

19 APRIL 1996

**Building Activity
Australia
December Quarter 1995**

Product No. 8752.0.40.001

NOTES

SPECIAL ISSUE

It was previously advised that the June quarter 1995 issue of this Standard Data Service was to be the final issue. Data from the Building Activity Survey was to be included in a new publication titled *Building and Construction Activity, Australia* (8754.0).

However, due to delays in finalising the design and content of this proposed new publication, it has been necessary to release a further issue of this Standard Data Service to make available data in respect of the December quarter 1995.

INQUIRIES

For further information about statistics in this publication and the availability of related unpublished statistics, please contact Information Services on Canberra (06) 252 6627 or 252 6007 or any ABS State office.

Dennis Trewin
Acting Australian Statistician

SUMMARY OF FINDINGS

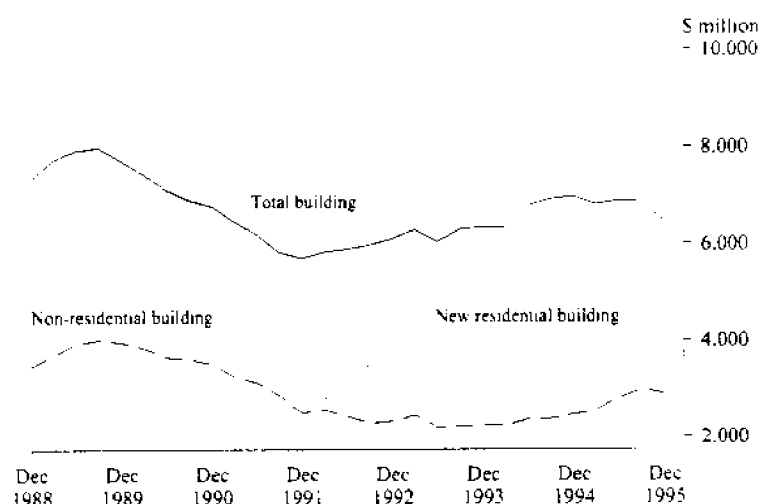

VALUE OF BUILDING
ACTIVITY — AVERAGE
1989–90 PRICES,
SEASONALLY ADJUSTED
ESTIMATES

Changes in the seasonally adjusted value of building activity, at average 1989–90 prices, in the December quarter 1995 compared with the previous quarter and a year previously are summarised below.

	<i>Building work done</i>		<i>Building work commenced</i>	
	<i>change Sept qtr 95 to Dec qtr 95</i>	<i>change Dec qtr 94 Dec qtr 95</i>	<i>change Sept qtr 95 to Dec qtr 95</i>	<i>change Dec qtr 94 Dec qtr 95</i>
	%	%	%	%
New residential building	- 10.2	- 23.1	- 10.5	- 31.9
Alterations and additions to residential buildings	- 3.2	- 8.2	- 7.9	- 19.3
Non-residential building	- 2.3	17.1	- 15.0	5.6
Total building	- 6.1	- 7.5	- 11.0	- 18.4

Building work done The value of total building work done fell 6.1% in the December quarter 1995, following a decrease of 0.4% in the September quarter and a rise of 1.3% in the June quarter 1995. Total building work done in the December quarter 1995 was 7.5% lower than for the same period 12 months prior. Falls were recorded in all three major categories (new residential building, alterations and additions to residential building and non-residential building) in the December quarter 1995.

BUILDING WORK DONE AT AVERAGE 1989–90 PRICES (Seasonally adjusted)

Building work commenced The value of total building work commenced fell 11.0% in the December quarter 1995, following a decreases of 0.3% and 8.9% in the September and June quarters 1995. Total building work commenced in the December quarter 1995 was 18.4% lower than for the same period 12 months prior. As for building work done, commencements fell in all three major categories in the December quarter 1995.

