(a) For the current account aggregates, a minus sign means an increase in a deficit, a decrease in a surplus, a decrease in exports or a decrease in imports; and the absence of a sign means a decrease in a deficit, an increase in a surplus, an increase in exports or an increase in imports. (b) Period averages.

March quarter 1995 —

GRAPH 1. CURRENT ACCOUNT MAIN AGGREGATES
trend estimates at current prices

Balance on current account (seasonally adjusted)

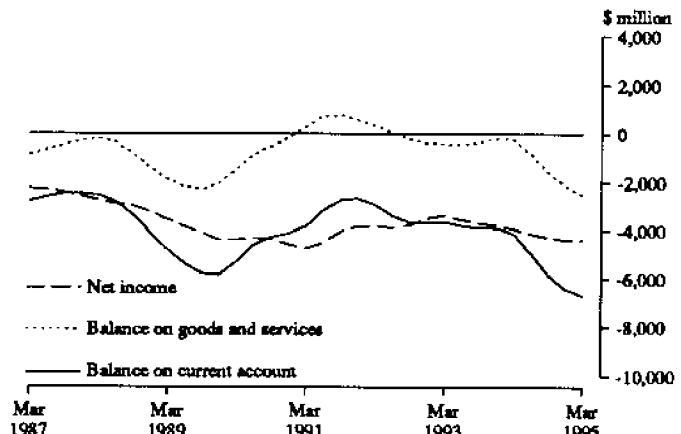

The current account deficit for the March quarter rose \$248 million, or 4 per cent, to \$6,538 million. The rise in the current account deficit was caused by:

- an increase of \$121 million (45 per cent) in the net services deficit (services credits rose 1 per cent, while services debits rose 3 per cent); and
- an increase of \$289 million (7 per cent) in the net income deficit. (income credits rose 11 per cent, while income debits rose 8 per cent).

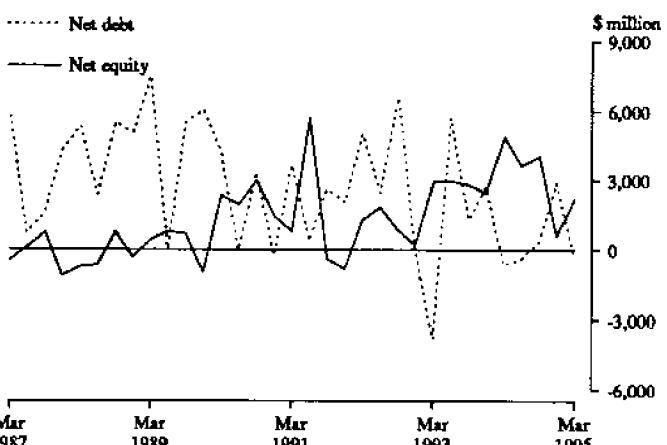

Partly offsetting these movements in services and income was a reduction of \$141 million (7 per cent) in the merchandise trade deficit (merchandise exports rose 5 per cent, while merchandise imports rose 4 per cent); and an increase of \$21 million (13 per cent) in the net unrequited transfers surplus (unrequited transfers credits rose 9 per cent, while unrequited transfers debits rose 7 per cent).

Balance on capital account (not seasonally adjusted)

In original terms, the *balance on capital account* recorded a net inflow of \$2,097 million, a decrease of \$1,077 million on the net inflow recorded in the December quarter. This change was the result of a \$3,251 million turnaround in net debt, to a net outflow of \$343 million; partly offset by an increase of \$1,610 million, to \$2,223 million, in the net inflow from equity transactions; and a turnaround of \$564 million in "other" transactions, from a net outflow to a net inflow of \$216 million.

