SUMMARY OF FINDINGS

NOTE: Trend estimates appear in this issue of the publication for the first time. Selected seasonally adjusted series are available on request.

	Full-time adult average weekly ordinary time earnings			Full-time adult average weekly total earnings			All employees average weekly total earnings		
	Change (%)			Change (%)			Change (%)		
	May 1993 to Aug. 1993	Aug. 1992 to Aug. 1993		May 1993 to Aug. 1993	Aug. 1992 to Aug. 1993		May 1993 to Aug. 1993	Aug. 1992 to Aug. 1993	
	(\$)			(\$)			(\$)		
TREND ESTIMATES									
Males	641.20	+1.2	+2.6	688.30	+1.1	+3.1	622.30	+1.3	+3.8
Females	538.40	+1.0	+3.4	550.70	+1.0	+3.5	413.20	+1.2	+3.7
Persons	604.80	+1.1	+2.9	639.60	+1.1	+3.3	525.80	+1.3	+4.0
ORIGINAL ESTIMATES									
Males	639.90	+1.1	+2.7	685.70	+0.9	+3.1	618.10	+0.9	+3.4
Females	535.30	+0.4	+3.2	547.10	+0.3	+3.2	409.60	+0.8	+3.1
Persons	602.40	+0.8	+2.8	636.10	+0.6	+3.2	520.60	+0.6	+3.3

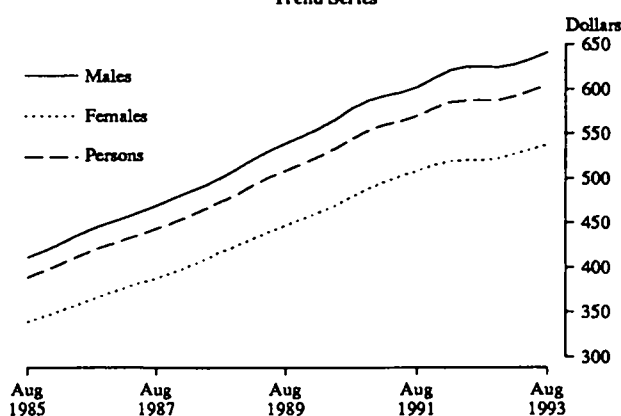

The movements in the trend estimates for all categories of earnings at the national level have continued to show steady growth since the March quarter 1993. The diagram illustrates this trend for full-time adult ordinary time earnings for males, females and persons.

At the national level movements in ordinary time earnings original estimates were statistically significant only for full-time adult males.

For original estimates at the State level, movements were statistically significant in all categories of earnings for males and persons in South Australia and for ordinary time and average weekly total earnings for full-time adult females in Queensland.

Industries with the largest increases in average weekly ordinary time earnings original estimates of full-time adult persons were Mining (8.0%), Communication (6.3%) and Finance, property and business services (6.0%).

AVERAGE WEEKLY ORDINARY TIME EARNINGS
OF FULL-TIME ADULT EMPLOYEES, AUSTRALIA
Trend Series

TREND ESTIMATES OF AVERAGE WEEKLY ORDINARY TIME EARNINGS FOR STATES, PERSONS AUGUST 1985 - AUGUST 1993

NEW SOUTH WALES

The trend estimate for August 1993 is \$617.20 continuing the long term upward trend. However, the rate of increase has slowed since February 1992.

VICTORIA

The trend estimate for August is \$603.60 continuing the long term upward trend.

QUEENSLAND

The trend estimate for August 1993 is \$574.90 continuing the long term upward trend.

SOUTH AUSTRALIA

The trend estimate for August 1993 is \$601.30. The rate of increase has been less marked between May 1992 and February 1993 and has risen more sharply since then.

WESTERN AUSTRALIA

The trend estimate for August 1993 is \$593.80. The trend has remained relatively flat since February 1992.

TASMANIA

The trend estimate for August 1993 is \$576.20. This continues the steady upward trend in the series since its inception in 1983.

