## NOTES

### ABOUT THIS PUBLICATION

For Australia, this publication contains estimates of the resident population of Statistical Local Areas (SLAs), Local Government Areas (LGAs), Statistical Subdivisions (SSDs), Statistical Divisions (SDs), Statistical Districts and states and territories at June 1999, 2003 and 2004, according to the 2004 edition of the Australian Standard Geographical Classification (ASGC). Growth rates for these areas are also provided. Estimates for 1999 are final estimates, based on results of the 2001 Census of Population and Housing, while estimates for 2003 are revised and estimates for 2004 are preliminary.

For New Zealand, this publication contains final estimates of the resident population of Regional Councils and Territorial Authorities at June 1999 and preliminary estimates for 2003 and 2004, based on results of the New Zealand 2001 Census of Population and Dwellings. Growth rates for these areas are also provided.

### CHANGES IN THIS ISSUE

In previous issues analysis of small area population change (in percentage terms) and rankings of growth in Tables 1 to 7 have excluded SLAs and LGAs with populations smaller than 1,000 people. Due to the inherent imprecision of small area population estimates, in this issue areas with populations of less than 2,000 people have been excluded from analysis and rankings according to percentage growth/decrease.

### ROUNDING

In commentary based on statistics in this publication, it is recommended that the relevant statistics be rounded. Small area population estimates are the result of mathematical modelling and are subject to error. While unrounded figures are provided in tables, accuracy to the last digit is not claimed and should not be assumed. No reliance should be placed on statistics with small values.

Dennis Trewin  
Australian Statistician

## MAIN FEATURES

### POPULATION CHANGE

- Australia's estimated resident population (ERP) at June 2004 was 20.1 million, an increase of 238,700 people compared with June 2003. This represents an annual growth rate of 1.2%, the same as the average annual growth rate for the five years to June 2004.
- All states and territories experienced population growth in 2003–04, with the largest increases occurring in Queensland (up 81,000 people), Victoria (up 61,400 people) and New South Wales (up 49,200 people).
- Queensland and Western Australia were the only two states to record annual growth rates greater than Australia overall in 2003–04. Queensland's population increased by 2.1% while Western Australia's increased by 1.7%.
- Victoria's growth rate for 2003–04 of 1.2% was the same as Australia overall. The remaining states and territories recorded lower annual growth rates than Australia, with the population of Tasmania increasing by 1.0%, New South Wales and the Northern Territory each increasing by 0.7%, South Australia by 0.5%, and the Australian Capital Territory by 0.2%.

### SLA POPULATION CHANGE, Australia—2003–04

(a) Includes Queensland Aboriginal and Island Councils and Northern Territory Community Government Councils. See paragraphs 16 to 25 of the Explanatory Notes for more information.

## MAIN FEATURES *continued*

### ACCURACY OF POPULATION ESTIMATES

- It is important to recognise that sub-state/territory population estimates in this publication are produced using mathematical models and are subject to error. Caution should be exercised when using the estimates, especially for areas with very small populations. For more information see paragraphs 7 to 12 of the Explanatory Notes.

### CAPITAL CITY GROWTH

- At June 2004 capital city Statistical Divisions (SDs) were home to 12.8 million people, around two-thirds (64%) of Australia's population. The combined population of capital city SDs increased by 153,700 people in 2003–04, accounting for 64% of Australia's growth for the year.
- Melbourne SD recorded the largest growth of capital cities in 2003–04, increasing 44,800 people, followed by Brisbane SD (up 39,700 people) and Sydney SD (up 33,500 people).
- Brisbane SD was the fastest growing capital city in Australia in 2003–04, increasing by 2.3%, followed by Perth SD (up 1.8%) and the Melbourne and Darwin SDs (each up 1.3%).
- Population growth in the Sydney SD in 2003–04 equated to an average increase of 640 people per week. Other large capital cities such as Melbourne increased at an average of 860 people per week, Brisbane 760 per week and Perth 500 per week.

### *Outer suburban growth*

- Large increases in population continue to occur in many outer Local Government Areas (LGAs) of capital city SDs. In Sydney SD, the LGAs of Blacktown (C), Baulkham Hills (A), and Liverpool (C) experienced large growth (up 5,500, 3,500 and 2,300 people respectively), while in Melbourne SD the fringe LGAs of Casey (C), Wyndham (C) and Melton (S) increased by 8,700, 8,400 and 5,900 people respectively.
- Outer suburban areas in the smaller capital cities also experienced significant growth, such as occurred in the Brisbane Statistical Local Areas (SLAs) of Parkinson-Drewvale and Doolandella-Forest Lake. In South Australia the outer suburban LGA of Salisbury (C) recorded the largest population increase in the state, while in Perth the LGAs of Wanneroo (C), Rockingham (C), Gosnells (C) and Cockburn (C) experienced large growth. Kingborough (M), to the south of Hobart, recorded the second largest increase in population of Tasmanian LGAs, while Palmerston (C), on the outskirts of Darwin, recorded the second largest growth of any Northern Territory LGA. Of SLAs in the Australian Capital Territory, Gungahlin-Hall - SSD Bal and Amaroo, on the northern fringe of Canberra, and Dunlop, to the north-west, experienced the largest growth.

### *Inner city growth*

- Many of Australia's inner city areas experienced high levels of growth during 2003–04. Perth (C) recorded the fastest growth rate of all LGAs in Australia, with a 12.1% increase, while the population of the adjacent LGA of Subiaco (C) increased by 3.6%. Melbourne (C) recorded an annual growth rate of 6.4%, the population of Adelaide (C) increased by 4.6%, and Sydney (C) increased by 3.6%. Elsewhere in Australia, other inner city areas to experience high levels of growth were the Brisbane SLAs of City - Remainder, City - Inner, South Brisbane and Newstead, the Darwin SLA of Stuart Park, and the Canberra SLAs of Turner and Braddon.

## MAIN FEATURES *continued*

---

### GROWTH ALONG THE COAST

- Generally, the largest growth outside capital city SDs occurred in coastal Australia. Gold Coast (C) in Queensland recorded the second largest increase in population of all LGAs in Australia during 2003–04 (up 13,200 people), behind Brisbane which increased by 17,600 people, while strong growth continued in many other Queensland coastal areas such as Pine Rivers (S), Maroochy (S) and Caloundra (C).
- In New South Wales, increases in population were recorded in most coastal LGAs outside the Sydney SD, with the largest occurring in Tweed (A), Newcastle (C) and Hastings (A), while the Victorian LGA of Bass Coast (S) continued to experience strong growth in 2003–04. In South Australia, the populations of Alexandrina (DC) and Victor Harbor (C) continued to grow, and in Western Australia the coastal LGAs of Mandurah (C), Busselton (S), Capel (S) and Augusta-Margaret River (S) experienced continuing strong growth.

### GROWTH IN REGIONAL CENTRES

- Various regional centres throughout Australia continued to gain population during 2003–04, such as the New South Wales LGAs of Maitland (C) and Greater Queanbeyan (C), the statistical district of Albury-Wodonga on the New South Wales/Victorian border, the Victorian LGAs of Greater Geelong (C), Greater Bendigo (C) and Ballarat (C), and the Queensland LGA of Toowoomba (C). A number of coastal regional centres, such as Cairns (C) and Townsville (C) in Queensland and Port Lincoln (C) in South Australia, also experienced growth in 2003–04.

### SMALL AREA POPULATION DECLINES

- The largest decline in population in 2003–04 occurred in the Melbourne LGA of Banyule (C), which decreased by 680 people, followed by the Sydney LGA of Fairfield (C) which decreased by 650 people. Hobsons Bay (C) in Melbourne and Penrith (C) in Sydney recorded the third and fourth largest decreases in population, down 560 and 550 people respectively.
- Of LGAs with populations greater than 2,000 people at June 2003, all of the twenty fastest decreasing LGAs in Australia in 2003–04 were located in state and territory balances (that is, those areas outside the capital city SDs), and all of the seven fastest decreasing LGAs were located in the balance of Western Australia. The population of Coolgardie (S) recorded the highest rate of population decline in 2003–04, decreasing by 6.8%, followed by Merredin (S) (down 4.7%) and Carnarvon (S) and Katanning (S) (each down 4.1%).

## POPULATION CHANGE AUSTRALIA

### NATIONAL GROWTH

Australia's estimated resident population at June 2004 was 20.1 million, an increase of 238,700 people compared with June 2003. This represents an annual growth rate of 1.2%, the same as the average annual growth rate of 1.2% over the five years to June 2004.

