AGE AND SEX DISTRIBUTION OF THE ESTIMATED RESIDENT POPULATION, QUEENSLAND, 1995

MAIN FEATURES

QUEENSLAND

- The estimated resident population of Queensland at 30 June 1995 was 3 277 373 persons, a rise of 81 239 persons or 2.5% since 30 June 1994.

CHILDREN

- Children (aged under 15 years) numbered 720 028 in 1995, an increase of 12 406 since 1994. In 1995, children represented 22.0% of Queensland's population with the lowest proportion occurring in the Moreton Statistical Division (20.5%). The highest proportions of children were found in the North-West and South-West Statistical Divisions, 27.8% and 26.0% respectively. The proportion exceeded 30% in the Shires of Torres, Mornington, Burke, Croydon, Cloncurry and Barcoo. In south-eastern Queensland, the statistical local areas of Marsden, Edens Landing-Holmview and Greenbank Part B on the outskirts of Brisbane recorded the highest proportions along with the Gold Coast suburb of Ernest-Molendinar.

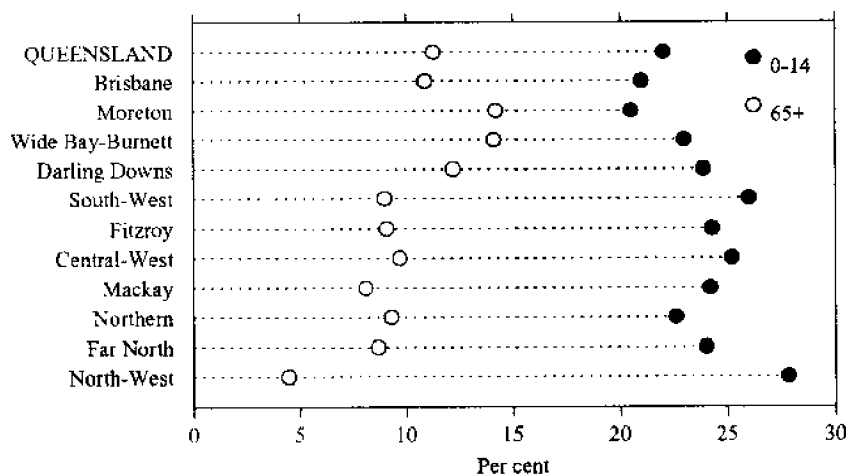

AGED PERSONS

- The aged (65 years or more) numbered 369 159 in 1995, an increase of 11 932 persons since 1994. In 1995, aged persons represented 11.3% of Queensland's population with the lowest proportion occurring in the North-West Statistical Division (4.5%). The highest proportions of aged persons occurred in the Moreton and Wide Bay-Burnett Statistical Divisions, 14.2% and 14.1%, respectively, while the figure in the Brisbane Statistical Division was 10.9%. The Brisbane suburbs of Chermside, Sandgate and Wavell Heights recorded high proportions of aged persons as did Gold Coast suburbs such as Coolangatta, Paradise Point, Tugun and Broadbeach Waters.

DEPENDENCY RATIO

- The dependency ratio (number of children 0-14 years and person aged 65 years and over per 100 persons aged 15 to 64 years) was 49.8 for Queensland in 1995, having decreased from 50.0 in 1994. In 1995, the dependency ratio was highest in the Statistical Divisions of Wide Bay-Burnett (58.8) and Darling Downs (56.5). The Northern and Brisbane Statistical Divisions recorded the lowest ratios, 46.9 and 47.0, respectively.

**PROPORTION OF POPULATION IN SELECTED AGE GROUPS BY
STATISTICAL DIVISION, QUEENSLAND, 30 JUNE 1995**

EXPLANATORY NOTES

INTRODUCTION

1 This publication contains estimates of the age and sex distribution of the resident population of statistical divisions, statistical subdivisions, statistical local areas (SLAs), legal local government areas and statistical districts in Queensland for 30 June 1995.

METHODOLOGY

2 The estimated resident population (ERP) as at 30 June 1991 for each SLA was calculated by adjusting usual residence census counts for under-enumeration and adding the number of residents temporarily overseas at the census date. Persons who did not state their usual residence on the census form were proportionately allocated to all the SLAs in the State.

