### INQUIRES

- *for further information about statistics in this publication and the availability of related unpublished statistics, contact Mr R. Gogulapati on Canberra (06) 252 7417 or any ABS State office.*
  - *for information about other ABS statistics and services please refer to the back page of this publication.*
-

NOTE: This is the last issue of this publication. The statistics by country of birth will continue to be produced and the main statistics from this publication will be included in a new publication: Migration, Australia (Cat. 3412.0).

MAIN FEATURES

As at 30 June 1994, the resident population of Australia of 17,843,300 comprised 13,779,700 (77.2%) persons born in Australia and 4,063,600 (22.8%) overseas-born persons. The proportion of the population who was born overseas declined slightly for the second successive year, a reversal of the long term trend of increase in this population since the second world war.

The most prevalent birthplace of overseas-born persons in Australia was the United Kingdom and Ireland (1,216,100). The ten highest contributing birthplaces are presented below.

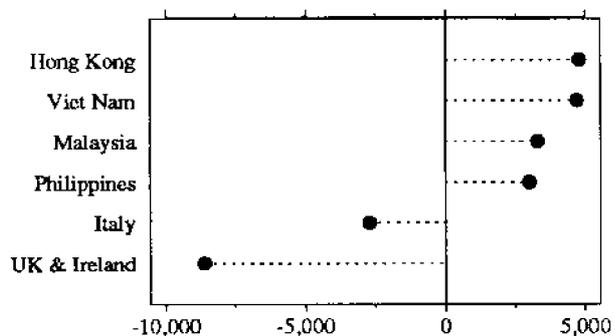

Country of Birth	Number	Per cent
UK and Ireland	1,216,100	29.9
New Zealand	285,500	7.0
Italy	263,900	6.5
Greece	145,200	3.6
Viet Nam	142,000	3.5
Germany	118,800	2.9
Netherlands	98,200	2.4
China	91,353	2.2
Philippines	88,400	2.2
Malaysia	88,000	2.2
Other Overseas Born	1,526,100	37.6
<b>Total Overseas Born</b>	<b>4,063,600</b>	<b>100.0</b>

In the twelve months to 30 June 1994 the total population increased by 186,800 (1.1 per cent), only 16 per cent of which resulted from increases in the overseas-born population. The overseas-born population increased by 0.8 per cent which was lower than the rate of growth of the Australian-born population (1.1 per cent). This lower growth of the overseas-born is due to a decline in net overseas migration.

During 1993-94 Australia's net population gain from permanent and long-term overseas migration of overseas-born persons was 62,600. The major countries of birth contributing to this net gain were the United Kingdom and Ireland (6,400), Viet Nam (4,900), Hong Kong and Macau (4,900) and Philippines (3,100). The gains from each of the other countries were smaller than 3,000. There was a net loss of 13,000 Australian-born persons due to overseas migration.

The net increase (including the effect of both deaths and migration) among overseas-born populations was highest for persons born in Hong Kong and Macau (4,800) followed by Viet Nam (4,700) and Malaysia (3,300). The largest net losses occurred for population groups born in UK and Ireland (8,600) and Italy (2,700), reflecting the effect of deaths outweighing new migrants for population groups who have settled in Australia over a long period of time.

NET POPULATION CHANGE IN 1993-94  
SELECTED COUNTRIES OF BIRTH

Among the overseas-born (with a population of over 50,000) the median age was highest for persons born in the former USSR and Baltic States (66.0 years). Persons born in Italy (56.5 years), Poland (54.5 years) Greece (53.1 years), Netherlands (51.7 years) and Germany (49.6 years) also have comparatively older age structures. The migrant populations born in Hong Kong and Macau (30.2 years), Viet Nam (31.9 years), Malaysia (32.0 years), Philippines (34.0 years) and New Zealand (34.7 years) have the youngest age structures.

(a) Countries of birth with 25,000 or more residents at the 1991 Census. (b) Excluding Australian-born. (c) Includes an adjustment for intercensal discrepancy.

## EXPLANATORY NOTES

**Introduction**

This publication contains statistics of the preliminary estimated resident population of Australia as at 30 June 1993 and 1994 (preliminary) classified by age and sex and country of birth for those countries with at least 38,000 residents at 30 June 1991. The population size, annual percentage rates of growth, and the components of growth, (viz., the number of deaths and net overseas migration) for selected years are also included.

**Revisions**

2. The 1992 and 1993 estimates will be revised when the results of the 1996 Census of Population and Housing are available. The 1994 estimates are preliminary and will be revised when more accurate data for deaths and category jumping by country of birth become available.

