary is delineated, the nomenclature shall be (using Cairns as the example) Urban Cairns;
- (d) Where an urban centre is formed by the coalescence of two or more named localities, the urban centre shall be assigned a name agreed upon after consultation with the Deputy Commonwealth Statistician of the State concerned;

This statement contains preliminary results of the 1971 Census of Population and Housing. The figures have been compiled during the taking of the Census by field personnel and are subject to amendment.

At the 1966 Census, in conformity with Section 127 of the Constitution, Aborigines were excluded from the published population. In 1967 the Constitution was altered to remove this provision, and the 1971 Census therefore includes Aborigines. In order to provide comparability between the two censuses the 1966 populations in this statement have been amended to include Aborigines and therefore differ from the 1966 populations previously published.

A list of 1971 Field Count Statements being issued showing dates of publication (where already issued) is contained in Appendix A to this statement.

EXPLANATORY NOTES

Urban centres and other bounded localities: A detailed description of the concepts and methods used in 1971 in defining urban centres is contained in Appendix D. These methods were similar to those used at the 1966 Census, the main changes being:

1. The elimination of the "indentation" provision. At the 1966 Census an indented area was included within the urban centre if the distance across the "neck" was less than one mile.
2. A re-interpretation of the "enclosure" rule. At the 1966 Census, land was included within the urban centre if it was completely surrounded by the urban centre itself (or in part by the sea or a wide unbridged river). In 1971, if one part of this surround is the sea or a wide unbridged river, this rule is not applied.

At the 1971 Census these concepts were used to determine the urban boundaries of Adelaide and Whyalla.

Around other urban centres and non-urban localities, boundaries were delineated, where possible, where the population was expected to reach at least 200 by 1971. For this purpose, the most recent available aerial photography was used in order to identify as closely as possible the periphery of the built up area. Those centres with a population of 200 or more persons are included in the tables in this bulletin.

Notes on the composition of certain of the urban centres are given in Appendix C to this statement.

1966 Census population: For comparative purposes the population of statistical divisions, local government areas and urban and rural centres at the 1966 Census is shown.

Where the boundaries of local government areas or statistical divisions have been changed (see Appendix B) an estimate has been given of the 1966 population in the 1971 area.

For those urban centres where the density criteria for determining urban boundaries have been used, the 1966 population shown is that resulting from the application of these same criteria at the time of the 1966 Census.

For most of the bounded towns and for some urban components of local government areas it has not been possible to make satisfactory estimates of 1966 population. These cases are shown in the tables as "N.A."

Major urban population: This term has been applied to population enumerated in urban centres with a total population of 100,000 or more and supersedes the use of "metropolitan" at previous Censuses. In South Australia, it represents the population of Urban Adelaide.

Abbreviations: The following abbreviations have been used in the tables and appendixes.

U - urban, R - rural, C - City, M - Municipality

D.C. - District Council, N.A. - not available.

A minus sign, when appearing after a figure, indicates a decrease in population, e.g. 125-.

APPENDIX AField Count Statements to be Issued

<u>Reference No.</u>	<u>F.C. No.</u>	<u>Title</u>	<u>Date of Issue</u>
2.71	No. 1	Population: States and Territories	25 October 1971
2.72	No. 2	Population: Principal Urban Centres	

APPENDIX CNOTES ON CERTAIN URBAN CENTRES

1. The composition of urban centres which have absorbed rural localities or merged with other urban centres is shown below:

URBAN CENTRE

Ceduna	: Includes Thevenard
Mannum	: Includes Cowirra
Moonta	: Includes Port Hughes and Port Moonta
Mount Barker	: Includes Littlehampton
Port Elliot	: Includes Ocean View
Victor Harbor	: Includes Encounter Bay and Harborough

2. The following urban centres were non-urban at the 1966 Census:

Coober Pedy

Quorn

Waikerie

3. The rural localities of Gladstone and Leigh Creek were classified as urban for the 1966 Census but failed to meet urban criteria for the 1971 Census.

4. The 1966 urban centre of Reynella - Port Noarlunga was absorbed by Urban Adelaide and therefore does not appear as a separate urban centre in this bulletin.

5. As a result of the changes in urban-rural classification in 2, 3 and 4 above, 1966 figures for individual areas may not add to the urban and rural totals shown.

APPENDIX B1. STATISTICAL DIVISIONS

Statistical Divisions in South Australia were redefined to represent closely allied and meaningful areas of production and community of interest. This new system was introduced during 1970 and has nine primary Statistical Divisions. These Statistical Divisions together with the new Statistical Subdivisions are described in detail in the publication "Divisional Statistics, 1970" which is available from the Deputy Commonwealth Statistician, Adelaide.

2. LOCAL GOVERNMENT AREAS

The 1966 figures in this statement have been adjusted to take account of local government area boundary changes effective between 1 July 1966 and 30 June 1971. In 1966 publications, the City of Whyalla incorrectly included 850 persons who, for this publication, are included in the unincorporated area of the Northern Statistical Division. The following table indicates the major changes and further information about other amendments to local government area boundaries may be obtained from the Commonwealth Statistician.

MAJOR LOCAL GOVERNMENT AREA CHANGES, 1 JULY 1966 - 30 JUNE 1971

Local Government Area	Nature of change	Net change in area	Estimated population	Date of change
BURRA(T) & BURRA BURRA (D.C.)	United to form Burra Burra (D.C.)	24.4.69
CENTRAL YORKE PENINSULA (D.C.)	Formerly Maitland (T) and Yorke Peninsula (D.C.)	1.4.69
CLARE(T) & CLARE (D.C.)	United to form Clare (D.C.)	9.1.69
ENFIELD (C)	Lost to Walkerville (T)	260 acres	-2,165	5.7.70
KANYAKA (D.C.)	Lost to Port Augusta (C)	200 acres	-325	28.3.68
MAITLAND(T) & YORKE PENINSULA (D.C.)	United to form Central Yorke Peninsula (D.C.)	1.4.69
PORT AUGUSTA (C)	Gained from Kanyaka (D.C.)	200 acres	+325	28.3.68
PORT ELLIOT (D.C.)	Name changed to Port Elliot & Goolwa (D.C.)	11.7.68
QUORN(T) & KANYAKA (D.C.)	United to form Kanyaka - Quorn (D.C.)	1.4.69
SADDLEWORTH (D.C.) & UPPER WAKEFIELD (D.C.)	United to form Saddleworth & Auburn (D.C.)	5.7.70
WALKERVILLE (T)	Gained from Enfield (C)	260 acres	+2,165	5.7.70

APPENDIX CNOTES ON CERTAIN URBAN CENTRES

1. The composition of urban centres which have absorbed rural localities or merged with other urban centres is shown below:

URBAN CENTRE

Ceduna	:	Includes Thevenard
Mannum	:	Includes Cowirra
Moonta	:	Includes Port Hughes and Port Moonta
Mount Barker	:	Includes Littlehampton
Port Elliot	:	Includes Ocean View
Victor Harbor	:	Includes Encounter Bay and Harborough

2. The following urban centres were non-urban at the 1966 Census:

Coober Pedy

Quorn

Waikerie

3. The rural localities of Gladstone and Leigh Creek were classified as urban for the 1966 Census but failed to meet urban criteria for the 1971 Census.

4. The 1966 urban centre of Reynella - Port Noarlunga was absorbed by Urban Adelaide and therefore does not appear as a separate urban centre in this bulletin.

5. As a result of the changes in urban-rural classification in 2, 3 and 4 above, 1966 figures for individual areas may not add to the urban and rural totals shown.

APPENDIX DCRITERIA FOR THE DELIMITATION OF URBAN BOUNDARIES

The criteria used for delimiting urban centres, as determined by the Thirty-First Conference of Statisticians, October 1969, were:

1. At each Census of Population and Housing a boundary shall be defined in accordance with these Resolutions for each population cluster of 1,000 or more population (and, for known holiday resorts of less population, if they contain 250 or more dwellings of which at least 100 are occupied). These clusters shall be named "urban centres" and the population and dwellings enumerated in them shall be classified as urban for statistical purposes.
2. Around each urban centre with a population of at least 100,000, a further boundary shall be defined, after consultation with planners, to contain the anticipated development of the urban centre and associated smaller urban centres for a period of at least twenty years. Such a boundary should delimit an area which is now, or is expected to be, socially and economically oriented towards the urban centre. It shall consist of complete Local Government Areas if possible. This fixed boundary (as distinct from the urban boundary which is moving) will delimit an area which, for general statistical purposes, is free from the practical problems imposed by the moving boundary, but which nevertheless represents the city in a wider sense.
3. In delimiting urban centres with 25,000 or more population:
 - (a) All contiguous Census Collector's Districts which have a population density of 500 or more persons per square mile shall be included. Consequently, State, Statistical Division, Local Government Area and other administrative boundaries shall be disregarded;
 - (b) A Collector's District which is known to contain a high proportion of holiday homes shall be classified as urban if the dwelling density is 125 dwellings per square mile or greater;
 - (c) A Collector's District consisting mainly of land used for factories, airports, small sports areas, cemeteries, hostels, institutions, prisons, military camps or certain research stations shall be classified as urban if contiguous with Collector's Districts which are themselves urban;
 - (d) Any Collector's District which consists mainly of land used for large sporting areas, large parks, explosives handling and munitions areas, or holding yards associated with meatworks and abattoirs shall be classified as urban only if it is bordered on three sides by Collector's Districts which are themselves urban;
 - (e) Any area which is completely surrounded by Collector's Districts which are urban must itself be classified as urban;

