## BALANCE OF PAYMENTS, AUSTRALIA, DECEMBER 1993

### MAIN FEATURES

Estimates of the main balance of payments aggregates for December 1993, the three preceding months and year-to-date are shown below. These estimates are preliminary and subject to revision. Particular care should be taken in interpreting month-to-month movements, as indicated in the note on page 6 on *Reliability of Contemporary Trend Estimates*. Certain items have been estimated using extrapolation techniques until source data become available.

(a) For current account aggregates a minus sign means an increase in a deficit or a reduction in a surplus and a plus sign means a decrease in a deficit or an increase in a surplus. (b) Period averages.

In seasonally adjusted terms, the current account deficit for December rose \$571 million, or 48 per cent, to \$1,765 million.

The increase in the deficit was caused by:

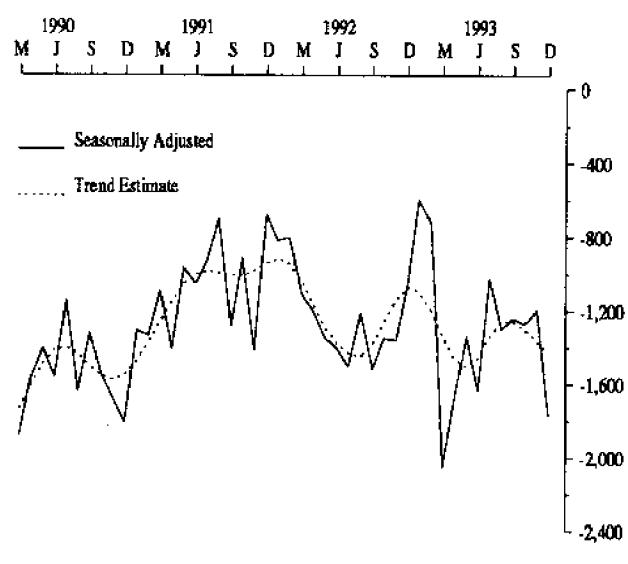

- a turnaround of \$674 million, from a surplus to a deficit, in the balance on merchandise trade (merchandise exports fell 7 per cent, while merchandise imports rose 6 per cent); and
- an increase of \$37 million (47 per cent) in the net services deficit.

Partly offsetting these movements in merchandise trade and services was a decrease of \$140 million (11 per cent) in the net income deficit.

The net unrequited transfers surplus was \$23 million, unchanged from its November level.

The provisional trend estimate for the December current account deficit was \$1,430 million, up \$64 million, or 5 per cent, on the provisional trend estimate for November.

GRAPH 1: BALANCE ON CURRENT ACCOUNT

## ANALYSIS OF SELECTED MAJOR AGGREGATES

*December 1993 compared with November 1993*

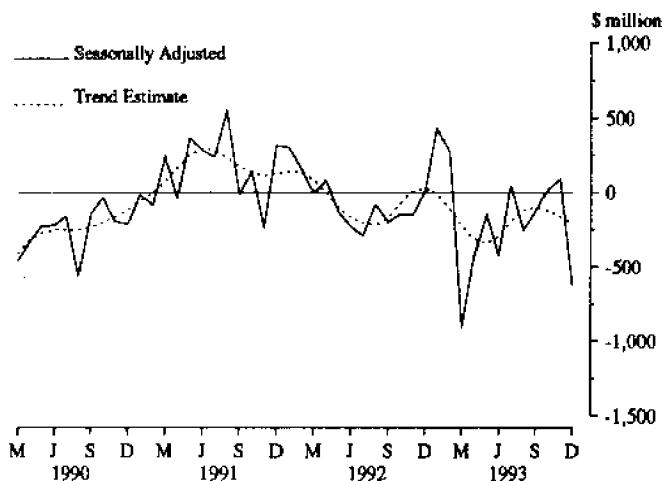

### **Balance on goods and services**

The seasonally adjusted *balance on goods and services* recorded a deficit of \$620 million, a turnaround of \$711 million on the surplus recorded in November.