NORTHERN TERRITORY

The trend estimate for August 1993 is \$635.20. There has been modest growth in the trend since November 1992.

AUSTRALIAN CAPITAL TERRITORY

The trend estimate for August 1993 is \$703.90. This continues the steady upward movement in trend since the inception of the series in 1983.

EXPLANATORY NOTES

Introduction

This publication contains estimates of average weekly earnings for August 1993 based on information obtained from a sample survey of employers.

2. Background information about the average weekly earnings series is provided in *Information Paper: New Statistical Series: Employment, Average Weekly Earnings, Job Vacancies and Overtime* (6256.0) published on 21 June 1984, copies of which are available on request.

Scope of the survey

3. All wage and salary earners who received pay for the reference period are represented in the survey, except:

- members of the Australian permanent defence forces;
- employees of enterprises primarily engaged in agriculture, forestry, fishing and hunting;
- employees in private households employing staff;
- employees of overseas embassies, consulates, etc.;
- employees based outside Australia; and
- employees on workers' compensation who are not paid through the payroll.

4. Also excluded are the following persons who are not regarded as employees for the purposes of this survey:

- directors who are not paid a salary;
- proprietors/partners of unincorporated businesses; and
- self-employed persons such as subcontractors, owner/drivers, consultants and persons paid solely by commission without a retainer.

Survey design

5. A sample of approximately 5,000 employers is selected from the ABS register of businesses to ensure adequate State and industry representation. The sample is updated each quarter to reflect changes in the ABS register of business units. These changes arise from the emergence of new businesses, takeovers and mergers, changes to industry classification, changes in the number of employees, and businesses which have ceased operations. Such updating of the register can contribute to changes in the estimates of average weekly earnings.

6. The statistical unit for the survey comprises all activities of an enterprise in a particular State or Territory. Each statistical unit is classified to an industry which reflects the predominant activity of the enterprise in the State or Territory. In a small number of cases where an enterprise has significant employment in more than one industry, a separate statistical unit is created for each industry. The statistical units are stratified by State, public/private sector, industry and size of employment and an equal probability sample is selected from each stratum.

7. Since February 1992 survey data for a number of Commonwealth Government and ACT Government departments have been collected electronically.

Reliability of estimates

8. Estimates are subject to sampling and non-sampling errors. For more information refer to Appendix A - Technical Note.

Notes on the estimates

9. Average weekly earnings statistics represent average gross (before tax) earnings of employees and do not relate to average award rates nor to the earnings of the 'average person'. Estimates of average weekly earnings are derived by dividing estimates of weekly total earnings by estimates of employment. Changes in the averages may be affected not only by changes in the level of earnings of employees but also by changes in the overall composition of the employed wage and salary earner segment of the labour force. There are several aspects which can contribute to compositional changes such as variations in the proportions of part-time, casual and junior employees, variations in the occupational distribution within and across industries, variations in the distribution of employment between industries and variations in the proportion of male and female employees. Such effects may apply differently in the different States, and over time.

Comparability of results

10. When comparisons are made between period to period movements in average weekly ordinary time earnings (AWOTE) for full-time adults and movements in the Award Rates of Pay Indexes (ARPI) it is important to recognise the different coverage, scope, definitions and methodology used in the construction of each series. In particular, the AWOTE series includes a number of payments additional to award rates of pay used in compiling ARPI. Allowances covered under awards which are not industry or occupation wide in their application such as site, travelling, height and dirt allowances are excluded from ARPI but included in AWOTE. The AWOTE series also includes other payments, such as shift penalty payments and overaward pay. A significant number of employees are not covered by awards but are included in AWOTE. The AWOTE series is affected by compositional change in the labour force. However ARPI is not, because it is a fixed-weight index constructed from a representative 'basket' of occupations selected from the May 1985 Survey of Employee Earnings and Hours and subject to reselection and rebasing at infrequent intervals. Other factors affecting comparisons of the two series include seasonal influences on earnings and differences between the two series in the treatment of retrospective pay increases. A detailed description of the methodology, scope and definitions used in ARPI is published in *Award Rates of Pay Indexes, Australia* (6312.0).

11. It is also important to recognise that whilst average employee earnings can be derived from the Survey of Employment and Earnings (SEE) published in *Employed Wage and Salary Earners, Australia* (6248.0), these average earnings will not be comparable with those

produced from the Survey of Average Weekly Earnings (AWE). In the AWE survey, information is obtained relating to a specified pay period, the last pay period ending on or before the third Friday of the middle month of the calendar quarter. The SEE collects the sum of employee earnings paid in *all* pay periods ending in a calendar quarter including payments to employees which are excluded from the scope of the AWE survey such as retrospective pay, pay in advance, leave loadings and severance, termination and redundancy payments. Whilst the quarterly earnings produced by the SEE are affected by the varying number of pay periods from quarter to quarter the AWE results are unaffected because of the selection of a specified pay period in the middle of a quarter. The SEE earnings data are also more subject to seasonal variations, particularly in the December and March quarters, due to the incidence of holidays taken in January being paid in advance and the earnings being reported in December quarter figures.

Historical series

12. The series was introduced in August 1981 when it replaced the average weekly earnings series based principally on information from payroll tax returns. Revised estimates of average weekly earnings for the period August 1981 to November 1983 were included in *Average Weekly Earnings, States and Australia, March Quarter 1984* (6302.0) published on 12 July 1984. Users who need a measure of the movement in earnings for a period which spans both the payroll tax based and employer survey series should refer to Table 3 in that publication which presents both series linked to a common index base (August 1981 = 100).

Trend Estimates

13. The ABS considers that trend estimates provide a more reliable guide to the underlying direction of the data, and are more suitable than either the seasonally adjusted or original data for most business decisions and policy advice.

14. The ABS has not published seasonal adjusted AWE series in the past. The AWE series have now been examined to determine the influence of seasonal factors but it has been found that they exhibit very little seasonality. Consequently, seasonally adjusted AWE series have not been published but have been calculated as part of the process for determining trend estimates. The seasonally adjusted series are available on request to the ABS.

15. The trend estimates in this publication, obtained by dampening out the irregular component from the seasonally adjusted series, are calculated using a centred 7-term Henderson moving average of the seasonally adjusted series. Estimates for the three most recent quarters cannot be calculated using this centred average method; instead an asymmetric average is used. This can lead to revisions in the trend estimates for the last three quarters when data become available for later quarters. Revisions of trend estimates will also occur with revisions to the original data and re-estimation of seasonal adjustment factors. The seasonal factors will be revised annually.

16. Seasonal adjustment is a means of removing the estimated effect of normal seasonal variation from the series

so that the effects of other influences can be more clearly recognised. Seasonal adjustment does not remove the irregular or non-seasonal influences which may be present in any particular period. Volatile or unsystematic influences may still effect the interpretation of movement in the series, even after adjustment for seasonal variation.

17. If a series is highly volatile then the trend estimates will be subject to greater revision for the latest few quarters as data become available. However, it is important to note that this does not make the trend series inferior to the seasonally adjusted or original series. In some cases the effect of the irregular component on overall movements will remain in the seasonally adjusted and the original estimates but not in the trend series.

18. For more information about ABS procedures for deriving trend estimates and analysis of advantages of using them over alternative techniques for monitoring trends, refer to the ABS Information Papers:

- *A guide to Interpreting Time Series - Monitoring 'Trends': an Overview* (1348.0)
- *A Guide for Smoothing Series - Estimates of 'Trend'* (1316.0), and
- *Time Series Decomposition - An Overview* (1317.0)

Two feature articles which have appeared in the ABS monthly publication *Australian Economic Indicators* may also be of interest:

- *Picking Turning Points in the Economy* (April 1991), and
- *Smarter Data Use* (March 1992).

Related publications

19. Users may also wish to refer to the following publications which are available on request:

Average Weekly Earnings, States and Australia (6302.0)—issued quarterly

Average Weekly Earnings of Employees, Australia (6304.0)—issued annually

Distribution and Composition of Employee Earnings and Hours, Australia (6306.0)—issued annually

Job Vacancies and Overtime, Australia (6354.0)—issued quarterly

Employed Wage and Salary Earners, Australia (6248.0)—issued quarterly

Information Paper: New Statistical Series: Employment, Average Weekly Earnings, Job Vacancies and Overtime (6256.0)—issued June 1984

Average Weekly Earnings, Australia 1941-1990 (6350.0)—issued February 1992

Occasional Paper No. 1986/1: *Statistics on Wages, Earnings, Income and Labour Costs—A Guide to Their Concepts, Measurement and Usage*

Award Rates of Pay Indexes, Australia (6312.0)—issued monthly

The Labour Force, Australia (6203.0)—issued monthly
Labour Force Projections, Australia 1992-2005 (6260.0)

Weekly Earnings of Employees (Distribution) Australia (6310.0)—issued annually

20. Current publications produced by the ABS are listed in the *Catalogue of Publications and Products, Australia* (1101.0). The ABS also issues, on Tuesdays and Fridays, a *Publications Advice* (1105.0) which lists publications to be released in the next few days. The Catalogue and Publications Advice are available from any ABS office.

Unpublished statistics

21. In some cases, the ABS can also make available information which is not published. This information may be made available in one or more of the following forms: microfiche, photocopy, data tape, floppy disk, computer printout or clerically extracted tabulation. Generally, a charge is made for providing unpublished information. Inquiries should be made to the contact officer or Information Services in the nearest ABS office.

22. The estimates of average weekly earnings are rounded to the nearest 10 cents.

23. Percentage changes are calculated on the actual values and may differ from calculations based on rounded estimates.

Forthcoming Issues

24. The following table shows the dates on which catalogue numbers 6301.0 and 6302.0 are expected to be released.

ISSUE		EXPECTED RELEASE DATE
1993	November 6301.0 (Australia, Preliminary)	10 February 1994
1993	November 6302.0 (States and Australia)	3 March 1994
1994	February 6301.0 (Australia, Preliminary)	28 April 1994
1994	February 6302.0 (States and Australia)	19 May 1994

APPENDIX A - TECHNICAL NOTES

Reliability of estimates

As the estimates in this publication are based on information relating to a sample of employers rather than a full enumeration, they are subject to sampling variability. That is, they may differ from the estimates that would have been produced if the information had been obtained from all employers. This difference, called *sampling error*, should not be confused with inaccuracy that may occur because of imperfections in reporting by respondents or in processing by the ABS. Such inaccuracy is referred to as *non-sampling error* and may occur in any enumeration whether it be a full count or sample. Efforts have been made to reduce non-sampling error by careful design of questionnaires, detailed checking of returns and quality control of processing.

2. The sampling error associated with any estimate can be estimated from the sample results. One measure of sampling error is given by the *standard error* which indicates the degree to which an estimate may vary from the value that would have been obtained from a full enumeration (the 'true' figure). There are about two chances in three that a sample estimate differs from the true value by less than one standard error, and about nineteen chances in twenty that the difference will be less than two standard errors.

3. An example of the use of a standard error is as follows. If the estimated average earnings was \$500.00 with a standard error of \$4.00, then there would be about two chances in three that a full enumeration would have given an estimate in the range \$496.00 to \$504.00 and about nineteen chances in twenty that it would be in the range \$492.00 to \$508.00.

4. An example of the use of a standard error for a quarterly change estimate is as follows. If the estimated standard error for a quarterly change estimate of average weekly earnings was \$1.00 and the quarterly change estimate between two quarters was \$1.50, then there would be about two chances in three that a full enumeration would have given a quarterly change estimate in the range +\$0.50 to +\$2.50 and about nineteen chances in twenty that it would be in the range -\$0.50 to +\$3.50.

5. Quarterly movements in estimates of average weekly earnings are considered to be statistically significant where they exceed two standard errors.

6. Standard errors of estimates of level by industry are shown in Table A for total all sectors for Australia. These standard errors relate to the average weekly earnings estimates in Table 4 on page 7.

APPENDIX B: GLOSSARY

Weekly ordinary time earnings refers to one week's earnings of employees for the reference period attributable to award, standard or agreed hours of work. It is calculated before taxation and any other deductions (e.g. superannuation, board and lodging) have been made. Included in ordinary time earnings are award payments, base rates of pay, overaward payments, penalty payments, shift and other allowances; commissions and retainers; bonuses and similar payments related to the reference period; payments under incentive or piecework; payments under profit-sharing schemes normally paid each pay period; payments for leave taken during the reference period; all workers' compensation payments made through the payroll; and salary payments made to directors. Excluded are overtime payments, retrospective pay, pay in advance, leave loadings, severance, termination and redundancy payments and other payments not related to the reference period.

2. *Weekly total earnings* of employees is equal to weekly ordinary time earnings plus weekly overtime earnings.

3. *Average weekly earnings* statistics represent average gross (before tax) earnings of employees and do not relate to average award rates nor to the earnings of the 'average person'. Estimates of average weekly earnings are derived by dividing estimates of weekly total earnings by estimates of employment. Changes in the averages may be affected not only by changes in the level of earnings of employees but also by changes in the overall composition of the employed wage and salary earner segment of the labour force. There are several aspects which can contribute to compositional changes such as variations in the

proportions of part-time, casual and junior employees, variations in the occupational distribution within and across industries, variations in the distribution of employment between industries and variations in the proportions of males and females.

4. *Employees* refers to all wage and salary earners (as defined in paragraph 3 of the Explanatory Notes) who received pay for any part of the reference period.

5. *Full-time employees* are permanent, temporary and casual employees who normally work the agreed or award hours for a full-time employee in their occupation and received pay for any part of the reference period; if agreed or award hours do not apply, employees are regarded as full-time if they ordinarily work 35 hours or more per week.

6. *Adult employees* are those employees 21 years of age or over and those employees who, although under 21 years of age, are paid at the full adult rate for their occupation.

7. *Reference period* for the survey refers to the last pay period ending on or before the third Friday of the middle month of the quarter. The reference date for the current survey is 20 August 1993.

8. *Sector*. Public sector includes all local government authorities and government departments, agencies and authorities created by, or reporting to the Commonwealth and State Parliaments. All remaining employees are classified as private sector.

For more information ...

The ABS publishes a wide range of statistics and other information on Australia's economic and social conditions. Details of what is available in various publications and other products can be found in the *ABS Catalogue of Publications and Products* available at all ABS Offices (see below for contact details).

Information Consultancy Service

Information tailored to special needs of clients can be obtained from the Information Consultancy Service available at ABS Offices (see Information Inquiries below for contact details).

National Dial-a-Statistic Line

0055 86 400

(Steadycom P/L: premium rate 25c/21.4 secs.)

This number gives you 24 hour access, 365 days a year for a range of statistics.

Electronic Data Services

A wide range of ABS data are available on electronic media. Selections of most frequently requested statistics are available, updated daily, on DISCOVERY (Key *656#). The ABS PC TELESTATS service delivers major economic indicator main features ready to download into personal computers on the day of release. The PC AUSSTATS service enables on-line access to a data base of thousands of up-to-date time series. Selected datasets are also available on diskette or CD-ROM. For more details on electronic data services available, contact Information Services in any of the ABS Offices (see Information Inquiries below for contact details).

Bookshops and Subscriptions

There are over 500 titles of various publications available from ABS bookshops in all ABS Offices (see below Bookshop Sales for contact details). The ABS also provides a subscription service through which nominated publications are provided by mail on a regular basis at no additional cost (telephone Publications Subscription Service toll free on 008 02 0608 Australia wide).
