\* The Migratory Population has been computed chiefly from the number of householders known to have escaped enumeration owing to their having changed their residences between the time of the schedules being deposited and the time they should have been collected, with a few additions of persons reported by the enumerators to have been encamped in their districts on the Census night, but whom the sub-enumerators did not succeed in meeting with. No attempt has been made to form an estimate of unenumerated persons of whose existence no definite information was obtained.
