BALANCE OF PAYMENTS, AUSTRALIA, NOVEMBER 1993

MAIN FEATURES

Estimates of the main balance of payments aggregates for November 1993, the three preceding months and year-to-date are shown below. These estimates are preliminary and subject to revision. Particular care should be taken in interpreting month-to-month movements, as indicated in the note on page 6 on *Reliability of Contemporary Trend Estimates*. Certain items have been estimated using extrapolation techniques until source data become available.

	1993-94				Jul-Nov		
	Aug	Sept	Oct	Nov	1992-93	1993-94	Change(a)
	\$ million				\$ million		%
<i>Not seasonally adjusted</i>							
Balance on current account	-1,541	-1,668	-1,214	-1,475	-8,058	-7,369	+9

Trade weighted index (base May 1970 = 100)(b)	49.8	47.8	48.6	49.9

(a) For current account aggregates a minus sign means an increase in a deficit or a reduction in a surplus and a plus sign means a decrease in a deficit or an increase in a surplus. (b) Period averages.

In seasonally adjusted terms, the current account deficit for November fell \$124 million, or 10 per cent, to \$1,162 million.

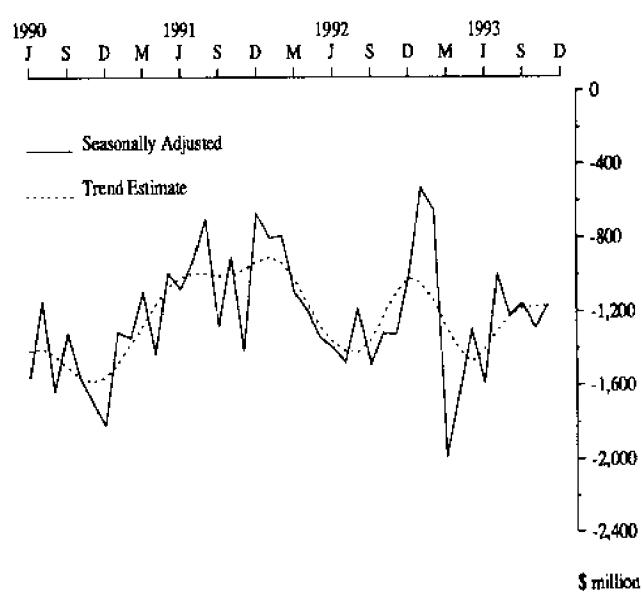

The decrease in the deficit was caused by:

- an increase of \$59 million (43 per cent) in the merchandise trade surplus (merchandise exports fell \$17 million, while merchandise imports fell \$76 million);
- a decrease of \$53 million (31 per cent) in the net services deficit; and
- an increase of \$18 million in the net unrequited transfers surplus.

Marginally offsetting these movements in merchandise trade, services and unrequited transfers was an increase of \$6 million in the net income deficit.

The provisional trend estimate for the November current account deficit was \$1,172 million, up \$4 million on the provisional trend estimate for October.

GRAPH I: BALANCE ON CURRENT ACCOUNT

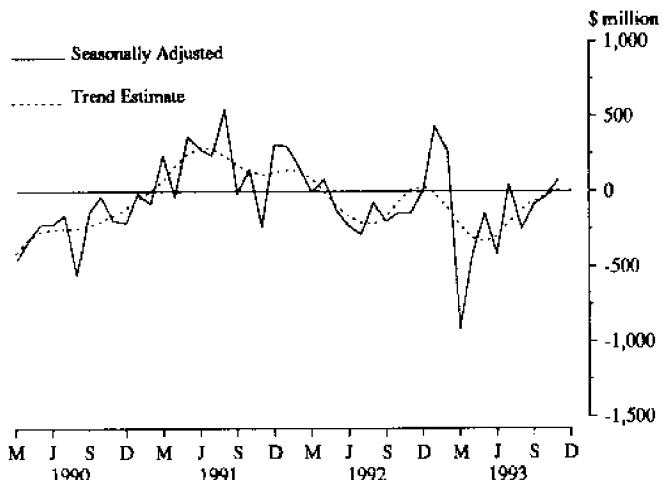

ANALYSIS OF SELECTED MAJOR AGGREGATES

November 1993 compared with October 1993

Balance on goods and services

The **seasonally adjusted balance on goods and services** recorded a surplus of \$80 million, a turnaround of \$112 million on the deficit recorded in October.