GRAPH 2. CAPITAL ACCOUNT MAIN AGGREGATES

NOTES ON THE ESTIMATES

March quarter 1995—

Current account (seasonally adjusted)

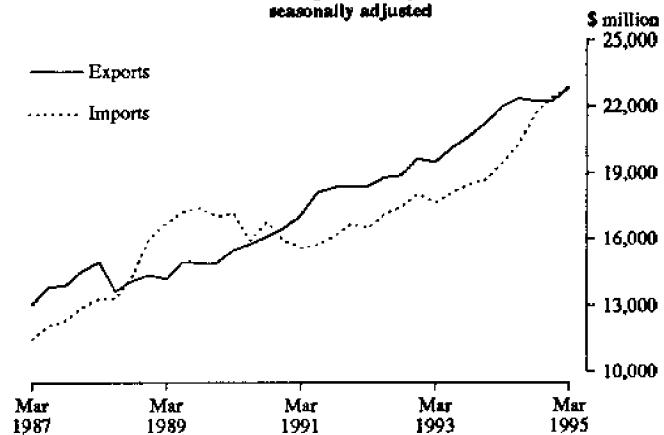

"Volume" refers to values at average 1989-90 prices and "price" refers to implicit price deflators.

Goods and services

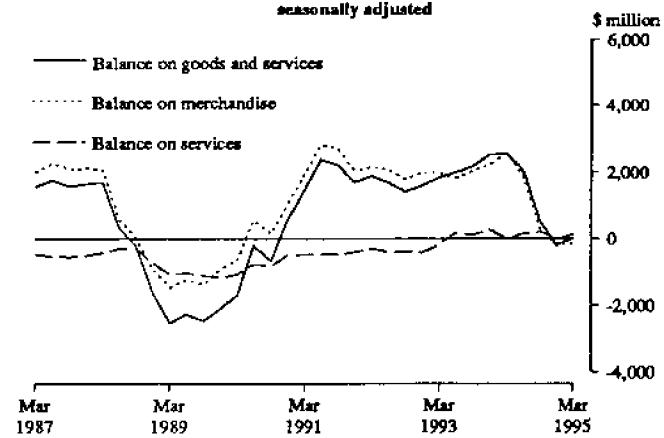

The *deficit on goods and services* at current prices was \$2,228 million, a decrease of \$20 million on the deficit recorded in the December quarter 1994. This was due to a decrease of \$141 million in the merchandise trade deficit, which was largely offset by a \$121 million increase in the net services deficit.

In volume terms, exports of goods and services rose \$620 million (3 per cent), while imports of goods and services rose \$450 million (2 per cent). The resulting turnaround of \$170 million, from a deficit to a surplus, in the balance on goods and services will make a positive contribution of 0.2 percentage points to the March quarter 1995 expenditure based estimates of GDP at average 1989-90 prices, assuming no significant revisions to the GDP estimates for the preceding quarter. The deficit on merchandise trade fell \$45 million, while the net services surplus rose \$125 million.

GRAPH 3. EXPORTS AND IMPORTS OF GOODS AND SERVICES
at average 1989-90 prices
seasonally adjusted

GRAPH 4. BALANCE ON GOODS AND SERVICES
at average 1989-90 prices
seasonally adjusted

Exports of merchandise

Exports of merchandise at current prices fell \$853 million, or 5 per cent, to \$17,111 million, as a result of a 3 per cent increase in volume and a 2 per cent increase in price.

Rural exports at current prices fell \$142 million, or 3 per cent, as a result of a 4 per cent decrease in volume which was partly offset by a 1 per cent increase in price.

Decreases were recorded in cereals, down \$247 million (35 per cent), due to a 41 per cent decrease in volume which was partly offset by an 11 per cent increase in price; and sugar, down \$109 million (23 per cent), due to a 30 per cent decrease in volume which was partly offset by a 9 per cent increase in price.

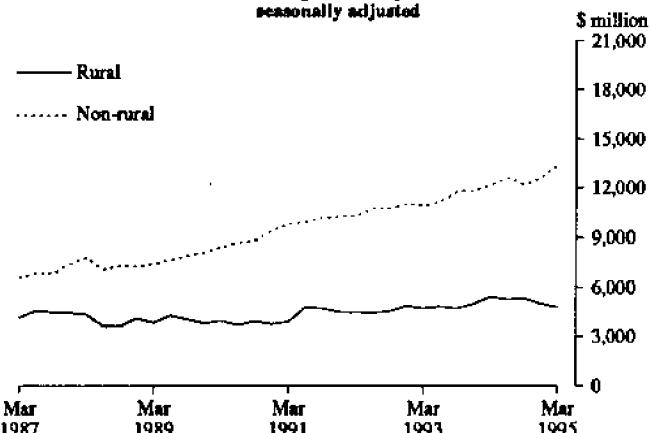

The most significant increase was recorded in wool, up \$165 million (16 per cent) due to a 19 per cent increase in volume, partly offset by a 3 per cent decrease in price.

