AUSTRALIAN DEMOGRAPHY, 1946.

PREFACE.

The present issue of the Demography Bulletin, the sixty-fourth in the series, furnishes detailed statistics relating to the year 1946. Statistics for the years 1860 to 1946 are also included in summary form.

The preliminary results of the Census of 30th June, 1947, have been included in Section I., and oversea migration statistics in Section II. Some of the leading particulars of the Australian Life Tables, based on the results of the 1933 Census and on the mortality statistics for the period 1932-34, are shown in Section VIII.

Tabulations in Sections IV., Births, and V., Deaths, have been made according to place of usual residence within the State of registration. The classification of occupations appearing in these sections, and in Sections II., Migration, and III., Marriages, is the classification used in the Census of England and Wales, 1931, as adapted to the requirements of the Australian Census of 1933, and further amended in 1939. In Section V., Deaths, the classification of the causes of death is in accordance with the "International List of Causes of Death, 1938" (International Commission, Paris, 1938), with slight modifications to suit Australian conditions. Details of causes of death have been included for the years 1943 to 1946.

From September, 1939, to June, 1947, estimates of population include Australian defence personnel, irrespective of their location, in the States and Territories from which they enlisted. Allied defence personnel, internees sent to Australia from overseas and prisoners of war are excluded from estimates of population.

Population estimates from 1939 to 1943 had been adjusted in previous issues to agree with the results of a quasi-Census based on tabulations of civilian registration cards issued in June, 1943, but these adjustments have been superseded by a general revision of population estimates for the complete intercensal period 1933-47 in accordance with the preliminary results of the 1947 Census. These intercensal adjustments are provisional only and are subject to revision in accordance with the final results of the 1947 Census.

In view of the uncertainty of war-time records of interstate migration, populations of States subsequent to June, 1943, have been estimated on the basis of natural increase, deaths of defence personnel and oversea migration.

The considerable war-time movement of population as between statistical divisions in each State has rendered difficult the estimation of population according to divisions and has virtually destroyed the meaning of the crude birth and death-rates usually calculated for such divisions. Both the estimates and the rates have therefore been omitted from the Bulletin.

The deaths as recorded in Section V. exclude deaths of defence personnel for the years 1942 to 1946, but include such of those deaths as were registered with civil Registrars during the years 1940 and 1941. The figures shown in this section thus relate to the Australian civilian population. Death-rates for the years 1939 to 1946 are calculated on total population and must be regarded as approximate.

Thanks are expressed to the various State Government Departments responsible for the registration of births, deaths and marriages for the valuable assistance rendered by them in furnishing the data for the compilation of the Vital Statistics. Special thanks are due to Mr. R. C. Gilligan, B.Com., for the work done in the preparation of this Bulletin.

S. R. CARVER,
Acting Commonwealth Statistician.

(a) Unrecorded movement disclosed by the preliminary results of the Census of 30th June, 1947. Prior to 30th June, 1933, discrepancies disclosed by the various censuses were corrected by adjusting recorded oversea departures. (b) Deaths of defence personnel were not recorded separately for population purposes prior to the 1939-45 War.

NOTE.—Minus sign (—) denotes excess of departures over arrivals.

(a) For total increase recorded for each year commencing with 1860, see VII.—Statistical Summary. (b) Included with South Australia prior to 1901. (c) Part of New South Wales prior to 1911. (d) Includes deaths of defence personnel from September, 1939. (e) Includes interstate migration as from July, 1943.

NOTE.—Differences between the figures above and totals of figures for each element of increase shown separately in Tables 14, 15 and 16 (natural increase, deaths of defence personnel and net migration respectively) represent unrecorded movement of population from 1st July, 1938, to 31st December, 1940, as disclosed by the preliminary results of the 1947 Census. Particulars of total increase have been adjusted for this discrepancy but no separate adjustment has been applied to individual elements of increase. Intercensal discrepancies disclosed by previous Censuses were adjusted on recorded oversea departures.

Minus sign (-) denotes decrease.

No. 14.—Population : Natural Increase (Excess of Births over Deaths)(a).

NOTE.—The table above indicates the State or Territory where migrants disembarked from overseas or embarked for overseas. The figures do not indicate the effect of migration on the populations of the several States; for that purpose it is necessary to take interstate migration into account. Because, however, of the impracticability of obtaining accurate records of interstate passenger traffic during the war and in the post-war period, when large movements of troops occurred, no allowance has been made in population estimates for interstate migration since 30th June, 1943.

NOTES.—(1) Minus sign (—) denotes excess of departures over arrivals. (2) Although the title of this table has been changed, the term "Racial Origin" being substituted for "Nationality or Race," there has been no variation in the method of compilation. The particulars shown are directly comparable with those previously published under the heading of "Nationality or Race." The figures should not, however, be regarded as a completely accurate record of "Racial Origin" as they are based on the passenger's own statement as to race, which in many cases may incorrectly express the country of his nationality or birthplace rather than actual race. So far as available information permits, however, migrants are classified according to race. This applies particularly in cases where a person's nationality differs from race through naturalization or marriage.

(a) The rate for each year is calculated on the basis of births in each year. (b) The "gross" reproduction rate is the estimated average number of female children born to every woman who lives through child-bearing age. (c) The "net" reproduction rate allows for the effects of mortality and is an index of the number of women who, in the next generation, will replace each woman of reproductive age in this generation.

NOTE.—The mortality experience used throughout the table above for the calculation of the net reproduction rate is that for the period 1932-34. The numbers of females of child-bearing age on which the rates above are based have not been adjusted in accordance with the results of the Census of 30th June, 1947.

NOTE.—Comparison of causes of death in the table above with years prior to 1940 should be made with caution owing to changes in classification which were adopted in 1931 and 1940. Demography Bulletins Nos. 49 and 58 indicate the extent of the changes and the connexion between former classification title numbers and those at present in use.

Causes in respect of which no deaths occurred have been omitted from this table. A complete classification of causes of death is given in Table No. 80.

(a) Northern Territory figures included with South Australia prior to 1901. (b) Part of New South Wales prior to 1911. (c) See note (c), Table No. 115c. (d) Includes deaths of defence personnel as from September, 1939. (e) Excludes interstate migrations as from July, 1943.

NOTE.—Minus sign (-) denotes decrease of population.

Differences between the figures above and totals of figures for elements of increase shown separately in the two following tables (natural increase, and net migration respectively) represent, after taking into account deaths of defence personnel for the period 1939 to 1946, unrecorded movement of population from 1st July, 1933, to 31st December, 1946, as disclosed by the preliminary results of the 1947 Census. Particulars of total increase have been adjusted for this discrepancy but no separate adjustment has been applied to individual elements of increase. Inter-censal discrepancies disclosed by previous Censuses were adjusted on recorded oversea departures.

No. 122.—Natural Increase (Excess of Births over Deaths).
