NOTES

ABOUT THIS PUBLICATION

For Australia, this publication contains estimates of the resident population of Local Government Areas (LGAs), Statistical Local Areas (SLAs), Statistical Subdivisions (SSDs), Statistical Divisions (SDs), Statistical Districts (S Dists), States, Territories and Australia at June 1996, 2000 and 2001. Average annual growth rates for these areas are also provided. The estimates in this publication are preliminary for 2001, revised for 2000 and final for 1996.

For New Zealand, this publication contains estimates of the resident population of Regions and Territorial Authorities at June 1996, 2000 and 2001. Average annual growth rates for these areas are also provided.

ROUNDING

In commentary based on statistics in this publication, it is recommended that the relevant statistics be rounded. All data are affected by errors in reporting and processing. While unrounded figures are provided in tables, accuracy to the last digit is not claimed and should not be assumed. No reliance should be placed on statistics with small values.

MAIN FEATURES

POPULATION INCREASE

- Australia's estimated resident population at June 2001 was 19.4 million, up 229,500 (or 1.2%) from June 2000. Over the same period New Zealand's population increased by 19,200 (or 0.5%) to 3.9 million.
- Australia's natural increase accounted for 52% of population increase while overseas migration accounted for the remaining 48%.
- As in the previous year Queensland had the fastest growth of all the States and Territories in the year to June 2001 (1.7%), followed by Western Australia (1.4%) and Victoria (1.3%), while New South Wales experienced the largest increase in population, up by 70,000 (1.1%).
- For the third consecutive year Victoria's population growth (1.3%) marginally outpaced that of Australia's (1.2%).
- Following four years of population decline Tasmania's population changed little in the year to June 2001, with a loss of just 30 people.
- Almost two-thirds (61%) of Australia's 624 LGAs gained or had a constant population in the year ending June 2001, while 243 (39%) experienced population decline. Of these, 103 lost only 25 people or less each during the year.

Population change, Australia—year ended June 2001

MAIN FEATURES *continued*

CAPITAL CITY GROWTH

- At June 2001 capital city SDs were home to 64% of Australia's population. Taken together the capital city SDs grew by 1.4% (169,700) in 2000–01, accounting for 74% of Australia's total population growth over the same period. In 2000–01 the balance of the States and Territories grew by 0.9%.
- Growth in the capital cities was dominated by growth in Sydney and Melbourne. These two cities had the largest increase of all capital cities, increasing the size of their population by 55,800 (1.4%) and 55,300 (1.6%) respectively in the year ending June 2001. Sydney and Melbourne both grew at much faster rates than their respective State balances (those areas excluding the capital city SDs) in the year ending June 2001. In contrast the balances of Queensland, South Australia and Western Australia grew at rates only slightly lower than those of their respective capital cities.
- Brisbane and Darwin recorded the fastest population increases of all the capital cities in 2000–01, growing by 1.8% and 1.7% respectively.
- Wellington, New Zealand's capital, grew by 0.2% to reach 430,500 at June 2001.

Inner city growth

- Australia's inner cities continued their rapid population growth in 2000–01. The LGAs of Melbourne (10.0%), Sydney (8.1%) and Perth (7.6%) recorded some of the fastest increases in population in Australia.

GROWTH ALONG THE COAST

- Many regions located along the coastline continued to record population gains in 2000–01. Examples include Lake Macquarie (C), Wollongong (C), Shoalhaven (C) and Maclean (A) in New South Wales, and Mornington Peninsula (S), Port Phillip (C), Bass Coast (S) and Surf Coast (S) in Victoria. The city of Gold Coast in Queensland recorded the second largest population increase of all LGAs in Australia, while growth also continued in the Queensland coastal areas of Maroochy (S) and Pine Rivers (S). In South Australia Victor Harbour (DC) continued to experience population growth, while in Western Australia the coastal LGAs of Broome (S), Bunbury (C) and Busselton (S) recorded growth.

GROWTH IN REGIONAL CENTRES

- Population growth continued in a number of regional centres in the year ending June 2001, such as Queanbeyan (C) and Maitland (C) in New South Wales, Greater Bendigo (C) and Ballarat (C) in Victoria, Townsville (C) in Queensland, Mount Gambier (C) in South Australia, and Albany (C) in Western Australia.

MAIN FEATURES *continued*

SMALL AREA GROWTH

- The two LGAs with the largest population increases to June 2001 were in Queensland; Brisbane (C) increased by 17,200 and Gold Coast (C) by 13,000. The shires of Maroochy and Redland, also in Queensland, grew by 3,400 each (the ninth and tenth largest increases in Australia respectively).
- Four of the largest growth LGAs were in the capital city of Melbourne. Casey (C) grew by 7,900 people (the fourth largest increase in Australia), Melbourne (C) by 5,200 (sixth largest), Melton (S) by 4,500 (seventh largest) and Hume (C) by 4,100 (eighth largest).
- Two of the LGAs with the largest population increases were in Sydney SD. Baulkham Hills (A) grew by 8,000 (third largest increase) and Liverpool (C) by 5,800 (fifth largest).
- The four cities within the Auckland region experienced the largest population growth in New Zealand in the year ending June 2001, with Auckland increasing by 4,700, Manukau by 4,300, Waitakere by 2,600 and North Shore by 1,700. Together these four cities accounted for 69% of New Zealand's total population growth.

SMALL AREA DECLINE

- All of the LGAs with the top 20 population losses were located in the State balances.
- Once again LGAs in the balance of Victoria experienced the largest population declines with Wellington (S) and Latrobe (C) losing 500 and 490 people respectively. Three other LGAs in the balance of Victoria also featured in the top 20 — the shires of Glenelg, Corangamite and Loddon had population losses of 330, 240 and 150 respectively.
- Seven LGAs in the balance of New South Wales were amongst those experiencing some of the largest population losses in Australia with the city of Wagga Wagga seeing a decline of 340 people in the year ending June 2001.
- Other areas of relatively large decline in 2000–01 were Whyalla (C) (the third largest loss in Australia), Port Augusta (C) and Northern Areas in the balance of South Australia. Three LGAs in Western Australia, the shires of Ashburton, East Pilbara and Collie, were amongst those with the top 20 population losses in Australia.
- Of New Zealand's territorial authorities, 37 experienced population decline in the year ending June 2001. The largest declines were in the districts of South Waikato and Wanganui, the city of Lower Hutt and the districts of New Plymouth and South Taranaki.

POPULATION CHANGE AUSTRALIA

NATIONAL GROWTH RATE STEADY

Australia's estimated resident population at June 2001 was 19.4 million, an increase of 229,500, from June 2000. Natural increase accounted for 52% of the increase while overseas migration accounted for the remaining 48%. The national growth rate of 1.2% for the year ending June 2001 was slightly above the average annual growth rate for the period 1996–2001 of 1.1%.

FASTEST GROWTH IN QUEENSLAND, WESTERN AUSTRALIA AND VICTORIA

Queensland continued to have the fastest population growth of all the States and Territories in 2000–01, increasing by 1.7% (or 61,000, which was the third largest increase in Australia). This rate of growth was the same as the average growth rate (1.7%) for the five years ending June 2001.

Western Australia and Victoria also experienced faster population growth than Australia as a whole, increasing their populations by 1.4% and 1.3% respectively in the year ending June 2001. Western Australia's growth rate in 2000–01 was slower than its average rate of growth for the five years ending June 2000–01 (1.6%). In contrast, Victoria's growth rate in 2000–01 was faster than its five year average annual growth rate of 1.2%.

LARGEST GROWTH IN THE THREE LARGEST STATES

As in previous years the largest population increases in 2000–01 occurred in the three largest States. New South Wales recorded the largest increase, 70,000 (1.1%) followed by Victoria (62,200) and Queensland (61,000).