BUILDING WORK COMMENCED AT AVERAGE 1989-90 PRICES (Seasonally adjusted)

NEW DWELLING UNITS COMMENCED AND COMPLETED

Seasonally adjusted estimates The number of new dwelling units commenced and completed in the December quarter 1995, in seasonally adjusted terms, and percentage changes from the September quarter 1995 and December quarter 1994 are summarised in the table below:

	Dec qtr 95	change Sept qtr 95 to Dec qtr 95	change Dec qtr 94 to Dec qtr 95
	number	%	%
New dwelling units commenced			
Private sector houses	20 710	- 6.9	- 30.2
Total dwelling units	29 262	- 8.3	- 34.2
New dwelling units completed			
Private sector houses	22 346	- 14.4	- 28.0
Total dwelling units	33 508	- 10.5	- 22.9

Original estimates There were 30,089 new dwelling units commenced in the December quarter 1995, a decrease of 10.8% from the September quarter 1995 estimate of 33,742.

Total new private sector dwelling commencements fell by 8.5% in the December quarter 1995 to 28,797. New private sector house commencements were down 5.5% and new private sector other residential dwelling commencements were down 17.1% from the September quarter 1995.

Total new public sector dwelling commencements fell by 42.5% in the December quarter 1995 to 1,292. New public sector house commencements were down 27.5%, while new public sector other residential dwelling commencements fell by 48.9% in the December quarter 1995.

In addition to new dwelling commencements, there were 470 dwellings commenced in the December quarter 1995 as part of alterations and additions to existing buildings (including conversions to dwelling units) and as part of the construction of non-residential buildings. This compares with 483 such dwellings in the September quarter 1995 and 1,509 in the December quarter 1994.

DWELLING UNITS COMMENCED AND COMPLETED (Seasonally adjusted)

EXPLANATORY NOTES

INTRODUCTION

- 1** This publication contains **detailed** results from the quarterly Building Activity Survey.
- 2** The statistics were compiled on the basis of returns collected from builders and other individuals and organisations engaged in building activity. The quarterly survey consists of two components:
 - A sample survey of private sector jobs involving new house construction or alterations and additions valued at \$10,000 or more to houses;
 - A complete enumeration of jobs involving construction of new residential buildings other than private sector houses, all alterations and additions to residential buildings (other than private sector houses) with an approval value of \$10,000 or more, and all non-residential building jobs with an approval value of \$50,000 or more.
- 3** From the September quarter 1990, only non-residential building jobs (both new and alterations and additions) with an approval value of \$50,000 (previously \$30,000) or more are included in the survey.
- 4** The use of sample survey techniques in the Building Activity Survey means that reliable estimates of private sector house building activity, including alterations and additions to houses are generally only available at the State/Territory and Australia levels. However, dwelling unit commencement data for regions below State/Territory level are shown in the monthly series of dwelling unit commencements compiled by the ABS. Data from this series, unlike that compiled from the Building Activity Survey, are based on information reported by local and other government authorities.

SCOPE AND COVERAGE

- 5** The statistics relate to *building* activity which includes construction of new buildings and alterations and additions to existing buildings. Construction activity not defined as building (e.g. construction of roads, bridges, railways, earthworks, etc.) is excluded.
- 6** Building jobs included in each quarter in the Building Activity Survey comprise those jobs selected in previous quarters which have not been completed (or commenced) by the end of the previous quarter and those jobs newly selected in the current quarter. The population list from which jobs are selected for inclusion comprises all approved building jobs which were notified to the ABS (refer paragraph 2) up to but not including the last month of the reference quarter (i.e. up to the end of August in respect of the September quarter survey). This introduces a lag to the statistics in respect of those jobs notified *and* commenced in the last month of the reference quarter (i.e. for the month of September in respect of the September quarter survey). For example, jobs which were notified as approved in the month of June and which actually commenced in that month are shown as

commencements in the September quarter. Similarly, building jobs which were notified in the month of September and which actually commenced in that month are shown as commencements in the December quarter.

