MAIN FEATURES

AGEING POPULATION

The median age of the Australian population, the age at which half the population is older and half is younger, has increased by 5.7 years in the last twenty years, from 28.9 years in June 1978 to 34.6 years in June 1998.

South Australia has the oldest population

In the 12 months to June 1998 South Australia (36.3 years) continued to have the highest median age of all States and Territories. Tasmania had the second highest median age (35.6 years) followed by New South Wales (35.0 years), Victoria (34.8 years), Queensland (33.9 years), Western Australia (33.6 years), the Australian Capital Territory (32.1 years) and the Northern Territory (28.3 years). Tasmania experienced the highest level of growth in median age over the last twenty years, increasing by 27% between 1978 (28.0 years) and 1998.

MEDIAN AGE

AGE STRUCTURE

Since June 1978 there has been very slow growth in the number of children (aged less than 15 years) in the population (5%), whereas the number of persons aged 15–64 years has increased by 35% and the number of persons aged 65 years and over has increased by 72%.

CHILDREN

In the 12 months to June 1998, the number of children (0–14 years) in Australia increased by 0.1%. In the Northern Territory this age group experienced the highest growth rate (0.8%), followed by Queensland (0.5%), Western Australia (0.4%) and Victoria (0.2%). New South Wales only increased marginally. The other States and Territories experienced a decline in the number of children, the largest being in Tasmania (–2.1%), followed by the Australian Capital Territory (–1.9%) and South Australia (–0.7%).

MAIN FEATURES

ADULTS

Nationally, the number of persons aged 15–64 years grew by 1.5% during the 12 months to June 1998. In this age group Western Australia (2.3%), Queensland (2.1%), the Northern Territory (1.9%) and South Australia (0.7%) all experienced growth rates above the national average, while New South Wales (1.4%), Victoria (1.4%) and the Australian Capital Territory (0.4%) increased by less than the national average. In Tasmania, the number of persons aged 15–64 years decreased by 0.1%.

The Baby Boomers

In the 12 months to June 1998, the number of persons in Australia aged 50–54 years increased substantially (by 6.3%) showing the second highest growth rate after the 85 year olds and above (which increased by 6.8%). The growth in 50–54 years olds can be attributed to the large number of the early Baby Boomers (those born in the late 1940s) moving from the 45–49 years age group to the 50–54 years age group.

The older ages

The number of persons aged 65 years and over in Australia increased by 1.8% in the 12 months to June 1998. The Australian Capital Territory (3.7%), the Northern Territory (3.3%), Queensland (2.3%) and Western Australia (2.2%) showed increases above the national average for this age group. Victoria (1.7%), New South Wales (1.5%), Tasmania (1.5%) and South Australia (1.4%) recorded increases below the national average.

Declining mortality and the resulting increase in life expectancy is continuing to have a major impact on the older age groups. There were 227,600 persons aged 85 years and over in the population compared with 91,600 twenty years ago, an increase of 148%. There were more than twice as many females as males in this age group (158,300 compared with 69,300). In the 12 months to June 1998, it is estimated that this age group increased by 14,500 persons (6.8%), well above the 1.2% growth rate for the Australian population as a whole.

(a) Includes Other Territories—see paragraph 2 of the Explanatory Notes.

EXPLANATORY NOTES

INTRODUCTION

1 This publication contains revised estimates of the resident populations by age and sex of Australian States and Territories as at 30 June 1997 and preliminary estimates as at 30 June 1998. Mean ages, median ages and sex ratios for the Australian States and Territories are also included.

2 Following the 1992 amendment to the Acts Interpretation Act to include the Indian Ocean Territories of Christmas Island and the Cocos (Keeling) Islands as part of geographic Australia, population estimates commencing with 30 September 1993 include estimates for these two territories. To reflect this change, another category of the State and Territory level has been created, known as Other Territories. Other Territories include Jervis Bay Territory as well as Christmas Island and the Cocos (Keeling) Islands. Data for Other Territories are included in tables where specifically noted. Prior to 30 September 1993, Jervis Bay Territory was included in estimates for the Australian Capital Territory.

RESIDENT POPULATION ESTIMATES SERIES

3 Australia's population statistics (for the period from 1971) are compiled according to the place of usual residence of the population.

4 An explanation of the conceptual basis for population estimates is given in *Information Paper: Population Estimates: Concepts, Sources and Methods* (Cat. no. 3228.0), issued on 23 June 1995.

