NOTES

ABOUT THIS PUBLICATION

For Australia, this publication contains estimates of the resident population of Local Government Areas (LGAs), Statistical Local Areas (SLAs), Statistical Subdivisions (SSDs), Statistical Divisions (SDs), Statistical Districts (S Dists), States, Territories and Australia at June 1995, 1999 and 2000. Average annual growth rates for these areas are also provided. The estimates in this publication are preliminary for 2000, revised for 1999 and final for 1995.

For New Zealand, this publication contains estimates of the resident population of Regions and Territorial Authorities at June 1996, 1997, 1998, 1999 and 2000. Average annual growth rates for these areas are also provided.

ROUNDING

In commentary based on statistics in this publication, it is recommended that the relevant statistics be rounded. All data are affected by errors in reporting and processing. While unrounded figures are provided in tables, accuracy to the last digit is not claimed and should not be assumed. No reliance should be placed on statistics with small values.

Australian Statistician

MAIN FEATURES

POPULATION INCREASE

- Australia's estimated resident population at June 2000 was 19.2 million people, up 219,900 (or 1.2%) from June 1999. Over the same period New Zealand's population increased 20,100 (or 0.5%) to 3.8 million.
- Natural increase accounted for 55% of Australia's population growth in the year to June 2000, while overseas migration accounted for 45%. In New Zealand, natural increase contributed 30,100 people to the population, while there was a net loss of 9,800 people through migration.
- Queensland experienced the fastest growth of the States and Territories in the year to June 2000 (1.7%), followed by the Northern Territory (1.4%) and Western Australia (1.4%), while New South Wales experienced the largest increase in population (up by 66,800).
- For the second consecutive year Victoria's population growth (1.24%) marginally outpaced growth Australia wide (1.16%). The ACT and South Australian populations increased at under half the Australian rate (0.5% and 0.4% respectively) in the year to June 2000, while Tasmania's population declined for the fourth consecutive year (-0.1%).

CAPITAL CITY GROWTH

- At June 2000 capital city SDs were home to 64% of the Australian population. Taken together capital city SDs grew by 1.3% (160,200) over the year to June 2000, accounting for 73% of Australia's population growth over the year. Over the same period the balance of the States and Territories grew by 0.9%.
- Overall growth in the capital cities was largely accounted for by growth in Sydney and Melbourne, with the balances of Queensland, South Australia and Western Australia all increasing at a rate equal to, or above, the capital city.
- Sydney and Melbourne experienced the largest population increases of Australia's capital cities in the year to June 2000, increasing by 53,600 and 52,100 people respectively, while Darwin and Brisbane recorded the fastest population increases (2.2% and 1.7% respectively). Wellington, New Zealand's capital, increased by 500 people (0.1%) to reach 429,600 at June 2000.

Inner city growth

- Inner areas of Australia's capital cities continued to experience considerable population growth in 1999–2000. The LGAs of Sydney (up 9.6%), Melbourne (up 9.6%), and Perth (up 6.7%), continued to experience rapid population growth, while the SLAs of Fortitude Valley — Inner in Brisbane and Canberra City in the ACT increased by 740 people (102%) and 180 (72%) respectively in 1999–2000. The SLAs of City — Inner (9.6%), Coconut Grove (8%) and Stuart Park (6.8%) in Darwin also experienced relatively fast growth in 1999–2000.

GROWTH ALONG THE COAST

- Many regions located along the coastline continued to record population gains during 1999–2000. Examples include Tweed (A), Lake Macquarie (C), Hastings (A), Shoalhaven (C) and Port Stephens (A) in New South Wales, and Surf Coast (S), Bass Coast (S) and Mornington Peninsula (S) in Victoria. Gold Coast (C) LGA in Queensland experienced the second largest population increase of all LGAs in Australia, and growth continued in the Queensland coastal areas of Maroochy (S), Pine Rivers (S) and Hervey Bay (C).

MAIN FEATURES

GROWTH ALONG THE COAST *continued*

Victor Harbour (DC) in South Australia continued to record population growth in 1999–2000, while coastal areas of Western Australia, such as Broome (S) and Busselton (S) were among the fastest growing LGAs in Australia.

GROWTH IN REGIONAL CENTRES

- Population growth continued in a number of regional centres in the year to June 2000, such as Maitland (C), Griffith (C) and Dubbo (C) in New South Wales, Ballarat (C), Greater Shepparton (C) and Wodonga (RC) in Victoria, the cities of Townsville (C) and Toowoomba (C) in Queensland, Mount Gambier (C) in South Australia and Albany (C) in Western Australia.

SMALL AREA GROWTH

- Over half of Australia's LGAs (350) gained or had a constant population in the year to June 2000.
- Queensland experienced the two largest LGA population increases to June 2000, with Brisbane (C) increasing by 14,700 people and Gold Coast (C) increasing by 13,300.
- Of the ten largest growth LGAs in Australia, four were in the capital city of Melbourne. Casey (C) increased by 7,700 people (the third largest increase), Melbourne (C) increased 4,600 (sixth largest), Melton (S) increased 4,400 (seventh largest) and Hume (C) increased 3,800 (ninth largest).
- Three of the largest growth LGAs were in Sydney, with Liverpool (C) increasing by 6,300 people (fourth largest), Blacktown (C) increasing 6,100 (fifth largest) and Bankstown (C) increasing 4,000 (eighth largest). Redland (S) in Brisbane increased by 3,600 people in the year to June 2000 — the tenth largest increase of all LGAs in Australia.
- The four cities within the Auckland region experienced the largest population growths in New Zealand in 1999–2000, with Manukau City increasing by 4,900 people, Auckland City increasing 4,300, Waitakere City increasing 3,500 and North Shore City increasing 2,000. Together these cities accounted for over 70% of New Zealand's population increase in 1999–2000.

SMALL AREA DECLINE

- Over 40% (274) of LGAs experienced population decline in the year to June 2000.
- The balance of Victoria experienced the two largest LGA declines, with Latrobe (C) declining by 800 people and Wellington (S) down by 570 people. Southern Grampians (S) and Glenelg (S), also in Victoria's balance, were among the ten largest declining LGAs, declining by 360 and 320 people respectively.
- Broken Hill (C) and Wagga Wagga (C) in New South Wales balance experienced the third and fourth largest population declines to June 2000, down by 510 and 470 people respectively. Other areas of relatively large decline included Whyalla (C) in South Australia (down 420 people), Canterbury (C) in Sydney (down 420), Vincent (T) in Perth (down 410) and Rockhampton (C) in Queensland's balance (down 320).
- Of New Zealand's 74 territorial authorities, 35 experienced population decline in the year to June 2000. Largest declines were experienced in South Waikato District (–700), South Taranaki District (–600) and Invercargill City (–600).

POPULATION CHANGE AUSTRALIA

NATIONAL GROWTH RATE STEADY

Australia's estimated resident population at June 2000 was 19.2 million people, up 219,900 from June 1999. Natural increase accounted for 55% of the increase while overseas migration accounted for 45%. The national growth rate for the year was 1.2%, equal to the average annual growth rate for the five years to June 2000.

FASTEST GROWTH IN QUEENSLAND...

In the year to June 2000, Queensland had the fastest population growth of the States and Territories, increasing by 1.7% (or 59,500 which was the second largest increase of the States and Territories). This growth was similar to rates recorded for the previous three years but considerably lower than the growth experienced during the late-1980s to the mid-1990s, when growth rates averaged around 2.5%.

The Northern Territory and Western Australia experienced the second fastest growth in the year to June 2000 (1.4% each), increasing by 2,700 and 26,300 respectively.

... AND VICTORIA'S GROWTH RATE EXCEEDS AUSTRALIA

Victoria's population increased by 58,300 (1.2%) in the year to June 2000. The 1998–99 growth rate of 1.13% exceeded, marginally, that of Australia overall (1.10%) for the first time since the inception of the Estimated Resident Population series (1971), and continued to be marginally higher for 1999–2000 (1.24% compared with Australia's growth rate of 1.16%). This was mainly due to increasing numbers of interstate arrivals to Victoria and decreasing numbers of departures of Victorians to other States and Territories, a trend apparent since the mid-1990s.

New South Wales recorded the largest increase of the States and Territories in the year to June 2000, up 66,800 or 1.0%. The ACT had an increase of 0.5% (1,500) over the same period, while South Australia had the second lowest growth rate with 0.4% (5,200).

For the fourth consecutive year Tasmania recorded a decrease in population, down 400 to 470,400 in 1999–2000. The rate of decline has slowed over the past three years, from -0.4% in 1997–98 to -0.1% in 1999–2000.

CAPITAL CITIES CONTINUE TO OUTPACE STATE BALANCES

Taken together, capital city SDs grew by 1.3% (160,200), considerably faster than the combined State and Territory balances which grew by 0.9% (59,600). Both rates were the same as the average annual growth rates recorded for the five years to June 2000. The overall growth in the capital cities was largely driven by growth in Sydney and Melbourne, with the balances of Queensland, South Australia and Western Australia all increasing at a rate equal to, or above, the capital city growth. In June 2000, capital city SDs were home to 64% of the Australian population. They contributed 73% of Australia's population growth in the year to June 2000.

Sydney and Melbourne SDs had the largest increases of the capital cities in the year to June 2000, growing by 53,600 and 52,100 respectively. These two cities combined comprised 39% of Australia's population and accounted for almost two-thirds (66%) of the total capital city growth, and almost half (48%) of Australia's total growth, in the year to June 2000.

Darwin was the fastest growing capital city SD, increasing by 2.2% (up 2,000). Perth grew 1.4% (19,500) during 1999–2000, less than the average annual rate of 1.7% for the five years to June 2000.

