EXPLANATORY NOTES

Introduction

This publication is one of a series containing results from the 1986 Census of Population and Housing for each State, Territory, and Australia. It presents a series of detailed census counts of persons and dwellings cross-classified by various social, demographic and housing characteristics for Queensland based on place of enumeration (i.e. the counts are based on where persons were located on census night, 30 June 1986).

2. Census counts on place of enumeration basis (C) are different from census counts on place of usual residence basis (U), and the estimated resident population (ERP) figures released by the ABS. A brief description of the two bases of enumeration and the ERP is given in paragraphs 9-11. More details can be found in *The 1986 Census Dictionary* (2174.0). All census table numbers are prefixed as appropriate with the letter 'C' or 'U'. All of the tables in this publication are in the 'C' category.

3. Printed census publications contain broad summaries only, and represent a very small amount of the total census data released. More detailed cross-tabulations for the large geographic levels (e.g. States or statistical regions), and somewhat less detailed tabulations for small areas (e.g. collection districts or postcodes) are available on microfiche, magnetic tape and floppy disk. For further information see *Census 86 - Data Release Plans* (2173.0).

4. The tables in this publication are divided under six major themes of 'birthplace', 'usual residence', 'income', 'labour force', 'demography and social', and 'housing'. The major theme of each table determines the section in which data on particular characteristics appear. For example, the table on birthplace by age appears in the birthplace section and not the demography and social section. However, tables classified to the major themes (sections) in this way may be cross-tabulated with a variable constituting a primary theme for some other section. In such cases, a cross-reference to the secondary variable is made in the appropriate section in the list of contents.

5. Further details on individual topics and classifications can be obtained from the relevant information papers (see paragraph 21).

6. To avoid the inadvertent identification of any person or dwelling, the tables in this publication have been subjected to random adjustments. The random adjustments are insignificant in relative terms for large counts, however, it is invalid to attach statistical significance to cells containing very small counts (i.e. zero to three). For more information see the term INTRODUCED RANDOM ERROR in *The 1986 Census Dictionary* (2174.0)

Scope and coverage

7. The 1986 Census of Population and Housing aimed at counting every person who spent census night, 30 June

1986, in Australia, including persons on vessels in or between Australian ports, or on board long-distance trains, buses or aircraft. All private dwellings were counted, whether occupied or unoccupied. Occupied non-private dwellings, such as hospitals, prisons, hotels etc. were also included. People were counted where they were on census night, which may not have been where they usually lived. Place of usual residence was asked of each person, and answers, where they differed from enumeration address, were coded to statistical local area (SLA) level. Census counts based on place of usual residence will be available in other output products. Visitors to Australia were enumerated regardless of how long ago they had arrived or how long they planned to stay. Australian residents out of the country on census night were excluded from the count.

8. Diplomatic personnel and their families are out of the scope of the census, as are diplomatic residences.

Definitions

Census Count — Place of Enumeration (C)

9. Persons were counted where they were actually located on census night. Overseas visitors were included and Australians overseas were excluded. No adjustment is made for census underenumeration.

Census Count — Place of Usual Residence (U)

10. Persons were counted according to their stated place of usual residence (i.e. their answer to question 6 - see Appendix A). Overseas visitors and Australians overseas were excluded. No adjustment is made for census underenumeration.

Estimated Resident Population (ERP)

11. These estimates are formed by adding estimates of Australians overseas, and of the census undercount, to the census count at place of usual residence. The ERP at census date is updated between population censuses. ERP statistics are not included in this publication.

Section of State

12. Within a State or Territory, each section of State represents an aggregation of non-contiguous geographic areas with particular urban or rural characteristics. The sections of State within each State and Territory are the following:

- Major Urban — all urban centres with a population of 100,000 and over;
- Other Urban — all urban centres with a population of 1,000 to 99,999 and known holiday resorts of less population if they contain 250 or more dwellings, of which at least 100 are occupied on census night;

- Locality — all population clusters of 200 to 999 persons;
- Rural Balance — the rural remainder of the State/Territory; and
- Off-shore and Migratory — persons enumerated on census night on off-shore oil rigs, drilling platforms and the like, on board vessels in and between Australian ports, or on board long-distance trains, buses or aircraft. There is one such category for each State and the Northern Territory. The Australian Capital Territory has no migratory population.

