## SUMMARY OF FINDINGS

---

### TOTAL POPULATION

The estimated resident population (ERP) of the Australian Capital Territory (ACT) as at 30 June 1996 was 308,300, an increase of 3,400 since June 1995 and 18,900 since June 1991. The average annual growth rate for 1991-96 was 1.3%.

Population growth varied considerably between subdivisions. For the period 1991-96, the average annual growth rate for Gungahlin-Hall was the highest at 94.6% per year or 12,200 as a result of the development of the new suburbs of Ngunnawal, Nicholls, Palmerston and Amaroo. Tuggeranong increased by 3.9% per year or 16,000 and South Canberra increased by 0.3% per year or 400. All other subdivisions experienced declining populations. Weston Creek-Stromlo decreased by 1.8% per year or 2,400. Belconnen decreased by 0.9% per year or 3,900, North Canberra decreased by 0.7% per year or 1,400 and Woden Valley decreased by 0.5% per year or 900.

### MEDIAN AGE

The median age of the population of the ACT at 30 June 1996 was 31.3 years, an increase of 6.2 years in the last 20 years, 3.2 years in the last 10 years and 0.4 years since 30 June 1995. However, the ACT has a much younger population than for Australia as a whole, being 2.7 years lower than the Australian median age of 34.0 years. The highest median age among the subdivisions was in South Canberra (36.7 years), followed by Woden Valley (36.5 years), Weston Creek-Stromlo (35.7 years), North Canberra (32.1 years), Belconnen (30.8 years), Tuggeranong (28.6 years) and Gungahlin-Hall (27.6).

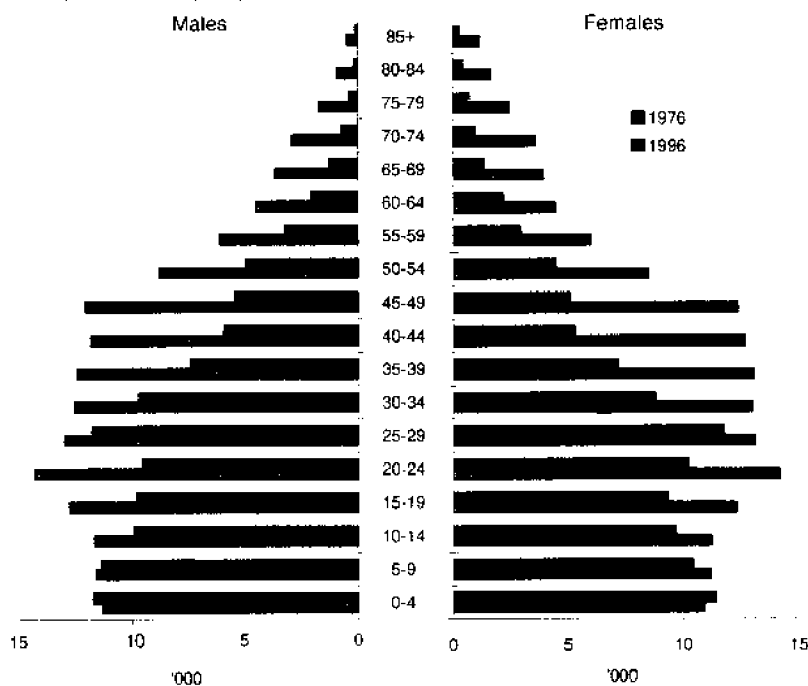

The suburbs with the highest median ages were O'Malley (40.7 years), Symonston (40.5 years) and Deakin and Weetangara (both 40.2 years). Suburbs with the lowest median age included Duntroon (21.1 years) which largely comprises cadets and other military personnel, Acton (21.3 years) which contains a high proportion of university students and Bruce (24.2 years) which includes many Australian Institute of Sport athletes and university students.

# SUMMARY OF FINDINGS *continued*

## AGE STRUCTURE

The population of the ACT is continuing to age, following the national trend. Over the last 20 years there has been no significant growth in the population aged 0–14 years (increased 5%), whereas the population aged 15–64 years has increased by 59% and the number of people aged 65 years and over has increased by 255%.

Population by age and sex

## POPULATION AGED 0–14 YEARS

The population aged 0–14 years was 67,800 or 22.0% of the population of the ACT as at 30 June 1996, compared with 64,400 persons (31.0%) 20 years ago. The subdivision with the highest proportion of its population in the 0–14 age group was Tuggeranong (29.4%), followed by Gungahlin–Hall (23.7%), Belconnen (21.5%), Weston Creek–Stromlo (18.7%), Woden Valley (17.5%), South Canberra (17.0%) and North Canberra (14.3%).

The suburbs with the highest proportion of children aged 0–14 years, Gilmore (35.2%), Chisholm (34.5%), Condor (34.3%), Richardson (34.2%), Macarthur (34.1%) and Theodore (34.0%), are all in the subdivision of Tuggeranong. The suburbs of Hume (0.0%), Acton (0.8%), Phillip (4.8%) and City (5.2%) had the lowest proportions of the population aged 0–14 years.