POPULATION CHANGE IN THE SMALLER STATES AND TERRITORIES

Tasmania's population changed little in the year ending June 2001 (declining by 30 people). This relative stability followed four years of negative growth, with the population experiencing an average annual rate of decline of –0.2% for the five years ending June 2001. South Australia had the lowest rate of growth in 2000–01, its population increasing by just 0.3%, lower than the average rate of growth seen over the last five years (0.4%).

The Australian Capital Territory saw a rise in its population growth rate in the year ending June 2001 (1.0% or 3,200 people), somewhat higher than the average annual growth rate for the five years ending June 2001 (0.4%). In contrast, population growth in the Northern Territory slowed in 2000–01 (1.1%) compared to the average annual growth rate of 1.7% for the five year period ending June 2001.

POPULATION CHANGE AUSTRALIA *continued*

CAPITAL CITIES CONTINUE TO OUTPACE STATE BALANCES

Taken together, the capital cities grew by 1.4% (169,700) in 2000–01, accounting for 74% of Australia's total population growth over the same period. The population of the combined capital cities increased at a considerably faster rate than that of the combined State and Territory balances which grew by 0.9% (59,800) over the same period.

The population of the combined capital cities grew at a slightly faster rate in 2000–01 than they did in the five year period ending June 2001 with an average annual growth rate of 1.3%. The State and Territory balances continued to grow at the same rate in 2000–01 as in the five years to June 2001 (0.9%).

Population growth in the capital cities was largely driven by growth in Sydney and Melbourne, which grew by 55,800 and 55,300 respectively. Almost 40% of Australia's total population live in Sydney and Melbourne and in 2000–01 they accounted for almost half (48%) of Australia's total growth and almost two-thirds (65%) of the total capital city growth in the year to June 2001.

Sydney and Melbourne both grew at much faster rates than the rest of New South Wales and Victoria in the year ending June 2001. In contrast Brisbane, Adelaide and Perth grew at rates only slightly faster than that of their respective State balances.

POPULATION DENSITY

Australia's overall population density at June 2001 was around 2.5 people per km². The ACT had the highest population density of the States and Territories (around 130 people per km²) and Victoria the second highest (around 20 people per km²). The Northern Territory had an overall population density of only 0.1 people per km², the lowest of the States and Territories.

Population density was highest in the city centres, particularly in Sydney, with seven of the ten most densely populated SLAs in Australia located in the Sydney SD. Waverley (A) (7,100 people per km²), Sydney (C) – Remainder (6,700), and North Sydney (A) and Port Phillip (C) – St Kilda (both 5,600 people per km²) had the highest population densities at June 2001. At the other end of the spectrum, there were almost 250 SLAs with population densities of under 1 person per km².

POPULATION CHANGE AUSTRALIA *continued*

CENTRE OF POPULATION

The centre of population is one measure to describe the spatial distribution of the population. This point marks the average latitude and longitude around which the population is distributed. At June 2001 the centre of Australia's population was located in the LGA of Central Darling (A), reflecting the concentration of the population in the south-east of Australia, particularly Sydney and Melbourne. Between June 1996 and June 2001 the centre of Australia's population moved about 6 km northward largely as a result of the faster population growth in Queensland, Western Australia and the Northern Territory than in the southern States.

Centre of population, Australia—June 1996 and June 2001

POPULATION CHANGE NEW ZEALAND

NATIONAL GROWTH

New Zealand's resident population reached 3.9 million at June 2001, an increase of over 19,200 people since June 2000. New Zealand's growth of 0.5% in 2000–01 was lower than the average annual growth rate for the five years ending June 2001 (0.7%) and was just over two-fifths the growth rate experienced in Australia (1.2%).

In the year to June 2001 natural increase contributed 28,500 people to New Zealand's population, while there was a net outflow of 9,300 through permanent and long-term migration.

NORTH ISLAND AND SOUTH ISLAND, BALANCED GROWTH

The population growth rate of the South Island, at 0.5%, matched that of the North Island in the 2000–01 period. At the end of June 2001 an estimated 2.9 million people lived in the North Island, an increase of 14,800 since June 2000. In the South Island the population increased by 4,400 over the same period to reach 931,000.

At June 2001, the North Island was home to 75.8% of New Zealand residents, while the South Island accommodated 24.2%. The general trend has been one of increased concentration of New Zealand's population in the North Island. In 1996, 75.3% resided in the North Island and 24.7% in the South Island.

CITIES OUTPACE DISTRICTS

The combined population of New Zealand's 15 cities grew by 0.7% (or 15,600 people) during the year to June 2001, to 2.2 million, while the combined population of the 59 districts increased at a slower rate (0.2% or 3,600) to reach 1.7 million.

AUCKLAND — MAJOR GROWTH AREA

Twenty three of New Zealand's 74 territorial authority areas (five cities and 18 districts) had growth rates which exceeded the national average of 0.5% in 2000–01. Although some of the fastest population growth areas were in the South Island, including Queenstown-Lakes District (7.1%), Selwyn District (2.8%), Kaikoura District (2.2%) and Waimakariri District (1.9%), the largest population increases were in the North Island. The four cities within the Auckland Region experienced the largest population increases in 2000–01, with Auckland City increasing by 4,700, Manukau City increasing by 4,300, Waitakere City increasing by 2,600 and North Shore City increasing by 1,700. Together these cities accounted for over 69% of the population growth experienced in New Zealand during 2000–01.

POPULATION DECLINE

Thirty seven of New Zealand's 74 territory authorities experienced population decline in the year to June 2001. The largest rates of population decline were experienced in the districts of South Waikato and Kawerau (both –3.0%), Tararua (–2.5%) and Wairoa (–2.1%), and the largest numerical losses were experienced in South Waikato District (–700) and Wanganui District (–600).

POPULATION CHANGE NEW SOUTH WALES

STATE SUMMARY

The estimated resident population of NSW at June 2001 was 6.5 million, an increase of 70,000 persons, or 1.1%, since 2000. Since 1996 the NSW population has increased by 327,700 persons with an average annual rate of growth of 1.0% between 1996 and 2001.

Population growth in NSW was the result of net overseas migration (46,100) and natural increase (40,600). Net interstate migration was negative, with a loss of 16,700 persons in 2000–01.

In 2000–01, 94 NSW LGAs experienced positive growth, while 77 LGAs experienced negative growth. The five LGAs with the largest growth were located in Sydney SD, while four of the five fastest growing were located in Sydney SD. The other was Queanbeyan (C) in South Eastern SD. The five LGAs that experienced that fastest and largest population declines were located in inland NSW.

GROWTH IN SYDNEY

The population of Sydney SD increased by 55,800 persons to reach 4,141,000 at June 2001, an increase of 1.4%, higher than the average annual rate of change between 1996 and 2001. Sydney SD accounted for 63% of the NSW population in 2001, but growth in Sydney SD accounted for 80% of all population growth in NSW.

With the exception of Marrickville (A) (–0.1%), all Sydney LGAs experienced positive growth in 2000–01. Twenty Sydney LGAs grew by between 0% and 1%, 15 LGAs grew between 1% and 2% and 9 LGAs grew by more than 2%.

Largest growth

Baulkham Hills (A) experienced the largest increase in population in NSW in 2000–01 and the third largest in Australia, growing by 8,000 people or 5.8%, with much of this growth occurring in the suburbs of Kellyville and Rouse Hill. Liverpool had the second largest population growth in NSW and the fifth largest in Australia in 2000–2001, increasing by 5,800 people or 3.9%, largely as a result of developments in West Hoxton, Horningsea and Prestons. The population of Wyong (A) grew by 3,000, or 2.3%, in 2000–01 as a result of developments in Warnervale and Blue Haven along with new housing in established areas. Camden (A) had the fourth largest increase of 2,400 persons (5.6%) due to developments that took place in Harrington Park, Narrellan Vale, Mount Annan and Currans Hill. Gosford had the fifth largest population increase in NSW in 2000–01, increasing by 2,100 people (1.3%).