Natural increase (the excess of births over deaths) contributed 121,000 people to Australia's population in 2003–04, while net overseas migration contributed 117,600 people.

### QUEENSLAND RECORDS FASTEST AND LARGEST POPULATION GROWTH

Queensland recorded the largest population growth of the states and territories in 2003–04, with an increase of 81,000 people. This resulted from net interstate migration of 36,700 people (the largest of the states and territories), net overseas migration of 19,700 people, and natural increase of 24,600 people.

Queensland's annual growth rate of 2.1% was also the fastest increase, in percentage terms, of the states and territories.

South-east Queensland (comprising the Brisbane and Moreton SDs) increased by 61,900 people in 2003–04, accounting for 76% of Queensland's total population growth. This equates to an average increase of just under 1,200 people per week.

### GROWTH IN NEW SOUTH WALES AND VICTORIA

New South Wales experienced the third largest population increase during 2003–04, up 49,200 people (or 0.7%). Natural increase added 40,400 people to NSW's population and overseas migration added 39,300 people, while 30,400 people were lost to the remaining states and territories due to interstate migration.

The population of Victoria increased by 61,400 people in 2003–04, the second largest increase of the states and territories. This corresponds to a growth rate of 1.2% for the year, the same as Australia overall.

Victoria's natural increase (29,100 people) in 2003–04 was the highest recorded for Victoria since 1994–95, while net interstate migration was negative (losing 2,300 people to the rest of Australia) for the first time since 1997–98. Net overseas migration in 2003–04 contributed 34,600 people to Victoria's population.

### POPULATION GROWTH IN THE SMALLER STATES AND TERRITORIES

Western Australia recorded the second fastest population growth of the states and territories in 2003–04, increasing by 1.7% (32,300 people). Net overseas migration contributed 17,100 people to WA's population and natural increase 13,800 people, while net interstate migration added 1,300 people. This was the first year since 1998–99 in which WA's net interstate migration level was positive; that is, more people moved interstate to WA than left WA for other states and territories of Australia.

South Australia's population increased by 7,900 people (0.5%) in 2003–04, with natural increase adding 5,700 people, net overseas migration adding 5,500 people, and net interstate migration removing 3,200 people.

Tasmania's population increased by 1.0% (4,800 people) during 2003–04, compared with an average annual rate of increase of 0.4% for the period 1999 to 2004. This high rate of growth was largely due to recent positive levels of net interstate migration, which added 1,900 people in 2002–03 and 2,500 people in 2003–04 to Tasmania's population, after 11 consecutive years of net interstate migration losses.

POPULATION GROWTH IN  
THE SMALLER STATES  
AND TERRITORIES *continued*

The Northern Territory's population increased by 1,400 people (or 0.7%) in 2003–04. Natural increase remained the main component of growth, adding 2,900 people to the population, while overseas migration added a smaller amount (610 people). The Northern Territory lost 2,100 people through interstate migration.

The population of the Australian Capital Territory (ACT) increased by 0.2% (660 people) in 2003–04, the smallest growth rate of the states and territories. Natural increase added 2,800 people to the ACT, net overseas migration added 220 people, and net interstate migration removed 2,400 people.

CAPITAL CITY AND STATE  
BALANCE POPULATION  
CHANGE

Capital city SDs were home to 12.8 million people at June 2004, making up approximately two-thirds (64%) of Australia's population. This was the same proportion as in 1999. The combined population of all capital city SDs increased by 153,700 people in 2003–04, accounting for 64% of Australia's growth for the year.

The combined population of the state balances (those areas outside capital city SDs) was 7.3 million people, making up 36% of Australia's population, and increased by 85,000 people in 2003–04.

The combined populations of capital city SDs and state balances increased at the same rate as each other in 2003–04 (each up 1.2%). In percentage terms, capital city growth was higher than state balance growth in all states and territories with the exception of South Australia and the ACT.

The largest growth among capital cities in 2003–04 occurred in the Melbourne SD (up 44,800 people), followed by Brisbane SD (up 39,700 people) and Sydney SD (up 33,500 people). The population of the balance of Queensland increased by 41,300 people, with most of the growth occurring within one statistical region in the south-eastern corner of Queensland. Brisbane SD was the fastest growing capital city in Australia in 2003–04, increasing by 2.3%, followed by the Perth SD (1.8%).

POPULATION DENSITY

Australia's population density at June 2004 was 2.6 people per square kilometre, compared with 2.5 people per square kilometre in 1999. The ACT had the highest population density of the states and territories at June 2004 with 138 people per square kilometre, followed by Victoria with 22 people per square kilometre. The Northern Territory had a population density of only 0.1 people per square kilometre, the lowest of the states and territories.

Population density at June 2004 was highest in the city centres, particularly in the Sydney SD, where the three most densely populated SLAs in Australia are located. These were Sydney (C) - Central (with 8,300 people per square kilometre), Waverley (A) (6,700 people per square kilometre) and North Sydney (5,800 people per square kilometre). Fourth on the list, and the most densely populated SLA in Victoria, was Port Phillip (C) - St. Kilda, with 5,600 people per square kilometre. Fifth, and the most densely populated area in Queensland, was the SLA of New Farm in inner Brisbane, with 5,400 people per square kilometre. At the other extreme, there were over 250 SLAs in Australia with less than 1 person per square kilometre.

CENTRE OF POPULATION

The centre of population is one measure to describe the spatial distribution of the population. This point marks the average latitude and longitude around which the population is distributed. The inherent imprecision in small area population estimates, and the use of SLA 'centroids', means the centre of population provides only an indication of the distribution of the population, and cannot with any certainty be ascribed to an exact location. See paragraphs 36 and 37 of the Explanatory Notes for more detail.

At June 2004 the centre of Australia's population was located around 55 kilometres east of the town of Ivanhoe in the LGA of Central Darling (A), reflecting the concentration of the population in the south-east of Australia, particularly in Sydney and Melbourne. Between June 1999 and June 2004 the centre of population has moved around 7 kilometres north-eastward, as a result of population growth in northern Australia.

CENTRE OF POPULATION, Australia—June 1999 and June 2004

## POPULATION CHANGE NEW ZEALAND

### NATIONAL GROWTH

The estimated resident population of New Zealand at June 2004 was 4.1 million people, an increase of 52,200 people since June 2003. New Zealand's annual growth rate of 1.3% during 2003–04 was slightly higher than the rate recorded for the period 1999 to 2004, of 1.2%.

The North Island's population was 3.1 million people, an increase of 39,800 people (1.3%) compared with June 2003, accounting for more than three-quarters (76%) of New Zealand's total population. The population of the South Island at June 2004 was 973,100 people, an increase of 12,400 people (also 1.3%).

### REGIONAL COUNCIL POPULATION CHANGE

The four northern-most regions of New Zealand (Northland, Auckland, Waikato and Bay of Plenty) together accounted for just over half (52%) of New Zealand's total population. At June 2004 the Auckland Region was home to 1.3 million people, or just under one-third (32%) of all New Zealanders. The population of Auckland Region increased by 2.0% (26,100 people) in 2003–04, making it the second fastest growing Regional Council in New Zealand, behind Tasman Region whose population increased by 2.5% (1,100 people).

Canterbury, the second most populous Regional Council in New Zealand, experienced growth of 7,900 people (1.5%) in 2003–04, to reach a population of 520,600 people.

Other regions to experience growth rates higher than New Zealand overall were Nelson (up 1.8%, or 800 people) and the Bay of Plenty and Marlborough (each up 1.4%, or 3,600 and 600 people respectively).

Five Regional Councils experienced overall decreases in population in 2003–04. These were Gisborne Region (down 300 people), the Manawatu-Wanganui and Taranaki Regions (each down 200 people), and the Southland and West Coast Regions (each down 100 people).

### TERRITORIAL AUTHORITIES

The city of Manukau recorded the largest increase in population of New Zealand's Territorial Authorities in 2003–04, up 8,700 people (or 2.7%), followed by Auckland City (up 5,700 people, or 1.4%), Christchurch City (up 5,300 people, 1.6%) and North Shore City (up 4,400, or 2.1%).

The Queenstown-Lakes District continued as New Zealand's fastest growing territorial authority, increasing by 7.2% (1,500 people) in 2003–04. Since 1999 the population of this district has increased by almost 40%, from 16,100 people to 22,200 people.

