OVERSEA TRADE.

1956-57.

BULLETIN No. 54.

PREPARED UNDER INSTRUCTIONS FROM THE RIGHT HONORABLE THE TREASURER,
BY
S. R. CARVER,
COMMONWEALTH STATISTICIAN.

OVERSEA TRADE, 1956-57.

PREFACE.

Source of Data.—These statistics of Australia's trade with other countries, and of customs and excise revenue, for the year ended 30th June, 1957, together with comparative figures for previous years in abridged form, have been compiled from documents obtained under the Customs Act 1901-1954 and supplied to this Bureau by the Department of Customs and Excise.

The Customs Area, to which all overseas trade statistics issued by this Bureau apply, is the whole area of the Commonwealth of Australia, comprising the States of New South Wales, Victoria, Queensland, South Australia, Western Australia, and Tasmania, the Northern Territory and the Australian Capital Territory. Non-contiguous territories are treated as outside countries, and trade transactions between Australia and these non-contiguous territories are part of the overseas trade of Australia. Such transactions are shown separately, i.e., the trade of Australia with each particular area is separately recorded and tabulated.

The Trade System.—There are two generally accepted systems of recording overseas trade statistics, namely, (a) special trade and (b) general trade. The Statistical Office of the United Nations defines the two systems as follows:—

(a) *Special Trade.* Special imports are the combined total of imports directly for domestic consumption and withdrawals from bonded warehouses or free zones for domestic consumption, transformation or repair. Special exports comprise exports of national merchandise, namely, goods wholly or partly produced or manufactured in the country, together with exports of nationalized goods. (Nationalized goods are goods which, having been included in special imports, are then exported.)

(b) *General Trade.* General imports are the combined total of imports directly for domestic consumption and imports into bonded warehouses or free zones. Direct transit trade and trans-shipment under bond are excluded. General exports are the combined total of national exports and re-exports of imported merchandise including withdrawals from bonded warehouse or free zone for re-export.

General imports and exports are contained in this Bulletin.

Ships' Stores (including bunker coal and oil) are omitted from the tabulation of exports. Table IV. shows the value of these stores.

Outside Packages (containers, crates, etc.) are included as a separate item in the tabulation of imports. For exports, however, the value recorded for each item includes the value of the outside package.

Imports and Exports on Government Account are treated as normal transactions and are an integral part of overseas trade statistics.

Currency.—Notes and coins are included in the overseas trade statistics at their commodity value only.

Gold Content of Ores and Concentrates.—The value of ores and concentrates imported and exported includes the value of the gold content. The latter is not recorded separately for purposes of inclusion in imports and exports of gold. However, Table XX. shows the quantity of gold contained in ores and concentrates exported from Australia.

Migrants' Effects are included in imports and exports.

Direct Transit Trade.—Particulars of direct transit trade through Australia are not recorded.

Classification of Imports and Exports.—The tables of imports and exports have been compiled according to a revised statistical classification divided into 21 classes, which came into operation on 1st July, 1945. The classification now comprises 2264 items of imports and 1072 items of exports. An extensive index of imports and exports is given on page 553. Many items are recorded according to value only, but in all cases where quantities are recorded particulars concerning both quantities and values are shown.

Presentation of Data.—In Table I., exports of statistical items are classified according to (i) country of consignment, (ii) State of final shipment and (iii) “Australian produce” and “Re-exports”.

“Australian produce” comprises the following:—

- (i) Raw materials produced in Australia;
- (ii) Articles manufactured therefrom;
- (iii) Articles wholly or partly manufactured in Australia from imported materials.

“Re-exports” consists of articles produced overseas, imported into Australia and subsequently re-exported.

Particulars of re-exports classified according to State of final shipment are shown in Table II.

In Table III., imports of statistical items are classified according to country of origin and importing State.

Tables IV. to VI. and VIII. to XXII. are, in the main, summary tables covering five years in some cases and ten years in others.

Table XI. gives a summary of the principal imports from and exports to each of the countries whose trade with Australia was recorded during 1956–57.

Statistical items under which there have been no exports during the past two years are included in Table I., and those under which there have been no imports during the same period are included in Table III. In previous Bulletins “nil” statistical items were omitted from Tables I. and III.

Countries.—“Country of origin” appearing in import tables should be taken to mean “country of production”. “Country of consignment” appearing in export tables means the country to which goods were consigned so far as this can be determined at the time of export. Where the country of consignment is not determined at the time of export, goods are shown as exported “For Orders”.

In the tables appearing in this Bulletin, countries are arranged in two divisions, namely, (a) Commonwealth countries (including protectorates, trust territories and territories under condominium) and (b) foreign countries.

Where, in respect of any statistical item in Tables I. and III. (except in Class XXI.), the total value is less than £5,000, details of Australian States and oversea countries are omitted. Where country details are shown for a statistical item, only those countries with totals of £5,000 or more are shown separately. In cases where the total value of the item is £5,000 or more but the value for each country is less than £5,000, separate mention is made of the country for which the highest value is recorded. In Class XXI. full details are given for each item.

A list of countries, together with the areas included under each individual country, appears on pages ix to xi.

Valuation.—(a) *General.*—All values throughout this Bulletin are expressed in £ (Aust.). Prior to 15th November, 1947, however, imports into Australia were recorded in British currency values. Full explanatory notes on the methods of recording import values before and since 15th November, 1947, were included immediately after the Preface in Oversea Trade Bulletin No. 45, 1947–48.

(b) *Exports.*—The value of goods exported includes the cost of containers and has been determined as from 1st July, 1937 as follows:—

- (1) Goods sold to oversea buyers before export.—The f.o.b. equivalent of the price at which the goods were sold (e.g., as regards wool, the actual price paid by the oversea buyer plus the cost of all services incurred by him in placing the wool on board ship).
- (2) Goods shipped on consignment.—The Australian f.o.b. equivalent of the current price offering for similar goods of Australian origin in the principal markets of the country to which the goods were dispatched for sale (as regards wool, f.o.b. equivalent of current price ruling in Australia will normally provide a sufficient approximation to the f.o.b. equivalent of the price ultimately received).

(c) *Imports.*—The value of goods imported represents the amount on which duty is payable or would be payable if the duty were *ad valorem*. Section 154 (1) of the Customs Act 1901–1954 provides that when any duty is imposed according to value, the value for duty shall be the sum of the following:—

- (a) (i) the actual money price paid or to be paid for the goods by the Australian importer plus any special deduction; or
- (ii) the current domestic value of the goods, whichever is the higher;
- (b) all charges payable or ordinarily payable for placing the goods free on board at the port of export.

“Current domestic value” is defined as “the amount for which the seller of the goods to the purchaser in Australia is selling or would be prepared to sell for cash, at the date of exportation of these goods, the same quantity of identically similar goods to any and every purchaser in the country of export for consumption in that country”.

The recorded value of Australia's imports is, therefore, “transaction value (f.o.b.)” or “domestic value (f.o.b.)”, whichever is the higher.

Units of Quantity.—Where quantities are shown they are generally, but not invariably, expressed in terms of the normal trade unit. Where “cental” is used, the unit is equivalent to 100 lb. avoirdupois.

Quantities are not tabulated in respect of statistical items for which there is no appropriate unit of quantity (for example, statistical items which cover a number of commodities which cannot be recorded under a uniform unit of quantity).

Unless provision is made in the Classification of Imports and Exports for a separate statistical item for “parts,” imports and exports of parts of articles are recorded under the same statistical item as the complete unit. In such cases, if quantities for the items are tabulated, the quantity/value relationship may be distorted, as the quantity represents the number of complete units whereas the value includes, in addition, the value of parts. All statistical items for which quantities are tabulated and which include the value of parts are indicated in Tables I. and III. by footnotes.

Supplementary Bulletins.—In order to meet the demand for up-to-date statistics of Australia's overseas trade, two mimeographed bulletins containing 1956–57 statistics in considerable detail have been issued. The first of these bulletins, *Overseas Trade—Preliminary Bulletin 1956–57*, was published in September, 1957, and contains particulars of imports and exports classified according to statistical item and country. The other mimeographed bulletin, *Imports Cleared for Home Consumption 1956–57*, published in two volumes in November, 1957, shows the quantity and value of goods cleared (and duty paid thereon) under each tariff item classified according to statistical item and further subdivided according to country of origin and nature of tariff.

Abbreviation.—N.E.I. means “not elsewhere included”.

I am especially indebted to Mr. E. J. Starkey, B.Com., Supervisor, Trade and Transport Branch, and to Mr. K. S. Watson, B.Ec. and the other officers of the Overseas Trade Section, for the care and attention bestowed on the compilation of this Bulletin, and the preparation of the material for the Printer. My thanks are due also to the officers of the Department of Customs and Excise.
