## MAIN FEATURES

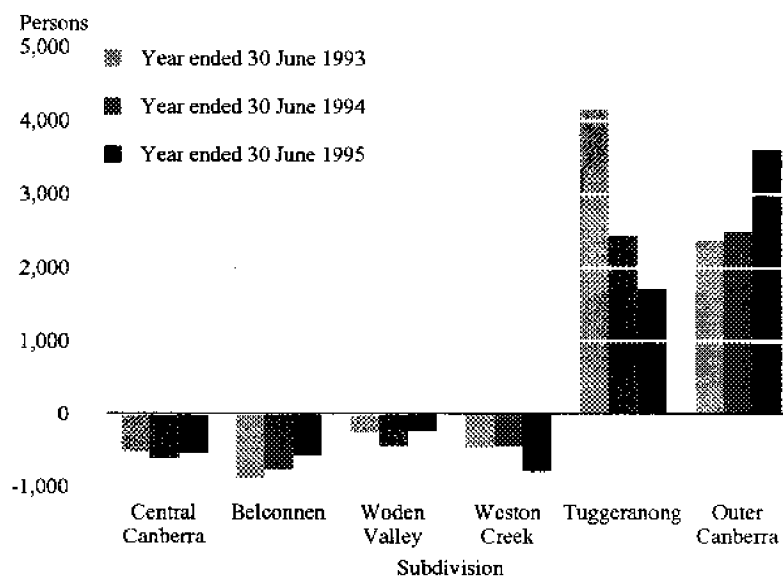

### TOTAL POPULATION

The estimated resident population of the Australian Capital Territory (ACT) as at 30 June 1995 was 304,100, an increase of 3,200 since June 1994. The growth rate for 1994-95 was 1.1%, compared with a growth rate of 0.9% for the previous financial year.

The increase in the growth rate for 1994-95 was largely due to an increase in the net overseas migration level (from a net loss of 400 persons in 1993-94 to a net gain of 130 persons in 1994-95). Over the same period, net estimated interstate migration and natural increase remained relatively constant.

Population growth varied considerably between subdivisions in 1994-95. As for the previous financial year only Outer Canberra (up 3,600 persons or 49.3%, as a result of the development of the new suburbs of Ngunnawal, Nicholls, Palmerston and Amaroo) and Tuggeranong (up 1,700 persons or 2.0%) showed positive growth. During the financial year 1994-95 Tuggeranong overtook Belconnen as the most populous subdivision in the ACT. Weston Creek (down 790 persons or 3.0%), Belconnen (down 570 persons or 0.6%), Central Canberra (down 540 persons or 0.9%) and Woden Valley (down 230 persons or 0.7%) continued to decline in population.

### POPULATION CHANGE BY SUBDIVISION

Suburbs to experience significant increases in population included Ngunnawal (up 2,100 persons), Gordon (up 820 persons), Nicholls (up 630 persons), Conder (up 620 persons), Banks (up 550 persons), Palmerston (up 540 persons) and Bonython (up 420 persons). There were no significant declines in population with Kambah (down 260 persons), Wanniasa (down 230 persons), Duffy and Richardson (both down 150 persons) recording the largest decreases.

### MEDIAN AGE

The median age of the estimated resident population of the ACT at 30 June 1995 was 30.6 years, an increase of 6.1 years in the last 20 years, 2.8 years in the last 10 years and 0.2 years since 30 June 1994. However, the ACT has a much younger population than for Australia as a whole, being 3.1 years lower than the Australian median age of 33.7 years.