- (f) Where an urban centre of 25,000 or more population is separated from another urban centre by a gap in actual development of less than two miles (by the shortest rail or road distance), the gap shall be bridged by classifying a connecting Collector's District or Districts as urban, and therefore treating the urban centres as one; if the gap is two or more miles (and whether or not it is comprised mainly of reserved land or a natural barrier) the urban centres shall remain separate;
- (g) Any area included in an urban centre in 1971 or thereafter under the provisions of this Resolution shall continue to be so included unless the population of the urban centre falls below 25,000, in which case this Resolution will cease to apply;
- (h) Large peripheral Collector's Districts in growth areas shall be fragmented; and so far as the availability of visible boundary features allows, the fragments so created shall be as near square-shaped as possible and of such a size that they will contain a collector's workload when fully developed. For the purposes of delimiting urban centres such fragments shall be regarded as Collector's Districts.

4. In delimiting urban centres with less than 25,000 population:

- (a) The urban centres shall be delimited subjectively (by the inspection of aerial photographs, by field inspection and/or by consideration of any other information that is available);
- (b) All continuous urban growth is to be included (which, in small urban centres, would not necessarily occur if the density criterion were applied), together with any close but non-contiguous development which could be clearly regarded as part of the centre. However, cognisance shall be taken of Resolution 3, where appropriate, particularly in urban centres which are approaching a population of 25,000.

5. In selecting the boundaries for the splitting of Collector's Districts, cognisance shall be taken, where appropriate, of the boundaries of land-use zones.

6. (a) For State capital cities, nomenclature for the area delimited by

(i) the urban, and

(ii) the outer boundary

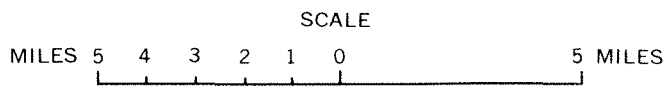

shall be (using Melbourne as the example) -

(i) Urban Melbourne, and

(ii) Melbourne Statistical Division;

- (b) In other cases where the dual boundary concept is employed, the nomenclature shall be (using Newcastle as the example) -
 - (i) Urban Newcastle, and
 - (ii) Newcastle Statistical District;
- (c) In cases where only a single boundary is delineated, the nomenclature shall be (using Cairns as the example) Urban Cairns;
- (d) Where an urban centre is formed by the coalescence of two or more named localities, the urban centre shall be assigned a name agreed upon after consultation with the Deputy Commonwealth Statistician of the State concerned.

	APPENDIX D Delimitation of urban centres	
	APPENDIX E Outline map: Perth Statistical Division	

This statement contains preliminary results of the 1971 Census of Population and Housing. The figures have been compiled during the taking of the Census by field personnel and are subject to amendment.

At the 1966 Census, in conformity with Section 127 of the Constitution, Aborigines were excluded from the published population. In 1967 the Constitution was altered to remove this provision, and the 1971 Census therefore includes Aborigines. In order to provide comparability between the two censuses the 1966 populations in this statement have been amended to include Aborigines and therefore differ from the 1966 populations previously published.

A list of 1971 Field Count Statements being issued showing dates of publication (where already issued) is contained in Appendix A to this statement.

EXPLANATORY NOTES

Urban centres and other bounded localities: A detailed description of the concepts and methods used in 1971 in defining urban centres is contained in Appendix D. These methods were similar to those used at the 1966 Census, the main changes being:

1. The elimination of the "indentation" provision. At the 1966 Census an indented area was included within the urban centre if the distance across the "neck" was less than one mile.
2. A re-interpretation of the "enclosure" rule. At the 1966 Census land was included within the urban centre if it was completely surrounded by the urban centre itself (or in part by the sea or a wide unbridged river). In 1971, if one part of this surround is the sea or a wide unbridged river, this rule is not applied.

At the 1971 Census the concepts were used to determine the urban centre of Perth.

Around other urban centres and non-urban localities, boundaries were delineated, where possible, where the population was expected to reach at least 200 by 1971. For this purpose, the most recent available aerial photography was used in order to identify as closely as possible the periphery of the built up area. Those centres with a population of 200 or more persons are included in the tables in this bulletin.

Notes on the composition of certain of the urban centres are given in Appendix C to this statement.

1966 Census population: For comparative purposes the population of statistical divisions, local government areas and urban and rural centres at the 1966 Census is shown.

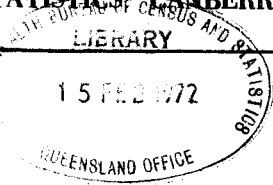

Where the boundaries of local government areas or statistical divisions have been changed (see Appendix B) an estimate has been made of the 1966 population in the 1971 area.

For those urban centres where the density criteria for determining urban boundaries have been used, the 1966 population shown is that resulting from the application of these same criteria at the time of the 1966 Census.

For most of the bounded towns and for some urban components of local government areas it has not been possible to make satisfactory estimates of 1966 population. These cases are shown in the tables as "N.A."

Major urban population: This term has been applied to population enumerated in urban centres with a total population of 100,000 or more and supersedes the use of "metropolitan" at previous Censuses. The urban population of Perth and of other smaller centres is shown in Tables 2 and 3.

APPENDIX BLOCAL GOVERNMENT AREAS

The 1966 figures in this statement have been adjusted to take account of Local Government Area boundary changes effective between 1 July 1966 and 30 June 1971. The following table indicates the major changes and further information about other amendments to Local Government Area boundaries may be obtained from the Commonwealth Statistician.

MAJOR LOCAL GOVERNMENT AREA CHANGES, 1 JULY 1966-30 JUNE 1971

Local Government Area	Nature of Change	Net Change in Area	Estimated Population	Date of Change
BOULDER (T) and KALGOORLIE (S)	United, and name changed to Boulder (S) (12-12-69)	-	11,897	18- 8-69
BOYUP BROOK (S)	Formerly Upper Blackwood (S)	-	--	30- 5-69
BRIDGETOWN (S) and GREENBUSHES (S)	United to form Bridgetown - Greenbushes (S)	-	3,482	26- 3-70
DONNYBROOK (S) and BALINGUP (S)	United to form Donnybrook (S) and name changed to Donnybrook - Balingup (S) (15-7-70)	-	3,334	26- 3-70
KALAMUNDA (S)	Gained from Swan-Guildford (S)	975 acres	+85	1- 7-69
KALGOORLIE (S)	See Boulder (T)			
MANDURAH (S)	Gained from Murray (S)	8,400 acres	+30	1- 7-69
MURRAY (S)	Lost to Mandurah (S)	8,400 acres	-30	1- 7-69

STIRLING (C)	Formerly Perth (S)	-	--	24- 1-71
SWAN-GUILDFORD (S)	Lost to Kalamunda (S)	975 acres	-85	1- 7-69
SWAN-GUILDFORD (S) and MIDLAND (T)	United to form Swan (S)	-	19,135	1- 4-70
UPPER BLACKWOOD (S)	Name changed to Boyup Brook (S)	-	--	30- 5-69

APPENDIX CNOTES ON CERTAIN URBAN CENTRES

I. The composition of urban centres which have absorbed rural localities or merged with other urban centres is shown below:

URBAN CENTRE

Bunbury	:	Includes Glen Iris and Picton Junction
Kwinana New Town	:	Includes Calista, Medina and Orelia
Port Hedland	:	Includes South Hedland
Rockingham	:	Includes Kwinana Industrial, Safety Bay and Warnbro

II. The following urban centres were non-urban at the 1966 Census:

Donnybrook	Kununurra	Roleystone
Exmouth	Newman	Tom Price
Goldsworthy	Paraburdoo	Wanneroo
Kambalda	Pinjarra	
Karratha	Roebourne	

III. Urban Centres in 1966 whose names do not appear in this Bulletin are:-

Armadale which has been absorbed by urban Perth.

Kalamunda - Gooseberry Hill which has been absorbed by urban Perth.

Kwinana Industrial)
and Rockingham -) which are incorporated into urban Rockingham.
Safety Bay)

IV. As a result of the changes in urban-rural classification in II and III above, 1966 figures for individual areas may not add to the urban and rural totals shown.