POPULATION CHANGE AUSTRALIA *continued*

CAPITAL CITIES CONTINUE TO OUTPACE STATE BALANCES *continued*

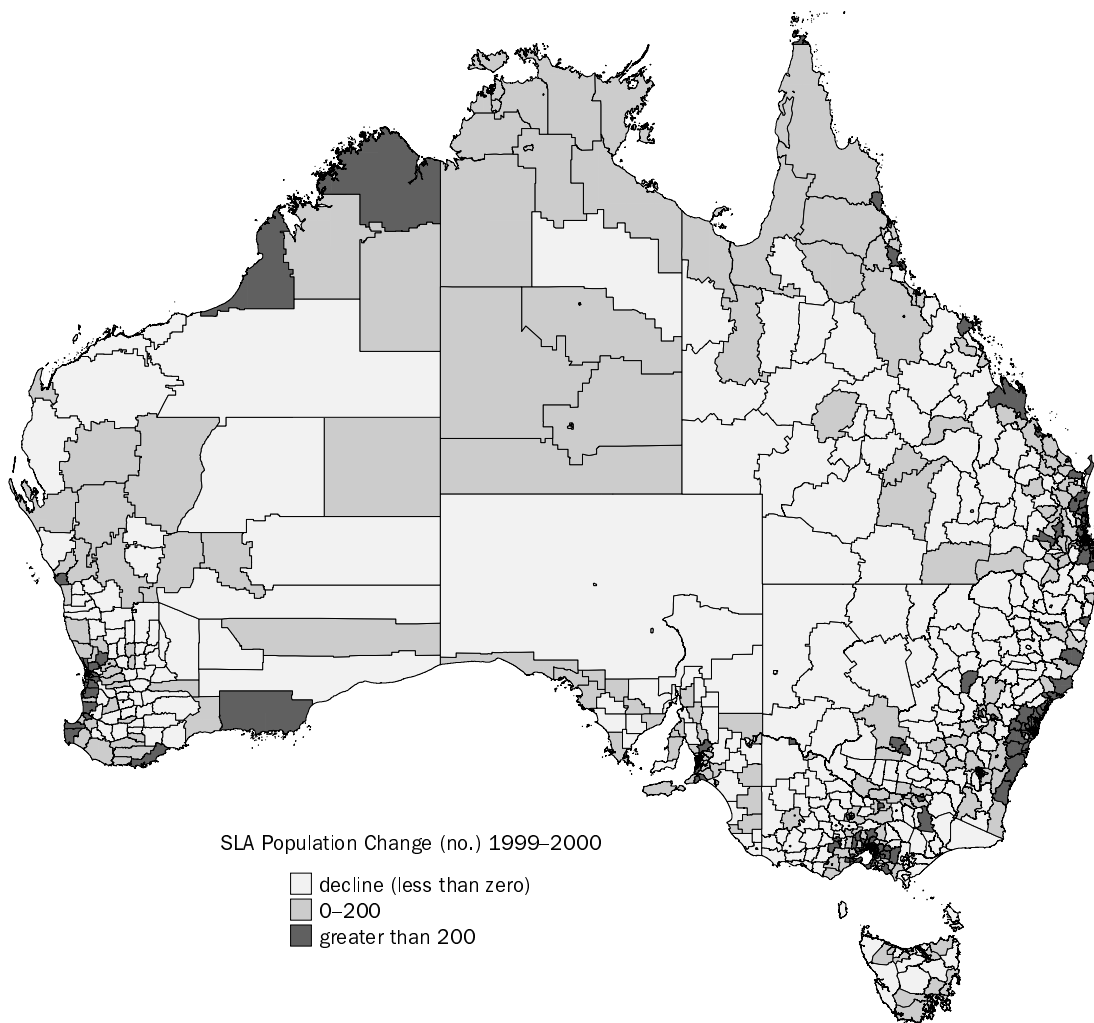

Queensland was the only State or Territory where growth in the balance exceeded growth in the capital city SD. Brisbane SD increased by 27,900 while Queensland balance increased 31,500 (each up 1.7%).

REGIONAL GROWTH

During the period June 1999 to June 2000, 350 LGAs gained or had a constant population, while 274 LGAs experienced population loss. At a regional level, differences in population change occur as a result of the interplay of the components of population growth: natural increase (the number of births minus the number of deaths), international and internal migration. While there are variations between regions in all these components, it is migration, especially internal migration, that mainly determines the level of population growth in many regions of Australia.

Over recent years growth has occurred in several different types of regions throughout Australia, and these trends largely continued in 1999–2000. Examples of growth regions include outer suburban areas of capital cities, urban–rural fringes, the inner cities, coastal regions, some mining areas and regional centres. Some regions may fall into more than one kind of category as the distinction between the categories is not always clear.

Population Change, Australia

Suburban growth

Within the capital cities, population increase continued to be recorded in suburban areas. These areas contain housing developments that are attractive to families because of their relative affordability while generally being close enough to the city to allow access to employment and services. These areas generally have large populations and experience large increases; for example, Casey (C) in Melbourne and Liverpool (C) in Sydney experienced some of the largest and fastest increases of all LGAs in Australia in 1999–2000.

EXAMPLES OF SUBURBAN GROWTH—1999–2000

State	Examples of LGAs or SLAs
NSW	Liverpool (C), Blacktown (C), Bankstown (C), Hurstville (C), Concord (A)
Vic.	Casey (C)
Qld	Doolandella–Forest Lake,
SA	Onkaparinga (C), Playford (C), Tea Tree Gully (C) — North
WA	Cockburn (C), Rockingham (C), Subiaco (C), Claremont (T)
NT	Palmerston (T)
ACT	Nicholls, Ngunnawal

Growth on the urban fringe

Regions located on the edge of urban areas continued to experience population growth in 1999–2000. Examples include: Wyong (A), Camden (A) and Gosford (C) in New South Wales, the cities of Casey, Hume and Melton (S) in Victoria, Caboolture in Queensland, Mount Barker (DC) in South Australia, Swan (S), Serpentine–Jarrahdale (S) and Wanneroo (C) in Western Australia, and Kingborough (M) and Brighton (M) in Tasmania. These centres are located within commuting zones that allow access to urban employment combined with a rural or coastal lifestyle. Hobby farms and holiday homes are also popular in some of these areas.

Inner city growth

The inner areas of some of Australia's capital cities continued to experience considerable population growth in 1999–2000, associated with the development of medium and high-density residential accommodation. Growing from relatively small population bases Sydney (C), Melbourne (C), Perth (C), and to a lesser extent Adelaide (C), have all experienced high population growth over recent years while the inner city SLAs of Fortitude Valley — Inner in Brisbane, and Canberra City in the ACT increased by 740 people (102%) and 180 (72%) respectively in 1999–2000. Similarly the SLAs of City — Inner (9.6%), Coconut Grove (8.0%) and Stuart Park (6.8%) in Darwin experienced relatively fast growth in 1999–2000.

Coastal growth

Areas located along the coastline, particularly in New South Wales, Victoria, Queensland, and some areas of Western Australia, continued to record population gains during 1999–2000. Coastal areas are popular with older people wishing to retire and with younger people wanting a lifestyle change or who are attracted by service-based employment opportunities associated with tourism.

EXAMPLES OF COASTAL GROWTH—1999–2000

State	Examples of LGAs or SLAs
NSW	Tweed (A), Lake Macquarie (C), Hastings (A), Shoalhaven (C), Port Stephens (A)
Vic.	Surf Coast (S), Bass Coast (S), Mornington Peninsula (S)
Qld	Gold Coast (C), Maroochy (S), Pine Rivers (S), Hervey Bay (C)
SA	Victor Harbor (DC), Port Lincoln (C), Alexandrina (DC) — Coastal
WA	Busselton (S), Broome (S), Mandurah (C)

Mining area growth

Some of the inland regions that experienced population growth in 1999–2000 were those associated with the expansion of employment and services due to the development of mining activities, such as Capel (S) and Ngaanyatjaraku (S) in Western Australia. In other mining areas such as Roxby Downs (M) in South Australia and Emerald (S) in Queensland, growth continued but at a slower rate than in the five years to June 2000.

Regional centre growth

Most of Australia's population growth in 1999–2000 continued to reflect growth in metropolitan and coastal regions, although growth also occurred in a number of regional centres which provide goods and services to surrounding regions.

EXAMPLES OF REGIONAL CENTRE GROWTH—1999–2000

State	Examples of LGAs
NSW	Maitland (C), Griffith (C), Dubbo (C)
Vic.	Ballarat (C), Greater Bendigo (C), Greater Shepparton (C), Wodonga (RC)
Qld	Townsville (C), Toowoomba (C), Thuringowa (C)
SA	Mount Gambier (C)
WA	Albany (C), Bunbury (C)

REGIONAL DECLINE

In 1999–2000 inland rural areas, some mining and manufacturing areas and some urban areas continued to experience population decline.

Rural population decline

Population loss in rural Australia has been occurring for some time and is largely a result of net migration loss. People leave rural areas and small towns because technological and economic changes have led to a lack of employment opportunities, while young people in particular may leave to continue their education and training.

EXAMPLES OF RURAL POPULATION DECLINE—1999–2000

<i>State</i>	<i>Examples of LGAs</i>
NSW	Deniliquin (A), Barraba (A), Bombala (A)
Vic.	Buloke (S), West Wimmera (S), Yarriambiack (S)
Qld	Flinders (S), Paroo (S)
SA	Mid Murray (DC), Petersborough (DC)
WA	Collie (S), Corrigin (S), Mount Marshall (S)

Mining and manufacturing-based decline

The population of mining and manufacturing areas often fluctuate in response to changing market forces and economic restructuring. A number of mining and manufacturing regions continued to experience population decline in 1999–2000, for example, Broken Hill (C) in New South Wales, La Trobe (S) and Wellington (S) in Victoria, Mount Isa (C) and Banana (S) in Queensland, Whyalla (C) in South Australia, Ashburton (S), East Pilbara (S) and Coolgardie (S) in Western Australia and Burnie (C) and West Coast (M) in Tasmania.

Urban decline

Although many suburban and urban fringe areas gained population in 1999–2000, a number of urban areas lost population over the same period. Population decline in these regions can occur for a variety of reasons. It may occur in older suburbs as a result of life-cycle change when the younger generation moves away. The redevelopment of urban areas may also result in a population decline, albeit temporary, due to existing housing stock being demolished to make way for new medium or high-density housing.

EXAMPLES OF URBAN POPULATION DECLINE—1999–2000

<i>State</i>	<i>Examples of LGAs or SLAs</i>
NSW	Canterbury (C), Marrickville (A)
Vic.	Moreland (C), Banyule (C)
Qld	Stafford Heights
SA	Playford (C) — Elizabeth, Port Adel. Enfield (C) — Port, Tea Tree Gully (C) — Central
WA	Vincent (T), Cambridge (T), Bassendean (T)
Tas.	Hobart (C), Launceston (C), Devonport (C)
NT	Nightcliff, Karama, Rapid Creek, Leanyer, Malak
ACT	Campbell, Kambah, Griffith, O'Connor

POPULATION CHANGE AUSTRALIA *continued*

POPULATION DENSITY

Australia is a sparsely settled continent with an overall population density of around 2 people per km² at June 2000. Population density varies across the States and Territories, being highest in the small territory of the ACT (130 per km²), followed by Victoria (20 per km²), and lowest in the Northern Territory (0.1 per km²).

Population density is highest in the city centres, particularly Sydney, with seven out of the ten most densely populated SLAs in Australia located in the Sydney SD. Waverly (A) (7,100 people per km²), Sydney (C) – Remainder (6,600) and North Sydney (A) (5,600) had the highest population densities at June 2000. At the other end of the spectrum, there were over 330 SLAs with population densities of under 2 people per km² at June 2000.

CENTRE OF POPULATION

The centre of population is one measure to describe the spatial distribution of the population. This point marks the average latitude and longitude around which the population is distributed. At June 2000 the centre of Australia's population was just inside the LGA of Central Darling (A), reflecting the concentration of the population in the south-east, particularly Sydney and Melbourne. Between June 1995 and June 2000 the centre of Australia's population moved 8 km northward.

Centre of population Australia, June 1995 and June 2000

POPULATION CHANGE NEW ZEALAND

NATIONAL GROWTH

New Zealand's resident population was 3.8 million at June 2000, an increase of 20,100 people since June 1999. New Zealand's growth of 0.5% in 1999–2000 was lower than the average annual growth for the four years ending June 2000 (0.8%) and was under half the growth rate experienced in Australia.

In the year to June 2000 natural increase contributed 30,100 people to New Zealand's population, while there was a net loss of 9,800 people through migration.

NORTH ISLAND GROWING FASTER THAN SOUTH ISLAND

Population growth in the North Island continued to outpace that in the South Island in 1999–2000. As at June 2000 an estimated 2.9 million people lived in the North Island, an increase of 19,200 or 0.7% since June 1999. In the South Island growth was slower with the population increasing by 900 people or 0.1% over the same period to 0.9 million people.

These growth differences led to a further concentration of New Zealand's population in the North Island. At June 2000, the North Island was home to 75.8% of New Zealand residents, up from 75.7% at June 1999 and 75.3% at June 1996.

CITIES OUTPACE DISTRICTS

The combined population of New Zealand's 15 cities grew by 0.7% (or 14,600) during the year to June 2000, to 2.2 million, while the combined population of the 59 districts increased at a slower rate (0.3% or 5,500) to 1.7 million.

Wellington, New Zealand's capital, increased by 500 people (0.1%) to reach 429,600 at June 2000.

AUCKLAND — MAJOR GROWTH AREA

Nearly one-third (five cities and 19 districts) of the territorial authority areas had growth rates which exceeded the national average of 0.5% in 1999–2000. Although some of the fastest population growth areas were in the South Island, including Queenstown–Lakes District (4.7%), Selwyn District (2.9%) and Waimakariri District (2.5%), the largest population increases were in the North Island. The four cities within the Auckland region experienced the largest population growths in 1999–2000, with Manukau City increasing by 4,900 people, Auckland City increasing 4,300, Waitakere City increasing 3,500 and North Shore City increasing 2,000. Together these cities accounted for over 70% of New Zealand's population increase in 1999–2000.

POPULATION DECLINE

Of New Zealand's 74 territorial authorities, 35 experienced population decline in the year to June 2000. Fastest population declines were experienced in the districts of Kawerau (–3.3%), South Waikato (–2.9%) and South Taranaki (–2.1%), and largest declines were experienced in South Waikato District (–700), South Taranaki District (–600) and Invercargill City (–600).

POPULATION ESTIMATES

The Subnational Population Estimates for Regions, Territorial Authorities and Urban Areas are subject to revision. The latest estimates are available from the Statistics New Zealand Website <URL:<http://www.stats.govt.nz>>.

POPULATION CHANGE NEW SOUTH WALES

STATE SUMMARY

The ERP of NSW at June 2000 was 6.5 million, an increase of 66,800 people since June 1999. This represents a growth rate of 1.0% for 1999–2000, the same as for 1998–99 but slightly below the annual average growth rate for the five years to 2000 (1.1%).

Natural increase (41,700) contributed slightly more people than net overseas migration (40,600), while net interstate migration contributed a loss of 15,600 people to the New South Wales population.

The overwhelming majority (93%) of LGAs in Sydney showed population growth during 1999–2000. Among coastal LGAs a majority (82%) showed population growth, while inland LGAs which experienced population growth during 1999–2000 were in the minority (25%).

SYDNEY GROWTH

While Sydney SD was home to 63% of the NSW population at June 2000, it accounted for 80% (53,600) of the total NSW population growth. During the five years to June 2000, Sydney grew by an average of 1.3% per year, over twice the growth rate of the balance of State (0.6% per year).

The ten largest growing LGAs in NSW were in Sydney, with six of these located in Sydney's west and two on the Central Coast. Liverpool (C) had the largest population increase (6,300 or 4.4%) in 1999–2000, while the most populous NSW LGA, Blacktown (C), had the second largest population increase (6,100 or 2.4%). Bankstown (C) with an increase of 4,000 (2.4%), Wyong (A) with an increase of 3,400 (2.6%) and Baulkham Hills (A) with an increase of 3,200 (2.4%) made up the remainder of the five largest-growth LGAs.

In addition to the largest population increases, three of the five fastest growing LGAs were within Sydney. The inner city LGA of Sydney (C) continued to grow rapidly during 1999–2000, with an increase of 9.6% (2,200) associated with development of inner city high-rise and harbourside apartments. The second fastest growth in Sydney occurred in Camden (A) (6.1% or 2,500), followed by Liverpool (C) (4.4% or 6,300), Hurstville (C) (2.8% or 2,000) and Concord (2.8% or 700). For the last three LGAs the population growth was partly a result of urban consolidation.

Only three of Sydney's LGAs experienced a population decline in 1999–2000. Canterbury (C) lost 420 people (–0.3%), Marrickville (A) lost 240 (–0.3%) and Waverley (A) lost 20 (–0.03%). The size of the declines in Canterbury (C) and Marrickville (A) made them, respectively, the third and fourth largest declining LGAs in NSW, although in percentage terms the declines were small.

POPULATION CHANGE NEW SOUTH WALES *continued*

GROWTH RATES OF COASTAL REGIONS

Outside Sydney, the combined LGAs along the NSW coast had a growth rate of 1.2%, compared to the negative growth rate experienced by inland NSW (-0.1%). Tweed (A) had the largest growth, increasing by 1,900 (2.7%), Lake Macquarie (C) increased by 1,800 (1.0%) and Hastings (A) increased by 1,700 (2.8%). Shoalhaven (C) and Newcastle (C) increased by 1,300 each (1.5% and 0.9% respectively). Hastings (A) and Tweed (A) had the first and second fastest growth on the coast, while Kiama (A) (2.2%), Great Lakes (A) (2.2%) and Port Stephens (A) (2.0%) made up the remainder of the five fastest growing LGAs. When looking at population growth at the SLA level the fastest growing region on the NSW coast was Newcastle (C) — Inner (up 6.3%). Inner city Newcastle is undergoing significant change with the reduction of industrial activity and the development of residential apartments.

Almost one-fifth of the NSW coastal LGAs experienced a population decline in 1999–2000. These LGAs were Nambucca (A), which lost 230 (-1.3%), Richmond Valley (A) (-210 or -1.0%), Bellingen (A) (-100 or -0.8%) and Pristine Waters (A) (-50 or -0.5%).

LGAs WITH LARGEST AND FASTEST POPULATION GROWTH, New South Wales

Baulkham Hills (A)	3 200	2.4	Queanbeyan (C)	880	3.0

INLAND POPULATION GROWTH

Despite the overall decline in population in inland NSW, several regional centres experienced considerable population increases in the year to June 2000. Wingecarribee (A) had the largest growth (1,080) and the third fastest growth (2.7%), while Queanbeyan (C) had the third largest growth (880) and the second fastest growth (3.0%). Griffith (C) had both the fourth largest (550) and fourth fastest (2.4%) growth. Other fast growing LGAs were Mulwaree (A) (3.1%) and Leeton (A) (2.2%), while the LGAs of Maitland (C) (1,060) and Dubbo (C) (420) had large population increases.

INLAND POPULATION DECLINE

Of the 107 LGAs in inland NSW, 75% experienced population decline in 1999–2000. Broken Hill (C) experienced the largest decline (-510 or -2.4%), followed by Wagga Wagga (C) (-470 or -0.8%). Deniliquin (A), Lismore (C) and Goulburn (C) declined by 230 (-2.8%), 200 (-0.5%) and 170 (-0.8%) respectively. The fastest population declines were experienced by the LGAs of Barraba (A) (-3.6%), Windouran (A) (-3.2%), Bombala (A) (-3.0%), Deniliquin (A) (-2.8%) and Bourke (A) (-2.7%).

POPULATION CHANGE NEW SOUTH WALES *continued*

Deniliquin (A)	-230	-2.8	Bourke (A)	-100	-2.7

CENTRE OF POPULATION

At June 2000 the New South Wales centre of population was located within the LGA of Hawkesbury (C). Between June 1995 and June 2000 the population centre moved 2 km south-eastward, reflecting the greater population growth experienced within the Sydney area compared to the balance of New South Wales.

Centre of population NSW, June 1995 and June 2000

POPULATION CHANGE VICTORIA

STATE SUMMARY

The ERP of Victoria at June 2000 was 4.8 million, an increase of 58,300 or 1.2% since June 1999. Victoria's growth rate has continued to rise, averaging an annual growth rate of 1.1% over the five years since 1995. Most of Victoria's population growth in 1999–2000 came from natural increase (26,800) and net overseas migration (24,800). For the last three years Victoria has also experienced positive net interstate migration (6,700 in 1999–2000), a turnaround from the large net interstate migration losses experienced to the mid 1990s.

In 1999–2000 the major growth areas in Victoria were located in the outer suburban and inner city LGAs of Melbourne. Outside Melbourne, growth occurred in regional centres and some areas along the coast.

CONTINUING HIGH GROWTH FOR MELBOURNE

At June 2000 there were an estimated 3.5 million people resident in Melbourne SD. Melbourne grew by 1.5% (52,100 people) in the year ending June 2000, greater than the Victorian growth rate of 1.2% and faster than Melbourne's average annual growth over the five years to June 2000 (1.3%). Melbourne's share of Victoria's population continues to gradually increase. At June 2000, 73% of Victoria's residents lived in Melbourne, compared to 72% at June 1995 and 71% at June 1990.

GROWTH IN THE OUTER SUBURBS

Continuing the pattern of recent years, the LGAs which experienced the largest growth in population in 1999–2000 were located on the outer suburban fringes of Melbourne. Within these LGAs much of the population growth was often concentrated in just one SLA. The largest (7,700) and one of the fastest (4.6%) population increases in Victoria occurred in the city of Casey, located on Melbourne's south-eastern outskirts. Almost two-thirds (64%) of Casey's population growth was due to a large increase in the SLA of Casey (C) — Berwick, which gained 5,000 people (8.6%) during 1999–2000.

The shire of Melton, located in Melbourne's outer west, experienced the fastest population growth in Australia in 1999–2000 (9.6%). A very high proportion (96%) of the population gain was in the SLA of Melton (S) — East, which grew by 44.7% in 1999–2000. Similarly, in the city of Hume, located in Melbourne's north, more than four-fifths (82%) of the city's population growth was accounted for by the SLA of Hume (C) — Craigieburn which grew by 9.5% in the year to June 2000.

LGAs WITH LARGEST AND FASTEST POPULATION GROWTH, Victoria

LGA	1999-2000.....		LGA	1999-2000.....	
	no.	%		no.	%
LARGEST GROWTH			FASTEST GROWTH		
Casey (C)	7 700	4.6	Melton (S)	4 400	9.6
Melbourne (C)	4 600	9.6	Melbourne (C)	4 600	9.6
Melton (C)	4 400	9.6	Casey (C)	7 700	4.6
Hume (C)	3 800	2.9	Wyndham (S)	3 300	4.0
Wyndham (C)	3 300	4.0	Surf Coast (C)	730	3.8

POPULATION CHANGE VICTORIA *continued*

GROWTH IN THE OUTER SUBURBS *continued*

The shire of Mornington Peninsula, located in Melbourne's south, attracts older people (retirees). In 1999–2000 this LGA gained 3,200 people (or 2.6%). Around half of the population growth in this shire was accounted for by growth in the SLA of Mornington Peninsula (S) — West which grew by 3.2% or 1,500 people over the same period.