Non-rural exports at current prices rose \$995 million, or 9 per cent, due to a 6 per cent increase in volume and a 2 per cent increase in price. The most significant increases were recorded in :

- "other" metals, up \$329 million (23 per cent), due to a 20 per cent increase in volume and a 3 per cent increase in price;
- machinery, up \$264 million (19 per cent), due to a 15 per cent increase in volume and a 3 per cent increase in price;
- gold, up \$194 million (17 per cent), due to an 18 per cent increase in volume, which was partly offset by a 1 per cent decrease in price;
- metal ores and minerals up \$187 million (10 per cent), due to 5 per cent increases in both volume and price; and
- "other" mineral fuels, up \$167 million (19 per cent), due to a 12 per cent increase in volume and a 7 per cent increase in price.

Decreases were recorded in "other" non-rural, down \$118 million (23 per cent) due to a 24 per cent decrease in volume, which was partly offset by a 1 per cent increase in price; and coal, coke and briquettes, down \$93 million (5 per cent) due to a 6 per cent decrease in volume, which was also partly offset by a 1 per cent increase in price.

GRAPH 5. MERCHANTISE EXPORTS
at average 1989-90 prices
seasonally adjusted

Services credits

Services credits, at current prices, rose \$25 million (1 per cent) to \$4,881 million, as a result of a 1 per cent increase in volume which was marginally offset by a decrease in price. At current prices and in volume terms, the increases were due to growth in "other" transportation which was partly offset by decreases in the remaining components.

Exports implicit price deflator

The *implicit price deflator (IPD)* for total exports of goods and services rose 1.3 per cent between the December and March quarters. On a fixed-weighted basis, export prices rose 2.0 per cent, indicating that compositional change within exports of goods and services had a marginal (downwards) effect on the overall level of the IPD.

Imports of merchandise

Imports of merchandise at current prices rose \$712 million, or 4 per cent, to \$18,951 million, as a result of a 3 per cent increase in volume and a 1 per cent increase in price. Increases were recorded in two of the three end-use categories, with imports of *consumption goods* up \$78 million (2 per cent) due to a 1 per cent increase in volume and a marginal increase in price; and *intermediate and other goods* up \$730 million (8 per cent) due to a 5 per cent increase in volume and a 3 per cent increase in price. Imports of *capital goods* fell \$96 million (2 per cent) due to a 3 per cent decrease in price, which was partly offset by a 1 per cent increase in volume.

Increases were recorded in 20 of the 26 commodity groups with the most significant being:

- machinery and industrial equipment, up \$306 million (17 per cent) due to a 14 per cent increase in volume and a 3 per cent increase in price;
- fuels and lubricants, up \$247 million (37 per cent) due to a 23 per cent increase in volume and an 11 per cent increase in price;
- processed industrial supplies n.e.s., up \$149 million (7 per cent) due to a 3 per cent increase in volume and a 4 per cent increase in price;
- "other" parts for capital goods, up \$92 million (6 per cent) almost entirely due to an increase in volume;
- ADP equipment, up \$73 million (10 per cent) due to an 11 per cent increase in volume, which was partly offset by a 1 per cent decrease in price;
- consumption goods n.e.s., up \$59 million (5 per cent) due to a 4 per cent increase in volume and a 1 per cent increase in price; and
- non-monetary gold, up \$58 million (35 per cent) due almost entirely to an increase in volume.