APPENDIX DCRITERIA FOR THE DELIMITATION OF URBAN BOUNDARIES

The criteria used for delimiting urban centres, as determined by the Thirty-First Conference of Statisticians, October 1969, were:

1. At each Census of Population and Housing a boundary shall be defined in accordance with these Resolutions for each population cluster of 1,000 or more population (and, for known holiday resorts of less population, if they contain 250 or more dwellings of which at least 100 are occupied). These clusters shall be named "urban centres" and the population and dwellings enumerated in them shall be classified as urban for statistical purposes.
2. Around each urban centre with a population of at least 100,000, a further boundary shall be defined, after consultation with planners, to contain the anticipated development of the urban centre and associated smaller urban centres for a period of at least twenty years. Such a boundary should delimit an area which is now, or is expected to be, socially and economically oriented towards the urban centre. It shall consist of complete Local Government Areas if possible. This fixed boundary (as distinct from the urban boundary which is moving) will delimit an area which, for general statistical purposes, is free from the practical problems imposed by the moving boundary, but which nevertheless represents the city in a wider sense.
3. In delimiting urban centres with 25,000 or more population:
 - (a) All contiguous Census Collector's Districts which have a population density of 500 or more persons per square mile shall be included. Consequently, State, Statistical Division, Local Government Area and other administrative boundaries shall be disregarded;
 - (b) A Collector's District which is known to contain a high proportion of holiday homes shall be classified as urban if the dwelling density is 125 dwellings per square mile or greater;
 - (c) A Collector's District consisting mainly of land used for factories, airports, small sports areas, cemeteries, hostels, institutions, prisons, military camps or certain research stations shall be classified as urban if contiguous with Collector's Districts which are themselves urban;
 - (d) Any Collector's District which consists mainly of land used for large sporting areas, large parks, explosives handling and munitions areas, or holding yards associated with meatworks and abattoirs shall be classified as urban only if it is bordered on three sides by Collector's Districts which are themselves urban;
 - (e) Any area which is completely surrounded by Collector's Districts which are urban must itself be classified as urban;

- (f) Where an urban centre of 25,000 or more population is separated from another urban centre by a gap in actual development of less than two miles (by the shortest rail or road distance), the gap shall be bridged by classifying a connecting Collector's District or Districts as urban, and therefore treating the urban centres as one; if the gap is two or more miles (and whether or not it is comprised mainly of reserved land or a natural barrier) the urban centres shall remain separate;
- (g) Any area included in an urban centre in 1971 or thereafter under the provisions of this Resolution shall continue to be so included unless the population of the urban centre falls below 25,000, in which case this Resolution will cease to apply;
- (h) Large peripheral Collector's Districts in growth areas shall be fragmented; and so far as the availability of visible boundary features allows, the fragments so created shall be as near square-shaped as possible and of such a size that they will contain a collector's workload when fully developed. For the purposes of delimiting urban centres such fragments shall be regarded as Collector's Districts.

4. In delimiting urban centres with less than 25,000 population:

- (a) The urban centres shall be delimited subjectively (by the inspection of aerial photographs, by field inspection and/or by consideration of any other information that is available);
- (b) All continuous urban growth is to be included (which, in small urban centres, would not necessarily occur if the density criterion were applied), together with any close but non-contiguous development which could be clearly regarded as part of the centre. However, cognisance shall be taken of Resolution 3, where appropriate, particularly in urban centres which are approaching a population of 25,000.

5. In selecting the boundaries for the splitting of Collector's Districts, cognisance shall be taken, where appropriate, of the boundaries of land-use zones.

