MAIN FEATURES (September quarter 1993)

Total movement

The total number of movements (all arrivals plus all departures) for the September quarter 1993 was 2,691,100. Total arrivals (1,368,800) increased 7 per cent and departures (1,322,300) increased 6 per cent compared with September quarter 1992.

Short-term movement - Overseas visitors

There were 708,600 short-term overseas visitor arrivals to Australia, an increase of 16 per cent compared with the September quarter 1992 (608,400).

The main source countries for visitor arrivals in September quarter 1993 were: Japan (24% of total), New Zealand (22%), the United States of America (9%) and the United Kingdom (8%). These four countries accounted for 62 per cent of the total visitor arrivals compared with 65 per cent in September quarter 1992 and 70 per cent in September quarter 1991.

The main purpose of journey reported by visitors arriving was 'Holiday or accompanying business traveller' (62%) followed by 'Visiting relatives' (17%) and 'Business or employment' (10%).

The largest age group for visitor arrivals was 25 to 34 years with 150,900 (21% of total) followed by the 35 to 44 year age group with 134,600 (19%).

All visitors were asked, on completion of their visit to Australia, to report the State or Territory in which they spent most time. Forty-Five per cent reported New South Wales (the same percentage as September quarter 1992), 32 per cent Queensland (the same percentage), 10 per cent Victoria (11%) and 8 per cent Western Australia (7%).

Of those visitors who reported spending most time in New South Wales or Queensland, 15 per cent stayed for one month or more, while 25 per cent stayed for one month or more in Victoria.

Short-term movement - Australian residents

The number of short-term resident departures (614,700) was 3 per cent less than September quarter 1992 (632,700).

The main destinations of Australian residents departing were: New Zealand (14% of total), the United States of America (13%), the United Kingdom (12%), Indonesia (10%), Hong Kong (5%) and Singapore (4%).

In the September quarter 1993, 54 per cent (compared with 56% in September quarter 1992) of departures were for the purpose of 'Holiday or accompanying business traveller', 20 per cent for 'Visiting relatives' (19%) and 18 per cent for 'Business or employment' (16%).

A similar number of Australian resident departures were in the 35 to 44 year age group (132,400) as the 45 to 54 year age group (127,200), followed by the 25 to 34 year age group with 121,100.

Australian residents who intended to stay abroad for less than 1 month accounted for 63 per cent of all resident departures, with a further 18 per cent intending to stay for 1 month and less than 2 months.

Permanent and long-term movement

Permanent and long-term arrivals (49,330) decreased 6 per cent, while permanent and long-term departures (33,000) remained almost identical compared with September quarter 1992. The excess of permanent and long-term arrivals over permanent and long-term departures was 16,330, 15 per cent lower than the net gain of 19,130 for September quarter 1992.

There were 17,530 permanent (settler) arrivals, 25 per cent less than the 23,310 settler arrivals in September quarter 1992.

Settler arrivals from all major groups decreased compared with September quarter 1992. Settler arrivals increased from the Former Yugoslav Republics (31%) and Viet Nam (14%), while decreases were recorded in almost all countries with the most significant being Hong Kong (65%), Iraq (58%), Taiwan (57%), India (41%) and the United Kingdom (23%).

The major source countries for settlers were the United Kingdom (12% of all settler arrivals), New Zealand and Viet Nam (both 9%), the Former Yugoslav Republics (7%) and the Philippines (6%).

There were 6,800 permanent departures, 3 per cent more than September quarter 1992.

The major countries of intended residence recorded for permanent and long-term departures were the United Kingdom (5,530 or 17% of total), New Zealand (3,320 or 10%), the United States of America (3,100 or 9%) and Hong Kong (2,380 or 7%). These countries accounted for 43 per cent of all destinations for permanent and long-term departures.