## SUMMARY OF FINDINGS *continued*

---

### POPULATION AGED 15-64 YEARS

The population aged 15-64 years was 218,100 or 70.7% of the total ACT population as at 30 June 1996, compared with 137,000 (66.0%) 20 years ago. The subdivision of Gungahlin-Hall had the highest proportion of its population in this age group (74.2%), followed by Weston Creek-Stromlo (72.9%), Belconnen (72.7%), North Canberra (72.6%), Woden Valley (71.2%), Tuggeranong (67.7%) and South Canberra (67.1%).

The age structure of the population aged 15-64 years varies considerably across subdivisions. North Canberra, Gungahlin-Hall and Belconnen have a proportionally high number of people aged 20-24 years. This is primarily due to the high number of university students resident in the suburbs of Acton and Bruce and surrounding suburbs and university students and military personnel in Duntroon. A substantial number of persons aged 20-24 years live in or near the town centres of Belconnen and Civic. For example, the suburbs of Acton (44.3%), Duntroon (39.8%) and Belconnen Town Centre (32.3%) have a high proportion of their population aged in the 20-24 years age group.

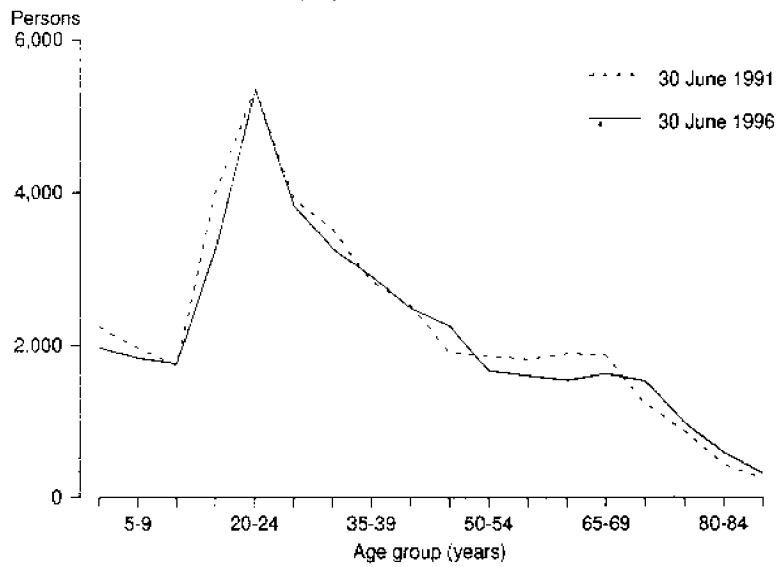

### POPULATION AGED 65 YEARS AND OVER

The 65 years and over age group comprised 22,400 persons or 7.3% of the total population of the ACT as at 30 June 1996 compared with 6,300 (3.0%) 20 years ago. South Canberra had the highest proportion of its population aged 65 years and over (15.9%), followed by North Canberra (13.1%), Woden Valley (11.3%), Weston Creek (8.4%), Belconnen (5.8%), Tuggeranong (2.9%) and Gungahlin-Hall (2.1%).

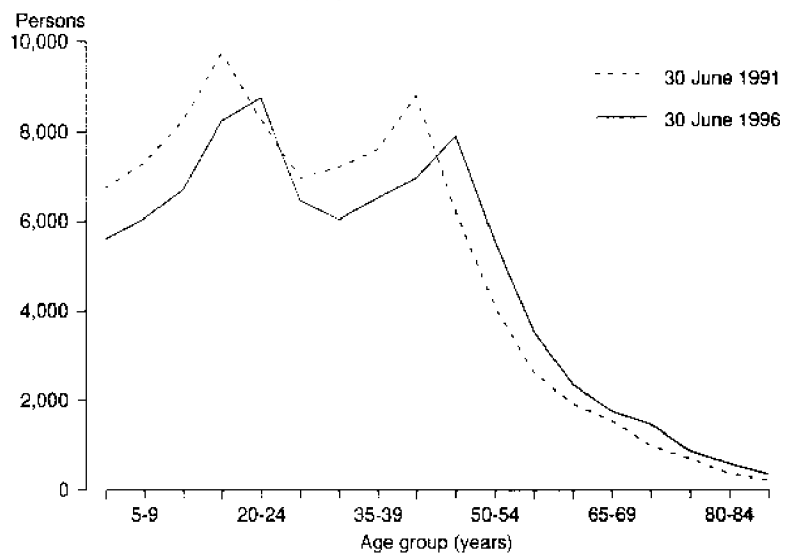

The population aged 85 years and over in the ACT was estimated to be 1,600 persons as at 30 June 1996, compared with 400 persons 20 years ago. Together, the suburbs of Narrabundah, Red Hill, Weston, Ainslie, Curtin, Farrer, Page and Lyneham were estimated to contain about 39% of all persons aged 85 years and over in the ACT.

