MAIN FEATURES

Preliminary estimates of the Australian population by sex and age as at 30 June 1994 show that the population is continuing to age. The median age as at 30 June 1994 was 33.4 years, an increase of 5.6 years in the last twenty years, 2.9 years in the last ten years and 0.4 years since 30 June 1993.

Over the last twenty years there has been no significant growth (0.5%) in the numbers of children (aged less than 15 years) in the population, whereas the number of persons aged 15 to 64 years has increased by 36% and the number of persons aged 65 years and over has increased by 79%.

Declining mortality and the resulting increase in life expectancy is continuing to have a major impact on the older age groups. There are now 182,000 persons aged 85 years and over in the population compared with 76,500 twenty years ago, an increase of 138 per cent. There are more than twice as many females as males in this age group (127,900 compared with 54,100). During the financial year 1993/94, it is estimated that this age group increased by 10,600 persons (6%), well above the 1% growth rate for the Australian population as a whole.

In the twelve months to 30 June 1994, the number of children (0-14 years) in Australia increased by 0.5 per cent. However, in Queensland this age group experienced a significantly higher growth rate (1.8%), followed by the Northern Territory (1.1%) and Western Australia (0.6%). The number of children

increased by 0.5% in New South Wales and 0.2% in South Australia, while Victoria, Tasmania and the Australian Capital Territory experienced declines of 0.2%, 0.7% and 1.1% respectively.

Nationally, the number of persons aged 15 to 64 years grew by 1 per cent during the twelve months to 30 June 1994. However, when this increase was disaggregated by State and Territory, Queensland experienced a high growth rate of 2.7%. With the exception of Western Australia (1.6%), all other States and Territories increased by less than the national average.

The number of persons aged 65 years and over in Australia increased by 2.5% in the twelve months to 30 June 1994. The Northern Territory (5.7%), the Australian Capital Territory (4.2%), Queensland (3.8%) and Western Australia (2.9%) showed increases above the Australian average. New South Wales (2.3%), Victoria (2.1%), South Australia (1.9%) and Tasmania (1.8%) recorded increases below the national average.

At 30 June 1994, the Northern Territory was the only State or Territory with a median age less than 30 years (28.0 years). South Australia has the highest median age (34.6 years) followed by New South Wales (33.8 years), Tasmania (33.7 years), Victoria (33.6 years), Queensland (32.7 years), Western Australia (32.6 years) and the Australian Capital Territory (30.4 years).

(a) Minus sign indicates a decrease. (b) From 1994, 'Other Territories' is included in Australia. (c) Average annual compound rate of growth.

EXPLANATORY NOTES

Introduction

This publication contains final estimates of the resident populations by sex and age, of the States and Territories of Australia, as at 30 June 1993 and preliminary estimates as at 30 June 1994. Mean ages, median ages, sex ratios and dependency ratios for the States, Territories and Australia are also included. For all data prior to June 1994, Jervis Bay Territory is included in estimates for the Australian Capital Territory.

2. Following the 1992 amendment to the 'Acts Interpretation Act' to include the Indian Ocean Territories of Christmas Island and the Cocos (Keeling) Islands as part of geographic Australia, population estimates commencing with the September quarter 1993 include estimates for these two territories. To reflect this change, another category of the State/Territory level has been created, known as 'Other Territories'. 'Other Territories' include Jervis Bay Territory as well as Christmas Island and the Cocos (Keeling) Islands. Data for 'Other Territories' are included in the Australian totals.

Resident population estimates series

3. Australia's population statistics (for the period from 1971) are compiled according to the place of usual residence of the population.

4. An explanation of the conceptual basis for population estimates is given in the ABS technical paper, *Methods and Procedures in the Compilation of Estimated Resident Population 1981 and in the Construction of the 1971-81 Time Series* (3103.0), issued on 11 March 1983.

Method of estimation

5. The estimates by age of the population of Australia and the States and Territories at the date of the Census are derived from the Census Counts. Place of Usual Residence, by adjusting for underenumeration and adding the number of Australian residents estimated to have been temporarily overseas at the time of the census.

6. Post-censal age distributions are obtained by advancing the estimates to the next age, subtracting deaths and adding births and net estimated interstate and overseas migration. After each census estimates for the preceding intercensal period are revised by incorporating an additional adjustment (intercensal discrepancy) to ensure that the total intercensal increase at each age agrees with the difference between the estimated resident populations at the two respective census dates.