DEFINITIONS

7 A *building* is defined as a rigid, fixed and permanent structure which has a roof. Its intended purpose is primarily to house people, plant, machinery, vehicles, goods or livestock. An integral feature of a building's design, to satisfy its intended use, is the provision for regular access by persons.

8 A *dwelling unit* is defined as a self-contained suite of rooms, including cooking and bathing facilities and intended for *long term* residential use. Units (whether self-contained or not) within buildings offering institutional care, such as hospitals, or temporary accommodation such as motels, hostels and holiday apartments, are not defined as dwelling units. The value of units of this type is included in the appropriate category of non-residential building.

9 A *residential building* is defined as a building predominantly consisting of one or more dwelling units. Residential buildings can be either *houses* or *other residential buildings*:

- A *house* is defined as a detached building predominantly used for long term residential purposes and consisting of only one dwelling unit. Thus, detached 'granny flats' and detached dwelling units (such as caretakers' residences) associated with non-residential buildings are defined as houses for the purpose of these statistics.
- An *other residential building* is defined as a building which is predominantly used for long term residential purposes and which contains (or has attached to it) more than one dwelling unit (e.g. includes townhouses, duplexes, apartment buildings, etc.).

10 The number of dwelling units created by alterations and additions to existing buildings, and through the construction of new non-residential buildings, is not included in the tables but is shown as a footnote to Table 1.

11 *Commenced*. A building is defined as commenced when the first physical building activity has been performed on site in the form of materials fixed in place and/or labour expended (this includes site preparation but excludes delivery of building materials, the drawing of plans and specifications and the construction of non-building infrastructures, such as roads).

12 *Under construction*. A building is regarded as being under construction at the end of a period if it has been commenced but has not been completed, and work on it has not been abandoned.

13 *Completed*. A building is defined as completed when building activity has progressed to the stage where the building can fulfil its

intended function. In practice, the ABS regards buildings as completed when notified as such by respondents to the survey.

VALUATION OF BUILDING JOBS

14 The value series in this publication are derived from estimates reported on survey returns as follows:

- *Value of building commenced or under construction* represents the anticipated completion value based, where practicable, on estimated market or contract price of building jobs excluding the value of land and landscaping. Site preparation costs are included. Where jobs proceed over several quarters the anticipated completion value reported on the return for the first (commencement) quarter may be amended on returns for subsequent (under construction) quarters as the job nears completion;
- *Value of building completed* represents the actual completion value based, where practicable, on the market or contract price of jobs including site preparation costs but excluding the value of land and landscaping.
- *Value of building work done during the period* represents the estimated value of building work actually carried out during the quarter on jobs which have commenced;
- *Value of building work yet to be done* represents the difference between the anticipated completion value and the estimated value of work done on jobs up to the end of the period.

BUILDING CLASSIFICATION

15 *Ownership.* The ownership of a building is classified as either *public sector* or *private sector* according to the sector of the intended owner of the completed building as evident at the time of approval. Residential buildings being constructed by private sector builders under government housing authority schemes whereby the authority has contracted, or intends to contract, to purchase the buildings on or before completion, are classified as public sector.

16 *Builder type.* Houses are classified according to the type of builder as follows:

- *Contractor-built houses.* Those constructed by a private recognised building contractor, either under contract, or in anticipation of sale or rental;
- *Houses built by other than contract builders.* Those constructed by an owner (other than a recognised building contractor) or under his direction, without the services of a single contractor responsible for the whole job. Houses built by businesses (other than recognised building contractors) and public sector organisations are also included in this category.

17 *Functional classification of buildings.* A building is classified according to its intended major function. Hence a building which is ancillary to other buildings or forms a part of a group of related buildings is classified to the function of the building and not to the

function of the group as a whole. An example of this can be seen in the treatment of building work approved for a factory complex. In this case a detached administration building would be classified to Offices, a detached cafeteria building to Shops, while factory buildings would be classified to Factories. An exception to this rule is the treatment of group accommodation buildings where, for example, a student accommodation building on a university campus would be classified to Educational.

