AUSTRALIA.

OVERSEA TRADE.

1952-53.

BULLETIN No. 50.

PREPARED UNDER INSTRUCTIONS FROM THE RIGHT HONORABLE THE TREASURER,

BY

S. R. CARVER,

ACTING COMMONWEALTH STATISTICIAN.

OVERSEA TRADE, 1952-53.

PREFACE.

Source of Data.—These statistics of Australia's Trade with Other Countries, and of Customs and Excise Revenue, for the year ended 30th June, 1953, together with comparative figures for previous years in abridged form, have been compiled from documents obtained under the Customs Act and supplied to this Bureau by the Department of Trade and Customs.

The Customs Area, to which all oversea trade statistics issued by this Bureau apply, is the whole area of the Commonwealth of Australia, comprising the States of New South Wales (including the Australian Capital Territory), Victoria, Queensland, South Australia, Western Australia and Tasmania, and the Northern Territory. Non-contiguous territories and mandated areas are treated as outside countries, and trade transactions between Australia and these non-contiguous territories are part of the oversea trade of Australia. Such transactions are shown separately, i.e., the trade of Australia with each particular area is separately recorded and tabulated.

The Trade System.—There are two generally accepted systems of recording oversea trade statistics, namely, (a) special trade and (b) general trade. The United Nations Statistical Office defines the two systems as follows:—

(a) *Special Trade.* Special imports are the combined total of imports directly for domestic consumption and withdrawals from bonded warehouses or free zones for domestic consumption, transformation or repair. Special exports comprise exports of national merchandise, namely, goods wholly or partly produced or manufactured in the country, together with exports of nationalized goods. (Nationalized goods are goods which, having been included in special imports, are then exported.)

(b) *General Trade.* General imports are the combined total of imports directly for domestic consumption and imports into bonded warehouse or free zone. Direct transit trade and trans-shipment under bond are excluded. General exports are the combined total of national exports and re-exports of imported merchandise including withdrawals from bonded warehouse or free zone for re-export.

Both special and general trade statistics are contained in this Bulletin, greater emphasis being placed on the latter. Special exports may be obtained from Table I., in which totals for statistical items and classes and the grand total are divided into Australian produce and re-exports. Special imports are included in Table IV., which relates to imports cleared for home consumption.

Ships' Stores (including bunker coal and oil) are omitted from the tabulation of exports. Table V. shows the value of these stores.

Outside Packages (containers, crates, &c.) have always been included as a separate item in the tabulation of imports, but, apart from those received from the United Kingdom, a classification according to country of origin has been available only since 1950-51. For exports, however, the value recorded for each item includes the value of the outside package.

Imports and Exports on Government Account are treated as normal transactions and are an integral part of oversea trade statistics.

Currency.—Notes and coins are included in the oversea trade statistics at their commodity value only.

Gold Content of Ores and Concentrates.—The value of ores and concentrates imported and exported includes the value of the gold content. The latter is not recorded separately for purposes of inclusion in imports and exports of gold. However, Table XIX. shows the quantity of gold contained in ores and concentrates exported from Australia.

Migrants' Effects are included in imports and exports.

Direct Transit Trade.—Particulars of direct transit trade through Australia are not recorded.

Classification of Imports and Exports.—The tables of imports and exports have been compiled according to a revised statistical classification divided into 21 classes, which came into operation on 1st July, 1945. The classification now comprises 2749 items of imports and 1497 items of exports. An extensive alphabetical index of imports and exports is given on page 563. Many items are recorded according to value only, but in all cases where quantities are recorded particulars concerning both quantities and values are shown.

Presentation of Data.—In Table I., exports of each statistical item are classified according to (i) country to which exported, (ii) State of final shipment and (iii) "Australian produce" and "Re-exports".

"Australian produce" comprises the following:—

- (i) Raw materials produced in Australia;
- (ii) Articles manufactured therefrom;
- (iii) Articles wholly or partly manufactured in Australia from imported materials.

"Re-exports" consist of articles produced overseas, imported into Australia and subsequently re-exported.

Particulars of re-exports classified according to States of final shipment are shown in Table II.

In Table III., imports of each statistical item are classified according to country of origin and importing State.

In Table IV. the value of goods cleared for home consumption and the gross amount of duty paid are shown for each statistical item.

Tables V. to XXI., in the main, are summary tables covering five years in some cases and ten years in others.

Statistical items which have not been exported during the past two years have been omitted from Table I., and those which have not been imported during the same period have been omitted from Table III.

Countries.—"Country to which exported" shown in export tables should be interpreted as "Country of consignment", while "Country of origin" appearing in import tables should be taken to mean "Country of production". The country of origin of all re-imports is shown as Australia.

In the tables appearing in this Bulletin, countries are arranged in two divisions, namely—(a) British Countries (including protectorates, mandated territories and territories under condominium) and (b) Foreign Countries. Within each of these divisions the arrangement is alphabetical, except that dependencies and possessions of a foreign country follow immediately after that country.

Where, in respect of any statistical item in Tables I. and III., the total value is less than £5,000, details of the States and countries concerned are omitted. Where country details are shown for a statistical item, only those countries with totals of £5,000 or more are shown separately. In cases where the total value of the item is £5,000 or more but the value for each country is less than £5,000, separate mention is made of the country for which the highest value is recorded.

A list of countries whose trade with Australia was recorded during 1952-53 appears on pages ix to xi, together with the areas included under each individual country shown.

Valuation.—(a) *General*.—All values throughout this Bulletin are expressed in £ (Aust.). Prior to 15th November, 1947, however, imports into Australia were recorded in British currency values. Full explanatory notes on the methods of recording import values before and after 15th November, 1947, were included immediately after the Preface in Oversea Trade Bulletin No. 45, 1947-48.

(b) *Exports.*—The value of goods exported includes the cost of containers and has been determined as from 1st July, 1937 as follows :—

- (1) Goods sold to oversea buyers before export.—The f.o.b. equivalent of the price at which the goods were sold (e.g., as regards wool, the actual price paid by the oversea buyer plus the cost of all services incurred by him in placing the wool on board ship).
- (2) Goods shipped on consignment.—The Australian f.o.b. equivalent of the current price offering for similar goods of Australian origin in the principal markets of the country to which the goods were dispatched for sale (as regards wool, f.o.b. equivalent of current price ruling in Australia will normally provide a sufficient approximation to the f.o.b. equivalent of the price ultimately received).

In view of the small proportion of goods shipped on consignment, the recorded value of Australia's exports may be regarded as "transaction value (f.o.b.)".

(c) *Imports.*—The value included in the tabulation of goods imported represents the amount on which duty is payable or would be payable if the duty were *ad valorem*. Section 154(I) of the Customs Act 1901-1953 provides that when any duty is imposed according to value, the value for duty shall be the sum of the following :—

- (a) (i) the actual money price paid or to be paid for the goods by the Australian importer plus any special deduction ; or
- (ii) the current domestic value of the goods, whichever is the higher ;
- (b) all charges payable or ordinarily payable for placing the goods free on board at the port of export ;

"Current domestic value" is defined as "the amount for which the seller of the goods to the purchaser in Australia is selling or would be prepared to sell for cash, at the date of exportation of these goods, the same quantity of identically similar goods to any and every purchaser in the country of export for consumption in that country".

The recorded value of Australia's imports is, therefore, "transaction value (f.o.b.)" or "domestic value (f.o.b.)", whichever is the higher.

Import Duties.—The duties charged on imports into the Commonwealth of Australia during the year 1952-53 were collected in accordance with the Customs Tariff 1933-1953 and subsequent Tariff Resolutions. The gross amount of duty collected in respect of each statistical item is shown in Table IV. In issues of this Bulletin prior to No. 49 (1951-52) this information was included in the table corresponding to Table III. in the current issue.

Primage Duties.—Primage duty is imposed on certain goods in addition to duties collected under the tariff.

The amount of primage duty collected in respect of each statistical item is not separately shown in this publication. Totals, however, are included in Tables XXII.-XXIV.

Units of Quantity.—Where quantities are shown they are generally, but not invariably, expressed in terms of the normal trade unit. Where "cental" is used, the unit is equivalent to 100 lb. avoirdupois.

Quantities are not tabulated in respect of statistical items for which there is no appropriate unit of quantity (for example statistical items which cover a number of commodities which cannot be recorded under a uniform unit of quantity).

Unless provision is made in the Classification of Imports and Exports for a separate statistical item for "parts," imports and exports of parts of articles are recorded under the same statistical item as the complete unit. In such cases, if quantities for the items are tabulated, the quantity/value relationship may be distorted, as the quantity represents the number of complete units whereas the value includes, in addition, the value of parts. All statistical items which included parts during 1952-53 are indicated in Tables I. and III. by a footnote.

Supplementary Bulletins.—In order to meet the demand for up-to-date statistics of Australia's Oversea Trade two mimeographed bulletins containing 1952-53 statistics in considerable detail have been issued. The first of these bulletins, *Oversea Trade—Preliminary*

Bulletin 1952-53, was published in September, 1953, and contains particulars of imports and exports classified according to statistical item and country. The other mimeographed bulletin, *Imports Cleared for Home Consumption* 1952-53, was published in two volumes in November, 1953, and shows the quantity and value of goods cleared (and duty paid thereon) under each tariff item classified according to statistical item and further subdivided according to country of origin and nature of tariff.

Abbreviation.—N.E.I. means "not elsewhere included".

I am especially indebted to Mr. V. Fahey, Supervisor, Trade and Transport Branch, and to Mr. A. A. Sluce and the other officers of the Oversea Trade Section, for the care and attention bestowed on the compilation of this Bulletin, and the preparation of the material for the Printer. My thanks are due also to the officers of the Department of Trade and Customs.

Acting Commonwealth Statistician.