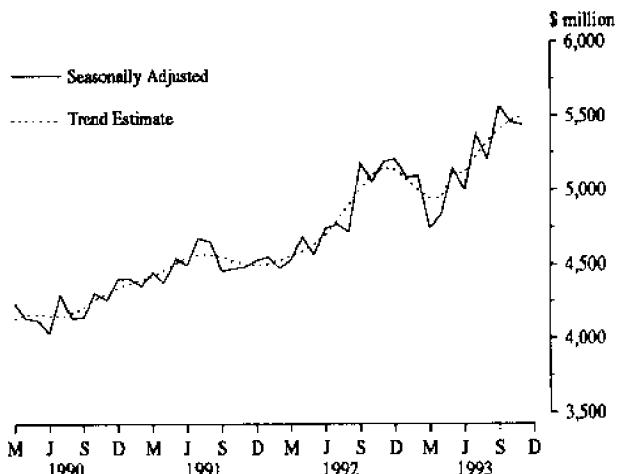

GRAPH 2: BALANCE ON GOODS AND SERVICES

Merchandise exports

Seasonally adjusted exports f.o.b. fell \$17 million, to \$5,438 million. **Rural exports** fell \$4 million, to \$1,595 million. **Non-rural exports** fell \$13 million, to \$3,843 million.

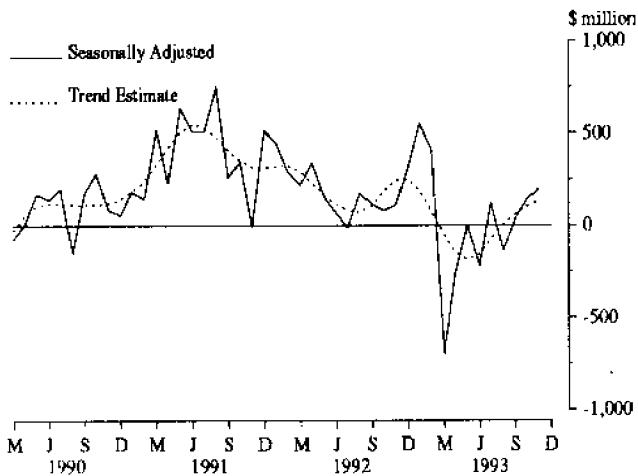

GRAPH 4: MERCHANTISE - EXPORTS F.O.B.

Balance on merchandise trade

The **seasonally adjusted balance on merchandise trade** recorded a surplus of \$197 million, an increase of \$59 million on the surplus recorded in October.

GRAPH 3: BALANCE ON MERCHANDISE TRADE

In **original terms**, **exports** fell \$269 million, or 5 per cent, to \$5,475 million.

Rural exports in original terms fell \$39 million, or 2 per cent, to \$1,594 million. Decreases were recorded in:

- sugar, down \$45 million or 27 per cent (due mainly to decreased volumes of cane sugar exports);
- "other" rural exports, down \$25 million or 5 per cent; and
- meat, down \$15 million or 4 per cent (due mainly to decreased volumes of beef and veal exports).

Increases were recorded in wool, up \$27 million or 9 per cent; and cereals, up \$19 million or 9 per cent.

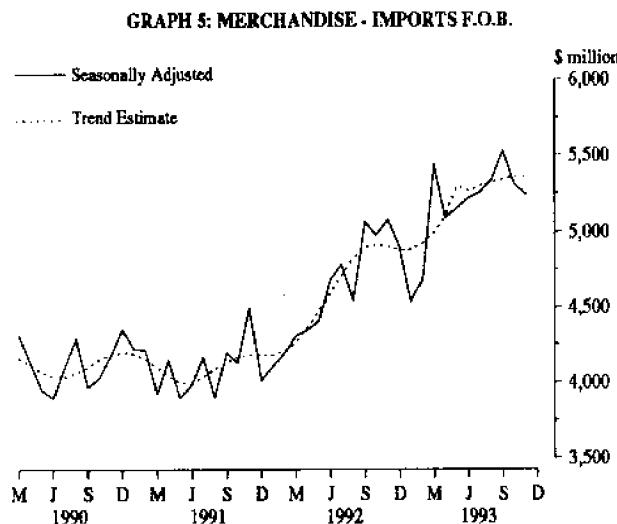

Non-rural exports in original terms fell \$230 million, or 6 per cent, to \$3,881 million. The largest decreases were recorded in:

- gold, down \$117 million or 21 per cent (due mainly to decreased volumes);
- coal, coke and briquettes, down \$56 million or 8 per cent (due mainly to decreased volumes of coal exports);
- "other" metals, down \$25 million or 5 per cent; and
- "other" manufactures, down \$25 million or 4 per cent.