18 Example of the types of individual buildings jobs included under each main functional heading are shown in the following lists:

- *Houses*. Includes 'cottages', 'bungalows', detached caretakers'/managers' cottages, rectories;
- *Other residential buildings*. Includes blocks of flats, home units, attached townhouses, villa units, terrace houses, semi-detached houses, maisonnettes;
- *Hotels, etc.* Includes motels, hostels, boarding houses, guest houses, holiday apartment buildings;
- *Shops*. Includes retail shops, restaurants, cafes, taverns, dry cleaners, laundromats, hair salons, shopping arcades;
- *Factories*. Includes paper mills, oil refinery buildings, brickworks, foundries, power-houses, manufacturing laboratories, workshops as part of a manufacturing process;
- *Offices*. Includes banks, post offices, council chambers, head and regional offices;
- *Other business premises*. Includes warehouses, storage depots, services stations, transport depots and terminals, electricity sub-station buildings, pumping station buildings, telephone exchanges, mail sorting centres, broadcasting stations, film studios;
- *Educational*. Includes schools, colleges, kindergartens, libraries, museums, art galleries, research and teaching laboratories, theological colleges;
- *Religious*. Includes churches, chapels, temples;
- *Health*. Includes hospitals, nursing homes, surgeries, clinics, medical centres;
- *Entertainment and recreational*. Includes clubs, theatres, cinemas, public halls, gymnasiums, grandstands, squash courts, sports and recreation centres;
- *Miscellaneous*. Includes law courts, homes for the aged (where medical care is not provided as a normal service), orphanages, gaols, barracks, mine buildings, glass houses, livestock sheds, shearing sheds, fruit and skin drying sheds, public toilets, and ambulance, fire and police stations.

RELIABILITY OF THE ESTIMATES

19 Since the figures for private sector house building activity (including alterations and additions) are derived from information obtained from a sample of approved building jobs they are subject to sampling error; that is, they may differ from the figures that would have been obtained if information for all approved jobs for the relevant period had been included in the survey. A measure of the likely difference is given by the relative standard error of each estimate. There are about two chances in three that a sample estimate will differ by less than one standard error from the figure that would have been obtained if all approved jobs had been included, and about nineteen chances in twenty that the difference will be less than two standard errors. Relative standard errors of the estimates are shown in Tables 23 and 24.

20 An example of the use of standard errors is as follows: If the number of new private sector houses commenced is 30,000 and the associated standard error is 1.5 per cent, there are about two chances in three that the value which would have been derived if information had been obtained about all approved private sector house jobs would have been within the range 29,550 to 30,450 and about nineteen chances in twenty that the value would have been within the range 29,100 to 30,900.

21 The imprecision due to sampling variability, which is measured by the relative standard error, should not be confused with inaccuracies that may occur because of inadequacies in the source of building approval information, imperfections in reporting by respondents, and errors made in the coding and processing of data. Inaccuracies of this kind are referred to as non-sampling error, and may occur in any enumeration whether it be a full count or only a sample. Every effort is made to reduce the non-sampling error to a minimum by the careful design of questionnaires, efforts to obtain responses for all selected jobs, and efficient operating procedures.

SEASONAL ADJUSTMENT

22 Seasonally adjusted building statistics are shown in Tables 4 and 5. In the seasonally adjusted series, account has been taken of normal seasonal factors and the effect of movement in the date of Easter which may, in successive years, affect figures for different quarters. Details regarding the methods used in seasonally adjusting the series are available on request.

