JULY KEY POINTS

TREND ESTIMATES

- The growth rate of the trend estimate of turnover for the Australian Retail and Hospitality series recorded growth of 0.4% in both June and July 1997. In May the growth was 0.3%.
- Over the three months to July 1997 the trend estimate increased by \$129.9m. The major contributors to this growth were Other retailing (\$37.3m), Food retailing (\$33.3m) and Hospitality and services (\$30.6m).

TAKE CARE!
Trend estimates are revised as new monthly data become available.

SEASONALLY ADJUSTED

- The seasonally adjusted series increased by 2.6% in July 1997. This followed a fall of 0.3% in June and an increase of 1.2% in May.
- Department stores accounted for 1.6 percentage points of the seasonally adjusted increase in July.

ORIGINAL ESTIMATES

- In original terms Australian retail turnover increased by 4.9% in July 1997 over July 1996. Chains and other large retailers increased turnover by 8.1% in the same period while the increase for small retailers was 1.5%.

CONSTANT PRICE ESTIMATES

- In seasonally adjusted, constant price terms, the estimate of turnover for the June quarter 1997 fell by 0.3% over the March quarter 1997.

INQUIRIES

- For further information about these and related statistics, contact Bill Powell on 02 6252 6132. For information about constant price estimates contact Leon Ting on 02 6252 6807.

NOTES

FORTHCOMING ISSUES

ISSUE	RELEASE DATE
August 1997	30 September 1997
September 1997	3 November 1997
October 1997	2 December 1997

.....

CHANGES IN THIS ISSUE

The data contained in this publication have been adjusted. See paragraphs 16 to 22 of the Explanatory Notes. The introduction of this adjusted series coincided with the normal annual seasonal reanalysis and has resulted in more up-to-date seasonally adjusted and trend series. Tables 14 and 15 have been included in this issue to show the impact of the adjustments (including seasonal reanalysis) on the constant price series.

.....

SAMPLING ERRORS

Standard errors for the Australian estimates (original data) for July 1997 contained in this publication are:

DATA SERIES	ESTIMATE	STANDARD ERROR
Level of retail turnover (\$m)	10 892.3	99.8
Change from June to July (\$m)	672.0	51.3
% change from June to July	6.6	0.5

For more information see the Explanatory notes, paragraphs 12-15, or contact Bill Powell on 02 6252 6132.

.....

WHAT IF?

The most recent trend estimates published in this release are likely to be revised when next month's seasonally adjusted estimates become available. To assist readers of this publication in analysing retail trends, the effect of two possible scenarios on the previous trend estimates of the percentage change in retail turnover are presented below.

- 1 The August seasonally adjusted estimate of retail turnover is 1.0% higher than the July estimate.
- 2 The August seasonally adjusted estimate of retail turnover is 1.0% lower than the July estimate.

TAKE CARE!
Trend estimates are subject to revision as subsequent data become available. See Explanatory note 9.

W. McLennan
Australian Statistician

STATE TRENDS

MONTHLY PERCENTAGE CHANGE IN TREND ESTIMATES

NEW SOUTH WALES

Growth has accelerated in the trend estimate over the last six months. Department stores, Food, Household good and the Other retailing groups contributed mostly to this growth.

VICTORIA

Over the last five months growth has been weak at around 0.1% per month. Household good, Recreational good and Hospitality and services are all in decline.

QUEENSLAND

The growth rate has eased slightly since March 1997. The Clothing and Other retailing groups have been the largest contributors to recent growth.

SOUTH AUSTRALIA

The trend estimate has grown steadily over recent months. The Clothing and Household good groups have recorded the strongest growth.

WESTERN AUSTRALIA

The trend estimate has been in decline for the last four months following a short period of strong growth. The Food, Clothing and Household good retailing groups are in decline.

TASMANIA

Growth in the trend estimate has remained around 0.5% over the last four months. Strong growth in the Recreational good retailing group has contributed to this result.

INDUSTRY TRENDS

MONTHLY PERCENTAGE CHANGE IN TREND ESTIMATES

FOOD RETAILING

The trend estimate has gradually eased over the last six months. Growth is moderate to weak in most States. Queensland has shown no growth over that period while Western Australia and the Northern Territory were in decline.

