SUMMARY OF FINDINGS

ESTIMATED RESIDENT POPULATION

The estimated resident population of NSW at 30 June 1998 was 6,341,594, which represented an increase of 67,224 persons above the 1997 estimates. The average annual growth rate for NSW was 1.1%, compared with 1.2% for Australia.

Among the Statistical Divisions of NSW which experienced positive annual growth were Richmond–Tweed (1.5%), Sydney (1.3%), Mid-North Coast (1.3%), Hunter (1.0%), Illawarra (0.9%), Murray (0.5%), South Eastern (0.4%) and Central West (0.1%). Statistical Divisions of NSW which experienced negative annual growth were Far West (–1.2%), Northern (–0.7%), North Western (–0.2%) and Murrumbidgee (–0.03%). Many larger Statistical Local Areas (SLAs) with populations of 10,000 persons or more (74%) experienced positive annual growth, while many smaller SLAs with populations of less than 10,000 persons (78%) experienced negative annual growth.

The population of Sydney Statistical Division (SD) was 3,986,723 and represented 62.9% of the total population in the State. Between 1997 and 1998 the population of Sydney SD increased by 52,006 persons. The SLAs in Sydney SD which experienced the highest average annual growth were Sydney (25.5%), Camden (7.1%), Auburn (5.3%), Liverpool (5.0%), Hunter's Hill (2.5%), Wyong (2.4%), Baulkham Hills (2.4%), South Sydney (2.1%), Strathfield (2.0%), and Holroyd (2.0%). The SLAs which experienced net losses were Waverley (–1.1%) and Marrickville (–1.0%).

In Richmond–Tweed SD, the SLAs of Tweed and Byron showed a positive annual growth of 2.9% and 2.5% respectively. In Mid-North Coast SD, the SLAs of Maclean and Hastings showed a positive annual growth of 3.3% and 2.9% respectively. In Hunter SD, SLAs with the highest growth were Newcastle—Inner (3.8%), Port Stephens (2.4%) and Great Lakes (2.0%); and in Illawarra SD, the SLAs of Wingecarribee (1.7%) and Shellharbour (1.6%). In the Northern SD, SLAs with negative growth included most of the smaller SLAs and some of the larger SLAs such as Gunnedah (–1.8%), Inverell (–1.2%), Parry (–0.8%) and Armidale (–0.7%).