6. (a) For State capital cities, nomenclature for the area delimited by

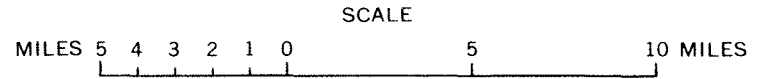

- (i) the urban, and
- (ii) the outer boundary

shall be (using Melbourne as the example) -

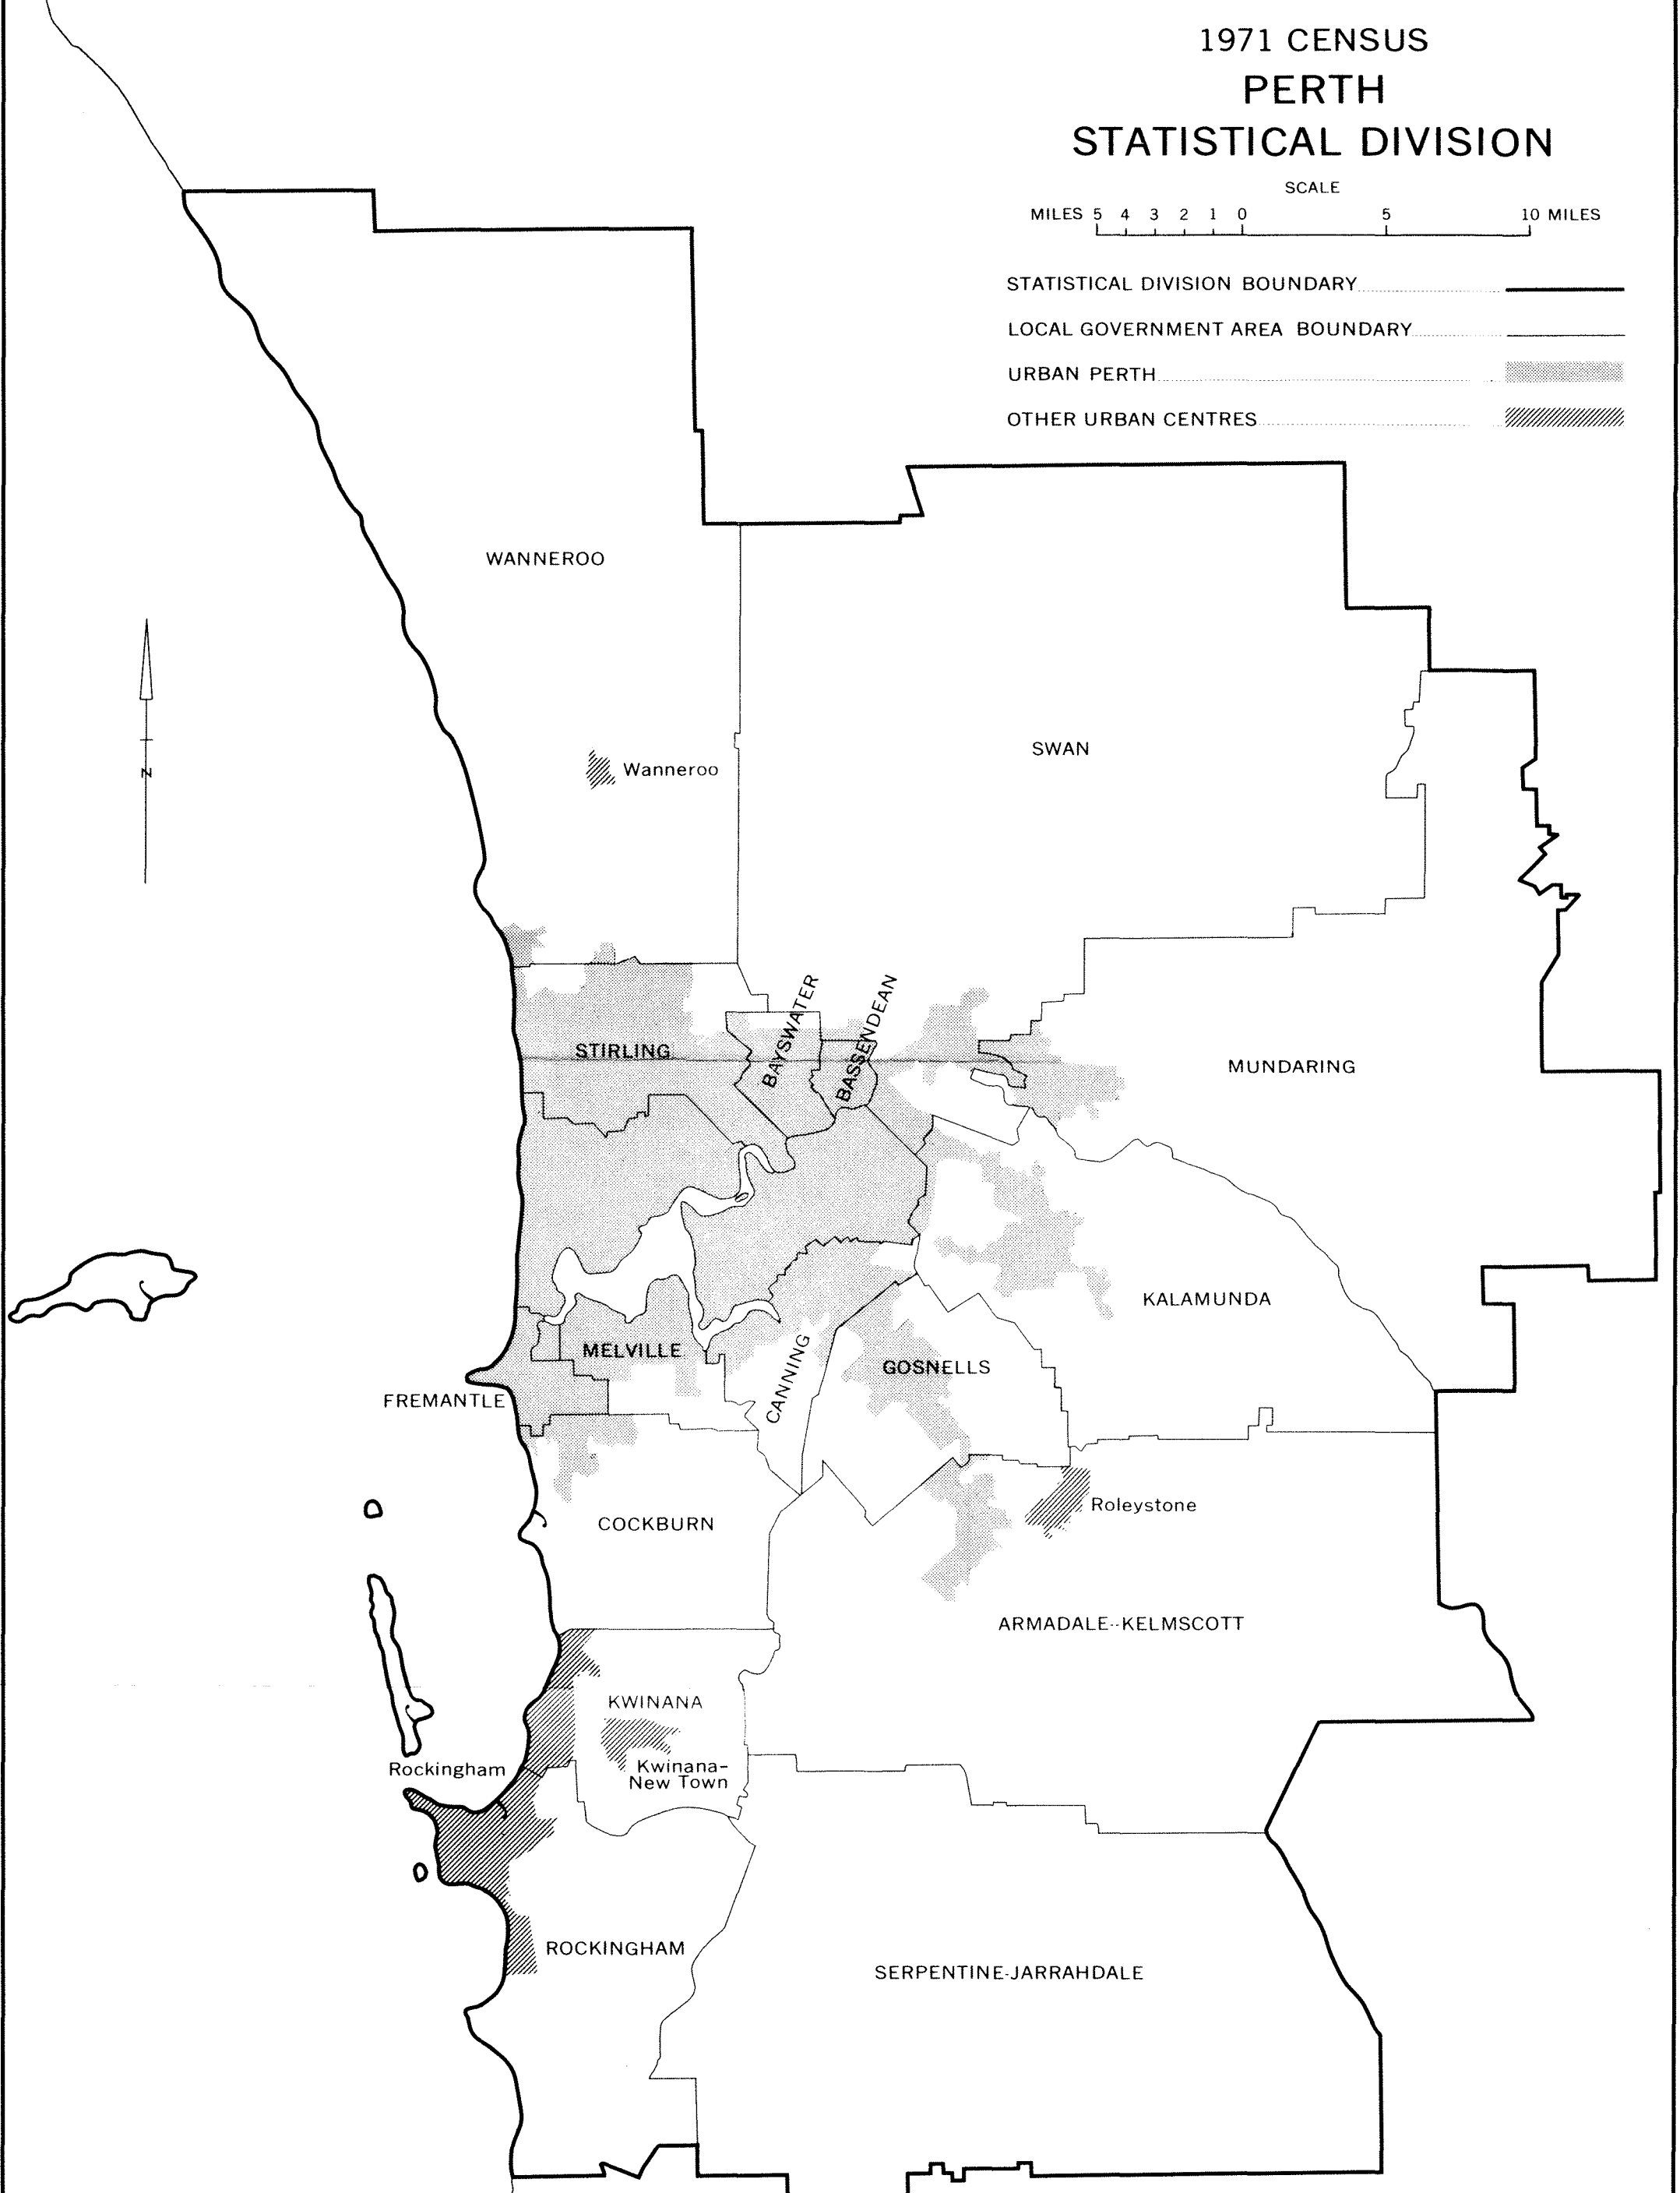

- (i) Urban Melbourne, and
- (ii) Melbourne Statistical Division;

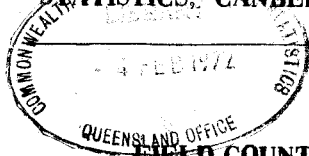

- (b) In other cases where the dual boundary concept is employed, the nomenclature shall be (using Newcastle as the example) -
 - (i) Urban Newcastle, and
 - (ii) Newcastle Statistical District;
- (c) In cases where only a single boundary is delineated, the nomenclature shall be (using Cairns as the example) Urban Cairns;
- (d) Where an urban centre is formed by the coalescence of two or more named localities, the urban centre shall be assigned a name agreed upon after consultation with the Deputy Commonwealth Statistician of the State concerned.

	APPENDIX D Outline map: Hobart Statistical Division	

This statement contains preliminary results of the 1971 Census of Population and Housing. The figures have been compiled during the taking of the Census by field personnel and are subject to amendment.

At the 1966 Census, in conformity with Section 127 of the Constitution, Aborigines were excluded from the published population. In 1967 the Constitution was altered to remove this provision, and the 1971 Census therefore includes Aborigines. In order to provide comparability between the two censuses the 1966 populations in this statement have been amended to include Aborigines and therefore differ from the 1966 populations previously published.

A list of 1971 Field Count Statements being issued showing dates of publication (where already issued) is contained in Appendix A to this statement.

EXPLANATORY NOTESUrban centres and other bounded localities

A detailed description of the concepts and methods used in 1971 in defining urban centres is contained in Appendix C. These methods were similar to those used at the 1966 Census, the main changes being:

1. The elimination of the "indentation" provision. At the 1966 Census an indented area was included within the urban centre if the distance across the "neck" was less than one mile.
2. A re-interpretation of the "enclosure" rule. At the 1966 Census land was included within the urban centre if it was completely surrounded by the urban centre itself (or in part by the sea or a wide unbridged river). In 1971 if one part of this surround is the sea or a wide unbridged river this rule is not applied.

At the 1971 Census these concepts were used to determine the urban boundaries of Hobart and Launceston.

Around other urban centres and non-urban localities, boundaries were delineated, where possible, where the population was expected to reach at least 200 by 1971. For this purpose, the most recent available aerial photography was used in order to identify as closely as possible the periphery of the built up area. Those centres with a population of 200 or more persons are included in the tables in this bulletin.