Other Territorial Authorities to experience high rates of growth in 2003–04 were the Rodney and Waimakariri Districts (each up 3.0%), Tauranga City (up 2.9%), Manukau City and Selwyn District (each up 2.7%), and Tasman District (up 2.5%).

Around one-third of New Zealand's Territorial Authorities experienced decreases in population in 2003–04, with the largest occurring in Ruapehu District (down 500 people), the Gisborne, South Waikato and Wanganui Districts (each down 300 people), and Wairoa District (down 240 people).

# POPULATION CHANGE NEW SOUTH WALES

## STATE SUMMARY

At June 2004 the estimated resident population of New South Wales (NSW) was 6.73 million people, an increase of 49,200 people since June 2003. The annual growth rate of 0.7% was the same as the previous year, and less than the average annual growth rate of 1.0% recorded over the period 1999 to 2004.

## SYDNEY SD

At June 2004, 63% (4.2 million people) of NSW's population resided in the Sydney SD. The annual growth rate for the Sydney SD was 0.8%, representing an increase of 33,500 people during 2003–04.

### *Growth in Sydney SD*

The five largest increases in population at the LGA level in NSW during 2003–04 all occurred in the Sydney SD. Blacktown (C) recorded the largest increase of any LGA in NSW, up 5,500 people, followed by Sydney (C) (up 5,100 people), Baulkham Hills (A) (3,500 people), Liverpool (C) (2,300 people) and Parramatta (C) (2,200 people).

High annual growth rates were also recorded in many of Sydney's LGAs during 2003–04, with seven of the ten fastest growing LGAs in NSW being located within the Sydney SD. The inner city LGA of Sydney (C), with a population increase of 3.6% (5,100 people), was the fastest growing LGA in NSW. The second and third fastest growing LGAs in NSW were Strathfield (A) and Auburn (A), which increased by 3.1% (930 people) and 2.8% (1,700 people) respectively.

## LGAs WITH LARGEST AND FASTEST POPULATION GROWTH, New South Wales

LGA	ERP	POPULATION CHANGE		LGA	ERP	POPULATION CHANGE	
	2004p	2003-2004p			2004p	2003-2004p	
	no.	no.	%		no.	no.	%
LARGEST GROWTH				FASTEST GROWTH			
Blacktown (C)	278 500	5 500	2.0	Sydney (C)	146 300	5 100	3.6
Sydney (C)	146 300	5 100	3.6	Strathfield (A)	31 100	930	3.1
Baulkham Hills (A)	157 900	3 500	2.2	Auburn (A)	62 800	1 700	2.8
Liverpool (C)	167 900	2 300	1.4	Kogarah (A)	55 000	1 300	2.4
Parramatta (C)	151 100	2 200	1.5	Canada Bay (A)	66 100	1 500	2.4

### *Population losses in Sydney SD*

Twelve of Sydney's LGAs experienced decreases in population during 2003–04. These included the six largest decreases at the LGA level in NSW. Fairfield (C) experienced the largest loss, down 650 people, while Penrith (C) declined by 550 people, Campbelltown (C) by 520 people, Canterbury (C) by 430 people, Blue Mountains (C) by 400 people and Botany Bay (C) by 250 people.

## RURAL AND REGIONAL NSW

The largest increases in SD populations outside the Sydney SD occurred in the Hunter (up 4,700 people), Mid-North Coast (up 4,100 people), Richmond-Tweed (up 2,400 people) and Illawarra (also up 2,400 people) SDs.

Three NSW SDs outside the Sydney SD experienced decreases in population during 2003–04. The Northern SD lost 490 people (down 0.3%), the North Western SD lost 280 people (down 0.2%), and the Far West SD lost 190 people (down 0.8%).

## POPULATION CHANGE NEW SOUTH WALES *continued*

### Coastal change

At June 2004 there were 1.3 million people living in coastal LGAs (those LGAs outside the Sydney SD whose boundaries adjoin the sea) in NSW, making up 20% of the state's total population. These areas experienced a combined population increase of 12,700 people (or 1.0%) in 2003–04.

The LGA of Tweed (A) recorded the largest and fastest population growth of all coastal LGAs in NSW during 2003–04, with an increase of 1,700 people, or 2.2%. Newcastle (C) experienced the second largest increase (up 1,400 people or 0.9%) followed by Hastings (A) (up 1,300 people or 1.9%). The population of Nambucca (A) also increased by 2.2% during 2003–04, while other coastal LGAs to experience relatively high rates of growth were Great Lakes (A) (up 1.9%), and Coffs Harbour (C), Port Stephens (A), and Eurobodalla (A) (whose populations each increased by 1.8%).

Only three LGAs in coastal NSW experienced population decreases in 2003–04.

Richmond Valley (A) lost 150 people (0.7% of its population), while Bellingen (A) and Kiama (A) each lost 60 people (down 0.4% and 0.3% respectively).

### Inland population change

At June 2004 around 1.2 million people lived in inland LGAs (those LGAs not included in the Sydney SD or in coastal NSW), accounting for 17% of NSW's total population. In the year to June 2004 the combined population of these LGAs increased by 3,000 people, or 0.3%. This growth rate was slightly higher than the growth rate of 0.2% for 2002–03.

Of NSW's inland LGAs, around one third experienced increases in population in 2003–04. The largest increases occurred in Maitland (C) (up 1,000 people), Greater Queanbeyan (C) (up 450 people), Wingecarribee (A) (up 390 people), and Wagga Wagga (C) and Bathurst (C) (both up 350 people).

Broken Hill (C) recorded the largest population decrease of any LGA in inland NSW, down 210 people. Other inland LGAs to experience decreases in population in 2003–04 were Tumut (A) (down 170 people), Narrabri (A) (down 130), Forbes (A) (down 120) and Moree Plains (A) (down 110).

## POPULATION CHANGE VICTORIA

### STATE SUMMARY

Victoria's estimated resident population at June 2004 was almost 5 million (4.97 million) people, an increase of 61,400 people since June 2003. This represents an annual growth rate of 1.2%.

### GROWTH IN MELBOURNE

At June 2004 there were an estimated 3.6 million people resident in the Melbourne SD, an increase of 44,800 people (or 1.3%) since June 2003.

Melbourne SD accounted for 73% of Victoria's population growth between June 2003 and June 2004 and is home to 72% of Victoria's population.

#### *Growth in the outer suburbs*

The largest population increases in Victoria continued to occur on the outer suburban fringes of the Melbourne SD. Casey (C) experienced the largest growth of Victorian LGAs, increasing by 8,700 people (or 4.3%) in 2003–04. Within Casey (C), the SLA of Casey (C) - Berwick (which includes the suburbs of Berwick and Narre Warren) increased by 4,300 people, while the SLA of Casey (C) - Cranbourne increased by 3,800 people.

The LGA of Wyndham (C), located to the south-west of the Melbourne city centre, experienced the second largest growth of Victorian LGAs in 2003–04, increasing by 8,400 people (or 8.4%). Almost 45% of this growth occurred in the SLA of Wyndham (C) - South (which includes the suburbs of Point Cook and Sanctuary Lakes), which grew by 3,800 people. The population of the SLA of Wyndham (C) - North increased by 3,600 people.

The population of Melton (S) increased by 9.1% (or 5,900 people) during 2003–04, making it the fastest growing LGA in the state. The majority of this growth occurred in the SLA of Melton (S) - East (which includes suburbs such as Caroline Springs, Burnside and Hillside), which increased by 4,700 people.

#### *Growth in the inner city*

The population of the LGA of Melbourne (C) continued to grow in 2003–04, increasing by 3,700 people (or 6.4%). The SLA of Melbourne (C) - Remainder contributed growth of 1,560 people, Melbourne (C) - Southbank-Docklands 1,480 people and Melbourne (C) - Inner a further 680 people.

### LGAs WITH LARGEST AND FASTEST POPULATION GROWTH, Victoria

## POPULATION CHANGE VICTORIA *continued*

### GROWTH IN REGIONAL VICTORIA

#### *Statistical Divisions*

In the year to June 2004, the population of the Balance of Victoria increased by 16,600 people (or 1.2%) to 1.4 million people. During this period, all SDs in regional Victoria experienced population growth, with the exception of the Wimmera SD which experienced a very small decrease (of 40 people, or 0.1%). Barwon SD increased by 4,000 people (or 1.5%), Loddon SD increased by 2,600 people (also 1.5%), while the populations of the Goulburn and Gippsland SDs increased by 2,500 (or 1.3%) and 2,100 (also 1.3%) people respectively.