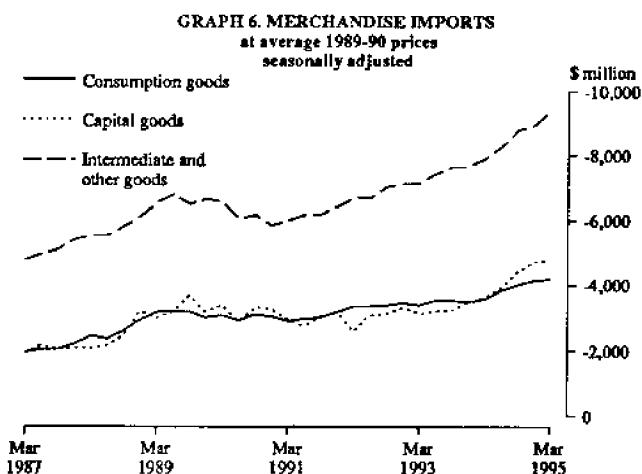

The most significant decreases were recorded in industrial transport equipment n.e.s., down \$412 million (42 per cent) due to a 39 per cent decrease in volume and a 5 per cent decrease in price; telecommunications equipment, down \$92 million (18 per cent), due to a 12 per cent decrease in volume and a 6 per cent decrease in price; and textiles, clothing and footwear, down \$60 million (9 per cent) due to a 9 per cent decrease in volume, which was partly offset by a 1 per cent increase in price.

Services debits

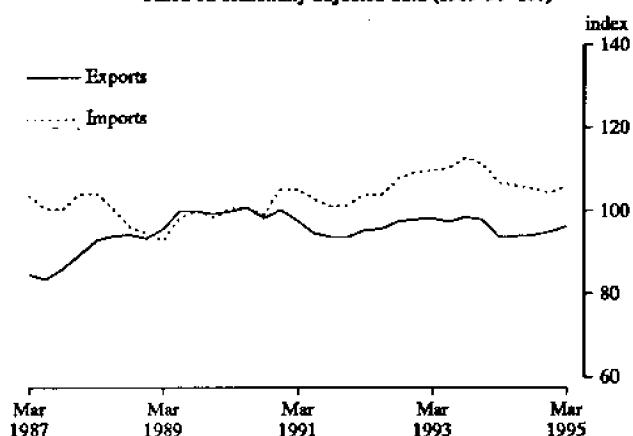

Services debits, at current prices, rose \$146 million (3 per cent) to \$5,269 million, as a result of a 5 per cent rise in price, offset by a 2 per cent fall in volume. At current prices and in volume terms, the increase was due to growth in travel and "other" services, which was partly offset by decreases in the remaining components. Prices of all components increased during the quarter.

Imports implicit price deflator

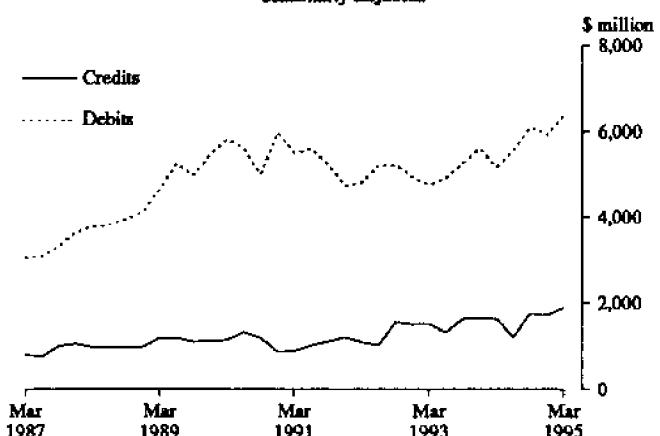

The *implicit price deflator (IPD)* for imports of goods and services rose 1.6 per cent. On a fixed-weighted basis, import prices rose 1.9 per cent, indicating that compositional change within imports of goods and services had a marginal (downwards) effect on the overall level of the IDP.

GRAPH 7. IMPLICIT PRICE DEFULATOR FOR GOODS AND SERVICES
based on seasonally adjusted data (1989-90=100)

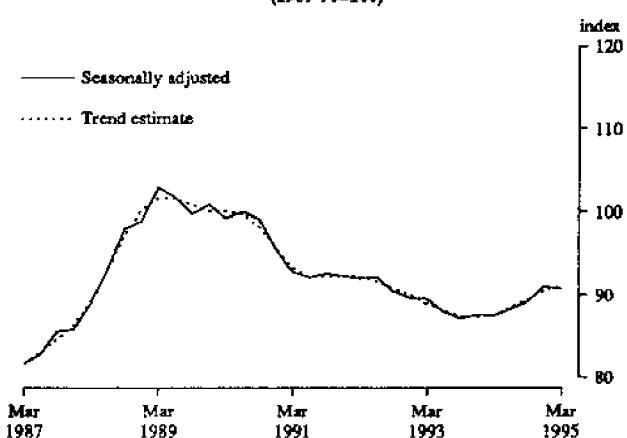

GRAPH 9. INCOME CREDITS AND DEBITS -
seasonally adjusted

Terms of Trade

Australia's *terms of trade* fell 0.4 per cent, resulting from a rise of 1.3 per cent in the IDP for exports of goods and services being more than offset by a rise of 1.6 per cent in the IDP for imports of goods and services.