Gowrie Park and Strathgordon have not been classified as urban although each had populations greater than 1,000 at 30 June 1971. These centres are construction sites and therefore are not permanent townships.

Notes on the composition of certain of the urban centres are given in Appendix B to this statement.

1966 Census population. For comparative purposes the population of statistical divisions, local government areas and urban and rural centres at the 1966 Census is shown.

For those urban centres where the density criteria for determining urban boundaries have been used, the 1966 population shown is that resulting from the application of these same criteria at the time of the 1966 Census.

For most of the bounded towns and for some urban components of local government areas it has not been possible to make satisfactory estimates of 1966 population. These cases are shown in the tables as "N.A."

Major urban population. This term has been applied to population enumerated in urban centres with a total population of 100,000 or more and supersedes the use of "metropolitan" at previous Censuses.

Abbreviations. The following abbreviations have been used in the tables and appendices

U - urban, R - rural, C - City, M - Municipality

N.A. - not available

A minus sign, appearing after a figure, indicates a decrease in population, e.g. 125-.

APPENDIX B

The rural locality of Beaconsfield was urban at the 1966 Census but failed to meet urban criteria for the 1971 Census. Conversely, Savage River met the urban criteria for the first time in 1971.

The composition of urban centres which have absorbed rural localities is shown below.