7. Estimates of overseas migration are based on net permanent and long-term overseas movements as recorded on passenger cards completed by incoming and outgoing travellers, for the Department of Immigration and Ethnic Affairs. Short-term movements are excluded but an adjustment for the net effect of *category jumping* has been included since July 1976. This adjustment is necessary because net permanent and long-term migration figures can be affected by changes in travel intentions, as when an

Australian resident departing for a short-term visit overseas (stating that he/she intends to stay abroad for less than 12 months) in fact stays 12 months or more, thereby changing his/her travel category from short-term to long-term. An ABS technical paper, *Estimates of Residents Temporarily Overseas, Visitors in Australia and Category Jumping* (3104.0), was published on 10 March 1983.

8. Information about internal migration is available from population censuses and from a sample survey of internal movements conducted annually. These sources, however, do not provide the up-to-date estimates of interstate migration required for updating post-censal population estimates. The only suitable sources for this purpose are administrative records:

(i) Prior to June 1986, estimates were derived from records of interstate changes of addresses advised to the Department of Social Security by Family Allowance recipients.

(ii) Because of difficulties in obtaining adequate coverage of all movements from Family Allowance transfers, estimates of interstate migration since June 1986 have been derived from unidentified information on interstate changes of addresses advised to the Health Insurance Commission in the process of administering Medicare. Only Medicare transfers aged 0-14 are used, as most other ages suffer from under-registration of transfers of varying amounts. These are expanded using adult to child expansion ratios based on information from the latest available Census for each interstate flow. An allowance is made for underenumeration of interstate movers in the Census, and for the ageing of the population (which has resulted in increasing adult to child ratios for interstate movers between recent censuses).

Definitions

9. *Sex ratio*. Male population per 100 female population.

10. *Median age*. The age at which half the population is older and half is younger.

11. *Mean age*. The average age of the population.

12. *Dependency ratio*. The ratio of the dependent population (aged 0-14 and 65 and over) per 100 persons of working ages (15-64 years), as defined by the United Nations.

Reliability

13. *Accuracy of population statistics*. It should be noted that while ABS seeks to produce the most accurate estimates of the population possible, the accuracy of the estimates depends on the quality of the source data used. The major sources of potential error are considered to be

the census date estimates compiled from the five yearly Census of Population and Housing and estimates of interstate migration based on medicare transfer data.

14. Single year age estimates are not shown for persons aged 85 years or older. The reliability of age estimates decreases as older ages are reached. However, estimates for each age up to 99 have been calculated and are available on request.

Related publications

15. Four previous issues of this series containing consolidated data were issued on 23 August 1982 (containing estimates for the years 1971 to 1976), 22 July 1983 (containing estimates for the years 1977 to 1982), 8 December 1987 (containing estimates for the years 1981 to 1987) and 21 July 1993 (containing estimates for the years 1987 to 1992). Other ABS publications which may be of interest to users of this publication include:

Australian Demographic Statistics (3101.0)

Estimated Resident Population by Marital Status, Age and Sex, Australia (3220.0)

Estimated Resident Population by Country of Birth, Age and Sex, Australia (3221.0)

Projections of the Populations of Australia, States and Territories, 1993 to 2041 (3222.0)

Births, Australia (3301.0)

Deaths, Australia (3302.0)

Overseas Arrivals and Departures, Australia (3404.0)

16. Current publications produced by the ABS are listed in the *Catalogue of Publications and Products, Australia* (1101.0). The ABS also issues, on Tuesdays and Fridays, a *Publications Advice* (1105.0) which lists publications to be released in the next few days. The Catalogue and Publications Advice are available from any ABS office.

For more information ...

The ABS publishes a wide range of statistics and other information on Australia's economic and social conditions. Details of what is available in various publications and other products can be found in the *ABS Catalogue of Publications and Products* available at all ABS Offices (see below for contact details).

Information Consultancy Service

Information tailored to special needs of clients can be obtained from the Information Consultancy Service available at ABS Offices (see Information Inquiries below for contact details).

National Dial-a-Statistic Line

0055 86 400

(Steadycom P/L, premium rate 25c/21 4 secs.)

This number gives 24-hour access, 365 days a year for a range of statistics.

Electronic Data Services

A large range of data is available via on-line services, diskette, magnetic tape, tape cartridge and CD ROM. For more details about our electronic data services, contact any ABS Office (see below).

Bookshops and Subscriptions

There are over 400 titles of various publications available from ABS bookshops in all ABS Offices (see below Bookshop Sales for contact details). The ABS also provides a subscription service through which nominated publications are provided by mail on a regular basis at no additional cost (telephone Publications Subscription Service toll free on 008 02 0608 Australia wide).
