**SUMMARY OF FINDINGS**

The estimated resident population of the A.C.T. (excluding Jervis Bay Territory) at 30 June 1992 was 293,700, an increase of 5,100 or 1.8% since 30 June 1991.

The median age of the estimated resident population of the A.C.T. at 30 June 1992 was 29.8 years. This was 2.9 years lower than the Australian median age of 32.7 years. The highest median age was in the subdivision of Woden Valley (33.9 years), followed by Central Canberra (33.0 years), Weston Creek (32.3 years), Outer Canberra (29.8 years), Belconnen (28.7 years) and Tuggeranong (26.9 years). Although Woden Valley had the highest median age, the suburbs with the highest median ages, Red Hill (39.4 years), Deakin (38.5 years), Campbell (38.1 years) and Yarralumla (38.0 years), are in the subdivision of Central Canberra. Suburbs with the lowest median age include Duntroon (20.3 years) which largely comprises cadets and other military personnel, Acton (20.6 years) which contains a high proportion of university students, and Bruce (23.3 years) which includes the Australian Institute of Sport athletes and university students.

**MEDIAN AGE OF ESTIMATED RESIDENT POPULATION, AUSTRALIAN CAPITAL TERRITORY SUBDIVISIONS, 30 JUNE 1992**

Children aged 0-14 years accounted for 23.0 per cent of the population of the A.C.T. at 30 June 1992 compared with 23.5 per cent at 30 June 1991. The subdivision with the highest proportion of its population in the 0-14 years age group was Tuggeranong (31.1%), followed by Belconnen (23.7%), Weston Creek (19.7%), Outer Canberra (18.5%) and Woden Valley (17.6%). Central Canberra, the oldest subdivision, had the lowest proportion of children aged 0-14 years (16.0%). The suburb of Richardson had the highest proportion of its population in the 0-14 years age group (35.8%), followed by Chisholm (35.7%) and Macarthur (35.1%).

The 65 years and over age group comprised 6.4 per cent of the total population of the A.C.T. at 30 June 1992, compared with 6.2 per cent at 30 June 1991. The subdivision of Central Canberra had the highest proportion of its population aged 65 years and over (13.6%), accounting for almost half of the total population of this age group in the A.C.T. This was significantly greater than the subdivision of Woden Valley which had the next highest proportion in this age group (9.0%). Tuggeranong had the lowest proportion of people in the 65 years and over age group (2.3%). The suburbs with the highest proportion of the population aged 65 years and over were Red Hill (18.7%), Braddon (18.6%), Deakin (18.6%) and Griffith (17.7%).

**PROPORTION OF POPULATION IN SELECTED AGE GROUPS, 30 JUNE 1992**

During the year ended 30 June 1992 the population in the A.C.T. increased by 5,100 or 1.8 per cent. However this varied considerably between subdivisions. Tuggeranong subdivision (up 5,900 or 8.0%), Outer Canberra (up 100 or 5.7%), Woden Valley (up 100 or 0.3%) showed positive growth, while Central Canberra (down 300 or 0.5%), Belconnen (down 300 or 0.4%), Weston Creek (down 400 or 1.6%) experienced negative growth.

Although the 0-14 years age group experienced a decline in population for the A.C.T. (down 100 or 0.2%), the subdivisions of Outer Canberra (up 40 or 9%), Tuggeranong (up 1,400 or 5.8%) and Central Canberra (up 30 or 0.3%) increased. The subdivisions of Belconnen (down 1,100 or 5.1%), Weston Creek (down 400 or 7.8%) and Woden Valley (down 30 or 0.4%) contributed to the overall decline.

The 15-64 years age group in the A.C.T. increased by 4,400 or 2.2 per cent over the same period with most of the growth occurring in Tuggeranong (up 4,400 or 9%), and Belconnen (up 600 or 0.9%). The subdivisions of Central Canberra (down 500 or 1%), Woden Valley (down 80 or 0.3%), and Weston Creek (down 50 or 0.2%) experienced negative growth.

The 65 years and over age group in the A.C.T. increased by 900 or 4.8 per cent over the year. All subdivisions experienced an increase with the largest changes occurring in Tuggeranong (up 200 or 10.2%), Woden Valley (up 200 or 7.5%), and Belconnen (up 200 or 5.2%).

(a) Excluding Jarvis Bay

## EXPLANATORY NOTES

### Introduction

This publication contains estimated resident populations by age and sex for the Statistical Local Areas (SLA's) of the Australian Capital Territory at 30 June 1992. Estimates for the ACT do not include Jervis Bay Territory.

2. Area statistics are classified according to the *Australian Standard Geographical Classification* (1216.0). The SLA's in Canberra equate directly with the suburbs. Details for the adjacent (N.S.W.) Queanbeyan subdivision are not included in this publication. They are published in *Age and Sex Distribution of the Estimated Resident Population of Statistical Local Areas, New South Wales* (Catalogue No. 3209.1).

### Estimated Resident Population

3. The Estimated Resident Population of an area is the estimate of the number of persons who usually reside in that area.

4. An explanation of the concept of estimated resident population, as adopted by the Australian Bureau of Statistics for official population estimates, is contained in the ABS technical paper, *Methods and Procedures in the Compilation of Estimated Resident Population 1981 and in the Construction of the 1971-81 Time Series* (3103.0), issued on 11 March 1983.

### Methodology

5. The figures contained in this publication were obtained by the following demographic cohort method:

- (a) Estimates by age and sex in SLA's at 30 June 1991 (based on the 1991 Census) were used as the base for updating;
- (b) Estimates of total persons in each SLA at 30 June 1992 are derived from estimates of the number of occupied dwellings and their occupancy ratios. For each suburb the number of occupied private dwellings is estimated by using domestic electricity connections and enumerations of the number of occupied dwellings supplied by A.C.T. Administration. Historical housing occupancy trends derived from census counts are used to estimate occupancy rates for dwellings. These are applied to the number of occupied private dwellings to give an estimated population for each suburb. Births and student numbers are also used as indicators of population size.
- (c) The total population growth for each SLA during 1991-92 was then split into natural increase and net migration components. Natural increase was derived for each SLA from birth and death registration statistics for 1991-92. Net migration was derived for each SLA as the difference between total population growth and natural increase.
- (d) Age/sex migration profiles were derived for each SLA from 1986 census data on usual residence one year prior to the census date. Profiles were produced for:

- (i) Inter-SLA arrivals - persons residing in the SLA whose usual residence one year ago was in another SLA within Australia
- (ii) Inter-SLA departures - persons whose SLA of usual residence one year ago was that SLA but whose residence at the date of the census is another SLA within Australia.
- (iii) SLA overseas arrivals - persons in the SLA whose usual residence one year ago was overseas.

SLA overseas departures profiles were derived using an average for the last three years of overseas departures data by usual residence for the A.C.T., obtained from passenger cards.

- (e) Using the migration profiles and the derived net migration component for an SLA, the age/sex distribution of the net migration component was compiled for that SLA. The net migration estimates for all SLA's by age and sex were further adjusted to add to the net migration estimates for the A.C.T. by age and sex which were derived independently from other sources of statistics (Medicare and overseas arrivals and departures statistics). This distribution and data on deaths by age, and births in each SLA were then added (or subtracted) to the 1991 estimates described in (a) above. The totals for each age/sex group were then forced to add to the A.C.T. total for that age/sex group.

### Geographic Boundaries

6. The geographic areas used in this publication are defined in the *Australian Standard Geographic Classification, Edition 2.2* (1216.0). The boundaries of SLA's used in determining the population are those in existence at 30 June 1992. The population for previous years have been adjusted where appropriate so that they reflect the population changes for each area had the June 1992 boundaries existed then.

### Reliability

7. Although estimates of resident population are shown to the nearest unit, accuracy to this level is not claimed and should not be assumed.

### Data on disk

8. Data is available on disk upon request.

### Related publications

9. Other ABS publications which may be of interest to users of this publication include:

*Estimated Resident Population in Statistical Local Areas, Australian Capital Territory* (3205.8)

*Australian Demographic Statistics* (3101.0) - issued quarterly

*Estimated Resident Population by Sex and Age : States and Territories of Australia (3201.0) - issued annually*

*Interstate Migration, Australia (3411.0)*

*Projections of the Population of Australia, States and Territories, 1993 to 2041 (3222.0)*

*Births, Australia (3301.0) - issued annually*

*Deaths, Australia (3302.0) - issued annually*

*Overseas Arrivals and Departures, Australia (3404.0) - issued annually*

*1991 Census - Census Counts for Small Areas: Australian Capital Territory (2730.8)*

10. Current publications produced by the ABS are listed in the *Catalogue of Publications and Products, Australia (1101.0)*. The ABS also issues, on Tuesdays and Fridays, a *Publications Advice (1105.0)* which lists publications to be released in the next few days. The *Catalogue* and *Publications Advice* are available from any ABS office.

**Symbols and other usages**

- . . not applicable
- nil or rounded to zero
- p preliminary figure subject to revision.

## For more information ...

The ABS publishes a wide range of statistics and other information on Australia's economic and social conditions. Details of what is available in various publications and other products can be found in the *ABS Catalogue of Publications and Products* available at all ABS Offices (see below for contact details).

### Information Consultancy Service

Information tailored to specific needs of clients can be obtained from the Information Consultancy Service available at all ABS Offices (see Information Inquiries below for contact details).

### National 24-a-Statistic Line

055 86 400

(steadycom P/L; premium rate 25c/21.4 secs.)

This number gives 24-hour access, 365 days a year for a range of statistics.

### Electronic Data Services

DISCOVERY (Key \*656#): The ABS intends discontinuing its statistical information service on DISCOVERY. Please contact Peter Davidson (Phone 06 252 6684) to discuss possible alternatives for acquiring statistics or if you wish to comment on this proposal. For details on electronic data services available, contact Information Services in any of the ABS Offices (see Information Inquiries below for contact details).

### Bookshops and Subscriptions

There are over 400 titles of various publications available from ABS bookshops in all ABS Offices (see below Bookshop Sales for contact details). The ABS also provides a subscription service through which nominated publications are provided by mail on a regular basis at no additional cost (telephone Publications Subscription Service toll free on 008 02 0608 Australia wide).