Changes to this issue

Several improvements to various tables have been incorporated in this issue. Tables 5, 11, 13 and 17 now include a separate category for 'Education'. More detailed lengths of stay are shown in Tables 14, 16 and 18 and additional countries have been included in Tables 9 and 17 to 22.

EXPLANATORY NOTES

Introduction

This publication contains statistics of persons arriving in, and departing from, Australia in summary form for the latest available quarter, together with three year time series for the major characteristics of travellers. More detailed statistics can be made available, on request (see paragraph 22). Monthly statistics have previously been released (see paragraph 19).

Source of the statistics

2. Persons arriving in, or departing from, Australia are required to complete prescribed questionnaires in the form of Incoming and Outgoing Passenger cards (see Appendix A). These cards provide information to the Department of Immigration and Ethnic Affairs for administrative purposes and serve as the source of statistics of overseas arrivals and departures. In accordance with the *Census and Statistics Act 1905*, information relating to individuals, individual flights or ships and individual carriers, which is contained in these cards or other documents, is treated as confidential by the ABS.

Scope

3. The statistics in this publication relate to the number of movements of travellers rather than the number of travellers (i.e. the multiple movements of individual persons during a given reference period are each counted separately). The statistics exclude the movements of operational air and ships' crew, of transit passengers who pass through Australia but are not cleared for entry, and of passengers on pleasure cruises commencing and finishing in Australia aboard ships not then engaged on regular voyages.

Definitions

Category of movement

4. Category of movement is primarily determined by the traveller's selection of their own category on the passenger card. This selection is accepted provided it is consistent with other information on the passenger card.

Permanent movement

5. Permanent arrivals (settlers) comprise travellers who hold migrant visas, (regardless of stated intended period of stay), New Zealand citizens who indicate an intention to settle and those who are otherwise eligible to settle (e.g. overseas born children of Australian citizens). Permanent departures are Australian residents (including former settlers) who on departure state they do not intend to return to Australia.

Long-term movement

6. Long-term arrivals comprise overseas visitors (except those who hold migrant visas—see paragraph 5 above) who intend to stay in Australia for 12 months or more and Australian residents returning after an absence of 12 months or more overseas. Long-term departures comprise Australian residents who intend to stay abroad for 12 months or more and overseas visitors departing who stayed 12 months or more in Australia.

Short-term movement

7. Movements of travellers whose intended or actual length of stay is less than twelve months are classified as short-term, except those who on arrival hold migrant visas (see paragraph 5 above).

8. A large number of travellers state exactly 12 months or one year as their intended period of stay. Many of these stay for less than that period and on their departure from, or return to, Australia should therefore be classified as short-term. To maintain consistency between arrivals and departures, movements of travellers who report their actual or intended period of stay as being one year exactly are randomly allocated to long-term or short-term, in proportion to the number of movements of travellers who report their actual length of stay as up to one month more, or one month less, than one year.

Country of birth, residence or citizenship

9. The classification of countries in this publication is based on the Australian Standard Classification of Countries for Social Statistics (ASCCSS). For more detailed information refer to the ABS publication *Australian Standard Classification of Countries for Social Statistics* (1269.0).

10. Political developments in Europe and the Former USSR have resulted in a number of changes to the ASCSS. These changes have affected some of the categories in this publication and are detailed in Revision 1.02 of the ASCSS.

11. Statistics on country of birth, residence or citizenship have certain limitations because of inadequate reporting on passenger cards. For instance, it is not possible to identify separately England, Scotland and Wales. Similarly 'Korea' includes both the Republic of Korea and the Democratic People's Republic of Korea. United States of America includes 'America (undefined)'.

State or Territory of clearance

12. State or Territory of clearance refers to the State or Territory in which a passenger is cleared by Customs and Immigration authorities. Embarkation or disembarkation and clearance are usually, but not necessarily, in the same State.