Increases were recorded in metal ores and minerals, up \$23 million or 4 per cent; and "other" mineral fuels, up \$6 million or 2 per cent.

Merchandise imports

Seasonally adjusted *imports f.o.b.* decreased \$76 million, or 1 per cent, to \$5,241 million.

In original terms, *imports* rose \$135 million, or 2 per cent, to \$5,697 million. The largest increases were recorded in:

- machinery, up \$98 million or 6 per cent, due mainly to increased imports of office machines and ADP equipment, and power generating machinery;
- "other" transport equipment, up \$81 million or 95 per cent, due mainly to the import of a bulk carrier, "Iron Chieftain", valued at \$83 million; and
- "other" manufactures, up \$30 million or 2 per cent.

The largest decreases occurred in civil aircraft, down \$49 million (with no imports of civil aircraft in November, compared to the import of one aircraft valued at \$49 million in October); "other" imports, down \$35 million or 14 per cent; and road vehicles, down \$21 million or 3 per cent.

Exogenous imports fell \$32 million, or 8 per cent, due mainly to the decrease in imports of civil aircraft. *Endogenous imports* rose \$167 million or 3 per cent.

Net services

The seasonally adjusted *net services* deficit fell \$53 million, or 31 per cent, to \$117 million. Services credits fell \$16 million or 1 per cent, while services debits fell \$69 million, or 4 per cent.

Net income

The seasonally adjusted *net income* deficit rose \$6 million, to \$1,265 million. Income credits rose \$44 million or 15 per cent, while income debits rose \$50 million, or 3 per cent.

Net unrequited transfers

The seasonally adjusted *net unrequited transfers* surplus rose \$18 million, to \$23 million. Unrequited transfers credits rose \$15 million, or 7 per cent, while unrequited transfers debits fell \$3 million, or 1 per cent.

Net capital transactions

In original terms, the *net capital transactions of the official sector*, recorded a net inflow of \$1,372 million in November, an increase of \$1,302 million on the net inflow recorded in October.

The November estimate consisted of:

- a net inflow of \$1,336 million in general government transactions, up \$1,085 million on the inflow recorded in October; and
- a net inflow of \$36 million in Reserve Bank transactions, a turnaround of \$217 million on the October outflow.

The increased inflow from general government transactions was mainly due to State government borrowing domiciled abroad which turned around \$1,846 million, to an inflow of \$1,532 million in November. Partly offsetting this inflow was an outflow of \$206 million in general government borrowing domiciled in Australia, which turned around \$1,074 million on the October inflow.

The change in Reserve Bank transactions mainly reflected net sales of official reserve assets in November following net purchases in October.

Exchange rates

During November the \$A appreciated 3 per cent on a trade-weighted index basis (using period average exchange rates) against the currencies of Australia's major trading partners, by 3 per cent against the Japanese yen, and by 1 per cent against the \$US.

Comparing rates at the end of November 1993 with those at the end of June 1993, the \$A has depreciated by 1 per cent on a trade-weighted basis against the currencies of Australia's major trading partners, has remained steady against the Japanese yen, and depreciated by 2 per cent against the \$US.

Five months ended November 1993 compared with five months ended November 1992 —

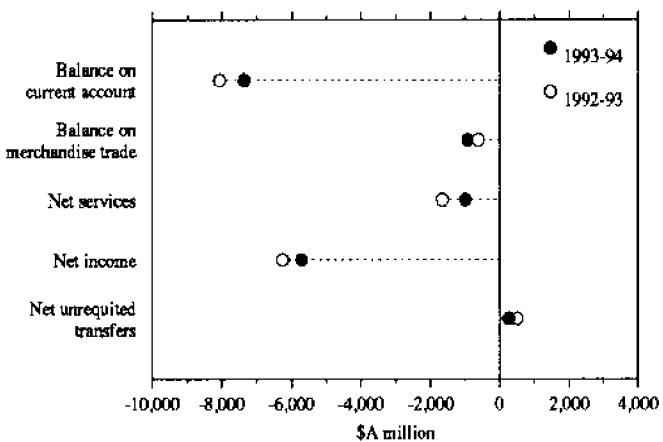

In original terms, the *balance on current account* deficit for the five months ended November 1993 was \$7,369 million, down \$689 million or 9 per cent, on the deficit for the five months ended November 1992.