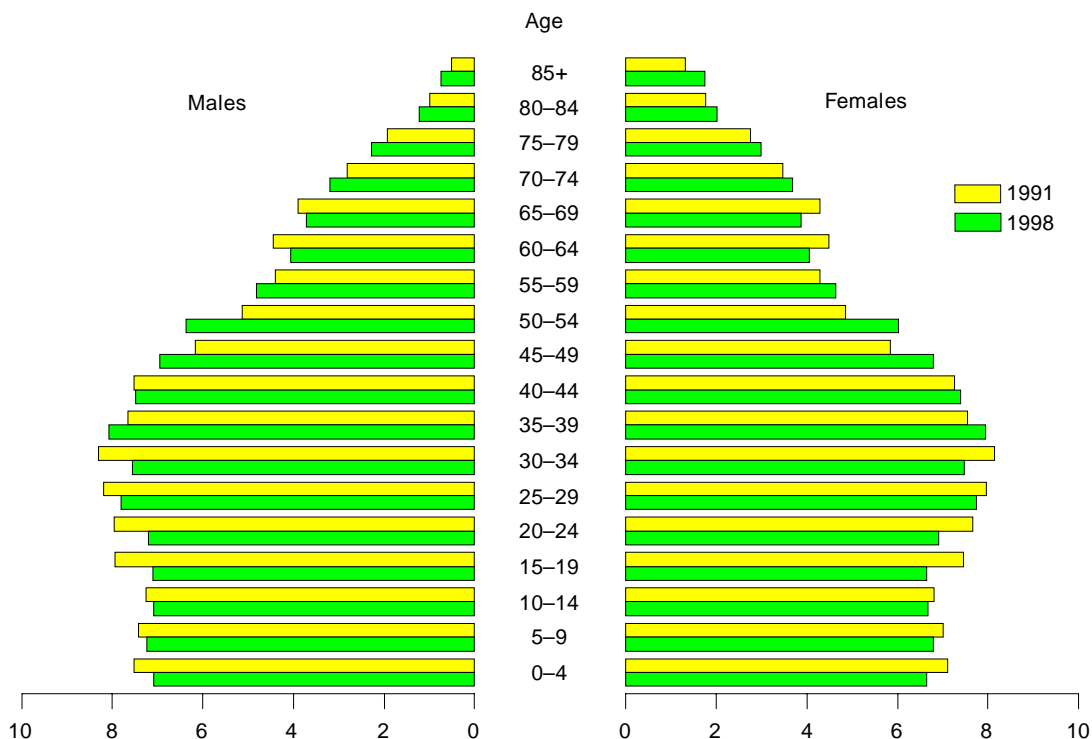

AGE DISTRIBUTION

The established trend of the ageing of the State's population continues. In 1998, older people (those aged 65 years or more) constituted 12.7% of the NSW population, compared to 11.9% in 1991.

While the proportion of older residents in NSW continues to increase, the proportion of younger people continues to decline. In 1998 the proportion of children aged under 15 years was 20.8% compared with 21.6% in 1991.

SUMMARY OF FINDINGS *continued*

PERCENTAGE OF POPULATION IN AGE GROUPS

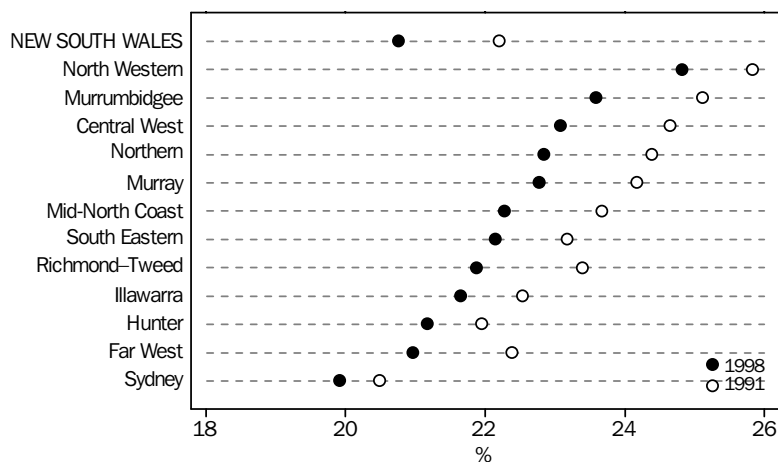

CHILDREN (UNDER 15 YEARS)

At 30 June 1998, there were 1,316,237 children representing 20.8% of the total population residing in NSW. Sydney SD maintained its position of having the lowest proportion of children (19.9%) of all the statistical divisions in NSW. The lowest proportion of children within Sydney SD were in the SLAs of Sydney—Remainder (7.4%), South Sydney (8.4%) and North Sydney (9.1%). Within Sydney SD the highest proportions of children were located in the outlying SLAs of Campbelltown (27.4%), Wollondilly (25.9%), Blacktown (25.4%), Camden (25.4%) and Penrith (25.3%).

Outside Sydney SD, North Western SD and Murrumbidgee SD continued to have the highest proportions of children (24.8%) and (23.6%) respectively, while among the statistical divisions which had the lowest proportion of children in their resident population were Far West SD (21.0%) and Hunter SD (21.2%).