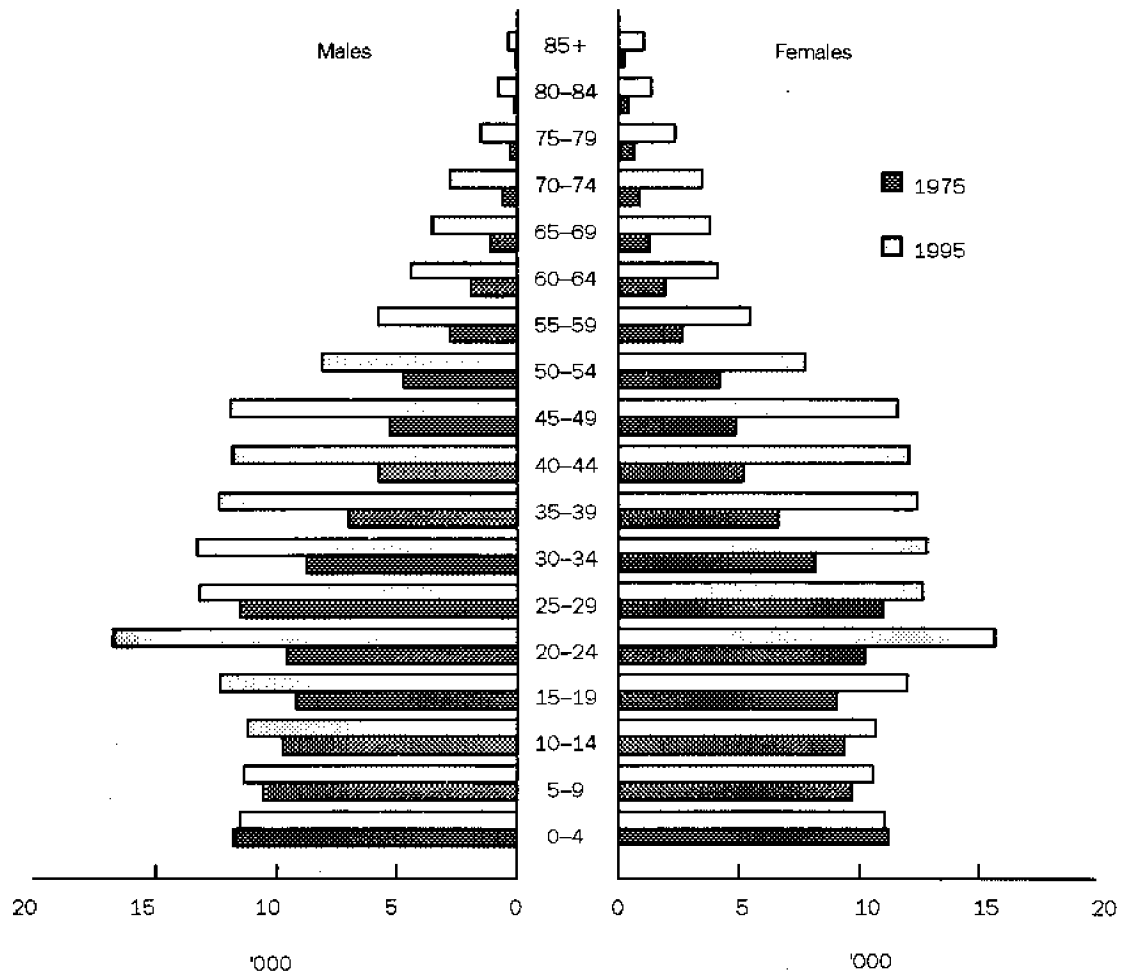

The highest median age among the subdivisions was in Woden Valley (36.0 years), followed by Weston Creek (34.8 years), Central Canberra (33.9 years), Belconnen (30.4 years), Tuggeranong (27.6 years) and Outer Canberra (26.4 years).

The suburbs with the highest median ages were Campbell (41.6 years), Chapman (41.2 years), Forrest (40.7 years), Deakin (40.1 years) and Pearce (40.2 years). Suburbs with the lowest median age included Duntroon (20.2 years) which largely comprises cadets and other military personnel, Acton (20.6 years) which contains a high proportion of university students, City (21.9 years) and Bruce (23.4 years) which includes the Australian Institute of Sport athletes and university students.

## AGE STRUCTURE

The population of the ACT is continuing to age, following the national trend. Over the last 20 years there has been no significant growth in the population aged 0-14 years (6%), whereas the population aged 15-64 years has increased by 65% and the number of people aged 65 years and over has increased by 268%.

POPULATION BY AGE AND SEX, ACT, 1975 AND 1995

Population aged 0–14 years The population aged 0–14 years was estimated to be 66,400 persons or 21.8% of the population of the ACT as at 30 June 1995, compared with 62,400 persons (31.4%) 20 years ago. The subdivision with the highest proportion of its population in the 0–14 age group was Tuggeranong (29.6%), followed by Outer Canberra (25.5%), Belconnen (20.8%), Weston Creek (16.8%), Woden Valley (16.9%) and Central Canberra (16.0%).