3 As the 1991 Census was held on 6 August, a further adjustment was made to obtain the ERP at 30 June 1991. This involved subtracting the increase in population of each SLA, due to the natural increase and net migration between 1 July and 6 August, from the 6 August 1991 population estimate.

4 For intercensal years, the total ERP for each SLA is calculated using a linear regression model. The model establishes a mathematical relationship between changes in population and other variables over the period between the two most recent censuses for which the required data are available, i.e. 1986 to 1991. The main variables used include building commencements, estimates of persons in dwellings (adjusted for changes in occupancy rates), electoral enrolments and medicare registrations.

5 Other indicators of resident population movement used to supplement the estimates from the regression model include information from councils about mining and other development projects in their area. Further information about the method of calculation of estimates in this publication is available on request.

6 Estimates of the age and sex distribution of SLA populations were obtained by the demographic cohort method, i.e. by advancing births, subtracting deaths and adjusting for inward and outward migration. Total population growth in 1994-95 was split into natural increase and net migration components, the latter being the difference between total growth and natural increase for each SLA. Age/sex estimates of natural increase were obtained from birth and death registrations and those for net migration are described in the following paragraph.

7 Age/sex migration profiles for each SLA were derived from 1986 census data for inter-SLA arrivals, inter-SLA departures and overseas arrivals. The method involved a comparison of usual residence in 1986 with usual residence at 30 June 1985. (Comparable data was not available from the 1991 Census.) Profiles for overseas departures were derived using an average for the last 3 years of overseas departures data by usual residence, obtained from passenger cards.

8 A detailed description of the methods used to compile population estimates at national, State and statistical local area levels is contained in the ABS Information Paper *Population Estimates: Concepts, Sources and Methods* (3228.0).

BOUNDARY CHANGES

9 The boundaries of SLAs used in this publication are those which existed at 30 June 1995. The data are presented according to *Australian Standard Geographical Classification, Edition 2.5*. Details of boundary changes which occurred between 1 July 1991 and 30 June 1995 are shown in *Estimated Resident Population and Area, 1995, Preliminary* (3201.3).

DEFINITIONS

10 *Legal local government areas* (LGAs), as defined under the *Local Government Act 1993*, are spatial units which represent the geographical areas of incorporated local government councils, such as cities (C), towns (T) and shires (S).

11 *Statistical local areas* are the smallest spatial units for which the estimates of resident population are presented. They correspond either to LGAs or to suburbs in certain LGAs. Some LGAs are split into two parts, with each part forming a separate SLA. The unincorporated area of Queensland also forms a SLA. In aggregate, SLAs cover the whole of the State without gaps or overlaps.

12 *Statistical subdivisions* consist of one or more SLAs.

13 *Statistical divisions*, which are groupings of SLAs, are designed to be reasonably homogeneous regions characterised by identifiable social and economic units within the region. The Brisbane Statistical Division comprises the Cities of Brisbane, Logan and Redcliffe, the Shires of Pine Rivers and Redland, parts of Gold Coast and Ipswich Cities and parts of Beaudesert and Caboolture Shires.

14 *Statistical districts* have been defined around selected urban areas to provide comparable statistics over a period of time. These districts, which are intended to contain the anticipated urban spread for at least 20 years, are generally defined as having a population of 25 000 or more and experiencing urban growth beyond the LGA boundaries.

RELIABILITY

15 Although estimates of the resident population are shown to the nearest unit, accuracy to this level is not claimed and should not be assumed.

POPULATION PROJECTIONS

16 The ABS compiles and publishes population projections for Australia, States and Territories (3222.0).

17 The ABS as part of its Information Consultancy Service can prepare ad hoc population projections at the SLA or higher level. The projections are based on the latest ERP by age and sex. Clients can supply their own assumptions of migration, birth and death rates or approve the use of assumptions formulated by the ABS.

18 Further details regarding the population projections service may be obtained from the contact shown at the front of this publication.