URBAN CENTRE

Burnie-Somerset: includes Camdale, Cooe and Wivenhoe

Devonport: includes Don and Quoiba

Launceston: includes St Leonards

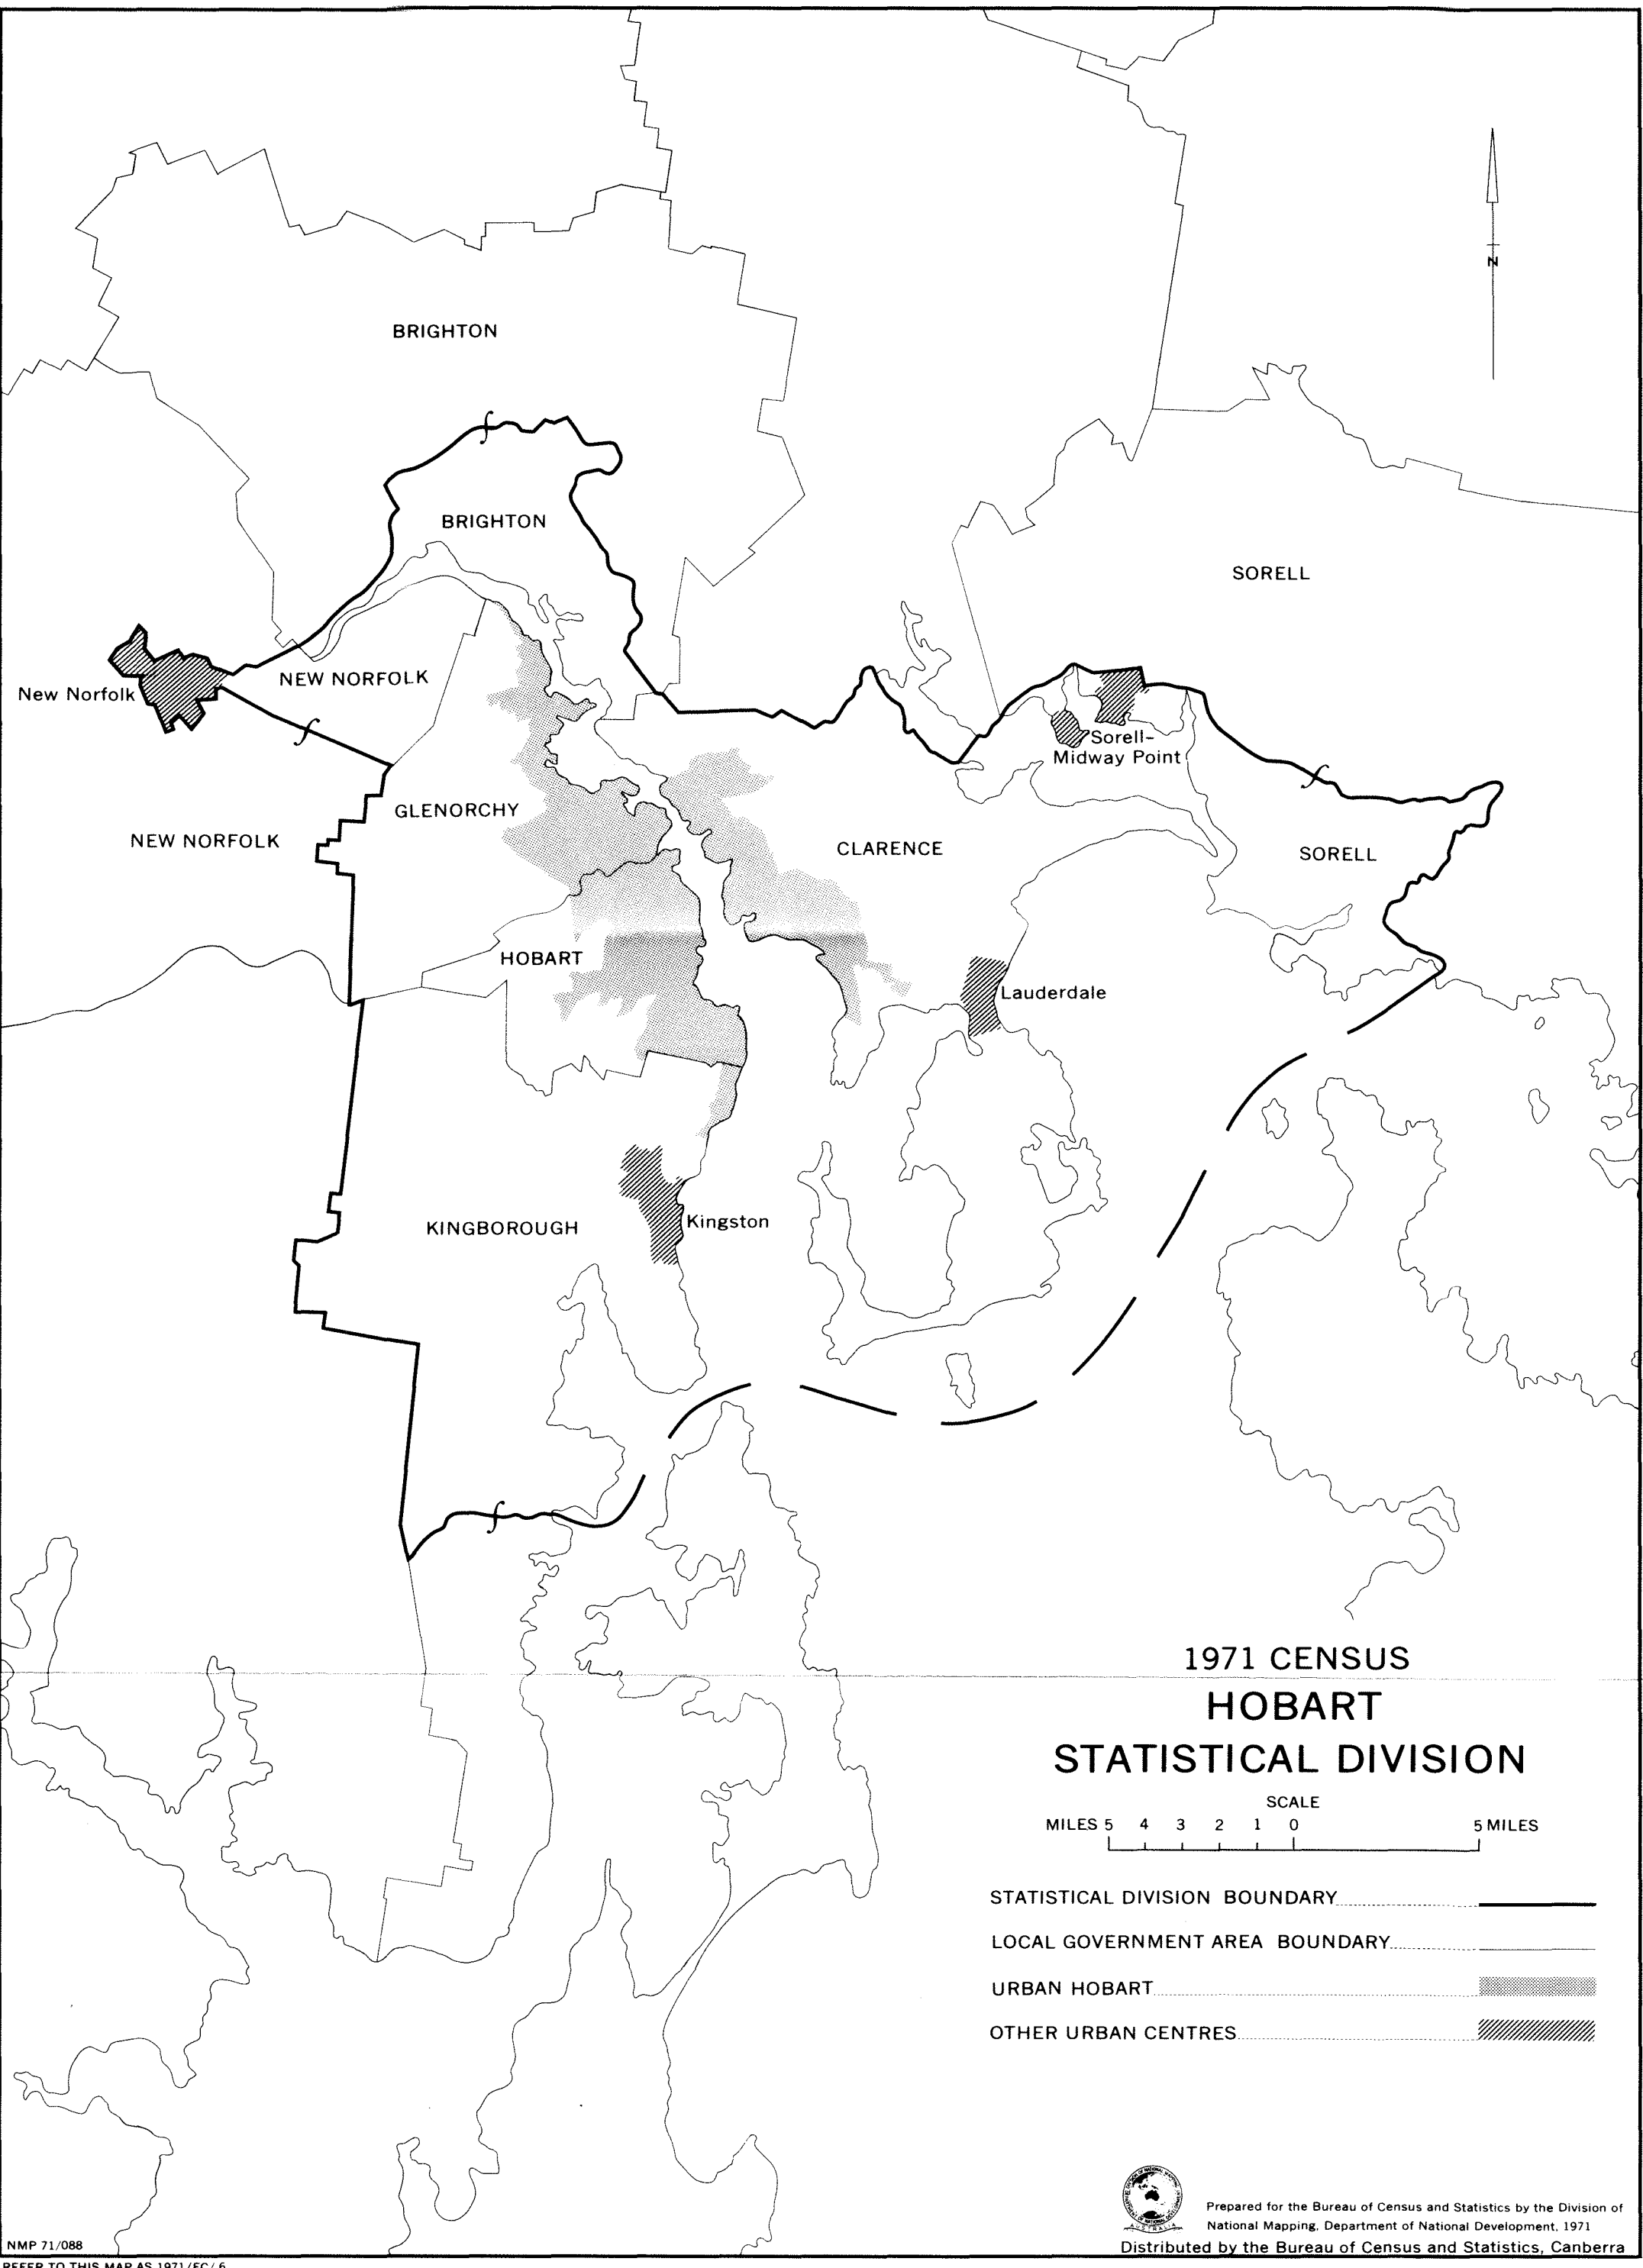

APPENDIX CCRITERIA FOR THE DELIMITATION OF URBAN BOUNDARIES

The criteria used for delimiting urban centres, as determined by the Thirty-First Conference of Statisticians, October 1969, were:

1. At each Census of Population and Housing a boundary shall be defined in accordance with these Resolutions for each population cluster of 1,000 or more population (and, for known holiday resorts of less population, if they contain 250 or more dwellings of which at least 100 are occupied). These clusters shall be named "urban centres" and the population and dwellings enumerated in them shall be classified as urban for statistical purposes.
2. Around each urban centre with a population of at least 100,000, a further boundary shall be defined, after consultation with planners, to contain the anticipated development of the urban centre and associated smaller urban centres for a period of at least twenty years. Such a boundary should delimit an area which is now, or is expected to be, socially and economically oriented towards the urban centre. It shall consist of complete Local Government Areas if possible. This fixed boundary (as distinct from the urban boundary which is moving) will delimit an area which, for general statistical purposes, is free from the practical problems imposed by the moving boundary, but which nevertheless represents the city in a wider sense.
3. In delimiting urban centres with 25,000 or more population:
 - (a) All contiguous Census Collector's Districts which have a population density of 500 or more persons per square mile shall be included. Consequently, State, Statistical Division, Local Government Area and other administrative boundaries shall be disregarded;
 - (b) A Collector's District which is known to contain a high proportion of holiday homes shall be classified as urban if the dwelling density is 125 dwellings per square mile or greater;
 - (c) A Collector's District consisting mainly of land used for factories, airports, small sports areas, cemeteries, hostels, institutions, prisons, military camps or certain research stations shall be classified as urban if contiguous with Collector's Districts which are themselves urban;
 - (d) Any Collector's District which consists mainly of land used for large sporting areas, large parks, explosives handling and munitions areas, or holding yards associated with meatworks and abattoirs shall be classified as urban only if it is bordered on three sides by Collector's Districts which are themselves urban;
 - (e) Any area which is completely surrounded by Collector's Districts which are urban must itself be classified as urban;

- (f) Where an urban centre of 25,000 or more population is separated from another urban centre by a gap in actual development of less than two miles (by the shortest rail or road distance), the gap shall be bridged by classifying a connecting Collector's District or Districts as urban, and therefore treating the urban centres as one; if the gap is two or more miles (and whether or not it is comprised mainly of reserved land or a natural barrier) the urban centres shall remain separate;
 - (g) Any area included in an urban centre in 1971 or thereafter under the provisions of this Resolution shall continue to be so included unless the population of the urban centre falls below 25,000, in which case this Resolution will cease to apply;
 - (h) Large peripheral Collector's Districts in growth areas shall be fragmented; and so far as the availability of visible boundary features allows, the fragments so created shall be as near square-shaped as possible and of such a size that they will contain a collector's workload when fully developed. For the purposes of delimiting urban centres such fragments shall be regarded as Collector's Districts.
4. In delimiting urban centres with less than 25,000 population:
- (a) The urban centres shall be delimited subjectively (by the inspection of aerial photographs, by field inspection and/or by consideration of any other information that is available);
 - (b) All continuous urban growth is to be included (which, in small urban centres, would not necessarily occur if the density criterion were applied), together with any close but non-contiguous development which could be clearly regarded as part of the centre. However, cognisance shall be taken of Resolution 3, where appropriate, particularly in urban centres which are approaching a population of 25,000.
5. In selecting the boundaries for the splitting of Collector's Districts, cognisance shall be taken, where appropriate, of the boundaries of land-use zones.
6. (a) For State capital cities, nomenclature for the area delimited by
- (i) the urban, and
 - (ii) the outer boundary
- shall be (using Melbourne as the example) -
- (i) Urban Melbourne, and
 - (ii) Melbourne Statistical Division;

- (b) In other cases where the dual boundary concept is employed and nomenclature shall be (using Newcastle as the example) -
 - (i) Urban Newcastle, and
 - (ii) Newcastle Statistical District;
- (c) In cases where only a single boundary is delineated, the nomenclature shall be (using Cairns as the example) Urban Cairns;
- (d) Where an urban centre is formed by the coalescence of two or more named localities, the urban centre shall be assigned a name agreed upon after consultation with the Deputy Commonwealth Statistician of the State concerned.

	APPENDIX B Major changes to local government areas, 1966-1971	11
	APPENDIX C Delimitation of urban centres	12
	APPENDIX D Outline map: Canberra Statistical District.	

This statement contains preliminary results of the 1971 Census of Population and Housing. The figures have been compiled during the taking of the Census by field personnel and are subject to amendment.

