## EXPLANATORY NOTES

.....

### INTRODUCTION

**1** This publication contains final estimates of the resident population by age and sex in statistical local areas (SLAs) in South Australia at 30 June 1996.

**2** The estimated resident population (ERP) is the official ABS estimate of the Australian population. The ERP at 30 June 1996 is based on results of the Census of Population and Housing held on 6 August 1996.

### METHODOLOGY

**3** The estimated resident population of an SLA at a Census of Population and Housing date is based on the census count (place of actual location) for the SLA with adjustments made by:

- excluding all visitors who normally reside elsewhere (i.e. overseas or in another SLA within Australia);
- including residents of the SLA who were counted in another SLA within Australia;
- including residents of the SLA who were temporarily overseas (i.e. for less than 12 months) on census night; and
- adjusting for census under-enumeration as measured by the post-enumeration survey taking into account differences in under-enumeration by age, sex and geographic location.

**4** Adjustments were made for births, deaths and net migration for the period 30 June to 6 August (the Census date in both 1991 and 1996) to arrive at estimated resident population figures for 30 June 1991 and 30 June 1996.

**5** A detailed explanation of the concept of estimated resident population, as adopted by the Australian Bureau of Statistics (ABS) for official population estimates, is contained in the ABS Information Paper: Population Estimates: Concepts, Sources and Methods (Cat. no. 3228.0).

### GEOGRAPHIC BOUNDARIES

**6** The geographic areas used in this publication are defined in the *Australian Standard Geographical Classification, 1996 Edition* (Cat. no. 1216.0). The SLAs shown in this publication equate directly with local government areas except for Enfield which is split into two SLAs, Part A and Part B.

**7** The SLA population estimates in this publication are calculated on SLA boundaries at 30 June 1996.

### RELIABILITY

**8** All SLA estimates are shown to the nearest person, although accuracy to this level is not claimed and should not be assumed.

### DATA ON FLOPPY DISK

**9** The data in this publication are also available on floppy disk.

### POPULATION PROJECTIONS

**10** The ABS compiles and publishes *Population Projections for Australia, States and Territories* (Cat. no. 3222.0).

**11** The ABS as part of its Statistical Consultancy Service can prepare ad hoc population projections at the SLA or higher level. The projections are based on the latest ERP by age and sex. Clients can supply their own assumptions or approve the use of ABS formulated assumptions.

**12** For further details regarding data on floppy disk or population projections contact the ABS Small Area Population Unit on (08) 8237 7318.