GRAPH 8. TERMS OF TRADE FOR GOODS AND SERVICES
(1989-90=100)

Income

The net income deficit rose \$289 million (7 per cent) to \$4,496 million. Income credits rose \$180 million (11 per cent) to \$1,892 million, due mainly to an increase in earnings on reserve assets; a decrease in interest payable on loans from direct investment groups abroad; and an increase in dividends receivable from direct investment groups abroad. These movements were partly offset by a fall in remitted profits.

Income debits rose \$469 million (8 per cent) to \$6,388 million, due mainly to increases in interest payable by the official sector; interest payable by the private sector; and dividends payable on foreign portfolio investment in Australia. These increases were partly offset by decreases in dividends payable on foreign direct investment in Australia; and interest payable by the public sector.

Unrequited transfers

The *net unrequited transfers* surplus rose \$21 million (13 per cent) to \$186 million. Unrequited transfers credits rose \$66 million (9 per cent) and unrequited transfers debits rose \$45 million (7 per cent).

Capital account (not seasonally adjusted)

In original terms, the *balance on capital account* recorded a net inflow of \$2,097 million, a decrease of \$1,077 million on the net inflow recorded in the December quarter. This change was the result of a \$3,251 million turnaround in net debt, to a net outflow of \$343 million; partly offset by an increase of \$1,610 million, to \$2,223 million, in the net inflow from equity transactions; and a turnaround of \$564 million in "other" transactions, from a net outflow to a net inflow of \$216 million.

By sector, the balance on capital account was composed of:

- a net outflow of \$1,878 million in official sector transactions, a turnaround of \$10,762 million on the net inflow recorded in the previous quarter; and
- a net inflow of \$3,975 million in non-official sector transactions, a turnaround of \$9,685 million on the net outflow recorded in the December quarter.

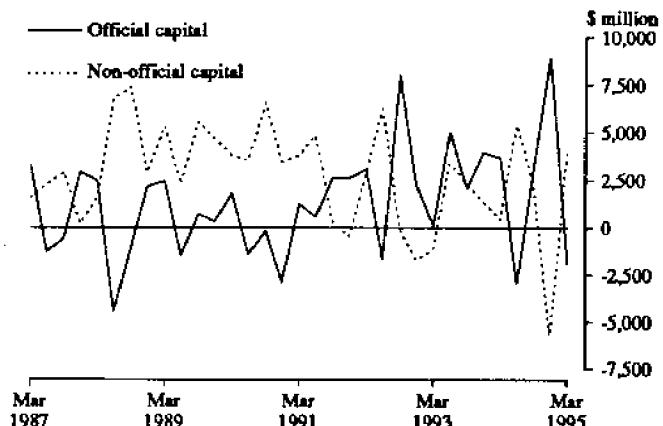

The change in *official sector* transactions resulted from:

- a turnaround of \$9,307 million in general government transactions to a net outflow of \$1,359 million. State government borrowing domiciled abroad turned around by \$5,845 million to a net outflow of \$1,002 million; and borrowing domiciled in Australia turned around by \$4,703 million to a net outflow of \$264 million. These movements were partly offset by a decrease of \$1,298 million, to \$48 million in the net outflow of Commonwealth government borrowing domiciled abroad; and
- a \$1,455 million turnaround in Reserve Bank transactions, to a net outflow of \$519 million.

The *non-official sector* transactions were composed of:

- a net inflow of foreign investment in Australia of \$5,032 million, a turnaround of \$10,920 million on the net outflow recorded in the December quarter; and
- a net outflow of Australian investment abroad of \$1,057 million, a turnaround of \$1,235 million on the net inflow recorded in the December quarter.