At the 1966 Census, in conformity with Section 127 of the Constitution, Aborigines were excluded from the published population. In 1967 the Constitution was altered to remove this provision, and the 1971 Census therefore includes Aborigines. In order to provide comparability between the two censuses the 1966 populations in this statement have been amended to include Aborigines and therefore differ from the 1966 populations previously published.

A list of 1971 Field Count Statements being issued showing dates of publication (where already issued) is contained in Appendix A to this statement.

EXPLANATORY NOTES

Urban centres and other bounded localities .

A detailed description of the concepts and methods used in 1971 in defining urban centres is contained in Appendix C. These methods were similar to those used at the 1966 Census, the main changes being:

1. The elimination of the "indentation" provision. At the 1966 Census an indented area was included within the urban centre if the distance across the "neck" was less than one mile.

2. A re-interpretation of the "enclosure" rule. At the 1966 Census land was included within the urban centre if it was completely surrounded by the urban centre itself (or in part by the sea or a wide unbridged river). In 1971 if one part of this surround is the sea or a wide unbridged river this rule is not applied.

At the 1971 Census these concepts were used to determine the urban boundaries of Darwin and Canberra.

For other urban centres and non-urban bounded localities, boundaries were delineated, where possible, when the population was expected to reach at least 200 by 1971. For this purpose, the most recent available aerial photograph was used in order to identify as closely as possible the periphery of the built up area. Those centres with a population of 200 or more persons are included in the tables in this bulletin.

Nomenclature

The following Canberra areas are used in the tables:

Canberra Statistical District (see para. 2 of Appendix C). This is an extensive area which is considered to contain that area which is in close economic and social contact with Canberra. The boundary is intended to remain stable for some time.

The Statistical District includes Urban Canberra (see below), the Municipality of Queanbeyan in New South Wales and the Northern part of rural A.C.T. Field count figures show the population of Canberra Statistical District at the 1971 Census to be 158,594.

Urban Canberra. This was defined using the criteria set out in Appendix C and is therefore comparable with other large Australian urban centres.

Canberra City District. This is the proclaimed administrative area of Canberra as at 30 June 1971.

NOTE.

Although Urban Canberra extends into New South Wales the tables in this statement only include that part which is situated within the Australian Capital Territory. In 1971 the total population of Urban Canberra, including 15,368 persons in Queanbeyan, was 156,334.

Similarly only that part of the Canberra Statistical District in the Australian Capital Territory is included. The total population of the Canberra Statistical District, which includes the Municipality of Queanbeyan, was 107,138 in 1966 and 158,594 in 1971.

1966 Census population

For comparative purposes the population of local government areas and urban and rural centres at the 1966 Census is shown.

Where the boundaries of local government areas have been changed (see Appendix B) an estimate has been given of the 1966 population in the 1971 area. Certain areas for the Australian Capital Territory in this Statement have been estimated and therefore may be subject to revision.

As the urban boundaries for Darwin and Canberra were determined by using density criteria, the 1966 population shown is that resulting from the application of these same criteria at the time of the 1966 Census.

For most of the bounded towns and for some urban components of local government areas it has not been possible to make satisfactory estimates of 1966 population. These cases are shown in the tables as "n.a.". Where figures are not available on grounds of confidentiality ".." has been shown.

Major urban population

This term has been applied to population enumerated in urban centres with a total population of 100,000 or more and supersedes the use of "metropolitan" at previous Censuses.

Abbreviations

The following abbreviations have been used in the tables and appendixes:

U - urban, R - rural, n.a. or ".." - not available

Minus sign, when appearing after a figure, indicates a decrease in population, e.g. 125 -.

APPENDIX BMAJOR CHANGES TO LOCAL GOVERNMENT AREAS, 1966-1971Northern Territory

For 1971 Census purposes, the use of Police Districts as tabulation areas has been abandoned. The only local government area in the Northern Territory is the City of Darwin. For census purposes two areas have been treated as local government areas : Proposed Greater Darwin and the balance of the Territory.

Australian Capital Territory

The boundaries of the Canberra City District were extended in December 1966 to encompass the Weston Creek and Belconnen development complexes. As there is no system of local government in the Australian Capital Territory, suburbs have been treated as local government areas for 1971 Census purposes. The following suburbs were not separately identified at the 1966 Census.

Aranda, Belconnen Other (including Belconnen, Bruce, Charnwood, Flynn, Hawker, Holt, MacGregor, Melba and areas not yet designated as suburbs) Cook, Farrer, Fisher, Higgins, Isaacs, Latham, Macquarie, Mawson, O'Malley, Page, Pearce, Phillip, Rivett, Scullin, Torrens, Waramanga, Weetangera, Weston and Weston Creek Other (including Chapman, Holder, Duffy, Stirling, and areas not yet designated as suburbs).

APPENDIX CCRITERIA FOR THE DELIMITATION OF URBAN BOUNDARIES

The criteria used for delimiting urban centres, as determined by the Thirty-First Conference of Statisticians, October 1969, were:

1. At each Census of Population and Housing a boundary shall be defined in accordance with these Resolutions for each population cluster of 1,000 or more population (and, for known holiday resorts of less population, if they contain 250 or more dwellings of which at least 100 are occupied). These clusters shall be named "urban centres" and the population and dwellings enumerated in them shall be classified as urban for statistical purposes.
2. Around each urban centre with a population of at least 100,000, a further boundary shall be defined, after consultation with planners, to contain the anticipated development of the urban centre and associated smaller urban centres for a period of at least twenty years. Such a boundary should delimit an area which is now, or is expected to be, socially and economically oriented towards the urban centre. It shall consist of complete Local Government Areas if possible. This fixed boundary (as distinct from the urban boundary which is moving) will delimit an area which, for general statistical purposes, is free from the practical problems imposed by the moving boundary, but which nevertheless represents the city in a wider sense.
3. In delimiting urban centres with 25,000 or more population:
 - (a) All contiguous Census Collector's Districts which have a population density of 500 or more persons per square mile shall be included. Consequently, State, Statistical Division, Local Government Area and other administrative boundaries shall be disregarded;
 - (b) A Collector's District which is known to contain a high proportion of holiday homes shall be classified as urban if the dwelling density is 125 dwellings per square mile or greater;
 - (c) A Collector's District consisting mainly of land used for factories, airports, small sports areas, cemeteries, hostels, institutions, prisons, military camps or certain research stations shall be classified as urban if contiguous with Collector's Districts which are themselves urban;
 - (d) Any Collector's District which consists mainly of land used for large sporting areas, large parks, explosives handling and munitions areas, or holding yards associated with meatworks and abattoirs shall be classified as urban only if it is bordered on three sides by Collector's Districts which are themselves urban;
 - (e) Any area which is completely surrounded by Collector's Districts which are urban must itself be classified as urban;

- (f) Where an urban centre of 25,000 or more population is separated from another urban centre by a gap in actual development of less than two miles (by the shortest rail or road distance), the gap shall be bridged by classifying a connecting Collector's District or Districts as urban, and therefore treating the urban centres as one; if the gap is two or more miles (and whether or not it is comprised mainly of reserved land or a natural barrier) the urban centres shall remain separate;
- (g) Any area included in an urban centre in 1971 or thereafter under the provisions of this Resolution shall continue to be so included unless the population of the urban centre falls below 25,000, in which case this Resolution will cease to apply;
- (h) Large peripheral Collector's Districts in growth areas shall be fragmented; and so far as the availability of visible boundary features allows, the fragments so created shall be as near square-shaped as possible and of such a size that they will contain a collector's workload when fully developed. For the purposes of delimiting urban centres such fragments shall be regarded as Collector's Districts.

4. In delimiting urban centres with less than 25,000 population:

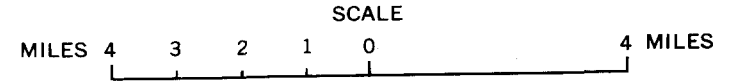

- (a) The urban centres shall be delimited subjectively (by the inspection of aerial photographs, by field inspection and/or by consideration of any other information that is available);
- (b) All continuous urban growth is to be included (which, in small urban centres, would not necessarily occur if the density criterion were applied), together with any close but non-contiguous development which could be clearly regarded as part of the centre. However, cognisance shall be taken of Resolution 3, where appropriate, particularly in urban centres which are approaching a population of 25,000.

5. In selecting the boundaries for the splitting of Collector's Districts, cognisance shall be taken, where appropriate, of the boundaries of land-use zones.

