JUNE KEY POINTS

TREND ESTIMATES

- With the inclusion of data for June 1997, the trend estimate for total dwellings financed now shows decreases in the past three months, and is down 0.7% in June.
- Commitments for the purchase of new dwellings have shown increases since July 1996 and are up 0.7% in June. Commitments for the construction of dwellings have also been rising slowly since July and are up slightly in June.
- The trend estimate for commitments for established dwellings has decreased by 1.0% in June.

SEASONALLY ADJUSTED ESTIMATES

- The number of dwellings financed during June was 39 162, 2.1% lower than in May, with decreases recorded for each type of housing.
- The number of commitments under new finance, excluding refinancing, fell by 5.0%. The number of commitments for established dwellings, excluding refinancing, fell by 4.9% and refinancing commitments increased by 9.6%.

ORIGINAL ESTIMATES

- There were 39 838 dwellings financed in June, an increase of 12.2% on June 1996.
- During June 1997, 79.4% of commitments were made by Banks, 3.7% by Permanent Building Societies and 16.9% by Other Lenders. For June 1996, the proportions were 83.1%, 5.3% and 11.6% respectively. There was a sharp rise in lending by Mortgage Managers which accounted for 9.2% of commitments in June 1997, compared with 6.7% a year earlier.

CHANGES IN THIS ISSUE

This issue includes revisions in Table 6, Commitments not advanced at end of month and Cancellations of commitments during month, for the period April 1996 to May 1997. Revisions to previously published statistics are included in the publication as they occur, see Explanatory Note 7.

SENSITIVITY ANALYSIS

Readers should exercise care when interpreting this month's trend estimates because they will be revised when next month's seasonally adjusted estimates become available. For further information, see Explanatory Notes 13 to 15.

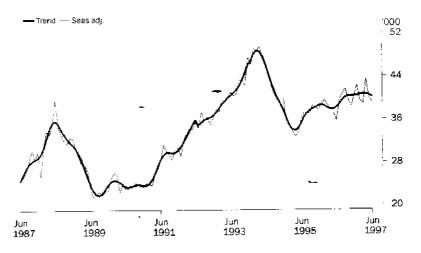

The graph below presents the effect of two possible scenarios on the previous trend estimates:

- **1** The July seasonally adjusted estimate of number of dwellings financed is *higher* than the June seasonally adjusted estimate by 4%.
- **2** The July seasonally adjusted estimate of number of dwellings financed is *lower* than the June seasonally adjusted estimate by 4%.

The percentage change of 4% was chosen because the average absolute percentage change of the seasonally adjusted series, based on the last 10 years of data, has been 4%.

1996 1997		(new)						

W. McLennan Australian Statistician NUMBER OF DWELLINGS FINANCED The trend estimate for the number of dwellings financed in June decreased by 0.7%, the third consecutive monthly decrease. Commitments for the purchase of new dwellings and for the construction of dwellings have had increases since July 1996 and are up 0.7% and 0.4% respectively in June. Commitments for the purchase of established dwellings have decreased by 1.0% in June, following eight months of little change. Seasonally adjusted, the number of dwellings financed decreased by 2.1%, with decreases recorded for each type of housing. The number of dwellings refinanced increased by 9.6%, following a 22.6% decrease in May.

VALUE OF COMMITMENTS

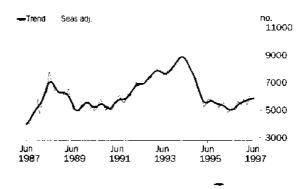

The trend estimate for the value of commitments in June was \$4,331.0 million, down slightly on May, following thirteen consecutive monthly increases. Seasonally adjusted, the value of commitments were \$4,286.4 million, an increase of 0.9% on May. The average borrowing size was \$109,400 in original terms.

NUMBER OF DWELLINGS FINANCED

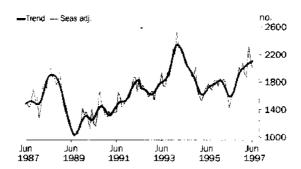

CONSTRUCTION OF DWELLINGS

The trend estimate for the construction of dwellings was 5 821, the twelfth consecutive monthly rise and a slight increase on May. Seasonally adjusted, the number of dwellings financed was 5 634, a 5.5% decrease on May.