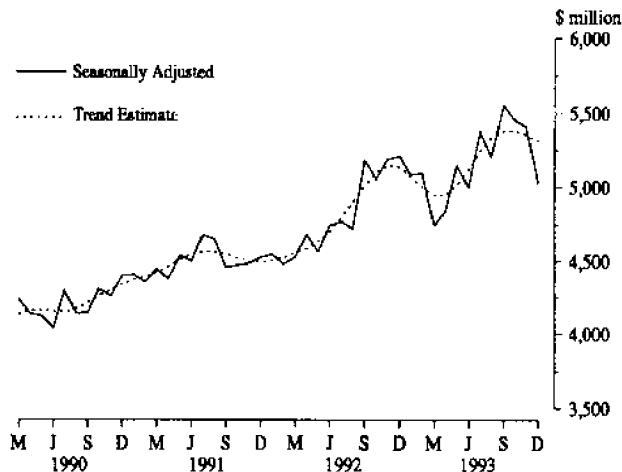

### **Merchandise exports**

**Seasonally adjusted exports f.o.b.** fell \$375 million, or 7 per cent, to \$5,035 million. *Rural exports* fell \$169 million, or 11 per cent, to \$1,417 million. *Non-rural exports* fell \$206 million, or 5 per cent, to \$3,618 million.

**GRAPH 2: BALANCE ON GOODS AND SERVICES**

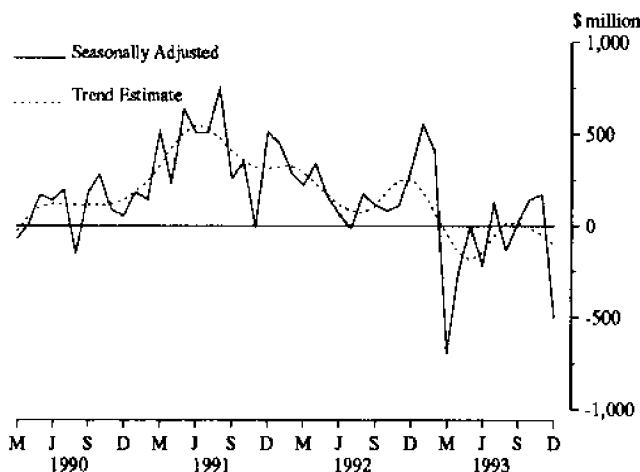

**GRAPH 4: MERCHANDISE - EXPORTS F.O.B.**

### **Balance on merchandise trade**

The seasonally adjusted *balance on merchandise trade* recorded a deficit of \$505 million, a turnaround of \$674 million on the surplus recorded in November.

**GRAPH 3: BALANCE ON MERCHANDISE TRADE**

In original terms, *exports* fell \$118 million, or 2 per cent, to \$5,329 million.

*Rural exports* in original terms fell \$72 million, or 5 per cent, to \$1,513 million. Decreases were recorded in:

- sugar, down \$77 million or 62 per cent (due mainly to decreased volumes of cane sugar exports); and
- meat, down \$70 million or 18 per cent (due mainly to decreased volumes of beef and veal exports).

Increases were recorded in "other" rural exports, up \$56 million or 11 per cent (due mainly to increased exports of fish, crustaceans and molluscs); cereals, up \$10 million or 4 per cent; and wool, up \$9 million or 3 per cent.

*Non-rural exports* in original terms fell \$46 million, or 1 per cent, to \$3,816 million. Decreases were recorded in:

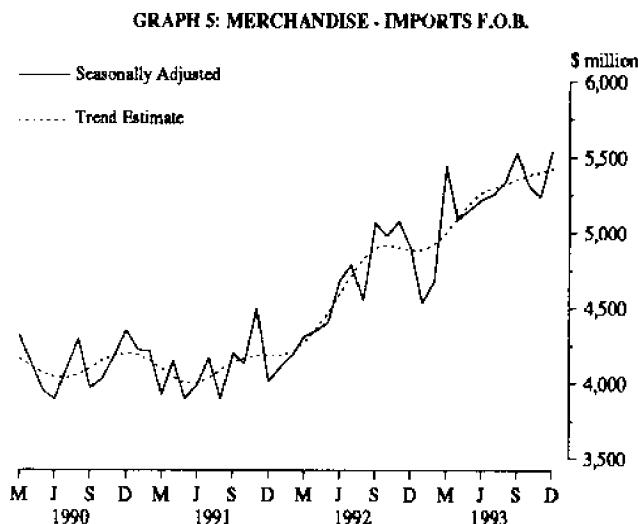

- gold, down \$153 million or 34 per cent (due mainly to decreased volumes);
- metal ores and minerals, down \$70 million or 10 per cent (due mainly to decreased exports of uranium and iron ore);
- "other" non-rural exports, down \$42 million or 28 per cent; and
- "other" mineral fuels, down \$29 million or 10 per cent.