The result was due to:

- a decrease of \$682 million (41 per cent) in the net services deficit; and
- a decrease of \$549 million (9 per cent) in the net income deficit.

The movements in services and income were partially offset by an increase of \$313 million (50 per cent) in the merchandise trade deficit and a decrease of \$229 million (47 per cent) in the net unrequited transfers surplus.

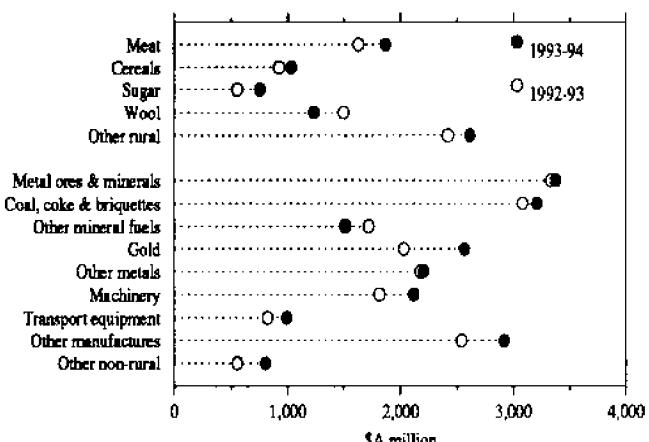

GRAPH 6: BALANCE OF PAYMENTS AGGREGATES - FIVE MONTHS ENDED NOVEMBER

Merchandise exports rose \$2,104 million, or 8 per cent, to \$27,188 million. The largest increases were recorded in:

- gold, up \$536 million (26 per cent);
- "other" manufactures, up \$369 million (14 per cent);
- machinery, up \$304 million (17 per cent);
- "other" non-rural exports, up \$248 million (44 per cent);
- meat, up \$236 million (15 per cent);
- sugar, up \$198 million (36 per cent); and
- "other" rural exports, up \$198 million (8 per cent).

GRAPH 7: MERCHANTISE EXPORTS - FIVE MONTHS ENDED NOVEMBER

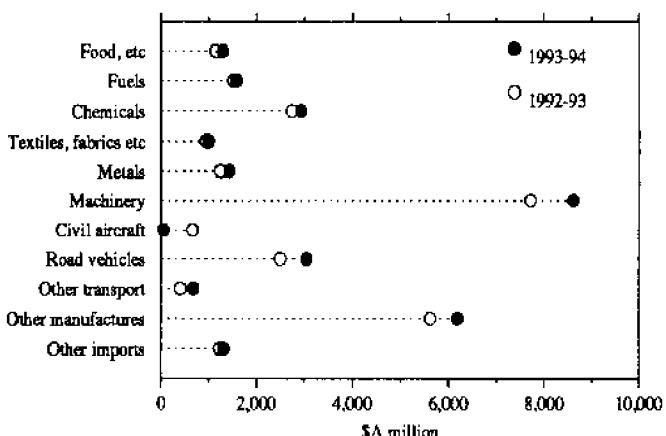

Decreases were recorded in wool, down \$261 million (17 per cent); and "other" mineral fuels, down \$208 million (12 per cent).

Merchandise imports rose \$2,417 million, or 9 per cent, to \$28,124 million. Increases were recorded in all groups except civil aircraft which fell \$610 million (93 per cent). The largest increases were recorded in:

- machinery, up \$906 million (12 per cent);
- "other" manufactures, up \$567 million (10 per cent);
- road vehicles, up \$558 million (22 per cent);
- "other" transport equipment, up 266 million (65 per cent);
- chemicals, up \$201 million (7 per cent); and
- metals and metal manufactures, up \$183 million (15 per cent).

Exogenous imports fell \$428 million or 16 per cent. *Endogenous imports* increased \$2,845 million or 12 per cent.

GRAPH 8: MERCHANTISE IMPORTS - FIVE MONTHS ENDED NOVEMBER

The *net services* deficit fell \$682 million, or 41 per cent, to \$987 million. Services credits increased by \$794 million, or 14 per cent, due mainly to increases of \$433 million in travel credits, \$262 million in "other" transportation credits and \$77 million in "other" services credits. Services debits rose \$112 million, or 2 per cent, due to increases of \$80 million in shipment debits and \$53 million in "other" services debits.