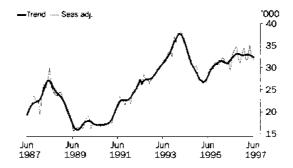

PURCHASE OF NEW DWELLINGS

The trend estimate for the number of new dwellings financed was 2 105, up 0.7% on May. This series has been rising since July 1996, however, the rate of increase has been decelerating over the last two months. Seasonally adjusted, finance was committed for 1 999 dwellings, down 5.7% on May, the second consecutive monthly decrease.

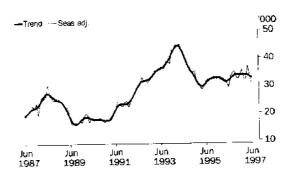

PURCHASE OF ESTABLISHED DWELLINGS The trend estimate for the purchase of established dwellings has decreased by 1.0% in June, following eight months of little change. Commitments for established dwellings, excluding refinancing, have decreased by 1.2% and refinancing commitments have decreased slightly for the first time in six months. Seasonally adjusted, finance was committed for 31 529 dwellings, a decrease of 1.2% on May. Commitments for established dwellings, excluding refinancing, fell by 4.9%.

NUMBER OF DWELLINGS FINANCED

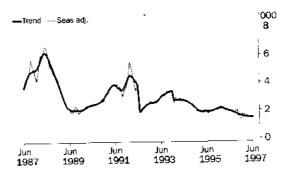

BANKS

The trend estimate for the number of dwellings financed now shows decreases for the past three months, falling 1.5% in June. Seasonally adjusted, finance was committed for 30 457 dwellings, an 8.9% decrease on May.

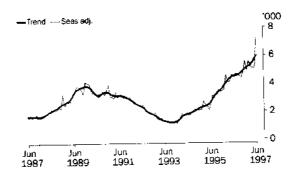

PERMANENT BUILDING SOCIETIES

The trend estimate for the number of dwellings financed continues to fall, with the 1.1% decrease in June being the sixteenth consecutive month of decline. Seasonally adjusted, finance was committed for 1 503 dwellings, a 0.7% increase in June. The graph below contains breaks in series when Permanent Building Societies converted to Banks, see Explanatory Note 6.

OTHER LENDERS The trend estimate for the number of dwellings financed was 5 944, a 4.1% increase in June and the highest level recorded since the inception of the series. Seasonally adjusted, finance was committed for 7 202 dwellings, an increase of 41.8% in June. The increase was largely attributable to Mortgage Managers, for refinancing and new loans.

IMPACT ON HOUSING FINANCE ESTIMATES

The ABS began collecting separate information on the level of refinancing in July 1991. Up until that time refinancing was included with statistics of finance for established dwellings. Growth in refinancing in recent years has led to requests for trend estimates of total commitments for housing finance excluding commitments for refinancing.

Preliminary seasonally adjusted and trend estimates for dwellings refinanced are now available from July 1991 based on the actual recorded level of refinancing. These should be used with caution as there is still an insufficient number of observations to produce estimates as reliable as others in this publication.

The table below compares the seasonally adjusted and trend estimates, and trend growth rates in housing finance, both inclusive and exclusive of refinancing, for the most recent fifteen month period. The graph opposite illustrates this comparison on an extended time frame.

OTHER LENDERS-MORTGAGE MANAGERS

Commitments made by mortgage managers for secured housing finance for owner occupation are included in the 'other lenders' and 'total lenders' categories in this publication. The table below shows the level of lending commitments by mortgage managers to individuals for construction and purchase of dwellings. Data for the more significant mortgage managers is available from July 1995 and has been included for carlier months elsewhere in this publication under 'other lenders', but not shown separately. The data in the following table are on an original basis; seasonally adjusted data will not be available for some years as a large number of observations are needed to produce reliable seasonal factors.

Care should be exercised in the interpretation of these statistics as:

- only those mortgage managers identified as significant lenders are included;
- only those commitments funded by securitisers are included. Commitments made by
 mortgage managers acting as agents or brokers for other financial institutions are
 excluded from this table. Such commitments are reported by those lending
 institutions providing the finance and are included in the lender type category
 relating to those institutions; and
- commitments made by mortgage managers for investment housing are excluded. The value of those commitments is included in the 'other_lenders' and 'total lenders' categories of the ABS's Commercial Finance standard data service (5643.0.40.002).