DEPARTMENT STORES

As a result of a strong 17.6% increase in the July seasonally adjusted series, the trend estimate has rebounded to show growth for the last two months. This reflects some shift in mid year sales from June to July this year.

CLOTHING AND SOFT GOOD RETAILING

There has been virtually no growth over the last four months. Growth has been strong in Queensland, South Australia and the Australian Capital Territory. Offsetting this, growth in the remaining States has been weak or in decline.

HOUSEHOLD GOOD RETAILING

The Household good group has recorded weak growth for the last two months following a period of decline. Victoria, Queensland and Western Australia were all in decline. Recent strengthening in New South Wales has contributed to the slight improvement.

MONTHLY PERCENTAGE CHANGE IN TREND ESTIMATES

**RECREATIONAL GOOD
RETAILING**

Monthly growth in the trend estimate has been around 0.6% for the last three months. Strong growth was recorded in Western Australia, Tasmania and the two Territories. New South Wales recorded no growth while Victoria was in decline.

OTHER RETAILING

The Other retailing group has recorded growth of 1.0% or more in each of the last eight months. Most States have contributed to this strong growth.

**TOTAL RETAIL (excluding
Hospitality and Services)**

In recent months the trend estimate for Total retail (excluding the Hospitality and services group) was similar to that observed for Total industries (including the Hospitality and services group).

**HOSPITALITY AND
SERVICES**

Growth has been steady at between 0.5% and 0.6% over the last seven months. Growth has been strongest in Western Australia and the two Territories. In Queensland the growth rate has eased while Victoria was in decline.

EXPLANATORY NOTES

INTRODUCTION

1 This publication presents monthly estimates of the value of turnover of retail businesses classified by industry, and by State. The principal objective of the Retail Trade survey is to show month to month movement of retail turnover.

2 Estimates of turnover contained in this publication are based on a survey of about 7,000 retail and selected service businesses (covering 20,000 outlets). All 'large' businesses are included in the survey, while a sample of about 4,400 'smaller' businesses is selected. The 'large' business' contribution of approximately 54% of the total estimate ensures a highly reliable Australian total turnover estimate.

SCOPE AND COVERAGE

3 The Retail Trade survey covers all employing businesses, with at least one retail establishment. The scope of the survey (classified according to the Australian and New Zealand Standard Industrial Classification [ANZSIC]) is detailed below:

- Food Retailing
 - Supermarkets and grocery stores (5110)
and non-petrol sales of identified convenience stores of petrol stations
 - Takeaway food retailing (5125)
 - Other food retailing
 - Fresh meat, fish and poultry retailing (5121)
 - Fruit and vegetable retailing (5122)
 - Liquor retailing (5123)
 - Bread and cake retailing (5124)
 - Specialised food retailing n.e.c. (5129)
- Department Stores (5210)
- Clothing and Soft Good Retailing
 - Clothing retailing (5221)
 - Other clothing related retailing
 - Footwear retailing (5222)
 - Fabric and other soft good retailing (5223)
- Household Good Retailing
 - Furniture and floorcovering retailing
 - Furniture retailing (5231)
 - Floor covering retailing (5232)
 - Domestic hardware and houseware retailing (5233)
 - Domestic appliance retailing
 - Domestic appliance retailing (5234)
 - Recorded music retailing (5235)
- Recreational Good Retailing
 - Newspaper, book and stationery retailing (5243)
 - Other recreational good retailing
 - Sport and camping equipment retailing (5241)
 - Toy and game retailing (5242)
 - Photographic equipment retailing (5244)
- Other Retailing
 - Pharmaceutical, cosmetic and toiletry retailing (5251)
 - Other retailing
 - Antique and used good retailing (5252)
 - Garden supplies retailing (5253)
 - Flower retailing (5254)
 - Watch and jewellery retailing (5255)
 - Retailing n.e.c. (5259)

EXPLANATORY NOTES

.....

