BULLETIN No. 68.

PREPARED UNDER INSTRUCTIONS FROM THE RIGHT HONORABLE THE TREASURER,

BY
S. R. CARVER,
ACTING COMMONWEALTH STATISTICIAN.

AUSTRALIAN DEMOGRAPHY, 1950.

PREFACE.

The present issue of the Demography Bulletin, the sixty-eighth in the series, furnishes detailed statistics relating to the year 1950. Statistics for the years 1876 to 1950 are also included in summary form.

Section I., which presents population statistics up to 31st December, 1950, contains a summary of certain Census results up to and including the Census of 30th June, 1947, together with population estimates for selected dates and estimates of the mean population for selected periods. All population statistics for dates up to 30th June, 1947, and all mean populations for calendar years up to 1946 and financial years up to 1946-47, inclusive, are final, having been adjusted to accord with Census results. Population statistics for dates or years subsequent to these are subject to revision when another Census is taken.

From September, 1939, to March, 1947, estimates of population include Australian defence personnel, irrespective of their location, in the States and Territories from which they enlisted. Allied defence personnel, internees sent to Australia from overseas and prisoners of war are excluded from estimates of population.

Detailed statistics of oversea migration are included in Section II., in which the figures relate to oversea passenger journeys whether by sea or air. The statistics for the period September, 1939, to June, 1947, exclude movements of defence personnel, internees from overseas and prisoners of war.

As from 1st July, 1948, migrants have been classified separately according to both nationality and race instead of on a composite basis as had been the case previously. The particulars under these headings for 1949 and 1950 published in Section II. are therefore no longer directly comparable with those published for years prior to 1948.

The statistics of marriages in Section III. and births in Section IV. are substantially the same as in the previous year but Section III. has been extended to embrace a sub-section showing divorce statistics in detail for the year 1950 together with summary tables for the previous four to six years.

Commencing with 1950 the classification of causes of death is made according to the International Statistical Classification of Diseases, Injuries and Causes of Death (Sixth Revision, 1948, of the International List of Causes of Death) together with the international rules for selecting the underlying cause of death, as explained more fully in *Official Year Book* No. 39, Chapter XIV.—Vital Statistics. Although the classification is made in accordance with the full detailed list of three-digit categories (with some fourth-digit sub-categories) the tables presented in this Bulletin have been shortened by grouping categories which are not important as causes of death. This grouping has been arranged so as to preserve comparability with past statistics as much as possible and to permit re-grouping into the Intermediate List of 150 Causes. Tables Nos. 91 and 95 have been compiled in accordance with the Fifth Revision of the International List of Causes of Death, together with the rules of selection in force with that Revision, so as to facilitate comparison with previous years and also to provide a basis of conversion for earlier years from the former classification to the present one. Advantage has been taken of the change in the classification to alter the style of the cause of death tables. It is thought that the new style will provide easier reference and more convenience in extraction of figures than formerly.

The deaths as recorded in Section V. include deaths of defence personnel which were registered with civil registrars in the period September, 1939, to December, 1941, but from January, 1942, to June, 1947, deaths of Australian and Allied defence personnel, internees from overseas and prisoners of war are excluded. The figures shown in this section thus relate to the Australian civilian population. Death-rates for the years 1939 to 1947 are calculated on total population and must be regarded as approximate.

Section VI., relating to the External Territories, has been extended to show population in addition to the vital statistics. Also, the tables have been extended to cover the years 1946 to 1950 thus giving a comparison over the first five years following the re-establishment of civil administration in those Territories in which civil control had been suspended during the period of hostilities in the Pacific area.

The graphs introduced in the preceding issue have been continued and appear at the back of this Bulletin.

For convenience in presentation and economy of space the Statistical Summary in Section VIII. has been restricted to the 75 years, 1876 to 1950. Demography Bulletin No. 67, 1949, is thus the last issue to contain the complete presentation of the statistical summary.

Thanks are expressed to the various State Statisticians, State Government Departments responsible for the registration of births, deaths and marriages and to the Department of Territories for the valuable assistance rendered by them in furnishing the data for the compilation of the vital statistics. For the work done in the preparation of this Bulletin special thanks are due to Mr. W. J. Willecocks, Supervisor of the Demography Branch, and the staff under his control.