POPULATED INNER CITY

Continuing the trend over recent years, Melbourne's inner city experienced large gains in population over the past year. Melbourne (C) LGA gained 4,600 people in the year to June 2000, growing by 9.6%, making it one of the fastest growing LGAs in Australia. This growth was largely due to an increase in the number of young adults, including many students, living in the city and inner suburbs.

The largest increase in this LGA occurred in the SLA of Melbourne (C) — Remainder (1,700 or 4.4% growth), while the much smaller SLAs of Melbourne (C) — Inner and Melbourne (C) — Southbank–Docklands experienced very rapid population gains during the past year, growing by 36.4% and 34.3% respectively. The rapid population growth of the inner city has increased the population density of Melbourne (C) — Inner from 840 people per km² at June 1995 to 3,400 people per km² at June 2000.

SLOWER GROWTH OVERALL IN THE BALANCE OF STATE

The population of Victoria balance grew by 6,100 in 1999–2000 to 1.3 million people. As in previous years, the average growth rate for the balance of Victoria (0.5%) was much lower than for Melbourne (1.5%). The growth rate for the balance of Victoria in 1999–2000 was slightly higher than the average annual growth rate experienced over the five years to June 2000 (0.4%).

LGAs WITH LARGEST AND FASTEST POPULATION DECLINE, Victoria

LGA	1999–2000.....		LGA	1999–2000.....	
	no.	%		no.	%
LARGEST DECLINE			FASTEST DECLINE		
La Trobe (S)	-800	-1.1	Buloke (S)	-250	-3.3
Wellington (S)	-570	-1.4	West Wimmera (S)	-130	-2.6
South Grampians (S)	-360	-2.1	Towong (S)	-150	-2.4
Glenelg (S)	-320	-1.6	Hindmarsh (S)	-160	-2.4
Corangamite (S)	-310	-1.8	Yarriambiack (S)	-200	-2.3

As in previous years the LGAs in the balance of Victoria experiencing the largest and fastest declines, largely as a result of outmigration, were shires located in mining areas or in the wheat-sheep producing areas of far western and north-western Victoria. The fastest declines were experienced by the shires of Buloke (-3.3%) and West Wimmera (-2.6%). In 1999–2000 some of the largest population declines in Australia were experienced in the balance of Victoria – in the mining shire of La Trobe, and Wellington, in the east of the state, and in the Southern Grampians and Glenelg in the south-west.

POPULATION CHANGE VICTORIA *continued*

REGIONAL AND COASTAL GROWTH AREAS

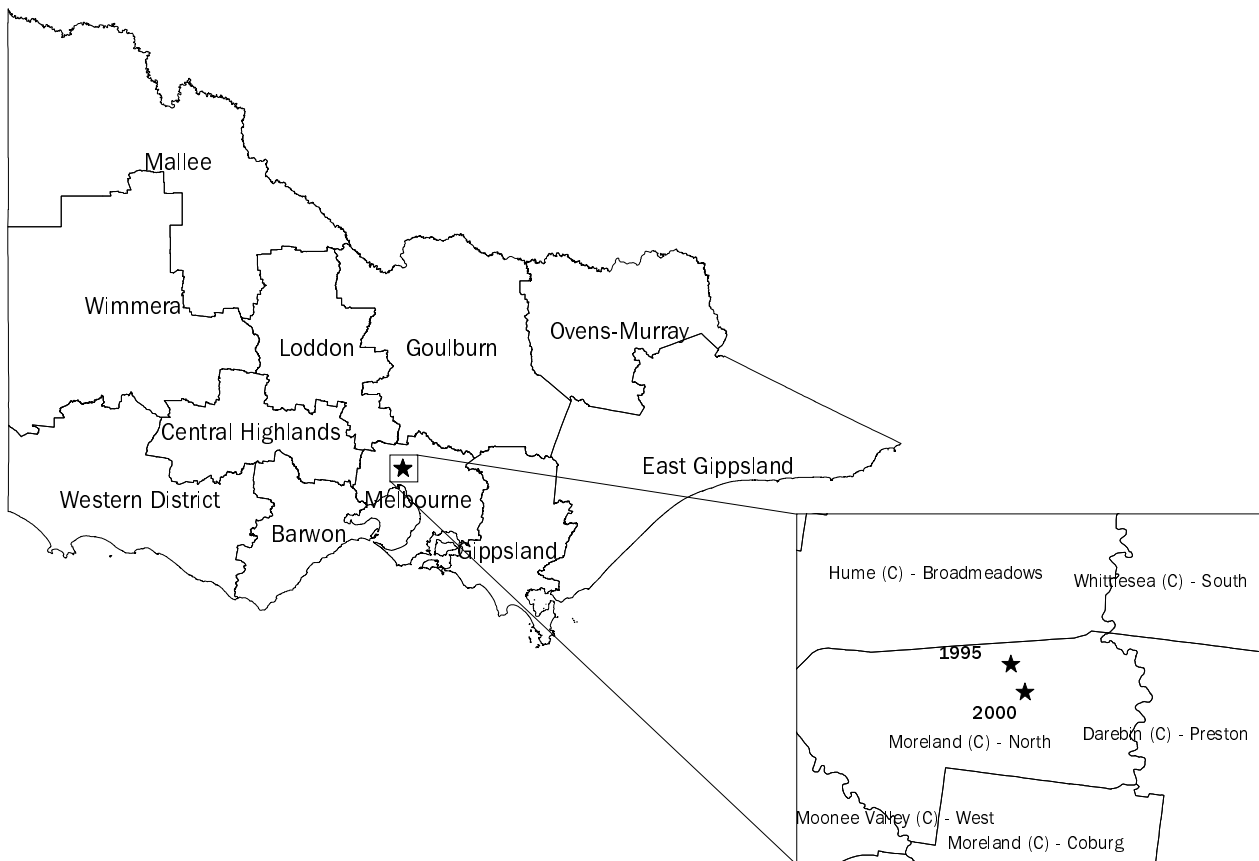

In 1999–2000, half of the LGAs in Victoria balance (24 out of 48) gained or had a constant population. These LGAs were dominated by regional centres and some coastal areas. The city of Greater Geelong recorded the largest increase in population in Victoria balance, gaining 2,600 people (1.4%) in 1999–2000, followed by Greater Shepparton (1,000 people or 1.9%), Ballarat (990 or 1.2%), the shire of Surf Coast (730 or 3.8%) and the city of Greater Bendigo (700 or 0.8%).

The fastest growing LGAs in the balance of Victoria were the shires of Surf Coast, an area not far from Geelong (growing by 3.8%), Golden Plains (2.8% or 400), and Bass Coast (2.8% or 630), and the cities of Wodonga (1.9% or 590) and Greater Shepparton (1.9%).

CENTRE OF POPULATION

Victoria's centre of population moved 0.7 km southward within the city of Moreland over the period June 1995 to June 2000, reflecting population growth in the capital city compared to the balance of the State over this period.

Centre of population Victoria, June 1995 and June 2000

POPULATION CHANGE QUEENSLAND

STATE SUMMARY

The ERP of Queensland at June 2000 was 3.6 million, an increase of 59,500 people since June 1999. Queensland's growth rate of 1.7% in 1999–2000 was slightly above that for 1998–99 (1.6%) and slightly lower than the average annual growth rate of 1.8% for the five years ending June 2000.

THE SOUTH-EAST

The south-east corner of Queensland (the Moreton and Brisbane SDs) experienced an increase of 47,500 in 1999–2000, accounting for 79.9% of the total population growth of Queensland. The proportion of the total Queensland population living in this region increased to 65.1% at June 2000, from 63.8% at June 1995.

Moreton was the fastest growing SD in Queensland, increasing 16.5% over the five year period to June 2000, or by an average annual growth rate of 3.1%. In the year to June 2000 Moreton increased by 19,600 (or 2.9%).

Brisbane SD experienced an average annual growth rate of 1.8% for the five year period to June 2000 and an increase of 1.7% (27,900 people) since June 1999. An estimated 1.6 million people lived in Brisbane SD at June 2000, representing 45.6% of Queensland's population.

GROWING LOCAL GOVERNMENT AREAS

The two largest LGAs in Queensland again experienced the largest increases in population. The City of Brisbane recorded an increase of 14,700 and the City of Gold Coast increased by 13,300. Brisbane's growth rate of 1.7% for the year to 2000 was slightly less than the average annual growth rate (1.8%) for the five year period to June 2000, while the Gold Coast's growth rate (3.4%) over the past year was equal to the average annual growth rate since June 1995.

Within Brisbane, new housing estates accounted for the large increases experienced in a number of SLAs. As in 1998–99, Fortitude Valley — Inner experienced outstanding growth in 1999–2000 (up 102%), largely due to increased occupancy of new apartment developments within the SLA.

The southern SLA of Doolandella–Forest Lake again had the largest growth in Brisbane, with an increase of 1,500 (12.8%) in 1999–2000, compared with an increase of 2,000 (20.1%) in 1998–99. This was again due to the continuing high growth of families in new housing estates.

Within Gold Coast City the largest population increase was recorded in the low-density SLA of Guanaba–Currumbin Valley, which increased by 2,000 people in the year to June 2000, a 9.7% increase. This was also the largest numerical growth for any SLA in Queensland. Arundel was the fastest growing SLA within Gold Coast City, increasing 19.6% (1,000) during 1999–2000.

POPULATION CHANGE QUEENSLAND *continued*

GROWING LOCAL GOVERNMENT AREAS *continued*

The fastest growing LGA in Queensland was Mornington (S) in the State's north-west (which increased 5.0% or 60), followed by the neighbouring Burke (S) which grew by 40 people or 4.0% in 1999–2000. Noosa (S), Crow's Nest (S) and Thuringowa (C) all continued to experience fast growth (3.9%), with Noosa slowing slightly from the 1998–99 level of 4.0%, while increases in rates of growth were evident in Crow's Nest (S) (3.3% in 1998–99) and Thuringowa (C) (3.2% in 1998–99).

LGAs WITH LARGEST AND FASTEST POPULATION GROWTH, Queensland

LGA	1999–2000.....		LGA	1999–2000.....	
	no.	%		no.	%
LARGEST GROWTH			FASTEST GROWTH		
Brisbane (C)	14 700	1.7	Mornington (S)	60	5.0
Gold Coast (C)	13 300	3.4	Burke (S)	40	4.0
Redland (S)	3 600	3.2	Crow's Nest (S)	380	3.9
Maroochy (S)	3 200	2.7	Noosa (S)	1 600	3.9
Pine Rivers (S)	2 600	2.2	Thuringowa (C)	1 900	3.9

DECLINING RURAL POPULATIONS

The trend of declining populations in rural areas continued, with the SDs of South West (–1.0%), Central West (–0.9%) and North West (–0.2%) all showing average annual population declines over the five year period to June 2000.

Some of the largest declines were in mining areas, particularly evident in shires surrounding Mackay. The population of Duaringa (S) lost 190 people (or –2.2%) in the year to June 2000, Broadsound (S) lost 130 people (–1.8%) and Bowen (S) lost 100 people (–0.8%). For all three LGAs the 1999–2000 rates of decline were greater than their 1995–2000 average annual rates of decline.