SUMMARY OF FINDINGS *continued*

CHILDREN, Proportion of population in statistical divisions—at 30 June

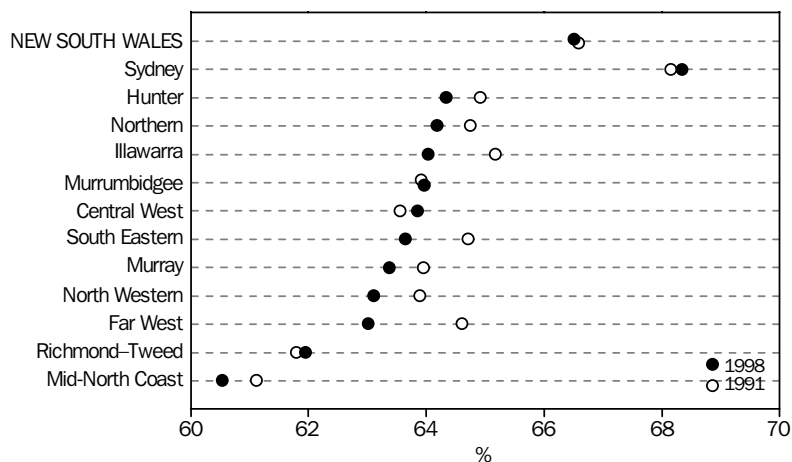

POPULATION AGED 15–64 YEARS

The resident population aged 15–64 years made up 66.5% of the population of NSW. Sydney SD had 68.3% of its population in this age group. The inner city had the highest proportion of this age group with the highest concentration being in the SLAs of Sydney—Remainder (87.1%), Sydney—Inner (82.4%), South Sydney (81.2%) and North Sydney (78.9%). The SLAs where the proportion of this age group was lowest were Wyong (59.5), Gosford (61.2) and Bankstown (64.7).

Outside the Sydney SD, the proportion of the population in this age group was lower in Mid-North Coast SD (60.5%) and Richmond-Tweed SD (62.0%) followed by Far West SD (63.0%) and North Western SD (63.1%). The SLAs where the proportion of the population in this age group was lowest were Great Lakes (56.5%), Tweed (57.8%), Eurobodalla (58.1%), Hasting (58.3%) and Shoalhaven (59.1%).

POPULATION AGED 15–64, Proportion of population in statistical divisions—at 30 June

SUMMARY OF FINDINGS *continued*

OLDER PEOPLE (65 YEARS OR MORE)

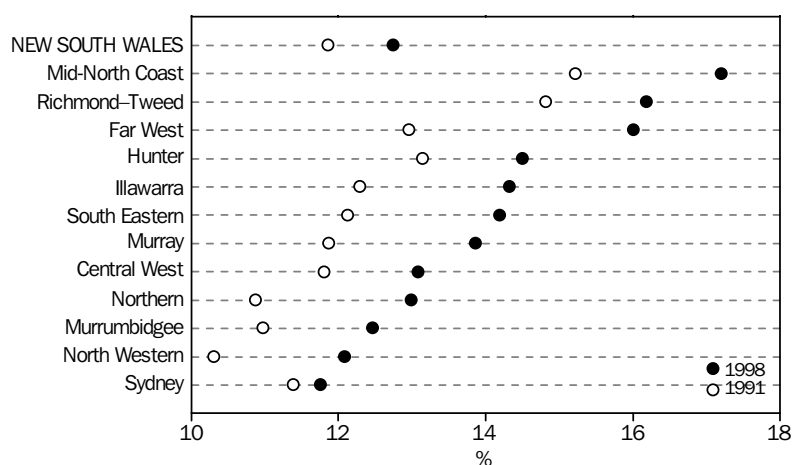

At 30 June 1998, there were an estimated 807,865 older residents in NSW (up from 797,025 in 1997) representing 12.7% of NSW population.

Older people represented 11.7% of the population of Sydney SD. The SLAs with the highest proportions of older people within Sydney SD were Wyong (18.0%), Hunter's Hill (17.3%), Gosford (17.1%), Rockdale (16.1%), Hurstville (16.0%), Kogarah (15.8%), Drummoyne (15.7%), and Manly (15.5%). The lowest proportions of older people were found in the SLAs of Campbelltown (5.5%), Penrith (6.4%), Liverpool (6.9%) and Blacktown (7.0%).