The suburbs with the highest proportion of children aged 0–14 years, Gilmore (35.9%), Theodore (35.7%), Chisholm (35.2%), Richardson (34.5%) and Gordon (33.8%), are all in the subdivision of Tuggeranong. The suburbs of Acton (1.5%) and Belconnen Town Centre (8.5%) were estimated to have the lowest proportions of the population aged 0–14 years.

Population aged 15–64 years The population aged 15–64 years was estimated to be 216,300 persons or 71.1% of the total ACT population as at 30 June 1995, compared with 130,800 (65.7%) 20 years ago. The subdivision of Weston Creek had the highest proportion of its population in this age group (75.7%), followed by Belconnen (73.8%), Outer Canberra (72.6%), Woden Valley (72.2%), Central Canberra (69.2%) and Tuggeranong (67.9%).

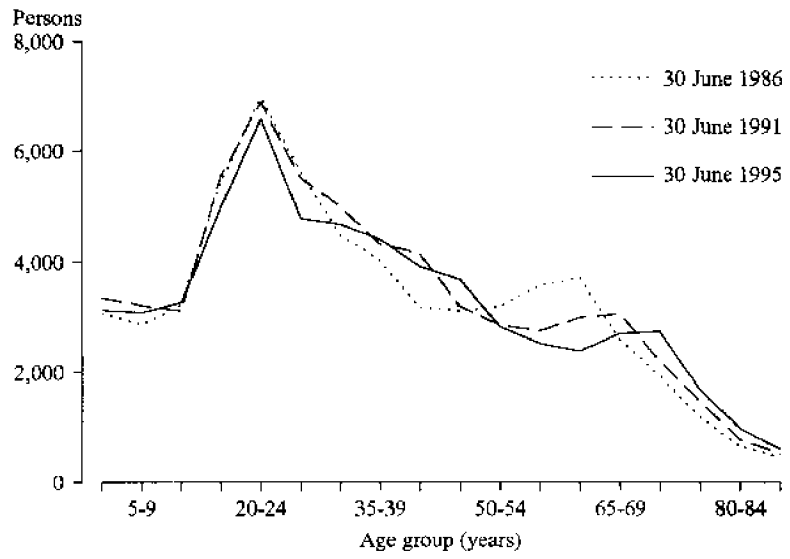

The age structure of the population aged 15–64 years varies considerably across subdivisions. Belconnen, Central Canberra and Woden Valley have a proportionally high number of people aged 20–24 years. This is primarily due to the high number of university students resident in the suburbs of Acton and Bruce and surrounding suburbs and university students and military personnel in Duntroon. A substantial number of persons aged 20–24 years live in or near the town centres of Belconnen and Woden Valley. For example, the suburbs of Belconnen Town Centre (29.5%), Phillip (20.8%) and Lyons (14.4%) have a high proportion of their population aged in the 20–24 years age group.

Meanwhile, the subdivision of Weston Creek appears to have a proportionally high number of older families, with the highest proportions of its population being aged 15–24 years and 45–54 years. In comparison, both Tuggeranong and Outer Canberra have large percentages of their populations in the 20–44 years age group. This reflects the high proportion of children aged 0–14 years in these subdivisions, with Outer Canberra having a higher proportion of younger families than Tuggeranong.