The *net income* deficit fell \$549 million, or 9 per cent, to \$5,708 million. Income credits fell \$125 million, or 7 per cent, due mainly to falls in interest receivable from abroad. Income debits fell \$674 million, or 8 per cent, due mainly to reduced interest payable on official sector and non-official sector borrowing from unrelated enterprises abroad and reductions in remitted profits payable on direct investment abroad.

The *net unrequited transfers* surplus fell \$229 million, or 47 per cent, to \$262 million. Unrequited transfers credits fell

\$245 million, or 18 per cent, due mainly to a decline in migrants' transfers. Unrequited transfers debits fell \$16 million, or 2 per cent, also mainly due to a fall in migrants' transfers.

Official capital transactions for the five months ended November 1993 yielded a net inflow of \$2,946 million, compared with a net inflow of \$10,612 million for the corresponding period of the previous financial year. This change was the result of:

- an inflow of \$3,845 million in general government transactions, down \$3,240 million on the inflow for the period July to November 1992; and
- an outflow of \$899 million in Reserve Bank transactions, a turnaround of \$4,426 million on the inflow for the comparable period of the previous financial year.

The decreased inflow from general government transactions was largely due to general government borrowing domiciled in Australia, which turned around \$3,389 million, to an outflow (reflecting payments) of \$1,005 million. Net purchases of official reserve assets, compared to net sales for the corresponding period of the previous financial year, was

the main factor underlying the change in Reserve Bank transactions.

REVISIONS

Revisions since the last issue of this publication have increased the current account deficit for the first four months of 1993-94 by \$103 million.

The main factors contributing to the revisions were:

- for merchandise trade, the incorporation of the latest available data on merchandise imports and exports. The net effect of these revisions was to increase the current account deficit by \$86 million;
- for services, the incorporation of minor revisions to both credits and debits. The net effect of these revisions was to increase the current account deficit by \$26 million; and
- for unrequited transfers, the incorporation of the latest available data on unrequited transfers credits. The net effect of these revisions was to decrease the current account deficit by \$10 million.

Release date for December 1993 issue

The expected release date for the December issue of this publication is 2 February 1994.
Any variations which might occur will be notified in the ABS Publications Advice (1105.0) and on DISCOVERY.

The date can be confirmed a few days prior to release by telephoning
Canberra (06) 252 6627.

RELIABILITY OF CONTEMPORARY TREND ESTIMATES

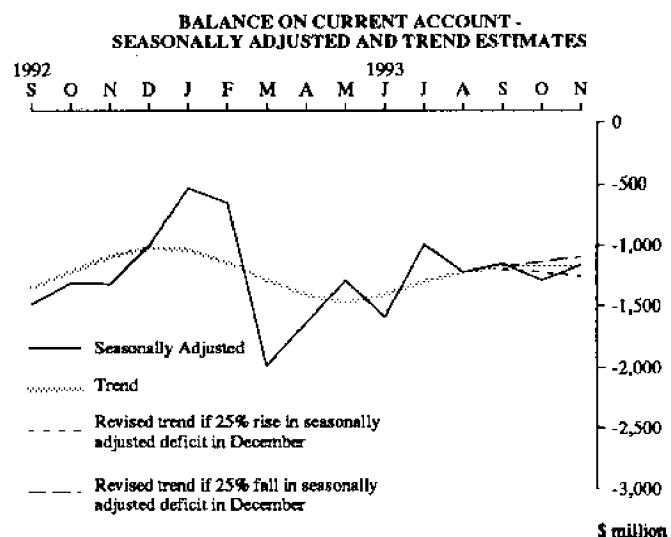

The table below presents trend estimates of the deficit on current account from September 1992 onwards, including provisional trend estimates for the latest three months (September, October and November 1993).

To illustrate the possible impact of future months' observations on the provisional trend estimates for the latest three months, the table also shows the revisions to these trend estimates that would result if the seasonally adjusted estimate of the current account balance next month (December 1993) is 25 per cent higher or lower than this month and if there are no revisions to the current or previous months' estimates. The 25 per cent range has been chosen because in the last decade the average monthly percentage movement, without regard to sign, of the seasonally adjusted current account deficit has been about 25 per cent.