The largest increases were recorded in machinery, up \$95 million or 22 per cent (with most components recording increases); coal, coke and briquettes, up \$91 million or 14 per

cent (due mainly to increased volumes of coal exports); and "other" metals, up \$50 million or 12 per cent.

#### *Merchandise imports*

**Seasonally adjusted imports f.o.b.** rose \$299 million, or 6 per cent, to \$5,540 million.

In original terms, imports fell \$400 million, or 7 per cent, to \$5,297 million. The largest decreases were recorded in:

- "other" manufactures, down \$175 million or 14 per cent (with all components recording decreases);
- machinery, down \$141 million or 8 per cent (with most components recording decreases); and
- road vehicles, down \$79 million or 13 per cent.

Increases were recorded in "other" transport equipment, up \$89 million or 54 per cent; fuels, up \$16 million or 5 per cent; and "other" imports, up \$15 million or 7 per cent.

*Exogenous imports* rose \$42 million or 11 per cent. *Endogenous imports* fell \$442 million or 8 per cent.

#### *Net services*

The seasonally adjusted net services deficit increased \$37 million, or 47 per cent, to \$115 million. Services credits fell \$21 million, or 2 per cent, while services debits rose \$16 million or 1 per cent.

#### *Net income*

The seasonally adjusted net income deficit fell \$140 million, or 11 per cent, to \$1,168 million. Income credits rose \$8 million, or 2 per cent, while income debits fell \$132 million or 7 per cent (due mainly to a fall in interest payable on official sector borrowing).

#### *Net unrequited transfers*

The seasonally adjusted net unrequited transfers surplus was unchanged at \$23 million. Unrequited transfers credits rose \$31 million, or 14 per cent, while unrequited transfers debits also rose \$31 million or 15 per cent.

#### *Net capital transactions*

In original terms, the net capital transactions of the official sector, recorded a net inflow of \$2,451 million in December, up \$1,079 million on the net inflow recorded in November.

The December estimate consisted of:

- a net inflow of \$2,385 million in general government transactions, up \$1,049 million on the inflow recorded in November; and
- a net inflow of \$66 million in Reserve Bank transactions, an increase of \$30 million on the November inflow.

The increased inflow from general government transactions was mainly due to general government borrowing domiciled in Australia which turned around \$1,164 million, to an inflow of \$958 million. Partly offsetting this turnaround, was a decrease of \$97 million in general government borrowing domiciled abroad, which recorded an inflow of \$1,424 million in December.

The change in Reserve Bank transactions reflected a turnaround from an outflow to an inflow in "other" transactions partly offset by decreased sales of official reserve assets.

#### *Exchange rates*

During December the \$A appreciated 2 per cent on a trade-weighted index basis (using period average exchange rates) against the currencies of Australia's major trading partners, by 1 per cent against the Japanese yen, and by 1 per cent against the \$US.

Comparing rates at the end of December 1993 with those at the end of June 1993, the \$A has appreciated by 3 per cent on a trade-weighted basis against the currencies of Australia's major trading partners, by 6 per cent against the Japanese yen, and by 1 per cent against the \$US.

*Six months ended December 1993 compared with six months ended December 1992 —*

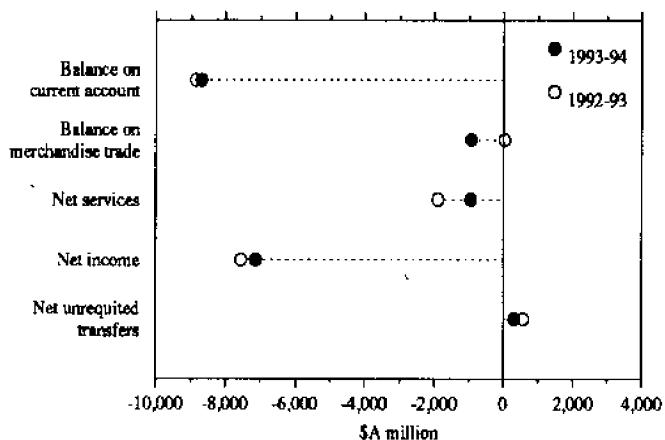

In original terms, the balance on current account deficit for the six months ended December 1993 was \$8,694 million, down \$162 million, or 2 per cent, on the deficit for the six months ended December 1992.

The result was due to:

- a decrease of \$947 million (50 per cent) in the net services deficit; and
- a decrease of \$431 million (6 per cent) in the net income deficit.

The movements in services and income were partially offset by a turnaround of \$964 million, from a surplus to a deficit, in the balance of merchandise trade; and a decrease of \$252 million, or 45 per cent, in the net unrequited transfers surplus.

**GRAPH 6: BALANCE OF PAYMENTS AGGREGATES - SIX MONTHS ENDED DECEMBER**

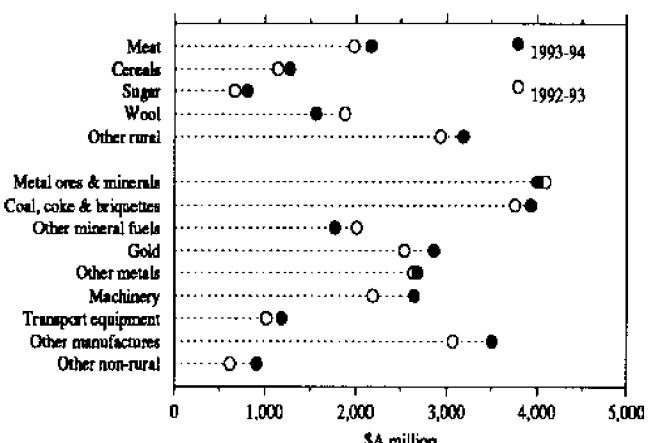

Merchandise exports rose \$1,970 million, or 6 per cent, to \$32,485 million. The largest increases were recorded in:

- machinery, up \$454 million (21 per cent);
- "other" manufactures, up \$433 million (14 per cent);
- gold, up \$327 million (13 per cent);
- "other" non-rural exports, up \$292 million (47 per cent);
- "other" rural exports, up \$260 million (9 per cent);
- meat, up \$188 million (9 per cent);
- coal, coke and briquettes, up \$176 million (5 per cent); and
- transport equipment, up \$165 million (16 per cent).

Decreases were recorded in wool, down \$318 million (17 per cent); "other" mineral fuels, down \$240 million (12 per cent); and metal ores and minerals, down \$90 million (2 per cent).

**GRAPH 7: MERCHANTISE EXPORTS - SIX MONTHS ENDED DECEMBER**

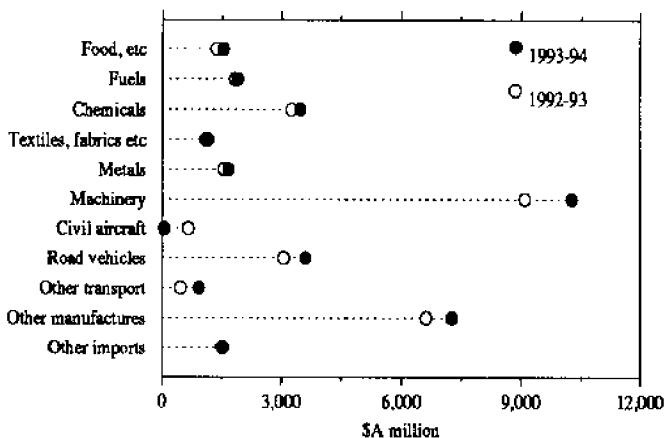

Merchandise imports rose \$2,934 million, or 10 per cent, to \$33,421 million. Increases were recorded in all groups except civil aircraft which fell \$610 million (93 per cent). The largest increases were recorded in:

- machinery, up \$1,187 million (13 per cent);
- "other" manufactures, up \$660 million (10 per cent);
- road vehicles, up \$548 million (18 per cent);
- "other" transport equipment, up \$456 million (96 per cent);
- chemicals, up \$212 million (7 per cent); and
- food, beverages and tobacco, up \$176 million (13 per cent).

*Exogenous imports* fell \$446 million or 15 per cent. *Endogenous imports* increased \$3,380 million or 12 per cent.

**GRAPH 8: MERCHANTISE IMPORTS - SIX MONTHS ENDED DECEMBER**

The *net services* deficit fell \$947 million, or 50 per cent, to \$944 million. Services credits increased by \$1,022 million, or 14 per cent, due to increases of \$599 million in travel credits, \$304 million in "other" transportation credits and \$92 million in "other" services credits. Services debits rose

\$75 million or 1 per cent, due to increases of \$47 million in "other" services debits and \$45 million in shipment debits.

The *net income* deficit fell \$431 million, or 6 per cent, to \$7,116 million. Income credits rose \$65 million, or 2 per cent, due mainly to an increase in reinvested earnings. Income debits fell \$366 million, or 4 per cent, due mainly to a decrease in remitted profits payable on direct investment abroad.