The City of Rockhampton experienced the largest decline (–320) in Queensland, largely associated with an emerging trend for people to reside nearer the coast in Livingstone (S) and to commute to work in Rockhampton.

LGAs WITH LARGEST AND FASTEST POPULATION DECLINE, Queensland

POPULATION CHANGE QUEENSLAND *continued*

PRISON POPULATIONS IN QUEENSLAND

The ERP of an area includes residents of prisons and other institutions. For a few SLAs in Queensland, prison populations form a significant proportion of the total SLA population. In the SLA of Wacol, for example, 1,750 prisoners accounted for 31% of the population for June 2000.

During the year 1999–2000 there was a relatively high number of movements between prisons within Queensland, affecting the population of a number of SLAs. The most noticeable was the relocation of the Brisbane Women's Prison from Dutton Park to Wacol, which influenced Dutton Park experiencing a relatively large decline in population in the year to June 2000. Both SLAs are within the City of Brisbane.

CENTRE OF POPULATION

At June 2000 Queensland's centre of population was located in Gayndah (S). Between June 1995 and June 2000 Queensland's centre of population moved 6 km south-eastward, largely reflecting growth in the south-eastern cities (Brisbane and the Gold Coast) and coastal areas.

Centre of population Queensland, June 1995 and June 2000

POPULATION CHANGE SOUTH AUSTRALIA

STATE SUMMARY

South Australia's ERP at June 2000 was 1.5 million, an increase of 5,200 (0.4%) since June 1999. In the last five years South Australia's population has increased by 28,200, giving an average annual growth rate during this period of 0.4%.

Since 1991–92 South Australia has gained population through natural increase and net overseas migration, but lost population through net interstate migration. During 1999–2000, 6,500 people were added to South Australia's population through natural increase, and 3,500 people through net overseas migration. In the same year 4,800 more people chose to leave South Australia for other States and Territories than chose to settle in South Australia.

CONTINUED POPULATION GROWTH IN ADELAIDE

The population of the Adelaide SD at June 2000 was 1.1 million, an increase of 3,700 people (0.3%) since June 1999. This was slightly slower growth than the rest of the State (0.4%) over the same period. Adelaide's share of South Australia's population has remained steady over the past five years with 73% of South Australians resident within the capital city.

Inner Adelaide

Within the Adelaide SD the fastest population growth between June 1999 and June 2000 was experienced in the Northern Statistical Subdivision (SSD) with an increase of 0.6%, which was slightly higher than for the previous year. This increased growth was due largely to increases in the LGAs of Playford (C) (700) and Tea Tree Gully (C) (530). Growth in the Southern SSD slowed to 0.4% although the LGA of Onkaparinga (C) (740) had the largest population increase of all LGAs in the State. Within the Eastern SSD the LGA with the fastest increase in population between 1999 and 2000 was Adelaide (C) increasing by 290 or 2.2%. Apartment developments within the City of Adelaide continue to attract people to an inner city lifestyle.

Outer Adelaide

The Outer Adelaide SD continued to have the fastest population increase of all SDs in the State. Between June 1999 and June 2000 the population of this area increased by 1,600 (1.5%). Considerable growth continued in the Mt Lofty Ranges SSD (1.7%), to the east of the Adelaide metropolitan area, driven by growth in the LGA of Mount Barker (DC) (up 550 or 2.5%). The Fleurieu SSD to the south increased by 620 (2.0%), with Alexandrina (DC) up 340 (2.0%), Victor Harbour (DC) up 220 (2.1%) and Yankalilla (DC) up 60 (1.5%). After slowing somewhat in 1998–99, growth in the Barossa SSD to the north of the metropolitan region has picked up with the LGA of Light (DC) increasing by 260 people between June 1999 and June 2000. Continuing high growth in these urban fringe areas in recent years reflects an expansion of Adelaide's commuting zone.

POPULATION CHANGE SOUTH AUSTRALIA *continued*

GROWTH TREND CONTINUES IN EYRE SD

In 1999–2000 the Eyre SD had the second fastest population increase of all SDs in the State, behind the Outer Adelaide SD. Between June 1999 and June 2000 the population of Eyre SD increased by 260 (0.8%) continuing the signs of recovery shown in 1998–99.

RESIDENTIAL GROWTH

The LGAs with the largest increase in population between June 1999 and June 2000 were Onkaparinga (C) (740) and Playford (C) (700), both in the Adelaide SD. The LGAs of Robe (DC) (4.4%) in the State's south-east and Light (DC) (2.6%) in the Outer Adelaide SD were the fastest growing. Roxby Downs (M) and Victor Harbor (DC) were the LGAs with the highest average annual growth rate over the last five years.

LGAs WITH LARGEST AND FASTEST POPULATION GROWTH, South Australia

LGA	1999–2000.....		LGA	1999–2000.....	
	no.	%		no.	%
LARGEST GROWTH			FASTEST GROWTH		
Onkaparinga (C)	740	0.5	Robe (DC)	60	4.4
Playford (C)	700	1.0	Light (DC)	260	2.6
Mount Barker (DC)	550	2.5	Mount Barker (DC)	550	2.5
Tea Tree Gully (C)	530	0.5	Roxby Downs (M)	100	2.4
Alexandrina (DC)	340	2.0	Adelaide (C)	290	2.2

For the first time in a number of years the SLA of Roxby Downs (M) in the State's far north has been displaced as the SLA with the fastest population growth. Between June 1999 and June 2000 the residential area of Playford (C) — Hills increased by 4.6% to record the State's highest percentage growth. The SLA of Roxby Downs (M) remains the SLA with the fastest average annual growth rate over the last five years in South Australia. This has resulted from the expansion of the Olympic Dam project and from increases in the number of families moving into the area following recent developments to the town's infrastructure and services.

Most of the other fast growing SLAs in South Australia, both in terms of percentage and numerical growth, tended to be located within the Adelaide and Outer Adelaide SDs. As has been the case in the previous two years, Tea Tree Gully (C) — North in the north-east of the Adelaide metropolitan area was the SLA with the largest increase in ERP between June 1999 and June 2000, increasing by 850 (3.4%). This SLA has been the site of some of the more significant housing developments which have occurred in the Adelaide metropolitan area in recent years.

POPULATION CHANGE SOUTH AUSTRALIA *continued*

DECLINES IN RURAL NORTH

The LGAs with the fastest population declines between June 1999 and June 2000, Peterborough (DC) (-3.6%) and Whyalla (C) (-1.8%), were located in more remote areas of the State's north. The LGAs of Whyalla (C) (-420) in the State's north and Wattle Range (DC) (-190) in the State's south-east had the largest declines in population between June 1999 and June 2000.

Of the 68 LGAs in South Australia, population decreases were recorded in over a third (25 LGAs). With the exception of Adelaide Hills (DC) none of the declining LGAs were within the Adelaide or Outer Adelaide SDs.

LGAs WITH LARGEST AND FASTEST POPULATION DECLINE, South Australia

LGA	1999-2000.....		LGA	1999-2000.....	
	no.	%		no.	%
LARGEST DECLINE			FASTEST DECLINE		
Whyalla (C)	-420	-1.8	Peterborough (DC)	-80	-3.6
Wattle Range (DC)	-190	-1.5	Whyalla (C)	-420	-1.8
Prospect (C)	-110	-0.6	Flinders Ranges (DC)	-30	-1.5
Port Pirie City and Dists. (M)	-110	-0.6	Wattle Range (DC)	-190	-1.5
West Torrens (C)	-90	-0.2	Karoonda East Murray (DC)	-20	-1.4

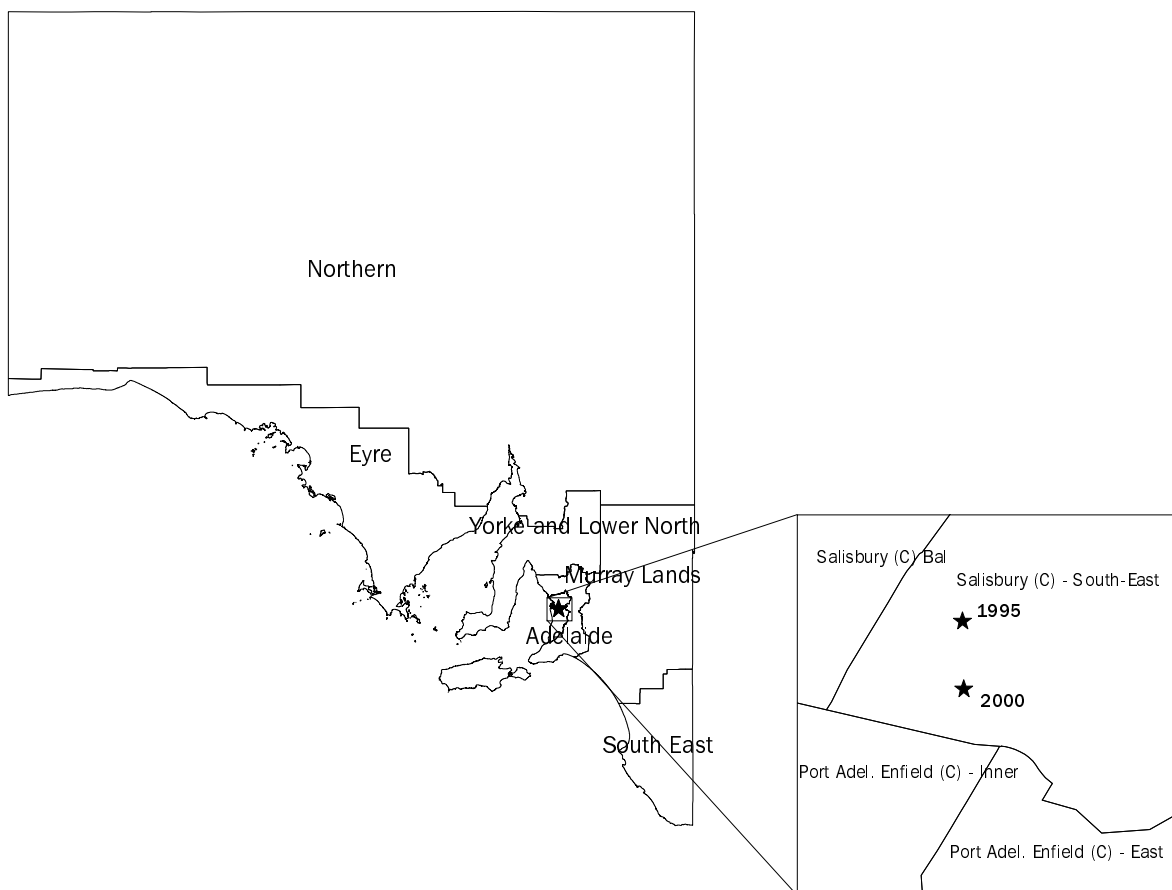

In a trend similar to that for LGAs, most of the SLAs with the fastest population declines between June 1999 and June 2000 were located in the rural regions in the north of the State, with the populations of Peterborough (DC) and Whyalla (C) declining -3.6% and -1.8% respectively. The largest numeric decrease in population was experienced in Whyalla (C) with a decline of 420 people. Of the other SLAs to experience large population declines, most were located in the Adelaide metropolitan region with Tea Tree Gully (C) — Central experiencing a decline of 310 people.