Fastest growth

The fastest growth in Sydney SD occurred in the inner city and in western and south-western Sydney. Sydney (C) experienced the fastest population growth (8.1%, or 2000 people) in all of NSW, and was the third fastest growing LGA in Australia in 2000–01. Population growth in Sydney (C) in 2000 was associated with residential developments in the central and southern parts of the CBD, Ultimo and Pyrmont. The second fastest growth occurred in Baulkham Hills (A) (5.8%), followed by Camden (A) (5.6%), Liverpool (C) (3.9%) and Willoughby (C) (3.3%).

COASTAL GROWTH AND DECLINE

The population of NSW coastal LGAs outside Sydney SD increased by 12,400 or 1.0% in the year ending June 2001. This is slightly lower than the average annual growth rate (1.1%) experienced during the period 1996–2001.

Of all coastal LGAs outside Sydney SD, Maclean (A) (3.1%) experienced the fastest growth in 2000–01. Great Lakes (A) (1.8%), Byron (A) (1.6%), Hastings (A) (1.6%) also experienced high growth rates. Coastal LGAs which experienced negative growth were located on the north coast of NSW and include Richmond Valley (A) (–0.7%), Nambucca (A) (–0.3%), Bellingen (A) (–0.3%) and Pristine Waters (A) (–0.1%).

The LGAs that experienced the largest gains in population were also the LGAs that had the largest populations. These include Lake Macquarie (C) (1,700), Wollongong (C) (1,300), Shoalhaven (C) (1,100) and Newcastle (C) (1,100). The largest population decline was experienced by Richmond Valley (A) (–140).

INLAND POPULATION CHANGE

In the year ending June 2001, the population of NSW inland LGAs outside Sydney SD increased by 0.1%, higher than their average annual growth rate (–0.01%) for the five years ending June 2001. Thirty three inland LGAs experienced population growth, Bourke experienced no change, and 73 experienced population decline.

Of all inland LGAs outside Sydney SD, Queanbeyan (C) experienced the fastest (3.8%) and largest (1,200) growth in 2001 with Jerrabomberra an important growth area in Queanbeyan (C). The neighbouring LGA of Yarrowlumla (A) also experienced high growth (3.3%), along with Oberon (A) (2.4%) and Leeton (A) (2.0%). In total 13 LGAs in inland NSW experienced growth rates higher than 1%. Large population growth was also experienced in Maitland (C) (770), Wingecarribee (A) (590), Griffith (C) (450) and Bathurst (C) (360).

The estimated resident population of Wagga Wagga (C) declined for the third consecutive year. In 2000–01, the population declined by 340 people (–0.6%), and while this was the largest decline in the State, it was smaller than the loss of the previous year (–470). Broken Hill's population decline also continued (–330), although its rate of population decline in 2000–01 (–1.6%) was slower than the average rate of decline over the last five years (–1.8%).

Bingara (A) experienced the fastest rate of decline in inland NSW (–2.5%). Walgett (A) (–2.4%), Bombala (A) (–2.3%), Holbrook (A) (–2.1%), Coonamble (A) (–2.1%) and Gilgandra (A) (–2.1%) also experienced negative growth rates in excess of 2%. Three of these LGAs, Walgett (A), Coonamble (A) and Gilgandra (A), are located in a cluster in north-central NSW. In total 31 LGAs in inland NSW experienced rates of decline faster than 1% in 2000–01.

CENTRE OF POPULATION FOR NEW SOUTH WALES

The centre of New South Wales's population is located in the SLA of Hawkesbury (C). Between June 1996 and June 2001 the population moved 2 km south-eastward, reflecting the greater population growth experienced within the Sydney area compared to the balance of the State.

CENTRE OF POPULATION FOR SYDNEY SD

The centre of population of Sydney SD at June 2001 was located in the Parramatta (C) SLA.

POPULATION CHANGE VICTORIA

STATE SUMMARY

The estimated resident population of Victoria at June 2001 was 4.8 million, an increase of 62,200, or 1.3%, since June 2000. Victoria's growth rate has continued to rise since June 1996, averaging an annual growth rate of 1.2% for the five years since 1996. Most of Victoria's population growth in 2000–01 came from net overseas migration (27,600) and natural increase (26,600). Since 1998, Victoria has experienced positive net interstate migration (7,900 in 2000–01), a turnaround from the large net interstate migration losses experienced in the early 1990s.

In 2000–01 the growth areas in Victoria were located in the outer suburban and inner city LGAs of Melbourne, while outside Melbourne growth occurred in regional centres and areas along the coast.

CONTINUING HIGH GROWTH FOR MELBOURNE

At June 2001 there were an estimated 3,522,000 people resident in Melbourne SD. Melbourne grew by 1.6% (55,250 people) in the year ending June 2001, greater than the growth for Victoria as a whole (1.3%) and faster than Melbourne's average annual growth over the five years to June 2001 (1.4%). Melbourne continues to share 73% of Victoria's population.

SLOWER GROWTH OVERALL IN THE BALANCE OF THE STATE

The population of the balance of Victoria increased by 6,900 (0.5%) to 1,307,000 in the year ending June 2001. This increase is consistent with the average annual growth rate of 0.5% for the five years to June 2001. As in previous years, Victoria balance continued to grow more slowly than Melbourne.

GROWTH IN THE OUTER SUBURBS

In 2000–01, the trend of recent years continued with some of the largest and fastest growing LGAs in the State being located in the outer suburbs of Melbourne. New residential estates that attract young families, together with high birth rates in these areas, continued to bring people to Melbourne's outer fringe.

As in previous years, the city of Casey experienced the largest population increase (7,900 people) and the third fastest growth rate (4.5%) in Victoria and the fourth largest increase in Australia in 2000–01. Just over two-thirds (68.4%) of Casey's growth was due to the SLA of Casey (C) — Berwick, which gained 5,400 people (8.6%) in 2000–01.

The shire of Melton which experienced the third largest population gain in the State (4,500), grew at a fast rate (9%), and was the second fastest growing LGA in Victoria and in Australia in 2000–01. Almost all of the growth in this LGA (95%) occurred in the SLA of Melton (S) — East, which gained 4,300 persons (31.0%).

Similarly the city of Hume increased by 4,100 persons (3.1%), with three quarters (76.6%) of the growth due to growth in the SLA of Hume (C) — Craigieburn, which increased by 3,100 persons (8.7%).

GROWTH IN THE INNER CITY

Over recent years, inner city Melbourne has experienced large population gains. In 2000–01 this trend continued with the city of Melbourne the fastest growing LGA (10.0%) in the State, and in Australia, in 2000–01. It also had the second largest increase in population in the whole of Victoria (5,200 persons). About half (51.5%) of this increase was due to growth in the SLA of Melbourne (C) — Southbank — Docklands, which gained 2,700 persons (62.6%). Melbourne (C) — Inner grew by 1,100 (16.9%) and Melbourne (C) — Remainder grew by 1,400 (3.5%).

POPULATION CHANGE VICTORIA *continued*

GROWTH IN THE INNER CITY *continued*

Inner city living in recent years has become more attractive, particularly to professionals and university students. To meet this demand, new apartments and student accommodation have been developed within and around inner Melbourne. The population gains each year reflect the rate at which the new residences are becoming occupied.