The *net unrequited transfers* surplus fell \$252 million, or 45 per cent, to \$302 million. Unrequited transfers credits fell \$243 million, or 15 per cent, due mainly to a decline in migrants' transfers. Unrequited transfers debits rose \$9 million or 1 per cent.

*Official capital transactions* for the six months ended December 1993 yielded a net inflow of \$5,397 million, compared with a net inflow of \$10,337 million for the corresponding period of the previous financial year. The change was the result of:

- an inflow of \$6,230 million in general government transactions, down \$990 million on the inflow for the period July to December 1992; and
- an outflow of \$833 million in Reserve Bank transactions, a turnaround of \$3,950 million on the inflow for the comparable period of the previous financial year.

The decreased inflow from general government transactions was largely due to general government borrowing domiciled in Australia, which turned around \$1,993 million, to an outflow (reflecting repayments) of \$47 million. Partly offsetting this turnaround was an increase of \$1,193 million, to an inflow of \$7,048 million, in State government borrowing domiciled abroad. Net purchases of official reserve assets, compared to net sales for the corresponding period of the previous financial year, was the main factor underlying the change in Reserve Bank transactions.

## REVISIONS

Revisions since the last issue of this publication have increased the current account deficits for 1988-89, 1989-90, 1991-92 and 1992-93 by \$41 million, \$34 million, \$128 million and \$545 million respectively; and reduced the current account deficit for 1990-91 by \$45 million. The current account deficit for the first five months of 1993-94 has increased by \$216 million.

Revisions to the current account for the financial years 1988-89 to 1992-93 are due to the incorporation of the latest investment income estimates based on data from the 1992-93 annual Survey of Foreign Investment.

The main factors contributing to the revisions for 1993-94 were:

- for merchandise trade, the incorporation of the latest available data on merchandise imports and exports. The net effect of these revisions was to increase the current account deficit for 1993-94 by \$32 million;
- for services, the incorporation of revisions to both credits and debits. The net effect of these revisions was to reduce the current account deficit for 1993-94 by \$63 million; and
- for income, the incorporation of revisions to estimates of reinvested earnings based on data from the 1992-93 annual Survey of Foreign Investment. The net effect of these revisions was to increase the current account deficit by \$250 million.

Revisions to the capital account are due to the incorporation of data from the 1992-93 annual Survey of Foreign Investment.

### Release date for January 1994 issue

The expected release date for the December issue of this publication is 1 March 1994.  
Any variations which might occur will be notified in the ABS Publications Advice  
(1105.0) and on DISCOVERY.

The date can be confirmed a few days prior to release by telephoning  
Canberra (06) 252 6627.

## RELIABILITY OF CONTEMPORARY TREND ESTIMATES

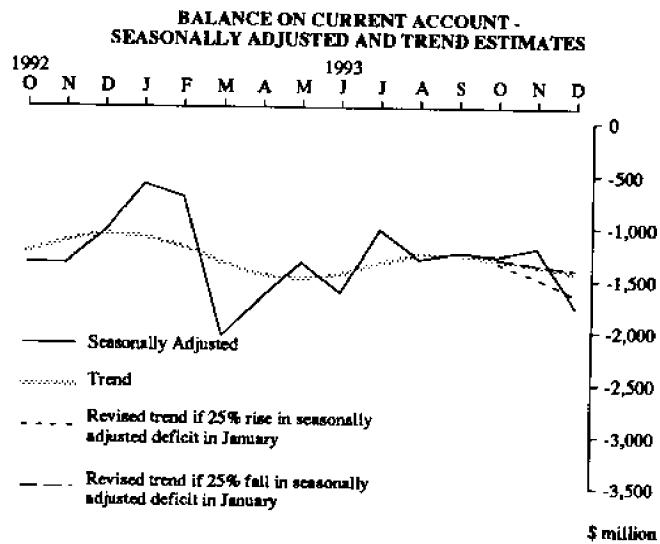

The table below presents trend estimates of the deficit on current account from October 1992 onwards, including provisional trend estimates for the latest three months (October, November and December 1993).

To illustrate the possible impact of future months' observations on the provisional trend estimates for the latest three months, the table also shows the revisions to these trend estimates that would result if the seasonally adjusted estimate of the current account balance next month (January 1994) is 25 per cent higher or lower than this month and if there are no revisions to the current or previous months' estimates. The 25 per cent range has been chosen because in the last decade the average monthly percentage movement, without regard to sign, of the seasonally adjusted current account deficit has been about 25 per cent.