POPULATION CHANGE SOUTH AUSTRALIA *continued*

CENTRE OF POPULATION

At June 2000 South Australia's centre of population was located in the LGA of Salisbury (C). The centre of population has moved only slightly south (0.5 km) since June 1995 reflecting growth in the Adelaide area, and decline in the Northern SD, compared to the rest of the State.

Centre of population South Australia, June 1995 and June 2000

POPULATION CHANGE WESTERN AUSTRALIA

STATE SUMMARY

The Western Australia population increased by 26,300 (1.4%) in the year to June 2000 to 1.9 million. This growth rate was the third fastest in Australia (after Queensland and the Northern Territory), and was slightly slower than Western Australia's average growth of 1.7% per year for the five years to June 2000.

In 1999–2000, natural increase accounted for just over half of Western Australia's growth while net overseas migration accounted for just under half of the growth. Western Australia experienced a net interstate migration loss of 700 people.

Three-quarters of all Western Australia's population growth occurred in Perth (SD) in 1999–2000. The increase of 19,500 people in the year to June 2000 produced a growth rate of 1.4% and a total Perth population of 1.4 million people, or 73% of the total Western Australia population. The population in the balance of State increased by 6,800 (1.4%) in the year to June 2000, with 79% of this growth in the South West SD.

The Kimberley accounted for 16% of the growth outside Perth and was Western Australia's fastest growing SD, increasing by 3.6% (1,100 people) between June 1999 and June 2000.

LARGEST GROWTH IN PERTH FRINGE

Western Australia's largest population growth LGAs were associated with the low-density residential housing developments in the Perth metropolitan fringe areas. Wanneroo (C) and Swan (S) in the north were the LGAs with the first and second largest increases, up 3,600 (4.8%) and 2,400 (3.1%) respectively. In the south-west fringe, Cockburn (C) and Rockingham (C) had the State's third and fourth largest LGA growth with increases of 2,300 (3.5%) and 1,900 (2.8%) respectively. Gosnells (C) in the south-east had the fifth largest increase, adding 1,900 people, or 2.3%. These five LGAs accounted for 62% of Perth's growth in 1999–2000.

The established inner city areas generally had less growth than the outer areas, the main exception being the City of Perth which had a population increase of 430 (6.7%) in the year to June 2000. This is associated with medium and high-density housing developments, particularly on the eastern edge of the CBD.

LGAS WITH LARGEST AND FASTEST POPULATION GROWTH, Western Australia

LGA	1999–2000.....		LGA	1999–2000.....

Rockingham (C)	1 900	2.8	Busselton (S)	1 200	5.7
Gosnells (C)	1 900	2.3	Broome (S)	610	5.6

POPULATION CHANGE WESTERN AUSTRALIA *continued*

FAST GROWTH CONTINUES IN SOUTH-WEST

The fastest growing LGA in Western Australia was Dardanup (S) with a population of 9,300 at June 2000, an increase of 7.8% (670) from June 1999. This continues the LGA's trend of consistent high growth since 1996. Dardanup is in the south-west region of Western Australia and is close to the large regional centre of Bunbury. Other LGAs in the South West experiencing fast growth in 1999–2000 included Busselton (S) up by 5.7% (1,200), Harvey (S) up by 5.1% (920) and Augusta–Margaret River (S) up by 4.3% (410). The south-west region is popular among retirees and young families.

GROWTH IN OTHER REGIONS OF WESTERN AUSTRALIA

In the Kimberley, all LGAs experienced growth in 1999–2000. The Shire of Broome was the fifth fastest growing LGA in the State with a 5.6% (610 people) increase in the year to June 2000. The other fast growing LGA population in the Kimberley was Wyndham–East Kimberley (S) which increased by 4.1% (300 people).

Chittering (S), in the Midlands SD, was the second fastest growing LGA in the State increasing by 7.3% (190) in the year to June 2000. Gingin (S) was the other fast growing LGA in the Midlands SD, increasing by 3.1% (120).

Fast growing LGAs in the Central SD were Upper Gascoyne (S) and Irwin (S) growing by 4.8% (20) and 4.0% (120) respectively in the year to June 2000. In Lower Great Southern SD, Denmark (S) was the fastest growing LGA increasing by 4.4% (200) in the year to June 2000. In the South Eastern SD, growth in the Shire of Esperance slowed to 1.7% (220) while Ngaanyatjarraku (S) was the fastest growing LGA increasing by 4.3% (70) in the year to June 2000.

DECLINING LGAS

Population decreases were recorded in 64 of Western Australia's 142 LGAs in the year to June 2000. While the fastest declining LGAs were outside the Perth metropolitan area, the largest decline was in the metropolitan LGA of Vincent (T), declining by 410 (–1.6). East Pilbara (S) was the fastest declining LGA in the State followed by Coolgardie (S). These two shires were the fastest declining LGAs in Australia. The population in East Pilbara (S) declined by 3.9% (a loss of 270) in the year to June 2000, while Coolgardie's population dropped by 3.6% (–180). Every LGA in the Pilbara SD declined in the year to June 2000.

Roeboorne (S)	–190	–1.3	Cuballing (S)	–20	–3.1

POPULATION CHANGE WESTERN AUSTRALIA *continued*

POPULATION CENTRE

Western Australia's centre of population at June 2000 was located in the south-western LGA of Toodyay (S). The centre of population has moved 1 km south in the 5 years to June 2000, reflecting greater population growth in the Perth and South West regions compared to the rest of the State over this period.

Centre of population Western Australia, June 1995 and June 2000

POPULATION CHANGE TASMANIA

POPULATION DECLINE SLOWS

For the fourth year in a row Tasmania experienced a decline in population. At June 2000 the ERP of Tasmania was 470,400, a decline of 400 people or -0.1% since June 1999. Since June 1995 the population of Tasmania has declined by 3,300 people.

Tasmania's population decline for the year ending June 2000 was the slowest annual decline experienced since growth became negative in 1996-97. In 1999-2000 Tasmania's population decline was due to a net loss through interstate migration (-3,000), which outweighed the gain made through natural increase (2,200) and overseas migration (400).

HOW THE REGIONS FARED

In 1999-2000 the Southern SD was the only SD in Tasmania to experience an increase in population, up by 100 people. The growth rate of 0.3% for the Southern SD was equal to the average annual growth rate for the past five years. The remaining SDs continued to experience population decline. Greater Hobart decreased by 160 people (or -0.1%) since June 1999 while the Northern SD decreased by 90 (-0.1%). The Mersey-Lyell SD experienced the largest and fastest loss, down 280 (-0.3%). Although Latrobe LGA experienced one of the largest and fastest population increases in the State in 1999-2000, most of the other LGAs in the Mersey-Lyell region declined.

GROWTH IN LESS THAN FORTY PERCENT OF TASMANIAN LGAS

In the year to June 2000, less than 40% (11 out of 29) of Tasmania's LGAs increased their population, albeit at a lower rate than Australia as a whole (1.2%). In 1999-2000 Kingborough, a fringe urban area south of Hobart, experienced the largest increase in population of all LGAs in Tasmania. This LGA increased by 160 people or 0.6% in the year to June 2000, compared to an average annual growth rate of 0.4% over the past five years. The second largest increase in population occurred in Brighton (an increase of 80 or 0.6%), a fringe urban area just north of Hobart.

LGAs WITH LARGEST AND FASTEST POPULATION GROWTH, Tasmania

LGA	1999-2000.....		LGA	1999-2000.....	
	no.	%		no.	%
LARGEST GROWTH			FASTEST GROWTH		
Kingborough (M)	160	0.6	Glamorgan/Spring Bay (M)	40	1.0
Brighton (M)	80	0.6	Latrobe (M)	70	0.9
Latrobe (M)	70	0.9	Brighton (M)	80	0.6
Meander Valley (M)	70	0.4	Kingborough (M)	160	0.6
Huon Valley (M)	60	0.4	Kentish (M)	30	0.5

POPULATION LOSS IN THE CITIES

The cities of Hobart and Launceston experienced the largest population declines in Tasmania in 1999-2000. The decline in Hobart's population (-0.6%, or 260 people) was slightly faster in 1999-2000 than the annual average decline for the last five years (-0.5%). Launceston decreased by 140 people or -0.2%. Losses in the larger LGAs are greatly affected by interstate migration loss.