Outside Sydney SD, the proportion of older people was 14.0%, which was above the State figure. The statistical divisions with the highest proportions of older people were Mid-North Coast SD (17.2%), Richmond-Tweed SD (16.2%), Far West SD (16.0%) and Hunter SD (14.5%). The statistical divisions with the lowest proportions were North Western SD (12.1%) and Murrumbidgee SD (12.5%).

Of the State's older people, 349,242 (43.2%) were aged 75 years or more. This proportion has increased since 1991 when 39.0% were aged 75 years or more.

OLDER PEOPLE, Proportion of population in statistical divisions—at 30 June

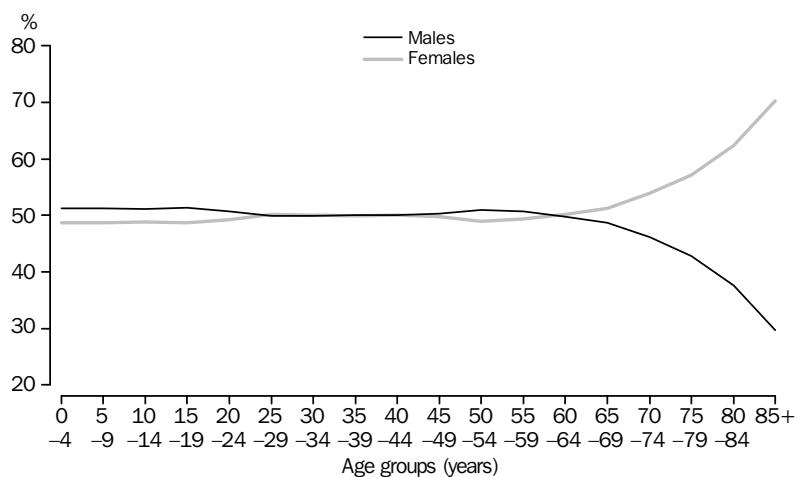

SUMMARY OF FINDINGS *continued*

SEX RATIO

Females continue to outnumber males in the older age groups. In 1998 the number of females aged 65 years or more was 456,231 and the number of males aged 65 years or more was 351,634. This represents a ratio of about 1.3 females for every male. This ratio becomes higher with more advanced age groups. In 1998 there were about 1.6 females aged 75 years or more for every male aged 75 years or more. Although high, this ratio has decreased in recent years from 1.7 in 1991.

EXPLANATORY NOTES

ESTIMATED RESIDENT POPULATION

- 1** The *Estimated Resident Population (ERP)* of an area (State, Statistical Local Area, etc.) is the estimate of the number of persons who usually reside in that area irrespective of where they were at the date of the estimate.
- 2** Intercensal estimates of resident population are based on the ERP at the date of the previous census (in this case, at the 1996 Census) and available measures of change in resident population since that date. As no direct measure of population movement at the statistical local area level is available, the indicators used may give an incomplete picture of such movement. Therefore it should be noted that all intercensal estimates will be subject to revision when final figures are available from the processing of the 2001 Census.
- 3** Detailed explanation of the concept of estimated resident population, as adopted by the Australian Bureau of Statistics (ABS) for official population estimates, is contained in the ABS Information Paper *Population Estimates: Concepts, Sources and Methods* (Cat. no. 3228.0).