(a) For total increase recorded for each year commencing with 1870, see Section VIII.—Statistical Summary. (b) Included with South Australia prior to 1901. (c) Part of New South Wales prior to 1911. (d) For period September, 1939, to June, 1947, troop movements have been excluded and deaths of Australian defence personnel, whether in Australia or overseas, included. (e) Excludes interstate migration from July, 1943, to June, 1947.

NOTE.—Differences between the figures above and totals of figures for each element of increase shown separately in Tables 9, 10 and 11 (natural increase, net migration and deaths of Australian defence personnel respectively) represent unrecorded movement of population from 1st July, 1933, to 30th June, 1947, as disclosed by the results of the 1947 Census. Particulars of total increase have been adjusted for this discrepancy, which is believed to represent largely unrecorded migration, but in view of the abnormal period covered, and omissions in other records, no separate adjustment has been applied to individual elements of increase. Intercensal discrepancies disclosed by previous Censuses were adjusted on recorded departures. See Table 12 for summary.

Minus sign (-) denotes decrease.

NOTE.—The Metropolitan Divisions relate to the capital cities of the States and adjoining urban municipal areas within boundaries used for Census purposes.

The Urban Provincial Divisions comprise the capital cities of the Territories and, in States other than Tasmania, cities and towns outside the Metropolitan Divisions which are separately incorporated. In Tasmania, where most of the towns are not separately incorporated, boundaries were determined for Census purposes.

Rural Divisions comprise the remaining portion of each State and Territory.

(a) Deaths of defence personnel which were registered in civil registers in the years 1940 and 1941 and included in the figures of civilian deaths for those years have been deducted. (b) Excludes troop movements. Interstate migration has also been excluded for the period July, 1943, to June, 1947. (c) Unrecorded movement of population disclosed by the Census of 30th June, 1947. This item is believed to represent largely unrecorded migration but, in view of the abnormal period covered and omissions in other records, the discrepancy has not been apportioned between the various elements of population increase.

NOTE.—Minus sign (—) denotes decrease.

(a) Excess of total arrivals over total departures. (b) Excludes troop movements for the period September, 1939, to June, 1947. (c) Includes Maltese and Cypriote. (d) Includes Austrian. (e) Mainly Polish and Baltic races.

NOTE.—(1) Minus sign (-) denotes excess of departures over arrivals. (2) The particulars shown are directly comparable with those published in Bulletins prior to No. 64 under the heading of "Nationality or Race." The figures should not, however, be regarded as a completely accurate record of "Racial Origin" as they are based on the passenger's own statement as to race, which in many cases may express the country of his nationality or birthplace rather than actual race. So far as available information permits, however, migrants are classified according to race. This applies particularly in cases where a person's nationality differs from race through naturalization or marriage. From July, 1948 onwards, migrants have been classified separately according to both nationality and race and the particulars available are no longer directly comparable with those published above for previous years. See tables Nos. 29, 36 and 37.

(a) Excludes 58 still-born twins. (b) Excludes 20 still-born twins. (c) Excludes 12 still-born twins. (d) Excludes 6 still-born twins. (e) Excludes 102 still-born twins. (f) Excludes 1 still-born triplet. (g) Excludes 3 still-born triplets. (h) Excludes 1 still-born quadruplet. (i) Excludes 2 still-born twins. (j) Excludes 1 still-born twin. (k) Excludes 3 still-born twins.

NOTE.—The table above shows the number of confinements resulting in one or more live births. The figures exclude cases where the births were of still-born children only. In States other than New South Wales and Western Australia the registration of still-births is not compulsory and it is possible that in some cases where one child only of a multiple pregnancy is live born the confinement has been treated as a single birth. This applies particularly to South Australia.

(a) The rate for each year is calculated on the basis of births in each year. (b) The "gross" reproduction rate is a measure of the average number of female children who, according to the fertility rates on which the calculation is based, would be born to women during their lifetime. (c) The "net" reproduction rate is a measure of the average number of female children who would be born to women during their lifetime if they were subject at each age to the fertility and mortality rates on which the calculation is based.

NOTE.—The numbers of females of child-bearing age on which the rates above are based for years 1940-48 have not been adjusted in accordance with the results of the Census of 30th June, 1947.

NOTE.—Comparison of causes of death in the table above with years prior to 1940 should be made with caution owing to changes in classification which were adopted in 1931 and 1940. Demography Bulletins Nos. 49 and 58 indicate the extent of the changes and the connexion between the classification title numbers of the Fourth Revision and those of the Fifth Revision of the International List.

Causes in respect of which no deaths occurred have been omitted from this table. A complete classification of causes of death is given in Table No. 91.

No. 96.—Deaths: Causes of Death and Occupations of Males, Australia, 1950.

PAPUA.

NOTE.—Because of the outbreak of hostilities in the Pacific during the 1939-45 War civil administration in Papua was suspended on 11th February, 1942, and was not re-established until 30th October, 1945. Registration of births, deaths and marriages was resumed in 1946 and since then there have been many delayed registrations of vital events which occurred during the period of suspension: also, owing to geographic conditions, there is some delay at any time. For these reasons the birth and death tables below have been designed to show both the number of births and deaths registered in each year and the number of births and deaths which actually occurred in each year, irrespective of the date of registration.

NEW GUINEA.

(TRUST TERRITORY.)

NOTE.—Because of the outbreak of hostilities in the Pacific during the 1939–45 War civil administration in New Guinea was suspended on 11th February, 1942. Part of the Territory was returned to civil administration on 30th October, 1945, and, as circumstances permitted, civil control was extended until the whole of the Territory came under control of civil authorities on 24th June, 1946. Registration of births, deaths and marriages was resumed in 1946 and since then there have been many delayed registrations of vital events which occurred during the period of suspension; also, owing to geographic conditions there is some delay at any time. For these reasons the birth and death tables below have been designed to show both the number of births and deaths registered in each year and the number of births and deaths which actually occurred in each year, irrespective of the date of registration.

(a) For years prior to 1876 see Demography Bulletin No. 67, 1949. (b) Northern Territory figures included with South Australia prior to 1900.

(c) Part of New South Wales prior to 1st January, 1911. The estimated male population on 31st December, 1910, was 969. (d) Population increased by 156 males owing to transfer of Jervis Bay area to Australian Capital Territory. (e) Revised estimates based on the results of the Census of Canberra on 14th September, 1951, are as follows:—1947, 9,714; 1948, 10,943; 1949, 12,577; and 1950, 13,049.

NOTE.—All estimates have been corrected for discrepancies disclosed by the various Censuses of the Commonwealth.

Figures from 1939 to 1946 include all living Australian defence service personnel according to the State in which they resided prior to their enlistment and irrespective of whether they were within Australia or overseas, but exclude members of Allied Services and prisoners of war and internees from overseas. The estimated populations from 31st December, 1947 onwards, include Australian defence personnel in Australia according to their actual location and are exclusive of members of the Forces overseas.

(a) For years prior to 1876 see Demography Bulletin No. 67, 1949. (b) Northern Territory figures included with South Australia prior to 1901. (c) Part of New South Wales prior to 1911. (d) See note (d), Table No. 144c. (e) For the period September, 1939, to June, 1947, troop movements were excluded and deaths of defence personnel, whether in Australia or overseas, included.

NOTE.—Minus sign (-) denotes decrease of population.

Differences between the figures above and totals of figures for elements of increase shown separately in the two following tables (natural increase and net migration) represent, after taking into account deaths of defence personnel, unrecorded movement of population from 1st July, 1933, to 30th June, 1947, as disclosed by the final results of the 1947 Census. Particulars of total increase have been adjusted for this discrepancy, which is believed to represent largely unrecorded migration, but in view of the abnormal period covered, and omissions in other records, no separate adjustment has been applied to individual elements of increase. Intercensal discrepancies disclosed by previous Censuses were adjusted on recorded departures.