POPULATION CHANGE TASMANIA *continued*

LGAs WITH LARGEST AND FASTEST POPULATION DECLINE, Tasmania

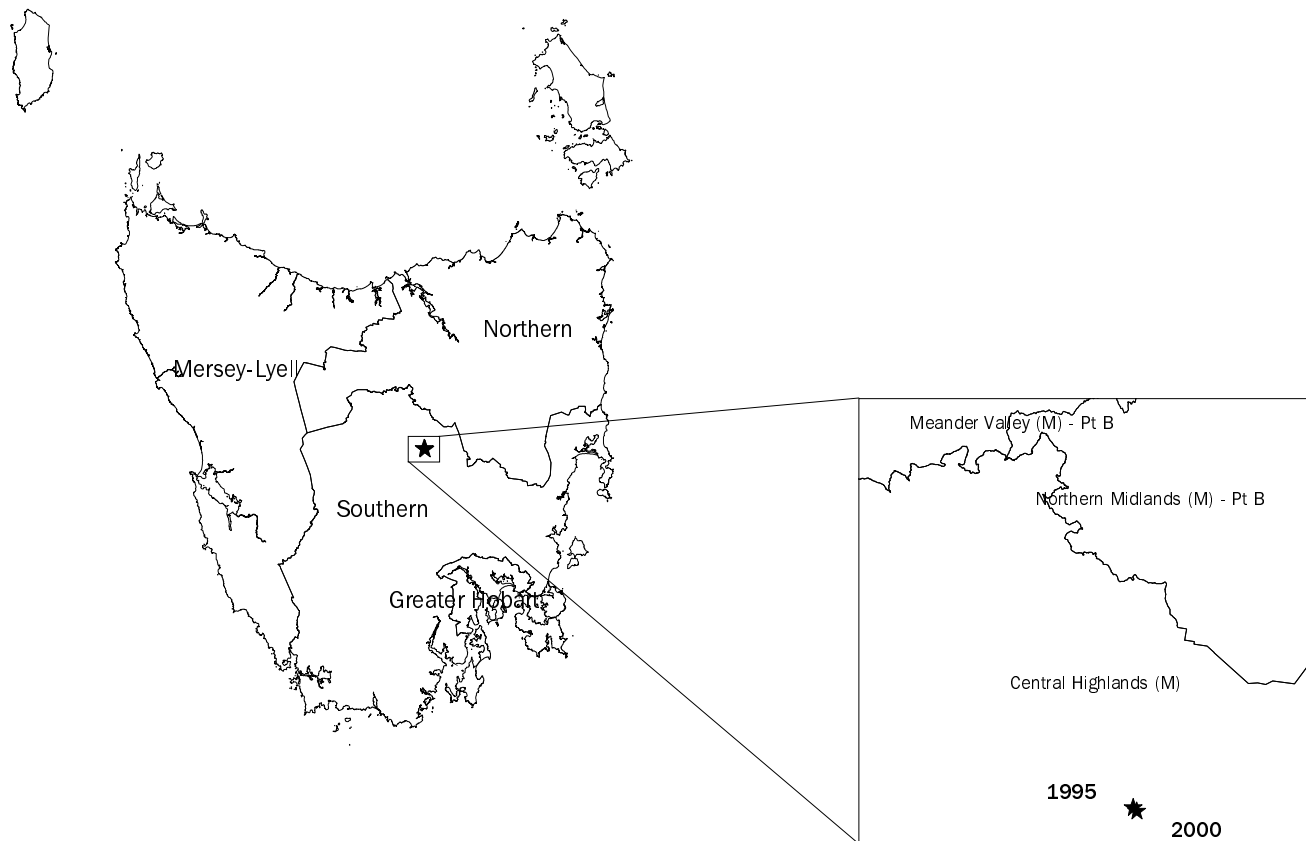

LGA	1999–2000.....		LGA	1999–2000.....	
	no.	%		no.	%
LARGEST DECLINE			FASTEST DECLINE		
Hobart (C)	-260	-0.6	West Coast (M)	-100	-1.8
Launceston (C)	-140	-0.2	Flinders (M)	-10	-1.5
Burnie (C)	-130	-0.6	Tasman (M)	-30	-1.1
West Coast (M)	-100	-1.8	King Island (M)	-20	-0.9
Devonport (C)	-50	-0.2	Break O'Day (M)	-50	-0.8

While West Coast, a relatively small LGA, continued to experience the fastest population decline in Tasmania, it declined at a slower rate in 1999–2000 (-1.8%) than over the last five years (an average annual decline of -2.8%).

CENTRE OF POPULATION

The centre of Tasmania's population is located in the municipality of Central Highlands and moved only slightly south-east (0.5 km) over the period June 1995 to June 2000, reflecting higher population growth in Southern SD, and greater decline in Mersey–Lyell SD compared to the rest of the State.

Centre of population Tasmania, June 1995 and June 2000

POPULATION CHANGE NORTHERN TERRITORY

GROWTH SLOWS IN THE TERRITORY

The ERP of the Northern Territory in June 2000 was 195,500, an increase of 2,700 since June 1999. Population growth in the Northern Territory slowed in 1999–2000 to 1.4%, from an average annual growth rate of 1.9% experienced for the five years to June 2000. Nevertheless, the Northern Territory's growth rate almost equalled the growth rate for Western Australia with only Queensland recording a higher rate. Since June 1995 the Northern Territory's population has increased by 10.1% (17,900).

Much of the Northern Territory's population growth comes from natural increase (2,700 people). In the year to June 2000 the Northern Territory gained 900 people from overseas migration and lost 900 people through interstate migration.

POPULATION GROWTH IN DARWIN CITY

Population growth was faster in Darwin SD in 1999–2000 (2.2%) than in the balance of the Territory (0.7%). The population of Darwin SSD increased for the first time since 1996–97, from 68,400 in June 1999 to 68,800 in June 2000 (0.6%). Some of the largest population increases in 1999–2000 occurred in the SLAs of City — Inner (230 or 9.6%), Coconut Grove (180 or 8.0%), Stuart Park (210 or 6.8%) and Larrakeyah (210 or 6.3%). This can largely be explained by the promotion and building of new residential housing (mostly flats and units) in these areas.

While there was positive growth in the Darwin City SSD, almost two out of three SLAs (19 out of 29) in this region experienced zero or negative growth in 1999–2000. Some of the largest population declines experienced in the Darwin City SSD in 1999–2000 occurred in the SLAs of Nightcliff, Leanyer, Karama, Rapid Creek and Malak with most of the northern suburbs showing a decline. This decline can be partially explained by the trend for Darwin residents to move out of the older suburbs to more affordable (or, in some cases, higher quality) housing in the new suburbs of Palmerston or to higher quality, lower maintenance properties in and around the city centre.

SLAS WITH LARGEST POPULATION GROWTH AND DECLINE, Northern Territory

SLA	1999–2000.....		SLA	1999–2000.....	
	no.	%		no.	%
LARGEST GROWTH			LARGEST DECLINE		
Palmerston (T) Bal	1 400	23.0	Nightcliff	-80	-2.1
City — Inner	230	9.6	Leanyer	-80	-1.6
Stuart Park	210	6.8	Nhulunbuy	-60	-1.7

Coconut Grove	180	8.0	Karama	-50	-1.0

HIGH POPULATION GROWTH IN PALMERSTON–EAST ARM AREA

Palmerston–East Arm SSD was the largest growth area in the Northern Territory, accounting for almost three out of every five persons (1,600 or 57.1%) added to the Northern Territory's population in 1999–2000. Since June 1995 Palmerston LGA (which includes Driver, Gray, Moulden, Woodroffe and Palmerston (T) Bal) has increased by 77.5% from 11,800 to 21,000. This growth can be attributed to Palmerston being a new residential area which provides a range of housing options attractive to a broad range of socioeconomic groups.

The fastest growing area in Palmerston LGA was Palmerston (T) Bal SLA (which includes the newly developed suburbs of Durack, Gunn, Bakewell, Rosebery and Marlow Lagoon) which grew by 23.0% from 5,900 to 7,200 in 1999–2000. The second fastest population increase in Palmerston LGA was Woodroffe SLA which grew from 3,500 to 3,600 (2.6%) in 1999–2000.

POPULATION GROWTH IN DARWIN RURAL AREAS

Population growth in the Darwin Rural SSD slowed in 1999–2000 to 1.2%, from an average annual growth rate of 4.0% over the five years to June 2000. The slowing of the growth is largely due to the near completion of the Department of Defence's Army Presence in the North project. Under this project, more than 2,000 soldiers and their families have relocated from New South Wales and Victoria to the Darwin region over the last 10 years as part of the move of the Army's 1st Brigade. The 1st Brigade is based at Robertson Barracks which is located in Darwin Rural SSD. The relocation of the 1st Brigade is expected to be completed by February 2001.

Litchfield (S) — Pt B increased by 160 (1.2%) in 1999–2000, primarily due to the continued subdivision of land for low density residential housing throughout the area, particularly in Humpty Doo, Virginia, Bees Creek and Noonamah.

POPULATION MOVEMENTS IN OTHER MAJOR NORTHERN TERRITORY TOWNS

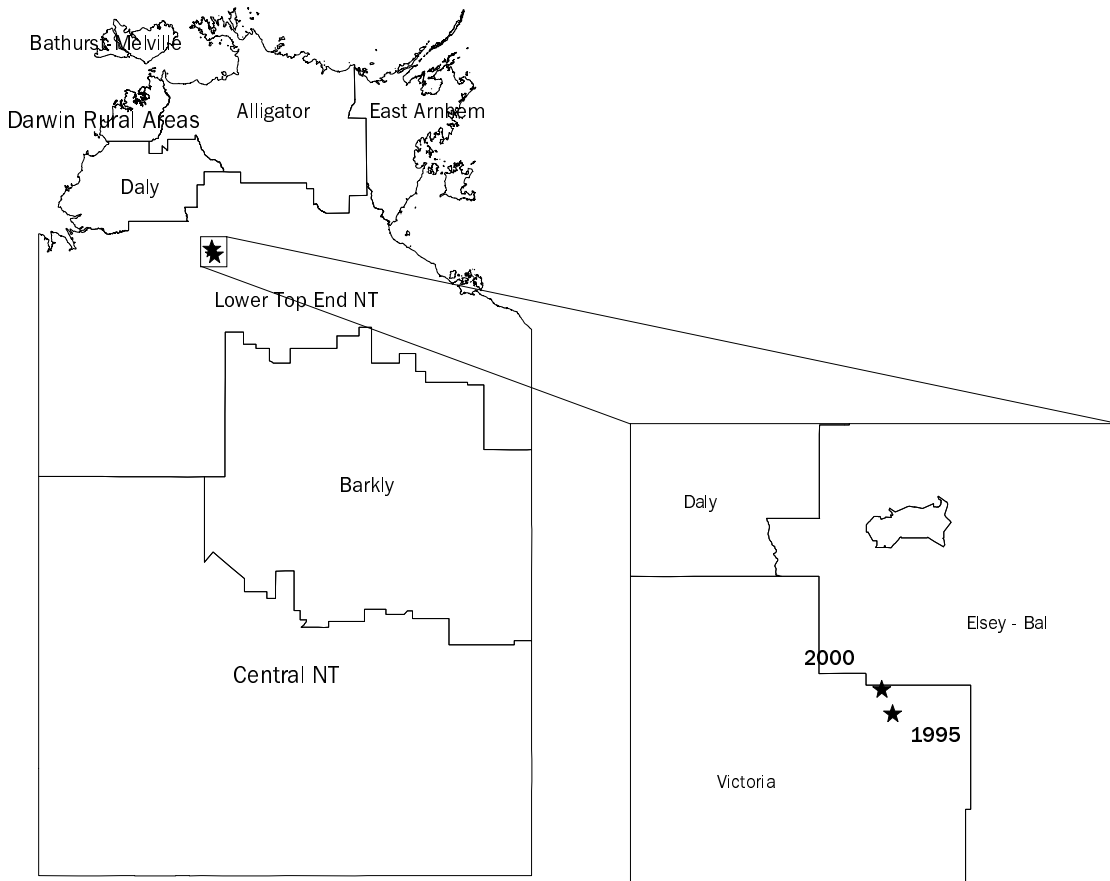

Alice Springs (T) continued to grow marginally increasing from 25,500 to 25,600 (0.2%) from 1999–2000. Population growth slowed in both Tennant Creek (T) and Katherine (T) between June 1999 and June 2000 to 0.6% and 0.3% respectively.

POPULATION CHANGE NORTHERN TERRITORY *continued*

CENTRE OF POPULATION

Over the five years to June 2000, the Northern Territory's centre of population has moved 13 km northward within the north-east corner of Victoria SLA. This movement reflects population increases in the north-west regions of the Northern Territory, such as Darwin City and Palmerston–East Arm, compared to the rest of the Territory.

Centre of population Northern Territory, June 1995 and June 2000

POPULATION CHANGE AUSTRALIAN CAPITAL TERRITORY

ACT SUMMARY

The population of the ACT increased by 1,500 people (or 0.5%) in the year to June 2000, to 310,800. Natural increase contributed 2,600 people while population was lost due to overseas migration (-260) and interstate migration (-840). The ACT growth rate of 0.5% was slightly higher than the average annual growth for the five years to June 2000 (0.4%).

Gungahlin-Hall SSD continued as ACT's principal region of population growth, with an increase of 1,600 people (up 8.9% in the year to June 2000). As a proportion of the total ACT population, Gungahlin-Hall almost doubled in the five year period to June 2000, from 3.3% in June 1995 to 6.2% in June 2000.