GROWTH IN MELBOURNE COASTAL AREAS

The shire of Mornington Peninsula is a coastal area located in Melbourne's south. The area attracts older persons (retirees) and tourists. Consistent with previous years, in 2000–01 this LGA grew by 3,100, or 2.5%. The city of Port Phillip, a coastal area located just south of Melbourne city, grew by 3,100 (3.8%). The developments in Port Phillip are similar to those occurring in inner Melbourne with its close proximity to the city and the bay creating residential demand and occupancy.

GROWTH IN REGIONAL CENTRES AND COASTAL AREAS

As in previous years, growth within Victoria balance occurred in LGAs that were, or were around, regional centres and coastal areas. In 2000–01, the largest growth in the balance of the State was in the city of Greater Geelong, which gained 2,500 people (1.3%). Nearly two-thirds (62.9%) of this growth is attributed to the SLAs of South Barwon — Inner and Greater Geelong (C) — Pt B, gaining 900 and 700 persons respectively. The city of Greater Bendigo increased by 1,000 (1.2%). The shire of Yarra Ranges increased by 1,000 (0.7%) and the city of Ballarat gained 700 (0.9%).

The fastest growing LGAs within the balance of the State were the shires of Bass Coast, which increased by 3.0% (700), Surf Coast, which increased by 2.9% (580) and Golden Plains, which increased by 2.3% (340). The rapid growth in the shires of Bass Coast and Surf Coast can be attributed to an increase in the number of older persons (retirees) coming to live in the areas and people servicing an expanding tourism industry. The growth in the Golden Plains area may be due to a spill over effect from the growth in Ballarat and Geelong.

LGAS WITH LARGEST AND FASTEST DECLINE

As in previous years the LGAs experiencing the largest and fastest declines were shires located in mining areas or in wheat and sheep producing areas of far western and north-western Victoria. The fastest declines were experienced by Hindmarsh (S) and West Wimmera (S), while the largest losses were recorded in Wellington (S) and Latrobe (C).

CENTRE OF POPULATION FOR VICTORIA

Victoria's centre of population moved 0.7 km southward within the SLA of Moreland (C) — North over the period June 1996 to June 2001. This shift in location reflects the population growth in the capital city compared to the balance of the State over the same period.

CENTRE OF POPULATION FOR MELBOURNE SD

The centre of population for the Melbourne SD at June 2001 was located in the Booroondara (C) — Camberwell South SLA.

POPULATION CHANGE QUEENSLAND

STATE SUMMARY

The estimated resident population of Queensland at June 2001 was 3.6 million, an increase of 61,000 since June 2000. Queensland's rate of growth (1.7%) in 2000–01 was the same as the average annual growth rate for the five years ending June 2001 and was the fastest growth rate of all States and Territories.

THE SOUTH-EAST

The south-east corner of Queensland (the Moreton and Brisbane SDs) experienced an increase of 48,600 in 2000–01, accounting for almost four-fifths (79.7%) of the total population growth of Queensland. The proportion of the total Queensland population living in this region increased to 65.3% at June 2001, from 64.0% at June 1996.

In the year to June 2001, the population of Moreton SD increased by 19,000 (2.7%). Moreton was the fastest growing SD in Queensland, increasing 15.4% over the five year period to June 2001, an average annual growth rate of 2.9%.

Brisbane SD experienced an increase of 29,700 people (1.8%) since June 2000, while an annual average growth rate of 1.7% was recorded for the five year period to June 2001. An estimated 1.7 million people lived in Brisbane SD at June 2001, representing 45.7% of Queensland's population.

LARGE INCREASES IN BRISBANE AND GOLD COAST

The two largest LGAs in Queensland again experienced the largest increases in population in Queensland and in Australia as a whole in 2000–01. The city of Brisbane recorded an increase of 17,200 and the city of Gold Coast increased by 13,000. Brisbane's growth rate of 2.0% for 2000–01 was higher than its average annual growth rate (1.8%) for the five year period to June 2001, while the Gold Coast's growth rate of 3.2% for the year ended June 2001 was just under that of the average annual growth rate for the five year period to June 2001 (3.3%).

Within Brisbane, new housing estates accounted for the large increases experienced in a number of SLAs. The southern SLA of Doolandella — Forest Lake again had the largest population growth in Brisbane, with an increase of 1,100 (8.0%) in 2000–01, compared with an increase of 1,500 (12.8%) in 1999–2000, and an average annual growth rate of 16.8% for the five years ending June 2001.

The shires of Redland and Pine Rivers in Brisbane SD recorded increases of 3,400 (2.9%) and 3,100 (2.7%) respectively in 2000–01, reflecting the continuing high growth of new housing estates in these areas.

Within Gold Coast city the largest population increases were recorded in the adjoining low-density SLAs of Coomera — Cedar Creek and Guanaba — Currumbin Valley, which increased by 1,900 (20.7%) and 1,700 (7.7%) respectively for the year to June 2001. These SLAs recorded the largest growth in Queensland. Coomera — Cedar Creek was also the fastest growing SLA within Gold Coast City, followed by Arundel which increased by 890 (14.0%) during 2000–01.

POPULATION CHANGE QUEENSLAND *continued*

Pine Rivers (S)	3 100	2.7	Tiaro	150	3.2

DECLINING POPULATIONS

The trend of declining populations in rural areas continued in 2000-01. The SDs of Central West and South West both showed average annual population declines of -0.8% and -0.1% respectively over the five year period to June 2001.

The LGA with the largest decline in 2000-01 was the city of Rockhampton which recorded a decrease of 240 people, while the adjoining shire of Livingstone on the coast recorded an increase of 640 people.

The majority of population decreases were associated with the decline of various industries. The LGA of Daringa (S) recorded a decrease of 100 people (-1.1%) associated with changes in the mining industry. Broadsound (S) (80), Dalby (T) (70) and Blackall (S) (50) continued to record decreases in 2000-01.

LGAs WITH LARGEST AND FASTEST POPULATION DECLINE, Queensland

CENTRE OF POPULATION FOR QUEENSLAND

The centre of Queensland's population at June 2001 was located in the SLA of Gayndah (S) and had moved 7 km south-eastward over the period June 1996 to June 2001, largely reflecting the population growth in the south-eastern cities (Brisbane and the Gold Coast) and coastal areas.

CENTRE OF POPULATION FOR BRISBANE SD

The centre of population for Brisbane SD at June 2001 was located in the Kangaroo Point SLA.

POPULATION CHANGE SOUTH AUSTRALIA

STATE SUMMARY

South Australia's estimated resident population at 30 June 2001 was 1.5 million, an increase of 5,000 (0.3%) since 30 June 2000. In the last five years South Australia's population has increased by 28,100 persons, giving an average annual growth rate during this period of 0.4%.

POPULATION GROWTH IN ADELAIDE

The population of the Adelaide SD at June 2001 was estimated at 1.1 million, an increase of 4,200 persons (0.4%) over June 2000, the growth rate being double that of the remainder of the State, which grew by 0.2% in the same period. Adelaide's share of South Australia's population has remained steady over the past five years with 73% of South Australian residents living within the capital city.

Inner Adelaide

Within the Adelaide SD the largest growth for 2000–01 was recorded in the Eastern Adelaide SSD (0.8%). This increase in growth was due largely to a 3.7% increase in the SLA of Adelaide (C) (500). Apartment developments within the city of Adelaide continue to attract people to an inner city lifestyle.

OUTER ADELAIDE SD

The Outer Adelaide SD continued to have the highest average annual growth rate of all SDs in the State. The population of this area increased by 1.6% (1,800) during 2000–01, slightly higher than the five year average annual growth rate of 1.5%. Within the Outer Adelaide SD significant growth continued in the Fleurieu SSD (2.3%) to the south of the Adelaide metropolitan area and in the Mt. Lofty Ranges SSD (1.7%) to the east.