#### *Local Government Areas*

Of Victorian regional centres, the LGA of Greater Geelong (C) experienced the largest increase in population in the year to June 2004, up 2,800 people (or 1.4%), followed by Greater Bendigo (C) (up 1,700 people, or 1.8%) and Ballarat (C) (up 1,300 people, or 1.5%).

The LGA of Golden Plains (S) recorded the fastest population growth in regional Victoria in 2003–04, with an increase of 3.6% (or 570 people). Mitchell (S) was the second fastest growing LGA in regional Victoria, increasing by 3.5% (or 1,100 people), due to growth in the SLA of Mitchell (S) - South which increased by 1,100 people while Mitchell (S) - North experienced a small decrease in population (down 60 people). The third fastest growing LGA was Bass Coast (S) (including the localities of Phillip Island, Inverloch and Wonthaggi), which grew by 3.3% (or 900 people).

### POPULATION DECLINE

The largest declines in population in Victoria in 2003–04 all occurred within the Melbourne SD, with the LGA of Banyule (C) decreasing by 680 people (or 0.6%), Hobsons Bay (C) decreasing by 560 people (or 0.7%) and Whitehorse (C) decreasing by 340 people (or 0.2%).

The fastest declines in population were recorded in regional Victoria, with the populations of the LGAs of Yarriambiack (S) and Buloke (S) both decreasing by 1.1% (or 90 and 80 people respectively). The LGA of West Wimmera (S) experienced the third fastest decrease in population in Victoria, down 0.9% (or 50 people).

### LGAs WITH LARGEST AND FASTEST POPULATION DECLINE, Victoria

## POPULATION CHANGE QUEENSLAND

### STATE SUMMARY

The estimated resident population of Queensland increased by 81,000 people in the year to June 2004, to reach 3.9 million people. The corresponding annual growth rate of 2.1% was the highest of all states and territories.

### SOUTH-EAST QUEENSLAND

At June 2004 the south-east corner of Queensland, comprising the Brisbane and Moreton SDs, made up two-thirds (66%) of Queensland's total population. The population of this area increased by 61,900 people in 2003–04, accounting for three-quarters (76%) of Queensland's total growth.

The cities of Brisbane (C) and the Gold Coast (C) were the major contributors to Queensland's population growth in 2003–04. These two LGAs, the largest in Queensland, again experienced the largest increases in population in the state and in Australia overall. The city of Brisbane increased by 17,600 people, a growth of 1.9% for the year ending June 2004, and the city of Gold Coast recorded an increase of 13,200 people, representing an increase of 2.9% for the same period.

### BRISBANE SD

Brisbane SD recorded an increase in population of 39,700 people (or 2.3%) in 2003–04, reaching a population of 1.8 million people (46% of Queensland's total population).

Within the city of Brisbane (C), new housing estates continued to account for large increases in population in a number of areas in 2003–04. The southern SLAs of Parkinson-Drewvale, which increased by 1,500 people (16%), and Doolandella-Forest Lake, which increased by 1,200 people (7%), experienced the largest increases in population of any SLAs within Brisbane (C) during this period.

Of SLAs with a population greater than 2,000 people at June 2003, Wakerley recorded the fastest growth in Brisbane (C), with an increase of 31% in 2003–04, followed by City - Remainder (up 21%) and Ellen Grove (up 20%). Other, smaller, SLAs to experience high rates of growth in 2003–04 were Bowen Hills and City - Inner.

### *Pine Rivers and Redland shires*

During 2003–04 the shires of Pine Rivers and Redland, within Brisbane SD, recorded increases of 5,300 people (up 4.0%) and 3,000 people (up 2.4%) respectively. This reflects ongoing development of new housing estates in these areas. The population of the SLA of Griffin-Mango Hill, in Pine Rivers (S), increased by 2,000 people (31%) in 2003–04.

### *The Gold and Sunshine Coasts*

Moreton SD includes Gold Coast City Part B and the Sunshine Coast. In 2003–04 Moreton continued as the fastest growing SD in Queensland, increasing by 2.9% (22,200 people).

The population of the city of Gold Coast (comprising Gold Coast City Part A and Gold Coast City Part B) increased by 13,200 people (2.9%) in the year to June 2004. The major contributor to this growth was the SLA of Robina, which increased by 1,700 people, followed by Guanaba-Currumbin Valley, which increased by 1,600 people, and Coomera-Cedar Creek which increased by 1,300 people.

## POPULATION CHANGE QUEENSLAND *continued*

### POPULATION GROWTH IN THE REMAINDER OF QUEENSLAND

Six of the nine SDs outside south-east Queensland experienced increases in population in 2003-04. Wide Bay-Burnett SD recorded the largest increase, up 5,700 people, followed by Far North SD (up 3,400 people), Northern SD (up 3,300 people), Darling Downs and Fitzroy SDs (each up 2,600 people), and Mackay SD (up 2,000 people).

Significant growth was recorded in many coastal LGAs, with the population of Cairns (C) increasing by 2,800 people (2.3%) in 2003-04, Hervey Bay (C) up 2,600 people (5.6%), Townsville (C) up 2,000 people (2.1%) and Thuringowa (C) up 1,500 people (2.7%).

### DECLINING POPULATIONS

The population of rural Queensland continued to decline in 2003-04, with decreases in population recorded in the SDs of Central West (down 1.1%) and North West and South West (each down 0.3%).

Of Queensland LGAs, Hinchinbrook (S) experienced the largest decrease in population in 2003-04, down 130 people (1.1%), followed by Taroom (S) and Inglewood (S), which each decreased by 70 people (2.7% and 2.5% respectively). Of LGAs with a population of greater than 2,000 people, Flinders (S) recorded the highest rate of population loss, decreasing by 2.8%.

### LGAs WITH LARGEST AND FASTEST POPULATION DECLINE, Queensland

(a) Excludes LGAs with a population of less than 2,000 at June 2003.

## POPULATION CHANGE SOUTH AUSTRALIA

### STATE SUMMARY

South Australia's estimated resident population at June 2004 was 1.5 million people, an increase of 7,900 people since June 2003. This represents an annual growth rate of 0.5% over the period.

### POPULATION GROWTH IN ADELAIDE

At June 2004 the population of Adelaide SD was 1.1 million people, accounting for 73% of South Australia's population. Adelaide's population increased by 5,200 people (0.5%) in 2003–04, while the remainder of the state increased by 2,700 people (0.7%).

#### *Adelaide SD*

Of Statistical Subdivisions (SSD) within the Adelaide SD, the largest growth in 2003–04 was recorded in Northern Adelaide SSD, which increased by 3,200 people (or 0.9%).

Adelaide SD contained both the largest and fastest growing LGAs in South Australia. The largest increase in population occurred in the LGA of Salisbury (C), which increased by 2,100 people (1.8%), while the fastest growing LGA was Adelaide (C), which recorded an increase of 4.6% (640 people). Tea Tree Gully (C) experienced the largest population decline within the state, down 170 people (or 0.2%).

#### *Outer Adelaide SD*

The Outer Adelaide SD recorded the fastest increase in population of South Australian SDs in 2003–04, increasing by 2.3%, and the second largest increase in population (2,700 people), behind the Adelaide SD.

Outer Adelaide SD contained the four fastest growing SSDs within South Australia in 2003–04. These were Fleurieu SSD, which increased by 3.1% (1,100 people), Kangaroo Island SSD and Barossa SSD (each up 2.1%, or 90 and 810 people respectively), and Mt Lofty Ranges SSD (up 1.7%, or 690 people).

Alexandrina (DC) experienced both the largest and fastest growth of LGAs within the Outer Adelaide SD, with an increase of 710 people, or 3.7%.

### LGAs WITH LARGEST AND FASTEST POPULATION GROWTH, South Australia

## POPULATION CHANGE SOUTH AUSTRALIA *continued*

### POPULATION CHANGE IN THE REMAINDER OF SOUTH AUSTRALIA

#### *Population growth*

LGA population increases in the remainder of South Australia in 2003–04 were generally smaller than those recorded within the Adelaide and Outer Adelaide SDs. The population of Murray Bridge (RC) increased by 230 people, Copper Coast (DC) by 180 people and Port Lincoln (C) by 130 people. Copper Coast (DC) recorded the fastest growth in 2003–04 outside the Adelaide and Outer Adelaide SDs, with an increase of 1.6%.

