SUMMARY OF VITAL AND POPULATION STATISTICS SEPTEMBER QUARTER 1972

CONTENTS

	<u>Page</u>
Explanatory notes	2
 <u>Table</u>	
1. Summary : Vital and population statistics, Australia, 1967 to 1972	3
2. Population : Males, females and persons, States and Territories, 1967 to 1972	4
3. Mean population, calendar years : Males, females and persons, States and Territories, 1967 to 1971	5
4. Mean population, financial years : Males, females and persons, States and Territories, 1967-68 to 1971-72	6
5. Rate of population growth : States and Territories, 1967 to 1972	6
6. Marriages : States and Territories, 1967 to 1972	7
7. Live births : States and Territories, 1967 to 1972	8
8. Deaths : States and Territories, 1967 to 1972	9
9. Infant deaths : States and Territories, 1967 to 1972	10

EXPLANATORY NOTES

1. The estimated population for Australia as a whole takes account of natural increase and net overseas migration since the latest Census.

2. The estimate for each State or Territory represents the population ascertained at the Census plus recorded natural increase and net gain from overseas migration for that State or Territory; gains and corresponding losses that result from movements between States and Territories are also taken into account in so far as they are recorded as transfers of State of residence under child endowment procedures or Commonwealth electoral procedures or are indicated in other ways such as the results of any special count. As records of migration by State or Territory are not complete the estimated State and Territory populations so derived are approximate and are subject to revision when the population of each State is ascertained at the next Census. The final results of the Census of 30 June 1971 have been taken into account in the present population estimates.

3. Holiday, business and other similar short-term movements between States and Territories are not taken into account in the quarterly calculations. However such movements do affect the estimates in so far as people who were on holiday or other short-term interstate travel at the time of the Census are counted in the population of the State or Territory where they spent Census night. On the other hand, changes in the populations of States and Territories due to visitors from overseas and Australians travelling overseas are reflected in all estimates.

4. Population estimates for New South Wales, Victoria and the Northern Territory for dates subsequent to 30 June 1971 have been revised. Estimates of mean population, population growth rates and birth, death and marriage rates have been re-calculated on the basis of the revised population figures.

NOTE

- (i) Any discrepancies between totals and sums of components in Tables 1-4 are due to rounding.
- (ii) Birth and death figures in this bulletin (i.e. Tables 1, 7, 8 and 9) do not include stillbirths.

(a) Excess of live births registered over deaths registered. (b) Excess of recorded overseas arrivals over recorded overseas departures. Minus sign (-) denotes excess of departures over arrivals. (c) Increase consists of natural increase, net overseas migration gain, and an adjustment to make the series of increases agree with the total intercensal increase revealed by successive censuses. The adjustment reflects the combined net error in the census and in the recording of births, deaths and migration during the five year period. Minus sign (-) denotes a net decrease. (d) Population at Census date (final figure).

r - Revised.

NOTE. Mean populations are calculated for twelve-month periods to provide a satisfactory average basis for calculations requiring allowance for the continuous change in population figures during such periods. The mean population for any year has been calculated by the formula :

$$\text{Mean population} = \frac{a + 4b + 2c + 4d + e}{12}$$

where a, b, c, d and e, respectively, are the populations at the end of the quarter immediately preceding the year and at the end of each of the four succeeding quarters; e.g., in the case of a calendar year, 31 December of the preceding year, and 31 March, 30 June, 30 September and 31 December of the year under consideration.

(a) The rates represent the increase during the period expressed as a proportion (per cent) of the population at the beginning of the period. The increase consists of natural increase, net overseas migration gain, and an adjustment to make the series of increases agree with the total intercensal increase revealed by the latest Census.

r - Revised.

NOTE. Rates for quarters are calculated by multiplying the number of registrations for the quarter by 4 and dividing by the average of estimated populations at the beginning and end of the quarter (expressed as a rate per 1,000 of the average population). Quarterly rates, especially in deaths and marriages, reflect seasonal influences and all rates may be influenced by varying delay in registration. Also, a variation in rates based on small numbers of events is of less significance than the same variation in rates based on larger numbers.

(a) Included in total number of deaths registered; i.e. in Table 8. (b) Although comprehensive data are not available, it is known that the rate of Aboriginal infant deaths is substantially above that for other births in the Territory. (c) Less than twenty deaths, rate not calculated.

NOTE. Quarterly rates, especially in deaths and marriages, reflect seasonal influences and all rates may be influenced by varying delay in registration. Also, a variation in rates based on small numbers of events is of less significance than the same variation in rates based on larger numbers.

COMMONWEALTH BUREAU OF CENSUS AND STATISTICS

CANBERRA, A.C.T. 2600

J. P. O'NEILL

COMMONWEALTH STATISTICIAN

NOTE. Inquiries concerning these statistics can be made in Canberra by telephoning 63 9111 Extension 2348 or, in each State capital, by telephoning the office of the Bureau of Census and Statistics.