POPULATION CHANGE IN SOUTH AUSTRALIA'S SDs

Just over half of South Australia's SDs (4 out of 7) experienced population growth in 2000–01. While South East SD remained stable for 2000–01, Yorke and Lower North SD (-0.1%) and Northern SD (-1.3%) experienced population decline. The Northern SD continued a pattern of population decline, experiencing an average annual decline rate of -0.6% in the five years since June 1996.

Population growth

For 2000–01 the LGA of Adelaide (C) increased by 3.7% to record the highest growth rate in South Australia. The majority of other fast growing LGAs, both in terms of growth rate and population numbers, tended to be located within the Adelaide and Outer Adelaide SDs. LGAs in the north-east of the Adelaide metropolitan area, such as Salisbury (C) and Norwood Payneham St Peters (C) recorded some of the largest increases in population for 2000–01. These LGAs have been the site of some of the more significant housing developments which have occurred in the Adelaide metropolitan area in recent years.

In the five years since June 1996 the LGA of Roxby Downs (M) remained the LGA with the fastest average annual growth rate, recording 8.9%. This has resulted from the expansion of the Olympic Dam project and from an increase in the number of families moving into the area following recent developments to the town's infrastructure and services.

POPULATION CHANGE SOUTH AUSTRALIA *continued*

Population decline

Population decreases were recorded in 27 of the 68 LGAs in South Australia. None of the declining LGAs were within the Adelaide or Outer Adelaide SDs. The LGAs with the largest average annual population declines for 2000–01 were located in the rural regions in the north of the State. The LGA of Peterborough (DC) experienced a decline of –3.9%. The largest decline in population was experienced in Whyalla (C) with a loss of 380 people.

CENTRE OF POPULATION FOR SOUTH AUSTRALIA

At June 2001 South Australia's centre of population was located in the SLA of Salisbury (C) — South-East. The centre of population has shifted almost 2 km since June 1996, reflecting growth in the Adelaide area and decline in the Northern SD.

CENTRE OF POPULATION FOR ADELAIDE SD

The centre of population for the Adelaide SD at June 2001 is located in the Adelaide (C) SLA.

POPULATION CHANGE WESTERN AUSTRALIA

STATE SUMMARY

The estimated resident population of Western Australia at June 2001 was 1.9 million, an increase of 26,100 since June 2000. Western Australia's growth rate of 1.4% for 2000–01 was the second fastest in Australia (after Queensland). It was slower than the average annual growth rate of 1.6% for the five years to June 2001.

Western Australia's population growth in 2000–01 came from net overseas migration (14,800) and natural increase (13,900), while population was lost through interstate migration (–2,700).

Between June 2000 and June 2001 over half (58%) of Western Australia's LGAs experienced population growth, while 41% experienced decline.

CAPITAL CITY GROWTH

Perth SD continued to account for 73% of the total Western Australian population at June 2001. The State's largest population growth areas were located in the metropolitan fringes of Perth with Wanneroo (C) and Swan (C) to the city's north experiencing the largest and second largest population increases, 3,100 (4.0%) and 2,600 (3.2%) respectively. Cockburn (C) in the south-west fringe and Joondalup (C) in the north-west experienced the third and fourth largest population increases, 1,900 (2.7%) and 1,700 (1.1%) respectively. Rockingham (C), further to the south, experienced the fifth largest population growth, increasing by just under 1,700, or 2.4%. Together these five LGAs accounted for 57% of Perth's total growth (19,500) in 2000–01.

Growth in the inner city LGAs was generally slower than in the outer city, with the exception of the city of Perth which was the fastest growing LGA in the State, and fourth fastest in Australia. Increasing by 520 people, the city of Perth experienced a growth rate of 7.6% in 2000–01. This was somewhat higher than the average growth experienced in this LGA over the last five years (5.5%). Population growth in the city of Perth is associated with medium and high-density housing developments, particularly those on the eastern edge of the CBD.

LGAs WITH LARGEST AND FASTEST POPULATION GROWTH, Western Australia

LGA	2000-01.....		LGA	2000-01.....	
	no.	%		no.	%
LARGEST GROWTH			FASTEST GROWTH		
Wanneroo (C)	3 100	4.0	Perth (C)	520	7.6
Swan (C)	2 600	3.2	Capel (S)	410	6.1
Cockburn (C)	1 900	2.7	Halls Creek (S)	200	5.5
Joondalup (C)	1 700	1.1	Broome (S)	570	4.9
Rockingham (C)	1 700	2.4	Dardanup (S)	400	4.3

GROWTH IN OTHER REGIONS

Capel Shire in the South West SD was the second fastest growing LGA in the State in 2000–01, increasing by 6.1% (400). Dardanup (S), also in the South West SD, experienced the fifth fastest growth (4.3% or 400 people), although growth in 2000–01 was slower than the average experienced in Dardanup over the last five years (7.7%). Both Capel and Dardanup shires are located close to the large regional centre of Bunbury (C), which also experienced fast growth in 2000–01 (3.6% or 1,000 people).

POPULATION CHANGE WESTERN AUSTRALIA *continued*

GROWTH IN OTHER REGIONS *continued*

Other growth areas in the South West SD included Busselton (S) up by 4.2% (950), Augusta — Margaret River (S) up by 3.2% (320), and Mandurah up by 3.1% (1,400).

All LGAs in the Kimberley SD experienced growth in 2000–01. The shires of Halls Creek and Broome were the third and fourth fastest growing LGAs in the State, up by 5.5% (200) and 4.9% (570) respectively. Wyndham — East Kimberley (S) also experienced fast growth, up 3.6% (270).

In the Central SD, the rural shires of Irwin and Chapman Valley each experienced fast growth, increasing by 3.5% (110) and 3.4% (30) respectively in 2000–01. In the Midlands SD, the rural–urban fringe shires of Gingin and Chittering experienced fast growth up by 3.4% (130) and 3.0% (80) respectively.

DECLINING LGAS

Of the 58 LGAs which experienced population decline in 2000–01, 56 were located in the balance of Western Australia. Dundas shire, a mining-rural area in the State's south-east was the fastest declining LGA in Australia, declining by –6.9% (100 people) to 1,400 in 2001. Coorow and Morawa shires experienced the second and third fastest declines, down by –4.7% (70) and –4.2% (40) respectively.

Ashburton and East Pilbara, both mining-rural shires in the Pilbara region experienced the largest population declines in Western Australia in 2000–01. Ashburton (S) declined by 250 people (–3.9%) to 6,100, while East Pilbara declined by 220 (–3.4%) to 6,300. Collie (S) in the State's south-west had a similar population decline (220 or –2.6%).

CENTRE OF POPULATION FOR WESTERN AUSTRALIA

Western Australia's centre of population at June 2001 was located in the SLA of Toodyay (S), 85 km north-east of Perth. The centre of population has shifted 1 km south-westward in the five years from June 1996, reflecting greater population growth in the Perth and South West regions compared to the balance of the State over this period.

CENTRE OF POPULATION FOR PERTH SD

The centre of population for the Perth SD at June 2001 is located in the Victoria Park (T) SLA.

POPULATION CHANGE TASMANIA

POPULATION DECLINE SLOWS

The estimated resident population of Tasmania was 470,300 at June 2001. The population remained relatively stable in 2000–01, declining by only 30 people since June 2000. Since June 1996 the population of Tasmania has declined by 4,200 people (–1.0%).

Tasmania's population decline for the year ending June 2001 was the smallest annual decline experienced since growth became negative in 1996–97. In 2000–01 Tasmania's population decline was due to a net loss through interstate migration (–2,600), which marginally outweighed the gains made through natural increase (2,400) and overseas migration (200).