SCOPE AND COVERAGE *continued*

- Hospitality and Services
 - Hotels and licensed clubs
 - Pubs, taverns and bars (5720)
 - Clubs (Hospitality) (5740)
 - Cafes and restaurants (5730)
- Selected services
 - Video hire outlets (9511)
 - Hairdressing and beauty salons (9526).

DEFINITION OF TURNOVER

4 Turnover includes retail sales; wholesale sales; takings from repairs, meals and hiring of goods (except for rent, leasing and hiring of land and buildings); and commissions from agency activity (e.g. commissions received from collecting dry cleaning, selling lottery tickets, etc.) and net takings from gaming machines etc.

SEASONAL ADJUSTMENT

5 Seasonal adjustment is a means of removing the estimated effects of normal seasonal variation from the series so that the effects of other influences can be more clearly recognised.

6 In the seasonal adjustment of the turnover estimates, account has been taken of both normal seasonal factors and 'trading-day' effects (arising from the varying length of each month and the varying numbers of Sundays, Mondays, Tuesdays, etc. in the month). There is some evidence suggesting possible changes in retail trading patterns, including increased activity on weekends and public holidays. The impact of these changes on the seasonal pattern and trading day component of the data is being investigated and can only be confirmed once sufficient data becomes available. While these changes may impact on the unadjusted and seasonally adjusted data, the trend estimate is less likely to be affected. Further, the seasonal adjustment does not remove from the series the effect of irregular influences (e.g. abnormal weather, industrial disputes). The seasonally adjusted estimates still reflect the sampling and non-sampling errors to which the original estimates are subject.

7 The State component series have been seasonally adjusted independently. Therefore, the adjusted components may not add to the Australian Group totals.

8 As happens with all seasonally adjusted series, the seasonal factors are reviewed annually to take account of each additional year's data. For Retail Trade, the results of the latest review are shown in this issue.

TREND ESTIMATES

9 Most monthly trend estimates in this publication have been obtained by smoothing the seasonally adjusted series using a centred 13-term Henderson weighted moving average (7-term for quarterly series). However, to estimate the last six monthly trend values (or the last three quarters) a set of asymmetric moving averages have been designed to reduce a small bias associated with estimating these recent values when the trend growth is increasing or decreasing. Overall, revision to the estimates should be reduced, however, there may be a greater revision to the estimates whenever there are large irregular movements in the seasonally adjusted series.

10 For further information, see *A Guide to Interpreting Time Series — Monitoring 'Trends': an Overview* (1348.0) or contact the Assistant Director, Time Series Analysis on (02) 6252 6345.

CONSTANT PRICE STATISTICS

11 To enable analysis of the movement of retail activity in 'real' terms, estimates of retail turnover at constant (average 1989-90) prices are compiled and published each quarter. Constant price retail turnover series are derived by deflating the original current price series of retail turnover by specially compiled indexes of price change.

EXPLANATORY NOTES

RELIABILITY OF ESTIMATES

12 There are two types of error possible in estimates of retail turnover:

Sampling error which occurs because a sample, rather than the entire population, is surveyed. One measure of the likely difference resulting from not including all establishments in the survey is given by the standard error, see below.

Non sampling error which arises from inaccuracies in collecting, recording and processing the data. The most significant of these errors are: misreporting of data items; deficiencies in coverage; non-response; and processing errors. Every effort is made to minimise reporting error by the careful design of questionnaires, intensive training and supervision of interviewers, and efficient data processing procedures.

STANDARD ERRORS

13 Seasonally adjusted, trend and constant price estimates are also subject to sampling variability. For seasonally adjusted estimates, the standard errors are approximately the same as for the original estimates. For trend estimates, the standard errors are likely to be smaller. For constant price estimates, the standard errors may be up to 10% higher than those for the corresponding current price estimates because of the sampling variability contained in the prices data used to deflate the current price estimates.

14 To assist users in assessing the reliability of estimates, each data series has been given a grading of A to D. Where:

- A represents a relative standard error on level of less than 2%. The published estimates are highly reliable for movement analysis;
- B represents a relative standard error on level between 2 and 5%, meaning the estimate is reliable for movement analysis purposes;
- C represents a relative standard error on level between 5 and 10%, meaning users are advised to exercise some caution in interpreting movements for such series; and
- D represents a relative standard error on level greater than 10% (mainly affects unpublished state by industry series).