Dwellings

13. For the 1986 Census, dwellings are classified into four basic groups: occupied private dwellings; occupied caravans etc. in caravan parks; unoccupied private dwellings; and non-private dwellings.

- (a) An *occupied private dwelling* is defined as the premises occupied by a household (see paragraph 15) on census night (except households occupying caravans etc. in caravan parks — see (b)). A private dwelling is normally a house, flat, part of a house or even a room, but can also be a house above shops or offices, a boat, a tent, houseboat, or caravan if standing on its own block of land and not occupied by members of the same household resident in an adjacent dwelling. Because a structure may contain more than one household, the number of dwellings (households) counted in the census can be greater than the total number of structures in any given area.
- (b) For the 1986 Census, an *occupied caravan etc. in a caravan park* is treated as a separate household. This category also includes occupied boats in marinas. In previous censuses, caravans etc. in caravan parks were considered to be parts of a non-private dwelling (the caravan park) and as such no family relationship data were collected for them. This change in classification will affect the comparison between the family and non-private dwelling data with previous censuses.
- (c) An *unoccupied private dwelling* is a structure built specifically for private living purposes and capable of being lived in, but unoccupied at the time of the census. Vacant houses, holiday homes, huts, cabins (other than seasonal workers' quarters) and houseboats are counted as unoccupied dwellings; but vacant tents, garages and caravans if not on a separate block (and if not normally occupied) are not. Only private dwellings can be classified as unoccupied. Unoccupied dwellings include: dwellings which are vacant for demolition or repair; dwellings to let; and dwellings where all

members of the household were absent on census night.

- (d) *Non-private dwellings* (NPDs) are dwellings with accommodation not in the dwelling categories listed above, and are classified according to their function. These dwellings include schools, hotels, motels, guest houses, boarding houses, gaols, religious and charitable institutions, hospitals, nursing homes, defence establishments and other communal dwellings. Usually, occupants of such dwellings use communal facilities (such as hotel dining-rooms or mess halls) attached to the particular establishment. Self-contained units provided by commercial enterprises such as hotels, motels, homes for the elderly, or guest houses are treated as part of a non-private dwelling, not as separate dwellings. Campers out on census night are also included in the NPD count.

Household

14. For census purposes, a household is either a person living alone, or a group of people living together as a single domestic unit with common eating arrangements. It is possible for more than one household to live in one house or structure. For example, a lodger who lives with a family and provides all his own food is not a member of the family's household but constitutes a separate household and, therefore, completes a separate household form. The premises occupied by households are classified as either occupied private dwellings or as caravans etc. in a caravan park.

Campers out

15. Persons who spent census night in the open in cars, caravans or trucks pulled up at the side of the road for that night only, or persons in other temporary camps or accommodation erected for that night only, are classified as campers out. Such persons are included in the population of the statistical local area in which they were enumerated.

Data quality

16. Statistical collections such as the census are subject to a number of sources of error. While some errors (such as deliberate misreporting) defy detection and correction procedures, the effect of such errors in overall census results is generally insignificant. Information on data quality is also available.

Main sources of error in the census are :

- (a) *Underenumeration*. Despite efforts to obtain full coverage of persons and dwellings (other than those associated with overseas diplomatic missions), some undercounting still occurs. A measure of the extent of underenumeration is obtained from a small survey of households undertaken very shortly after the census. Underenumeration of persons in the 1986 Census was

estimated to be 1.9 per cent for Australia as a whole and 2.7 per cent for Queensland (on a place of enumeration basis).

- (b) *Partial response.* In those instances where the householder omitted to provide a response to a question, a 'not stated' code was allocated; with the exception of non-response to age, sex, marital status, and SLA of usual residence. These variables were imputed using other information on the census form, and specially constructed random tables. In addition, variables such as Aboriginality and birthplace were imputed where the appropriate response was clear from other information on the census form.
- (c) *Respondent error.* Computer editing procedures are used to detect obvious errors made by individuals in completing the form (for example, a six year old male who was married). However, these procedures cannot detect all such errors and some remain in final output.
- (d) *Processing error.* Errors created during the processing of the census are kept at an acceptable level by means of a quality control system which involves sample checking at different stages of the coding and keying operations, and taking corrective action where necessary.
- (e) *Introduced random adjustments.* Adjustments are made to table cells to allow the maximum of detailed census data to be released, while protecting the confidentiality of information about individual persons. The adjustments made are very small and the general value of the data is not impaired. However, no reliance should be placed on cells with counts of three or less.