#### *Population decline*

The Northern SD was the only SD in South Australia to experience an overall population decline in 2003–04, decreasing by 510 people. The populations of all four SSDs in the Northern SD declined: Flinders Ranges SSD decreased by 190 people (or 0.9%), Pirie SSD decreased by 150 people (or 0.6%), Far North SSD decreased by 130 people (or 1.1%) and Whyalla SSD decreased by 50 people (or 0.2%).

For LGAs outside the Adelaide and Outer Adelaide SDs, the largest declines were recorded in Roxby Downs (M) (down 110 people), Mount Remarkable (DC) (down 70 people), and Flinders Ranges (DC) (down 60 people). Flinders Ranges (DC) and Roxby Downs (M) also recorded the fastest declines in South Australia, of 3.3% and 2.9% respectively.

## POPULATION CHANGE WESTERN AUSTRALIA

---

### STATE SUMMARY

The estimated resident population of Western Australia at June 2004 was 1.98 million, an increase of 32,300 people since June 2003. Western Australia's growth rate of 1.7% for 2003–04 was the second fastest in the country, after Queensland.

### PERTH STATISTICAL DIVISION

Perth Statistical Division (SD) continued to experience strong growth, increasing by 1.8% (26,100 people) during 2003–04 to reach a population of 1.5 million people. Perth SD now accounts for 74% of the total Western Australian population.

LGAs located on the fringes of the Perth SD continue to show the strongest growth. To the north, the population of Wanneroo (C) increased by 6,700 people (or 7.2%) during 2003–04, the largest increase in population of any LGA in the state, to reach over 100,000 people for the first time (100,400 people at June 2004). The LGA of Swan (C) increased by 2,200 people (2.5%) while Gosnells (C) in the south east of the Perth SD grew by 2,800 people (3.2%).

Rockingham (C) and Cockburn (C), coastal LGAs located in the southern part of the Perth SD, grew by 3,200 people (4.1%) and 2,400 people (3.3%) respectively during 2003–04.

In percentage terms, Perth (C) outstripped growth in all other LGAs in WA, and in Australia overall. An increase of 1,100 people resulted in a growth rate of 12.1% for 2003–04, taking the city of Perth's population to 10,500 people at June 2004. Growth in Perth (C) is associated with the move toward inner-city living and medium and high-density housing development.

### GROWTH IN OTHER REGIONS

#### *South West SD*

Approximately two-thirds of the LGAs in the South West SD experienced population growth during 2003–04. Mandurah (C), at the north of the South West SD and bordering the Perth SD, recorded the second largest increase in population of LGAs in WA, up 4,300 people (or 7.9%).

The population of Capel (S), adjacent to Bunbury (C), increased by 11.6% (930 people) during 2003–04, the second highest rate of growth of LGAs in WA and in Australia overall. Busselton (S), also located in the South West SD, increased by 1,000 people (3.8%) in the same period.

#### *Other regions*

The populations of each of the four LGAs in the Kimberley SD continued to increase in 2003–04, with Broome (S) increasing 370 people to an estimated resident population of 14,300 at June 2004.

The LGA of Ashburton (S) in the Pilbara SD, after losing population in each year between 1996 and 2003, increased by 210 people (or 3.7%) in 2003–04.

## POPULATION CHANGE WESTERN AUSTRALIA *continued*

### LGAs WITH LARGEST AND FASTEST POPULATION GROWTH, Western Australia

LGA	ERP	POPULATION CHANGE		LGA	ERP	POPULATION CHANGE	
	2004p	2003-2004p			2004p	2003-2004p	
	no.	no.	%		no.	no.	%
LARGEST GROWTH				FASTEST GROWTH (a)

(a) Excludes LGAs with a population of less than 2,000 at June 2003.

### DECREASING POPULATIONS

LGAs that experienced declines in population in 2003–04 were predominantly located outside the Perth SD. In the Pilbara SD, Port Hedland (T) experienced the largest decline in population of LGAs in WA, losing 490 people (down 3.8%).

Most LGAs in the Upper Great Southern SD experienced decreases in population in the year to June 2004. Overall this region experienced a loss of 470 people (2.6%) in 2003–04. The population of Narrogin (T) decreased by 180 people (3.9%), while declines of around 40 to 50 people occurred in the small population wheat belt LGAs of Dumbleyung, Wickelpin and Williams.

In the Central SD, Geraldton (C) and Carnarvon (S) lost 410 people and 270 people respectively.

### LGAs WITH LARGEST AND FASTEST POPULATION DECLINE, Western Australia

(a) Excludes LGAs with a population of less than 2,000 at June 2003.

## POPULATION CHANGE TASMANIA

### POPULATION GROWTH SUSTAINED

The estimated resident population of Tasmania increased by 1.0% in 2003–04, marginally higher than the growth rate of 0.9% recorded in 2002–03, and more than double the average growth rate of 0.4% per year for the period 1999 to 2004. At June 2004 the population of Tasmania was 482,100, an increase of 4,800 people since June 2003.

### POPULATION INCREASES IN TASMANIA'S STATISTICAL DIVISIONS

In 2003–04 the population of all Statistical Divisions (SD) in Tasmania increased. The capital city SD of Greater Hobart passed the 200,000 mark for the first time, increasing by 2,200 people (or 1.1%) to reach 202,100 people, while the population of the Northern SD increased by 1,500 people (also 1.1%). Mersey-Lyell SD experienced growth of 700 people (or 0.7%) while the Southern SD increased by 420 people (1.2%).

### LARGEST AND FASTEST GROWTH

Launceston (C), the central population base in the north of the state, and the largest LGA, experienced the largest increase in population of all LGAs in Tasmania in 2003–04. This LGA increased by 670 people, or 1.1%, compared with an average annual growth rate of 0.4% over the past five years. The second largest increase in population occurred in Kingborough (M), a fringe urban area south of Hobart, which gained 630 people (an increase of 2.1%).

The LGA of Brighton (M) recorded the highest rate of growth in Tasmania in 2003–04, up 2.8% (370 people), followed by Glamorgan/Spring Bay (M) (up 2.7%, or 110 people), and Kentish (up 2.6%, or 140 people).

### POPULATION GAIN IN ALL CITIES

All Tasmanian cities experienced population increases in 2003–04, as in 2002–03. Launceston (C) experienced the largest increase (up 670 people), followed by Hobart (C) (up 460 people), Clarence (C) (up 400), Devonport (C) (up 360), and Glenorchy (C) (up 300). For the second consecutive year the population of Burnie (C) increased (up 100 people in 2003–04), after experiencing population losses in each year from 1997 to 2002.

### LGAs WITH LARGEST AND FASTEST POPULATION GROWTH, Tasmania

## POPULATION CHANGE TASMANIA *continued*

### DECREASES IN POPULATION

Only five out of 29 LGAs in Tasmania lost population in 2003–04, with the largest loss occurring in the north-eastern LGA of Dorset (M), which decreased by 120 people. The population of West Coast (M) decreased by 100 people, making it the second largest decrease in the state.

Of LGAs with a population of greater than 2,000 at June 2003, Central Highlands (M) experienced the fastest decrease in population, down 2.2% during the year to June 2004. In five years since 1999 the LGA of West Coast (M) experienced the highest average rate of decline, decreasing by 2.0% per year.

### LGAs WITH LARGEST AND FASTEST POPULATION DECLINE, Tasmania

Derwent Valley (M)	9 400	-30	-0.3				

(a) Excludes LGAs with a population of less than 2,000 at June 2003.

## POPULATION CHANGE NORTHERN TERRITORY

### INCREASE IN NORTHERN TERRITORY POPULATION

The estimated resident population of the Northern Territory at June 2004 was 199,900, an increase of 1,400 people (or 0.7%) since June 2003, after a slight decrease (of 0.1%) in 2002-03.

### DARWIN SD

Around 55% (109,500 people) of the Northern Territory's population resided in the Darwin SD at June 2004. Darwin SD's growth rate of 1.3% (1,400 people) for 2003-04 was slightly less than the average annual growth rate recorded over the five years to June 2004 (of 1.2%).