15 The table below provides an indicator of reliability for key retail turnover estimates.

	Food retailing	Department stores	Clothing and soft good retailing	Household good retailing	Recreational good retailing	Other retailing	Hospitality and services	Total
NSW	B	A	B	C	C	C	C	A
Vic	B	A	B	C	C	C	C	A

Australia	A	A	A	B	B	B	B	A

EXPLANATORY NOTES

IMPROVEMENTS TO COVERAGE

16 The Retail Trade survey, like most ABS economic surveys, takes its frame (i.e. the retail business population) from the ABS Business Register. The frame is updated quarterly to take account of new businesses, cessations and other general business changes. The Business Register primarily sources its information about new businesses from those businesses applying for group employer (GE) registration with the Australian Taxation Office (ATO).

17 Over the past few years, the ABS has been working on improving the coverage of the Business Register. Investigations have revealed that a significant number of businesses were not recorded on the Business Register but should have been. These were mainly small businesses. Procedures have been developed to account for the impact of the missing or omitted businesses over the period affected and these have been incorporated into survey estimates as from the July 1997 publication release.

18 In addition, the ABS Business Register should ideally record all businesses as soon as they commence operations. However, the ability to achieve this coverage is limited by the time it takes to obtain and process information from the ATO and other sources. The ABS will in future be adjusting for this time lag associated with the time it takes for newly registered businesses to get on to survey frames. Hence, from the July 1997 reference month publication, in addition to the missing businesses referred to above, each monthly survey estimate will contain a 'new business provision' to account for the delay in loading new businesses to the survey frame.

IMPACT ON THE ESTIMATES

19 The omission of these small businesses and the delays in loading new businesses have had an impact on survey level estimates but have had very little effect on overall month to month trend estimate movements which have remained essentially the same as previously published. The levels of reported Retail turnover have been understated by small amounts which reached a peak of just over 5% of total Australian turnover in mid 1995. The adjustments have been applied back to 1982.

20 The charts below illustrate the impact on the month to month movement in the trend series (Chart 1) and the absolute trend level estimates (Chart 2). The series shown represent the current adjusted series (from July 1997) and the previous series (to June 1997) for the period April 1994 (commencement of the current survey design) to March 1997 (when the analysis was undertaken). The two series utilise the same seasonal factors to isolate the effect of the adjustments.

BACKCASTING OF SERIES

21 The series have been backcast to the introduction of the State and Industry series in 1982. The backcast series prior to periods shown in the publication are available. Standard charges apply.

FURTHER INFORMATION

22 For more information on these adjustments, please refer to the *ABS Information Paper—Improvements to ABS Economic Statistics 1997* (1357.0) which was released on 22 August 1997.

UNPUBLISHED DATA

23 The Retail Survey Special Data Service provides additional retail trade statistics which include further State industry dissections through to 'top ten' industry reports. For more information, contact the Retail Trade Special Data Services manager on (02) 6252 5220.

RELATED PUBLICATIONS

24 Current publications produced by the ABS are listed in the *Catalogue of Publications and Products, Australia* (1101.0). The ABS also issues, on Tuesdays and Fridays, a *Release Advice* (1105.0) which lists publications to be released in the next few days. The Catalogue and Release Advice are available from any ABS office.

SYMBOLS AND OTHER USAGES

FOR MORE INFORMATION...

The ABS publishes a wide range of information on Australia's economic and social conditions. A catalogue of publications and products is available from any of our offices (see below).

INFORMATION CONSULTANCY SERVICES

Information tailored to special needs of clients can be obtained from the Information Consultancy Service available at ABS Offices (see below).

ABS PRODUCTS

A large number of ABS products is available from the ABS Bookshops (see below). The ABS also provides a subscription service – you can telephone the ABS Subscription Service Australia wide toll free on 1800 0206 08.

ELECTRONIC SERVICES

A large range of data is available via on-line services, diskette, magnetic tape, tape cartridge and CD ROM. For more details about our electronic data services, contact any ABS office (see below) or e-mail us at:
