INTRODUCTION

This publication contains detailed statistics of teachers and students in primary and secondary schools in Australia at August 1979. Preliminary statistics for 1979 were published in School Enrolments, Australia, 1979 (Preliminary) (4201.0) on 30 January 1980. Additional information can be found in publications of the Deputy Commonwealth Statistician in each State, various publications of the Department of Education and the Schools Commission, and in the annual reports of the State Education Departments.

The statistics in this publication relate to primary and secondary education provided by schools and also to special schools specifically set up for the education of children requiring other than ordinary schooling. Children attending pre-school classes at schools have been excluded from the statistics and shown separately in Appendix B, page 41. Teacher figures are generally expressed in full-time equivalent units (FTEs) in this publication.

Because of the diversity of the Australian education system and its administration, the statistics are not entirely comparable. Comparability between States and between government and non-government schools in any one State is affected by differences in the organisation of school systems and grades, policy on student advancement and the recruitment and employment of teachers.

This publication has been divided into five sections.

The first section contains an overview of schools statistics and in particular the changes occurring in this sector of the education system.

The second, third and fourth sections of the publication contain more detailed statistics on schools, students and teachers respectively.

The fifth section, the Appendixes, contains a table on the average age of students at government schools and another on pre-primary enrolments at primary schools.

R.J. CAMERON
Australian Statistician

MAIN FEATURES

Total school enrolments were 2,986,931 in 1979 representing a decline of 0.2 per cent (5,697) over the previous year's enrolments. This contrasted with an average annual growth of 1 per cent experienced between 1969 and 1978.

Between 1978 and 1979, male enrolments fell by 4,282 (0.3 per cent), while female enrolments fell by 1,415 (0.1 per cent).

The number of students at non-government schools increased between 1978 and 1979 by 12,007 (1.9 per cent), while numbers at government schools declined by 17,704 (0.8 per cent).

The number of teachers at government schools increased by 2.1 per cent (2,850) and at non-government schools by 5.6 per cent (1,788).

EXPLANATORY NOTES

Because of the diversity of the Australian education system and its administration, the statistics reported in this publication are not entirely comparable. Comparability between States and between government and non-government schools in any one State is affected by differences in the organisation of grades, policy on student advancement, flows from secondary to vocational education and the recruitment and employment of teachers.

Scope and coverage

- 2. The statistics in this publication relate to schools established to provide full-time instruction according to a primary and/or secondary curriculum and to schools catering for students with special needs who would be attending an ordinary school under other circumstances.
- In previous years, pre-school activity conducted under the administration of a primary and/or secondary school has been included in statistics for Western Tasmania, Australia, Northern Territory non-government schools in New South Wales. From 1979, all pre-primary education undertaken on a sessional basis or in a recognised pre-school class of a primary/secondary school has been excluded from the statistics in this publication. (Exceptions are footnoted in the relevant tables.) This pre-primary activity is considered to be different from the primary education activities of most kindergarten, preparatory, reception and transition classes included in primary education.
- 4. Student enrolment data for 1969, 1974 to 1979 is shown on the new basis, ie, excluding pre-primary enrolments. Teacher figures, however, have only been presented on the new basis for 1979 as earlier data with this dissection is not readily available. For similar reasons student: teacher ratios have not been revised before 1979.

5. Details of student enrolments in pre-primary education at primary schools have been presented in Appendix B of this publication.

Definitions

- 6. Schools are broadly classified as government or non-government and may provide primary, secondary and/or special education (special education being special instruction for physically and/or mentally handicapped or socially maladjusted students). The term 'school' in this publication includes junior technical schools, correspondence schools (included in government schools), schools in institutions and hospitals, mission schools and similar establishments. The term excludes recognised pre-school and kindergarten centres, pre-primary schools or classes in, or attached to, ordinary schools, senior technical and agricultural colleges, evening schools, continuation classes, and institutions such as business or coaching colleges.
- 7. Teacher statistics include teaching staff, principals and head teachers, (whether permanent or temporary), but exclude teachers-in-training, teachers on leave without pay, and other teachers engaged wholly in advisory, administrative or other non-teaching duties. Comparability between States is affected by different treatments of casual and special purpose teachers and different classifications of teachers who perform other duties as well as primary or secondary teaching.
- 8. All teachers are classified as either full-time or part-time. Part-time teaching effort is also expressed in 'full-time equivalent units' (FTE). Methods used for calculating FTE vary slightly between and within States, however most schools base their calculations on hours worked, number of class periods, or proportion of full-time salary. Generally, total teaching effort is presented in FTE in this publication.
- 9. Teachers of sessional and/or pre-school classes who have been included in previous year's statistics have been excluded for 1979.
- 10. Student statistics refer to the number of full-time students enrolled at schools included in the Schools Census collection at the reference period. The reference period is the first week of August in all States and the Australian Capital Territory and the second Friday in August for the Northern Territory.
- 11. There is no Australia-wide standard method of allocating students and classes to a certain year of education (grade). In particular there are differences in the organisation of both special schools and special classes at ordinary schools. Where possible, special students have been allocated to a year of education, otherwise they have been recorded an 'ungraded special'.
- 12. A number of schools (other than special schools) do not maintain a formal grade structure. Students at these schools have been allocated to equivalent grades where possible but otherwise appear against the category 'ungraded'.