Increases in population were also recorded for Belconnen (up 340) and North Canberra (up 210), while Tuggeranong (-230), Weston Creek-Stromlo (-250) and Woden Valley (-110) experienced population losses.

SLA GROWTH

SLAs in the Gungahlin-Hall SSD continued to experience strong growth over the past year. Nicholls had the largest population increase in the ACT, of 490 (up 14.0% since June 1999), while Ngunnawal and Amaroo recorded the second and third largest increases (up 480 and 470 respectively). Palmerston increased by 140 people.

The suburban SLAs of Dunlop (up 410) and Gordon (up 270), on the north-western and southern fringes of Canberra respectively, experienced large gains in population in the year to June 2000. At the opposite end of the housing spectrum, strong population growth was recorded in inner Canberra, with apartment dwellings accounting for an increase of 180 people in the City SLA. Watson, with recently completed townhouse developments, experienced the fifth largest increase in population in the ACT, up by 330 people.

SLA DECREASE

The largest population declines in the year to June 2000 occurred in Campbell and Kambah which each lost 120 people (-3.8% and -0.7% respectively). O'Connor and Griffith each lost 100 people (-2.1% and -2.4% respectively).

POPULATION CHANGE AUSTRALIAN CAPITAL TERRITORY

CENTRE OF POPULATION

Over the five years to June 2000 the centre of the ACT's population has moved 0.5 km northward, to the border of Curtin and Yarralumla SLAs. This movement reflects the population growth experienced in the outer northern suburbs over this period.

Centre of population ACT, June 1995 and June 2000

(a) Average annual growth rate.

EXPLANATORY NOTES

INTRODUCTION

1 For Australia, this publication contains estimates of the resident population of LGAs, SLAs, SSDs, SDs, Statistical Districts, States, Territories and Australia. For New Zealand, this publication contains estimates of the resident population of Regions, Territorial Authorities and New Zealand.

2 LGAs are ranked within States and Territories according to both largest and fastest growth between June 1999 and June 2000, allowing this publication to identify, in two ways, areas in Australia with the largest and fastest increases and decreases in population.

3 Following the 1992 amendment to the Acts Interpretation Act to include the Indian Ocean Territories of Christmas Island and Cocos (Keeling) Islands as part of geographic Australia, population estimates at dates commencing from July 1993 include estimates for these two Territories. To reflect this change, another category of the State/Territory classification was created, known as Other Territories. Other Territories include Jervis Bay Territory, Christmas Island and the Cocos (Keeling) Islands. Prior to July 1993, Jervis Bay Territory was included in estimates for the Australian Capital Territory. Data for Other Territories are shown in the table below.

ESTIMATED RESIDENT POPULATION, Other Territories

.....			
AT 30 JUNE.....			
<i>Territory</i>	1995	1999	2000
.....			
Christmas Island	1 717	1 892	1 910
Cocos (Keeling) Islands	624	592	592
Jervis Bay Territory	694	692	695
Other Territories	3 035	3 176	3 197
.....			

ACCURACY

4 To meet the conflicting demand for accuracy and timeliness there are three estimates of sub-State populations. Preliminary estimates are available seven months after the reference date, revised estimates are available a year later and final estimates after the following census. The estimates in this publication are preliminary for 2000, revised for 1999 and final for 1995.

5 In recognition of the inherent inaccuracy involved in population estimation, population figures less than 1,000 in the text and accompanying tables are rounded to the nearest ten, figures over 1,000 are rounded to the nearest hundred, and figures over 1 million are rounded to the nearest 100,000. While unrounded figures are provided in the core tables, accuracy to the last digit is not claimed and should not be assumed.

ESTIMATED RESIDENT POPULATION – AUSTRALIA

6 Estimated resident population (ERP) are estimates of the Australian population obtained by adding to the estimated population at the beginning of each period the components of natural increase (on a usual residence basis) and net overseas migration.

7 For the States and Territories, account is also taken of estimated interstate movements involving a change of usual residence. After each census, estimates for the preceding intercensal period are revised by incorporating an additional adjustment (intercensal discrepancy) to ensure that the total intercensal increase agrees with the difference between the ERPs at the two respective census dates.

8 Estimates of the resident population are based on adjusted (for underenumeration) census counts by place of usual residence, to which are added the number of Australian residents estimated to have been temporarily overseas at the time of the Census. Overseas visitors in Australia are excluded from this calculation.

9 The concept of ERP links people to a place of usual residence within Australia. Usual residence is that place where each person has lived or intends to live for six months or more from the reference date for data collection.

Estimation of Statistical Local Area populations

10 In Census years the estimated resident population (ERP) as at 30 June for each Statistical Local Area (SLA)/Local Government Area (LGA) is based on usual residence census counts. To these counts are added an adjustment for net census undercount and the number of residents temporarily overseas at the Census date. As the 1996 Census was held on 6 August, further adjustments were made to obtain the ERP at 30 June 1996.

11 For post-censal years, the absence of migration data at the SLA level means that it is not possible to estimate SLA populations by taking into account natural increase and net migration. Instead, ERPs are calculated using a mathematical model. Local knowledge, including that advised by local governments, may be used to adjust the outcome of the model for a particular SLA.

12 In the mathematical model a relationship is established between changes in population and changes in other indicators over the period between the two most recent censuses.

13 The choice of indicators varies across the States and Territories, depending on availability, and includes dwelling approvals, electricity connections, Medicare enrolments and drivers licenses. Changes in these indicators are then used to estimate changes in the population of each area since the last census. The choice of indicators also varies across SLAs depending on aspects such as whether the SLA is urban or rural, is growing or declining, and whether the area has a high or low proportion of houses or medium and high density dwellings.

14 A more detailed explanation of the concept of ERP, as adopted by the ABS for official population estimates, is contained in *Demographic Estimates and Projections: Concepts, Sources and Methods, Statistical Concepts Library*, ABS website <URL: <http://www.abs.gov.au>>

EXPLANATORY NOTES *continued*

ESTIMATED RESIDENT POPULATION – NEW ZEALAND

15 The base population for the 2000 New Zealand estimates is the estimated resident population for each area at 30 June 1996. The 1996 estimates were calculated in two stages. Firstly, the number of New Zealand residents who usually live in each area and were in New Zealand on census night, 5 March 1996, was adjusted for the estimated net undercount at the census (45,000) and for the number of New Zealand residents temporarily overseas on 5 March 1996 (estimated at 40,000 for New Zealand as a whole). Secondly, these populations were then updated for births, deaths and net permanent and long-term migration in each area between 6 March 1996 and 30 June 1996. More details are available on request from Chief Demographer, Demography Division, Private Bag 4741, Christchurch.

16 Subnational resident population estimates are derived by updating the resident base population in each area for estimated natural increase (excess of births over deaths), net permanent and long-term migration and estimated internal migration. Symptomatic data are used to measure the last component. Owing to the delays between actual births and deaths occurring and the registration of the event, it is necessary to estimate births and deaths to produce timely population estimates.

AUSTRALIAN STATISTICAL AREAS

17 This publication contains data presented according to the Australian Standard Geographical Classification 2000 Edition (ASGC). Under this classification, statistical areas are defined as follows:

- *Legal Local Government Areas (LGAs)*. These areas are the spatial units which represent the geographical areas of incorporated local government councils and incorporated Community Government Councils (CGCs) where the CGC is of sufficient size and statistical significance. The various types of LGAs are cities (C), areas (A), rural cities (RC), towns (T), shires (S), district councils (DC) and municipalities (M).
- *Statistical Local Areas (SLAs)*. These geographical areas are, in most cases, identical with, or have been formed from a division of, whole LGAs. In other cases, they represent unincorporated areas. In aggregate, SLAs cover the whole of a State or Territory without gaps or overlaps. In some cases legal LGAs overlap statistical subdivision boundaries and therefore comprise two or three SLAs (Part A, Part B and, if necessary, Part C).
- *Statistical Subdivisions (SSDs)*. These are of intermediate size, between SLAs and SDs. In aggregate, they cover the whole of Australia without gaps or overlaps. They are defined as socially and economically homogeneous regions characterised by identifiable links between the inhabitants. In the non-urban areas an SSD is characterised by identifiable links between the economic units within the region, under the unifying influence of one or more major towns or cities.
- *Statistical Divisions (SDs)*. These consist of one or more SSDs. The divisions are designed to be relatively homogeneous regions characterised by identifiable social and economic units within the region, under the unifying influence of one or more major towns or cities.
- *Statistical Districts (S Dists)*. These consist of selected, significant, predominantly urban areas in Australia which are not located within a Capital City SD. S Dists enable comparable statistics to be produced about these selected urban areas.

EXPLANATORY NOTES *continued*

STATISTICAL AREAS *continued*

18 Further information concerning statistical areas is contained in *Australian Standard Geographical Classification (ASGC), 2000* (Cat. no. 1216.0).

19 For the purposes of this publication, all data refer to bounded areas as defined at 1 July 2000, and as incorporated in the 2000 ASGC.

20 Changes to LGA boundaries that have occurred between 5 August 1995 and 1 July 1998 are documented in Appendix A. Appendix B contains SLA changes incorporated in ASGC 1998, not included in Appendix A. Changes to LGA boundaries that have occurred since 1 July 1998 and incorporated in ASGC 1999 are documented in Appendix C. Appendix D contains SLA changes that have occurred since 1 July 1998, incorporated in ASGC 1999. Appendix E contains changes to LGA boundaries incorporated in ASGC 2000 and Appendix F includes changes to SLA boundaries included in ASGC 2000.

MAPS

21 A complete series of maps showing the SLAs mentioned in this publication is available in *Australian Standard Geographical Classification (ASGC), 2000* (Cat. no. 1216.0)

AVERAGE ANNUAL RATE OF GROWTH

22 The average annual growth rate, r , is calculated as a percentage using the formula:

$$\left[\left(\frac{P_n}{P_o} \right)^{\frac{1}{n}} - 1 \right] \times 100$$

where P_o is the population at the start of the period, P_n is the population at the end of the period and n is the length of the period between P_n and P_o in years

CALCULATION OF AREAS

23 The area figures quoted in this issue are based upon the Statistical Local Area (SLA) level of the *Australian Standard Geographical Classification (ASGC) 2000* (Cat. no. 1216.0). The areas of the SLAs were calculated using ABS standard GIS software from the digital boundaries of the ASGC 2000. Higher level spatial unit area figures are sub-totals of the SLA areas.

ELECTRONIC DATA

24 Annual population estimates at 30 June for all SLAs in Australia are available electronically. This information can be customised to provide data for any choice of years and any combination of States and Territories. Inquiries should be made to Information Services (see the back cover of this publication for contact details). Inquiries for New Zealand data should be directed to Statistics New Zealand (email info@stats.govt.nz).

ACKNOWLEDGMENT

25 ABS publications draw extensively on information provided freely by individuals, businesses, governments and other organisations. Their continued cooperation is very much appreciated; without it, the wide range of statistics published by the ABS would not be available. Information received by the ABS is treated in strict confidence as required by the *Census and Statistics Act 1905*.