REGIONAL CHANGES

In 2000–01 the Mersey — Lyell SD was the only SD in Tasmania to experience a decrease in population, down by 300 people. Although Latrobe LGA experienced one of the largest and fastest population increases in the State in 2000–01, most of the other LGAs in the Mersey — Lyell region declined. The remaining SDs experienced a population increase, albeit marginal. Greater Hobart, which accounted for 41% of the total State's population at June 2001, increased by 190 people (or 0.1%) since June 2000 while the Northern SD increased by 50. The Southern SD gained 40 people (0.1%).

GROWTH IN LESS THAN FIFTY PERCENT OF TASMANIAN LGAs

In the year to June 2001, less than 50% (14 out of 29) of Tasmania's LGAs increased in population and all at a lower rate than Australia as a whole (1.2%). In 2000–01 Meander Valley (M), a fringe urban area west of Launceston, experienced the largest growth in population of all LGAs in Tasmania, increasing by 160 people or 0.9% in the year to June 2001, compared to an average annual growth rate of 0.5% over the past five years. The second largest increase in population occurred in Kingborough (M) (an increase of 140 or 0.5%), a fringe urban area just south of Hobart.

Over the five year period ending June 2001, Latrobe LGA had the largest average annual growth rate (0.9%), followed by Sorell (M) (0.6%), Brighton (M), Glamorgan/Spring Bay (M) and Meander Valley (M) (all 0.5%).

LGAs WITH LARGEST AND FASTEST POPULATION GROWTH, Tasmania

LGA	2000–01.....		LGA	2000–01.....

Latrobe (M)	80	0.9	Glamorgan/Spring Bay (M)	30	0.7
Brighton (M)	70	0.6	Brighton (M)	70	0.6
Clarence (C)	60	0.1	Kingborough (M)	140	0.5

POPULATION CHANGE TASMANIA *continued*

POPULATION LOSS IN MOST CITIES

The city of Hobart experienced a small population increase in 2000–01 with the increase of 40 people arresting the declines of the previous four years. The city of Launceston decreased by 140 people or –0.2% in 2000–01. Glenorchy(C) and Burnie (C) both recorded losses of over 100 in population in 2000–01, Devonport(C) lost 100 people while the city of Clarence recorded an increase of just 60 people. Between June 1996 and June 2001 all six cities recorded population losses, with Burnie (C) experiencing the largest average annual rate of decline of –0.7%, followed by Devonport (C) (–0.5%), Launceston (C) and Hobart (C) (–0.4%), Glenorchy (C) (–0.3%) and Clarence (C) (–0.2%).

POPULATION LOSSES IN THE LGAs

King Island (M), a relatively small LGA, continued to experience the fastest population decline in Tasmania, albeit at a slower rate in 2000–01 (–1.1%) than over the last five years (at an average annual decline of –1.4%). In the five years since 1996 the West Coast LGA has experienced the largest average annual rate of decline in population with –2.4%, followed by King Island (M) (–1.4%) and Burnie (C) (–0.7%).

Waratah/Wynyard (M)	–70	–0.5	Dorset (M)	–40	–0.5

CENTRE OF POPULATION FOR TASMANIA

The centre of Tasmania's population is located in the SLA of Central Highlands and moved only slightly south-east (0.8 km) over the period June 1996 to June 2001, reflecting higher population growth in Southern SD, and greater decline in Mersey — Lyell SD compared to the rest of the State.

CENTRE OF POPULATION FOR GREATER HOBART SD

The centre of population for the Greater Hobart SD at June 2001 is located in the Hobart (C) — Remainder SLA.

POPULATION CHANGE NORTHERN TERRITORY

GROWTH SLOWS IN THE TERRITORY

The estimated resident population of the Northern Territory at June 2001 was 197,600, an increase of 2,100 since June 2000. Population growth in the Northern Territory slowed to 1.1% in 2000–01, down from 1.4% in 1999–2000. Since June 1996 the Northern Territory's average annual growth rate has been 1.7%.

DARWIN SD CONTINUES TO GROW

Darwin SD accounted for 54% of the Territory's total population at June 2001. Population growth was faster in the Darwin SD in 2000–01 (1.7%) than in the balance of the Territory (0.3%). All three SSDs within Darwin SD experienced population growth in 2000–01. Darwin City SSD grew by 0.4%, Palmerston — East Arm SSD by 6.6% and Litchfield Shire SSD by 1.1%.

POPULATION GROWTH IN DARWIN CITY SSD

The population of Darwin City SSD showed an increase from 68,800 in June 2000 to 69,100 in June 2001 (0.4%). Despite this overall increase in population the majority of Darwin City's SLAs (17 out of 29) continued to decline, especially the older SLAs of Anula, Fannie Bay, Leanyer, Nightcliff, and Wulagi. This decline can be partially explained by the trend for Darwin residents to move out of the older suburbs to more affordable housing in the new suburbs of Palmerston or to higher quality, lower maintenance properties, such as in the SLA of Coconut Grove.

Some of the largest population increases in 2000–01 occurred in the SLAs of Stuart Park (4.9%), City — Inner (4.1%) and Larrakeyah (3.0%). City — Inner and Larrakeyah experienced an increase in those seeking rental accommodation while Narrows, The Gardens and Stuart Park saw the development and promotion of diverse new residential housing which included high-rise units, duplexes and detached style dwellings.

Since 1996, the average annual growth rates for the Darwin City SSD showed that the fastest decreases occurred in Wulagi (–1.8%), Anula (–1.7%), Karama and Malak (–1.5%). The fastest increases were in City — Inner (8.5%), Larrakeyah (5.7%) and Coconut Grove (4.9%).

HIGH POPULATION GROWTH IN PALMERSTON — EAST ARM SSD

Palmerston — East Arm SSD was the largest growth area in the Northern Territory, accounting for two-thirds (1,400 people) of the Northern Territory's population growth in 2000–01, and was the fifth fastest growing LGA in Australia. This growth can be attributed to Palmerston being an expanding residential area which provides a range of housing options attractive to a broad range of socioeconomic groups, coupled with access to fully developed commercial and recreational facilities and services.

Two of the fastest growing areas in the Palmerston — East Arm SSD in 2000–01 were the SLAs of Bakewell (20.1%) and Durack (10.9%), while Palmerston (C) Bal SLA (which includes the suburbs of Farrar, Gunn, Rosebery and Marlow Lagoon) grew by 18.6% from 2,200 to 2,600. Since 1996 Bakewell's population has increased by 61.4% and Palmerston (C) Bal by 49%.

POPULATION CHANGE NORTHERN TERRITORY *continued*

LITCHFIELD SHIRE NOW PART OF DARWIN SD

As at 1 July 2001 the boundary for Darwin SD was extended to include the Litchfield Shire (formerly part of Darwin Rural Areas). This was due to the recognition of significant economic and social links which had rapidly developed between the Litchfield Shire, Darwin and Palmerston. Therefore, Litchfield Shire is now represented by the newly formed SLAs of Litchfield (S) — Pt A and Litchfield (S) — Pt B. Litchfield (S) — Pt A experienced growth of 1.4% during 2000–01 buoyed by the continued presence of the Defence forces. Litchfield (S) — Part B increased during 2000–01 by 1.0%.

The SLAs of Coomalie (CGC) and Cox — Finnis remain as Darwin Rural Areas Statistical Subdivision (SSD) but formed a new SSD called Finnis.

POPULATION CHANGE IN OTHER MAJOR NORTHERN TERRITORY TOWNS

The LGA of Alice Springs (T) continued to grow marginally (0.2%) during 2000–01, specifically within the SLAs of Heavitree and Ross.