Age grade tables

13. Supplementary age grade tables are available on request. These tables are classified by category of school (government, non-government and total) and show the age distribution of boys and girls within grades in each State and Territory and for Australia.

SECTION I - ANALYSES OF TRENDS

The Changing Scene: 1969 to 1979

FIGURE 1. CUMULATIVE PERCENTAGE CHANGE IN NUMBERS OF SCHOOLS, STUDENTS AND TEACHERS (FTE(a))
BY GOVERNMENT AND NON-GOVERNMENT: AUSTRALIA, SELECTED YEARS, 1969 to 1979

(a) Number of full-time and part-time teachers measured in full-time equivalent units (FTE)

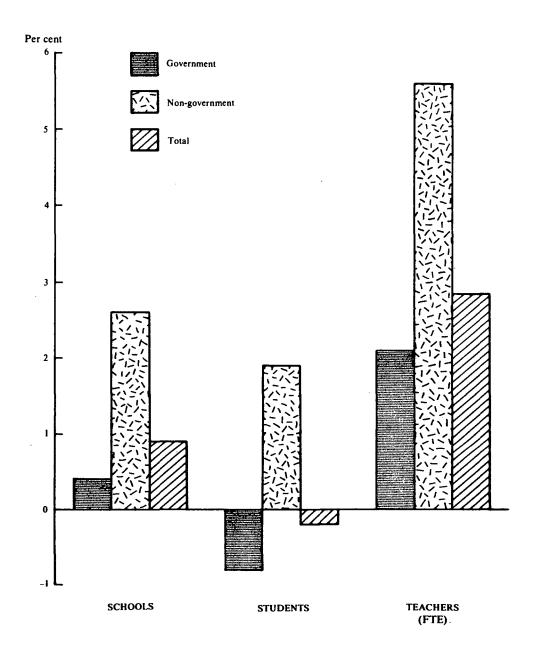

The period since 1969 has, for the most part, been a period in which significant increases occured in the numbers of students and staff. Student numbers at government schools rose by 10.7 per cent and staff by 53.7 per cent. The number of non-government school students increased by 8.0 per cent and staff by 51.6 per cent.

Enrolments in Non-Government Schools Increasing: 1978 to 1979

Growth in student and staff numbers in government schools slowed in 1978 and 1979, but accelerated in non-government schools.

Student numbers in government schools in fact declined in 1979 and growth in the number of schools and teachers was faster in the non-government than in the government sector.

FIGURE 2. PERCENTAGE CHANGE IN NUMBERS OF SCHOOLS, STUDENTS AND TEACHERS (FTE), BY GOVERNMENT AND NON-GOVERNMENT : AUSTRALIA, 1978 TO 1979

Declining Enrolments

FIGURE 3. ANNUAL PERCENTAGE CHANGE IN NUMBERS OF STUDENTS, BY SEX : AUSTRALIA FROM 1974 TO 1979

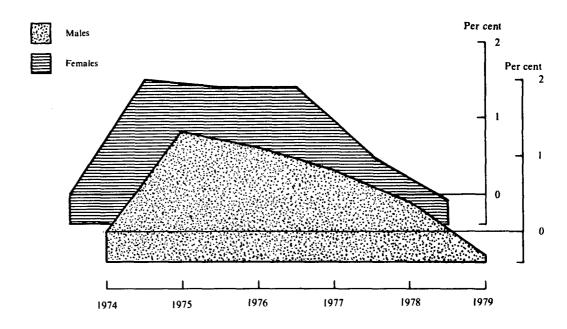

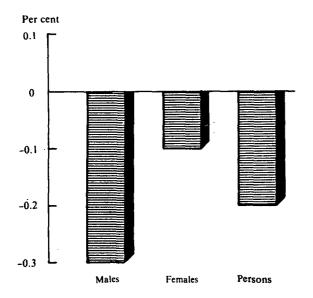

FIGURE 4: PERCENTAGE CHANGE IN NUMBERS OF SCHOOL STUDENTS, BY SEX: AUSTRALIA, 1978 TO 1979

In 1979 there was an absolute decline in the number of school students. The decrease in student numbers (from 2,992,628 in 1978 to 2,986,931 in 1979) was greater for boys than for girls.

Ratio of boy to girl students in the 15 to 18 year age group has declined

Since 1974 the ratio of boys to girls in the 15 to 18 year age group at school has declined. The greatest change was for 17 year olds where for every hundred girls at school, the number of boys has dropped from 117 to 96 in 1979.