GRAPH 10. NET CAPITAL TRANSACTIONS

The chief factors responsible for the turnaround in *foreign investment in Australia* in the *non-official sector* were:

- a \$7,523 million turnaround in borrowing by the private sector from unrelated foreign lenders, to a net inflow of \$3,027 million;
- a \$2,743 million turnaround in foreign direct investment in corporate equities, to a net inflow (purchases) of \$796 million; and
- a \$1,942 million turnaround in direct investment borrowing, to net inflow (drawings) of \$23 million.

The movements in these components were partly offset by a decrease of \$1,058 million in foreign portfolio investment in Australian corporate equities, to a net inflow of \$20 million.

The turnaround in *Australian investment abroad* of the *non-official sector* was mainly the result of a \$2,040 million turnaround in lending to unrelated enterprises abroad, to a net outflow of \$918 million. This was partly offset by a turnaround of \$458 million in accounts receivable/payments made, to a net inflow of \$107 million.

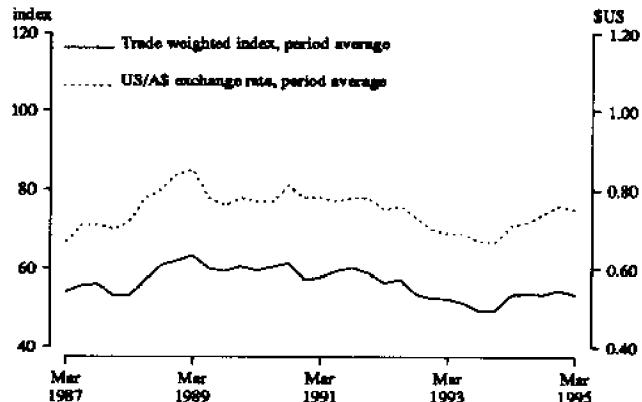

Balancing item (not seasonally adjusted)

Reflecting the outcomes on the current and capital accounts, the balancing item for the March quarter 1995 increased by \$994 million, from a net inflow of \$2,882 million, to a net inflow of \$3,876 million. It should be noted that data underlying the balance of payments estimates for the most recent quarters are preliminary and subject to revision.

Trade weighted index and US/A\$ exchange rates

The trade weighted index value of the Australian dollar (using period average exchange rates) for the March quarter was 53.4, down 2.0 per cent on the previous quarter. The Australian dollar fell 0.9 per cent against the US dollar to 0.7486 for the March quarter.

**GRAPH 11. TRADE WEIGHTED INDEX
(May 1970=100) and US/A\$ exchange rate**

Revisions

Estimates in this publication are consistent with those published in the April 1995 issue of *Balance of Payments, Australia* (5301.0), which was released on 29 May 1995.

Table 35 shows revisions to current price unadjusted series, on an annual and quarterly basis, since the December quarter 1994 issue of this publication.

(a) A minus sign means a decrease in debit entries (including imports fob), a decrease in debit entries (including exports fob), a decrease in a surplus or an increase in a deficit; and the absence of a sign means an increase in credit entries. An increase in debit entries or an increase in a surplus or a decrease in a deficit. (b) Balance of payments basis. (c) Annual reinvested earnings figures are allocated equally across the quarters resulting in the annual movement being reflected in the September quarter.

(a) Quarterly figures are derived from seasonally adjusted data. (b) The fixed-weighted indexes are derived by combining individual component prices (base year 1989-90=100) with weights which reflect the relative importance of the components in the base year. (c) Derived by dividing the implicit price deflator (IPD) for merchandise exports fob by the IPD for merchandise imports fob. (d) Derived by dividing the IPD for services credits by the IPD for services debitis. (e) Derived by dividing the IPD for total exports of goods and services by the IPD for total imports of goods and services. (f) Derived by smoothing the terms of trade series using a tailored seven term Henderson moving average.

(a) Most series are not seasonally adjusted. For those that are (Direct investment, Dividends; and Labour income, Earnings abroad), care should be exercised in using the seasonally adjusted series as their volatility makes reliable estimation of the winter seasonal pattern very difficult. (b) Also includes interest/remuneration received from the IMF on behalf of the Commonwealth Government.

(a) The entries carry the opposite sign to corresponding entries in Tables 1 and 6. (b) These exchange rates and the trade-weighted index are derived using rates provided by the Reserve Bank of Australia in respect of each trading day. (c) These exchange rates and index numbers relate to the last trading day of the reference period. (d) These exchange rates and index numbers are derived by averaging figures for each trading day.