There were population decreases for both Jabiru (T) (–2.0%) and Tennant Creek (T) (–0.7%) in the year to June 2001. Jabiru, principally a mining town, continued a pattern of decreasing population, experiencing an average annual decline of –0.9% in the five years since June 1996. In the year to June 2001 Katherine (T) grew by 0.4%, increasing by 40 people.

SLAs WITH LARGEST POPULATION GROWTH AND DECLINE, Northern Territory

SLA	2000–01.....		SLA	2000–01.....	
	no.	%		no.	%
LARGEST GROWTH			LARGEST DECLINE		
Bakewell	520	20.1	Groote Eylandt	–50	–1.9
Palmerston (C) — Bal	400	18.5	Nhulunbuy	–50	–1.5
Durack	270	10.9	Fannie Bay	–50	–1.9
Stuart Park	160	4.9	Alice Springs (T) — Larapinta	–50	–0.6
Litchfield (S) — Pt B	150	1.1	Leanyer	–50	–1.0

CENTRE OF POPULATION FOR THE NORTHERN TERRITORY

Over the five years to June 2001, the Northern Territory's centre of population has moved 13 km northward from the Victoria SLA to the SLA of Elsey — Bal. This movement reflects population increases in the north-west regions of the Northern Territory, such as Darwin City SSD and Palmerston — East Arm SSD.

CENTRE OF POPULATION FOR DARWIN SD

The centre of population for the Darwin SD at June 2001 is located in the SLA of Litchfield (S) — Pt A.

POPULATION CHANGE AUSTRALIAN CAPITAL TERRITORY

ACT SUMMARY

The estimated resident population of the ACT increased by 3,200 people in the year to June 2001, to 314,200. The ACT's growth rate of 1.0% for 2000–01 was higher than the average annual growth for the five years to June 2001 (0.4%), but lower than Australia's overall growth of 1.2%.

Natural increase continued as the main contributor to population growth, adding 2,800 people in the year to June 2001, while net interstate migration added 330 people — the first time since 1993 that more people moved to the ACT from interstate than left. Overseas migration added only 10 people in the year to June 2001.

Gungahlin — Hall SSD continued as the ACT's principal region of population growth, with an increase of 1,900 people (up 10.0% in the year to June 2001), and was in fact the fastest growing SSD, in percentage terms, in Australia.

Increases in population were also recorded in North Canberra (640), Belconnen (470), and Woden Valley and South Canberra (110 each). The population of Tuggeranong decreased by 120.

SLA GROWTH

SLAs in the Gungahlin — Hall SSD continued to experience high levels of growth during 2000–01, accounting for four of the five largest population increases in the ACT. Amaroo had the largest growth, increasing by 860 people, while Palmerston (440) and Nicholls (430) recorded the second and third largest increases respectively. Ngunnawal (220) recorded the fifth largest increase.

The population of Dunlop, on the north-western fringe of Canberra, increased by 410 during the year to June 2001, while Gordon on the southern fringe increased by 190.

Remaining growth in Canberra occurred mainly in inner suburbs such as Garran (180), Watson (160), and Bruce, Turner and Lyneham (130 each).

SLA DECREASE

The largest population decline in the year to June 2001 occurred in Kambah (170), while Lyons decreased by 110. Monash lost 60 people and Wanniasa and Barton both lost 50 people.

SLAs WITH LARGEST POPULATION GROWTH AND DECLINE, ACT

POPULATION CHANGE AUSTRALIAN CAPITAL TERRITORY

CENTRE OF POPULATION FOR THE AUSTRALIAN CAPITAL TERRITORY

At June 2001 the ACT's centre of population was located in the SLA of Yarralumla, having moved northwards by 0.5 kilometres from the SLA of Curtin during the past five years. This movement reflects the population growth experienced in the northern suburbs over this period.

EXPLANATORY NOTES

INTRODUCTION

1 For Australia, this publication contains estimates of the resident population of LGAs, SLAs, SSDs, SDs, Statistical Districts, States, Territories and Australia. For New Zealand, this publication contains estimates of the resident population of Regions, Territorial Authorities and New Zealand.

2 LGAs are ranked within States and Territories according to both largest (in number) and fastest (in percentage terms) growth between June 2000 and June 2001, allowing this publication to identify, in two ways, areas in Australia with the largest and fastest increases and decreases in population.

3 Following the 1992 amendment to the Acts Interpretation Act to include the Indian Ocean Territories of Christmas Island and Cocos (Keeling) Islands as part of geographic Australia, population estimates at dates commencing from July 1993 include estimates for these two Territories. To reflect this change, another category of the State/Territory classification was created, known as Other Territories. Other Territories include Jervis Bay Territory, Christmas Island and the Cocos (Keeling) Islands. Prior to July 1993, Jervis Bay Territory was included in estimates for the Australian Capital Territory.

ACCURACY

4 To meet the conflicting demand for accuracy and timeliness there are three estimates of sub-State populations. Preliminary estimates are available seven months after the reference date, revised estimates are available a year later and final estimates after the following census. The estimates in this publication are preliminary for 2001, revised for 2000 and final for 1996. Final estimates for 1997 to 2001 will be published in July 2002.

5 In recognition of the inherent inaccuracy involved in population estimation, population figures less than 1,000 in the text and accompanying summary tables are rounded to the nearest ten, figures over 1,000 are rounded to the nearest hundred, and figures over 1 million are rounded to the nearest 100,000. While unrounded figures are provided in the main tables, accuracy to the last digit is not claimed and should not be assumed.

ESTIMATED RESIDENT POPULATION — AUSTRALIA

6 Estimated resident population (ERP) are estimates of the Australian population obtained by adding to the estimated population at the beginning of each period the components of natural increase (on a usual residence basis) and net overseas migration.

7 For the States and Territories, account is also taken of estimated interstate movements involving a change of usual residence. After each census, estimates for the preceding intercensal period are revised by incorporating an additional adjustment (intercensal discrepancy) to ensure that the total intercensal increase agrees with the difference between the ERPs at the two respective census dates.

8 Estimates of the resident population are based on adjusted (for underenumeration) census counts by place of usual residence, to which are added the number of Australian residents estimated to have been temporarily overseas at the time of the Census. Overseas visitors in Australia are excluded from this calculation.

9 The concept of ERP links people to a place of usual residence within Australia. Usual residence is that place where each person has lived or intends to live for six months or more from the reference date for data collection.

Estimation of Statistical Local Area populations

10 In Census years the estimated resident population (ERP) as at 30 June for each Statistical Local Area (SLA)/Local Government Area (LGA) is based on usual residence census counts. To these counts are added an adjustment for net census undercount and the number of residents temporarily overseas at the Census date. As the 1996 Census was held on 6 August, further adjustments were made to obtain the ERP at 30 June 1996. Estimates based on the 2001 Census will be available in July 2002.

11 For post-censal years, the absence of migration data at the SLA level means that it is not possible to estimate SLA populations by taking into account natural increase and net migration. Instead, ERPs are calculated using a mathematical model. Local knowledge, including that advised by local governments, may be used to adjust the outcome of the model for a particular SLA.

12 In the mathematical model a relationship is established between changes in population and changes in other indicators over the period between the two most recent censuses.

13 The choice of indicators varies across the States and Territories, depending on availability, and includes dwelling approvals, electricity connections, Medicare enrolments and drivers licenses. Changes in these indicators are then used to estimate changes in the population of each area since the last census. The choice of indicators also varies across SLAs depending on aspects such as whether the SLA is urban or rural, is growing or declining, and whether the area has a high or low proportion of houses or medium and high density dwellings.