If the deficit were to increase in January by 25 per cent, to \$2,206 million, the provisional trend movement for that month would be 11.7 per cent. The movements in the trend estimates for October, November and December which are provisionally 3.6 per cent, 4.9 per cent and 4.7 per cent respectively, would be revised to 8.1 per cent, 10.7 per cent and 11.1 per cent, respectively. On the other hand, a 25 per

cent decline in the seasonally adjusted deficit next month, to \$1,324 million, would produce a trend movement of 4.8 per cent for January with the movements in the trend estimates for October, November and December being revised to 3.7 per cent, 4.0 per cent and 3.6 per cent, respectively.

The graph below illustrates this potential degree of revision at the current end of the trend series.

(a) The entries carry the opposite sign to corresponding entries in Tables 1 and 5. (b) These exchange rates and the trade-weighted index are derived using rates provided by the Reserve Bank of Australia in respect of each trading day. (c) These exchange rates and index numbers relate to the last trading day of the reference period. (d) These exchange rates and index numbers are derived by averaging figures for each trading day.

## EXPLANATORY NOTES

### **Introduction**

1. This publication contains preliminary estimates of Australia's balance of payments for December 1993, together with revised estimates for previous months. More comprehensive quarterly estimates are available in the September quarter 1993 issue of the quarterly balance of payments publication (5302.0) released on 26 November 1993.

2. Descriptions of the underlying concepts and structure of the balance of payments and the sources and methods used in compiling the estimates are presented in *Balance of Payments, Australia: Concepts, Sources and Methods* (5331.0). The publication also provides item definitions; explanations of seasonal adjustment and trend estimates; and an analysis of the quality of the estimates.

### **Accuracy, reliability and volatility**

3. Care should be exercised in the use and interpretation of estimates in this publication. The sources available for the production of timely and reliable monthly estimates are limited and the initial estimates are made available very quickly. Consequently, the latest estimates in this publication, to a greater extent than estimates in quarterly and annual balance of payments publications, are **preliminary and subject to revision** as more complete and accurate information becomes available. Certain items are estimated using extrapolation techniques until source data become available. Further, the more detailed estimates may be less accurate in relative terms than broader items and aggregates of which they form components.

4. **Particular care should be exercised in interpreting month-to-month movements** in original and seasonally adjusted series as short term movements cannot be assumed to indicate changes in trend. The monthly estimates are volatile, being subject to seasonal factors (except where adjusted in Table 2) and large irregular influences (which are not removed by seasonal adjustment). The irregular influences may reflect both random economic events and difficulties of statistical recording. The impact of the irregular influences upon the seasonally adjusted series is reduced by smoothing, as shown by the trend estimates in Table 2 and the graphs. The trend estimates are generally derived by applying a 13-term Henderson-weighted moving average to the seasonally adjusted series.

### **Seasonal adjustment**

5. The factors used in seasonally adjusting the monthly balance of payments statistics during 1993 can be obtained, for a charge, from Mr Trevor Jolly on Canberra (06) 252 6820.

6. The **seasonally adjusted** statistics in this publication should not be regarded as in any way definitive as results from seasonal adjustment vary according to the method used.

### **Available longer term series**

7. Estimates for months prior to those shown in this publication are available and can be obtained by contacting Mr Trevor Jolly on Canberra (06) 252 6820. There may be a charge for this information.

### **Symbols and other usages**

## For more information ...

The ABS publishes a wide range of statistics and other information on Australia's economic and social conditions. Details of what is available in various publications and other products can be found in the *ABS Catalogue of Publications and Products* available at all ABS Offices (see below for contact details).

### Information Consultancy Service

Information tailored to special needs of clients can be obtained from the Information Consultancy Service available at ABS Offices (see Information Inquiries below for contact details).

### Electronic Data Services

A wide range of ABS data are available on electronic media. Selections of most frequently requested statistics are available, updated daily, on DISCOVERY (Key \*656#). The ABS PC TELESTATS service delivers major economic indicator main features ready to download into personal computers on the day of release. The PC Ausstats service enables on-line access to a data base of thousands of up-to-date time series. Selected datasets are also available on diskette or CD-ROM. For more details on electronic data services available, contact Information Services in any of the ABS Offices (see Information Inquiries below for contact details).

### Bookshops and Subscriptions

There are over 500 titles of various publications available from ABS bookshops in all ABS Offices (see below Bookshop Sales for contact details). The ABS also provides a subscription service through which nominated publications are provided by mail on a regular basis at no additional cost (telephone Publications Subscription Service toll free on 008 02 3302 Australia wide).