If the deficit were to increase in December by 25 per cent, to \$1,453 million, the provisional trend movement for that month would be 2.4 per cent. The movements in the trend estimates for September, October and November which are provisionally -3.0 per cent, -0.8 per cent and 0.3 per cent respectively, would be revised to -1.0 per cent, 1.8 per cent and 2.9 per cent, respectively. On the other hand, a 25 per cent decline in the seasonally adjusted deficit next month,

to \$872 million, would produce a trend movement of -4.8 per cent for December, with the movements in the trend estimates for September, October and November being revised to -3.9 per cent, -3.2 per cent and -3.6 per cent, respectively.

The graph below illustrates this potential degree of revision at the current end of the trend series.

DEFICIT ON CURRENT ACCOUNT — RELIABILITY OF TREND ESTIMATES

(a) The entries carry the opposite sign to corresponding entries in Tables 1 and 5. (b) These exchange rates and the trade-weighted index are derived using rates provided by the Reserve Bank of Australia in respect of each trading day. (c) These exchange rates and index numbers relate to the last trading day of the reference period. (d) These exchange rates and index numbers are derived by averaging figures for each trading day.

EXPLANATORY NOTES

Introduction

1. This publication contains preliminary estimates of Australia's balance of payments for November 1993, together with revised estimates for previous months. More comprehensive quarterly estimates are available in the September quarter 1993 issue of the quarterly balance of payments publication (5302.0) released on 26 November 1993.

2. Descriptions of the underlying concepts and structure of the balance of payments and the sources and methods used in compiling the estimates are presented in *Balance of Payments, Australia: Concepts, Sources and Methods* (5331.0). The publication also provides item definitions; explanations of seasonal adjustment and trend estimates; and an analysis of the quality of the estimates.

Accuracy, reliability and volatility

3. Care should be exercised in the use and interpretation of estimates in this publication. The sources available for the production of timely and reliable monthly estimates are limited and the initial estimates are made available very quickly. Consequently, the latest estimates in this publication, to a greater extent than estimates in quarterly and annual balance of payments publications, are **preliminary and subject to revision** as more complete and accurate information becomes available. Certain items are estimated using extrapolation techniques until source data become available. Further, the more detailed estimates may be less accurate in relative terms than broader items and aggregates of which they form components.

4. Particular care should be exercised in interpreting month-to-month movements in original and seasonally adjusted series as short term movements cannot be assumed to indicate changes in trend. The monthly estimates are volatile, being subject to seasonal factors (except where adjusted in Table 2) and large irregular influences (which are not removed by seasonal adjustment). The irregular influences may reflect both random economic events and difficulties of statistical recording. The impact of the irregular influences upon the seasonally adjusted series is reduced by smoothing, as shown by the trend estimates in Table 2 and the graphs. The trend estimates are generally derived by applying a 13-term Henderson-weighted moving average to the seasonally adjusted series.

Seasonal adjustment

5. The factors used in seasonally adjusting the monthly balance of payments statistics during 1993 can be obtained, for a charge, from Mr Trevor Jolly on Canberra (06) 252 6820.

6. The seasonally adjusted statistics in this publication should not be regarded as in any way definitive as results from seasonal adjustment vary according to the method used.

Available longer term series

7. Estimates for months prior to those shown in this publication are available and can be obtained by contacting Mr Trevor Jolly on Canberra (06) 252 6820. There may be a charge for this information.

Australian Statistician

For more information ...

The ABS publishes a wide range of statistics and other information on Australia's economic and social conditions. Details of what is available in various publications and other products can be found in the *ABS Catalogue of Publications and Products* available at all ABS Offices (see below for contact details).

Information Consultancy Service

Information tailored to special needs of clients can be obtained from the Information Consultancy Service available at ABS Offices (see Information Inquiries below for contact details).

Electronic Data Services

A wide range of ABS data are available on electronic media. Selections of most frequently requested statistics are available, updated daily, on DISCOVERY (Key *656#). The ABS PC TELESTATS service delivers major economic indicator main features ready to download into personal computers on the day of release. The PC Ausstats service enables on-line access to a data base of thousands of up-to-date time series. Selected datasets are also available on diskette or CD-ROM. For more details on electronic data services available, contact Information Services in any of the ABS Offices (see Information Inquiries below for contact details).

Bookshops and Subscriptions

There are over 500 titles of various publications available from ABS bookshops in all ABS Offices (see below Bookshop Sales for contact details). The ABS also provides a subscription service through which nominated publications are provided by mail on a regular basis at no additional cost (telephone Publications Subscription Service toll free on 008 02 0608 Australia wide).