State or country of residence

13. State of residence or country of residence refers to the State or country in which travellers regard themselves as living or as last having lived. State of intended residence is derived from the intended address given by settlers and Australian residents returning after a journey abroad. Particularly in the case of the former, this information does not necessarily relate to the State in which a traveller will eventually establish a permanent residence.

State of stay and country of intended stay for short-term travellers

14. Overseas visitors are asked on arrival for their intended address and on departure for the name of the State in which they spent most time. Australian residents travelling overseas are asked on departure for the name of the country in which they intend to spend most time and on their return for the name of the country in which they spent most time.

Estimation method

15. Overseas arrival and departure statistics are derived from a combination of full enumeration and sampling. All permanent movements and all movements with a duration of stay of one year or more are fully enumerated. All movements with a duration of stay of less than one year are sampled. Statistics relating to these movements are therefore estimates which may differ from statistics which would have been obtained if details of all these movements had been processed. Details of the sampling method and comments on the sampling errors associated with the estimates are contained in the Technical Note, Appendix B.

16. The statistics in this publication have been rounded, to the nearest 100 for short-term movements and to the nearest 10 for permanent and long-term movements. In tables showing both short-term and permanent and long-term movements the total movements have been rounded to the nearest 100. The sums of the components may, due to rounding, not add exactly to totals.

Corrections and imputations

17. The imprecision due to sampling errors should not be confused with errors arising from imperfections in reporting, which may occur in any data collection, whether sampled or not. Every effort is made to minimise such errors, both through careful design of the passenger cards and through checks on the information once it is received. During the edit process some items are corrected where they conflict with other known information. Missing replies to certain items such as age and country of birth are also imputed by reference to other related items.

18. Errors of this kind differ from discrepancies arising from the fact that certain information reflects the travellers intentions, at the time the passenger cards were completed. These intentions are of course subject to change. Particularly affected is the distinction between permanent and temporary movement and in the latter case, length of intended stay, country in which most time will be spent and purpose of journey.

Related publications

19. Users may also wish to refer to the following ABS publications:

Overseas Arrivals and Departures, Australia (3401.0)—issued monthly

Overseas Arrivals and Departures, Australia (3404.0)—issued annually

Australian Demographic Statistics, (3101.0)—issued quarterly

20. Related statistics are also published by the Department of Immigration and Ethnic Affairs and the Department of Transport and Communications.

21. Current publications produced by the ABS are listed in the *Catalogue of Publications and Products, Australia* (1101.0). The ABS also issues, on Tuesdays and Fridays, a *Publications Advice* (1105.0) which lists publications to be released in the next few days. The Catalogue and Publications Advice are available from any ABS office.

Additional statistics available

22. In some cases, the ABS can make available information which is not published. This information may be made available in one or more of the following forms: microfiche, photocopy, data tape, floppy disk, computer printout, clerically-extracted tabulations. Generally, a charge is made for providing unpublished information. A full list of unpublished Overseas Arrival and Departure tabulations is available on request.

About the information you give in this form. The information you give in this form is needed by the Department of Immigration, Local Government and Ethnic Affairs to carry out its functions and activities. It is also the Department's usual practice to pass on some or all of such information to agencies which deal with education, health, community services, social welfare, employment and labour, intelligence, law enforcement, taxation and statistics.		

APPENDIX B

TECHNICAL NOTE : METHOD OF SAMPLING AND RELIABILITY OF ESTIMATES

Method of sampling

All movements with a duration of stay less than one year are sampled using the following stratification:

<i>Country of Citizenship</i>	<i>Sample</i>	
Australia, New Zealand, Japan, United Kingdom (excl. Ireland), and the United States of America	1 in	40
Canada, Germany, Malaysia and Singapore	1 in	15
Any other individual country depending on the number of movements	1 in or 1 in or 1 in	1 4 10

Reliability of estimates

Estimates based on a sample are subject to sampling variability, i.e. they may differ from those that would be obtained from a full enumeration.

