## EXPLANATORY NOTES

## 1. Introduction

This publication, containing results from the 1986 Census of Population and Housing, is one of a series for each State and the Northern Territory. It presents census counts of persons and dwellings for various geographic levels based on place of enumeration (i.e. the counts for each area are of persons and dwellings enumerated in the area on census night, 30 June 1986).

Census counts on a place of enumeration basis (C) are not comparable with census counts on a place of usual residence basis (U), or the estimated resident population (ERP) figures released by the ABS. A brief description of the two bases of enumeration and the ERP is in Section 3. More details can be found in The 1986 Census Dictionary (2174.0). All census table numbers are prefixed as appropriate with the letter ' $C$ ' or ' $U$ '. However, this publication contains only tables in the ' C ' category.

The tables in this publication contain counts of persons, and counts of dwellings by class of dwelling (including caravans etc. in caravan parks), for statistical local areas, statistical divisions, statistical subdivisions, legal local government areas, urban centres and (rural) localities.

The tables also contain counts from the 1981 Census. For legal local government areas, 1981 Census data have been presented according to boundaries adopted for the 1986 Census. Because some intercensal boundary changes involve areas smaller than collection districts (CDs), precise figures cannot always be calculated. In these cases, the 1981 population on 1986 boundaries is recorded as not available (n.a.). Note that for urban centres and (rural) localities the 1981 Census data are shown on boundaries delineated for 1981.

See Appendix A for intercensal area changes.
Printed census publications contain broad summaries only, and represent a very small amount of the total census data released. More detailed cross-tabulations for the larger geographic levels (e.g. State or statistical region), and somewhat less detailed tabulations for small areas (e.g. collection district or statistical local area), are available on microfiche and magnetic tape. For further information see Census 86 - Data Release Plans (2173.0).

## 2. Scope and coverage

The 1986 Census of Population and Housing aimed at counting every person who spent census night, 30 June 1986, in Australia, including persons on vessels in or between Australian ports, or on board long-distance trains, buses or aircraft. All private dwellings were also counted, whether occupied or unoccupied. Occupied
non-private dwellings, such as hospitals, prisons, hotels etc. were also included. People were counted where they were on census night, which may not have been where they usually lived. This is the basis for the counts in this publication. Place of usual residence was asked of each person, and answers, where they differed from enumeration address, were coded to statistical local area level. Census counts based on place of usual residence are available in other output products. Visitors to Australia were enumerated regardless of how long ago they had arrived or how long they planned to stay. They are included in the counts based on place of enumeration but not in those counts based on usual residence. Australian residents out of the country on census night were excluded from the count.

Diplomatic personnel and their families are out of the scope of the census, as are diplomatic residences.

## 3. Definitions

## Census Count - Place of Enumeration (C)

Persons were counted where they were actually located on census night. Overseas visitors are included and Australians overseas are excluded. No adjustment is made for census underenumeration.

## Census Count - Place of Usual Residence (U)

Persons were also counted according to their stated place of usual residence (i.e. their answer to question 6 -see a facsimile of the 1986 Census household form at Appendix C). Overseas visitors and Australians overseas are excluded, and no adjustment is made for census underenumeration. Statistics on a place of usual residence basis are not included in this publication.

## Estimated Resident Population (ERP)

These estimates are formed by adding estimates of Australians overseas, and of the census undercount, to the census count at place of usual residence. The ERP at census date is updated quarterly at national and State levels between population censuses. ERP statistics are not included in this publication.

## Migratory

Persons enumerated on census night on off-shore oil rigs, drilling platforms and the like, on board vessels in and between Australian ports, or on board long-distance trains, buses or aircraft are classified as migratory. Such persons are not included in the population of specific statistical local areas, but are shown as a balancing item (Off-shore Areas and Migratory) for each State and the Northern Territory. The Australian Capital Territory has no migratory population.

## Dwellings

For the 1986 Census, dwellings are classified into four basic groups: occupied private dwellings; occupied caravans etc. in caravan parks; unoccupied private dwellings; and non-private dwellings.
(a) An occupied private dwelling is defined as the premises occupied by a household (see below) on census night (except households occupying caravans etc. in caravan parks - see (b)). A private dwelling is normally a house, flat, part of a house or even a room, but can also be a house above shops or offices, a boat, a tent, a houseboat, or a caravan if standing on its own block of land and not occupied by members of the same household resident in an adjacent dwelling.

It is important to remember that the census definition of a private dwelling means that the total number of dwellings may be more than the total number of known structures in any given area (see 'household' below).
(b) For the 1986 Census, an occupied caravan etc. in a caravan park is, for the first time, treated as a separate household. This category also includes occupied boats in marinas. In previous censuses, caravans etc. in caravan parks were considered to be parts of a non-private dwelling (the caravan park) which meant that no family relationship data were collected for them. This change in classification will affect some comparisons made between censuses, and care should be taken when comparing family and non-private dwelling data with previous censuses.
(c) An unoccupied private dwelling is a structure built specifically for private living purposes and capable of being lived in, but unoccupied at the time of the census. Vacant houses, holiday homes, huts, cabins (other than seasonal workers' quarters) and houseboats are counted as unoccupied dwellings; but vacant tents, garages and caravans, if not on a separate block (and if not normally occupied), are not. Only private dwellings can be classified as unoccupied (i.e. unoccupied caravans etc. in caravan parks and unoccupied non-private dwellings are not counted). Unoccupied dwellings include: dwellings which are vacant because they have been newly completed; dwellings which are vacant for demolition or repair; dwellings to let; and dwellings where all members of the household were absent on census night.
(d) Non-private dwellings (NPDs) are dwellings with accommodation not in the dwelling categories listed above, and are classified according to their function. These dwellings include schools,
hotels, motels, guest houses, boarding houses, prisons, religious and charitable institutions, hospitals, nursing homes, defence establishments and other communal dwellings. Usually, occupants of such dwellings use communal facilities (such as hotel dining rooms or mess halls) attached to the particular establishment. Selfcontained units provided by commercial enterprises, such as hotels, motels, homes for the elderly, or guest houses, are treated as parts of a non-private dwelling, not as separate dwellings. Campers out and persons classed as migratory on census night were also included in the NPD count.

## Household

For census purposes, a household is either a person living alone, or a group of people living together as a single domestic unit with common eating arrangements. It is possible for more than one household to live in one house or structure. For example, a lodger who lives with a family and provides all his own food is not a member of the family's household but constitutes a separate household and, therefore, completes a separate household form. The premises occupied by households are classified as either occupied private dwellings or as caravans etc. in a caravan park.

## Campers out

Persons who spent census night in the open in cars, caravans or trucks pulled up at the side of the road for that night only, or persons in other temporary camps or accommodation erected for that night only, are classified as campers out. Such persons are included in the population of the statistical local area in which they were enumerated.

## 4. Geographic areas

The geographic units used in this publication are statistical local areas (SLAs), statistical divisions, statistical subdivisions, legal local government areas (LGAs) and urban centres/(rural) localities. Definitions of these areas appear below. For definitions of other census geographic areas see Appendix B.

SLAs are a new spatial unit for 1986 Census. The 1981 Census equivalent was the census local government area. SLAs are for the most part legal LGA based. In special cases, where a legal LGA is much larger and more populous than the general run of legal LGAs (as is the City of Brisbane), or where there are no legal local government authorities (as in the Australian Capital Territory), the SLAs are officially defined suburbs or localities. SLAs cover, in aggregate, the whole of Australia without gaps or overlaps.

Statistical divisions consist of one or more statistical subdivisions which in turn consist of one or more SLAs and cover, in aggregate, the whole of Australia without gaps or overlaps. They are used as a large, general purpose regional type geographic area. Statistical divisions are designed to be relatively homogeneous regions, characterised by identifiable social and economic links between the inhabitants and the economic units within the region, under the unifying influence of one or more major towns or cities.

Statistical subdivisions consist of one or more SLAs and cover, in aggregate, the whole of Australia without gaps or overlaps. They are used as an intermediate level, general purpose regional type geographic area.

Legal local government areas are the geographic areas of incorporated local government councils, such as towns and shires, and consist of one or more SLAs. In aggregate, these cover only part of Australia. The major areas of Australia not governed by incorporated local government councils include the northern parts of South Australia, most of the Northern Territory and all of the Australian Capital Territory. Legal LGAs can, and sometimes do, straddle statistical subdivision, statistical district and statistical division boundaries. An example is 'Tweed Shire' in New South Wales. The predominantly urban part of this shire is treated as an SLA as well as a statistical subdivision in its own right and constitutes the New South Wales part of the 'Gold Coast-Tweed' Statistical District. The predominantly rural remainder of this shire constitutes a separate SLA outside the 'Gold CoastTweed' Statistical District, and lies within a different statistical subdivision.

Urban centres/(rural) localities consist of one or more adjoining whole collection districts (CDs) with urban characteristics and represent, in the case of (rural) localities, population clusters of between 200 and 999 people and, in the case of urban centres, population clusters of 1,000 or more people (including known holiday resorts of smaller size). Because of their nature they can, and sometimes do, straddle SLA, legal LGA, statistical subdivision and other census geographic area boundaries.

## 5. Maps

The choropleth maps on the inside of the front and back covers show intercensal change (1981-1986) in SLAs in terms of person counts.

The statistical division maps (Appendix E) show the boundaries, names and codes of statistical divisions, statistical subdivisions and SLAs listed in this publication.

## 6. Geographic codes

The geographic areas referred to in tables in this publication can be located by reference to the maps at Appendix E. The geographic codes describing areas in the maps also appear in the tables. For further details, refer to Census 86 - Australian Standard Geographical Classification: Geographic Code List (2188.0).

## 7. Data quality

Statistical collections such as the census are subject to a number of sources of error. While some errors (such as deliberate misreporting) mostly defy detection and correction procedures, the number of errors in overall census results is expected to be generally insignificant. Information on data quality will be released during 1988.

Main sources of error in the census are:
(a) Underenumeration. Despite efforts to obtain full coverage of persons and dwellings (other than those associated with overseas diplomatic missions), some undercounting still occurs. A measure of the extent of underenumeration is obtained from a small survey of households undertaken very shortly after the census. Undercounting of persons in the 1986 Census was estimated to be 1.8 per cent for Australia as a whole.
(b) Partial response. In those instances where the householder omitted to provide a response to a question, a 'not stated' code was allocated; with the exception of non-response to age, sex, marital status, and SLA of usual residence. These variables were imputed using other information on the census form, and specially constructed random tables.
(c) Respondent error. Computer editing procedures are used to detect obvious errors made by individuals in completing the form (e.g. a six year old person who was married). Such procedures cannot detect all respondent errors and some remain in final output.
(d) Processing error. Errors created during the processing of the census are kept at an acceptable level by means of a quality control system, which involves sample checking at different stages of the coding and keying operations, and taking corrective action where necessary.

## 8. Further information

Further information about 1986 Census statistics is available from the nearest ABS office (see Appendix D for addresses and telephone numbers). The information paper Census 86 - Data Release Plans (2173.0) describes
standard output products to be released from the 1986 Census. Details of tabulations are contained in the Catalogue of 1986 Census Tables (2175.0).

## 9. Census 86 publications

## Statistical publications

Statistical publications (standard series) currently planned from the 1986 Census of Population and Housing are:

Census 86 - Age and Sex of Persons in Statistical Local Areas and Statistical Divisions (2454.0-2461.0) (A series of separate publications for each State and Territory)
Census 86 - Persons and Dwellings in Legal Local Government Areas, Statistical Local Areas and Urban Centres/(Rural) Localities (2462.0-2468.0) (A series of separate publications for each State and the Northern Territory)
Census 86 - Persons and Dwellings in Statistical Local Areas, Australian Capital Territory (2469.0)
Census 86 - Profile of Legal Local Government Areas -Usual Residents Counts (2470.0-2476.0) (A series of separate publications for each State and the Northern Territory)
Census 86 - Profile of Statistical Local Areas - Usual Residents Counts: Australian Capital Territory (2477.0)
Census 86 - Profile of Statistical Local Areas - Usual Residents Counts: Brisbane Statistical Division (2478.0)
Census 86 - Summary Characteristics of Persons and Dwellings (2479.0-2489.0) (A series of separate publications for each State, Territory, Australia and the external Territories of the Cocos (Keeling) Islands and Christmas Island)
Census 86 - Cross-classified Characteristics of Persons and Dwellings (2490.0-2498.0) (A series of separate publications for each State, Territory and Australia)
Census 86 - Aboriginals and Torres Strait Islanders: Australia, States and Territories (2499.0)
Census 86 - Characteristics of Persons in Hobart Suburbs, 30 June 1986 (2201.6)
Census 86 - Characteristics of Persons in Launceston Suburbs, 30 June 1986 (2202.6)
Census 86 - Characteristics of Persons in BurnieDevonport Suburbs, 30 June 1986 (2203.6)

In addition, other statistical publications (special series) providing information on, and analysis of, the census results are planned. These are:
Census 86 - Australia in Brief (2501.0)
Census 86 - A Summary of Major Findings (2502.0)
Census 86 - The Aboriginal and Torres Strait Islander Population (2503.0)
Census 86 - Population Growth and Distribution (2504.0)

Census 86 - Multicultural Australia (2505.0)
Census 86 - Families and Households (2506.0)
Census 86 - Rural Australia (2507.0)
Census 86 - The Aged Population (2508.0)
Census 86 - Caravan Park Dwellers (2509.0)
Census 86 - Religion (2510.0)
Census 86 - Sole Parent Families (2511.0)

Further titles may be added to this list in the future.
Users may request non-standard census output from the ABS. For more details see Census 86 - Special Data Services (2181.0).

## Information papers

The following information papers are being published:
Census 86 - New South Wales Publishing Information (2101.1)

Census 86 - Data Release Plans (2173.0)
The 1986 Census Dictionary (2174.0)
Catalogue of 1986 Census Tables (2175.0)
Census 86 - How Australia Takes a Census (2176.0)
Census 86 - Census Products Price List (2177.0)
Census 86 - Understanding Family Data (2178.0)
Census 86 - Collection District Master File (2179.0)
Census 86 - Census Data for Microcomputers (2180.0)
Census 86 - Special Data Services (2181.0)
Census 86 - Australian Standard Classification of Occupations/Classification and Classified List of Occupations: Link (2182.0)
Census 86 - Maps (2183.0)
Census 86 - Sample Files on Magnetic Tape (2184.0)
Census 86 - Microfiche (2185.0)
Census 86 - Standard Tables on Magnetic Tape (2186.0)
Census 86 - Australian Standard Geographical Classification: Geographic Code List (2188.0)
Census 86 - Revised Data on Attendance at Educational Institutions (2612.0)

## Evaluation papers

A series of data quality papers is planned for release:
Census 86 - Data Quality : Overview (2601.0)
Census 86 - Data Quality : Undercount (2602.0)
Census 86 - Data Quality : Aboriginal and Torres Strait Islander Counts (2603.0)
Census 86 - Data Quality : Ethnicity (2604.0)
Census 86 - Data Quality : Families (2605.0)
Census 86 - Data Quality : Education (2606.0)

## 10. Related ABS publications

Current publications produced by the ABS are listed in the Catalogue of Publications, Australia(1101.0). The ABS also issues, on Tuesdays and Fridays, a Publications Advice (1105.0) which lists publications to be released in the next few days. The Catalogue and Publications Advice are available from any ABS office.

## 11. Symbols and other usages

n.a. not available (used where it has not been possible to provide comparable 1981 Census data)

- nil or rounded to zero
. . not applicable
Minus sign (-) followed by a figure, denotes a decrease.
(C) city
(H) known holiday resort
(L) (rural) locality
(M) municipality

## Electronic services

VIATEL Key *656\# for selected current economic, social and demographic statistics.
AUSSTATS Thousands of up-to-date time series are available on this ABS on-line service through CSIRONET.

## APPENDIX A

## CHANGES TO GEOGRAPHIC AREAS, CENSUS 1981 TO CENSUS 1986

LEGAL LOCAL GOVERNMENT AREA CHANGES (EXCLUDING AMALGAMATIONS)

| Area | Nature of change | Date of <br> change |
| :--- | :--- | :---: |
|  |  | $19-05-83$ |
| Devonport(C) | Gained small area from Ulverstone(M) and Latrobe(M) | $19-05-83$ |
| Latrobe(M) | Lost small area to Devonport(C) | $19-05-83$ |

LEGAL LOCAL GOVERNMENT AREA CHANGES RESULTING FROM AMALGAMATIONS

| New Legal Local Government Area | Former Legal Local Government Area | Date of <br> change |
| :--- | :--- | ---: |
| Launceston(C) | Lilydale(M) | $08-05-85$ |
|  | St Leonards(M) | $08-05-85$ |
|  | Launceston(C) | $08-05-85$ |

## APPENDIX B

## CENSUS GEOGRAPHIC AREAS - DEFINITIONS

## A. AUSTRALIAN STANDARD GEOGRAPHICAL CLASSIFICATION (ASGC)

The Australian Standard Geographical Classification (1216.0) is a new geographic classification used for the dissemination of 1986 Census data. It incorporates a number of hierarchic structures of geographic areas (also referred to as 'spatial units') and defines the individual structures and the area types of which each structure is composed. Each geographic area in the classification is identified by a unique numeric code.

The ASGC has been adopted as the standard geographic classification for ABS output. This will ensure greater comparability of statistics within the ABS and standardisation of terminology.

Abbreviated definitions of other ASGC geographic areas which are used in 1986 Census output follow below. More detailed definitions can be found in The 1986 Census Dictionary (2174.0) or Census 86 - Australian Standard Geographical Classification : Geographic Code List (2188.0).

## Collection districts (CDs)

These are the smallest type of geographic area in the ASGC and are the building blocks of which all other ASGC geographic areas are composed. They have been designed for use in population censuses and, in aggregate, cover the whole of Australia without gaps or overlaps.

## States and Territories

These consist of two or more statistical divisions and cover the whole of Australia (as defined for statistical purposes) without gaps or overlaps. They encompass the geographic areas of the six Australian States and two mainland Territories.

## Statistical districts

These consist of one or more statistical subdivisions and represent large urban areas of Australia outside State capital city statistical divisions. Because of their nature they can and, in some cases, do straddle statistical division and State/Territory boundaries. An example is the 'Gold Coast-Tweed' Statistical District which encompasses an urban area which lies partly in the State of Queensland and partly in the State of New South Wales.

## Statistical regions

These consist of one or more SLAs and cover, in aggregate, the whole of Australia without gaps or overlaps. They were designed primarily as geographic areas containing sufficient population to be suitable for the presentation of both population census and labour force statistics, within the frameworks for standard statistical outputs from these collections. The smallest region in terms of population is the Northern Territory, which had a census count of 154,848 on 30 June 1986.

## Major statistical regions

These consist of one or more statistical regions and cover, in aggregate, the whole of Australia without gaps or overlaps. They do not cross State or Territory boundaries and serve the same purpose as statistical regions, though at a broader geographic (i.e. capital city statistical division versus balance of state) level. However, even this dissection could not, due to population size limitations, be implemented in the case of Tasmania, the Northern Territory and the Australian Capital Territory, each of which equates with a major statistical region.

## Sections of State

Within a State or Territory, each section of State represents an aggregation of non-contiguous geographic areas with particular urban or rural characteristics. The sections of State within each State and Territory are the following:

Major Urban - all urban centres with a population of 100,000 and over;

Other Urban - all urban centres with a population of 1,000 to 99,999 and known holiday resorts of less population if they contain 250 or more dwellings, of which at least 100 are occupied on census night;

Locality - all population clusters of 200 to 999 persons; and

Rural Balance - the remainder of the State/ Territory.

The above section of State categories can be used in conjunction with other CD-based ASGC geographic areas to show section of State components within, say, statistical subdivisions or statistical divisions.

In addition to the above section of State categories, persons who were enumerated on off-shore oil rigs, drilling platforms and the like, aboard ship in Australian waters, or on an overnight journey by train or bus were included in an additional category, off-shore areas and migratory. There is one such category for each State and the Northern Territory.

## B. NON-ASGC AREAS

Census data are also available for Commonwealth and State electoral divisions and postcode areas. A postcode and a Commonwealth and State electoral division code is assigned to each CD. Where a CD is dissected by a postcode or electoral division boundary, the entire CD was allocated to the postcode or electoral division in which the greater part of the CD population was estimated to lie.