The population of Darwin City SSD increased by 760 people in 2003-04, to 69,400 people at June 2004. Further residential development contributed to population growth in the SLAs of Stuart Park (up 470 people or 11.8%), Tiwi (up 220 people or 8.5%) and City - Inner (up 40 people or 1.8%). Minor population losses were recorded in older and more established SLAs such as Rapid Creek, Nightcliff and Fannie Bay (each down 20 people).

The SSDs of Palmerston-East Arm and Litchfield Shire both experienced continued population growth during 2003-04. Palmerston-East Arm gained 370 people (or 1.6%) with the largest increases occurring in the SLAs of Palmerston (C) Bal (up 190 people or 5.5%) and Bakewell (up 170 people or 4.9%). The population of Litchfield Shire increased by 310 people (or 1.9%), with almost all population growth taking place within the SLA of Litchfield (S) - Pt B (up 290 people or 2.0%).

### NORTHERN TERRITORY - BAL SD

The population of the Balance of the Northern Territory decreased by 70 people (down 0.1%) during 2003-04. This overall decline in population was mainly due to population decreases in Alice Springs (T) (down 200 people) and Katherine (T) (down 190 people). Small population increases were recorded in the SLAs of East Arnhem - Bal (up 90 people), Western Arnhem and Petermann (each up 40 people), and Sandover (up 30 people).

# POPULATION CHANGE AUSTRALIAN CAPITAL TERRITORY

## ACT SUMMARY

The estimated resident population of the Australian Capital Territory (ACT) increased by 660 people during 2003–04, to 324,000 people. The annual growth rate of 0.2% was the lowest of the states and territories, and below the ACT's average annual growth of 0.7% for the five years to June 2004.

Gungahlin-Hall SSD continued as the ACT's main region of growth, with an increase of 2,000 people (or 7.4%) in the year to June 2004. Increases in population were also recorded in North Canberra (up 620 people) and South Canberra (up 100 people).

Decreases in population were recorded in the remaining SSDs of the ACT.

Belconnen SSD decreased by 630 people, Tuggeranong SSD by 610 people, Woden SSD by 460 people and Weston Creek-Stromlo SSD by 430 people.

## POPULATION GROWTH

### SLA growth in the ACT

In 2003–04 population growth continued in areas on the suburban fringes of Canberra as well as in a number of inner city SLAs.

On the northern edge of Canberra, the population of Gungahlin-Hall - SSD Bal, which includes Gungahlin Town Centre, increased by 1,300 people during 2003–04, while the nearby SLAs of Amaroo and Nicholls increased by 630 and 220 people respectively.

Dunlop, on the north-western edge of the Belconnen SSD, increased by 730 people, and Banks, the southern-most suburb of Canberra, increased by 420 people.

In Canberra's inner north the populations of Turner and Braddon increased by 550 and 230 people respectively, while in South Canberra, Barton increased by 220 people.

### Growth in the surrounding region

Population growth in NSW LGAs adjacent to the ACT continued in 2003–04, in part due to their proximity to the city of Canberra. The population of Greater Queanbeyan (C) increased by 450 people, Yass Valley (A) increased by 200 people, and the LGA of Eastern Capital City Regional (A) increased by 140 people.

## SLA DECREASES

More than half of the SLAs in the ACT experienced decreases in population in 2003–04. The population of the ACT's largest SLA, Kambah, is estimated to have decreased by 290 people, while smaller decreases were recorded for Wanniasa (down 240 people), Evatt and Kaleen (each down 140 people), and Curtin (down 130).

## SLAs WITH LARGEST POPULATION GROWTH AND DECLINE, Australian Capital Territory

SLA	ERP	POPULATION CHANGE		SLA	ERP	POPULATION CHANGE	
	2004p	2003-2004p	%		2004p	2003-2004p	%
	no.	no.	%		no.	no.	%
LARGEST GROWTH				LARGEST DECLINE			
Gungahlin-Hall - SSD				Kambah	16 200	-290	-1.7
Bal(a)	2 000	1 300	191.6	Wanniasa	8 300	-240	-2.8
Dunlop	4 900	730	17.6	Evatt	5 700	-140	-2.4
Amaroo	5 400	630	13.1	Kaleen	8 000	-140	-1.8
Turner	3 100	550	21.7	Curtin	5 200	-130	-2.4
Banks	4 300	420	11.1				

(a) The very high proportional increase for Gungahlin-Hall - SSD Bal in 2003–04 (of 191.6%) is due to the small June 2003 population (of 680 people) used as the denominator in calculating this increase.

np not available for publication but included in totals where applicable, unless otherwise indicated

(a) The ABS has been unable to estimate population change for June 2002 onwards for a number of new Aboriginal Council and Island Council areas introduced in the 2002 edition of the Australian Standard Geographical Classification. Population estimates for these areas for 30 June 2003 and 2004 are denoted 'np', while the latest available estimates, 30 June 2002, are published in the 2002–03 issue of this publication. For more information see paragraphs 16 to 25 of the Explanatory Notes and Appendices 1 and 4.

(b) Average annual growth rate.

np not available for publication but included in totals where applicable, unless otherwise indicated

(a) The ABS has been unable to estimate population change for June 2001 onwards for a number of new Community Government Councils introduced in the 2003 edition of the Australian Standard Geographical Classification. Population estimates for these areas for 30 June 2003 and 2004 are denoted 'np', while the latest available estimates, 30 June 2001, are published in the 2002–03 issue of this publication. For more information see paragraphs 16 to 25 of the Explanatory Notes and Appendices 2 and 5.

(b) Average annual growth rate.

(a) The ABS has been unable to estimate population change for June 2002 onwards for a number of new Aboriginal Council and Island Council areas introduced in the 2002 edition of the Australian Standard Geographical Classification. Population estimates for these areas for 30 June 2003 and 2004 are denoted 'np', while the latest available estimates, 30 June 2002, are published in the 2002–03 issue of this publication. For more information see paragraphs 16 to 25 of the Explanatory Notes and Appendices 1 and 4.

(b) Average annual growth rate.

(a) The ABS has been unable to estimate population change for June 2002 onwards for a number of new Aboriginal Council and Island Council areas introduced in the 2002 edition of the Australian Standard Geographical Classification. Population estimates for these areas for 30 June 2003 and 2004 are denoted 'np', while the latest available estimates, 30 June 2002, are published in the 2002–03 issue of this publication. For more information see paragraphs 16 to 25 of the Explanatory Notes and Appendices 1 and 4.

(b) Average annual growth rate.

np not available for publication but included in totals where applicable, unless otherwise indicated

(a) The ABS has been unable to estimate population change for June 2002 onwards for a number of new Aboriginal Council and Island Council areas introduced in the 2002 edition of the Australian Standard Geographical Classification. Population estimates for these areas for 30 June 2003 and 2004 are denoted 'np', while the latest available estimates, 30 June 2002, are published in the 2002–03 issue of this publication. For more information see paragraphs 16 to 25 of the Explanatory Notes and Appendices 1 and 4.

## EXPLANATORY NOTES

### INTRODUCTION

**1** For Australia, this publication contains estimates of the resident population of SLAs, LGAs, SSDs, SDs, Statistical Districts, states and territories, and Australia. For New Zealand, estimates of the resident population are provided for Regional Councils, Territorial Authorities and New Zealand.

**2** To meet the conflicting demands for accuracy and timeliness there are three estimates of sub-state/territory populations. Preliminary estimates are normally available eight months after the reference date (i.e. February), revised estimates a year later and final estimates after the following census. The Australian estimates in this publication are final for 1999, based on results of the 2001 Census of Population and Housing. Estimates for 2003 have been revised, while estimates for 2004 are preliminary, based upon the final 2001 estimates.

### ESTIMATED RESIDENT POPULATION — AUSTRALIA

**3** Estimated resident population (ERP) are official estimates of the Australian population, which links people to a place of usual residence within Australia. Usual residence is that place where each person has lived or intends to live for six months or more from the reference date for data collection.

**4** Estimates of the resident population are based on census counts by place of usual residence (excluding overseas visitors in Australia), with an allowance for net census undercount, to which are added the number of Australian residents estimated to have been temporarily overseas at the time of the census.

**5** Population estimates are updated by adding to the estimated population at the beginning of each period the components of natural increase (on a usual residence basis) and net overseas migration. For the states and territories, account is also taken of estimated interstate movements involving a change of usual residence.

**6** After each census, estimates for the preceding intercensal period are revised by incorporating an additional adjustment (intercensal discrepancy) to ensure that the total intercensal change agrees with the difference between the ERPs at the two respective census dates.

#### *Estimation of sub-state/territory populations*

**7** In census years the ERP as at 30 June for each SLA is calculated based on usual residence census counts, excluding overseas visitors in Australia, with an allowance for net census undercount and the number of residents temporarily overseas at the census date. As the census is held at a date other than 30 June (the 2001 census was held on 7 August), further adjustments taking into account births, deaths and migration for the intervening period are made to obtain the ERP at 30 June. The population estimates for LGAs and other regions are built up from the SLA estimates.

**8** For post-censal years, the absence of migration data at the SLA level means that it is not possible to estimate SLA populations by taking into account natural increase and net migration. Instead, ERPs are calculated using a mathematical model. Local knowledge, including that advised by local governments, may be used to adjust the outcome of the model for a particular SLA.

**9** In the mathematical model a relationship is established between changes in population and changes in other indicators between the two most recent censuses. The choice of indicators varies across the states and territories, depending on availability and indicative ability, and includes dwelling approvals, electricity connections, Medicare enrolments and drivers' licences. The choice of indicators also varies within states/territories, depending on aspects such as whether the SLA is urban or rural, is growing or declining, and has a high or low proportion of medium and high density dwellings. Changes in these indicators are then used to estimate changes in the population of each area since the last census.

## EXPLANATORY NOTES *continued*

*Accuracy of sub-state/territory population estimates*

**10** In census years, both preliminary estimates (derived from updating the ERPs from the previous census) and final estimates (based on the current census) are prepared. Differences between these two sets of estimates are referred to as intercensal errors. An indication of the accuracy of ERPs can be gauged by assessing the size and direction of the intercensal errors. For Australia, the preliminary June 2001 ERP under-estimated the final June 2001 ERP by 0.1% (–26,600 persons). For the states/territories, the 2001 intercensal errors ranged from –1.6% (Australian Capital Territory) to +0.5% (Victoria).

**11** Summary statistics of the absolute values of these errors can be used to assess a number of population estimates. The average absolute value of the intercensal errors for the 2001 series of SLA estimates (excluding regions with an ERP less than 500) was 3.8%, a decrease on the 1996 average of 4.6%. For LGAs, the 2001 average absolute intercensal error (excluding regions with an ERP less than 500) was 3.6%, an increase on the 1996 average of 3.4%.

**12** Average absolute intercensal errors for the 2001 series of LGA estimates decreased with increasing population size; that is, LGAs with large populations recorded the smallest percentage errors while small LGAs recorded the largest percentage errors.

### AVERAGE ABSOLUTE INTERCENSAL ERROR, Australia—30 June 2001

<i>Size of LGA (people)</i>	<i>Number of LGAs</i>	<i>Average absolute intercensal error</i>
	<i>no.</i>	<i>%</i>
Under 500	21	10.5
500 to 1,999	93	7.7
2,000 to 4,999	109	4.4
5,000 to 9,999	91	3.8
10,000 to 19,999	94	2.7
20,000 to 49,999	100	2.0
50,000 and over	116	1.5

**13** In recognition of the inherent inaccuracy involved in population estimation, in general population figures less than 1,000 in the text and accompanying summary tables are rounded to the nearest ten, figures over 1,000 are rounded to the nearest hundred, and figures over 1 million are rounded to the nearest 100,000. While unrounded figures are provided in the main tables, accuracy to the last digit is not claimed and should not be assumed. Percentage change in population is based on unrounded numbers.

*Interpretation of LGA rankings*

**14** In Tables 1 to 7 LGAs are ranked within states and territories according to both 'largest' and 'fastest' growth, identifying areas in Australia currently experiencing significant changes in population size. Largest growth is based on the absolute change in population between June 2003 and June 2004, while fastest growth is based on the rate of change in population (that is, the percentage change in population) for the same period. LGAs with populations of less than 2,000 people at June 2003 have been excluded from the fastest growth rankings.

**15** Due to the inherent imprecision of small-area population estimates, rankings should be considered indicative of relative growth between LGAs within each state and territory, not definitive.

## EXPLANATORY NOTES *continued*

*Estimating ERPs for Northern Territory Community Government Councils and Queensland Aboriginal and Island Councils*

**16** The *Australian Standard Geographical Classification (ASGC), 2003* (cat. no. 1216.0) introduced 29 new LGAs and corresponding SLAs in Northern Territory. These geographic areas are based on Community Government Councils (CGCs) which are representative Indigenous bodies. Previously, the population of these areas were included within the former SLA (and LGA or unincorporated Northern Territory) boundaries defined in earlier versions of ASGC (see Appendices 2 and 5). Similarly in Queensland, new LGAs and corresponding SLAs were introduced in 2002 for Aboriginal Council (AC) and Island Council (IC) areas (see Appendices 1 and 4).

**17** The 30 June 2001 ERPs for these areas are based on 2001 Census of Population and Housing usual residence census counts as at 7 August 2001, adjusted for net undercount (including demographic adjustments), residents temporarily overseas and backdated to 30 June based on estimates of natural increase and net migration. Population estimates for these areas which do not correspond to ASGC 2001-based SLAs are compiled by apportioning the 30 June 2001 ERP of the former SLA(s) to 2001 census based Collection Districts (CDs) within each SLA using 2001 census usual residence counts at the CD level. CDs, or aggregations of CDs which directly correspond to the SLAs are then used to aggregate apportioned CD level population estimates to derive an estimated population of each of the ASGC 2003-based SLAs. In some cases where SLA boundaries do not correspond directly to 2001 census CD boundaries, estimates are made as to the share of population to be allocated from the CD to each relevant SLA.

**18** The SLA to CD level apportionment method for estimating census-year populations has some limitations. Estimates of net undercount are apportioned to SLAs based on age, sex, Indigenous status, state and territory, and (for the six states) capital city/balance of state. However, the SLA to CD level apportionment assumes that net undercount is distributed to component CDs in proportion to the census usual residence counts. It is quite possible that there may be local clustering and regional differences in net undercount which cannot be practically or efficiently measured. SLA level estimates of the number of residents temporarily overseas on census night are based on coding addresses of residence to SLA from a sample of incoming passenger cards. The apportionment process assumes these are distributed to CDs in proportion to the census usual counts. Data are not available retrospectively for the newly defined SLAs and LGAs for births and deaths between the 30 June and the census date. Similarly, no data are available on net migration for the new SLAs. Accordingly, the population estimates for new SLAs based on CD level apportionment are reasonable approximations in the absence of finer level components.

**19** For the Queensland AC and IC areas, additional administrative and local knowledge was used to estimate for population change from 30 June 2001 to 30 June 2002 in the 2001–02 issue of this publication.

**20** Unlike most SLAs and LGAs in Australia, the ABS has not been able to estimate population change for the new CGC LGAs and SLAs in the Northern Territory for June 2002 onwards, and the AC and IC LGAs and SLAs in Queensland for June 2003 onwards. At the present time the ABS has not been able to identify any data sources that can yield reliable and comprehensive information on annual population change for these small communities. For Queensland ACs and ICs a significant change occurred in a previously used data source limiting its suitability for estimating population change for these SLAs during 2002–03. Further, the small size and remoteness of some of these areas means that postcode address-based data sets are of limited use. The nature of postal delivery areas and the use of post box-based addresses which may not be a clear indication of place of residence also limits the utility of these data to estimate population change for these areas.

## EXPLANATORY NOTES *continued*

*Estimating ERPs for Northern Territory Community Government Councils and Queensland Aboriginal and Island Councils continued*

**21** Where ABS has not been able to estimate annual population change, estimates in this publication have been represented as "np". In the accompanying electronic releases, the most recently published estimates (June 2002 for Queensland ACs and ICs, and June 2001 for NT CGCs) have been held constant to June 2004 to ensure individual estimates sum to totals. Although these estimates indicate no change in population over this period, it should not be assumed that this is the case.

**22** Small populations are relatively more sensitive to small population changes which may not be detectable or quantifiable. However, larger populations contain much of this variability within the larger population.

**23** For the time being, and in the absence of other reliable data sources, the ABS may only be able to produce population estimates for these SLAs and LGAs in census years using data from the five-yearly Census of Population and Housing. The ABS will continue to monitor the availability of other data sources for population change estimation in consultation with state, territory and local governments. For example, the inclusion of these areas in the ASGC will mean that in future, other data such as births and deaths by place of usual residence can be coded to these new geographic levels for future use in small area population estimation.