**Last Issue**

3. This is the last issue of this publication. The statistics by country of birth will continue to be produced and the main statistics from this publication will be included in the new publication *Migration, Australia (3412.0)*

4. The estimated resident population is the official population estimates series compiled according to the place of usual residence of the population.

5. An explanation of the conceptual basis for population estimates is given in the ABS technical paper, *Methods and Procedures in the Compilation of Estimated Resident Population 1981 and in the Construction of the 1971-81 Time Series (3102.0)*, issued on 11 March 1983. In this publication, compilation of the estimated resident population has been extended to classify the population by country of birth.

**Method of estimation**

6. For a detailed description of the method used in estimating the resident population by country of birth, see the issue in this series for June 1986 and 1987, released on 13 September 1988.

7. The estimated resident populations as at 30 June 1994 were obtained by advancing the 30 June 1993 estimates to the next age and adjusting for migration and deaths, by country of birth, age and sex, which occurred in the financial year 1993-94. The births in Australia during the financial year were added to the Australian-born population.

8. Persons in migration and death statistics with country of birth not stated were distributed pro-rata between stated countries of birth.

9. The Appendix to this publication contains a list of the 66 major country classifications for which country of birth population estimates are available. For more detailed infor-

mation on the classification of countries refer to the ABS publication *Australian Standard Classification of Countries for Social Statistics (1269.0)*.

**Reliability of estimates**

10. The estimated resident populations are subject to sampling variability because the estimated rates of underenumeration at population censuses were obtained from the census Post-enumeration Survey, and the estimates of the number of residents temporarily overseas were obtained by sampling records of short-term overseas arrivals. Estimates based on information obtained from a sample may differ from the figures that would have been produced if all units had been included. The post-censal estimates are updates of census date estimates, and therefore contain sampling errors as in the census date estimates. For a table showing the rates of underenumeration and their standard errors for selected countries of birth, refer to *Census 91: Data Quality Undercount (2940.0)*. Standard errors of estimates of short-term overseas arrivals, on which the numbers of residents temporarily overseas were based, are contained in Appendix B of *Overseas Arrivals and Departures, Australia (3402.0)*.

11. In addition to sampling variability, the estimates may be affected by non-sampling errors, which may occur because of imperfections in census, births, deaths and migration data. Errors may also occur in the allocation to country of birth of those who did not state their country of birth.

12. Some estimates in this bulletin are shown in units without being rounded. However, accuracy down to the last unit is not claimed and should not be assumed.

**Related publications**

13. Estimates by Country of birth, age and sex from June 1981 are available on floppy disc at a cost of \$100 per year.

14. Other ABS publications which may be of interest to users of this publication include:

*Births, Australia, 1992 (3301.0)*

*Deaths, Australia, 1992 (3302.0)*

*Overseas Arrivals and Departures, Australia (3404.0)*

*Estimated Resident Population by Sex and Age: States and Territories of Australia (3201.0)*

*Australian Demographic Statistics(3101.0) - issued quarterly*

15. Current publications produced by the ABS are listed in the *Catalogue of Publications and Products, Australia (1101.0)*. The ABS also issues, on Tuesdays and Fridays, a *Publications Advice (1105.0)* which lists publications to be released in the next few days. The Catalogue and Publications Advice are available from any ABS office.

## APPENDIX

## For more information ...

The ABS publishes a wide range of statistics and other information on Australia's economic and social conditions. Details of what is available in various publications and other products can be found in the *ABS Catalogue of Publications and Products* available at all ABS Offices (see below for contact details).

### Information Consultancy Service

Information tailored to special needs of clients can be obtained from the Information Consultancy Service available at ABS Offices (see Information Inquiries below for contact details).

### National Dial-a-Statistic Line

0055 86 400

(Steadycom P.L. premium rate 25c/21 4 secs)

This number gives 24-hour access, 365 days a year for a range of statistics.

### Electronic Data Services

A large range of data is available via on-line services, diskette, magnetic tape, tape cartridge and CD ROM. For more details about our electronic data services, contact any ABS Office (see below).

### Bookshops and Subscriptions

There are over 400 titles of various publications available from ABS bookshops in all ABS Offices (see below Bookshop Sales for contact details). The ABS also provides a subscription service through which nominated publications are provided by mail on a regular basis at no additional cost (telephone Publications Subscription Service toll free on 008 02 0608 Australia wide).