Boys less likely to stay to Year 12

During the early 1970s both boys and girls showed an increasing tendency to continue their schooling through to Year 12. In 1976 the established patterns of male and female rates changed. Since then girls have continued the trend to continue their schooling while boys are now leaving earlier.

Patterns of retention rates vary between States and Territories ranging from 22 per cent in the Northern Territory to 70 per cent in the Australian Capital Territory.

NOTE: Apparent retention rate (the measure used in the following tables and graphs) is the percentage of students commencing secondary school in a given year who remained at school until the third last, second last and final year of schooling (ie until Year 10, Year 11 and Year 12). The rates are called "apparent" as they do not take into account the effects of migration, the repeating of classes or inter-system transfer on the school population.

Year 10 still gaining students, boys not continuing to Years 11 and 12

In 1979, 89 per cent of students who had commenced secondary school stayed until at least Year 10, in 1969 only 78 per cent did so. In 1977, boys first showed a tendency not to continue their schooling into Years 11 and 12. In 1979, girls appeared to be about to follow this trend.

Retention rates between schools vary greatly. Government schools in 1979 had the lowest retention rates, only 29 per cent of students were retained until Year 12. Non-catholic non-government schools by comparison had the highest retention rates with 87 per cent staying until Year 12.

A higher proportion of 15 year olds attend school

FIGURE 8. NUMBER OF STUDENTS 15 TO 18 YEARS COMPARED WITH THE POPULATION OF THE SAME AGE, BY SEX : AUSTRALIA, 1979

(the shaded area represents the proportion of the population at school)

The proportion of the population staying on at school at each age group falls quickly beyond the 15 year age group.

Since 1974, male participation rates have shown little fluctuation for the 15 to 18 year age group. However, until 1979, female participation rates displayed a steady increase from 41.9 per cent in 1974 to 47.0 per cent in 1978. Preliminary 1979 population data indicates that this increase did not continue in 1979.

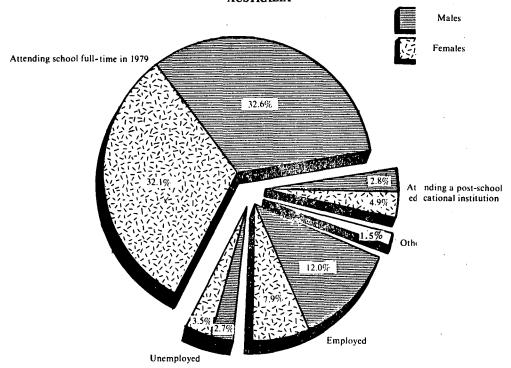

The most notable increase since 1974 has been in the participation rate of 15 year olds which has risen steadily from 81.3 in 1974 to 87.7 in 1979.

FIGURE 9. STATUS IN MAY 1979 OF PERSONS AGED 15 TO 25 YEARS WHO ATTENDED SCHOOL FULL-TIME IN 1978 : AUSTRALIA

Seventy-two per cent of people (15 to 25 years old) who went to school full-t ne in 1978 continued full-time education in 1979; 65 per cent returned to school and the remainder went to another education.

A larger proportion of females than males continued their full-time education at post-school institution whereas about equal proportions returned to school.

Of the 26 per cent who discontinued their full-time education and entered the lal our force, nearly a quarter were unemployed in May 1979.

TABLE 11. STUDENT:TEACHER RATIOS IN GOVERNMENT AND NON-GOVERNMENT SCHOOLS: AUSTRALIA, 1974 TO 1979

The student:teacher ratio is the total number of students divided by the total number of teachers (the total number of teachers having been derived by adding the number of full-time teachers and the full-time equivalent units of part-time teaching). The ratios are *not* measures of average class sizes. For further comments on teacher statistics see paragraphs 7 to 9 of the Explanatory Notes.

⁽a) There are no part-time teachers reported for Queensland government schools. Teachers occupying posts during the temporary absence of permanent teachers are excluded. (b) Pre-school teachers in primary schools in Western Australia, Tasmania and Northern Territory were excluded for the first time in 1979. See paragraphs 3 to 5 of the Explanatory Notes.

SECTION II - SCHOOLS, 1979

The structure of primary and secondary schooling in Australia varies between the different States and Territories. There are two basic patterns evident, as illustrated in Figure 10.

The first pattern is found in New South Wales, Victoria, Tasmania and the Australian Capital Territory where the primary system comprises a Kindergarten or Preparatory grade followed by Years 1 to 6. The secondary system comprises Years 7 to 12.

The second pattern exists in Queensland, South Australia, Western Australia and the Northern Territory where the primary system comprises Years 1 to 7 and the secondary system Years 8 to 12.

Each State and Territory also has an expanding pre-school sector which is prior to, and separate from, primary and secondary schooling. Data on pre-primary education within primary schools has been excluded from primary enrolments in this publication. (See paragraphs 3 to 5 of the Explanatory Notes, and the table on pre-primary enrolments in primary schools in Appendix B.)