**24** Population estimates for these SLAs and LGAs for periods between 1996 and 2001 have been prepared using interpolation techniques between 1996 and 2001 census year-based estimates.

**25** A more detailed explanation of the concept of ERP, as adopted by the ABS for official population estimates, is contained in *Demographic Estimates and Projections: Concepts, Sources and Methods, Statistical Concepts Library*, ABS web site <[www.abs.gov.au](http://www.abs.gov.au)>.

### SERVICE POPULATIONS

**26** Service population estimates are a different measure of population. They take into account seasonal itinerant populations which are not included in the ERP. Currently the ABS does not produce service population estimates but two working papers are available which investigate the concept and feasibility of such estimates. The working papers are available on the ABS web site <[www.abs.gov.au](http://www.abs.gov.au)> by selecting Themes, then Demography, then ABS Demography Working Papers (numbers 96/4 and 99/3).

### CORRECTION OF PRISON DATA OF QUEENSLAND

**27** For the 2001 Census of Population and Housing, most prison data was received for processing via electronic data files. During the post-processing evaluation cycle, it has been established that the male and female counts for Queensland prisons (only) were incorrectly captured. This has resulted in the publication of incorrect sex census counts for males and females for various Queensland geographical areas and as a consequence, the Australian population totals. For population estimates, revisions to Queensland have been applied over the financial year 2001–02. Revised estimates for 30 June 2002 by age and sex and SLA/LGA are currently available. Revision to population estimates for the 1996–2001 intercensal period are not planned. However, information on the SLAs and LGAs and other geographic areas affected are available in the 2001 Census Working Paper—*Fact Sheet: Correction of Prison Data of Queensland* on the ABS web site <[www.abs.gov.au](http://www.abs.gov.au)>.

### ESTIMATED RESIDENT POPULATION — NEW ZEALAND

**28** The estimated resident population of New Zealand, and any area of New Zealand, at 30 June in the year of the latest census is based on the latest census usually resident population counts updated for net census undercount, the number of residents temporarily overseas on census night, births, deaths and net migration between census night and 30 June, and reconciliation with demographic estimates at ages 0–9 years.

**29** Subsequent national population estimates are produced by updating previous estimates using births, deaths and external migration data for the current quarter.

## EXPLANATORY NOTES *continued*

### Subnational population estimates

**30** Subnational population estimates are produced annually, as at 30 June. The estimation of subnational resident population uses the same component method as is used for estimates of the total national population, but with the addition of an extra component — internal migration between the subnational areas of New Zealand.

**31** As no data on current internal migration is available, internal migration is estimated indirectly, using 'symptomatic' data, including building consents, occupancy rates, full-time equivalent employment, numbers of people in institutions (e.g. prisons), armed forces data, and past internal migration (from the most recent intercensal period). This information is supplemented by information from Territorial Authorities and universities. More details are available on request from Manager, Demography Division, Private Bag 4741, Christchurch, New Zealand.

### AUSTRALIAN STATISTICAL AREAS

**32** This publication contains data presented according to the Australian Standard Geographical Classification (ASGC) 2004 Edition, which refers to boundaries as defined at 1 July 2004. Under this classification, statistical areas are defined as follows:

- *Local Government Areas* (LGAs). These areas are the spatial units which represent the geographical areas of incorporated local government councils, an Aboriginal or Island Council in Queensland, or a Community Government Councils in the Northern Territory. The various types of LGAs are Aboriginal Councils (AC), Areas (A), Boroughs (B), Cities (C), Community Government Councils (CGCs), District Councils (DC), Island Councils (IC), Municipalities (M), Regional Councils (RegC), Rural Cities (RC), Shires (S), and Towns (T).
- *Statistical Local Areas* (SLAs). These geographical areas are, in most cases, identical with, or have been formed from a division of, whole LGAs. In other cases they represent unincorporated areas. In aggregate, SLAs cover the whole of a state or territory without gaps or overlaps. In some cases legal LGAs overlap Statistical Subdivision boundaries and therefore comprise two or three SLAs (Part A, Part B and, if necessary, Part C).
- *Statistical Subdivisions* (SSDs). These are of intermediate size, between SLAs and SDs. In aggregate, they cover the whole of Australia without gaps or overlaps. They are defined as socially and economically homogeneous regions characterised by identifiable links between the inhabitants. In the non-urban areas an SSD is characterised by identifiable links between the economic units within the region, under the unifying influence of one or more major towns or cities.
- *Statistical Divisions* (SDs). These consist of one or more SSDs. The divisions are designed to be relatively homogeneous regions characterised by identifiable social and economic units within the region, under the unifying influence of one or more major towns or cities.
- *Statistical Districts*. These consist of selected, significant, predominantly urban areas in Australia which are not located within a Capital City SD. Statistical Districts enable comparable statistics to be produced about these selected urban areas.

**33** LGAs are proclaimed by various state and territory government authorities and changes are gazetted throughout the year. Presently, LGAs are used as the base on which SLAs are defined for the ASGC. Because this definition process takes time, some LGAs gazetted during the year leading up to an ASGC edition are not always processed in time for inclusion in that edition, and are instead included in a later edition.

**34** Further information concerning statistical areas is contained in *Australian Standard Geographical Classification, 2004* (cat. no. 1216.0).

### MAPS

**35** A complete series of maps showing the SLAs mentioned in this publication is available in *Australian Standard Geographical Classification, 2004* (cat. no. 1216.0).

## EXPLANATORY NOTES *continued*

### MAPS *continued*

**36** The centre of population is one measure used to describe the spatial distribution of a population. The method of calculation used in this publication for the map on page 10 is based on the 'centroid' (i.e. centre) and population of each SLA in Australia. Latitude and longitude coordinates of the centroid of each SLA are multiplied by the SLA's estimated resident population to obtain weighted latitudes and longitudes. These are summed to obtain a weighted latitude and longitude coordinate for all Australia, then divided by the total population of Australia to obtain a single latitude and longitude coordinate, the centre of population.

**37** Due to the inherent imprecision in small-area estimates, and the choice of SLA-level estimates in the above calculation (rather than estimates at a different geographical level, for example, the Census Collection District or Local Government Area level), the centre of population should be considered indicative only of the distribution of population, and cannot be ascribed to an exact location. Use of different geographical level data would result in a slightly different centre of population.

### AVERAGE ANNUAL RATE OF GROWTH

**38** The average annual growth rate is calculated as a percentage using the formula below, where  $P_0$  is the population at the start of the period,  $P_n$  is the population at the end of the period and  $n$  is the length of the period between  $P_n$  and  $P_0$  in years.

$$\left[ \left( \frac{P_n}{P_0} \right)^{\frac{1}{n}} - 1 \right] \times 100$$

### CALCULATION OF AREAS

**39** The area figures quoted in this issue are based upon the SLA level of the *Australian Standard Geographical Classification, 2004* (cat. no. 1216.0). The areas of the SLAs were calculated using ABS standard Geographic Information Systems software from the digital boundaries of the ASGC 2004. Higher level spatial unit area figures are subtotals of the SLA areas.

### ELECTRONIC DATA

**40** Annual population estimates at 30 June for all SLAs in Australia are available electronically. This information can be customised to provide data for any choice of years and any combination of states and territories. Electronic copies of this publication (in .pdf format), plus current and earlier year estimates for all SLAs in Australia, are available from the ABS web site <[www.abs.gov.au](http://www.abs.gov.au)>. These and other downloadable products are available for purchase online using a credit card. They can be downloaded (with no credit card needed) by AusStats and ABS@ subscribers, Australian universities and at some public libraries. If you are not an AusStats subscriber inquiries can be made to Information Services (see the back cover of this publication for contact details). Inquiries for New Zealand data should be directed to Statistics New Zealand (email <[info@stats.govt.nz](mailto:info@stats.govt.nz)>).

### ACKNOWLEDGMENT

**41** ABS publications draw extensively on information provided freely by individuals, businesses, governments and other organisations. Their continued cooperation is very much appreciated; without it, the wide range of statistics published by the ABS would not be available. Information received by the ABS is treated in strict confidence as required by the Census and Statistics Act 1905.

### RELATED RELEASES

**42** Other ABS releases that may be of interest to users of this publication include:
