EXPLANATORY NOTES

Introduction

This publication is one of a series containing results from the 1986 Census of Population and Housing for each State and Territory and for Australia. It presents 47 tables summarising characteristics of persons, families and dwellings based on place of enumeration with the exception of Table CU47 (i.e. the counts are based on where persons were located on census night, 30 June 1986). More detailed cross-classified tables will be available for States, Territories and Australia in the publication series *Census 86 — Cross-classified Characteristics of Persons and Dwellings* (2490.0-2498.0).

Census counts on place of enumeration basis (C) are not the same as census counts on place of usual residence basis (U), or the estimated resident population (ERP) figures released by the ABS. A brief description of the two bases of enumeration and the ERP is given in Section 3. More details can be found in *The 1986 Census Dictionary* (2174.0). Census table numbers are prefixed as appropriate with the letter 'C' or 'U' to denote the basis of the counts. This publication contains only tables in the 'C' category, except for Table CU47.

Statistics from earlier censuses are included in the tables, where appropriate, to enable their comparison over time.

Further details on individual topics and classifications can be found in *The 1986 Census Dictionary* (2174.0).

2. Scope and coverage

The 1986 Census of Population and Housing aimed at counting every person who spent census night, 30 June 1986, in Australia, including persons on vessels in or between Australian ports, or on board long-distance trains, buses or aircraft. All private dwellings were counted, whether occupied or unoccupied. Occupied non-private dwellings, such as hospitals, prisons, hotels, etc. were also included. People were counted where they were on census night, which may not have been where they usually lived. Place of usual residence was asked of each person, and answers, where they differed from enumeration address, were coded to statistical local area level. Census counts based on place of usual residence are available in other output products. Visitors to Australia were enumerated regardless of how long ago they had arrived or how long they planned to stay. They were included in the counts based on place of enumeration but not in those counts based on usual residence. Australian residents out of the country on census night were excluded from the count.

Diplomatic personnel and their families are out of the scope of the census, as are diplomatic residences.

3. Definitions

Census Count — Place of Enumeration (C)

Persons were counted where they were actually located on census night. Overseas visitors were included and Australians overseas were excluded. In this publication no adjustment is made for census underenumeration.

Census Count — Place of Usual Residence (U)

Persons were counted according to their stated place of usual residence (i.e. their answer to question 6 —see Appendix A). Overseas visitors and Australians overseas were excluded, and no adjustment was made for census underenumeration. Except for Table CU47, statistics on place of usual residence basis are not included in this publication.

Estimated Resident Population (ERP)

These estimates are formed by adding estimates of Australians overseas, and of the census undercount, to the census count at place of usual residence. The ERP at census date is updated between population censuses. ERP statistics are not included in this publication.

Section of State

Within a State or Territory, each section of State represents either an aggregation of non-contiguous geographic areas with particular urban or rural characteristics. The sections of State within each State and Territory are as follows:

- Major urban — all urban centres with a population of 100,000 and over;

- Other urban — all urban centres with a population of 1,000 to 99,999, and known holiday resorts of less population if they contain 250 or more dwellings, of which at least 100 are occupied on census night;

- Locality — all population clusters of 200 to 999 persons;

- Rural balance — the rural remainder of the State/Territory; and

- Off-shore and migratory — persons who were enumerated on off-shore oil rigs, drilling platforms and the like, aboard ship in Australian waters, or on an overnight journey by train or bus. There is one such category for each State and the Northern Territory.

Dwellings

For the 1986 Census, dwellings are classified into four groups: occupied private dwellings; occupied caravans etc. in caravan parks; unoccupied private dwellings; and non-private dwellings.

(a) An *occupied private dwelling* is defined as the premises occupied by a household (see below) on census night (except households occupying caravans etc. in caravan parks — see (b)). A private dwelling is normally a house, flat, part of a house or even a room, but can also be a house above shops or offices, a boat, a tent, houseboat, or caravan if standing on its own block of land and not occupied by members of the same household resident in an adjacent dwelling.

Because a structure may contain more than one household, the number of dwellings (households) counted in the census can be greater than the total number of known structures in an area.

(b) For the 1986 Census, an *occupied caravan etc. in a caravan park* is treated as a separate household. This category also includes occupied boats in marinas. In previous censuses, caravans etc. in caravan parks were considered to be parts of a non-private dwelling (the caravan park) and as such no family relationship data were collected for them. This change in classification will affect the comparison of family and non-private dwelling data with previous censuses.

(c) An *unoccupied private dwelling* is a structure built specifically for private living purposes and capable of being lived in, but unoccupied at the time of the census. Vacant houses, holiday homes, huts, cabins (other than seasonal workers' quarters) and houseboats are counted as unoccupied dwellings; but vacant tents, garages and caravans if not on a separate block (and if not normally occupied) are not. Only private dwellings can be classified as unoccupied (i.e. unoccupied caravans etc. in caravan parks, and non-private dwellings are not counted). Unoccupied dwellings include: dwellings which are vacant because they have been newly completed; dwellings which are vacant for demolition or repair; dwellings to let; and dwellings in which all members of the household were absent on census night.

(d) *Non-private dwellings* (NPDs) are dwellings with accommodation not in the dwelling categories listed above, and are classified according to their function. These dwellings include schools, hotels, motels, guest houses, boarding houses, gaols, religious and charitable institutions, hospitals, nursing homes, defence establishments and other communal dwellings. Usually, occupants of such dwellings use communal facilities (such as hotel dining-rooms or mess halls). Self-contained units provided by commercial enterprises such as hotels, motels, homes for the elderly, or guest houses are treated as part of a non-private dwelling, not as separate dwellings. Campers out and persons classed as migratory on census night were also included in the NPD count.

Household

For census purposes, a household is either a person living alone, or a group of people living together as a single domestic unit with common eating arrangements. It is possible for more than one household to live in one house or structure. For example, a lodger who lives with a family and provides all his own food is not a member of the family's household but constitutes a separate household and completes a separate household form. The premises occupied by households are classified as either occupied private dwellings or as caravans etc. in a caravan park.

Campers out

Persons who spent census night in the open in cars, caravans or trucks pulled up at the side of the road for that night only, or persons in other temporary camps or accommodation erected for that night only, are classified as campers out. Such persons are included in the population of the statistical local areas in which they were enumerated.

4. Data quality

Statistical collections such as the census are subject to a number of sources of error. While some errors (such as deliberate misreporting) mostly defy detection and correction procedures, the effect of such errors in overall census results is generally insignificant. Information on data quality is also available.

Main sources of error in the census are:

(a) *Underenumeration.* Despite efforts to obtain full coverage of persons and dwellings (other than those associated with overseas diplomatic missions), some undercounting still occurs. A measure of the extent of underenumeration is obtained from a survey of households undertaken very shortly after the census. Undercounting of persons in the 1986 Census was estimated to be 1.9 per cent for Australia as a whole and 2.3 per cent for Western Australia (on a place of enumeration basis).

(b) *Partial response.* In those instances where the householder omitted to provide a response to a question, a 'not stated' code was allocated with the exception of non-response to age, sex and marital status, and SLA of usual residence. These variables were imputed using other information on the census form, and specially constructed random tables.

(c) *Respondent error.* Computer editing procedures are used to detect obvious errors made by individuals in completing the form (for example, a six year old male who was married). Such procedures cannot detect all respondent errors and some remain in final output.

(d) *Processing error.* Errors created during the processing of the census are kept at an acceptable level by means of a quality control system, which involves sample checking at different stages of the coding and keying operations, and taking corrective action where necessary.

5. Further information

Further information about 1986 Census statistics is available from the nearest ABS office (see Appendix B for addresses and telephone numbers). The information paper *Census 86 — Data Release Plans* (2173.0) describes standard output products released from the 1986 Census. Details of tabulations are contained in the *Catalogue of 1986 Census Tables* (2175.0).

6. Census 86 publications

Other statistical publications currently planned or available from the 1986 Census of Population and Housing are:

(a) In 1981 persons who reported an occupation of 'housewife' (except farmers' wives), 'student' or 'pensioner' were incorrectly left in the labour force. These persons have been re-allocated to the category 'not in labour force' in this table and in table C29 to facilitate comparison with 1986 Census figures. (b) In 1981 labour force status was imputed for 'Not stated' responses. (c) 'Not stated' responses have been disregarded in calculation of 1986 percentages. It is considered that imputation of these responses would not have significantly affected results obtained.

AUSTRALIAN BUREAU OF STATISTICS

30 JUNE 1986
Census 86

Household Form

Dear Householder,

Census Night is on Monday, 30 June 1986.

The Census is like a stocktake of our nation carried out at the one time, Census Night. Statistics from it show how many people there are in each part of Australia, what they do and how they live. The Census is the only practical way to get this information and is essential for planning our future.

So the Census helps to make a better Australia.

The Census is authorised by the *Census and Statistics Act 1905* which provides for the compulsory completion of this form and its return to your Census Collector. The same Act also protects your privacy. It forbids the publication of, or passing to anyone outside the Statistics Bureau, any information or statistics that could identify any person. Under no circumstances are any names or addresses kept.

To help you, below is an easy guide to filling in your Census Form. Use it with your Census 86 booklet.

Who to include on your form.

In question 1, list all persons (INCLUDING VISITORS) who spent the night of Monday, 30 June 1986, in this household. Include any persons who returned on Tuesday 1 July 1986, without having been counted somewhere else. USE ONE COLUMN FOR EACH PERSON.

If there are more than 8 persons in this household, ask your Census Collector for extra Personal Forms.

What is a Household?

Persons living and eating together as a domestic unit are a household. A person who lives alone is also a household. If there is more than one household at this address, ask your Census Collector for as many extra Household Forms as you need. A SEPARATE FORM MUST BE USED FOR EACH HOUSEHOLD.

How to answer each question.

Please use black or blue ball point pen, or ink.

Read everything carefully. Give your answer, then go to the next question.

Most questions only need a tick in the answer box. Numbers and letters alongside the boxes are only for processing purposes.

If you do not know the exact answer, give the best answer you can.

Your privacy.

If any person in this household prefers a separate Census Form for privacy reasons, ask your Census Collector for a Personal Form and a Privacy Envelope. For that person, enter name, sex, relationship to Person 1 and write "P.F." in the age question on this form. The completed Personal Form should be sealed in the envelope and given unopened to the collector.

You may also ask for a Privacy Envelope if you do not want your collector to see your completed Census Form.

Finished?

After filling in the Census Form, please sign it and write the household address in the address panel below.

Your collector will return as soon as possible after Monday, 30 June 1986, for the completed Census Form.

If you have any difficulty filling out this form, please refer to your Census 86 booklet. If you still have a problem, ask your Census Collector for help or phone the Census Hotline on _____

Thank you for your help.