EXPLANATORY NOTES

INTRODUCTION

1 This publication presents statistics of secured housing finance commitments made by significant lenders to individuals. The commitments are for the construction or purchase of owner–occupied dwellings.

SCOPE

- 2 The scope of the survey comprises the following types of lenders:
- Ranks
- · Permanent building societies
- Credit unions/co-operative credit societies
- · Life or general insurance companies
- General government enterprises
- Superannuation funds
- Organisations raising funds through the secondary mortgage market for approved home buyers under State government housing schemes
- Other financial corporations registered under the Financial Corporations Act 1974
- Other providers of consumer finance registered with State credit tribunals, including mortgage managers.

COVERAGE

- **3** The statistics cover significant lenders only. Significant lenders are the largest lenders to individuals for the construction and purchase of owner—occupied dwellings. They account in aggregate for at least 95% of the Australian total and at least 90% of each State total of finance commitments for housing.
- **4** An annual collection is conducted to maintain coverage of significant lenders. In addition, new lenders are included in the series as their level of lending for owner–occupied housing becomes significant.
- **5** All banks and permanent building societies qualify as significant lenders and are therefore covered by these statistics. The category 'other lenders' includes a large number of small lenders that do not qualify as significant lenders and therefore are excluded from the survey. Although their omission does not have a serious impact on the overall coverage of lending activity, the statistics for 'other lenders' are affected to a greater extent by this coverage constraint.
- **6** Changes in the classification of lenders (for example, the conversion of a permanent building society to a bank) are reflected in the 'type of lender' statistics from the month of such changes. Data for earlier periods for such lenders are not reclassified. Details of the establishment of new banks are published in the Reserve Bank of Australia's monthly Bulletin in the section on Technical Notes to tables.

REVISIONS

7 Revisions to previously published statistics are included in the publication as they occur.

COMMITMENTS NOT ADVANCED

- **8** Commitments not advanced at the end of the period are calculated as follows:
- Balance of unadvanced commitments at the end of the previous period + Total new housing commitments (including refinancing)
- + Alterations and additions
- = Total commitments
- Cancellations of commitments
- Commitments advanced during the period
- = Commitments not advanced at the end of the period

EXPLANATORY NOTES

SEASONAL ADJUSTMENT

- **9** Seasonal adjustment is a means of removing the estimated effects of normal seasonal variation and 'trading day effects' (arising from the varying amounts of activity on different days of the week and the varying reporting practices of the lenders'). Adjustment is also made for Easter which may affect the March and April estimates differently. Seasonal adjustment does not remove the effect of irregular or non-seasonal influences (for example, a change in interest rates) from the series.
- **10** Over the period from early 1990 to April 1995, each of the four major banks changed from reporting for the 4 or 5 weeks ending on the last Wednesday of each month to reporting on a calendar month basis. The published seasonally adjusted data takes account of this change in pattern.
- 11 Two other developments in recent years may induce some change in the trading day and seasonal patterns of housing finance data. These comprise the changes in the classification of some major financial institutions (in particular, the conversion of building societies into banks) and the recent expansion of activity by mortgage managers. Estimation of seasonal adjustment and trading day factors that reflect the full effect of all these changes will not be possible until a sufficient number of years of data have been collected. Accordingly, the trend estimate data provide the most reliable indicator of underlying movement in housing finance commitments.
- **12** State component series have been seasonally adjusted independently of the Australian series. The sum of the States components is therefore unlikely to equal the corresponding Australian total series. The State component series are also affected by the changes mentioned in paragraphs 10 and 11.
- **13** Smoothing seasonally adjusted series reduces the impact of the irregular component of the seasonally adjusted series and creates trend estimates. These trend estimates are derived by applying a 13-term Henderson-weighted moving average to all months of the respective seasonally adjusted series except the last six months. Trend series are created for the last six months by applying surrogates of the Henderson moving average to the seasonally adjusted series. For further information, refer to *A Guide to Interpreting Time Series Monitoring 'Trends': an Overview* (1348.0) or contact the Assistant Director, Time Series Analysis on 06 252 6345.
- **14** While the smoothing technique described in paragraph 13 enables trend estimates to be produced for the latest few months, it does result in revisions to the trend estimates as new data become available. Generally, revisions become smaller over time and, after three months, usually have a negligible impact on the series. Changes in the original data and re-estimation of seasonal factors may also lead to revisions to the trend.
- **15** Volatility in the refinancing series means that the most recent trend estimates may be subjected to greater revision than usual. Users are advised to exercise care when interpreting movements affected by this volatility.

n.y.a not yet available

GLOSSARY

Alterations and additions

Alterations and additions cover all structural and non-structural changes which are integral to the functional and structural design of a dwelling. Examples are garages, carports, pergolas, reroofing, recladding, etc. Alterations and additions do not include swimming pools, ongoing repairs, or maintenance and home improvements which do not involve building work.

Average borrowing

Average borrowing is calculated as follows:

Total value of lending commitments per month Total number of dwellings financed per month

Average borrowing does not necessarily represent the average loan size per dwelling. For instance, average borrowing separately reflects first and second mortgages, committed in separate months, which apply to the same dwelling.

Commitment

A lending commitment is a firm offer of housing finance. It either has been, or is normally expected to be, accepted. Included are commitments to provide housing finance to employees and commitments accepted and cancelled in the same month.

Commitment value

The commitment value for a contract of sale is the dwelling's sale value less any deposit.

Construction of dwellings

Construction of dwellings represents commitments made to individuals to finance, by way of progress payments, the construction of owner-occupied dwellings.

Dwelling

A dwelling is either a house or other dwelling. A house is a single self–contained place of residence detached from other buildings. An other dwelling is a single self–contained place of residence other than a house. Examples of other dwellings are individual flats, home units, town houses, terrace houses, etc.

Dwelling units

Dwelling units refers to the number of houses and other dwellings for which commitments have been made, either on the security of first mortgage or on contract of sale.

Established dwelling

An established dwelling is one which has been completed for more than twelve months prior to the lodgement of a loan application, or which has been previously occupied.

First home buyers

First home buyers are persons entering the home ownership market for the first time.

Fixed rate loan

Fixed rate loans have a set interest rate which cannot be varied, either upward or downward, for a minimum period of two years. Capped loans are not categorised as fixed rate loans because their interest rate can vary within a two year period.

Mortgage Manager

Mortgage Managers obtain funds from financial institutions and through securitisation to lend for housing finance. In general, they manage the loans that they originate on behalf of the wholesale lenders. To avoid double counting, only those mortgage manager commitments funded by securitisers are included in the housing finance statistics. Those commitments made by mortgage managers acting as agents/brokers for other financial institutions are reported by those institutions.

GLOSSARY

Newly erected dwelling — A new dwelling that has been completed within twelve months of the lodgement

of a loan application, and the borrower will be the first occupant.

Refinancing Refinancing represents a commitment to refinance an existing loan where the

refinancing lender is not the lender who made the original loan. Excluded are an institution's refinancing of its own loans and the refinancing of loans to fund a

change of residence. The latter is treated as a new lending commitment.

Secured housing finance This is all secured commitments to individuals for the construction or purchase

of houses and other dwellings for owner occupation, regardless of type of security. Commitments for housing that will be occupied by persons other than

the owner(s) are excluded.

Self-contained The dwelling includes bathing and cooking facilities.

Significant lenders Significant lenders are those lenders who committed funds of more than

\$25 million Australia-wide_during the calendar year 1995.

FOR MORE INFORMATION...

The ABS publishes a wide range of information on Australia's economic and social conditions. A catalogue of publications and products is available from any of our offices (see below).

INFORMATION CONSULTANCY SERVICES

Information tailored to special needs of clients can be obtained from the Information Consultancy Service available at ABS Offices (see below).

ABS PRODUCTS

A large number of ABS products is available from the ABS Bookshops (see below). The ABS also provides a subscription service – you can telephone the ABS Subscription Service Australia wide toll free on 1800 0206 08.

ELECTRONIC SERVICES

A large range of data is available via on-line services. diskette, magnetic tape, tape cartridge and CD ROM. For more details about our electronic data services, contact any ABS office (see below) or e-mail us at:
