SUMMARY OF FINDINGS

POPULATION

At 30 June 1996 the estimated resident population of the Northern Territory was 181,843, comprising 95,668 males and 86,175 females. This was 1.0% of the Australian total of 18,310,714.

The majority of people in the Northern Territory (107,272 or 59.0%) live in the three major urban centres of Darwin City SSD, Palmerston-East Arm SSD and Alice Springs (T). A further 9.3% (16,872) live in the smaller urban areas of Katherine (T), Nhulunbuy and Tennant Creek (T). By SSD, the greatest proportion of people live in the Darwin City SSD (37.9%), followed by Central NT SSD (19.9%) which includes Alice Springs.

POPULATION DISTRIBUTION BY STATISTICAL SUBDIVISION

SEX DISTRIBUTION

The sex ratio at 30 June 1996 for the Northern Territory was 111 males for every 100 females. Males outnumbered females in all but four SLAs — Karama, Moulden and Woodroffe in Darwin SD and Alice Springs (T) — Larapinta in NT Balance SD. The highest ratio of males to females occurred in the SLAs of East Arm (which includes a prison — 656.7 males per 100 females), Litchfield (S) — Part A (which includes the Robertson Barracks — 244.4 males per 100 females) and Winnellie (a light industrial area — 216.8 males per 100 females).

SUMMARY OF FINDINGS continued

AGE DISTRIBUTION

The age structure of the Northern Territory's population is quite different from that of the total Australian population. At 30 June 1996 the Northern Territory had the highest proportion of people aged 14 years and under of any State or Territory (27.1% compared with the national figure of 21.4%). It also had the lowest proportion of people aged 65 years and over (3.2% compared with 12.0% nationally). The proportion of people aged 15-64 was similar to the national proportion (69.7% compared with 66.6%).

AGE DISTRIBUTION, NORTHERN TERRITORY AND AUSTRALIA

The SLAs with the highest proportion of people aged 14 years and under were concentrated in the Alligator, East Arnhem, Lower Top End NT and Barkly SSDs. The SLA of Gulf had the highest proportion of people aged 14 years and under (36.8%), followed by West Arnhem and East Arnhem - Balance (both 36.5%), Tennant Creek - Balance (36.0%) and Daly (35.6%). The SLAs with the highest proportion of people aged 65 years and over were all located in Darwin SD - The Gardens (16.7%), City - Inner (8.2%), Parap (8.0%), Coconut Grove (7.6%) and Fannie Bay (7.5%).

MAP A STATISTICAL LOCAL AREAS — NORTHERN TERRITORY

MAP B STATISTICAL LOCAL AREAS — DARWIN STATISTICAL DIVISION AND ALICE SPRINGS (T)

MAP C LOCAL GOVERNMENT AREAS — NORTHERN TERRITORY

EXPLANATORY NOTES

.....

INTRODUCTION

- 1** This publication contains estimates of the resident population by age and sex in Statistical Local Areas (SLAs) in the Northern Territory at 30 June 1996.
- 2** The estimated resident population (ERP) is the official ABS estimate of the Australian population. The ERP for 30 June 1996 is based on results of the Census of Population and Housing held on 6 August 1996, and numbers of births, deaths, and estimates of interstate and overseas migration in 1995-96.
- 3** ERP is compiled according to the place of usual residence of the population. An explanation of the conceptual basis used is given in the ABS *Information Paper: Demographic Estimates - Concepts, Sources and Methods* (Cat. no. 3228.0).
- 4** Commencing with ERP figures based on the 1996 Census, the ABS has decided to cease publishing the ERP for Off Shore and Migratory SLAs and to redistribute that population across the other SLAs in that State or Territory.

METHODOLOGY FOR DERIVING

POPULATION ESTIMATES

- 5** The figures at the Census date were arrived at by —
 - adjusting the Census counts (place of enumeration basis) to obtain counts on the basis of usual residence (Census count, place of usual residence)
 - adjusting the Census counts, place of usual residence, for Census under-enumeration
 - adding to the adjusted Census counts, place of usual residence, the number of Northern Territory residents temporarily overseas at the time of the Census.
- 6** A survey is conducted after the Census to measure under-enumeration during the Census. Adjustments are calculated separately for the Indigenous and non-Indigenous components of the population. These adjustments are calculated from the result of the under-enumeration survey and other demographic measures. A more detailed explanation is available on request.
- 7** The methods described above are used to derive the Northern Territory population figures for 6 August 1996. The figures for 30 June 1996 were derived by estimating the components of change between 1 July and 6 August and subtracting them from 6 August figures. See the *Australian Demographic Quarterly Statistics* (Cat. no. 3101.0), March quarter 1997, for the data associated with the State and Territory adjustments.
- 8** The "components of change" for estimating growth between 30 June for any two periods for State/Territory ERP include numbers of births and deaths, estimates of interstate migration (derived from Medicare data) and numbers of overseas migrants.

DERIVING ESTIMATES AT SLA LEVEL

- 9** Estimates at SLA level detailed in this issue were derived from a model which apportions the total Northern Territory ERP for 1996 according to changes in the Family Allowance (Department of Social Security) and ABS building survey data.

EXPLANATORY NOTES continued

GEOGRAPHIC BOUNDARIES

10 The geographic boundaries for small area data used in this publication are defined in the *Statistical Geography: Volume 1 Australian Standard Geographic Classification (ASGC), Edition 5* (Cat. no. 1216.0).

11 The principal geographic area change in the Northern Territory between the 1991 and 1996 Census was the splitting of Alice Springs into 5 SLAs where previously there was only one. SLAs in Darwin and Palmerston remain equivalent to gazetted suburbs.