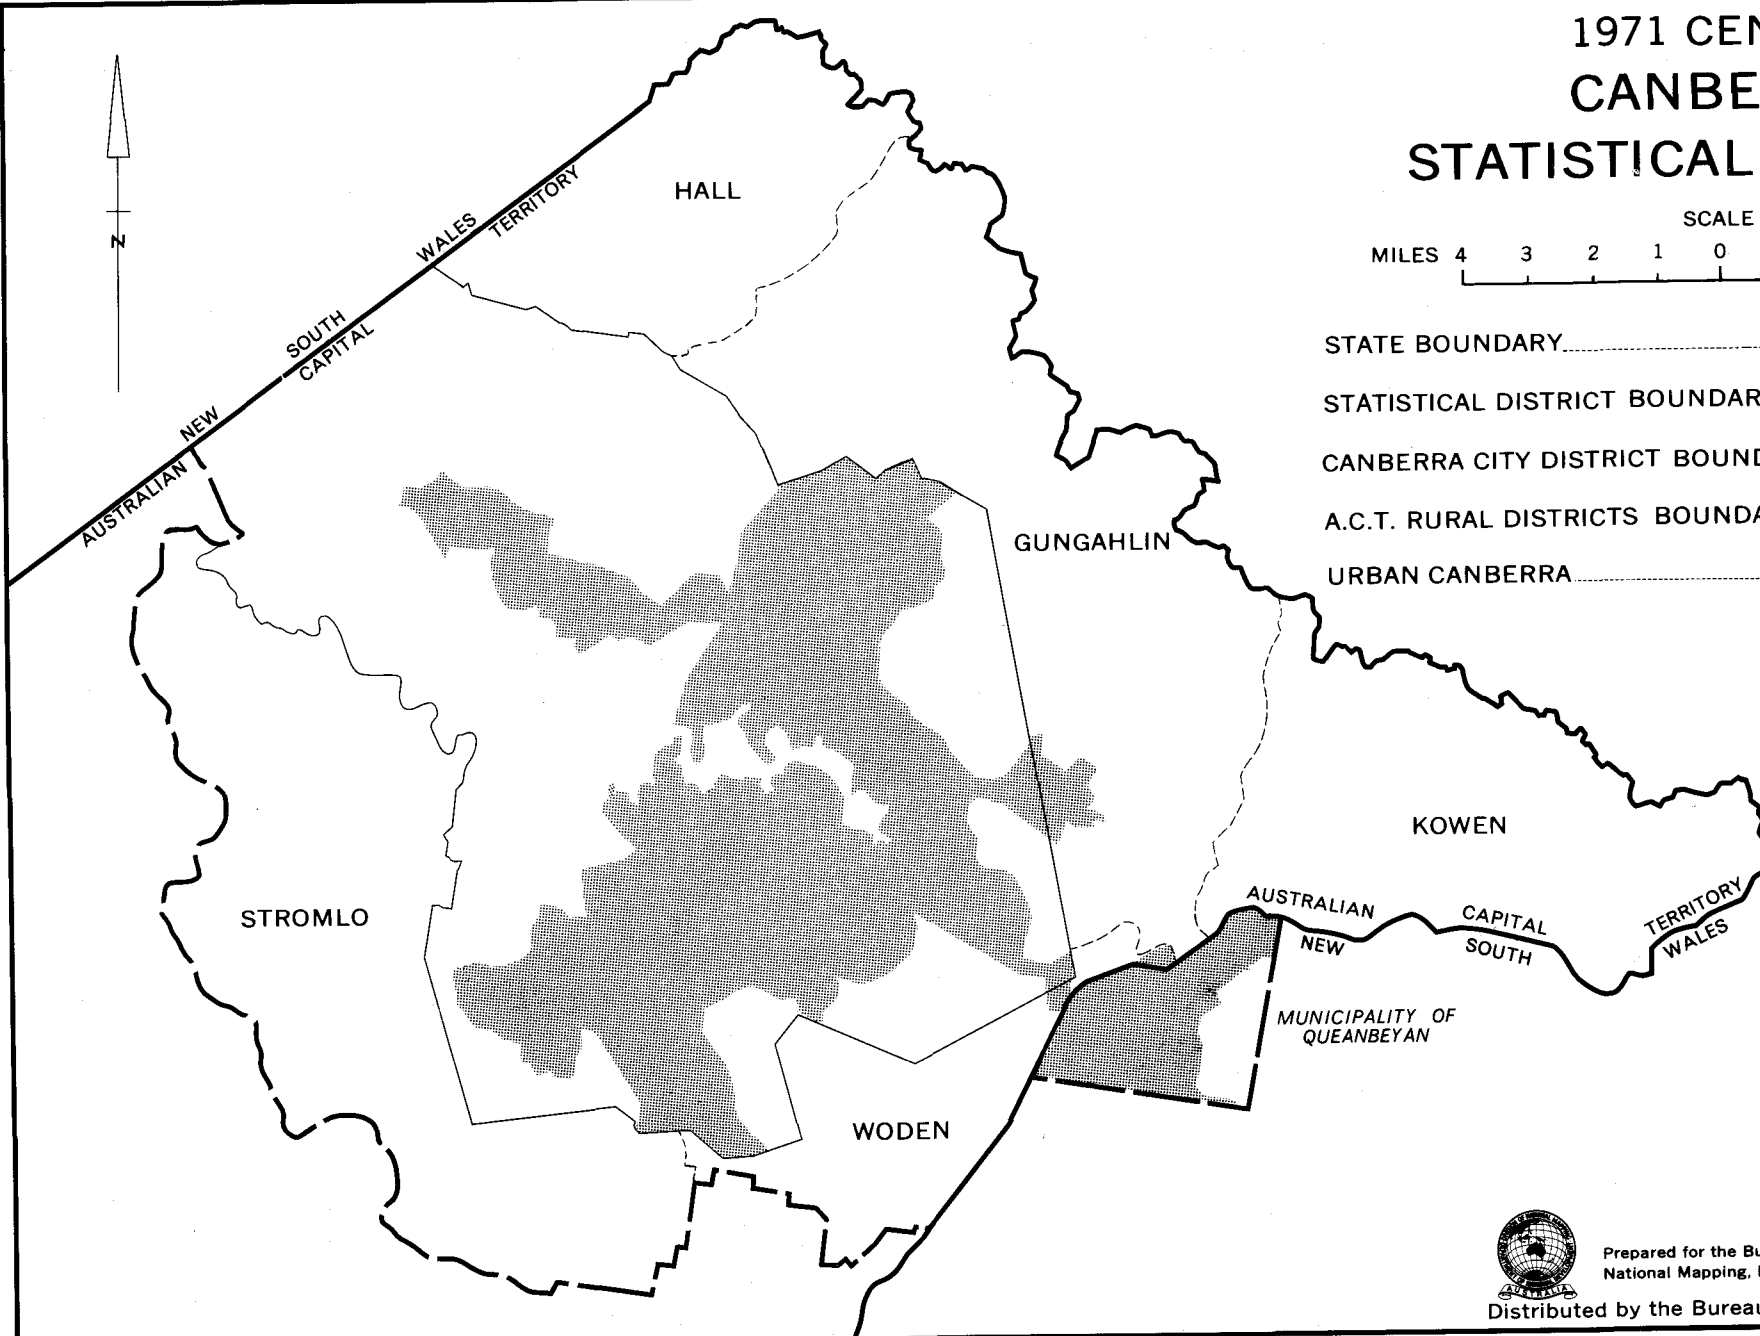

- 6. (a) For State capital cities, nomenclature for the area delimited by
 - (i) the urban, and
 - (ii) the outer boundary
 shall be (using Melbourne as the example) -
 - (i) Urban Melbourne, and
 - (ii) Melbourne Statistical Division;

- (b) In other cases where the dual boundary concept is employed the nomenclature shall be (using Newcastle as the example) -
- (i) Urban Newcastle, and
 - (ii) Newcastle Statistical District;
- (c) In cases where only a single boundary is delineated, the nomenclature shall be (using Cairns as the example) Urban Cairns;
- (d) Where an urban centre is formed by the coalescence of two or more named localities, the urban centre shall be assigned a name agreed upon after consultation with the Deputy Commonwealth Statistician of the State concerned:

APPENDIX A List of census field count statements already issued	8

This statement contains preliminary results of the 1971 Census of Population and Housing. It shows, for each Commonwealth electoral division as determined at the 1968 re-distribution, the population enumerated in 1971 together with comparative figures from the 1966 Census. The figures have been compiled during the taking of the Census by field personnel and are subject to amendment when final figures become available.

At the 1966 Census, in conformity with Section 127 of the Constitution, Aborigines were not included in the published figures of the population. In 1967 the Constitution was altered to remove this provision, and the 1971 Census population figures therefore include Aborigines. In order to provide comparability between the two Censuses, the 1966 populations in this statement have been amended to include Aborigines.

EXPLANATORY NOTES

Populations of electoral divisions shown in this publication have been determined by allocating each Census collector's district to an electoral division. The boundaries of electoral divisions, however, occasionally do not coincide with the boundaries of collector's districts. In such cases, the total population of the collector's district has been attributed to the electoral division in which the greater part of the collector's district is situated. Thus in the compilation of the figures in this publication, a small degree of approximation has sometimes been necessary.

In using the figures in this publication, it is important to remember the "de facto" nature of the Census. The total population shown for each division is therefore the number of persons in that division on the night of 30 June, including temporary visitors to Australia and persons enumerated at other than their usual place of residence.