The sampling error associated with any estimate can be estimated from the sample results and one measure so derived is the standard error. Given an estimate and the standard error on that estimate, there are about two chances in three that the sample estimate will differ by less than one standard error from the figure that would have been obtained from full enumeration, and about nineteen chances in twenty that the difference will be less than two standard errors. Another measure of the sampling error is the relative standard error which is obtained by expressing the standard error as a percentage of the estimate.

It would be impracticable to publish estimates of standard errors for all figures in individual tables. However, the following tables of standard errors and relative standard errors gives an indication of the magnitude of the sampling error associated with any estimate of a particular size for short-term and total movement.

APPROXIMATE STANDARD ERRORS OR ESTIMATES FOR STRATIFIED SAMPLE

<i>Estimated number of persons</i>	<i>Short-term movement</i>				<i>Total movement</i>	
	<i>Departure or arrival of Australian residents</i>		<i>Arrival or departure of overseas visitors</i>		<i>Arrivals or departures</i>	
	<i>Standard error</i>	<i>Relative standard error</i>	<i>Standard error</i>	<i>Relative standard error</i>	<i>Standard error</i>	<i>Relative standard error</i>
		<i>%</i>		<i>%</i>		<i>%</i>
10,000	550	6	490	5	550	6
5,000	450	9	330	7	410	8
2,000	280	14	230	11	250	13
1,000	200	20	150	15	170	17
750	180	24	140	19	150	20
500	130	26	110	22	125	25
400	120	30	100	25	115	29
300	110	36	84	28	97	32
200	90	45	70	35	80	40
100	63	63	49	49	56	56

An example of the use of this table is as follows: if the estimate of the number of the Australian resident departures for short-term visits is 500, then the standard error on this estimate is 130, i.e. there are two chances in three that the actual number of Australian resident departures for a short-term visit will lie between 370 and 630 and nineteen chances in twenty that it will lie between 240 and 760.

As the table shows, the larger the size of an estimate the smaller the relative standard error. For any estimate of greater than 10,000 the relative standard error will be less than 6 per cent and so the sampling error can be assumed to be negligible for most practical purposes.

The estimate of the difference between an estimate in two different periods or between estimates from the same

period is also subject to sampling error. The standard error on the difference between any two estimates which are subject to sampling error can be approximated by using the larger standard error of the estimates inflated by a factor of 1.4. An example of the use of this procedure is as follows:

Assume the estimates of the number of arrivals to Australia of visitors who stated 'attending convention' as the purpose of journey in January 1992 and 1993 are 1,500 and 750 respectively. The difference between the 1992 and 1993 figures is 750 and the standard errors on these estimates are approximately 190 and 140. The standard error on the difference is approximately $(1.4 \times 190) = 266$, and there are nineteen chances in twenty that the estimate of the difference between the two years will lie between 218 and 1,282.

For more information ...

The ABS publishes a wide range of statistics and other information on Australia's economic and social conditions. Details of what is available in various publications and other products can be found in the *ABS Catalogue of Publications and Products* available at all ABS Offices (see below for contact details).

Information Consultancy Service

Information tailored to special needs of clients can be obtained from the Information Consultancy Service available at ABS Offices (see Information Inquiries below for contact details).

National Dial-a-Statistic Line

0055 86 400

(Steadycom P/L: premium rate 25c/21.4 secs.)

This number gives 24-hour access, 365 days a year for a range of statistics.

Electronic Data Services

Selections of most frequently requested statistics are available, updated daily, on DISCOVERY (Key *656#). For more details on electronic data services available, contact Information Services in any of the ABS Offices (see Information Inquiries below for contact details).

Bookshops and Subscriptions

There are over 500 titles of various publications available from ABS bookshops in all ABS Offices (see below Bookshop Sales for contact details). The ABS also provides a subscription service through which nominated publications are provided by mail on a regular basis at no additional cost (telephone Publications Subscription Service toll free on 008 02 0608 Australia wide).