For further information on sources of error, refer to the appropriate entries in *The 1986 Census Dictionary* (2174.0).

If you can't afford to use a research company, buy your own.

To make accurate business decisions, you need the right information.

Imagine you are the manager of a chain of boutiques selling up-market ladies' clothes. You have to decide where to locate new shops. Wouldn't you like to know where you'd find the largest concentration of women earning over \$32,000 a year?

Or, you could be a manufacturer wanting to know the market penetration of his products. Or a retailer wishing to establish a typical profile of his customers.

In the past you had two options. Consult a research company, or take a guess.

The first option could cost you an arm and a leg. The second option has always been free, but could end up costing you more than the first if you guess wrong.

Now there is a third option, CDATE86.

Using the latest technology, the Australian Bureau of Statistics has recorded all the information from the last two censuses, on a single compact disk.

Where Australians work. Where they live. What they are like. Their ages. Incomes. Occupations. And a lot, lot more.

All of it accessible in a way that you can manipulate quickly and easily. You could get answers to questions, like the ones we asked above, in a matter of minutes.

You can even enter information from CDATE86 onto your own spreadsheets. Or add your own computer data into the CDATE86 program.

And it's yours to keep, for a fraction of the fee you'd pay to use a research company for a one off project.

To find out more call the Australian Bureau of Statistics for a free demonstration.

You'll discover that CDATE86 does virtually everything, except interview consumers.

30 JUNE 1986

Census 86

Household Form

Dear Householder,

Census Night is on Monday, 30 June 1986.

The Census is like a stocktake of our nation carried out at the one time, Census Night. Statistics from it show how many people there are in each part of Australia, what they do and how they live. The Census is the only practical way to get this information and is essential for planning our future.

So the Census helps to make a better Australia.

The Census is authorised by the *Census and Statistics Act 1905* which provides for the compulsory completion of this form and its return to your Census Collector. The same Act also protects your privacy. It forbids the publication of, or passing to anyone outside the Statistics Bureau, any information or statistics that could identify any person. Under no circumstances are any names or addresses kept.

To help you, below is an easy guide to filling in your Census Form. Use it with your Census 86 booklet.

Who to include on your form.

In question 1, list all persons (INCLUDING VISITORS) who spent the night of Monday, 30 June 1986, in this household. Include any persons who returned on Tuesday, 1 July 1986, without having been counted somewhere else. USE ONE COLUMN FOR EACH PERSON.

If there are more than 8 persons in this household, ask your Census Collector for extra Personal Forms.

What is a Household?

Persons living and eating together as a domestic unit are a household. A person who lives alone is also a household. If there is more than one household at this address, ask your Census Collector for as many extra Household Forms as you need. A SEPARATE FORM MUST BE USED FOR EACH HOUSEHOLD.

How to answer each question

Please use black or blue ball point pen, or ink.

Read everything carefully. Give your answer, then go to the next question.

Most questions only need a tick in the answer box. Numbers and letters alongside the boxes are only for processing purposes.

If you do not know the exact answer, give the best answer you can.

Your privacy.

If any person in this household prefers a separate Census Form for privacy reasons, ask your Census Collector for a Personal Form and a Privacy Envelope. For that person, enter name, sex, relationship to Person 1 and write "P.F." in the age question on this form. The completed Personal Form should be sealed in the envelope and given unopened to the collector.

You may also ask for a Privacy Envelope if you do not want your collector to see your completed Census Form.

Finished?

After filling in the Census Form, please sign it and write the household address in the address panel below.

Your collector will return as soon as possible after Monday, 30 June 1986, for the completed Census Form.

If you have any difficulty filling out this form, please refer to your Census 86 booklet. If you still have a problem, ask your Census Collector for help or phone the Census Hotline on _____

Thank you for your help.