# EXPLANATORY NOTES

.....

## INTRODUCTION

**1** This publication contains final estimated resident population (ERP) by age and sex for the Statistical Local Areas (SLA) of the ACT at 30 June 1996.

## POPULATION ESTIMATES

**2** The ERP of an area is the estimate of the number of people who usually reside in that area.

**3** An explanation of the concept of ERP, as adopted by the Australian Bureau of Statistics (ABS) for official population estimates, is given in *Information Paper: Demographic Estimates—Concepts, Sources and Methods* (Cat. no. 3228.0) issued on 23 June 1995.

## METHODOLOGY

**4** The ERP contained in this publication are the official ABS population estimates. They are derived from the 1996 Census population counts by making the following adjustments:

- Census counts on a place of usual residence basis are obtained by counting each person in their stated SLA of usual residence, rather than where they were counted on census night. Persons who do not state their usual residence on the census form are proportionately allocated to all the SLAs in the State or Territory. Overseas visitors are excluded from these counts.
- These usual residence census counts are then adjusted for undercount, by applying undercount rates derived from the 1996 Post-Enumeration Survey. These rates take into account differences in undercount according to a persons age, sex and geographic location.
- Australian residents temporarily overseas on census night, excluded from the census counts, are added back to the population. Estimates of Australians temporarily overseas on census night are obtained from passenger card data for persons returning to Australia in the year following the Census.
- The above three adjustments result in the ERP for each SLA as at census date, 6 August 1996. To obtain the ERP as at 30 June 1996, the estimated increase in the population of each SLA due to natural increase and net migration between 1 July and 6 August is subtracted from the 6 August 1996 population estimate.

## EXPLANATORY NOTES *continued*

---

### GEOGRAPHIC BOUNDARIES

**5** The geographic areas used in this publication are defined in the *Statistical Geography: Volume 1—Australian Standard Geographical Classification (ASGC) Edition 2.6* (Cat. no. 1216.0). The boundaries of SLAs used in determining the population are those in existence at 30 June 1996. The population for previous years have been adjusted where appropriate so that they reflect the population changes for each area had the June 1996 boundaries existed then.

**6** The SLAs in Canberra equate directly with the suburbs. Details for the adjacent (New South Wales) Queanbeyan Subdivision are not included in this publication. They are published in *Population by Age and Sex, New South Wales* (Cat. no. 3235.1).

### RELIABILITY

**7** Although estimates of resident population are shown to the nearest unit, accuracy to this level is not claimed and should not be assumed.

### DATA ON DISK

**8** Data is available on disk upon request.

### GENERAL ACKNOWLEDGEMENT

**9** ABS publications draw extensively on information provided freely by individuals, businesses, governments and other organisations. Their continued cooperation is very much appreciated: without it, the wide range of statistics published by the ABS would not be available. Information received by the ABS is treated in strict confidence as required by the *Census and Statistics Act 1905*.

### RELATED PUBLICATIONS

**9** Other ABS publications which may be of interest to users of this publication include:

*1996—Census of Population and Housing: Selected Social and Housing characteristics for Statistical Local Areas, Australian Capital Territory, 1996* (Cat. no. 2015.8)

*Australian Demographic Statistics* (Cat. no. 3101.0) — issued quarterly  
*Demography, Australian Capital Territory* (Cat. no. 3311.8) — issued annually

*Information Paper: Demographic Estimates—Concepts, Sources and Methods* (Cat. no. 3228.0)

*Population, Australian Capital Territory* (Cat. no. 3234.8) — issued annually

*Population by Age and Sex, Australian States and Territories* (Cat. no. 3201.0) — issued annually

*Projections of the Populations of Australia, States and Territories, 1995 to 2051* (Cat. no. 3222.0)

**10** Current publications produced by the ABS are listed in the *Catalogue of Publications and Products* (Cat. no. 1101.0). The ABS also issues, on Tuesdays and Fridays, a *Release Advice* (Cat. no. 1105.0), which lists publications to be released in the next few days. The Catalogue and Release Advice are available from any ABS office.

## For more information . . .

The ABS publishes a wide range of statistics and other information on Australia's economic and social conditions. Details of what is available in various publications and other products can be found in the ABS Catalogue of Publications and Products available from all ABS Offices.

### ABS Products and Services

Many standard products are available from ABS bookshops located in each State and Territory. In addition to these products, information tailored to the needs of clients can be obtained on a wide range of media by contacting your nearest ABS Office. The ABS also provides a Subscription Service for standard products and some tailored information services.

### National Dial-a-Statistic Line

0055 86 400

*Steadycom P/L: premium rate 25c/20 secs.*

This number gives 24-hour access, 365 days a year, for a range of important economic statistics including the CPI.

### Internet

<http://www.abs.gov.au>

A wide range of ABS information is available via the Internet, with basic statistics available for each State, Territory and Australia. We also have Key National Indicators, ABS product release details and other information of general interest.