23 Since seasonally adjusted statistics reflect both irregular and trend movements, an upward or downward movement in a seasonally adjusted series does not necessarily indicate a change of trend. Particular care should therefore be taken in interpreting individual quarter to quarter movements. Each of the component series shown has been seasonally adjusted independently. As a consequence, while the unadjusted components in the original series shown add to the totals, the adjusted components may not add to the adjusted totals. Further, the difference between independently seasonally adjusted series does not necessarily produce series which are optimal or even adequate adjustments of the similarly derived original series. Thus the figures which can be derived

by subtracting seasonally adjusted private sector dwelling units from the seasonally adjusted total should not be used to represent seasonally adjusted public sector dwelling units.

ESTIMATES AT CONSTANT
PRICES

24 Estimates of the value of commencements and work done at average 1989-90 prices are presented in original terms for each State and Territory, and in original and seasonally adjusted terms for Australia.

25 Constant price estimates measure changes in value after the direct effects of price changes have been eliminated. The deflators used to revalue the current price estimates in this publication are derived from the same price data underlying the deflators compiled for the dwellings and non-dwelling construction components of the national accounts aggregate 'Gross fixed capital expenditure'.

26 Estimates at constant prices are subject to a number of approximations and assumptions. Further information on the nature and concepts of constant price estimates is contained in Chapter 4 of *Australia National Accounts: Concepts, Sources and Methods* (5216.0).

27 The factors used to seasonally adjust the constant price series are identical to those used to adjust the corresponding current price series.

UNPUBLISHED DATA AND
RELATED PUBLICATIONS

28 The ABS can also make available certain building approvals and activity data which are not published. Where it is not practicable to provide the required information by telephone, data can be provided in the following forms: microfiche, photocopy, computer print-out, floppy disk and clerically extracted tabulation. A charge may be made for providing unpublished information in these forms.

29 Users may also wish to refer to the following publications and special products which are available on request:

Building Approvals, Australia (8731.0) — issued monthly

Building Activity, Australia: Dwelling Unit Commencements, Preliminary (8750.0) — issued quarterly

Engineering Construction Activity, Australia (8762.0.40.001) — issued quarterly

Construction Activity at Constant Prices, Australia (8782.0.40.001) — issued quarterly

Public Sector Construction Activity, Australia, 1988-89 (8775.0)

Construction Industry, Australia, Summary of Private Sector Operations, 1988-89 (8771.0)

Housing Finance for Owner Occupation, Australia (5609.0) — issued monthly

Price Index of Materials Used in House Building (6408.0) — issued monthly

Price Index of Materials Used in Building Other Than House Building (6407.0) — issued monthly

House Price Indexes: Eight Capital Cities (6416.0) — issued quarterly

30 Current publications produced by the ABS are listed in the *Catalogue of Publications and Products, Australia* (1101.0). The ABS also issues, on Tuesdays and Fridays, a *Release Advice* (1105.0) which lists publications to be released in the next few days. The Catalogue and Release Advice are available from any ABS office.

SYMBOLS AND OTHER
USAGES

.. not applicable
— nil or rounded to zero
r figure or series revised since previous issue
n.a. not available

31 Where figures have been rounded, discrepancies may occur between sums of the component items and totals.

For more information . . .

The ABS publishes a wide range of statistics and other information on Australia's economic and social conditions. Details of what is available in various publications and other products can be found in the ABS Catalogue of Publications and Products available from all ABS Offices.

ABS Products and Services

Many standard products are available from ABS bookshops located in each State and Territory. In addition to these products, information tailored to the needs of clients can be obtained on a wide range of media by contacting your nearest ABS Office. The ABS also provides a Subscription Service for standard products and some tailored information services.

National Dial-a-Statistic Line

0055 86 400

Steadycam P/L: premium rate 25c/21.4 secs.

This number gives 24-hour access, 365 days a year, for a range of important economic statistics including the CPI.

Internet

<http://www.statistics.gov.au>

A wide range of ABS information is available via the Internet, with basic statistics available for each State, Territory and Australia. We also have Key National Indicators, ABS product release details and other information of general interest.