RELATED PUBLICATIONS

19 Users may also wish to refer to the following publications which are available on request:

Estimated Resident Population and Area, Queensland, Preliminary (3201.3) - Latest issue: 1995 (\$13.50)

Estimated Resident Population, Queensland, 1986 to 1991 (3212.3) (\$25.00)

RELATED PUBLICATIONS — *continued*

Demography, Queensland (3311.3) - Latest issue: 1994 (\$17.50)
Australian Demographic Statistics (3101.0) - Quarterly (\$14.00)

DATA ON FLOPPY DISK

20 Data from this and other selected ERP publications are also available on floppy disk.

Estimated Resident Population by Age and Sex in Statistical Local Areas, Queensland: Data on Floppy Disk (3227.3) - Latest issue: 1995 (\$55.00)

UNPUBLISHED STATISTICS

21 The ABS also has other unpublished statistics available including ERP age/sex data by single year of age. Inquiries should be made to the contact shown at the front of this publication.

ELECTRONIC SERVICES

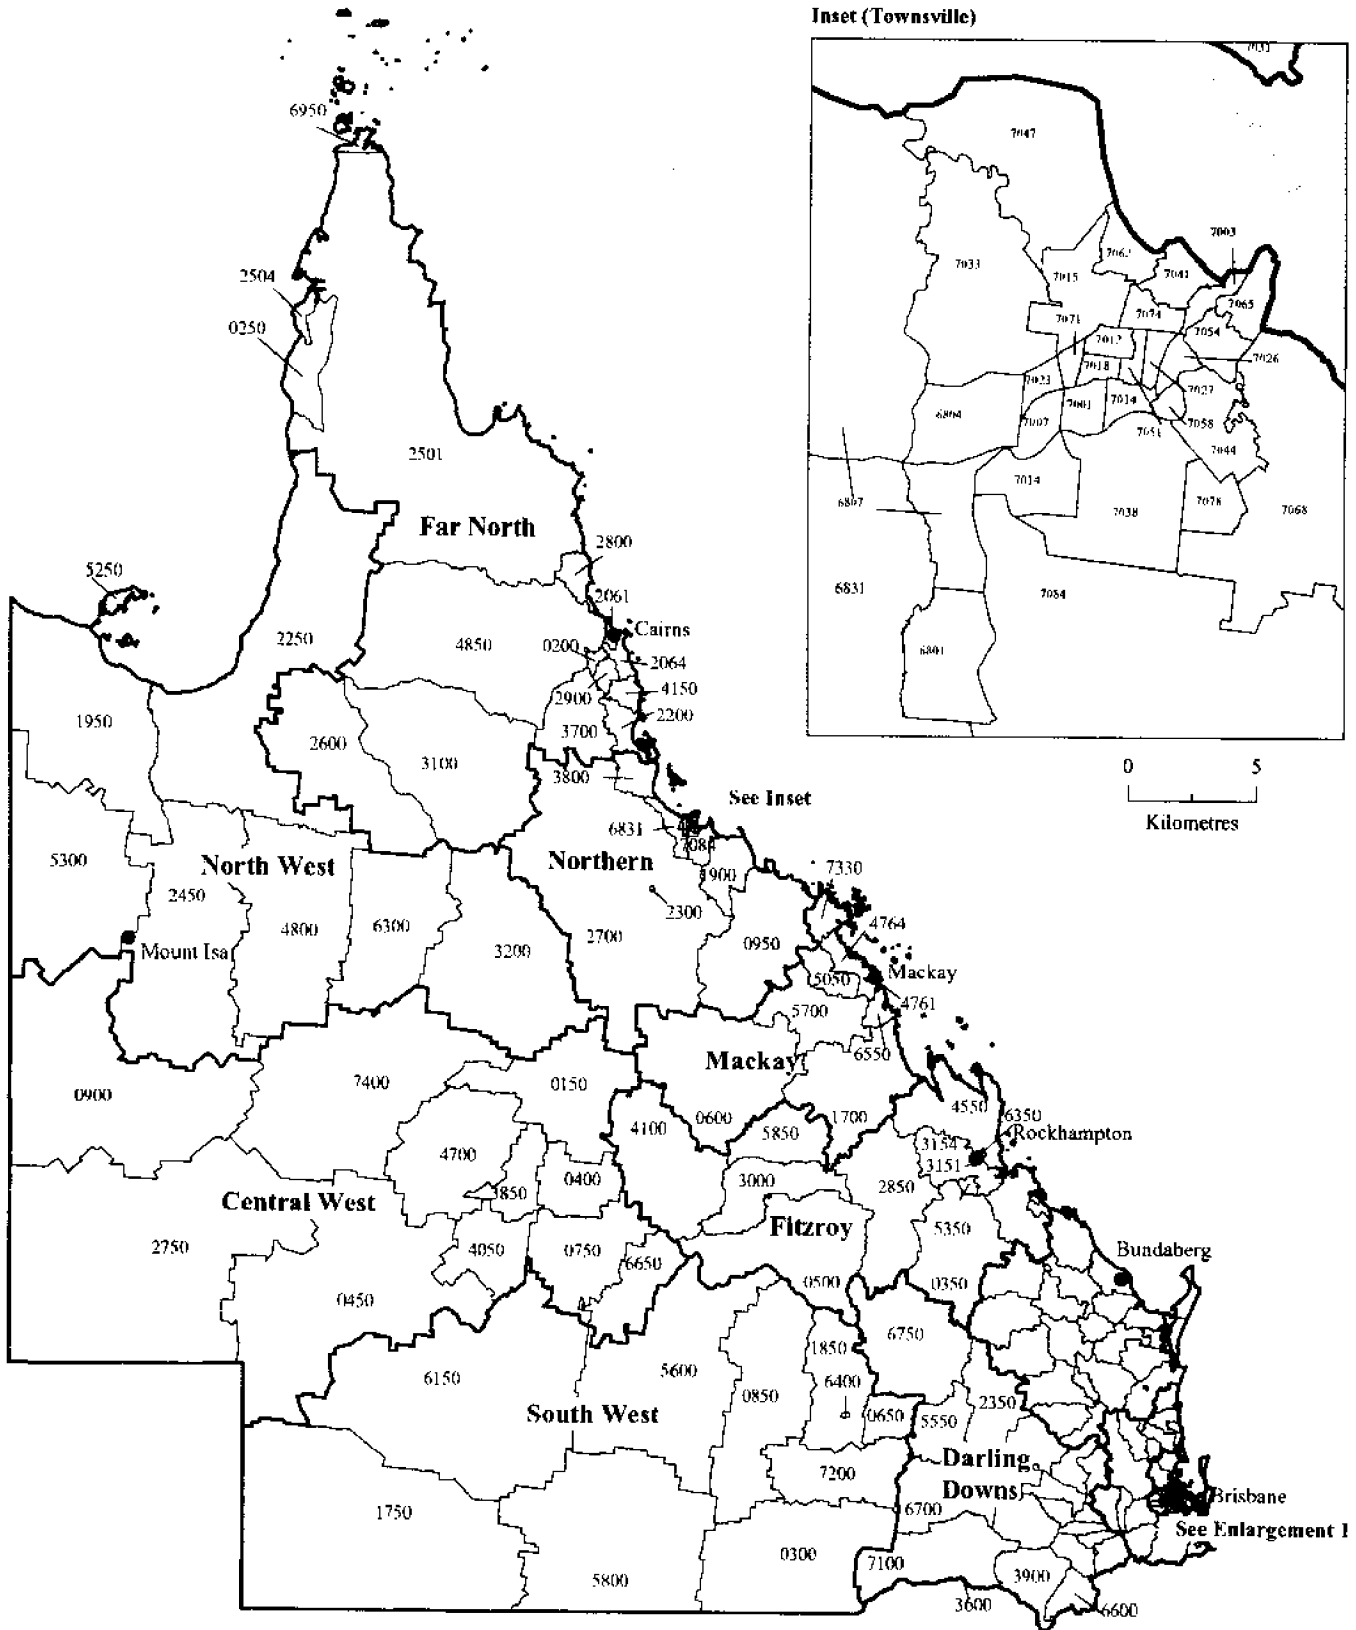

AUSSTATS: Thousands of up-to-date time series are available on this ABS on-line service through PAXUS COMNET. For further information phone the AUSSTATS help desk on (06) 252 6017.

Integrated regional data base: This Windows-based product from the ABS contains 2 800 small area data items. It is easy to use and can produce tables quickly. It can export data into spreadsheets, word processors and mapping packages. For more information call (06) 252 7363.