# Census 86 

Dear Householder,
Census Night is on Monday, 30 June 1986.
The Census is like a stocktake of our nation carried out at the one time, Census Night. Statistics from it show how many people there are in each part of Australia, what they do and how they live. The Census is the only practical way to get this information and is essential for planning our future.

So the Census helps to make a better Australia.
The Census is authorised by the Census and Statistics Act 1905 which provides for the compulsory completion of this form and its return to your Census Collector. The same $A$ also protects your privacy. It forbids the publication of, or passing to anyone outside the Statistics Bureau, any infemation or statistics that could identify any person. Under nt circumstances are any names or addresses kept.

To help you, below is an easy guide to gmin Census Form. Use it with your Census 86 boo let

## Who to include on yoms iorn

How to answer earnquestion
Please use black or blue hall pointpen, ornt.
Read everything catefuly. Git youn ansyer, then go to the next question.

Most questions ony ned y the the answer box. Numbers and letters along id\& fhe boues are only for process yx purposes.

Klyoy do not know the onact answer, give the best

## Your privacy.

Ihark person in this household prefers a separate
Cen.0. Form, for p, civacy reasons, ask your Census Collector for a Persohal Movin and a Privacy Envelope. For that person,
anter name, sear, relationship to Person 1 and write "P.F" in the age quesios on this form. The completed Personal Form nould sealed in the envelope and given unopened to ins collector.

You may also ask for a Privacy Envelope if you do not
In question 1 , list all persons (IICLODINGYISTRAS) who spent the night of Monday, 30 twne 98 , jinhil ho teh ild Include any persons who returred on Thesday 1 Jul 1986 , without having been counted so Aewzert ehe. USBONE COLUMN FOR EACH PERYOM

If there are mofe that 8 gersops in thishousehold, ask your Census Colletron Lorexta Fersonalforms.

## What is Ho Heschdl?

Persons living and eation rogethor as a domestic unit are a household. A person why lines glone is also a household. If there is more than one housebold at this address, ask your Census Collector for as many extra Household Forres as you need. A SEPARATE FORM MUST BE USED FOR EACH HOUSEHOLD.

## Finished?

After filling in the Census Form, please sign it and write the household address in the address panel below.

Your collector will return as soon as possible after Monday, 30 June 1986, for the completed Census Form.

If you have any difficulty filling out this form, please refer to your Census 86 booklet. If you still have a problem, ask your Census Collector for help or phone the Census Hotline on_

Thank you for your help.

AUSTRALIAN STATISTICIAN

For each person who uses a Personal Form for privacy reasons, complete questions 1, 2 and 4 and write "P.F." in question 3 on this Form.

Page 6

Please turn to dwelling questions

## PLEASE AMSWER OUESTIONS ABOUT THIS DWELLING

## H1. How many rooms are there in this dwelling?

- Write the number of each type of room,
for example, $\qquad$ ..........Bedroom(s).
- Count each room once only.
- A room shared with another household should be counted only by the principal householder.
- Do not count toilets, pantries, laundries, storerooms, halls or corridors.

Number
Type of Room

.......Bedroom(s)
.......Combined lounge/dining room
.......Lounge room
.......Dining room
.......Kitchen
.......Bathroom
........Family room
.......Study
.......Other rooms (please state)

H2. How many registered motor vehicles owned or used by members of this household were garaged or parked at or near this dwelling for the night of Monday, 30 June 19867

- Exclude motor bikes, motor scooters, tractors.
- Include company vehicles kept at home.

None1 motor vehicle2 motor vehicles
$3 \square$3 motor vehicles4 motor vehicles or more

Go to Question H3

H3. Is this dwelling rented by you or any usual member of this household?
No

To whom is rent paid?State Housing Authority Other Government Agency Other

What is the weekly rent?

$$
\mathbf{\$} . . .
$$

$\qquad$

Is this dwelling rented fumished or unfurnished?

Is this dwalling owned (or being bought) by you or any usual member of this housohold?

Yes, owned (paid-off) Yes, being bought No

## If being bought:

What monthly payment (or average monthly payment) is boing made on the loan(s) for this dwalling?
$\$$ $\qquad$ ..per month.

For a household with more than 8 persons, please contact the Census Collector.
