EXPLANATORY NOTES

This bulletin shows statistics of schools throughout Australia for 1961 with comparative figures for earlier years. Separate figures are shown for government and non-government schools in all tables except No. 6.

The statistics relate generally to schools providing education according to the primary and secondary school curricula of the various State Education Departments, whether provided in government or non-government schools. Junior technical schools, correspondence schools and schools in institutional homes, hospitals and similar establishments are included. Institutions providing only pre-school education, senior technical colleges, evening schools, continuation classes and various unregistered schools such as coaching establishments are excluded.

"School Censuses" are conducted annually throughout all States and Territories of Australia. With the exception of non-government schools in Tasmania, where the census is conducted in December, school censuses are conducted at or about the beginning of August. The numbers of pupils refer to the position at the school census date. The numbers of schools and teachers refer to the position at dates which vary from State to State and in some instances from year to year.

It has not been possible to present all figures on a uniform basis between States. However, continuity of the figures for any one State over the period of years shown has been maintained as far as possible. Improvements to the definition and comparability of the statistics are currently being investigated.

This bulletin does not show separate statistics for primary and secondary levels of education. However, extensions to the range of statistics of schools, including statistics of the different levels of education, are currently being developed.

TABLE 1. - NUMBER OF SCHOOLS, TEACHERS, PUPILS : 1961