METHOD

- 4** The figures contained in this publication are preliminary estimates and were obtained by a demographic cohort component method. The age and sex estimates at 30 June 1998 were produced as follows:
 - Census-based estimates by age and sex in SLAs at 30 June 1996 were used as the base for updating.
 - Estimates of total persons in each SLA at 30 June 1998 were made on the basis indicated in Note 2.
 - Age/sex migration profiles are used for each SLA. Using 1996 Census data on usual residence one year prior to the Census date, profiles were derived for:
 - ◆ *Inter-SLA arrivals*—persons residing in the SLA whose usual residence one year ago was in another SLA within Australia.
 - ◆ *Inter-SLA departures*—persons whose SLA of usual residence one year ago was that SLA but whose residence at the date of the Census was another SLA within Australia.
 - ◆ *SLA overseas arrivals*—persons in the SLA whose usual residence one year ago was overseas.
- 5** SLA overseas departures profiles are derived using an average for the last three years of overseas departures data by usual residence, obtained from passenger cards.
 - The total population growth for each SLA during 1997–98 was then split into natural increase and net migration components. Natural increase was derived for each SLA for 1997–98 from birth and death registration statistics. Net migration was derived for each SLA as the difference between total population growth and natural increase.
 - Using the migration profiles and the derived net migration component for an SLA, the age/sex distribution of the net migration component was compiled for that SLA. This distribution and data of deaths by age and sex, and births by sex in each SLA were then added to (or subtracted from) the corresponding age/sex cell estimate at 30 June 1997, which was derived from the Census-based estimates described above. The totals for each age/sex group were then forced to the State total for that age/sex group independently determined.

STATISTICAL AREAS OF NSW

6 This publication contains data presented according to the Australian Standard Geographical Classification (ASGC) and incorporating changes brought about by the (State) *Local Government Act 1993* to the titles of local government areas (LGAs). Under this classification, statistical areas are defined as follows:

- *Statistical Local Areas (SLAs)*. These geographical areas are, in almost all cases, identical with, or have been formed from a division of, whole local government areas (LGAs) as defined under the (State) *Local Government Act 1993* and comprising cities (C) and areas (A)—prior to this Act these areas were known as cities (C), municipalities (M) and shires (S). In other cases, they represent areas which are unincorporated under the Act. In aggregate, SLAs cover the whole of the State without gaps or overlaps. In some cases LGAs overlap statistical subdivision boundaries and therefore comprise two SLAs (Part A and Part B) or three SLAs in the case of Cabonne (A) (Part A, Part B and Part C). Separate estimates for these LGAs are shown in Table 2.
- *Statistical Subdivisions (SSDs)*. These consist of one or more SLAs and form the intermediate size spatial unit for the presentation of regional data.
- *Statistical Divisions (SDs)*. These consist of one or more SSDs. Where SSDs are not shown, SLAs are ordered alphabetically within SDs. The divisions are designed to be relatively homogeneous regions characterised by identifiable social and economic units within the region, under the unifying influence of one or more major towns or cities.

7 Further information concerning statistical areas is contained in the publication *Regional Statistics, New South Wales* (Cat. no. 1304.1) and in the publication *Australian Standard Geographical Classification* (Cat. no. 1216.0).

BOUNDARY CHANGES

8 A list of name changes, amalgamations and boundary changes of SLAs and other statistical areas of NSW, from 1 July 1997 to 30 June 1998, is contained in the Appendix.

ROUNDING

9 Estimates for each age and sex category are shown to the nearest unit without rounding; **accuracy to this level is not claimed and should not be assumed**. This procedure is consistent with 1987 to 1996 age and sex estimates, and is applied because rounding of small cells could result in substantial year to year fluctuations owing to the rounding process rather than an actual population change.

10 Population estimates in previous publications have been rounded as follows:

- All areas in Sydney SD have been rounded to the nearest 50 persons;
- For the remainder of NSW, the SLA and subdivision totals have been rounded to the nearest 10 persons;
- Statistical division totals have been rounded to the nearest 50 persons.
- The State total has been rounded to the nearest 100 persons.

FLOPPY DISK

11 The data contained in this publication are also available on floppy disk.

UNPUBLISHED STATISTICS

12 In some cases, the ABS can also make available information which is not published. This information may be made available in one or more of the following forms: floppy disk, microfiche, photocopy, computer printout, clerically-extracted tabulation. Generally, a charge is made for providing unpublished information. Inquiries should be made as shown in the inquiries section at the front of this publication.