EXPLANATORY NOTES

Introduction

This publication provides detailed estimates of Australia's balance of payments for the March quarter 1995 together with revised estimates for previous quarters and financial years. Longer term estimates, from September quarter 1959, consistent with those shown in this issue, are available on request. A charge is made for this service.

2. Tables 1 to 6 in this publication provide summary statistics; they show the main aggregates and the more important components of these aggregates and include, in addition, trend estimates and percentage changes in the seasonally adjusted estimates of the current account. The remaining tables, Tables 7 to 37, provide additional breakdowns, related series (e.g. exchange rates and the trade-weighted index), reconciliations of selected balance of payments series with other series (i.e. with foreign trade statistics and levels of official reserve assets), historical data on selected balance of payments aggregates and other analytical information.

Concepts, sources and methods

3. Descriptions of the underlying concepts and structure of the balance of payments and the sources and methods used in compiling the estimates are presented in *Balance of Payments, Australia: Concepts, Sources and Methods* (5331.0). The publication also provides item definitions; explanations of seasonal adjustment, constant price estimates, implicit price deflators and the terms of trade; and an analysis of the quality of the estimates.

Commodity breakdowns of merchandise

4. Commodity breakdowns of merchandise exports are provided in Table 11 (at current prices), 13 (at average 1989-90 prices), 15 (at current prices, seasonally adjusted) and 17 (at average 1989-90 prices, seasonally adjusted). The groupings shown are based on the third revision of the United Nations Standard International Trade Classification (SITC Rev 3) as follows:

	<i>SITC rev 3</i>	
	<i>Section or Division</i>	
Exports		
Rural —		
Meat & meat preparations	01	
Cereal grains and cereal preparations	04	
Sugar, sugar preparations & honey	06	
Wool and sheepskins	21(part), 26(part)	
Other rural	00, 02, 03, 05, 07 to 09, 12, 21(part), 22 to 25, 26(part), 29, 4	
Non-rural —		
Metal ores & minerals	27, 28	
Mineral fuels —		
Coal, coke and briquettes	32	
Other mineral fuels	33 to 35	
Metals —		
Gold	95, 97	
Other metals	67, 68	

	<i>SITC rev 3</i>
	<i>Section or Division</i>
Exports — continued	
Machinery	71 to 77
Transport equipment	78, 79
Other manufactures	5, 61 to 66, 69, 8
Other non-rural	11, 93, 96, 98

Note: Division 98 is not part of the SITC. In the balance of payments it comprises confidential items, which are removed from the actual division and combined in Division 98 to prevent disclosure of their values.

5. Commodity breakdowns of merchandise imports are provided in Table 12 (at current prices), 14 (at average 1989-90 prices), 16 (at current prices, seasonally adjusted) and 18 (at average 1989-90 prices, seasonally adjusted). The three broad end-use categories - *Consumption goods*, *Capital goods* and *Intermediate and other goods* - are based on United Nations' Classification of Broad Economic Categories (BEC), but differ from the BEC to the extent that intermediate goods are combined with other goods. These broad end-use categories are further divided into a total of 26 SITC Rev 3-based commodity groupings, which have also been aligned to the BEC.

6. For more information on the commodity classification of merchandise imports, and a detailed concordance between balance of payments merchandise imports end-use categories, commodity groups, BEC and SITC Rev 3, refer to the Information Paper, *Change to Commodity Classification of Merchandise Imports in Balance of Payments Publications* (5344.0), released on 14 April 1994.

Seasonal adjustment

7. Most of the current account series in this publication are affected to some extent by seasonal influences and it is useful to recognise and take account of this element of variation. However, seasonally adjusted statistics in this publication should not be regarded as in any way definitive as results from seasonal adjustment vary according to the method used.

8. The factors to be used in compiling seasonally adjusted estimates for certain series (principally components of merchandise trade and investment income) up to September quarter 1995 can be obtained, for \$70.00, from Mr Trevor Jolly on Canberra (06) 252 6820.