14 A more detailed explanation of the concept of ERP, as adopted by the ABS for official population estimates, is contained in *Demographic Estimates and Projections: Concepts, Sources and Methods*, *Statistical Concepts Library*, ABS website <www.abs.gov.au>.

15 Service population estimates are a different measure of population. They take into account seasonal itinerant populations which are not included in the ERP. Currently the ABS does not produce service population estimates but two working papers are available which investigate the concept and feasibility of such estimates. The working papers are available on the ABS website <www.abs.gov.au>, then select Themes, then Demography, then ABS Demography Working Papers (numbers 96/4 and 99/3).

ESTIMATED RESIDENT POPULATION — NEW ZEALAND

16 The resident population estimates for territorial authorities at 30 June 2001 were obtained by updating the June 2000 population figures for estimated births and deaths (by date of occurrence) of New Zealand residents, net permanent and long-term international migration, and estimated internal migration, for the period 1 July 2000 to 30 June 2001. The base population for these estimates is the number of New Zealand residents in New Zealand on census night, 5 March 1996 (3,618,302), adjusted for the estimated net undercount at the 1996 Census (45,000) and for the estimated number of New Zealand residents temporarily overseas on 5 March 1996 (40,000). More details are available on request from Chief Demographer, Demography Division, Private Bag 4741, Christchurch, New Zealand.

EXPLANATORY NOTES *continued*

ESTIMATED RESIDENT POPULATION — NEW ZEALAND *continued*

17 As these population estimates are based on the 1996 Census, they make no allowance for the census night counts that have become available from the 2001 Census of Population and Dwellings. Subnational resident population estimates at 30 June 2001, based on the 2001 Census, should be available late July 2002 and will be published on the Statistics New Zealand website <www.stats.govt.nz>. The 1996–based subnational population estimates are based on the resident population concept; as a result they will differ from the population counts released from the 2001 Census of Population and Dwellings.

18 The 1996–base subnational population estimates for regions, territorial authorities and urban areas for 1996–2001, are subject to revision. These estimates are available from the Statistics New Zealand website <www.stats.govt.nz/domino/external/web/prod_serv.nsf/htmldocs/Subnational+Population+Estimates+Tables>.

AUSTRALIAN STATISTICAL AREAS

19 This publication contains data presented according to the Australian Standard Geographical Classification 2001 Edition (ASGC). Under this classification, statistical areas are defined as follows:

- *Legal Local Government Areas (LGAs)*. These areas are the spatial units which represent the geographical areas of incorporated local government councils and incorporated Community Government Councils (CGCs) where the CGC is of sufficient size and statistical significance. The various types of LGAs are cities (C), areas (A), rural cities (RC), towns (T), shires (S), district councils (DC) and municipalities (M).
- *Statistical Local Areas (SLAs)*. These geographical areas are, in most cases, identical with, or have been formed from a division of, whole LGAs. In other cases, they represent unincorporated areas. In aggregate, SLAs cover the whole of a State or Territory without gaps or overlaps. In some cases legal LGAs overlap statistical subdivision boundaries and therefore comprise two or three SLAs (Part A, Part B and, if necessary, Part C).
- *Statistical Subdivisions (SSDs)*. These are of intermediate size, between SLAs and SDs. In aggregate, they cover the whole of Australia without gaps or overlaps. They are defined as socially and economically homogeneous regions characterised by identifiable links between the inhabitants. In the non-urban areas an SSD is characterised by identifiable links between the economic units within the region, under the unifying influence of one or more major towns or cities.
- *Statistical Divisions (SDs)*. These consist of one or more SSDs. The divisions are designed to be relatively homogeneous regions characterised by identifiable social and economic units within the region, under the unifying influence of one or more major towns or cities.
- *Statistical Districts (S Dists)*. These consist of selected, significant, predominantly urban areas in Australia which are not located within a Capital City SD. S Dists enable comparable statistics to be produced about these selected urban areas.

20 Further information concerning statistical areas is contained in *Australian Standard Geographical Classification (ASGC), 2001* (Cat. no. 1216.0).

21 For the purposes of this publication, all data refer to bounded areas as defined at 1 July 2001, and as incorporated in the 2001 ASGC.

EXPLANATORY NOTES *continued*

AUSTRALIAN STATISTICAL AREAS *continued*

22 Changes to LGA boundaries that have occurred between 5 August 1995 and 1 July 1998 are documented in Appendix A. Appendix B contains SLA changes incorporated in ASGC 1998, not included in Appendix A. Changes to LGA boundaries that have occurred since 1 July 1998 and incorporated in ASGC 1999 are documented in Appendix C. Appendix D contains SLA changes that have occurred since 1 July 1998, incorporated in ASGC 1999. Appendix E contains changes to LGA boundaries incorporated in ASGC 2000 and Appendix F includes changes to SLA boundaries included in ASGC 2000. Appendix G contains changes to SLA boundaries included in the ASGC 2001.

MAPS

23 A complete series of maps showing the SLAs mentioned in this publication is available in *Australian Standard Geographical Classification (ASGC), 2001* (Cat. no. 1216.0) and is freely available on the ABS website <www.abs.gov.au>, then select About Statistics.

AVERAGE ANNUAL RATE OF GROWTH

24 The average annual growth rate, r , is calculated as a percentage using the formula:

$$\left[\left(\frac{P_n}{P_o} \right)^{\frac{1}{n}} - 1 \right] \times 100$$

where P_o is the population at the start of the period, P_n is the population at the end of the period and n is the length of the period between P_n and P_o in years.

CALCULATION OF AREAS

25 The area figures quoted in this issue are based upon the Statistical Local Area (SLA) level of the *Australian Standard Geographical Classification (ASGC) 2001* (Cat. no. 1216.0). The areas of the SLAs were calculated using ABS standard GIS software from the digital boundaries of the ASGC 2001. Higher level spatial unit area figures are sub-totals of the SLA areas.

ELECTRONIC DATA

26 Annual population estimates at 30 June for all SLAs in Australia are available electronically. This information can be customised to provide data for any choice of years and any combination of States and Territories. Electronic copies of this publication (in .pdf format), plus current and earlier year estimates for all SLAs in Australia, are available from the ABS website <www.abs.gov.au>. These and other downloadable products will soon be able to be purchased online using a credit card. They can be downloaded (with no credit card needed) by AusStats and ABS@ subscribers, Australian universities and at some public libraries. If you are not an AusStats subscriber inquiries can be made to Information Services (see the back cover of this publication for contact details). Inquiries for New Zealand data should be directed to Statistics New Zealand (email info@stats.govt.nz).

ACKNOWLEDGMENT

27 ABS publications draw extensively on information provided freely by individuals, businesses, governments and other organisations. Their continued cooperation is very much appreciated; without it, the wide range of statistics published by the ABS would not be available. Information received by the ABS is treated in strict confidence as required by the *Census and Statistics Act 1905*.

RELATED RELEASES

28 Other ABS releases that may be of interest to users of this publication include:

Regional Statistics, Australian Capital Territory (Cat. no. 1362.8)

Further Statistics New Zealand data are available from the website <www.stats.govt.nz>.

29 A compendium of all demographic data for each State and Territory has been released in State or Territory specific publications, *Demography, State* (Cat. nos. 3311.1–8). These publications are released each year for each State or Territory and contain a variety of demographic data.

30 Current publications produced by the ABS are listed in the *Catalogue of Publications and Products* (Cat. no. 1101.0). The ABS also issues, on Tuesdays and Fridays, a *Release Advice* (Cat. no. 1105.0) which lists publications to be released in the next few days. Both are available electronically from the ABS website.

31 As well as the statistics included in this and related publications, additional information is available from the ABS Website at <www.abs.gov.au> and accessing Themes/Demography.

APPENDIX A LGA CHANGES MADE IN ASGC 1998