METHOD OF ESTIMATION

5 The estimates by age of the population of Australia and the States and Territories at the date of the Census are derived from the Census Counts and Place of Usual Residence, by adjusting for under-enumeration and adding the number of Australian residents estimated to have been temporarily overseas at the time of the Census.

6 Post-censal age distributions are obtained by advancing the estimates to the next age, subtracting deaths and adding births and net estimated interstate and overseas migration. After each census, estimates for the preceding intercensal period are revised by incorporating an additional adjustment (intercensal discrepancy) to ensure that the total intercensal increase at each age agrees with the difference between the estimated resident populations at the two respective census dates.

7 Estimates of overseas migration are based on net permanent and long-term overseas movements with State and Territory not stated allocated pro rata. Short-term movements are excluded. The estimates from July 1976 onwards include an adjustment for the net effect of category jumping. This adjustment is necessary because net permanent and long-term migration figures can be affected by changes in travel intentions from short-term to permanent/long-term or vice versa. For example, an Australian resident departing for a short-term visit overseas (stating that he/she intends to stay abroad for less than 12 months) in fact stays more than 12 months, thereby changing his/her travel category from short-term to long-term. Prior to December quarter 1989, adjustments for category jumping were only made to final population estimates. These adjustments are now also included in preliminary estimates. For further details see *Population Estimates: Concepts, Sources and Methods* (Cat. no. 3228.0).

METHOD OF ESTIMATION *continued*

8 Estimates of interstate migration since June 1986 have been derived from unidentified information on interstate changes of addresses advised to the Health Insurance Commission in the process of administering Medicare.

DEFINITIONS

9 *Sex ratio*: male population per 100 female population.

10 *Median age*: the age at which half the population is older and half is younger.

11 *Mean age*: the average age of the population.

ACCURACY/RELIABILITY

12 It should be noted that while the Australian Bureau of Statistics (ABS) seeks to produce the most accurate estimates of the population possible, the accuracy of the estimates depends on the quality of the source data used. The major sources of potential error are considered to be the census date estimates compiled from the five-yearly Census of Population and Housing and estimates of interstate migration based on Medicare transfer data.

13 Single year age estimates are not shown for persons aged 85 years or older. The reliability of age estimates decreases as older ages are reached. However, estimates for each age up to 99 have been calculated and are available on request.

ACKNOWLEDGMENT

14 ABS publications draw extensively on information provided freely by individuals, businesses, governments and other organisations. Their continued cooperation is very much appreciated: without it, the wide range of statistics published in the ABS would not be available. Information received by the ABS is treated in strict confidence as required by the *Census and Statistics Act 1905*.

RELATED PUBLICATIONS

15 Four previous issues of this series containing consolidated data were issued on 23 August 1982 (containing estimates for the years 1971 to 1976); 22 July 1983 (containing estimates for the years 1981 to 1987); 8 December 1987 (containing estimates for the years 1981 to 1987); 21 July 1993 (containing estimates for the years 1987 to 1992); and 18 December 1997 (containing estimates for the years 1992 to 1997).

16 Other ABS publications which may be of interest to users of this publication include:

Australian Demographic Statistics (Cat. no. 3101.0) — issued quarterly

Australian Demographic Trends, 1997 (Cat. no. 3102.0)

Births, Australia (Cat. no. 3301.0) — issued annually

Deaths, Australia (Cat. no. 3302.0) — issued annually

Migration, Australia (Cat. no. 3412.0) — issued annually

Overseas Arrivals and Departures, Australia (Cat. no. 3401.0) — issued monthly

Population Projections, 1997 to 2051 (Cat. no. 3222.0) — issued every two years

17 A compendium of all demographic data for each State and the Australian Capital Territory has been released in State and Territory specific publications, *Demography* (Cat. nos 3311.1–8). The first release contained 1990 data. These publications are released each year for each State or Territory and contain a variety of demographic data. The first release for the Northern Territory contained 1993 data.

EXPLANATORY NOTES *continued*

RELATED PUBLICATIONS *continued*

18 Publications are annually produced for each State and Territory showing the estimated resident population within Statistical Local Areas by age group and sex, *Population by Age and Sex* (Cat. nos 3235.1–8).

19 Current publications produced by the ABS are listed in the *Catalogue of Publications and Products* (Cat. no. 1101.0). The ABS also issues, on Tuesdays and Fridays, a *Release Advice* (Cat. no. 1105.0) which lists publications to be released in the next few days. Both are available from any ABS office.