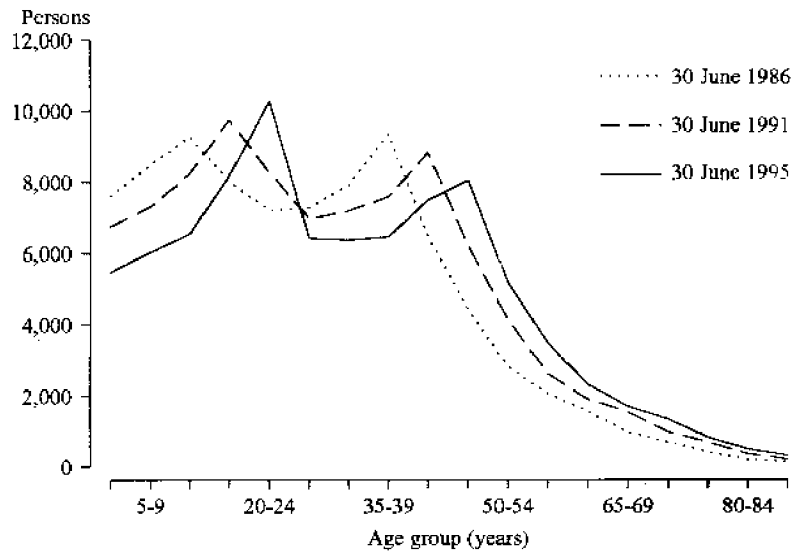

Population aged 65 years and over The 65 years and over age group was estimated to comprise 21,400 persons or 7.0% of the total population of the ACT as at 30 June 1995 compared with 5,800 (2.9%) 20 years ago. Central Canberra had the highest proportion of its population aged 65 years and over (14.8%), followed by Woden Valley (11.0%), Weston Creek (7.5%), Belconnen (5.4%), Tuggeranong (2.5%) and Outer Canberra (2.0%). While Central Canberra accounted for only 19% of the total ACT population, the subdivision contained 41% of ACT residents aged 65 years and over.

The population aged 85 years and over in the ACT was estimated to be 1,500 persons as at 30 June 1995, compared with 330 persons 20 years ago. Together, the suburbs of Farrer, Narrabundah, Griffith, Curtin, Ainslie and Holt were estimated to contain a quarter of all persons aged 85 years and over in the ACT.

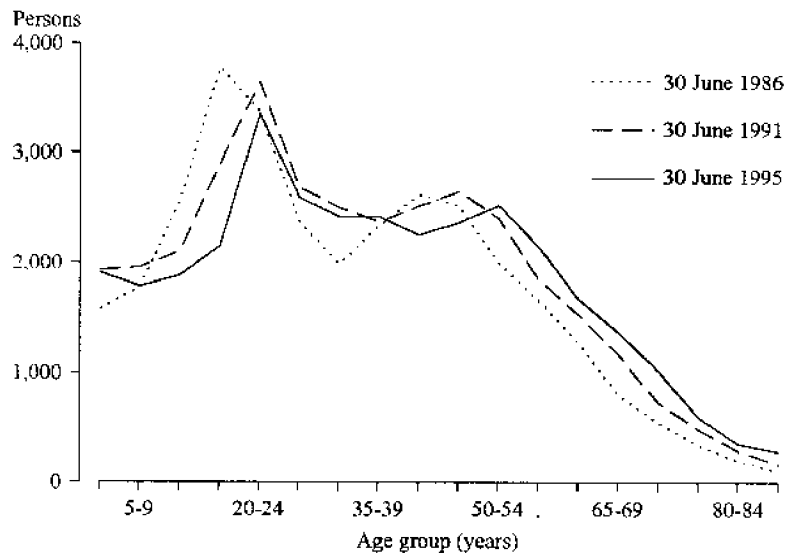

ESTIMATED RESIDENT POPULATION, CENTRAL CANBERRA SUBDIVISION

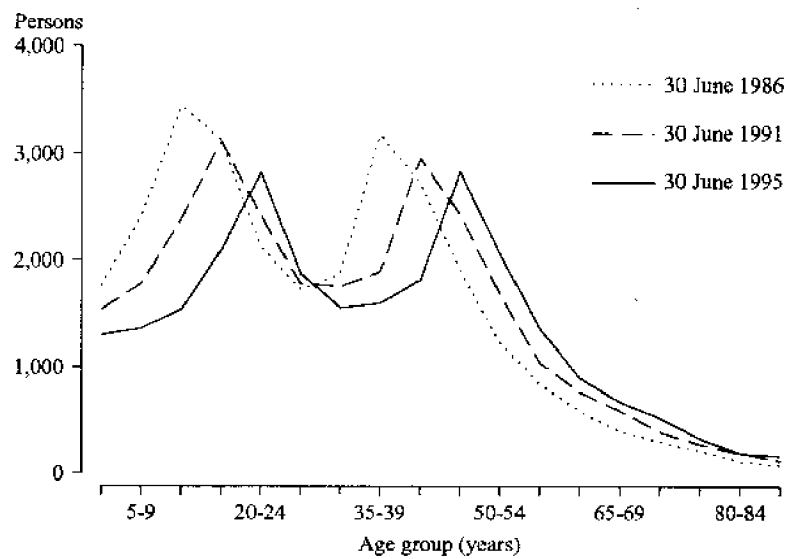

ESTIMATED RESIDENT POPULATION, BELCONNEN SUBDIVISION

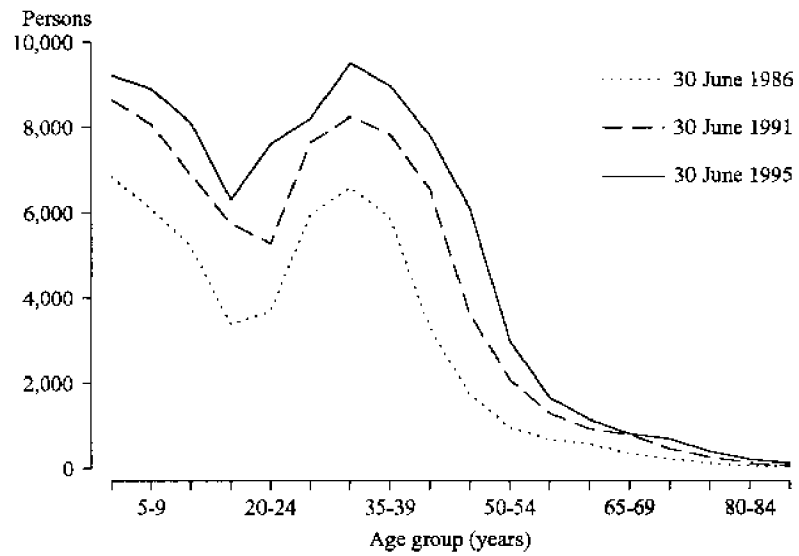

ESTIMATED RESIDENT POPULATION, WODEN VALLEY SUBDIVISION

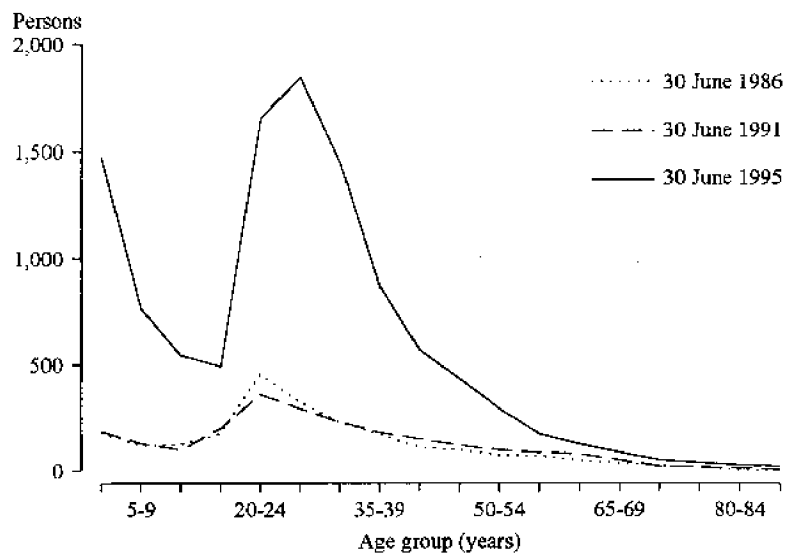

ESTIMATED RESIDENT POPULATION, WESTON CREEK SUBDIVISION

## EXPLANATORY NOTES

### INTRODUCTION

**1** This publication contains final estimated resident population (ERP) by age and sex for the Statistical Local Areas (SLAs) of the ACT at 30 June 1995.

### POPULATION ESTIMATES

**2** The ERP of an area is the estimate of the number of people who usually reside in that area.

**3** An explanation of the concept of estimated resident population, as adopted by the ABS for official population estimates, is given in *Population Estimates: Concepts, Sources and Methods* (3228.0) issued on 23 June 1995.

### METHODOLOGY

**4** The figures in this publication were obtained by the following demographic cohort method:

- Estimates by age and sex in SLAs at 30 June 1991 (based on the 1991 Census) were used as the base for updating.
- Estimates of total persons in each SLA at 30 June 1995 are derived from estimates of the number of occupied dwellings and their occupancy ratios. For each suburb the number of occupied private dwellings is estimated by using domestic electricity connections and enumerations of the number of occupied dwellings supplied by ACT administration. Historical housing occupancy trends derived from census counts are used to estimate occupancy rates for dwellings. These are applied to the number of occupied private dwellings to give an estimated population for each suburb. Births and student numbers are also used as indicators of population size.
- The total population growth for each SLA during 1994–95 was then split into natural increase and net migration components. Natural increase was derived for each SLA from birth and death registration statistics for 1994–95. Net migration was derived for each SLA as the difference between total population growth and natural increase.
- Inter-SLA age/sex migration profiles were derived for each SLA from 1986 census data on usual residence one year prior to the census date. Profiles were produced for:
  - ✧ Inter-SLA arrivals — persons residing in the SLA whose usual residence one year ago was in another SLA within Australia.
  - ✧ Inter-SLA departures — persons whose SLA of usual residence one year ago was that SLA but whose residence at the date of the census was another SLA within Australia.
- SLA overseas migration profiles were derived for each SLA from 1991 census data for persons whose usual residence one year ago was overseas. Profiles were produced for:
  - ✧ SLA overseas arrivals — persons in the SLA whose usual residence one year ago was overseas.
  - ✧ SLA overseas departures profiles were derived using the SLA arrivals level and modifying these by forcing them to ACT age/sex overseas departures data for 1990–91, obtained from passenger cards.

- Using the migration profiles and the derived net migration component for an SLA, the age/sex distribution of the net migration component was compiled for that SLA. The net migration estimates for all SLAs by age and sex were further adjusted to add to the net migration estimates for the ACT by age and sex which were derived independently from other sources of statistics (Medicare and overseas arrivals and departures statistics). This distribution and data on deaths by age, and births in each SLA were then added (or subtracted) to the 1991 estimates described above. The totals for each age/sex group were then forced to add to the ACT total for that age/sex group.

#### GEOGRAPHIC BOUNDARIES

**5** The geographic areas used in this publication are defined in the *Australian Standard Geographical Classification, Edition 2.5* (1216.0). The boundaries of SLAs used in determining the population are those in existence at 30 June 1995. The population for previous years have been adjusted where appropriate so that they reflect the population changes for each area had the June 1995 boundaries existed then.

**6** The SLAs in Canberra equate directly with the suburbs. Details for the adjacent (New South Wales) Queanbeyan subdivision are not included in this publication. They are published in *Age and Sex Distribution of the Estimated Resident Population of Statistical Local Areas, New South Wales* (3209.1).

#### RELIABILITY

**7** Although estimates of resident population are shown to the nearest unit, accuracy to this level is not claimed and should not be assumed.

#### DATA ON DISK

**8** Data is available on disk upon request.

#### RELATED PUBLICATIONS

**9** Other ABS publications which may be of interest to users of this publication include:

*1991 Census — Census Counts for Small Areas: Australian Capital Territory* (2730.0)

*Australian Demographic Statistics* (3101.0) — issued quarterly

*Estimated Resident Population by Sex and Age: States and Territories of Australia* (3201.0) — issued annually

*Estimated Resident Population in Statistical Local Areas, Australian Capital Territory* (3205.8) — issued annually

*Projections of the Populations of Australia, States and Territories, 1995 to 2051* (3222.0)

*Information Paper: Population Estimates: concepts, sources and methods* (3228.0)

*Demography, Australian Capital Territory* (3311.8) — issued annually

**10** Current publications produced by the ABS are listed in the *Catalogue of Publications and Products, Australia* (1101.0). The ABS also issues, on Tuesdays and Fridays, a *Release Advice* (1105.0), which lists publications to be released in the next few days. The Catalogue and Release Advice are available from any ABS office.

#### SYMBOLS AND OTHER USAGES

.. not applicable  
 — nil or rounded to zero

## For more information . . .

The ABS publishes a wide range of statistics and other information on Australia's economic and social conditions. Details of what is available in various publications and other products can be found in the ABS Catalogue of Publications and Products available from all ABS Offices.

### ABS Products and Services

Many standard products are available from ABS bookshops located in each State and Territory. In addition to these products, information tailored to the needs of clients can be obtained on a wide range of media by contacting your nearest ABS Office. The ABS also provides a Subscription Service for standard products and some tailored information services.

### National Dial-a-Statistic Line

0055 86 400

*Steadycorn P/L: premium rate 25c/20 secs.*

This number gives 24-hour access, 365 days a year, for a range of important economic statistics including the CPI.

### Internet

<http://www.abs.gov.au>

A wide range of ABS information is available via the Internet, with basic statistics available for each State, Territory and Australia. We also have Key National Indicators, ABS product release details and other information of general interest.