Trend estimates

9. The trend estimates are derived by applying a 7-term Henderson moving average to the seasonally adjusted series. The 7-term Henderson average (like all Henderson averages) is symmetric, but as the end of a time series is approached, asymmetric forms of the average are applied. Unlike the weights of the standard 7-term Henderson moving average, the weights employed here have been tailored to suit the particular characteristics of individual series. While the asymmetric weights enable trend estimates for recent quarters to be produced, it does result in revisions to the estimates for the most recent three quarters as additional observations become available. There may also be revisions because of changes in the original data and as a result of the re-estimation of the seasonal factors. Details of trend-cycle weighting patterns

are available on request from the Supervisor, Time Series Analysis, on (06) 252 6345.

Accuracy and reliability of estimates

10. - Because the transactions recorded in the balance of payments are of many different kinds, compilation of balance of payments estimates entails the use of a very wide range of statistical data of varying degrees of accuracy and timeliness.

11. Therefore care should be exercised in the use and interpretation of estimates in this publication. The latest estimates are *preliminary and subject to revision* as more accurate data come to hand. Also, the more detailed estimates may be less accurate in relative terms than broader items and aggregates of which they form components.

Investment income and capital transactions

12. Additional information about capital account and investment income transactions is available in the quarterly publication *International Investment Position, Australia* (5306.0) and in the annual publication *International Investment Position, Australia* (5305.0). Statistics in international investment publications are consistent with those in balance of payments publications. International investment publications also provide comprehensive statistics on the level of foreign investment in Australia, the level of Australian investment abroad and Australia's external debt.

Transportation transactions

13. Additional information on freight and other transportation transactions is available on request for a charge from Mr Kym Borgmeyer on (06) 252 5738.

Comparability with capital expenditure statistics

14. Tables 12 and 16 in this publication contain current price estimates of *imports of capital goods*. Shorter-term movements in this series can differ quite significantly from the corresponding movements in the *new private capital expenditure on equipment, plant and machinery* series published in *Private New Capital Expenditure, Australia* (5625.0 and 5626.0). The main reasons for the differences are:

- The imports series includes all goods defined as capital goods, whereas the capital expenditure series relates only to goods classified as equipment, plant and machinery that are acquired by private enterprises in selected industries.
- The capital expenditure series includes all plant, machinery and equipment, irrespective of whether it has been imported or manufactured in Australia.
- Imports are valued f.o.b. at the point of export whereas estimates of capital expenditure are measured at domestic market prices, including international transport margins, government duties and domestic trade and transport margins.

15. Accordingly, while movements in imports of capital goods can provide an indication of movements in the *import component* of new private capital expenditure on equipment, plant and machinery, they do not necessarily

provide an accurate indication of movements in total new private capital expenditure on these goods.

Series available on request

16. Detailed quarterly export and import series at constant (average 1989-90) prices can be obtained by contacting Mr Nigel Powell on Canberra (06) 252 6716. These series are based on foreign trade statistics (ie they are not adjusted to a balance of payments basis) and relate to selected divisions and sections of the SITC rev 3. Quarterly tables showing components of services can also be obtained from Mr Powell. These tables provide original and seasonally adjusted current and constant price estimates, corresponding to the series shown (in original current price terms) in Tables 22 and 23 of this publication. Both sets of estimates are working estimates only and may not always be completely consistent with published estimates.

Related publications

17. Other ABS publications which may be of interest include:

For more information ...

The ABS publishes a wide range of statistics and other information on Australia's economic and social conditions. Details of what is available in various publications and other products can be found in the *ABS Catalogue of Publications and Products* available at all ABS Offices (see below for contact details).

Information Consultancy Service

Information tailored to special needs of clients can be obtained from the Information Consultancy Service available at ABS Offices (see Information Inquiries below for contact details).

National Dial-a-Statistic Line

0055 86 400

(Steadycom P/L: premium rate 25c/21.4 secs.)

This number gives 24-hour access, 365 days a year, for a range of statistics.

Electronic Data Services

A large range of data is available via on-line services, diskette, magnetic tape, tape cartridge and CD ROM. For more details about these electronic data services, contact any ABS Office (see below).

Bookshops and Subscriptions

There is a large number of ABS publications available from ABS bookshops (see below Bookshop Sales for contact details). The ABS also provides a subscription service through which nominated publications are supplied by mail on a regular basis (telephone Subscription Service toll free on 008 02 0608 Australia wide).
